## TREASURY FINANCING OPERATIONS

### Auctions of 2-Year and 4-Year Notes

On March 10 the Treasury announced that it would auction \$5,250 million of 2-year and \$3,750 million of 4-year notes to refund \$6,037 million of notes maturing March 31, 1982, and to raise \$2,963 million new cash. The notes offered were Treasury Notes of Series Q-1984, to be dated March 31, 1982, due March 31, 1984, and Treasury Notes of Series G-1986, to be dated March 31, 1982, due March 31, 1986, with interest payable on September 30 and March 31 in each year until maturity. Coupon rates of 14-1/8% and 14%, respectively, were set after the determinations as to which tenders were accepted on a yield auction basis.

Tenders for the 2-year notes were received until 1:30 p.m., EST, March 17, and totaled \$10,507 million, of which \$5,254 million was accepted at yields ranging from 14.08%, price 100.076, up to 14.162, price 99.941. Noncompetitive tenders were accepted in full at the average yield of accepted competitive tenders, 14.14%, price 99.975. These totaled \$1,327 million. Competitive tenders accepted from private investors totaled \$3,592 million. The \$5,254 million of accepted tenders also included \$335 million of tenders at the average price from Federal Reserve banks as agents for foreign and international monetary authorities in exchange for maturing securities.

In addition to the \$5,254 million of tenders accepted in the auction process, \$600 million of tenders were accepted at the average price from Government accounts and Federal Reserve banks for their own account in exchange for maturing securities, and \$225 million of tenders were accepted at the average price from Federal Reserve banks as agents for foreign and international monetary authorities for new cash.

Tenders for the 4-year notes were received until 1:30 p.m., EST, March 24, and totaled \$8,297 million, of which \$3,753 million was accepted at yields ranging from 14.02%, price 99.940, up to 14.08%, price 99.762. Noncompetitive tenders were accepted in full at the average yield of accepted competitive tenders, 14.05%, price 99.851. These totaled \$722 million. Competitive tenders accepted from private investors totaled \$2,675 million. The \$3,753 million of accepted tenders also included \$356 million of tenders at the average price from Federal Reserve banks as agents for foreign and international monetary authorities in exchange for maturing securities.

In addition to the \$3,753 million of tenders accepted in the auction process, \$288 million of tenders were accepted at the average price from Government accounts and Federal Reserve banks for their own account in exchange for maturing securities, and \$144 million of tenders were accepted at the average price from Federal Reserve banks as agents for foreign and international monetary authorities for new cash.

Tenders were received in both auctions at Federal Reserve banks and branches and at the Bureau of the Public Debt, Washington, D.C. Bearer and registered notes were authorized to be issued in denominations of \$5,000, \$10,000, \$100,000, and \$1,000,000 for both loans and in a \$1,000 denomination for the 4-year notes.

### Auction of 7-Year Notes

On March 23 the Treasury announced that it would auction \$3,250 million of 7-year notes to raise new cash. The notes offered were Treasury Notes of Series D-1989, to be dated April 7, 1982, due April 15, 1989, with interest payable on October 15 and April 15 in each year until maturity. A coupon rate of 14-3/8% was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1:30 p.m., EST, March 31, and totaled \$6,142 million, of which \$3,253 million was accepted at yields ranging from 14.38%, price 99.957, up to 14.452, price 99.655. Noncompetitive tenders for \$1 million or less from any one bidder were accepted in full at the average yield of accepted tenders, 14.42%, price 99.784. These totaled \$353 million. Competitive tenders accepted from private investors totaled \$2,718 million.

In addition to the \$3,253 million of tenders accepted in the auction process, \$75 million of tenders were accepted at the average price from Federal Reserve banks as agents for foreign and international monetary authorities for new cash.

Tenders were received at Federal Reserve banks and branches and at the Bureau of the Public Debt, Washington, D.C. Bearer and registered notes were authorized to be issued in denominations of \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000.

### Cancellation of 20-year Bond Auction

The Treasury also announced on March 23, 1982, that the 20-year bond offering normally announced in conjunction with the 7-year note offering would be cancelled. The cancellation resulted from congressional inaction on the Treasury's request to eliminate the \$70 billion limitation on bonds with a coupon rate of more than 4-1/4% that could be held by the public.

### 52-Week Bills

On March 12 tenders were invited for approximately \$5,250 million of 364-day Treasury bills to be dated March 25, 1982, and to mature March 24, 1983. The issue was to refund \$4,684 million 364-day bills maturing March 25 and to raise about \$566 million new cash. Tenders were opened on March 18. They totaled \$9,352 million, of which \$5,251 million was accepted, including \$428 million of noncompetitive tenders from the public and \$1,502 million of the bills issued at the average price to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. The average bank discount rate was 12.509%.

### Cash Management Bills

On March 26, tenders were invited for approximately \$8,000 million of 20-day bills to be issued April 2, 1982, representing an additional amount of bills dated April 23, 1981, maturing April 22, 1982. The issue was to raise new cash. Tenders were opened on March 30. They totaled \$31,637 million, of which \$8,016 million was accepted. The average bank discount rate was 14.544%.

### 13-Week and 26-Week Bills

Issues of regular weekly Treasury bills in March totaled approximately \$38,400 million. These issues were offered to refund bills maturing in the amount of \$37,125 million, and to raise about \$1,275 million in new cash. In the 13-week series there were four issues of \$4,800 million. In the 26-week series there were also four issues of \$4,800 million. Average rates for the new issues are shown in the following table.

Date of issue		Annual average rate (bank discount basis)	
		13-week	26-week
March	4	12.450	12.786
	11	12.058	12.064
	18	12.909	12.962
	25	12.553	12.673

### Treasury Bills (Other than Cash Management Bills) - General

Treasury bills are sold on a discount basis under competitive and noncompetitive bidding, and at maturity their par amount is payable without interest. All series are issued entirely in book-entry form in a minimum amount of \$10,000 and in any higher \$5,000 multiple, on the records either of the Federal Reserve banks and branches, or of the Department of the Treasury.

Tenders are received at Federal Reserve banks and branches and from individuals at the Bureau of the Public Debt, Washington. Each tender must be for a minimum of \$10,000. Tenders over \$10,000 must be in multiples of \$5,000. Payment for the full par amount applied for must accompany all tenders submitted for bills to be maintained on the book-entry records of the Department of the Treasury. A cash adjustment will be made for the difference between the par payment submitted and the actual issue price as determined in the auction. No deposit need accompany tenders from incorporated banks and trust companies and from responsible and recognized dealers in investment securities for bills to be maintained on the book-entry records of Federal Reserve banks and branches. A deposit of 2 percent of the par amount of the bills applied for must accompany tenders for such bills from others, unless an express guaranty of payment by an incorporated bank or trust company accompanies the tenders.

Noncompetitive tenders (without stated price), usually for \$500,000 or less from any one bidder, for each issue of 13-week, 26-week, and 52-week bills, are accepted in full at the weighted average price of accepted competitive bids for an issue.

Payment for accepted tenders must be made or completed on the date of issue, in cash or other immediately available funds or in a like par amount of Treasury securities maturing on or before that date. Payment for 13-week, 26-week, and 52-week bills may not be made by credit in Treasury tax and loan accounts.

### Nonmarketable Foreign Series Securities - Foreign Governments

Dollar-denominated foreign series securities issued to official institutions in March totaled \$1,928 million, consisting of 11 bills. Redemptions during the month totaled \$683 million. At the end of March, dollar-denominated foreign series securities outstanding totaled \$15,560 million. (Details are shown on page 54.)

## FEDERAL FISCAL OPERATIONS

## Footnotes to Table FFO-1

Source: Monthly Treasury Statement of Receipts and Outlays of the United States Government.

Note: Budget and off-budget estimates are based on the fiscal year 1983 Budget Document released on February 8, 1982, by the Office of Management and Budget. Totals have been adjusted to reflect the reclassification of supplementary medical insurance and voluntary hospital insurance enrollee premiums from budget receipts to proprietary receipts. The adjustment decreases budget receipts and outlays for each year since 1967 by the amount of the premiums collected for that year.

1/ For detail see Table FFO-2.

2/ For detail see Table FFO-3.

3/ For detail see Table FFO-6.

4/ Represents holdings of special drawing rights, less certificates issued to Federal Reserve banks.

5/ Prior month adjustments will be made as information becomes available.

6/ Prior year adjustments cannot be made because of unavailable information.

7/ Prior month adjustments will be made as information becomes available.

Notes: Budget and off-budget estimates are based on the fiscal year 1983 Budget Document released on February 8, 1982, by the Office of Management and Budget. Totals have been adjusted to reflect the reclassification of supplementary medical insurance and voluntary hospital insurance enrollee premiums from budget receipts to proprietary receipts. The adjustment decreases budget receipts and

outlays for each year since 1967 by the amount of the premiums collected for that year.

1/ Includes individual income taxes designated for the Presidential election campaign fund.

Source: Monthly Treasury Statement of Receipts and Outlays of the United States Government.

Notes: Outlays consist of disbursements less proprietary receipts from the public and certain intrabudgetary transactions. Agency shifts are shown in this table beginning with the period of such shifts; figures prior to the shifts have been adjusted. Budget and off-budget estimates are based on the fiscal year 1983 Budget Document released on February 8, 1982, by the Office of Management and Budget. Totals have been adjusted to reflect the reclassification of supplementary medical insurance and voluntary hospital insurance enrollee premiums from budget receipts to proprietary receipts. The adjustment decreases budget receipts and outlays for each year since 1967 by the amount of the premiums collected for that year.

1/ For content see Table FFO-4.

2/ The budget proposes dismantlement of the Department of Energy effective October 1, 1982. Budget data for activities previously performed are included in the agencies that are proposed to assume these activities.

3/ The budget proposes dismantlement of the Department of Education effective October 1, 1982. Budget data for activities previously performed are included in the agencies that are proposed to assume these responsibilities.

4/ Includes Federal supplementary medical insurance trust fund premiums and Federal hospital insurance trust fund premiums which were previously classified as budget receipts. Year-to-date activity through December 1981 for these premiums amounted to \$1,202 million.

Source: Monthly Treasury Statement of Receipts and Outlays of the United States Government.

Note: Budget and off-budget estimates are based on the fiscal year 1983 Budget Document released on February 8, 1982, by the Office of Management and Budget. Totals have been adjusted to reflect the reclassification of supplementary medical insurance premiums from budget receipts to proprietary receipts. The adjustment decreases budget receipts and outlays for each year since 1967 by the amount of the premiums collected for that year.

<sup>1</sup> Includes receipts from off-budget Federal agencies to the civil service

retirement and disability fund.

<sup>2</sup> Includes Federal supplementary medical insurance trust fund premiums and Federal hospital insurance trust fund premiums which were previously classified as budget receipts. Year-to-date activity through December 1981 for these premiums amounted to \$1,202 million.

<sup>3</sup> Includes adjustment of interest on public debt issues to convert to the accrual basis. Also, includes Indian tribal funds, judicial survivors annuity fund, foreign service retirement and disability fund, airport and airway trust fund, and other. Less than \$500,000. Revised.

Notes: The memorandum sections of various tables in the Budget of the U.S. Government present the trust fund receipt and outlay data on the same concept as columns 3 and 9 above. Trust interfund transactions are payments from one trust fund to another and are excluded in calculating trust fund receipts and outlays. The intragovernmental transactions are payments from Federal funds to trust funds, and vice versa,

but exclude \$158 million in trust payments to Federal funds.

1/ For content see columns 7 and 8.

2/ For content see columns 11 through 14.

3/ Includes net taxes and other receipts, mainly deposits by States and Federal employee retirement contributions.

4/ Excludes trust fund payments to Federal funds such as charges for administrative expenses of Social Security Act.

## FEDERAL OBLIGATIONS

"Obligations" are the basis on which the use of funds is controlled in the Federal Government. They are recorded at the point at which the Government makes a firm commitment to acquire goods or services and are the first of the four key events—order, delivery, payment, consumption—which characterize the acquisition and use of resources. In general, they consist of orders placed, contracts awarded, services received, and similar transactions requiring the disbursement of money.

The obligational stage of Government transactions is a strategic point in gauging the impact of the Government's operations on the national economy, since it frequently represents for business firms the Government commitment which stimulates business investment, including inventory purchases and employment of labor. Disbursements may not occur for months after the Government places its order but the order itself usually causes immediate pressure on the private economy.

Obligations are classified according to a uniform set of categories which are based upon the nature of the transaction without regard to its

ultimate purpose. All payments for salaries and wages, for example, are reported as personnel compensation, whether the personal services are used in current operations or in the construction of capital items.

Federal agencies and firms often do business with one another; in doing so, the "buying" agency records obligations, and the "performing" agency records reimbursements. In Table FO-1, obligations that are incurred within the Government are distinguished from those incurred outside the Government. Tables FO-2 and 3 show only those incurred outside.

Obligation data for the administrative budget fund accounts were first published in the September 1967 Treasury Bulletin and the trust fund accounts were first published in the October 1967 Bulletin. Beginning with the April 1968 Bulletin, the data are on the basis of the budget concepts adopted pursuant to the recommendations of the President's Commission on Budget Concepts.

1/ For Federal Budget presentation a concept of "net obligations incurred" is generally used. This concept eliminates transactions within the Government and revenue and reimbursements from the public which by statute may be used by Government agencies without appropriation action by the Congress. Summary figures on this basis follow. (This data is on the basis of Reports on Obligations received from the agencies prior to reports submitted for Budget

presentation and therefore may differ somewhat from the Budget document.)

1/ For Federal Budget presentation a concept of "net obligations incurred" is generally used. This concept eliminates transactions within the Government and revenue and reimbursements from the public which by statute may be used by Government agencies without appropriation action by the Congress. Summary figures on this basis follow. (This data is on the basis of Reports on Obligations received from the agencies prior to reports submitted for Budget

presentation and therefore may differ somewhat from the Budget document.)

Gross obligations incurred (as above).....	937,348
Deduct:	
Advances, reimbursements, other income, etc.....	-148,956
Offsetting receipts.....	-95,339
Net obligations incurred.....	693,053

## ACCOUNT OF THE U.S. TREASURY

## Source and Availability of the Balance in the Account of the U.S. Treasury

The operating cash of the Treasury is maintained in Treasury's accounts with the Federal Reserve banks and branches and in tax and loan accounts. As the balances in the accounts at the Federal Reserve banks become depleted, they are restored by calling in (withdrawing) funds from thousands of financial institutions throughout the country authorized to maintain tax and loan accounts.

Under authority of Public Law 95-147, the Treasury implemented a program on November 2, 1978, to invest a portion of its operating cash in obligations of depositaries maintaining tax and loan accounts. Under the Treasury tax and loan investment program, depositary financial institutions select the manner in which they will participate in the program. Depositaries that wish to retain funds deposited in their tax and loan accounts in interest-bearing obligations participate under the Note Option; depositaries that wish to remit the funds to the Treasury's account at Federal Reserve banks participate under the Remittance Option.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all financial institutions whereby customers of financial institutions deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of funds from a customer's account to the tax and loan account in the same financial institution. On occasions, to the extent authorized by the Treasury, financial institutions are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the accounts of their customers.

The tax and loan system permits the Treasury to collect funds through financial institutions and to leave the funds in Note Option depositaries and in the financial communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuation operations on Note Option financial institution reserves and the economy.

1/ Effective January 1972, the Treasury operating balance excludes the gold balance in Treasury.

2/ Represents deposits in certain commercial depositaries that have been converted from a time deposit to a demand deposit basis to permit greater flexibility in Treasury cash management.

3/ Will not agree with Daily Treasury Statement due to rounding.

4/ Represents funds in process of collection by (a) the U.S. Treasury

and (b) commercial banks which have been authorized to defer credit until checks are collected.

5/ Represents demand deposits in national, foreign, and other bank depositaries previously included in time deposits.

6/ The free gold balance can be readily converted to available funds with Federal Reserve banks.

\* Less than \$500,000.

Note: The computed annual interest charge represents the amount of interest that would be paid if each interest-bearing issue outstanding at the end of each month or year should remain outstanding for a year at the applicable annual rate of interest. The aggregate charge for all interest-bearing issues constitutes the total computed annual interest charge. The average annual rate is computed by dividing the computed annual interest charge for the total or for any group of issues by the corresponding principal

amount. The computation is based on the rate effective yield for issues sold at premium or discount.

1/ Includes Federal Financing Bank.

2/ Excludes Federal Financing Bank.

3/ Included in debt outstanding at face amount, but discount value is used in computing annual interest charge and annual interest rate.

4/ On United States savings bonds, the rate of maturity is applied against the amount outstanding.

Note: The Export-Import Bank was moved within the budget effective October 1, 1976 pursuant to Public Law 93-666. Adjustments are made to include totals for the period it was outside the budget (August 17, 1971 through September 30, 1976). Also, adjustments are made to reflect certain Export-Import Bank borrowing transactions now classified

as agency debt. These transactions were previously reported as off-budget negative outlays.

1/ Includes unredeemed matured securities outstanding on which interest has ceased.

2/ For details of securities outstanding, see Table T50-5.

For a summary of legislation of debt limitation under the Second Liberty Bond Act and the amounts of limitation, see Table 32 of the Statistical Appendix.

<sup>1/</sup> Adjusted to exclude notes to IMF and other international lending

organizations from public debt and include them in "Other debt" to conform with the budget presentation and the source for this table.

<sup>2/</sup> Consists of guaranteed debt of Government agencies, specified participation certificates, District of Columbia Stadium Bonds and notes of international lending organizations.

## FEDERAL DEBT

Table FD-9. - Status and Application of Statutory Limitation

The Second Liberty Bond Act (31 U.S.C. 757b), as amended, provides that the face amount of obligations issued under authority of that act, and the face amount of obligations guaranteed as to principal and interest by the United States, shall not exceed in the aggregate \$400 billion outstanding at any time. Public Law 97-49 provides that beginning on October 1, 1981, and ending on September 30, 1982, the statutory debt limit shall be temporarily increased by \$679.8 billion.

The act of June 30, 1967 (Public Law 90-39) provides that the face amount of beneficial interests and participations issued under section 302(c) of the Federal National Mortgage Association Charter Act (12 U.S.C. 1717(c)) during the fiscal year 1968 and outstanding at any time shall be added to the amount otherwise taken into account in determining whether the requirements of the above provisions are met.

## Footnotes to Table FD-10

Source: Bureau of Government Financial Operations.

Note: These securities were issued to the Treasury in exchange for advances by the Treasury from public debt receipts under congressional authorizations for specified Government corporations and other agencies to borrow from the Treasury. Further detail may be found in the 1981 Treasury Combined Statement of Receipts, Expenditures and Balances of the United States Government, pages 560-1.

- 1/ Includes predecessor agencies. Figures include notes previously issued by the Administrator in connection with informational media guaranties. The obligation for these notes was assumed by the Director of the United States Information Agency, pursuant to the act approved July 18, 1956 (22 U.S.C. 1442), and the notes together with others issued for the same purpose are included in "Other."
- 2/ Farm housing and other loan programs, Agricultural Credit Insurance Fund, Rural Housing Insurance Fund, and Rural Development Insurance Fund.
- 3/ Includes securities transferred from the Reconstruction Finance Corporation.
- 4/ As of May 1980, the college housing loan program was transferred to the Department of Education.
- 5/ Consists of notes issued to borrow for; public facility loans; low rent public housing fund; and housing for the elderly or handicapped.

6/ Consists of liabilities taken over by the Association from the Secretary in accordance with the act approved August 2, 1954, and notes issued by the Association under authority of that act (12 U.S.C. 1719 (c), 1720 (d), and 1721 (d) and also securities transferred from the Reconstruction Finance Corporation.

7/ Consists of notes issued by the: International Communication Agency for informational media guaranties (see footnotes 1); Secretary of Commerce (Maritime Administration) for the Federal Ship Mortgage Insurance Fund and Federal Ship Financing Fund (NOAA); Virgin Islands Corporation; District of Columbia Commissioners for the Stadium sinking fund; Secretary of the Interior (Bureau of Mines) for development and operation of helium properties; Bureau of Commercial Fisheries for Federal ship mortgage insurance fund, fishing vessels; revenue bonds for Smithsonian Institution (John F. Kennedy Center Parking Facilities); Secretary of Transportation (Washington Metropolitan Area Transit Authority); Health, Education, and Welfare, Office of Education (student loan insurance fund); Pension Benefit Guaranty Corporation; Federal Railroad Administration, rail service assistance, and regional rail reorganization; Bonneville Power Administration; Secretary of Energy; General Services Administration (Pennsylvania Avenue Corporation); advances for the national flood insurance fund; disaster loan fund (SBA); and National Insurance Development Fund.

## PUBLIC DEBT OPERATIONS

## Footnotes to Table PDO-4

Source: Bureau of the Public Debt.

Note: All securities except EA & ED notes were sold at auction through competitive and noncompetitive bidding.

- 1/ For maturing issues, see Table PDO-7.
- 2/ For bill issues, always sold at auction, the rate shown is the equivalent average rate (bank discount basis) of accepted bids. Other securities issued at par except those sold at auction. For details of bill offerings see Table PDO-2.
- 3/ From date of additional issue in cause of a reopening.
- 4/ In reopenings, the amount issued is in addition to the amount of original offerings.
- 5/ As of the April 1982 issue of the Bulletin, includes securities issued to U.S. Government accounts and Federal Reserve banks; and to foreign and international monetary authorities, whether in exchange for maturing securities or for new cash.
- 6/ Yields accepted ranged from 14.20% (price 100.443) up to 14.50% (price 99.365) with the average at 14.39% (price 99.758).

Note: In these tables sales of Series A-F and J bonds are included at issue price, and redemptions and amounts outstanding at current redemption value. Series G,H, HH and K are included at face value throughout. Matured bonds which have been redeemed are included in redemptions. Matured J and K bonds outstanding are included in the interest-bearing debt until all bonds of the annual series have matured, and are then transferred to matured debt on which interest has ceased.

1/ Sales and redemption figures include exchange of minor amounts of (1) matured Series F bonds for Series G and K bonds from May 1951 through April 1957; (2) Series F and J bonds for Series H bonds beginning January 1960; and (3) U.S. savings notes for Series H bonds beginning January 1972; however, they exclude exchanges of Series F bonds for Series H and HH bonds, which are reported in Table SB-3.

2/ Details by series on a cumulative basis and by periods of Series A-D combined will be found in the February 1952 and previous issues of the Treasury Bulletin.

3/ Because there is a normal lag in classifying redemptions, the distributions of redemption between sales price and accrued discount have been estimated.

4/ Series F and G sales were discontinued April 30, 1952, and Series J and K sales were discontinued April 30, 1957. Sales figures after April 30, 1957, represent adjustments.

5/ Includes exchanges of Series 1941 F and G bonds for 3-1/4% marketable bonds of 1978-83.

Includes exchanges of Series 1948 F and G savings bonds for 4-3/4% marketable notes of 1964.

Includes exchanges of Series 1949 F and G bonds for 4% marketable bonds of 1969.

Includes exchanges of Series 1960 F and G bonds for 3-7/8% marketable bonds of 1968.

6/ Includes exchanges of Series 1951 and 1952 F and G bonds for 3-7/8% marketable bonds of 1971 and 4% marketable bonds of 1980.

7/ Represents changes in the amounts of redemptions not yet classified between matured and unmatured issues.

\* Less than \$500,000.

## UNITED STATES SAVINGS NOTES

United States savings notes were on sale May 1, 1967 through June 30, 1970. The notes were eligible for purchase by individuals with the simultaneous purchase of Series E savings bonds.

The principal terms and conditions for purchase and redemptions

and information on investment yields of savings notes appear in the Treasury Bulletin of March 1967 and June 1968; and the Annual Report of the Secretary of the Treasury for fiscal year 1974.

Note: The Export-Import Bank was moved within the budget effective October 1, 1976 pursuant to Public Law 93-646. Adjustments are made to include totals for the period it was outside the budget (August 17, 1971 through September 30, 1976). Also adjustments are made to reflect certain Export-Import Bank borrowing transactions now classified as agency debt. These transactions were previously reported as off-budget negative outlays.

1/ Includes a nonmarketable Federal Reserve special certificate for \$2,500.

2/ Adjusted to exclude non-interest-bearing notes issued to the International Monetary Fund to reflect the unified budget concept.

3/ For detail, see Table FD-5.

## TREASURY SURVEY OF OWNERSHIP, FEBRUARY 28, 1982

The monthly Treasury Survey of Ownership covers securities issued by the United States Government, Federal agencies, Federally-sponsored agencies, and the District of Columbia. The banks and insurance companies included in the Survey currently account for about 80 percent of all such securities held by these institutions. The similar proportion for corporations and for savings and loan associations is 50 percent, and for State and local governments, 40 percent. Data were first published for banks and insurance companies in the May 1941 Treasury Bulletin, for corporations and savings and loan associations

in the September 1960 Bulletin, and for State and local governments in the February 1962 Bulletin.

Holdings by commercial banks distributed according to Federal Reserve member bank classes and nonmember banks are published for June 30 and December 31. Holdings by corporate pension trust funds are published quarterly, first appearing in the March 1954 Bulletin.

1/ Beginning April 1953, prices are closing bid quotations in the over-the-counter market. Prices for prior dates are the mean of closing bid and ask quotations. "When issued" prices are included in the history beginning October 1941. Dates of highs and lows in case of recurrences are the latest dates.

2/ On callable issues market convention treats the yields to earliest call date as most significant when an issue is selling above par, and to maturity when it is selling at par or below.

3/ Included in the average yield of long-term taxable Treasury bonds as shown under "Average Yields of Long-Term Bonds."

\* Less than \$500,000.

Note: Annual balance sheets for fiscal years 1934 through 1940 appear in the 1940 Annual Report of the Secretary of the Treasury and those for succeeding years appear in subsequent reports. Quarterly balance sheets beginning with December 31, 1938 have been published in the Treasury Bulletin. Data from inception to September 30, 1978 may be found on the statements published in the January 1979 Treasury Bulletin.

<sup>1/</sup> Beginning July 1974, the IMF adopted a technique for valuing the SDR based on a weighted average of exchange rates for the currencies of 16 member countries. The U.S. SDR holdings and allocations are valued on this basis beginning July 1974.

<sup>2/</sup> Excludes foreign exchange transactions for future and spot delivery.

<sup>3/</sup> The exchange translation liability represents the amount of loss the Exchange Stabilization Fund would sustain on outstanding \$1.2 billion equivalent of German mark swaps with the Federal Reserve if those swaps were liquidated on December 31, 1981. The loss as of December 31, 1981 amounts to \$105,684,000.

<sup>4/</sup> A non-interest-bearing liability to the U.S. Treasury resulting from the transfer to ESF of foreign currencies drawn from IMF by the United States.

<sup>5/</sup> During the period October 1, 1981 to December 31, 1981, no gains or losses were sustained on foreign exchange transactions.

<sup>6/</sup> Administrative expenses and adjustments incurred in current fiscal year, but chargeable to prior fiscal years.

## INTERNATIONAL FINANCIAL STATISTICS

The tables in this section are designed to provide data on United States reserve assets and liabilities and other statistics related to the United States balance of payments and international financial position.

Table IFS-1 shows the reserve assets of the United States, including its gold stock, special drawing rights held in the Special Drawing Account in the International Monetary Fund, holdings of convertible foreign currencies, and reserve position in the International Monetary Fund.

Table IFS-2 brings together statistics on liabilities to foreign official institutions, and liquid liabilities to all other foreigners, which are used in the United States balance of payments statistics.

Table IFS-3 presents an area breakdown of United States liabilities to official institutions of foreign countries.

Table IFS-4 shows United States Treasury nonmarketable bonds and notes issued to official institutions and other residents of foreign countries.

Table IFS-5 sets forth the factors which affect the United States position in the International Monetary Fund.

Table IFS-6 presents a measure of weighted-average changes in exchange rates between the United States dollar and the currencies of certain other countries.

1/ Beginning July 1974, the IMF adopted a technique for valuing the special drawing right (SDR) based on a weighted-average of exchange rates for the currencies of selected member countries. The United States SDR holdings and reserve position in the IMF are also valued on this basis beginning July 1974.

2/ Includes gold sold to the United States by the International Monetary Fund with the right of repurchase, and gold deposited by the International Monetary Fund to mitigate the impact on the U.S. gold stock of foreign purchases for the purpose of making gold subscriptions to the Fund under quota increases. For corresponding liabilities see Table IFS-2.

3/ Includes gold held by the Exchange Stabilization Fund (ESF). See "Account of the U.S. Treasury," Table UST-3.

4/ Includes allocations of SDRs in the Special Drawing Account in the International Monetary Fund, plus or minus transactions in SDR's.

Allocations of SDRs on January 1 of respective years are as follows: 1970, \$867 million; 1971, \$717 million; 1972, \$710 million; 1979, 874 million (in SDR terms); 1980, 874 million (in SDR terms); and 1981, 857 million (in SDR terms).

5/ Includes holdings of Treasury and Federal Reserve System; beginning November 1978, these are valued at current market exchange rates or, where appropriate, as such other rates as may be agreed upon by the parties to the transactions.

6/ The United States has the right to purchase foreign currencies equivalent to its reserve position in the Fund automatically if needed. Under appropriate conditions the United States could purchase additional amounts related to the United States quota. See Table IFS-5.

Note: Table is based on Treasury Department data and on data reported to the Treasury Department by banks and brokers in the United States.

Data correspond generally to statistics following in this section and in the "Capital Movements" section, except for the exclusion of nonmarketable, nonconvertible U.S. Treasury notes issued to foreign official nonreserve agencies and the inclusion of investments by foreign official reserve agencies in debt securities of U.S. Federally-sponsored agencies and U.S. corporations. Table excludes International Monetary Fund "holdings of dollars," and holdings of U.S. Treasury letters of credit and nonnegotiable noninterest-bearing special U.S. notes held by other international and regional organizations.

1/ Includes liability on gold deposited by the International Monetary Fund to mitigate the impact on the U.S. gold stock of foreign purchases for gold subscriptions to the Fund under quota increases, and U.S. Government obligations at cost value and funds awaiting investment obtained from proceeds of sales of gold by the International Monetary Fund to the United States to acquire income-earning assets.

2/ Includes Bank for International Settlements.

3/ Derived by applying reported transactions to benchmark data.

4/ Excludes notes issued to foreign official nonreserve agencies.

5/ Includes debt securities of U.S. Government corporations, Federally-sponsored agencies, and private corporations.

6/ Includes liabilities payable in dollars to foreign banks, and liabilities payable in foreign currencies to foreign banks and to "other foreigners."

7/ Includes marketable U.S. Government bonds and notes held by foreign banks.

8/ Includes nonmarketable U.S. Government bonds and notes held by foreign banks.

9/ Principally the International Bank for Reconstruction and Development, the Inter-American Development Bank and the Asian Development Bank.

10/ Data on the two lines shown for this date differ because of changes in reporting coverage. Figures on the first line are comparable in coverage to those shown for the preceding date; figures on the second line are comparable to those shown for the following date.

Note: The initial U.S. quota in the International Monetary Fund was \$2,750 million. The U.S. quota was increased to \$4,125 million in 1959, \$5,160 million in February 1966, and \$6,700 million in December 1970, and revalued to \$7,274 million in May 1972 and \$8,083 million in October 1973 as a result of changes in the par value of the dollar. In April 1978 the U.S. quota was increased in SDR terms from 6,700 million to 8,405 million; and in December 1980 to 12,608 million (in SDR terms).

1/ Represents net Fund sales of gold to acquire U.S. dollars for use in gold deposits or gold investment (see Table IFS-2).

2/ Represents net loans made to the IMF under borrowing arrangements.

3/ Positive figures represent purchases from the Fund of currencies of other members for equivalent amounts of dollars; negative figures represent repurchases of dollars, including dollars derived from charges on purchases and from other net dollar income of the Fund. The United States has a commitment to repurchase within 3-5 years, but only to the extent that the Fund's holdings of dollars exceed the U.S. quota. Purchases of dollars by other countries reduce the U.S. commitment to repurchase by an equivalent amount.

<sup>1/</sup> This table presents calculations of weighted average percentage changes in the rates of exchange between the dollar and certain foreign currencies, in order to provide a measure of changes in the dollar's general foreign exchange value broader than a measure provided by any single exchange rate change. Calculations are provided for two sets of countries that account for a major share of U.S. foreign trade. U.S. bilateral trade patterns in 1972 are used as a convenient, readily available proxy for the assignment of relative weights to individual exchange rate changes, though such weights do not provide a full measure of individual currencies' relative importance in U.S. international transactions because they take no account of factors other than trade. The calculations do not purport to represent a guide to measuring the impact of exchange rate changes on U.S. international transactions.

Exchange rate data used in constructing the indices reported here differ somewhat from those used in earlier calculations to more accurately reflect end-of-period currency values.

The equations used are as follows:

Equation one is used to calculate a trade-weighted average of changes in the dollar cost of foreign currencies:

$$(EQ1) \quad E_m = \sum (\Delta \$ / f c_i \cdot M_i / EM)$$

Where:  $E_m$  is the weighted average of percentage changes in the dollar cost of individual foreign currencies;

$\Delta \$ / f c_i$  is the percent change in the dollar cost of foreign currency  $i$ ; and

$M_i / EM$  is U.S. imports from country  $i$ , as a proportion of total U.S. imports from all countries in the set.

Equation two is used to calculate a trade-weighted average of changes in the foreign exchange cost of dollars:

$$(EQ2) \quad E_x = \sum (\Delta f c_i / \$ \cdot X_i / EX)$$

Where:  $E_x$  is the weighted average of percentage changes in the foreign currency cost of dollars;

$\Delta f c_i / \$$  is the percent change in the foreign currency  $i$  cost of dollars; and

$X_i / EX$  is U.S. exports to country  $i$ , as a proportion of total U.S. exports to all countries in the set.

Equation three combines the above export-weighted and import-weighted averages to provide an overall measure of exchange rate change:

$$(EQ3) \quad E = [(E_m \cdot m / m+x) \cdot (-1)] + [E_x \cdot x / m+x]$$

Where:  $m / m+x$  is U.S. imports as a proportion of its total trade with all countries in the set; and

$x / m+x$  is U.S. exports as a proportion of its total trade with all countries in the set.

## CAPITAL MOVEMENTS

Background

Data relating to capital movements between the United States and foreign countries have been collected since 1935 under Treasury regulations pursuant to Executive Orders Nos. 5560 of January 15, 1934, and 10093 of February 8, 1949, and the International Investment Survey Act of 1976. Reports are filed with Federal Reserve banks by banks, bank holding companies, securities brokers and dealers, and nonbanking enterprises in the United States. Statistics on the principal types of data by country or geographical area are then consolidated and are published in the monthly *Treasury Bulletin*.

The reporting forms and instructions <sup>1/</sup> used in the Treasury International Capital (TIC) Reporting System have been revised a number of times to meet changing conditions and to increase the usefulness of the published statistics. Revisions to the reporting forms are part of an ongoing effort to ensure the adequacy of the Treasury capital movements statistics for analysis and policy formulation with respect to the international financial position of the United States and on movements of capital between the United States and foreign countries. Revised forms and instructions are developed with the cooperation of other Government agencies and the Federal Reserve System and in consultations with representatives of banks, securities firms, and nonbanking enterprises.

Major revisions of the TIC B-series forms, filed by banks and some brokers in the United States, became effective with reports as of April 30, 1978; new data series were introduced in the July 1978 *Treasury Bulletin*. Also, effective March 1981, reporting coverage of the B-series forms was enlarged to include holdings by brokers and dealers of certain types of short-term money market instruments. Substantial revisions of the C-series forms, filed by nonbanking enterprises, were effective with reports as of December 31, 1978; the new data series are shown beginning with the June 1979 issue. Revisions of the TIC forms that affect the format and coverage of the current Capital Movements tables are noted under "Description of Statistics" below.

Basic Definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including United States citizens domiciled abroad, and the foreign branches, subsidiaries, and offices of United States banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located, and international and regional organizations, wherever located. The term "foreigner" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled, as shown on the records of reporting institutions. For a number of reasons, the geographical breakdown of the reported data may not in all cases reflect the ultimate ownership of the assets. Reporting institutions are not expected to go beyond the addresses shown on their records, and so may not be aware of the country of domicile of the ultimate beneficiary. Furthermore, U.S. liabilities arising from deposits of dollars with foreign banks are reported generally in the Treasury statistics as liabilities to foreign banks, whereas the liability of the foreign bank receiving the deposit may be to foreign official institutions or to residents of another country.

Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the appropriate international or regional classification except for the Bank for International Settlements which is included in the classification "Other Europe."

Geographical Classification

A number of changes in geographical classification were introduced for most Capital Movements tables in the July 1978 issue. Several countries formerly included in "Eastern Europe" and "Other Latin American Republics" are now shown separately in the country list as well as a new category in the "International and regional" grouping for "Middle Eastern Regional" in view of the proliferation of regional financial organizations in that area primarily in the Arab states. The remaining countries in the categories "Other Eastern Europe" and "Other Western Europe" were combined into a single "Other Europe" category; and the heading, "Latin America" was retitled "Latin America and Caribbean." To the extent possible, the statistics for earlier dates have been adjusted in accordance with these revised geographical categories.

Reporting Coverage

Reports are required from banks, bank holding companies, securities brokers and dealers, and nonbanking enterprises in the United States, including the branches, agencies, subsidiaries, and other affiliates in the United States of foreign firms. Entities that have reportable liabilities, claims, or securities transactions below specified exemption levels are exempt from reporting.

Banks and some brokers and dealers file reports monthly covering their dollar liabilities to, and dollar claims on, foreigners in a number of countries. Twice a year, as of June 30 and December 31, they also report the same liabilities and claims items with respect to foreigners in countries not shown separately on the monthly reports. Beginning with reports due as of June 30, 1978, quarterly reports are filed with respect to liabilities and claims denominated in foreign currencies *vis-a-vis* foreigners. Effective January 31, 1982, the specified exemption level applicable to the monthly and quarterly reports is \$10 million and is based on the average for the report dates during a six-month period, including the current report date. There is no separate exemption level for the semiannual reports.

Banks, securities brokers and dealers, and in some instances nonbanking enterprises report monthly their transactions in securities with foreigners; the applicable exemption level is \$500,000 on the grand total of purchases and on the grand total of sales during the month covered by the report.

Quarterly reports are filed by exporters, importers, industrial and commercial concerns, financial institutions other than banks and brokers, and other nonbanking enterprises if their liabilities or claims on the six-month average basis are \$2 million or more. Beginning December 31, 1978, these firms also report for each month their U.S. dollar-denominated deposit and certificates of deposit claims on banks abroad of \$10 million or more.

Description of Statistics

Section I presents data in four tables on liabilities to foreigners reported by banks, brokers, and dealers in the United States. Beginning April 1978, amounts due to banks' own foreign offices are shown separately; the previous distinction between short-term and long-term liabilities has been eliminated; there is a separation of the liabilities of the respondents themselves from their custody liabilities to foreigners; and foreign currency liabilities are only reported quarterly. Also, beginning April 1978, the data on liabilities are made more complete by extending to securities brokers and dealers the requirement to report certain of their own liabilities and all of their custody liabilities to foreigners.

Table CM-I-1, showing total liabilities by type of foreign holder, combines liabilities previously shown separately as either short-term or long-term. Table CM-I-2, Parts A and B, on foreigners' holdings of liabilities by type show total liabilities payable in dollars reported by banks, brokers, and dealers. Table CM-I-3 presents total liabilities by country for recent periods and includes the long-term data previously shown separately; whereas CM-I-4, covering total liabilities by type and country for the most recent month, includes several data items not reported separately prior to April 1978. The liabilities data on supplementary countries previously presented in Table CM-I-5 now appear in Table CM-III-1. (See Section III below.)

Section II presents the claims on foreigners reported by banks in the United States. Beginning with data reported as of the end of April 1978, banks' claims held for their own account are reported separately from claims held for their domestic customers. The former are available in a monthly series whereas the latter data are collected on a quarterly basis only. Also, there is no longer a breakdown available on the long-term (and short-term) components of banks' claims. Maturity data are collected quarterly on a time remaining to maturity basis as opposed to the historic original maturity classification. Foreign currency claims are also collected only on a quarterly basis. Beginning March 1981, this claims coverage was extended to certain items in the hands of brokers and dealers in the United States.

Table CM-II-1 presents total claims by type as reported on the old B-series forms and has been revised to include the long-term claims components formerly published separately. Table CM-II-2, showing total claims by type, is based on the revised banking reports. Table CM-II-3, which represents total claims by country, merges the previously reported short-term and long-term claims data from old CM-II-2 and CM-II-5. New Tables CM-II-4 through CM-II-7 are based on the revised reports and replace the previous tables which showed short-term and long-term claims separately.

Another important change in the claims reporting, beginning with new quarterly data as of June 30, 1978, is the adoption of a broadened concept of "foreign public borrower," which replaces the previous category of "foreign official institution" to produce more meaningful information on the public sector of foreign countries. The term "foreign public borrower" encompasses central governments and departments of central governments of foreign countries and of their possessions; foreign central banks, stabilization funds, and exchange authorities; corporations and other agencies of central governments, including development banks, development institutions and other agencies which are majorily-owned by the central government or its departments; State, provincial, and local governments of foreign countries and their departments and agencies; and any international or regional organization or subordinate or affiliated agency thereof, created by treaty or convention between sovereign states.

Section III includes two supplementary tables on U.S. banks' liabilities to, and claims on, foreigners. Table CM-III-1 summarizes dollar liabilities to, and banks' own dollar claims on, countries and areas not regularly reported separately. Beginning with reports due as of June 30, 1978, these data are collected semiannually. Previously, the semiannual reports were addressed to liabilities items only and were reported as of April and December; however, they are now collected as of the end of June and December. Table CM-III-2 presents data on U.S. banks' loans and credits to nonbank foreigners, based on the TIC reports and on the monthly Federal Reserve 2502 reports submitted for foreign branches of U.S. banks.

Sections IV and V, respectively, show the liabilities to, and claims on, unaffiliated foreigners by exporters, importers, industrial and commercial concerns, financial institutions other than banks and brokers, and other nonbanking enterprises in the United States. The data exclude the intercompany accounts of nonbanking enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. (Such transactions are reported by business enterprises to the Department of Commerce on its direct investment forms.) The data also exclude claims held through banks in the United States. Beginning with data published in June 1979 (reported as of December 31, 1978), there is separation of the financial liabilities and claims of reporting enterprises from their commercial liabilities and claims; and items are collected on a time-remaining basis instead of the prior original maturity basis. In addition, the number of reporters increased somewhat as a result of a broad canvass of prospective reporters undertaken in late 1978.

## CAPITAL MOVEMENTS

In Section IV, Table CM-IV-1 combines liabilities previously shown as either short-term or long-term in old Table CM-IV-1; Table CM-IV-2 combines these short-term and long-term liabilities by country and replaces previous Tables CM-IV-2 and CM-IV-6. Table CM-IV-3, covering total liabilities by type and country for the most recent quarter-end, includes several items not reported separately prior to December 1978.

The tables in Section V have been extensively revised to reflect the changes in data collection format outlined above and the elimination of a monthly form that covered nonbanking enterprises' liquid claims on foreigners. Specifically, Table CM-V-1 combines short-term and long-term claims; Table CM-V-2 shows total claims by country and replaces former Tables CM-V-2 and CM-V-7. Current Table CM-V-3 shows total claims by type and country and includes items that were not reported separately prior to end-year 1978. Tables CM-V-4, CM-V-5, and CM-V-6 no longer appear.

Section VI contains data on transactions in all types of long-term domestic and foreign securities by foreigners as reported by banks and brokers in the United States (except nonmarketable U.S. Treasury notes, foreign series; and nonmarketable U.S. Treasury bonds and notes, foreign currency series, which are shown in the "International Financial Statistics" section, Table IFS-4). The data cover new issues of securities, transactions in outstanding issues, and redemptions of securities. They include transactions executed in the United States for the account of foreigners, and transactions executed abroad for the account of reporting institutions and their domestic customers. The data include some transactions which are classified as direct

investments in the balance of payments accounts. The data exclude securities issued abroad by foreign subsidiaries of U.S. corporations, some of which are treated in the balance of payments as issues of U.S. corporations.

The geographical breakdown of the data on securities transactions shows the country of domicile of the foreign buyers and sellers of the securities; in the case of outstanding issues, this may differ from the country of the original issuer. The gross figures contain some offsetting transactions between foreigners. The net figures for total transactions represent transactions by foreigners with United States residents; but the net figures for transactions of individual countries and areas may include some transactions between foreigners of different countries. Beginning with data for 1969, transactions between foreigners in new issues not offered for sale to United States residents but managed by underwriters in the United States are excluded from the gross figures.

The data published in these sections do not cover all types of reported capital movements between the United States and foreign countries. The principal exclusions are the intercompany capital transactions of business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies, and capital transactions of the United States Government. Consolidated data on all types of international capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

Note: Total claims include claims previously classified as either "short-term" or "long-term" on the Treasury reports filed by banks. A monthly maturity breakdown was discontinued with new reports filed as of April 30, 1978, and the historical series has been adjusted accordingly. (See Introductory text to Capital Movements Section for discussion of changes in reporting forms and coverage.)

1/ Data on the two lines shown for this date differ because of changes in reporting coverage. Figures on the first line are comparable in coverage to those shown for the preceding date; figures on the second line are comparable to those shown for the following date.

## FOREIGN CURRENCY POSITIONS

### Background

Data have been collected since 1974 on the foreign currency positions of banks and nonbanking firms in the United States, and on those of foreign branches, majority-owned foreign partnerships, and majority-owned foreign subsidiaries of U. S. banks and nonbanking firms. Reports cover eight major foreign exchange market currencies and U. S. dollars held abroad. Reporting has been required pursuant to title II of Public Law 93-110, an amendment to the Par Value Modification Act of September 21, 1973, and implementing Treasury regulations. Statistics on the positions have been published monthly since March 1977 beginning with data for December 1975.

The report forms and instructions used in the collection of bank data were revised effective with reports as of November 1, 1978, for the weekly reports, and as of October 31, 1978 (the last business day of the month), for the monthly reports. The most recent revision of the nonbank foreign currency forms (see below) became effective as of the last business day of September 1978. Among the changes on the forms, the Belgian franc was deleted as a reporting currency.

### Common Definitions and Concepts

The term "United States" means the States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Canal Zone, Midway Island, the Virgin Islands, and Wake Island. The term "foreign" means locations other than the "United States." The term "worldwide" is used to describe the sum of "United States" and "foreign" data.

Data for the United States include amounts reported by sole proprietorships, partnerships, and corporations in the United States including the U.S. branches and subsidiaries of foreign nonbanking concerns, in the case of "nonbanking firms' positions," and the agencies, branches, and subsidiaries located in the United States of foreign banks and banking institutions, in the case of the weekly and monthly "bank positions."

Data for "foreign branches" and "abroad" include amounts reported by the branches, majority-owned partnerships and majority-owned subsidiaries of U. S. banking and nonbanking concerns. In general, these data do not reflect the positions of foreign parents or foreign parents' subsidiaries located abroad except through intercompany accounts. The data include the foreign subsidiaries of a few foreign-owned U.S.-based corporations.

Assets, liabilities, and foreign exchange contract data are reported on the basis of time remaining to maturity as of the date of the report, regardless of the original maturity of the instrument

involved. "Spot" means due for receipt or delivery within 2 business days from the date of the report. "Short-term" means maturing in 1 year or less from the date of the report.

"Majority-owned foreign partnerships" are those organized under the laws of a foreign country in which one or more nonbanking concerns or nonprofit institutions in the United States, directly or indirectly, own more than 50 percent profit interest. "Majority-owned foreign subsidiaries" are foreign corporations in which one or more nonbanking business concerns or nonprofit institutions located in the United States directly or indirectly own stock with more than 50 percent of the total combined voting power of all classes of stock entitled to vote, or more than 50 percent of the total value of all classes of stock.

### Reporting Threshold

The exemption level applicable to banks and banking institutions is \$10 million equivalent. The exemption level applicable to nonbanking business concerns and nonprofit institutions was \$1 million equivalent on all nonbank forms from March 1975 through November 1976. It was raised to \$2 million equivalent on the monthly reports of positions held in the United States. From November 1976 through September 1978 the exemption level was raised to \$3 million on foreign subsidiary positions on June 31, 1977, and for positions held in the United States on September 30, 1978.

Firms must report their entire foreign currency position in a specified foreign currency if a specified U. S. dollar equivalent value is reached in any category of assets, liabilities, exchange contracts bought and sold, or the net position in the currency. In general, exemption levels are applied to the entire firm in the United States and separately to each foreign branch or subsidiary. In reports on their foreign branches, majority-owned foreign partnerships and majority-owned foreign subsidiaries, U. S. banks and nonbanks are required to report the U. S. dollar-denominated assets, liabilities, exchange contracts bought and sold, and net positions of those branches, partnerships, and subsidiaries with reportable positions in the specified foreign currencies.

### Description of Statistics

Data collected on the Treasury foreign currency forms are published in the Treasury Bulletin in nine sections. The first section presents a summary of worldwide net positions in all of the currencies reported. Sections II through VIII each present data on a specified foreign currency. Section IX presents the U. S. dollar positions of the foreign branches and subsidiaries of U. S. firms which are required to report in one or more of the specified foreign currencies.

## FINANCIAL OPERATIONS OF GOVERNMENT AGENCIES AND FUNDS

## Government Corporations and Other Activities

Treasury Department Circular No. 966, Revised, dated December 20, 1972, and volume I, part 2, chapter 4100 of the Treasury Fiscal Requirements Manual (Transmittal letter No. 287) require Government agencies to submit business-type financial statements and related information to the Department of the Treasury for use in compiling financial reports of the U.S. Government. The circular was originally issued in 1956 pursuant to the authority of section 114 of the Budget and Accounting Procedures Act of 1950 (31 U.S.C. 66b) which requires the Secretary of the Treasury to prepare reports on the financial operations of the U.S. Government.

Department Circular No. 966, Revised, requires submission of semiannual financial statements by all Government corporations specifically subject to the Government Corporation Control Act, as amended (31 U.S.C. 846, 856), and any wholly owned and mixed-ownership corporations subsequently brought under the provisions of the act, and all other activities operating as revolving funds. Other business-type activities required to report semiannually include activities and agencies whose operations, services, or functions are largely self-liquidating or primarily of a revenue-producing nature or whose activities result in the accumulation of substantial inventories, investments, and other recoverable assets. Regular governmental activities, which are of a nonbusiness-type nature, are required to report on an annual basis.

Two basic kinds of financial statements are called for by Department

Circular No. 966, Revised; and they are published in the Treasury Bulletin. Statements of financial condition are required for all activities. Statements of income and retained earnings are required for business-type activities only.

The statements of financial condition for business-type activities appear in Section I, Table GA-I-1 and are published semiannually. The first statements of financial condition published under the revised circular were as of December 31, 1972, applied to business-type activities only, and appeared in the May 1973 issue of the Bulletin. Statements of financial condition submitted annually by nonbusiness-type activities were published together with business-type activities in Section I, Table GA-I-1 in the January 1974 issue of the Bulletin. Loans shown on the agencies' statements of financial condition and held by the agencies, and loans guaranteed and insured by the agencies are reported on a quarterly basis. The first quarterly table on this Federal credit data, which was as of March 31, 1973, appeared in Section III, Table GA-III-2 in the August 1973 issue of the Bulletin. The first semiannual statements of income and retained earnings submitted under the revised circular were for the period July 1, 1972, through December 31, 1972, and appeared in Section I, Table GA-I-2 in the June 1973 issue of the Bulletin. All revolving funds shown in the statements are noted to indicate whether they are public enterprise funds, intragovernmental funds, or trust revolving funds; and trust funds are also noted. Direct sales and repurchases of loans are published on a monthly basis in Section II, Table GA-II-1.

Source: Bureau of Government Financial Operations. Based on quarterly reports received from agencies pursuant to Treasury Circular No. 966.

1/ If the maximum authority is indefinite an amount equal to the loans outstanding is shown in this column. Certain amounts have been noted to indicate factors affecting the indefinite amounts. Authority for credit sales of realty and loans in liquidation is stated in amounts equal to the amounts outstanding.

2/ If the maximum is indefinite an amount equal to the guarantees and insurance outstanding is shown in this column. Certain amounts have been noted to indicate factors affecting the indefinite authority.

3/ Figures shown in this column are applicable to both direct loans or credit outstanding, and guarantees and insurance outstanding if amounts are shown under both heading; otherwise they are applicable to the amounts under the heading shown.

4/ Administrative rates are from 3% to 9.0% on direct loans; various rates on guaranteed loans. No statutory provisions.

5/ Represents loans made in foreign currency, repayable in U.S. dollars.

6/ Statutory limit for public debt borrowings is \$20,000,000 thousand, of which \$17,289,945 thousand was in use as of December 31, 1981.

8/ Administrative - differences, if any, between interest rate to borrower and interest rate to lender: statutory - borrower shall pay such fees and other charges as the Secretary may require.

9/ Statutory - determined by the Secretary of the Treasury taking into consideration the current average market yield on U.S. marketable obligations outstanding with remaining periods of maturity comparable to average maturities of the loans.

10/ Administrative - not to exceed 7 years; however, last installment may be refinanced for 7 year; statutory - may not exceed 7 year, but may be renewed for not more than 7 years.

11/ Rate negotiated between lender and borrowers. The rate shall be legal and reasonable.

12/ Administrative may not exceed shortest of following: (1) local statutory limitations, (2) 50 years from date principal benefits from works of improvement become available, or (3) useful life of improvement become available.

13/ Administrative-direct loans for natural disaster: interest is determined monthly. Rate of 13% on loans not to exceed \$1,000 to low and moderate income families pursuant to Section 505 of the Housing Act of 1949, as amended. Rate for Section 504 loans is 1% Guaranteed: loans to low or moderate income borrowers, 13.3% above moderate income borrowers, 15.5% plus 5% insurance charge.

14/ Statutory - direct and guaranteed loans to low and moderate income borrowers: determine annually by the Secretary of the Treasury, considering current average market yield on U.S. marketable obligations outstanding of comparable maturities, adjusted to nearest 1/8 of 1%, less not to exceed difference between adjusted rate and 1% per annum. Guaranteed loans to above moderate income borrowers; as determined by the Secretary at rates comparable to combined rates of interest and premium charges in effect under Title 12, Section 1709.

15/ Maximum authorization for direct rural housing loans is \$30,000 thousand.

16/ Administrative: 13.3% statutory rate is determined annually by the Secretary of the Treasury, considering current average market yield on outstanding U.S. marketable obligations for comparable maturities adjusted to nearest 1/8 of 1%, less not to exceed difference between adjusted rate determined by the Secretary and 1% per annum.

17/ Administrative - direct, not to exceed 50 years; guaranteed, not to exceed 40 years except for loans to provide housing for senior citizens only will not exceed 50 years. Statutory - as determined by the Secretary.

## FINANCIAL OPERATIONS OF GOVERNMENT AGENCIES AND FUNDS

## Footnotes to Table GA-II-2
