## Reporting Bases

Data on receipts, expenaituree, and debt which appear In the "Treasury Bulletin" are based largely on two Treasury finsncial reports, the "Daily Staterent of the United States Treasury" and the "Monthiy Statement of Recelpts and Expenditares of the United States Government." Certain monetary statistics are based at least in part on the "circulation Statement of United States Aoney." Where these statements are given as sources for individual tables, they are cited by name only. Their respective reporting bases are described below. For other data in the Bulletin, information on sources or reportins beses is given in connection with the tables themselves.

The monthly statement of receipts and expenditures was first published for February 1954, and replaced the daily statement as the primary source of information on budgst results and other recelpt and exfenditure data classifled by type of account. At the same time, the dally statement was changed to a statement of cash deposits and witharawals affecting the account of the Treasurer of the United States. Both publications have provided comparative figures on their respective bases from the beginning of the fiscal year 1953. The announcement of February 17, $195^{\prime} 4$, with respect to these reporting changes may be found in the April 2954 1ssue of the Bulletin.

The monthly statement shows all recelpts and expenditures of the Government, including those made from cash accounts held outside the United States Treasury. The information is compiled from reports by the Treasurer of the United States and by all other collectiñ and disbursing agencies, including those agencies which maintain checkins accounts in commercial banks. These reports cover transactions recorded in the accounts of the agencies during the reporting period. The net of the transactions as compiled from these reports is reconciled in the monthly statement to changes in the balance in the Treasurer's account and in cash held outside the Treasurer's account and changes in the public debt outstanding.

Recelpts of taxes and customs duties are reported on a collections basis. Other receipts are reported partially on a collections basis and partlally on a deposits basis. Expenditures, except interest on the public debt, are reported on the basis of checks $18 s u e \bar{c}$ or cash payments made by disbursing officers. Transactions of an interfund or intragovernmental nature are included on the game basis even though the actual issuance of checks may not be involved. Interest on the public debt is included on an accrual basis beginning with figures for June 1955 and the fiscal year 1955. Prior to that, it was included on a due and payable basis. The same reportins basis as that in the monthly statement provides the fiscal year figures for the Treasury's "Comoined Statement of Receipts, Expend-

1tures and Dalances of the United States Government" and for actual recelpts and expenditures in the "Budget of the United States Government."

Beginning with the final statement for the fiscal year 1960 , the monthly statement reports totals for net budget receipts and budget expenditures after deduction of certain interfund transactions which are inciuced in the detall of both budget recelpts and budget expenditures. The transactions deducted consist of interest payments and minor amounts of certain other payments made by Government agencies to the Treasury. This reporting change was made ir accordance with the plan stated in the President's Budget Kiessage of January 18,1960 . It does not affect the surpluf or ceficit. Figures for earlier periods shown in the Tress. ury Bulletin were revised to the new reporting basis in the September 1960 issue. The interfund transactions deducted under this procedure do not include payments to the Treasury by wholly owned Government corporations for retirement of their capital stock and for disposition of earninge. These capital transfers have been excluded currently frou budget receipts and budget expenditures beginning July 1 , 1948, and figures for prior fiscal years back through 1936 were revised accordinety at that time.

The dally statement on the new basis was first issued for February 17, 1954. In the deposits and withdrawals as shown, no distinction is made as to the type of account (budget, trust, etc.). The deposits are on the basis of certificates of deposit cleared through the account of the Treasurer of the United States. Total withdrawals are oi the basis of checks paid or cash disbursements made out o: the Treasurer's accuunt. Some of the withdrawal classi. fications shown are reported on the basis of malled report। of checks issued and are adjusted by means of clearing ac. counts to the total of checks pald. Except for relativel: minor amounts, noncash interfund and other intragovernmenta transactions are excluded. The public debt figures in thi dally statement also are on a "clearance" basis, with th exception of those issuance and retirement transaction reported on the basis of telegrams from Federal Reservi Banks. Noncash debt transactions are included, however

The dally statement before February 17, 1954, covered not only transactions cleared through the Treasurer's ac. count but also certain Government agency transactions whic' wese handled through commercial bank accounts, and include noncash interfund and other intragovernmental transactions It provided information similar to that in the present dail statement with respect to the status of the Treasurer's ac count, and similar to that in the present end-of-month dail statement with respect to debt issuance, retirement, an amount outstanding. Receipts and expenditures, however, wer classifled by type of account, and the budget results show

## Reporting Bases - (Continued)

In the dally statement were usea as the basis for reflecting the results under the President's oudget program as enacted by the Congress.

Recelpts were on the basis of deposits as they cleared the Treasurer's account. Expenditures cleared through the the Treasurer's account were reported on two successive bases. Through 1946 they were on the basis of checks paid by the Treasurer of the United States. Beginning with 1947, expenditures made through the facilities of the Treasury Department's Division of Disbursement were on the basis of checks issued, while certain others, principally those of the Department of Defense and its predecessor organizations, were on the basis of checks paid. Transactions han-
died through commercial bank accounts, consisting of market transactions in public debt anç quaranteed securities, were as reported by the agencies. Interest on the public debt was included on a due and payable basis beginning with November 1949 and on a checks-pald basis prior to that time.

The circulation statement reflects transactions through the Treasurer's account which affect monetary stocks of gold and silver and the amounts of $\operatorname{coln}$ and currency in the money supply of the country. It is issued later than the daily statement, however, and the figures are based on transactions consummated during the reporting period even though some may not have cleared the Treasurer's account during that period.

## Treasury Financing Operations

## One-Year Bills Refunded

On August 19 the Treasury invited tencers for \$1.0 billion, or thereabouts, of 365 -day Treasury bills, for cash and in exchange for Treasury bills maturing August 31, 1964.

Tenders totaling $\$ 1,941$ million (including $\$ 40$ million of noncompetitive tenders) were received on August 25. Acceptances of tenders at the average bank discount rate of 3.688 percent totaled $\$ 1,000$ million. Noncompeti tive tenders for $\$ 200,000$ or less (without stated price) from any one bidder were accepted in full at the average price of accepted competitive bids.

The new one-year bills are dated August 31, 1964, and will mature August 31, 1965, when the face amount is payable without interest. Issued in bearer form only, the bills are in denominations of $\$ 1,000, \$ 5,000, \$ 10,000, \$ 50,000, \$ 100,000$, $\$ 500,000$, and $\$ 1,050,000$ (maturity value).

Banking institutions generally could submit tenders for account of customers provided the names of the customers were set forth in such tenders. Others than banking institutions were not permitted to submit tenders except for their own account. Tenders were received without deposit from incorporated banks and trust companies and from responsible and recognized dealers in investment securities. Tenders from others were required to be accompanied by payment of 2 percent of the face amount of Treasury bills applied for, unless the tenders were accompanied by an express guaranty of payment by an incorporated bank or trust company.

Payment for accepted tenders had to be completed on August 31, 1964 , in cash or other immediately available funds or in a like face amount of Treasury bills maturing on that date. Payment by credit in Treasury tax and loan accounts was not permitted.

Tax Anticipation Bills Issued
The Treasury Department announced on August 21 that it would invite tenders on August 26, 1964, for $\$ 1.0$ billion, or thereabouts, of 201-day tax anticipation bills. Tenders totaled $\$ 2,235$ million, of which $\$ 1,001$ million was accepted at the average bank discount rate of 3.580 percent. Noncompetitive tenders for $\$ 200,000$ or less (without stated price) from any one bidder were accepted in full at the average price of accepted competitive bids. These totaled $\$ 29$ million.

The 201-day tax anticipation bills are dated September 2, 1964, and will mature March 22, 1965. They will be accepted at par in payment of income taxes due March 15, 1965; to the
extent they are not presented for this purpose the face amount will be payable without interest at maturity. Payment for the bills was required to be made or completed on September 2 , 1964, in cash or other immediately available funds. Payment by credit in Treasury tax and loan accounts was not permitted.

Requirements relating to deposits with tenders and the denominations of the tax anticipation bills were like those for the one-year bills described in preceding paragraphs. 13-Week and 26-Week Bills Refunded

New issues of reqular weekly Treasury bills in August totaled $\$ 8.4$ billion, refunding an equivalent amount maturing. The new bills consist of four l3-week issues of $\$ 1.2$ billion each and four 26 -week issues of $\$ 0.9$ billion each. Except for the 13-week bills dated August 27, 1964, which mature in 92 days, all have $91-$ day or $182-$ day maturities. Average rates of discount are shown in the table following.

Foreign Series and Foreign Currency Series
In August the Treasury issued two 3-month certificates of indebtedness of the foreign series totaling $\$ 30$ million, and one 13 -month bond of the foreign currency series equivalent to $\$ 52$ million.

The two certificates for $\$ 20$ million, and $\$ 10$ million, respectively, carry interest at 3.50 percent per annum. As of August 31, foreign series securities outstanding totaled \$312 million.

The new foreign currency series bond is denominated in Swiss francs and carries interest at 3.67 percent per annum. In addition to Swiss franc securities, foreign currency series outstanding are denominated in Austrian schillings, Belgian francs, and German marks. The total outstanding at the end of August was equivalent to $\$ 1,035$ million.

7/ Interest on refunds is included in expenditures in Table 3.
The principal amounts for refunds of employment taxes and certain exsise taxes (highway) are excluded from the transfers of tax receipts shown herein, and are included with refunds of internal revenue receipts, applicable to trust accounts.
2/ Amounts appropriated to the Federal 01d-Age and Survivors Insurance Trust Fund are equivalent to the amounts of taxes collected and deposited for old-age insurance. Amounts transferred currently for appropriation to the trust fund are based on estimates of oldage insurance tax receipts made by the Secretary of the Treasury (42 U.S.C. 401 (a)), and are adjusted in later transfers on the basis of wage and self-employment incorue records maintained in the Social Security Administration.
10. The Federal Disability Insurance Trust Fund was established by the Social Security Act Amendments of 1956, approved August 1, 1956 ( 42 U.S.C. 401 (b)). The act appropriated to the trust fund amounts equivalent to specified percentages of the wages and self-employment income, reapectively, which are taxed for old-age insurance, and provided that the amounts appropriated should be transierred from time to time to the trust fund on the same basis as transfers to the Federal Old-Age and Survivors Insurance Trust Fund. Rates of tax were incrassed by the percentages appropriated to the Federal Disability Insurance Trust Fund, tha increase being applicable to wages paid and
11. Amounts are appropriated to the Railroad Retirement Account equal to the amount of taxes under the Railroad Retirement Tax Act deposited

In the Treasury, less refunds, during each fiscal year ( 65 Stat. 222 and 66 Stat. 371) and transfers are made currently.
12) The Employment Security Act of 1960, approved September 13, 1960 ( 42 U.S.C. 1101), established in the Unemployment Trust Fund, an adminsistration account, and appropriated for credit to that account, beginning with fiscal 1961, amounts equivalent to taxes collected and deposited under the Federal Unemployment Tax Act. The tax receipts are transfarred currently on the basis of estimates by th Secretary of the Trwsury, with later adjustments as necessary. From that account is to be paid the administrative expenses of the employment security program. Previously the corresponding amounts were included, respectively, in budget recaipts and budget expenditures.
13) The Highway Revenue Act of 1956, as amended, (23 U.S.C. 120, note established a Highway Trust Fund from which are to be made, as provided by appropriation acts, Fedaral-aid highway expenditures after June 30, 1956, and before October 1, 1972. The act appropriated to this fund amounts equivalent to specified percentages of receipts from certain excise taxes on motor fuels, motor vehicles, tires and tubes, and use of certain vehicles, and provided that the amounts appropriated should be transfarred currently to the trust fund on the basis of estimates by the Secretary of the Treasury with propar adjustments to be made in subsequent transfers. Before fiscal 1957 corresponding excise tax receipts were included in net budget receipts and Federal-aid highway expenditures ware included in budget expenditures.
14. For content, see Table 4. These transactions ara included in the datail of both budget receipts and expenditures but are deducted from the totals (see Reporting Bases, p. II).
15) Figuras in this column differ from those published under the same caption prior to tha Septamber 1960 Treasury Bulletin becausa of the exclusion of certain interfund transactions (see footnote 14).

Consolidated cash transactions reported in the Treasury Bulletin are on a basis consistent with Federal receipts from and paymen is to the public as derived in the Budget of the United States (in the Budget for 1965 in Special Analysis A). Shown also is the amoint of net cash borrowing from, or repayment of borrowing to, the public. Revisions of the figures for earlier years have been made where necessary to make them as nearly comparable with current Budget classifications as available data will permit. For this reason certain of the figures differ somewhat from those published in previous Budget doccuments as well as in the Bulletin.

This series of cash transactions is designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the account of the Treasurer of the United States. Receipts and payments include transactions both in administrative budget accounts and in trust and deposit fund accounts. Major intragovernmental transactions which are reported as both expenditures and receipts are excluded from
both. Noncash items representing the obligations of the Government to make payments in the future also are eliminated from expenditures currently, but are added later when actual payments are made. These items consist of certain interest accrued on the public debt and expenditures involving the issuance of a few special public debt securities. Checks outstanding, deposits in transit, and other clearing accounts are excluded from payments. Receipts from the exercise of monetary authority are excluded as not representing cash received from the public. Feder al cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencies and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direct cash borrowing from the public. The net effect of all these transactions with the public is reflected in changes in the balance in the Treasurer's account and in cash held outside the Treasury.

## Source and Availability of the Balance in the Treasurer's Account

The account of the Treasurer of the United states rellects not only budget receipts and expenditures but also trust, deposit fund, and public debt transaotions.

The working oash of the Treasury is held mainly in Treasurer'a accounts with Federal Reserve Banks and branches. As the balanoes in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and lcan accounts with thousands of commercial banks throughout the country.

Depoeite to tax and loan aocounts ocour in the normal course of business under a uniform procedure applicable to all banks whereby cuetomers of banks deposit with thom tax payments and funds for the purchase of Government securlties. In most cases the transaction involvee merely the transfer of money from a customer's account to the tax and loan aocount in
the ame banis. On occasions, to the extent authorlzed by the Treasury, banks are permitted to deposit in these accounts proceeds from subscrlptions to public debt securities entered for thelr own account as well as for the account of their oustomers.

The tax and loan account systom permits the Treasury to leave funds in banks and in the communities in which they arise until such time as the Treasury neede the funde for its operations. In thls way the Treasury is able to neutralize the offect of 1 ts iluctuating operations on bank ressrves and the aconomy.

A detalled description of the Treasury's depositary aystem may be found in the Annual Report of the Seoretary of the Treasury for 1955, pages 275-284.

1/ Includes reserves and other deposits of the Board of Trustees, Postal Savings System, and uncollected items, exchanges, etc., through December 1962. Effective January 1963 balances of the Postal Savings System funds were transferred to deposit fund accounts and became demand obligations of the Treasury. Balances of these funds, therefore, are no longer liabilities within the general account of the Tressurer. Uncollected items, exchanges, etc., also previously shown as liabilities were combined with "Unclassified collections, etc." shown under assets. Treasurer's checks outstanding are included
through June 1958, after which they are included in the balance in the Treasurer's account. (See footnote 2).
2) Through June 1958, the balance of the Treasurer was reduced when Treasurer's checks were issued and the amount of the checks was carried as a liability until paid. Effective July 1958, the balance is not reduced until the checks are paid, a procedure also applying to checks drawn on the Treasurer by Government disbursing officers and agencies.
3/ Amounts shown, beginning Jenuary 1963, are net of uncollected items, exchanges, etc. Previously these items were included under liabilities.

Table 2. - Computed Interest Charge and Computed Interest Rate on Federal Securities
(Dollar amounts in millions)

Source: On the basis of the daily Treasury statement.
Note: The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of each month or yoar should remain outstanding for a year at the applicable annual rate of intarest. The charge is computed for each Isaue by applying the appropriate annual intereat rate to the amount outstanding on that date (the amount actually borrowed in the case of sacurities sold at a premium or discount, beginning with May 1960). The ageregate charge for all interest-bearing issuea constlitutes the total computed annual interest charge. The average annusl interest rate is computed by dividing the computed annual intereat charge for
the total, or for any group of isaues, by the corresponding principal amount. Beginning with data for December 31, 1958, the computation is based on the rate of effective yield for issues sold at premium or discount. Prior to that date it was based on the coupon rate for all issues.
1/ Guaranteed securities included are those held outside the Treasury. Total includes mother bonds ${ }^{n}$ through 1960; see Table 3.
Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate.
a/ On United States savings bonds the rate to maturity is applied against the amount outstanding.

Note: In these tables sales of Series $\mathrm{A}-\mathrm{F}$ and J bonds are included at issue price, and redemptions and amounts outstanding at current redemption value. Series $G, H$, and $K$ are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured J and K bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, and are then transferred to matured debt on which interest has ceased.
1/ Sales and redemption figures include exchanges of minor amounts of (1) matured Series E bonds for Series G and K bonds from May 1951 through April 1957 and (2) Series $F$ and J bonds for Series $H$ bonds beginning January 1960; however, they exclude exchanges of Series E bonds for Series H bonds, which are reported in Table 3.
2/ Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the Treasury Bulletin.
3 Because there is a normal lag in classifying redemptions, the distribution of redemptions between sales price and accrued discount has been estimated. Beginning with the Treasury Bulletin of March 1961 the
method of distributing redemptions between sales price and accrued discount has been changed to reflect the distribution shown in final reports of classified redemptions. All periods shown have been revised on this basis.
4/ Series $\bar{F}$ and $G$ sales were discontinued April 30, 1952, and Series J and $K$ sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent adjustments.
5 Includes exchanges of Series 1941 F and G savings bonds for $3-1 / 48$ marketable bonds of 1978-83.
6/ Includes exchanges of Series 1948 F and G bonds for $4-3 / 4 \%$ marketable notes of 1964.
7/ Includes exchanges of Series 1949 F and G bonds for $4 \%$ marketable bonds of 1969.
8f Includes exchanges of Series 1950 F and G bonds for $3-7 / 8 \%$ marketable bonds of 1968.
2/ Includes exchanges of Series 1951 and 1952 F and G bonds for 3-7/8\% marketable bonds of 1971 and $4 \%$ marketable bonds of 1980.
10/ Represents changes in the amounts of redemptions not yet classified
between matured and unmatured issues.

1 Includes approximately $\$ 100$ million issued for cash on July 29, 1964, as part of a "strip" of additional amounts of ten series of Treasury bills, maturing each week from Octnber 15 to December 17, 1964.
2/ Amount issued on September 2, 1964, was $\$ 1,000$ million.
3/ Beginning April 1953, prices are closing bid quotations in the over-the-counter market. Prices for prior dates are the mean of closing bid and ask quotations, except that before October 1, 1939, they are closing prices on the New York Stock Exchange. "When issued" prices
are included in the history beginning Octnber 1, 1939. Dates of highs and lows in case of recurrence are the latest dates.
4 On callable issues market ennvention treats the yield to carliest call date as more significant when an issue is selling above par, and $t$ ? maturity when it is selling at par or below.
5) Included in the average yield of long-term taxable Treasury bonds as shown under "Average Yields of Long-Term Bonds."

Note: The smaoth curve is fitted by eye. Market yiglds on coupon issues due in less thon 3 months are excluded.

Table 1.- Average Yields of Treasury and Corporate Bonds by Periods

Source: Beginning April 1953, Treasury bond yields are reported to the Treasury by the Federal Reserve Bank of New York, based on closing bid quotations in the over-the-counter market. Yields for prior periods were computed on the basis of mean of closing bid and ask quotations. Moody's Investor Service is the source for the average of Aas corporate bonds.
1/ Series includes bonds on which the interest income is subject to normal tax and surtax and which are neither due nor callable before a
given number of years as follows: April 1953 to date, 10 years; April 1952 - March 1953, 12 years; October 1941 - March 1952, 15 years. For bonds currently in the series, see Table 4 under "Market Quotations on Treasury Securities ${ }^{n}$ in this issue of the Bulletin.
2/ One or more new long-term bonds added to the average (see footnote 1). 3/ An existing bond dropped from the average (see footnote 1 ).
4 Change in series (see footnote 1).

1/ Excludes money held by the Treasury and money held by or for the account of the Federal Reserve Banks and agants.
2/ The following paper currencies are in process of retirement and are redeemable from the genaral fund of the Treasury: Gold certificates issued before January 30, 1934, silver certificates issued before July 1, 1929, Treasury notes of 1890 , Federal Reserve notes 1ssued before the series of 1928, Federal Reserve Bank notes, and national bank notes. The Treasury notes of 1890 have been in procass of retirement since March 1900 ( 31 U.S.C. 411) upon receipt by the Treasury, the Federal Reserve Bank notes since June 12, 1945 (12 O.S.C. 445 note), and the national bank notes since December 23, 1915 (12 U.S.C. 441). Retirement of the others was authorized by the Old Series Currancy Adjustment Act, approved June 30, 1961 (31 U.S.C. 912-916). The act authorizes the Secretary of the Treasury to datermine from time to time the amount of currency of tha following types which have been destroyed or lost, and to reduce the amounts thereof on the books of the Treasury: Gold certificates issued before January 30 , 1934; silver certificates, United States notes, Federal Reserve Bank
notes, and national bank notes all issued before July 1, 1929; Federal Reserve notes issued prior to the series of 1928; and Treasury notes of 1890. Accordingly, the Secretary of the Treasury has determined that the following paper currencies have been destroyed or irretrievably lost and so will never be presented for redemption: On October $20,1961, \$ 1$ million of Treasury notes of 1890 ; and on August 27, 1962 , $\$ 9$ million of gold certificates, $\$ 15$ million of silver certificates, $\$ 18$ million of Federal Reserve notes, $\$ 1$ million of Federal Reserve Bank notes, and $\$ 15$ million of national bank notes.
3/ Highest amount to date. $30,1934$.
5/ Includes $\$ 15$ million issued before July 1, 1929.
6) Includes $\$ 18$ million issued prior to the aerles of 1928.

I/ Based on the Bureau of the Census estinated population. Through fiscal 1958 the estimated population is for the contermincus United States (that is, exclusive of Alaska, Hawail, and the outlying areas such as Puerto Rico, Guam, and the Virgin Islands). Beginning with fiscal 1959 the estimates include Alaska, and with fiscal 1960, Hawaii. * Less than $\$ 500,000$.

Note: The United States also has certain drawing rights on the International Monetary Fund, in which the United States has a quota of $\$ 4,125$ million. In accordance with Fund policies, these drawing rights include the right to draw virtually automatically an amount equal to the sum of the United States gold subscription to the Fund ( $\$ 1,031.2$ million) less net U.S. drawings from the Fund and the Fund's net operational receipts in U.S. dollars. On August 31, 1964, the net balance of these three amounts was $\$ 804.4$ million. Under appropriate circumstances the United States could draw an additional amount equal to the United States quota.
1/ Includes gold sold to the United States by the International Monetary

Fund with the right of repurchase, the proceeds of which are invested by the Fund in U.S. Covernment securities; as of August 31, 1964, this amounted to $\$ 800$ million. Of this amount, the United States purciased $\$ 200$ million in 1956 , $\$ 300$ million in 1959 , and $\$ 300$ million in 1960.

2/ Includes gold in Exchange Stabilization Fund, which is not included in Treasury gold figures shown in "Circulation Statement of United States Money." See "Monetary Statistics," Table 3.
3/ Includes holdings of Treasury and Federal Reserve System.

## Background

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Information on the principal types of data and the principal countries is reported monthly, and is published monthly in the "Treasury Bulletin." Supplementary information is published less frequently. Reports by banks, bankers, securities brokers and dealers, and nonfinancial business concerns in the United States are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury. These statistics are consolidated by the Treasury and published as promptly as possible.

The reporting forms and instructions used in the collection of the statistics have been revised a number of times. The most recent revision became effective with reports covering data as of May 31, 1963.1/A detailed description of the content of the statistics, including the changes instituted, appeared in the July 1963 issue of the "Treasury Bulletin," pages 79-81. As a result of changes in presentation introduced in that issue, not all breakdowns previously published will be exactly comparable to those now presented. Basic definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including United States citizens domiciled abroad and the foreign subsidiaries and offices of United States banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled. Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the classification "International," "European regional," or "Latin American regional," as appropriate, except for the Bank for International Settlements and the European Fund, which are included in the classification "Other Western Europe."
"Short-term" refers to obligations payable on demand or having an original maturity of one year or less, without deduction of any offsets. "Long-term" refers to obligations having an original maturity of more than one year, and includes securities having no contractual maturity.

## Exclusions

The data published herein do not cover all types of capital movements between the United States and foreign
countries. The data reported to and publishod by the Treasury Department exclude entirely the intercompany capital transactions of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies; such transactions are reported by business firms to the Department of Commerce. Data on the capital transactions of the United States Government and on shipments and receipts of United States currency are also excluded from the Treasury reports. Certain capital transactions not effected through reporting institutions, such as securities transactions carried out entirely abroad, are not racorded in the Treasury reports. Consolidated data on all types of capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

The liabilities data exclude nonnegotiable, noninterestbearing special notes of the United States held by the InterAmerican Development Bank and the International Development Association.

The data on securities transactions and on foreign holdings of U.S. Goverment bonds and notes exclude nonmarketable U.S. Treasury notes, foreign series, and nonmarketable U.S. Treasury bonds, foreign currency serles (see "International Financial Statistics" section, Table 2).

Presentation of statistics
Data collected monthly on the Treasury Foreign Exchange Forms are published in the "Treasury Bulletin" in three sections. Section I provides a summary of the principal data by period; Section II presents data by country and by period; and Section III shows detailed breakdowns of the latest available preliminary data.

Section IV presents supplementary data in four tables which appear less frequently than monthly. Table I, shortterm foreign liabilities and claims reported by nonfinancial concerns, is published quarterly in the February, May, August, and November issues of the Bulletin. Table 2 (formerly Table 3), foreign credit and debit balances in brokerage accounts, appears semiannually in the March and September issues. Table 3 (formerly Table 4), short-term banking liabilities to foreigners in countries and areas not regularly reported separately, heretofore has been presented annually in the March issue, but beginning with the August 1963 issue ia published twice a year, covering data as of April 30 and December 31. Table 4 (formerly Table 5), purchases and sales of long-term securities by foreigners during the preceding calendar year, appears annually in the April issue. The former Table 2, estimated gold reserves and dollar holdings of foreign countries and international institutions, is now published monthly in the "International Financial Statistics" section.

Note: Data represent estimated official and private holdings of U. S. Government securities with an original maturity of more than one year. (For exclusions, see headnote on page 85). Beginning with the February 1964 issue, annual and monthly data are shown in this section. For quarterly data and statistics for earlier dates, see Section IV of previous issues.

Data are shown as of December 31 for 1960 through 1963, on the basis of a November 30, 1960 survey of holdings and the regular monthly reports of securities transactions (see Table 4). Data for December 31, 1963, also are shown on the basis of a survey as of July 31, 1963, and the
monthly transactions reparts. For statistical convenience, the new serles is intrnduced as of December 31, 1963, rather than as of the survey date.

The variations between the two series are belleved to result from omissions from or errors in reporting, shifts in ownership not involving purchases or sales through $U$. S. banks or brokers, and physical transfers of securities to and from abroad. It is nat possible to reconcile the two series or to revise figures for earlier dates. * Less than $\$ 500,000$. p Preliminary.
