Reporting Bases

Data on receipts, expenditures, and debt which appear in the "Treasury Bulletin" are based largely on two Treasury financial reports, the "Daily Statement of the United States Treasury" and the "Monthly Statement of Receipts and Expenditures of the United States Government." Certain monetary statistics are based at least in part on the "Circulation Statement of United States Money." Where these statements are given as sources for individual tables, they are cited by name only. Their respective reporting bases are described below. For other data in the Bulletin, information on sources or reporting bases is given in connection with the tables themselves.

The monthly statement of receipts and expenditures was first published for February 1954, and replaced the daily statement as the primary source of information on budget results and other receipt and expenditure data classified by type of account. At the same time, the daily statement was changed to a statement of cash deposits and withdrawals affecting the account of the Treasurer of the United States. Both publications have provided comparative figures on their respective bases from the beginning of the fiscal year 1953. The announcement of February 17, 1954, with respect to these reporting changes may be found in the April 1954 issue of the Bulletin.

The monthly statement shows all receipts and expenditures of the Government, including those made from cash accounts held outside the United States Treasury. The information is compiled from reports by the Treasurer of the United States and by all other collecting and disbursing agencies, including those agencies which maintain checking accounts in commercial banks. These reports cover transactions recorded in the accounts of the agencies during the reporting period. The net of the transactions as compiled from these reports is reconciled in the monthly statement to changes in the balance in the Treasurer's account and in cash held outside the Treasurer's account and changes in the public debt outstanding.

Receipts of taxes and customs duties are reported on a collections basis. Other receipts are reported partially on a collections basis and partially on a deposits basis. Expenditures, except interest on the public debt, are reported on the basis of checks issued or cash payments made by disbursing officers. Transactions of an interfund or intragovernmental nature are included on the same basis even though the actual issuance of checks may not be involved. Interest on the public debt is included on an accrual basis beginning with figures for June 1955 and the fiscal year 1955. Prior to that, it was included on a due and payable basis. The same reporting basis as that in the monthly statement provides the fiscal year figures for the Treasury's "Combined Statement of Receipts, Expenditures and Balances of the United States Government" and for actual receipts and expenditures in the "Budget of the United States Government."

Beginning with the final statement for the fiscal year 1960, the monthly statement reports totals for net budget receipts and budget expenditures after deduction of certain interfund transactions which are included in the detail of both budget receipts and budget expenditures. The transactions deducted consist of interest payments and minor amounts of certain other payments made by Government agencies to the Treasury. This reporting change was made in accordance with the plan stated in the President's Budget Message of January 18, 1960. It does not affect the surplus or deficit. Figures for earlier periods shown in the Treasury Bulletin were revised to the new reporting basis in the September 1960 issue. The interfund transactions deducted under this procedure do not include payments to the Treasury by wholly owned Government corporations for retirement of their capital stock and for disposition of earnings. These capital transfers have been excluded currently from budget receipts and budget expenditures beginning July 1, 1948, and figures for prior fiscal years back through 1932 were revised accordingly at that time.

The daily statement on the new basis was first issued for February 17, 1954. In the deposits and withdrawals as shown, no distinction is made as to the type of accounts (budget, trust, etc.). The deposits are on the basis of certificates of deposit cleared through the account of the Treasurer of the United States. Total withdrawals are on the basis of checks paid or cash disbursements made out of the Treasurer's account. Some of the withdrawal classifications shown are reported on the basis of mailed reports of checks issued and are adjusted by means of clearing accounts to the total of checks paid. Except for relatively minor amounts, noncash interfund and other intragovernmental transactions are excluded. The public debt figures in the daily statement also are on a "clearance" basis, with the exception of those issuance and retirement transactions reported on the basis of telegrams from Federal Reserve Banks. Noncash debt transactions are included, however.

The daily statement before February 17, 195⁴, covered not only transactions cleared through the Treasurer's account but also certain Government agency transactions which were handled through commercial bank accounts, and included noncash interfund and other intragovernmental transactions. It provided information similar to that in the present daily statement with respect to the status of the Treasurer's account, and similar to that in the present end-of-month daily statement with respect to debt issuance, retirement, and amount outstanding. Receipts and expenditures, however, were classified by type of account, and the budget results shown

Reporting Bases - (Continued)

in the daily statement were used as the basis for reflecting the results under the President's budget program as enacted by the Congress.

Receipts were on the basis of deposits as they cleared the Treasurer's account. Expenditures cleared through the Treasurer's account were reported on two successive bases. Through 1946 they were on the basis of checks paid by the Treasurer of the United States. Beginning with 1947, expenditures made through the facilities of the Treasury Department's Division of Disbursement were on the basis of checks issued, while certain others, principally those of the Department of Defense and its predecessor organizations, were on the basis of checks paid. Transactions handled through commercial bank accounts, consisting of market transactions in public debt and guaranteed securities, were as reported by the agencies. Interest on the public debt was included on a due and payable basis beginning with November 1949 and on a checks-paid basis prior to that time.

The circulation statement reflects transactions through the Treasurer's account which affect monetary stocks of gold and silver and the amounts of coin and currency in the money supply of the country. It is issued later than the daily statement, however, and the figures are based on transactions consummated during the reporting period even though some may not have cleared the Treasurer's account during that period.

Note: Where calculations have been made from unrounded figures, the details may not check to the totals shown.

Tax Anticipation Bills

On November 12 the Treasury announced it would auction \$2.5 billion, or thereabouts, of 210-day tax anticipation bills on November 17. Representing an additional amount of the bills dated October 11, 1965, to mature June 22, 1966, and originally issued in the amount of \$1,003 million, the bills of this series are freely interchangeable with the original bills.

Tenders received totaled \$5,164 million, of which \$2,513 million was accepted at the average bank discount rate of 4.075 percent. Noncompetitive tenders for \$400,000 or less (without stated price) from any one bidder were accepted in full at the average price of accepted competitive bids. These totaled \$472 million.

Banking institutions generally could submit tenders for account of customers provided the names of the customers were set forth in such tenders. Others than banking institutions could submit tenders only for their own account. Tenders were received without deposit from incorporated banks and trust companies and from responsible and recognized dealers in investment securities. Tenders from others had to be accompanied by payment of 2 percent of the face amount of the tax anticipation bills applied for, or an express guaranty of payment by an incorporated bank or trust company.

All bidders were required to agree not to purchase or to sell, or to make any agreements with respect to the purchase or sale or other disposition of any bills of the additional issue at a specific rate or price, until after one-thirty p.m., eastern standard time, November 17, 1965.

Payment for accepted tenders in cash or other immediately available funds was required to be made or completed on November 24. Any qualified depositary was permitted to make payment by credit in its Treasury tax and loan account for the bills allotted to it for itself and its customers up to any amount for which it was qualified in excess of existing deposits.

The additional tax anticipation bills will be accepted at par in payment of income taxes due June 15, 1966. To the extent they are not presented for this purpose the face amount will be payable without interest at maturity. Issued in bearer form only, the bills are in denominations of \$1,000, \$5,000, \$10,000, \$50,000, \$100,000, \$500,000, and \$1,000,000 (maturity value).

One-Year Bills

Tenders were invited on November 17 for the auction on November 23 of \$1 billion, or thereabouts, of 365-day Treasury bills for cash and in exchange for Treasury bills maturing November 30, 1965. The new bills are dated November 30, 1965, and mature November 30, 1966, when the face amount is payable without interest.

Tenders received totaled \$1,949 million, of which \$1,001 million (including \$46 million of noncompetitive tenders) was accepted at the average discount rate of 4.277 percent. Non-competitive tenders for \$200,000 or less (without stated price) from any one bidder were accepted in full at the average price of accepted competitive bids.

Requirements relating to deposits with tenders and the denominations of the new one-year bills were like those for the tax anticipation bills described in preceding paragraphs. Payment for accepted tenders was required to be made or completed on November 30, 1965, in cash or other immediately available funds or in a like face amount of Treasury bills maturing on that date. Payment by credit in Treasury tax and loan accounts was not permitted.

13-Week and 26-Week Bills

November issues of regular weekly Treasury bills totaled \$8.8 billion, refunding \$8.8 billion of bills maturing. The new bills consisted of four 13-week issues of \$1.2 billion each and four 26-week issues of \$1.0 billion each. The bills issued November 12 and November 26 carry 90-day and 181-day maturities and those issued November 4 and November 18 carry 91-day and 182-day maturities. Average rates for the new issues are shown in the table following.

Foreign Series and Foreign Currency Series

In November the Treasury issued one 2-month and five 3-month certificates of indebtedness of the foreign series totaling \$390 million and one note, payable May 13, 1968, of the foreign series in the amount of \$75 million. Redemptions amounted to \$305 million for six certificates of indebtedness and \$30 million for one bond.

The new certificates of indebtedness were issued at interest rates ranging from 3.75 percent to 4.15 percent. The new note bears interest at the rate of 4.30 percent. As of November 30, 1965, the outstanding foreign series securities

totaled \$1,164 million.

Foreign currency series bonds issued in November consisted of one 18-month and one 19-month issue, denominated in German marks, equivalent to \$25 million each, at the interest rate of 4.33 percent. One bond denominated in German marks equivalent to \$50 million, matured in November. At the end of November, foreign currency series securities outstanding were equivalent to \$1,208 million and were denominated in Swiss francs, Austrian schillings, Belgian francs, German marks, and Italian lire.

Source: Actual figures through 1961 are from reports to the Treasury Department by disbursing officers and administrative agencies, on the monthly statement reporting basis (see page II); and from the monthly statement of receipts and expenditures thereafter. Estimates, in-cluding effect of proposed legislation, are from the 1966 Budget document, released January 25, 1965.

Beginning October 1965 certain accounts representing profits from

silver coinage, previously classified as "dividends and then earnings," have been classified as "seignorage." Consists of miscellaneous taxes (principally the tonnage tax on foreign vessels entering U. S. ports), bullion charges, gifts and con-tributions, under undistributed proceeds, sale of foreign currency.

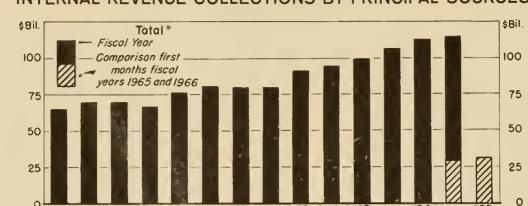

Footnotes to Table 1 - (Continued)

- Taxes on carriers and their employees under the Railroad Retirement 3/
- Tax Act, as amended (26 U.S.C. 3201-3233). Tax on employers of 4 or more under the Federal Unemployment Tax Act, as amended (26 U.S.C. 3301-3308). Includes collections under increased rates in the Highway Revenue Act
- of 1956 (see footnote 15).

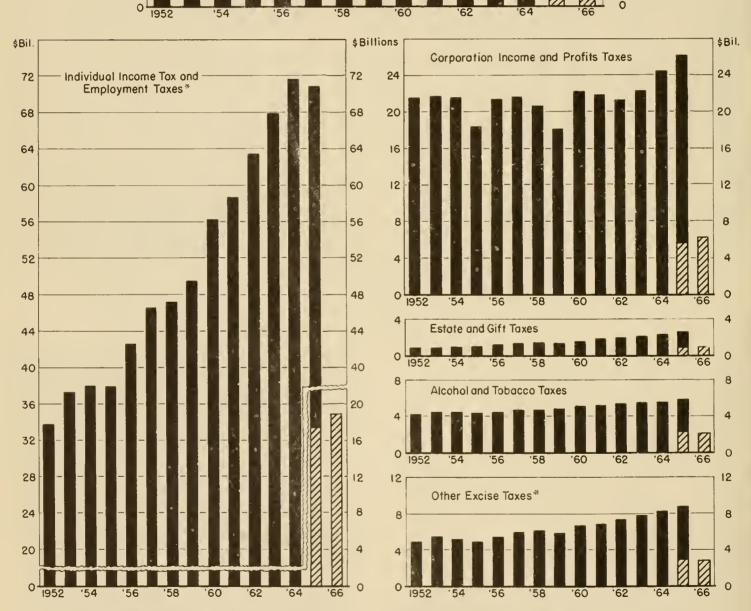

- Includes small amounts for taxes not classified. Includes \$600 million for hospital insurance for the aged. Includes adjustments as follows: Income taxes not withheld, November 1964 -\$5 million, March -\$2 million, June +\$86 million, August -\$4 million and November 1965 -\$6 million; income taxes withheld, November 1964 +\$27 million, March +\$157 million, June -\$7 million, August -\$202 million and November 1965 +\$128 million; transfers to Federal Old-Age and November 1965 +\$128 million; transfers to Federal Old-Age and Survivors Insurance Trust Fund, November 1964 -\$24 million, March -\$150 million, June -\$74 million, August +\$187 million and November 1965 -\$107 million; and transfers to Federal Disability Insurance Trust Fund, November 1964 +\$2 million, March -\$4 million, June -\$5 million, August +\$18 million and November 1965 -\$15 million. See also footnote 11.
- Interest on refunds is included in expenditures in Table 10/ The principal amounts for refunds of employment taxes and certain excise taxes (highway) are excluded from the transfers of tax receipts shown herein, and are included with refunds of internal revenue receipts, applicable to trust accounts.
- Amounts appropriated to the Federal Old-Age and Survivors Insurance Trust Fund are equivalent to amounts of taxes collected and deposited for old-age insurance. Amounts transferred currently for appropriation to the trust fund are based on estimates of old-age insurance tax receipts made by the Secretary of the Treasury (42 U.S.C. 401 (a)), and are adjusted in later transfers on the basis of wage and self-employment income records maintained in the Social Security Administration.
- The Federal Disability Insurance Trust Fund was established by the Social Security Act Amendments of 1956, approved August 1, 1956 (42 U.S.C. 401 (b)). The act appropriated to the trust fund amounts equivalent to 12/ tively, which are taxed for old-age insurance, and provided that the amounts appropriated should be transferred from time to time to the

trust fund on the same basis as transfers to the Federal Old-Age and Survivors Insurance Trust Fund. Rates of tax were increased by the percentages appropriated to the Federal Disability Insurance Trust Fund, the increase being applicable to wages paid and taxable years beginning after December 31, 1956. Amounts are appropriated to the Railroad Retirement Account squal to

- 13/ the amount of taxes under the Railroad Retirement Tax Act deposited in the Treasury, less refunds, during each fiscal year (65 Stat. 222 and 66 Stat. 371) and transfers are made currently.
- and 66 Stat. 3/1) and transfers are made currently. The Employment Security Act of 1960, approved September 13, 1960 (42 U.S.C. 1101), established in the Unemployment Trust Fund, an adminis-tration account, and appropriated for credit to that account, begin-ning with fiscal 1961, amounts equivalent to taxes collected and deposited under the Federal Unemployment Tax Act. The tax receipts are transferred currently on the basis of estimates by the Secretary of the Teacement with letter adjustments for a processor. From that of the Treasury, with later adjustments as necessary. From that account is to be paid the administrative expenses of the employment
- security program. Previously the corresponding amounts ware included, respectively, in budget receipts and budget expenditures. The Highway Revenue Act of 1956, as amended, (23 U.S.C. 120, note) established a Highway Trust Fund from which are to be made, as provided by appropriation acts, Federal-aid highway expenditures after June 30, 1956, and before October 1, 1972. The act appro-prieted to the fund encourts expinate the specified encourtees of priated to this fund amounts equivalent to specified percentages of preceipts from certain excise taxes on motor fuels, motor vehicles, tires and tubes, and use of certain vehicles, and provided that the amounts appropriated should be transferred currently to the trust fund on the basis of estimates by the Secretary of the Treasury with proper adjustments to be made in subsequent transfers. Before fiecal 1957 corresponding excise tax receipts were included in net budget precipited in the transferred current included in net budget receipts and Federal-aid highway expenditures were included in budget expenditures. For content, see Table 4.
- These transactions are included in the detail of both budget receipts and expenditures but are deducted from the totals (see Reporting Bases, p. II). Less than \$500.000.

Source: Internal Revenue Service collection reports. Far explanation of difference in reporting basis fram budget receipts through 1954, see the Treasury Bulletin for July 1962, p.BO, and the Annual Report of the Secretary of the Treasury for 1962 p.599

* Beginning with the fiscal year 1955, includes undistributed depository receipts and unopplied collections. The whale amount of such receipts for excise taxes is included under "Other excise taxes."

Source: Expenditures for 1945 and 1966 are from reports received from disbursing, collecting, and administrative agencies of the Government, on the monthly statement reporting basis (see page II). They are classified in accordance with classifications used in the 1946 Budget document, Table 18, as nearly as can be done on an individual appropriation and fund item basis. Prior year figures are from the same source but have been adjusted below the appropriation level in some instances by the Burgau of the Budget for use in Table 18. Where current classifications differ on this account, they are footned. Revolving fund transactions are included net in the expenditures.
1/ For expenditures by major functions for fiscal 1946 through November 1955, and fiscal 1945 through November 1964, see "Note"below. Details by functions are not available for publication in this issue tut will appear in the January 1966 Bulletin.
2/ Expenditures for 1945 and 1946 include those for specified research projects applicable to function code 355. These expenditures were made from "Special Activities, Commodity Credit Corporation."

r Revised.

Consolidated cash transactions reported in the Treasury Bulletin are on a basis consistent with Federal receipts from and payments to the public as derived in the Budget of the United States (in the Budget for 1966 in Special Analysis A). Shown also is the amount of net cash borrowing from, or repayment of borrowing to, the public. Revisions of the figures for earlier years have been made where necessary to make them as nearly comparable with current Budget classifications as available data will permit. For this reason certain of the figures differ somewhat from those published in previous Budget doccuments as well as in the Bulletin.

This series of cash transactions is designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the account of the Treasurer of the United States. Receipts and payments include transactions both in administrative budget accounts and in trust and deposit fund accounts. Major intragovernmental transactions which are reported as both expenditures and receipts are excluded from

both. Noncash items representing the obligations of the Government to make payments in the future also are eliminated from expenditures currently, but are added later when actual payments are made. These items consist of certain interest accrued on the public debt and expenditures involving the issuance of a few special public debt securities. Checks outstanding, deposits in transit, and other clearing accounts are excluded from payments. Receipts from the exercise of monetary authority are excluded as not representing cash received from the public. Federal cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencies and Government-spon-ored enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direct cash borrowing from the public. The net effect of all these transactions with the public is reflected in changes in the balance in the Treasurer's account and in cash held outside the Treasury.

Source: Actual figures are based on the monthly statement of receipts and expenditures of the Government and the daily Treasury statement (for explanation of reporting bases, see page II); estimates, includ-ing effect of proposed legislation are from the 1966 Budget document released on January 25, 1965. Later estimates contained in testimony of the Secretary of the Treasury before the Senate Finance Committee on June 15, 1965, are as follows: Receipts \$95.4 billion; expend-itures \$99.7 billion; and deficit \$4.3 billion.

1/ See "Trust and Other Transactions", Table 5, for net sales and redemptions of Government agency securities in market.
2/ See "Trust and Other Transactions", Table 4, for net investments in public debt and agency securities.
3/ Includes increment resulting from reduction in the weight of the gold dollar; excluded from receipts from the public but included in cash deposits in the Treasurer's account.

_ ACCOUNT OF THE TREASURER OF THE UNITED STATES _

Source and Availability of the Balance in the Treasurer's Account

The account of the Treasurer of the United States reflects not only budget receipts and expenditures but also trust, deposit fund, and public debt transactions.

The working cash of the Treasury is held mainly in Treasurer's accounts with Federal Reserve Banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banks throughout the country.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of money from a customer's account to the tax and loan account in the same bank. On occasions, to the extent authorized by the Treasury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the account of their customers.

The tax and loan account system permits the Treasury to leave funds in banks and in the communities in which they arise until such time as the Treasury needs the funds for ite operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on bank reserves and the economy.

A detailed description of the Treasury's depositary system may be found in the Annual Report of the Secretary of the Treasury for 1955, pages 275-284.

Source: Daily Treasury statement. $\underline{l}/$ Includes reserves and other deposits of the Board of Trustees, Postal Savings System, and uncollected items, exchanges, etc., through December 1962. Effective January 1963 balances of the Postal Savings System funds were transferred to deposit fund accounts and became demand obligations of the Treasury. Balances of these funds, there-fore, are no longer liabilities within the general account of the Treasurer. Uncollected items, exchanges, etc., also previously shown as liabilities were combined with "Unclassified collections, etc." shown under assets. Treasurer's checks outstanding are included - through June 1958, after which they are included in the balance in the Treasurer's account. (See footnote 2).

Through June 1958, the balance of the Treasurer was reduced when Treasurer's checks were issued and the amount of the checks was carried as a liability until paid. Effective July 1958, the balance is not reduced until the checks are paid, a procedure also applying to checks drawn on the Treasurer by Government disbursing officers and agencies

3/ Amounts shown, beginning January 1963, are net of uncollected itams exchanges, etc. Previously these items were included under liabilities.

Special depositaries are permitted to make payment in the form of a deposit credit for the purchase price of U.S. Government securities purchased by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting sub-scriptions to the issues. 1/

Retirement plan bonds first offered for sale as of January 1, 1963. Taxes eligible for credit consist of those deposited by taxpayers in the depositary banks, as follows: Withheld income tax beginning $\frac{2}{3}$

March 1948; taxes on employers and employees under the Federal Insur-ance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; and a number of excise taxes beginning July 1953.

beginning July 1953.
4/ Under a special procedure begun in March 1951, authorization may be given for income tax payments, or a portion of them, made by checks of \$10,000 or more drawn on a special depositary bank, to be credited to the tax and loan account in that bank. This procedure is followed during some of the periods of heavy tax payments.

Adventer 11,799 11,796 11,799 1,797 ree: in the basis of the daily Tressury statement. e: The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outstanding on that date (the amount actually borrowed in the case of securities sold at a premium or discount, beginning with May 1960). The aggregate charge for all interest charge. The average ennual interest rate is computed by dividing the computed annual interest charge for Note: rate is computed by dividing the computed annual interest charge for

30 3.457 4.154 - 3.33. 3.652 3.523 3.307 3.603 the total, or for mry group of issues, by the corresponding principal group. Beginning with data for December 31, 1958, the computation is based on the rate of effective yieli for issues sold at premium or discount. Frior to that date it wis based on the couron rate for all

Guaranteed securities included are those held outside the Treasury. 1

Total includes "Other bonds" through 1960; see Table 3. Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate. On United States savings bonds the rate to maturity is applied against 41 the amount outstanding.

STATUTORY DEBT LIMITATION

The Second Liberty Bond Act (31 U.S.C. 757b), as amended by an act approved June 30, 1959, provides that the face amount of obligations issued under authority of that act, and the face amount of obligations guaranteed as to principal and interest by the United States (except guaranteed obligations held by the Secretary of the Treasury) shall not exceed in the aggregate \$285 billion outstanding at any one time. The corresponding limitation in effect under the act of June 26, 1946, was \$275 billion and that under the act of September 2, 1958, was \$283 billion. Temporary increases to the permanent limitation of \$285 billion, have been authorized as follows: \$10 billion from July 1, 1959, through June 30, 1960 (act of June 30, 1959); \$8 billion from July 1, 1960, through June 30, 1961 (act of June 30, 1960); \$13 billion from July 1, 1961, through March 12, 1962, and \$15 billion from March 13 through June 30, 1962 (acts of June 30, 1961, and March 13, 1962); \$23 billion from July 1, 1962, through March 31, 1963, \$20 billion from April 1 through May 28, 1963, \$22 billion from May 29 through June 30, 1963, and \$24 billion from July 1, 1963 through June 30, 1964 (acts of July 1, 1962, May 29, 1963, August 27, 1963, and November 26, 1963, and an additional \$6 billion, making a total of \$30 billion, from December 1, 1963, through June 29, 1964 (act of November 26, 1963)); \$39 billion from June 29, 1964 through June 30, 1965 (act of June 29, 1964); and \$43 billion from July 1, 1965 through June 30, 1966 (act of June 24, 1965).

1/ Does not include payments for accrued interest.
2/ The effective rate of interest on the new issue is the coupon rate adjusted for the amount paid by or to the Treasury as premium or discount on the new security exchanged for eligible securities originally issued at par. For eligible securities originally issued at par, the payment by or to the Treasury is applied to the price adjusted for the pro rate amortization of the original premium or discount to the date of the advance funding.

2/ Based on the mean of bid and asked prices of securities eligible for exchange (adjusted for payments on account of purchase price of securities issued) at noon on the day before announcement by the

Treasury. 4/ Additional issue.

- Original call and maturity dates are used.
- All by investors other than Federal Reserve Banks.
- Rolled over into a one-year bill (see Table 4). Holders of the maturing certificates were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the 3-1/4%notes offered in the amount of around \$6.9 billion. - Note: In these tables sales of Series A-F and J bonds are included at issue price, and redemptions and amounts outstanding at current redemption value. Series G, H, and K are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured J and K bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, and are then transferred to maturad debt on which interest has ceased.
- Sales and redemption figures include exchanges of minor amounts of (1) matured Series E bonds for Series G and K bonds from May 1951 through April 1957 and (2) Series F and J bonds for Series H bonds beginning 1/ April 1957 and (2) series F and 5 bonds for Series H bonds beginning January 1960; however, they exclude exchanges of Series E bonds for Series H bonds, which are reported in Table 3. Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the
- 2/ Treasury Bulletin.
- Because there is a normal lag in classifying redemptions, the distribu-tion of redemptions between sales price and accrued discount has been estimated. Beginning with the Treasury Bulletin of March 1961 the 3/

method of distributing redemptions between sales price and accrued discount has been changed to reflect the distribution shown in final reports of classified redemptions. All periods shown have been revised on this basis.

- Series F and G sales were discontinued April 30, 1952, and Series J and K sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent adjustments. Includes exchanges of Series 1941 F and G savings bonds for 3-1/4% marketable bonds of 1978-83. 41
- Includes exchanges of Series 1948 F and G bonds for 4-3/4% marketable notes of 1964. 6/
- 7/ Includes exchanges of Series 1949 F and G bonds for 4% marketable bonds of 1969.
- Includes exchanges of Series 1950 F and G bonds for 3-7/8% marketable 8/ bonds of 1968.
- Includes exchanges of Series 1951 and 1952 F and G bonds for 3-7/8% 91 marketable bonds of 1971 and 4% marketable bonds of 1980.
- 10/ Represents changes in the amounts of redemptions not yet classified between matured and unmatured issues.
- * Lass than \$500,000.

Table 1.- Distribution of Federal Securities by Classes of Investors and Types of Issues

Source: Daily Treasury statement for total amounts outstanding; reports from agencies and trust funds for securities held by U. S. Government investment accounts; and reports from Federal Reserve System for securities held by Federal Reserve Banks.

Includes certain debt not subject to statutory limitation. For amounts

Subject to limitation, see page 1. Includes accounts under the control of certain U. S. Government agencies

whose investments are handled outside the Treasury. The total amount of interest-bearing securities held by private inves-tors is calculated by deducting from the total amount outstanding the amount held by U. S. Government investment accounts and Federal Reserve Banks.

Consists of guaranteed securities held outside the Treasury. All are public marketable issues. 4/

6/ Exclusive of banks and insurance companies.
7/ Consists of the investments of foreign balances and international accounts in the United States.
8/ Consists of savings and loan associations, nonprofit institutions, corporate pension trust funds, and dealers and brokers.
9/ Immediate postwar debt peak. p Preliminary.

The monthly Treasury Survey of Ownership covers securities issued by the United States Government and by Federal agencies. The banks and insurance companies included in the Survey currently account for about 90 percent of all such securities held by these institutions. The similar proportion for corporations and for savings and loan associations is 50 percent, and for State and local governments, 70 percent. Data were first published for banks and insurance companies in the May 1941 Treasury Bulletin, for corporations and savings and loan associations in the September 1960 Bulletin, and for State and local governments in the February 1962 Bulletin.

Holdings by commercial banks distributed according to Federal Reserva member bank classes and nonmember banks are published for June 30 and December 31. Holdings by corporate pension trust funds are published quarterly, first appearing in the March 1954 Bulletin.

1/ Includes public debt not subject to statutory limitation. For amount subject to limitation, see page 1.

 $\frac{2}{3}$ Excludes trust departments.

Includes trust companies and, beginning with figures for July 1949, also includes stock savings banks. Previously, those banks were reported as a separate classification.

New series; see March 1964 Treasury Bulletin, page 70. Included with all other investors are those banks, insurance companies, savings and loan associations, corporations, and State and local government funds not reporting in the Treasury Survey. United States savings bonds, Series E and J, are reported to the

6/

Treasury Survey at maturity value but have been adjusted to current redemption value for use in this statement. Includes \$19 million depositary bonds held by commercial banks not included in the Treasury Survey.

7/

Holdings by reporting investors not available.

<u>8</u>/ 9/

Guaranteed securities are those hold outside the Treasury. Includes only publicly offered issues. The proprietary interest of the United States in these banks ended $\frac{10}{11}$ in July 1951.

The proprietary interest of the United States in these banks ended in June 1947. * Less than \$500,700. <u>12</u>/

Beginning April 1953, prices are closing bid quotations in the over-the-counter market. Prices for prior dates are the mean of closing bid and ask quotations. "When issued" prices are included in the history beginning October 1941. Dates of highs and lows in case of recurrence are the latest dates. IJ

2/ On callable issues market convention treats the yield to earliest call date as more significant when an issue is selling above par, and to maturity when it is selling at par or below.
2/ Included in the average yield of long-term taxable Treasury bonds as shown under "Average Yields of Long-Term Bonds."

account of the Federal Reserve Banks and agents. The following paper currencies are in process of retirement and are redeemable from the general fund of the Treasury: Gold certificates issued before January 30, 1934, silver certificates issued before July 1, 1929, Treasury notes of 1890, Federal Reserve notes issued before the series of 1928, Federal Reserve Bank notes, and national bank notes. The Treasury notes of 1890 have been in process of re-tirement since March 1900 (31 U.S.C. 411) upon receipt by the Treasury, the Federal Reserve Bank notes since June 12, 1945 (12 U.S.C. 445 note). and the national bank notes since December 23, 1915 (12 U.S.C. 441). Retirement of the others was authorized by the Old Series Currency Adjustment Act, approved June 30, 1961 (31 U.S.C. 912-916). The act authorizes the Secretary of the Treasury to determine from time to time the amount of currency of the following types which have been destroyed or lost, and to reduce the amounts thereof on the books of the Treasury: Gold certificates notes, Federal Reserve Bank 1934; ailver certificates, United States notes, Federal Reserve Bank notes, and national bank notes all issued before July 1, 1929; Federal Reserve notes issued prior to the series of 1928; and Treasury notes of 1890. Accordingly, the Secretary of the Treasury has determined

that the following paper currencies have been destroyed or irretrieva-bly lost and so will never be presented for redemption: On October 20, 1961, \$1 million of Treasury notes of 1890; on August 27, 1962, \$9 million of gold certificates, \$15 million of silver certificates, \$18 million of Federal Reserve notes, \$1 million of Federal Reserve Bank notes, and \$15 million of national bank notes; and on November 16, 1964, \$6 million of gold certificates, \$14.5 million of silver certi-ficates, \$100 thousand of Treasury notes of 1890, \$24 million of United States notes, \$14 million of Federal Reserve notes, \$1 million of Federal Reserve Bank notes, and \$13.5 million of national bank notes. notes. Issued prior to January 30, 1934.

- 45/6/ Highest amount to data.

- Highest amount to data. Includes \$421 thousand issued before July 1, 1929. Includes \$42 thousand issued prior to the series of 1928. Based on the Bureau of the Census estimated population. Through fiscal 1958 the estimated population is for the conterminous United States (that is, evclusive of Alaska, Hawaii, and the outlying areas such as Puerto Rico, Guum, and the Virgin Islands). Beginning with fiscal 1959 the estimates include Alaska, and with fiscal 1960, Hawaii. Less than \$500,000. ×

Note: The United States also has a gold tranche position in the International Monetary Fund, amounting to \$602.9 million as of November 30, 1965. In accordance with Fund policies the United States has the right to draw foreign currencies equivalent to this amount from the Fund virtually sutomatically if needed. Under appropriate circum-Fund virtually subconstically in needed. Under appropriate circum-stances, the United States could draw additional amounts equal to the United States quota of \$4,125 million. In addition, the United States has a \$258.8 million gold claim on the Fund arising from a gold sub-scription to the Fund in June 1965, for a U. S. quota increase which has not yet become effective.

2/

purchased \$200 million in 1956, \$300 million in 1959, and \$300 million in 1960. Also includes gold deposit of I.M.F.; see footnote 4. Includes gold in Exchange Stabilization Fund, which is not included in Treasury gold figures shown in "Circulation Statement of United States Money." See "Monetary Statistics," Table 3. Includes holdings of Treasury and Federal Reserve System. Includes gold deposited by the International Monetary Fund (\$8.3 mil-lion as of September 30, \$9.3 million as of October 31, 1965, and \$34.3 million as of November 30, 1965) for the purpose of mitigating the impact of gold payments to the Fund for quota increases by countries which purchased such gold from the United States. The United States has a corresponding gold liability to the Fund. 4/ United States has a corresponding gold liability to the Fund.

Includes gold sold to the United States by the International Monetary Fund with the right of repurchase, the proceeds of which are invested by the Fund in U. S. Government securities; as of November 30, 1965, this amounted to \$800 million. Of this amount, the United States

Background

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Information on the principal types of data and the principal countries is published monthly in the "Treasury Bulletin." Reports by banks, bankers, securities brokers and dealers, and nonbanking business concerns in the United States are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury. These statistics are consolidated by the Treasury and published as promptly as possible.

The reporting forms and instructions used in the collection of the statistics have been revised a number of times. The most recent revision became effective with reports covering data as of May 31, 1963.1/ A detailed description of the content of the statistics, including the changes instituted, appeared in the July 1963 issue of the "Treasury Bulletin," pages 79-81. As a result of changes in presentation introduced in that issue, not all breakdowns previously published will be exactly comparable to those now presented.

Basic definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including United States citizens domiciled abroad and the foreign subsidiaries and offices of United States banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled. Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the classification "International," "European regional," or "Latin American regional," as appropriate, except for the Bank for International Settlements and the European Fund, which are included in the classification "Other Western Europe."

"Short-term" refers to obligations payable on demand or having an original maturity of one year or less, without deduction of any offsets. "Long-term" refers to obligations having an original maturity of more than one year, and includes securities having no contractual maturity. Exclusions

The data published herein do not cover all types of capital movements between the United States and foreign countries. The data reported to and published by the Treasury Department exclude entirely the intercompany capital transactions of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies; such transactions are reported by business firms to the Department of Commerce. Data on the capital transactions of the United States Government and on shipments and receipts of United States currency are also excluded from the Treasury reports. Certain capital transactions not effected through reporting institutions, such as securities transactions carried out entirely abroad, are not recorded in the Treasury reports. Consolidated data on all types of capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

The liabilities data exclude nonnegotiable, noninterestbearing special notes of the United States held by the Inter-American Development Bank and the International Development Association.

The data on securities transactions and on foreign holdings of U.S. Government bonds and notes exclude nonmarketable U.S. Treasury notes, foreign series, and nonmarketable U.S. Treasury bonds, foreign currency series (see "International Financial Statistics" section, Table 2).

Presentation of statistics

Data collected monthly on the Treasury Foreign Exchange Forms are published in three sections. Section I provides a summary of the principal data by period; Section II presents data by country and by period; and Section III shows detailed breakdowns of the latest available preliminary data.

Section IV presents supplementary data which are reported less frequently than monthly but which are published monthly. Beginning with the November 1965 issue, data on "Long-Term Liabilities to Foreigners Reported by Nonbanking Concerns" and "Long-Term Claims on Foreigners Reported by Nonbanking Concerns" are presented as Tables 4 and 5 of this Section.

1/ Copies of the reporting forms and instructions may be obtained from the Office of Balance of Payments Programs, Operations and Statistics, Office f the Assistant Secretary for International Affairs, Treasury Department, Washington, D.C. 2022) or from Feisral Reserve Banks.

for an explanation of statistical presentation and exclusions, see headnote on page 83. Through 1949, transactions in D. S. Government bonds and notes include transactions in domestic corporate bonds. Data below the line include changes in liabilities and claims reported by a number of banks included in the series beginning December 31, 1961.

1961. Change includes claims previously held but first reported as of May 31, 1963; as of that date such claims amounted to \$85.6 million. Also includes claims reported by banks for the first time as of December 31, 1963; as of that date such claims amounted to \$193.2 million, repre-4/

senting in part claims previously held by banks but not reported.

5/ Change in short-term liabilities includes a net increase of \$20.1 million as of December 31, 1964, arising from changes in reporting coverage.

Coverage. Data below the line on changes in claims reflect the exclusion from the series beginning December 31, 1964 of short-term U. S. Government claims previously included; and the addition to the series of claims arising from the inclusion of claims previously held but first reported as of December 31, 1964, and from revisions of preliminary figures. 6/

- For exclusions see headnote on page 83. Included with "Other foreigners." Included with "Other claims." Beginning in August 1956 and also in April 1957, certain accounts previously classified as "Foreign banks" are included with "Official institutions."
- 5/
- institutions." Differs from 1961 end-year data on the preceding line by inclusion of liabilities and claims reported by a number of banks included in the series beginning December 31, 1961. Includes reported liabilities to foreign official institutions begin-ning October 1961. Figures for selected dates are as follows: end 1961, \$46.3 million; end 1962, \$47.9 million; end 1963, \$30.1 million; million.
- Includes claims previously held but first reported as of May 31, 1963; as of that date such claims amounted to \$85.6 million. Also includes 2/

claims amounting to \$193.2 million reported by banks for the first time as of December 31, 1963, representing in part claims previously held by banks but not reported.

Short-term liabilities include a net increase of \$20.1 million arising from changes in reporting coverage, distributed as follows: "Foreign banks" + \$25.6 million, "Other foreigners" + \$22.5 million, and "Payable in foreign currencies" -\$27.9 million. See footnote 10. 8/

-R

2/ 10/ See footnote 10. Data on claims below the line differ from claims above the line because of the exclusion as of December 31, 1964 of \$58.1 million of short-term U. S. Government claims previously included; and because of the ad-dition of \$538.3 million of short-term claims and \$313.3 million of long-term claims arising from the inclusion of claims previously held but first reported as of December 31, 1964, and from revisions of preliminary figures. p Preliminary. r Pevised.

1/ Includes claims previously held but first reported as of May 31, 1963; as of that date such claims amounted to \$85.6 million.
2/ Grand total includes claims amounting to \$193.2 million, reported by banks for the first time as of December 31, 1963, representing in part claims previously held by banks but not reported. Included in this amount are claims on: Europe \$4.6 million, Latin America \$133.8 million, and Asia \$53.7 million.
3/ See footnote 4.
4/ Piffers from 1964 data in preceding column because of the addition of \$313.3 million of long-term claims arising from the inclusion of claims previously held but first reported as of December 31, 1964, and from

revisions of preliminary figures.
"Other Latin American Republics" include only Bolivia, Dominican Republic, Guatemala and El Salvador; other Latin American republics included with "Other Latin America." Bahamas and Bormuda included with "Other Latin America."
"All other" countries include Morocco and "Other Africa." "Total other countries" include "Total Africa."

Note: Data represent estimated official and private holdings of U. S. Covern-ment securities with an original maturity of more than one year. (For exclusions see headnote on page 83.) Annual and monthly data are shown in this section beginning February 1964. For quarterly data see Section IV, Table 2, through June 1964; and "Internstional Financial Statistics," Table 4, beginning September 1964. Data as of December 31, 1962-63 are on the basis of a November 30, 1960 survey and regular monthly reports of securities transactions (see Table 4). Data for December 31, 1963, also are shown on the basis of a July 31, 1963, survey and the monthly

transactions reports. For statistical convenience, the new series is introduced as of December 31, 1963, rather than as of the survey date. The variations between the two series are believed to result from omissions from, or errors in reporting, shifts in ownership not in-volving purchases or sales through U.S. banks or brokers, and physical transfers of securities to and from abroad. It is not possible to reconcila tha two series or to revise figures for earlier dates. * Less than \$500,000.

Note: Data are reported by exporters, importers, industrial and commercial firms, and other nonbanking concerns in the United States. Data exclude intercompany accounts between firms in the United States and their affiliates abroad. Data are included from firms reporting for the first time as of March 31, 1963 (seventh revised series), and December 31, 1963 (eighth

revised series). The ninth revised series includes reports from firms having \$500 thousand or more of liabilities; for previous series the exemption level was \$100 thousand. The detailed breakdown of the most recent data is shown in Table 3 of this Section. Preliminary

p Preliminary.

Note: Excludes transactions in nonmarketable U. S. Treasury bonds, foreign currency series. See "International Financial Statistics," Table 2. The financial statements of corporations and other business-type activities of the United States Government, which have appeared in the "Treasury Bulletin" since the August 1956 issue, are compiled from reports submitted to the Treasury under Department Circular No. 966, issued January 30, 1956, and Supplement No. 1, Revised, issued June 16, 1965. These regulations were issued pursuant to the Budget and Accounting Procedures Act of 1950. They superseded Budget-Treasury Regulation No. 3, issued under Executive Order No. 8512 of August 13, 1940, as amended by Executive Order No. 9084 of March 3, 1942, under which financial statements previously published in the Bulletin were submitted.

Department Circular No. 966 requires submission of financial statements by all wholly owned and mixed-ownership Government corporations specifically included in the Government Corporation Control Act, as amended (31 U.S.C. 846, 856); and all other activities of the Government operating as revolving funds. Other activities and agencies whose operations, services, or functions are largely self-liquidating or primarily of a revenue-producing nature, and activities and agencies whose operations result in the accumulation of substantial inventories, investments, and other recoverable assets, were brought under the regulations as the agency accounting systems were developed to where they were capable of furnishing the required financial reports.

Four kinds of financial statements are called for by Department Circular No. 966. They are statements of financial condition, income and expense, source and application of funds, and certain financial contingencies. The statements of financial condition are published quarterly and appear as Section I in the series of tables. The first statements of financial condition published under Circular 966 were as of March 31, 1956, and were presented in the August 1956 Bulletin. Statements of income and expense and source and application of funds are published semiannually, for June 30 and December 31 reporting dates, and appear as Section II and III. The first of these statements under Circular 966 covered the fiscal year 1956, and were published in the January 1957 Bulletin. Within the sections, the agencies are grouped in separate tables by type, as follows: public enterprise revolving funds, intragovernmental revolving funds, certain other activities, deposit funds, and trust revolving funds.

Supplement No. 1, when originally issued in 1956, extended the coverage to include all executive agencies and activities not previously reporting under Circular 966, but required only a statement of financial condition annually as of June 30. These were activities which were not principally of a businesstype nature. Those which had not yet developed formal accounting procedures to provide complete balance-sheet type statements were temporarily authorized to report only assets. Thus, the supplement rounded out provisions for information on properties and other assets, as well as liabilities, of the United States Government all of which is needed by Treasury for the compilation of complete Government-wide financial reports. The first comprehensive reporting under the original Supplement No. 1 was for June 30, 1957, and the data were published in the December 1957 Bulletin as Part B of Table 4 in Section I. The revision to Supplement No. 1 in 1965 made no basic change to the overall purpose of the originally issued supplement; it updated and consolidated all amendments to both the regulation and instructions which had been issued after June 30, 1956.

A summary of loans outstanding for a series of dates is included in Section I of the Bulletin presentation beginning with the June 1958 issue. Two classifications of the loans are shown, one by type and one by agency. Data prior to 1956 are based on the earlier reporting requirements, which provided for complete coverage of Government lending agencies.
