Treasury Financing Operations

9-Month and One-Year Bills

On May 23 tenders were invited for \$500 million, or thereabouts, of 273-day Treasury bills, representing an additional amount of bills dated February 29, 1968, maturing February 28, 1969, and for \$1 billion, or thereabouts, of 365-day Treasury bills to mature May 31, 1969, both series to be issued May 31, 1968. These issues were to refund \$1.4 billion of bills maturing May 31 and to raise \$100 million cash. Tenders were opened on May 23.

Tenders received for the 273-day bills totaled \$1,140 million, of which \$500 million was accepted, including \$14 million of noncompetitive tenders. The average bank discount rate was 6.086 percent.

Tenders received for the 365-day bills totaled \$1,861 million, of which \$1,002 million was accepted, including \$28 million of noncompetitive tenders. The average bank discount rate was 6.079 percent.

13-Week and 26-Week Bills

Issues of regular weekly Treasury bills in May totaled \$13.5 billion, replacing \$12.6 billion of maturing bills and raising \$900 million cash. There were four 91-day issues and one 90-day issue of \$1.6 billion each and five 182-day issues of \$1.1 billion each. Average rates for the new issues are shown in the following table.

Treasury Bills - General

Treasury bills are sold on a bid basis. The face amount is payable without interest at maturity. They are issued in bearer form only, and in denominations of \$1,000, \$5,000, \$10,000, \$50,000, \$100,000, \$500,000, and \$1,000,000 (maturity value). Tenders are received at Federal Reserve banks and branches.

Banking institutions generally may submit tenders for account of customers. Tenders may be made without deposit by incorporated banks and trust companies and by responsible and recognized dealers in investment securities. Tenders from others must be accompanied by payment of 2 percent of the face amount of bills applied for, unless the tenders are accompanied by an express guaranty of payment by an incorporated bank or trust company.

Noncompetitive tenders (without stated price), usually for \$200,000 or less from any one bidder, are accepted in full at the average price of accepted competitive bids for an issue.

Payment for accepted tenders must be made or completed on the date of issue, in cash or other immediately available funds or in a like face amount of Treasury bills maturing on that date. Payment for 13-week, 26-week, 9-month, and one-year bills may not be made by credit in Treasury tax and loan accounts.

Foreign Series and Foreign Currency Series

Foreign series securities issued in May totaled \$903 million, consisting of eleven certificates of indebtedness and four notes. Redemptions for the month totaled \$913 million. At the end of May, foreign series securities outstanding totaled \$1,866 million. (Details are shown on page 53.)

Foreign currency series securities issued in May consisted of one note denominated in Swiss francs equivalent to \$30 million. Redemptions for the month totaled an equivalent of \$30 million. At the end of May foreign currency series securities outstanding totaled an equivalent of \$1,615 million, and were denominated in Austrian schillings, Belgian francs, German marks, Italian lire, Netherland guilders, and Swiss francs. (Details are shown on page 56.)

Treasury Financing Operations - (Continued)U.S. Savings Bonds and U.S. Savings Notes

On May 31, 1968, President Johnson announced an increase in the interest rates on United States Savings Bonds and freedom shares (U.S. Savings Notes). In making this announcement the President stated:

"I am today announcing an increase, to become effective June 1, 1968, on the interest rates for both United States Savings Bonds and freedom shares.

"The new rate on both series E and H savings bonds will move from 4.15 to 4.25 percent -- the maximum permitted by law. This higher rate will apply not only to newly-purchased bonds but also proportionately to all outstanding E and H bonds for their remaining period to next maturity. Thus, present bond-owners will be rewarded for investing in America and will not have to cash in their present bonds to take advantage of the higher rates.

"The rate on freedom shares will be increased from the present 4.74 percent to a full 5 percent when held to maturity of four and one-half years. Since these are savings notes, rather than savings bonds, there is no provision in the law for applying this increase to freedom shares which are outstanding. I am assured, however, that because of the rising scale of freedom share interest accruals, most of these outstanding shares will earn a comparably high rate for their remaining period of maturity.

"Limitations on the combination purchase of bonds and freedom shares will also be relaxed so that any American, at any time, may buy this attractive savings package over-the-counter at his bank rather than only through a bond-a-month plan.

"Savings bonds and freedom shares now become a more attractive investment than ever before.

"As a direct obligation of the United States they are the ultimate in safety -- a solid and secure base on which any family's savings and investment program might well be founded. They pay a good, and absolutely guaranteed, return. They are ideally suited for any important long-range goal, such as education, home-ownership, or retirement. But aside from these practical benefits, these securities offer much more. They offer an opportunity for the citizen to participate in America's goals and dreams -- to become involved in the achievement of all the things to which we aspire as a free people.

"The savings bonds program offers a partnership in which we should all be members. I extend my warmest invitation to every family to join."

On the day President Johnson's statement was released, the Treasury Department announced that the increased rate on Series E and H savings bonds will be applied, in most cases, to the first full six-month interest period beginning on and after June 1, 1968. The increased return on Series E and H savings bonds will be reflected in the final interest period before maturity.

Series E bonds issued June 1 or thereafter will now return 4-1/4 percent interest, compounded semi-annually, when held to maturity of 7 years. Series H bonds will return 4-1/4 percent also when held to a maturity of 10 years.

Outstanding Series E and H savings bonds will return comparably higher yields for the remaining time from June 1 to next maturity. This increase will also be reflected in the final interest period.

Beginning June 1, the freedom share - savings bonds combination will be available for over-the-counter purchase. Individuals may buy freedom shares, without signing up to become a regular purchaser under either a payroll savings or bond-a-month plan, provided they buy a Series E savings bond of the same or larger denomination at the same time. Individuals may purchase up to a face value of \$350 of freedom shares each calendar quarter to an annual limit of \$1,350.

The monthly limitations remain on the automatic purchase plans -- payroll savings and bond-a-month plans. Deductions for the notes, under a payroll savings plan, shall not be more than \$20.25 per weekly pay period, or \$40.50 per biweekly or semimonthly pay period, or \$81.00 per monthly pay period. Deductions under a bond-a-month plan shall not exceed \$81.00.

Note: Details of Treasury market financing operations are shown elsewhere in tables on public debt operations.

FEDERAL OBLIGATIONS

"Obligations" are the basis on which the use of funds is controlled in the Federal Government. They are recorded at the point at which the Government makes a firm commitment to acquire goods or services and are the first of the four key events--order, delivery, payment, consumption--which characterize the acquisition and use of resources. In general, they consist of orders placed, contracts awarded, services received and similar transactions requiring the disbursement of money.

The obligational stage of Government transactions is a strategic point in gauging the impact of the Government's operations on the national economy, since it frequently represents for business firms the Government commitment which stimulates business investment, including inventory purchases and employment of labor. Disbursements may not occur for months after the Government places its order but the order itself usually causes immediate pressure on the private economy.

Obligations are classified according to a uniform set

of categories which are based upon the nature of the transaction without regard to its ultimate purpose. All payments for salaries and wages, for example, are reported as personnel compensation, whether the personal services are used in current operations or in the construction of capital items.

Federal agencies and firms often do business with one another; in doing so, the "buying" agency records obligations, and the "performing" agency records reimbursements. In Table 1, obligations that are incurred within the Government are distinguished from those incurred outside the Government. Tables 2, 3, and 4 show only those incurred outside.

Obligation data for the administrative budget fund accounts were first published in the September 1967 Treasury Bulletin and the trust fund accounts were first published in the October 1967 Bulletin. Beginning with the April 1968 Bulletin, the data are on the basis of the budget concepts adopted pursuant to the recommendations of the President's Commission on Budget Concepts.

1/ For Federal Budget presentation a concept of "net obligations incurred" is generally used. This concept eliminates transactions within the Government and revenue and reimbursements from the public which by statute may be used by Government agencies without appropriation action by the Congress. Summary figures on this basis follow. (This data is on the basis of Reports on Obligations

received from the agencies prior to reports submitted for Budget presentation and therefore may differ somewhat from the Budget document.)

ACCOUNT OF THE TREASURER OF THE UNITED STATES

Source and Availability of the Balance in the Treasurer's Account

The account of the Treasurer of the United States reflects not only budget receipts and expenditures but also trust, deposit fund, and public debt transactions.

The working cash of the Treasury is held mainly in Treasurer's accounts with Federal Reserve banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banks throughout the country.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of money from a customer's account to the tax and loan account in

the same bank. On occasions, to the extent authorized by the Treasury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the account of their customers.

The tax and loan account system permits the Treasury to leave funds in banks and in the communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on bank reserves and the economy.

A detailed description of the Treasury's depository system may be found in the Annual Report of the Secretary of the Treasury for 1955, pages 275-284.

Footnotes to Table 2

Source: On the basis of the daily Treasury statement.

Note: The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outstanding on that date (the amount actually borrowed in the case of securities sold at a premium or discount, beginning with May 1960). The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. The average annual interest rate is computed by dividing the computed annual

interest charge for the total, or for any group of issues, by the corresponding principal amount. Beginning with data for December 31, 1958, the computation is based on the rate of effective yield for issues sold at premium or discount. Prior to that date it was based on the coupon rate for all issues.

- ^{1/} Guaranteed securities included are those held outside the Treasury.
- ^{2/} Total includes "Other bonds" through 1960; see Table 3.
- ^{3/} Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate.
- ^{4/} On United States savings bonds the rate to maturity is applied against the amount outstanding.

Note: In these tables sales of Series A-F and J bonds are included at issue price, and redemptions and amounts outstanding at current redemption value. Series G, H, and K are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured J and K bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, and are then transferred to matured debt on which interest has ceased.

- 1/ Sales and redemption figures include exchanges of minor amounts of (1) matured Series E bonds for Series G and K bonds from May 1951 through April 1957 and (2) Series F and J bonds for Series H bonds beginning January 1960; however, they exclude exchanges of Series E bonds for Series H bonds, which are reported in Table 3.
- 2/ Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the Treasury Bulletin.
- 3/ Because there is a normal lag in classifying redemptions, the distribution of redemptions between sales price and accrued discount has been estimated. Beginning with the Treasury Bulletin of March 1961 the

method of distributing redemptions between sales price and accrued discount has been changed to reflect the distribution shown in final reports of classified redemptions. All periods shown have been revised on this basis.

- 4/ Series F and G sales were discontinued April 30, 1952, and Series J and K sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent adjustments.
- 5/ Includes exchanges of Series 1941 F and G savings bonds for 3-1/4% marketable bonds of 1978-83.
- 6/ Includes exchanges of Series 1948 F and G bonds for 4-3/4% marketable notes of 1964.
- 7/ Includes exchanges of Series 1949 F and G bonds for 4% marketable bonds of 1969.
- 8/ Includes exchanges of Series 1950 F and G bonds for 3-7/8% marketable bonds of 1968.
- 9/ Includes exchanges of Series 1951 and 1952 F and G bonds for 3-7/8% marketable bonds of 1971 and 4% marketable bonds of 1980.
- 10/ Represents changes in the amounts of redemptions not yet classified between matured and unmatured issues.

UNITED STATES SAVINGS NOTES

Sales of United States savings notes began May 1, 1967. The notes are eligible for purchase by individuals with the simultaneous purchase of Series E savings bonds.

The principal terms and conditions for purchase and redemption and information on investment yields of the savings notes appear in the Treasury Bulletins of March 1967 and June 1968.

TREASURY SURVEY OF OWNERSHIP, APRIL 30, 1968

The monthly Treasury Survey of Ownership covers securities issued by the United States Government and by Federal agencies. The banks and insurance companies included in the Survey currently account for about 90 percent of all such securities held by these institutions. The similar proportion for corporations and for savings and loan associations is 50 percent, and for State and local governments, 70 percent. Data were first published for banks and insurance companies in the May 1941 Treasury Bulletin, for corporations and

savings and loan associations in the September 1960 Bulletin, and for State and local governments in the February 1962 Bulletin.

Holdings by commercial banks distributed according to Federal Reserve member bank classes and nonmember banks are published for June 30 and December 31. Holdings by corporate pension trust funds are published quarterly, first appearing in the March 1954 Bulletin.

1/ Beginning April 1953, prices are closing bid quotations in the over-the-counter market. Prices for prior dates are the mean of closing bid and ask quotations. "When issued" prices are included in the history beginning October 1941. Dates of highs and lows in case of recurrence are the latest dates.

2/ On callable issues market convention treats the yield to earliest call date as more significant when an issue is selling above par, and to maturity when it is selling at par or below.

3/ Included in the average yield of long-term taxable Treasury bonds as shown under "Average Yields of Long-Term Bonds."

Source: Beginning April 1953, Treasury bond yields are reported to the Treasury by the Federal Reserve Bank of New York, based on closing bid quotations in the over-the-counter market. Yields for prior periods were computed on the basis of mean of closing bid and ask quotations. Moody's Investor Service is the source for the average of Aaa corporate bonds.

1/ Series includes bonds on which the interest income is subject to

normal tax and surtax which are neither due nor callable before a given number of years as follows: April 1953 to date, 10 years; April 1952 - March 1953, 12 years; October 1941 - March 1952, 15 years. For bonds currently in the series, see Table 3 under "Market Quotations on Treasury Securities" in this issue of the Bulletin.

INTERNATIONAL FINANCIAL STATISTICS

The tables in this section are designed to provide data on United States reserve assets and liabilities and other statistics related to the United States balance of payments and international financial position. A number of changes were introduced in the May 1967 Bulletin to increase the usefulness of this section.

Table 1 has been revised to include in the reserve assets of the United States its reserve position in the International Monetary Fund. In accordance with Fund policies the United States has the right to draw foreign currencies equivalent to this amount virtually automatically if needed. (Under appropriate conditions the United States could draw additional amounts equal to the United States quota of \$5,160 million.) This revised presentation corresponds to the treatment of United States monetary reserves in the United States balance of payments accounts.

Table 2 brings together the various statistical components of the liabilities which enter into the United States balance of payments calculated on the liquidity basis. The inclusion of the United States reserve position in the International Monetary Fund in Table 1 requires that the "holdings of

dollars" of the Fund be excluded from the data on liabilities to foreigners, in order to avoid double counting. For further explanation of this change in the liabilities statistics, see headnote to "Capital Movements" section.

Table 3 (formerly Table 5), presenting an area breakdown of United States liquid liabilities to official institutions of foreign countries, has been revised to include holdings of convertible nonmarketable United States Government securities with an original maturity of more than one year.

Table 4 (formerly Table 2) is virtually unchanged and shows United States Treasury nonmarketable bonds and notes issued to official institutions of foreign countries.

Table 5 sets forth the factors which affect the United States position in the International Monetary Fund.

Table 6 (formerly Table 3) presents United States net monetary gold transactions with foreign countries and international and regional organizations. The former Table 4, which presented the estimated gold reserves and dollar holdings of foreign countries and international institutions, was discontinued in the May 1967 Bulletin.

^{1/} Includes gold sold to the United States by the International Monetary Fund with the right of repurchase, and gold deposited by the International Monetary Fund to mitigate the impact on the U.S. gold stock of foreign purchases for the purpose of making gold subscriptions to the Fund under quota increases. For corresponding liabilities see Table 2.

^{2/} Includes gold in Exchange Stabilization Fund, which is not included in Treasury gold figures shown in daily Treasury statement. See "Account of the Treasurer of the United States," Table 4.

^{3/} Includes holdings of Treasury and Federal Reserve System.

^{4/} In accordance with Fund policies the United States has the right to draw foreign currencies equivalent to its reserve position in the Fund virtually automatically if needed. Under appropriate conditions the United States could draw additional amounts equal to the United States quota. See Table 5.

^{5/} Reserve position includes, and gold stock excludes, \$259 million gold subscription to the Fund in June 1965 for a U.S. quota increase which became effective on February 23, 1966. In figures published by the Fund from June 1965 through January 1966, this gold subscription was included in the U.S. gold stock and excluded from the reserve position.

Note: Table is based on Treasury Department data and on data reported to the Treasury Department by banks and brokers in the United States. Data correspond to statistics following in this section and in the "Capital Movements" section, except for minor rounding differences. Table excludes International Monetary Fund "holdings of dollars," and holdings of U.S. Treasury letters of credit and nonnegotiable, non-interest-bearing special U.S. notes held by other international and regional organizations. The liabilities figures are used by the Department of Commerce in the statistics measuring the balance of international payments of the United States on the liquidity basis; however, the balance-of-payments statistics include certain adjustments to Treasury data prior to 1963 and some rounding differences, and may differ because of varying timing in incorporating revisions of Treasury data. The table does not include certain nonliquid liabilities to foreign official institutions which enter into the calculation of the official reserve transactions balance by the Department of Commerce.

1/ Represents liability on gold deposited by the International Monetary Fund to mitigate the impact on the U.S. gold stock of foreign purchases for the purpose of making gold subscriptions to the Fund under quota increases.

2/ U.S. Government obligations at cost value and funds awaiting investment obtained from proceeds of sales of gold by the International Monetary Fund to the United States to acquire income-earning assets.

Upon termination of investment, the same quantity of gold can be reacquired by the International Monetary Fund.

- 3/ Includes Bank for International Settlements and European Fund.
- 4/ Derived by applying reported transactions to benchmark data; breakdown of transactions by type of holder estimated 1960-1963. Includes securities issued by corporations and other agencies of the United States Government, which are guaranteed by the United States.
- 5/ Principally the International Bank for Reconstruction and Development and the Inter-American Development Bank.
- 6/ Includes difference between cost value and face value of securities in IMF gold investment account. Liabilities data reported to the Treasury include the face value of these securities, but in this table the cost value of the securities is included under "Gold investment." The difference, which amounted to \$29 million as of the end of 1967, is included in this column.
- 7/ Includes total foreign holdings of U.S. Government bonds and notes, for which breakdown by type of holder is not available.
- 8/ Data on the two lines shown for this date differ because of changes in reporting coverage. Figures on the first line are comparable in coverage to those shown for the preceding date; figures on the second line are comparable to those shown for the following date.

Note: The initial U.S. quota in the International Monetary Fund was \$2,750 million. The U.S. quota was increased to \$4,125 million in 1959, and to \$5,160 million in February 1966. Under the Articles of Agreement, subscription payments equal to the quota have been made 25 percent in gold and 75 percent in dollars.

1/ Represents net Fund sales of gold to acquire U.S. dollars for use in Fund operations. Does not include transactions in gold relating to gold deposit or gold investment (see Table 2).

2/ Represents purchases from the Fund of currencies of other members for equivalent amounts of dollars. The United States has a commitment to repay drawings within 3-5 years, but only to the extent that the Fund's holdings of dollars exceed 75 percent of the U.S. quota. Drawings of dollars by other countries reduce the U.S. commitment to repay by an equivalent amount.

2/ Represents the United States gold tranche position in the Fund (the United States quota minus the Fund's holdings of dollars), which is the amount that the United States could draw in foreign currencies virtually automatically if needed. Under appropriate conditions, the United States could draw additional amounts equal to the United States quota.

4/ Represents \$600 million IMF gold sale to United States (1957), less \$6 million gold purchase by IMF from another member with U.S. dollars (1948).

5/ Includes \$259 million gold subscription to the Fund in June 1965 for a U.S. quota increase which became effective on February 23, 1966. In figures published by the Fund from June 1965 through January 1966, this gold subscription was included in the U.S. gold stock and excluded from the reserve position.

CAPITAL MOVEMENTS

Background

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Information on the principal types of data and the principal countries is published monthly in the "Treasury Bulletin." Reports by banks, bankers, securities brokers and dealers, and nonbanking business concerns in the United States are made initially to the Federal Reserve Banks, which forward consolidated figures to the Treasury. These statistics are consolidated by the Treasury and published as promptly as possible.

The reporting forms and instructions used in the collection of the statistics have been revised a number of times. The most recent general revision became effective with reports covering data as of May 31, 1963.^{1/} A detailed description of the content of the statistics, including the changes instituted in 1963, appeared in the July 1963 issue of the "Treasury Bulletin," pages 79-81. As a result of changes in presentation introduced in that issue, not all breakdowns previously published will be exactly comparable to those now presented.

Basic definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including United States citizens domiciled abroad and the foreign subsidiaries and offices of United States banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled. Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the classification "International," "European regional," "Latin American regional," or "Asian regional," as appropriate, except for the Bank for International Settlements and the European Fund, which are included in the classification "Other Western Europe."

"Short-term" refers to obligations payable on demand or having an original maturity of one year or less, without deduction of any offsets. "Long-term" refers to obligations having an original maturity of more than one year, and includes securities having no contractual maturity.

Exclusions

The data published herein do not cover all types of capital movements between the United States and foreign countries. The data reported to and published by the Treasury Department exclude entirely the intercompany capital transactions of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies; such transactions are reported by business firms to the Department of Commerce. Data on the capital transactions of the United States Government and on shipments and receipts of United States currency are also excluded from the Treasury reports. Certain capital transactions not effected through reporting institutions, such as securities transactions carried out entirely abroad, are not recorded in the Treasury reports. Consolidated data on all

types of capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

The liabilities data exclude U.S. Treasury letters of credit, and nonnegotiable, noninterest-bearing special notes of the United States held by the Inter-American Development Bank and the International Development Association.

Beginning with the May 1967 Bulletin, data on short-term liabilities to foreigners have been revised to exclude the holdings of dollars of the International Monetary Fund derived from payments of the United States subscription and from the exchange transactions and other operations of the Fund. (Liabilities representing the "gold investment" of the Fund continue to be included.) This change in the treatment of the Fund's "holdings of dollars" is related to the revision of the table on United States monetary reserve assets (see "International Financial Statistics" section, Table 1) to include the United States reserve position in the International Monetary Fund.

The Fund's "holdings of dollars" do not represent United States liabilities to foreigners in the same sense as do other reported liabilities to foreigners. They are more accurately viewed as contingent liabilities, since they represent essentially the amount of dollars available for drawings from the Fund by other member countries. Changes in these holdings (arising from United States drawings and repayments of foreign currencies, from drawings and repayments of dollars by other countries, and from other dollar operations of the Fund) give rise to equal and opposite changes in the United States gold tranche position in the Fund, which in the absence of United States lending to the Fund, is equal to the United States reserve position. Since the reserve position is included in United States reserve assets, it is necessary, in order to avoid double-counting, to exclude the Fund's "holdings of dollars" from United States liabilities to foreigners. This revised presentation conforms to the treatment of these items in the United States balance of payments and the international investment position of the United States.

The data on securities transactions and on foreign holdings of U.S. Government bonds and notes exclude non-marketable U.S. Treasury notes, foreign series, and non-marketable U.S. Treasury bonds and notes, foreign currency series (see "International Financial Statistics" section, Table 4).

Presentation of statistics

Data collected monthly on the Treasury Foreign Exchange Forms are published in three sections. Section I provides a summary of the principal data by period; Section II presents data by country and by period; and Section III shows detailed breakdowns of the latest available preliminary data.

Beginning with the May 1967 Bulletin, publication of the former Section I, Table 1, "Net Movements of Banking Funds and Transactions in Long-Term Securities with Foreigners" was discontinued. Due to numerous breaks in the statistical series, the usefulness of this table had become increasingly limited in recent years. Time series of the significant categories of data reported on the Treasury Foreign Exchange Forms, from which this table was derived, are available elsewhere in this section.

Section IV presents supplementary data which are reported less frequently than monthly but which are published monthly.

^{1/} Copies of the reporting forms and instructions may be obtained from the Office of Balance of Payments Programs, Operations and Statistics, Office of the Assistant Secretary for International Affairs, Treasury Department, Washington, D.C. 20220 or from Federal Reserve Banks.

^{1/} For exclusions see headnote on page 80.^{2/} Data exclude the "holdings of dollars" of the International Monetary Fund. For explanation see headnote on page 80.^{3/} Included with "Other foreigners."^{4/} Included with "Other claims."^{5/} Beginning in August 1956 and also in April 1957, certain accounts previously classified as "Foreign banks" are included with "Official institutions."^{6/} Differs from 1961 end of year data on the preceding line by inclusion of liabilities and claims reported by a number of banks included in the series beginning December 31, 1961.^{7/} Includes reported liabilities to foreign official institutions beginning October 1961. Figures for selected dates are as follows: end 1961, \$46.3 million; end 1962, \$47.9 million; end 1963, \$30.1 million; end 1966, \$516.5 million; end June 1967, \$428.7 million; end September 1967, \$303.6 million; end December 1967, \$151.8 million; end March 1968, \$217.3 million; end April 1968, \$217.3 million.^{8/} Includes claims previously held but first reported as of May 31, 1963; as of that date such claims amounted to \$85.6 million. Also includes claims amounting to \$193.2 million reported by banks for the first time as of December 31, 1963, representing in part claims previously held by banks but not reported.^{9/} Short-term liabilities include a net increase of \$50.8 million arising

from changes in reporting coverage, distributed as follows: "Official institutions" -\$4.0 million, "Foreign banks" +\$60.3 million, "Other foreigners" +\$22.5 million, and "Payable in foreign currencies" -\$27.9 million.

^{10/} Data on claims below the line differ from claims above the line because of the exclusion as of December 31, 1964 of \$58.1 million of short-term U.S. Government claims previously included; and because of the addition of \$545.9 million of short-term claims and \$313.3 million of long-term claims arising from the inclusion of claims previously held but first reported as of December 31, 1964, and from revisions of preliminary figures.^{11/} Data on claims below the line differ from claims above the line because of the addition of short-term claims held in custody for domestic customers but reported by banks for the first time beginning December 31, 1965, and short-term claims reported by banks reporting for the first time.^{12/} Data on liabilities and claims below the line differ from data above the line because of changes in reporting coverage and classification effective December 31, 1966, and because of revisions of reported data beginning December 31, 1966.^{13/} Data on liabilities and claims below the line differ from data above the line because of changes in reporting coverage effective December 31, 1967.

CORPORATIONS AND CERTAIN OTHER BUSINESS-TYPE ACTIVITIES

The financial statements of corporations and other business-type activities of the United States Government, which have appeared in the "Treasury Bulletin" since the August 1956 issue, are compiled from reports submitted to the Treasury under Department Circular No. 966, issued January 30, 1956, and Supplement No. 1, Revised, issued June 16, 1965. These regulations were issued pursuant to the Budget and Accounting Procedures Act of 1950. They superseded Budget-Treasury Regulation No. 3, issued under Executive Order No. 8512 of August 13, 1940, as amended by Executive Order No. 9084 of March 3, 1942, under which financial statements previously published in the Bulletin were submitted.

Department Circular No. 966 requires submission of financial statements by all wholly owned and mixed-ownership Government corporations specifically included in the Government Corporation Control Act, as amended (31 U.S.C. 846, 856); and all other activities of the Government operating as revolving funds. Other activities and agencies whose operations, services, or functions are largely self-liquidating or primarily of a revenue-producing nature, and activities and agencies whose operations result in the accumulation of substantial inventories, investments, and other recoverable assets, were brought under the regulations as the agency accounting systems were developed to where they were capable of furnishing the required financial reports.

Four kinds of financial statements are called for by Department Circular No. 966. They are statements of financial condition, income and expense, source and application of funds, and certain financial contingencies. The statements of financial condition are published quarterly and appear as Section I in the series of tables. The first statements of financial condition published under Circular 966 were as of March 31, 1956, and were presented in the August 1956 Bulletin. Statements of income and expense and source and application of funds

are published semiannually, for June 30 and December 31 reporting dates, and appear as Section II and III. The first of these statements under Circular 966 covered the fiscal year 1956, and were published in the January 1957 Bulletin. Within the sections, the agencies are grouped in separate tables by type, as follows: public enterprise revolving funds, intra-governmental revolving funds, certain other activities, deposit funds, and trust revolving funds.

Supplement No. 1, when originally issued in 1956, extended the coverage to include all executive agencies and activities not previously reporting under Circular 966, but required only a statement of financial condition annually as of June 30. These were activities which were not principally of a business-type nature. Those which had not yet developed formal accounting procedures to provide complete balance-sheet type statements were temporarily authorized to report only assets. Thus, the supplement rounded out provisions for information on properties and other assets, as well as liabilities, of the United States Government all of which is needed by Treasury for the compilation of complete Government-wide financial reports. The first comprehensive reporting under the original Supplement No. 1 was for June 30, 1957, and the data were published in the December 1957 Bulletin as Part B of Table 4 in Section I. The revision to Supplement No. 1 in 1965 made no basic change to the overall purpose of the originally issued supplement; it updated and consolidated all amendments to both the regulation and instructions.

A summary of loans outstanding for a series of dates is included in Section I of the Bulletin presentation beginning with the June 1958 issue. Two classifications of the loans are shown, one by type and one by agency. Data prior to 1956 are based on the earlier reporting requirements, which provided for complete coverage of Government lending agencies.

CORPORATIONS AND CERTAIN OTHER BUSINESS-TYPE ACTIVITIES

Footnotes to Table 1

- 1/ These amounts consist mainly of unexpended balances of general, special, and revolving fund accounts against which checks may be drawn to pay proper charges under these funds. The funds are considered as assets of the agencies, but are not assets of the United States Government since funds must be provided out of cash balances of the Treasurer of the United States and future receipts to take care of checks to be issued against the balances.
- 2/ Includes foreign currency assets, representing loans and other receivables recoverable in foreign currency as well as balances of foreign currencies in United States depositories, aggregating \$5,977 million in dollar equivalent. These currencies, acquired primarily without the payment of dollars, were generated under various Government programs, principally the Agricultural Trade Development and

Assistance Act of 1954, as amended, and the Mutual Security Acts, as amended. Dollar equivalents are computed for reporting purposes, to provide a common denominator for the currencies of the many countries involved. Foreign currencies on hand and on deposit and loans under section 104 (e) of the Agricultural Trade Development and Assistance Act of 1954, as amended, are stated at the rates as of March 31, 1968, at which the United States could purchase currencies on the market for regular operating purposes. Other loans are stated at the rates at which they are to be repaid or at rates in effect when the loans were extended. Currencies that are dollar denominated or guaranteed as to rate of exchange are stated at rates specified in the agreements.
