## Reporting Bases

Data on receipts, expenditures, and debt which appear In the "Treasiary Bulletin" are based largely on two Treasury financial reports, the "Daily Statement of the United States Treasury" and the "Monthly Statement of Recelpts and Expenditures of the United States Government." Where tinpse statements are given as sources for individual tables, they are cited by name only. Their respective reporting bases are described below. For other data in the Bulletin, information on sources or reporting bases is given in connection with the tables themselves.

The monthly statement of recelpts and expenditures was first publisheo for February 1954 , and replaced the dally statement as the primary source of information on budget results and other receipt and expenditure data classifled by type of account. At the same time, the dally statement was changed to a statement of cash deposits and withdrawals affecting the account of the Treasurer of the United States. Both publications have provided comparative figures on their respective bases fron the beginning of the fiscal year 1953. The announcement of February 17 , 1954, with respect to these reporting chenges may be found in the April 1954 1ssue of the Bulletin.

The monthly statement shows all recelpts and expenditures of the Government, Including those made from cash accounts held outside the United states Treasury. The information is compiled from reports by the Treasurer of the United states and by all other collectin bursing agencies, including those agencies which maintain checking accounts in commercial banks. These reports cover transactions recorded in the accounts of the agencies during the reporting period. The net of the transactions as complled from these reports is reconciled in the monthly statement to changes in the balance in the Treasurer's account and in cash held outside the Treasurer's account anc changes in the public debt outstanding.

Recelpts of taxes and customs duties are reported on a collections basis. Other receipts are reported partially on a collections basis and partially on a deposits basis. Expenditures, except interest on the public debt, are reported on the basis of checks lssuec or cash payments made by disbursing officers. Transactions of an interfund or intragovernmental nature are included on the same basis even though the actual issuance of checks may not be involved. Interest on the public debt is included on an accrual basis beginning with figures for June 1955 and the fiscal year 1955. Frior to that, it was included on a due and payable basis. The sane reportine basis as that In the monthly statement provides the flscal year figures for the Treasury's "Comoined Statement of Receipts, ExpendItures and Ealances of the United States Government" and
for actual receipts and expenditures in the "Budget of the United States Government."

Beginaing kith the inal statement for the fiscal year 1960, the monthly statement reports totals for net budget receipts and budget expenditures after deduction of certain interfund transactions which are inclucied in the detail of both buoget recelpts and budget expenditures. The transactions deducted consist of interest payments and minor amounts of certain other payments made by Government agencies to the Treasury. This reporting change was made in accordance with the plan stated in the President's Budget Kessage of January 18,1960 . It does not affect the surplus or deficit. Figures for earlier periods shown in the Treasury Bulletin were revised to the new reportins basis in the September 1960 issue. The interfund transactions deducted under this procedure do not include payments to the Treasury by wholly owned Government corporations for retirement of their capital stock and for disposition of earninge. These capital transfers have been excluded currently from budget receipts and budget expenditures beginning july 1 , 1948, anả figures for prior fiscal years back throuefh 1932 were revised accordinely at that time.

The dally statement on the new basis was first issued for February 17, 1954. In the deposits anत withdrawals as shown, no distinction is made as to the type of accounts (budget, trust, etc.). The deposits are on the basis of certificates of deposit cleared through the account of the Treasurer of the United States. Total withdrawals are on the basis of checks pali or cash disbursements made out of the Treasurer's account. Some of the withdrawal classifications shown are reported on the basis of malled reports of checks issued and are adjusted by means of clearing accounts to the total of checks paid. Except for relatively minor amounts, noncash interfund and other intragovernmental transactions are excluded. The public debt figures in the daily statement also are on a "clearance" basis, with the exception of those issuance and retirement transactions reported on the basis of telegrams from Federal Reserve Banks. Noncash debt transactions are included, however.

The dally statement before February 17, 195't, covered not only transactions cleared through the Treasurer's account but also certain Government agency transactions which were handled throueh commercial banix accounts, and included noncash interfund and other intrasovernmental transactions. It provided information similar to that in the present dally statement with respect to the status of the Treasurer's account, and similar to that in the oresent end-of-month daily statement with respect to debt issuance, retirement, and amount outstanding. Receipts and expenditures, however, were. classified by type of account, and the budget results shown

## Reporting Bases - (Continued)

In the daily statement were used as the basis for reflecting the results under the President's budget program as enacted by the Congress.

Reoelpts were on the basis of deposits as they cleared the Treasurer's account. Expenditures cleared through the Treasurer's account were reported on two successive bases. Through 1946 they were on the basis of checks paid by the Treasurer of the United States. Beginning with 1947, expenditures made through the pacilities of the Treasury

Department's Division of Disbursement were on the basis of cheoks issued, while certain others, principally those of the Department of Defense and its predecessor organizations, ware on the basis of checks paid. Transactions handied through commercial bank accounts, consisting of market transactions in public debt and guaranteed securities, were as reported by the agencies. Interest on the public debt was included on a due and payable basis beginning with November 1949 and on a checks-paid basis prior to that time.

## Treasury Financing Operations

## One-year Bills

On May 18 tenders were invited for \$1 billion, or thereabouts, of 365-day Treasury bills, to be dated May 31, 1966, to refund an equal amount of one-year bills maturing on that date.

Tenders were opened on May 25 and totaled $\$ 2,013$ million, of which $\$ 1,001$ million (including $\$ 38$ million of noncompetitive tenders) were accepted at the average discount rate of 4.966 percent.

## 13-Week and 26-Week Bills

Issues of regular weekly Treasury bills in May totaled \$9.2 billion, replacing an equal amount of maturing bills. There were four 91-day issues of $\$ 1.3$ billion each and three 182-day and one 183-day issues of $\$ 1.0$ billion each. Average rates for the new issues are shown in the following table.

## Treasury Bills - General

Treasury bills are sold on a bid basis. The face amount is payable without interest at maturity. They are issued in bearer form only, and in denominations of $\$ 1,000, \$ 5,000$, $\$ 10,000, \$ 50,000, \$ 100,000, \$ 500,000$, and $\$ 1,000,000$ (maturity value). Tenders are received at Federal Reserve banks and branches.

Banking institutions generally may submit tenders for account of customers. Tenders may be made without deposit by incorporated banks and trust companies and by responsible and recognized dealers in investment securities. Tenders from others must be accompanied by payment of 2 percent of the face amount of bills applied for, unless the tenders are accompanied by an express guaranty of payment by an incorporated bank or trust company.

Noncompetitive tenders (without stated price), usually for $\$ 200,000$ or less from any one bidder, are accepted in full at the average price of accepted competitive bids for an issue,

Payment for accepted tenders must be made or completed on the date of issue, in cash or other immediately available funds or in a like face amount of Treasury bills maturing on that date. Payment for 13 -week, 26-week and one-year bills may not be made by credit in Treasury tax and loan accounts.

## Foreign Series and Foreign Currency Series

In May the Treasury issued one certificate of indebtedness of the foreign series in the amount of $\$ 50$ million. The certificate bears interest at the rate of 4.65 percent, is dated May 31 and matures August 31, 1966. Redemptions of notes of the foreign series during the month totaled $\$ 6.4$ million. As of May 31, the outstanding foreign series securities totaled $\$ 992$ million.

One foreign currency series certificate of indebtedness denominated in German marks equivalent to $\$ 50$ million was issued in May. The new certificate is dated May 2, 1966, matures May 2, 1967, and carries interest at 4.87 percent per annum. One bond denominated in German marks equivalent to $\$ 50$ million matured on May 2, and a bond denominated in Swiss francs equivalent to $\$ 23$ million matured on May 16 . Foreign currency series securities outstanding at the end of May totaled \$l,007 million, and were denominated in Austrian schillings, Belgian francs, German marks, Italian lire and Swiss francs.

Source: Actual figures are from the monthly statement of receipts and expenditures of the Government (for explanation of reporting bases, see page II); estimates, including effect of proposed legislation, ara from the 1967 Budget document released January 24, 1966.

1) Certain interfund transactions are excluded from both receipts and
expenditures beginning with the July 1957 issue of the Bulletin.
For details see Table 6.
2/ Includes guaranteed securities (see Table 4).

Note: Figures in this table differ from those published prior to August 1963 for shifts in classification including security transactions of Government-sponsored enterprises from deposit fund account expenditures to net investment by Government agencies in public debt securities, and net redemption of agency securities in the market; and certain deposit fund account receipts from net receipts to net expenditures.

Table 6. - Interfund Transactions Excluded from Both Net Trust Account Receipts and Net Trust Account Expenditures

Consolidated cash transactions reported in the Treasury Bulletin are on a basis consistent with Federal receipts from and payments to the public as derived in the Budget of the United States (in the Budget for 1967 in Special Analysis A). Shown also is the amount of net cash borrowing from, or repayment of borrowing to, the public. Revisions of the figures for earlier years have been made where necessary to make them as nearly comparable with current Budget classifications as available data will permit. For this reason certain of the figures differ somewhat from those published in previous Budget doccuments as well as in the Bulletin.

This series of cash transactions is designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the account of the Treasurer of the United States. Receipts and payments include transactions both in administrative budget accounts and in trust and deposit fund accounts. Major intragovernmental transactions which are reported as both expenditures and receipts are excluded from
both. Noncash items representing the obligations of the Government to make payments in the future also are eliminated from expenditures currently, but are added later when actual payments are made. These items consist of certain interest accrued on the public debt and expenditures involving the issuance of a few special public debt securities. Checks outstanding, deposits in transit, and other clearing accounts are excluded from payments. Receipts from the exercise of monetary authority are excluded as not representing cash received from the public. Feder al cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencies and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direct cash borrowing from the public. The net effect of all these transactions with the public is reflected in changes in the balance in the Treasurer's account and in cash held outside the Treasury.

## Source and Availability of the Balance in the Treasurer's Account

The account of the Treasurer of the United States reflects not only budget receipts and expenditurse but also trust, deposit fund, and public debt transactions.

The working oash of the Treasury io held mainly in Treasurer'a accounts with Federal Reserve Banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banke throughout the country.

Depoeits to tax and loan accounts accur in the normal course of business under a uniform procedure applicable to all banke whereby cuetomers of banks deposit with tham tax payments and funds for the purchase of Government eecurities. In most cases the transaction involvas merely the transfer of money from a customer'g account to the tax and loan account in
the same bank. On occasions, to the extent authorized by the Treasury, banks are permitted to deposit in these accounts proceeds from subecriptions to public debt securities entered for their ovn account as well as for the account of their customers.

The tax and loan account system permite the Treasury to leave funds in banks and in the communities in which they arise until such time as the Treasury neede the funds for its operationg. In this way the Treasury is able to neutralize the effect of $1 t \mathrm{f}$ fluctuating operations on bank reserves and the economy.

A dstalled description of the Treasury's depositary system may be found in the Annual Report of the Seoretary of the Treasury for 1955, pages 275-284.

(In millions of dollars)

[^2]through June 1958, after which they are included in the bslance in the Treasurer's account. (See footnote 2).
2/ Through June 1958, the balance of the Treasurer was reduced when Treasurer's checks were issued and the amount of the checks was carried as a liability until paid. Effective July 1958, the balance is not reduced until the checks are paid, a procedure also applying to checks drawn on the Treasurer by Governmant disbursing officers and agencies.
3/ Amounts shown, baginning January 1963, are net of uncollected itams, exchanges, etc. Previously these items were included under liabilities

1) Special depositaries are permitted to make payment in the form of a deposit credit for the purchase price of U.S. Government securities purchased by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues.
2/ Retirement plan bonds first offered for sale as of January 1, 1963.
3/ Taxes eligible for credit consist of those deposited by taxpayers in the depositary banks, as follows: Withheld income tax beginning

March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning Jamuary 1950, and under the Railroad Retirement Tax Act beginning July 1951; and a number of excise taxes beginning July 1953.
4 Under a special procedure begun in March 1951, authorization may be given for income tax payments, or a portion of them, made by checks of $\$ 10,000$ or more drawn on a special depositary bank, to be credited to the tax and loan account in that bank. This procedure is followed during some of the periods of heavy tax payments.

Note: The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of each wonth or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outstanding on that date (the amount actually borrowed in the case of securities sold. at a premium or discount, beginning with May 1960). The aggregate charge for all intereat-bearing issues constitutes the total computed annual interest charge. The average annual interest rate is computed by dividing the computed annual interest charge for
the total, or for any group of issues, by the corresponding principal based on the rate of effective yield for issues sold at premium or discount. Prior to that date it was based on the coupon rate for all issues

1) Guaranteed securities included are those held outside the Treasury.
2. Total includes "Other bonds" through 1960; see Table 3.

3 Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate.
4 On United States savings bonds the rate to maturity is applied against the amount outstanding.

1/ Does not include payments for accrued interest.
2/ The effective rate of interest on the new issue is the coupon rate adjusted for the amount paid by or to the Treasury as premiun or discount on the new security exchanged for eligible securities originally issued at par. For eligible securities originally issued at prices other than par, the payment by or to the Treasury is applied to the price adjusted for the pro rata amortization of the original premium or discount to the date of the advance funding.

3/ Based on the mean of bid and asked prices of securites eligible for exchange (adjusted for payments on account of purchase price of securities issued) at noon on the day before announcement by the securities

Scurce: Daily Treasury statement; Office of Debt Analysis in the Office of the Secretary.
Note: In these tables sales of Series $A-F$ and $J$ bonds are included at issue price, and redemptions and amounts nutstanding at current redemption value. Series $G, H$, and $K$ are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured $J$ and $K$ bonds outstanding sre included in the interest-bearing debt until all bonds of the annual series have matured, and are then transferred to matured debt on which interest has ceased.

1) Sales and redemption figures include exchanges of minor amounts of (1) matured Series E Londs for Series $G$ and $K$ bonds from May 1951 through April 1957 and (2) Series $F$ and $J$ bonds for Series $H$ bonds beginning January 1950; however, they exclude exchanges of Series $E$ bonds for Series H bonds, which are reported in Table 3 .
2) Details by series $n$ a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the Treasury Bulletin.
3/ Because there is a normal lag in classifying redemptions, the distribution of redemptions between sales price and accrued discount has been estimated. Eeginning with the Treasury Bulletin of March 1961 the
method of distributing redemptions between sales price and accrued discount has been changed to reflect the distribution shown in final reports of classified redemptions. All periods shown have been revised on this basis.
4' Series F and G sales were discontinued April 30, 1952, and Series J and K sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent adjustments.
5/ Includes exchanges of Series 1942 F and G savings bonds for 3-1/4\% marketable bonds of 1978-83.
6/ Includes exchanges of Series 1948 F and $G$ bonds for $4-3 / 4 \%$ marketable notes of 1964.
3) Includes exchanges of Series 1949 F and $G$ bonds for $4 \%$ marketable bonds กf 1969.
8/ Includes exchanges of Series 1950 F and G bonds for $3-7 / 8 \%$ marketable bonds of 1968 .
4) Includes exchanges of Series 1951 and 1952 F and $G$ bonds for 3-7/8\% marketable bonds of 1971 and $4 \%$ marketable bonds of 1980.
5) Represents changes in the amounts of redemptions not yet classified
between matured and unmatured issues.

Source: Daily Treasury statement for total amounts outstanding; reports
from agencies and trust funds for securities held by U.S. Government
investment accounts; and reports from Federal Reserve System for
securities held by Federal Reserve banks.
1 Includes certain debt not subject to statutory limitation. For amount
2/ Includes accounts under the control of certain U.S. Government agencies
whose investments are handled outside the Treasury
3 The total amount of interest-bearing securities held by private investors is calculated by deducting from the total amount outstanding the amount held by U.S. Government investment accounts and Federal Reserve banks.
4 Consists of guaranteed securities held outside the Treasury. All are public marketable issues.

[^8]Table 4.- Treasury Bonds
(Price decimals are 32 nds)

1/ Beginning April 1953, prices are closing bid quotations in the over-the-counter market. Prices for prinr dates are the mean of closing bid and ask quotations. "When issued" prices are included in the history beginning October 1941. Dates of highs and lows in case of recurrence are the latest dates.

2/ On callable issues market convention treats the yield to earliest call date as more significant when an issue is selling above par, and to maturity when it is selling at par or below.
3 Included in the average yield of long-term taxable Treasury bonds as shown under "Average Yields of Long-Term Bonds.

## Background

Deta relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promalgated thereunder. Information on the principal types of data and the principal countries is published monthly in the "Treasury Bulletin." Reports by banks, bankers, securities brokers and dealers, and nonbanking business concerns in the United States are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury. These statistics are consolidated by the Treasury and published as promptly as possible.

The reporting forms and instructions used in the collection of the statistics have been revised a number of times. The most recent revision became effective with reports covering data as of May 31, 1963.1/ A detailed description of the content of the statistics, including the changes instituted, appeared in the July 1963 issue of the "Treasury Bulletin," pages 79-81. As a result of changes in presentation introduced in that issue, not all breakdowns previously published will be exactly comparable to those now presented.
Basic definitions
The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including United States citizens domiciled abroad and the foreign subsidiaries and offices of United States banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled. Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the classification "International," "European regional," or "Latin American regional," as appropriate, except for the Bank for International Settlements and the European Fund, which are included in the classification "Other Western Europe."
"Short-term" refers to obligations payable on demand or having an original maturity of one year or less, without deduction of any offsets. "Long-term" refers to obligations having an original maturity of more than one year, and $i_{1}-$ cludes securities having no contractual maturity. Exclusions

The data published herein do not cover all types of capital movements between the United States and foreign countries. The data reported to and published by the Treasury Department exclude entirely the intercompany capital transactions of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies; such transactions are reported by business firms to the Department of Commerce. Data on the capital transactions of the United States Government and on shipments and receipts of United States currency are also excluded from the Treasury reports. Certain capital transactions not effected through reporting institutions, such as securities transactions carried out entirely abroad, are not recorded in the Treasury reports. Consolidated data on all types of capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

The liabilities data exclude nonnegotiable, noninterestbearing special notes of the United States held by the InterAmerican Development Bank and the International Development Association.

The data on securities transactions and on foreign holdings of U.S. Gover ment bonds and notes exclude nonmarketable U.S. Treasury notes, foreign series, and nonmarketable U.S. Treasury bonds, foreign currency series (see "International Financial Statistics" section, Table 2).

## Presentation of statistics

Data collected monthly on the Treasury Foreign Exchange Forms are published in three sections. Section I provides a summary of the principal data by period; Section II presents data by country and by period; and Section III shows detailed breakdowns of the latest available preliminary data.

Section IV presents supplementary data which are reported less frequently than monthly but which are published monthly.

1/ For an explanation of statistical presenation and exclusions, see headnote on page 86.
2/ Through 1949, transactions in U. S. Covernment bonds and notes include transactions in domestic corporate bonds.
3) Data below the line include changes in liabilities and claims reported by a number of banks included in the series beginning December 31, 1961
4) Change includes claims previously held but first reported as of May 31, 1963; as of that date such claims amounted to $\$ 85.6$ million. Also includes claims reported by banks for the first time as of December 31, 1963; as of that date such claims amounted to $\$ 193.2$ million, representing in part claims previously held by banks but not reported.
5/ Change in short-term liabilities includes a net increase of $\$ 50.8$ million as of December 31, 1964, arising from changes in reporting coverage.
6/ Data below the line on changes in claims reflect the exclusion from the series beginning December 31, 1964 of short-term U. S. Government
claims previously included; and the addition to the series of claims arising from the inclusion of claims previously held but first reported as of December 31, 1964, and from revisions of preliminary figures.
7) Change in short-term liabilities excludes $\$ 776.3$ million representing letter of credit issued by the U. S.Treasury Department to the International Monetary Fund in payment of the dollar portion of the U. S. quota increase which became effective on February 23, 1966.
8 Data below the line on changes in short-term claims reflect the addition to the series of short-term claims held in custody for domestic customers but reported by banks for the first time beginning December 31, 1965, and short-time claims reported by banks reporting for the first time.

1/ Excludes convertible foreign currencies held by U.S. monetary authorities.
2) The second column for 1964 differs from data in preceding column because of the exclusion as of December 31, 1964 of $\$ 58.1$ million of short-term U.S. Government claims previously included; and because of the addition of $\$ 545.9$ million of short-term claims arising from the inclusion of claims previously held but first reported as of December 31, 1964, and from revisions of preliminary figures.
3. See footnote column for December 1965 differs from data in preceding column because of the addition of short-term claims held in custody colum domestic customers but reported by banks for the first time beginning December 31, 1965, and short-tera claims reported by banks reporting for the first time.
Less than $\$ 50,000$.

1) Includes claims previously held but first reported as of May 31,

1963; as of that date such claims amounted to $\$ 85.6$ million.
2) Grand total includes claims amounting to $\$ 193.2$ million, reported by banks for the first time as of December 31, 1963, representing in part claims previously held by banks but not reported. Included in this amount are claims on: Europe $\$ 4.6$ million, Latin America $\$ 133.8$ million, and Asia $\$ 53.7$ million.

3/ The second column for 1964 differs from data in preceding column because of the addition of $\$ 313.3$ million of long-term claims arising from the inclusion of claims previously held but first reported as of December 31, 1964, and from revisions of preliminary figures. Less than $\$ 50,004$.

For quarterly data see Section IV, Tabie through the June 1964 issue; and "Internatiaral Financtal Statistics," Table 4, beginning with the September 1904 iss le. Tata as of necember 31, 1962-63 are on the basis nf a N vember 3., 1909 survey and regular monthly reports of securities transactions (see Table 4). Data for December 31, 1903, alse are shown on the basis Freliminary.
of a faly 37, 17b3, survey and the monthly transactions repcrts. For statistical invenience, the new series is introdiced as of $I=c e m b e r$ 31, 1903, rather than as of the surrey date. the variations between the two series are believed to resit from omissions from, or errors in reptrting, shifts in ownerchip not involv ing farchases or sales through U.S. banks or brokers, anid physical tranefurs of securities to and from abroad. It is not possible to reancile the two series or t. revies figures for earlier dates.

Revised.

The financial statements of corporations and other busi-ness-type activities of the United States Govermment, which have appeared in the "Treasury Bulletin" since the August 1956 issue, are compiled from reports submitted to the measury under Department Circular No. 966, issued January 30, 1956, and Supplement No. 1, Revised, issued June 16, 1965. These regulations were issued pursuant to the Budget and Accounting Procedures Act of 1950. They superseded Budget-Treasury Regulation No. 3, issued under Executive Order No. 8512 of August 13, 1940, as amended by Executive Order No. 9084 of March 3, 1942, under which financial statements previously published in the Bulletin were submitted.

Department Circular No. 966 requires submission of financial statements by all wholly owned and mixed-ownership Government corporations specifically included in the Government Corporation Control Act, as amended (31 U.S.C. 846, 856); and all other activities of the Government operating as revolving funds. Other activities and agencies whose operations, services, or functions are largely self-liquidating or primarily of a revenue-producing nature, and activities and agencies whose operations result in the accumulation of substantial inrentories, investments, and other recoverable assets, were irought under the regulations as the agency accounting systems werc developed to where they were capable of furnishing the required financial reports.

Four kinds of financial statements are called for by Department Circular No. 966 . They are statements of financial condition, income and expense, source and application of funds, and certain financial contingencies. The statements of financial condition are published quarterly and appear as Section I in the series of tables. The first statements of financial condition published under Circular 966 were as of March 31, 1956, and were presented in the August 1956 Bulletin. Statements of income and expense and source and application of funds
are published semiannually, for June 30 and December 31 reporting dates, and appear as Section II and III. The first of these statements under Circular 966 covered the fiscal year 1956, and were published in the January 1957 Bulletin. Within the sections, the agencies are grouped in separate tables by type, as follows: public enterprise revolving funds, intragovernmental revolving funds, certain other activities, deposit funds, and trust revolving funds.

Supplement No. 1, when originally issued in 1956, extended the coverage tc include all executive agencies and activities not previously reporting under Circular 966, but required only a statement of financial condition annually as of June 30. These were activities which were not principally of a businesstype nature. Those which had not yet developed formal accounting procedures to provide complete balance-sheet type statements were temporarily authorized to report only assets. Thus, the supplement rounded out provisions for information on properties and other assets, as well as liabilities, of the United States Government all of which is needed by Treasury for the compilation of complete Government-wide financial reports. The first comprehensive reporting under the original Supplement No. 1 was for June 30, 1957, and the data were published in the December 1957 Bulletin as Part B of Table 4 in Section I. The revision to Supplement No. 1 in 1965 made no basic change to the overall purpose of the originally issued supplement; it updated and consolidated all amendments to both the regulation and instructions which had been issued after June 30, 1956.

A summary of loans outstanding for a series of dates is included in Section I of the Bulletin presentation beginning with the June 2958 issue. Two classifications of the loans are show, one by type and one by agency. Data prior to 1956 are based on the earlier reporting requirements, which provided for complete coverage of Government lending agencies.
