Treasury Financing Operations

9-Month and One-Year Bills

On August 18 it was announced that the first steps were being taken toward establishing regular offerings of 52-week Treasury bills to ultimately replace the monthly offerings of 9-month and one-year bills. In that connection, instead of offering one-year bills to mature on August 31, 1973, 362-day bills maturing on Tuesday, August 28, 1973, were offered. It was also announced that the final sales of 9-month bills will be made to mature in late September and late October.

On August 18 tenders were invited for \$500 million, or thereabouts, of 273-day Treasury bills, representing an additional amount of bills dated May 31, 1972, maturing May 31, 1973, and for \$1,800 million, or thereabouts, of 362-day Treasury bills to be dated August 31, 1972, to mature August 28, 1973, both series to be issued August 31. These issues were to refund \$1,700 million of bills maturing August 31. Tenders were opened August 24.

Tenders received for the 273-day bills totaled \$1,889 million, of which \$501 million was accepted, including \$17 million of noncompetitive tenders. The average bank discount rate was 5.040 percent.

Tenders received for the 362-day bills totaled \$4,914 million, of which \$1,804 million was accepted, including \$33 million of noncompetitive tenders. The average bank discount rate was 5.178 percent.

13-Week and 26-Week Bills

Issues of regular weekly Treasury bills in August totaled \$20.5 billion, replacing \$20.1 billion of maturing bills. There were four 91-day issues of \$2.3 billion, one 92-day issue of \$2.3 billion and five 182-day issues of \$1.8

billion. Average rates for the new issues are shown in the following table.

Treasury Bills - General

Treasury bills are sold on a bid basis. The face amount is payable without interest at maturity. They are issued in bearer form only, and in denominations of \$10,000, \$15,000, \$50,000, \$100,000, \$500,000, and \$1,000,000 (maturity value). Tenders are received at Federal Reserve banks and branches. Each tender must be for a minimum of \$10,000. Tenders over \$10,000 must be in multiples of \$5,000.

Banking institutions generally may submit tenders for account of customers. Tenders may be made without deposit by incorporated banks and trust companies and by responsible and recognized dealers in investment securities. Tenders from others must be accompanied by payment of 2 percent of the face amount of bills applied for, unless the tenders are accompanied by an express guaranty of payment by an incorporated bank or trust company.

Noncompetitive tenders (without stated price), usually for \$200,000 or less from any one bidder, are accepted in full at the average price of accepted competitive bids for an issue.

Treasury Financing Operations - (Continued)

Payment for accepted tenders must be made or completed on the date of issue, in cash or other immediately available funds or in a like face amount of Treasury bills maturing on that date. Payment for 13-week, 26-week, 9-month, and one-year bills may not be made by credit in Treasury tax and loan accounts.

Foreign Series and Foreign Currency Series

Foreign series securities issued in August totaled \$1,748 million, consisting of eighteen certificates of indebtedness and one note. Redemptions for the month totaled

\$2,059 million. At the end of August, foreign series securities outstanding totaled \$19,728 million. (Details are shown on page 56 .)

Foreign currency series securities issued in August consisted of one certificated denominated in Swiss francs equivalent to \$57 million. Redemptions for the month totaled an equivalent of \$56 million. At the end of August, foreign currency series securities outstanding totaled an equivalent of \$2,000 million and were denominated in German marks and Swiss francs. (Details are shown on page 58.)

Note: This table contains the data formerly included in the loan account classification, and last published in the June 1972 Preliminary Monthly Statement of Receipts and Expenditures of the U. S. Government in Section B--The Loan Account of Table III--Budget Receipts and Outlays. The loan balances presented in this table are preliminary and may not agree with the later data published

quarterly in Table GA-III-2-Loans Outstanding.

1/ The loan account/expenditure account distinction was discontinued in fiscal 1972 pursuant to GMB Circular No. A-11, Revised, Dated June 12, 1972. Data formerly classified in the "loan account" will be published monthly in the Bulletin for users' convenience while the need for such data is being assessed.

"Obligations" are the basis on which the use of funds is controlled in the Federal Government. They are recorded at the point at which the Government makes a firm commitment to acquire goods or services and are the first of the four key events--order, delivery, payment, consumption--which characterize the acquisition and use of resources. In general, they consist of orders placed, contracts awarded, services received, and similar transactions requiring the disbursement of money.

The obligational stage of Government transactions is a strategic point in gauging the impact of the Government's operations on the national economy, since it frequently represents for business firms the Government commitment which stimulates business investment, including inventory purchases and employment of labor. Disbursements may not occur for months after the Government places its order but the order itself usually causes immediate pressure on the private economy.

Obligations are classified according to a uniform set

of categories which are based upon the nature of the transaction without regard to its ultimate purpose. All payments for salaries and wages, for example, are reported as personnel compensation, whether the personal services are used in current operations or in the construction of capital items.

Federal agencies and firms often do business with one another; in doing so, the "buying" agency records obligations, and the "performing" agency records reimbursements. In Table FO-1, obligations that are incurred within the Government are distinguished from those incurred outside the Government. Tables FO-2, 3, and 4 show only those incurred outside.

Obligation data for the administrative budget fund accounts were first published in the September 1967 Treasury Bulletin and the trust fund accounts were first published in the October 1967 Bulletin. Beginning with the April 1968 Bulletin, the data are on the basis of the budget concepts adopted pursuant to the recommendations of the President's Commission on Budget Concepts.

3/ For Federal Budget presentation a concept of "net obligations incurred" is generally used. This concept eliminates transactions within the Government and revenue and reimbursements from the public which by statute may be used by Government agencies without appropriation action by the Congress. Summary figures on this basis follow. (This data is on the basis of Reports on Obligations received from the agencies prior to reports submitted for Budget

presentation and therefore may differ somewhat from the Budget document.)

ACCOUNT OF THE TREASURER OF THE UNITED STATES

Source and Availability of the Balance in the Treasurer's Account

The working cash of the Treasury is held mainly in Treasurer's accounts with Federal Reserve banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banks throughout the country.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of money from a customer's account to the tax and loan account in the same bank. On occasions, to the extent authorized by the

Treasury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the account of their customers.

The tax and loan account system permits the Treasury to leave funds in banks and in the communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on bank reserves and the economy.

A detailed description of the Treasury's depository system may be found in the Annual Report of the Secretary of the Treasury for 1955, pages 275-284.

Note: The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outstanding on that date (the amount actually borrowed in the case of securities sold at a premium or discount, beginning with May 1960). The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. The average

annual interest rate is computed by dividing the computed annual interest charge for the total, or for any group of issues, by the corresponding principal amount. Beginning with data for December 31, 1958, the computation is based on the rate of effective yield for issues sold at premium or discount. Prior to that date it was based on the coupon rate for all issues.

- ^{1/} Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate.
^{2/} On United States savings bonds the rate to maturity is applied against the amount outstanding.

PUBLIC DEBT OPERATIONS

Footnotes to Table PDO-7

Source: Daily Treasury statement and Bureau of the Public Debt.

- 1/ Original call and maturity dates are used.
- 2/ All by investors other than Federal Reserve banks.
- 3/ Rolled over into 9-month and one-year bills (see Table PDO-4).
- 4/ Tax anticipation issue: for detail of offerings beginning July 1969, see Table PDO-4; for amounts redeemed for taxes and for cash see "Note" below.
- 5/ Of this amount \$909 million of the 5-5/8% notes and \$6,156 million of the 6-3/8% notes were submitted in payment for subscriptions allotted for the 7-3/4% Treasury Notes of Series C-1971 which were offered on a cash basis. Holders of the maturing notes were not offered preemptive rights to exchange their holdings for the new notes. (For detail of offerings see Table PDO-4).
- 6/ Of this amount \$10 million of the 6-3/8% notes and \$180 million of the 4% bonds were exchanged by Federal Reserve banks and Government accounts for 7-1/2% notes of Series C-1972. Other holders of the maturing securities were not given preemptive rights to exchange their holdings for the 7-1/2% notes.

- 7/ Federal Reserve banks and Government accounts exchanged \$1,500 million of the notes for 4-7/8% notes issued November 15, 1971.
 - 8/ Subscribers exchanging these securities may elect, for Federal income tax purposes, to recognize gain or loss on account of the exchange either in the taxable year of the exchange or (except to the extent that cash is received) in the taxable year of disposition or redemption of the securities received in the exchange. Any gain to the extent that cash was received by the subscriber (other than as an interest adjustment) must be recognized in the year of the exchange.
 - 9/ The four securities due in 1974 were eligible to be exchanged only for the 6-3/8% bonds.
 - 10/ Public holders of these securities were not given preemptive rights to exchange them but they could be used in payment for new securities allotted.
 - 11/ Exchanged by Federal Reserve banks and Government accounts for 4-3/4% notes issued May 15, 1972.

Note: In these tables sales of Series A-F and J bonds are included at issue price, and redemptions and amounts outstanding at current redemption value. Series G, H, and K are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured J and K bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, and are then transferred to matured debt on which interest has ceased.

- 1/ Sales and redemption figures include exchanges of minor amounts of (1) matured Series E bonds for Series G and K bonds from May 1951 through April 1957; (2) Series F and J bonds for Series H bonds beginning January 1960; and (3) U.S. savings notes for Series H bonds beginning January 1972; however, they exclude exchanges of Series E bonds for Series H bonds, which are reported in Table SB-3.
- 2/ Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the Treasury Bulletin.
- 3/ Because there is a normal lag in classifying redemptions, the distribution of redemption between sales price and accrued discount has been estimated. Beginning with the Treasury Bulletin of March 1961 the

method of distributing redemptions between sales price and accrued discount has been changed to reflect the distribution shown in final reports of classified redemption. All periods shown have been revised on this basis.

- 4/ Series F and G sales were discontinued April 30, 1952, and Series J and K sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent adjustments.
- 5/ Includes exchanges of Series 1941 F and G savings bonds for 3-1/4% marketable bonds of 1978-83.
- 6/ Includes exchanges of Series 1948 F and G bonds for 4-3/4% marketable notes of 1964.
- 7/ Includes exchanges of Series 1949 F and G bonds for 4% marketable bonds of 1969.
- 8/ Includes exchanges of Series 1960 F and G bonds for 3-7/8% marketable bonds of 1968.
- 9/ Includes exchanges of Series 1951 and 1952 F and G bonds for 3-7/8% marketable bonds of 1971 and 4% marketable bonds of 1980.
- 10/ Represents changes in the amounts of redemptions not yet classified between matured and unmatured issues.

* Less than \$500,000.

TREASURY SURVEY OF OWNERSHIP, JULY 31, 1972

The monthly Treasury Survey of Ownership covers securities issued by the United States Government, Federal agencies, Federally-sponsored agencies, and the District of Columbia. The banks and insurance companies included in the Survey currently account for about 90 percent of all such securities held by these institutions. The similar proportion for corporations and for savings and loan associations is 50 percent, and for State and local governments, 70 percent. Data were first published for banks and insurance companies in the May

1941 Treasury Bulletin, for corporations and savings and loan associations in the September 1960 Bulletin, and for State and local governments in the February 1962 Bulletin.

Holdings by commercial banks distributed according to Federal Reserve member bank classes and nonmember banks are published for June 30 and December 31. Holdings by corporate pension trust funds are published quarterly, first appearing in the March 1954 Bulletin.

1/ Beginning April 1953, prices are closing bid quotations in the over the counter market. Prices for prior dates are the mean of closing bid and ask quotations. "When issued" prices are included in the history beginning October 1941. Dates of highs and lows in case of recurrences are the latest dates.

2/ On callable issues market convention treats the yields to earliest call date as more significant when an issue is selling above par, and to maturity when it is selling at par or below.

3/ Included in the average yield of long term taxable Treasury Bonds as shown under "Average Yields of Long Term Bonds."

YIELDS OF TREASURY SECURITIES, AUGUST 31, 1972

Based on Closing Bid Quotations

Note: The smooth curve is fitted by eye. Market yields on coupon issues due in less than 3 months are excluded.

1/ Treasury bond yields are based on a composite of closing bid quotations in the over-the-counter market. Series includes bonds on which the interest income is subject to normal tax and surtax which are neither due nor callable before 10 years. For bonds currently in series, see Table MQ-3.

2/ Treasury series based on reoffering yields of new corporate bonds rated Aa by Moody's Investors Service. The series is calculated to reflect bonds with no call protection. Currently 5 years of call

protection is valued at 15 basis points.

3/ Index of new issue reoffering yields on Aa 20 year general obligations compiled by Securities Industry Association. Weekly series are not available prior to January 1970.

4/ One or more new long-term bonds added to the average.

5/ An existing bond dropped from the average.

INTERNATIONAL FINANCIAL STATISTICS

The tables in this section are designed to provide data on United States reserve assets and liabilities and other statistics related to the United States balance of payments and international financial position. A number of changes were introduced in the May 1967 and July 1972 issues of the Bulletin to increase the usefulness of this section.

Table IFS-1 shows the reserve assets of the United States, including its gold stock, special drawing rights held in the Special Drawing Account in the International Monetary Fund, holdings of convertible foreign currencies, and reserve position in the International Monetary Fund.

Table IFS-2 brings together statistics on liquid and nonliquid liabilities to foreign official institutions, and liquid liabilities to all other foreigners, which are

used in the United States balance-of-payments statistics.

Table IFS-3 presents an area breakdown of United States liquid and nonliquid liabilities to official institutions of foreign countries.

Table IFS-4 shows United States Treasury nonmarketable bonds and notes issued to official institutions of foreign countries.

Table IFS-5 sets forth the factors which affect the United States position in the International Monetary Fund.

Table IFS-6 presents United States net monetary gold transactions with foreign countries and international and regional organizations.

^{1/} Includes gold sold to the United States by the International Monetary Fund with the right of repurchase, and gold deposited by the International Monetary Fund to mitigate the impact on the U.S. gold stock of foreign purchases for the purpose of making gold subscriptions to the Fund under quota increases. For corresponding liabilities see Table IFS-2.

^{2/} Includes gold in Exchange Stabilization Fund, which is not included in Treasury gold figures shown in daily Treasury statement. See "Account of the Treasurer of the United States," Table TUS-4.

^{3/} Includes initial allocation on January 1, 1970 of \$867 million, second allocation on January 1, 1971 of \$717 million and third allocation on January 1, 1972 of \$710 million of special drawing rights (SDR) in the Special Drawing Account in the International Monetary Fund, plus or minus transactions in SDR.

^{4/} Includes holdings of Treasury and Federal Reserve System.

^{6/} Reserve position includes, and gold stock excludes, \$259 million gold subscription to the Fund in June 1965 for a U.S. quota increase which became effective on February 23, 1966. In figures published by the Fund from June 1965 through January 1966, this gold subscription was included in the U.S. gold stock and excluded from the reserve position.

^{7/} Includes gain of \$67 million resulting from revaluation of the German mark in October 1969, of which \$13 million represents gain on German mark holdings at time of revaluation. See also footnotes 3 and 4, Table IFS-4.

^{8/} Includes \$28 million increase in dollar value of foreign currencies revalued to reflect market exchange rates as of December 31, 1971. See also footnotes 3 and 6, Table IFS-4.

^{9/} Total reserve assets include increase of \$1,016 million resulting from change in par value of the U.S. dollar on May 8, 1972, consisting of \$828 million total gold stock, \$822 million Treasury gold stock, \$155 million special drawing rights and \$33 million reserve position in the International Monetary Fund.

Note: Table is based on Treasury Department data and on data reported to the Treasury Department by banks and brokers in the United States. Data correspond generally to statistics following in this section and in the "Capital Movements" section, except for the exclusion of non-marketable, nonconvertible U.S. Treasury notes issued to foreign official nonreserve agencies and the inclusion of investments by foreign official reserve agencies in nonguaranteed bonds of U.S. Federally-sponsored agencies. Table excludes International Monetary Fund "holdings of dollars," and holdings of U.S. Treasury letters of credit and nonnegotiable, noninterest-bearing special U.S. notes held by other international and regional organizations. The liabilities figures are used by the Department of Commerce in the statistics measuring the balance of international payments of the United States. However, this table does not include changes in liquid claims reported by U.S. banks and nonbanking concerns, which are used in calculating the net liquidity balance, or certain nonliquid liabilities to foreign official institutions which enter into the calculation of the official reserve transactions balance. In addition, the balance-of-payments statistics include certain adjustments to Treasury data prior to 1963 and some rounding differences, and may differ from the Treasury data because of varying timing in incorporating revisions.

- 1/ Includes liability on gold deposited by the International Monetary Fund to mitigate the impact on the U.S. gold stock of foreign purchases for gold subscriptions to the Fund under quota increases, and U.S. Government obligations at cost value and funds awaiting investment obtained from proceeds of sales of gold by the International Monetary Fund to the United States to acquire income-earning assets.
- 2/ Includes Bank for International Settlements and European Fund.
- 3/ Derived by applying reported transactions to benchmark data; breakdown of transactions by type of holder estimated 1960-1963. Includes securities issued by corporations and other agencies of the United States Government which are guaranteed by the United States.

- 4/ Includes nonguaranteed securities of U.S. Federally-sponsored agencies, beginning February 1972.
- 5/ Excludes notes issued to foreign official nonreserve agencies.
- 6/ Includes short-term liabilities payable in dollars to foreign banks, and short-term liabilities payable in foreign currencies to foreign banks and to "other foreigners."
- 7/ Includes marketable U.S. Government bonds and notes held by foreign banks.
- 8/ Principally the International Bank for Reconstruction and Development, the Inter-American Development Bank and the Asian Development Bank. From December 1957 through January 1972 includes difference between cost value and face value of securities in IMF gold investment account.
- 9/ Includes total foreign holdings of U.S. Government bonds and notes, for which breakdown by type of holder is not available.
- 10/ Data on the two lines shown for this date differ because of changes in reporting coverage. Figures on the first line are comparable in coverage to those shown for the preceding date; figures on the second line are comparable to those shown for the following date.
- 11/ Includes \$101 million increase in dollar value of foreign currency liabilities resulting from revaluation of the German mark in October 1969, as follows: liquid \$17 million; nonliquid \$84 million.
- 12/ Data on the second line differ from those on the first line because certain accounts previously classified as "official institutions" are included with "banks"; a number of reporting banks are included in the series for the first time; and U.S. Treasury liabilities payable in foreign currencies to official institutions of foreign countries are increased in value to reflect market exchange rates as of December 31, 1971, as follows: U.S. Treasury certificates, \$7 million; nonmarketable convertible U.S. Treasury bonds and notes, \$33 million; and nonmarketable nonconvertible U.S. Treasury bonds and notes, \$70 million.

Note: Data represent short- and long-term liabilities to the official institutions of foreign countries, as reported by banks in the United States; foreign official holdings of marketable and nonmarketable U.S. Government securities with an original maturity of more than one year, except for nonmarketable notes issued to foreign official nonreserve agencies; and investments by foreign official reserve agencies in non-guaranteed bonds of U.S. Federally-sponsored agencies. The table does not include certain nonliquid liabilities to foreign official institutions which enter into the calculation of the official reserve transactions balance by the Department of Commerce.

1/ Includes Bank for International Settlements and European Fund.

2/ Includes countries in Oceania and Eastern Europe, and Western European dependencies in Latin America.

3/ Data on the two lines shown for this date differ because of changes in

reporting coverage. Figures on the first line are comparable in coverage to those shown for the preceding date; figures on the second line are comparable to those shown for the following date.

4/ Includes \$101 million increase in dollar value of foreign currency liabilities due to revaluation of the German mark in October 1969.

5/ Data on the second line differ from those on the first line because certain accounts previously classified as "official institutions" are included with "banks"; a number of reporting banks are included in the series for the first time; and U.S. Treasury liabilities payable in foreign currencies to official institutions of foreign countries are increased in value by \$110 million to reflect market exchange rates as of December 31, 1971.

Note: The initial U.S. quota in the International Monetary Fund was \$2,750 million. The U.S. quota was increased to \$4,125 million in 1959, \$5,160 million in February 1966, \$6,700 million in December 1970, and \$7,274 million in May 1972 as a result of change in the par value of the U.S. dollar. Under the Articles of Agreement, subscription payments equal to the quota have been made 25 percent in gold and 75 percent in dollars.

- 1/ Represents net Fund sales of gold to acquire U.S. dollars for use in Fund operations. Does not include transactions in gold relating to gold deposit or gold investment (see Table IFS-2).
- 2/ Positive figures represent purchases from the Fund of currencies of other members for equivalent amounts of dollars; negative figures represent repurchases of dollars, including dollars derived from charges on purchases and from other net dollar income of the Fund. The United States has a commitment to repurchase within 3-5 years, but only to the extent that the Fund's holdings of dollars exceed 75 percent of the U.S. quota. Purchases of dollars by other countries reduce the U.S. commitment to repurchase by an equivalent amount.

3/ Beginning January 1970, includes dollars obtained by countries other than the United States from sales of gold to the Fund.

4/ Represents the United States gold tranche position in the Fund (the United States quota minus the Fund's holdings of dollars), which is the amount that the United States could purchase in foreign currencies automatically if needed. Under appropriate conditions, the United States could purchase additional amounts equal to the United States quota.

5/ Includes \$259 million gold subscription to the Fund in June 1965 for a U.S. quota increase which became effective on February 23, 1966. In figures published by the Fund from June 1965 through January 1966, this gold subscription was included in the U.S. gold stock and excluded from the reserve position.

6/ Includes \$30 million of special drawing rights.

7/ Represents amount payable in dollars to the Fund to maintain the value of Fund holdings of U.S. dollars.

* Less than \$500,000.

CAPITAL MOVEMENTS

Background

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Statistics on the principal types of data and the principal countries are published monthly in the "Treasury Bulletin." Reports are filed with the Federal Reserve Banks by banks, securities brokers and dealers, and nonbanking concerns in the United States. These statistics are then consolidated, and are published by the Treasury as promptly as possible.

The report forms and instructions used in the collection of the statistics have been revised a number of times. The most recent general revision of the report forms became effective with reports as of May 31, 1963. 1/

The present form of the published presentation of the "Capital Movements" statistics was introduced in the May 1969 issue of the "Bulletin." The principal changes were the rearrangement of the tables to bring together in separate sections all the data relevant to the same statistical series; the expansion of the time series on aggregate liabilities and claims reported by banks to show more detailed breakdowns by type of holder and type of liability and claim; and the presentation of statistics not previously published on the short-term liquid claims of large nonbanking concerns.

Basic definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including United States citizens domiciled abroad, and the foreign branches, subsidiaries and offices of United States banks and business concerns; the central governments, central banks and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located. The term "foreigner" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled, as shown on the records of reporting institutions. For a number of reasons, the geographical breakdown of the reported data may not in all cases reflect the ultimate ownership of the assets. Reporting institutions are not expected to go beyond the addresses shown on their records, and so may not be aware of the country of domicile of the ultimate beneficiary. Furthermore, U.S. liabilities arising from deposits of dollars with foreign banks are reported generally in the Treasury statistics as liabilities to foreign banks, whereas the liability of the foreign bank receiving the deposit may be to foreign official institutions or residents of another country.

Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the appropriate international or regional classification except for the Bank for International Settlements and the European Fund, which are included in the classification "Other Western Europe."

"Short-term" refers to obligations payable on demand or having an original maturity of one year or less. "Long-term" refers to obligations having an original maturity of more than one year, and includes securities having no contractual maturity.

Reporting coverage

Reports are required from banks, securities brokers and dealers, and nonbanking concerns in the United States, including the branches, agencies, subsidiaries, and other affiliates in the United States of foreign firms. Institutions which have total reportable liabilities, claims or securities transactions below a specified exemption level, based on the average for the report dates during a six-month period, including the current report date, are exempt from reporting.

Banks file reports monthly covering their short-term and long-term liabilities to and claims on foreigners; an exemption of \$500,000 is applicable to reports in each of these categories. Twice a year they also report their short-term dollar liabilities to foreigners in countries not shown separately on the monthly report of liabilities. Banks, securities brokers and dealers, and in some instances, nonbanking concerns, report monthly their transactions in securities with foreigners; the applicable exemption level is \$100,000.

Quarterly reports are filed by exporters, importers, industrial and commercial concerns, financial institutions other than banks and brokers, and other nonbanking firms if their liabilities or claims are \$500,000 or more. Such firms also report the liquid portion of their claims for each month-end when they have reportable claims of \$1 million or more. The foreign credit and debit balances of securities brokers and dealers are reported quarterly; the exemption level applicable to these reports is \$100,000.

Description of statistics

Data collected on the Treasury Foreign Exchange Forms are published in the "Treasury Bulletin" in six sections. Each section contains all the data relevant to the same statistical series, with tables showing time series by type and country, and the detailed breakdowns of the latest available data.

Section I covers the short-term and long-term liabilities to foreigners reported by banks in the United States. The data exclude the holdings of dollars of the International Monetary Fund derived from payments of the United States subscription and from the exchange transactions and other operations of the Fund. (Liabilities representing the "gold investment" of the Fund, however, are included.) The data also exclude U.S. Treasury letters of credit, and nonnegotiable, noninterest-bearing special notes of the United States held by international and regional organizations.

Section II presents the short-term and long-term claims on foreigners reported by banks in the United States, including claims held for their own account and for the account of their domestic customers. The data exclude convertible foreign currencies held by U.S. monetary authorities.

Sections III and IV show respectively the liabilities

CAPITAL MOVEMENTS

to, and claims on, foreigners reported by exporters, importers, industrial and commercial firms, financial institutions other than banks and brokers, and other nonbanking concerns in the United States. The data exclude the intercompany accounts of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. (Such transactions are reported by business firms to the Department of Commerce on its direct investment forms.) The data also exclude claims held through United States banks. Separate figures are shown in Section IV for the short-term liquid claims of large nonbanking concerns in the United States.

Section V contains data on transactions in all types of long-term domestic and foreign securities by foreigners reported by banks and brokers in the United States (except nonmarketable U.S. Treasury notes, foreign series, and nonmarketable U.S. Treasury bonds and notes, foreign currency series, which are shown in "International Financial Statistics" section, Table IFS-4). The data cover new issues of securities, transactions in outstanding issues, and redemptions of securities. They include transactions executed in the United States for the account of foreigners, and transactions executed abroad for the account of reporting institutions and their domestic customers. The data include some transactions which are classified as direct investments in the balance of payments accounts. The data exclude securities issued abroad by foreign subsidiaries of U.S. corporations, some of which are treated in the balance of payments as issues of U.S. corporations.

The geographical breakdown of the data on securities transactions shows the country of domicile of the foreign buyers and sellers of the securities; in the case of outstanding issues, this may differ from the country of the original issuer. The gross figures contain some offsetting transactions between foreigners. The net figures for total transactions represent transactions by foreigners with United States residents; but the net figures for transactions of individual countries and areas may include some transactions between foreigners of different countries. Beginning with data for 1969, transactions between foreigners in new issues not offered for sale to United States residents but managed by underwriters in the United States are excluded from the gross figures.

Section VI comprises two tables on the money credit and debit balances, as appearing on the books of reporting brokers and dealers in the United States, in accounts of foreigners with them, and in their accounts carried by foreigners.

The data published in these sections do not cover all types of reported capital movements between the United States and foreign countries. The principal exclusions are the intercompany capital transactions of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies, and capital transactions of the United States Government. Consolidated data on all types of capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

- 1/ Includes Bank for International Settlements and European Fund.
2/ Short-term U.S. Government obligations at cost value and funds awaiting investment obtained from proceeds of sales of gold by the International Monetary Fund to the United States to acquire income-earning assets. Upon termination of investment, the same quantity of gold was reacquired by the International Monetary Fund.
3/ Principally the International Bank for Reconstruction and Development and the Inter-American Development Bank. Includes difference between cost value and face value of securities in IMF gold investment account (\$14 million at end 1971).
4/ In addition, IMF gold investment included investments in U.S. Government bonds and notes which amounted to \$109 million at end 1960, \$187 million at end 1961, and \$61 million at end 1963.

- 5/ Data on the two lines shown for this date differ because of changes in reporting coverage. Figures on the first line are comparable in coverage to those shown for the preceding date; figures on the second line are comparable to those shown for the following date.
6/ Data on the second line differ from those on the first line because certain accounts previously classified as "official institutions" are included with "banks" and a number of reporting banks are included in the series for the first time.
7/ Second line includes \$7 million increase in dollar value of foreign currency obligations revalued to reflect market exchange rates as of Dec. 31, 1971.

1/ Data on the two lines shown for this date differ because of changes in reporting coverage. Figures on the first line are comparable in coverage to those shown for the preceding date; figures on the second line are comparable to those shown for the following date.

2/ Data on the second line differ from those on the first line because those claims of U.S. banks on their foreign branches and those claims

of U.S. agencies and branches of foreign banks on their head offices and foreign branches which were previously reported as loans are included in "other short-term claims"; and a number of reporting banks are included in the series for the first time.

Note: Data represent estimated official and private holdings of marketable U.S. Government securities with an original maturity of more than one year. Data shown as of end year 1969 through end year 1970 (first column) are based on November 30, 1968 benchmark survey of holdings and the regular monthly reports of securities transactions (see Table CM-V-3). Data shown for end year 1970 (second column) through latest date are based on a benchmark survey as of January 31, 1971, and the monthly transactions reports. For statistical convenience, the new series is introduced as

of December 31, 1970, rather than as of the survey date. The difference between the two series is believed to arise from errors in reporting during the period between the two benchmark surveys, from shifts in ownership not involving purchases or sale through U.S. banks and brokers, and from physical transfers of securities to and from abroad. It is not possible to reconcile the two series or to revise figures for earlier dates.
