## Reporting Bases

Data on receipts, expenditures, and debt which appear in the "Tressury Bulletin" are based largely on two Treasury finencial reports, the "Daily statement of the United States Treasury" and the "Monthiy Statement of Receipts and Expenditures of the United States Government." Certain monetary statistics are based at least in part on the "Circulation Statement of United States :1oney." Where these statements are given as sources for individual tables, they are cited by name only. Their respective reporting bases are described below. For other data in the Bulletin, information on sources or reporting bases is given in connection with the tables themselves.

The montbly statement of recelpts and expenditures was first published for February 1954 , and replaced the dally statement as the primary source of information on budget results and other receipt and expenditure data classified by type of account. At the same time, the daily statement was changed to a statement of cash deposits and withdrawals affecting the account of the Treasurer of the United States. Both publications have proviaed comparative figures on their respective bases from the beginning of the fiscal year 1953. The announcement of February 17, 1954 , with respect to these reporting changes may be found in the April 1954 issue of the Bulletin.

The monthly statement shows all recelpts and sxpenditures of the Government, including those made from cash accounts held outside the United States Treasury. The information is compiled from reports by the Treasurer of the United states and by all other collecting and disbursing agencies, including those agencies which maintain checkinc accounts in commercial banks. These reports cover transactions recorded in the accounts of the agencies during the reporting period. The net of the transactions as compiled from these reports is reconciled in the monthly statement to changes in the balance in the Treasurer's account and in cash held outside the Treasurer's account and changes in the public debt outstanding.

Receipts of taxes and customs duties are reported on a collections basis. Other receipts are reported partially on a collections basis and partially on a deposits basis. Expenditures, except interest on the public debt, are reported on the basis of checks issued or cash payments made by disbursing officers. Transactions of an interfund or intragovernmental nature are included on the same basis even though the actual issuance of checks may not be involved. Interest on the public debt is included on an accrual basis beginning with figures for June 1955 and the fiscal year 1955. Prior to that, it was included on a due and payable basis. The same reportins basis as that in the monthly statement provides the fiscal year figures for the Treasury's "Comoined Statement of Receipts, Expend-

1tures and Ealances of the United States Government" and for actual receipts and expenditures in the "Budget of the United States Government."

Beginning with the inal statement for the inscal year 1960, the monthly statement reports totals for net budget receipts and budget expenditures after deduction of certain interfund transactions which are incluced in the detall of both budget recelpts and budget expenditures. The transactions deducted consist of interest payments and minor amounts of certain other payments made by Government agencies to the Treasury. This reporting change was made in accordance with the plan stated in the President's Budget Nessage of January 18, 1960. It does not affect the surplus or deficit. Figures for earlier periods shown in the Treasury Bulletin were revised to the new reporting basis in the September 1960 issue. The interfund transactions deducted under this procedure do not include payments to the Treasury by wholly owned Government corporations for retirement of their capital stock and for disposition of earnings. These capital transiers have been excluded currently from budget recelpts and budget expenditures beginning July 1 , 1948, and figures for prior fiscal years back through 1932 were revised accordinf゙ly at that time.

The dally statement on the new basis was first issued for February 17, 1954. In the deposits and withdrawals as shown, no distinction is made as to the type of accounts (budget, trust, etc.). The deposits are on the basis of certificates of deposit cleared through the account of the Treasurer of the United States. Total withdrawals are on the basis of checks pald or cash disbursements made out of the Treasurer's account. Some of the withdrawal classifications shown are reported on the basis of meiled reports of checks issued and are adjusted by means of clearing accounts to the total of checks paid. Except for relatively minor amounts, noncash interfund and other intragovernmental transactions are excluded. The public debt figures in the dally statement also are on a "clearancs" basis, with tha exception of those issuance and retirement transactions reported on the basis of telegrams from Federal Reserve Banks. Noncash debt transactions are included, however.

The dally gtatement before February 17, 1954, covered not only transactions cleared through the Treasurer's account but also certain Government agency transactions which were handled through commercial bank accounts, and included noncash interfund and other intragovernmental transactions. It provided information similar to that in the present daily statement with respect to the atatus of the Treasurer's account, and similar to that in the present end-of-month daily statement with respect to debt issuance, retirement, and amount outstanding. Receipts and expenditures, however, were classified by type of account, and the budget results shown

## Reporting Bases - (Continued)

in the daily statement were used as the basis for reflecting the results under the President's budget program as enacted by the Congress.

Recelpts were on the basis of deposits as they cleared the Treasurer's account. Expenditures cleared through the Treasurer's account were reported on two successive bases. Through 1946 they were on the basis of checks paid by the Treasurer of the United States. Beginning with 1947, expenditures made through the facilities of the Treasury Department's Division of Disbursement were on the basis of checks 1ssued, while certain others, principally those of the Department of Defense and 1 ts oredecessor organizations, were on the basis of checks paid. Transactions han-
dled through comnercial bank accounts, consisting of mariket transactions in public debt and guaranteed securities, were as reported by the agencies. Interest on the public debt was included on a due and payable basis beginning with November 1949 and on a checks-pald basis prior to that time.

The circulation statement reflects transactions through the Treasurer's account which affect monetary stocks of gold and silver and the amounts of coin and currency in the money supply of the country. It is issued later than the dally statement, however, and the figures are based on transactions consummated during the reporting period even though some may not have cleared the Treasurer's account during that period.

## Treasury Financing Operations

## January Cash Offering

The Treasury announced on January 5 a cash offering of \$1.5 billion, or thereabouts, of 10 -month $4 \frac{3}{4}$ percent Treasury Certificates of Indebtedness of Series A-1966 at a price of 99.92 (to yield 4.85 percent). It was stated in the announcement that this was part of the Treasury's estimated $\$ 5$ billion cash need during the second half of the current fiscal year.

Subscriptions were received on Monday, January 10. On the basis of preliminary reports, subscriptions totaled about \$10,133 million of which $\$ 1,652$ million were accepted. Subscriptions for $\$ 50,000$ or less were allotted in full and those for more than $\$ 50,000$ were allotted 14. 5 percent, with a minimum allotment of $\$ 50,000$.

The payment and delivery date for the certificates was January 19. Payment by credit in Treasury tax and loan accounts was permitted. The certificates are dated January 19, 1966, will mature November 15, 1966, and were issued in bearer form only. Interest will be payable on May 15 and November 15, 1966.

Subscriptions from banking institutions for their own account, Federally-insured savings and loan associations, States, political subdivisions or instrumentalities thereof, public pension and retirement and other public funds, international organizations in which the United States holds membership, foreign central banks and foreign States, dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions with respect to Government securities and borrowings thereon, and Government investment accounts were received without deposit. Subscriptions from all others had to be accompanied by payment of 2 percent of the amount of certificates applied for, not subject to withdrawal until after allotment. Commercial bank subscriptions for their own account were restricted in each case to an amount not exceeding 50 percent of the combined capital (not including capital notes or debentures), surplus and undivided profits of the subscribing bank.

Commercial banks and other lenders were requested to refrain from making unsecured loans, or loans collateralized in whole or in part by the certificates subscribed for, to cover the deposits required to be paid when subscriptions were entered, and banks were required to make the usual certification to that effect. All subscribers were required to agree not to purchase or to sell, or to make any agreements with respect to the purchase or sale or other disposition of the certificates subscribed for under this offering at a specific

Tax Anticipation Bills

An additional issue in January increased the June 1966 tax anticipation bills to $\$ 4.5$ billion. Tenders were invited on December 22 for $\$ 1.0$ billion, or thereaborts, of 168-day tax anticipation bills which were auctionel on December 29. The bills constitite an additional issue of the bills dated October 11, 1965, to mature June 22, 1966, and originally issued in the amount of $\$ 1,003$ million (an additional $\$ 2,513$ million was issued November 24, 1965).

Tenders : ecsived totaled $\$ 3,647$ million, of which $\$ 1,007$ million were accepted at the average bank discount rate of 4.281 percent. Noncompetitive tenders for $\$ 200,000$ or less (without stated price) from any one bidder were accepted in full at the avarage price of accepted competitive bids. These totaled $\$ 236$ million.

Banking institutions generally could submit tenders for account of customers provided the names of the customers were set forth in such tenders. Others than banking institutions could submit tenders only for their own account. Tenders were received without deposit from incorporated banks and trust companies and from responsible and recognized dealers in investment securities. Tenders from others had to be accompanied by payment of 2 percent of the face amount of the tax anticipation bills applied for, or an express guaranty of payment by an incorporated bank or trust company.

All bidders were required to agree not to purchase or to sell, or to make any agreements with respect to the purchase or sale or other disposition of any bills of the additional issue at a specific rate or price, until after one-thirty p.m., eastern standard time, December 29, 1965.

Payment for accepted tenders in cash or other immediately available funds was required to be made or completed on January 5, 1966. Any qualified depositary was permitted to make payment by credit in its Treasury tax and loan account for the bills allotted to it for itself and its customers up to any amount for which it was qualified in excess of existing deposits.

The additional and original bills are freely interchangeable and will be accepted at face value in payment of income taxes due June 15, 1966. To the extent they are not presented for this purpose the face amount will be payable without interest at maturity. Issued in bearer form only, the bills are in denominations of $\$ 1,000, \$ 5,000, \$ 10,000, \$ 50,000$, $\$ 100,000, \$ 500,000$, and $\$ 1,000,000$ (maturity value).

## One-Year Bills Refunded

On December 16 the Treasury invited tenders for \$1 billion, or thereabouts, of 365-day Treasury bills for cash and in exchange for bills maturing December 31, 1965. The auction was held December 23.

The new bills are dated December 31, 1965, and mature December 31, 1966, when the face amount will be payable without interest. Tenders received totaled $\$ 2,720$ million, of which \$1,001 million (including \$52 million of noncompetitive tenders) were accepted at the average discount rate of 4.731 percent. Noncompetitive tenders for $\$ 200,000$ or less (without stated price) from any one bidder were accepted in full at the average price of accepted compstitive bids.

Requirements relating to deposits with tenders and the denominations of the new one-year bills were like those for the tax anticipation bills described in preceding paragraphs. Payment for accepted tenders was required to be made or completed on December 31, 1965, in cash or other immediately available funds or in a like face amount of bills maturing on that date. Payment by credit in Treasury tax and loan accounts was not permitted.

## 13-Week and 26-Week Bills

New issues of regular weekly Treasury bills in December totaled \$11.0 billion, refunding an equivalent amount of weekly bills maturing. The new issues consisted of five 13 -week issues of $\$ 1.2$ billion each and five 26 -week issues of $\$ 1.0$ billion each. All of the new bills carry 91-day or 182-day terms. Average rates for the new issues are shown in the following table.

This was an additional issue of the bills dated March 31, 1965.
3) This was an additional issue of the bills dated June 30, 1965.
In an announcement December 22, 1965, the Treasury said it planned to raise additional cash by a $\$ 100$ million increase in the $\$ 1.2$ billion regular weekly three-month bill issue, starting with the auction on January 3, and probably runing through a full 13-week cycle.

## Foreign Series and Foreign Currency Series

In December the Treasury issued three certificates of indebtedness and one note of the foreign series totaling $\$ 470$ million and three foreign currency issues equivalent to $\$ 80$ million. Retirements amounted to $\$ 490$ million for foreign series securities, including \$115 million payable in February, and the equivalent of $\$ 80$ million for the foreign currency series.

1/ The distribution of receipts between individual income taxes and oldage and disability insurance taxes is made in accordance with provisions of Sec. 201 of Social Security Act, as amended (42 U.S.c. 401), for transfer to the Federal Old-Age and Survivors Insurance Trust Fund (see footnote 10), and also for transfer to the Federal Disability Insurance Trust Fund (see footnote 11).

2 Taxes on employers and employees under the Federal Insurance Contriindividuals under the Self-Employment Contributions Act, as amended ( 26 J.S.C. 1401-1403). The Social Security Act Amendments of 1956, approved August 1, 1956, increased the rates of tax applicable to wages paid and taxable years beginning after December 31, 1956, to provide for disability insurance.

9 The principel amounts for refunds of employmant taxes and certain excise taxes (highway) are excluded from the trensfers of tax recelpts shown herein, and are included with refunds of internel revenue receipts, applicable to trust accounts.
10 Amounts epproprieted to the Federal 01d-Age and Survivors Insurance Trust Fund ore equivalent to amounts of taxes collected and deposited for old-age insurance. Amounts transferred currently for approprietion to the trust fund are besed on estimates of old-ege insurence tax receipts made by the Secretery of the Treesury ( 42 U.S.C. 401 (a)), end ere adjusted in later trensfers on the basis of wage and self-employment income records maintained in tbe Social Security Administration.
11 The Federel Disebility Insurance Trust Fund wes esteblished by tha Social Security Act Amandments of 1956, approved. August 1, 1956 (42 U.S.C. 401 (b)). The ect approprieted to the trust fund amounts equivelent to specified percentages of the weges end self-employment income, respectively, which ere taxed for old-age insurence, and provided thet the amounte eppropriated should be transferred from tima to time to the
trust fund on the same basis as transfers to the Federal Old-Age and Survivors Insurence Trust Fund. Rates of tax were increesed by the percenteges appropristed to the Federal Disability Insurance Trust Fund, the increase being applicable to wages paid and taxable yeers baginning after Decembar 31, 1956.
12 Amounts are appropriated to the Railroad Retirement Account equal to the amount of taxes under the Railroad Retirement Tax Act doposited In the Treasury, less refunds, during each fiscal year ( 65 Stet. 222 end 66 Stet. 371 ) and transfers are mede currently.
13) The Employment Security Act of 1960, approved September 13, 1960 ( 42 U.S.C. 1101), established in the Unemployment Trust Fund, an edministration account, and appropriated for credit to thet eccount, beginning with fiscal 1961, amounts equivalent to texes collected end deposited under the Federal Unemployment Tax Act. The tax receipts are trensferred currently on the besis of estimates by the Secretery of the Treasury, with later adjustments as necessary. From that account is to be paid the administrative expenses of the employment security program. Previously the corresponding amounts were included, respectively, in budget recelpts end budget expenditures.
14 The Highway Revenue Act of 1956, as amended, ( $23 \mathrm{U} . \mathrm{S} . \mathrm{C} .120$, note) established a Highway Trust Fund from which are to be made, as provided by eppropriation ects, Federel-aid highwey expenditures after June 30, 1956, and before October 1, 1972. The act appropriated to this fund amounts equivelent to specified percentages of receipte from certain excise taxes on motor fuels, motor vehicles, tires and tubas, and use of certain vehicles, and providad that the amounts approprieted should be trensferred currently to the trust fund on the besis of estimates by the Secretary of the Treesury with proper edjustments to be made in subsequent transfers. Before fiscal 1957 corresponding excise tax receipte were included in net budget receipts and Federal-eid highway expenditures were included in budget expandituree.

Scurce: Expenditures for 1966 are from reporta received from disbursing, collecting, and administrative agencies of the Government, on the monthly statement reporting basis (see page II). They are classified in accordance with classifications used in the 1967 Budget document, Table 19, as nearly as can be done on an individual appropriation and fund item basis. Prior year figures are from the same source but have been adjusted below the appropriation level in some instances by the Bureau of the Budgat for use in Table 19. Where current classifications differ on this account, they are footnoted. Revolving fund transactions are included net in the expenditures.
1/ For expenditures by major functions for fiscal 1966 through December 1965, and fiscal 1965 through December 1964, see "Note" below. Details by functions are not available for publication in this issue but will appear in the February 1966 Bulletin.
2) For description of items included, see Table 5. Although not expended, substantial portions of these amounts are obligated for payrolls, outstanding purchase orders and contracts for equipment
and supplies, and similar items.
3 Expenditures for 1966 include those for specified research projects applicable to function code 355. These expenditures were made from "Special Activities, Commodity Credit Corporation."
4. See footnote 3.
6) Expenditures for 1966 include medical and hospital care for the aged applicable to function code 651.
7/ See footnote 8.
8/ Expenditures for 1966 include those for assistance for elementary and secondary education applicable to function code 701 and other aids to education applicable to function code 704 . These expenditures were made from "Defense Educational Activities, Office of Education."

2/ Expenditures for 1966 include those for veterans ' nonserviceconnected pensions applicable to function code 802 and other vetarans' benefits and services applicable to function code 805. These expenditures were made from "Compensation and Pensions, Veterans' Administration."
10/ See footnote 9.
Note: Expenditures by major functions, see footnote 1.

Source: See Table 1.

1) Payments are made between the Railroad Retirement Account and the Federal 01d-Age and Survivors and Federal Disability Insurance trust funds so as to place those funds in the position in which they would have been if railroad employment after 1936 had been included under social security coverage.
2) Includes interest on amounts reimbursed to the Federal 01d-Age and Survivors Insurance Trust Funさ for administrative expenses.
3/ Includes temporary advances to the Railroad Unemployment Insurance Account in the Unemployment Trust Fund when the balance in the account is insufficient to meet payments of benefits and refunds due or to become due.

4 Repayment of advances plus interest to the Railroad Retirement Account. See Footnote 3.
5/ Transfers from the Civil Service Retirement and Disability Fund to the Foreign Service Retirement and Disability Fund.
6) Contributions and beginning with 1958, transfers of deductions from employees' salaries to the Civil Service Retirement and Disability Fund, and advances to National Park Service.
7/ Transfers to the Foreign Claims Settlement Commission.

* Less than $\$ 500,000$.

Consolidated cash transactions reported in the Treasury Bulletin are on a basis consistent with Federal receipts from and payments to the public as derived in the Budget of the United States (in the Budget for 1966 in Special Analysis A). Shown also is the amount of net cash borrowing from, or repayment of borrowing to, the public. Revisions of the figures for earlier years have been made where necessary to make them as nearly comparable with current Budget classifications as available data will permit. For this reason certain of the figures differ somewhat from those published in previous Budget doccuments as well as in the Bulletin.

This series of cash transactions is designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the account of the Treasurer of the United States. Receipts and payments include transactions both in administrative budget accounts and in trust and deposit fund accounts. Major intragovernmental transactions which are reported as both expenditures and receipts are excluded from
both. Noncash items representing the obligations of the Government to make payments in the future also are eliminated from expenditures currently, but are added later when actual payments are made. These items consist of certain interest accrued on the public debt and expenditures involving the issuance of a $f$ ew special public debt securities. Checks outstanding, deposits in transit, and other clearing accounts are excluded from payments. Receipts from the exercise of monetary authority are excluded as not representing cash received from the public. Federal cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencies and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direct cash borrowing from the public. The net effect of all these transactions with the public is reflected in changes in the balance in the Treasurer's account and in cash held outside the Treasury.

## Source and Availability of the Balance in the Treasurer's Account

The account of the Treasurer of the United statea reflects not only budget recelpts and expendituras but alao trust, deposit fund, and public debt tranaactions.

The working cash of the Treasury is held mainly in Treasurer's accounta with Federal Reaerve Banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funda from the tax and loan accounta with thouaanda of commercial banke throughout the country.

Deposita to tax and loan aocounta ooour in the normal courae of businese under a unlform procedure applicable to all banks whereby customers of banke deposit with than tax payments and funds for the purchase of Government securities. In moat casea the tranaaction involves merely the tranafer of monay from a cuatomer's account to the tax and loan aooount in
the same bank. On ocossiona, to the sxtent authorized by the Treasury, banka are permitted to deposit in these accounts proceeda from subacriptions to public debt aecuritiea entered for their own account as woll aa for the account of their oustomera.

The tax and loan account aystam parmita the Treasury to leave funda in banks and in the communitioa in which they ariae until such time as the Treasury needs the funds for ite operations. In thia way the Treasury ia able to neutralize the offect of ita iluotuating operationa on bank reserves and the economy.

A detalled deacription of the Treasury's depositary ayotex may be found in the Annual Raport of the Saoretary of the Treasury for 1955, pages 275-284.

## Source: Daily Traasury statement.

1. Includes reserves and othar deposits of the Board of Trustees, Postal Savings System, and uncollected items, exchanges, etc., through December 1962. Effective January 1963 balances of the Postal Savings Systam funds were transferred to daposit fund accounts and became demand obligations of the Treasury. Balances of thase funds, therefore, are no longer liabilities within the general account of the Treasurer. Uncollectad items, axchanges, atc., also previously shown as liabilities ware combined with "Unclassified collactions, etc." shown under assets. Treasurer's checks outstanding are included
through June 1958, after which they are included in the balanca in the Treasurer's account. (See footnote 2).
2/ Through June 1958, the balance of the Traasurer was reducad whan Treasurer's checks ware issued and the amount of the checks was carriad as a liability until paid. Effective July 1958, the balance is not reduced until the chacks are paid, a procedura also applying to checks drawn on the Treasurar by Govemment disbursing officers to checks dra
and agencias.
3) Amounts shawn, beginning January 1963, are net of uncollectad items, exchanges, etc. Previously these items were included under liabilities.

Source: On the basis of the daily Treasury statement. that would be paid if each interest-bearing issue outstanding at the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annusl interest rate to the amount outstanding on that date (the amount actusily borrowed in the case of securities sold at a premium or discount, beginning with May 1960).
The aggregate charge for all interest-bearing 1ssues constitutes the total computed annual interest charge. The average annual interest rate is computed by dividing the computed annual intarest charge for
the total, or for any group of issues, by the corresponding principal amount. Beginning with dsta for December 31, 1958, the computation is based on the rate of effective yield for issues sold at premium or discount. Prior to that date it was bssed on the coupon rate for all issues.
1/ Cuaranteed securities included are those held outside the Treasury.
2 Total includes "Other bonds" through 1960: see Tsble 3.
3 Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate. 4) On United States savings bonds the rate to maturity is applied against the amount outstanding.

2) The proprietary interest of the United States in these banks ended in June 2947.
3/ Figures do not include securitias which are issued for use as collateral for commercial bank borrowing and not as a part of public offerings. Includes small amounts owned by Federal land banks.

The Second Liberty Bond Act (31 U.S.C. 7570), as amended by an act approved June 30, 1959, provides that the face amount of obligations issued under authority of that act, and the face amount of obligations guaranteed as to principal and interest by the United States (except guaranteed obligations held by the Secretary of the Treasury) shall not exceed in the aggregate $\$ 285$ billion outstanding at any one time. The corresponding limitation in effect under the act of June 26, 1946, was $\$ 275$ billion and that under the act of September 2, 1958, was $\$ 283$ billion. Temporary increases to the permanent limitation of $\$ 285$ billion, have been authorized as follows: $\$ 10$ billion from July 1, 1959, through June 30, 1960 (act of June 30, 1959); $\$ 8$ billion fram July 1, 1960, through June 30,

1961 (act of June 30, 1960); \$13 billion from July 1, 1961, through March 12, 1962, and $\$ 15$ billion from March 13 through June 30, 1962 (acts of June 30, 1961, and March 13, 1962); \$23 billion fram July 1, 1962, through March 31, 1963, $\$ 20$ billion from April 1 through May 28, 1963, \$22 billion from May 29 through June 30, 1963, and $\$ 24$ billion from July l, 1963 through June 30, 1964 (acts of July 1, 1962, May 29, 1963, August 27, 1963, and November 26, 1963, and an additional $\$ 6$ billion, making a total of $\$ 30$ billion, from December 1 , 1963, through June 29, 1964 (act of November 26, 1963)); \$39 billion from June 29, 1964 through June 30, 1965 (act of June 29, 1964); and $\$ 43$ billion from July 1, 1965 through June 30, 1966 (act of June 24, 1965).

Note: In these tables sales of Series $A-F$ and $J$ bonds are included at issue price, and redemptions and amounts outstanding at current redemption value. Series G, H, and $K$ are included at face value throughout. Matured bands which have been redeemed are included in redemptions. Maturad $J$ and $K$ bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, and are then transferred to matured debt on which interest has ceased.

1) Salas and redemption figures include exchanges of minor amounts of (1) matured Saries E bonds for Series G and K bonds from May 1951 through April 1957 and (2) Serias $F$ and $J$ bonds for Series $H$ bonds beginning January 1960; however, they exclude exchanges of Series $E$ bonds for Series $H$ bonds, which are reported in Table 3.
2) Details by series on a cumalative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the Treasury Bulletin.
3/ Because there is a normal lag in classifying redemptions, the distribution of redemptions between sales price and sccrued discount has been estimated. Beginning with the Treasury Bulletin of March 1961 the
method of distributing redemptions between sales price and accrued discount has been changed to reflect the distribution shown in final reports of classified redemptions. All pariods shown have been revised on this besis.
4/ Series F and G sales were discontinued April 30, 1952, and Series J and K sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent adjustments.
5/ Includes exchanges of Series 1941 F and G savings bonds for $3-1 / 4 \%$ marketable bends of 1978-83.
6/ Includes exchanges of Series 1948 F and $G$ binds for $4-3 / 4 \%$ marketable notes of 1964.
7/ Includes exchanges of Series 1949 F and G bonds for $4 \%$ marketable bonds of 1969.
8/ Includes exchanges of Series 1950 F and $G$ bonds for 3-7/8\% marketable bonds of 1968.
9/ Includes exchanges of Series 1951 and 1952 F and G bonds for 3-7/8\% marketable bonds of 1971 and $4 \%$ marketable bonds of 1980.
10/ Represents changes in the amnunts of redemptions not yet classified between matured and unmatured issues.

The monthly Treasury Survey of Ownership covers securities issued by the United States Government and by Federal agencies. The banks and insurance companies included in the Survey currently account for about 90 percent of all such securities held by these institutions. The similar proportion for corporations and for savings and loan associations is 50 percent, and for State and local governments, 70 percent. Data were first published for banks and insurance companies in the May 1941 Treasury Bulletin, for
corporations and savings and loan associations in the September 1960 Bulletin, and for State and local governments in the February 1962 Bulletin.

Holdings by commercial banks distributed according to Federal Reserve member bank classes and nonmember banks are published for June 30 and December 31. Holdings by corporate pension trust funds are published quarterly, first appearing in the March 1954 Bulletin.

1) Beginning April 1953, prices are closing bid quotations in the over-the-counter market. Prices for prior dates are the mean of closing bid and ask quotations. When issued" prices are included in the history beginning October 1941. Dates of highs and lows in case of recurrence are the latest dates.
2) On callable issues market convention treats the yield to earliest call date as more significant when an issue is selling above par, and to maturity when it is selling at par or below.
3/ Included in the average yield of long-term taxable Treasury bonds as shown under "Average Yields of Long-Term Bonds."
YIELDS OF TREASURY SECURITIES, DEC.31, 1965

Table 1.- Average Yields of Treasury and Corporate Bonds by Periods
(Percent per annum)

Source: Beginning April 1953, Treasury bond yields are reported to the
Treasury by the Federal Reserve Bank of New York, based on closing bid quotations in the over-the-counter market. Yields for prior periods were computed on the basis of mean of closing bid and ask quotations. Moody's Investor Service is the source for the average of Aas corporate bonds.
1 Series includes bonds on which the interest income is subject to normal tax and surtax and which are neither due nor callable before a
given number of years as follows: April 1953 to date, 10 years;
April 1952 - March 1953, 12 years; October 1941 - March 1952, 15 years
For bonds currently in the series, see Table 3 under "Market Quota-
tions on Treasury Securities" in this issue of the Bulletin.
2) One or more new long-term bonds added to the average (see footnote 1).
$3 /$ An existing bond dropped from the average (see foonote 1).
4) Market closed.

Revised.

## Background

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Information on the principal types of data and the principal countries is published monthly in the "Treasury Bulletin." Reports by banks, bankers, securities brokers and dealers, and nonbanking business concerns in the United States are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury. These statistics are consolidated by the Treasury and published as promptly as possible.

The reporting forms and instructions used in the collection of the statistics have been revised a number of times. The most recent revision became effective with reports covering data as of May 31, 1963.1/ A detailed description of the content of the statistics, including the changes instituted, appeared in the July 1963 issue of the "Treasury Bulletin," pages 79-81. As a result of changes in presentation introduced in that issue, not all breakdowns previously published will be exactly comparable to those now presented. Basic definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including United States citizens domiciled abroad and the foreign subsidiaries and offices of United States banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled. Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the classification "Internationa1," "European regional," or "Latin American regional," as appropriate, except for the Bank for International Settlements and the European Fund, which are included in the classification "Other Western Europe."
"Short-term" refers to obligations payable on demand or having an original maturity of one year or less, without
deduction of any offsets. "Long-term" refers to obligations having an original maturity of more than one year, and includes securities having no contractual maturity.

## Exclusions

The data published herein do not cover all types of capital movements between the United States and foreign countries. The data reported to and published by the Treasury Department exclude entirely the intercompany capital transactions of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies; such transactions are reported by business firms to the Department of Commerce. Data on the capital transactions of the United States Government and on shipments and receipts of United States currency are also excluded from the Treasury reports. Certain capital transactions not effected through reporting institutions, such as securities transactions carried out entirely abroad, are not recorded in the Treasury reports. Consolidated data on all types of capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

The liabilities data exclude nonnegotiable, noninterestbearing special notes of the United States held by the InterAmerican Development Bank and the International Development Association.

The data on securities transactions and on foreign holdings of U.S. Goverment bonds and notes exclude nonmarketable U.S. Treasury notes, foreign series, and nonmarketable U.S. Treasury bonds, foreign currency series (see "International Financial Statistics" section, Table 2).

## Presentation of statistics

Data collected monthly on the Treasury Foreign Exchange Forms are published in three sections. Section I provides a summary of the principal data by period; Section II presents data by country and by period; and Section III shows detailed breakdowns of the latest available preliminary data.

Section IV presents supplementary data which are reported less frequently than monthly but which are published monthly. Beginning with the November 1965 issue, data on "Long-Term Liabilities to Foreigners Reported by Nonbanking Concerns" and "Long-Term Claims on Foreigners Reported by Nonbanking Concerns" are presented as Tables 4 and 5 of this Section.

1) For an explanation of statistical presentation and exclusions, see headnote on page 84.
2) Through 1949, transactions in U.S. Government bonds and notes include transactions in domestic corporate bonds.
3 Data below the line include changes in liabilities and claims reported by a number of banks included in the series beginning December 31, 1961.
3) Change includes claims previously held but first reported as of May 31, 1963; as of that date such claims amounted to $\$ 85.6$ million. Also includes claims reported by banks for the first time as of December 31, 1963; as of that date such claims amounted to $\$ 193.2$ million, repre-
senting in part claims previously held by banks but not reported.
5/ Change in short-term liabilities includes a net increase of \$20.1 million as of Deceaber 31, 1964, arising from changes in reporting coverage.
4) Data below the line on changes in claims reflect the exclusion from the series beginning December 31, 1964 of short-term U.S. Government claims previously included; and the addition to the series of claims arising from the inclusion of claims previously held but first reported as of December 31, 1964, and from revisions of preliminary figures.

2/ Included with "Other foreigners.
3 Included with "Other claims."
4 Beginning in August 1956 and also in April 1957, certain accounts previously classified as "Foreign banks" are included with "Official institutions."
5/ Differs from 1961 end-year data on the preceding line by inclusion of liabilities and claims reported by a number of banks included in the series beginning December 31, 1961.
6/ Includes reported liabilities to foreign official institutions beginning October 1961. Figures for selected dates are as follows: end 1961, \$46.3 million; end 1962, \$47.9 million; end 1963, \$30.1 million.
7 Includes claims previously held but firat reported as of May 31, 1963; as of that date such claims amounted to $\$ 85.6$ million. Also includes
claims amounting to $\$ 193.2$ million reported by banks for the first time as of December 31, 1963, representing in part claims previously held by banks but not reported.
8) Short-term liabilities include a net increase of 20.1 million arising from changes in reporting coverage, distributed as follows: "Foreign banks" $+\$ 25.6$ million, "Other foreigners" $+\$ 22.5$ million, and "Payable in foreign currencies" -\$27.9 million.
9) See footnote 10.
10. Data on claims helow the line differ from claims above the line because of the exclusion as of December 31,1964 of $\$ 58.1$ million of short-term U. S. Government claims previously included; and because of the addition of $\$ 538.3$ million of short-term claims and $\$ 313.3$ million of long-term claims arising from the inclusion of claims previously held but first reported as of December 31, 1964, and from revisions of preliminary figures. p Preliminary.

1) Excludes convertible foreign currencies held by U. S. monetary authorities.
2/ See footnote 3.
Differs from 1964 data in preceding column because of the exclusion as of December 31, 1964 of $\$ 58.1$ million of short-term U. S. Government claims previously included; and because of the addition of $\$ 538.3$ million of short-term claims arising from the inclusion of claims previously held but first reported as of December 31, 1964, and from revisions of preliminary figures.
2) "Other Eastern Europe" includes Czechoslovakia, Poland and Rumania only. "Other Western Europe" may include claims on some Eastern

European countries.
5) "Other Latin American Republics" include only Bolivia, Dominican Republic, Guatemala and El Salvador; other Latin American republics included with "Other Latin America." Bahamas and Bermuda included with "Other Lat1n America."
6/ "All other" countries include Morocco and "Other Africa." "Total other countries" include "Total Africa."
Less than $\$ 50,000$.

Table 9. - Estimated Holdings of $U_{*}$ S. Government Bonds and Notes
(Position at end of period in millions of dollars)

Note: Data represent estimated official and private holdings of U. S. Government securities with an original maturity of more than one year. (For exclusions see headnote on page 84.) Annual and monthly data are shown in this section beginning February 1964. For quarterly data see Section IV, Table 2, through June 1964; and "International Financial Statistics, Table 4, beginning September 1964. Data as of December 31, 1962-63 are on the basia of a November 30, 1960 survey and regular monthly reports of securities transactions (see Table 4). Data for December 31, 1963, also are shown on the basis of a July 31, 1963, survey and the montbly
transactions reports. For statistical convenience, the new aerlea is introduced as of December 31, 1963, rather than as of the survey date. The variations between the two series are believed to result from missions from, or errors in reporting, shifts in ownership not involving purchases or sales through U.S. banks or brokers, and physical transfers of securities to and from abroad. It is not possible to reconcile the two series or to revise figures for earlier dates. Less than $\$ 500,000$. p Preliminary.
