Treasury Financing Operations

February Refunding

On January 22 the Treasury announced that it would sell to the public at auction, under competitive and noncompetitive bidding, up to \$3.0 billion of Treasury Notes of Series D-1978, up to \$1.75 billion of Treasury Notes of Series C-1981, and up to \$0.75 billion of Treasury Bonds of 1995-2000. These issues were to refund \$3.55 billion of publicly held Treasury securities maturing February 15. Coupon rates of 7-1/8% on the notes of Series D-1978, 7-3/8% on the notes of Series C-1981 and 7-7/8% on the bonds were set after determinations as to which tenders were accepted on a yield basis, the average of which produced a price of 100.00 or less.

The notes of Series D-1978 will be dated February 18, 1975, due May 15, 1978, with interest payable on a semiannual basis on May 15 and November 15 until maturity. The notes of Series C-1981 will be dated February 18, 1975, due February 15, 1981, with interest payable on a semiannual basis on February 15 and August 15 until maturity. The bonds will be dated February 18, 1975, due February 15, 2000, callable at the option of the United States on any interest payment date on and after February 15, 1995, with interest payable on a semiannual basis on February 15 and August 15 until maturity.

Tenders for the notes of Series D-1978 were received until 1:30 p.m., EST, January 28, and totaled \$6.7 billion of which \$3.2 billion was accepted at yields ranging from 7.17%, price 99.814, up to 7.23%, price 99.643. Noncompetitive tenders for \$500,000 or less were accepted in full at the average yield of accepted tenders, 7.21%, price 99.700. These totaled \$0.6 billion.

Tenders for the notes of Series C-1981 were received until 1:30 p.m., EST, January 29, and totaled \$4.2 billion of which \$1.75 billion was accepted at yields ranging from 7.40%, price 99.881, up to 7.52%, price 99.311. Noncompetitive tenders for \$500,000 or less were accepted in full at the average yield of accepted tenders, 7.49%, price 99.453. These totaled \$0.2 billion.

Tenders for the bonds were received until 1:30 p.m., EST, January 30, and totaled \$2.3 billion of which \$0.75 billion was accepted at yields ranging from 7.89%, price 99.837, up to 7.96%, price 99.084. Noncompetitive tenders for \$500,000 or less were accepted in full at the average yield

of accepted tenders, 7.95%, price 99.191. These totaled \$0.1 billion.

In addition to the amounts allotted to the public, \$0.9 billion of the notes of Series D-1978, \$0.4 billion of the notes of Series C-1981 and \$0.15 billion of the bonds were allotted at the average-yield price to Government accounts and to Federal Reserve Banks for themselves and as agents of foreign and international monetary authorities.

Payment for accepted tenders in all three auctions was required to be made or completed on or before February 18, 1975, except that payment for up to 50 percent of the amount of bonds allotted could be deferred until March 3, 1975. Payment could be made in cash, 5-3/4 percent Treasury Notes of Series A-1975 or 5-7/8 percent Treasury Notes of Series E-1975, which were to be accepted at par, or other funds immediately available to the Treasury by that date.

Tenders were received in all three auctions at Federal Reserve banks and branches and at the Bureau of the Public Debt, Washington, D. C. Bearer notes and bonds, with interest coupons attached, and notes and bonds registered as to principal and interest were authorized to be issued in denominations of \$1,000, \$5,000, \$10,000, \$100,000 and \$1,000,000.

52-Week Bills

On January 2, tenders were invited for \$2,000 million, or thereabouts, of 364-day Treasury bills to be dated January 14, 1975, and to mature January 13, 1976. The issue was to refund \$1,800 million of bills maturing January 14.

Tenders were opened on January 8. They totaled \$3,355 million, of which \$2,001 million was accepted, including \$62 million of noncompetitive tenders. The average bank discount rate was 6.378 percent.

13-Week and 26-Week Bills

Issues of regular weekly Treasury bills in January totaled \$24.4 billion. These issues were offered for cash and in exchange for bills maturing in the amount of \$23.3 billion. There were two 13-week issues of \$2.7 billion and three 13-week issues of \$2.6 billion. There were two 26-week issues of \$2.3 billion and three 26-week issues of \$2.2 billion. Average rates for the new issues are shown in the following table.

Treasury Bills - General

Treasury bills are sold on a bid basis. The face amount is payable without interest at maturity. They are issued in bearer form only, and in denominations of \$10,000, \$15,000, \$50,000, \$100,000, \$500,000, and \$1,000,000 (maturity value). Tenders are received at Federal Reserve banks and branches. Each tender must be for a minimum of \$10,000. Tenders over \$10,000 must be in multiples of \$5,000.

Banking institutions generally may submit tenders for account of customers. Tenders may be made without deposit by incorporated banks and trust companies and by responsible and recognized dealers in investment securities. Tenders from others must be accompanied by payment of 2 percent of the face amount of bills applied for, unless the tenders are accompanied by an express guaranty of payment by an incorporated bank and trust company.

Noncompetitive tenders (without stated price), usually for \$200,000 or less from any one bidder, for each issue of 13-week, 26-week, and 52-week bills, are accepted in full at the average price of accepted competitive bids for an issue.

Payment for accepted tenders must be made or completed on the date of issue, in cash or other immediately available funds or in a like face amount of Treasury bills maturing on that date. Payment for 13-week, 26-week, and 52-week bills may not be made by credit in Treasury tax and loan accounts.

Foreign Series and Foreign Currency Series

Foreign series securities issued in January totaled \$1,987 million, consisting of twenty-four certificates of indebtedness and four notes. Redemptions for the month totaled \$1,837 million. At the end of January, foreign series securities outstanding totaled \$21,363 million. (Details are shown on page 49.)

Foreign currency series securities issued in January consisted of one note denominated in Swiss francs equivalent to \$127 million. Redemptions for the month also totaled an equivalent of \$127 million. At the end of January foreign currency series securities outstanding totaled an equivalent of \$1,599 million and were all denominated in Swiss francs. (Details are shown on page 51.)

Note: The memorandum section of various tables in the Federal Budget presents the trust fund receipts and outlay data on the same concept as columns (3) and (9) above. Trust interfund transactions are payments from one trust fund to another trust fund and are excluded in calculating trust fund receipts and outlays. The intragovernmental transactions are payments from Federal funds to trust funds, and vice-versa, but excludes \$60 million in trust fund payments to Federal Funds.

1/ For content see columns (7) and (8).

2/ For content see columns (10-13)

2/ Includes net taxes and other receipts, mainly deposits by States and Federal employee retirement contributions.

4/ Excludes trust fund payments to Federal funds, such as charges for administrative expenses of Social Security Act.

FEDERAL OBLIGATIONS

"Obligations" are the basis on which the use of funds is controlled in the Federal Government. They are recorded at the point at which the Government makes a firm commitment to acquire goods or services and are the first of the four key events--order, delivery, payment, consumption--which characterize the acquisition and use of resources. In general, they consist of orders placed, contracts awarded, services received, and similar transactions requiring the disbursement of money.

The obligational stage of Government transactions is a strategic point in gauging the impact of the Government's operations on the national economy, since it frequently represents for business firms the Government commitment which stimulates business investment, including inventory purchases and employment of labor. Disbursements may not occur for months after the Government places its order but the order itself usually causes immediate pressure on the private economy.

Obligations are classified according to a uniform set

of categories which are based upon the nature of the transaction without regard to its ultimate purpose. All payments for salaries and wages, for example, are reported as personnel compensation, whether the personal services are used in current operations or in the construction of capital items.

Federal agencies and firms often do business with one another; in doing so, the "buying" agency records obligations, and the "performing" agency records reimbursements. In Table FO-1, obligations that are incurred within the Government are distinguished from those incurred outside the Government. Tables FO-2, 3, and 4 show only those incurred outside.

Obligation data for the administrative budget fund accounts were first published in the September 1967 Treasury Bulletin and the trust fund accounts were first published in the October 1967 Bulletin. Beginning with the April 1968 Bulletin, the data are on the basis of the budget concepts adopted pursuant to the recommendations of the President's Commission on Budget Concepts.

The November obligations data are not included in this issue due to certain unavoidable delays in processing. November data will be published in the March Bulletin.

ACCOUNT OF THE U.S. TREASURY

Source and Availability of the Balance in the Account of the U.S. Treasury

The working cash of the Treasury is held mainly in 'Treasury's accounts with Federal Reserve banks and branches. As the balances in these accounts become depleted, they are restored by calling in (transferring) funds from the tax and loan accounts with thousands of commercial banks throughout the country.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all banks whereby customers of banks deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of money from a customer's account to the tax and loan account in the same bank. On occasions, to the extent authorized by the

Treasury, banks are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the account of their customers.

The tax and loan account system permits the Treasury to leave funds in banks and in the communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on bank reserves and the economy.

A detailed description of the Treasury's depository system may be found in the Annual Report of the Secretary of the Treasury for 1973, pages 282-285.

Note: The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annual interest rate to the amount outstanding on that date (the amount actually borrowed in the case of securities sold at a premium or discount, beginning with May 1960). The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. The average annual interest rate is computed by dividing the computed annual interest charge for the total, or for any group of issues, by the corresponding principal amount. Beginning with data for December

31, 1958, the computation is based on the rate of effective yield for issues sold at premium or discount. Prior to that date it was based on the coupon rate for all issues.

Note: In these tables sales of Series A-F and J bonds are included at issue price, and redemptions and amounts outstanding at current redemption value. Series G, H, and K are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured J and K bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, and are then transferred to matured debt on which interest has ceased.

- 1/ Sales and redemption figures include exchanges of minor amounts of (1) matured Series E bonds for Series G and K bonds from May 1951 through April 1957; (2) Series F and J bonds for Series H bonds beginning January 1960; and (3) U.S. savings notes for Series H bonds beginning January 1972; however, they exclude exchanges of Series E bonds for Series H bonds, which are reported in Table SB-3.
- 2/ Details by series on a cumulative basis and by periods for Series A-D combined will be found in the February 1952 and previous issues of the Treasury Bulletin.
- 3/ Because there is a normal lag in classifying redemptions, the distribution of redemption between sales price and accrued discount has been estimated. Beginning with the Treasury Bulletin of March 1961 the

method of distributing redemptions between sales price and accrued discount has been changed to reflect the distribution shown in final reports of classified redemption. All periods shown have been revised on this basis.

- 4/ Series F and G sales were discontinued April 30, 1952, and Series J and K sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent adjustments.
 - 5/ Includes exchanges of Series 1941 F and G savings bonds for 3-1/4% marketable bonds of 1978-83.
 - 6/ Includes exchanges of Series 1948 F and G bonds for 4-3/4% marketable notes of 1964.
 - 7/ Includes exchanges of Series 1949 F and G bonds for 4% marketable bonds of 1969.
 - 8/ Includes exchanges of Series 1960 F and G bonds for 3-7/8% marketable bonds of 1968.
 - 9/ Includes exchanges of Series 1951 and 1952 F and G bonds for 3-7/8% marketable bonds of 1971 and 4% marketable bonds of 1980.
 - 10/ Represents changes in the amounts of redemptions not yet classified between matured and unmatured issues.
- * Less than \$500,000.

TREASURY SURVEY OF OWNERSHIP, DECEMBER 31, 1974

Footnotes Treasury Survey of Ownership

- 1/ Securities issued by the Treasury and Government agencies that are classified as debt under the new unified budget concept. For debt subject to limitation, see Table FD-9.
- 2/ Includes trust departments.
- 3/ Included with all other investors are those banks, insurance companies, savings and loan associations, corporations, and State and local government funds not reporting in the Treasury Survey. Also included are certain Government deposit accounts and Government-sponsored agencies.
- 4/ Consists of corporate pension trust funds and profit sharing plans which involve retirement benefits. The data are compiled from quarterly reports by bank trustees who report total number of funds administered and Public Debt and Agency Securities held. It is estimated that these funds account for approximately 90 percent of Federal Securities held by all corporate pension trust funds. Since the data are not available each month, the regular monthly Survey includes holdings by these funds under "Held by all other private investors." The quarterly data are presented as supplemental information in a memorandum column accompanying the Survey for each reporting date, beginning with December 31, 1953.
- 5/ Data on holdings of nonmarketable public debt were no longer collected beginning with July 1974 Treasury Survey of Ownership.
- 6/ Includes Export-Import Bank and Government National Mortgage Association participation certificates.
- 7/ Includes matured securities outstanding on which interest has ceased.
- 8/ Direct Placements with State and Local Governments with various interest rates and maturity dates.
- 9/ Includes securities issued for use as collateral for short-term borrowings.
- 10/ Obligation of the Federal Home Loan Mortgage Corporation. The capital stock of the Federal Home Loan Mortgage Corporation is held by the twelve Federal Home Loan Banks.
 - Less than \$500,000.

TREASURY SURVEY - COMMERCIAL BANK OWNERSHIP, DECEMBER 31, 1974

The tables which follow report the security holdings of those commercial banks included in the Treasury Survey of Ownership by type of bank and by type of security. The figures in the columnar headings indicate the number of reporting banks in each class.

Commercial bank ownership was first published in the May 1944 issue of the "Treasury Bulletin" based on the Survey date for December 31, 1943. It has appeared at semiannually or quarterly intervals since that time and is now being published for the June 30 and December 31 Survey dates.

1/ Beginning April 1953, prices are closing bid quotations in the over-the-counter market. Prices for prior dates are the mean of closing bid and ask quotations. "When issued" prices are included in the history beginning October 1941. Dates of highs and lows in case of recurrences are the latest dates.

2/ On callable issues market convention treats the yields to earliest call date as more significant when an issue is selling above par, and to maturity when it is selling at par or below.

3/ Included in the average yield of long term taxable Treasury bonds as shown under "Average yields of Long-Term Bonds."

1/ Treasury bond yields are based on a composite of closing bid quotations in the over-the-counter market. Series includes bonds on which the interest income is subject to normal tax and surtax which are neither due nor callable before 10 years. For bonds currently in series, see Table MQ-3.

2/ Treasury series based on reoffering yields of new corporate bonds with 5 years call protection and rated Aa by Moody's Investors Service. Prior to June 1973, this series reflected bonds without call protection.

The value of 5 years call protection in that period ranged from 10 to 25 basis points.

3/ Index of new issue reoffering yields on Aa 20 year general obligations compiled by Securities Industry Association. Weekly series are not available prior to January 1970.

4/ One or more new long-term bonds added to the average.

5/ An existing bond dropped from the average.

n.a. Not available.

INTERNATIONAL FINANCIAL STATISTICS

The tables in this section are designed to provide data on United States reserve assets and liabilities and other statistics related to the United States balance of payments and international financial position. A number of changes were introduced in the May 1967 and July 1972 issues of the Bulletin to increase the usefulness of this section.

Table IFS-1 shows the reserve assets of the United States, including its gold stock, special drawing rights held in the Special Drawing Account in the International Monetary Fund, holdings of convertible foreign currencies, and reserve position in the International Monetary Fund.

Table IFS-2 brings together statistics on liquid and nonliquid liabilities to foreign official institutions, and liquid liabilities to all other foreigners, which are used in the United States balance-of-payments statistics.

Table IFS-3 presents an area breakdown of United States liquid and nonliquid liabilities to official institutions of foreign countries.

Table IFS-4 shows United States Treasury nonmarketable bonds and notes issued to official institutions of foreign countries.

Table IFS-5 sets forth the factors which affect the United States position in the International Monetary Fund.

Table IFS-6 presents United States net monetary gold transactions with foreign countries and international and regional organizations.

Table IFS-7 presents a measure of weighted-average changes in exchange rates between the United States dollar and the currencies of certain other countries.

^{1/} Includes gold sold to the United States by the International Monetary Fund with the right of repurchase, and gold deposited by the International Monetary Fund to mitigate the impact on the U.S. gold stock of foreign purchases for the purpose of making gold subscriptions to the Fund under quota increases. For corresponding liabilities see Table IFS-2.

^{2/} Prior to December 1974, excludes gold held by the Exchange Stabilization Fund. On December 9, 1974, the Treasury acquired all gold held by the Exchange Stabilization Fund. See "Account of the U.S. Treasury," Table UST-4.

^{3/} Includes initial allocation on January 1, 1970 of \$867 million, second allocation on January 1, 1971 of \$717 million and third allocation on January 1, 1972 of \$710 million of special drawing rights (SDR) in the Special Drawing Account in the International Monetary Fund, plus or minus transactions in SDR.

^{4/} Includes holdings of Treasury and Federal Reserve System.

^{5/} The United States has the right to purchase foreign currencies equivalent to its reserve position in the Fund automatically if needed. Under appropriate conditions the United States could purchase additional amounts equal to the United States quota. See Table IFS-5.

^{6/} Reserve position includes, and gold stock excludes, \$259 million gold subscription to the Fund in June 1965 for a U.S. quota increase which became effective on February 23, 1966. In figures published by the Fund from June 1965 through January 1966, this gold subscription was included in the U.S. gold stock and excluded from the reserve position.

^{7/} Includes gain of \$67 million resulting from revaluation of the German mark in October 1969, of which \$13 million represents gain on German mark holdings at the time of revaluation. See also footnotes

3 and 4, Table IFS-4.

^{8/} Includes \$28 million increase in dollar value of foreign currencies revalued to reflect market exchange rates as of December 31, 1971. See also footnotes 3 and 5, Table IFS-4.

^{9/} Total reserve assets include increase of \$1,016 million resulting from change in par value of the U.S. dollar in May 1972, consisting of \$828 million total gold stock, \$822 million Treasury gold stock, \$155 million special drawing rights and \$33 million reserve position in the International Monetary Fund.

^{10/} Total reserve assets include increase of \$1,436 million resulting from change in par value of the dollar on October 18, 1973, consisting of \$1,165 million total gold stock, \$1,157 million Treasury gold stock, \$217 million special drawing rights, and \$54 million reserve position in the International Monetary Fund.

^{11/} Beginning July 1974, the IMF adopted a technique for valuing the SDR based on a weighted average of exchange rates for the currencies of 16 member countries. The United States SDR holdings and reserve position in the IMF are also valued on this basis beginning July 1974. At valuation used prior to July 1974 (SDR 1=\$1.20635), the following end-of-month values amounted to (in millions of dollars):

Note: Table is based on Treasury Department data and on data reported to the Treasury Department by banks and brokers in the United States. Data correspond generally to statistics following in this section and in the "Capital Movements" section, except for the exclusion of nonmarketable, nonconvertible U.S. Treasury notes issued to foreign official nonreserve agencies and the inclusion of investments by foreign official reserve agencies in debt securities of U.S. Federally-sponsored agencies and U.S. corporations. Table excludes International Monetary Fund "holdings of dollars," and holdings of U.S. Treasury letters of credit and nonnegotiable, noninterest-bearing special U.S. notes held by other international and regional organizations.

1/ Includes liability on gold deposited by the International Monetary Fund to mitigate the impact on the U.S. gold stock of foreign purchases for gold subscriptions to the Fund under quota increases, and U.S. Government obligations at cost value and funds awaiting investment obtained from proceeds of sales of gold by the International Monetary Fund to the United States to acquire income-earning assets.

2/ Includes Bank for International Settlements and European Fund.

3/ Derived by applying reported transactions to benchmark data; breakdown of transactions by type of holder estimated 1960-1963.

4/ Includes long-term liabilities reported by banks in the United States and debt securities of U.S. Federally-sponsored agencies and U.S. corporations.

5/ Excludes notes issued to foreign official nonreserve agencies.

6/ Includes short-term liabilities payable in dollars to foreign banks, and short-term liabilities payable in foreign currencies to foreign banks and to "other foreigners."

7/ Includes marketable U.S. Government bonds and notes held by foreign

banks.

8/ Principally the International Bank for Reconstruction and Development, the Inter-American Development Bank and the Asian Development Bank.

9/ Includes total foreign holdings of U.S. Government bonds and notes, for which breakdown by type of holder is not available.

10/ Data on the two lines shown for this date differ because of changes in reporting coverage. Figures on the first line are comparable in coverage to those shown for the preceding date; figures on the second line are comparable to those shown for the following date.

11/ Includes \$101 million increase in dollar value of foreign currency liabilities resulting from revaluation of the German mark in October 1969, as follows: liquid \$17 million; other \$84 million.

12/ Data on the second line differ from those on the first line because certain accounts previously classified as "official institutions" are included with "banks"; a number of reporting banks are included in the series for the first time; and foreign currency liabilities to official institutions of foreign countries are increased in value by \$110 million to reflect market exchange rates as of December 31, 1971, as follows: U.S. Treasury certificates, \$7 million; nonmarketable convertible U.S. Treasury bonds and notes, \$33 million; and nonmarketable nonconvertible U.S. Treasury bonds and notes, \$70 million.

13/ Includes \$162 million increase in dollar value of foreign currency liabilities to official institutions of foreign countries revalued to reflect market exchange rates, as follows: short-term liabilities, \$15 million; nonmarketable convertible U.S. Treasury notes, \$128 million; and nonmarketable nonconvertible U.S. Treasury notes, \$19 million.

Note: Data represent short-term and long-term liabilities to the official institutions of foreign countries, as reported by banks in the United States; foreign official holdings of marketable and nonmarketable U.S. Government securities with an original maturity of more than one year except for nonmarketable notes issued to foreign official nonreserve agencies; and investments by foreign official reserve agencies in debt securities of U.S. Federally-sponsored agencies and U.S. corporations. The table does not include certain nonliquid liabilities to foreign official institutions which enter into the calculation of the official reserve transactions balance by the Department of Commerce.

1/ Includes Bank for International Settlements and European Fund.
2/ Includes countries in Oceania and Eastern Europe, and Western European dependencies in Latin America.

3/ Data on the two lines shown for this date differ because of changes in reporting coverage. Figures on the first line are comparable in

coverage to those shown for the preceding date; figures on the second line are comparable to those shown for the following date.

4/ Includes \$101 million increase in dollar value of foreign currency liabilities due to revaluation of the German mark in October 1969.

5/ Data on the second line differ from those on the first line because certain accounts previously classified as "official institutions" are included with "banks"; a number of reporting banks are included in the series for the first time; and U.S. Treasury liabilities payable in foreign currencies to official institutions of foreign countries are increased in value by \$110 million to reflect market exchange rates as of December 31, 1971.

6/ Includes \$162 million increase in dollar value of foreign currency liabilities revalued to reflect market exchange rates.

Note: The initial U.S. quota in the International Monetary Fund was \$2,750 million. The U.S. quota was increased to \$4,125 million in 1959, \$5,160 million in February 1966, and \$6,700 million in December 1970, and revalued to \$7,274 million in May 1972 and \$8,083 million in October 1973 as a result of changes in the par value of the dollar. Under the Articles of Agreement, subscription payments equal to the quota have been made 25 percent in gold and 75 percent in dollars.

1/ Represents net Fund sales of gold to acquire U.S. dollars for use in Fund operations. Does not include transactions in gold relating to gold deposits or gold investment (see Table IFS-2).

2/ Positive figures represent purchases from the Fund of currencies of other members for equivalent amounts of dollars; negative figures represent repurchases of dollars, including dollars derived from charges on purchases and from other net dollar income of the Fund. The United States has a commitment to repurchase within 3-5 years, but only to the extent that the Fund's holdings of dollars exceed 75 percent of the U.S. quota. Purchases of dollars by other countries reduce the U.S. commitment to repurchase by an equivalent amount.

3/ Beginning January 1970, includes dollars obtained by countries other than the United States from sales of gold to the Fund.

4/ Represents the United States gold tranche position in the Fund (the United States quota minus the Fund's holdings of dollars), which is the amount that the United States could purchase in foreign currencies automatically if needed. Under appropriate conditions, the United States could purchase additional amounts equal to the United States quota.

5/ Includes \$259 million gold subscription to the Fund in June 1965 for a U.S. quota increase which became effective on February 23, 1966. In figures published by the Fund from June 1965 through January 1966, this gold subscription was included in the U.S. gold stock and excluded from the reserve position.

6/ Includes \$30 million of special drawing rights.

7/ Represents amount payable in dollars to the Fund to maintain the value of Fund holdings of U.S. dollars.

8/ Excludes currency valuation adjustments in 1974 payable to the United States of \$20 million for July and \$102 million for August; and currency valuation adjustments payable to the Fund of \$14 million for September, \$42 million for October, \$62 million for November, and \$90 million for December. Excludes a currency valuation adjustment payable to the Fund of \$75 million for January, 1975.

^{1/} This table presents calculations of weighted average percentage changes in the rates of exchange between the dollar and certain foreign currencies, in order to provide a measure of changes in the dollar's general foreign exchange value broader than a measure provided by any single exchange rate change. Calculations are provided for two sets of countries that account for a major share of U.S. foreign trade. U.S. bilateral trade patterns in 1972 are used as a convenient, readily available proxy for the assignment of relative weights to individual exchange rate changes, though such weights do not provide a full measure of individual currencies' relative importance in U.S. international transactions because they take no account of factors other than trade. The calculations do not purport to represent a guide to measuring the impact of exchange rate changes on U.S. international transactions.

The equations used are as follows:

Equation one is used to calculate a trade-weighted average of changes in the dollar cost of foreign currencies:

$$(EQ1) \quad E_m = \sum (\Delta \$ / fc_i * M_i / EM)$$

Where: E_m is the weighted average of percentage changes in the dollar cost of individual foreign currencies;

$\Delta \$ / fc_i$ is the percent change in the dollar cost of foreign currency i ; and

M_i / EM is U.S. imports from country i , as a proportion of total U.S. imports from all countries in the set.

Equation two is used to calculate a trade-weighted average of changes in the foreign exchange cost of dollars:

$$(EQ2) \quad E_x = \sum (\Delta fc_i / \$ * X_i / EX)$$

Where: E_x is the weighted average of percentage changes in the foreign currency cost of dollars;

$\Delta fc_i / \$$ is the percent change in the foreign currency i cost of dollars; and

X_i / EX is U.S. exports to country i , as a proportion of total U.S. exports to all countries in the set.

Equation three combines the above export-weighted and import-weighted averages to provide an overall measure of exchange rate change:

$$(EQ3) \quad E = [(E_m * m / m+x) - 1] + [E_x * x / m+x]$$

Where: $m / m+x$ is U.S. imports as a proportion of its total trade with all countries in the set; and

$x / m+x$ is U.S. exports as a proportion of its total trade with all countries in the set.

^{2/} Australia, Austria, Belgium-Luxembourg, Canada, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, United Kingdom.

^{3/} The currencies of 47 IMF member countries which account for approximately 90% of U.S. total trade. As of October 1974 this entire series has been modified to include Hong Kong, Indonesia, Argentina and Brazil, which had not been included in the calculations prior to February 1974, and to exclude Chile.

CAPITAL MOVEMENTS

Background

Data relating to capital movements between the United States and foreign countries have been collected since 1935, pursuant to Executive Order 6560 of January 15, 1934, Executive Order 10033 of February 8, 1949, and Treasury regulations promulgated thereunder. Statistics on the principal types of data and the principal countries are published monthly in the "Treasury Bulletin." Reports are filed with the Federal Reserve Banks by banks, securities brokers and dealers, and nonbanking concerns in the United States. These statistics are then consolidated, and are published by the Treasury as promptly as possible.

The report forms and instructions used in the collection of the statistics have been revised a number of times. The most recent general revision of the report forms became effective with reports as of May 31, 1963. 1/

The present form of the published presentation of the "Capital Movements" statistics was introduced in the May 1969 issue of the "Bulletin." The principal changes were the rearrangement of the tables to bring together in separate sections all the data relevant to the same statistical series; the expansion of the time series on aggregate liabilities and claims reported by banks to show more detailed breakdowns by type of holder and type of liability and claim; and the presentation of statistics not previously published on the short-term liquid claims of large nonbanking concerns.

Basic definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including United States citizens domiciled abroad, and the foreign branches, subsidiaries and offices of United States banks and business concerns; the central governments, central banks and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located. The term "foreigner" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled, as shown on the records of reporting institutions. For a number of reasons, the geographical breakdown of the reported data may not in all cases reflect the ultimate ownership of the assets. Reporting institutions are not expected to go beyond the addresses shown on their records, and so may not be aware of the country of domicile of the ultimate beneficiary. Furthermore, U.S. liabilities arising from deposits of dollars with foreign banks are reported generally in the Treasury statistics as liabilities to foreign banks, whereas the liability of the foreign bank receiving the deposit may be to foreign official institutions or residents of another country.

Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the appropriate international or regional classification except for the Bank for International Settlements and the European Fund, which are included in the classification "Other Western Europe."

"Short-term" refers to obligations payable on demand or having an original maturity of one year or less. "Long-term" refers to obligations having an original maturity of more than one year, and includes securities having no contractual maturity.

Reporting coverage

Reports are required from banks, securities brokers and dealers, and nonbanking concerns in the United States, including the branches, agencies, subsidiaries, and other affiliates in the United States of foreign firms. Institutions which have total reportable liabilities, claims or securities transactions below a specified exemption level, based on the average for the report dates during a six-month period, including the current report date, are exempt from reporting.

Banks file reports monthly covering their short-term and long-term liabilities to and claims on foreigners; an exemption of \$500,000 is applicable to reports in each of these categories. Twice a year they also report their short-term dollar liabilities to foreigners in countries not shown separately on the monthly report of liabilities. Banks, securities brokers and dealers, and in some instances, nonbanking concerns, report monthly their transactions in securities with foreigners; the applicable exemption level is \$100,000.

Quarterly reports are filed by exporters, importers, industrial and commercial concerns, financial institutions other than banks and brokers, and other nonbanking firms if their liabilities or claims are \$500,000 or more. Such firms also report the liquid portion of their claims for each month-end when they have reportable claims of \$1 million or more. The foreign credit and debit balances of securities brokers and dealers are reported quarterly; the exemption level applicable to these reports is \$100,000.

Description of statistics

Data collected on the Treasury Foreign Exchange Forms are published in the "Treasury Bulletin" in six sections. Each section contains all the data relevant to the same statistical series, with tables showing time series by type and country, and the detailed breakdowns of the latest available data.

Section I covers the short-term and long-term liabilities to foreigners reported by banks in the United States. The data exclude the holdings of dollars of the International Monetary Fund derived from payments of the United States subscription and from the exchange transactions and other operations of the Fund. (Liabilities representing the "gold investment" of the Fund, however, are included.) The data also exclude U.S. Treasury letters of credit, and nonnegotiable, noninterest-bearing special notes of the United States held by international and regional organizations.

Section II presents the short-term and long-term claims on foreigners reported by banks in the United States, including claims held for their own account and for the account of their domestic customers. The data exclude convertible foreign currencies held by U.S. monetary authorities.

Sections III and IV show respectively the liabilities

CAPITAL MOVEMENTS

to, and claims on, foreigners reported by exporters, importers, industrial and commercial firms, financial institutions other than banks and brokers, and other nonbanking concerns in the United States. The data exclude the intercompany accounts of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. (Such transactions are reported by business firms to the Department of Commerce on its direct investment forms.) The data also exclude claims held through United States banks. Separate figures are shown in Section IV for the short-term liquid claims of large nonbanking concerns in the United States.

Section V contains data on transactions in all types of long-term domestic and foreign securities by foreigners reported by banks and brokers in the United States (except nonmarketable U.S. Treasury notes, foreign series, and nonmarketable U.S. Treasury bonds and notes, foreign currency series, which are shown in "International Financial Statistics" section, Table IFS-4). The data cover new issues of securities, transactions in outstanding issues, and redemptions of securities. They include transactions executed in the United States for the account of foreigners, and transactions executed abroad for the account of reporting institutions and their domestic customers. The data include some transactions which are classified as direct investments in the balance of payments accounts. The data exclude securities issued abroad by foreign subsidiaries of U.S. corporations, some of which are treated in the balance of payments as issues of U.S. corporations.

The geographical breakdown of the data on securities transactions shows the country of domicile of the foreign buyers and sellers of the securities; in the case of outstanding issues, this may differ from the country of the original issuer. The gross figures contain some offsetting transactions between foreigners. The net figures for total transactions represent transactions by foreigners with United States residents; but the net figures for transactions of individual countries and areas may include some transactions between foreigners of different countries. Beginning with data for 1969, transactions between foreigners in new issues not offered for sale to United States residents but managed by underwriters in the United States are excluded from the gross figures.

Section VI comprises two tables on the money credit and debit balances, as appearing on the books of reporting brokers and dealers in the United States, in accounts of foreigners with them, and in their accounts carried by foreigners.

The data published in these sections do not cover all types of reported capital movements between the United States and foreign countries. The principal exclusions are the intercompany capital transactions of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies, and capital transactions of the United States Government. Consolidated data on all types of capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

- ^{1/} Includes Bank for International Settlements and European Fund.
^{2/} Short-term U.S. Government obligations at cost value and funds awaiting investment obtained from proceeds of sales of gold by the International Monetary Fund to the United States to acquire income-earning assets. Upon termination of investment, the same quantity of gold was reacquired by the International Monetary Fund.
^{3/} Principally the International Bank for Reconstruction and Development and the Inter-American Development Bank. Includes difference between cost value and face value of securities in IMF gold investment account (\$14 million at end 1971).
^{4/} In addition, IMF gold investment included investments in U.S. Government bonds and notes which amounted to \$109 million at end 1960, \$187 million at end 1961, and \$61 million at end 1963.
^{5/} Data on the two lines shown for this date differ because of changes

- in reporting coverage. Figures on the first line are comparable in coverage to those shown for the preceding date; figures on the second line are comparable to those shown for the following date.
^{6/} Data on the second line differ from those on the first line because certain accounts previously classified as "official institutions" are included with "banks" and a number of reporting banks are included in the series for the first time.
^{7/} Second line includes \$7 million increase in dollar value of foreign currency obligations revalued to reflect market exchange rates as of Dec. 31, 1971.
^{8/} Includes \$15 million increase in dollar value of foreign currency liabilities revalued to reflect market exchange rates.

1/ Data on the two lines shown for this date differ because of changes in reporting coverage. Figures on the first line are comparable in coverage to those shown for the preceding date; figures on the second line are comparable to those shown for the following date.

2/ Data on the second line differ from those on the first line because those claims of U.S. banks on their foreign branches and those claims

of U.S. agencies and branches of foreign banks on their head offices and foreign branches which were previously reported as loans are included in "other short-term claims"; and a number of reporting banks are included in the series for the first time.

FINANCIAL OPERATIONS OF GOVERNMENT AGENCIES AND FUNDS

Government Corporations and Other Activities

Treasury Department Circular No. 966, Revised, dated December 20, 1972, and Treasury Fiscal Requirements Manual, Transmittal Letter No. 95 of the same date require Government agencies to submit business-type financial statements and related information to the Department of the Treasury for use in compiling financial reports of the U.S. Government. The circular was originally issued in 1956 pursuant to the authority of Section 114 of the Budget and Accounting Procedures Act of 1950 (31 U.S.C. 66b) which requires the Secretary of the Treasury to prepare reports on the financial operations of the U.S. Government.

Department Circular No. 966, Revised, requires submission of semiannual financial statements by all Government corporations specifically subject to the Government Corporation Control Act, as amended (31 U.S.C. 846, 856) and any wholly owned and mixed-ownership corporations subsequently brought under the provisions of the act, and all other activities operating as revolving funds. Other business-type activities required to report semiannually include activities and agencies whose operations, services, or functions are largely self-liquidating or primarily of a revenue-producing nature or whose activities result in the accumulation of substantial inventories, investments, and other recoverable assets. Regular governmental activities, which are of a nonbusiness-type nature, are required to report on an annual basis.

Two basic kinds of financial statements are called for by Department Circular No. 966, Revised; and they are published in the Treasury Bulletin. Statements of financial condition

are required for all activities. Statements of income and retained earnings are required for business-type activities only.

The statements of financial condition for business-type activities appear in Section I, Table GA-I-1 and are published semiannually. The first statements of financial condition published under the revised circular were as of December 31, 1972, applied to business-type activities only, and appeared in the May 1973 issue of the Bulletin. Statements of financial condition submitted annually by nonbusiness-type activities were published together with business-type activities in Section I, Table GA-I-1 in the January 1974 issue of the Bulletin. Loans shown on the agencies' statements of financial condition and held by the agencies, and loans guaranteed and insured by the agencies are reported on a quarterly basis. The first quarterly table on this Federal credit data, which was as of March 31, 1973, appeared in Section III, Table GA-III-2 in the August 1973 issue of the Bulletin. The first semiannual statements of income and retained earnings submitted under the revised circular were for the period July 1, 1972, through December 31, 1972, and appeared in Section I, Table GA-I-2 in the June 1973 issue of the Bulletin. All revolving funds shown in the statements are noted to indicate whether they are public enterprise funds, intragovernmental funds, or trust revolving funds; and trust funds are also noted. Direct sales and repurchases of loans are published on a monthly basis in Section II, Table GA-II-1.
