## Reporting Bases

Data on receipts, expenditures, and debt which appear In the "Tressury Bulletin" are based largely on two Treasury financial reports, the "Daily Statement of the United States Treasury" and the "Monthly Statement of Receipts and Expencitures of the United States Government." Certain monetary statistics are based at least in part on the "Circulation Statement of United States Noney." Where tinpse statements are given as sources for individual tables, they are cited by name only. Their respective reporting bases are described below. For other data in the Bulletin, information on source 6 or reporting beses is given in connection with the tables themselves.

The monthly statement of recelpts and expenditures was flrst published for February 1954, and replaced the daily statement as the primary source of information on budget results and other receipt and expenditure data classified by type of account. At the same time, the daily statement was changed to a statement of cash deposits and withdrawals affecting the account of the Treasurer of the United States. Both publications have proviled comparative figures on their respective bases from the beginning of the fiscal year 1953. The announcement of February 17. 1954, with respect to these reporting changes may be found in the April 2954 issue of the Bulletin.

The monthly statement shows all receipts and expenditures of the Government, including those made from cash accounts held outside the United States Treasury. The information is complled from reports by the Treasurer of the United States and by all other collectiñ and disbursing agencies, including those agencies which maintain checkinc accounts in comnercial banks. These reports cover transactions recorded in the accounts of the agencies during the reporting period. The net of the transactions as compiled from tnese reports is reconciled in the monthly statement to changes in the balance in the Treasurer's account and in cash held outsiđe the Treasurer's account and changes in the public debt outstanding.

Recelpts of taxes and customs duties are reported on a collections basis. Other receipts are reported partially on a collections basis and partially on a deposits basis. Expenditures, except interest on the public debt, are reported on the basis of checks $1 s s u e d$ or cash payments made by disbursing officers. Tranaactions of an interfund or intragovernmental nature are included on the same basis even though the actual issuance of checks may not be involved. Interest on the public debt is included on an sccrual basis beginning with figures for June 1955 and the fiscal year 1955. Prior to that, it was incluced on a due and payable basis. The same reportins basis as that in the monthly statement provides the fiscal year figures for the Treasury's "Comoined Statement of Recelpts, Expend-

1tures and Ealances of the United States Government" and for actual receipts and expenditures in the "Budget of the United States Government."

Beginning with the final statement for the fiscal year 1960, the monthly statement reports totals for net budget receipts and budget expenditures after deduction of certain interfund transactions which are included in the detall of both buaget recelpts and budget expenditures. The transactions deducted consist of interest payments and minor amounts of certain other payments made by Government agencies to the Treasury. This reporting change was made in accordance with the plan stated in the President's Budget Kiessage of January 18,1960 . It does not affect the surplus or deficit. Figures for earlier periods shown in the Treasury Bulletin were revised to the new reporting basis in the September 1960 1ssue. The interfund transactions deducted under this procedure do not include payments to the Treasury by wholly owned Government corporations for retirement of their capital stock and for disposition of earnings. These capltal transfers have been excluded currently from budget receipts and budget expenditures beginning July 1 , 1948, and figures for prior fiscal years back throû̆h 1932 were revised accordinsiy at that time.

The dally statement on the new basis was first issued for February 17, 1954. In the degosits and withdrawals 88 shown, no distinction is made as to the type of accounts (budget, trust, etc.). The deposits are on the basis of certificates of deposit cleared through the accourt of the Treasurer of the United States. Total withdrawals are on the basis of checks paid or cash disbursements made out of the Treasurer's account. Some of the withdrawal classifications shown are reported on the basis of malled reports of checks issued and are adjusted by means of clearing accounts to the total of checks paid. Except for relatively minor amounts, noncash interfund and other intragovernmental transactions are excluded. The public debt figures in the daily statement also are on a "clearance" basis, with the exception of those issuance and retirement transactions reported on the basis of telegrams from Federal Reserve Banks. Noncash debt transactions are included, however.

The dally statement before February 17, 1954, covered not only transactions cleared through the Treasurer's account but also certain Government agency transactions which wele handled throw commercial bank accounts, and included noncash interfund and other intragovernmental transactions. It provided information similar to that in the present daily statement with respect to the status of the Freasurer's account, and similar to that in the present end-of-month daily statement with respect to debt issuance, retirement, and amount outstanding. Receipts and expenditures, however, were classified by type of account, and the budget results shown

## Reporting Bases - (Continued)

In the daily statement were used as the basis for reflecting the results under the President's budget program as enacted by the Congress.

Recelpts were on the basis of deposits as they cleared the Treasurer's account. Expenditures cleared through the the Treasurer's account were reported on two successive bases. Through 1946 they were on the basis of checks paid by the Treasurer of the United States. Beginning with 1947, expenditures made through the facilities of the Treasury Department's Division of Disbursement were on the basis of checks issued, while certain others, principally those of the Department of Defense and its predecessor organizations, were on the basis of checks paid. Transactions han-
aled through commercial bank accounts, consisting of market transactions in public debt and guaranteed securities, were as reported by the agencies. Interest on the public debt was included on a due and payable basis beginning with November 1949 and on a checks-paid basis prior to that time.

The circulation statement reflects transactions through the Treasurer's account which affect monetary stocks of sold and silver and the amounts of coin and currency in the money supply of the country. It is issued later than the daily statement, however, and the figures are based on transactions consummated during the reporting period even though some may not have cleared the Treasurer's account during that period.

## November Cash Offering

On October 28, 1964, the Treasury announced an offering for cash of $\$ 9 \frac{1}{4}$ billion, or thereabouts, of 18 -month 4 percent Treasury notes, at par, dated November 15, 1964. Subscription books were open only on November 2.

The proceeds of the offering were used to retire the securities maturing November 15, 194 , the $\$ 3.3$ billion of 4-7/8 percent Series C-1964 notes dated February 15, 1960, and the $\$ 5.4$ billion of $3-3 / 4$ percent Series F-1964 notes dated August 15, 1963, and to provide new cash.

Of the total $\$ 21,900$ million of subscriptions received, \$9,519 million was accepted. Subscriptions were received subject to allotment and were payable in full or in part in cash or in the maturing securities exchanged at par. Payment for the new notes was required on or before November 16, 1964, the delivery date. Commercial banks were not permitted to make payment by credit in Treasury tax and loan accounts. Where payment was made with the maturing securities in bearer form, coupons dated November 15, 1964, were to be detached and cashed when due. In the case of registered notes the final interest due on November $15,1 \% 4$, was paid by check, or by credit in any account maintained by a banking institution with the Federal Reserve Bank of its district.

Subscriptions from comercial banks, for their own account, were restricted in each case to an amount not exceeding 50 percent of the combined capital (not including capital notes or debentures), surplus and undivided profits of the subscribing bank. Cormercial banks could submit subscriptions for account of their customers provided the names of customers were set forth in the subscriptions. Others than commercial banks were permitted to enter subscriptions only for their own account.

Subscriptions without deposit were received from banking institutions for their own account, Federally-insured savings and loan associations, States, political subdivisions or instrumentalities thereof, public pension and retirement and other public funds, international organizations in which the United States holds membership, foreign central banks and foreign States, dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions with respect to Goverment securities and borrowings thereon, Government investment accounts, and Federal Reserve Banks. All other subscriptions were required to be accompanied by payment of 2 percent (in cash or maturing securities, at par) of the amount of notes applied for, not subject to withdrawal until after allotment.

Subscribers requesting registered notes were required to furnish appropriate identifying numbers as required on tax returns and other documents submitted to the Internal Revenue Service. Subscribers also were required to agree not to purchise, sell, or make any agreements with respect to the purchase or sale or other disposition of any of the 4 percent notes at a specific rate or price until after midnight November 2, 1964.

In submitting subscriptions, commercial banks were required to certify that they had no beneficial interest in any of the subscriptions they entered for the account of their customers, and that their customers had no beneficial interest in the banks' subscriptions for their own account.

All subscriptions from States, political subdivisions or instrumentalities thereof, public pension and retirement and other public funds, international organizations in which the United States holds membership, foreign central banks and foreign States, Federal Reserve Banks, and Government investment accounts, were allotted in full, provided a written certification was submitted stating that the amount of their subscriptions did not exceed the amount of the two eligible securities owned or contracted for purchase for value, at 4:00 p.m., eastern standard time, October 28, 1964.

Of the notes applied for, there was allotted in full about $\$ 6,607$ million of subscriptions from States, political subdivisions or instrumentalities thereof, public pension and retirement and other public funds, international organizations in which the United States holds membership, foreign central banks and foreign States, Government investment accounts, and the Federal Reserve Banks, where the subscriber made the required certification of ownership of securities maturing on November 15, 1964.

On subscriptions received subject to allotment, the Treasury allotted in full subscriptions up to $\$ 100,000$. Other subscriptions were allotted 16.5 percent with a minimum of $\$ 100,000$ per subscription. Subscriptions subject to allotment totaled about $\$ 8,794$ million from comercial banks for their own account and $\$ 6,499$ million from all others.

The new Series D-1 $1 \% 6$ notes are dated November 15, $1 \% 4$, and bear interest from that date at the rate of 4 percent per annum, payable semiannually on May 15 and November 15, 1965, and at their maturity on May 15, 1966.

Bearer notes, with interest coupons attached, and notes registered as to principal and interest were issued in denominations of $\$ 1,000, \$ 5,000, \$ 10,000, \$ 100,000, \$ 1,000,000$, $\$ 100,000,000$, and $\$ 500,000,000$.

## Tax Anticipation Bills

Tenders were invited on October 14 for $\$ 1.5$ billion, or thereabouts, of 147-day tax anticipation bills issued on October 26,1964 , for cash. The bills of this series constitute an additional issue of the bills dated September 2, 1964, which mature March 22,1965 . Of the total $\$ 3,188$ million tenders received, $\$ 1,503$ million was accepted at the average bank discount rate of 3.518 percent. Noncompetitive tenders for $\$ 200,000$ or less (without stated price) from any one bidder were accepted in full at the average price of accepted competitive bids. These totaled $\$ 204$ million.

Payment for accepted tenders in cash or other immediately available funds was required to be completed on October 26. Any qualified depositary was permitted to make payment by credit in its Treasury tax and loan account for 50 percent of the amount of tax anticipation bills allotted to it for itself and its customers up to the amount for which it was qualified in excess of existing deposits. Banking institutions generally could submit tenders for account of customers provided the names of the customers were set forth in such tenders. Others than banking institutions were not permitted to submit tenders except for their own account. Tenders were received without deposit from incorporated banks and trust companies and from responsible and recognized dealers in investment securities. Tenders from others were required to be accompanied by payment of 2 percent of the face amount of the tax anticipation bills applied for, umless the tenders were accompanied by an express guaranty of payment by an incorporated bank or trust company.

The 147-day bills were issued October 26, 1964, and are freely interchangeable with those issued September 2, 1964, and mature March 22, 1965. They will be accepted at par in payment of income taxes due March 15, 1965; to the extent they are not presented for this purpose the face amount will be payable without interest at maturity. Issued in bearer form only, the bills are in denominations of ${ }^{\#} 1,000, ~ \# 5,000$, $\$ 10,000, \$ 50,000, \$ 100,000, \$ 500,000$, and $\$ 1,000,000$ (maturity value).

## One-Year Bills Refunded

On October 21, 1964, the Treasury invited tenders for \$1 billion, or thereabouts, of 365-day Treasury bills for cash and in exchange for Treasury bills maturing October 31, 1964. The auction was held on October 27.

The new bills are dated October 31, 1964, and mature October 31, 1965, when the face amount is payable without
interest. Issued in bearer form only, the bills are in denominations of $\$ 1,000, \$ 5,000, \$ 10,000, \$ 50,000, \$ 100,000$, $\$ 500,000$, and $\$ 1,000,000$ (maturity value).

Tenders received, on the basis of preliminary reports, totaled $\$ 2,350$ million, of which $\$ 1,000$ million (including \$45 million of noncompetitive tenders) was accepted at the average bank discount rate of 3.790 percent. Noncompetitive tenders for $\$ 200,000$ or less (without stated price) from any one bidder were accepted in full at the average price of accepted competitive bids. Payment for accepted tenders was required to be made or completed on November 2, 1964, in cash or other immediately available funds or in a like face amount of bills maturing October 31, 1964. Payment by credit in Treasury tax and loan accounts was not permitted.

Requirements relating to deposits with tenders were like those for the tax anticipation bills described in preceding paragraphs.

## 13-Week and 26-Week Bills

New issues of regular weekly Treasury bills in October totaled \$10.9 billion, refunding $\$ 10.8$ billion of bills maturing and providing \$0.1 billion of new cash. The new issues consisted of five weekly issues of 13-week bills, one issue on October 1 was for $\$ 1.3$ billion, the others were for $\$ 1.2$ billion each; and five weekly issues of 26 -week bills for $\$ 0.9$ billion each on October 1 and 8 , and the other three for $\$ 1.0$ billion each. All of the new bills carry $91-$ day and 182-day terms. Average rates of discount on the new bills are shown in the table following:

## Foreign Series and Foreign Currency Series

In October the Treasury issued two certificates of indebtedness of the foreign series totaling $\$ 25$ million and three bonds of the foreign currency series equivalent to $\$ 106$ million. Retirements amounted to $\$ 20$ million for foreign series securities and the equivalent of $\$ 55$ million for the foreign currency series.

The new 3 -month certificates bear interest at the rate of 3.25 percent and 3.60 percent per annum, respectively. As of October 31,1964 , the outstanding foreign series securities
totaled \$554 million.
The foreign currency series bonds, with maturities ranging from 14 months to 19 months, carry interest rates of 3.90 percent for the bonds denominated in Austrian schillings and German marks, and 3.87 percent for those denominated in Swiss francs. At the end of October foreign currency series securities autstanding totaled $\$ 1,086$ million. In addition to the Austrian, German, and Swiss currencies, the securities are denominated in Belgian francs.

Source: Actual figures through 1961 are from reports to the Treasury Department by disbursing officers and administrative agencies, on the monthly statement reporting basis (see page II); and from the monthly statement of receipts and expenditures thereafter. Estimates are from the Review of the 1965 Budget released October 26, 1964, including
effect of proposed legislation.
1/ Consists of miscellaneous taxes (principally the tonnage tax on foreign vessels entering U. S. ports), bullion charges, gifts and contributions, and undistributed proceeds, sale of foreign currency. Preliminary. n.a. Not available.

Footnotes to Table 1 - (Continued)
6) Includes adjustments as follows for: Income taxes not withheld, March $-\$ 6$ million, June $+\$ 106$ million, and August $-\$ 4$ million; income taxes withheld, March - $\$ 50$ million, June $-\$ 57$ million, and August - $\$ 78$ million; transfers to Federal Old-Age and Survivors Insurance Trust Fund, March $+\$ 52$ million, June $-\$ 46$ million, and August $+\$ 80$ million; and transfers to Federal Disability Insurance Trust Fund, March $+\$ 4$ million, June $-\$ 2$ million, and August $+\$ 2$ million. See also footnote 9 .
7. Interest on refunds is included in expenditures in Table 3.

8/ The principal amounts for refunds of employment taxes and certain excise taxes (highway) are excluded from the transfers of tax receipts shown herein, and are included with refunds of internal revenue receipts, applicable to trust accounts.
2/ Amounts appropriated to the Federal Old-Age and Survivors Insurance Trust Fund are equivalent to the amounts of taxes collected and deposited for old-age insurance. Amounts transferred currently for appropriation to the trust fund are based on estimates of old-age insurance tax receipts made by the Secretary of the Treasury ( 42 U.S.C. 401 (a)), and ara adjusted in later transfars on the basis of wage and self-employment income records maintained in the Social Security Administration.
10) The Federal Disability Insurance Trust Fund was established by the Social Security Act Amendments of 1956, approved August 1, 1956 ( 42 U.S.C. 401 (b)). The act appropriated to the trust fund amounts equivalent to specified percentages of the wages and self-employment income, respectively, which are taxed for old-age insurance, and provided that the amounts appropriated should be transferred from time to time to the trust fund on the sama basis as transfers to the Fedaral 0ld-Age and Survivors Insurance Trust Fund. Rates of tax ware incrased by the percentages appropriated to the Federal Disability Insurance Trust Fund, the increase being applicable to wages paid and taxable years beginning after December 31, 1956.
11. Amounts are appropriated to the Railroad Retirement Account equal to the amount of taxes under the Railroad Retirement Tax Act deposited
in the Treasury, less refunds, during each fiscal year ( 65 Stat. 222 and 66 Stat. 371) and transfers are made currently.
12) The Employment Security Act of 1960, approved Septamber 13, 1960 ( 42 U.S.C. 1101), established in the Unemployment Trust Fund, an adminsistration account, and appropriated for credit to that account, beginning with fiscal 1961, amounts equivalent to taxes collected and deposited under the Fedaral Unemployment Tax Act. The tax receipts are transfarrad currently on the basis of estimates by the Secretary of the Treasury, with later adjustments as necessary. From that account is to be paid the administrative expenses of the employment security program. Praviously the corresponding amounts were included, respectively, in budget receipts and budget expenditures.
13) The Highway Revenue Act of 1956, as amended, (23 U.S.C. 120, note established a Highway Trust Fund from which are to be made, as provided by appropriation acts, Fedaral-aid highway expanditurss after June 30, 1956, and before October 1, 1972. The act appropriated to this fund amounts equivalent to specified parcentages of receipts from certain excise taxes on motor fuels, motor vehiclas, tires and tubes, and use of certain vehicles, and provided that the amounts appropriated should be transferred currently to the trust fund on the basis of estimates by the Secretary of the Treasury with proper adjustments to be made in subsequent transfers. Before fiscal 1957 corresponding excise tax receipts were included in net budget receipts and Fedaral-aid highway expenditures were included in budget expenditures.
14. For content, see Table 4. These transactions ara included in the detail of both budget receipts and expenditures but are deducted from the totals (see Reporting Bases, p. II).
15) Figures in this column differ from thosa publisbed under the same caption prior to the September 1960 Treasury Bulletin because of the exclusion of certain interfund transactions (see footnote 14).

Note: Figurea in this table are for agencies as constituted at the time expenditures were made, and therefore do not necessarily represent functions which are comparable over a period of time. For expenditures by functions on a consistent basis, see table 6. Agency shifts are reflected in this table as follows: Beginning 1957, Alaska Road Construction from "Interior Department" to "Commerce Department," and Federal intermediate credit banks and production cradit corporations as indicated in footnote 12; beginning 1958, Federal Facilities Corporation (remaining functions) from "Treasury Department" to "General Services Administration," and Informational Madia Guaranty Fund from "Funds appropriated to the President" to "Independent agencies;" beginning 1959, Federal Civil Defense Administration from "Independent agencies" to "Executive Office of the President," Civil Aeronautics

Board from "Commerce Department" to Independent agencies, "Civil Aeronautics Adminiatration from "Commerce Department" and Airways Modernization Board from "Independent agencies" to the "Federal
Aviation Agency," National Advisory Commission for Aeronautics from
"Independent agencies" to "National Aeronautics and Space Administration;" from fiscal 1960 through November 1962, and from December 1963, through March 1964, military assistance from "Funds appropriated to the President" to "Defense Department, military," and beginning 1962, subscriptions to international institutions from "Treasury Department" to "Funds appropriated to the President."
1/ Consists of net expenditures of the Postal Fund, reflecting the change in classification of Post Office transactions to a public enterprise revolving fund basis, and beginning fiscal 1960, payment for public services.
2/ Beginning 1957, Federal aid for highways is excluded from budget expenditures and included in trust account expenditures (see Table 1). 3 / Adjusted for reclassification.

4) Beginning with fiscal 1961, administrative expenses of the employment security program are handled as trust account expenditures rather than budget expenditures, pursuant to the Employment Security Act of 1960, approved September 13, 1960 (42 U.S.C. 1101); see Table 1, footnote 12.
5/ Reported on an accrual basis effective June 30, 1955.
6/ Includes Reconstruction Finance Corporation except beginning July 1, 1954, certain functions transferred: Under Reorganization Plan No. 2 of 1954 ( 15 J.S.C. 609, note) to the Export-Import Bank, the Federal National Mortgage Association, and the Small Business Administration; and under Executive Order 10539, as amended, (15 U.S.C. 603, note) to the General Services Administration. The corporation was abolished at the close of June 30, 1957, by Reorganization Plar. No. 1 of 1957, and its remaining functions were transferred to the Housing and Home Finance Administrator, Administrator of General Services, Administrator of Small Business Administration, and Secretary of the Treasury.
5) Established pursuant to the Federal Aviation Act of 1958 (49 U.S.C. 1341 (a)), approved August 23, 1958.
8/ Established pursuant to the National Aeronautics and Space Act of 1958 (42 U.S.C. 2472 (a)), approved July 29, 1958.
9/ Consists of Federal payment and loans and advances.
6) For content, see Table 4. These transactions are included in the detail of both budget receipts and budget expenditures, but are deducted from the totals (see Reporting Bases, p. II).
11. Figures in this colunn differ from those published under the same caption prior to the September 1960 Treasury Bulletin because of the exclusion of certain interfund transactions (see footnote 10)
12) Effective January 1, 1957, the production credit corporations were merged in the Federal intermediate credit banks, pursuant to the Farm Credit Act of 1956, approved July 26, 1956 ( 12 U.S.C. 1027), and operations of the merged agencies (as mixed-ownership corporations) were classified as trust enterprise funds from January 1, 1957, until January 1959 when they were classified as Covernment-sponsored enterprises (see "Trust and Other Transactions," Table 3); previously the operations of the banks and the corporations, respectively, were classified as public enterprise funds and were included net in budget expenditures.
13) Includes $\$ 1,375$ million paid to the International Monetary Fund for the additional United States subscription, authorized by an act approved June 17, 1959, consisting of \$34 million in gold (sae MMonetary Statistics," Table 3) and $\$ 1,031$ million in special notes. The special notes of the United States issued to international institutions are nonnegotiable and noninterest-bearing and are payable on demand. See also "Consolidated Cash Transactions," Table 2 and "Debt Outstanding, "Table 1.
14 Totals include $\$ 150$ million allowance for contingencias, and $\$ 450$ miliion for comparability pay adjustment.

* Less then $\$ 500,000$.

## Table 6.- Expenditures by Functions - (Continued)

(Fiscal years; in millions of dollars)

Source: Expenditures for 1964 and 1965 are from reports received from disbursing, collecting, and administrative agencies of the Government, on the monthly statement reporting basis (see page II). They are classified in accordance with classifications used in the 1965 Budget document, Table 18, as nearly as can be done on an individual appropriation and fund item basis. Prior year figures are from the same source but have been adjusted below the appropriation level in some instances by the Bureau of the Budget for use in Table 18. Where current classifications differ on this account, they are footnoted. Revolving fund transactions are included net in the expenditures.
1/ For expenditures by major functions fol fiscal 1965 through October 1964, and fiscal 1964 through October 1963, see "Note" below. Details by functions are not available for publication in this issue but will appear in the December 1964 Bulletin.
2) See footnote 3.

3/ Expenditures for 1954 and 1965 include those for assiatance for elementary and secondary education applicable to functional code 701 and other aids to education applicable to functional code 704. These expenditures were made from "Defense Educational Activities, Office of Education."
4) Expenditures for 1964 and 1965 include those for veterans' nonserviceconnected pensions applicable to functional code 802 and other veterans' benefits and services applicable to functional code 805. These expendituras wera made from "Compensation and Pensions, Veterans Administration."

5/ See footnote 4.

1. Includes the Government's contribution for creditable military service
(45 U.S.C. $228 \mathrm{c}-1$ ( $n$ )) until payment was completed in 1954. Beginning 1952, appropriations of receipts are equal to the amount of taxes deposited in the Treasury (less refunds) under the Railroad Retirement Tax Act, and transfers are made currently subject to later adjustments (see "Administrative Budget Receipts and Expenditures," Table 1). Includes unappropriated transfers of tax receipts.
2) Payments are made between the Railroad Retirement Account and the Federal 01d-Age and Survivors and the Federal Disability insurance trust funds so as to place those funds in the position in which they would
have been if railroad employment after 1936 had been included in social security coverage ( 45 O.S.C. 228 (k)). See Tables 7 and 8.
3/ See Table 10. Receipts include repayment and interest.
3) Paid from the trust fund beginning 1950 ( 63 Stat. 297).

5 Includes unappropriated receipts.
6) Beginning fiscal 1961, amounts for interest on refunds of taxes, formerly included under budget expenditures, are treated as transfers of budget receipts to trust receipts and are included in trust expenditures.
7) Includes $\$ 13.8$ million for military service credits.

Includes adjustments to monthly statement basis. p Preliminary.

## Footnotes to Table 10

1/ State unemployment funds; used for benefit payments mainly. Beginning August 1961, withdrawals by States have been reduced by reimbursements to State accounts from Federal Extended Compensation Account.
2) Established by the Employment Security Act of 1960, approved September 13, 1960 (42 U.S.C. 1101 (a)), into which are deposited tax receipts transferred in accordance with the act (see "Administrative Budget Receipts and Expenditures," Table 1, footnote 12), and from which are paid the administrative expenses of the employment security program and reimbursement for tax refunds. Previously the corresponding amounts were included, respectively, in budget receipts and budget expenditures, and only the excess of receipts over expenditures, if any, was transferred to the trust account by appropriation. Receipts consist of appropriated and unappropriated transfers of tax collections. The Federal unemployment tax allows to the taxpayer credit for contributions to State unemployment funds up to 90 percent of the tax.
3/ Net of repayments.
4) Excess of collections from Federal unemployment tax over expenditures for benefits and administrative expenses each year is deposited in this account to maintain a reserve of $\$ 200$ million available for loans to States when needed to replenish the balances in their accounts in the trust fund. Beginning 1961, these transfers are from the administration fund in the trust account; previously they were from the general fund. Any remaining excess is credited to the State accounts ( 42 U.S.C. 1101-1103).
5) Established by the act approved March 24, 1961 (42 U.S.C. 1105(a)), which provides for a temporary program of extended unemployment compensation payments.
6) For payment of benefits and refunds ( 45 U.S.C. 360 ). Figures exclude interim advance of $\$ 15$ million from the Treasury and subsequent repayment, both in 1940.
7) Contributions under the Railroad Unemployment Insurance Act of 1938, as amended ( 45 U.S.C. 360 (a)), in excess of the amount specified for
administrative expenses. Through 1957, also includes transfers from the administration fund of excess amounts over the specified balance ( 45 U.S.C. 361 (d)).
8) Temporary advances are made when the balance in the Railroad Unemployment Insurance Account is insufficient to meet payments of benefits and refunds due or to become due. When ever the balance is sufficient to pay such benefits and refunds, repayments are made, plus interest at $3 \%$ per annum, pursuant to an act approved May 19, 1959 ( 45 U.S.C. 360 (d)).
nsists of a specified proportion of contributions deposited in the fund to be available for administrative expenses. The Railroad Unemployment Insurance Administration Fund was established in the Unemployment Trust Fund pursuant to the amending act of September 6, 1958; before that the administration fund was a separate trust fund ( 45 U.S.C. 361 ).
10) Total includes $\$ 107.2$ million transferred from State accounts to the Railroad Unemployment Insurance Account in connection with its establishmant ( 45 U.S.C. 363).
11. Beginning fiscal 1961 refunds of taxes (principal only) are reported as deduction from receipts. Interest paid on refunds of taxas is included under expenditures. See footnote 13.
12/ Incluces adjustments to monthly statement basis.
13 Includes small amounts for interest on refunds of taxes. Includes interest.
Excludes adjustment pursuant to the act of September 6, 1958 ( 45 U.S.C. 361 (a)); see footnote 16.
16) Includes an adjustment of $\$ 7.2$ million pursuant to the act of September 6,1958 ( 45 U.S.C. 361 (a)); see footnote 9.
17) Includes unappropriated receipts beginning September 1960.

Less than \$50,000.

Consolidated cash transactions reported in the Treasury Bulletin are on a basis consistent with Federal receipts from and paymen is to the public as derived in the Budget of the United States (in the Budget for 1965 in Special Analysis A). Show also is the amount of net cash borrowing from, or repayment of borrowing to, the public. Revisions of the figures for earlier years have been made where necessary to make them as nearly comparable with current Budget classifications as available data will permit. For this reason certain of the figures differ somewhat from those published in previous Budget doccuments as well as in the Bulletin.

This series of cash transactions is designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the account of the Treasurer of the United States. Receipts and payments include transactions both in administrative budget accounts and in trust and deposit fund accounts. Major intragovernmental transsctions which are reported as both expenditures and receipts are excluded from
both. Noncash items representing the obligations of the Government to make payments in the future also are eliminated from expenditures currently, but are added later when actual payments are made. These items consist of certain interest accrued on the public debt and expenditures involving the issuance of a few special public debt securities. Checks outstanding, deposits in transit, and other clearing accounts are excluded from payments. Receipts from the exercise of monetary authority are excluded as not representing cash received from the public. Federal cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencies and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direct cash borrowing from the public. The net effect of all these transactions with the public is reflected in changes in the balance in the Treasurer's account and in cash held outside the Treasury.

## Source and Availability of the Balance in the Treasurer's Account

The account of the Treasurer of the United States reflects not only budget recelpts and expenditures but also trust, deposit fund, and public debt transactions.

The working cash of the Treasury is held mainly in Treasurer'a accounts with Federal Reserve Banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banks throughout the country.

Deposits to tax and loan accounts occur in the normal course of business under a unlform procedure applicable to all banke whereby customers of banks deposit with them tax payments and funde for the purchase of Government securities. In most cases the transaction involves merely the transfer of money from a custoxer's account to the tax and loan aocount in
the same bank. On occasions, to the extent authorized by the Treasury, banks are permitted to deposit in these accounts procesds from subscriptions to public debt securities entered for their own account as woll as for the account of their customers.

The tax and loan account systam permits the Treasury to leave lunds in banks and in the communities in which they arise untll such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralizo the effect of 1 ts fluctuating operations on bank reserves and the economy.

A dotalled description of the Treasury'e depositary aystem may be found in the Annual Report of the Seoretary of the Treasury for 1955, pages 275-284.

1/ Includes reserves and other deposits of the Board of Trustees, Postal Savings System, and uncollected items, exchanges, etc., through December 1962. Effective January 1963 balances of the Postal Savings System funds were transferred to deposit fund accounts and became demand obligations of the Treasury. Balances of these funds, therefore, are no longer liabilities within the general account of the Treasurer. Uncollected items, exchanges, etc., also previously shown as liabilities were combined with "Unclassified collections, etc." shown under assets. Treasurer's checks outstanding are included
through June 1958, after which they are included in the balance in the Treasurer's account. (See footnote 2).
2/ Through June 1958, the balance of the Treasurer was reduced when Treasurer's checks were issued and the amount of the checks was carried as a liability until paid. Effective July 1958, the balance is not reduced until the checks are paid, a procedure also applying to checks drawn on the Treasurer by Government disbursing officers and agencies.
3/ Amounts show, beginning January 1963, are net of uncollected items, exchanges, etc. Previously these items were included under liabilities.

1) Special depositaries are permitted to make payment in the form of a deposit credit for the purchase price of U.S. Government securities purchased by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues.
2/ Retirement plan bonds first offered for sale as of January 1, 1963. Taxes eligible for credit consist of those deposited by taxpayers in the depositary banks, as follows: Withheld income tax beginning

March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; and a number of excise taxes beginning July 1953.
4/ Under a special procedure begun in March 1951, authorization may be given for income tax payments, or a portion of them, made by checks of $\$ 10,000$ or more drawn on a special depositary bank, to be credited to the tax and loan account in that bank. This procedure is followed during some of the quarterly periods of heavy tax payments.
Less than $\$ 500,000$.

Table 2.- Computed Interest Charge and Computed Interest Rate on Federal Securities
(Dollar amounts in millions)

Source: On the basis of the daily Treasury statement.
Nota: The computed annual interast charge represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of eacb month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each isaue by applying the appropriate annual interest rate to the amount outatanding on that date (tbe amount actually borrowed in the case of securities sold at a premium or discount, beginning with May 1960). The aggregate charge for all interest-bearing issues constitutes the total computed annual intarast charge. The average annual interest rate is computed by dividing the computed annual intereat charge for
the total, or for any group of isaues, by tha corresponding principal amount. Beginning with data for December 31, 1958, the computation is based on the rate of effective yield for issues sold at premium or discount. Prior to that date it was based on the coupon rate for all issues.
1 Guaranteed securities included are those held outsida the Treasury.
$2 /$ Total includes wother bonds" tbrough 1960; see Table 3.
3 Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interast rate.
4 On Unitad States savings bonds the rate to maturity is applied against the amount outstanding.

Note: In these tables sales of Series $A-F$ and $J$ bonds are included at issue price, and redemptions and amounts outstanding at current redemption value. Series $G, H$, and $K$ are included at race value throughout. Matured bonds which have been redeemed are included in redemptions. Matured J and $K$ bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, and are then transferred to maturad debt on which interest has ceased.
1/ Sales and redemption figures include exchanges of minor amounts of (I) motured Series E bonds for Series G and K bonds from May 1951 through April 1957 and (2) Series $F$ and $J$ bonds for Series $H$ bonds beginning January 1960; however, they exclude exchanges of Series E bonds for Series $H$ bonds, which are reported in Table 3.
2) Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the Treasury Bulletin.
3) Because there is a normal lag in classifying redemptions, the distribution of redemptions between sales price and accrued discount has been estimated. Beginning with the Treasury Bulletin of March 1961 the
method of distributing redemptions between sales price and accrued discount has been changed to reflect the distribution shown in final reports of classified redemptions. All periods shown have been revised on this basis.
4/ Series F and G sales were discontinued April 30, 1952, and Series J and $K$ sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent adjustments.
5/ Includes exchanges of Series 1941 F and G savings bonds for $3-1 / 4 \%$ marketable bonds of 1978-83.
6/ Includes exchanges of Series 1948 F and $G$ bonds for $4-3 / 4 \%$ marketable notes of 1964 .
7/ Includes exchanges of Series 1949 F and G bonds for $4 \%$ marketable bonds of 1969.
8/ Includes exchanges of Series 1950 F and $G$ bonds for $3-7 / 8 \%$ marketable bonds of 1968 .
2 Includes exchanges of Series 1951 and 1952 F and $G$ bonds for 3-7/8\% marketable bonds of 1971 and $4 \%$ marketable bonds of 1980.
10 Represents changes in the amounts of redemptions not yet classified batween matured and unmatured issues.

1/ Includes approximately $\$ 100$ million issued for cash on July 29, 1964, as part of a "strip" of additional amounts of ten serics of Treasury bills, maturing each week from October 15 to December 17, 1964.
2) Not quoted October 30, 196\%.
3) Beginning April 1953, prices are closing bid quotations in the over the-counter market. Prices for prior dates are the mean of closing bid and ask quotations. "When issued" prices are included in the
history beginning October 1941. Dates of highs and lows in case of recurrence are the latest dates.
4. On callable issues market convention treats tbe yield to earliest call date as more significant when an issue is selling above par, and to maturity when it is selling at par or below.
5/ Included in the average yield of long-term taxable Treasury bonds as shown under "Average Yields of Long-Term Bonds."

1/ Excludes money held by the Treasury and money held by or for the account of the Federal Reserve Banks and agents.
2) The following paper currencies are in process of retirement and are redeemable from the general fund of the Treasury: Gold cartificates issued before Jamuary 30, 1934, silver certificates issued before July 1, 1929, Tressury notes of 1890, Federal Reserve notes issued before the serles of 1928, Federal Reserve Bank notes, and national bank notes. The Treasury notes of 1890 have been in process of retirement since March 1900 ( 31 U.S.C. 411) upon receipt by the Treasury, the Federal Reserve Bank notes since June 12, 1945 ( 12 U.S.C. 445 note), and the national bank notes since December 23, 1915 (12 U.S.C. 441). Retirement of the others was authorized by the 0ld Series Currency Adjustment Act, approved June 30, 1961 ( 31 U.S.C. 912-916). The act authorizes the Secretary of the Treasury to determine from time to time the amount of currency of the following types which bave been destroyed or lost, and to reduce the amounts thereof on the books of the Treasury: Gold certificates issuad before January 30, 1934; silver certificates, United States notes. Federal Reserve Bank
notes, and national bank notes all issued before July 1, 1929; Federal Reserve notes issued prior to the series of 1928; and Treasury notes of 1890. Accordingly, the Secratary of the Treasury has determined that the following paper currencies have been destroyed or irretrievably loat and so will never be presented for redemption: On October 20, 1961, \$1 million of Tressury notes of 1890; and on August 27, 1962, \$9 million of gold certificates, $\$ 15$ million of silver certificates, $\$ 18$ million of Federal Reserve notes, $\$ 1$ million of Federal Reserve Bank notea, and $\$ 15$ million of national bank notes.
3/ Highest amount to date.
$4 /$ Issued prior to January 30, 1934.
5/ Includes $\$ 15$ million issued before July 1, 1929.
6/ Includes $\$ 18$ million issued prior to the aeries of 1928.
7) Based on the Bureau of the Census estimated population. Through fiscal 1958 the estimated population is for the conterminous United States (that ia, exclusive of Alaska, Hawail, and the outlying areas such as Puertc Rico, Guam, and the Virgin Islands). Beginning with fiscal 1959 the estimates include Alaska, and with fiacal 1960, Hawaii

Note: The United States also has certain drawing rights on the International Monatary Fund, in which the United States has a quota of $\$ 4,125$ million. In accordance with Fund policies, these drawing rights include the right to draw virtually automatically an amount equal to the sum of the United States gold subscription to the Fund ( $\$ 1,031.2$ million) less net U.S. drawings from the Fund and the Fund's net operational recaipts in U.S. dollars. On Octobar 31, 1964, the net bslance of these three amounts was $\$ 683.5$ million. Under appropriate circumstances the United States could draw an additional amount equal to the United States quata.

1) Includes gald sold to the United States by the International Monetary

Fund with the right of rapurchase, the proceeds of which are invested by the Fund in U.S. Government securities; as of October 31, 1964, this amounted to $\$ 800$ million. Of this amount, the United Statas purchased $\$ 200$ million in 1956, $\$ 300$ million in 1959 , and $\$ 300$ million in 1960.
2) Includes gold in Exchange Stabilization Fund, which is not included in Treasury gold figures shown in "Circulation Statement of Unitad States Money." See "Monetary Statistics," Tabla 3.

## Background

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Information on the principal types of data and the principal countries is reported monthly, and is published monthly in the "Treasury Bulletin." Supplementary information is published less frequently. Reports by banks, bankers, securities brokers and dealers, and nonfinancial business concerns in the United States are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury. These statistics are consolidated by the Treasury and published as promptly as possible.

The reporting forms and instructions used in the collection of the statistics have been revised a number of times. The most recent revision became effective with reports covering data as of May 31, 1963.1/ A detailed description of the content of the statistics, including the changes instituted, appeared in the July 1963 issue of the "Treasury Bulletin," pages 79-81. As a result of changes in presentation introIduced in that issue, not all breakdowns previously published will be exactly comparable to those now presented.

## Basic definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including United States citizens domiciled abroad and the foreign subsidiaries and offices of United States banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled. Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the classification "International," "European regional," or "Latin American regional," as appropriate, except for the Bank for International Settlements and the European Fund, which are included in the classification "Other Western Europe."
"Short-term" refers to obligations payable on demand or having an original maturity of one year or less, without deduction of any offsets. "Long-term" refers to obligations having an original maturity of more than one year, and includes securities having no contractual maturity.
Exclusions
The data published herein do not cover all types of capital movements between the United States and foreign
countries. The data reported to and published by the Treasury Department exclude entirely the intercompany capital transactions of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies; such transactions are reported by business firms to the Department of Commerce. Data on the capital transactions of the United States Government and on shipments and receipts of United States currency are also excluded from the Treasury reports. Certain capital transactions not effected through reporting institutions, such as securities transactions carried out entirely abroad, are not recorded in the Treasury reports. Consolidated data on all types of capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

The liabilities data exclude nonnegotiable, noninterestbearing special notes of the United States held by the InterAmerican Development Bank and the International Development Association.

The data on securities transactions and on foreign holdings of U.S. Goverment bonds and notes exclude nonmarketable U.S. Treasury notes, foreign series, and nonmarketable U.S. Treasury bonds, foreign currency series (see "International Financial Statistics" section, Table 2).

## Presentation of statistics

Data collected monthly on the Treasury Foreign Exchange Forms are published in the "Treasury Bulletin" in three sections. Section I provides a summary of the principal data by period; Section II presents data by country and by period; and Section III shows detailed breakdowns of the latest available preliminary data.

Section IV preaents supplementary data in four tables which appear less frequently than monthly. Table I, shortterm foreign liabilities and claims reported by nonfinancial concerns, is published quarterly in the February, May, August, and November issues of the Bulletin. Table 2 (formerly Table 3), foreign credit and debit balances in brokerage accounts, appears semiannually in the March and September issues. Table 3 (formerly Table 4), short-term banking liabilities to foreigners in countries and areas not regularly reported separately, heretofore has been presented annually in the March issue, but beginning with the August 1963 is sue is published twice a year, covering data as of April 30 and December 31. Table 4 (formerly Table 5), purchases and sales of long-term securities by foreigners during the preceding calendar year, appears annually in the April issue. The former Table 2, estimated gold reserves and dollar holdings of foreign countries and international institutions, is now published monthly in the "International Financial Statistics" section.

Note: Data represent estimated official and private holdings of U. S. Government securities with an original maturity of more than one year. (Eor exclusions see headnote on page 91.) Annual and monthly data are shown in tbis section beginning February 1964. For quarterly data see Section IV, Table 2, through June 1964; and "International Financial Statistics," Table 4, beginning September 1964. Data as of December 31, 1960-63 are on the basis of a November 30, 1960 survey and regular monthly reports of securities transactions (see Table 4). Data for December 31, 1963, also shown on the basis of a July 31, 1963, survey and the monthly transactions reports. For statistical convenience,
the new series is introduced as of December 31, 1963, rather than as of survey date.

The variations between the two series are believed to result from omissions from, or errors in reporting, shifts in ownership not involving purchases or sales through U. S. banks or brokers, and physical transfers of securities to and from abroad. It is not possible to reconcile the two series or to revise figures for earlier dates.

1/ As reported by exporters, importers, industrial and commercial firms and other nonfinancial concerns in the United Statas. Data exclude claims held through United States banks, and intercompany accounts between United States companies and their foreign affiliates.
2/ Under a continuing program instituted at the end of 1960 to enlarge coverage and to improve reporting by nonfinancial concerns, data are
included from a number of firms reporting for the first tima as of June 30, 1962 (fifth revised series), as of December 31, 1962 (sixth revised series), and as of March 31, 1963 (seventh revised series). Changes in liatilities and claims between quarter-ends can thus be computed based on comparable coverage.

Foreign currencies reported herein in United States collar equivalents were acquired without purchase with dollars, for the most part in connection with foreign assistance and agricultural trade development programs authorized by various provisiong of law. The currencies are held in the custody of the Treasury Department until such time as they are either sold for dollars to Government agencies or trangferred to Government agencies for expenditure without charge to appropriations, as epecifically authorized by law.

Prior to July 1, 1953, foreign currencies acquired by Government agencies without payment of dollars generally were avallable to the collecting agencles to defray operating expenses and were not subject to the regular appropriation processes.

The act of July 15, 1952, sec. 1415 ( 66 stat. 662), provided that after June 30, 1953, United States agencies could no longer expent forelgn currencies belonging to the United states except as provided annually in appropriation acts. Subsequent legislation required executive departmenta and agencies, with certain exceptions, to reimburse the Treasury in dollars for the foreign currencies used. Expcutive Orders No. 10488 dated September 23, 1953, and No. 10900 dated January 5,1961 , se amended, provided for the issuance of regulationa by the Secretary of the Treas ury governing the purchase, custody, transfer, or sale of foreign exchange by the United Statea.

Accordingly, Treasury Department Circular No. 930 wae 1ssued on October 19, 1953, effective December 1, 1953. These regulations provided for the transfer of department and agency foreign currency balances as of November 30,
1953. Into Treasury custody, and the flow of future collections throuzh Treasury accounts; and established requirements with respect to withorawals from Treasury accounte; limitations on purchases and amounte of holdings; the use of foreign depositaries; and accounting for the currencies. Department Circular No. 930 as revised October 20, 1961, added certain requirements governing foreign currency reporting and accounting.

Figures are stated in dollar equivalents, computed for reporting purposes, to provide a common denominator for the currencies of the many foreign countries involved. It should not be assumed that dollars, in amounts equal to the balances, are actually avallable for the general use of the United States Government, since most of the currencies are inconvertible and restricted as to uses by the terms of agreaments between the United States and the foreign governments.

The tables exclude the counterpart funds owned by and held in accounts of the forelgn govemments. The use of such funds is subject to approval of the United States, and transactions therein are included in reports of the Agency for International Development. The tablea aloo exclude the United States purohases of forelgn currencles which are under dollar accountabllity and reported as dollar transactions.

Detalled data, by account, agency, program, forelen country, units of currency, and related dollar equivalente, are published annually in the Combined Statement of Receipts, Expenditures and Balanoss, beginning with fiscal 1958.

The current financial statements of corporations and certain other business-type activities of the United states Government which appear in the "Treasury Bulletin" beginning With the August 1956 1ssue are complled from reports submitted to the Treasury under Department Circular No. 966, 18 sued Jenuary 30, 1956, and Supplement No. 1, issued June 1, 1956. The regulations so 1ssued are pursuant to Section 114 of the Budget and Accounting Procedures Act of 1950 ( 31 U.S.C. 66b), and represent another step in the program of comprehenaive and integrated Government accounting and financial reporting for which authority was provided in that. act. They supersede Budget-Treasury Regulation No. 3 , 18 sued under Executive Order No. 8512 of August 13, 1940, as amended by Executive Order No. 9084 of March 3, 1942, under which financial statements previously published in the Bulletin were submitted.

In coverage, Department Circular No. 966 requires submiseion of financial statemente by all wholly owned and mixed-ownership Government corporations specifically included in the Government Corporation Control Act, as amended ( 31 U.S.C. 846,856 ); and all other activities of the Government operating as revolving funds for which businesetype public enterprise or intragovernmental fund budgets are required by the Bureau of the Budget. Other activitlec and agencies whoss operations, services, or functions are largely self-liquidating or primarily of a revenue-producine nature, and activities and agencies whose operations result in the accumulation of substantial inventories, investments and other recoverable assets, may be brought under the regulations as agency accounting systems are developed to the point where they are capable of furnishing the finencial reports required.

Four kinds of financial statements are called for by Department Circular No. 966. They are statements of ilnancial condition, income and expense, source and application of funds, and certain commitments and contingencies. The
statements of financial condition are published quarterly and appear as section I in the series of tables. The first data under the new regulations are for March 31, 1956, and were presented in the August 1956 Bulletin. Statements of income and expense and source and application of funds ars published semlannually, for June 30 and December 31 report-1 ing dates, and appear as Sections II and III. The first of these statements under the new regulations cover the flscal year 1956, and were published in the January 1957 Bulletin. Within the sections, the agencies are grouped in separats tables by type, as follows: public enterprise revolving funds, intragovernmental revolving funàs, certain other activities, deposit funds, and trust revolving funde.

Supplement No. 1 added to the coverage by including all executive agencies and activities not reporting under Department Circular No. 966 , but required only a statement of financial condition annually as of June 30. These are mainly not business-type activities, and those which had! not yet developed formal accounting procedures to provide complete balance sheet types of statementa were authorized temporarily to report only the asset oide. Thus the supplement rouncs out provision for the information on properties and assets of the United States Government which the Treasury has been asked to furnish to the Committee on Government Operations, House of Representatives, for at continuing study of the assets of the Government. The first comprehensive reporting under Supplement No. 1 is for June 30, 1957, and the data were publiehed in the December 1957 1ssue of the Bulletin as Part B of Table 4 in Section I.

A summary of loans outstanding for a series of dates is included in Section $I$ of the Bulletin presentation beginning with the June 1958 1asue. Two classifications of the loans are shown, one by type and one by agency. Data prior to 1956 are based on the earlier reporting requirements, which provided for complete coverage of Government lending agencies.

## Footnotes to Table 1

1/ Business-type activities reporting pursuant to Department Circular No. 966.
Activities reporting pursuant to Supplement No. 1 to Department Circular No. 966. These are mainly not business-type activities. Excluded from the June 30, 1964, figures are those activities whose reports for that date cover assets only (see Headnote), and also certain activities of the Department of Defense, which have not yet furnished the data required by Supplement No. 1.
3 With the exceptions indicated in footnote 2.
These amounts consist in the main of unexpended balances of general, special, and revolving fund accounts against which checks may be drawn to pay proper charges under these funds. The funds are considered as assets of the agencies, but are not assets of the United States Government since funds must be provided out of cash balances of the Treasurer of the United States and future receipts to take care of checks to be issued against the balances.
5/ Includes foreign currency assets, representing loans and other re-
ceivables recoverable in foreign currency as well as bslances of foreign currencies in United States depositaries, aggregating $\$ 7,190$ million in dollar equivalent. These currencies, acquirad primarily without the payment of dollars, were generated under various Government programs, principally the Agricultural Trade Development and Assistance Act of 1954, as amended, and the Mutual Security Acts, as amended. Dollar equivalents are computed for reporting purposes, to provide a common denominator for the currencies of the many countries involvad. Foreign currencies on hand and on deposit and loans under section 104 (e) of the Agricultural Trade Development and Assistance Act of 1954 , as amended, are stated at the rates as of June 30, 1964 at which the United States could purchase currencies on the market for regular operating purposes. Other loans are stated at the rates at which they are to be repaid or at rates in effect when the loans were extended. Currencies that are dollar denominated or guaranteed as to rate of exchange are stated at rates specified in the agreements. Less than $\$ 500$.
