## Reporting Bases

Data on receipts, expenditures, and debt which appear in the "Treasury Bulletin" are based largely on two Treasury financial reports, the "Daily Statement of the United States Treasury" and the "Monthly Statement of Receipts and Expenditures of the United States Government." Where these statements are given as sources for individual tables, they are cited by name only. Their respective reporting bases are described below. For other data in the Bulletin, information on sources or reporting bases is given in connection with the tables themselves.

The monthly statement of receipts and expenditures was first published for February 1954, and replaced the daily statement as the primary source of information on budget results and other receipt and expenditure data classified by type of account. At the same time, the daily statement was changed to a statement of cash deposits and withdrawals affecting the account of the Treasurer of the United States. Both publications have provided comparative figures on their respective bases from the beginning of the fiscal year 1953. The announcement of February 17, 1954, with respect to these reporting changes may be found in the April 1954 issue of the Bulletin.

The monthly statement shows all receipts and expenditures of the Government, including those made from cash accounts held outside the United States Treasury. The information is compiled from reports by the Treasurer of the United States and by all other collecting and disbursing agencies, including those agencies which maintain checking accounts in commercial banks. These reports cover transactions recorded in the accounts of the agencies during the reporting period. The net of the transactions as compiled from these reports is reconciled in the monthly statement to changes in the balance in the Treasurer's account and in cash held outside the Treasurer's account and changes in the public debt outstanding.

Receipts of taxes and customs duties are reported on a collections basis. Other receipts are reported partially on a collections basis and partially on a deposits basis. Expenditures, except interest on the public debt, are reported on the basis of checks issued or cash payments made by disbursing officers. Transactions of an interfund or intragovernmental nature are included on the same basis even though the actual issuance of checks may not be involved. Interest on the public debt is included on an accrual basis beginning with figures for June 1955 and the fiscal year 1955. Prior to that, it was included on a due and payable basis. The same reporting basis as that in the monthly statement provides the fiscal year figures for the

Treasury's "Combined Statement of Receipts, Expenditures and Balances of the United States Government" and for actual receipts and expenditures in the "Budget of the United States Government. "

Beginning with the final statement for the fiscal year 1960, the morthly statement reports totals for net budget receipts and budget expenditures after deduction of certain interfund transactions which are included in the detail of both budget receipts and budget expenditures. The transactions deducted consist of interest payments and minor amounts of certain other payments made by Government agencies to the Treasury. This reporting change was made in accordance with the plan stated in the President's Budget Message of January 18, 1960. It does not affect the surplus or deficit. Figures for earlier periods shown in the Treasury Bulletin were revised to the new reporting basis in the September 1960 issue. The interfund transactions deducted under this procedure do not include payments to the Treasury by wholly owned Government corporations for retirement of their capital stock and for disposition of earnings. These capital transfers have been excluded currently from budget receipts and budget expenditures beginning July 1,1948 , and figures for prior fiscal years back through 1932 were revised accordingly at that time.

The daily statement on the new basis was first issued for February 17, 1954. In the deposits and withdrawals as shown, no distinction is made as to the type of accounts (budget, trust, etc.). The deposits are on the basis of certificates of deposit cleared through the account of the Treasurer of the United States. Total withdrawals are on the basis of checks paid or cash disbursements made out of the Treasurer's account. Some of the withdrawal classifications shown are reported on the basis of mailed reports of checks issued and are adjusted by means of clearing accounts to the total of checks paid. Except for relatively minor amounts, noncash interfund and other intragovernmental transactions are excluded. The public debt figures in the daily statement also are on a "clearance" basis, with the exception of those issuance and retirement transactions reported on the basis of telegrams from Federal Reserve banks. However, noncash debt transactions are included.

The daily statement before February 17, 1954, covered not only transactions cleared through the Treasurer's account but also certain Government agency transactions which were handled through commercial bank accounts, and included noncash interfund and other intragovernmental transactions. It provided information similar to that in the present daily state-

lent with respect to the status of the Treasurer's account, and similar to that in the present end-of-month daily statement with respect to debt issuance, retirement, and amount outstanding. Receipts and expenditures were classified by type of account, and the budget results shown in the daily statement were used as the basis for reflecting the results under the President's budget program as enacted by the Congress.

Receipts were on the basis of deposits as they cleared the Treasurer's account. Expenditures cleared through the Treasurer's account were reported on two successive bases. Through 1946 they were on the basis of checks paid by the

Treasurer of the United States. Beginning with 1947, expenditures made through the facilities of the Treasury Department's Division of Disbursement were on the basis of checks issued, while certain others, principally those of the Department of Defense and its predecessor organizations, were on the basis of checks paid. Transactions handled through commercial bank accounts, consisting of market transactions in public debt and guaranteed securities, were as reported by the agencies. Interest on the public debt was included on a due and payable basis beginning with November 1949 and on a checks-paid basis prior to that time.

[^0]Treasury Bills - General
Treasury bills are sold on a bid basis. The face amount is payable without interest at maturity. They are issued in bearer form only, and in denominations of $\$ 1,000, \$ 5,000$, $\$ 10,000, \$ 50,000, \$ 100,000, \$ 500,000$, and $\$ 1,000,000$ (maturity value). Tenders are received at Federal Reserve banks and branches.

Banking institutions generally may submit tenders for account of customers. Tenders may be made without deposit by incorporated banks and trust companies and by responsible and recognized dealers in investment. securities. Tenders from others must be accompanied by payment of 2 percent of the face amount of bills applied for, unless the tenders are accompanied by an express guaranty of payment by an incorporated bank or trust company.

Noncompetitive tenders (without stated price), usually for $\$ 200,000$ or less from any one bidder, are accepted in full at the average price of accepted competitive bids for an issue.

Payment for accepted tenders must be made or completed on the date of issue, in cash or other immediately available funds or in a like face amount of Treasury bills maturing on that date. Payment for 13-week, 26-week, 9-month, and one-year bills may not be made by credit in Treasury tax and loan accounts.

## Foreign Series and Foreign Currency Series

No foreign series securities were issued in March. Redemptions for the month totaled \$l million -- all for notes. At the end of March, foreign series securities outstanding totaled $\$<02 \mathrm{mil}$ ion.

N foreign currency series securities were issued or redeemed in March. At the end of March foreign currency series securities outstanding totaled an equivalent of \$ؤn nillion, and were donominated in Austrian schillings, Belgian francs, German marks, Italian lire, and Swiss franes.

[^3]Consolidated cash transactions reported in the Treasury Bulletin are on a basis consistent with Federal receipts from and payments to the public as derived in the Budget of the United States (in the Budget for 1968 in Special Analysis A). Shown also is the amount of net cash borrowing from, or repayment of borrowing to, the public. Revisions of the figures for earlier years have been made where necessary to make them as nearly comparable with current Budget classifications as available data will permit. For this reason certain of the figures differ somewhat from those published in previous Budget documents as well as in the Bulletin.

This series of cash transactions is designed to provide information on the flow of money between the public and the Federal Government as a whole, and therefore includes transactions not cleared through the account of the Treasurer of the United States. Receipts and payments include transactions both in administrative budget accounts and in trust and deposit fund accounts. Major intragovernmental transactions which are reported as both expenditures and receipts are excluded from both. Noncash items representing the obligations of the Government to make payments in the future also are eliminated
from expenditures currently, but are added later when actual payments are made. These items consist of certain interest accrued on the public debt and expenditures involving the issuance of a few special public debt securities. Checks outstanding, deposits in transit, and other clearing accounts are excluded from payments. Receipts from the exercise of monetary authority are excluded as not representing cash received from the public. Federal cash borrowing from the public includes net borrowing by the Treasury through public debt transactions and also net borrowing by Government agencies and Government-sponsored enterprises through sales of their own securities. It excludes changes in the public debt which do not represent direct cash borrowing from the public. The net effect of all these transactions with the public is reflected in changes in the balance in the Treasurer's account and in cash held outside the Treasury.

Seasonally adjusted summary data are shown in table 3. The adjusted data have been derived by applying a seasonal adjustment formula developed by the Bureau of Census, Department of Commerce.

## Source and Availability of the Balance in the Treasurer's Account

The account of the Treasurer of the United States reflects not only budget receipts and expenditures but also trust, deposit fund, and public debt transactions.

The working cash of the Treasury is held mainly in Treasurer's accounts with Federal Reserve banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banks throughout the country.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of money from a customer's account to the tax and loan account in
the same bank. On occasions, to the extent authorized by the Treasury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the account of their customers.

The tax and loan account system permits the Treasury to leave funds in banks and in the communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on bank reserves and the economy.

A detailed description of the Treasury's depositary system may be found in the Annual Report of the Secretary of the Treasury for 1955, pages 275-284.

Source: Daily Treasury statement.
1/ Includes raserves and other deposits of the Board of Trustees, Postal Savings System, and uncollected items, exchanges, etc., through December 1962. Effective January 1963 balances of the Postal Savings System funds were transferred to deposit fund accounts and became demand obligations of the Treasury. Balances of these funds, therefore, are no longer liabilities within the general account of the Treasurar. Uncollected items, exchanges, etc., also previously shown as liabilities were combined with "Unclassified collections, etc." shown under assets. Treasurer's checks outstanding are includad
through June 1958, after which they are included in the balance in the Treasurer's account. (See footnote 2).
2/ Through June 1958, the balance of the Treasurer was reduced when Treasurer's checks were issued and the amount of the checks was carried as a liability until paid. Effective July 1958, the balance is not reduced until the checks are paid, a procedure also applying to chacks drawn on the Treasurer by Government disbursing officars and agencies.
3/ Amounts shown, beginning January 1963, are net of uncollected items, exchanges, etc. Previously these items were included under liabilities.

1) Special depositaries are permitted to make payment in the form of a deposit credit for the purchase price of U.S. Government securities purchased by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues.
2/ Retirement plan bonds first offered for sale as of January 1, 1963. Taxes eligible for credit consist of those deposited by taxpayers in the depositary banks, as follows: Withheld income tax beginning

March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; and a number of excise taxes beginning July 1953.
4) Under a special procedure begun in March 1951, authorization may be given for income tax payments, or a portion of them, made by checks of $\$ 10,000$ or more drawn on a special depositary bank, to be credited to the tax and loan account in that bank. This procedure is followed during some of the periods of heavy tax payments.

* Less than $\$ 500,000$.

## Footnotes to Table 2

Source: On the besis of the daily Treasury statement.
Note: The computed annusl interest charge represents the amount of interest that would be peid if each interest-bearing issue outstanding et the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriste annual interest rete to the amount outstanding on that date (the amount actually borrowed in the case of securities sold at a premium or discount, beginning with May 1960). The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. The average annusl interest rete is computed by dividing the computed annual
interest charge for the total, or for any group of issues, by the corresponding principal amount. Beginning with data for December 31, 1958, the computation ls based on the rate of effective yield for issues sold at premium or discount. Prior to that date it was based on the coupon rate for all issues.
1/ Guarenteed securities included are those held outside the Tressury.
2. Total includes "Other bonds" through 1960; see Table 3.

3/ Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate.
4 On United States savings bonds the rate to maturity is applied against the amount outstanding.

1/ Original call and maturity dates are used.
All by investors other than Federal Reserve banks.
Advance refunding offering. Pursuant to the provisions of section 1037 (a) of the Internal Revenue Code of 1954 as added by Public Law 86-346, approved September 22, 1959, the Secretary of the Treasury has declared that no gain or loss shall be recognized for Federal income tax purposes upon the exchange of the eligible outstanding securities solely for the new securities. For tax purposes, there-
fore, the investor will carry the new securities on his books at the same amount as he had been carrying the eligible securities exchanged.
Gain or loss, if any, upon the securities surrendered in exchange will be taken into account upon the disposition or redemption of the new securities. See also Table 5.
4. Reopening of an earlier issue.
5) Holders of the maturing notes were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the 3-7/8\% notes offered in the amount of about $\$ 4.0$ billion. For detail of offering, see Table 4.
6) Excess of maturing $5 \%$ notes and $3-3 / 4 \%$ notes over allotments of new securities on subscriptions from holders of those notes (see Table 4, footnotes 9 and 10).
7/ Rolled over into a one-year bill (see Table 4).
8/ Holders of the maturing notes were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the $4 \%$ notes offered in the amount of about $\$ 91 / 4$ billion. For detail of offering, see Table 4.
2/ Excess of maturing $4-7 / 8 \%$ notes and 3-1/4\% notes over allotments of new securities on subscriptions from holders of those notes (see Table 4, footnotes 14 and 15).
0 Holders of the maturing bonds were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the $4 \%$ notes offered in the amount of about $\$ 2,170$ million. For detail of offering, see Table 4.

1) Excess of maturing $2-5 / 8 \%$ bonds over allotments of the new security on subscription from holders of those bonds (see Table 4, footnotes 18 and 19).
2/ Tax anticipation issue; for detail of offerings beginning 1965, see Table 4 ; for amounts redeemed for taxes and for cash see "Note" below.

Table 4. - Redemptions of Matured and Unmatured Savings Bonds

Source: Daily Treasury statement; Office of Debt Analysis in the Office of the Secratary.
Note: In these tables salas of Series $A-F$ and $J$ bonds are included at issue price, and redemptions and amounts outstanding at current redemption value. Series $G, H$, and $K$ are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Maturad $J$ and $K$ bonds outstanding ara included in tha intarest-bearing debt until all bonds of the annual saries have matured, and are then transferrad to matured debt on which interest has ceasad.
1 Sales and rademption figures include exchanges of minor amounts of (1) maturad Series E bonds for Series G and K bonds from May 1951 through April 1957 and (2) Saries $F$ and J bonds for Series $H$ bonds beginning January 1960; however, they exclude exchanges of Serias E bonds for Series H bonds, which are raported in Table 3
2) Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the Treasury Bulletin.
3 Because there is a normal lag in clasaifying redemptions, the distribution of redamptions betwaen salas price and accrued discount has baen estimated. Beginning with the Treasury Bulletin of March 1961 the
method of distributing redemptions between sales price and accruad discount has bean changed to reflect the distribution shown in final reports of classified redemptions. All periods shown have been revised on this basis.
4) Series $F$ and $G$ sales were discontinued April 30, 1952, and Series J and K sales were discontinued April 30, 1957. Sales figuras after April 30, 1957, represent adjustments.

6/ Includes exchanges of Series 1948 F and $G$ bonds for $4-3 / 4 \%$ markatable notas of 1964.
7) Includes axchangas of Series 1949 F and G bonds for 4 marketabla bonds of 1969.
8/ Includes exchanges of Series 1950 F and G bonds for $3-7 / 8 \%$ marketable bonds of 1968.
2/ Includes exchangas of Saries 1951 and 1952 F and G bonds for 3-7/8\% marketable bonds of 1971 and $4 \%$ marketable bonds of 1980.
10. Represents changes in the amounts of rademptions not yet classified betwean matured and unmatured issuas. Lass than $\$ 500,000$.

Table 3. - Estimated Ownership of Federal Securities

[^10][^11]The monthly Treasury Survey of Ownership covers securities issued by the United States Government and by Federal agencies. The banks and insurance companies included in the Survey currently account for about 90 percent of all such securities held by these institutions. The similar proportion for corporations and for savings and loan associations is 50 percent, and for State and local governments, 70 percent. Data were first published for banks and insurance companies in the May 1941 Treasury Bulletin, for corporations and

Savings and loan associations in the September 1960 Bulletin, and for State and local governments in the February 1962 Bulletin.

Holdings by commercial banks distributed according to Federal Reserve member bank classes and nonmember banks are published for June 30 and December 31. Holdings by corporate pension trust funds are published quarterly, first appearing in the March 1954 Bulletin.

## INTERNATIONAL FINANCIAL STATISTICS

## Table 1. - U. S. Gold Stock, and Holdings of Convertible Foreign Currencies by U. S. Monetary Authorities

(In millions of dollars)

ote: The United States also has a gold tranche position in the International Monetary Fund, amounting to $\$ 356.6$ million as of March 31, 1967. In accordance with Fund policies the United States has the right to draw foreign currencies equivalent to this amount from the Fund virtually automatically if needed. Under appropriate circumstances, the United States could draw additional amounts equal to the United States quota of $\$ 5,160$ million.
Includes gold sold to the United States by the International Monetary Fund with the right of repurchase, the proceeds of which are invested by the Fund in U.S. Government securities; as of March 31, 1967, this amounted to $\$ 800$ million. Of this amount, the United States purchased $\$ 200$ million in $1956, \$ 300$ million in 1959, and $\$ 300$ million in 1960 .

Beginning September 1965 includes gold deposited by the International Monetary Fund, ( $\$ 212.1$ million as of January 31, $\$ 213.4$ million as of February 28, and $\$ 227.7$ million as of March 31, 1967) for the purpose of mitigating the impact of gold payments to the Fund for quota increases by countries which purchased such gold from the United States. The United States has a corresponding gold liability to the Fund.
2/ Includes gold in Exchange Stabilization Fund, which is not included in Treasury gold figures shown in daily Treasury statement. (Data as of December 31, 1965 and earlier dates for Treasury gold stock taken from Circulation Statement of United States Money.)
3/ Includes holdings of Treasury and Federal Reserve System.

## lackground

Data relating to capital movements between the United itates and foreign countries have been collected since 1935, rursuant to Executive Order 6560 of January 15, 1934, Execuive Order 10033 of February 8, 1949, and Treasury regulations romulgated thereunder. Information on the principal types of lata and the principal countries is published monthly in the Treasury Bulletin." Reports by banks, bankers, securities rokers and dealers, and nonbanking business concerns in the Inited States are made initially to the Federal Reserve Banks, hich forward consolidated figures to the Treasury. These itatistics are consolidated by the Treasury and published as romptly as possible.

The reporting forms and instructions used in the collecion of the statistics have been revised a number of times. he most recent general revision became effective with reports :overing data as of May 31, 1963.1/ A detailed description f the content of the statistics, including the changes instiuted in 1963, appeared in the July 1963 issue of the "Treasury ulletin," pages 79-81. As a result of changes in presentation ntroduced in that issue, not all breakdowns previously ublished will be exactly comparable to those now presented. asic definitions

The term "foreigner" as used in the Treasury reports overs all institutions and individuals domiciled outside he United States, including United States citizens domiciled broad and the foreign subsidiaries and offices of United tates banks and business concerns; the central governments, entral banks, and other official institutions of foreign ountries, wherever located; and international and regional rganizations, wherever located.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled. Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the classification "International," "European regional," "Latin American regional," or "Asian regional," as appropriate, except for the Bank for International Settlements and the European Fund, which are included in the classification "Other Western Europe."
"Short-term" refers to obligations payable on demand or having an original maturity of one year or less, without deduction of any offsets. "Long-term" refers to obligations having an original maturity of more than one year, and includes securities having no contractual maturity.
Exclusions
The data published herein do not cover all types of capital movements between the United States and foreign countries. The data reported to and published by the Treasury Department exclude entirely the intercompany capital transactions of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies; such transactions are reported by business firms to the Department of Commerce. Data on the capital transactions of the United States Government and on shipments and receipts of United States currency are also excluded from the Treasury reports. Certain capital transactions not effected through reporting institutions, such as securities transactions carried out entirely abroad, are not recorded in the Treasury reports. Consolidated data on all types of capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

The liabilities data exclude U.S. Treasury letters of credit, and nonnegotiable, noninterest-bearing special notes of the United States held by the Inter-American Development Bank and the International Development Association.

The data on securities transactions and on foreign holdings of U.S. Government bonds and notes exclude nonmarketable U.S. Treasury notes, foreign series, and nonmarketable U.S. Treasury bonds and notes, foreign currency series (see "International Financial Statistics" section, Table 2).

## Presentation of statistics

Data collected monthly on the Treasury Foreign Exchange Forms are published in three sections. Section I provides a summary of the principal data by period; Section II presents data by country and by period; and Section III shows detailed breakdows of the latest available preliminary data.

Section IV presents supplementary data which are reported less frequently than monthly but which are published monthly.

For an explanation of statistical presentation and exclusions, see headnote on page 75 .
2) Through 2949, transactions in U.S. Govermment bonds and notes include transactions in domestic corporate bonds
3 Data below the line include changes in liabilities and claims reported by a number of banks included in the series beginning December 31, 1961
4 Change includes claims previously held but first reported as of May 31, 1963 ; as of that date such claims amounted to $\$ 85.6$ million. Also includes claims reported by banks for the first time as of December 31, 1963 ; as of that date such claims amounted to $\$ 203.2$ million, representing in part claims previously held by banks but not reported.
2. Change in short-term liabilities includes a net increase of $\$ 50.8$ million as of December 31, 1964, arising from changes in reporting covarage.
6) Data below the line on changes in clains reflect the exclusion from tha scries beginning December 31, 1964 of short-term U.S. Government claims previously included; and the addition to the series of claims arising from the inclusion of claims previously held but first reported as of December 31, 2964, and from revisions of preliminary figures.
7) Data below the line on changes in short-term claims reflect the addition to the series of short-term claims held in custody for domestic customers but reported by banks for the first time beginning December 31, 2965, and short-term claims reported by banks reporting for the first time.
8/ Changes for calendar year 1966 and December 1966 are computed from comparable outstanding figures, and do not reflect changes in reporting coverage and classification effective December 31, 1966. Outstanding short-term liabilities data as of December 31, 1966 have been increased by $\$ 330.0$ million to make them statistically comparable to data for previous date; this amount of noninterest-bearing special U. 3. notes held by the International Monetary Fund was exchanged for a U. S. Treasury letter of credit on December 30, 1966.
9 Change in short-term liabilities includes a decrease of $\$ 298.0$ million resulting from exclusion from outstanding liabilities of a U. S. Treasury Ietter of credit issued to the International Monetary Fund on January 30,1967 in exchange for noninterest-bearing special U. S. notes.

Included with "Other foreigners."
Included with "Other claims.
Beginning in August 1956 and also in April 1957, certain accounts previously classified as "Foreign banks" are included with "Official institutions.
5/ Differs from 1961 end of year data on the preceding line by inclusion of lisbilities and claims reported by a number of banks included in the series beginning December 31, 1961.
6) Includes reported liabilities to foreign official institutions beginning October 1961. Figures for selected dates are as follows: end 1961, \$46.3 million; end 1962, \$47.9 million; end 1963, \$30.1 million; end March 1966, \$317.2 million; end June 1966, \$367.2 million; end September 1966, \$517.7 million; end December 2966, $\$ 516.5$ million; end February 1967, $\$ 414.2$ million.
7) Includes claims previously held but first reported as of May 31, 1963; as of that date such claims amounted to $\$ 85.6$ million. Also includes claims amounting to $\$ 193.2$ million reported by banks for the first time as of December 31, 1963, representing in part claims previously held by banks but not reported.
8) Short-term liabilities include a net increase of $\$ 50.8$ million arising from changes in reporting coverage, distributed as follows: "Official institutions" - $\$ .0$ million, "Foreign banks" $+\$ 60.3$ million, "0ther foreigners" $+\$ 22.5$ million, and "Payable in foreign currencies" - $\$ 27.9$ million.

2/ Data on claims below the line differ from claims above the line be-
cause of the exclusion as of December 31, 1964 of $\$ 58.1$ million of short-term U.S. Government claims previously included; and because of the addition of $\$ 545.9$ million of short-term claims and \$313.3 million of long-tem claims arising from the inclusion of claims previously held but first reported as of December 31, 1964, and from revisions of preliminary figures
10/ Data on claims below the line differ from claims sbove the line because of the addition of short-term claims held in custody for domestic customers but reported by banks for the first time beginning December 31, 1965, and short-term claims reported by banks reporting for the first time

## 12) See footnote 12

12) Data on liabilities and claims below the line differ from data above the line because of changes in reporting coverage and classification effective December 31, 1966. Liabilities to International and regional above the line have been increased by $\$ 330.0$ million to make them statistically comparable to data for previous date; this amount of noninterest-bearing special U.S. notes held by the Internationsl Monetary Fund was exchanged for a U.S. Treasury letter of credit on December 30, 1966. Liabilities to International and regional below the line exclude the $\$ 330.0$ million letter of credit.
13 Data exclude a $\$ 298.0$ million U.S. Treasury letter of credit issued to the Internationel Monetary Fund on January 30, 1967 in exchange for noninterest-bearing special U.S. notes

[^21]foreign series, and foreign currency series. See "International
Financial Statistics," Table 2.

Foreign currenciea reported herein in United States dollar equivalents were acquired without purchase with dollars, for the most part in connection with foreign assletance and agricultural trade development programs authorized by various provisions of law. The currencies are held in the cuetody of the Treasury Department until such time as they are elther sold for dollars to Government agencies or transferred to Government agenciea for expenditure without charge to appropriations, as epecilically authorized by law.

Prior to July 1, 2953, foreign currenciee acquired by Government agencles without payment of dollars generally were avallable to the collecting agencies to defray operating expenses and were not subject to the regular appropriation processes.

The act of July 15,1952 , sec. 1415 ( 66 Stat. 662), provided that after June 30, 1953, United Statea agenciea could no lonzer expend roreign currencies belonging to the United States except 26 provided annually in appropriation acts. Subsequent legislation required executive departmenta and agencies, with certain exceptions, to reimburse the Treasury in dollars for the forelgn currencies uaed. Expcutive Ordera No. 10488 dated September 23, 1953, and No. 10900 dated January 5,1961 , as amended, provided for the issuance of regulations by the saoretary of the Treas ury governing the purchase, custody, transfar, or sale of forelgn exchange by the United States.

Accordingly, Treaaury Dapartment Circular No. 930 was 1ssued on October 19, 1953, ef1eotive December 1, 1953. These regulatione provided for the transfer of dapartment and agency forelgn currency balances as of November 30,
1953. into Treasury custody, and the flow of future collectiona through Treasury accounts; and established requirements with respect to withdrawale irom Treasury accounta; limitations on purchases and amounta of holdings; the use of forelgn depositaries; and accounting for the currencies. Department Circular No. 930 as revised October 20, 1961, added certain requirementa governing foreign currency reporting and accounting.

Figurea are atated in dollar equivalenta, computed for reporting purposes, to provide a common denominator for the currencies of the many foreign countries involved. It ahould not be assumed that dollars, in amounte equal to the balances, are actually aval lable for the general use of the United States Government, aince most of the currenciea are inconvertibla and restricted as to uses by the terme of agreamenta betwaen the United Statee and the foreign governments.

The tables exclude the counterpart funds owned by and held in accounta of the foreign govermmenta. The use of such funds is aubject to approval of the United Statea, and tranaactions therein are included in reports of the Agency for International Development. The tables also exclude the United Statea purohasea of foreign currencies which aro under dollar accountabllity and reported as dollar tranaactions.

Detalled data, by account, agency, program, forelgn country, units of currency, and related dollar equivalents, are publiched annually in the Combined Statement of Reoolpta, Expenditures and Balanoes, beginning with fisoal 1958.

[^22]5 Consists of the portion (between 5 and 10 percent of the total) owned by the United States.
6/ Includes transfers from administrative agencies to custody of the Treasury
7) Consists of loan repayments and assistance under Mutual Security and Foreign Assistance programs, interest on deposits, and other items.
8/ Details for fiscal years 1954-57 are not available. Less than $\$ 50,000$.

The financial statements of corporations and other busi-ness-type activities of the United States Government, which have appeared in the "Treasury Bulletin" since the August 1956 issue, are compiled from reports submitted to the Treasury under Department Circular No. 966, issued January 30, 1956, and Supplement No. 1, Revised, issued June 16, 1965. These regulations were issued pursuant to the Budget and Accounting Procedures Act of 1950. They superseded Budget-Treasury Regulation No. 3, issued under Executive Order No. 8512 of August 13, 1940, as amended by Executive Order No. 9084 of March 3, 1942, under which financial statements previously published in the Bulletin were submitted.

Department Circular No. 966 requires submission of financial statements by all wholly owned and mixed-ownership Government corporations specifically included in the Government Corporation Control Act, as amended (31 U.S.C. 846, 856); and all other activities of the Government operating as revolving funds. Other activities and agencies whose operations, services, or functions are largely self-liquidating or primarily of a revenue-producing nature, and activities and agencies whose operations result in the accumulation of substantial inventories, investments, and other recoverable assets, were brought under the regulations as the agency accounting systems were developed to where they were capable of furnishing the required financial reports.

Four kinds of financial statements are called for by Department Circular No. 966. They are statements of financial condition, income and expense, source and application of funds, and certain financial contingencies. The statements of financial condition are published quarterly and appear as Section I in the series of tables. The first statements of financial condition published under Circular 966 were as of Merch 31, 1956, and were presented in the August 1956 Bulletin. Statements of income and expense and source and application of funds
are published semiannually, for June 30 and December 31 reporting dates, and appear as Section II and III. The first of these statements under Circular 966 covered the fiscal year 1956, and were published in the January 1957 Bulletin. Within the sections, the agencies are grouped in separate tables by type, as follows: public enterprise revolving funds, intragovernmental revolving funds, certain other activities, deposit funds, and trust revolving funds.

Supplement No. 1, when originally issued in 1956, extended the coverage to include all executive agencies and activities not previously reporting under Circular 966 , but required only a statement of financial condition annually as of June 30. These were activities which were not principally of a businesstype nature. Those which had not yet developed formal accounting procedures to provide complete balance-sheet type statements were temporarily authorized to report only assets. Thus, the supplement rounded out provisions for information on properties and other assets, as well as liabilities, of the United States Covernment all of which is needed by Treasury for the compilation of complete Government-wide financial reports. The first comprehensive reporting under the original Supplement No. 1 was for June 30, 1957, and the data were published in the December 1957 Bulletin as Part B of Table 4 in Section I. The revision to Supplement No. 1 in 1965 made no basic change to the overall purpose of the originally issued supplement; it updated and consolidated all amendments to both the regulation and instructions.

A summary of loans outstanding for a series of dates is included in Section I of the Bulletin presentation beginning with the June 1958 issue. Two classifications of the loans are ahown, one by type and one by agency. Data prior to 1956 are based on the earlier reporting requirements, which provided for complete coverage of Government lending agencies.

Table 7. - Loans Outstanding December 31, 1966, Excluding Interagency Loans and Those Made by Deposit and Trust Revolving Funds, Classified by Types of Loans - (Continued) $1 /$

1/ Includes purchase money mortgages, mortgages purchased from insured lending institutions to prevent default, and similar long-term paper held by the agencies which are now classified as loans receivable. Prior to June 30, 1960, these assets had been classified as accounts and notes receivable or other assets.
2/ Does not include foreign currency loans.
$3 /$ The dollar equivalents of these loans are computed for reporting purposes at varying rates. Where the loan agreements stipulate a dollar denominated figure, the loans outstanding are generally valued at agreement rates of exchange. Loans executed in units of foreign currency are valued at the market rates (i.e.. the rates of exchange at which Treasury sells such curfencies to Government agencies)
4. Certificates of interest amounting to $\$ 527$ million, issued against certain of these loans, were outstanding as of December 31, 1966.
5) Has been reduced by participation certificates issued under trust agreements by the Federal National Mortgage Association, participation sales fund. The face amounts of participation certificates outstanding for these programs as of December 31, 1966, were:

Federal National Mortgage Association: Special assistance functions............... 622 Management and liquidating functions......
Veterans' Administration:
Direct loans to veterans and reserves.... 721

## Footnotes to Table 1

1) These amounts consist in the main of unexpended balances of general, special, and revolving fund accounts against which checks may be drawn to pay proper charges under these funds. The funds are considered as assets of the agencies, but are not assets of the United States Government since funds must be provided out of cash balances of the Treasurer of the United States and future receipts to take care of checks to be issued against the balances.
2) Includes foreign currency assets, representing loans and other receivables recoverable in foreign currency as well as balances of foreign currencies in United States depositaries, aggregating \$5,834 million in dollar equivalent. These currencies, acquired primarily without the payment of dollars, were generated under various Government programs, principally the Agricultural Trade Development and

Assistance Act of 1954, as amended, and the Mutual Security Acts, as amended. Dollar equivalents are computed for reporting purposes, to provide a common denominator for the currencias of the many countries involved. Foreign currencies on hand and on deposit and loans under section 104 (e) of the Agricultural Trade Development and Assistance Act of 1954, as amended, are stated at the rates as of December 31, 1966, at which the United States could purchase currencies on the market for regular operating purposes. Other loans are stated at the rates at which they are to be repaid or at rates in effect when the loans were extended. Currencies that are dollar denominated or guaranteed as to rate of exchange are stated at rates specified in the ggreements.
Less than $\$ 500$.
