## Reporting Bases

Data on receipts, expenditures, and debt which appear in the "Treasury Bulletin" are based largely on two Treasury financial reports, the "Daily Statement of the United States Treasury" and the "Monthly Statement of Receipts and Expenditures of the United States Government." Where these statements are given as sources for individual tables, they are cited by name only. Their respective reparting bases are described below. For other data in the Bulletin, information on sources or reporting bases is given in connection with the tables themselves.

The monthly statement of receipts and expenditures was first published for February 1954, and replaced the daily statement as the primary source of information on budget results and other receipt and expenditure data classified by type of account. At the same time, the daily statement was changed to a statement of cash deposits and withdrawals affecting the account of the Treasurer of the United States. Both publications have provided comparative figures on their respective bases from the beginning of the fiscal year 1953. The announcement of February 17, 1954, with respect to these reporting changes may be found in the April 1954 issue of the Bulletin.

The monthly statement shows all receipts and expenditures of the Government, including those made from cash accounts held outside the United States Treasury. The information is compiled from reports by the Treasurer of the United States and by all other collecting and disbursing agencies, including those agencies which maintain checking accounts in commercial banks. These reports cover transactions recorded in the accounts of the agencies during the reporting period. The net of the transactions as compiled from these reports is reconciled in the monthly statement to changes in the balance in the Treasurer's account and in cash held outside the 'Treasurer's account and changes in the public debt outstanding.

Receipts of taxes and customs duties are reported on a collections basis. Other receipts are reported partially on a collections basis and partially on a deposits basis. Expenditures, except interest on the public debt, are reported on the basis of checks issued or cash payments made by disbursing officers. Transactions of an interfund or intragovernmental nature are included on the same basis even though the actual issuance of checks may not be involved. Interest on the public debt is included on an accrual basis beginning with figures for June 1955 and the fiscal year 1955. Prior to that, it was included on a due and payable basis. The same reporting basis as that in the monthly statement provides the fiscal year figures for the

Treasury's "Combined Statement of Receipts, Expenditures and Balances of the United States Government" and for actual receipts and expenditures in the "Budget of the United States Government."

Beginning with the final statement for the fiscal year 1960, the monthly statement reports totals for net budget receipts and budget expenditures after deduction of certain interfund transactions which are included in the detail of both budget receipts and budget expenditures. The transactions deducted consist of interest payments and minor amounts of certain other payments made by Government agencies to the Treasury. This reporting change was made in accordance with the plan stated in the President's Budget Message of January 18, 1960. It does not affect the surplus or deficit. Figures for earlier periods shown in the Treasury Bulletin were revised to the new reporting basis in the September 1960 issue. The interfund transactions deducted under this procedure do not include payments to the Treasury by wholly owned Government corporations for retirement of their capital stock and for disposition of earnings. These capital transfers have been excluded currently from budget receipts and budget expenditures beginning July 1,1948 , and figures for prior fiscal years back through 1932 were revised accordingly at that time.

The daily statement on the new basis was first issued for February 17, 1954. In the deposits and withdrawals as shown, no distinction is made as to the type of accounts (budget, trust, etc.). The deposits are on the basis of certificates of deposit cleared through the account of the Treasurer of the United States. Total withdrawals are on the basis of checks paid or cash disbursements made out of the Treasurer's account. Some of the withdrawal classifications shown are reported on the basis of mailed reports of checks issued and are adjusted by means of clearing accounts to the total of checks paid. Except for relatively minor amounts, noncash interfund and other intragovernmental transactions are excluded. The public debt figures in the dally statement also are on a "clearance" basis, with the exception of those issuance and retirement transactions reported on the basis of telegrams from Federal Reserve banks. However, noncash debt transactions are included.

The daily statement before February 17, 1954, covered not only transactions cleared through the Treasurer's account but also certain Government agency transactions which were handled through commercial bank accounts, and included noncash interfund and other intragovernmental transactions. It provided information similar to that in the present daily state-

ment with respect to the status of the Treasurer's account, and similar to that in the present end-of-month daily statement with respect to debt issuance, retirement, and amount outstanding. Receipts and expenditures were classified by type of account, and the budget results shown in the daily statement were used as the basis for reflecting the results under the President's budget program as enacted by the Congress.

Receipts were on the basis of deposits as they cleared the Treasurer's account. Expenditures cleared through the Treasurer's account were reported on two successive bases. Through 1946 they were on the basis of checks paid by the

Treasurer of the United States. Beginning with 1947, expenditures made through the facilities of the Treasury Department's Division of Disbursement were on the basis of checks issued, while certain others, principally those of the Department of Defense and its predecessor organizations, were on the basis of checks paid. Transactions handled through commercial bank accounts, consisting of market transactions in public debt and guaranteed securities, were as reported by the agencies. Interest on the public debt was included on a due and payable basis beginning with November 1949 and on a checks-paid basis prior to that time.

## Treasury Financing Operations

## November Financing

On October 27, 1966, the Treasury announced an offering for cash of $\$ 2.5$ billion, or thereabouts, of $5-5 / 8$ percent Treasury Notes of Series A-1968, dated November 15, 1966, due February 15, 1968, at par and \$1.6 billion, or thereabouts, of $5-3 / 8$ percent Treasury Notes of Series B-1971, dated November 15, 1966, due November 15, 1971, at par. The proceeds were to be used to pay off in cash the $3-3 / 8$ percent bonds, 4 percent notes, and $4-3 / 4$ percent certificates of indebtedness maturing November 15, 1966. Subscriptions totaled \$5,860 million for the $5-5 / 8$ percent notes of which $\$ 2,635$ milion were accepted and $\$ 14,029$ million for the $5-3 / 8$ percent notes of which $\$ 1,734$ million were accepted. The subscription books were open only on Tuesday, November 1.

Interest is payable on the $5-5 / 8$ percent notes on February 15 and August 15, 1967, and February 15, 1968, and on the $5-3 / 8$ percent notes semiannually on May 15 and November 15.

The notes are not subject to call for redemption prior to maturity. bearer notes, with interest coupons attached, and notes registered as to principal and interest were authorized to be issued in denominations of $\$ 1,000, \$ 5,000, \$ 10,000$, $\$ 100,000, \$ 1,000,000, \$ 100,000,000$, and $\$ 500,000,000$.

Subscriptions were received subject to allotment and were payable in cash or in the Treasury securities maturing November 15 , 1966, which were accepted at par, in payment or exchange, in whole or in part. Payment was required to be made or completed on or before November 15, 1966, the delivery date of the new notes. Payment by credit in Treasury tax and loan accounts was not permitted.

Coupons dated November 15, 1966, on the maturing securities in bearer form submitted in payment for the notes, were to be detached by holders and cashed when due. In the case of registered securities submitted in payment, the final interest due on November 15, 1966, was paid by issuance of interest checks in regular course to holders of record on October 14, 1966, the date the transfer books closed.

Commercial banks could submit subscriptions for account of their customers provided the names of the customers were set forth in such subscriptions. Others than commercial banks were not permitted to enter subscriptions except for their own account. Commercial banks' subscriptions for their own account, were restricted in each case to an amount not exceeding 50 percent of the combined capital (not including capital
notes or debentures), surplus and undivided profits of the subscribing bank.

Subscriptions were received without deposit from banking institutions for their own account, Federally-insured savings and losn associations, States, political subdivisions or instrumentalities thereof, public pension and retirement and other public funds, international organizations in which the United States holds membership, foreign central banks and foreign States, dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions with respect to Government securities and borrowings thereon, Government investment accounts, and the Federal Reserve banks. All other subscriptions were required to be accompanied by payment of 2 percent (in cash or in the maturing securities, which were accepted at par) of the amount of notes applied for, not subject to withdrawal until after allotment.

Subscribers requesting registered notes were required to furnish appropriate identifying numbers as required on tax returns and other documents submitted to the Internal Revenue Service.

All subscribers were required to agree not to purchase or to sell, or to make any agreements with respect to the purchase or sale or other disposition of any of the notes subscribed for at a specific rate or price, until after midnight November l, 1966.

Commercial banks in submitting subscriptions were required to certify that they had no beneficial interest in any of the subscriptions they entered for the account of their customers, and that their customers had no beneficial interest in the banks' subscriptions for their own account. They were required to certify also that they had not made unsecured loans, or loans collateralized in whole or in part by the securities subscribed for, to cover amounts required to be paid when subscriptions were entered.

As provided in the offering circulars, the Treasury allotted in full $\$ 943$ million of subscriptions for the $5-5 / 8$ percent notes and $\$ 75$ million of subscriptions for the $5-3 / 8$ percent notes from States, political subdivisions or instrumentalities thereof, public pension and retirement and other public funds, international organizations in which the United States holds membership, foreign central banks and foreign

States, Government investment accounts, and Federal Reserve banks, where a statement was submitted certifying that the amount of the subscription did not exceed the amount of Treasury securities maturing November 15, 1966, owned or contracted for purchase for value at 4:00 p.m. eastern daylight time, October 27, 1966. Such subscribers were also permitted to enter additional subscriptions subject to percentage allotments.

On subscriptions received subject to allotment, those up to $\$ 100,000$ for each issue were allotted in full. Other subscriptions were allotted 30 percent for the $5-5 / 8$ percent notes and 10 percent for the $5-3 / 8$ percent notes with a minimum allotment of $\$ 100,000$ per subscription for each issue. Subscriptions subject to allotment totaled $\$ 2,972$ million from commercial banks for their own account and $\$ 1,945$ million from all others for the 5-5/8 percent notes and $\$ 7,846$ million from commercial banks for their own account and $\$ 6,108$ million from all others for the $5-3 / 8$ percent notes.

## 9-Month and One-Year Bills

On October 19 tenders were invited for $\$ 900$ million, or thereabouts, of 365 -day Treasury bills, to be dated October 31, 1966, and for $\$ 500$ million, or thereabouts, of 273 -day Treasury bills, representing an additional amount of bills dated July 31, 1966, maturing July 31, 1967, to be issued October 31. These issues were to refund \$1 billion of bills maturing October 31 and to raise $\$ 400$ million cash. Tenders were opened on October 25.

Tenders received for the 273-day bills totaled \$1,076 million, of which $\$ 500$ million were accepted, including $\$ 15$ million of noncompetitive tenders. The average bank discount rate was 5.567 percent.

Tenders received for the 365-day bills totaled \$2,272 million, of which $\$ 905$ million were accepted, including $\$ 42$ million of noncompetitive tenders. The average bank discount rate was 5.544 percent.

## 13-Week and 26-Week Bills

Issues of regular weekly Treasury bills in October totaled \$9.2 billion, replacing an equal amount of maturing bills. There were four 91-day issues of $\$ 1.3$ billion each and four

182-day issues of $\$ 1.0$ billion each. Average rates for the new issues are shown in the following table.

## Treasury Bills - General

Treasury bills are sold on a bid basis. The face amount is payable without interest at maturity. They are issued in bearer form only, and in denominations of $\$ 1,000, \$ 5,000$, $\$ 10,000, \$ 50,000, \$ 100,000, \$ 500,000$, and $\$ 1,000,000$ (maturity value). Tenders are received at Federal Reserve banks and branches.

Banking institutions generally may submit tenders for account of customers. Tenders may be made without deposit by incorporated banks and trust companies and by responsible and recognized dealers in investment securities. Tenders from others must be accompanied by payment of 2 percent of the face amount of bills applied for, unless the tenders are accompanied by an express guaranty of payment by an incorporated bank or trust company.

Noncompetitive tenders (without stated price), usually for $\$ 200,000$ or less from any one bidder, are accepted in full at the average price of accepted competitive bids for an issue.

Payment for accepted tenders must be made or completed on the date of issue, in cash or other immediately available funds or in a like face amount of Treasury bills maturing on that date. Payment for 13 -week, 26 -week, 9 -month, and one-year bills may not be made by credit in Treasury tax and loan accounts.

## Foreign Series and Foreign Currency Series

In October the Treasury issued one 3-month certificate of indebtedness of the foreign series in the amount of \$30 million bearing interest at the rate of 5.45 percent. Redemptions during the month totaled $\$ 157$ million. At the end of October the outstanding foreign series securities totaled $\$ 747$ million.

Two certificates of indebtedness of the foreign currency series equivalent to $\$ 102$ million were issued in October. One certificate denominated in German marks equivalent to $\$ 50$
million, bears interest at 5.60 percent, is dated October 3, 1966, and matures October 3, 1967. The other certificate denominated in Swiss francs equivalent to $\$ 52$ million, bears interest at 5.54 percent, is dated October 7, 1966, and matures October 6, 1967. Redemptions of matured bonds amounted to the equivalent of $\$ 102$ million. Foreign currency securities outstanding at the end of October were equivalent to $\$ 859$ million and were denominated in Austrian schillings, Belgian francs, German marks, Swiss francs, and Italian lire.

Source: Actual figures are from the monthly statement of receipts and
expenditures of the Government (for explanation of reporting bases,
see page II); estimates, including effect of proposed legislation,
are from the 1967 Budget document released January 24, 1966.
Note: Agency shifts are shown in this table beginning with the period
of such shifts; figures prior to the shifts have not been adjusted. Therefore, some expenditures do not necessarily represent functions which are comparable over a period of time (for a more consistent basis, see Table 6).

Table 6. - Expenditures by Functions- (Continued)
(Fiscal years; in millions of dollars)

Source: Expenditures for 10,66 and 1067 are from reports received from disbursing, collecting, and administrative agencies of the Covernment, on the monthly statement reporting basis (see page II). They are classified in accordance with classifications used in the 1967 Budget document, Table 19, as nearly as can be done on an individual appropriation and fund item basis. Prior year figures are from the same source but have been adjusted below the appropriation level in some instances by the Bureau of the Budget for use in Table 19. Where current classifications differ on this account, they are footnoted. Revolving fund transactions are included net in the expenditures.
1/ For expenditures by major functions for fiscal 1967 through October 1966, and fiscal 1966 through October 1965, see "Note" below. Details by functions are not available for publication in this issue
but will appear in the December 1966 Bulletin.
2) Expenditures for 1966 and 2967 for function code 351 include those relating to specified research projects applicable to function code 355. These expenditures were made from "Special Activities, Commodity Credit Corporation."
3/ Expenditures for 1966 and 1967 for function code 551 include those relating to veterans' readjustment benefits applicable to function code 803. These expenditures were made from the "Participation Sales Fund, Federal National Mortgage Association."
4) Expenditures for 1966 and 1967 for function code 653 include those relating to medical and hospital care for the aged applicable to function code 651. These expenditures were made from "Grants to States for Public Assistance, Bureau of Family Services."
5/ Expenditures for 1966 and 1967 for function code 702 include those relating to assistance for elementary and secondary education applicable to function code 701 and other aids to education applicable to function code 704. These expenditures were made from "Defense Educational Activities, office of Education."
6/ Expenditures for 1966 and 1967 for function code 801 include those relating to veterans' nonservice-connected pensions applicable to
function code 802 and other veterans benefits and services applicable to function code 805. These expenditures were made from "Compensation and Pensions, Veterans' Administration."
Less than $\$ 500,000$.

## Footnotes to Table 12

1 State unemployment funds; used for benefit payments mainly. Beginning August 1961, withdrawals by States have been reduced by reimbursements to State accounts from Federal Extended Compensation Account.
2/ Established by the Employment Security Act of 1960, approved September 13, 1960 ( 42 U.S.C. 1101 (a)), into which are deposited tax receipts transferred in accordance with the act and from which are paid the administrative expenses of the employment security program and reimbursement for tax refunds. Heceipts consist of appropriated and unappropriated transfers of tax collections.

## 3/ Net of repayments.

4) Amounts represent excess of collections from Federal unemployment tax over expenditures for benefits and administrative expenses which excess was appropriated from the general fund to this account. (Includes amounts appropriated to the State Unemployment Accounts). Beginning 1961, such excess is transferred between book accounts within the Unemployment Trust Fund.
5) Established by the act approved March 24, 1961 (42 U.S.C. 1105(a)), which provides for a temporary program of extended unemployment compensation payments.
6/ For payment of benefits and refunds ( 45 U.S.C. 360). Figures exclude interim advance of $\$ 15$ million from the Treasury and subsequent repayment, both in 1940.
6) Contributions under the Railroad Unemployment Insurance Act of 1938 , as amended ( 45 U.S.C. 360 (a)), in excess of the amount specified for administrative expenses. Through 1957, also includes transfers from the administration fund of excess amounts over the specified balance (45 U.S.C. 361 (d)).

8/ Temporary advances are made when the balance in the Railroad Unemploy. ment Insurance Account is insufficient to meet payments of benefits and refunds due or to become due. Whenever the balance is sufficient to pay such benefits and refunds, repayments are made, plus interest at $3 \%$ per annum, pursuant to an act approved May 19, 1959 ( 45 U.S.C. 360 (d)).
2/ Consists of a specified proportion of contributions deposited in the fund to be available for administrative expenses. The Railroad Unemployment Insurance Administration Fund was established in the Unemployment Trust Fund pursuant to the amending act of September 6, 1958; before that the administration fund was a separate trust fund (45 U.S.C. 361).
10/ Total includes $\$ 107.2$ million transferred from State accounts to the Railroad Unemployment Insurance Account in connection with its establishment ( 45 U.S.C. 363).
11. Beginning fiscal 1961 refunds of taxes (principal only) are reported as deductions from receipts. Interest paid on refunds of taxes is included under expenditures. See footnote 13.
12/ Includes adjustments to monthly statement basis. Includes interest on refunds of taxes. Includes interest.
Includes an adjustment of $\$ 7.2$ million pursuant to the act of September 6, 1958 (45 U.S.C. 361 (a)).
16/ Includes unappropriated receipts beginning September 1960.

* Less than $\$ 50,000$.

Table 14. - Investments of Specified Trust Accounts in Public Debt and Agency Securities by Issues, as of September 30, 1966

Consolidated cash transactions reported in the Treasury Bulletin are on a basis consistent with Federal receipts from and payments to the public as derived in the Budget of the United States (in the Budget for 1967 in Special Analysis A). Shown also is the amount of net cash borrowing from, or repayment of borrowing to, the public. Revisions of the figures for earlier years have been made where necessary to make them as nearly comparable with current Budget classifications as available data will permit. For this reason certain of the figures differ somewhat from those published in previous Budget documents as well as in the Bulletin.

This series of cash transactions is designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the account of the Treasurer of the United States. Receipts and payments include transactions both in administrative budget accounts and in trust and deposit fund accounts. Major intragovernmental transactions which are reported as both expenditures and receipts are excluded from both. Noncash items representing the obligations of the Government to make payments in the future also are eliminated
from expenditures currently, but are added later when actual payments are made. These items consist of certain interest accrued on the public debt and expenditures involving the issuance of a few special public debt securities. Checks outstanding, deposits in transit, and other clearing accounts are excluded from payments. Receipts from the exercise of monetary authority are excluded as not representing cash received from the public. Federal cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencies and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direct cash borrowing from the public. The net effect of all these transactions with the public is reflected in changes in the balance in the Treasurer's account and in cash held outside the Treasury.

Seasonally adjusted summary data are shown in table 3. The adjusted data have been derived by applying a seasonal adjustment formula developed by the Bureau of Census, Department of Commerce.

## ACCOUNT OF THE TREASURER OF THE UNITED STATES

## Source and Availability of the Balance in the Treasurer's Account

The account of the Treasurer of the United States reflects not only budget receipts and expenditures but also trust, deposit fund, and public debt transactions.

The working cash of the Treasury is held mainly in Treasurer's accounts with Federal Reserve banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banks throughout the country.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of money from a customer's account to the tax and loan account in
the same bank. On occasions, to the extent authorized by the Treasury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the account of their customers.

The tax and loan account system permits the Treasury to leave funds in banks and in the communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on bank reserves and the economy.

A detailed description of the Treasury's depositary system may be found in the Annual Report of the Secretary of the Treasury for 1955, pages 275-284.

1/ Includes reserves and other deposits of the Board of Trustees, Postal Savings System, and uncollected items, exchanges, etc., through December 1962. Effective January 1963 balances of the Postal Savings System funds were transferred to deposit fund accounts and became demand obligations of the Treasury. Balances of these funds, therefore, are no longer liabilities within the general account of the Treasurer. Uncollected items, exchanges, etc., also previously shown as liabilities were combined with "Unclassified collections, etc." shown under assets. Treasurer's checks outstanding are included
through June 1958, after which they are included in the balance in the Treasurer's account. (See footnote 2).
2) Through June 1958, the balance of the Treasurer was reduced when Treasurer's checks were issued and the amount of the checks was carried as a liability until paid. Effective July 1958, the balance is not reduced until the checks are paid, a procedure also applying to checks drawn on the Treasurer by Government disbursing officers and agencies.
3' Amounts shown, beginning January 1963, are net of uncollected items, exchanges, etc. Previously these items were included under liabilities.

1) Special depositaries are permitted to make payment in the form of a deposit credit for the purchase price of U.S. Government securities purchased by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues.
2/ Retirement plan bonds first offered for sale as of January l, 1963.
Taxes eligible for credit consist of those deposited by taxpayers in the depositary banks, as follows: Withheld income tax beginning

March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; and a number of excise taxes beginning July 1953.
4) Under a special procedure begun in Marcb 1951, authorization may be given for income tax payments, or a portion of them, made by checks of $\$ 10,000$ or more drawn on a special depositary bank, to be credited to the tax and loan account in that bank. This procedure is followed during some of the periods of heavy tax payments.

* Less then $\$ 500,000$.

Nata: The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing issue. outstanding at the end of each month or year should remaln outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outstanding on that data (the amount actually borrowed In the case of securities sold at a premium or discount, beginning with May 1960). The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. The average annual interest rate is computed bv dividing the computed annual
corresponding principal amount. Beginning with data for December 31, 1958, the computation is based on the rate of effective yield for issues sold at premium or discount. Prior to that date it was based on the coupon rate for all issues.

1) Guaranteed securities included are those held outside the Treasury.

2 Total includes "Other bonds" through 1960; see Table 3.
3 Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate.
4/ On United States savings bonds the rate to maturity is applied against the amount outstanding.

## PUBLIC DEBT OPERATIONS

## Footnotes to Table 7

Source: Daily Treasury statement; Bureau of the Public Debt.
1/ Original call and maturity dates are used
2 All by investors other than Federal Reserve banks
3 Rolled over into a one-year bill (see Table 4)
4 Holders of the maturing certificates were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the $3-1 / 4$ 拣 notes offered in the amount of around $\$ 6.9$ billion. For detail of offering, see Table 4
5) Excess of maturing $4-7 / 8 \%$ certificates over allotments of new securities on subscriptions from holders of those certificates (see Table 4, footnotes 6 and 7).
6/ Advance refunding offering. Pursuant to the provisions of section 1037 (a) of the Internal Revenue Code of 1954 as added by Public Law 86-346, approved September 22, 1959, the Secretary of the Treasury has declared that no gain or loss shall be recognized for Federal income tax purposes upon the exchange of the eligible outstanding securities solely for the new securities. For tax purposes, there fore, the investor will carry the new securities on his books at the same amount as he had been carrying the eligible securities exchanged. Gain or loss, if any, upon the securities surrendered in exchange will be taken into account upon the disposition or redemption of the new securities. See also Table 5 .

Note: In these tebles seles of Series $A-F$ and $J$ bouds are included at issue price, and redemptions and amounts outstanding at current redemption value. Serles $G, H$, and $K$ are included at face value throughout. Matured bonds which hsve been redeemed are included in rederptions. Matured $J$ and $K$ boads outstanding are included in the interest-bearing debt until all bonds of the ennuel series have matured, and are then transferred to matured debt on which interest hes caesed.

1) Seles and redemption figures include exchanges of minor amounts of (1) matured Series E bondo for Series $G$ and K bonds from May 1951 through April 1957 and (2) Series $F$ and $J$ bonde for Series $K$ bondo beginning January 1960; however, they exclude exchanges of Series E bonds for Series $H$ bonds, which are reported in Table 3.
2 Details by series on a cumlative basis and by periode for Series A-D combined will be found in the February 1952 and previous issues of tha Treasury Bulletin.
3/ Because there is a normal lag in classifying redemptions, the distribution of redemptions between sales price and accrued discount hes been estimated. Beginning with the Treasury Bulletin of March 1961 the
method of distributing redemptions between sales price and accrued discount has been changed to reflect the dietribution shown in fiasl reports of clessified rederptione. All periods shown heve been revised on this besis. and $K$ and April 30, 1957, represent adjustments.
5 Includes exchanges of Series 1941 F and $G$ savings bonds for 3-1/4\% marketeble bonds of 1978-83.
6/ Includes exchanges of Series 1948 F and $G$ bonds for $4-3 / 4 \%$ marketable notes of 1964.
7 Includes exchanges of Series 1949 F and G bonds for $4 \%$ marketeble bonde of 1969.
8/ Includes exchanges of Series 1950 F and $G$ bonds for $3-7 / 8$, marketable bonde of 1968.
2/ Includes exchanges of Series 1951 and 1952 F and G bonds for $3-7 / 8 \%$ marketable bonds of 1971 and 48 marketable bonds of 1980.
10/ Represents changes in the amounts of redemptions not yet classified

[^9]Table 4. - Treasury Bonds
(Price decimals are 32nds)

Table 1. - Average Yields of Treasury and Corporate Bonds by Periods

Source: Beginning April 1953, Treasury bond yields are reported to the Treasury by tha Federal Reserve Bank of New York, based on closing bid quotations in the over-the-counter market. Yields for prior periods were computed on the basis of mean of closing bid and ask quotations. Moody's Investor Service is the source for the average of Aas corporate bonds.

1) Series includes bonds on which the interest income is subject to
normal tax and surtax which are neither due nor callable before a
given number of years as follows: April 1953 to date, 20 years;
April 1952 - March 1953, 12 years; October 1941 - March 1952, 15 years.
For bonds currently in the series, see Table 4 under "Market Quotations on Treasury Securities" in this issue of the Bulletin.
2/ One or more new long-term bonds added to the average (see footnote 1).
3 An existing bond dropped from the average (sea footnote l).
2) Market closed.

Table 1. - U.S. Gold Stock, and Holdings of Convertible Foreign Currencies by U.S. Monetary Authorities

Note: The United States also has a gold tranche position in the International Monetary Fund, amounting to $\$ 355.6$ million as of October 31, 1966. In accordance with Fund policies the United States has the right, draw foreign currencies equivalent to this amount from the Fund virtually automatically if needed. Under appropriate circumstances, the United States could draw additional amounts equal to the United States quota of $\$ 5,160$ million.
1/ Includes gold sold to the United States by the International Monetary Fund with the right of repurchase, the proceeds of which are invested by the Fund in U.S. Government securities; as of October 31, 1966, this amounted to $\$ 800$ million. Of this amount, the United States purchased $\$ 200$ million in 1956, \$300 million in 1959, and $\$ 300$ million in 1960.

Beginning September 1965 includes gold deposited by the International Monetary Fund (\$202.7 million as of August 31, 1966, \$211.5 million as of September 30, 1966, and $\$ 211.5$ million as of October 31, 1966) for the purpose of mitigating the impact of gold payments to the Fund for quota increases by countries which purchased such gold from the United States. The United States has a corresponding gold liability to the Fund.
2) Includes gold in Exchange Stabilization Fund, which is not included in Treasury gold figures shown in daily Treasury statement. (Data as of December 31, 1965 and earlier dates for Treasury gold stock taken from Circulation Statement of United States Money.)
3/ Includes holdings of Treasury and Federal Reserve System. Preliminary.

Table 2. - U. S. Treasury Nonmarketable Notes and Bonds Issued to Official Institutions of Foreign Countries

Table 3. - U.S. Net Monetary Gold Transactions with Foreign Countries and International and Regional Organizations

1 Reflects the United States payment of the $\$ 259$ million increase in its gold subscription to the International Monetary Fund less gold deposited by the International Monetary Fund.
2/ Represents the United States payment of the $\$ 259$ million increase in

3/ Represents gold deposited by the International Monetary Fund; see Table 1 , footnote 1 .

* Less than $\$ 500,000$.

## Background

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Information on the principal types of data and the principal countries is published monthly in the "Treasury Bulletin." Reports by banks, bankers, securities brokers and dealers, and nonbanking business concerns in the United States are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury. These statistics are consolidated by the Treasury and published as promptly as possible.

The reporting forms and instructions used in the collection of the statistics have been revised a number of times. The most recent general revision became effective with reports covering data as of May 31, 1963.1 A detailed description of the content of the statistics, including the changes instituted in 1963, appeared in the July 1963 issue of the "Treasury Bulletin," pages 79-81. As a result of changes in presentation introduced in that issue, not all breakdowns previously published will be exactly comparable to those now presented. Basic definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including United States citizens domiciled abroad and the foreign subsidiaries and offices of United States banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled. Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the classification "International," "European regional," "Latin American regional," or "Asian regional," as appropriate, except for the Bank for International Settlements and the European Fund, which are included in the classification "Other Western Europe."
"Short-term" refers to obligations payable on demand or having an original maturity of one year or less, without deduction of any offsets. "Long-term" refers to obligations having an original maturity of more than one year, and includes securities having no contractual maturity. Exclusions

The data published herein do not cover all types of capital movements between the United States and foreign countries. The data reported to and published by the Treasury Department exclude entirely the intercompany capital transactions of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies; such transactions are reported by business firms to the Department of Commerce. Data on the capitel transactions of the United States Government and on shipments and receipts of United States currency are alsc excluded from the Treasury reports. Certain capital transactions not effected through reporting institutions, such as securities transactions carried out entirely abroad, are not recorded in the Treasury reports. Consolidated data on all types of capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

The liabilities data exclude nonnegotiable, noninterestbearing special notes of the United States held by the InterAmerican Development Bank and the International Development Association.

The data on securities transactions and on foreign holdings of U.S. Govarment bonds and notes exclude nonmarketable U.S. Treasury notes, foreign series, and non marketable U.S. Treasury bonds, foreign currency series (see "International Financial Statistics" section, Table 2).

## Presentation of statistics

Data collected monthly on the Treasury Foreign Exchange Forms are published in three sections. Section I provides a summary of the principal data by period; Section II presents data by country and by period; and Section III shows detailed breakdown of the latest available preliminary data.

Section IV presents supplementary data which are rejorted less frequently than monthly but which are published monthly.

Table 2. - Short-Term Banking Claims on Foreigners 1/

Excludes convertible foreign currencies held by U.S. monetary author ities.
The second column for 1964 differs from data in preceding column because of the exclusion as of December 31, 1964 of $\$ 58.1$ million of short-term U.S. Government claims previously included; and because of the addition of $\$ 545.9$ million of short-term claims arising from the inclusion of claims previously held but first reported as of December 31, 1964, and from revisions of preliminary figures.

The second column for 1965 differs from data in preceding column
because of the addition of short-term claims held in custody for
domestic customers but reported by banks for the first time beginning
December 31, 2965, and short-term claims reported by banks reporting
for the first time
Less than $\$ 50,000$.

Table 9. - Estimated Holdings of U. S. Government Bonds and Notes

Note: Data represent estimated official and privste holdings of U.S. Government securities with an original maturity of more than one yesr. (For exclusions see headnote on page 93.) Annual and month7y data are shown in this section beginning with the February 1964 issue of the Bulletin. For quarterly data see Section IV, Table 2, through the June 1964 issue; and "International Financial Statistics," Table 4, beginning with the September 1964 issue. Data as of December 31, 1962-63 are on the basis of a November 30, 1960 survey and regular monthly reports of securities transactions (see Table 4). Data for December 31, 1963, also are shown on the basis
of a July 31, 1963, survey and the monthly transactions reports. For statistical convenience, the new series is introduced as of December 31,1963 , rather than as of the survey date.

The variations between the two series are believed to result from omissions from, or errors in reporting, shifts in ownership not involving purchases or sales through U.S. banks or brokers, and physical transfers of securities to and from abroad. It is not possible to reconcile the two series or to revise figures for earlier dates. Iess than \$530,030.

Foreign currencies reported herein in United States dollar equivalents were acquired without purchase with dollars, for the most part in connection with forelgn assistance and agricultural trade development programs authorized by various provisions of law. The currencies are held in the custody of the Treasury Department until such time as they are oither sold for dollars to Government agencies or transferred to Government agencies for expenditure without charge to appropriations, as specifically authorized by law.

Prior to July 1, 1953, foreign currencies acquired by Government agencles without payment of dollars generally were available to the collecting agencies to defray operatIng expenses and were not subject to the regular appropriation processes.

The act of July 15, 1952, Sec. 1415 (66 stat. 662), provided that after June 30 , 1953, United States agencies could no longer expend forelgn currencies belonging to the United States except as provided annually in appropriation acts. Subsequent legislation required executive departments and agencies, with certain exceptions, to reimburse the Treasury in dollars for the foreign currencies used. Executive Orders No. 10488 dated September 23, 1953, and No. 10900 dated January 5, 1961, ss amended, provided for the issuance of regulations by the Saoretary of the Treas ury governing the purchase, custody, transfer, or sale of foreign exchange by the United gtates.

Accordingly, Treasury Department Circular No. 930 was 1esued on October 19, 1953, effeotive December 1, 1953. These regulations provided for the transfer of department and agency forsign currency balances as of November 30,
1953. into Treasury custody, and the flow of future oollections through Treasury accounts; and established requirements with respect to withdrawals from Treasury accounts; limitations on purchases and amounts of holdings; the use of foreign depositaries; and accounting for the currencies. Department Circular No. 930 as revised October 20, 1961, added certain requirements governing foreign currency reporting and accounting.

Figures are stated in dollar equivalents, computed for reporting purposes, to provide a common denominator for the currencies of the many foreign countries involved. It should not be assumed that dollars, in amounts equal to the balances, are actually avallable for the general use of the United States Government, aince most of the currencies are inconvertible and reatricted as to uses by the terms of agreements between the United States and the foreign governments.

The tables exclude the counterpart funds owned by and held in accounts of the foreign govermments. The use of such funds is aubject to approvai of the United States, and transactions therein are included in reports of the Agency for International Development. The tables also exclude the United States purohases of foreign currencies which are under dollar accountability and reported as dollar transactions.

Detalled data, by account, agency, program, forelgn country, units of currency, and related dollar equivalente, are published annually in the Combined Statement of Reosipts, Expenditures and Balenoes, beginning with fisoal 1958.
