## ne-Year Bills Refunded

On August 18.tenders were invited for the auction on ugust 24 of $\$ 1.0$ billion, or thereabouts, of 365 -day Treasury ills, for cash and in exchange for Treasury bills maturing ugust 31, 1965. Tenders totaling $\$ 1,927$ million were reeived, of which $\$ 1,000$ million was accepted, including $\$ 34$ nillion of noncompetitive tenders, at the average bank discount ate of 4.006 percent. Noncompetitive tenders for $\$ 200,000$ or ess without stated price from any one bidder were accepted in 'ull at the average price of accepted competitive bids.

The new one-year bills are dated August 31, 1965 and will hature August 31, 1966, when the face amount will be payable rithout interest. Issued in bearer form only, the bills are in lenominations of $\$ 1,000, \$ 5,000, \$ 10,000, \$ 50,000, \$ 100,000$, $; 500,000$ and $\$ 1,000,000$ (maturity value).

Banking institutions generally could submit tenders for "ccount of customers provided the names of the customers were pet forth in such tenders. Others than banking institutions :ould submit tenders only for their own account. Tenders rere received without deposit from incorporated banks and trust ompanies and from responsible and recognized dealers in inestment securities. Tenders from others had to be accompanied y payment of 2 percent of the face amount of the bills pplied for, unless the tenders were accompanied by an express uaranty of payment by an incorporated bank or trust company.

Payment for accepted tenders was required to be made or |ompleted on August 31, 1965, in cash or other immediately vailable funds or in a like face amount of bills maturing on hat date. Payment by credit in Treasury tax and loan accounts as not permitted.

3-Week and 26-Week Bills
New issues of regular weekly Treasury bills in August otaled $\$ 8.8$ billion, refunding an equivalent amount maturing. he August bills consisted of four 13-week issues of \$1.2 bilion each and four 26 -week issues of $\$ 1.0$ billion each. The 3-week bills issued August 12 and August 26 carry 92-day matu-
rities and the ones issued August 5 and August 19 carry 91-day maturities. All of the 26 -week issues mature in 182 days. Average rates for the new issues are shown in the following table.

## Reporting Bases

Data on receipts, expenditures, and debt which appear in the "Treasury Bulletin" are based largely on two Treasury financial reports, the "Daily Statement of the United States Treasury" and the "MonthIy statement of Recelpts and Expenditures of the United States Govermnent." Certain monetary statistics are based at least in part on the "Circulation Statement of United States Aoney." Where these statements are given as sources for individual tables, they are cited by name only. Their respective reporting bases are described below. For other data in the Bulletin, information on sources or reporting beses is given in connection with the tables themselves.

The monthly statement of receipts and expenditures was first published for February 1954, and replaced the daily statement as the primary source of information on budget results and other receipt and expenditure data classified by type of account. At the same time, the dally statement was changed to a statement of cash deposits and withdrawals affecting the account of the Treasurer of the United States. Both publications have provided comparative figures on their respective bases from the beginning of the fiscal year 1953. The announcement of February 17, 1954, with respect to these reporting changes may be found in the April 2954 issue of the Bulletin.

The monthly statement shows all recelpts and expenditures of the Government, including those made from cash accounts held outside the United states Treasury. The information is complled from reports by the Treasurer of the United States and by all other collecting and disbursing agencies, including those agencies which maintain checkins accounts in commercial banks. These reports cover transactions recorded in the accounts of the agencies during the reporting period. The net of the transactions as complled from these reports is reconciled in the monthly statement to changes in the balance in the Treasurer's account and in cash held outside the Treasurer's account and changes in the public debt outstanding.

Recelpts of taxes and customs duties are reported on a collections basis. Other receipts are reported partially on a collections basis and partially on a deposits basis. Expenditures, except interest on the public debt, are reported on the basis of checks issuec or cash payments made by disbursing officers. Transactions of an interfund or intragovernmental nature are included on the same basis even though the actual issuance of checks may not be involved. Interest on the public debt is included on an accrual basis beginning with figures for June 1955 and the fiscal year 1955. Prior to that, it was included on a due and payable basis. The same reportiny basis as that in the monthly statement provides the fiscal year figures for the Treasury's "Comoined Statement of Receipts, Expend-
itures and Balances of the United states Government" an for actual receipts and expenditures in the "Budget of th United States Government."

Beginning with the final statement for the fisce year 1960, the monthly statement reports totals for $n \in$ budget recelpts and budget expenditures aiter deductic of certain interfund transactions which are included : the detail of both budget receipts and budget expenditurei The transactions deducted consist of interest payments ar minor amounts of certain other payments made by Governmer agencies to the Treasury. This reporting change was made accordance with the plan stated in the President's Budg Message of January 18,1960 . It does not affect the surpl or deficit. Figures for earlier periods shown in the Tres ury Bulletin were revised to the new reporting basis in $t$ September 1960 1ssue. The interfund transactions deduct under this procedure do not include payments to the Trea ury by wholly owned Government corporations for retireme of their capital stock and for disposition of earning These capital transfers have been excluded currently fr budget receipts and budget expenditures beginning July 1948, and figures for prior fiscel years back throueh 19 were revised accordinaly at that time.

The daily statement on the new basis was first issu for February 17, 1954. In the deposits and withdrawals shown, no distinction is made as to the type of accoun (budget, trust, etc.). The deposits are on the basis certificates of deposit cleared through the account of $t$ Treasurer of the United States. Total withdrawals are the basis of checks pali or cash disbursements made out the Treasurer's account. Some of the withdrawal class fleations shown are reported on the basis of malled repor of checks issued and are adjusted by means of clearing $\varepsilon$ counts to the total of checks paid. Except for relative minor amounts, noncash interfund and other intragovernmen transactions are excluded. The public debt figures in t dally statement also are on a "clearance" basis, with $t$, exception of those issuance and retirement transactici reported on the basis of telegrams from Federal Resex Banks. Noncash debt transactions are included, howev

The dally statement before February 17, 1954, cover not only transactions cleared through the Treasurer's \& count but also certain Government agency transactions wh. were handled through commercial bank accounts, and incluri noncash interfund and other intragovernmental transaction It provided information similar to that in the present day statement with respect to the status of the Treasurer's count, and similar to that in the present end-of-month day statement with respect to debt issuance, retirement, il amount outstanding. Receipts and expenditures, however, we classified by type of account, and the budget results she 3

## Reporting Bases - (Continued)

In the dally statement were used a the basis for reflecting the results under the President's budget program as enacted py the Congress.

Recelpts were on the basis of deposits as they cleared the Treasurer's account. Expenditures cleared through the Ireasurer's account were reported on two successive bases. Through 1946 they were on the basis of checks paid by the Treasurer of the United States. Beginning with 1947, expenditures made through the facilities of the Treasury Department's Division of Disbursement were on the basis of checks issued, while certain others, principally those If the Department of Defense and its predecessor organizalions, were on the basis of checks paid. Transactions han-
dled through commercial bank accounts, consisting of market transactions in public debt and guaranteed securities, were as reported by the agencies. Interest on the public debt was included on a due and payable basis beginning with November 1949 and on a checks-pald basis prior to that time.

The circulation statement reflects transactions through the Treasurer's account which affect monetary stocks of gold and silver and the amounts of coin and currency in the money supply of the country. It is issued later than the daily statement, however, and the figures are based on transpctions consummated during the reporting period even though some may not have cleared the Treasurer's account during that period.

Source: Actual figures are from the monthly statement of receipts and expenditures of the Government (for explanation of reporting bases, see page II); estimates, including effect of proposed legislation, are from the 1966 Budget document released January 25, 1965. Later estimates contained in testimony of the Sacretary of the Treasury before the Senate Finance Committee on June 15, 1965, are as follows: Receipts $\$ 95.4$ billion; expenditures $\$ 99.7$ billion; and deficit $\$ 4.3$ billion.
1 The distribution of raceipts between individual income taxes and oldage and disability insurance taxes is made in accordance with provisions of Sec. 201 of Social Security Act, as amgnded ( 42 U.S.C. 401),
for transfer to the Federal Old-Age and Survivors Insurance Trust Fund (see footnote 11), and also for transfer to the Federal Disability Insurance Trust Fund (see footnote 12).
2) Taxes on employers and employees under the Federal Insurance Contributions Act, as amended (26 U.S.C. 3101-3125), and tax on self-employed individuals under the Self-Employment Contributions Act, as amended ( 26 U.S.C. 1401-1403). The Social Security Act Amendments of 1956, approved August 1, 1956, increased the rates of tax applicable to wages paid and taxable years beginning after December 31, 1956, to provide for disability insurance.

## Footnotes to Table 1 - (Continued)

3) Taxes on carriers and their employees under the Railroad Retirement Tax Act, as amended ( 26 U.S.C. 3201-3233).
4) Tax on employers of 4 or more under the Federal Unemployment Tax Act, as amended ( 26 U.S.C. 3301-3308).
5) Includes collections under increased rates in the Highway Revenue Act of 1956 (see footnote 15 ).
6/ Includes small amounts for taxes not classified.
7/ Includes $\$ 600$ million for hospital insurance for the aged.
8/ Includes adjustments as follows: Income taxes not withheld, March -\$2 million, June $+\$ 86$ million and August - $\$ 4$ million; income taxes withheld, March $+\$ 27$ million, June $-\$ 7$ million and August $-\$ 202$ million; transfers to Federal 01d-Age and Survivors Insurance Trust Fund, March - $\$ 150$ million, June $-\$ 74$ million and August $+\$ 187$ million; and transfers to Federal Disability Insurance Trust Fund, March - $\$ 4$ million, June $-\$ 5$ million and August $+\$ 18$ million. See also footnote 11.
9/ Interest on refunds is included in expenditures in Table 3.
6) The principal amounts for refunds of employment taxes and certain excise taxes (highway) are excluded from the transfers of tax receipts shown herein, and are included with refunds of internal revenue receipts, applicable to trust accounts.
11 Amounts appropriated to the Federal 01d-Age and Survivors Insurance Trust Fund are equivalent to amounts of taxes collected and deposited for old-age insurance. Amounts transferred currently for appropriation to the trust fund are based on estimates of old-age insurance tax raceipts made by the Secretary of the Treasury ( 42 U.S.C. 401 (a)), and are adjusted in later transfers on the basis of wage and self-employment income records maintained in the Social Security Administration.
12 The Federal Disability Insurance Trust Fund was established by the Social Security Act Amendments of 1956, approved August 2, 1956 ( 42 U.S.C. 401 (b)). The act appropriated to the trust fund amounts equivalent to specified percentages of the wages and self-employment income, respectively, which are taxed for old-age insurance, and provided that the amounts appropriated should be transferred from time to tima to the trust fund on the same basis as transfers to the Faderal 01d-Age and Survivore Insurance Trust Fund. Rates of tax ware increasad by the
percentages appropriated to the Federal Disability Insurance Trust Fund, the increase being applicable to wages paid and taxable years beginning after December 31, 1956.
13/ Amounts are appropriated to the Railroad Retirement Account equal to the amount of taxes under the Railroad Retirement Tax Act deposited in the Treasury, less refunds, during each fiscel year ( 65 Stat. 222 and 66 Stat. 371) and transiers are made currently.
$14^{\prime}$ (The Employment Security Act of 1960, approved September 13, 1960 ( 42 U.S.C. 1101), established in the Unemployment Trust Fund, an administration account, and appropriated for credit to that account, beginning with fiscal 1961, amounts equivalent to taxes collected and deposited under the Federal Unemployment Tax Act. The tax receipts are transferred currently on the basis of estimates by the Secretary of the Treasury, with later adjustments as necessary. From that account is to be paid the administrative expenses of the employment security program. Previously the corresponding amounts were included, respectively, in budget receipts and budget expenditures.
7) The Highway Revenue Act of 1956 , as amended, ( 23 U.S.C. 120 , note) established a Highway Trust Fund from which are to be made, as provided by appropriation acts, Federal-aid highway expenditures after June 30,1956 , and before October 1, 1972. The act appropriated to this fund amounts equivalent to specified percentages of receipts from certain excise taxes on motor fuels, motor vehicies, tires and tubes, and use of certain vehicles, and provided that the amounts appropriated should be transferred currently to the the amounts appropriated shoust be transferred current of the basis of estimates by the Secreasury with proper adjustments to be made in subsequent transfers. Before fiscal 1957 corresponding excise tax receipts were included in net budget receipts and Federal-aid highway expenditures were included in budget expenditures.

Source: Expenditures for 1965 and 1966 are from reports received from disbursing, collecting, and administrative agencies of the Government, on the monthly statement reporting basis (see page II). They are classified in accordance with classifications used in the 1966 Budget document, Table 18, as nearly as can be done on an individual appropriation and fund item basis. Prior year figures are from the same source but have been adjusted below the appropriation level in some instances by the Bureau of the Budget for use in Table 18. Where current classifications differ on this account, they are footnoted. Revolving fund transactions are included net in the expenditures.

1) For expenditures by major functions for fiscal 1966 through August 1965, and fiscal 1965 through August 1964, see "Note" below. Details by functions are not available for publication in this issue but will appear in the October 1965 Bulletin.
2) Expenditures for 1965 and 1966 include those for specified research projects applicable to function code 355. These expenditures were made from "Special Activities, Commodity Credit Corporation."
3 See footnote 2 .
4/ See footnote 5 .
5/ Expenditures for 1965 and 1966 include those for assistance for elementary and secondary education applicable to function code 701 and other alds to education applicable to function code 704. These expenditures were made from "Defense Educational Activities, Office of Education."
6/ Expenditures for 1965 and 1966 include those for veterans' nonserviceconnected pensions applicable to function code 802 and other veterans' benefits and services applicable to function code 805. These expenditures were made from "Compensation and Pensions, Veterans' Administration."

Consolidated cash transactions reported in the Treasury Bulletin are on a basis consistent with Federal receipts from and paymenis to the public as derived in the Budget of the United States (in the Budget for 1966 in Special Analysis A). Shown also is the amount of net cash borrowing from, or repayment of borrowing to, the public. Revisions of the figures for earlier years have been made where necessary to make them as nearly comparable with current Budget classifications as available data will permit. For this reason certain of the figures differ somewhat from those published in previous Budget doccuments as well as in the Bulletin.

This series of cash transactions is designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the account of the Treasurer of the United States. Receipts and payments include transactions both in administrative budget accounts and in trust and deposit fund accounts. Major intragovernmental transactions which are reported as both expenditures and receipts are excluded from
both. Noncash items representing the obligations of the Government to make payments in the future also are eliminated from expenditures currently, but are added later when actual payments are made. These items consist of certain interest accrued on the public debt and expenditures involving the issuance of a few special public debt securities. Checks outstanding, deposits in transit, and other clearing accounts are excluded from payments. Receipts from the exercise of monetary authority are excluded as not representing cash received from the public. Feder al cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencies and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direct cash borrowing from the public. The net effect of all these transactions with the public is reflected in changes in the balance in the Treasurer's account and in cash held outside the Treasury.

## Source and Availability of the Balance in the Treasurer's Account

The account of the Treasurer of the United states reflects not only budget receipts and expenditurss but also trust, deposit fund, and public debt transactions.

The working oash of the Treasury is held mainly in Treasurer's accounts with Federal Reserve Banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banks throughout the country.

Depoeite to tax and loan socounte oocur in the normal course of businecs under a unlform procedure applicable to all banke whereby cuetomers of banks deposit with them tax payments and funds for the purchase of Government securitiee. In most cases the transaction involves merely the transfer of money from a customer's account to the tax and loan aocount in
the same bank. On occasions, to the sxtent authorized by the Treasury, banks are permitted to deposit in these accounts procesds from subscriptions to public debt securities entered for their own account as wall as for the account of their customers.

The tax and loan account systsm permits the Treasury to leave funds in banks and in the communities in which they arise until such time as the Treasury needs the funds for ite operations. In this way the Treasury is able to neutralize the effact of its fluctuating operations on bank reserves and the economy.

A detalled description of the Treasury's depositary syotem may be found in the Annual Report of the seoretary of the Treasury for 1955, pages 275-284.

1/ Includes reserves and other deposits of the Board of Trustees, Postal Savings System, and uncollected items, exchanges, otc., through
December 1962. Effective January 1963 balances of the Postal Savings Systam funds were transferred to deposit fund accounts and became demand obligations of the Treasury. Balances of these funds, therefore, are no longer liabilities within the general account of the Treasurer. Uncollected items, axchanges, etc., also previously shown as liabilities ware combined with "Unclassified collections, etc." shown under essets. Treasurer's checks outstanding are included
through June 1958, after which they are included in the balance in the Treasurer's account. (See footnote 2).
2 Through June 1958, the balance of the Treasurer was reduced when Treasurer's checks were issued and the amount of the checks was carried as a liability until paid. Effective July 1958, the balance is not reduced until the checks are paid, a procedure also applying to checks drsm on the Treasurer by Government disbursing officers and agencies.
3/ Amounts show, beginning January 1963, are net of uncollected itams, exchenges, etc. Previously these items were included under liabilities.

1. Special depositaries are permitted to make payment in the form of a deposit credit for the purchase price of U.S. Government securities purchased by them for their own account, or for the account of their customers who enter subacriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues.
2/ Retirement plan bonds first offered for sale as of January 1, 1963.
3 Taxes eligible for credit consist of those deposited by taxpayers in the depositary banks, as follows: Withheld income tax beginning

March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; and a number of excise taxes beginning July 1953.
4 Under a special procedure begun in March 1951, authorization may be given for income tax payments, or a portion of them, made by checks of $\$ 10,000$ or more drawn on a special depositary bank, to be credited to the tax and loan account in that bank. This procedure is followed during some of the periods of heavy tax payments.

Source: On the basis of the daily Treasury statement.
Note: The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outstanding on that date (the amount actually borrowed in the case of securities sold at a premium or discount, beginning with May 1960). The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. The average annual interest rate is computed by dividing the computed annual interest charge for
the total, or for any group of issues, by the corresponding principal amount. Beginning with data for December 31, 1958, the computation is based on the rate of effective yield for issues sold at premium or discount. Prior to that date it was based on the coupon rate for all issuea.

1) Guaranteed securities included are those held outside the Treasury,
2) Total includes "Other bonds" through 1960; see Table 3.

Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate.
4 On United States savings bonds the rate to maturity is applied against the amount outstanding.

Table 4.- Redemptions of Matured and Unmatured Savings Bonds

Source: Daily Treasury statement; Office of Debt Analysis in the Office
te: In these tables sales of Series $A-F$ and $J$ bonds are included at issue price, and redemptions and amounts nutstanding at current redemption value. Series $G, H$, and $K$ are included at face value throughnut. Matured bonds which have been redeemed are included in redemptions. Maturad $J$ and $K$ bonds outstanding are included in the interest-bearing debt until all bands of the annual series have matured, and are then transferred to matured debt on which interest has ceased.

1) Salas and rederuption figures include exchanges of minor ameunts of (2) matured Series $E$ bonds for Series $G$ and $K$ bonds from May 1951 through April 1957 and (2) Series $F$ and $J$ bonds for Series $H$ bonds beginning Jenuary 1960; however, they exclude exchanges of Series $E$ bonds for Series H bonds, which are reported in Table 3.
2) Details by serias on a cumulative basis and by parlods for Series A-П combined will be found in the February 1952 and previcus issues of the Treasury Eulletin.
3) Because there is a normal lag in classifying redemptions, the distribution of redemptions between aales price and accrued discount has been estimated. Beginning with the Treasury Bulletin of March 1961 the
method of distributing redemptions between sales price and sccrued discount has been changed to reflect the distribution shown in final repnrts of classified redemptions. All periods shown have been revised on this basis.
4' Series F and G sales were discontinued April 30, 1952, and Series J and $K$ aales were discontinued April 30, 1957. Sales figures after April 30, 2957, represent adjustments.
5/ Includes exchanges of Series 1941 F and $G$ savings bonds for $3-1 / 4 \%$ marketable bnds of 1978-83.
6/ Includes exchanges of Series 1948 F and G bonds for $4-3 / 4 \%$ marketable notes of 1964.
7/ Includes exchanges of Series 1949 F and G bonds for $4 \%$ marketable bonds of 1969.
8/ Includes exchanges of Series 1950 F and $G$ bonds for $3-7 / 8 \%$ marketable bonds of 1968.
2/ Includes exchanges of Series 1951 and 1952 F and $G$ bonds $f \circ$ or 3-7/8\% marketable bnads of 1971 and $4 \%$ marketable bonds of 1980.
10. Represents changes in the amounts of redemptions not yet classified between matured and unmatured issues.

* Less than \$500,000.

The monthly Treasury Survey of Ownership covers securities issued by the United States Government and by Federal agencies. The banks and insurance companies included in the Survey currently account for about 90 percent of all such securities held by these institutions. The similar proportion for corporations and for savings and loan associations is 50 percent, and for State and local governments, 70 percent. Data were first published for banks and insurance companies in the May 1941 Treasury Bulletin, for
corporations and savings and loan associations in the September 1960 Bulletin, and for State and local governments in the Febmary 1962 Bulletin.

Holdings by comercial banks distributed according to Federal Reserve member bank classes and nonmember banks are published for June 30 and December 31. Holdings by corporate pension trust funds are published quarterly, first appearing in the March 1954 Bulletin.

Beginring April 1953, prices are closing bid quotations in the over the-counter market. Prices for prior dates are the mean of closing bid and ask quotations. "When issued" prices are included in the history beginning October 1941. Dates of highs and lows in case of recurrence are the latest dates.

3/ On callable issues market convention treats the yield to earliest call date as more significant when an issue is selling above par, and to maturity when it is selling at par or below.
4 Included in the average yield of long-term taxable Treasury bonds as shown under "Average Yields of Long-Term Bonds."

1) Excludes money held by the Treasury and money held by or for the account of the Federal Reserve Banks and agents.
2) The following paper currencies are in process of retirement and are redeemable from the general fund of the Treasury: Gold certificates issued before January 30, 1934, silver certificates issued before July 1, 1929, Treasury notes of 1890 , Federal Reserve notes issued bofore the series of 1928, Federal Reserve Bank notes, and national bank notes. The Treasury notes of 1890 have been in process of retirement since March 1900 ( 31 U.S.C. 411) upon receipt by the Treasury, the Federal Reserve Bank notes since June 12, 1945 (12 U.S.C. 445 note) and the national bank notes since December 23, 1915 (12 U.S.C. 441). Retirement of the others was authorized by the 0ld Series Currency Adjustment Act, approved June 30, 1961 (31 U.S.C. 912-916). The ac authorizes the Secretary of the Treasury to determine from time o time the amount of currency of the following types which have been destroyed or lost, and to reduce the mmounts thereof on the books of the Treasury: Gold certificates issued before January 30, 1934; silver certificates, United States notes, Federal Reserve Bank notes, and national bank notes all issued before July 1, 1929; Faderal Reserve notes issuad prior to the series of 1928; and Treasury notes of 1890. Accordingly, the Secretary of the Treasury has determined
that the following paper currencies have been dastroyed or irratrievably lost and so will never be presented for redemption: On October 20, 1961, \$1 million of Treasury notes of 1890; on August 27, 1962, \$9 million of gold certificates, \$15 million of silver certificates, \$18 million of Federal Reserve notes, \$l million of Federal Reserve Bank notes, and $\$ 15$ million of national bank notes; and on November 16, 1964, \$6 million of gold certificates, $\$ 14.5$ million of silver certificates, $\$ 100$ thousand of Treasury notes of $1890, \$ 24$ million of United States notes, \$14 million of Federal Resarve notes, \$1 million of Federal Reserve Bank notes, and $\$ 13.5$ million of national bank notes.
3/ Issued prior to January 30, 1934
4 Highest amount to date.
5/ Includes \$422 thousand issuad before July 1, 1929.
Includes $\$ 4$ million issued prior to the series of 1928. Based on tha Bureau of tha Census estimated population. Through fiscal 1958 the astimated population is for the contarminous Unitad States (that is, exclusive of Alaska, Hawaii, and the outlying areas such as Puerto Rico, Guam, and the Virgin Islands). Beginning with fiscal 1959 the estimates include Alaska, and with fiscal 1960, Hawail. Less than $\$ 500,000$. Revised.

## Background

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Information on the principal types of data and the principal countries is reported monthly, and is published monthly in the "Treasury Bulletin." Supplementary information is published less frequently. Reports by banks, bankers, securities brokers and dealers, and nonfinancial business concerns in the United States are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury. These statistics are consolidated by the Treasury and published as promptly as possible.

The reporting forms and instructions used in the collection of the statistics have been revised a number of times. The most recent revision became effective with reports covering data as of May 31, 1963.1/ A detailed description of the content of the statistics, including the changes instituted, appeared in the July 1963 issue of the "Treasury Bulletin," pages 79-81. As a result of changes in presentation introduced in that issue, not all breakdowns previously published will be exactly comparable to those now presented.
Basic definitions
The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including United States citizens domiciled abroad and the foreign subsidiaries and offices of United States banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled. Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the classification "International," "European regional," or "Latin American regional," as appropriate, except for the Bank for International Settlements and the European Fund, which are included in the classification "Other Western Europe."
"Short-term" refers to obligations payable on demand or having an original maturity of one year or less, without deduction of any offsets. "Long-term" refers to obligations having an original maturity of more than one year, and includes securities having no contractual maturity. Exclusions

The data published herein do not cover all types of capital movements between the United States and foreign countries. The data reported to and published by the Treasury Department exclude entirely the intercompany capital transactions of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies; such transactions are reported by business firms to the Department of Commerce. Data on the capital transactions of the United States Government and on shipments and receipts of United States currency are also excluded from the Treasury reports. Certain capital transactions not effected through reporting institutions, such as securities transactions carried out entirely abroad, are not recorded in the Treasury reports. Consolidated data on all types of capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

The liabilities data exclude nonnegotiable, noninterestbearing special notes of the United States held by the InterAmerican Development Bank and the International Development Association.

The data on securities transactions and on foreign holdings of U.S. Goverment bonds and notes exclude nonmarketable U.S. Treasury notes, foreign series, and nonmarketable U.S. Treasury bonds, foreign currency series (see "International Financial Statistics" section, Table 2).

## Presentation of statistics

Data collected monthly on the Treasury Foreign Exchange Forms are published in the "Treasury Bulletin" in three sections. Section I provides a sumary of the principal data by period; Section II presents data by country and by period; and Section III shows detailed breakdowns of the latest available preliminary data.

Section IV presents supplementary data which are reported less frequently than monthly. Beginning with the April 1965 issue, these tables are published each month.

Section II - Summary by Countries
Table 9. - Estimated Holdings of U. S. Government Bonds and Notes
(Position at end of period in millions of dollars)

Note: Data represent estimated official and private holdings of J. S. Government securities with an original maturity of more than one year. (For exclusions see headnote on page 83.) Annual and monthly data are show in this section beginning February 1964. For quarterly data see Section IV, Table 2, through June 1964; and "International Financial Statistics,n Table 4, beginning September 1964. Data as of December 31, 1962-63 are on the basis of a November 30, 1960 survey and regular monthly reports of securities transactions (see Table 4). Data for December 31, 1963, also are show on the basis of a July 31, 1963, survey and the montbly
transactions reports. For statistical convenience, the new aeriga is introduced as of December 31, 1963, rather than as of the survey date.

The varlations between the two serles are belleved to result from omissions from, or errors in reporting, shifts in ownership not involving purchases or aales through U.S. banks or brokers, and physical transfers of securities to and from abroad. It is not possible to reconclle the two serles or to ravise figures for earller dates.
Less than $\$ 500,000$.
