## Treasury Financing Operations

## Tax Anticipation Bills

On June 26 tenders were invited for $\$ 2.5$ billion, or thereabouts, of 257-day tax anticipation bills to be dated July 8, 1970, and to mature March 22, 1971. They will be acceptable at face value in payment of income taxes due March 15, 1971.

Tenders were opened on July 2 and totaled $\$ 4,741 \mathrm{mil}-$ lion, of which $\$ 2,516$ million was accepted. The average bank discount rate was 6.452 percent. The limit for noncompetitive tenders fromany one bidder was $\$ 400,000$ and they totaled \$261 million.

All bidders were required to agree not to purchase or to sell, or to make any agreements with respect to the purchase or sale or other disposition of any bills of the issue at a specific rate or price, until after one-thirty p.m., Eastern daylight saving time, July 2, 1970.

Any qualified depositary was permitted to make settlement by credit in its Treasury tax and loan account for the amount of bills allotted to it for itself and its customers.

## 2-Month and One-year Bills

On June 17 tenders were invited for $\$ 500$ million, or thereabouts, of 274-day Treasury bills, representing an additional amount of bills dated March 31, 1970, maturing March 31, 1971, and for $\$ 1.2$ billion, or thereabouts, of 365 -day Treasury bills to be dated June 30, 1970, to mature June 30, 1971, both series to be issued June 30. These issues were to refund $\$ 1,702$ million of bills maturing June 30 . Tenders were opened on June 23.

Tenders received for the 274-day bills totaled \$1,243 million, of which $\$ 501$ million was accepted, including $\$ 21$ million of noncompetitive tenders. The average bank discount rate was 7.068 percent.

Tenders received for the 365-day bills totaled $\$ 1,774$ million, of which $\$ 1,201$ million was accepted, including $\$ 75$ million of noncompetitive tenders. The average bank discount rate was 7.079 percent.

## 13-Week and 26-Week Bills

Issues of regular weekly Treasury bills in June totaled $\$ 12.4$ billion, replacing $\$ 12.0$ billion of maturing bills.

There were four 91-day issues of $\$ 1.8$ billion and four 182day issues of $\$ 1.3$ billion. Average rates for the new issues are shown in the following table.

| 13-week <br> (Additional amount of bills of original maturity of 26 weeks) |  |  | 26-week |  |
| :---: | :---: | :---: | :---: | :---: |

## Treasury Bills - General

Treasury bills are sold on a bid basis. The face amount is payable without interest at maturity. They are issued in bearer form only, and in denominations of $\$ 10,000, \$ 50,000$, $\$ 100,000, \$ 500,000$, and $\$ 1,000,000$ (maturity value) 2/. Tenders are received at Federal Reserve banks and branches. Each tender must be for a mutiple of $\$ 10,000$.

Banking institutions generally may submit tenders for account of customers. Tenders may be made without deposit by incorporated banks and trust companies and by responsible and recognized dealers in investment securities. Tenders from others must be accompanied by payment of 2 percent of the face amount of bills applied for, unless the tenders are accompanied by an express guaranty of payment by an incorporated bank or trust company.

Noncompetitive tenders (without stated price), usually for $\$ 200,000$ or less from any one bidder, are accepted in full at the average price of accepted competitive bids for an issue.

Payment for accepted tenders must be made or completed on the date of issue, in cash of other immediately available funds or in a like face amount of Treasury bills maturing on that date. Payment for 13-week, 26-week, 9-month, and one-

## Treasury Financing Operations - (Continued)

year bills may not be made by credit in Treasury tax and loan accounts.

## Foreign Series and Foreign Currency Series

Foreign series securities issued in June totaled $\$ 990$ million, consisting of six certificates of indebtedness and four notes. Redemptions for the month totaled $\$ 135$ million. At the end of June foreign series securities outstanding totaled $\$ 3,389$ million. (Details are shown on page 55.)

Foreign currency series securities issued in June consisted of one note denominated in Swiss francs equivalent to $\$ 23$ million. Redemptions for the month totaled an equivalent of $\$ 23$ million. At the end of June foreign currency series securities outstanding totaled an equivalent of $\$ 1,366 \mathrm{mil}$ lion and were denominated in German marks and Swiss francs. (Details are shown on page 57.)

Table FFO-7. - Trust Funds Transactions July 1, 1969 through May 31, 1970

"Ubligations" ar: the basis on which the use of funds is controlled in the Federal Government. They are recorded at the point at which the Government makes a firm commitment to acquire goods or services and are the first of the four key events--order, delivery, payment, consumption--which characterize the acquisition and use of resources. In general, they consist of orders placed, contracts awarded, services received, and similar transactions requiring the disbursement of money.

The obligational stage of Government transactions is 9 strategic point in gauging the impact of the Government:s operations on the national economy, since it frequently represents for business firms the Government commitment which stimulates business investment, including inventory purchases and employment of labor. Disbursements may not occur for months after the Government places its order but the order itself usually causes immediate pressure on the private economy.

Obligations are classified according to a uniform set
af cateruries which are based upon the nature of the transaction without regard to its ultimate purpose. All payments for salaries and wages, for example, are reported as personnel compensation, whether the personal services are used in current operations or in the construction of capital items.

Federal agencies and firms often do business with one another; in doing so, the "buying" agency records obligations, and the "performing" agency records reimbursements. In Table FO-1, obligations that are incurred within the Government are distinguished from those incurred outside the Government. Tables $\mathrm{FO}-2,3$, and 4 show only those incurred outside.

Obligation data for the administrative budget fund accounts were first published in the September 1967 Treasury Bulletin and the trust fund accounts were first published in the October 1967 Bulletin. Beginning with the April 1968 Bulletin, the data are on the basis of the budget concepts adopted pursuant to the recommendations of the President's Commission on Budget Concepts.

Table FO-1. - Gross Obligations Incurred Within and Outside the Federal Government by Object Class, May 31, 1970
(In millions of dollars)

Source: Reports on Obligations, Standard Form 225, from agencies. 1/ For Federal Budget presentation a concept of "net obligations incurred" is generally used. This concept eliminates transactions within the Government and revenue and reimbursements from the public which by statute may be used by Government agencies without appropriation action by the Congress. Summary figures on this bas is follow. (This data is on the basis of Reports on Obligations received from the agencies prior to reports submitted for Budget
presentation and therefore may differ somewhat from the Budget document.)

[^4]Table FO-3. - Gross Obligations Incurred Outside the Federal Government by Department or Agency, May 31, 1970

Table FO-4. - Gross Obligations Incurred Outside the Federal Government

## Source and Availability of the Balance in the Treasurer's Account

The working cash of the Treasury is held mainly in Treasurer's accounts with Federal Reserve banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banks throughout the country.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of money from a customer's account to the tax and loan account in the same bank. On occasions, to the extent authorized by the

Treasury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the account of their customers.

The tax and loan account system permits the Treasury to leave funds in banks and in the communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on bank reserves and the economy.

A detailed description of the Treasury's depositary system may be found in the Annual Report of the Secretary of the Treasury for 1955, pages 275-284.

| Source: Daily Ireasury statement <br> 1/ Includes reserves and other deposits of the Board of Trustees, Postal Savings System, and uncollected items, exchanges, etc.. through December 1952. Effective January 1963 balances of the Postal Savings System funds were transferred to deposit fund accounts and became demand obligations of the Treasury. Balances of these funds, there- |  |  |  |  | fore, are no longer liabilities within the general account of the Treasurer. Uncollected items, exchanges, etc., also previously shown as liabilities were combined with "Unclassified collections, etc." shown under assets. <br> Amounts shown, beginning January 1963, are net of uncollected items, exchanges, etc. Previously these items were included under liabilities. |  |  |  |  |  |  |

Figures $1 /$ Beginning with the February 1963 Bulletin, figures have been revised, in the first four columns of this table may differ somewhat from those as shown in daily Treasury statements beginning January 2, 1963, to originally published in the daily Treasury statement because of subexclude transactions of clearing accounts. sequent reclassification of certain transactions. <br> 2/ Previously included under cash withdrawals. See footnote 1. |  |  |  |  |  |  |  |

Table TUS-4. - Gold Assets and Liabilities of the Treasury

Source: Circulation Statement of United States Money through 1965; daily Treasury statement thereafter.
1/ Treasury gold stock; does not include gold in Exchange Stabilization Fund. See "International Financial Statistics," Table TFS-1.
2/ Comprises gold certificates held by the public and in Federal Reserve Banks, the gold certificate fund - Federal Reserve System, and gold deposited by and held for the International Monetary Fund. Prior to March 1968 also includes ( 1 ) reserve of $\$ 156$ million against United

States notes and through June 30, 1961, Treasury notes of 1890 and (2) the redemption fund - Federal Reserve notes (Pursuant to P.L. $90-269$ approved March 18, 1968, this fund was combined with gold certificate fund - Federal Reserve System).
3/ The United States payment of the $\$ 259$ million increase in its gold subscription to the International Monetary Fund, authorized by P. L. 89-31, approved June 2, 1965 (79 Stat. 119) was made on June 30,

Source: Daily Treasury statement
1/ Consists of certificates of indebtedness, Treasury notes beginning
January 1963, and Treasury bonds baginning September 1964, sold to
foreign governments for U. S. dollars.
2/ Consists of the dollar equivalent of Treasury certificates of indebted-
ness; Treasury bonds beginning October 1962; and Treasury notes beginning

November 1966 issued and payable in designated foreign currencies.
Includes Treasury bonds, Faral Electrification Administration series beginning July 1960; retirement plan bonds beginning January 1963; Treasury certificates beginning June 1963; Treasury bonds beginning January 1964; and U. S. savings notes beginning May 1967.

## Footnotes to Table FD-2

 year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outstanding on that date (the anount actually borrowed in the case of securities sold at a premium or discount, beginning with May 1960). The aggregate charge for all interest-bearing issues cunstitutes the total computed annual interest charge. The averageannual interest rate is computed by dividing the computed annual interest charge for the total, or for any group of issues, by the corresponding principal amount. Beginning with data for December 31, 1958, the computation is based on the rate of effective yield for issues sold at premiun or discount. Prior to that date it was based on the coupon rate for all issues.
1/ Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate
On United States savings bonds the rate to maturity is applied rgainst the amount outstanding.

Note: For debt subject to limitation for fiscal years 1940-1960 see table
21 of the Statistical Appendix to the Annual Report of the Secretary
of the Treasury on the State of the Finances for fiscal 1969. For a
summary of legislation on debt limitation under the Second Liberty

Bond Act and the amounts uf limitation see table 31 of the Statistical Appendix.

1. District of Colurbia Armory Board Stadium Bonds,
2) Includes $\$ 3,250$ million in participation certificates.

Less than $\$ 500,000$.

Table FD-9. - Status and Application of Statutory Limitation

The Second Liberty Bond Act (31 U.S.C. 757b), as amended by the Act of April 7, 1969 (Public Law 91-8), provides that the face amount of obligations issued under authority of that Act, and the face amount of olligations guaranteed as to principal and interest by the United States, shall not exceed in the aggregate $\$ 365$ billion outstanding at ary one time. Public Law 91-8 also provides that beginning April 7, 1969, and ending June 30, 1970, the public debt limit shall be temporarily in-
creased by $\$ 12$ billion to $\$ 377$ billion.
In addition, the Act provides that the face amount of beneficial interests and participations issued under section 302 (c) of the Federal National Mortgage Association Charter Act (12 U.S.C. $2717(\mathrm{c})$ ) during the fiscal year 1968 and outstanding at any time shall be added to the amount otherwise taken into account in determining whether the requirements of the above provisions are met.

19) Includes $\$ 292$ million of the $8-1 / 4 \%$ notes. $\$ 288$ million of the $8-1 / 8 \%$ notes, and $\$ 458$ million of the $8 \%$ notes, allotted to Federal Reserve banks and Government accounts.
20) Includes \$2.421 miliion of the $7-3 / 4 \%$ notes and $\$ 2,125$ milion of the $8 \%$ notes $3 l l o t t e d$ to Federal Reserve banks and Government accounts.
21 All subscriptions were allotted in full. Subscriptions for Government accounta and Federal Reserve banks tctaled $\$ 7,005$ million.
p Preliminary.

Table PDO-5. - Unmatured Marketable Securities Issued in Advance Refunding Operations

Table PDO-5. . Unmatured Marketable Securities Issued in Advance Refunding Operations - (Continued)

1/ Does not include payments for accrued interest The effective rate of interest on the new issue is the coupon rate adjusted for the amount paid by or to the Treasury as discount or premium on the new security exchanged for eligible securities originally issued at par. For eligible securities originally issued at prices other than par, the payment by or to the Treasury is applied to the price adjusted for the pro rata amortization of the original discount or premium to the date of the advance funding.

3/ Based on the mean of bid and asked prices of securities eligible for exchange (adjusted for payments on account of purchase price of securities issued) at noon on the day before announcement by the Treasury.
4/ Gain or loss on exchange deferred in accordance with Section 1037 a of the Internal Revenue Code.
5/ Additional issue.

## Footnotes to Table PDO-8

Source: Daily Treasury Statement: Eureau of the Public Debt. 1) Original call and maturity dates are used.

All by investors other than Federal Reserve banks.
Rolled over into 9 -month and one-year bills (see Table PDO-4).
4 Holders of the maturing securities were not offered preemptive rights to exchange their holdings, but were permitted to present them in payment or exchange, in whole or in part, for the new securities offered. 5 Excess of maturing securities over allotments of new securities paid for with the maturing securities.

6/ Tax anticipation issue: for detail of offerings beginning July 1968 , see Table PDO-4; for amounts redeemed for taxes and for cash see "Note" below.
7/ Of this amount $\$ 1,001$ milion of the $5-5 / 8 \%$ notes and $\$ 6,428$ million of the $6-3 / 8 \%$ notes were submitted in payment for subscriptions allotted for the $7-3 / 4 \%$ Treasury Notes of Series G-1971 which were offered on a cash basis. Holders of the maturing notes were not offered preemptive rights to exchange their holdings for the new notes. (For detail of offering see Table PDO-4).
p Preliminary.

Note: Information on retirement of tax anticipation issues referred to
in footnote 6 , in millions of dollars:

Table PDO-10. - Foreign Currency Series Securities (Nonmarketable) Issued to Official Institutions of Foreign Countries

Table PDO-10. - Foreign Currency Series Securities (Nonmarketable) Issued to Official Institutions of Foreign Countries - (Continued)

Series E and H are the only savings bonds currently being sold. Series $E$ has been on sale since May 1, 1941, and Series $H$ has been on sale since June 1, 1952. Series A-D were sold from March 1, 1935, through April 30, 1941. Series $F$ and $G$ were sold from May 1, 1941, through April 30, 1952. Series J and K were sold from May I, 1952, through April 30, 1957. Details of the principal changes in issues,
interest yields, maturities, and other terms appear in the Treasury Bulletins of April 1951, May 1952, May 1957, October and December 1959, and May and October 1961; the Annual Report of the Secretary of the Treasury fiscal year 1966 (pages 197 and 258), and fiscal year 1967 (pages 179 and 181); and the Treasury Bulletin of June 1968.

Source: Daily Treasury statement; uffice of Debt Analysi: in the office of the Secretary.
Note: In these tables sales of Series $A-F$ and $J$ bonds are included at issue price, and redemptions and amounts outstanding at current redemption value. Series G. H, and K are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured $J$ and $K$ bonds utstanding are included in the interest-bearing debt until all bonds of the annual series have matured, and are then transferred to matured debt on which interest has ceased.

1. Sales and redemption figures include exchanges of minor amounts of (1) maturad Series E bonds for Series G and K bonds from May 1951 through April 1957 and (2) Series F and J bonds for Series $H$ bonds beginning January 1960; however, they exclude exchanges f Series E binds for Series H bonds, which are reported in Table SB- 3 .
d Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the Treasury Bulletin.
2. Because there is a normal lag in classifying redemptions, the distribution of redemption between sales price and accrued discount has been estimated. Beginning with the Ireasury Bulletin of March 1961 the
methud of distributing redemptions between sales price and accrued discount has been changed tr reflect the distribution shown in final rep rts of classified redemptions. All peri. ds shown have been Series F and G sales were discontinued April 30, 1952, and Series J and $K$ sales were discontinued April 30, 1957. Sales figures after April $30,195 \%$, represent adiustments. 197 . Sales figures after April $30,195 \%$, represent adjustments.
Includes exchanges of Series $19,4 \mathrm{~F}$ and $G$ savings bonds for $3-1 / 4 \%$ marketable bonds ot" 1978-83. Includes exchanges of Series 1048 F and $G$ bonds for $4-3 / 4 \%$ marketable notes of 1 )64.
Tncludes exchanges of series 1944 F and i bonds for $4 \%$ marketable bonds of 196
3. Includes exchanges of Series 1950 F and 3 bonds for $3-7 / 8 \%$ marketable bonds of 1968.
Includes exchanges of jeries 1951 and 1.152 F and G bonds for $3-7 / 8 \%$ marketable bonds of 1,71 and $4 \%$ marketable bonds of 1980.
10/ Represents changes in the amounts of redemptions not yet classified between matured and unmatured issues. - bectwen matured anc innat ured 1ssues.

Sales of United States savings notes began May 1, 1967. The notes are eligible for purchase by individuals with the simultaneous purchase of Series E savings bonds.

The principal terms and conditions for purchase and redemption and information on investment yields of the savings notes appear in the Treasury Bulletins of March 1967 and June 1968.

[^10]The monthly Treasury Survey of Ownership covers securi ties issued by the United States Government, Federal agencies, Federally -sponsored agencies, and the District of Columbia. The banks and insur see companies includedin the Survey currently account for about 90 percent of all such securities held by these institutions. The similar proportion for corporations and for savings and loan associations is 50 percent, and for State and local governments, 70 percent. Data were first published for banks and insurance companies in the May

1941 Treasury Bulletin, for corporations and savings and loan associations in the September 1960 Bulletin, and for State and local governments in the February 1962 Bulletin.

Holdings by commercial banks distributed according to Federal Reserve member bank classes and nonmember banks are published for June 30 and December 31. Holdings by corporate pension trust funds are published quarterly, first appearing in the March 1954 Bulletin.

Tht title in this sen-tion are designed to provive uat ur. 'n"ten vtates reserve ascets and liabilities and other tatistics related to the United states balance of payment. ad international financial position. A number of charle wore introuluced in the May 1767 Pulletin to increase the usefulness of this section.

Table IFC-1 showe the reserve assets of the United tate, , includint "ts rold stock, special drawing rights held in the "pecial IrawinJ Account in the International Monetary und, holaings of convertible foreign currencies, and $r \in-$ erve position in the International Monetary Fund.

Table IFS-2 brinets torether the various statistical comconerts of the liatilitie wh ichenter into the United States balance of pavmente calculated or the liquidity basis. The Culusion of the United States reserve position in the Intcrmational Monetary Fund in Table IFS-I requires that the
"holdines of dollars" of the Fund be excluded from the data on liabilities to foreigners, in order to avoid double countirg.

Table IFS-3 presents an area breakdown of United States liquid liabilities to official institutions of foreign countries.

Table IFS-4 chows United States Treasury nonmarketable bonds and notes issued to official institutions of foreign - ountries.

Table IFS-5 sets forth the factors which affect the United States position in the International Monetary Fund.

Table IFS-6 presents United States net monetary gold transactions with foreign countries and international and regional organizations.

Table IFS-1. - U.S. Reserve Assets

[^14]In accordance with Fund policies the United States has the right to
draw foreign currencies equivalent to its reserve position in the in currencies equivalent to its reserve position in the sund virtually automatically if meeded. Under appropriate conditions the United States could draw additional amounte equal to the United States quota. See Table IFS-5
Reserve position includes, and gold stock excludes, $\$ 259$ million gold subscription to the fund in iure 1765 for a U.S. quota increase which became effective on Febıuary 23, 1966. In figuree published by the Fund from June 1965 through January 1966, this gold subscription was
maxed in the . . gold stock and excluded from the reserve position.
7/ Includes gain of $\$ 07$ million resulting from revaluation of the German mark in October 176 , of which $\$ 13$ million represents gain on German mark holdings at time of revaluation. See also footnate: 3 and 4 ,

Table IFS-2. - U.S. Liquid Liabilities to Foreigners

Note: Table is based on Treasury Lepartment datd an on data reporte Data correspond to etatictics following in this zection and in the "Capital Movements" eention, except for minor rounding differences Table excludes Tntemational Monetary Fund "holdings of dollars," an holdings of U.S. Treasury letters of credit and nomegotiable, non-
interest-bearing special regional organizations. The liab:lities fieures are used by the Department of Commerce in the statistics measuring the balance of international payments of the Lrited States on the liquidity ba is however, the balance-of-payment= ztatistics ir lude certain adjustmenta to Treasury data prior to 1963 and some rounding dilference, and may differ because of varying timing in incorporating revisions of Treasury data. The table does rot include certain nonliquid liabilities to foreign official institutions which enter into the calculation of the official reserve transactions balance by the Department of Commerce.
1 Represents liability on gold deposited by the International Monetar Fund to mitigate the impact on the U.S. gold stock of foreign purchases for the purpose of making gold subscriptions to the Fund under quota increases.

- U.S. Covernment obligations at cost value and funds awaiting inves ment obtained from proceeds of sales of gold by the international
Monetary Fund to the United States to acquire income-earning assets Upon termination of investment, the same quantity of gold can be

Table IFS-3. - U.S. Liquid Liabilities to Official Institutions of Foreign Countries, by Area $1 /$

[^15]Table IFS-4. - Nonmarketable U.S. Treasury Bonds and Notes Issued to Official Institutions of Foreign Countries

1. Inclutes bonds issued to the Govermment of Canada in connection with transactions under the Columbis River treaty. Amounts outstanding were $\$ 204$ million, September 1964 through October 1965; \$174 million November 1965 through October 1966; \$144 million, November 1966 through ctober 1767, \$114 million, November 1967 throuch October 1968. $\$ 84$ million, November 1968 through September 1969: and $\$ 54$ milion, october 1969 through latest date.
2/ Bonds issued to the Government of Italy in connection with military

In addition, nonmarketable Treasury notes amounting to $\$ 125$ million equivalent were issued to a group of German commercial banks in June 1968. The revaluation of the German mark in October 1969 increased the dollar value of these notes by $\$ 10$ million. See also footnote 7, Table TFS-1.
4 Includes an increase in dollar value of $\$ 101$ million resulting from revaluation of the German mark in October 1969. See also footnote 7 , Table IFS-1.

Note: The initial U. S. quota in the International Monetary Fund was $\$ 2,750$ million. The U.S. quate was increased to $\$ 4,125$ million in 1959 , and to $\$ 5,160$ million in February 1966. Under the Articles of Agreement, subscription payments equal to the quota have been made 25 percent in gold and 75 percent in dollars.
1/ Represents net Fund sales of gold to acquire U.S. dollars for use in Fund operations. Does not include transactions in gold relating to gold deposit or gold investment (see Table IFS-2).
2/ Positive flgures represent purchases fram the Fund of currencies of other members for equivalent amounts of dollars; negative figures represent repurchases of dollars, including dollars derived from charges on drewings and from other net dollar income of the Fund. The United States has a commitment to repay drawings within $3-5$ years, but only to the extent that the Fund's holdings of dollars exceed 75 percent of the U.S. quota. Drawings of dollars by ather countries reduce the U.S. comatment to
repay by an equivalent amount.
3/ Beginning Jamary 1970. includes dollars obtained by countries other than the United States from sales of gold to the Fund
4/ Represents the United States gold tranche position in the Fund (the United States quota minus the Fund's holdings of dollars), which is the amount that the United States could draw in foreign currencies virtually automatically if needed. Under appropriate conditions, the United States could draw additional amounts equal to the United States quata.
5) Includes $\$ 259$ million gold subscription to the Fund in June 1965 for a U.S. quota increase which became effective on February 23, 1966. In figures published by the Fund from June 1965 through January 1966, this gold subscription was included in the U.S. gold stock and excluded from the reserve position.

Table IFS-6. - U.S. Net Monetary Gold Transactions with Foreign Countries and International and Regional Organizations

[^16]2) Reflects the United States payment of the $\$ 259$ million increase in its gold subscription to the International Monetary Fund less gold deposited by the International Monetary Fund.

## Backeround

Data relating to capital movements between the United States and foreign countries have been collected since 1935. pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Statistics on the principal types of data and the principal countries are published monthly in the "Treasury Bulletin." Reports are filed with the Federal Reserve Banks by banks, securities brokers and dealers, and nonbanking concerns in the United States. These statisties ar, then consolidated, and are published by the Troacury as fromptly as possible.

The report forms and instructions used in the collection of the statistics have been revised a number of times. The most recent general revision of the report forms became effective with reports as of May 31, 1963. 1/

The present form of the published presentation of the "Capital Movements" statistics was introdueed in the May 1960 issue of the "Bulletin." The principal chances were the rearrangement of the tables to oring together in separate sections all the data relevant to the same statistical series; the expansion of the time series on aggregate liahilities and claims reported by banks to show more delniled hrfakdowns by type of holder and type of liability and claim; and the presentation of statistics not previously publisherl on the shortterm liquid claims of large nonbanking concerns.

## Basic definitions

The term "foreigner" as used in the "reasury reports covers all institutions and individuals domiciled outside the United States, including United States citizens domiciled abroad, and the foreign branches, subsidiaries and offices of United States banks and business concerns; the central governments, central banks and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located. The term "foreigncr" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled, as shown on the records of reporting institutions. For a mumber of reasons, the geographical breakdown of the reported data my not in all cases reflect the ultimate ownership of the assets. Reporting institutions are not expected to go beyond the addresses shown on their records, and so may not be aware of the country of domicile of the ultimate beneficiary. Fu thermore, U.S. liabilities arising from deposits of dollars with foreign banks are reported generally in the Treasury statistics as liabilities to foreign banks, whereas the liability of the foreign bank receiving the deposit may be to foreign official institutions or residents of another country.

Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the appropriate international or regional classification except for the Bank for International Settlements and the European Fund, which are included in the classification "Other Western Europe."
"Short-term" refers to obligations payable on demand or having an original maturity of one year or less. "Iong-term" refers to obligations having an original maturity of more than one year, and includes securities having no contractual maturity.

## Report.ing coverage

Reports are required from banks, securities brokers and dealers, and nonbanking concerns in the United States, including the branches, agencies, subsidiaries, and other affiliates in the United States of foreign firms. Institutions which have total reportable liatilities, claims or securities transactions below a specified exemption level, based on the average for the report dates during a six-month period, including the current report date, are exempt from reporting.

Banks file reports monthly covering their short-term and long-term liabilities to and claims on foreigners; an exemption of $\$ 500,000$ is applicable to reports in each of these categories. Twice a year they also report their short-term dollar liabilities to foreigners in countries notshown separately on the monthly report of liabilities. Banks, securities brokers and dealers, and in some instances, nonbanking concerns, report monthly their transactions in securities with foreigners; the applicable exemption level is \$100,000.

Quarterly reports are filed by exporters, importers, inJustrial and commercial concerns, financial institutions other than banks and brokers, and other nonbanking firms if their liabilities or claims are $\$ 500,000$ or more. Such firms also report the liquid portion of their claims for each month-end when they have reportakle claims of $\$ 1$ million or more. The foreign credit, and debit balances of securities brokers and dealers are reported quarterly; the exemption level applicable to these reports is $\$ 100,000$.

## Description of statistics

Data collected on the Treasury Foreign Exchange Forms are published in the "Treasury Bulletin" in six section.. Each section contains all the data relevant to the same statistical series, with tables showing time series by type and country, and the detailed breakdown of the latest available data.

Section I covers the short-term and long-term liabilities to foreigners reported by banks in the United States. The dat.a exclude the holdings of dollars of the lnternational Monetary Fund derived from payments of the United States subscription and from the exchange transactions and other operations of the Fund. (Liatilities representing the "gold investment" of the Fund, however, are included.) The data also exclude U.S. Treasury letters uf credit, and nonnegotiable, noninterestbearing special notes of the United States held by international and regional organizations.

Section 11 presents the short-term and long-term clains on foreigners reported by banks in the United States, including claims held for their own account and for the accourt of their domestic customers. The data exclude convertible foreign currencies held by U.S. munetary authorities.

Section. JII and IV show respectively the liabilities to, and celains on, forcigners reporled by exporters, importers, industria] and commercial firins, financial institutions other than hanks and brokers, and other nontanking concerns in the United States. The data e\%clurle the intercompany accounts of business enterprises in the United States with their own brammes and subsidiaries abrcrif or with their foreign farent compnies. (Sum transactiors arc reported by business firms to the Department of Commerce on its direct investment forms.) The datis also exclute claims held throurh United States banks. Separate figures are shown in Section IV for the short-term liquid claims of large nonbanking concerns in the United States.

Section $V$ contains datis on transact,ions in all types of long-lemn dmestic and forsign securities by foreigners reported by barks and hrokers in the United States (excepl, nonmarketable U.S. Treasury nolas, foreign series, and nonmarketable U.S. Treasury bonds ard notes, foreigr currency series, which are shown in "lnternational Financial SLatistics" section, Table JFS-4). The data cover new issues of securities, transantions in outstanding issues, and redemptions of securitics. They includc transactions executed in the United States for the account of foreigners, and transactions executed abrond for the account of reporting institutions and their domestic customers. The data include some transactions which are elassificd as direct investments in the balance of payments accounts. The data exclude securities issued abroad by foreign subsidiaries of U.S. corporations, some of which are treated in the balance of payments as issues of U.S. corporations.

The geographical breakdown of the data on securities transactions shows the country of domicile of the foreign buyers and sellers of the securities; in the case of outstanding issues, this may differ from the country of the original issuer. The gross figures contain some offsetting transactions between foreigners. The net figures for total transactions represent transactions by foreigners with United States residents; but the net figures for transactions of individual countries and areas may include some transactions between foreigners of different countries. Beginning with data for 1969 , transactions between foreigners in new issues not oflered for sale to United States residents but managed by underwriters in the United States are excluded from the gross figures.

Section VI comprises two tables on the money credit and debit balances, as appearing on the books of reporting brokers and dealers in the United States, in accounts of foreigners with them, and in their accounts carried by foreigners.

The data published in these sections do not cover all types of reported capital movements between the United States and foreign countries. The principal exclusions are the intercompany capital transactions of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies, and capital transactions of the United States Government. Consolidated data on all types of capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

Table CM-V-4. - Estimated Foreign Holdings of Marketable U.S. Government Bonds and Notes by Country

Note: Data represent estimated official and private holdings of marketable U.S. Government securities with an original maturity of more than one year. Data shown as of end year 1966 through end year 1968 (first column) are based on a July 31, 1963 benchmark survey of holdings and the regular monthly reports of securities transactions (see Table $(M-V-3)$. Data shown for end year 1968 (second column) through latest date are based on a benchmark survey as of November 30 , 1968, and the monthly transactions reports. For statistical convenience, the new series is introduced as of December 31, 1908, rather than as of the survey date.
errors in reporting during the period between the two benchmark surveys, from shifts in ownership not involving purchases or sales through U.S. banks and brokers, and from physical transfers of securities to and from abroad. It is not possible to reconcile the two series or to revise figures for earlier dates.
1 See Note above.

The financial statements of corporations and other busi-ness-type activities of the United States Government, which have appeared in the "Treasury Bulletin" since the August. 1956 issue, are compiled from reports submitted to the Treasury under Department Circular No. 966, issued January 30, 1956, and Supplement No. 1, Revised, issued June 16, 1965. These regulations were issued pursuant to the Budget and Accounting Procedures Act of 1950. They superseded Budget-Treasury Regulation No. 3, issued under Executive Order No. 8512 of August 13, 1940, as amended by Executive Order No. 9084 of March 3, 1942, under which financial statements previously published in the Bulletin were submitted.

Department Circular No. 966 requires submission of financial statements by all wholly owned and mixed-ownership Government corporations specifically included in the Government Corporation Control Act, as amended (31 U.S.C. 846, 856); and all other activities of the Government operating as revolving funds. Other activities and agencies whose operations, services, or functions are largely self-liquidating or primarily of a revenue-producing nature, and activities and agencies whose operations result in the accumulation of substantial inventories, investments, and other recoverable assets, were brought under the regulations as the agency accounting systems were developed to where they were capable of furnishing the required financial reports.

Four kinds of financial statements are called for by Department Circular No. 966. They are statements of financial condition, income and expense, source and application of funds, and certain financial contingencies. The statements of financial condition are published quarterly and appear as Section $I$, Table GA-I-1. The first statements of financial condition published under Circular 966 were as of March 31, 1956, and
were presented in the August 1956 Bulletin. Loans shown on the statements of financial condition are classified by type and account in Section III, Table GA-III-2. Statements of income and expense and source and application of funds are published semiannually, for June 30 and December 31 reporting dates, and appear as Section I, Tables GA-I-2 and GA-I-3. The first of these statements under Circular 966 covered the fiscal year 1956, and were published in the January 1957 Bulletin. All funds shown in the statements are noted to indicate whether they are public enterprise revolving funds, intragovernmental revolving funds, trust or trust revolving funds, or general and special funds.

Supplement No. 1, when originally issued in 1956, extended the coverage to include all executive agencies and activities not previously reporțing under Circular 966, but required only a statement of financial condition annually as of June 30. These were activities which were not principally of a businesstype nature. Those which had not yet developed formal accounting procedures to provide complete balance-sheet type statements were temporarily authorized to report only assets. Thus, the supplement rounded out provisions for information on properties and other assets, as well as liabilities, of the United States Government all of which is needed by Treasury for the compilation of complete Government-wide financial reports. The first comprehensive reporting under the original Supplement No. 1 was for June 30, 1957, and the data were published in the December 1957 Bulletin as Part B of Table 4 in Section I. Statements submitted under this supplement are now published annually in Section II, Table GA-II-I. The revision to Supplement No. I in 1965 made no basic change to the overall purpose of the originally issued supplement; it updated and consolidated 911 gmendments to both the regulation and instructions.

(In thousands of dollars)

## Footnotes to Table GA-I-1

(PE) Public enterprise revolving funds
(IR) Intragovernmentel revolving funds
(TR) Trust revolving funds.
(Ges) Ceneral and special funds (also includes loan accounts of enterprises in liquidation and foreign currency)

1) These amounts consist mainly of unexpended balances of genersi. special, and revolving fund accounts against which checks may be drawn to pay proper charges under these funds. The funds are considered as assets of the agencies, but are not assets of the United States Government since funds must be provided out of cash balances of the Treasurer of the United States and future receipts to take care of checks to be issued against the balances.
2/ Represents Federal National Mortgage Association, secondary market operations fund debentures.
3/ Includes foreign currency assets, representing loans and other receivables recoverable in foreign currency es well es belances of foreign currencies in United States depositaries, aggregating \$6,049 million in dollar equivalent. These currencies, acquired primarily without the payment of dollars, were generated under various Government programs, principally the Agricultural Trade Development and Assistance Act of 1954, as amended, and the Mutual Security Acts, as amended. Dollar equivalents are computed for reporting purposes, provide a common denominator for the currencies of the many countries involved. Foreign currencies on hand and on deposit and loans under section 104 (e) of the Agricultural Trade Development and Assistance Act of 1954, as amended, are stated at the rates as of March 31, 1970 at which the United States could purchase currencies on the market for regular operating purposes. Other loans are stated at the rates at which they are to be repaid or at rates in effect when the loans are extended. Currencies that are dollar denominated or guaranteed as to rates of exchange are stated at rates specified in the agreements.
4 Excludes personal property which had an original acquisition cost value of $\$ 11$ million accounted for by this fund.
5f Certain corporations and other business-type activities thet have submitted statements of financiel condition guarantee and insure loans made by private financial institutions and insure deposits banks and savings and loan associations. These commitments are ex cluded from their balance sheets. The major agencies that heve these items and the principel amounts thereof are as follows:
