In the 13 -whek seties there were three iasues of $\$ 4,000$ million and one issue of $\$ 3,800$ million. In the 26 week series there were three iasued of $\$ 4,000$ million and one issue of $\$ 3,800$ million. Average rates for the new issues are show in the following table.

| Date of insue |  | Annual everage rate (bank diacount basis) |  |
| :---: | :---: | :---: | :---: |
|  | 1980 | 13-week | 26-week |
| Nov. | 6 | 13.344 | 13.269 |
|  | 13 | 13.514 | 13.231 |
|  | 20 | 14.309 | 13.917 |
|  | 28 | 14.384 | 14.030 |

Treasury 8ills (Other than Cash Management 8ills) - General
Treasury bills are sold on a discoumt basis under competitive and noncompetitive bidding, and at meturity their par amount is payable without incerest. All serics are issued entirely in book-entry form in o minimum amount of $\$ 10,000$ and in any higher $\$ 5,000$ multiple, on the records either of the Federal Reserve 8anks and Branches, or of the Department of the Treasury

Tenders are received ar Federal geserve banks and branches and from individuals at the sureau of the Public Debt, Washington. Each tender must be for a minimunm of $\$ 10,000$. Tenders over $\$ 10,000$ must be in mutiples of $\$ 5,000$. Payment for the full par amount applied for must accompany all tenders submitted for bills to be maintained on the bookentry records of the Department of the Treasury. A cash adfustment will be made for the difference between the par payment submitted ond the actual issue price as determined in the auction. No deposit need accompany tenders from incorporsted banks and trust companie and from responsible and recognized dealers in investment securities for bille to be maintained on the book-entry records of Federal Reserve sanks and 8 ranches. A deposit of 2 percent of the par amount of the bills applied for muat accompany tenders for such bills from others, unless an expreas guaranty of pavment by an incorporated bank or truat compony accompaniea the tendera.

Noncompetitive tenders (without stated price), usually for $\$ 500,000$ or leas from any one bidder, for each iasue of 13-week, 26-week, and 52-week billa, sre accepted in full at the weighted sversge price of accepted competitive bide for an isaue.

Paynent fur accepted tendera must be made or completed on the date of iasue, in cash or other imnediately available funds or in a like par amount of Treasty Securities maturing on or before that date. Payment for 13-week, 26-week, and 52 -week bills may not be made by credit in Treasury tax and loan accounts.

Table FFO-2. - Budget Receipts by Source-Continued

Source: Monthly Treasury Statement of Receipts and Outlays of the United States Covernment
Note: Budget estimates are based on the Current Budget Estimates, July 1980, released on July 21, 1980, by the Office of Management and Budget
1/ Includes individual income taxes designated for the Presidential
election campaign fund. Prior to February 1974, these taxes were included in "Other".
T-cludes $\$ 442,615$ thousand in faes for 1 icenses to import petroleum
and petroleum products.
frictudes $\$ 1,670$ million in fees for licenses to import petroleum and petroleum products
Estimate figures include $\$ 6,811$ million from the recently enacted wind fall profits tax for 1980 and $\$ 26,145$ million for 1981 and $\$ 30$ milliton for the Inland wateryay trust fund for 1991 . Less then $\$ 500,000$. Revised.

Source: Monthly Treasury Statement of Receipts and Outlays of the United States Government.
Budget estimates are bared on Current Budget Estimates, July
1980, released on July $1,198 n$ by the office of Management and Budget. Frtimates in detail are $n$. availabl $\epsilon$. laludes receipes $f_{1}$ fu of ${ }^{\circ}$,hith agencies to the Givil Service Retirement and Disability Fund as of May 1974.
Beginning fiscal 1974 , includes adjustments of interest on public debt issue to convert to the accrual basis. Also includes Indian tribal funds, Intericr Dedartment, Judicial survivors annuity fund, State,
foreign service retirement and disability fund, and Airport and Airway trust fund.
3/ Prior to January 1975, Rents and Royalties on the Outer Continental Shelf Lands were shown as proprietary receipts from the public for? the Interior Department. To conform with the FY 1976 Budget Document's presentation, these amountswere reclassified and are now being shown as undistributed offsetting receipts. As a result, the detail will not add to the Fiscal Year 1974 totals.
Less than $\$ 500,000$. I Revised

25/ 25\% of taxable lobbying expenditures.
26/ Tax on the windfall profit from domestically produced oil at rates from 30 percent to 70 percent, effective March 1, 1980.
27) Contains, among other items, amounts paid into depositaries but not yet classified into excise detail from tax returns filed. Fy 1980 data primarily less than $\$ 500,000$
Revised. n.a. Not available
"Obligations" are the basis on which the use of funds is controlled in the federal Government. They are recorded as the point at which the Government makes a firm commitment to acquire Roods or services and are the first of the four key events-order, delivery, payment, consumption-which characterize the acquisition and use of resources. In general, they consist of orders placed, contracts awarded, services received, and similar transactions requiring the disbursement of money.

The obligational stare of Government transactions is a strategic point in gauging the impact of the Covernment's operalions on the national economy, since it frequently represents for business firms the Government commitment which stimulates business investment, including inventory purchases and employment of labor. Disbursements may not occur for months after the Governmens places its order but the order itself usually causes immediate pressure on the private econumy.

Obligations are classified according to a uniform set of categories which are based upor the nature of the transaction without regard to its ultimate purpose. All payments for salaries and wages, for example, are reported as personnel compensation, whether the personal services are used in current operations or in the construction of capital items.

Federal agencies and firms often do business with one another: in doing so, the "buying" agency records obligations, and the "performing" agency records reimbursements. In Table FO-I, obligations that are incurredwithin the Government are distinguished from those incurred outside the Government. Tables FO-2 and 3 show only those incurred outside.

Obligation data for the administrative budget fund ac counts ware first published in the September 1967 Treasury Bulletin and the trust fund accounts were first published in the October 1967 Bulletin. Beginning with the April 1968 8ulletin, the data are on the basis of the budget concepts adopted pursuant to the recommendations of the President's Commission on Budget Concepts.

Table FO-1. - Gross Obligations Incurred Within and Outside the Federal Government by Object Clasa, May 31, 1980

Surce: Reports on Obligations, Standard Form 225, frim agencies.
1/ For Federal Budget presentation a concept if "net obligations incurred" is penerally used. This concept eliminates eransactions within the Government and revenue and reimbursements if of the public which by statuce may be used by Government agencies $\$ 1$ thout appro priation action bv the Congress. Sumnary fieures on this basis foll w. (This data is on the basis of Reports on Obligations teceived from the agencies prior to reports submitied for Budget
presentati in and therefore may differ somewhat trom the Budget document.)

## Source and Availability of the Balance in the Account of the U.S. Treasury

The operating ash of the Treasury is maintained in Treasury's accounts with the Federal Reserve banks and branches and in tax loan accounts. As the balances in the accounts at the Federal Reserve Banks hecome depleted, they are restored by calling in (Withdrawing) funds from thousands of financial institutions throughout the country authorized to maintain tax and loan accounts.

Under authority of P.L. 95-147, the Treasury implemented $a$ program on November 2,1973 , to invest a portion of its operating cash in obligations of depositariesmaintaining tax and loan accounts. Lnder the Treasury Tax and Loan investment program, depositary financial institutions select the manner in which they will participate in the program. Depositaries that wish to retain funds deposited in their tax and ioan accounts in interest-bearing obligations participate under the Note Option; depositaries that wish to remit the funds to the Treasury's account at Federal Reserve banks participate under the Remlttance option.

Deposits to tax and loan accuunts occur in the nurmal course of business under a uniform procedure applicable to all financial insticutions whereby customers of financial institutions deposit with them tax payments and funds for the purchase of Goverment securities. In most cases the transaction involves merely the transfer of funds from a customer's account to thetax and loan account in the same financial institution. On occasions, to the extent authorized by the Treasury, financial institutions are permitted to deposit in these account.s proceeds from subscriptions to public debt securities entered for their awn account as well as for the accounts of their customers.

The tax and loan system permits the Treasury to collect funds through financial institutions and to leave the funds in Note Option depositaries and in the financial communities in which they arise until such time at the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuation operations on Note Option financial institution reserves and the economy

: The computed annual interest chaise represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of each month or vear should remain outstanding for a year at the applicable annual rate of interest. The charge is computed for each issue by applying the appropriate annal interest rate to the amount outstanding on that date (the amount actually botrowed in the case of securities sold at a premiun or discount, beginning with May 1960). The aggregate charge for all incerest-bearing issues constitutes the total computed annual interest charke. The average annual rate is computed by dividing the computed annual interest charge for the topal on for any zroup of issues. by the corresponding principal amount Businning wirn data for December 31,1454 , the computation is base
the rate if effective yield fur issue sild it fremium or discount, Frior to that date it was based on the coupon rate for all issues As of July 1974, includes Federal Financing Bank,
/ Excludes Federal Financing Bank.
3/ Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rde. on United States savings bonds the rate co maturity is applied against the amount outstanding
As of July 31, 1974, Monthly Statement of the Public 0ebt of the U.S. the column heading was changed to "Government account series" whic includes Treasury deposit fonds in addition to those accounts pre

Source: Monthly Statement of the Public Debt of the U.S.; Office of Market Analysis, United States Savings Bonds Division
Note: In these tables sales of Series A-F and J bonds are included at is sue price, and redemptions and amounts outstanding at currept redemption value. Series $G, H$, and $K$ are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured J and K bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, and are then cransferred to matured debt on which interest has ceased.
(1) Sales and redemption figures include exchanges of minor amounts of (1) matured Series E bonds for Series G and K bonds from May 1951 through April 1957; (2) Series F and J bonds for Series $H$ bonds beginning January 1900: and (3) U.S. savings notes for Series $H$ bonds beginning January 1972; however, they exclude exchanges of Series E bonds for Series $H$ honds, which are feported in Table SB-3.
2/ Details by series on a cumulative basis and by periods of Series A-D combined will be found in the February 1952 and previous issues of the Treasury Bulletin.
3) Series E and H sales and redemptions include unclassified Series EE and Hf.
4) Besause there is a normal 1 ag in classifying redemptions, the distributions of redemption between sales price and accrued discount has been estimated. Beginning with the Treasury Bulletin of March 1961 the
method of distributing redemptions between sales price and accrued discount has been changed to reflect the distribution shown in final reports of classified redemption. All periods shown have been revised on this basis.
5/ Series F and G sales were discontinued Aptil 30, 1952, and Series J and $K$ sales were discontinued April 30, 1957. Sales figures after April 30, 1957. represent adjustments.
6/ Includes exchanges of Series 1941 F and G savings bonds for $3-1 / 4 \%$ marketable bonds of 1978-83.
Includes exchanges of Series 1948 F and G bonds for $4-3 / 4 \%$ marketable notes of 1964
Includes exchanges of Series 1949 F and G bonds for $4 \%$ marketable bonds of 1969
Includes exchanges of Series 1960 F and G bonds for $3-7 / 8 \%$ marketable bonds for 1968.
I/ Includes exchanges of Series 1951 and 1952 F and G bonds for $3-7 / 8 \%$ marketable bonds of 1971 and 4\% marketable bonds of 1980.
8/ Represents changes in the amounts of redemptions not yet classified between matured and unmatured issues.

* Less than $\$ 500,000$
n.a. Not available.

United States savings notes were on sale May 1,1967 through June 30, 1970. The notes were eligible for purchase by individuals with the simultaneous purchase of Series $E$ savings bonds.

The principal terms and conditions for purchase and redemption and information on investmont yields of savings notes appear in the Treasury Bulletins of March 1967 and June 1968; and in the Annual Report of the Sectetary of the Treasury for fiscal year 1974.

Note: The Export-lmport Bank was moved within the Budget effelcsve October 1, 1976 pursuant to Public Law 41 -b4h. Adjustments are made to include totals for the period it was outside the Budget (August 17, 1971 through September 30, 1976). Also, udjustments are made to reflect certain Export-Import Bank bofrowing transactions now
classified as agency debt. These transactions were previously reported as off-budget negative outlays.
1/ Includes a nonmarketable Federal Reserve special certificate for $\$ 2,500$.
2) Adjusted to exclude non-interest-bearing notes issued to the international Monetary Fund to reflect the unified budget-concept,
3) For detail, see Table F0-

Less than $\$ 500,000$.

1/ United states aswims bonds, Serics A-F and I, are included at current
reden uti $n$ value.
Consist, of commercial banks, trust compantr, and stoik savines
hanks in the inited states and in Territors and island f ssessions
Figures exclude securitic, held in trust departments
Includes partnerships and personnt trust accounts.
\#1 Ext 1 cive of bank, and ins rance companis.
F/ omsists of the investment of reign balances and international
exclude issues to the International Monetary fund and other international lending organizations to reflect the unified budge
oncept. f corporate pension trust funds, and dealers and brokers. Also included a cere government included are certain government deposit accoun government sponsored agencies and all other investors not included abovere discontinued after June 30,1970 . Pteliminary.

## OCTOBER 31, 1980

The monthly Treasury Survey of Ownership covers securities issued by the United States Government, Federal agencies, Fed-erally-sponsored agencies, and the District of Columbia. The banks and insurance companies included in the Survey currently account for about 80 percent of all such securities held by these institutions. The similar proportion for corporations and for savings and loan associations is 50 percent, and for State and local governments, 40 percent. Data were first published for banks and insurance companies in the May 1941 Treasury Bulletin, for corporations and savings and loan associa-
tions in the September 1960 Bulletin, and for State and local governments in the February 1962 Bulletin.

Holdings by commercial banks distributed according t., Federal Reserve member bank classes and nonmember banks are published for June 30 and December 31. Holdings by corporate pension trust funds are published quarterly, first appearing in the March 1954 Bulletin.

[^20]/ Index of new reoffering yields on 20 years general obligations rated Aa by Moody's Investors Service. Prior to June 1970, the series was compiled by Securities Industries Association. Since then, the series has been compiled by Treasury.
4/ One or more new long-term bonds added to the average.
5/ An existing bond dropped from the long-term bond average.
n.a. Not available.
AVERAGE YIELDS OF LONG -TERM TREASURY, CORPORATE,

The tables in this section are designed to provide data on United States reserve assets and liabilities and other statistics related to the United States balance of payments and international financial position.

Table IFS-1 shows the reserve assets of the United States, including its gold stock, special drawing rights held in the Special Drawing Account in the International Monetary Find, holdings of convertible foreign currencies, and reserve position in the International Monetary Fund.

Table IFS-2 brings together statistics on liabilities to foreign official institutions, and liquid liabilities to all other foreigners, which are used in the United States balance-of-payments statistics.

Table IFS-3 presents an area breakdown of United States liabilities to official institutions of foreign countries.

Table IFS-4 shows United States Treasury nonnarketable bonds and notes issued to official institutions and other residents of foreign countries.

Table IFS-5 sets forth the factors which affect the United States position in the International Monetary Fund.

Table IFS-6 presents a measure of weighted-average changes in exchange rates between the inited States dollar and the currencies of certain other countries.

1/ Begimning July 1974, the IMF adopted a technique for valuing the special drawing $\tau$ ight (SOR) based on a weighted-average of exchange rates for the currencies of 16 member countries. The United States SOR holdings and reserve position in the IMF are also valued on this basis beginning July 1974.
2/ Includes gold sold to the United States by the International Monetary Fund with the right of repurchase, and gold deposited by the International Monetary Fund to mitigate the impact on the U.S. gold stock of foreign purchases for the purpose of making gold subscriptions to the Fund under quota increases. For corresponding liabilities see Table TFS - 2.
3/ Includes gold held by the Exchange Stabilization Fund (ESF). See "Account of the U.S. Treasury," Table UST-3.
4/ Includes allocations of SDRs In the Special Drawing Account in the International Monetary Fund, plus or minus transactions in SDRs. Allacations of SDRs on January 1 of respective years are as follows: 1970, $\$ 867$ million; 1971, $\$ 717$ million; 1972, $\$ 710 \mathrm{million} ; 1979$, 874 million (In SDR terms); and $1980,874 \mathrm{milli}$ ion (in SDR terms).
5/ Includes holdings of Treasury and Federal Regerve System; beginning November 1978, these are valued at current market exchange rates.
6) The United States has the right to purchase foreign currencies equivalent to its reserve position in the Fund automatically if needed. Uneer appropriate conditions the United States could purchase additional amounts related to the United States quota. See Table IFS-5.
7/ Includes $\$ 28$ million increase in dollar value of foreign currencies revalued to reflect market exch hange rates as of December 31. 1971. See also footnotes 3 and 4, Table IFS-4.
8) Total reserve assets include increase of $\$ 1,016$ million resulting from change in par value of the U.S. dollat in May 1972, consisting of $\$ 828$ million total gold stock, $\$ 822$ million Treasury gold stock, $\$ 155$ million special drawing rights and $\$ 33$ million reserve position in the International Monetary Fund.
9/ Total reserve assets include increase of $\$ 1,436$ million resulting from change in par value of the dollar on October 18, 1973, consisting of $\$ 1,165$ million total gold stock, $\$ 1,157$ million Treasury gold stock, $\$ 217$ million special drawing rights, and $\$ 54$ million reserve position in the International Monetary Fund.

Table IFS-2. - Selected U.S. Liabilities to Foreigners

Note: Table is based on Treasury Department data and on data reported to the Treasury Department by banks and brokers in the United States. Data correspond generally to statistics following in this section and in the "Capital Movements" section, except for the exclusion of nonmarketable, nonconvertible U.S. reasury notes issued to foreign official nonreserve agencies and the inclusion of investments by foreign official rescrve agencies in debt securities of $U . S$. Fed-erally-sponsored agencies and U.S. corporations. Table excludes International Monetary Fund "holdings of dollars," and holdings of U.S. Treasury letters of credit and nonnegotiable noninterest-bearing speckal U.S. notes held by other international and regional organizations.
1/ Includes liahility on gold deposited by the International Monetary Fund comitigate the impact on the U.S. gold stock of foreign pure chases for gold subscriptions to the Fund under quota increases, and $\mathrm{I}^{1} . S$. Government obligations at cost value and funds awaiting Investment obtained from proceeds of sales of gold by the International Monetary Fund to the United States to acquire income-earning assets.
2f Includes Bank for International Settlements and European Fund
3/ Derived by applying reported transactions to benchmark data.
$\frac{4}{5}$ ) Excludes notes issued to foreign official nonreserve agencies.
Includes debt securities of U.S. Government corporations, Fed-erally-sponsored agencies, and private corporations.
6/ Includes liabilities payable in dollars to foreign banks, and liabilities payable in foreign currencies to foreign banks and to "other forelgners."

7/ Includes marketable U.S. Government bonds and notes held by foreign banks.
8/ Includes nonmarketable U.S. Government bonds and motes held by foreign banks.
Principally the International Bank for Reconstruction and Development, the Inter-American Development Bank and the Asian Development Bank.
10/ Data on the two lines shown for this date differ because of changes in reporting coverage. Figures on the first line are comparable in coverage to those shown for the preceding date; fisures on the second line are comparable to those shown for the following date.
11/ Data on the second line differ from those on the first line because certain accounts previously classified as "official institutions" are included with "banks"; a number of reporting banks are included in the series for the first time; and foreign currency liabilities are increased in value to reflect market exchange
rates as of December 31, 1971, as follows: U.S. Treasury certificates, $\$ 7$ million; nonmarketahle U.S. Treasury bonds and notes, colunn 6, $\$ 103$ million and column 12 , $\$ 18$ million.
12/ Includes $\$ 162$ million increase in dollar velue of foreign currency liabilities to official institutions of foreign countries revalued to reflect market exchange rates, as follows: short-term liabilities, $\$ 15 \mathrm{million}$; and nonmarhatable U.S. Treasury notes, $\$ 147$ million.
p. Preliminary $\quad \tau$ Revised.

Note: Data represent short-term and long-term liabilities to the official institutions of foreign countries, as reported by banks in the United States: foreign official holdings of marketable and nonmarketable U.S. Government securities with an original maturity of more than one year except for nonmarketable notes issued to foreign official nonreserve agencies; and investments by foreign official reserve agencies in debt securities of U.S. Government corporations, Federally-sponsored agencies, and private corporations
1/ Includes Bank for International Settlements and European Fund
2/ Includes Bank for International Settlements and European Fund. includes countries in ocearia,
3) Data on the two lines shown for this date differ because of changes in reporting coverage. Figures on the first line are comparable in
coverage to those shown for the preceding date: figures on the second line are comparable to those shown for the following date.
4/ Data on the second line differ from those on the first line because certain accounts previously classified as "official institutions" are included with "banks": a number of reporting banks are included in the series for the first time; and II.S. Treasury liabilities payable in foreign currencies to official institutions of foreign countries are increased in value by $\$ 101$ million to reflect market exchange rates as of December 31, 1971.
5/ Includes $\$ 162$ million increase in dollar value of foreign currency liabilities revalued to reflect market exchange rates.
p Preliminary. r Revised.

Table IFS-5. - U.S. Position in the international Monetary Fund

Note: The initial U. Quota in the International Monetary Fund was $\$ 2,750$ million. The U.S. quota was increased to $\$ 4,125 \mathrm{million}$ in 1954, $\$ 5,160$ million in February 1066 , and $\$ 6,700 \mathrm{million}$ in Derember 1970, and revalued to $\$ 7,274$ million in May 1972 and $\$ 5,083$ million in October 1973 as a result of changes in the par value of the dollar In April 1978 the U.S. quota was increased in SDR terms from 6,700 million to 8,405 million.
1/ Represents net Fund sales of gold to acquire U.S. dollars for use in Fund operations. Does not include transactions in gold relating to gold deposits or gold investment (see Table IFS-2).
2/ Represents net loans made to the IMF under borrowing arrangements.
3/ Positive figures represent purchases from the Fund of currencies of other members for aquivalent amounts of dollars; negative figures represent repurchases of dollars, including dollars derived from charges on purchases and from other net dollar income of the Fund. The United States has a commitment to repurchase within 3-5 years but only to the extent that the Fund's holdings of dollars exceed the U.S. quota. Purchases of dollars by other countries reduce the U.S. commitment to repurchase by an equivalent amount.

4/ Represents the United States reserve tranch position in the Fund (the United States quota, plus net U.S. loans to the IMF, minus Fund's purchase in Eoreign currencies automatically if the United States could purchase in loreign currencies automatically if needed. Under appropriate conditions, the United States could purchase additional amounts related to the United States quota.
5/ Includes $\$ 30$ million of special drawing rights.
Represents amount paid in dollars to the Fund to maintain the value of fund holdings of U.S. dollars.

If Beginning July 1974, IMF dollar holdings figures exclude currency valuation adjustments for individual months shown as follows (in millions of dollars):

```
Payable to the U.S.
```

Table IFS-6. - Weighted-Average of Exchange Rate Changes for the Dollar

- This table presents calculations of weighted average percentage changes In the rates of exchange between the dollar and certain foreign currencles, in order to provide a measure of changes in the dollar's general foreign exchange value broader than a measure provided by any single exchange rate change. Calculations are provided for two sets of countries that account for a major share of U.S. foreign trade. U.S. bilateral trade patterns in 1972 are used as a convenient, readily avallable proxy for the assigment of relative weights to individual exchange rate changes, though such welghts do not provide a full measure of individual currencies t telative importance in U.S. international transactions because they take no account of factors other than trade. The calculations do not purport to represent a guide to measuring the impact of exchange rate changes on U.S. international transactions.
Exchange rate data used in constructing the indices reported here differ somewhat from those used in earlier calculations to more accurately reflect end-of-period currency values.
The equations used are as follows:
Equation one is used to calculate a trade-weighted average of changes in the dollar cost of foreign currencles:

$$
\begin{aligned}
\text { (EQ1) } \quad E_{m}= & \Sigma\left(\Delta S / f c_{i} * M_{i} / \Sigma M\right) \\
\text { Where: } & E_{m} \text { is the weighted average of percentage } \\
& \text { changes in the dollar cost of individual } \\
& \text { foreign currencies; } \\
& \Delta \$ / f c_{i} \text { is the percent change in the dollar } \\
& \text { cost of foreign currency } i \text { and } \\
& M_{i} / \Sigma M \text { is U.S. imports from country i, as } \\
& a \text { proportion of total U.S. imports from } \\
& \text { all countries in the set. }
\end{aligned}
$$

Equation two is used to calculate a trade-weighted average of changes in the forelgn exchange cost of dollars:
(EQ2) $\quad E_{X}=\Sigma\left(\Delta f c_{i} / \$ * X_{i} / \Sigma X\right)$
Where: $E_{X}$ is the weighted average of percentage changes in the foreign currency cost of dollars:
$\Delta \mathrm{fc}_{\mathrm{i}} / \$$ is the percent change in the foreign currency i cost of dollars; and
$x_{i} / \Sigma x$ is U.S. exports to country i, as a proportion of total U.S. exports to all countrics in the set
Equation three fombines the above export-weighted and import-weighted averages to provide an overall measure of exchange rate change:
(EQ3) $E=\left[\left(E_{m} * m / m+x\right) *(-1)\right]+\left[E_{X} * x / m+x\right]$
Where: $m / m+x$ is U.S. imports as a proportion of its total trade with all countries in the set: and
$x / m+x$ is U.S. exports as a proportion of its total trade with all countries in the set.

2/ Australia, Austria, Belgium-Luxembourg, Canada, Oemark, Finland, France Cermany, Greece, Iceland, Ireland, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, United Kingdom.
3/ The currencies of 46 tMF member countries which account fnr approximately ग(O\% of U.S. total trade.
p Preliminary.

Background
Data relating to capital movements between the United States and foreign countries have been collected since 1935 under Treasury regulations pursuant to Executive Orders Nos. 6550 of January 15, 1934 and 10033 of February 8, 1949, and the International Investment Survey Act of 1976. Reports are filed with Federil Reserve Banks by banks, bank holding companies, securities brokers and dealers, and nonbanking enterprises in the United States. Statistics on the principal types of data and the priscipal countries are then consolidated and are published in the monthly Treasury Bulletin.

The reporting forms and instructions $1 /$ used in the Treasury International Capital (TIC) Reporting System have been revised a number of times to meet changing conditions and to increase the usefulness of the published statistics. Recent revisions to the reporting forms are part of a broad program conducted over the past several years to ensure the adequacy of the Treasury capital movements statistics for analysis and policy formulation with respect to the international financial position of the United States and on movements of capital between the United States and foreign countries. Revised forms and instructions are developed with the cooperation of other Government agencies and the Federal Reserve System and in consultations with representatives of banks, securities firms and nonbanking enterprises.

The most recent revisions of the TIC B-series Forms, filed by banks and some brokers in the United States, became effective with reports as of April 30,1978 ; new data series were introduced in the July 1978 Treasury Bulletin. Substantial revisions of the C-series Forms, filed by nonbanking enterprises, were effective with reports as of December 31, 1978; the new data series are shown beginning with the June 1979 issue. Major revisions of the TIC Forms that affect the format and coverage of the current Capital Movements tables are noted under "Description of Statistics" below.

Basic Definitions
The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including United Statescitizens domiciled abroad, and the foreign branches, subsidiaries and offices of United states banks and business concerns; the central governments, central banks and other offirial institutions of foreign countries, wherever located; and international and regional organizations, wherever located. The term "foreigner" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled, as shown on the records of reporting institutions. For a number of reasons, the geographical breakdown of the reported data may not in all cases reflect the ultimate ownership of the assets. Reporting institutions are not expected to go beyond the addresses shown on their records, and so may not be aware of the country of domicile of the ultimate beneficiary. Furthernore, U.S. liabilities arising from deposits of dollars with foreign banks are reported generally in the Treasury statistics as liabilities to foreign banks, whereas the liability of the foreign bank receiving the depositmay be to foreign official institutions or residents of another country.

Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organisations are reported opposite the appropriate international or regional classification except for the Bank for International Settlements and the European Fund, whichare included in the classification "Other Europe
Geographical Classification
A number of changes in geographical classification were introducedformost Capital Movements tables in the July 1978 issue. Several countries formerly included in "Eastern

Europe" and in "Other Latin American Republics' are shown separately in the country list as well as a new category in the International and Regional grouping for "Middle Eastern Regional" in view of the proliferation of regional financial organizations, primarily in the Arab States. The remaining countries in the categories "Other Eastern Europe" and "Other Western Europe" were combined into a single "Other Europe" category; and the heading, "Latin America" was retitled "Latin America and Caribbean." To the extent possible, the statistics for earlier dates have been adjusted in accordance with the revised country stub.

## Reporting Coverage

Reports are required from banks, bank holding companies securities brokers and dealers, and nonbanking enterprises in the United States, including the branches, agencies, subsidiaries, and other affiliates in the United States of foreign firms. Institutions that have reportable liabilitities, claims, or securities transactions belowspecified exemption levels are exempt from reporting.

Banks file reports monthly covering their dollar liabilities to, and dollar claims on, foreigners ina number of countries. Twice a year as of June 30 and December 31, they also report the same liabilities and claims items with respect to foreigners in countries not shown separately on the monthly reports. Beginning with reports due as of June 30,1978 , banks also report quarterly their liabilities and claims vis ais foreigners that are denominated in foreign currencies. The specified exemption level applicable to the monthly reports is $\$ 2$ million and is based on the average for the report dates during a six-month period, including the current report date. There are no separate exemption levels for the quarterly and semiannual reports.

Banks, securities brokers and dealers, and in some instances, nonbanking enterprises, report monthly their transactions in securities with foreigners; the applicable exemption level is $\$ 500,000$ on the grand total of purchases and on the grand total of sales during the month covered by the report.

Quarterly reports are filed by exporters, importers, industrial and commercial concerns, financial institutions other than banks and brokers, and other nonbanking enterprises if their liabilities or claims, on the six-month average basis, are $\$ 2$ million or more. Beginning December 31, 1978, these firms also report for each month-end their U.S. dollardenominated deposit and certificate of depositclaims on banks abroad of $\$ 10 \mathrm{milli}$ ion or more.

## Description of Statistics

Section I presents datain four tables on liabilities to foreigners reported by banks in the United States. Beginning April 1978, amounts due to banks' own foreign offices are shown separately; the previous distinction between short-term and long-tem liabilities has been eliminated; there is a separation of the liabilities of the reporting banks themselves from their custody liabilities to foreigners; and foreign currency liabilities are only reported quarterly. Also, beginning April 1978, the data on liabilities are more complete by extending to securities brokers and dealers the requirement to report certain of their own liabilities and all of their custody liabilities to foreigners.

Table CM-I-1, showing total tiabilities by type of foreign holder, combines liabilities previously shown separately as either short-tem or long-term. Table $C M-I-2$, Parts A and B, on foreigners' holdings of liabilities by type, shows total bank reported liabilities payable io dollars. Table CM-I-3 presents total liabilities by country for recent periods and includes the long-term data previously shown separately; whereas $C M-I-4$, covering total liabilities by type and country for the most recent month, includes several data items not reported separately prior to April 1978. The liabilities data on supplementary countries previously presentedin Table CM-I-5 now appear in TableCM-III-1. (SeeSection III below.)

Section II presents the claims on foreigners reported by banks in the United States. Beginning with data reported as of the end of April 1978, banks'claims held for their own acacount are reported separately from claims held for their domestic customers. The former are available in a monthly series whereas the latter data are collected on a quarterly basis only. Also, there is no longer a breakdown available on the long-term and short-term components of banks' claims. Maturity data arecollected quarterly on time remaining to maturity basis as opposed to the historic original maturity classification. Foreign currency claims are also collected only on a quarterly basis.

Table CM-II-1 presents total clalms by typeas reported on the old B-series Forms and has been revised to include the long-term claims components formerly published separately. Table CM-II-2, showing total claims by type, is based on the revised banking reports. Table CM-II-3, which represents total claims by country, merges the previously reported shortterm and long-term claims data fromoldCM-II-2 and CM-II-5. New Tables CM-II-4 through CM-II-7 are based on the revised reports and replace the previous tables which showed shortterm and long-term claims separately.

Another important change in the claims reporting, beginning with new quarterly data as of June 30,1978 , is the adoption of abroadened concept of "foreign public borrower," which replaces the previous category of "foreign official institution" to produce more meaningful information on lending to the publlc sector of foreign countries. The term "for= eign public borrower" encompasses central governments and departments of central governments of foreign countries and of their possessions; foreign central banks, stabilization funds, and exchange authorities: corporations and other agencles of central governments, including development banks, development institutions and other agencies which are ma-jority-owned by the central government or its departments; State, provincial and local governments of foreign countries and their departments and agencies; and any international or regional organization or subordinate or affiliated agency thereof, created by treaty or convention between sovereign states.

Section III includes two supplementary tables on U.S. banks' liabilities to, and claims on, foreigners. Table CM-III-1 summarizes dollar liabilities to, and banks' own dollar claims on, countries and areas not regularly reported separately. Beginning with reports due as of June 30, 1978, these data are collected semiannually. Previously, the semiannual reports were addressed to liabilities items only and were reported as of April and December; however, they are now collected as of the end of June and December. Table CM-III-2 presents data on U.S. banks' loans and credits to nombank foreigners, based on the TIC reports and on the monthly Federal Reserve 2502 reports submitted for foreign branches of U.S. banks.

Sections IV and $V$, respectively, show thie liabilisies to, and clalms on, unaffiliated foreigners by exporters,importers, industrial and comercial concerns, financial institutions other than banks and brokers, and other nonbanking enterprises in the United States. The data exclude the intercompany accounts of nonbanking enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. (Such transactions are reported by business enterprises to the Department of Commerce on its direct investment forms.) The data also excludeclaims held through banks in the United States. Beginning with data published in June 1979 (reported as of December 31, 1978),
there is separation of the financial liabilities and claims of reporting enterprises from their comercial liabilities and claims; and items are collected on a time remaining basis instead of the prior original maturity basis. In addition, the number of reporters increased somewhat as a result of a broad canvass of prospective reporters undertaken in late 1978.

In Section IV, Table CM-IV-1 combines liabilities previously shown as either short-term or long-term in old Table CM-IV-1; Table CM-IV-2 combines these shortterm and long-term liabilities by country and replaces previous Tables CM-IV-2 and CM-IV-4. Table CM-IV-3, covering total liabilities by type and country for the most recent quarter-end, includes several items not reported separately prior to December 1978.

The tables in Section $V$ have been extensively revised to reflect the changes in data collection format outlined above and the elimination of a monthly form that covered nonbanking enterprises' liquid claims on foreigners. Spe. cifically, Table CM-V-1 combines short-term and long-term claims: Table CM-V-2 shows total claims by country and replaces former Tables $\mathrm{CM}-\mathrm{V}-2$ and $\mathrm{CM}-\mathrm{V}-7$. Current Table CM-V-3 shows total claims by type and country and includes items that were not reported separately prior to end-year 1978. Tables $C M-V-4, C M-V-5$ and $C M-V-6$ no longer appear.

Section VI contains data on transactions in all types of long-term domestic and foreign securities by foreigners as reported by banks and brokers in the United States (except nonmarketable U.S. Treasury notes, foreign series; and nonmarketable U.S. Treasury bonds and notes, foreign currency series, which are shown in the "International Financial Statistics" section, Table IFS-4). The data cover new issues of securities, transactions in outstanding issues, and redemptions of securities. They include transactions executed in the United States for the account of foreigners, and transactions executed abroad for the account of reporting institutions and their domestic customers. The data include some transactions which are classified as direct investments in the balance of payments accounts. The data exclude securities issued abroad by foreign subsidiaries of U.S. corporations, some of which are treated in the balance of payments as issues of U.S. corporations.

The geographical breakdown of the data on securities transactions shows the country of domicile of the foreign buyers and sellers of the securities; in the case of outstanding issues, this may differ from the country of the original issuer. The gross figures contain some offsetting transactions between foreigners. The net figures for total transactions represent transactions by foreigners with United States residents; but the net figures for transactions of individual countries and areasmay include some transactions between foreigners of different countries. Beginning with data for 1969, transactions between foreigners in new issues not offered for sale to United States residents but managed by underwriters in the United States are excluded from the gross figures.

The data published in these sections do not cover all types of reported capital movements between the United States and foreign countries. The principal exclusions are the intercompany capital transactions of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies, and capital transactions of the United States Government. Consolidated data on all types of international capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

## Section $I$ - Liabilities to Foreigaers Roported by Banka in the United States

Table CM-I-1. - Total Liabilities by Type of Holder

Note: Total liabilities include liabilities previously classiffed as either "short-term" or "long-term" on the Treasury reports filed by banks. The maturity distinction was discontinued with new reports filed as of April 30, 1978, and historical series adjusted accordingly. See introductory text to Captial Movements tables for discussion of changes in reporting
1/ Includes Bank for International Settlements and European Fund
2/ Principally the International Bank for Reconstruction and Principally the International Bank for Reconstructio
Development and the Inter-American Development Bank.
3/ Data on the two lines shown for this date differ because of changes in reporting coverage. Figures on the first line are comparable in coverage to those shown for the preceding date; figures on the second line are comparable to those shown for the following date.
4) Includes U.S. Government obligations at cost value and funds awaiting investment obtained from proceeds of sales of gold by the International Monetary Fund to the United States to acquire income-earning assets in the arount of $\$ 400 \mathrm{million}$ at end 1970 and 1971. Upon termination of investment, the same quantity of gold was reacquired by the International Monetary Fund.

5/ Data on the second line differ from those on the first line because certain accounts previously classified as "offical institutions" are included with "banks" and a number of reporting banks are included in the series for the first time.
6/ Includes $\$ 7$ million increase in dollar value of foreign currency obligations revalued to, reflect market exchange rates as of Dec. 31, 1971.
7/ Includes $\$ 15$ million increase in dollar value of foreign tcurtency liabilities revalued to reflect market exchange rates.
8/ Data as of most immediately preceding quarter end
Preliminary.
Revised.

Note: Total claims Include claims previously classified as either "ahort-term" or "long-term" on the Treasury reports filed by banks. A monthly maturity breakdown was discontinued with new reports filed as of April 30, 1978, and the historical series has been adjuated accordingly, (See introductory text to Capital Movements Section for diacussion of changes in reporting forms and coverage.)

1. Data on the two lines shown for this date differ because of changes in reporting coverage. Figures on the first line are comparable in
coverage to those shown for the preceding date; figures on the second Ine are comparable to those shown for the following date
2) Data on the second inne differ from those on the first line becauae those claims of U.S. banks on their foreign branches and those claims of the U.S. agencies and branches of foreign banks on their head offices and forelgn branches which were previously reported as loans are included in "Other clalms"; and a number of reporting banks are included in the series for the firat time.

Section VI - Transactions in Long-Term Securities by Foreignera
Reported by Banka and Brokers in the United States
Tabla CM-VI-10. - Foreign Purchaees and Salea of Long-Term Securities, by Type and Country, During Calendar Year 1979

## Background

Data have been collected since 1974 on the foreign currency positions of banks and nonbanking firms in the United States, and on those of foreign branches, majorityowned foreign partnerships, and majority-owned foreign subsidiaries of United States banks and nonbanking firms. Reports cover nine major foreign exchange market currencies and United States dollars held abroad. Reporting has been required pursuant to Title II of Public Law 93-110, an amendement to the Par Value Modification Act, of September 21, 1973, and implementing Treasury regulations. Statistics on the positions will be published monthly in the Treasury Bulletin, beginning with data for December 1975.

The report forms and instructions used in the collection of bank data were revised effective with reports as of November 1, 1978, for the weekly reports, and as of October 31, 1978 (the last business day of the month), for the monthly reports. The most recent revision of the nonbank foreign currency forms (see below) became effective as of the last business day of September 1978. Among the changes on the forms, the Belgian franc was deleted as a reporting currency.

## Common Definitions and Concepts

The term "United States" means the States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Canal Zone, Midway Island, the Virgin Islands, and Wake Island. The term "foreign" means locations other than the "United States", The term "worldwide" is used to describe the sum of "United States" and "foreign" data.

Data for the United States include amounts reported by sole proprietorships, partnerships, and corporations in the United States including the U.S. branches and subsidiaries of foreign nonbanking concerns, in the case of "nonbanking firms' positions", and the agencies, branches, and subsidiaries located in the United States of foreign banks and banking institutions, in the case of the weekly and monthly "bank positions",

Data for "foreign branches" and "abroad" include amounts reported by the branches, majority-owned partnerships and majority-owned subsidiaries of United States banking and nonbanking concerns. In general, these data do not reflect the positions of foreign parents or foreign parents' subsidiaries located abroad except through intercompany accounts. The data include the foreign subsidiarles of a few foreign-owned U.S. based corporations.

Assets, liabilities, and foreign exchange contract data are reported on the basis of time remaining to maturity as of the date of the report, regardless of the original maturity of the instrument involved. "Spot" means due for receipt or delivery within 2 business days from the date of the report. "Short-term" means maturing in 1 year or leas from the date of the report.
"Majority-owned foreign partnerships" are those organized under the laws of a foreign country in which one or more nonbanking concerns or nonprofit institutions in the United States, directly or undirectly, own more than 50 percent profit interest. "Majority-owned foreign subsidiaries" are foreign corporations in which one or more nonbanking business concerns or nonprofit institutions located in the United States directly or indirectly own stock with more than 50 percent of the total combined voting power of all classes of stock entitled to vote, or more than 50 percent of the total value of all classes of stock.

## Reporting Threshold

The exemption level applicable to banks and banking institutions is $\$ 20$ million equivalent. The exemption level applicable to nonbanking business concerns and nonprofit institutions was $\$ 1$ million equivalent on all nonbank forms from March 1975 through November 1976. It was raised to $\$ 2$ million equivalent on the monthly reports of positions held in the United States. From November 1976 through September 1978 the exemption level was raised to $\$ 3$ million on foreign subsidiary positions on June 31, 1977 and for positions held in the United States on September 30, 1978.

Firms must report their entire foreign currency position in a specified foreign currency if a specified United States dollar equivalent value is reached in any category of assets, liabilities, exchange contracts bought and sold, or the net position in the currency. In general, exemption levels are spplied to the entire firm in the United States and separately to each foreign branch or subsidiary. In reports on their foreign branches, majority-owned foreign partnerships and majority-owned foreign subsidiaries, United States banks and nonbanks are required to report the United States dollar - denominated assets, liabilities, exchange contracts bought and sold, and net positions of those branches, partnerships, and subsidiaries with reportable positions in the specified foreign currencies.

## Description of Statistics

Data collected on the Treasury foreign currency forms are published in the Treasury Bulletin in nine sections. The first section presents a summary of worldwide net positions in all of the currencies reported. Sections II through VIII each present data on a Spacified foreign currency. Section IX presents the United States dollar positions of the foreign branches and subsidiaries of United States firms which are required to report in one or more of the specified foreign currencies.

SECTION I
$1 /$ Worldwide net positions on the last business day of the calendar quarter of nonbanking business concerns in the United States and their foreign branches and majorityowned partnerships and subsidiaries. Excludes receivables and installment paper which have been sold or discounted before maturity, U.S. parent companies' investment in their majority-owned foreign subsidiaries, fixed assets (plant and equipment) and capitalized leases for plant and equipment.

2/ Foreign branches and majority-owned partnerahips and subsidiaries only.

3/ Weekiy worldwide net positions of banks and banking institutions in the United States, and their foreign branches and majority-owned foreign subsidiaries. Excludes capital assets and liabilities.

4/ Foreign branches and majority-owned subsidiaries only.

5') Monthly worldwide net positions including capital assets and liabilities on the last business day of the month of banks and banking institutions in the United States and their foreign branches and majority-owned subsidiaries.

## SECTIONS II THROUGH IX

1) Positions of nonbanking business concerns in the United States and their foreign branches and majority-owned partnerships and subsidiaries. In section IX positions of foreign branches and majority-owned partnerships and subsidiaries only.
2) Includes unsettled spot foreign exchange purchase contracts, as well as currency, demand and time deposits, negotiable and other readily transferable financial instruments maturing in 1 year or less from the report date, and intracompany claims and loans to other parties repayable on demand. Other loans, accounts receivable, and unaccepted trade drafts are excluded.
3) Includes unsettled spot foreign exchange sales contracts, intracompany llablilies, other than short-term trade payables, short-term bornowings due in 1 year or less from the report date, and the current portion of long-term debt. Other loans, accrued expenses and accounts payable are excluded.
4) Due in 1 year or less; includes intracompany trade receivables. Receivables and installment paper sold or discounted before maturity are excluded.

5/ Due in 1 year or less; includes intracompany trade payables.

6/ All current assets other than liquid assets and shortterm trade receivables, and financial assets maturing in more than one year from the report date. Includes intracompany accounts, inventories, prepayments, longterm trade receivables, long-term intracompany claims, and stocks, bonds, and other securities. Fixed assets (plant and equipment) and parents' investment in majority-owned foreign subsidiaries are excluded.

7/ All financial liabilities other than short-term debt and short-term trade payables; includes long-term trade payables; intracompany liabilities, accrued expenses, and liabilities maturing in more than one year from the report date. Capitalized plant and equipment leases are excluded.

8/ Outatanding amounts of foreign exchange which have been contracted to be received or delivered in the future. Excludes spot exchange.

9/ Columns (1), (3), (5), and (7) less columns (2), (4), (6), and (8).

10/ Representative rates on the report date. Canadian dollar and United Kingdom pound rates are expressed in U.S. dollars per unit of foreign currency, all others in foreign units per U.S. dollar.
11) Banks and banking institutions in the United States and their foreign branches and majority-owned subsidiaries. In gection IX, foreign branches and majority-owed gubsidiaries only.

12/ Excludes capital assets and Liabilities.
13/ Inoludes both spot and forward exchange contracts.
14) Sum of columims (3) and (8).

15/ Sum of columa (4) and (9).
16/ Sum of columna (5) and (10).
17/ See footnote 10.

18/ See footnote 11.
19/ Fixed-rate loans are reported by time remaining to final maturity or the nearest call date, whichever is earlier, and floating-rate loans by time remaining to the nearest interest-fixing date
20) Option forward exchange contracts are reported by time remaining to the nearest option exercise date.

21/ Sum of columis (3) and (6).
I Ferised.
n. a. Not available.

Foreign currencies reported herein in U.S. dollar equivalents were acquired without direct payment of dollars, for the most part in connection with foreign assistance and agricultural trade development programs authorized by various provisions of law. These curencies are generally referred to as "nonpurchased" foreign currencies to distinguish them from currencies purchased with dollars from banks or other commercial sources. The currencies are held in the custody of the Department of the Treasury until such time as they are either aold for dollars to Government agencies or transferred to Government agencies for expenditure without charge to appropriations, as specifically authorized by law.

Prior to July 1, 1953, foreign currencies acquired by Government agencies without direct payment of dollars generally were available to the collecting agencies to defray operating expenses and were not subject to the regular appropriation processes.

The act of July 15, 1952, Sec. 1415 (66 Stat. 662), provided that after June 30,1953, U.S. agencies could no langer expend foreign currencies belonging to the U.S. Government except as provided annually in appropriation acts. Subsequent legislation required executive departments and agencies, with certain exceptions, to reimburse the Treasury in dollars for the foreign curencies used. Executive Orders No. 10488 dated September 23, 1953, and No. 10900 dated January S, 1961, as amended, provided for the issuance of regulations by the Secretary of the Treasury governing the purchase, custody, deposit, transfer, and sale of foreign exchange by all Executive Departments and agencies of the U.S. Government

Accordingly, Treasury Circular No. 930 was issued on October 19, 1953, effective December 1, 1953. These regulations provided for the transfer of department and agency foreign currency balances as of November 30, 1953,
into reasury custody, and the flow of future collections througl Treasury accounts; and established requirements with respect to withdrawals from Treasury accounts; limitations on purchases and amounta of holdinga; the use of foreign depositaries; and accounting for the currencies. Treasury Circular No. 930, Revised, June 8, 1978, and corresponding instructions in Volume I of the Treasury Fiscal Requirements Manual, I TFRM 2-3200 now cover foreign currency accounting and reporting.

Figures are stated in dollar equivalenta, computed for reporting purposes, to provide a common denominator for the currencies of the many foreign countries involved. It should not be assumed that dollars, in amounts equal to the balances, are actually avialahle for the general use of the balances, are actually available for the general use of the U.S. Government, since most of the currencies are inconvertible and restricted as to uses by the terms of agreements hetween the linited States and the foreign governments.

The tahles exclude the counterpart funds owned by and held in accounts of the foreign governments. The use of such funds is suhject to approval of the bnited States, and transactions therein are included in reports of the Agency for International Development. The tables also exclude the U.S. purchases of foreign curtencies which are under dollar accountahility and reported as dollar transactions.

Derailed data, by account, agency, program, foreign country, united of currency, and related dollar equivalents, were published annually in the Combined Statement of Receipts, Expenditures and Balances, from fiscal 1958 through 1969. Beginning with fiscal 1970, only summary data by country and account are shown in the Combined Statement; however, detailed data are published semiannually in the report, Foreign Currencies Held by the u.s. Government.
