## Reporting Bases

Data on receipts, expenditures, and debt which appear in the "Treasury Bulletin" are based largely on two Treasury financial reports, the "Daily Statement of the United States Treasury" and the "Monthly Statement of Receipts and Expenditures of the United States Government." Where these statements are given as sources for individual tables, they are cited by name only. Their respective reporting bases are described below. For other data in the Eulletin, information on sources or reporting bases is given in connection with the tables themselves.

The monthly statement of receipts and expenditures was first published for February 1954, and replaced the daily statement as the primary source of information on budget results and other receipt and expenditure data classified by type of account. At the same time, the daily statement was changed to a statement of cash deposits and withdrawals affecting the account of the Treasurer of the United States. Both publications have provided comparative figures on their respective bases from the beginning of the fiscal year 1953. The announcement of February 17, 1954, with respect to these reporting changes may be found in the April 1954 issue of the Bulletin.

The monthly statement shows all receipts and expenditures of the Government, including those made from cash accounts held outside the United States Treasury. The information is compiled from reports by the Treasurer of the United States and by all other collecting and disbursing agencies, including those agencies which maintain checking accounts in commercial banks. These reports cover transactions recorded in the accounts of the agencies during the reporting period. The net of the transactions as compiled from these reports is reconciled in the monthly statement to changes in the balance in the Treasurer's account and in cash held outside the Treasurer's account and changes in the public debt outstanding.

Receipts of taxes and customs duties are reported on a collections basis. Other receipts are reported partially on a collections basis and partially on a deposits basis. Expenditures, except interest on the public debt, are reported on the basis of checks issued or cash payments made by disbursing officers. Transactions of an interfund or intragovernmental nature are included on the same basis even though the actual issuance of checks may not be involved. Interest on the public debt is included on an accrual basis beginning with figures for June 1955 and the fiscal year 1955. Prior to that, it was included on a due and payable basis. The same reporting basis as that in the monthly statement provides the fiscal year figures for the

Treasury's "Combined Statement of Receipts, Expenditures and Balances of the United States Government" and for actual receipts and expenditures in the "Budget of the United States Government. "

Beginning with the final statement for the fiscal year 1960, the morthly statement reports totals for net budget receipts and budget expenditures after deduction of certain interfund transactions which are included in the detail of both budget receipts and budget expenditures. The transactions deducted consist of interest payments and minor amounts of certain other payments made by Government agencies to the Treasury. This reporting change was made in accordance with the plan stated in the President's Budget Message of January 18, 1960. It does not affect the surplus or deficit. Figures for earlier periods shown in the Treasury Bulletin were revised to the new reporting basis in the September 1960 issue. The interfund transactions deducted under this procedure do not include payments to the Treasury by wholly owned Government corporations for retirement of their capital stock and for disposition of earnings. These capital transfers have been excluded currently from budget receipts and budget expenditures beginning July 1, 1948, and figures for prior fiscal years back through 1932 were revised accordingly at that time.

The daily statement on the new basis was first issued for February 17, 1954. In the deposits and withdrawals as shown, no distinction is made as to the type of accounts (budget, trust, etc.). The deposits are on the basis of certificates of deposit cleared through the account of the Treasurer of the United States. Total withdrawals are on the basis of checks paid or cash disbursements made out of the Treasurer's account. Some of the withdrawal ciassifications shown are reported on the basis of mailed reports of checks issued and are adjusted by means of clearing accounts to the total of checks paid. Except for relatively minor amounts, noncash interfund and other intragovernmental transactions are excluded. The public debt figures in the daily statement also are on a "clearance" basis, with the exception of those issuance and retirement transactions reported on the basis of telegrams from Federal Reserve banks. However, noncash debt transactions are included.

The daily statement before February 27, 1954, covered not only transactions cleared through the Treasurer's account but also certain Government agency transactions which were handled through commercial bank accounts, and included noncash interfund and other intragovernmental transactions. It provided information similar to that in the present daily state-

ment with respect to the status of the Treasurer's account, and similar to that in the present end-of-month daily statement with respect to debt issuance, retirement, and amount outstanding, Receipts and expenditures were classified by type of account, and the budget results shown in the daily statement were used as the basis for reflecting the results under the President's budget program as enacted by the Congress.

Receipts were on the basis of deposits as they cleared the Treasurer's account. Expenditures cleared through the Treasurer's account were reported on two successive bases. Through 1946 they were on the basis of checks paid by the

Treasurer of the United States. Beginning with 1947, expenditures made through the facilities of the Treasury Department's Division of Disbursement were on the basis of checks issued, while certain others, principally those of the Department of Defense and its predecessor organizations, were on the basis of checks paid. Transactions handled through commercial bank accounts, consisting of market transactions in public debt and guaranteed securities, were as reported by the agencies. Interest on the public debt was included on a due and payable basis beginning with November 1949 and on a checks-paid basis prior to that time.

## Treasury Financing Operations

## Tax Anticipation Bills

On October 5 tenders were invited for $\$ 1.5$ billion, or thereabouts, of 185 -day tax anticipation bills, representing an additional amount of bills dated August 26, 1966, and for \$2.0 billion, or thereabouts, of 247-day tax anticipation bills, both series to be issued October 18. The 185-day bills mature on April 21, 1967, and the 247-day bills mature on June 22, 1967, but they will be acceptable at face value in payment of income taxes due on April 15, 1967, and June 15, 1967, respectively. Tenders were opened on October 11.

Tenders received for the 185 -day bills totaled $\$ 2,279$ million, of which $\$ 1,507$ million were accepted. The average bank discount rate was 5.483 percent. The limit for noncompetitive tenders was $\$ 300,000$ and they totaled $\$ 238$ million.

Tenders received for the 247 -day bills totaled $\$ 2,457$ million, of which $\$ 2,007$ million were accepted. The average bank discount rate was 5.586 percent. The limit for noncompetitive tenders was $\$ 400,000$ and they totaled $\$ 223$ million.

All bidders for either issue were required to agree not to purchase or to sell, or to make any agreements with respect to the purchase or sale or other disposition of any bills of that issue at a specific rate or price, until after onethirty p.m., Eastern daylight saving time, October 11, 1966.

Any qualified depositary was permitted to make payment by credit in its Treasury tax and loan account for both issues of bills allotted to it for itself and its customers up to any amount for which it was qualified in excess of existing deposits.

## 9-Month and One-Year Bills

On September 21 the Treasury announced the start of a program to auction 9-month bills on a monthly basis to help raise additional funds. Treasury borrowing needs in the market in the months ahead will be enlarged because of Government investment account purchases of Federal agency securities, and because of the cancellation of the sale of participation certificates. The plan is expected to increase the marketability of the 12-month bill issues.

On September 21 tenders were invited for $\$ 900$ million, or thereabouts, of 365-day Treasury bills, to be dated September 30, 1966, and for $\$ 500$ million, or thereabouts, of 273-day Treasury bills, representing an additional amount of bills dated June 30 , 1966, maturing June 30 , 1967, to be issued

September 30. These issues were to refund $\$ 1$ billion of bills maturing September 30 and to raise $\$ 400$ million cash. Tenders were opened on September 27.

Tenders received for the 273-day bills totaled $\$ 985$ million, of which $\$ 500$ million were accepted, including $\$ 28$ million of noncompetitive tenders. The average bank discount rate was 5.808 percent.

Tenders received for the $365-$ day bills totaled $\$ 1,473$ million, of which $\$ 900$ million were accepted, including $\$ 66$ million of noncompetitive tenders. The average bank discount rate was 5.806 percent.

## 13-Week and 26-Week Bills

Issues of regular weekly Treasury bills in September totaled \$ll. 5 billion, replacing an equal amount of maturing bills. There were five 91 -day issues of $\$ 1.3$ billion each and five 182 -day issues of $\$ 1.0$ billion each. Average rates for the new issues are shown in the following table.

Treasury Bilis - General
Treasury bills are sold on a bid basis. The face amount is payable without interest at maturity. They are issued in bearer form only, and in denominations of $\$ 1,000, \$ 5,000$, $\$ 10,000, \$ 50,000, \$ 100,000, \$ 500,000$, and $\$ 1,000,000$ (maturity value). Tenders are received at Federal Reserve banks and branches.

## Treasury Financing Operations - (Continued)

Banking institutions generally may submit tenders for account of customers. Tenders may be made without deposit by incorporated banks and trust companies and by responsible and recognized dealers in investment securities. Tenders from others must be accompanied by payment of 2 percent of the face amount of bills applied for, unless the tenders are accompanied by an express guaranty of payment by an incorporated bank or trust company.

Noncompetitive tenders (without stated price), usually for $\$ 200,000$ or less from any one bidder, are accepted in full at the average price of accepted competitive bids for an issue.

Payment for accepted tenders must be made or completed on the date of issue, in cash or other immediately available funds or in a like face amount of Treasury bills maturing on that date. Payment for 13-week, 26-week, 9-month, and one-year bills may not be made by credit in Treasury tax and loan accounts.

Foreign Series and Foreign Currency Series
Issues of foreign series securities in September consisted of four 3-month certificates of indebtedness totaling \$258 million, with interest rates ranging from 5.10 percent to 5.50 percent. Redemptions during the month totaled $\$ 80$ million. At the end of September the outstanding foreign series securities totaled $\$ 875$ million.

One certificate of indebtedness of the foreign currency series equivalent to $\$ 50$ million was issued in September. This certificate denominated in German marks bears interest at 5.75 percent, is dated September 1, 1966, and matures September 1, 1967. Redemptions of matured bonds amounted to the equivalent of $\$ 75$ million. Foreign currency securities outstanding at the end of September were equivalent to $\$ 859$ million and were denominated in Austrian schillings, Belgian francs, German marks, Swiss francs, and Italian lire.

## Footnotes to Table 3-(Continued)

1) Consists of net expenditures of the Postal Fund, reflecting the change in classification of Post Office transactions to a public enterprise revolving fund basis, and beginning fiscal 1960, payment for public services.
2) Beginning with fiscal 1961, administrative expenses of the employment security program are handled as trust account expenditures rather than budget expenditures, pursuant to the Employment Security Act of 1960, approved September 13, 1960 (42 U.S.G. 1101).
3/ Includes \$258.8 million paid to the International Monetary Fund for the additional United States gold subscription, authorized by an act approved June 2, 1965 (see "Account of the Treasurer of the United States," Table 4).
4 Net decrease is due to sale by the Commodity Credit Corporation of certificates of interest on loans held by the corporation. Net expenditures, excluding this sale, were $\$ 340$ million.
3) Reported on an accural basis effective June 30, 1955.

6 Consists of Federal payment and loans and advances.
For content see Table 4. These transactions are included in the detail of both budget receipts and budget expenditures, but are deducted from the totals (see Reporting Bases, p. II).

8 Effective January 1, 1957, the production credit coporations were merged in the Federal intermediate credit banks, pursuant to Farm Credit Act of 1956, approved July 26, 1956 (12 U.S.C. 1027, and operations of the merged agencies (as mixed-ownership corporations) were classified as trust ehterprise funds fron Jamary 1, 1957, until January 1959 when they were classified as Government-sponsored enterprises (see "Trust and Other Transactions," Table 3); previously the operations of the banks and the corporations, respectively, were classified as public enterprise funds and were included net in budget expenditures.
9/ Includes \$1,375 million paid to the International Monetary Fund for the additional United States subscription, authorized by an act approved Jure 17, 1959, consisting of $\$ 343.8$ million in gold (see "Account of the Treasurer of the United States," Table 4) and $\$ 1,031$ million in special notes. The special notes of the United States issued to international institutions are nonnegotiable and noninterest-bearing and are payable on demand. See also "Consolidated Cash Transactions," Table 2 and "Debt Outstanding," Table 1.
10) Includes an allowance for contingencies of $\$ 350$ million.

Less than $\$ 500,000$.

## ADMINISTRATIVE BUDGET RECEIPTS AND EXPENDITURES

Table 6. - Expenditures by Functions-(Continued)
(Fiscal years; in millions of dollars)

Source: Expenditures for 10,66 and 1967 are from reports received from disbursing, collecting, and administrative agencies of the Government, on the monthly statement reporting basis (see page II). They are classified in accordance with classifications used in the 1967 Budget document, Table 19, as nearly as can be done on an individual appropriation and fund item basis. Prior year figures are from the same source but have been adjusted below the appropriation level in some instances by the Bureau of the Budget for use in Table 19. Where current classifications differ on this account, they are footnoted.
Revolving fund transactions are included net in the expenditures.
1/ For expenditures by major functions for fiscal 1967 through September 1966, and fiscal 1966 through September 1965, see "Note" below. Details by functions are not available for publication in this issue but will appear in the November 1966 Bulletin.
2) Expenditures for 1966 and 1967 for function code 351 include those relating to specified research projects applicable to function code 355. These expenditures were made from "Special Activities, Commodity Credit Corporation."
3) Expenditures for 1966 and 1967 for function code 551 include those relating to veterans' readjustment benefits applicable to function code 803. These expenditures were made from the "Participation Sales Fund, Federal National Mortgage Association.
4 Expenditures for 1966 and 1967 for function code 653 include those relating to medical and hospital care for the aged applicable to function code 651. These expenditures were made from "Grants to States for Public Assistance, Bureau of Family Services."
5/ Expenditures for 1966 and 1967 for function code 702 include those relating to assistance for elementary and secondary education applicable to function code 701 and other aids to education applicable to function code 704. These expenditures were made from "Defense Educational Activities, Office of Education."
6/ Expenditures for 1966 and 1967 for function code 801 include those relating to veterans' nonservice-connected pensions applicable to
function code 802 and other veterans ${ }^{\prime}$ benefits and services applicable to function code 805. These expenditures were made from "Compensation and Pensions, Veterans' Administration."

1. Payments are made between the Railroad Retirement Account and Federal 01d-Age and Survivors, Federal Disability and Federal Hospital insurance trust funds so as to place those funds in the position in which they would have been if railroad retirement employment had been included under social security coverage.
2 Includes interest on amounts reimbursed to the Federal 0ld-Age and Survivors Insurance Trust Fund for administrative expenses.
3 Premiums deducted from benefit payments from Federal Old-Age and Survivors and Federal Disability insurance trust funds, and Civil Service and Railroad Retirement accounts.
40 Includes temporary advances to the Railroad Unemployment Insurance Account in the Unemployment Trust Fund when the balance in the account
is insufficient to meet payments of benefits and refunds due or to become due.
2) Repayment of advances plus interest to the Railroad Retirement Account. See footnote 4.
6/ Transfers from the Civil Service Retirement and Disability Fund to the Foreign Service Retiremant and Disability Fund.
3) Transfers to the Foreign Claims Settlement Commission.

8/ Contributions and beginning with 1958, transfers of deductions from employees' salaries to the Civil Service Retirement and Disability Fund, advances to National Park Service, and advances to Smithsonian Institution.
2 Includes payment of $\$ 2$ million between Federal Old-Age and Survivors Insurance Trust Fund and Federal Supplementary Medical Trust Fund.

* Less than $\$ 500,000$. P Preliminary.

Consolidated cash transactions reported in the Treasury Bulletin are on a basis consistent with Federal receipts from and payments to the public as derived in the Budget of the United States (in the Budget for 1967 in Special Analysis A). Shown also is the amount of net cash borrowing from, or repayment of borrowing to, the public. Revisions of the figures for earlier years have been made where necessary to make them as nearly comparable with current Budget classifications as available data will permit. For this reason certain of the figures differ somewhat from those published in previous Budget documents as well as in the Bulletin.

This series of cash transactions is designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the account of the Treasurer of the United States. Receipts and payments include transactions both in administrative budget accounts and in trust and deposit fund accounts. Major intragovernmental transactions which are reported as both expenditures and receipts are excluded from both. Noncash items representing the obligations of the Government to make payments in the future also are eliminated
from expenditures currently, but are added later when actual payments are made. These items consist of certain interest accrued on the public debt and expenditures involving the issuance of a few special public debt securities. Checks outstanding, deposits in transit, and other clearing accounts are excluded from payments. Receipts from the exercise of monetary authority are excluded as not representing cash received from the public. Federal cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencies and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direct cash borrowing from the public. The net effect of all these transactions with the public is reflected in changes in the balance in the Treasurer's account and in cash held outside the Treasury.

Seasonally adjusted summary data are shown in table 3. The adjusted data have been derived by applying a seasonal adjustment formula developed by the Bureau of Census, Department of Commerce.

## Source and Availability of the Balance in the Treasurer's Account

The account of the Treasurer of the United States reflects not only budget receipts and expenditures but also trust, deposit fund, and public debt transactions.

The working cash of the Treasury is held mainly in Treasurer's accounts with Federal Reserve banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banks throughout the country.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of money from a customer's account to the tax and loan account in
the same bank. On occasions, to the extent authorized by the Treasury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the account of their customers.

The tax and loan account system permits the Treasury to leave funds in banks and in the communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on bank reserves and the economy.

A detailed description of the Treasury's depositary system may be found in the Annual Report of the Secretary of the Treasury for 1955, pages 275-284.

Table 1. - Status of the Account of the Treasurer of the United States
( $\ln$ millions of dollars)

[^1]through June 1958, after which they are included in the balance in the Treasurer's account. (See footnote 2).
2) Through June 1958, tha balance of the Treasurer was reduced when Treasurer's checks ware issued and the amount of the checks was carried as a liability until paid. Effective July 1958, the balance is not reduced until the checks are paid, a procedure also applying to checks drawn on the Treasurer by Government disbursing officers and agencies.
3/ Amounts shown, beginning January 1963, are net of uncollected items exchanges, etc. Previously these items were included under liabilities.

1/ Special depositaries are permitted to make payment in the form of a deposit credit for the purchase price of U.S. Government securities purchased by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is parmittad under the terms of the circulars inviting subscriptions to the issues.
2/ Retirement plan bonds first offered for sale as of Jamuary 1, 1963. Taxes eligibla for credit consist of those deposited by taxpayers in the depositary banks, as follows: Withheld income tax beginning

March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; and a number of excise taxes beginning July 1953.
4 Under a special procedure begun in Marcb 1951, authorization may be given for income tax payments, or a portion of them, made by checks of $\$ 10,000$ or more drawn on a spacial depositary bank, to be credited to the tax and loan account in that bank. This procedure is followad during some of the periods of heavy tax payments.

[^2]interest charge for the total, or for any group of issues, by the
corresponding principal amount. Beginning with data for December 31
1958, the computation is based on the rate of effective yield for issues sold at premium or discount. Prior to that date it was based on the coupon rate for all issues.
1 Guaranteed securities included are those held outside the Treasury
2/ Total includes "Other bonds" through 1960 ; see Table 3.
3 Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate. 4) On United States savings honds the rate to maturity is applied against the amount outstanding.

Table 4. - Redemptions of Matured and Unmatured Savings Bonds
(ln millions of dollars)

Source: Daily Treasury statement; Office of Debt Analysis in the Office of the Secretary.
Note: In these tables salas of Series $A-F$ and $J$ bonds are included at issue price, and redemptions and amounts outstanding at current redemption value. Series G, H, and K are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Maturad $J$ and $K$ bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, and are then transferred to matured debt on which interest has ceased.

1. Sales and redemption figures include exchanges of minor amounts of (I) matured Series E bonds for Series $G$ and $K$ bonds from May 1951 through April 1957 and (2) Series $F$ and $J$ bonds for Series $H$ bonds beginning Jamary 1960; however, they exclude exchanges of Series $E$ bonds for Series H bonds, which are reported in Table 3.
2) Detalls by series on a cumulative basis and by periods for Series $A-D$ combined will be found in the February 1952 and previous issues of the Treasury Bulletin.
3/ Because there is a normal lag in classifying redemptions, the distribution of redemptions between sales price and accrued discount has been estimated. Beginning with the Treasury Bulletin of March 1961 the
method of distributing redemptions between sales price and accrued discount has been changed to reflect the distribution shown in final reports of classified redemptions. All periods sbown have been revised on this basis.
4' Series $F$ and $G$ sales were discontinued April 30, 1952, and Series J and $K$ sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent adjustments.
5/ Includes exchanges of Series 1941 F and G savings bonds for 3-1/4\% marketable bonds of 1978-83.
Includes exchanges of Series 1948 F and G binds for $4-3 / 4 \%$ marketable notes of 1964.
7/ Includes exchanges of Series 1949 F and $G$ bonds for $4 \%$ marketable bonds of 1969.
8. Includes exchanges of Series 1950 F and G bonds for $3-7 / 8 \%$ marketable bonds of 1968
9 Includes exchanges of Series 1951 and 1952 F and G bonds for $3-7 / 8 \%$
marketable bonds of 1971 and $4 \%$ marketable bonds of 1980 .
Represents changes in the amounts of redemptions not yet classified between matured and unmatured issues.
Less tban $\$ 500,000$.

The monthly Treasury Survey of Ownership covers securities issued by the United States Government and by Federal agencies. The banks and insurance companies included in the Survey currently account for about 90 percent of all such securities held by these institutions. The similar proportion for corporations and for savings and loan associations is 50 percent, and for State and local governments, 70 percent. Data were first published for banks and insurance companies in the May 1941 Treasury Bulletin, for
corporations and savings and loan associations in the September 1960 Bulletin, and for State and local governments in the February 1962 Bulletin.

Holdings by commercial banks distributed according to Federal Reserve member bank classes and nonmember banks are published for June 30 and December 31. Holdings by corporate pension trust funds are published quarterly, first appearing in the March 1954 Bulletin.

## Section II - Interest-Bearing Securities Issued by Federal Agencies But Not Guaranteed by the United States Government - (Continued)

1 Includes public debt not subject to statutory limitation. For amount subject to limitation, see page 1 .
Excludes trust departments.
Includes trust companies and, beginning with figures for July 1949, also includes stock savings banks. Previously, those banks were reported as a separate classification.
4) Included with all other investors are those banks, insurance companies, savings and loan associations, corporations, and State and local government funds not reporting in the Treasury Survey.

5/ United States savings bonds, Series E and J, are reported to the Treasury Survey at maturity value but have been adjusted to current redemption value for use in this statement.
6) Includes $\$ 20$ million depositary bonds held by commercial banks not included in the Treasury Survey.
7) Guaranteed securities are those held outside the Treasury.

8/ Holdings by reporting investors not available.
Less than $\$ 500,000$.

Current market quotations shown here are over-thecounter closing bid quotations in the New York market for the last trading day of the month, as reported to the Treasury by the Federal Reserve Bank of New York.

The securities listed include all regularly quoted public marketable securities issued by the United States Treasury. Securities issued by Federal agencies and guaranteed by the United States Government are excluded.

Daily series unweighted averages Treasury by the Federal Reserve Bank of New York, based on closing bid quotations in the over-the-counter market. Yields for prior periods were computed on the basis of mean of closing bid and ask quotations. Maody's Investor Service is the source for the average of Aas corporate bonds.
1 Series includes bonds on which the interest income is subject to
normal tax and surtax which are neither due nor callable before a
given number of years as follows: April 1953 to date, 10 years; April 1952 - March 1953, 12 years; October 1941 - March 1952, 15 years. For bonds currently in the series, see Table 4 under "Market Quotations on Treasury Securities" in this issue of the Bulletin.
2) One or more new long-term bonds added to the average (see footnote 1).

3 An existing bond dropped from the average (see footnote 1). Market closed.

Table 1. - U.S. Gold Stock, and Holdings of Convertible Foreign Currencies by U.S. Monetary Authorities

Note: The United States also has a gold tranche position in the Interna-
tional Monetary Fund, amounting to $\$ 372.0$ million as of September 30, 1966
In accordance with Fund policies the United States has the right to diaw foreign currencies equivalent to this amount from the Fund virtually automatically if needed. Under appropriate circumstances, the United States could draw additional amounts equal to the United States quota of $\$ 5,160$ million.
1/ Includes gold sold to the United States by the International Monetary Fund with the right of repurchase, the proceeds of which are invested by the Fund in U.S. Government securities; as of September 30, 1966, this gmounted to $\$ 800$ million. Of this amount, the United States purchased $\$ 200$ milion in 1956 , $\$ 300$ million in 1959 , and 300 million in 1960.

Beginning September 1965 includes gold deposited by the International Monetary Fund ( $\$ 183.9$ million as of July 31,1966 , \$202. 7 million as of August 31, 1966, and $\$ 211.5$ million as of September 30, 1966) for the purpose of mitigating the impact of gold payments to the Fund for quota increases by countries which purchased such gold from the United States. The United States has a corresponding gold liability to the Fund.
2) Includes gold in Exchange Stabilization Fund, which is not included in Treasury gold figures shown in daily Treasury statement. (Data as of December 31, 1965 and earlier dates for Treasury gold stock taken from Circulation Statement of United States Money.)
3/ Includes holdings of Treasury and Federal Reserve System.

## Background

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of Jamuary 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Information on the principal types of data and the principal countries is published monthly in the "Treasury Bulletin." Reports by banks, bankers, securities brokers and dealers, and nonbanking business concerns in the United States are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury. These statistics are consolidated by the Treasury and published as promptly as possible.

The reporting forms and instructions used in the collection of the statistics have been revised a number of times. The most recent general revision became effective with reports covering data as of May 31, 1963.1/ A detailed description of the content of the statistics, including the changes instituted in 1963, appeared in the July 1963 issue of the "Treasury Bulletin," pages 79-81. As a result of changes in presentation introduced in that issue, not all breakdowns previously published will be exactly comparable to those now presented. Basic definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including United States citizens domiciled abroad and the foreign subsidiaries and offices of United States banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled. Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the classification "International," "European regional," or "Latin American regional," as appropriate, except for the Bank for International Settlements and the European Fund, which are included in the classification "Other Western Europe."
"Short-term" refers to obligations payable on demand or having an original maturity of one year or less, without deduction of any offsets. "Long-term" refers to obligations having an original maturity of more than one year, and includes securities having no contractual maturity.

## Exclusions

The data published herein do not cover all types of capital movenents between the United States and foreign countries. The data reported to and published by the Treasury Department exclude entirely the intercompany capital transactions of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies; such transactions are reported by business firms to the Department of Commerce. Data on the capital transactions of the United States Government and on shipments and receipts of United States currency are also excluded from the Treasury reports. Certain capital transactions not effected through reporting institutions, such as securities transactions carried out entirely abroad, are not recorded in the Treasury reports. Consolidated data on all types of capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

The liabilities data exclude nonnegotiable, noninterestbearing special notes of the United States held by the InterAmerican Development Bank and the International Development Association.

The data on securities transactions and on foreign holdings of U.S. Goverrment bonds and notes exclude nonmarketable U.S. Treas ury notes, foreign series, and non2 marketable U.S. Treas ury bonds, foreign currency series (see "International Financial Statistics" section, Table 2).

## Presentation of statistics

Data collected monthly on the Treasury Foreign Exchange Forms are published in three sections. Section I provides a summary of the principal data by period; Section II presents data by country and by period; and Section III shows detailed breakdows of the latest available preliminary data.

Section IV presents supplementary data which are reported less frequently than monthly but which are published monthly.

1) For an explanation of statistical presentation and exclusions, see headnote on page 86.
2) Through 1949, transactions in U.S. Government bonds and notes include transactions in domestic corporate bonds.
3/ Data below the line include changes in liabilities and claims reported by a number of banks included in the series beginning December 31, 1961.
4 Change includes claims previously held but first reported as of May 31, 1963; as of that date such claims amounted to $\$ 85.6$ million. Also includes claims reported by banks for the first time as of December 31, 1963; as of that date such claims amounted to $\$ 193.2$ million, representing in part claims previously held by banks but not reported.
3) Change in short-term liabilities includes a net increase of $\$ 50.8$ million as of December 31, 1964, arising from changes in reporting coverage.
6/ Data below the line on changes in claims reflect the exclusion from
the series beginning December 31, 1964 of short-term U.S. Government claims previously included; and the addition to the series of claims arising from the inclusion of claims previously held but first reported as of December 31, 1964, and from revisions of preliminary figures.
1/ Change in short-term liabilities excludes $\$ 776.3$ million representing letter of credit issued by the U.S. Treasury Department to the International Monetary Fund in payment of the dollar portion of the U.S. quota increase which became effective on February 23, 1966.
8/ Data below the line on changes in short-term claims reflect the addition to the series of short-term claims held in custody for domestic customers but reported by banks for the first time beginning December 31, 1965, and short-term claims reported by banks reporting for the first time.

Included with＂Other claims．
Beginning in August 1956 and also in April 1957，certain accounts previously classified as＂Foreign banks＂are included with＂official institutions．＂
5／Differs from 1961 end of year data on the preceding line by inclusion of liabilities and claims reported by a number of banks included in the series beginning December 31， 1961.
6／Includes reported liabilities to foreign official institutions begin－ ning October 1961．Pigures for selected dates are as follows： end 1961，\＄46．3 million；end 1962，\＄47．9 million；end 1963，\＄30．1 million；end March 190́6，\＄317．2 million；end June 19á6，\＄367．2 million； end August 1966，$\$ 467.7$ million．
7）Includes claims previously held but flist reported as of May 31，1963； as of that date such claims amounted to $\$ 85.6$ million．Also includes claims amounting to $\$ 193.2$ million reported by barks for the first time as of December 31，1903，representing in part claims previously held by banks but not reported．
8／Short－term liabilities include a net increase of \＄ 50.8 million arising from changes in reporting coverage，distributed as follows：＂Official
institutions＂$\$ 4.0$ million，＂Foreign banks＂$+\$ 60.3$ million ＂Other foreigners＂＋\＄22．5 million，and＂Payable in foreign currencies＂ $\$ 27.9$ million
9／Data on claims below the line differ from claims above the line be－ cause of the exclusion as of December 31,1964 of $\$ 58.1$ million of short－term U．S．Govemment claims previously included；and because of the addition of $\$ 545.9$ million of short－term claims and $\$ 313.3$ million of long－term claims arising from the inclusion of claims previously held but first reported as of December 31，1964，and from revisions of preliminary figures．
10）See footnote 11
11 Data on claims below the line differ from claims above the line be－ cause of the addition of short－term clains held in custody for domestic customers but reported by banks for the first time beginning December 31,1965 ，and short－term claims reported by banks reporting for the first time．
12 Short－term liabilities exclude $\$ 776.3$ million letter of credit issued by the U．S．Treasury Department to the International Monetary Fund in payment of the dollar portion of the U．S．quota increase which became effective on February 23， 1966.

Section II - Summary by Countries
Table 9. - Estimated Holdings of U.S. Government Bonds and Notes
(Position at end of period in millions of dollars)

Note: Data represent estimated official and private holdings of iv.S.
Government securities with an original maturity of more than one Government securities with an original maturity of more than one year. (For exclusions see headnote on page 86.) Annual and monthly data are shown in this section beginning with the February 1964 issue of the Bulletin. For quarterly data see Section IV, Table 2 through the June 1964 issue; and "International Financial Statistics," Table 4 , beginning with the September 1964 issue. Data as of December 31, 1962-63 are on the basis of a November 30, 1960 survey and regalar monthly reports of securities transactions (see Table 4). Tata for December 31, 1963, also are shown on the basis
of a July 31,1903 , survey and the montlily transactions reports. For statistical convenielce, the new series is introduced as of December 31, 1963, rather than as of the survey date.

The variations between the two series are believed to result from omissions from, or errors in reporting, shifts in ownership not involving purchases or sales through U.S. banks or brokers, and physical transfers of securities to and from abroad. It is not possible to reconcile the two series or to revise figures for earlier dates. Less than $\$ 500,000$.

    Note: The computed annual interest charge represents the amount of
    interest that would be paid if each interest-bearing issue outstanding at the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outatanding on that date (the amount factually borrowed in the case of securities sold at a pramium or discount, beginning with May 1960). The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. The average annual interest rate is computed by dividing the computed annual
