Treasury Financing Operations

Strip bills

On November 17 tenders were invited for additional amounts of seven outstanding series of Treasury bills, the weekly issues maturing on January 7, 14, 21, and 28, and February 4, 11, and 18, 1971, to an aggregate amount of \$2.1 billion, or thereabouts, to be issued December 2.

Tenders were opened on November 25 and totaled \$3,560 million, of which \$2,105 million was accepted including \$273 million of noncompetitive tenders. The average bank discount rate was 4.695 percent, based on 57 days, the average number of days to maturity for the seven issues. The limit for noncompetitive tenders was \$420,000. Bidders were required to submit a single price for each tender. Tenders had to be in the minimum amount of \$70,000 or in multiples of \$35,000 over that amount.

Any qualified depository was permitted to make payment by credit in its Treasury tax and loan account for bills allotted to it for itself and its customers up to any amount for which it was qualified in excess of existing deposits.

2-Month and One-year bills

On November 17 tenders were invited for \$500 million, or thereabouts, of 274-day Treasury bills, representing an additional amount of bills dated August 31, 1970, maturing August 31, 1971, and for \$1.2 billion, or thereabouts, of 365-day Treasury bills to be dated November 30, 1970, to mature November 30, 1971, both series to be issued November 30. These issues were to refund \$1,501 million of bills maturing November 30. Tenders were opened on November 24.

Tenders received for the 274-day bills totaled \$1,323 million, of which \$501 million was accepted, including \$21 million of noncompetitive tenders. The average bank discount rate was 5.084 percent.

Tenders received for the 365-day bills totaled \$1,854 million, of which \$1,200 million was accepted, including \$40 million of noncompetitive tenders. The average bank discount rate was 5.010 percent.

13-week and 26-week bills

Issues of regular weekly Treasury bills in November totaled \$12.9 billion, replacing \$12.4 billion of maturing bills. There were three 91-day issues of \$1.8 billion,

one 90-day issue of \$1.9 billion, three 182-day issues of \$1.4 billion, and one 181-day issue of \$1.4 billion. Average rates for the new issues are shown in the following table.

Treasury Bills - General

Treasury bills are sold on a bid basis. The face amount is payable without interest at maturity. They are issued in bearer form only, and in denominations of \$10,000, \$15,000, \$50,000, \$100,000, \$500,000, and \$1,000,000 (maturity value). 2/ Tenders are received at Federal Reserve banks and branches. Each tender must be for a minimum of \$10,000. Tenders over \$10,000 must be in multiples of \$5,000.

Banking institutions generally may submit tenders for account of customers. Tenders may be made without deposit by incorporated banks and trust companies and by responsible and recognized dealers in investment securities. Tenders from others must be accompanied by payment of 2 percent of the face amount of bills applied for, unless the tenders are accompanied by an express guaranty of payment by an incorporated bank or trust company.

Noncompetitive tenders (without stated price), usually for \$200,000 or less from any one bidder, are accepted in full at the average price of accepted competitive bids for an issue.

Payment for accepted tenders must be made or completed on the date of issue, in cash or other immediately available

funds or in a like face amount of Treasury bills maturing on that date. Payment for 13-week, 26-week, 9-month, and one-year bills may not be made by credit in Treasury tax and loan accounts.

"Obligations" are the basis on which the use of funds is controlled in the Federal Government. They are recorded at the point at which the Government makes a firm commitment to acquire goods or services and are the first of the four key events--order, delivery, payment, consumption--which characterize the acquisition and use of resources. In general, they consist of orders placed, contracts awarded, services received, and similar transactions requiring the disbursement of money.

The obligational stage of Government transactions is a strategic point in gauging the impact of the Government's operations on the national economy, since it frequently represents for business firms the Government commitment which stimulates business investment, including inventory purchases and employment of labor. Disbursements may not occur for months after the Government places its order but the order itself usually causes immediate pressure on the private economy.

Obligations are classified according to a uniform set

of categories which are based upon the nature of the transaction without regard to its ultimate purpose. All payments for salaries and wages, for example, are reported as personnel compensation, whether the personal services are used in current operations or in the construction of capital items.

Federal agencies and firms often do business with one another; in doing so, the "buying" agency records obligations, and the "performing" agency records reimbursements. In Table FO-1, obligations that are incurred within the Government are distinguished from those incurred outside the Government. Tables FO-2, 3, and 4 show only those incurred outside.

Obligation data for the administrative budget fund accounts were first published in the September 1967 Treasury Bulletin and the trust fund accounts were first published in the October 1967 Bulletin. Beginning with the April 1968 Bulletin, the data are on the basis of the budget concepts adopted pursuant to the recommendations of the President's Commission on Budget Concepts.

1/ For Federal Budget presentation a concept of "net obligations incurred" is generally used. This concept eliminates transactions within the Government and revenue and reimbursements from the public which by statute may be used by Government agencies without appropriation action by the Congress. Summary figures on this basis follow. (This data is on the basis of Reports on Obligations received from the agencies prior to reports submitted for Budget

presentation and therefore may differ somewhat from the Budget document.)

ACCOUNT OF THE TREASURER OF THE UNITED STATES

Source and Availability of the Balance in the Treasurer's Account

The working cash of the Treasury is held mainly in Treasurer's accounts with Federal Reserve banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banks throughout the country.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of money from a customer's account to the tax and loan account in the same bank. On occasions, to the extent authorized by the

Treasury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the account of their customers.

The tax and loan account system permits the Treasury to leave funds in banks and in the communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on bank reserves and the economy.

A detailed description of the Treasury's depositary system may be found in the Annual Report of the Secretary of the Treasury for 1955, pages 275-284.

1/ Amounts shown, beginning January 1963, are net of uncollected items, exchanges, etc. Previously these items were included under liabilities.

2/ Includes reserves and other deposits of the Board of Trustees, Postal Savings System, and uncollected items, exchanges, etc., through December 1962. Effective January 1963 balances of the Postal Savings

System funds were transferred to deposit fund accounts and became demand obligations of the Treasury. Balances of these funds, therefore, are no longer liabilities within the general account of the Treasurer. Uncollected items, exchanges, etc., also previously shown as liabilities were combined with "Unclassified collections, etc." shown under assets.

Footnotes to Table FD-2

Source: On the basis of the daily Treasury statement.

Note: The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outstanding on that date (the amount actually borrowed in the case of securities sold at a premium or discount, beginning with May 1960). The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. The average

annual interest rate is computed by dividing the computed annual interest charge for the total, or for any group of issues, by the corresponding principal amount. Beginning with data for December 31, 1958, the computation is based on the rate of effective yield for issues sold at premium or discount. Prior to that date it was based on the coupon rate for all issues.

- ^{1/} Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate.
^{2/} On United States savings bonds the rate to maturity is applied against the amount outstanding.

Note: In these tables sales of Series A-F and J bonds are included at issue price, and redemptions and amounts outstanding at current redemption value. Series G, H, and K are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured J and K bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, and are then transferred to matured debt on which interest has ceased.

- 1/ Sales and redemption figures include exchanges of minor amounts of (1) matured Series E bonds for Series G and K bonds from May 1951 through April 1957 and (2) Series F and J bonds for Series H bonds beginning January 1960; however, they exclude exchanges of Series E bonds for Series H bonds, which are reported in Table SB-3.
- 2/ Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the Treasury Bulletin.
- 3/ Because there is a normal lag in classifying redemptions, the distribution of redemption between sales price and accrued discount has been estimated. Beginning with the Treasury Bulletin of March 1961 the

method of distributing redemptions between sales price and accrued discount has been changed to reflect the distribution shown in final reports of classified redemptions. All periods shown have been revised on this basis.

- 4/ Series F and G sales were discontinued April 30, 1952, and Series J and K sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent adjustments.
- 5/ Includes exchanges of Series 1941 F and G savings bonds for 3-1/4% marketable bonds of 1978-83.
- 6/ Includes exchanges of Series 1948 F and G bonds for 4-3/4% marketable notes of 1964.
- 7/ Includes exchanges of Series 1949 F and G bonds for 4% marketable bonds of 1969.
- 8/ Includes exchanges of Series 1950 F and G bonds for 3-7/8% marketable bonds of 1968.
- 9/ Includes exchanges of Series 1951 and 1952 F and G bonds for 3-7/8% marketable bonds of 1971 and 4% marketable bonds of 1980.
- 10/ Represents changes in the amounts of redemptions not yet classified between matured and unmatured issues.
- * Less than \$500,000.

The monthly Treasury Survey of Ownership covers securities issued by the United States Government, Federal agencies, Federally-sponsored agencies, and the District of Columbia. The banks and insurance companies included in the Survey currently account for about 90 percent of all such securities held by these institutions. The similar proportion for corporations and for savings and loan associations is 50 percent, and for State and local governments, 70 percent. Data were first published for banks and insurance companies in the May

1941 Treasury Bulletin, for corporations and savings and loan associations in the September 1960 Bulletin, and for State and local governments in the February 1962 Bulletin.

Holdings by commercial banks distributed according to Federal Reserve member bank classes and nonmember banks are published for June 30 and December 31. Holdings by corporate pension trust funds are published quarterly, first appearing in the March 1954 Bulletin.

^{1/} Beginning April 1953, prices are closing bid quotations in the over the counter market. Prices for prior dates are the mean of closing bid and ask quotations. "When issued" prices are included in the history beginning October 1941. Dates of highs and lows in case of recurrences are the latest dates.

^{2/} On callable issues market convention treats the yields to earliest call date as more significant when an issue is selling above par, and to maturity when it is selling at par or below.

^{3/} Included in the average yield of long term taxable Treasury Bonds as shown under "Average Yields of Long Term Bonds."

1/ Treasury bond yields are based on a composite of closing bid quotations in the over-the-counter market. Series includes bonds on which the interest income is subject to normal tax and surtax which are neither due nor callable before 10 years. For bonds currently in series, see Table MQ-3.

2/ Treasury series based on reoffering yields of new corporate bonds rated Aa by Moody's Investors Service. The series is calculated to reflect bonds with no call protection. Currently 5 years of call

protection is valued at 25 basis points.

3/ Index of new issue reoffering yields on Aa 20 year general obligations compiled by Investment Bankers Association of America. Weekly series are not available prior to January 1970.

4/ One or more new long-term bonds added to the average.

5/ An existing bond dropped from the average.

INTERNATIONAL FINANCIAL STATISTICS

The tables in this section are designed to provide data on United States reserve assets and liabilities and other statistics related to the United States balance of payments and international financial position. A number of changes were introduced in the May 1967 Bulletin to increase the usefulness of this section.

Table IFS-1 shows the reserve assets of the United States, including its gold stock, special drawing rights held in the Special Drawing Account in the International Monetary Fund, holdings of convertible foreign currencies, and reserve position in the International Monetary Fund.

Table IFS-2 brings together the various statistical components of the liabilities which enter into the United States balance of payments calculated on the liquidity basis. The inclusion of the United States reserve position in the International Monetary Fund in Table IFS-1 requires that the

"holdings of dollars" of the Fund be excluded from the data on liabilities to foreigners, in order to avoid double counting.

Table IFS-3 presents an area breakdown of United States liquid liabilities to official institutions of foreign countries.

Table IFS-4 shows United States Treasury nonmarketable bonds and notes issued to official institutions of foreign countries.

Table IFS-5 sets forth the factors which affect the United States position in the International Monetary Fund.

Table IFS-6 presents United States net monetary gold transactions with foreign countries and international and regional organizations.

^{1/} Includes gold sold to the United States by the International Monetary Fund with the right of repurchase, and gold deposited by the International Monetary Fund to mitigate the impact on the U.S. gold stock of foreign purchases for the purpose of making gold subscriptions to the Fund under quota increases. For corresponding liabilities see Table IFS-2.

^{2/} Includes gold in Exchange Stabilization Fund, which is not included in Treasury gold figures shown in daily Treasury statement. See "Account of the Treasurer of the United States," Table TUS-4.

^{3/} Includes initial allocation on January 1, 1970, of \$867 million of special drawing rights (SDR) in the Special Drawing Account in the International Monetary Fund, plus or minus transactions in SDR since that time.

^{4/} Includes holdings of Treasury and Federal Reserve System.

^{5/} The United States has the right to purchase foreign currencies equivalent to its reserve position in the Fund automatically if needed. Under appropriate conditions the United States could purchase additional amounts equal to the United States quota. See Table IFS-5.

^{6/} Reserve position includes, and gold stock excludes, \$259 million gold subscription to the Fund in June 1965 for a U.S. quota increase which became effective on February 23, 1966. In figures published by the Fund from June 1965 through January 1966, this gold subscription was included in the U.S. gold stock and excluded from the reserve position.

^{7/} Includes gain of \$67 million resulting from revaluation of the German mark in October 1969, of which \$13 million represents gain on German mark holdings at time of revaluation. See also footnotes 3 and 4, Table IFS-4.

Note: Table is based on Treasury Department data and on data reported to the Treasury Department by banks and brokers in the United States. Data correspond to statistics following in this section and in the "Capital Movements" section, except for minor rounding differences. Table excludes International Monetary Fund "holdings of dollars," and holdings of U.S. Treasury letters of credit and nonnegotiable, non-interest-bearing special U.S. notes held by other international and regional organizations. The liabilities figures are used by the Department of Commerce in the statistics measuring the balance of international payments of the United States on the liquidity basis; however, the balance-of-payments statistics include certain adjustments to Treasury data prior to 1963 and some rounding differences, and may differ because of varying timing in incorporating revisions of Treasury data. The table does not include certain nonliquid liabilities to foreign official institutions which enter into the calculation of the official reserve transactions balance by the Department of Commerce.

1/ Represents liability on gold deposited by the International Monetary Fund to mitigate the impact on the U.S. gold stock of foreign purchases for the purpose of making gold subscriptions to the Fund under quota increases.

2/ U.S. Government obligations at cost value and funds awaiting investment obtained from proceeds of sales of gold by the International Monetary Fund to the United States to acquire income-earning assets. Upon termination of investment, the same quantity of gold can be

reacquired by the International Monetary Fund.

3/ Includes Bank for International Settlements and European Fund.

4/ Derived by applying reported transactions to benchmark data; breakdown of transactions by type of holder estimated 1960-1963. Includes securities issued by corporations and other agencies of the United States Government, which are guaranteed by the United States.

5/ Principally the International Bank for Reconstruction and Development and the Inter-American Development Bank.

6/ Includes difference between cost value and face value of securities in IMF gold investment account. Liabilities data reported to the Treasury include the face value of these securities, but in this table the cost value of the securities is included under "Gold investment." The difference, which amounted to \$43 million as of the end of 1969, is included in this column.

7/ Includes total foreign holdings of U.S. Government bonds and notes, for which breakdown by type of holder is not available.

8/ Data on the two lines shown for this date differ because of changes in reporting coverage. Figures on the first line are comparable in coverage to those shown for the preceding date; figures on the second line are comparable to those shown for the following date.

9/ Data are comparable in coverage to those shown for the preceding date; for data comparable to those shown for the following date, see second line opposite December 1969.

10/ Includes \$17 million increase in dollar value of foreign currency liabilities resulting from revaluation of the German mark in October 1969.

Note: The initial U. S. quota in the International Monetary Fund was \$2,750 million. The U.S. quota was increased to \$4,125 million in 1959, and to \$5,160 million in February 1966. Under the Articles of Agreement, subscription payments equal to the quota have been made 25 percent in gold and 75 percent in dollars.

1/ Represents net Fund sales of gold to acquire U.S. dollars for use in Fund operations. Does not include transactions in gold relating to gold deposit or gold investment (see Table IFS-2).

2/ Positive figures represent purchases from the Fund of currencies of other members for equivalent amounts of dollars; negative figures represent repurchases of dollars, including dollars derived from charges on purchases and from other net dollar income of the Fund. The United States has a commitment to repurchase within 3-5 years, but only to the extent that the Fund's holdings of dollars exceed 75 percent of the U.S. quota. Purchases of dollars by other countries reduce the U.S. commitment to

repurchase by an equivalent amount.

3/ Beginning January 1970, includes dollars obtained by countries other than the United States from sales of gold to the Fund.

4/ Represents the United States gold tranche position in the Fund (the United States quota minus the Fund's holdings of dollars), which is the amount that the United States could purchase in foreign currencies automatically if needed. Under appropriate conditions, the United States could purchase additional amounts equal to the United States quota.

5/ Includes \$259 million gold subscription to the Fund in June 1965 for a U.S. quota increase which became effective on February 23, 1966. In figures published by the Fund from June 1965 through January 1966, this gold subscription was included in the U.S. gold stock and excluded from the reserve position.

6/ Includes \$30 million of special drawing rights.

CAPITAL MOVEMENTS

Background

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Statistics on the principal types of data and the principal countries are published monthly in the "Treasury Bulletin." Reports are filed with the Federal Reserve Banks by banks, securities brokers and dealers, and nonbanking concerns in the United States. These statistics are then consolidated, and are published by the Treasury as promptly as possible.

The report forms and instructions used in the collection of the statistics have been revised a number of times. The most recent general revision of the report forms became effective with reports as of May 31, 1963. 1/

The present form of the published presentation of the "Capital Movements" statistics was introduced in the May 1969 issue of the "Bulletin." The principal changes were the rearrangement of the tables to bring together in separate sections all the data relevant to the same statistical series; the expansion of the time series on aggregate liabilities and claims reported by banks to show more detailed breakdowns by type of holder and type of liability and claim; and the presentation of statistics not previously published on the short-term liquid claims of large nonbanking concerns.

Basic definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including United States citizens domiciled abroad, and the foreign branches, subsidiaries and offices of United States banks and business concerns; the central governments, central banks and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located. The term "foreigner" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled, as shown on the records of reporting institutions. For a number of reasons, the geographical breakdown of the reported data may not in all cases reflect the ultimate ownership of the assets. Reporting institutions are not expected to go beyond the addresses shown on their records, and so may not be aware of the country of domicile of the ultimate beneficiary. Furthermore, U.S. liabilities arising from deposits of dollars with foreign banks are reported generally in the Treasury statistics as liabilities to foreign banks, whereas the liability of the foreign bank receiving the deposit may be to foreign official institutions or residents of another country.

Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the appropriate international or regional classification except for the Bank for International Settlements and the European Fund, which are included in the classification "Other Western Europe."

"Short-term" refers to obligations payable on demand or having an original maturity of one year or less. "Long-term" refers to obligations having an original maturity of more than one year, and includes securities having no contractual maturity.

Reporting coverage

Reports are required from banks, securities brokers and dealers, and nonbanking concerns in the United States, including the branches, agencies, subsidiaries, and other affiliates in the United States of foreign firms. Institutions which have total reportable liabilities, claims or securities transactions below a specified exemption level, based on the average for the report dates during a six-month period, including the current report date, are exempt from reporting.

Banks file reports monthly covering their short-term and long-term liabilities to and claims on foreigners; an exemption of \$500,000 is applicable to reports in each of these categories. Twice a year they also report their short-term dollar liabilities to foreigners in countries not shown separately on the monthly report of liabilities. Banks, securities brokers and dealers, and in some instances, nonbanking concerns, report monthly their transactions in securities with foreigners; the applicable exemption level is \$100,000.

Quarterly reports are filed by exporters, importers, industrial and commercial concerns, financial institutions other than banks and brokers, and other nonbanking firms if their liabilities or claims are \$500,000 or more. Such firms also report the liquid portion of their claims for each month-end when they have reportable claims of \$1 million or more. The foreign credit and debit balances of securities brokers and dealers are reported quarterly; the exemption level applicable to these reports is \$100,000.

Description of statistics

Data collected on the Treasury Foreign Exchange Forms are published in the "Treasury Bulletin" in six sections. Each section contains all the data relevant to the same statistical series, with tables showing time series by type and country, and the detailed breakdowns of the latest available data.

Section I covers the short-term and long-term liabilities to foreigners reported by banks in the United States. The data exclude the holdings of dollars of the International Monetary Fund derived from payments of the United States subscription and from the exchange transactions and other operations of the Fund. (Liabilities representing the "gold investment" of the Fund, however, are included.) The data also exclude U.S. Treasury letters of credit, and nonnegotiable, noninterest-bearing special notes of the United States held by international and regional organizations.

Section II presents the short-term and long-term claims on foreigners reported by banks in the United States, including claims held for their own account and for the account of their domestic customers. The data exclude convertible foreign currencies held by U.S. monetary authorities.

Sections III and IV show respectively the liabilities

CAPITAL MOVEMENTS

to, and claims on, foreigners reported by exporters, importers, industrial and commercial firms, financial institutions other than banks and brokers, and other nonbanking concerns in the United States. The data exclude the intercompany accounts of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. (Such transactions are reported by business firms to the Department of Commerce on its direct investment forms.) The data also exclude claims held through United States banks. Separate figures are shown in Section IV for the short-term liquid claims of large nonbanking concerns in the United States.

Section V contains data on transactions in all types of long-term domestic and foreign securities by foreigners reported by banks and brokers in the United States (except nonmarketable U.S. Treasury notes, foreign series, and nonmarketable U.S. Treasury bonds and notes, foreign currency series, which are shown in "International Financial Statistics" section, Table IFS-4). The data cover new issues of securities, transactions in outstanding issues, and redemptions of securities. They include transactions executed in the United States for the account of foreigners, and transactions executed abroad for the account of reporting institutions and their domestic customers. The data include some transactions which are classified as direct investments in the balance of payments accounts. The data exclude securities issued abroad by foreign subsidiaries of U.S. corporations, some of which are treated in the balance of payments as issues of U.S. corporations.

The geographical breakdown of the data on securities transactions shows the country of domicile of the foreign buyers and sellers of the securities; in the case of outstanding issues, this may differ from the country of the original issuer. The gross figures contain some offsetting transactions between foreigners. The net figures for total transactions represent transactions by foreigners with United States residents; but the net figures for transactions of individual countries and areas may include some transactions between foreigners of different countries. Beginning with data for 1969, transactions between foreigners in new issues not offered for sale to United States residents but managed by underwriters in the United States are excluded from the gross figures.

Section VI comprises two tables on the money credit and debit balances, as appearing on the books of reporting brokers and dealers in the United States, in accounts of foreigners with them, and in their accounts carried by foreigners.

The data published in these sections do not cover all types of reported capital movements between the United States and foreign countries. The principal exclusions are the intercompany capital transactions of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies, and capital transactions of the United States Government. Consolidated data on all types of capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

1/ Copies of the reporting forms and instructions may be obtained from the Office of Balance of Payments Programs, Operations and Statistics, Office of the Assistant Secretary for International Affairs, Treasury Department, Washington, D.C. 20220 or from Federal Reserve Banks.

Note: Data represent estimated official and private holdings of marketable U.S. Government securities with an original maturity of more than one year. Data shown as of end year 1966 through end year 1968 (first column) are based on July 31, 1963 benchmark survey of holdings and the regular monthly reports of securities transactions (see Table CM-V-3). Data shown for end year 1968 (second column) through latest date are based on a benchmark survey as of November 30, 1968, and the monthly transactions reports. For statistical convenience, the new series is introduced as of December 31, 1968, rather than as of the survey date.

The difference between the two series is believed to arise from errors in reporting during the period between the two benchmark surveys, from shifts in ownership not involving purchases or sales through U.S. banks and brokers, and from physical transfers of securities to and from abroad. It is not possible to reconcile the two series or to revise figures for earlier dates.

FINANCIAL OPERATIONS OF GOVERNMENT AGENCIES AND FUNDS

The financial statements of corporations and other business-type activities of the United States Government, which have appeared in the "Treasury Bulletin" since the August 1956 issue, are compiled from reports submitted to the Treasury under Department Circular No. 966, issued January 30, 1956, and Supplement No. 1, Revised, issued June 16, 1965. These regulations were issued pursuant to the Budget and Accounting Procedures Act of 1950. They superseded Budget-Treasury Regulation No. 3, issued under Executive Order No. 8512 of August 13, 1940, as amended by Executive Order No. 9084 of March 3, 1942, under which financial statements previously published in the Bulletin were submitted.

Department Circular No. 966 requires submission of financial statements by all wholly owned and mixed-ownership Government corporations specifically included in the Government Corporation Control Act, as amended (31 U.S.C. 846, 856); and all other activities of the Government operating as revolving funds. Other activities and agencies whose operations, services, or functions are largely self-liquidating or primarily of a revenue-producing nature, and activities and agencies whose operations result in the accumulation of substantial inventories, investments, and other recoverable assets, were brought under the regulations as the agency accounting systems were developed to where they were capable of furnishing the required financial reports.

Four kinds of financial statements are called for by Department Circular No. 966. They are statements of financial condition, income and expense, source and application of funds, and certain financial contingencies. The statements of financial condition are published quarterly and appear as Section I, Table GA-I-1. The first statements of financial condition published under Circular 966 were as of March 31, 1956, and

were presented in the August 1956 Bulletin. Loans shown on the statements of financial condition are classified by type and account in Section III, Table GA-III-2. Statements of income and expense and source and application of funds are published semiannually, for June 30 and December 31 reporting dates, and appear as Section I, Tables GA-I-2 and GA-I-3. The first of these statements under Circular 966 covered the fiscal year 1956, and were published in the January 1957 Bulletin. All funds shown in the statements are noted to indicate whether they are public enterprise revolving funds, intragovernmental revolving funds, trust or trust revolving funds, or general and special funds.

Supplement No. 1, when originally issued in 1956, extended the coverage to include all executive agencies and activities not previously reporting under Circular 966, but required only a statement of financial condition annually as of June 30. These were activities which were not principally of a business-type nature. Those which had not yet developed formal accounting procedures to provide complete balance-sheet type statements were temporarily authorized to report only assets. Thus, the supplement rounded out provisions for information on properties and other assets, as well as liabilities, of the United States Government all of which is needed by Treasury for the compilation of complete Government-wide financial reports. The first comprehensive reporting under the original Supplement No. 1 was for June 30, 1957, and the data were published in the December 1957 Bulletin as Part B of Table 4 in Section I. Statements submitted under this supplement are now published annually in Section II, Table GA-II-1. The revision to Supplement No. 1 in 1965 made no basic change to the overall purpose of the originally issued supplement; it updated and consolidated all amendments to both the regulation and instructions.
