## Reporting Bases

Data on receipts, expenditures, and debt which appear in the "Tressury Bulletin" are based lergely on two Treasury financial reports, the "Daily statement of the United States Treasury" and the "Monthly Statement of Receipts and Expenditures of the United States Government." Certain monetary statistics are based at least in part on the "Circulation Statement of United States Koney." Where these statementa are given as sourcea for individual tables, they are cited by name only. Their reapective reporting basea are described below. For other data in the Bulletin, information on sources or reporting bases 18 given in connection with the tables themselves.

The monthly statement of recelpts and expenditures was firat published for February 1954, and replaced the dally statement as the primary source of information on budget results and other receipt and expenditure data claasifled by type of account. At the same time, the dally statement was changed to a statement of cash deposita and withdrawals affecting the account of the Treasurer of the United States. Both publications have provided comparative figures on their respective basea from the beginning of the fiscal yoar 1953. The announcement of February 17, 1954, with reapect to these reporting changes may be found in the April 1954 issue of the Eulletin.

The monthly statement shows all recelpts and expenditures of the Government, including those made from cash accounts held outelde the United States Treasury. The information is compiled from reporta by the Treasurer of the United States and by all other collecting and dis. bursing agencies, including those agencies which maintain checking accounta in commercial banks. Theae reports cover transactions recorded in the accounts of the agencies during the reporting period. The net of the transactions as compiled from these reports is reconciled in the monthly statement to changea in the balance in the Treasurer's account and in cash held outside the Treasurer's account and changes in the public debt outstanding.

Receipts of taxes and customs duties are reported on a colleotions bais. Other raceipta are reported partially on a collections basis and partially on a deposits basia. Expenditures, except interest on the public debt, are reported on the basis of checks issued or cash payments made by diabursing officers. Transactiona of an interfund or intragovernmental nature are included on the same basis even though the actual issuance of checks may not be involved. Intereat on the public debt is included on an accrual basia beginning with figures for June 1955 and the fiacal year 2955. Prior to that, it waa included on a due and payable basis. The same reportiny basis as that in the monthly statement provides the fiscal year figurea for the Treasury's "Combined Statement of Receipts, Expend-

1tures and Balances of the United States Government" and for actual receipts and expenditures in the "Budget of the United States Government."

Beginning with the inal statement for the fiscal year 1960 , the monthly statement reports totals for net budget receipts and budget expenditures after deduction of certain interfund transactions which are included in the detall of both budget recelpta and budget expenditures. The transactions deducted conaist of interest payments and minor amounts of certain other paymenta made by Government agencies to the Treasury. This reporting change was made in accordance with the plan stated in the President's Budget Message of January 18 , 1960. It does not affect the surplus or deficit. Figures for earlier periods shown in the Treas. ury Bulletin were revised to the new reporting basis in the September 1960 issue. The interfund transactions deducted under this procedure do not include payments to the Treasury by wholly owned Government corporations for retirement of their capital stock and for dispoaition of earninga. These capital transfers have been excluded currently from budget receipts and budget expenditures beginning July 1 , 1948, and ilgurea for prior fiscal years back through 1932 were revised accordingly at that time.

The daily atatement on the new basis was first issued for February 17, 1954. In the deposits and withdrawals as shown, no distinction is made as to the type of accounts (budget, truat, etc.). The deposita are on the basis of certificates of deposit cleared through the account of the Treasurer of the United States. Total withdrawals are on the basia of checks paid or cash disbursementa made out of the Treaaurer'a account. Some of the withdrawal clasaifications shown are reported on the bais of malled reports of checks issued and are adjusted by means of clearing accounta to the total of checks paid. Except for relatively minor amounts, noncash interfund and other intragovernmental transactiona are excluded. The public debt figures in the dally atatement also are on a "clearance" basis, with the exception of those issuance and retirement transactiona reported on the basis of telegrams from Federal Reserve Banka. Noncash debt transactions are included, however.

The dally statement before February 17, 1954, covered not only transactions cleared through the Treaaurer's account but also certain Government agency transactions which were handled through commercial bank accounts, and included noncash interfund and other intragovernmental transactions. It provided information similar to that in the present daily statement with respect to the status of the Treasurer's account, and similar to that in the present end-of-month daily statement with reapect to debt issuance, retirement, and amount outstanding. Receipts and expenditures, however, were classified by type of account, and the budget results shown

## Reporting Bases - (Continued)

in the dally statement were used as the basis for reflecting the results under the President's budget program as enacted by the Congress.

Receipts were on the basis of deposits as they cleared the Treasurer's account. Expenditures cleared through the the Treasurer's account were reported on two successive bases. Through 1946 they were on the basis of checks paid by the Treasurer of the United States. Beginning with 1947, expencitures made through the facilities of the Treasury Department's Division of Disbursement were on the basis of checks issued, while certain others, principally those of the Department of Defense and its predecessor organizations, were on the basis of checks paid. Transactions han-
dled through commercial bank accounts, consisting of market transactions in public debt and guaranteed securities, were as reported by the agencies. Interest on the public debt was included on a due and payable basis beginning with November 1949 and on a checks-paid basis prior to that time.

The circulation statement reflects transactions through the Treasurer's account which affect monetary stocks of gold and silver and the amounts of coin and currency in the money supply of the country. It is issued later than the daily statement, however, and the sigures are based on transactions consummated during the reporting period even though some may not have cleared the Treasurer's account during that period.

## January Advance Refunding

On December 30, 1964, the Treasury announced an offering to holders of the $2-5 / 8$ percent bonds due February 15, 1965, and seven other selected note and bond issues maturing from Nov ember 15, 1965, to November 15, 1967, an opportunity to extend the maturity of their holdings at attractive yields. Offered in exchange, as of January 15,1965 , were new 4 percent bonds maturing February 15,1970 , new $4-1 / 8$ percent bonds maturing February 15, 1974, and additional amounts of the reopened $4-1 / 4$ percent bonds callable beginning in 1987 and maturing August 15, 1992.
the $\$ 29.1$ billion of the latter securities, $\$ 18.7$ billion was publicly held, and $\$ 10.4$ billion was held by official accounts. No gain or loss was recognized for Federal income tax purposes solely on account of the exchange of these issues. Treatment of the exchange for tax purposes is described more fully in later paragraphs. Subscription books were open from January 4 through January 8.

Exchange subscriptions received, on the basis of preliminary reports, totaled $\$ 4,379$ million for the 4 percent bonds of $1970, \$ 3,101$ million for the $4-1 / 8$ percent bonds of 1974 , and

Public holdings of the $2-5 / 8$ percent bonds of $1965 \mathrm{ac}-$ counted for about $\$ 3.4$ billion of the nearly $\$ 4$ billion outstanding, with the remainder held by official accounts. Holders of these bonds, because they were so close to final maturity, were not offered the nontaxable exchange privilege extended to the other seven issues eligible for exchange. Of

Payment for the securities offered was required to be made on or before January 19, and could be made only in a like face amount of the eight eligible securities. Cash subscriptions

were not invited. All coupons dated February 15, 1965, and all subsequent coupons were required to be attached to the securities in bearer form surrendered for exchange. rate will be received until August 15, 1967, requiring reinvestment of the proceeds of the $3-3 / 4 s$ of August 1967 at that time at a rate of at least 4.32 percent for the remaining 6 years and 6 months, all at compound interest, to average out to a $4-1 / 8$ percent rate for 9 years and 1 month plus the $\$ 0.10$ immediate payment. This minimum reinvestment

[^0]The exchanges were made on the basis of par for par with accrued interest adjustments as of January 15, 1965. Cash adjustments, because of differences in coupon and maturity among the various eligible issues, were made to provide all subscribers with appropriately attractive opportunities. Accrued interest and cash adjustments are shown in the table following.

A holder of the outstanding eligible notes and bonds had the option of accepting the exchange offer or of holding them to maturity. Consequently, he could compare his return resulting from the exchange (plus or minus any payment, other than the adjustment of accrued interest) with the interest he was receiving on the eligible issues plus the return he might obtain by reinvesting the proceeds of the eligible securities at maturity. For example, if the $3-3 / 4$ percent notes of August 15, 1967, were exchanged for the $4-1 / 8$ percent bonds of February 15, 1974, the investor received $4-1 / 8$ percent for the entire 9 years and 1 month plus $\$ 0.10$ (per $\$ 100$ face value) immediately. If the exchange was not made, a $3-3 / 4$ percent
rate for the extension period is shown in the table on page $A-4$, as are the minimum reirvestment rates for the other issues included in the exchange.

Gain or loss, if any, upon exchanges of the $2-5 / 8$ percent bonds of 1965, was fully recognized under the Internal Revenue Code.

Pursuant to the authority of Section 1037(a) of the Internal Revenue Code no gain or loss shall be recognized for Federal income tax purposes rolely on account of the exchange of the remaining seven issues eligible for exchange in this advance refunding; provided, however, that Section 1031(b) of the Code requires recognition of any gain realized on such exchanges to the extent that money (other than interest) was received by the security holder in connection with the exchange.

The bonds of 1970 mature February 15, 1970, and the bonds of 1974 mature February 15, 1974.

The additional issues of the $4-1 / 4$ percent bonds of 198792 are dated August 15, 1962, and are identical in all respects with the original issues except that the interest on the bonds issued in exchange accrues from January 15, 1965. Interest is payable on a semiannual basis on February 15 and August 15 in
prior to maturity for the purpose of using the proceeds in payment of Federal estate taxes, but only if they are owned by the decedent at the time of his death and thereupon constitute part of his estate. ## Treasury Financing Operations - (Continued)

Tenders received totaled $\$ 4,045$ million, of which $\$ 1,758$ million was accepted at the average bank discount rate of 3.711 percent. Noncompetitive tenders for $\$ 300,000$ or less (without stated price) from any one bidder were accepted in full at the average price of accepted competitive bids. These totaled \$241 million.

Banking institutions generally could submit tenders for account of customers provided the names of the customers were set forth in such tenders. Others than banking institutions could submit tenders only for their own account. Tenders were received without deposit from incorporated banks and trust companies and from responsible and recognized dealers in investment securities. Tenders from others had to be accompanied by payment of 2 percent of the face amount of the tax anticipation bills applied for, or an express guaranty of payment by an incorporated bank or trust company.

All bidders were required to agree not to purchase or to sell, or to make any agreements with respect to the purchase or sale or other disposition of any bills of the additional issue at a specific rate or price, until after one-thirty p.m., eastern standard time, January 12, 1965.

Payment for accepted tenders in cash or other inmediately available funds was required to be made or completed on January 18. Any qualified depositary was permitted to make payment by credit in its Treasury tax and loan account for 50 percent of the tax anticipation bills allotted to it for itself and its customers up to the amount for which it was qualified in excess of existing deposits.

The additional tax anticipation bills were issued January 18, 1965, and mature June 22, 1965. They will be accepted at par in payment of income taxes due June 15, 1965; to the extent they are not presented for this purpose the face amount will be payable without interest at maturity. Issued in bearer form only, the bills are in denominations of $\$ 1,000, \$ 5,000, \$ 10,000, \$ 50,000, \$ 100,000, \$ 500,000$, and \$1,000,000 (maturity value).

## One-Year Bills

Tenders were invited on December 16, 1964, for the auction on December 23 for $\$ 1$ billion, or thereabouts, of 365-day Treasury bills for cash and in exchange for Treasury bills maturing December 31, 1964. The new bills are dated December $31,1 \% 64$, and mature December 31,1965 , when the face amount is payable without interest.

Of the total $\$ 2,311$ million tenders received, $\$ 1,003$
million, including $\$ 46$ million of noncompetitive tenders, was accepted at the average bank discount rate of 3.972 percent. Noncompetitive tenders for $\$ 200,000$ or less (without stated price) from any one bidder were accepted in full at the everage price of accepted competitive bids.

Requirements relating to deposits with tenders and the denominations of the new one-year bills were like those for the tax anticipation bills described in preceding paragraphs. Payment for accepted tenders was required to be made or completed on December 31, 1964, in cesh or other immediately available funds or a like face amount of Treasury bills maturing on that date. Payment by credit in Treasury tax and loan accounts was not permitted.

## 13-Week and 26-Week Bills

December issues of regular weekly bills totaled \$11.2 billion, refunding an equivalent amount of weekly bills maturing which included the remainder ( $\$ 0.3$ billion) of the strip bills issued July 29, 1964. The new 13-week bills carry 91-day maturities and were issued in amounts of $\$ 1.2$ billion each on December 3, 24, and 31, and in amounts of $\$ 1.3$ billion each on December 10 and 17. All five of the new 26week bills mature in 182 days and were issued in weekly amounts of $\$ 1.0$ billion. Average rates of discount are shown in the table following.

Foreign Series and Foreign Currency Series
In December the Treasury issued nine foreign series certificates of indebtedness totaling \$245 million. Redemptions amounted to $\$ 165$ million.

## Treasury Financing Operations - (Continued)

The new certificates were issued at various interest rates, with 3.43 percent for the shortest term of 1 month, 3.75 percent to 3.90 percent for the seven 3 -month issues, and 3.875 percent for the 6 -month certificate. At the end of December the outstanding foreign series securities totaled $\$ 634$ million.

Foreign currency series bonds outstanding on December 31, 1964, were equivalent to $\$ 1,086$ million and were denominated in Austrian schillings, Belgian francs, German marks, and Swiss francs. There were no transactions in these securities in December

6/ Includes adjustments as follows for: Income taxes not withheld, March - $\$ 6$ million, June $+\$ 106$ million, August $-\$ 4$ million, and N + vember - $\$ 5$ million; income taxes withheld, March - $\$ 50$ million, June $-\$ 57$ million, August $-\$ 78$ million, and November $+\$ 27$ million; transfers to Federal Old-Age and Survivors Insurance Trust Fund, March $+\$ 52$ million, June $-\$ 46$ million, August $+\$ 80$ million, and November $-\$ 24$ million; and tranafers to Federal Disability Insurance Trust Fund, March $+\$ 4$ million, June - $\$ 2$ million, August $+\$ 2$ million, and November $+\$ 2$ million. See also footnote 9.
7 Interest on refunds is included in expenditures in Table 3.
8/ The principal amounts for refunds of employment taxes and certain excise taxes (highway) are excluded from the transfers of tax receipts shown herein, and are included with refunds of internal revenue receipts, applicable to trust accounts.
2/ Amounts appropriated to the Federal 01d-Age and Survivors Insurance Trust Fund are equivalent to the amounts of taxes collected and deposited for old-age insurance. Amounts transferred currently for appropriation to the trust fund are based on estimates of old-age insurance tax receipts made by the Secretary of the Treasury ( 42 U.S.C. 401 (a)), and are adjusted in later transfers on the basis of wage and self-employment income records maintained in the Social Security Administration.
10) The Federsl Disability Insurance Trust Fund was established by the Social Security Act Amendments of 1956, approved August 1, 1956 ( 42 U.S.C. 401 (b)). The act appropriated to the trust fund amounts equivalent to specified percentages of the wages and self-employment income, respectively, which are taxed for old-age insurance, and provided that the amounts appropriated should be transferred from time to time to the trust fund on the same basis as transfers to the Federal 01d-Age and Survivors Insurance Trust Fund. Rates of tax were increased by the percentages appropriated to the Federal Disability Insurance Trust Fund, the increase being applicable to wages paid and taxable years beginning after December 31, 1956.
11. Amounts are appropristed to the Railroad Retirement Account equal to the amount of taxes under the Railroad Retirement Tax Act deposited
in the Tressury, less refunds, during each fiscal year ( 65 Stat. 222 and 66 Stat. 371) and transfers are made currently.
12/ The Employment Security Act of 1960, approved September 13, 1960 ( 42 U.S.C. 1101), established in the Unemployment Trust Fund, an adminsistration account, and appropriated for credit to that account, beginning with fiscal 1961, amounts equivalent to taxes collected and deposited under the Federal Unemployment Tax Act. The tax receipts are transferred currently on the basis of estimates by the Secretary of the Treasury, with later adjustments as necessary. From that account is to be paid the adminiatrative expenses of the employment securily program. Previously the corresponding amounts were included, respectively, in budget receipts and budget expenditures.
13. The Highway Revenue Act of 1956, as amended, (23 U.S.C. 120 , note established a Highway Trust Fund from which are to be made. as provided by appropriation acts, Federal-aid highway expenditures after June 30, 1956, and before October 1, 1972. The act appropriated to this fund amounts equivalent to specified percentages of receipts from certain excise taxes on motor fuels, motor vehicles, tires and tubes, and use of certain vehicles, and provided that the amounts appropriated should be transferred currently to the trust fund on the basis of estimates by the Secretary of the Treasury with proper adjustments to be made in subsequent transfers. Before fiscal 1957 corresponding excise tax receipts were included in net budget receipts and Federal-aid highway expenditures were included in bucget expenditures.
14 For content, see Table 4. These transactions are included in the detail of both budget receipts and expenditures but are deducted from the totals (see Reporting Bases, p. II).
15/ Figures in this column differ from those published under the same caption prior to the September 1960 Treasury Bulletin because of the exclusion of certain interfund transactions (see footnote 1人). Less than $\$ 500,000$.

1. Payments are made between the Railroad Retirement Account and the Federal 0ld-Age and Survivors and Federal Disability Insurance trust funds so as to place those funds in the position in which they would have been if railroad employment after 1936 had been included under social security coverage.
2) Includes interest on amounts reimbursed to the Federal 0ld-Age and Survivors Insurance Trust Fund for administrative expenses.
3 Includes temporary advances to the Railroad Unemployment Insurance Account in the Unemployment Tmast Fund when the balance in the
account is insufficient to meet paymen's of benefits and refunds due or to become due.
4 Repayment of advances plus interest to the Railroad Retirement Account. See footnote 3.
5/ Transfers from the Civil Service Retirement and Disability Fund to the Foreign Service Retirement and Disability Fund.
6/ Contributions and beginning with 1958, transfers of deductions from employees' salaries to the Civil Service Retirement and Disability Fund, and advances to National Park Service.

* Less than $\$ 500,000$.

Consolidated cash transactions reported in the Treasury Bulletin are on a basis consistent with Federal receipts from and paymen $\div$ s to the public as derived in the Budget of the United States (in the Budget for 1965 in Special Analysis A). Shown also is the amount of net cash borrowing from, or repayment of borrowing to, the public. Revisions of the figures for earlier years have been made where necessary to make them as nearly comparable with current Budget classifications as available data will permit. For this reason certain of the figures differ somewhat from those published in previous Budget doccuments as well as in the Bulletin.

This series of cash transactions is designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the account of the Treasurer of the United States. Receipts and payments include transactions both in administrative budget accounts and in trust and deposit fund accounts. Major intragovernmental transactions which are reported as both expenditures and receipts are excluded from
both. Noncash items representing the obligations of the Government to make payments in the future also are eliminated from expenditures currently, but are added later when actual payments are made. These items consist of certain interest accrued on the public debt and expenditures involving the issuance of a few special public debt securities. Checks outstanding, deposits in transit, and other clearing accounts are excluded from payments. Receipts from the exercise of monetary authority are excluded as not representing cash received from the pablic. Federal cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencies and Government-sponsored enterprises through sal es of their own securities. It excludes changes in the public debt which do not represent direct cash borrowing from the public. The net effect of all these transactions with the public is reflected in changes in the balance in the Treasurer's account and in cash held outside the Treasury.

## Source and Avallability of the Balance in the Treasurer's Account

The account of the Treasurer of the United States replects not only budget recelpts snd expenditures but also trust, deposit fund, and public debt trangactions.

The working ossh of the Tressury is held mainly in Treasurer's accounts with Federal Reserve Banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of comercisl banks throughout the country.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to sll banks whereby customers of banks deposit with them tax psyments and funds for the purchase of Government securities. In most cases the transaction involvas merely the transfer of money from a customer's account to the tax and loan account in
the aame bank. On occasions, to the sxtent authorlzod by the Treasury, banke are permitted to deposit in these accounts procesds from subscriptions to public debt securities entered for their own account as well as for the account of their customers.

The tax and loan account syatem permita the Treasury to leave funds in banks and in the communities in which they arlse until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on bank reserves and the economy.

A detailed description of the Treasury's depositary system may be found in the Annual Report of the Seoretary of the Treasury for 1955, pages 275-284.

Table 1.- Status of the Account of the Treasurer of the United States

Source: Daily Treasury statement.
1/ Includes reserves and other deposits of the Board of Trustees, Postal Savings System, and uncollected items, exchanges, etc., through December 1962. Effective January 1963 balances of the Postal Savings System funds were transferred to deposit fund accounts and became demand obligations of the Treasury. Balances of these funds, therefore, are no longer liabilities within the general account of the Treasurer. Uncollected items, exchanges, etc., also previously shown as liabilities were combined with "Unclassified collections, etc." shown under assets. Treasurer's checks outstanding are included
through June 1958, after which they are included in the balance in the Treasurer's account. (See footnote 2).
2/ Through June 1958, the balance of the Treasurer was reduced when Treasurer's checks were issued and the amount of the checks was carried as a liability until paid. Effective July 1958, the balance is not reduced until the checks are paid, a procedure also applying to checks drawn on the Treasurer by Government disbursing officers and agencies.
3/ Amounts shown, beginning January 1963, are net of uncollected items, exchanges, etc. Previously these items were included under liabilities.

1 Special depositaries are permitted to make payment in the form of a deposit credit for the purchase price of U.S. Government securities purchased by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues.
2/ Retirement plan bonds first offered for sale as of January 1, 1963. Taxes eligible for credit consist of those deposited by taxpayers in the depositary banks, as follows: Withheld income tax beginning

March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; and a number of excise taxes beginning July 1953.
4) Under a special procedure begun in March 1951, authorization may be given for income tax payments, or a portion of them, made by checks of $\$ 10,000$ or more drawn on a special depositary bank, to be credited to the tax and loan account in that bank. This procedure is followed during some of the quarterly periods of heavy tax payments.

Note: The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outatanding on that date (the anount actually borrowed in the case of securities sold at a premium or discount, beginning with May 1960). The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. The average annual interest rate is computed by dividing the computed annual interest charge for

the total, or for any group of issues, by the corresponding principal amount. Beginning with data for December 31, 1958, the computation is based on the rate of effective yield for issues sold at premium or discount. Prior to that date it was based on the coupon rate for all issues.
1/ Guaranteed securities included are those held outside the 'Ireasury.
2/ Total includes MOther bonds" through 1960; see Table 3.
3/ Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate. On United States savings bonds the rate to maturity is applied against the amount outstanding.

1 Does not include payments for accrued interest.
2 The effective rate of interest on the new issue is the coupon rate adjusted for the amount paid by or to the Treasury as premium or discount on the new security exchanged for eligible securities originally issued at par. For eligible securities originally issued at prices other than par, the payment by or to the Treasury is applied to the price adjusted for the prorata amortization of the original premium or discount to the date of the advance refunding.

> 3/ Based on the mean of bid and asked prices of securities eligible for exchange (adjusted for payments on account of purchase price of securities issued) at noon on the day before announcement by the Treasury.
> 4 Additional issue.

Table 4.- Redemptions of Matured and Unmatured Savings Bonds

Source: Daily Treasury statement; Office of Debt Analysis in the Office of the Secretary.
Note: In these tables sales of Series $A-F$ and $J$ bonds are included at issue price, and redemptions and amounts outstanding at current redemption value. Series G, $H$, and $K$ are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured $J$ and $K$ bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, and are then transferred to matured debt on which interest has ceased.

1) Sales and redemption flgures include exchanges of minor amounts of (1) matured Series $E$ bonds for Series $G$ and $K$ bonds from May 1951 through April 1957 and (2) Series $F$ and J bonds for Series $H$ bonds beginning January 1960; however, they exclude exchanges of Series E bonds for Series $H$ bonds, which are reported in Table 3.
2) Datails by series on a cumulative basis and by periods for Series A-D comoined will be found in the Fabruary 1952 and previous issues of the Treasury Bulletin.
3/ Because there is a normal lag in classifying redemptions, the distribution of redemptions between sales price and accrued discount has baen estimated. Beginning with the Treasury Bulletin of March 1961 the
method of distributing redemptions between sales price and accrued discount has been changad to reflect the distribution shown in final reports of classified redemptions. All periods shown have been revised on this basis.
$4^{\prime}$ Series F and G sales were discontinued April 30, 1952, and Series J and $K$ sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent adjustments.
5 Includes exchanges of Series 1941 F and $G$ savings bonds for 3-1/4\% marketable bonds of 1978-83.
6/ Includes excharges of Series 1948 F and $G$ bonds for $4-3 / 4 \%$ marketable notes of 1964.
3) Includes exchanges of Series 1949 F and G bonds for $4 \%$ marketable bonds of 1969.
8/ Includes exchanges of Series 1950 F and $G$ bonds for $3-7 / 8 \%$ marketable bonds of 1968.
4) Includes exchanges of Series 1951 and 1952 F and $G$ bonds for 3-7/8\% marketabla bonds of 1971 and $4 \%$ marketable bonds of 1980.
10. Represents changes in the amounts of redemptions not yet classified batween matured and unmatured issues. Less than $\$ 500,000$

Note: The United States also has certain drawing rights on the Internationel Monetary Fund, in which the United States has a quota of \$4, 125 million. In accordence with Fund policies, these drawing rights include the right to draw virtually automatically an amount equel to the sum of the United States gold subscription to the Fund ( $\$ 1,031.2$ million) less net U.S. drawings from the Fund and the Fund's net operational receipts in U.S. dollars. On December 31, 1964, the net bslance of these three amounts was $\$ 769.4$ million. Under appropriate circumstances the United States could draw an additional amount equal to the United States quota.

Fund with the right of repurchase, the proceeds of which are invested by the Fund in U.S. Government securities; es of December 31, 1964, this amounted to $\$ 800$ million. Of this amount, the United States purchased $\$ 200$ million in 1956, $\$ 300$ million in 1959 , and $\$ 300$ million in 1960.

1/ Data represent short-term liabilities to the official institutions of foreign countries and to official international and regional organizations, as reported by banks in the United States, and estimated foreign official holdings of marketable U.S. Government securities with an original maturity of more than one year. Data exclude nonnegotiable, noninterest-bearing special notes held by the Inter-American Development Bank and the International Development Association, and nonmarketable U.S. Treasury notes, foreign series, and nonmarketable U.S. Treasury bonds, foreign currency series.
2) Includes Bank for International Settlements and European Fund.

3/ Data are as reported by the Department of Finance of Canada, adjusted to exclude holdings of nonmarketable U.S. Treasury notes, foreign series. Data on holdings of such notes appear in "International Financial Statistics" section, Table 2.
4) Includes countries in Oceania and Eastern Europe, and Western European dependencies in Latin America.
5) Includes international organizations, and Latin American and European regional organizations, except the Bank for International Settlements and the European Fund which are included in Western Europe.

## Background

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Information on the principal types of data and the principal countries is reported monthly, and is published monthly in the "Treasury Bulletin." Supplementary information is published less frequently. Reports by banks, bankers, securities brokers and dealers, and nonfinancial business concerns in the United States are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury. These statistics are consolidated by the Treasury and published as promptly as possible.

The reporting forms and instructions used in the collection of the statistics have been revised a number of times. The most recent revision became effective with reports covering data as of May 31, 1963.1/ A detailed description of the content of the statistics, including the changes instituted, appeared in the July 1963 issue of the "Treasury Bulletin," pages 79-81. As a result of changes in presentation introduced in that issue, not all breakdowns previously published will be exactly comparable to those now presented.

## Basic definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individıals domiciled outside the United States, including United States citizens domiciled abroad and the foreign subsidiaries and offices of United States banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled. Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the classification "International," "European regional," or "Latin American regional," as appropriate, except for the Bank for International Settlements and the European Fund, which are included in the classification "Other Western Europe."
"Short-term" refers to obligations payable on demand or having an original maturity of one year or less, without deduction of any offsets. "Long-term" refers to obligations having an original maturity of more than one year, and includes securities having no contractual maturity. Exclusions

The data published herein do not cover all types of capital movements between the United States and foreign
countries. The data reported to and published by the Treasury Department exclude entirely the intercompany capital transactions of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies; such transactions are reported by business firms to the Department of Commerce. Data on the capital transactions of the United States Government and on shipments and receipts of United States currency are also excluded from the Treasury reports. Certain capital transactions not effected through reporting institutions, such as securities transactions carried out entirely abroad, are not recorded in the Treasury reports. Consolidated data on all types of capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

The liabilities data exclude nonnegotiable, noninterestbearing special notes of the United States held by the InterAmerican Development Bank and the International Development Association.

The data on securities transactions and on foreign holdings of U.S. Goverment bonds and notes exclude nonmarketable U.S. Treasury notes, foreign series, and nonmarketable U.S. Treasury bonds, foreign currency series (see "International Financial Statistics" section, Table 2).

## Presentation of statistics

Data collected monthly on the Treasury Foreign Exchange Forms are published in the "Treasury Bulletin" in three sections. Section I provides a summary of the principal data by period; Section II presents data by country and by period; and Section III shows detailed breakdowns of the latest available preliminary data.

Section IV presents supplementary data in four tables which appear less frequently than monthly. Table I, shortterm foreign liabilities and claims reported by nonfinancial concerns, is published quarterly in the February, May, August, and November issues of the Bulletin. Table 2 (formerly Table 3), foreign credit and debit balances in brokerage accounts, appears semiannually in the March and September issues. Table 3 (formerly Table 4), short-term banking liabilities to foreigners in countries and areas not regularly reported separately, heretofore has been presented annually in the March issue, but beginning with the August 1963 issue is published twice a year, covering data as of April 30 and December 31. Table 4 (formerly Table 5), purchases and sales of long-term securities by foreigners during the preceding calendar year, appears annually in the April issue. The former Table 2, estimated gold reserves and dollar holdings of foreign countries and international institutions, is now published monthly in the "International Financial Statistics" section.

Note: Data below the line include changes in liabilities and claims reported by a number of banks included in the series beginning December 31, 1961
1 For an explanation of statistical presentation and exclusions, see headnote on page 81.
2) Through 1949, transactions in U. S. Government bonds and notes include transactions in domestic corporate bonds.
3 Change in long-term banking funds during May 1963 reflects the
inclusion of $\$ 85.6$ million of long-term claims previously held but first reported as of May 31, 1963.
4) Change in long-term banking funds during December 1963 reflects the inclusion of 193.2 million of long-term claims reported by banks for the first time as of December 31, 1963, representing in part claims previously held by banks but not reported.

Note: Data represent estimated official and private holdings of 0 . S. Government securities with an original maturity of more then one year. (For exclusions see headnote on page 81.) Annual and monthly data are shown in tbis section beginning February 1964. For quarterly data see Section IV, Table 2, through June 1964; and "International Financial Statistics," Table 4, beginning September 1964. Data a.s of December 31, 1960-63 are on the basis of a November 30, 1960 survey and regular monthly reports of securities transactions (see Table 4). Data for December 31, 1963, also shown on the basis of a July 31, 1963, survey and the monthly transactions reports. For statistical convenience,
the new series is introduced as of December 31, 1963, rather than as of the survey date.

The variations between the two series are believed to result from omissions from, or errors in reporting, shifts in ownership not involving purchases or sales through U. S. banks or brokers, and physical transfers of securities to and from abroad. It is not possible to reconcile the two series or to revise figures for earlier dates.
