Reporting Bases

Data on receipts, expenditures, and debt which appear in the "Treasury Bulletin" are based largely on two Treasury financial reports, the "Daily Statement of the United States Treasury" and the "Monthly Statement of Receipts and Expenditures of the United States Government." Certain monetary statistics are based at least in part on the "Circulation Statement of United States Money." Where these statements are given as sources for individual tables, they are cited by name only. Their respective reporting bases are described below. For other data in the Bulletin, information on sources or reporting bases is given in connection with the tables themselves.

The monthly statement of receipts and expenditures was first published for February 1954, and replaced the daily statement as the primary source of information on budget results and other receipt and expenditure data classified by type of account. At the same time, the daily statement was changed to a statement of cash deposits and withdrawals affecting the account of the Treasurer of the United States. Both publications have provided comparative figures on their respective bases from the beginning of the fiscal year 1953. The announcement of February 17, 1954, with respect to these reporting changes may be found in the April 1954 issue of the Bulletin.

The monthly statement shows all receipts and expenditures of the Government, including those made from cash accounts held outside the United States Treasury. The information is compiled from reports by the Treasurer of the United States and by all other collecting and disbursing agencies, including those agencies which maintain checking accounts in commercial banks. These reports cover transactions recorded in the accounts of the agencies during the reporting period. The net of the transactions as compiled from these reports is reconciled in the monthly statement to changes in the balance in the Treasurer's account and in cash held outside the Treasurer's account and changes in the public debt outstanding.

Receipts of taxes and customs duties are reported on a collections basis. Other receipts are reported partially on a collections basis and partially on a deposits basis. Expenditures, except interest on the public debt, are reported on the basis of checks issued or cash payments made by disbursing officers. Transactions of an interfund or intragovernmental nature are included on the same basis even though the actual issuance of checks may not be involved. Interest on the public debt is included on an accrual basis beginning with figures for June 1955 and the fiscal year 1955. Prior to that, it was included on a due and payable basis. The same reporting basis as that in the monthly statement provides the fiscal year figures for the Treasury's "Combined Statement of Receipts, Expend-

itures and Balances of the United States Government" and for actual receipts and expenditures in the "Budget of the United States Government."

Beginning with the final statement for the fiscal year 1960, the monthly statement reports totals for net budget receipts and budget expenditures after deduction of certain interfund transactions which are included in the detail of both budget receipts and budget expenditures. The transactions deducted consist of interest payments and minor amounts of certain other payments made by Government agencies to the Treasury. This reporting change was made in accordance with the plan stated in the President's Budget Message of January 18, 1960. It does not affect the surplus or deficit. Figures for earlier periods shown in the Treasury Bulletin were revised to the new reporting basis in the September 1960 issue. The interfund transactions deducted under this procedure do not include payments to the Treasury by wholly owned Government corporations for retirement of their capital stock and for disposition of earnings. These capital transfers have been excluded currently from budget receipts and budget expenditures beginning July 1, 1948, and figures for prior fiscal years back through 1932 were revised accordingly at that time.

The daily statement on the new basis was first issued for February 17, 1954. In the deposits and withdrawals as shown, no distinction is made as to the type of accounts (budget, trust, etc.). The deposits are on the basis of certificates of deposit cleared through the account of the Treasurer of the United States. Total withdrawals are on the basis of checks paid or cash disbursements made out of the Treasurer's account. Some of the withdrawal classifications shown are reported on the basis of mailed reports of checks issued and are adjusted by means of clearing accounts to the total of checks paid. Except for relatively minor amounts, noncash interfund and other intragovernmental transactions are excluded. The public debt figures in the daily statement also are on a "clearance" basis, with the exception of those issuance and retirement transactions reported on the basis of telegrams from Federal Reserve Banks. Noncash debt transactions are included, however.

The daily statement before February 17, 1954, covered not only transactions cleared through the Treasurer's account but also certain Government agency transactions which were handled through commercial bank accounts, and included noncash interfund and other intragovernmental transactions. It provided information similar to that in the present daily statement with respect to the status of the Treasurer's account, and similar to that in the present end-of-month daily statement with respect to debt issuance, retirement, and amount outstanding. Receipts and expenditures, however, were classified by type of account, and the budget results shown

Reporting Bases - (Continued)

in the daily statement were used as the basis for reflecting the results under the President's budget program as enacted by the Congress.

Receipts were on the basis of deposits as they cleared the Treasurer's account. Expenditures cleared through the Treasurer's account were reported on two successive bases. Through 1946 they were on the basis of checks paid by the Treasurer of the United States. Beginning with 1947, expenditures made through the facilities of the Treasury Department's Division of Disbursement were on the basis of checks issued, while certain others, principally those of the Department of Defense and its predecessor organizations, were on the basis of checks paid. Transactions han-

dled through commercial bank accounts, consisting of market transactions in public debt and guaranteed securities, were as reported by the agencies. Interest on the public debt was included on a due and payable basis beginning with November 1949 and on a checks-paid basis prior to that time.

The circulation statement reflects transactions through the Treasurer's account which affect monetary stocks of gold and silver and the amounts of coin and currency in the money supply of the country. It is issued later than the daily statement, however, and the figures are based on transactions consummated during the reporting period even though some may not have cleared the Treasurer's account during that period.

Note: Where calculations have been made from unrounded figures, the details may not check to the totals shown.

Treasury Financing Operations

May Refunding

On April 28, the Treasury announced an exchange offering of two securities to holders of two issues maturing May 15, 1965. Owners of the maturing issues, totaling \$8,436 million of Treasury notes, were given the option of exchanging them for a like face amount of either or both of the securities offered. The subscription books were open from May 3 through May 5. Cash subscriptions were not received.

The exchange options consisted of:

an additional amount of 4 percent Treasury notes, Series A-1966, dated February 15, 1962, and to mature August 15, 1966, at 99.85 to yield about 4.12 percent and accrued interest from February 15 to May 15, 1965; or

an additional amount of 4-1/4 percent Treasury bonds of 1974, dated May 15, 1964, and to mature May 15, 1974 at 100.25 to yield about 4.22 percent.

Subscriptions accepted totaled \$7,964 million, leaving \$472 million to be paid in cash. Results of the refunding on a preliminary basis are shown in the accompanying table.

premiums on the bonds. Subscribers for the new 4 percent notes had to pay \$8.33425 per \$1,000, the difference between \$1.50 due them because of the issue price of the note and accrued interest of \$9.83425 per \$1,000 payable by them. Coupons dated May 15, 1965, on the maturing notes in bearer form exchanged for the new notes and bonds were to be detached by holders and cashed when due. Interest on registered notes was paid by check.

Interest on the 4 percent Series A-1966 notes is payable semiannually on August 15, 1965, and on February 15 and August 15, 1966. Interest on the 4-1/4 percent bonds of 1974 is payable semiannually on November 15, 1965, and thereafter on May 15 and November 15 in each year until their maturity. The new issues are not subject to call for redemption prior to maturity; the 4-1/4 percent bonds, however, are redeemable at par prior to maturity in payment of Federal estate taxes if owned by the decedent at time of death.

The new notes and bonds were available in bearer form or

Payment for the face amount of new securities allotted together with cash payments by the subscriber was to be made on or before May 17, 1965 and only in a like face amount of the two maturing notes. Subscribers for the new 4-1/4 percent bonds paid the Treasury \$2.50 per \$1,000, representing the

registered as to principal and interest. Subscribers for registered securities were required to furnish appropriate identifying numbers as required on tax returns and other documents submitted to the Internal Revenue Service. The securities were issued in denominations of \$1,000, \$5,000,

\$10,000, \$100,000, \$1,000,000, \$100,000,000 and \$500,000,000 for the notes, and \$500, \$1,000, \$5,000, \$10,000, \$100,000 and \$1,000,000 for the bonds.

One-Year Bills

Tenders were invited on April 19, for the auction on April 23 of \$1 billion, or thereabouts, of 365-day Treasury bills, for cash and in exchange for Treasury bills maturing April 30, 1965.

Of the total \$2,573 million tenders received, \$1,001 million, including \$37 million of noncompetitive tenders, was accepted at the average bank discount rate of 3.996 percent. Noncompetitive tenders for \$200,000 or less (without stated price) from any one bidder were accepted in full at the average price of accepted competitive bids.

Banking institutions generally could submit tenders for account of customers provided the names of the customers were set forth in such tenders. Others than banking institutions could submit tenders only for their own account. Tenders were received without deposit from incorporated banks and trust companies and from responsible and recognized dealers in investment securities. Tenders from others had to be accompanied by payment of 2 percent of the face amount of the bills applied for, unless the tenders were accompanied by an express guaranty of payment by an incorporated bank or trust company.

Payment for accepted tenders was required to be made or completed on April 30, 1965, in cash or other immediately available funds or in a like face amount of bills maturing April 30, 1965. Payment by credit in Treasury tax and loan accounts was not permitted.

The new bills are dated April 30, 1965, and mature April 30, 1966, when the face amount will be payable without interest. Issued in bearer form only, the bills are in denominations of \$1,000, \$5,000, \$10,000, \$50,000, \$100,000, \$500,000 and \$1,000,000 (maturity value).

13-Week and 26-Week Bills

Issues of regular weekly Treasury bills in April totaled \$11.0 billion, refunding \$10.6 billion of bills maturing and providing \$0.4 billion of new cash. During this fiscal year

the Treasury has raised about \$1.9 billion of new money by increasing the amount of certain weekly bill issues over the amount maturing. The new bills consisted of five 91-day issues of \$1.2 billion each and five 182-day issues of \$1.0 billion each. Average rates of discount for the new issues are shown in the following table.

Foreign Series and Foreign Currency Series

Issues of foreign series securities in April consisted of three 3-month certificates of indebtedness totaling \$155 million. Redemptions during the month totaled \$65 million, including \$5 million payable May 10, 1965.

Interest rates on the new certificates were 3.75 percent for the issue dated April 12, 1965, and 3.95 percent for the issues dated April 1 and April 22. At the end of April foreign series securities outstanding totaled \$699 million.

One foreign currency series bond denominated in Swiss francs equivalent to \$23 million was issued in April. The new bond is dated April 20, 1965, matures July 20, 1966, and carries interest at 4.02 percent per annum. A 15-month bond denominated in Swiss francs equivalent to \$23 million matured on April 20. At the end of the month foreign currency series bonds outstanding were equivalent to \$1,137 million. In addition to Swiss francs the securities are denominated in Austrian schillings, Belgian francs, and German marks.

Note: Details of Treasury market financing operations are shown elsewhere in this issue of the Bulletin in the tables on public debt operations.

Source: Actual figures through 1961 are from reports to the Treasury Department by disbursing officers and administrative agencies, on the monthly statement reporting basis (see page II); and from the monthly statement of receipts and expenditures thereafter. Estimates, including effect of proposed legislation, are from the 1966 Budget

document, released January 25, 1965.

- 1/ Consists of miscellaneous taxes (principally the tonnage tax on foreign vessels entering U. S. ports), bullion charges, gifts and contributions, and undistributed proceeds, sale of foreign currency.

Footnotes to Table 1 - (Continued)

- 6/ Includes small amounts for taxes not classified.
- 7/ Includes \$600 million for hospital insurance for the aged.
- 8/ Includes adjustments as follows: Income taxes not withheld, August -\$4 million, November -\$5 million, and March -\$2 million; income taxes withheld, August -\$78 million, November +\$27 million, and March +\$157 million; transfers to Federal Old-Age and Survivors Insurance Trust Fund, August +\$80 million, November -\$24 million, and March -\$150 million; and transfers to Federal Disability Insurance Trust Fund, August +\$2 million, November +\$2 million, and March -\$4 million. See also footnote 11.
- 9/ Interest on refunds is included in expenditures in Table 3.
- 10/ The principal amounts for refunds of employment taxes and certain excise taxes (highway) are excluded from the transfers of tax receipts shown herein, and are included with refunds of internal revenue receipts, applicable to trust accounts.
- 11/ Amounts appropriated to the Federal Old-Age and Survivors Insurance Trust Fund are equivalent to amounts of taxes collected and deposited for old-age insurance. Amounts transferred currently for appropriation to the trust fund are based on estimates of old-age insurance tax receipts made by the Secretary of the Treasury (42 U.S.C. 401 (a)), and are adjusted in later transfers on the basis of wage and self-employment income records maintained in the Social Security Administration.
- 12/ The Federal Disability Insurance Trust Fund was established by the Social Security Act Amendments of 1956, approved August 1, 1956 (42 U.S.C. 401 (b)). The act appropriated to the trust fund amounts equivalent to specified percentages of the wages and self-employment income, respectively, which are taxed for old-age insurance, and provided that the amounts appropriated should be transferred from time to time to the trust fund on the same basis as transfers to the Federal Old-Age and Survivors Insurance Trust Fund. Rates of tax were increased by the percentages appropriated to the Federal Disability Insurance Trust Fund, the increase being applicable to wages paid and taxable years beginning after December 31, 1956.
- 13/ Amounts are appropriated to the Railroad Retirement Account equal to the amount of taxes under the Railroad Retirement Tax Act deposited in the Treasury, less refunds, during each fiscal year (65 Stat. 222 and 66 Stat. 371) and transfers are made currently.
- 14/ The Employment Security Act of 1960, approved September 13, 1960 (42 U.S.C. 1101), established in the Unemployment Trust Fund, an administration account, and appropriated for credit to that account, beginning with fiscal 1961, amounts equivalent to taxes collected and deposited under the Federal Unemployment Tax Act. The tax receipts are transferred currently on the basis of estimates by the Secretary of the Treasury, with later adjustments as necessary. From that account is to be paid the administrative expenses of the employment security program. Previously the corresponding amounts were included, respectively, in budget receipts and budget expenditures.
- 15/ The Highway Revenue Act of 1956, as amended, (23 U.S.C. 120, note) established a Highway Trust Fund from which are to be made, as provided by appropriation acts, Federal-aid highway expenditures after June 30, 1956, and before October 1, 1972. The act appropriated to this fund amounts equivalent to specified percentages of receipts from certain excise taxes on motor fuels, motor vehicles, tires and tubes, and use of certain vehicles, and provided that the amounts appropriated should be transferred currently to the trust fund on the basis of estimates by the Secretary of the Treasury with proper adjustments to be made in subsequent transfers. Before fiscal 1957 corresponding excise tax receipts were included in net budget receipts and Federal-aid highway expenditures were included in budget expenditures.
- 16/ For content, see Table 4. These transactions are included in the detail of both budget receipts and expenditures but are deducted from the totals (see Reporting Bases, p. II).
- * Less than \$500,000.

They are classified in accordance with classifications used in the 1966 Budget document, Table 18, as nearly as can be done on an individual appropriation and fund item basis. Prior year figures are from the same source but have been adjusted below the appropriation level in some instances by the Bureau of the Budget for use in Table 18. Where current classifications differ on this account, they are footnoted. Revolving fund transactions are included net in the expenditures.

- 1/ Collections in the various States do not necessarily indicate the Federal tax burden of the respective States, since the taxes collected in one State are, in many instances, borne by residents of other States. For example, the withholding taxes reported by employers situated in metropolitan areas near State boundaries include amounts withheld from salaries of employees who reside in neighboring States.
- 2/ Includes old-age and disability insurance taxes on self-employment income.
- 3/ Includes tax on unrelated business income of exempt organizations.
- 4/ Consists of estate and gift taxes, and excise taxes; excise tax receipts deposited by postmasters from sales of documentary stamps; excise taxes on imported items deposited by collectors of customs;

and amounts collected on Puerto Rican products coming into the United States.

- 5/ Includes District of Columbia collections.
- 6/ Consists of collections from U. S. taxpayers in Puerto Rico, Canal Zone, etc., and in foreign countries.
- 7/ The amount of undistributed depository receipts consists of all those issued during the calendar year minus those received with tax returns which are included in the State totals.
- 8/ Withheld taxes covered into the Treasury of Guam (48 U.S.C. 1421h).
- 9/ Net transactions in the clearing account on the central books of the Treasury for income taxes withheld from the salaries of Federal employees.
- * Less than \$500.

Footnotes to Table 10

- 1/ State unemployment funds; used for benefit payments mainly. Beginning August 1961, withdrawals by States have been reduced by reimbursements to State accounts from Federal Extended Compensation Account.
- 2/ Established by the Employment Security Act of 1960, approved September 13, 1960 (42 U.S.C. 1101 (a)), into which are deposited tax receipts transferred in accordance with the act (see "Administrative Budget Receipts and Expenditures," Table 1, footnote 14), and from which are paid the administrative expenses of the employment security program and reimbursement for tax refunds. Receipts consist of appropriated and unappropriated transfers of tax collections.
- 3/ Net of repayments.
- 4/ Amounts represent excess of collections from Federal unemployment tax over expenditures for benefits and administrative expenses which excess was appropriated from the general fund to this account. (Includes amounts appropriated to the State Unemployment Accounts). Beginning 1961, such excess is transferred between book accounts within the Unemployment Trust Fund.
- 5/ Established by the act approved March 24, 1961 (42 U.S.C. 1105(a)), which provides for a temporary program of extended unemployment compensation payments.
- 6/ For payment of benefits and refunds (45 U.S.C. 360). Figures exclude interim advance of \$15 million from the Treasury and subsequent repayment, both in 1940.
- 7/ Contributions under the Railroad Unemployment Insurance Act of 1938, as amended (45 U.S.C. 360 (a)), in excess of the amount specified for administrative expenses. Through 1957, also includes transfers from the administration fund of excess amounts over the specified balance (45 U.S.C. 361 (d)).

- 8/ Temporary advances are made when the balance in the Railroad Unemployment Insurance Account is insufficient to meet payments of benefits and refunds due or to become due. Whenever the balance is sufficient to pay such benefits and refunds, repayments are made, plus interest at 3% per annum, pursuant to an act approved May 19, 1959 (45 U.S.C. 360 (d)).
- 9/ Consists of a specified proportion of contributions deposited in the fund to be available for administrative expenses. The Railroad Unemployment Insurance Administration Fund was established in the Unemployment Trust Fund pursuant to the amending act of September 6, 1958; before that the administration fund was a separate trust fund (45 U.S.C. 361).
- 10/ Total includes \$107.2 million transferred from State accounts to the Railroad Unemployment Insurance Account in connection with its establishment (45 U.S.C. 363).
- 11/ Beginning fiscal 1961 refunds of taxes (principal only) are reported as deduction from receipts. Interest paid on refunds of taxes is included under expenditures. See footnote 14.
- 12/ Includes \$39.3 million proposed advances from the general fund.
- 13/ Includes adjustments to monthly statement basis.
- 14/ Includes small amounts for interest on refunds of taxes.
- 15/ Includes interest.
- 16/ Includes an adjustment of \$7.2 million pursuant to the act of September 6, 1958 (45 U.S.C. 361 (a)).
- 17/ Includes unappropriated receipts beginning September 1960.

* Less than \$50,000.

CONSOLIDATED CASH TRANSACTIONS

Consolidated cash transactions reported in the Treasury Bulletin are on a basis consistent with Federal receipts from and payments to the public as derived in the Budget of the United States (in the Budget for 1966 in Special Analysis A). Shown also is the amount of net cash borrowing from, or repayment of borrowing to, the public. Revisions of the figures for earlier years have been made where necessary to make them as nearly comparable with current Budget classifications as available data will permit. For this reason certain of the figures differ somewhat from those published in previous Budget documents as well as in the Bulletin.

This series of cash transactions is designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the account of the Treasurer of the United States. Receipts and payments include transactions both in administrative budget accounts and in trust and deposit fund accounts. Major intragovernmental transactions which are reported as both expenditures and receipts are excluded from

both. Noncash items representing the obligations of the Government to make payments in the future also are eliminated from expenditures currently, but are added later when actual payments are made. These items consist of certain interest accrued on the public debt and expenditures involving the issuance of a few special public debt securities. Checks outstanding, deposits in transit, and other clearing accounts are excluded from payments. Receipts from the exercise of monetary authority are excluded as not representing cash received from the public. Federal cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencies and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direct cash borrowing from the public. The net effect of all these transactions with the public is reflected in changes in the balance in the Treasurer's account and in cash held outside the Treasury.

ACCOUNT OF THE TREASURER OF THE UNITED STATES

Source and Availability of the Balance in the Treasurer's Account

The account of the Treasurer of the United States reflects not only budget receipts and expenditures but also trust, deposit fund, and public debt transactions.

The working cash of the Treasury is held mainly in Treasurer's accounts with Federal Reserve Banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banks throughout the country.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of money from a customer's account to the tax and loan account in

the same bank. On occasions, to the extent authorized by the Treasury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the account of their customers.

The tax and loan account system permits the Treasury to leave funds in banks and in the communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on bank reserves and the economy.

A detailed description of the Treasury's depository system may be found in the Annual Report of the Secretary of the Treasury for 1955, pages 275-284.

^{1/} Includes reserves and other deposits of the Board of Trustees, Postal Savings System, and uncollected items, exchanges, etc., through December 1962. Effective January 1963 balances of the Postal Savings System funds were transferred to deposit fund accounts and became demand obligations of the Treasury. Balances of these funds, therefore, are no longer liabilities within the general account of the Treasurer. Uncollected items, exchanges, etc., also previously shown as liabilities were combined with "Unclassified collections, etc." shown under assets. Treasurer's checks outstanding are included

through June 1958, after which they are included in the balance in the Treasurer's account. (See footnote 2).

^{2/} Through June 1958, the balance of the Treasurer was reduced when Treasurer's checks were issued and the amount of the checks was carried as a liability until paid. Effective July 1958, the balance is not reduced until the checks are paid, a procedure also applying to checks drawn on the Treasurer by Government disbursing officers and agencies.

^{3/} Amounts shown, beginning January 1963, are net of uncollected items, exchanges, etc. Previously these items were included under liabilities.

^{1/} Special depositories are permitted to make payment in the form of a deposit credit for the purchase price of U.S. Government securities purchased by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues.

^{2/} Retirement plan bonds first offered for sale as of January 1, 1963.

^{3/} Taxes eligible for credit consist of those deposited by taxpayers in the depository banks, as follows: Withheld income tax beginning

March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; and a number of excise taxes beginning July 1953.

^{4/} Under a special procedure begun in March 1951, authorization may be given for income tax payments, or a portion of them, made by checks of \$10,000 or more drawn on a special depository bank, to be credited to the tax and loan account in that bank. This procedure is followed during some of the quarterly periods of heavy tax payments.

Note: The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outstanding on that date (the amount actually borrowed in the case of securities sold at a premium or discount, beginning with May 1960). The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. The average annual interest rate is computed by dividing the computed annual interest charge for

the total, or for any group of issues, by the corresponding principal amount. Beginning with data for December 31, 1958, the computation is based on the rate of effective yield for issues sold at premium or discount. Prior to that date it was based on the coupon rate for all issues.

1/ Guaranteed securities included are those held outside the Treasury.

2/ Total includes "Other bonds" through 1960; see Table 3.

Source: Bureau of the Public Debt. Preliminary figures are from subscription and allotment reports; final figures are on "clearance basis" in daily Treasury statement.

1/ Original call and maturity dates are used.

2/ All by investors other than Federal Reserve Banks.

3/ Rolled over into a one-year bill (see Table 4).

4/ Holders of the maturing certificates were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the 3-1/4% notes offered in the amount of around \$6.9 billion. For detail of offering, see Table 4.

5/ Excess of maturing 4-7/8% certificates over allotments of new securities on subscriptions from holders of those certificates (see Table 4, footnotes 6 and 7).

6/ Advance refunding offering. Pursuant to the provisions of section 1037 (a) of the Internal Revenue Code of 1954 as added by Public Law 86-346, approved September 22, 1959, the Secretary of the Treasury has declared that no gain or loss shall be recognized for Federal income tax purposes upon the exchange of the eligible outstanding securities solely for the new securities. For tax purposes, therefore, the investor will carry the new securities on his books at the same amount as he had been carrying the eligible securities exchanged. Gain or loss, if any, upon the securities surrendered in exchange will be taken into account upon the disposition or redemption of the new securities. See also Table 5.

7/ From March 20 through March 22, 1961, owners of 2-1/4% bonds of June 15, 1959-62, 2-1/4% bonds of December 15, 1959-62, 2-5/8% notes maturing February 15, 1963, and 2-1/2% bonds maturing August 15, 1963, were granted the option of exchanging their holdings. The first three were exchangeable for a new 3-5/8% bond due November 15, 1967, and the last for a new 3-3/8% bond due November 15, 1966. Exchanges

were subject to allotment if subscriptions exceeded \$5 billion for the bonds of 1967 or \$3 billion for the bonds of 1966.

8/ Tax anticipation issue; for detail of offerings beginning 1961, see Table 4; for amounts redeemed for taxes and for cash see "Note" below.

9/ Holders of the maturing certificates and notes were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the \$5,250 million offering of 3% certificates or the \$2,500 million offering of 3-1/4% notes. For detail of offering, see Table 4.

10/ Excess of maturing 4-3/8% certificates and 3-5/8% notes over allotments of new securities on subscriptions from holders of those certificates and notes (see Table 4, footnotes 12 and 13).

11/ Reopening of an earlier issue.

12/ \$1,569 million was redeemed for cash and \$168 million was exchanged for the tax anticipation bills dated March 23, 1962 (see Table 4).

13/ Holders of the maturing notes were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the \$6,500 million offering of 3-1/2% certificates, the \$1,500 million offering of 4% bonds, or the \$750 million offering of 4-1/4% bonds. For detail of offering, see Table 4.

14/ Excess of maturing 4% notes and 3-1/4% notes over allotments of new securities on subscriptions from holders of those notes (see Table 4, footnotes 27 and 28).

Note: In these tables sales of Series A-F and J bonds are included at issue price, and redemptions and amounts outstanding at current redemption value. Series G, H, and K are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured J and K bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, and are then transferred to matured debt on which interest has ceased.

- 1/ Sales and redemption figures include exchanges of minor amounts of (1) matured Series E bonds for Series G and K bonds from May 1951 through April 1957 and (2) Series F and J bonds for Series H bonds beginning January 1960; however, they exclude exchanges of Series E bonds for Series H bonds, which are reported in Table 3.
- 2/ Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the Treasury Bulletin.
- 3/ Because there is a normal lag in classifying redemptions, the distribution of redemptions between sales price and accrued discount has been estimated. Beginning with the Treasury Bulletin of March 1961 the

method of distributing redemptions between sales price and accrued discount has been changed to reflect the distribution shown in final reports of classified redemptions. All periods shown have been revised on this basis.

- 4/ Series F and G sales were discontinued April 30, 1952, and Series J and K sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent adjustments.
- 5/ Includes exchanges of Series 1941 F and G savings bonds for 3-1/4% marketable bonds of 1978-83.
- 6/ Includes exchanges of Series 1948 F and G bonds for 4-3/4% marketable notes of 1964.
- 7/ Includes exchanges of Series 1949 F and G bonds for 4% marketable bonds of 1969.
- 8/ Includes exchanges of Series 1950 F and G bonds for 3-7/8% marketable bonds of 1968.
- 9/ Includes exchanges of Series 1951 and 1952 F and G bonds for 3-7/8% marketable bonds of 1971 and 4% marketable bonds of 1980.
- 10/ Represents changes in the amounts of redemptions not yet classified between matured and unmatured issues.

TREASURY SURVEY OF OWNERSHIP, MARCH 31, 1965

The monthly Treasury Survey of Ownership covers securities issued by the United States Government and by Federal agencies. The banks and insurance companies included in the Survey currently account for about 90 percent of all such securities held by these institutions. The similar proportion for corporations and for savings and loan associations is 50 percent, and for State and local governments, 70 percent. Data were first published for banks and insurance companies in the May 1941 Treasury Bulletin, for

corporations and savings and loan associations in the September 1960 Bulletin, and for State and local governments in the February 1962 Bulletin.

Holdings by commercial banks distributed according to Federal Reserve member bank classes and nonmember banks are published for June 30 and December 31. Holdings by corporate pension trust funds are published quarterly, first appearing in the March 1954 Bulletin.

- 1/ Includes public debt not subject to statutory limitation. For amount subject to limitation, see page 1.
2/ Excludes trust departments.
3/ Includes trust companies and beginning with figures for July 1949, also includes stock savings banks. Previously, those banks were reported as a separate classification.
4/ New series; see March 1964 Treasury Bulletin, page 70.
5/ Included with all other investors are those banks, insurance companies, savings and loan associations, corporations, and State and local government funds not reporting in the Treasury Survey.

7/ United States savings bonds, Series E and J, are reported to the Treasury Survey at maturity value but have been adjusted to current redemption value for use in this statement.
8/ Includes \$48 million depository bonds held by commercial banks not included in the Treasury Survey.
9/ Holdings by reporting investors are not available.
10/ Guaranteed securities are those held outside the Treasury.
11/ Includes only publicly offered issues.
12/ The proprietary interest of the United States in these banks ended in July 1951.
13/ The proprietary interest of the United States in these banks ended in June 1947.
* Less than \$500,000.

1/ Beginning April 1953, prices are closing bid quotations in the over-the-counter market. Prices for prior dates are the mean of closing bid and ask quotations. "When issued" prices are included in the history beginning October 1941. Dates of highs and lows in case of recurrence are the latest dates.

2/ On callable issues market convention treats the yield to earliest call date as more significant when an issue is selling above par, and to maturity when it is selling at par or below.

3/ Included in the average yield of long-term taxable Treasury bonds as shown under "Average Yields of Long-Term Bonds."

YIELDS OF TREASURY SECURITIES, APR. 30, 1965 Based on Closing Bid Quotations

Note: The smooth curve is fitted by eye. Market yields on coupon issues due in less than 3 months are excluded.

Source: Beginning April 1953, Treasury bond yields are reported to the Treasury by the Federal Reserve Bank of New York, based on closing bid quotations in the over-the-counter market. Yields for prior periods were computed on the basis of mean of closing bid and ask quotations. Moody's Investor Service is the source for the average of Aaa corporate bonds.

1/ Series includes bonds on which the interest income is subject to normal tax and surtax and which are neither due nor callable before a

given number of years as follows: April 1953 to date, 10 years; April 1952 - March 1953, 12 years; October 1941 - March 1952, 15 years. For bonds currently in the series, see Table 3 under "Market Quotations on Treasury Securities" in this issue of the Bulletin.

^{1/} Excludes money held by the Treasury and money held by or for the account of the Federal Reserve Banks and agents.

^{2/} The following paper currencies are in process of retirement and are redeemable from the general fund of the Treasury: Gold certificates issued before January 30, 1934, silver certificates issued before July 1, 1929, Treasury notes of 1890, Federal Reserve notes issued before the series of 1928, Federal Reserve Bank notes, and national bank notes. The Treasury notes of 1890 have been in process of retirement since March 1900 (31 U.S.C. 411) upon receipt by the Treasury, the Federal Reserve Bank notes since June 12, 1945 (12 U.S.C. 445 note), and the national bank notes since December 23, 1915 (12 U.S.C. 441). Retirement of the others was authorized by the Old Series Currency Adjustment Act, approved June 30, 1961 (31 U.S.C. 912-916). The act authorizes the Secretary of the Treasury to determine from time to time the amount of currency of the following types which have been destroyed or lost, and to reduce the amounts thereof on the books of the Treasury: Gold certificates issued before January 30, 1934; silver certificates, United States notes, Federal Reserve Bank notes, and national bank notes all issued before July 1, 1929; Federal Reserve notes issued prior to the series of 1928; and Treasury notes of 1890. Accordingly, the Secretary of the Treasury has determined

that the following paper currencies have been destroyed or irretrievably lost and so will never be presented for redemption: On October 20, 1961, \$1 million of Treasury notes of 1890; on August 27, 1962, \$9 million of gold certificates, \$15 million of silver certificates, \$18 million of Federal Reserve notes, \$1 million of Federal Reserve Bank notes, and \$15 million of national bank notes; and on November 16, 1964, \$6 million of gold certificates, \$14.5 million of silver certificates, \$100 thousand of Treasury notes of 1890, \$24 million of United States notes, \$14 million of Federal Reserve notes, \$1 million of Federal Reserve Bank notes, and \$13.5 million of national bank notes.

^{3/} Highest amount to date.

^{4/} Issued prior to January 30, 1934.

^{5/} Includes \$427 thousand issued before July 1, 1929.

^{6/} Includes \$4 million issued prior to the series of 1928.

^{7/} Based on the Bureau of the Census estimated population. Through fiscal 1958 the estimated population is for the conterminous United States (that is, exclusive of Alaska, Hawaii, and the outlying areas such as Puerto Rico, Guam, and the Virgin Islands). Beginning with fiscal 1959 the estimates include Alaska, and with fiscal 1960, Hawaii.

Note: The United States also has certain drawing rights on the International Monetary Fund, in which the United States has a quota of \$4,125 million. In accordance with Fund policies, these drawing rights include the right to draw virtually automatically an amount equal to the sum of the United States gold subscription to the Fund (\$1,031.2 million) less net U.S. drawings from the Fund and the Fund's net operational receipts in U. S. dollars. On April 30, 1965, the net balance of these three amounts was \$708.3 million. Under appropriate circumstances the United States could draw an additional amount equal to the United States quota.

^{1/} Includes gold sold to the United States by the International Monetary

Fund with the right of repurchase, the proceeds of which are invested by the Fund in U.S. Government securities; as of April 30, 1965, this amounted to \$800 million. Of this amount, the United States purchased \$200 million in 1956, \$300 million in 1959, and \$300 million in 1960.

^{2/} Includes gold in Exchange Stabilization Fund, which is not included in Treasury gold figures shown in "Circulation Statement of United States Money." See "Monetary Statistics," Table 3.

^{3/} Includes holdings of Treasury and Federal Reserve System.

CAPITAL MOVEMENTS

Background

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Information on the principal types of data and the principal countries is reported monthly, and is published monthly in the "Treasury Bulletin." Supplementary information is published less frequently. Reports by banks, bankers, securities brokers and dealers, and nonfinancial business concerns in the United States are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury. These statistics are consolidated by the Treasury and published as promptly as possible.

The reporting forms and instructions used in the collection of the statistics have been revised a number of times. The most recent revision became effective with reports covering data as of May 31, 1963.^{1/} A detailed description of the content of the statistics, including the changes instituted, appeared in the July 1963 issue of the "Treasury Bulletin," pages 79-81. As a result of changes in presentation introduced in that issue, not all breakdowns previously published will be exactly comparable to those now presented.

Basic definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including United States citizens domiciled abroad and the foreign subsidiaries and offices of United States banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled. Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the classification "International," "European regional," or "Latin American regional," as appropriate, except for the Bank for International Settlements and the European Fund, which are included in the classification "Other Western Europe."

"Short-term" refers to obligations payable on demand or having an original maturity of one year or less, without deduction of any offsets. "Long-term" refers to obligations having an original maturity of more than one year, and includes securities having no contractual maturity.

Exclusions

The data published herein do not cover all types of capital movements between the United States and foreign countries. The data reported to and published by the Treasury Department exclude entirely the intercompany capital transactions of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies; such transactions are reported by business firms to the Department of Commerce. Data on the capital transactions of the United States Government and on shipments and receipts of United States currency are also excluded from the Treasury reports. Certain capital transactions not effected through reporting institutions, such as securities transactions carried out entirely abroad, are not recorded in the Treasury reports. Consolidated data on all types of capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

The liabilities data exclude nonnegotiable, noninterest-bearing special notes of the United States held by the Inter-American Development Bank and the International Development Association.

The data on securities transactions and on foreign holdings of U.S. Government bonds and notes exclude non-marketable U.S. Treasury notes, foreign series, and non-marketable U.S. Treasury bonds, foreign currency series (see "International Financial Statistics" section, Table 2).

Presentation of statistics

Data collected monthly on the Treasury Foreign Exchange Forms are published in the "Treasury Bulletin" in three sections. Section I provides a summary of the principal data by period; Section II presents data by country and by period; and Section III shows detailed breakdowns of the latest available preliminary data.

Section IV presents supplementary data which are reported less frequently than monthly. Beginning with the April 1965 issue, these tables are published each month.

^{1/} Copies of the reporting forms and instructions may be obtained from the Office of Balance of Payments Programs, Operations and Statistics, Office of the Assistant Secretary for International Affairs, Treasury Department, Washington, D.C. 20220 or from Federal Reserve Banks.

1/ For an explanation of statistical presentation and exclusions, see headnote on page 87.

2/ Through 1949, transactions in U. S. Government bonds and notes include transactions in domestic corporate bonds.

3/ Data below the line include changes in liabilities and claims reported by a number of banks included in the series beginning December 31, 1961.

4/ Change in long-term banking funds during May 1963 reflects the inclusion of \$35.6 million of long-term claims previously held but first reported as of May 31, 1963.

5/ Change in long-term banking funds during December 1963 reflects the inclusion of \$193.2 million of long-term claims reported by banks for the first time as of December 31, 1963, representing in part claims previously held by banks but not reported.

6/ Data below the line on changes in claims reflect the exclusion from the series beginning December 31, 1964 of short-term U. S. Note: Data represent estimated official and private holdings of U. S. Government securities with an original maturity of more than one year. (For exclusions see headnote on page 81.) Annual and monthly data are shown in this section beginning February 1964. For quarterly data see Section IV, Table 2, through June 1964; and "International Financial Statistics," Table 4, beginning September 1964. Data as of December 31, 1961-63 are on the basis of a November 30, 1960 survey and regular monthly reports of securities transactions (see Table 4). Data for December 31, 1963, also are shown on the basis of a July 31, 1963, survey and the monthly

transactions reports. For statistical convenience, the new series is introduced as of December 31, 1963, rather than as of the survey date.

The variations between the two series are believed to result from omissions from, or errors in reporting, shifts in ownership not involving purchases or sales through U.S. banks or brokers, and physical transfers of securities to and from abroad. It is not possible to reconcile the two series or to revise figures for earlier dates.

^{1/} As reported by exporters, importers, industrial and commercial firms, and other nonfinancial concerns in the United States. Data exclude claims held through United States banks, and intercompany accounts between United States companies and their foreign affiliates. Beginning with this issue, the detailed breakdown as of the most recent date for which data are available will be shown in Table 1A of this Section.

^{2/} Data are included from firms reporting for the first time as of March 31, 1963 (seventh revised series), and December 31, 1963 (eighth

revised series). The eighth revised series also includes claims previously held but not reported. The ninth revised series includes reports from firms having \$500 thousand or more of liabilities or of claims; for previous series the exemption level was \$100 thousand. The exemption level was raised to relieve smaller firms of reporting, without affecting the reliability of the statistics.

CORPORATIONS AND CERTAIN OTHER BUSINESS-TYPE ACTIVITIES

The current financial statements of corporations and certain other business-type activities of the United States Government which appear in the "Treasury Bulletin" beginning with the August 1956 issue are compiled from reports submitted to the Treasury under Department Circular No. 966, issued January 30, 1956, and Supplement No. 1, issued June 1, 1956. The regulations so issued are pursuant to Section 114 of the Budget and Accounting Procedures Act of 1950 (31 U.S.C. 66b), and represent another step in the program of comprehensive and integrated Government accounting and financial reporting for which authority was provided in that act. They supersede Budget-Treasury Regulation No. 3, issued under Executive Order No. 8512 of August 13, 1940, as amended by Executive Order No. 9084 of March 3, 1942, under which financial statements previously published in the Bulletin were submitted.

In coverage, Department Circular No. 966 requires submission of financial statements by all wholly owned and mixed-ownership Government corporations specifically included in the Government Corporation Control Act, as amended (31 U.S.C. 846, 856); and all other activities of the Government operating as revolving funds for which business-type public enterprise or intragovernmental fund budgets are required by the Bureau of the Budget. Other activities and agencies whose operations, services, or functions are largely self-liquidating or primarily of a revenue-producing nature, and activities and agencies whose operations result in the accumulation of substantial inventories, investments and other recoverable assets, may be brought under the regulations as agency accounting systems are developed to the point where they are capable of furnishing the financial reports required.

Four kinds of financial statements are called for by Department Circular No. 966. They are statements of financial condition, income and expense, source and application of funds, and certain commitments and contingencies. The

statements of financial condition are published quarterly and appear as Section I in the series of tables. The first data under the new regulations are for March 31, 1956, and were presented in the August 1956 Bulletin. Statements of income and expense and source and application of funds are published semiannually, for June 30 and December 31 reporting dates, and appear as Sections II and III. The first of these statements under the new regulations cover the fiscal year 1956, and were published in the January 1957 Bulletin. Within the sections, the agencies are grouped in separate tables by type, as follows: public enterprise revolving funds, intragovernmental revolving funds, certain other activities, deposit funds, and trust revolving funds.

Supplement No. 1 added to the coverage by including all executive agencies and activities not reporting under Department Circular No. 966, but required only a statement of financial condition annually as of June 30. These are mainly not business-type activities, and those which had not yet developed formal accounting procedures to provide complete balance sheet types of statements were authorized temporarily to report only the asset side. Thus the supplement rounds out provision for the information on properties and assets of the United States Government which the Treasury has been asked to furnish to the Committee on Government Operations, House of Representatives, for a continuing study of the assets of the Government. The first comprehensive reporting under Supplement No. 1 is for June 30, 1957, and the data were published in the December 1957 issue of the Bulletin as Part B of Table 4 in Section I.

A summary of loans outstanding for a series of dates is included in Section I of the Bulletin presentation beginning with the June 1958 issue. Two classifications of the loans are shown, one by type and one by agency. Data prior to 1956 are based on the earlier reporting requirements, which provided for complete coverage of Government lending agencies.
