## Reporting Bases

Data on receipte, expenditures, and debt which appear in the "Treasury Bulletin" are basea lergely on two Treasury financial reporta, the "Daily Statement of the United States Treasury" and the "Monthly Statement of Recelpts and Expenditures of the United States Government." Certain monetary statistics are based at least in part on the "Circulation Statement of United States :Aney." Where these statewents are given as sources for individual tables, they are cited by name only. Their respective reporting bases are described below. For other data in the Bulletin, information on cources or reporting bases is given in connection with the tables themselves.

The montbly statement of receipts and expenditures was f1rst published for February 1954, and replaced the dally statement as the primary source of information on budget results and other recelpt and sxpenditure data classified by type of account. At the same time, the daily statement was changed to a statement of cash deposits and withdrawals affecting the account of the Treasurer of the United States. Both publications have provided comparative figures on their respective bases from the beginning of the fiscal year 1953. The announcement of February 17, 1954, with respect to these reporting changes may be found in the April 1954 issue of the Bulletin.

The monthly statement shows all reoelpts and expenditures of the Government, including those made from cash accounts held outside the United States Treasury. The information 18 complled from reports by the Treasurer of the United States and by all other collecting and disbursing agencies, including those agencies which maintain checking accounts in commercial banks. These reports cover transactions recorded in the accounts of the agencies during the reporting period. The net of the transactions as compiled from these reports is reconciled in the monthly statement to changes in the balance in the Treasurer's account and in cash held outside the Treasurer's account and changes in the public debt outstanding.

Receipte of taxes and customs duties are reported on a collections basis. Other recelpts are reported partially on a collections basis and partially on a deposits basis. Expenditures, except interest on the public debt, are reported on the basis of checks $18 s u e d$ or cash payments made by disbursing officers. Transactions of an interfund or intragovernmental nature are included on the same basis even though the actual 18 suance of checks may not be 1 nvolved. Interest on the public debt is included on an accrual basis beginning with $i 1 g u r e s$ for June 1955 and the fiscal year 1955. Prior to that, it was included on a due and payable basis. The same reportins basis as that in the monthly statement provides the fiscal year figures for the Treasury's "Comoined Statement of Receipts, Expend-

1tures and Balances of the United States Government" and for actual receipts and expenditures in the "Budget of the United States Government."

Beginning with the final statement for the piscal year 1960, the monthly statement reports totals for net budget receipts and budget expenditures after deduction of certain interfund transactions which are included in the detall of both budget recelpts and budget expenditures. The transactions deducted consist of interest payments and minor amounts of certain other payments made by Government agencies to the Treasury. This reporting change was made in accordancs with the plan stated in the President's Budget Message of January 18, 1960. It does not affect the surplus or deficit. Figures for earlier periods shown in the Treasury Bulletin were revised to the new reporting basis in the september 1960 issue. The interfund transactions deducted under this procedure do not include payments to the Treasury by wholly owned Government corporations for retirement of their capital stock and for disposition of earninge. These capital transfers have been excluded currently from budget receipts and budget expenditures beginning July 1 , 1948, and 11gures for prior fiscal years back through 1932 were revised accordingly at that time.

The daily statement on the new basis was first issued for February 17, 1954. In the deposits and withdrawals as shown, no distinction is made as to the type of accounts (budget, trust, etc.). The deposits are on the basis of certificates of deposit cleared through the account of the Treasurer of the United States. Total withdrawals are on the basis of checks paid or cash disbursements made out of the Treasurer's account. Some of the withdrawal clase1flcations shown are reported on the basis of malled reports of checks issued and are adjusted by means of clearing accounts to the total of checks pald. Except for relatively minor amounts, noncash interfund and other intragovernmental transactions are excluded. The public debt figures in the dally statement also are on a "clearance" basio, with the exception of those issuance and retirement transactions reported on the basis of telegrams from Federal Reserve Banks. Noncasb debt transactions are included, however.

The dally statement before February 17, 1954, covered not only transactions cleared through the Treasurer's account but also certaln Government agency transactions which were handled through commercial bank accounts, and included noncash interfund and other intragovernmental transactions. It provided information similar to that in the present dally statement with respect to the status of the Treasurer's account, and similar to that in the present end-of-month daily statement with respect to debt lesuance, retirement, and amount outstanding. Receiprs and expenditures, however, were classifled by type of account, and the budget results shown

## Reporting Bases - (Continued)

In the dally statement were used as the basis for reflecting the results under the President's budget program as enacted by the Congress.

Receipts were on the basis of deposits as they cleared the Treasurer's account. Expenditures cleared through the the Treasurer's account were reported on two successive bases. Through 1946 they were on the basis of checks paid by the Treasurer of the United States. Beginning with 1947, expenditures made through the facilities of the Treasury Department's Division of Disbursement were on the basis of checks issued, while certain others, principally those of the Department of Defense and $1 t s$ predecessor organizations, were on the basis of checks paid. Transactions han-
dled through commercial bank accounts, consisting of market transactions in public debt and guaranteed securities, were as reported by the agencies. Interest on the public debt was included on a due and payable basis beginning with November 1949 and on a checks-paid basis prior to that time.

The circulation statement reflects transactinns through the Treasurer's account which affect monetary stocks of gold and silver and the amounts of coin and currency in the money supply of the country. It is lssued later than the dally statement, however, and the figures are based on transactions consummated during the reporting period even though some may not have cleared the Treasurer's account during that period.

## Treasury Financing Operations

## July Advance Refunding

On July 8, 1964, the Treasury offered to holders of the four note issues due in August and November of this year and five other selected note and bond issues maturing from May 1965 to February 1967, an opportunity to extend the maturity of their holdings by exchanging them in advance of their maturities for issues at attractive yields. Offered in ex-

July 13 through Julyl6. Cash subscriptions were not invited. Payment for the new issues was required on or before July 24, 1964.

Exchange subscriptions received, on the basis of preliminary reports, totaled $\$ 4,354$ million for the $4-1 / 8$ percent bonds, $\$ 3,726$ million for the reopened 4 percent bonds and

and for subsequent dates were required to be attached.
Amounts to equalize the current market values among the eligible issues and the accrued interest paid to or paid by subscribers are shown in the table following.

A holder of the outstanding eligible notes and bonds had the option of accepting the exchange offer or of holding them to maturity. Consequently, he could compare the interest plus (or minus) any payment, other than the adjustment of accrued interest, he will receive resulting from the exchange with the total of the interest on the eligible issues and which he might obtain by reinvesting the proceeds of the eligible securities at maturity. The income before tax for making the extension through exchange is the coupon rate plus (or minus) any payment on the new issue. If a holder of the eligible securities did not make the exchange, he will receive the coupon rates on the eligible issues to their maturity and will have to reinvest at that time at a rate equal to that shown in a succeeding table for the remaining terms of the issues offered in order to equal the return (including any payment) he will receive by accepting the exchange offer. For example, if the $3-5 / 8$ percent notes of February 15,1966 , are exchanged for the $4-1 / 8$ percent bonds of November 15, 1973, the investor receives $4-1 / 8$ percent for the entire 9 years $3-3 / 4$ months plus $\$ 0.55$ (per $\$ 100$ face
value) immediately. If the exchange was not made, a $3-5 / 8$ percent rate will be received until February 15, 1966, requiring reinvestment of the proceeds of the $3-5 / 8 \mathrm{~s}$ of February 1966 at that time at a rate of at least 4.34 percent for the remaining 7 jears 9 months, all at compound interest, to average out to a $4-1 / 8$ percent rate for 9 years $3-3 / 4$ months plus the $\$ 0.55$ immediate payment. This minimum reinvestment rate for the extension period is shown in the table following, as are the minimum reinvestment rates for the other issues included in the exchange.

Gain or loss, if any, upon exchanges of the $3-3 / 4$ percent notes or 5 percent notes due August 15, 1964, or the $3-3 / 4$ percent notes or $4-7 / 8$ percent notes due November 15, 1964, must be fully recognized under the Internal Revenue Code.

Pursuant to the provision of section 1037 (a) of the Internal Revenue Code the Secretary of the Treasury has declared that no gain or loss shall be recognized for Federal income tax purposes solely on account of the exchange of the $3-7 / 8$ percent notes due May $15,1965,3-5 / 8$ percent notes due February 15, 1966, 3-3/4 percent bonds due May 15, 1966, 4 percent notes due August 15, 1966, or the $3-5 / 8$ percent notes due February 15, 1967. Section 1031 (b) of the Code, however, requires recognition of any gain realized on the ex-

change to the extent that money (other than interest) is received by the security holder in connection with the exchange. Accordingly, if the fair market value (the mean of bid and asked quotations on the date subscriptions are submitted) of the new securities issued plus the amount paid to the investor (discount) exceeded the investor's cost basis of the securities
is the cost basis in the old securities reduced by the amount of the payment.

If a premium was paid by the subscriber no gain or loss will be recognized; but the tax basis in the new securities is his cost basis in the old securities increased by the amount of the premium.

1/ Redeemabie at the option of the United States at par and accrued interest on and after August 15, 1987.

The new 4-1/8 percent Treasury bonds of 1973 are dated July 22, 1964, and bear interest from that date payable on a semiannual basis on November 15, 1964 and thereafter on May 15 and November 15 in each year until the principal amount becomes payable on November 15, 1973.

The additional issues of the two reopened bonds are identical in all respects with their original respective issues, except that interest on the bonds issued in exchange accrues from July 22, 1964. The 4 percent bonds of 1969 are dated October 1, 1957, and the interest is payable on a semiannual basis on April 1 and October 1 in each year until their maturity on October 1, 1969. The 4-1/4 percent bonds of 1987-92 are dated August 15, 1962, and the interest is payable on a semiannual basis on February 15 and August 15 in each year until the principal amount becomes payable. They will mature August 15, 1992, but are redeemable at the option of
or less (without stated price) from any one bidder. The offering had been announced on June 25 .

The new bills are dated July 7, 1964, and will mature June 30,1965 , when the face amount will be payable without interest. Issued in bearer form only, the bills are in denominations of $\$ 1,000, \$ 5,000, \$ 10,000, \$ 50,000, \$ 100,000, \$ 500,000$, and $\$ 1,000,000$ (maturity value).

Payment for accepted tenders in cash or other immediately available funds was required to be made or completed on July 7, 1964. Payment by credit in Treasury tax and loan accounts was not permitted.

Banking institutions generally could submit tenders for account of customers provided the names of the customers were set forth in such tenders. Others than banking institutions were not permitted to submit tenders except for their own account.

## Treasury Financing Operations - (Continued)

Tenders were received without deposit from incorporated banks and trust companies and from responsible and recognized dealers in investment securities. Tenders from others were required to be accompanied by payment of 2 percent of the face amount of Treasury bills applied for, or by an express guaranty of payment by an incorporated bank or trust company.

## 13-Week and 26-Week Bills

Regular weekly Treasury bills issued in June totaled $\$ 8.4$ billion, refunding an equivalent amount maturing. The new issues consisted of four weekly issues of 13 -week bills for $\$ 1.2$ billion each and four weekly issues of 26 -week bills for $\$ 0.9$ billion each. All of the new bills carry 91-day or 182day terms. Average rates of discount on the bills are shown in the table following.

Source: actual figures are from the monthly statement of receipts and expenditures of the Government (for explanation of reporting bases, see page II); estimates, including effect of proposed legislation, are from the 1965 Budget document released January 21, 1964. Revised estimates of administrative budget receipts and expenditures for fiscal years 1964 and 1965 were submitted to the President, by the Secretary of the Treasury and the Director of the Budget, and announced by the White House on May 22, 1964, as follows (in billione): fiscal year 1964, receipts $\$ 89.5$, expenditures $\$ 98.3$, deficit $\$ 8.8$; fiscal year 1965 , receipts $\$ 91.5$, expenditures $\$ 97.3$, deflcit $\$ 5.8$.
1/ The diatribution of recalpte between individual income taxes and oldage and aisability insurance taxes is made in accordance with provialons of Sec. 201 of Social Security Act, as amended ( 42 U.S.C. 401), for transfer to the Federsl Old-Age and Survivors Insurance Trust. Fund (see footnote 9), and also for transfer to the Federal Disability Insurance Trust fund (see footnote 10).

## Footnotes to Table 1 - (Continued)

6/ Includes adjustments as follows for: Income taxes not withheld, September - $\$ 3$ million, December - $\$ 5$ million, March $-\$ 6$ million, and Juna $+\$ 106$ million; income taxas withheld, Septamber $+\$ 8$ million, December $-\$ 316$ million, March - $\$ 50$ million, and June $-\$ 57$ million; transfers to Federal Old-Age and Survivors Insurance Trust Fund, Septembar - $\$ 10$ million, December $+\$ 300$ million, March $+\$ 52$ million, and June $-\$ 46$ million; and transfers to Federsl Disability Insurance Trust Fund, September $+\$ 5$ million, Dacember $+\$ 21$ million, March $+\$ 4$ million, and June $\mathbf{- \$ 2}$ million. See also footnota 9.
7. Interest on refunds is included in axpenditures in Table 3.

The principal amounts for refunds of employment taxes and certain excise taxes (highway) are axcluded from the transfers of tax receipts shown herein, and are included with refunds of internal revenue raceipts, applicable to trust sccounts.
2/ Amounts appropriated to tha Faderal Old-Age and Survivors Insurance Trust Fund are equivalent to the amounts of taxes collected and dapositer for old-age insurance. Amounts transferrad currently for appropriation to the trust fund are based on estimates of old-age insurance tax receipts mada by the Secratary of tha Treasury ( 42 U.S.C. 401 (a)), and ara adjusted in later transfars on the basis of wage and self-employment income records maintained in the Social Security Administration.
10) The Federal Disability Insurance Trust Fund was established by the Social Security Act Amendments of 1956, approved Auguat 1, 1956 ( 42 U.S.C. 401 (b)). The act appropriated to the trust fund amounts equivalent to specified percentages of the wagas and self-employment income, respectively, which are taxed for old-age insurance, and provided that the amounts appropriated should be transferred from time to tima to the trust fund on the same basia as transfers to the Federal Old-Age and Survivors Insurance Trust Fund. Rates of tax were increased by tha parcentages appropriated to the Federal Disability Insurance Trust. Fund, the increase being applicable to wages paid and taxable years beginning after December 31, 1956.
11 Amounts are appropriated to the Railroad Retirement Account equal to the amount of taxes under the Railroad Ratirement Tax Act deposited
in the Treasury, leas refunds, during each fiscal year ( 65 Stat. 222 and 66 Stat. 371) and transfers are mada currently.
12) The Employment Security Act of 1960, approved Septamber 13, 1960 ( 42 U.S.C. 1101), established in tha Unemployment Trust Fund in administration account, and appropriated for credit to that account, beginning with fiscal 1961, amounts equivalent to taxes collected and deposited under tha Fedaral Unemployment Tax Act. Tha tax receipts are transfarred currently on tha basis of eatimatas by tha Sacretary of tha Treasury, with later adjustments as nacessary. From that account are to ba paid the administrative expenses of the amployment security program. Previously the corresponding amounts were included, respectively, in budget recaipts and budget expenditures.
13) The Highway Revenue Act of 1956, as amanded, (23 U.S.C. 120, note) established a Highway Trust Fund from which are to ba made, as provided by appropriation acts, Federal-aid highway expenditures after June 30, 1956, and before October 1, 1972. The act appropriated to this fund amounts equivalent to spacified percentages of raceipts from certain excise taxes on motor fuels, motor vehiclas, tires and tubes, and use of certain vehicles, and provided that the amounts appropriated should be transferred currently to the trust fund on the basis of estimates by the Secretary of the Treasury with propar adjustments to be made in subsequent transfers. Before fiscal 1957 corresponding excise tax receipts were included in net budget receipts and Federal-aid highway expenditures were included in budget expenditures.
14. For content, see Table 4. These transactions are included in tha detail of both budget receipts and expenditures but are deducted from the totals (see Reporting Bases, p. II).
15. Figures in this column differ from those published under the same caption prior to tha September 1960 Treasury Bulletin because of the exclusion of certain interfund transactions (see footnote 14).

Source: Expenditures for 1964 are from reports received from disbursing, collecting, and administrative agencies of the Government, on the monthly statement reporting basis (see page II). They are classified in accordance with classifications used in the 1965 Budget document, Table 18, as nearly as can be done on an individual appropriation and fund item basis. Prior year figures are from the same source but have been adjusted below the appropriation level in some instances by the Bureau of the Budget for use in Table 18. Where current classifications differ on this account, they are footnoted. Revolving fund transactions are included net in the expenditures.
1 For expenditures by major functions for fiscal 1964 through June 1964, and fiscal 1963 through June 1963, see "Noten below. Details by functions are not available for publication in this issue but will appear in the August 1964 Bulletin.
2) For description of items included, see Table 5. Although not expended, a substantial portion of these amounts is obligated for outstanding purchase orders and contracts for equifment and supplies, for payrolls, and for similar items.
3 See footnote 4 .
4/ Expenditures for 1964 include those for assistance for eleaentary and secondary education applicable to functional code 701 and other aids to education applicable to functional code 704. These expenditures were made from "Defanae Educational Activities, Office of Education."
5/ Expenditures for 1964 include those for veterans' nonservice-connected pensions applicable to functional code 802 and other veterans' benefite and services applicable to functional code 805 . These expendi-
turas were mada from "Compensation and Penaions, Vetarans Administration."

Consolidated cash transactions reported in the Treasury Bulletin are on a basis consistent with Federal receipts from and paymen $亠$ s to the public as derived in the Budget of the United States (in the Budget for 1965 in Special Analysis A). Shown also is the amount of net cash borrowing from, or repayment of borrowing to, the public. Revisions of the figures for earlier years have been made where necessary to make them as nearly comparable with current Budget classifications as available data will permit. For this reason certain of the figures differ somewhat from those published in previous Budget doccuments as well as in the Bulletin.

This series of cash transactions is designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the account of the Treasurer of the United States. Receipts and payments include transactions both in administrative budget accounts and in trust and deposit fund accounts. Major intragovernmental transactions which are reported as both expenditures and receipts are excluded from
both. Noncash items representing the obligations of the Government to make payments in the future also are eliminated from expenditures currently, but are added later when actual payments are made. These items consist of certain interest accrued on the public debt and expenditures involving the issuance of a few special public debt securities. Checks outstanding, deposits in transit, and other clearing accounts are excluded from payments. Receipts from the exercise of monetary authority are excluded as not representing cash received from the public. Federal cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencies and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direct cash borrowing from the public. The net effect of all these transactions with the public is reflected in changes in the balance in the Treasurer's account and in cash held outside the Treasury.

## Source and Availability of the Balance in the Treasurer's Account

The account of the Treasurer of the United statea rellects not only budget recelpts and expenditures but also trust, deposit fund, and public debt trensaotions.

The working casi of the Treasury is held mainly in Treasurer'a accounts with Federal Reserve Banks and branches. As the balances in these accounta become depleted, they are restored by calling in (tranaferring) funds from the tax and loan accounta with thousande of comercial banks throughout the country.

Depoelts to tax and loan socounts ocour in thenormal course of busines under a unlform procedure applicable to all banks whereby customers of banka deposit with thom tax payments and funds for the purchase of Government securities. In most cases the transaction involvas merely the transfer of money from a customer's account to the tax and loan aooount in
the same bank. On ocossions, to the extent authorized by the Treasury, banks are permitted to depooit in these accounts procesds from subsoriptions to public debt securitles entered for their own account as well as for the account of thelr customers.

The tax and loan account syetsm permits the Treasury to leave funds in banke and in the commanities in which they arise until such time as the Treasury noeds the funds for ite operations. In this way the Treasury is able to neutralize the offect of 1 ts fluctuating operations on bank reserves and the economy.

A detalled description of the Treasury' depositary syotem may bo found in the Annual Report of the Seoretary of the Treasury for 1955, pages 275-284.

1/ Includes resarves and other deposits of the Board of Trustees, Postal Savings System, and uncollacted itams, axchanges, atc., through December 1962. Effective January 1963 balances of the Postal Savings System funds wera transferred to daposit fund accounts and became demand obligations of the Treasury. Balances of these funds, therefore, are no longer liabilities within the general account of tha Triasurer. Uncollected items, exchanges, atc., also previously shown as liabilities were combined with NUnclassified collections, etc." shown under assets. Treasurer's chacks outstanding are included
through June 1958, after which they are included in the balance in the Treasurer's account. (Sea footnote 2).
2) Through June 1958, the balance of the Treasurer wes reduced when Treasurer's checks were issued and the amount of the checks was curried as a liability until paid. Effectiva July 1958, the balance is not reduced until tha checks are paid, a procedure also applying to chacks drawn on the Treasurar by Governmant disbursing officers and agencias.
3/ Amounts shown, beginning fiscal 1963, ars net of uncollacted items, exchanges, etc. Previously thase itams wera included undar lisbilitias.

1/ Special depositaries are permitted to make payment in the form of a deposit credit for the purchase price of U. S. Government obligations purchased by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues.
2/ Taxes eligible for credit consist of those deposited by taxpayers in the depositary banks, as follows: Withheld income tax beginning

March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950 , and under the Railroad Retirement Tax Act beginning July 1951; and a number of excise taxes beginning July 1953.
3 Under a special procedure begun in March 1951, authorization may be given for income tax payments, or a portion of them, made by checks of $\$ 10,000$ or more drawn on a special depositary cank, to be credited to the tax and loan account in that bank. This procedure is followed during some of the quarterly periods of heavy tax payments.

* Less than $\$ 500,000$.

Note: In these tables sales of Series $A-F$ and $J$ bonds are included at issue price, and redemptions and amounts outstanding at current redemption value. Series $G, H$, and $K$ are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured $J$ and $K$ bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, and are then transferred to matured debt on which interest has ceased.

1) Sales and redemption figures include exchanges of minor amounts of (1) mstured Series E bonds for Series G and K bonds from May 1951 through April 1957 and (2) Series $F$ and $J$ bonds for Series $H$ bonds beginning January 1960; however, they exclude exchanges of Series E bonds for Series $H$ bonds, which are reported in Table 3.
2) Datails by serias on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the Treasury Bulletin.
3) Because there is a normal lag in classifying redemptions, the distributlon of redemptions between sales price and accrued discount has been estimated. Beginning with the Treasury Bulletin of March 1961 the
method of distributing redemptions between sales price and accrued discount has been changed to reflect the distribution shown in final reports of classified redemptions. All periods shown have been revised on this basis.
4 Series F and G sales were discontinued April 30, 1952, and Series J and K sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent adjustments.
5/ Includes exchanges of Series 1941 F and G savings bonds for 3-1/4\% marketable bonds of 1978-83.
6/ Includes exchanges of Serles 1948 F and G bonds for $4-3 / 48$ marketable notes of 1964.
4) Includes exchanges of Series 1949 F and C bonds for $4 \%$ marketaole bonds of 1969.
8/ Includes exchanges of Series 1950 F and G bonds for 3-7/8\% marketable bonds of 1968.
9/ Includas exchanges of Series 1951 and 1952 F and G bonds for 3-7/8\% marketable bonds of 1971 and 48 marketable bonds of 1980
10/ Represents changes in the amounts of redemptions not yet classifiad between matured and unmatured issues.

1. Amount issued on July 7, 1964, was \$1,001 million.

Beginning April 1953, prices are closing bid quotations in the over-thecounter markat. Prices for prior dates are the mean of closing bid and ask quotations, except that before October 1, 1939, they are closing prices on the New York Stock Exchange. "When issued" prices are included in the history beginning October 1, 1939. Dates of highs and lows in
case of racurrenca are the latest dates.
3/ On callable issues market convention treats the yield to earliest call date as more significant when an issue is selling above par, and to maturity when it is selling at par or below.
4/ Included in the average yield of long-term taxable Treasury bonds as shown under "Average Yields of Long-Term Bonds."

Background
Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15,1934 , Executive Order 10033 of February 8,1949 , and Treasury regulationa promulgated thereuncer. Information on the principal types of data and the princifal countries is reported monthly, and ia publisheo monthly in the "Treasury Bulletin." Supplementary information ia published less frequently. Reports by banks, bankers, securities brokers and dealers, and nonilnancial business concerns in the United States are mede initially to the Federal Reserve Banks, which forward consolidated figures tc the Treasury. These statistics are consolidated by the Treasury and published as promptly as possible.

The reporting forms and instructions used in the collection of the statistics have been revised a number of times. The most recent revision became effective with reports covering data as of May $31,1963.1$ A detalled description of the content of the statietics, including the chances instituted, appeared in the July 1963 1ssue of the "Treasury Bulletin," pages 79-81. As a result of changes in presentation introduced in that issue, not all vreakcowns previously published will be exactly comparable to those now presented. Basic definltions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outaide the United States, including United States citizens domiciled abroad and the foreign subsidiaries snd offices of United States banks and business concerns; the central governments, central banks, and other offlcial institutions of foreign countries, wherever located; and international and regional oryanizations, wherever located.

In general, data are reported opposite the forelen country or geographical area in which the foreigner is domiclled. Data pertaining to branches or agencles of forelen offlcial inatitutions are reforted opposite the country to which the official institution belangs. Data pertaining to international and regional organizations are reported opposite the clabbification "International," "European regional," or "Latin American regional," as appropriate, except for the Bank for Internaticnal gettlements and the European Fund, which are included in the classification "Other Western Europe."
"Short-term" refera to obligations payable on demand or having an original maturity of one year or lees, without deduction of any offsets. "Long-term" refers to obligations having an original maturity of more than one year, and includes securitiea having no contractual maturity.

## Exclusions

The data publiehed herein do not cover all types of capital movements between the United statee and forelgn
countries. The data reportec to and published by the Treasury Department exclude entirely the intercompany capital transactione of business enterprises in the United States with their own branches and subsidiarles abroad or with their foreign parent companies; auch tranaactions are reportec by business firms to the Department of Comerce. Data on the capital tranaactione of the United States Government and on shlpments and recelpts of United Statea currency are also excluced from the Treasury reports. Certain capital transactions not effected through reporting institutions, such as securities transactions carried out entirely abroad, are not recorded in the Treasury reports. Consolidated data on all types of capltal transactions are published by the Department of Commerce in ita regular reports on the United gtates balance of payments.

The liabilities data exclude nonnegotiable, noninterestbearing special notes of the United States held by the InterAmerican Development Bank and the International Development Association.

The data on eecurities transactions and on forelgn holdings of U.S. Government bonds and notes exclude nonmarketable U.S. Treasury notes, foreign series, and nonmarketable U.s. Treasury bonds, foreign currency serleb (see "International Financial Statistics" section, Table $2)$.

## Pregentation of statistics

Data collected monthly on the Treasury Foreign Exchange Forms are publishea in the "Treasury Bulletin" in three sections. Section $I$ provices a summary of the principal data by period; Section II presents data by country and by perioc; and Section III shows detalled breakdowns of the latest avallable preliminary data.

Section IV presents supplementary data in five tables which appear less frequently than monthly. Table I, shortterm foreign liabilities and claims reported by nonfinancial concerne, is published quarterly in the February, May, August, and November 1 ssues of the Bulletin. Table 2, estimated gold reserves and dollar holdings of foreign countries and international institutions, is published quarterly in the March, June, September, and December 1scues. Table 3, foreign credit and debit balances in brokerage accounts, appears semiannually in the March and September isaues. Table 4, short-term banking liabilities to forelgners in countries and areas not regularly reported separately, heretofore has been presented annually in the March ieaue, but beginning with the Auguat 1963 1asue is published twice a year, covering data as of Apr11 30 and December 31. Table 5, purchases and sales of long-term aecurities by forelgnera during the preceding calendar year, appeara annually in the April issue.

Foreign currencies reported herein in United States dollar equivalents were acquired without purchase with dollars, for the most part in connection with foreign asclatance and agricultural trade development programs authorized by various proviaione of law. The currencies are held in the custody of the Treasury Department until such time as they are elther sold for dollars to Government agencles or transferred to Government agencles for expenditure without charge to appropriations, as apecifleally authorized by law.

Prior to July 1,1953 , foreign currencies acquired by Government agencles without payment of dollars generally were avallable to the collecting agencies to defray operating expenses and were not subject to the regular appropriation processes.

The act of July 15, 1952, sec. 1415 ( 66 Stat. 662), provided that after June 30,1953 , United States agencies could no longer expend foreign currencies belonsing to the United States except as provided annually in appropriation acts. Subsequent legislation required executive departments and agencies, with certain exceptions, to relmburse the Treasury in dollars for the foreign currencies used. Executive Orders No. 10488 dated September 23, 1953, and No. 10900 dated January 5, 1961, as amended, provided for the isouance of regulations by the Secretary of the Treas ury governing the purchase, custody, transfer, or sale of foreign exchange by the United Stater.

Accordingly, Treasury Department Circular No. 930 was lesued on October 19, 1953, effeotive December 1, 1953. These regulations provided for the transfer of department and agency forelgn currency balances as of November 30 ,
1953. into Treasury custody, and the flow of future oollections through Treasury accounte; and establlshed requirements with respect to withdrawals from Treasury accounts; limitations on purchases and amounta of holdings; the use of foreign depositaries; and accounting for the currencies. Department Circular No. 930 as revised October 20, 1961, added certain requirements governing foreign currency reporting and accounting.

Figures are stated in collar equivalerts, computed for reporting purposes, to provide a common denominator for the currencies of the many forelgn countries involved. It should not be assumed that dollars, in amounts equal to the balances, are actually aval lable for the general use of the United States Government, since most of the currencies are inconvertible and restricted as to uses by the terms of agreements between the United States and the foreign governments.

The tables exclude the counterpart funda owned by and held in accounts of the foreign governments. The use of such funds is subject to approval of the United States, anc transactions therein are included in reports of the Agency for International Development. The tables also exclude the United States purohases of forelgn currencies which are under dollar accountabllity and reported as dollar transaotions.

Detalled data, by account, agency, program, forelgn country, units of currency, and related dollar equivalents, are publisbed annually in the Combined Statement of Reoelpts, Expenditures and Balanoes, beginning with fisoal 1958.
