## Reporting Bases

Data on receipts, expenditures, and debt which appear in the "Treasury Bulletin" are based largely on two Treasury finencial reports, the "Daily Statement of the United States Treasury" and the "Monthiy Statement of Iecelpta and Expenditures of the United States Government. Where these statements are given as sources for individual tables, they are cited by name only. Their respective reporting bases are deecribed below. For other data in the Bulletin, information on sources or reportins beses is given in connection with the tables themselvea.

The monthly statenent of recelpts and expenditures was firat published for February 1954, and replaced the daily statement as the primary source of information on budget results and other receipt and expenditure data classified by type of account. At the same time, the daily otatement was changed to a statement of cash deposita and withdrawala affecting the account of the Treasurer of the United Statea. Both publications have provijed compariative figures on their respective bases from the beginning of the fiscal year 1953. The announcewent of February 17 , 1954, with respect to these reporting changes may be found in the April 1954 issue of the Bulletin.

The monthly statement shows all receipts and oxpenditures of the Government, including those made from cash accounts held outside the United States Treasury. The information is compiled from reporta by the Treasurer of the United States and by all other collecting and disbursing agencies, including those agencies which maintain checkinj accounts in commercial banks. These reports cover transactions recorded in the accounts of the agencies during the reporting period. The net of the transactiona as compiled from these reporta is reconciled in the monthly statement to changes in the balance in the Treasurer's account and in cash held outside the Treasurer's account and changes in the public debt outstancing.

Recelpts of taxes and customs duties are reported on a collection basis. Other receipts are reported partially on a collections basis and partially on a deposits basis. Expenditures, except interest on the public debt, are reported on the basis of checks $18 s u e \dot{G}$ or cash payments made by disbursing officers. Transactions of an interfund or intragovernmental nature are included on the same basis even though the actual issuance of checks may not be involved. Interest on the public debt is included on an accrual basis beginning with figures for June 1955 and the I1scal year 1955. Prior to that, it was included on a due and payable basis. The same reportins basis as that in the monthly statement provides the fiscal year figures for the Treasury's "Comoined Statement of Receipts, Expenditures and Dalances of the United States Government" and
for actual receipts and expenditures in the "Budget of the United States Government."

Beginning with the final statement for the fiscal year 1960 , the monthly statement reporta totals for net budget receipts and budget expenditures after deduction of certain interfund transactions which are incluced in the detail of both buaget receipts and budget expenditurea. The transactions deducted consist of interest payments and minor amounts of certain other payments made by Government agenciea to the Treasury. This reporting change was made in accordance with the plan stated in the President's Budget Message of January 28 , 1960. It does not affeot the surplus or deficit. Figures for aarlier periods ahown in the Treaaury Bulletin were revised to the new reporting basis in the September 1960 issue. The interfund tranaactions deducted under this procedure do not include payments to the Treasury by wholly owned Government corporationa for retirement of their capital stock and for diaposition of earnings. These capital transfers have been excluded currently from budget receipts and budget expenditures beginning July 1 , 1948, and flgures for prior fiscal years back through 1932 were revised accordinfly at that time.

The dally statement on the new basis was first lasued for February 17, 1954. In the deposita and withdrawals as shown, no distinction is made as to the type of accounts (budget, trust, etc.). The deposits are on the basia of certificatea of deposit cleared through the account of the Treasurer of the United Statea. Total witharawals are on the basis of checks paid or cash disbursements made out of the Treasurer's account. Some of the witbdrawal clase1flcations shown are reported on the basia of malled reports of checks issued and are sdjusted by means of clearing accounts to the total of checks paid. Except for relatively minor amounta, noncash interfund and other intragovernmental transactions are excluded. The public debt figures in the daily statement also are on "clearance" basis, with the exception of those issuance and retirement tranasctiona reported on the basis of telegrams from Federal Reserve Banks. Noncash debt transactions are included, howevar.

The dally statement before February 17, 1954, covered not only transactions cleared through the Treasurer's account but also certain Government agency transactions which were handled through commercial bank accounts, and included noncash interfund and other intragovernmental transactions. It provided information similar to that in the present daily statement with reapect to the atatus of the Treasurer's account, and similar to that in the present end-of-month daily statement with respect to debt issuance, retirement, and amount outstanding. Recelpta and expenditurea, however., were classified by type of account, and the buaget results shown

in the dally atatement were used aa the basis for replecting the results under the Preaident's budget program as enacted by the Congress.

Receipts were on the basis of deposits as they cleared the Treasurer's account. Expenditures cleared through the Treasurer's account were reported on two succesaive bases. Through 1946 they were on the basis of checks paid by the Treasurer of the United Statea. Beginning with 1947, axpenditures made through the facilities of the Treastury

Department's Division of Disbursement were on the basis of checks issued, while certain others, principally those of the Department of Defense and its predecessor organizations, were on the basis of checks paid. Transactions han. dled through commercial bank accounts, consistins of market transactions in public debt and guaranteed securities, were as reported by the agencies. Interest on the public debt was included on $a$ due and payable basis beginning with November 1949 and on a checks-paid basis prior to that time.

## Tax Anticipation Bills

On August 11 tenders were invited for $\$ 2.0$ billion, or thereabouts, of 208-day tax anticipation bills and for \$1.0 billion, or thereabouts, of 238-day tax anticipation bills, both issues to be dated August 26, 1966. The 208-day bills mature on March 22, 1967, and the 238-day bills mature on April 21, 1967, but they will be acceptable at face value in payment of income taxes due on March 15, 1967, and April 15, 1967, respectively. Tenders were opened on August 18.

Tenders received for the 208-day bills totaled $\$ 2,950$ million, of which $\$ 2,006$ million were accepted at the average bank discount rate of 5.338 percent. The limit for noncompetitive tenders was $\$ 400,000$. These totaled $\$ 307$ million.

Tenders received for the 238 -day bills totaled $\$ 1,490$ million, of which $\$ 1,003$ million were accepted at the average bank discount rate of 5.433 percent. The limit for noncompetitive tenders was $\$ 200,000$. These totaled $\$ 158$ million.

All bidders for either issue were required to agree not to purchase or to sell, or to make any agreements with respect to the purchase or sale or other disposition of any bills of that issue at a specific rate or price, until after one-thirty p.m., Eastern daylight saving time, August 18, 1966.

Any qualified depositary was permitted to make payment by credit in its Treasury tax and loan account for both issues of bills allotted to it for itself and its customers up to any amount for which it was qualified in excess of existing deposits.

## One-Year Bills

On August 18 tenders were invited for $\$ 1$ billion, or thereabouts, of 365-day Treasury bills, to be dated August 31, 1966, to refund an equal amount of one-year bills maturing on that date.

Tenders were opened on August 25 and totaled $\$ 2,237$ million, of which $\$ 1,000$ million (including $\$ 33$ million of noncompetitive tenders) were accepted at the average discount rate of 5.844 percent.

## 13-Week and 26-Week Bills

Issues of regular weekly Treasury bills in August totaled $\$ 9.2$ billion, replacing an equal amount of maturing bills. There were three 91-day issues and one 92-day issue of $\$ 1.3$ billion each and four 182-day issues of $\$ 1.0$ billion each.

Average rates for the new issues are shown in the following table.

## Treasury Bills-General

Treasury bills are sold on a bid basis. The face amount is payable without interest at maturity. They are issued in nearer form only, and in denominations of $\$ 1.000, \$ 5,000$, $\$ 10,000, \$ 50,000, \$ 100,000, \$ 500,000$, and $\$ 1,000,000$ (maturity value). Tenders are received at Federal Reserve banks and branches.

Banking institutions generally may summit tenders for account of customers. Tenders may be made without deposit, by incorporated banks and trust companies and by responsible and recognized dealers in investment securities. Tenders from others must be accompanied by payment of 2 percent of the face amount of bills applied for, unless the tenders are accompanied by an express guaranty of payment by an incorporated bank or trust company.

Noncompetitive tenders (without stated price), usually for $\$ 200,000$ or less from any one bidder, are accepted in full at the average price of accepted competitive bids for an issue.
payment for accepted tenders must be made or completed on the date of issue, in cash or other immediately available funds or in a like face amount of Treasury bills maturing on that date. Payment for 13 -week, 26-week, and one-year bills may not be made by credit in Treasury tax and loan accounts.

Table 6. - Expenditures by Functions - (Continued)
(Fiscal years; in millions of dollars)

Source: Expenditures for 1066 and 10,67 are from reports received from disbursing, collecting, and administrative agencies of the Government, on the monthly statement reporting basis (see page II). They are classified in accordance with classifications used in the 1967 Budget document, Table 19, as nearly as can be done on an individual appropriation and fund item basis. Prior year figures are from the same source but have been adjusted below the appropriation level in some instances by the Bureau of the Budget for use in Table 19. Where current classifications differ on this account, they are footnoted. Revolving fund transactions are included met in the expenditures.
1/ For expenditures by major functions for fiscal 1967 through August 1966, and fiscal 1966 through August 1965, see "Note" below. Details by functions are not available for publication in this issue but will appear in the October 1966 Bulletin.

Consolidated cash transactions reported in the Treasury Bulletin are on a basis consistent with Federal receipts from and payments to the public as derived in the Budget of the United States (in the Budget for 1967 in Special Analysis A). Show also is the amount of net cash borrowing from, or repayment of borrowing to, the public. Revisions of the figures for earlier years have been made where necessary to make them as nearly comparable with current Budget classifications as available data will permit. For this reason certain of the figures differ somewhat from those published in previous Budget documents as well as in the Bulletin.

This series of cash transactions is designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the account of the Treasurer of the United States. Receipts and payments include transactions both in administrative budget accounts and in trust and deposit fund accounts. Major intragovernmental transactions which are reported as both expenditures and receipts are excluded from both. Noncesh items representing the obligations of the Government to make payments in the future also are eliminated
from expenditures currently, but are added later when actual payments are made. These items consist of certain interest accrued on the public debt and expenditures involving the issuance of a few special public debt securities. Checks outstanding, deposits in transit, and other clearing accounts are excluded from payments. Receipts from the exercise of monetary authority are excluded as not representing cash received from the public. Federal cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencies and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direct cash borrowing from the public. The net effect of all these transactions with the public is reflected in changes in the balance in the Treasurer's account and in cash held outside the Treasury.

Seasonally adjusted summary data are shown in table 3. The adjusted data have been derived by applying a seasonal adjustment formula developed by the Bureau of Census, Department of Commerce.

1 Includes accelerated corporate tax payments of about $\$ 300$ million in 1964, 900 million in 1965, and $\$ 2,800$ million in 1966. Also,
the 2nd quarter of 1966 includes about $\$ 300$ million for the
initiation of graduated withholding of personal income taxes and
$\$ 1,400$ million because of a change in the schedule for depositing
withheld and OASI taxes.

## Source and Availability of the Balance in the Treasurer's Account

The account of the Treasurer of the United States reflects not only budget receipts and expenditures but also trust, deposit fund, and public debt transactions.

The working cash of the Treasury is held mainly in Treasurer's accounts with Federal Reserve banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banks throughout the country.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of money from a customer's account to the tax and loan account in
the same bank. On occasions, to the extent authorized by the Treasury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the account of their customers.

The tax and loan account system permits the Treasury to leave funds in banks and in the commanities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on bank reserves and the economy.

A detailed description of the Treasury's depositary system may be found in the Annual Report of the Secretary of the Treasury for 1955, pages 275-284.

## Source: Daily Treasury statement

Includes reserves and other deposits of the Board of Trustees, Postal Savings System, and uncollected items, exchanges, etc., through December 1962. Effective January 1963 balances of the Postal Savings System funds were transferred to deposit fund accounts and became demand obligations of the Treasury. Balances of these funds, therefore, are no longer liabilities within the general account of the Treasurer. Uncollected items, exchanges, etc., also previously shown as liabilities were combined with "Unclassified collections, etc." shown under assats. Treasurer's checks outstanding are included
through June 1958, after which they are included in the balance in the Treasurer's account. (See footnote 2).
2/ Through June 1958, the balance of the Treasurer was reduced when Treasurer's checks wera issued and the amount of the checks was carried as a liability until paid. Effective July 1958, the balance is not reduced until the checks are paid, a procedure also applying to checks drawn on the Treasurer by Government disbursing officers and agencies.
3/ Amounts shown, beginning January 1963, are net of uncollected items, exchanges, etc. Previously these items were included under liabilities.

1/ Special depositaries are permitted to make payment in the form of a deposit credit for the purchase price of U.S. Government securities purchased by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues.
2/ Retirement plan bonds first offered for sale as of January l, 1963.
3 Taxes eligible for credit consist of those deposited by taxpayers in the depositary banks, as follows: Withheld income tax beginning

March 1948; taxes on employers and employees under tha Federal Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; and a number of excise taxes beginning July 1953.
4) Under a special procedure begun in March 1951, authorization may be given for income tax payments, or a portion of them, made by checks of $\$ 10,000$ or more drawn on a special depositary bank, to be credited to the tax and loan account in that bank. This procedure is followad during some of the periods of heavy tax payments.

[^2]interest charge for the total, or for any group of issues, by the
corresponding principal amount. Beginning with data for December 31 , 1958 , the computation is based on the rate of effective yield for issues sold at premium or discount. Prior to that date it was based on the coupon rate for all issueg.

1) Guaranteed securities included are those held outside the Treasury.
2) Total includes "Other bonds" through 1960; see Tabla 3.

3/ Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interast rata.
4 On United Statas savings bonds the rate to maturity is appliad against the amount outstanding.

Note: The securities shown in the table are public offerings.

1) The proprietary interest of the United States in these banks ended in July 1951.

2/ The proprietary interest of the United States in these banks ended in June 1947. Excludes securities which are issued for use as collateral for comercial bank borrowing and not as a part of public offerings. Includes small amounts owned by Federal land banks. I Revised.

The Second Liberty Bond Act (31 U.S.C. 757b), as amended by an act approved June 30, 1959, provides that the face amount of securities issued under authority of that act, and the face amount of securities guaranteed as to principal and interest by the United States (except guaranteed securities held by the Secretary of the Treasury) shall not exceed in the aggregate
\$285 billion outstanding at any one time. A temporary increase to $\$ 330$ billion has been authorized through June 30, 1967 (act of June 24, 1966).

For a legislative history of the public debt limitation, see the Annual Report of the Secretary of the. Treasury.

## PUBLIC DEBT OPERATIONS

## Footnotes to Table 7

Source: Daily Treasury statement: Bureau of the Public Debt.

1. Original call and maturity dates are used.

All by investors other than Federal Reserve Banks.
Rolled over into a one-year bill (see Table 4)
Holders of the maturing certificates were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the $3-1 / 4 \%$ notes offered in the amount of around $\$ 6.9$ billion. For detail of offering, see Table 4.
5/ Excess of maturing 4-7/8\% certificates over allotments of new securities on subscriptions from holders of those certificates (see Table 4, footnotes 6 and 7).
6 Advance refunding offering. Pursuant to the provisions of section 1037 (a) of the Internal Revenue Code of 1954 as added by Public Law 86-346, approved September 22, 1959, the Secretary of the Treasury has declared that no gain or loss shall be recognized for Federal income tax purposes upon the exchange of the eligible outstanding eecurities solely for the new securities. For tax purposes, therefore, the investor will carry the new securities on his books at the same amount as he had been carrying the eligible securities exchanged. Gain or loss, if any, upon the securities surrendered in exchange will be taken into account upon the disposition or redemption of the new securitiae.. See also Table 5
7 From March 20 through March 22, 1961, owners of $2-1 / 4 \%$ bonds of June 15, 1959-62, 2-1/4\% bonds of December 15, 1959-62, 2-5/8\% notes maturing February 15, 1963, and 2-1/2\% bonds maturing August 15, 1963, were granted the option of exchanging their holdings. The first three were exchangeable for a new $3-5 / 8 \%$ bond due November 15, 1967, and the last for a new $3-3 / 8 \%$ bond due November 15, 1966. Exchanges were subject to allotment if subscriptions exceeded $\$ 5$ billion for the bonds of 1967 or $\$ 3$ billion for the bonds of 1966 .
8/ Tax anticipation issue; for detail of offerings beginning 1961, see Table 4; for amounts redeemed for taxes and for cash see "Note" below.
9 Holders of the naturing certificates and notes were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the $\$ 5,250$ million offering of $3 \%$ certificates or the $\$ 2,500$ million offering of $3-1 / 4 \%$ notes. For detail of offering, see Table 4.
10/ Excess of maturing 4-3/8\% certificates and 3-5/8\% notes over allotments of new securities on subscriptions from bolders of those certificates and notes (see Table 4, footnotes 12 and 13). Reopening of an earlier issue.
$\$ 1,569$ million was redeemed for cash and $\$ 168$ million was exchanged for the tax anticipation bills dated March 23, 1962 (see Table 4). holders of the maturing notes were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the $\$ 6,500$ million offering of $3-1 / 2 \%$ certificates, the $\$ 1,500$ million offering of $4 \%$ bonds, or the $\$ 750$ million offering of $4-1 / 4 \%$ bonds. For detail of offering, see Table 4 .
14/ Excess of maturing $4 \%$ notes and $3-1 / 4 \%$ notes over allotments of new securities on subscriptions from holders of those notes (see Table 4 , footnotes 27 and 28).
15/ From September 10 through September 12, 1962, owners of securities maturing February 15, 1963 ( $3-1 / 2 \%$ certificates, $2-5 / 8 \%$ notes, $3-1 / 4 \%$ notes), and May 15,1963 ( $3-1 / 4 \%$ certificates, $3-1 / 4 \%$ notes, 4\% notes) were granted the option of exchanging their holdings, subject to allotment if subscriptions exceeded the offering limits of $\$ 6$ billion for the notes and $\$ 3$ billion for the bonds
16 Called on August 14, 1962, for redemption on December 15, 1962
17 Holders of the maturing one-year bills were offered the option to exchange the bills for the tax anticipation bills dated October 15, 1963 (see Table 4, footnote 45).
18 Holders of the maturing certificates and notes were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, tor the $\$ 7,600$ million offering of $3-7 / 8 \%$ notes. For detail of offering, see Table 4.

Note: In these tables sales of Series $A-F$ and $J$ bonds are included at issue price, and redemptions and amounts outstanding at current redemption value. Series $G, H$, and $K$ are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured $J$ and $K$ bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, and are then transferred to matured debt on which interest has ceased.

1) Sales and redemption figures include exchanges of minor amounts of (1) matured Series $\mathbb{E}$ bonds for Series $G$ and $K$ bonds from May 1951 through April 1957 and (2) Series $F$ and $J$ bonds for Series $H$ bonds beginning January 1960; however, they exclude exchanges of Series E bonds for Series H bonds, which are reported in Table 3.
2) Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previcus issues of the Treasury Bulletin.
3/ Because there is a normal lag in classifying redemptions, the distribution of redemptions between sales price and accrued discount has been estimated. Beginning with the Treasury Bulletin of March 1961 the
method of distributing redemptions between sales price and accrued discount has been changed to reflect the distribution shown in final reports of classified redemptions. All periods shown have been revised on this basis. Series $F$ and $G$ sales were discontinued April 30, 1952, and Series and K sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent adjustments.
5/ Includes exchanges of Series 1941 F and G savings bonds for 3-1/4\% marketable bonds of 1978-83.
6/ Includes exchanges of Series 1948 F and $G$ bonds for $4-3 / 4 \%$ marketable notes of 1964.
3) Includes exchanges of Series 1949 F and G bonds for $4 \%$ marketable bonds of 1969.
8/ Includes exchanges of Series 1950 F and G bonds for $3-7 / 8 \%$ marketable bonds of 1968.
9/ Includes exchanges of Series 1951 and 1952 F and $G$ bonds for 3-7/8\% marketable bonds of 1971 and $4 \%$ marketable bnds of 1980.
10/ Represents changes in the amounts of redemptions not yet classified between matured and unmatured issues.

| 1/ Not quoted on August 31. <br> 2/ Beginning April 1953, prices are closing bid quotations in the over-the-counter market. Prices for prior dates are the mean of closing bid and ask quotations. "When issued" prices are included in the history beginning October 1941. Dates of highs and lows in case of recurrence are the latest dates. |  |  |  |  |  | 3 On callable issues market convention treats the yield to earliest call date as more significant when an issue is selling above par, and to maturity when it is selling at par or below. <br> 4) Included in the average yield of long-term taxable Treasury bonds as show under "Average Yields of Long-Term Bonds." |  |  |  |  |  |  |

Table 1. - Average Yields of Treasury and Corporate Bonds by Periods
(Percent per annum)

Source: Beginning April 1953, Treasury bond yields are reported to the
Treasury by the Federal Reserve Bank of New York, based on closing bid quotations in the cver-the-counter market. Yields for prior periods vere computed on the basis of mean of closing bid and ask quotations. Moody's Investor Service is the source for the average of Aas corporate bonds.
1 Series includes bouda on which the interest income is aubject to
normal tax and surtax which are neither due nor callable before a given number of years as follows: April 1953 to date, 10 years; April 1952 - March 1953, 12 years; October 1941 - March 1952, 15 years, For bonds currently in the series, see Table 4 under "Market Quotations on Treasury Securities" in this issue of the Bulletin.
2/ One or more new long-term bonds added to the average (see footnote 1 ).
3) An existing bond dropped from the average (see footnote 1).

Note: The United States also has a gold tranche position in the International Monetary Fund, amounting to $\$ 396.6$ million as of August $31,1966$. In accordance with Fund policies the United States has the right to draw foreign currencies equivalent to this amount from the Fund virtually autoratically if needed. Under appropriate circumstances, the United States could draw additional amounts equal to the United States quota of. $\$ 5,160$ million.

1) Includes gold sold to the United States by the International Monetary Fund with the right of repurchase, the proceeds of which are invested by the Pund in U.S. Government securities; As of August 31, 1966, this amounted to $\$ 800$ million. Of this amount, the United States purchased \$200 million in 1956, $\$ 300$ million in 1959, and $\$ 300$ million in 1960.

Beginning September 1965 includes gold deposited by the International Monetary Fund ( $\$ 182.9$ million as of June $30,1966, \$ 183.9$ million as of July 31, 1966, and $\$ 202.7$ million as of August 31, 1966) for the purpose of mitigating the impact of gold payments to the Fund for quote increases by countries which purchased such gold from the United States. The United States has a corresponding gold liability to the Fund.
2) Includes gold in Exchange Stabilization Fund, which is not included in Treasury gold figures shown in daily Treasury statement. (Data as of December 31, 1965 and earlier dates for Treasury gold stock taken from Circulation Statement of United States Money.)
3 Includes holdings of Treasury and Federal Reserve System.

## Background

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Information on the principal types of data and the principal countries is published monthly in the "Treasury Bulletin." Feports by banks, bankers, securities brokers and dealers, and nonbanking business concerns in the United States are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury. These statistics are consolidated by the Treasury and published as promptly as possible.

The reporting forms and instructions used in the collection of the statistics have been revised a number of times. The most recent revision became effective with reports covering data as of May 31, 1963.1/ A detailed description of the content of the statistics, including the changes instituted, appared in the July 1963 issue of the "Treasury Bulletin," pages 79-81. As a result of changes in presentation introduced in that, issue, not all breakdowns previously published will be exactly comparable to those now presented.

## Basic definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including United States citizens domiciled abroad and the foreign subsidiaries and offices of United States banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled. Data partaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the classification "International," "European regional," or "Latin American regional," as appropriate, except for the Bank for International Settlements and the European Fund, which are included in the classification "Other Western Europe."
"Short-term" refers to obligations payable on demand or having an original maturity of one year or less, without deduction of any offsets. "Long-term" refers to obligations having an original maturity of more than one year, and includes securities having no contractual maturity.
Exclusions
The data published herein do not cover all types of capital movements between the United States and foreign countries. The data reported to and published by the Treasury Department exclude entirely the intercompany capital transactions of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies; such transactions are reported by business firms to the Department of Commerce. Data on the capital transactions of the United States Government and on shipments and receipts of United States currency are also excluded from the Treasury reports. Certain capital transactions not effected through reporting institutions, such as securities transactions carried out entirely abroad, are not racorded in the Treasury reports. Consolidated data on all types of capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

The liabilities data exclude nonnegotiable, noninterestbearing special notes of the United States held by the InterAmerican Development Bank and the International Development Association.

The data on securities transactions and on foreign holdings of U.S. Goverment bonds and notes exclude nonmarketable U.S. Treasury notes, foreign series, and nonmarke table U.S. Treasury bonds, foreign currency series (see "International Financial Statistics" section, Table 2).

## Presentation of statistics

Data collected monthly on the Treasury Foreign Exchange Forms are published in three sections. Section I provides a summary of the principal data by period; Section II presents data by country and by period; and Section III shows detailed breakdowns of the latest available preliminary data.

Section IV presents supplementary data which are reported less frequently than monthly but which are published monthly.

5/ Differs from 1961 end of year data on the preceding line by inclusion of liabilities and claims reported by a number of banks included in the series beginning December 31, 1961.
6/ Includes reported liabilities to foreign official institutions beginning October 1961. Figures for selected dates are as follows: end 1961, \$46.3 million; end 1962, \$47.9 million; end 1963, \$30.1 million; end March 1966, \$317.2 million; end June 1966, \$367.2 million; end July 1966, \$392.5 míliion.
7) Includes claims previously held but first reported as of May 31, 1963; es of that date such claims amounted to $\$ 85.6$ million. Also includes claims amounting to $\$ 193.2$ million reported by banks for the first time as of December 31, 1963, representing in part claims previously held by banks but not reported.
8/ Short-term liabilities include a net increase of $\$ 50.8$ million arising from changes in reporting coverage, distributed as follows: "Dfficial
institutions" - $\$ 4.0$ million, "Foreign banks" $+\$ 60.3$ million, "Other foreigners" +22.5 million, and "Payable in foreign currencies" \$27.9 million.
2/ Data on claims below the line differ from claims above the line because of the exclusion as of December 31, 1964 of $\$ 58.1$ million of short-term U.S. Government claims previously included; and because of the addition of $\$ 545.9$ million of short-term claims and $\$ 313.3$ million of long-term claims arising from the inclusion of claims previously held but first reported as of December 31, 1964, and from revisions of preliminary figures.
10/ See footnote 11.
11 Data on claims below the line differ from claims above the line because of the addition of short-term claims held in custody for domestic customers but reported by banks for the first time beginning December 31, 1965, and short-term claims reported by banks reporting for the first time.
12 Short-term liabilities exclude $\$ 776.3$ million letter of credit issued by the U.S. Treasury Department to the International Monetary Fund in payment of the dollar portion of the iU.S. quota increase which became effective on February 23, 1966.

## 1) Excludes convertible foreign currencies held by U. S. monetary authorities.

2) The second colum for 1964 differs from data in preceding column because of the exclusion as of December 31, 1964 of $\$ 58.1$ million of short-term U.S. Government claims previously included; and because of the addition of $\$ 545.9$ million of short-term claims arising from the inclusion of claims previously held but first reported as of December 31, 1964, and from revisions of preliminary figures.
3) The second column for 1965 differs from data in preceding column
because of the addition of short-term claims hela in custody for
domestic customers but reforted by banks for the first time beginning December 31, 1965, and short-term claims reported by banks reporting
for the first time

* Less than $\$ 50,000$

Section II - Summary by Countries
Table 9.- Estimated Holdings of U.S. Government Bonds and Notes
(Position at end of period in millions of dollars)

Data represent estimated official and private holdings of U.S. Government, securities with an original maturity of more than one year. (For exclusions see headnote on page 86.) Annual and monthly data are show in this section beginning with the February 1964 issue of the Bulletin. For quarterly data see Section IV, Table through the June 1964 issue; and "International Financial Statistins," Table 4, beginning with the September 1964 issue. Data as survey and regular $1962-63$ are on the basis of a November 30, 1960 survey and regular monthly reports of securities transactions (see
Table 4). Data for December 31, 1963, also are shown on the basis
of a July 31, 1903 , s. ryty and the mont iy transactions reports. For statistical convenience, the new series is introduced as of December 31, 1963, rather than as of the survey date.

The variations between the two series are believed to result from omissions from, or errors in reporting, shifts in ownership not involving purchases or sales through U.S. banks or brokers, and physical transfers of securities to and from abroad. It is not possible to reconcile the two series or to revise iligures for earlier dates. Less than $\$ 500,000$.
