## Reporting Bases

Data on receipts, expenditures, and debt which appear In the "Treasury Bulletin" are based largely on two Treasury financial reports, the "Daily Statement of the United States Treasury" and the "Monthly Statement of Recelpts and Expenditures of the United States Government." Certain monetary statistics are based at least in part on the "Circulation Statement of United Statea Money." Where these statements are given as sources for individual tables, they are cited by name only. Their respective reporting bases are described below. For other data in the Bulletin, information on sources or reporting bases is given in connection with the tables themselver.

The monthly statement of receipts and expenditures was f1rst published for February 1954, and replaced the daily statement as the primary source of information on budget reoults and other receipt and expenditure data classified by type of account. At the same time, the dally statement was changed to a statement of cash deposits and withdrawals affecting the account of the Treasurer of the United States. Both publications have provided comparative figures on their respective bases from the beginning of the fiscal year 1953. The announcement of February 17 , 1954, with respect to these reporting changes may be found in the April 1954 1ssue of the Bulletin.

The monthly statement shows all reoelpts and expenditures of the Government, including those made from cash accounts held outside the United states Treasury. The information 18 complled from reports by the Treasurer of the United States and by all other collecting and disbursing agencies, including those agencies which maintain checking accounts in comercial banks. These reports cover transactions recorded in the accounts of the agencies during the reporting period. The net of the transaotions as complled from these reports is reconciled in the monthly statement to changes in the balance in the Treasurer's account and in cash held outside the Treasurer's account and changes in the public debt outstanding.

Recelpts of taxes and customs duties are reported on a collections basis. Other receipts are reported partially on a collections basis and partlally on a deposits basis. Expenditures, except interest on the public debt, are reported on the basis of checks $1 s$ sued or cash payments made by disbursing officers. Transactions of an interfund or intragovernmental nature are included on the same basis even though the actual issuance of checks may not be 1 nvolved. Interest on the public debt 18 included on an accrual basis beginning with figures for June 1955 and the fiscal year 1955. Prior to that, it was included on a due and payable basis. The same reportiny basis as that In the monthly statement providea the flscal year ilgures for the Treasury's "Combined Statement of Recelpts, Expend-

1tures and Balances of the Unlted States Government" and for actual receipts and expenditures in the "Budget of the United States Govarnment."

Beginning with the ilnal statement for the ilscal year 1960, the monthly statement reports totals for net budget receipts and budget axpenditures after deduction of certain interfund transactions which are included in the detall of both budget receipts and budget expenditures. The transactions deducted consist of interest payments and minor amounts of certain other payments made by Government agencies to the Treasury. This reporting change was made in accordance with the plan stated in the President's Budget Message of January 18,1960 . It does not affect the surplus or deficit. Figures for earlier periods shown in the Treasury Bulletin were revised to the new reporting basis in the September 1960 188ue. The interfund transactions deducted under this procedure do not include payments to the Treasury by wholly owned Government corporations for retirement of their capital stock and for disposition of earnings. These capital transfers have been excluded currently from budget recelpts and budget expenditures beginning July 1 , 1948, and 11gures for prior f1scal years back through 1932 were revised accordingly at that time.

The daily statement on the new basis was first lssued for February 17, 1954. In the deposits and withdrawals as shown, no distinction is made as to the type of accounts (budget, trust, etc.). The deposits are on the basis of certificates of deposit cleared through the account of the Treasurer of the United States. Total withdrawals are on the basis of checks paid or cash disbursements made out of the Treasurer's account. Some of the withdrawal class1fications shown are reported on the basis of malled reports of checks issued and are adjusted by means of clearing accounts to the total of checks paid. Except for relatively minor amounta, noncash interfund and other intragovernmental transactions are excluded. The public debt flgures in the dally statement also are on a "clearance" basis, with ths exception of those 188 uance and retirement transactions reported on the basis of telegrams from Federal Reserve Banks. Noncash debt transactions are included, however.

The dally statement before February 17, 1954, covered not only transactions cleared through the Treasurer's sccount but also certain Government agency tranaactions which were handled through conmercial bank accounts, and included noncash interfund and other intragovernmental transactions. It provided information similar to that in the present daily statement with respect to the status of the Treasurer's account, and similar to that in the present end-of-month daily statement with respect to debt issuance, retirement, and amount outstanding. Recelpts and expenditures, however, were classified by type of account, and the budget results shown

## Reporting Bases - (Continued)

In the daily gtatement were used as the basis for reflecting the results under the President's budget program as enacted hy the Congress.

Reoelpts were on the basis of deposits as they cleared the Treasurer's account. Expenditures cleared through the the Treasurer's account were reported on two succesaive bases. Through 1946 they were on the basis of checks paid by the Treasurer of the United States. Beginning with 2947, sxpenditures made through the facilities of the Treasury Department's Division of Disbursement were on the basis of checks lasued, while certain others, principally those of the Department of Defense and its predecessor organizations, were on the basis of checks pald. Transactions han-
dled through commercial bank accounts, consisting of maricet transactions in public debt and guaranteed securities, were as reported by the agencies. Interest on the public debt was included on a due and payable basis beginning with November 1949 and on a checks-paid basis prior to that time.

The circulation statement reflects transactions through the Treasurer's account which affect monetary stocks of gold and silver and the amounts of coin and currency in the money supply of the country. It is 1ssued later than the daily statoment, however, and the figures are based on transactions consummated during the reporting period even though some may not have cleared the Treasurer's account during that period.

## Treasury Financing Operations

One-Year Bills
An offering on February 25, 1964, of 362-day T'reasury bills for $\$ 1$ billion, or thereabouts, was announced by the Treasury on February 18. Tenders totaled $\$ 2,412$ million, of which $\$ 1,001$ million was accepted at the average bank discount rate of 3.765 percent. Noncompetitive tenders for $\$ 200,000$ or less (without stated price) from any one bidder were accepted in full at the average price of accepted competitive bids. These amounted to $\$ 19$ million.

The 362-day bills are dated March 3, 1964, and will mature February 28, 1965, when the face amount will be payable without interest. lssued in bearer form only, the bills are in denominations of $\$ 1,000, \$ 5,000, \$ 10,000, \$ 50,000, \$ 100,000$, $\$ 500,000$, and $\$ 1,000,000$ (maturity value).

Payment for accepted tenders in cash or other immediately a vailable funds was required to be completed on March 3, 1964. Payment by credit in Treasury tax and loan accounts was not permitted. Banking institutions generally could submit tenders for account of customers provided the names of the customers were set forth in such tenders. Others than banking institutions were not permitted to submit tenders except for their own account. Tenders were received without deposit from incorporated banks and trust companies and from responsible and recognized dealers in investment securities. Tenders from others were required to be accompanied by payment of 2 percent
of the face amount of Treasury bills applied for, unless tenders were accompanied by an express guaranty of payment by an incorporated benk or trust company.
13-Week and 26-Week Bills
New issues of regular weekly Treasury bills in February totaled $\$ 8.6$ billion, refunding an equivalent emount maturing. Of the 91-day bills, those issued February 6 and 13 were for $\$ 1.3$ billion each and those issued February 20 and 27 were for $\$ 1.2$ billion each. The four 182-day issues were for $\$ 0.9$ billion each. Average rates of discount are shown in the table following.

Source: Actual figures through the fiscal year 1952 and the calendar year 1953 are from the daily Treasury statement, and thereafter from the monthly statement of receipts and expenditures of the Government (for explanation of reporting bases, see page II); estimates are from the 1965 Budget document, released January 21, 1964, including effects of proposed legislation. More detail for data on this page will be found in succeeding tables.

1) Fiscal year figures beginning with the September 1960 issue of the Treasury Bulletin, and calendar year figures beginning with the June 1961 issue exclude certain interfund transactions from both net budget receipts and budget expenditures (see pages, 1I, 2, and 5). Figures previously published for these series have been revised to the new reporting basis. The change does not affect the budget surplus or deficit.

4 For current month detail and list of acts, see section on "Statutory Debt Limitation ${ }^{\prime \prime}$ in each issue of the Bulletin. The limitations in effect during the period covered by this table and the date when each became effective are as follows: \$275 billion on June 26, 1946; \$281 billion on August 28, 1954; \$278 billion on July 1, 1956; \$275 billion on July 1, 1957; \$280 billion on February 26, 1958; $\$ 288$ billion on September 2, 1958; \$290 billion on June 30, 1959; \$295 billion on July 1, 1959; 293 billion on July 1, 1960; \$298 billion on July 1, 1961; $\$ 300$ billion on March 13, 1962; $\$ 308$ billion on July 1, 1962; $\$ 305$ billion on April 1, 1963; $\$ 307$ billion on May 29, 1963; and $\$ 309$ billion on July 1, 1963. Under the act approved November 26, 1963, the limitation is $\$ 31$ billion from December 1, 1963, through June 29, 1964, and $\$ 309$ billion on June 30, 1964.

Source: Actual figures through 1961 are from reports to the Treasury Departmant by disbursing officers and administrativa agencies, on the monthly statemant reporting basis (see page II); and from the monthly statement of receipts and expenditures thereafter. Estimates ara
from the 1965 Budget document, raleased January 21, 1964, including effect of proposed legislation.
1/ Consists of miscellaneous taxes (principally the tonnage tax on foreign vessels entering U.S. ports), bullion charges, and gifts and contributions.

## Footnotes to Table 1 - (Cont Inued)

6) Includes adjustments as follows for: Income taxes not withheld September - $\$ 3$ million, and December - $\$ 5$ million; income taxes withheld, September $+\$ 8$ million, and December $-\$ 316$ million; transfers to Federal Old-Age and Survivors Insurance Trust Fund, September - $\$ 10$ million, and December $+\$ 300$ million; and transfers to Federal Disability insurance Trust Fund, September $+\$ 5$ million, and December $+\$ 21$ million. See also footnote 9 .
7. Interest on refunds is included in axpenditures in Table 3.

8/ The principal amounts for refunds of employment taxes and certain excise texes (highway) are excluded from the transfers of tax receipts shown herein, and are included with refunds of internal revenue receipts, applicable to trust accounts.
2 Amounts appropriated to the Federal Old-Age and Survivors Insurance Trust Fund are equivalent to the amounts of taxes collected and depositel for old-age insurance. Amounts transferred currently for appropriation to the trust fund are based on estimates of old-age insurance tax receipts made by the Secretary of the Treasury ( 42 U.S.C. 401 (a)), and are adjusted in later transfers on the basis of wage and self-employment income records maintained in the Social Security Administration.
10/ The Federal Disability Insurance Trust Fund was established by the Socisl Security Act Amendments of 1956, approved August 1, 1956 ( 42 U.S.C. 401 (b)). The act appropriated to the trust fund amounts equivalent to specified percentages of the wages and self-employment income, respectively, which are taxed for old-age insurance, and proviced that the amounts appropriated should be transferred from time to time to the trust fund on the same basis as transfers to the Federal 01d-Age and Survivors Insurance Trust Fund. Rates of tax were incrased by tha percentages appropriated to the Federal Disability Insurance Trust Fund, the increase being applicable to wages paid and taxable years beginning after December 31, 1956.
11. Amounts are appropriated to the Railroad Retirement Account equal to the amount of taxes under the Railroad Retirement Tax Act deposited
in the Treasury, less refunds, during each fiscal year ( 65 Stat. 222 and 66 Stat. 371 ) and transfers are mada currently.
12) The Employment Security Act of 1960, approved Septamber 13, 1960 (42 U.S.C. 1101), established in the Unemployment Trust Fund in administration account, and appropriated for credit to that account, beginning with fiscal 1961, amounts equivalent to taxes collected and deposited under the Federal Unemployment Tax Act. The tax receipts are transferred currently on the basis of estimates by the Secretary of the Treasury, with later adjustments as necessary. From that account are to be paid the administrative expenses of the employment security program. Praviously the corresponding amounts vere included, respectively, in budget receipts and budget expenditures.
13) The Highway Revenue Act of 1956, as amended, (23 U.S.C. 120, note) established a Highway Trust Fund from which are to be made, as provided by appropriation acts, Federal-aid highway expenditures after June 30, 1956, and before October 1, 1972. The act appropriated to this fund amounts equivalent to specified percentages of receipts from certain excise taxes on motor fuels, motor vehicles, tires and tubes, and use of certain vehicles, and provided that the amounts appropriated should be transferred currently to the trust fund on the basis of estimates by tha Secretary of the Treasury with proper adjustments to be made in subsequent transfers. Before fiscal 1957 corresponding excise tax receipts were included in net budget receipts and Federal-aid highway expenditures were included in budget expenditures.
14. For content, see Table 4. These transactions are included in the detail of both budget receipts and expenditures but are deducted from the totals (see Reporting Bases, p. II).
15/ Figures in this column differ from those published under the same caption prior to the September 1960 Treasury Bulletin because of the exclusion of certain interfund transactions (see footnote 14).

Source: Expenditures for 1964 are from reports received from disbursing, collecting, and administrative agencies of the Government, on the monthly statement reporting basis (see page II). They are classified in accordance with classifications used in the 1965 Budget document, Table 18 , as nearly as can be done on an individual appropriation and fund item basis. Prior year figares are from the same source but have been adjusted below the appropriation level in some instances by the Bureau of the Budget for use in Table 18. Where current classifications differ on this account, they are footnoted. Revolving fund transactions are included net in the expenditures.
1/ For expenditures by major functions for fiscal 1964 through February 1964, and fiscal 1963 through February 1963, see "Note" below. Details by functions are not available for publication in tbis issue but will appear in the April 1964 Bullatin.
2) For description of items included, see Table 5. Although not expended, a substantial portion of these amounts is obligated for outstanding purchase orders and contracts for equipment and supplies, for payrolls, and for similar items.
3/ See footnote 4.
4/ Expenditures for 1964 include those for grants of commodities for famine relief applicable to functional code 152 , and removal of surplus agricultural commodities applicabla to functional code 655. These expenditures were made from "Expenses, Public Law 480, Foreign Assistance Programs" and "Removal of Surplus Agricultural Commodities."
5/ See footnote 6.
6/ Expenditures for 1964 include tbose for assistance for elementary and secondary education applicable to functional code 701 and other aids to education applicable to functional code 704. These expenditures were made from "Defense Educational Activities, Office of Education."

7 Expenditures for 1964 include those for veterans' nonsarvice-connected pensions applicable to functional code 802 and other veterans' benefits and services applicable to functional code 805 . These expenditures were made from "Compensation and Pensions, Veterans Administration."

Source: See Table 1.
Secondary market operations, as provided in the Housing Act of 1954 approved August 2, 1954 (12 U.S.C. 1719). Funds provided by the Treasury (-), or repaid to the Treasury, are shown in a separate column (and correspondingly are reflected net in budget expenditures) See Table 2, footnote 4 .
2' Includes principally District of Columbia operating expenditures; Funds appropriated to the President - mutual security trust funds; Indian tribal funds; expenditures chargeable against increment on gold; and trist enterprise funds (net). The Railroad Unemploysent Insurance Administration Fund is included through November 1958 (see Table 10, published quarterly), the Employees ' Life Insurance Fund (net) and the Employees Health Benefits Fund (net) beginning 1961. ' Previously shown as deposit funds (see Table 1, Note).

5/ Includes banks for cooperatives, Federal intermediate credit banks, and Federal land banks.
6/ For content see Table 6. These transactions are included in the detail of both trust receipts and trust expenditures, but are deducted from the totals.
7) Excludes certain interfund transactions consisting principally of financial interchanges between trust funds resulting in receipts and expenditures (see footnote 6)
S/ Includes expenditures of the Federal intermediate credit banks which were operated as trust fund enterprises from January 1, 195~, until January 1050 , when these banks were classified as Covernmentsponsored enterprises.

Consolidated cash transactions reported in the Treasury Bulletin are on a basis consistent with Federal receipts from land paymen \(\bar{s}\) s to the public as derived in the Budget of the United States (in the Budget for \(1 \% 5\) in Special Analysis A). Shown also is the amount of net cash borrowing from, or repayment of borrowing to, the public. Revisions of the figures for earlier years have been made where necessary to make them as nearly comparable with current Budget classifications as available data will permit. For this reason certain of the figures differ somewhat from those published in previous Budget doccuments as well as in the Bulletin.

This series of cash transactions is designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the account of the Treasurer of the United States. Receipts and payments include transactions both in administrative budget accounts and in trust and deposit fund accounts. Major intragovernmental transactions which are reported as both expenditures and receipts are excluded from
both. Noncash items representing the obligations of the Government to make payments in the future also are eliminated from expenditures currently, but are added later when actual payments are made. These items consist of certain interest accrued on the priblic debt and expenditures involving the issuance of a few special public debt securities. Checks outstanding, deposits in transit, and other clearing accounts are excluded from payments. Receipts from the exercise of monetary authority are excluded as not representing cash received from the public. Feder al cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencies and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direct cash borrowing from the public. The net effect of all these transactions with the public is reflected in changes in the balance in the Treasurer's account and in cash held outside the Treasury.

price and the current redemption value less interest paid on bonds redeemed.
6/ Discount on securities at time of issuance less interest paid at time radeemed.
7) Treated as noncash expenditures at the time of issuance of the securities and as cash expenditures at the time of their redemptions; net issuance, or redemptions ( - ).
8/ Net increase, or decrease (-), in accrued liability.
9/ Net increase, or decrease (-), in checks outstanding, deposits in transit, and other accounts.

\section*{Source and Avallability of the Balance in the Treasurer's Account}

The account of the Treasurer of the Unlted States rellects not only budget receipts and expenditures but also trust, deposit fund, and public debt transactions.

The working oash of the Treasury is held mainly in Treasurer'a accounts with Federal Reserve Banks and branchos. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds frow the tax and loan accounts with thousands of commercial banke throughout the country.

Depooits to tax and loan aocounts oocur in the normal course of business under a uniform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involvas merely the transfer of money from a customer's account to the tax and loan aocount in
the same bank. On ocoasions, to the extent authorlzed by the Treasury, banks are permitted to deposit in these accounts procesds from subscriptions to public debt securities entered for their own account as well as for the account of their customers.

The tax and loan account system pormits the Treasury to leave funds in banks and in the communitiee in which they arise until such time as the Troasury noede the funds for ite operations. In this way the Treasury is able to neutralize the effect of 1 ts fluctuating operations on bank reserves and the economy.

A datalled description of the Treasury's depositary syotem may be found in the Annual Report of the Sooretary of the Treasury for 1955, pagee 275-284.

Source: Daily Treasury statement
1) Includes reserves and other deposits of the Board of Trustzes, Postal Savings system, and uncollected items, exchanges, etc., through December 1962. Effective January 1963 balances of the Postal Savings System funds were transferred to deposit fund accounts and became demand obligations of the Treasury. Balances of these funds, therefore, are no longer liabilities within the general account of the Treusurer. Uncollected items, exchanges, etc., also previously shown as liabilities were combined with "Unclassified collections, etc." shown under assets. Treasurer's checks outstanding are included
through June 1958, after which they are included in the balance in the Treasurer's account. (See footnote 2).
2) Through June 1958, the balance of the Treasurer was reduced when Treasurer's checks were issued and the amount of the checks was carried as a liability until paid. Fffective July 1958, the balance is not reduced until the checks are paid, a procedure also applying to checks drawn on the Treasurer by Government disbursing officers and agencies.
3) Amounts shown, beginning fiscal 1963, are net of uncollected items, exchanges, etc. Previously these items were included under liabilities.

Table 2. - Computed Interest Charge and Computed Interest Rate on Federal Securities

Source: On the basis of the daily Treasury statement.
Note: The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outstanding on that date (the amount actually borrowed in the case of securities sold at a premium or discount, beginning with May 1960). The aggregate charge for all interest-bearing issues constitutes the total computed annusl interest charge. The average annual interest
the total, or for any group of issues, by the corresponding principal amount. Beginning with data for December 31, 1958, the computation is based on the rate of effective yield for issues sold at premium or discount. Prior to that date it was based on the coupon rate for all issues.
1/ Cuaranteed securlties included are thase held outside the Treasury.
2) Total includes "Other bonds" through 1960; see Table 3.

3 Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate.
If On United States savings bonds the rate to maturity is applied

\section*{Footnotes to Table 7 -(Continued)}
\(3 /\) Two issues of bills, maturing January 16, 1957, and February 15, 1957, respectively, were rolled over into two issues of tax anticipation bills, both maturing Juna 24, 1957.
4) Tax anticipation issue; for detail of offerings beginning 1957, see Table 4; for amounts redeemed for taxes and for cash sae "Note" below.
5) During June and July 1958, \$491 million of the 2-5/8\% Treasury bonds of 1965 was purchased by the Treasury for retirement under section 19 of the Second Liberty Bond Act, as amended ( 31 U.S.C. 754a).
6/ Called on May 14, 1958, for redemption on September 15, 1958.
Represents amount which owners exercised the option to redeam on August 1, 1959 (see Table 4, footnote 9).
8 Holders of the \(4 \%\) notes, who had the option to redeem at par on February 15, 1960, by giving notice not later than November 16, 1959, were permitted to exchange their holdings on November 15, 1959, for the \(4-7 / 8 \%\) notes.
9/ Rolled over into a one-year bill (see Table 4).
10) Amount which owners exercised the option to redeem on February 15, 1960 (sea Table 4, footnote 11).
11 Advance refunding offering. Pursuant to the provisions of section 1037 (a) of the Internal Revenue Code of 1954 as added by Public Law 86-346, approvad September 22, 1959, the Secretary of the Treasury has declared that no gain or loss shall be recognized for Federal income tax purposes upon the exchange of the eligible outstanding securities solely for the new securities. For tax purposes, therefore, the investor will carry the new securities on his books at the same amount as he had been carrying the eligible securities exchanged. Gain or loss, if any, upon the obligations surrendered in exchange will be taken into account upon the disposition or redemption of the new obligations. See also Table 5.
12 Holders of 2-1/2\% Treasury bonds maturing November 15, 1961, were offered the option to exchange the bonds during the period from Juna 8, 1960, to June 13, 1960, inclusive, subject to allotment if subscriptions exceeded by 10 percent the offering limits of \(\$ 3.5\) billion for the notes and \(\$ 1.5\) billion for the bonds.
13 Holders of the maturing notes were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the \(3-1 / 8 \%\) certificates or the \(3-7 / 8 \%\) bonds, which were offered in an aggregate of around \#8-3/4 billion. For detail of offering, see Table 4.
14) Excess of maturing \(4-3 / 4 \%\) Treasury notes over allotments of new securities on subscriptions from holders of those notes (see Table 4, footnotes 32 and 34).
Reopening of an earlier issue.
Holders of \(2-1 / 2 \%\) Treasury bonds maturing June 15, 1967, December 15, 1968, June 15, 1969, and December 15, 1969, were offered the option to exchange the bonds during the period from Septamber 12, 1960 to September 20 , 1960, inclusive, the first for \(3-1 / 2 \%\) bonds of 1980 , the second for \(3-1 / 2 \%\) bonds of 1990 , and the other two for \(3-1 / 2 \%\) bonds of 1998, subject to allotment if the combined total of subscriptions for the bonds of 1990 and 1998 exceeded an outside limit of \(\$ 4.5\) billion.
17/ Holders of the maturing certificates were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the 3-1/4\% notes offered in the amount of around \(\$ 6.9\) billion. For detail of offering, see Table 4.
18) Excess of maturing \(4-7 / 8 \%\) certificates over allotments of new sacurities on subscriptions from holders of those certificates (see Table 4, footnotes 39 and 40).
19/ From March 20 through March 22, 1961, owners of 2-1/4\% bonds of June 15, 1959-62, 2-1/4\% bonds of December 15, 1959-62, 2-5/8\% notes maturing February 15, 1963, and 2-1/28 bonds maturing August 15, 1963, were granted the option of exchanging their holdings. The first three were axchangeable for a new \(3-5 / 8 \%\) bond due November 15,1967 , and the last for a new \(3-3 / 8 \%\) bond due November 15, 1966. Exchanges were subject to allotment if subscriptions exceeded \(\$ 5\) billion for the bonds of 1967 or \(\$ 3\) billion for the bonds of 1966 .
20 Holders of the maturing certificates and notes were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the \(\$ 5,250\) million offering of \(3 \%\) certificates or the 2,500 million offering of \(3-1 / 4 \%\) notes. For detail of offering, see Tabla 4.
21. Excess of maturing 4-3/8\% certificates and 3-5/8\% notes over allotments of naw securities on subscriptions from holders of those certificates and notes (see Table 4, footnotas 43 and 44).
22 \(\$ 1,569\) million wera redeemed for cash and \(\$ 168\) million were exchanged for the tax anticipation bills dated March 23, 1962 (see Table 4).

Holders of tha maturing notes were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the \(\$ 6,500\) million offering of \(3-1 / 2 \%\) certificates, the \(\$ 1,500\) million offering of \(4 \%\) bonds, or the \(\$ 750\) million offering of \(4-1 / 4 \%\) bonds. For detail of offering, sae Table 4.
24) Excess of maturing \(4 \%\) notes and 3-1/4\% notes over allotments of new securities on subscriptions from holders of those notes (sea Table 4, footnotes 58 and 59).
25/ From September 10 through September 12, 1962, owners of securities maturing February 15, 1963 (3-1/28 certificates, 2-5/8\% notes, \(3-1 / 4 \%\) notes), and May 15,1963 (3-1/4\% certificates, 3-1/4\% notes, \(4 \%\) notes) were granted the option of exchanging their holdings, subject to allotment if subscriptions exceeded the offering limits of \(\$ 6\) billion for the notes and \(\$ 3\) billion for the bonds.
26/ Called on August 14, 1962, for redemption on December 15, 1962. Holders of the maturing one-year bills were offered the option to exchange the bills for the tax anticipation bills dated October 15, 1963 (see Table 4, footnote 76).
28/ Holders of the maturing certificates and notes were not offered preemptive rights to exchanga their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the \$7,600 million of fering of 3-7/8\% notes, For detail of offering, see Table 4.
29/ Excess of maturing 3-1/8\% certificates and 4-7/8\% notes over allotments of new securities on subscriptions from holders of those certiffcates and notes (see Table 4, footnotes 78 and 79).
30) Tax anticipation bills issued to replace the maturing one-year bills (see Table 4, footnote 81).

Source: Daily Treasury statement; Office of Debt Analysis in the Office of the Secretary.
Note: In these tables sales of Series \(A-F\) and \(J\) bonds are included at issue price, and redemptions and amounts outstanding at current redemption value. Series \(G, H\), and \(K\) are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured \(F\) and \(G\) bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, and are then transferred to matured debt on which interest has ceased.
1 Sales and redemption figures include exchanges of minor amounts of (1) matured Series E bonds for Series \(G\) and \(K\) bonds from May 1751 through April 1957 and (2) Series F and J bonds for Series H bonds beginning January 1960; however, they exclude exchanges of Series E bonds for Series H bonds, which are reported in Table 3.
2) Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the Treasury Bulletin.
3/ Because there is a normal lag in classifying redemptions, the distribution of redemptions between sales price and accrued discount has been estimated. Beginning with the Treasury Bulletin of March 1961 the
method of distributing redemptions between sales price and accrued discount has been changed to reflect the diatribution shown in final reports of classified redemptions. All periods shown have teen revised on this basis.
4) Series F and G sales were discontinued April 30, 1952, and Series J and K sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent adjustments.
5/ Includes exchanges of Series 1941 F and G savings bonds for 3-1/4\% marketable bonds of 1978-83.
6/ Includes exchanges of Series 1948 F and G bonds for \(4-3 / 4 \%\) marketable notes of 1964.
7) Includes exchanges of Series 1949 F and \(G\) bonds for \(4 \%\) marketable bonds of 1969.
8/ Includes exchanges of Series 1950 F and G bonds for 3-7/8\% marketable bonds of 1968.
2/ Includes exchanges of Series 1951 and 1952 F and G bonds for 3-7/8\% marketable bonds of 1971 and \(4 \%\) marketable bonds of 1980.
10/Represents changes in the amounts of redemptions not yet classified between matured and unmatured issues.

In mid-1963 the Treasury expanded the coverage of the State and local portion of the Survey of Ownership, and has been receiving monthly reports from a number of important State and local authorities which were not included in the original series initiated in 1960 (see Treasury Bulletin, February 1962, page 67).

Beginning with this issue of the Treasury Bulletin the holdings of these funds, which collectively total over \(\$ 2.5\) billion of Federal securities, have been added to the regular survey. The following tables present a summary of the State and local reports, on the basis of the newly-expanded series, as of the end of the month for July-December 1963.

Table 4.- Treasury Bonds

1) Includes approximately \(\$ 100\) million issued for cash on October 28, 1963, as part of a "strip" of additional amounts of ten series of Treasury bills, maturing each week from February 6 to April 9, 1964.
2) Amount issued on March 3, 1964, was \$1,000 million.
3) Beginning April 1953, prices are closing bid quotations in the over-thecounter market. Prices for prior dates are the mean of ciosing bid and ask quotations, except that before October 1, 1939, they are closing prices on the New York Stock Exchange. "When issued" prices are included
in the history beginning October 1, 1939. Dates of highs and lows ir case of recurrence are the latest dates.
L/ On callable issues market convention treats the yield to earliest call date as more significant when an issue is selling above par, and to maturity when it is selling at par or below.
5/ Included in the average yield of long-term taxable Treasury bonds as shown under "Average Yields of Long-Term Bonds."

1) These items represent the difference between the cost value and the monetary value of silver bullion revalued and held to secure silver certificates.
2/ Total of seigniorage on coins and on newly mined silver, beginning with that for July 1959, is included under coins; the breakdown is not available after June 1959.

3/ An act approved June 4, 1963 ( 77 Stat. 54) repealed the Silver Furchase Act of 1934, the silver purchase provisions of the act of July 6, 1939, and the act of July 31, 1946.
4 The figures in this column are not cumulative; as the amount of bullion held changes, the potential seigniorage thereon changes.

Note: The United States also has certain drawing rights on the International Monetary Fund, in which the United States has a juota of \$4,12? million. In accordance with Fund policies, these drawing right: include the right to draw virtually automatically an amount ejual to the sum of the United States gold subscription to the Fund (\$1, 131.2 million) and the Fund's net use of dollars; on February 29 \(19 F 2_{4}\), these two amounts totaled \(\$ 905.5\) million. Under appropriste zircumstances the Unitad States could draw an additional amount equal to the United States quot.a.
1 Includes gold sold to the United States by the International Monetary

Fund with the right of repurchase, the proceeds of which are invested by the Fund in U. S. Government securities; as of February 29, 1964, this amounted to \(\$ 800\) million. Or this smount, the United States purchased \(\$ 200\) million in 1956 , \(\$ 300\) million in 1959 , and \(\$ 300\) million in 1960.
2' Includes gold in Exchange Stabilization Fund, which is not included in Treqsury gold figures shown in "Circulation Statement of United States Money." See "Monetary Statistics," Table 3.
2' Includes holdings of Treasury and Federal Reserve System.

\section*{Rackground}

Data relating to capital movements between the United States and forelgn countries have been collected since 1935, purguent to Executive Order 6560 of January 15, 1934, Executive Orcer 10033 of February 8, 1949, and Treasury regulatione promulgated thereuncer. Information on the principal types of data and the principal countries 18 reported monthly, and 18 published monthly in the "Treasury Bulletin." Supplementary informeition is published less frequently. Reports by banks, bankers, eccurities brokers and dealers, and nonimancial burinesa concerne in the United States are made initially to the Federal Feserve Banks, which forward consolidated figures to the Treasury. These statistics are consolidated by the Treasury and published as promptly as fossible.

The reporting forms and instructions used in the collection of the atatistica have been revised a number of times. The most recent revision became effective with reports covering data as of May 31, 1963.1/ A detalled description of the content of the statistics, including the chanses instituted. afreared in the July 1963 1ssue of the "Treasury Bulletin," pages \(79-81\). As a result of chances in presentation introduced in that 18eue, not all treakcoons previously published will be exactly corparable to those now presented. Sasic definitions

The term "roretgner" as used in the Treasury reports covers all institutions: a inoivicuals oomiciled outalde the United States, incluaing United States citizens domiciled abroad and the foreign subsidiarles and offices of United states banks and business concerns; the central governments, central banks, and other official institutions of forelgn countries, wherever locatec; and international and regionel orjanizations, wherever located.

In general, àata are reporteo opposite the foreten country or geographical erea 1r. winct the foreigner 18 domiclled. Pate: pertaining to tranches or agencles of forelgn opriciel institutions are rerorted opposite the country to which the official institution belonce. Data pertaining to international and regional orgarizatione are reported opposite the classifleation "International," "European regional," or "Letin American regional," as appropriate, exceft for the Bank for Internaticnal Settlements and the European Fund, whict are included in the classification "Other Weatern Europe."
"Short-terw" refers to obligations payable on demand or having an original maturity of one year or less, without decuction of any offeete. "Long-term" refers to obligations having an original maturity of more than one year, ane inclucer securities having no contractual maturity.

\section*{Exclusions}

The data publlehed hereln do not cover all types of capltal movementa between the United States and foreign
countries. The data reported to and publiahed by the Treazury Department exclude entirely the intercoxpany capital transactions of businese enterprises in the United States with their own branches and subaldarlea abroad or with their forelgn parent companiea; zuch traneactions are reported by bualness firms to the Department of Commerct. Data on the canital tranactions of the United States Governient and on shipmenta and recelpts of United Statee currency are also excluced from the Treasury reports. Certain capital transactiona not effected through reporting institutiona, auch as securities trancactions carried out entirely abroad, are not recoraded in the Treasury reports. Consolldated data on all types of capital traneactione are publiehed by the Department of Commerce in its regular reporta on the United Statea balance of paymenta.

The lifbilities data exclude nonnegotiable, noninterestbearing special notes of the United states r.eld by the InterAmericen Development Bank and the International Development Absociation.

The data on eecurities tranesctions and on foreign holdings of U.S. Government bonds and notes exclucie nonmarketable U.S. Treasury notes, forelen aerles, and nonmarketable U.s. Treasury bonds, forelgn currency serles (see "International Finencial Statiatics" section, Table 2).

\section*{Presentation of statistics}

Section IV - Supplementary Data by Countries Table 2. - Estimated Gold Reserves and Dollar Holdings of Foreign Countries and International Institutions \(1 /\)
(Position at end of period in millions of dollars)

1/ "Gold and short-term dollars" represent reported and estimated official gold reserves, and official and private short-term dollar holdings reported by banks in the U. S.; data exclude nonnegotiable, non-interest bearing special U. S. notes held by the Inter-American Development Bank and the International Development Association. "J. S. Government bonds and notes" represent estimated officisl and private holdings of U . S. Government securities with an original maturity of more than one year, except for nonmarketable U. S. Treasury notes, foreign series, and U. S. Treasury bonds, foreign currency series, which are excluded. Gold reserves of U.S.S.R., other Eastern European countries, and Ghina Mainland are excluded.
2 For explanation of the two series, see Section 1I, Table 9.
3/ Includes holdings of other Western European countries, the Bank for International Settlements and the European Fund, gold to be distributed by the Tripartite Commission for the Restitution of Monetary Gold, and
unpublished gold reserves of certain Western European countries. The figures included for the gold reserves of the B. I. S. represent the Bank's net gold assets.
4) Total short-term dollars include \(\$ 82\) million reported by banks included in the series beginning December 31, 1961. Of this total, holdings of Japan amount to \(\$ 81\) million.
5) Through March 1963, "Other Africa" and "Total Rfrica" may include shortterm dollars of some countries in the "uther" category.
6/ Includes countries in Oceania and Eastern Europe, and Western European dependencies in Latin America.
7) Includes international organizations, and Latin American and European regional organizations, except the Rank for International Settlements and the European Fund which are included in "Other Western Europe." Less than \$500,000.
