## Reporting Bases

Data on receipts, expenditures, and debt which appear In the "Treasury Bulletin" are based largely on two Treasury Inancial reports, the "Daily Statement of the United States Treasury" and the "Monthly Statement of Recelpts and Expenditures of the United States Government." Certain monetary statistics are based at least in part on the "Circulation Statement of United States Noney." Where these statements are given as sources for individual tables, they are cited by name only. Their respective reporting bases are desoribed below. For other data in the Bulletin, informan tion on sources or reporting bases is given in connection with the tables themselves.

The monthly statement of receipts and expenditures was first published for February 1954 , and replaced the daily statement as the primary source of information on budget reaults and other recelpt and sxpenditure data clasalfled by type of account. At the samo time, the daily atatement was changed to a atatement of cash deposits and withdrawals affecting the account of the Treasurer of the United States. Both publications have provided comparative ilgures on their respective bases from the beginning of the f1scal year 1953. The announcement of February 17, 1954, with respect to these reporting changes may be found in the April 195418848 of the Bulletin.

The monthly statement shows all reeeipts and sxpenditures of the Government, including those made from casb accounts held outside the United States Treasury. The information 18 compiled from reports by the Treasurer of the Unitsd States and by all other collecting and disbursing agencies, including those agencies which maintain checking accounts in commercial banks. These reports cover transactions recorded in the accounts of the agencies during the reporting period. The net of the transaotions as complled from these reports is reconciled in the monthly statement to changes in the balance in the Treasurer's account and in cash held outside the Treasurer's account and changes in the public debt outstanding.

Receipts of taxes and customs duties are reported on a colleotions basis. Other recelpts are reported partially on a collections basis and partially on a deposits basis. Expenditurss, except interest on the public dobt, are reported on the basis of checks lesued or cash payments made by disbursing officers. Transactions of an interfund or intragovernmental nature are included on the same basis even though the actual issuance of checks may not be involved. Interest on the public debt is included on an accrual basis beginning with ilgures for June 1955 and the fiscal yoar 1955. Prior to that, it was included on a due and payable basis. The samo reporting basis as that in the monthly statement provides the fiscal year ilgures for the Treasury's "Combined Statement of Receipts, Expend-
itures and Balances of the United States Government" and for actual receipts and expenditures in the "Budget of the United States Government."

Beginning with the final statement for the fiscal year 1960, the monthly statement reports totals for net budget receipts and budget expenditures after deduction of certain interfund transactions which are incluced in the detall of both budget receipts and budget expenditurss. The transactions deducted consist of interest payments and minor anounts of certain other payments made by Government agencies to the Treasury. This reporting change was made in accordance with the plan stated in the President's Budget Message of January 18, 1960. It does not affect the surplus or deficit. Figures for sarlier periods shown in the Treasury Bulletin were revised to the new reporting basis in the September 1960 18sue. The interfund transactions deducted under this procedure do not include payments to the Treasury by wholly owned Government corporations for retirement of their capital stock and for disposition of earnings. These capital transfers have been excluded currently from budget receipts and budget expenditures beginning July 1 , 1948, and figures for prior fiscal years back throuzh 1932 were rovised accordingly at that time.

The dally statement on the new basis was ilrst issued for February 17, 1954. In the deposits and withdrawals as shown, no distinction is made as to the type of accounts (budget, trust, etc.). The deposits are on the basis of certificates of deposit cleared through the account of the Treasurer of the United States. Total withdrawals are on the basis of checks paid or cash disbursements made out of the Treasurer's account. Some of the withdrawal clase1fications shown are reported on the basis of malled reports of checks lssued and are adjusted by means of clearing accounts to the total of checks pald. Except for relatively minor amounta, noncash interfund and other intragovernmental transactions are excluded. The public debt figures in the dally statement also are on a "clearance" basis, with the exception of those $18 s u a n c e$ and retirement transactions reported on the basis of telegrams from Federal Reserve Banks. Noncash dobt transactions are included, however.

The dally statement before February 17, 1954, covered not only transactions cleared through the Treasurer's account but also certain Government agency transactions which were handled through commercial bank accounts, and included noncash interfund and other intragovernmental transactions. It provided information similar to that in the present daily statement with respect to the status of the Treasurer's account, and similar to that in the present end-of-month daily statement with respect to debt issuance, retirement, and amount outstanding. Recolpts and expenditures, however, were classilled by type of account, and the budget rasults shown

## Reporting Bases - (Continued)

in the daily statement were used as the basis for replecting the results under the President's budget program as enacted by the Congress.

Receipts were on the basis of deposits as they cleared the Treasurer's account. Expenditures cleared through the Treasurer's account were reported on two successive bases. Through 1946 they were on the basis of checks paid by the Treasurer of the United States. Beginning with 1947, expenditures made through the facilities of the Treasury Department's Division of Disbursement were on the basis of checks issued, while certain others, principally those of the Department of Defense and 1 ts predecessor organizations, were on the basis of checks pald. Transactions han-
dled through commercial bank accounts, consisting of market transactions in public debt and guaranteed securities, were as reported by the agencies. Interest on the public debt was included on a due and payable basis beginning with November 1949 and on a checks-pald basis prior to that time.

The circulation statement reflects transactions through the Treasurer's account which affect monetary stocks of gold and silver and the amounts of coin and currency in the money supply of the country. It is issuod later than the dally statoment, however, and the figures are based on transactions consummated during the reporting poriod even though some may not have cleared the Treasurer's account during that period.

## Treasury Financing Operations

## Tax Anticipation Bills

The Treasury clarified its Autumn borrowing plans on September 22 with the announcement that the bulk of this financing would be provided by a $\$ 4$ billion tax anticipation bill package that included $\$ 3$ billion of March bills and $\$ 1$ billion of June bills.

Tenders were invited on September 22 for $\$ 3.0$ billion, or thereabouts, of l52-day $\operatorname{Tr}$ easury bills and $\$ 1.0$ billion, or thereabouts, of 254 -day Treasury bills. Both series are designated Tax Anticipation Series and are dated October 11, 1965. The 162-day bills mature March 22, 1966 and the 254 -day bills mature June 22, 1966. They will be accepted at face value in payment of income taxes due on March 15, 1966 and June 15, 1966, respectively. To the extent they are not presented for this purpose the face amount will be payable without interest at maturity. Issued in bearer form only, the bills are in denominations of $\$ 1,000, \$ 5,000, \$ 10,000, \$ 50,000, \$ 100,000$, $\$ 500,000$, and $\$ 1,000,000$ (maturity value).

Tenders for the March bills, on the basis of preliminary reports, totaled $\$ 4,052 \mathrm{million}$, of which $\$ 3,009 \mathrm{million}$ was accepted at the average bank discount rate of 3.783 percent. Of the $\$ 2,209$ million tenters received for the June bills, also on the basis of preliminary repurts, $\$ 1,003$ million was accepted at the average bank discount rate of 3.941 percent. The Mąch bill acceptances included noncompetitive tenders for $\$ 400,000$ or less (without stated price) and the June acceptances included noncompetitive tenders for $\$ 200,000$ or 1 ess (without stated price) from any one bidder at the average price of competitive bids. These amounted to $\$ 445$ million for the March bills and \$201 million for the June bills.

The usual requirements for the submission of tenders applied. Payment for accepted tenders in cash or other immediately available funds was required to be completed on October 11, 1965. Any qualified depositary was permitted to make payment by credit in its Ireasury tax and loan account for Treasury bills allotted to it for itself and its customers up to the amount for which it was qualified in excess of existing deposits.

## One-Year Bills Refunded

Tenders were invited on September 16 for $\$ 1.0$ billion, or thereabouts, of 365-day Treasury bills, for cash and in exchange for Treasury bills maturing September 30, 1965. Tenders totaling $\$ 2,970$ million were received, of which $\$ 1,000$ million was accepted, including $\$ 57$ million of noncompetitive tenders, at the average benk discount rate of 4.236 percent. Noncom-
petitive tenders for $\$ 200,000$ or less (without stated price) from any ons bidder were accepted in full at the average price of accepted competitive bids.

Payment for accepted tenders was required to be made or completed on September 30, 1765 , in cash or other immediately available funds or in a like fice amount of bills maturing on that date. Payment by credit in Treasury tax and loan accounts was not permitted.

The new one-year bills are dated September 30, 1965, and will mature September 30, 1965, when the face amount will be payable without intrerest. Issued in bearer form only, the bills are in denominations of $\$ 1,000, \$ 5,000, \$ 10,000, \$ 50,000$, $\$ 100,000, \$ 500,000$, and $\$ 1,000,000$ (maturity valu:).

## 13-Week and 26-Week Bills

New issues of regular weekly Treasury bills in September totaled \$11.0 billion, reffunding an equivalent amount maturing. The September bills consisted of five 13 -week issues of $\$ 1.2$ billion each and five 26 -week issues of $\$ 1.0$ billion each. The bills carry 91-day and 182-day maturities. Average rates for the new issues are shown in the table following.

Foreign Series and Foreign Currency Series
In September the Treasury issued one certificate of indebtedness of the foreign series in the amount of $\$ 325$ million and two bonds of the foreign currency series equivalent t) $\$ 82$ million. Retirements amounted to $\$ 135$ million for the foreign series securities and the equivalent of $\$ 82$ million for the foreign currency series.

## Treasury Financing Operations - (Continued)

The new 3 -month certificate, issued September 30, bears interest at the rate of 3.983 percent and matures December 30, 1965. As of September 30, the outstanding foreign series securities totaled $\$ ?, 044$ million.

The new bonds of the foreign currency series are denominated in Swiss francs. One, equivalent to $\$ 52$ million, was issued September 7, bears interest at the rate of 4.10 percent
and matures October 7, 1966. The other, equivalent to $\$ 30 \mathrm{mil}-$ lion, was issued September 27, bears interest at the rate of 4.23 percent and matures January 27, 1967. At the end of September foreign currency series outstanding totaled \$1,259 million and were denominated in Austrian schillings, Belgian francs, German marks, Italian lire and Swiss francs.

Table 6. - Expenditures by Functions - (Continued)
(Fiscal years; in millions of dollars)

Source: Expenditures for 1965 and 1966 are from reports rece ved from disbursing, collecting, and administrative agencies of the Covernment, on the monthly statement reporting basis (see page II). They are classifled in accordance with classifications used in the 2966 Budget document, Table 18, as nearly as can be done on an individual appropriation and fund item basis. Prior year figures are from the same source but hava been adjusted below the appropriation level in some instances by the Bureau of the Budget for use in Table 18. Where current classifications differ on this account, they are footnoted. Revolving fund transactions are included net in the expenditures.
1/ For expenditures by major functions for fiscal 1966 through September 1965, and fiscal 1965 through September 1964, sea "Note" below. Details by functions are not available for publication in this issue but will appear in the November 1965 Bulletin.
2) Expenditures for 1965 and 1966 include those for specified research projects applicable to function code 355 . These expenditures were made from "Special Activities, Commodity Credit Corporation."
3/ See footnote 2 .
$4^{\prime}$ See footnote 5 .
5 Expenditures for 1965 and 1966 include those for assistance for elementary and secondary education applicable to function code 701 and other aids to education applicable to function code 704 . These expenditures were made from "Defense Educational Activities, office of Education."
Expenditures for 1965 and 1966 include those for veterans' nonserviceconnected pensions applicable to function code 802 and other veterans' beneflts and services applicable to function code 805 . These expenditures were made from "Compensation and Pensions, Veterans' Administration."

Consolidated cash transactions reported in the Treasury Bulletin are on a basis consistent with Federal receipts from and payments to the public as derived in the Budget of the United States (in the Budget for 1966 in Special Analysis A). Shown also is the gmourt of net cash borrowing from, or repay ment of borrowing to, the public. Revisions of the figures for earlier years have been made where necessary to make them as nearly comparable with current Budget classifications as available data will permit. For this reason certain of the figures differ somewhat from those published in previous Budget doccuments as well as in the Bulletin.

This series of cash transactions is designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the account of the Treasurer of the Urited States. Receipts and payments include transactions both in administrative budget accounts and in trust and deposit fund accounts. Major intragovernmental transactions which are reported as both expenditures and receipts are excluded from
both. Noncash items representing the obligations of the Government to make payments in the future also are eliminated from expenditures currently, but are added later when actual payments are made. These items consist of certain interest accrued on the public debt and expenditures involving the issuance of a few special public debt securities. Checks outstanding, deposits in transit, and other clearing accounts are excluded from payments. Receipts from the exercise of monetary authority are excluded as not representing cash received from the public. Feder al cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencies and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direct cash borrowing from the public. The net effect of all these transactions with the public is reflected in changes in the balance in the Treasurer's account and in cash held outside the Treasury.

## Source and Availability of the Balance in the Treasurer's Account

The account of the Treasurer of the United states reflects not only budget receipts and expenditures but also trust, deposit fund, and publlc debt transactions.

The working cash of the Treasury 18 held mainly in Treasurer'a accounts with Federal Reserve Banks and branchee. As the bslances in thes accounts become depleted, they are restored by calling in (trangferring) funds from the tax and loan accounte with thoueands of commercial banks throughout the country.

Depoelts to tax and loan accounts occur in the normal course of business under a unlform procedure applicable to all banks whereby cuctomers of banks deposit with thom tax payments and funds for the purchsee of Government securitiee. In most cases the transaction involves merely the transfer of money from a customer's account to the tax and loan aocount in
the same bank. On occasions, to the extent authorized by the Treasury, banks are permitted to deposit in these accounts proceads from subscriptions to public debt securlties entered for their own account as well as for the account of their customers.

The tax and loan account system permits the Treasury to leave funds in banks and in the commanities in which they arise until such time as the Trasury nseds the funds for its operations. In this way the Ireasury is able to neutralize the effect of 1 ts fluctuating operations on bank reserves and the economy.

A detalled deecription of the Treasury's depositary syetem may be found in the Annual Report of the seoretary of the Tressury for 1955, pages 275-284.

1/ Includes reserves and other deposits of the Board of Trustees, Postal Savings System, and uncollected items, exchanges, etc., through December 1962. Effective January 1963 balances of tbe Postal Savings System funds were transferred to deposit fund accounts and became demand obligations of the Treasury. Balances of these funds, therefore, are no longer liabilities within the general account of the Treasurer. Uncollected items, exchanges, etc., also previously shown as liabilities were combined with "Unclassified collections, etc." shown under assets. Treasurer's checks outstanding are included
through Juna 1958, after which they are included in the baiance in the Treasurer's account. (See footnote 2).
2) Through June 1958, the balance of the Treasurer was reduced when Treasurer's checks were issued and the amount of the checks was carried as a liability until paid. Effective July 1958, the balance is not reduced until the checks are paid, a procedure also applying to checks drawn on the Treasurer by Government disbursing officers and agencies.
3) Amounts show, beginning January 1963, are net of uncollected items, exchanges, etc. Previously these items were included undar liabilities.

1) Special dapositaries are permitted to make payment in the form of a deposit credit for the purchase price of U.S. Government securities purchasad by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues.
2) Retirement plan bonds first offered for sala as of January 1, 1963.

Taxes eligible for credit consist of those deposited by taxpayers in the depositary banks, as follows: Withheld income tax beginning

March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950, and under the Railroad Retirenent Tax Act beginning Juiy 1951; and a number of excise taxes beginning July 1953.
4/ Under a special procedure begun in March 1951, authorization may be given for income tax payments, or a portion of them, made by checks of $\$ 10,000$ or more drawn on a special depositary bank, to be credited to the tax and loan account in that bank. This procedure is followed during some of the periods of heavy tax payments.
Less than $\$ 500,000$.

[^2]1/ Guaranteed securities included are those held outside the Treasury.
2) Total includes "Other bonds" through 1960; see Table 3

3 Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate.
4 On United States savings bonds the rate to maturity is applied against the amount outstanding

The monthly Treasury Survey of Ownership covers securitiee lssued by the United States Government and by Federal agencies. The banks and insurance companies included in the Survey currently account for about 90 percent of all such seourities held by these institutions. The similar proportion for corporatione and for eavings and loan aseociations is 50 percent, and for State and local governments, 70 percent. Data were ilrat published for banks and insurance companies in the May 1941 Treasury Bulletin, for
corporations and savings and loan associations in the Sep tember 1960 Bulletin, and for $9 t a t e$ and local governments in the February 1962 Builetin.

Holdinge by commercial banke distributed according to Federal Reserve member bank classes and nonmember banks are published for June 30 and December 31. Holdinge by corporate pension trust funds are published quarterly, first appearing in the March 1954 Bulletin.

## October 1965

## Background

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Information on the principal types of data and the principal countries is reported monthly, and is published monthly in the "Treasury Bulletin." Supplementary information is published less frequently. Reports by banks, bankers, securities brokers and dealers, and nonfinancial business concerns in the United States are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury. These statistics are consolidated by the Treasury and published as promptly as possible.

The reporting forms and instructions used in the collection of the statistics have been revised a number of times. The most recent revision became effective with reports covering data as of May 31, 1963.1/ A detailed description of the content of the statistics, including the changes instituted, appeared in the July 1963 issue of the "Treasury Bulletin," pages 79-81. As a result of changes in presentation introduced in that issue, not all breakdowns previously published will be exactly comparable to those now presented.

## Basic definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including United States citizens domiciled abroad and the foreign subsidiaries and offices of United States banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled. Data pertaining to branches or agencies of foreign official institutions are raported opposite the country to which the official institution belongs. Data partaining to international and regional organizations are reported opposite the classification "International," "European regional," or "Latin Americen regional," as appropriate, except for the Bank for International Settlements and the European Fund, which are included in the classification "Other Western Europe."
"Short-term" refers to obligations payable on demand or having an original maturity of one year or less, without deduction of any offsets. "Long-term" refers to obligations having an originsl maturity of more than one year, and includes securities having no contractual maturity. Exclusions

The data published herein do not cover all types of capital movents between the United States and foreign countries. The data reported to and published by the Treasury Department exclude entirely the intercompany capital transactions of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies; such transactions are reported by business firms to the Department of Commerce. Data on the capital transactions of the United States Government and on shipments and receipts of United States currency are also excluded from the Treasury reports. Certain capital transactions not effected through reporting institutions, such as securities transactions carried out entirely abroad, are not racorded in the Treasury reports. Consolidated data on all types of capital transactions are published by the Department of Commerce in its ragular reports on the United States balance of payments.

The liabilities data axclude nonnegotiable, noninterestbearing special notes of the United States held by the InterAmerican Development Bank and the International Development Association.

The data on securities transactions and on foreign holdings of U.S. Goverment bonds and notes exclude nonmarketable U.S. Treasury notes, foraign series, and nonmarketable U.S. Treas ury bonds, foreign currency series (see "International Financial Statistics" section, Table 2).

Presentation of statistics
Data collected monthly on tha Treasury Foreign Exchanga Forms are publishad in the "Treasury Bullatin" in three sections. Section I provides a sumary of the principal data by period; Section II presents data by country and by period; and Section III shows detailed breakdowns of the latest avallable preliminary data.

Section IV presents supplementary data which are reported less frequently than monthly. Beginning with the April 1965 issue, these tabls are published each month.

Included with "Other claims.
Beginning in August 1956 and also in April 1957, certain accounts previously classified as "Foreign banks" are included with "Official
institutions."
5 Differs from 1951 end-uear data on the preceding line by inclusion of liabilities and claims reported by a number of banks included in the series beginning December 31, 1961.
6/ Includes reported liabilities to foreign official institutions beginning October 1961. Figures for selected dates are as follows:
end 1961 , $\$ 46.3$ million; end 1962, $\$ 47.9$ million; end 1963, $\$ 30.1$ million; September 1964, $\$ 30.1$ million.
7) Includes claims previously held but first reported as of May 31, 1963; as of thst date such claims amounted to $\$ 85.6$ million. Also includes
claims smounting to $\$ 193.2$ million reported by banks for the first time as of December 31, 1963, representing in part claims previously held by banks but not reported.
8/ Short-term liabilities include a net increase of $\& 20.1$ million arising from changes in reporting coverage, distributed as follows: nForeign banks" +25.6 million, "Other foreigners" +22.5 million, and "Payable in foreign currencies" - $\$ 27.9$ million.
2/ See footnote 10.
10/ Data on claims below the line differ from claims above the line because of the exclusion as of December 31, 1964 of $\$ 58.1$ million of short-term U. S. Governaent claims previousiy included; and because of the addition of $\$ 543.8$ million of short-term claims and 298.3 million of long-term claims arising from the inclusion of claims previously held but first roportsd as of December 31, 1964, and from revisions of preliminary figires. p Prellminary. r Revised.

Through April 1963 "Other Latin American Republics" include only Bolivia Dominican Republic, Guatemala and El Salvador; data for other Latin
American republics included with "Other Latin Areerica."

3/Through 1963, Bahamas and Bermuda are incluled with "Other Latin America." 4 Through 1963, "All other" countries include Morocco and "Jther Africa." 5) Through 1963, "Total other countries" include "Total Africa."

# Table 9. - Estimated Holdings of U. S. Government Bonds and Notes 

(Position at end of period in millions of dollars)

Note: Data represent estimated official and private holdings of U. S. Government securities with an original maturity of more than one year. (For exclusions see headnote on page 83.) Annual and monthly data are show in tbis section beginning February 1964. For quarterly data see Section IV, Table 2, through June 1964; and "International Financial Statistics," Table 4, beginning September 1964. Data as of December 31, 1962-63 are on the basis of a November 30, 1960 survey and regular monthly reports of securities transactions (see Table 4). Data for December 31, 1963, also are sbow on the besis of a July 31, 1963, survey and the montbly
tranactions reports. For statistical convenience, the new aerlea is introduced as of December 31, 1963, rather than as of the survey date.

The variations between the two series are believed to result from omissions from, or errors in reporting, shifts in ownership not involving purchases or sales through U.S. banks or brokers, and physical transfers of securities to and from abroad. It is not possible to reconcile the two series or to revise figures for earlier dates.

[^17]March 31, 1963 (seventh revised series), and Decemter 31, 1963 (eighth revised series). The eighth revised series also includes claims previously held but not reported. The ninth revised series includes reports from firms having $\$ 500$ thousand or more of liabilities or of claims; for previous series the exemption level was $\$ 100$ thousand. The exemption level was raised to relieve smaller firms of reporting, without affecting the reliability of the statistics.
Revised.

    Note: The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing lssue outstanding at the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each lasue by applying the appropriate amusl interest rate to the amount outstanding on that date (the amount actually borrowed in the case of securities sold at a premium or discount, beginning with May 1960). The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. Tha average annual interest rate is computed by dividing the computed annual interest charge for
