Note.--Outlays consist of disbursements less proprietary receipts from the public and certain intrabudgetary transactions. Budget estimates are based on the fiscal year 1984 budget revisions released Apr. 12, 1983, by the Office of Management and Budget.

FEDERAL OBLIGATIONS

"Obligations" are the basis on which the use of funds is controlled in the Federal Government. They are recorded at the point at which the Government makes a firm commitment to acquire goods or services and are the first of the four key events--order, delivery, payment, and consumption--which characterize the acquisition and use of resources. In general, they consist of orders placed, contracts awarded, services received, and similar transactions requiring the disbursement of money.

The obligational stage of Government transactions is a strategic point in gauging the impact of the Government's operations on the national economy, since it frequently represents for business firms the Government commitment which stimulates business investment, including inventory purchases and employment of labor. Disbursements may not occur for months after the Government places its order, but the order itself usually causes immediate pressure on the private economy.

Obligations are classified according to a uniform set of categories

based upon the nature of the transaction without regard to its ultimate purpose. All payments for salaries and wages, for example, are reported as personnel compensation, whether the personal services are used in current operations or in the construction of capital items.

Federal agencies often do business with one another; in doing so, the "buying" agency records obligations, and the "performing" agency records reimbursements. In table FO-1, obligations incurred within the Government are distinguished from those incurred outside the Government. Table FO-2 shows only those incurred outside.

Obligation data for the administrative budget fund accounts were first published in the September 1967 Treasury Bulletin, and the trust fund accounts were first published in the October 1967 Bulletin. Beginning with the April 1968 Bulletin, the data are on the basis of the budget concepts adopted pursuant to the recommendations of the President's Commission on Budget Concepts.

This concept eliminates transactions within the Government and revenue and reimbursements from the public which by statute may be used by Government agencies without appropriation action by the Congress. Summary figures on this basis follow. (Data are on the basis of Reports on Obligations received from the agencies prior to reports submitted for budget presentation and therefore may differ somewhat from the Budget of the U.S. Government.)

ACCOUNT OF THE U.S. TREASURY

Source and Availability of the Balance in the Account of the U.S. Treasury

The operating cash of the Treasury is maintained in Treasury's accounts with the Federal Reserve banks and branches and in tax and loan accounts. As the balances in the accounts at the Federal Reserve banks become depleted, they are restored by calling in (withdrawing) funds from thousands of financial institutions throughout the country authorized to maintain tax and loan accounts.

Under authority of Public Law 95-147, the Treasury implemented a program on Nov. 2, 1978, to invest a portion of its operating cash in obligations of depositories maintaining tax and loan accounts. Under the Treasury tax and loan investment program, depository financial institutions select the manner in which they will participate in the program. Depositories that wish to retain funds deposited in their tax and loan accounts in interest-bearing obligations participate under the Note Option; depositories that wish to remit the funds to the Treasury's account at Federal Reserve banks participate under the Remittance Option.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all financial institutions whereby customers of financial institutions deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of funds from a customer's account to the tax and loan account in the same financial institution. On occasions, to the extent authorized by the Treasury, financial institutions are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the accounts of their customers.

The tax and loan system permits the Treasury to collect funds through financial institutions and to leave the funds in Note Option depositories and in the financial communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuation operations on Note Option financial institution reserves and the economy.

JANUARY

Auction of 2-Year Notes

On January 12 the Treasury announced that it would auction \$7,250 million of 2-year notes to refund \$4,647 million of notes maturing January 31, 1983, and to raise \$2,603 million new cash. The notes offered were Treasury Notes of Series Q-1985, to be dated January 31, 1983, due January 31, 1985, with interest payable on July 31 and January 31 in each year until maturity. An interest rate of 9-1/4 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1:30 p.m., EST, January 19, and totaled \$14,341 million, of which \$7,251 million was accepted at yields ranging from 9.18 percent, price 100.125, up to 9.28 percent, price 99.946. Noncompetitive tenders were accepted in full at the average yield of accepted tenders, 9.25 percent, price 100.000. These totaled \$1,338 million. Competitive tenders accepted from private investors totaled \$5,913 million.

In addition to the \$7,251 million of tenders accepted in the auction process, \$420 million of tenders were accepted at the average price from Federal Reserve banks as agents for foreign and international monetary authorities, and \$544 million of tenders were accepted at the average price from Government accounts and Federal Reserve banks for their own account in exchange for maturing securities.

February Quarterly Financing

On January 26 the Treasury announced that it would sell to the public at auction, under competitive and noncompetitive bidding, up to \$6,500 million of 3-year notes of Series L-1986, \$4,500 million of 10-year notes of Series A-1993, and \$3,500 million of 29-3/4-year 10-3/8 percent bonds of 2007-12 to refund \$5,769 million of publicly held Treasury securities maturing February 15, and to raise \$8,700 million new cash.

An interest rate of 9-7/8 percent was set on the notes of Series L-1986 after the determination as to which tenders were accepted on a yield auction basis. The notes of Series L-1986 will be dated February 15, 1983, due February 15, 1986, with interest payable semiannually on August 15 and February 15 until maturity.

Tenders for the notes of Series L-1986 were received until 1:30 p.m., EST, February 1, and totaled \$12,292 million, of which \$6,501 million was accepted at yields ranging from 9.90 percent, price 99.936, up to 10.02 percent, price 99.632. Noncompetitive tenders were accepted in full at the average yield of accepted tenders, 9.98 percent, price 99.733. These totaled \$1,535 million. Competitive tenders accepted from private investors totaled \$4,966 million.

In addition to the \$6,501 million of tenders accepted in the auction process, \$420 million of tenders were accepted at the average price from Federal Reserve banks as agents for foreign and international monetary authorities, and \$1,100 million of tenders were accepted at the average price from Government accounts and Federal Reserve banks for their own account in exchange for maturing securities.

An interest rate of 10-7/8 percent was set on the notes of Series A-1993 after the determination as to which tenders were accepted on a yield auction basis. The notes of Series A-1993 will be dated February 15, 1983, due February 15, 1993, with interest payable semiannually on August 15 and February 15 until maturity.

Tenders for the notes of Series A-1993 were received until 1:30 p.m., EST, February 2, and totaled \$10,343 million, of which \$4,501 million was accepted at yields ranging from 10.92 percent, price 99.730, up to 10.96 percent, price 99.491. Noncompetitive tenders were accepted in full at the average yield of accepted tenders, 10.94 percent, price 99.611. These totaled \$1,012 million. Competitive tenders accepted from private investors totaled \$3,489 million.

In addition to the \$4,501 million of tenders accepted in the auction process, \$20 million of tenders were accepted at the average price from Federal Reserve banks as agents for foreign and international monetary authorities, and \$650 million of tenders were accepted at the average price from Government accounts and Federal Reserve banks for their own account in exchange for maturing securities.

The 10-3/8 percent bonds of 2007-12 were an additional issue of the bonds dated November 15, 1982, due November 15, 2012, with interest payable on May 15 and November 15 until maturity. The bonds were auctioned on a yield basis, this being the first occasion on which an outstanding issue of notes or bonds was sold by means of a yield-type auction.

Tenders for the bonds were received until 1:30 p.m., EST, February 3, and totaled \$6,197 million, of which \$3,502 million was accepted at yields ranging from 10.98 percent, price 94.650, up to 11.05 percent, price 94.071. Noncompetitive tenders were accepted in full at the average yield of accepted tenders, 11.01 percent, price 94.401. These totaled \$655 million. Competitive tenders accepted from private investors totaled \$2,847 million.

In addition to the \$3,502 million of tenders accepted in the auction process, \$439 million of tenders were accepted at the average price from Government accounts and Federal Reserve banks for their own account and in exchange for maturing securities.

Payment for accepted tenders in all three auctions was required to be completed on or before February 15, 1983, in cash, maturing securities, or other funds immediately available to the Treasury.

52-Week Bills

On January 14 tenders were invited for approximately \$7,500 million of 364-day Treasury bills to be dated January 27, 1983, and to mature January 26, 1984. The issue was to refund \$5,294 million of 364-day bills maturing January 27 and raise about \$2,206 million new cash. Tenders were opened on January 20. They totaled \$17,024 million, of which \$7,501 million was accepted, including \$513 million of noncompetitive tenders from the public and \$1,180 million of the bills issued at the average price to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. The average bank discount rate was 8.007 percent.

U.S. SAVINGS BONDS AND NOTES

Series EE bonds, on sale since Jan. 1, 1980, are the only savings bonds currently sold. Series HH bonds are issued in exchange for series E and EE savings bonds and savings notes. Series A-D were sold from Mar. 1, 1935, through Apr. 30, 1941. Series E was on sale from May 1, 1941, through Dec. 31, 1979 (through June 1980 to payroll savers only). Series F and G were sold from May 1, 1941, through Apr. 30, 1952. Series H was sold from June 1, 1952, through Dec. 31, 1979. Series HH bonds were sold for cash from Jan. 1, 1980, through Oct. 31, 1982. Series J and K were sold from May 1, 1952, through Apr. 30, 1957.

U.S. savings notes were on sale May 1, 1967, through June 30, 1970. The notes were eligible for purchase by individuals with the simultaneous purchase of series E savings bonds. The principal terms and conditions for purchase and redemptions and information on investment yields of savings notes appear in the Treasury Bulletins of March 1967 and June 1968; and the Annual Report of the Secretary of the Treasury for fiscal year 1974.

1/ Treasury series is the 20-year constant maturity rate read from daily Treasury yield curves and averaged for the month.
 2/ Treasury series based on 3-week moving average of reoffering yields of new corporate bonds rated Aa by Moody's Investors Service and having an original maturity of at least 20 years. Prior to June 1973, this series reflected bonds without call protection. From June 1973 to July 1976, the

series was adjusted to reflect 5 years call protection. Since that time, the series reflects bond yields regardless of the call protection offered.
 3/ Index of new reoffering yields on 20-year general obligations rated Aa by Moody's Investors Service. Prior to June 1970, the series was compiled by Securities Industries Association. Since then, the series has been compiled by Treasury.

FINANCIAL OPERATIONS OF GOVERNMENT AGENCIES AND FUNDS

Government Corporations and Other Business-Type Activities

Treasury Department Circular No. 966, Revised, dated December 20, 1972, and volume I, part 2, chapter 4100 of the Treasury Fiscal Requirements Manual (Transmittal letter No. 320) require Government agencies to submit business-type financial statements and related information to the Department of the Treasury for use in compiling financial reports of the U.S. Government. The Circular was originally issued in 1956 pursuant to the authority of section 14 of the Budget and Accounting Procedures Act of 1950 (31 U.S.C. 66b) which requires the Secretary of the Treasury to prepare reports on the financial operations of the U.S. Government.

Statements of Income and Retained Earnings are required of all Government corporations specifically subject to the Government Corporation Control Act, as amended (31 U.S.C. 846, 856); any wholly owned and mixed-ownership corporations subsequently brought under the provisions of the act; all activities operating as revolving funds; and any other activities or agencies whose operations, services, or functions are largely self-liquidating or primarily of a revenue-producing nature or whose activities result in the accumulation of substantial inventories, investments, and other recoverable assets.

The Statements of Income and Retained Earnings presented in the following table reflect the position of business-type governmental activities as of September 30, 1982. These statements are entirely the representation of the reporting agency. Transfer appropriations, disclosed previously in memorandum columns, have been included with fund totals of the agency administering the program--the "spending" agency. Blank columns indicate that a statement was expected but not received by the Treasury. All amounts are reported in dollars.

Statements of Financial Condition, required for all activities, are published annually and appear in table GA-I-1. Statements of Income and Retained Earnings, required for all business-type activities, are also published annually and appear in table GA-I-2. Direct loans held by agencies and loans guaranteed or insured by agencies are published semiannually and appear in table GA-II-1. Tables detailing the status of accounts and loans receivable due from the public, required for all activities, are published annually and appear separately in the "Cash Management/Debt Collection" section of the Treasury Bulletin.

INTERNATIONAL FINANCIAL STATISTICS

The tables in this section are designed to provide data on U.S. reserve assets and liabilities and other statistics related to the U.S. balance of payments and international financial position.

Table IFS-1 shows the reserve assets of the United States, including its gold stock, special drawing rights held in the Special Drawing Account in the International Monetary Fund, holdings of convertible foreign currencies, and reserve position in the International Monetary Fund.

Table IFS-2 brings together statistics on liabilities to foreign official institutions, and selected liabilities to all other foreigners, which are used in the U.S. balance of payments statistics.

Table IFS-3 shows U.S. Treasury nonmarketable bonds and notes issued to official institutions and other residents of foreign countries.

Table IFS-4 presents a measure of weighted-average changes in exchange rates between the U.S. dollar and the currencies of certain other countries.

1/ Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing right (SDR) based on a weighted-average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and reserve position in the IMF are also valued on this basis beginning July 1974.

2/ Includes gold held by the Exchange Stabilization Fund.

3/ Treasury values its gold stock at \$42.2222 per fine troy ounce and pursuant to 31 U.S.C. 5117(b) issues gold certificates to the Federal Reserve at the same rate against all gold held.

4/ Includes allocations of SDR's in the Special Drawing Account in the International Monetary Fund, plus or minus transactions in SDR's.

Allocations of SDR's on Jan. 1 of respective years are as follows: 1970, \$867 million; 1971, \$717 million; 1972, \$710 million; 1979, 874 million (in SDR terms); 1980, 874 million (in SDR terms); and 1981, 857 million (in SDR terms).

5/ Includes holdings of Treasury and Federal Reserve System; beginning November 1978, these are valued at current market exchange rates or, where appropriate, as such other rates as may be agreed upon by the parties to the transactions.

6/ The United States has the right to purchase foreign currencies equivalent to its reserve position in the Fund automatically if needed. Under appropriate conditions the United States could purchase additional amounts related to the U.S. quota.

1/ This table presents calculations of weighted average percentage changes in the rates of exchange between the dollar and certain foreign currencies, in order to provide a measure of changes in the dollar's general foreign exchange value broader than a measure provided by any single exchange rate change. Calculations are provided for two sets of countries that account for a major share of U.S. foreign trade. U.S. bilateral trade patterns in 1972 are used as a convenient, readily available proxy for the assignment of relative weights to individual exchange rate changes, although such weights do not provide a full measure of individual currencies' relative importance in U.S. international transactions because they take no account of factors other than trade. The calculations do not purport to represent a guide to measuring the impact of exchange rate changes on U.S. international transactions.

Exchange rate data used in constructing the indices reported here differ somewhat from those used in earlier calculations to more accurately reflect end-of-period currency values.

The equations used are as follows:

Equation one is used to calculate a trade-weighted average of changes in the dollar cost of foreign currencies:

$$(EQ1) E_m = \Sigma(\Delta f_i / f_i \cdot M_i / \Sigma M_i)$$

Where: E_m is the weighted average of percentage changes in the dollar cost of individual foreign currencies;

$\Delta f_i / f_i$ is the percent change in the dollar cost of foreign currency i ; and

$M_i / \Sigma M_i$ is U.S. imports from country i , as a proportion of total U.S. imports from all countries in the set.

Equation two is used to calculate a trade-weighted average of changes in the foreign exchange cost of dollars:

$$(EQ2) E_x = \Sigma(\Delta f_i / \$ \cdot X_i / \Sigma X_i)$$

Where: E_x is the weighted average of percentage changes in the foreign currency cost of dollars;

$\Delta f_i / \$$ is the percent change in the foreign currency i cost of dollars; and

$X_i / \Sigma X_i$ is U.S. exports to country i , as a proportion of total U.S. exports to all countries in the set.

Equation three combines the above export-weighted and import-weighted averages to provide an overall measure of exchange rate change:

$$(EQ3) E = [(E_m \cdot m / m+x) \cdot (-1)] + [E_x \cdot x / m+x]$$

Where: $m / m+x$ is U.S. imports as a proportion of its total trade with all countries in the set; and

$x / m+x$ is U.S. exports as a proportion of its total trade with all countries in the set.

Background

Data relating to capital movements between the United States and foreign countries have been collected in some form since 1935. Reports are filed with district Federal Reserve banks by banks, bank holding companies, securities brokers and dealers, and nonbanking enterprises in the United States. Statistics on the principal types of data by country or geographical area are then consolidated and are published in the Treasury Bulletin.

The reporting forms and instructions 1/ used in the Treasury International Capital (TIC) Reporting System have been revised a number of times to meet changing conditions and to increase the usefulness of the published statistics. The most recent, general revision of the report forms became effective with the banking reports as of April 30, 1978, and with the nonbanking reports as of December 31, 1978. Revised forms and instructions are developed with the cooperation of other Government agencies and the Federal Reserve System and in consultations with representatives of banks, securities firms, and nonbanking enterprises.

Basic Definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including U.S. citizens domiciled abroad, and the foreign branches, subsidiaries, and other affiliates abroad of U.S. banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located. The term "foreigner" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled, as shown on the records of reporting institutions. For a number of reasons, the geographical breakdown of the reported data may not in all cases reflect the ultimate ownership of the assets. Reporting institutions are not expected to go beyond the addresses shown on their records, and so may not be aware of the country of domicile of the ultimate beneficiary. Furthermore, U.S. liabilities arising from deposits of dollars with foreign banks are reported in the Treasury statistics as liabilities to foreign banks, whereas the liability of the foreign bank receiving the deposit may be to foreign official institutions or to residents of another country.

Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the appropriate international or regional classification except for the Bank for International Settlements which is included in the classification "Other Europe."

Reporting Coverage

Reports are required from banks, bank holding companies, International Banking Facilities (IBF's), securities brokers and dealers, and nonbanking enterprises in the United States, including the branches, agencies, subsidiaries, and other affiliates in the United States of foreign banking and nonbanking firms. Entities that have reportable liabilities, claims, or securities transactions below specified exemption levels are exempt from reporting.

Banks and some brokers and dealers file reports monthly covering their dollar liabilities to, and dollar claims on, foreigners in a number of countries. Twice a year, as of June 30 and December 31, they also report the same liabilities and claims items with respect to foreigners in countries not shown separately on the monthly reports. Beginning with reports due as of June 30, 1978, quarterly reports are filed with respect to liabilities and claims denominated in foreign currencies vis-a-vis foreigners. Effective January 31, 1982, the specified exemption level applicable to the monthly and quarterly banking reports was raised from \$2 million to \$10 million and is based on the average for the report dates during a 6-month period, including the current report date. There is no separate exemption level for the semiannual reports.

Banks, securities brokers and dealers, and in some instances nonbanking enterprises report monthly their transactions in securities with foreigners; the applicable exemption level is \$500,000 on the grand total of purchases and on the grand total of sales during the month covered by the report.

Quarterly reports are filed by exporters, importers, industrial and commercial concerns, financial institutions other than banks and brokers, and other nonbanking enterprises if their liabilities to, or claims on, unaffiliated foreigners exceed a specified exemption level on a two quarter-end average basis. Effective March 31, 1982, this exemption level was set at \$10 million, up from \$2 million. Nonbanking enterprises also report for each month their U.S. dollar-denominated deposit and certificates of deposit claims of \$10 million or more on banks abroad.

Description of Statistics

Section I presents data on liabilities to foreigners reported by banks, brokers, and dealers in the United States. Beginning April 1978, the following major changes were made in the reporting coverage: Amounts due to banks' own foreign offices are reported separately; a previous distinction between short-term and long-term liabilities was eliminated; a separation was

provided of the liabilities of the respondents themselves from their custody liabilities to foreigners; and foreign currency liabilities are only available quarterly. Also, beginning April 1978, the data on liabilities were made more complete by extending to securities brokers and dealers the requirement to report certain of their own liabilities and all of their custody liabilities to foreigners.

Section II presents the claims on foreigners reported by banks in the United States. Beginning with data reported as of the end of April 1978, a distinction was made between banks' claims held for their own account and claims held for their domestic customers. The former are available in a monthly series whereas the latter data are collected on a quarterly basis only. Also, the distinction in reporting of long-term and short-term components of banks' claims was discontinued. Maturity data began to be collected quarterly on a time remaining to maturity basis as opposed to the historic original maturity classification. Foreign currency claims are also collected only on a quarterly basis. Beginning March 1981, this claims coverage was extended to certain items in the hands of brokers and dealers in the United States.

Another important change in the claims reporting, beginning with new quarterly data as of June 30, 1978, was the adoption of a broadened concept of "foreign public borrower," which replaced the previous category of "foreign official institution" to produce more meaningful information on lending to the public sector of foreign countries. The term "foreign public borrower" encompasses central governments and departments of central governments of foreign countries and of their possessions; foreign central banks, stabilization funds, and exchange authorities; corporations and other agencies of central governments, including development banks, development institutions, and other agencies which are majority-owned by the central government or its departments; State, provincial, and local governments of foreign countries and their departments and agencies; and any international or regional organization or subordinate or affiliated agency thereof, created by treaty or convention between sovereign states.

Section III includes supplementary statistics on U.S. banks' liabilities to, and claims on, foreigners. The supplementary data on banks' loans and credits to nonbank foreigners combine selected information from the TIC reports with data from the monthly Federal Reserve 2502 reports submitted for major foreign branches of U.S. banks. Other supplementary data on U.S. banks' dollar liabilities to, and banks' own dollar claims on, countries not regularly reported separately are available semiannually in the May and November issues of the Treasury Bulletin.

Section IV shows the liabilities to, and claims on, unaffiliated foreigners by exporters, importers, industrial and commercial concerns, financial institutions other than banks and brokers, and other nonbanking enterprises in the United States. The data exclude the intercompany accounts of nonbanking enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. (Such transactions are reported by business enterprises to the Department of Commerce on its direct investment forms.) The data also exclude claims held through banks in the United States. Beginning with data reported as of December 31, 1978, there is separation of the financial liabilities and claims of reporting enterprises from their commercial liabilities and claims; and items are collected on a time-remaining basis instead of the prior original maturity basis.

Section V contains data on transactions in all types of long-term domestic and foreign securities by foreigners as reported by banks and brokers in the United States (except nonmarketable U.S. Treasury notes, foreign series; and nonmarketable U.S. Treasury bonds and notes, foreign currency series, which are shown in the "International Financial Statistics" section, table IFS-3). The data cover new issues of securities, transactions in outstanding issues, and redemptions of securities. They include transactions executed in the United States for the account of foreigners, and transactions executed abroad for the account of reporting institutions and their domestic customers. The data include some transactions which are classified as direct investments in the balance of payments accounts.

The geographical breakdown of the data on securities transactions shows the country of domicile of the foreign buyers and sellers of the securities; in the case of outstanding issues, this may differ from the country of the original issuer. The gross figures contain some offsetting transactions between foreigners. The net figures for total transactions represent transactions by foreigners with U.S. residents; but the net figures for transactions of individual countries and areas may include some transactions between foreigners of different countries.

The data published in these sections do not cover all types of reported capital movements between the United States and foreign countries. The principal exclusions are the intercompany capital transactions of nonbanking business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies, and capital transactions of the U.S. Government. Consolidated data on all types of international capital transactions are published by the Department of Commerce in its regular reports on the U.S. balance of payments.

Note.--When two series of figures are presented for a single reporting date, changes in reporting coverage are denoted. The first series of figures is coverage to those for the preceding date; the second series is comparable to those shown for the following date.

1/ Copies of the reporting forms and instructions may be obtained from the Office of Data Management, Office of the Assistant Secretary for International Affairs, Department of the Treasury, Washington, D.C. 20220, or from district Federal Reserve banks.

1/ Includes Bank for International Settlements.

2/ Principally the International Bank for Reconstruction and Development and the Inter-American Development Bank.

3/ Data as of preceding quarter for non-quarter-end months.

4/ Establishment of International Banking Facilities (IBF's) permitted beginning December 1981.

Note.--Total liabilities include liabilities previously classified as either "short term" or "long term" on the Treasury reports filed by banks. The maturity distinction was discontinued with new reports filed as of Apr. 30, 1978, and historical series adjusted accordingly. See introductory text to Capital Movements tables for discussion of changes in reporting.

FOREIGN CURRENCY POSITIONS

Background

Data have been collected since 1974 on the foreign currency positions of banks and nonbanking firms in the United States, and on those of foreign branches, majority-owned foreign partnerships, and majority-owned foreign subsidiaries of U.S. banks and nonbanking firms. Reports cover eight major foreign exchange market currencies and U.S. dollars held abroad. Reporting has been required pursuant to title II of Public Law 93-110, an amendment to the Par Value Modification Act of September 21, 1973, and implementing Treasury regulations. Statistics on the positions have been published monthly since March 1977 beginning with data for December 1975.

The report forms and instructions used in the collection of bank data were revised effective with reports as of November 1, 1978, for the weekly reports, and as of October 31, 1978 (the last business day of the month), for the monthly reports. The most recent revision of the nonbank foreign currency forms (see below) became effective as of the last business day of September 1978. Among the changes on the forms, the Belgian franc was deleted as a reporting currency.

The monthly tables for all eight major foreign currencies have been deleted from publication beginning with the May 1982 Treasury Bulletin. All tables for the Italian lira and French franc were also deleted.

Common Definitions and Concepts

The term "United States" means the States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, Midway Island, the Virgin Islands, and Wake Island. The term "foreign" means locations other than the "United States." The term "worldwide" is used to describe the sum of "United States" and "foreign" data.

Data for the United States include amounts reported by sole proprietorships, partnerships, and corporations in the United States including the U.S. branches and subsidiaries of foreign nonbanking concerns, in the case of nonbanking firms' positions, and the agencies, branches, and subsidiaries located in the United States of foreign banks and banking institutions, in the case of the weekly "bank positions."

Data for "foreign branches" and "abroad" include amounts reported by the branches, majority-owned partnerships, and majority-owned subsidiaries of U.S. banking and nonbanking concerns. In general, these data do not reflect the positions of foreign parents or foreign parents' subsidiaries located abroad except through intercompany accounts. The data include the foreign subsidiaries of a few foreign-owned U.S.-based corporations.

Assets, liabilities, and foreign exchange contract data are reported on the basis of time remaining to maturity as of the date of the report, regardless of the original maturity of the instrument involved. "Spot" means

due for receipt or delivery within 2 business days from the date of the report. "Short-term" means maturing in 1 year or less from the date of the report.

"Majority-owned foreign partnerships" are those organized under the laws of a foreign country in which one or more nonbanking concerns or nonprofit institutions in the United States, directly or indirectly, own more than 50 percent profit interest. "Majority-owned foreign subsidiaries" are foreign corporations in which one or more nonbanking business concerns or nonprofit institutions located in the United States, directly or indirectly, own stock with more than 50 percent of the total combined voting power of all classes of stock entitled to vote, or more than 50 percent of the total value of all classes of stock.

Reporting Threshold

The exemption level applicable to banks and banking institutions was \$10 million equivalent through January 1982, when it was raised to \$100 million. The exemption level applicable to nonbanking business concerns and nonprofit institutions was \$1 million equivalent on all nonbank forms from March 1975 through November 1976. It was raised to \$2 million equivalent on the monthly reports of positions held in the United States from November 1976 through September 1978. The exemption level was raised to \$3 million on foreign subsidiary positions on June 30, 1977, and for positions held in the United States on September 30, 1978. The exemption level for nonbanking firms was raised to \$100 million on positions in the United States in January 1982 and on foreign branch and subsidiaries positions in March 1982.

Firms must report their entire foreign currency position in a specified foreign currency if a specified U.S. dollar equivalent value is reached in any category of assets, liabilities, exchange contracts bought and sold, or the net position in the currency. In general, exemption levels are applied to the entire firm. In reports on their foreign branches, majority-owned foreign partnerships, and majority-owned foreign subsidiaries, U.S. banks and nonbanks are required to report the U.S. dollar-denominated assets, liabilities, exchange contracts bought and sold, and net positions of those branches, partnerships, and subsidiaries with reportable positions in the specified foreign currencies.

Description of Statistics

Data collected on the Treasury foreign currency forms are published in the Treasury Bulletin in seven sections. The first section presents a summary of worldwide net positions in all of the currencies reported. Sections II through VI each present data on a specified foreign currency. Section VII presents the U.S. dollar positions of the foreign branches and subsidiaries of U.S. firms which are required to report in one or more of the specified foreign currencies.

1/ Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing rights (SDR's) based on a weighted average of exchange rates for the currencies of related member countries. The U.S. SDR holdings and allocations are valued on this basis beginning July 1974.

2/ Excludes foreign exchange transactions for future and spot delivery.

3/ The exchange translation liability represents the amount of loss the Exchange Stabilization Fund (ESF) would sustain on outstanding \$1.1 billion equivalent of German mark swaps with the Federal Reserve if those swaps were liquidated on Dec. 31, 1982.

4/ A non-interest-bearing liability to the U.S. Treasury resulting from

the transfer to the ESF of foreign currencies drawn from the IMF by the United States.

5/ In addition, the ESF has a contingent liability up to \$500 million, in connection with Bank for International Settlements financing for Brazil, which expires Nov. 30, 1983.

Note.—Annual balance sheets for fiscal years 1934 through 1940 appear in the 1940 Annual Report of the Secretary of the Treasury and those for succeeding years appear in subsequent reports through 1980. Quarterly balance sheets beginning with Dec. 31, 1938, have been published in the Treasury Bulletin. Data from inception to Sept. 30, 1978, may be found on the statements published in the January 1979 Treasury Bulletin.

Special Reports

CONSOLIDATED FINANCIAL STATEMENTS
OF THE UNITED STATES GOVERNMENT
FISCAL YEAR 1981/ PROTOTYPE

THE SECRETARY OF THE TREASURY
WASHINGTON

February 8, 1983

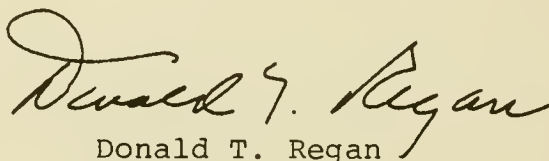

Statement of the Secretary
of the Treasury

This Consolidated Financial Statement for the U.S. Government is part of a continuing experimental effort to apply the principles of business accounting to the business of government. This Administration is committed to improving the Federal Government's financial systems, minimizing the burden on taxpayers by controlling Federal spending and managing our resources wisely.

The President's budget is the primary tool for planning and controlling the allocation of resources. However, this report provides you, the taxpayer, with general information on the impact of prior spending decisions on the financial condition of your Government. It is intended to enhance public understanding of the relationship between our resources and the claims against those resources. By looking at the build-up or diminution of assets and liabilities over time, it also provides early warning signals to policy decision-makers.

Improvements are still needed in agency accounting systems which produce data for this report, but we will continue to work with Executive Branch agencies and with the General Accounting Office to improve Federal financial reporting.

Reader reactions and comments on this prototype report are welcome.

Donald T. Regan

COMPTROLLER GENERAL OF THE UNITED STATES
WASHINGTON, D.C. 20548

February 8, 1983

STATEMENT OF THE UNITED STATES
GENERAL ACCOUNTING OFFICE

This financial report gives an overall picture that is not available elsewhere and can be useful in assessing the financial activities of the Federal Government as a whole. Although this report, like its predecessors, is a prototype, it demonstrates the value of an idea we strongly support--the annual publication of formal Consolidated Financial Statements of the United States Government.

Consolidated financial information can provide a wider perspective on the financial condition of the Government than is provided by the budgetary process alone. For example, a consolidated report could disclose the magnitude of the Government's pension liabilities, public debt, and estimated losses on guarantee and insurance programs.

Enactment of the Federal Managers' Financial Integrity Act of 1982 demonstrates the Government's commitment to effective systems of internal control. This legislation places the responsibility for effective internal controls with top management by requiring the head of each executive agency to report annually to the President and the Congress on whether the agency's internal control systems comply with standards prescribed by the Comptroller General. A plan of correction must be developed for systems not complying with the standards. This legislation will require management to give more attention to internal controls and should yield significant benefits through improved financial management.

The General Accounting Office has begun two major projects to improve financial accounting and reporting by the Federal Government. First, we are developing the internal control standards required by the Federal Managers' Financial Integrity Act. Secondly, we are revising the accounting principles and standards that we are required by law to establish for executive agencies.

As with our earlier reports of this nature, we did not audit the accompanying consolidated financial statements for the fiscal year ended September 30, 1981; accordingly, we do not express an opinion on them.

A handwritten signature in cursive script, reading "Charles A. Bowsher", is positioned above the printed name.

Charles A. Bowsher
Comptroller General
of the United States

Introduction

During the past year the following changes have been made in the report: the "Financial Statements of the U.S. Government Restated for General Price-Level Changes" schedule and the related narrative have been revised using the Consumer Price Index for All Urban Consumers (CPI-U) as suggested in Financial Accounting Standards Board Statement No. 33, "Financial Reporting and Changing Prices"; and the "Estimated Interest Subsidy on Direct Loans Outstanding" schedule and the related narrative have been deleted.

This year's report continues the presentation of alternative financial statement formats. The experimental set of summary-level statements first introduced in 1978 have been included again in this year's report. The significant feature of these alternative statements is the focus on selected current assets and liabilities of the Government. The excess of current liabilities over current assets is defined by identifying the approximate amount of liabilities incurred that will mature over the next year and the current assets presently available to liquidate them.

Once again, the accrued pension liability for the military and civil service retirement plans has been included in this report. As annual pension reports are received from other plans covered by Public Law 95-595, their pension liability amounts will also be included in the report. In addition, during the year, agencies for the first time were required to submit to Treasury and the Office of Management and Budget data on the status of accounts and loans receivable due from the public. This data is currently being analyzed by Treasury and will be reported in future year reports.

Notes to Financial Statements

1. Summary of general accounting policies

Principal financial statements.—These consist of a statement of financial position, a statement of operations, and a statement of changes in financial position. Because of their developmental nature, only the most significant changes in format are disclosed in the Notes.

Principles of consolidation.—The statements include the accounts of all significant agencies and funds included in the unified budget of the U.S. Government. Agencies such as the U.S. Postal Service and the Federal Financing Bank, classified as off-budget (not included in calculating the budget surplus or deficit), have also been included in the statements because they are wholly owned and are clearly within the scope of Government operations. Government-sponsored enterprises such as the Federal land banks are excluded because they are privately owned. The Federal Reserve System is also excluded. Intragovernmental transactions were eliminated in consolidation.

Fiscal year.—The fiscal year of the U.S. Government ends on September 30.

Reclassification and adjustment.—For comparability, certain fiscal 1980 data are reclassified where appropriate to conform to the financial statement presentation for fiscal 1981.

2. International monetary reserves

This category, as of September 30, 1981, comprises the following items: \$11.2 billion in gold, recorded at \$42.22 per ounce, the statutory price at which gold is monetized by the issuance of gold certificates to the Federal Reserve System; \$3.9 billion of special drawing rights, an international reserve asset; and \$4.6 billion representing the U.S. reserve position in the International Monetary Fund.

3. Accrued taxes receivable

The September 30, 1981, total for taxes receivable represents \$17.5 billion (net) for delinquent taxes and \$6.1 billion of accrued corporate taxes.

4. Loans receivable

Outstanding loans and allowances for losses have been recorded as reported by the various lending agencies. The allowances for losses are presumed to

be understated and they are under study. Interest rates and loan repayment terms vary considerably for outstanding loans, with rates up to 17.9 percent and terms from as short as 90 days to well over 40 years.

5. Inventories

Inventories include nondepreciable personal property and are generally stated at cost. The September 30, 1981, total for inventories comprises \$89.8 billion for the Department of Defense and \$23.9 billion for other agencies. The amounts as of September 30, 1980, were \$65.8 billion and \$22.3 billion, respectively. The inventory accounts do not include the weapons stockpile since the extent of this inventory is classified information.

6. Land

Land is valued at the cost paid by the Government. The cost of land acquired through donation, exchange, bequest, forfeiture, or judicial process is estimated by the General Services Administration at amounts the Government would have paid if purchased at the date of acquisition. Pending study of valuation methods, the Outer Continental Shelf and other offshore land, and the 684 million acres of public domain land, have not been included. In 1972 a committee of the House of Representatives estimated the value of public domain land (92 percent of the total onshore acreage owned by the Federal Government) to be \$29.9 billion.

7. Buildings, structures, and facilities

This category consists of all real property owned by the Federal Government except land. The total reflects the acquisition cost of buildings and the cost of acquiring or erecting dams, utility systems, monuments, roads, and bridges. The September 30, 1981, total represents \$51.3 billion for the Department of Defense and \$78.7 billion for other agencies. The amounts as of September 30, 1980, were \$50.0 billion and \$72.0 billion, respectively.

8. Depreciable personal property

Military hardware and equipment are recorded at acquisition cost and include only depreciable property currently in use or in usable condition. The major components of each category are summarized as follows:

	1981	1980
	[In billions]	
Military hardware		
Aircraft and related equipment	\$82.6	\$75.4
Ships and service craft	63.8	59.8
Combat and tactical vehicles ...	38.0	34.8
Missiles and related equipment	21.4	15.9
Other	3.6	3.6
Total	<u>\$209.4</u>	<u>\$189.5</u>
Equipment		
Department of Defense		
Industrial plant equipment. ...	\$26.3	\$24.2
Communications and electronics	2.9	2.3
Other	4.7	3.7
	33.9	30.2
Other agencies	47.3	27.1
Total	<u>\$81.2</u>	<u>\$57.3</u>

9. Accumulated depreciation

Most Government agencies do not calculate depreciation on property and equipment; therefore, accumulated depreciation is estimated on a straightline basis, from available information. The useful lives applied to each classification of asset are as follows: Buildings, structures, and facilities—50 years; ships and service craft—30 years; industrial plant equipment—20 years; all other depreciable assets—10 years.

10. Borrowing from the public

As of September 30, 1981, the gross amount of Federal debt outstanding net of unamortized premiums and discounts was \$994.3 billion. This amount is reduced by \$209.9 billion for intragovernmental holdings. The amount of Federal debt outstanding net of unamortized premiums and discounts, as of September 30, 1980, was \$908.5 billion. This amount was reduced by \$199.6 billion for intragovernmental holdings. As of September 30, 1981, foreign and international investors held approximately \$135.5 billion of the debt outstanding with the public. The amount as of September 30, 1980, was \$126 billion. For additional information on borrowing from the public, see the Federal Debt Maturity schedule in the supplemental section (page 129).

11. Accrued pension, retirement, and disability plans

The accounting for accrued pension, retirement, and disability plans is subject to several different

assumptions, definitions, and methods of calculation. Each of the major plans is summarized below.

Military personnel and civilian employees: Accrued pension liabilities for September 30, 1981, represent the excess of accumulated benefits over net assets available under the two plans and were calculated in accordance with instructions developed jointly by the General Accounting Office and the Office of Management and Budget under the provisions of Public Law 95-595. The liabilities under these two plans represent a major portion of the total unfunded liability which is to be reported under Public Law 95-595.

Social security: Based on the present value of the projected excess of benefits over contributions for present participants for the next 75 years.

It has not yet been determined whether the requirements for Federal pension plans, established as a result of Public Law 95-595, should be applied to the Social Security System due to the uniqueness of the actuarial cost methods used for measuring benefits under the system.

Veterans compensation: Represents the present value of annual benefit payments.

Federal employees compensation: Represents estimated future costs for approved Federal Employees Compensation Act cases.

As annual pension reports are received from other plans covered by Public Law 95-595, their pension liability amounts will also be included.

For additional information on accrued pensions, see Analysis of Pension and Retirement Plans schedule in the supplemental section (page 130).

12. Loss reserves for guarantee and insurance programs

A number of agencies do not make any provision for estimated losses on loan guarantees and insurance, while others do not provide reasonable estimates of losses.

For additional information on loss reserves for guarantee and insurance programs, see the Commitments and Contingencies of the U.S. Government schedule in the supplemental section (page 128).

13. Current noncash provision for social security

The noncash provision for social security represents changes in the social security accrued liability between periods based on a 30-year amortization of the actuarial deficit. Accounting methods for this provision require additional study.

The noncash amount is not included in the Statement of Operations because a substantial but indeterminate portion is not applicable to the current

period. The Statement of Operations does include cash benefit payments. The current noncash provision for social security is \$188.4 billion in 1981.

Contingencies

Several Government agencies insure businesses and individuals against various types of risks. The amount of insurance coverage in force, representing the maximum risk exposure to the Government, is \$2,221.9 billion as of September 30, 1981.

The Government also guarantees loans by non-Government enterprises to businesses and individuals. These guarantees become liabilities of the Government only when it is required to honor its guarantees. Loan guarantees in force at September 30, 1981, are \$363.0 billion. For further information on contingencies, see the Commitments and Contingencies of the U.S. Government schedule in the supplemental section (page 128).

Open-ended programs and fixed costs

The Government commits itself to provide services by passing laws that make spending mandatory. Once a significant amount of future spending is fixed by law, it is very probable that the Government will pay

for these programs in future years. Listed below are the programs for fiscal 1981 that can be terminated only if the laws are changed.

Introductory Statement to the Supplemental Schedules

The following schedules present information which in some cases is unique to the Federal Government or is not generally shown as a part of published financial statements. The information in the schedules reflects various operations of the Government under laws passed by the Congress, and in some cases shows the financial costs to the Government of providing benefits through the tax system or through other indirect means as opposed to direct Federal revenue collection or spending.

There are certain schedules that are incomplete. As a prototype, this report attempts to show what is planned with regard to providing a comprehensive overview of Federal financial operations. In some cases, the schedules support the financial results shown in the consolidated financial statements; in others, there is little relationship between the schedules and the statements. Consequently, each of the tables should be considered individually as a specialized information source.

The following schedules are presented in this section:

I Flow of Funds Projections

The information in this schedule was obtained from the 1983 Budget of the U.S. Government prepared by the Office of Management and Budget. It presents actual and projected 1982-85 cash receipts and outlays. Although the consolidated financial statements are prepared on an accrual basis and reflect historical financial data, no attempt has been made here to develop projections on an accrual basis. The data presented here also differ from the statements in that certain receipts are treated as reductions of outlays, according to conventions adopted for budgeting purposes.

These projections are not forecasts of future receipts and outlays, nor are they recommendations for policy-setting purposes. They simply reflect what may happen to cash basis revenues and expenditures considering certain basic assumptions reflected in the budget. The receipts projections are consistent with the continuation of current tax laws as modified in the 1983 Budget. Outlay estimates indicate the degree to which resources would be committed by the continuation of existing and currently proposed programs through fiscal 1985.

II Financial Statements of the U.S. Government Restated for General Price-Level Changes

This schedule is developed from the Statement of Financial Position and Statement of Operations. Historical values have been restated to account for changes in the general purchasing power of the dollar. Accounting for inflation by this method provides comparability between years, since all dollars are equivalent to the current level of purchasing power. This restatement generally follows the Financial Accounting Standards Board Statement No. 33, "Financial Reporting and Changing Prices."

Derived from the Consumer Price Index for All Urban Consumers (CPI-U), the average conversion factors used here are: fiscal 1981—1.039 and fiscal 1980—1.041. Monetary assets and liabilities as of September 30, 1981, are not restated because they already represent dollars of current general purchasing power.

III Effect of Tax Benefits on Federal Revenues

The Effect of Tax Benefits on Federal Revenues schedule is designed to show the revenue losses attributable to tax law provisions that allow special exclusions, exemptions, or

deductions from gross income or provide special credits, tax rates, or deferrals. The schedule shows the approximate cost of tax benefits.

It should be noted that the effect on revenues of adding or deleting a particular tax benefit would not be the same as the dollar amount currently associated with the benefit. Consequently, it is not possible to say what the effects of increasing or decreasing selected benefits would be without considering a number of variables.

Some minor distortions may have occurred since data presented have been condensed for purposes of this report.

IV Commitments and Contingencies of the U.S. Government

The Commitments and Contingencies schedule is designed to show two basic types of financial information. These are the maximum potential liabilities and the anticipated liabilities which it is reasonably certain, based on experience and other factors, will occur. The anticipated liabilities are the equivalent to allowance for losses.

As used in commercial accounting, a commitment represents an obligation to pay for goods or services upon delivery under a contractual arrangement. Commitments shown here are represented by long-term contracts for which appropriations have not yet been provided by the Congress, and undelivered orders representing obligations of currently available appropriations.

A contingency represents a possible exposure to a liability depending upon the outcome of uncertain future events or circumstances. Contingencies are stated in terms of the maximum risk exposure without regard to existing contingent assets which would be available to offset potential losses. The "ratio of losses incurred to premiums written" represents the probability of incurring those losses. "Loss reserves" supports the balance sheet liability "loss reserves for guarantee and insurance programs" and represents the anticipated liability.

V Federal Debt Maturity

The Federal Debt Maturity schedule reflects information on the borrowing of the Federal Government needed to finance the Government's operations.

Information on the debt is provided by type of debt instrument, average interest rate charged for each type, and maturity. This schedule directly supports the balance sheet caption, "Borrowing from the public," which is shown net of intragovernmental holdings and unamortized premium or discount. Intragovernmental holdings represent that portion of the total Federal debt held by Federal entities, including the major trust funds.

VI Additions to Non-Federal Economic Resources

This schedule indicates the ways in which the Government uses its resources to add to the physical and human resources of the Nation without acquiring physical assets. Some of these investment-type expenditures, while not adding to the Federal assets, add to the assets of State and local governments or private institutions, and all enhance the future productivity of the Nation.

While this schedule does not provide a precise measure of the difference between capital and current items, it does indicate a useful general magnitude.

Additions to State, local, and private assets include construction grants for highways, hospitals, and airports, subsidies to the merchant fleet, and conservation projects, which increase the value of private farmland and water resources. Other developmental expenditures reflect current Federal expenditures and grants which will benefit the Nation in future years by increasing productivity or well-being. These include research and development costs and education and training.

VII Analysis of Pension and Retirement Plans

The Analysis of Pension and Retirement Plans schedule is designed to provide an insight into the size of these programs and associated future financing requirements as of September 30, 1981, for all Government-financed plans. Amounts for social security, military personnel, civilian employees, and other plans support the liabilities on the Consolidated Statement of Financial Position. The third part of this schedule provides information on cash flows and benefits paid to pensioners.

To the extent that information for this schedule was available, it was obtained from direct contact with actuaries for the respective agencies, from published Department of the Treasury reports, and from annual reports filed with the General Accounting Office under Public Law 95-595. The schedule is incomplete in that the number of plans ultimately to be included in the schedule is not yet resolved—as many as 38 separate plans might be included. GAO has developed instructions regarding the information to be contained, and the format to be used, in the annual reports. Figures developed under the GAO guidelines have been used in this schedule for 1981.

VIII Federal Facts and Figures

The schedule is designed to provide readers of the financial statements and schedules a set of recognizable benchmarks to use in making comparisons and identifying any relationships. Major emphasis has been given to providing information on the gross national product, the Consumer Price Index, employment, Federal debt, Federal expenses, and personal income taxes. In all cases, the most current data available have been provided.

TRUST FUND REPORTS

Airport and Airway Trust Fund

The Airport and Airway Trust Fund was originally established on the books of the Treasury in fiscal 1971, in accordance with provisions of the Airport and Airway Revenue Act of 1970 (49 U.S.C. 1742(a)). The trust fund has been reestablished in the Internal Revenue Code (26 U.S.C. 9502 and 9602(b)) as a result of the Tax Equity and Fiscal Responsibility Act of 1982 (Public Law 97-248, dated Sept. 3, 1982), effective as of Sept. 1, 1982. Amounts equivalent to the taxes received in the Treasury on aviation fuel, transportation by air, gasoline used in aircraft, and tires and tubes used on aircraft are designated by the act to be appropriated and transferred from the general fund of the Treasury to the trust fund. These transfers are made at least quarterly on the basis of estimates made by the Secretary of the Treasury, subject to adjustments in later transfers to the amount of actual tax receipts. When the provisions of section 9602(b) of the act have been met, amounts available in the fund in excess of outlay requirements shall be invested in public debt securities and interest thereon credited to the fund. There are also credited to the fund additional

sums from the general fund, as authorized and made available by law, to meet outlay requirements in excess of available revenues, if necessary.

Amounts required for outlays to carry out the airport and airway program are made available to the Federal Aviation Administration, Department of Transportation. Other charges to the trust fund are made by the Secretary of the Treasury for transfers of certain refunds of taxes and certain section 39 credits of the Internal Revenue Code of 1954.

Annual reports to Congress are required by section 9602(a) of the act to be submitted by the Secretary of the Treasury, after consultation with the Secretary of Transportation. These reports are required to cover the financial condition and the results of operations of the fund during the past fiscal year and the expected condition and operations of the fund during the next 5 years.

Black Lung Disability Trust Fund

Section 3(a) of the Black Lung Benefits Revenue Act of 1977 (30 U.S.C. 4(a)) provided for the establishment of the Black Lung Disability Trust Fund on the books of the Treasury in fiscal 1978. The act designates the following receipts to be appropriated and transferred from the general fund of the Treasury to the trust fund: excise taxes on mined coal tonnage; taxable expenditures of private black lung benefit trusts; reimbursements by responsible mine operators; and related fines, penalties, and interest charges. Estimates made by the Secretary of the Treasury determine monthly transfers of amounts for excise taxes to the trust fund, subject to adjustments in later transfers to actual tax receipts.

Amounts available in the fund in excess of current expenditure requirements are invested by the Secretary of the Treasury in interest-bearing public debt securities, and any interest earned is credited to the fund. Also credited to the fund, if necessary, are repayable advances from the general fund to meet

outlay requirements in excess of available revenues.

To carry out the black lung disability program, amounts are made available to the Department of Labor. Other charges to the fund are to pay administrative expenses incurred by the Department of Health and Human Services and the Department of the Treasury, and also to repay advances from the general fund and interest on advances.

Section 3(c)(1) of the act requires the Secretary of the Treasury to submit an annual report to Congress not later than the last day of March after consultation with the Secretary of Labor and the Secretary of Health and Human Services. The report must present the financial condition and results of operations of the fund during the past fiscal year and the expected condition and operations of the fund during the current fiscal year.

Hazardous Substance Response Trust Fund

The Hazardous Substance Response Trust Fund was established on the books of the Treasury in fiscal 1981, in accordance with provisions of the Hazardous Substance Response Revenue Act of 1980 (42 U.S.C. 9631(a)). Excise taxes are collected on petroleum and certain chemicals by the Internal Revenue Service and appropriated from the general fund to the trust fund. All other receipts are deposited directly to the trust fund.

Amounts available in the fund in excess of current expenditure requirements are invested by the Secretary of the Treasury in interest-bearing public debt securities, and any interest earned is credited to the fund. Also credited to the fund, if necessary, are repayable advances from the general fund to meet outlay requirements in excess of available revenues.

To carry out the hazardous substance response program, amounts are made available to the Environmental Protection Agency. Other charges to the fund are to pay certain administrative expenses incurred and repay advances from the general fund and interest on advances.

An annual report to Congress by the Secretary of the Treasury is required by section 9633(b)(1) for each fiscal year ending on or after Sept. 30, 1981. These reports must present the financial condition and the results of operations of the fund for the past fiscal year and its expected condition and operations during the next 5 years.

Highway Trust Fund

The Highway Trust Fund was originally established on the books of the Treasury in accordance with provisions of the Highway Revenue Act of 1957, as amended (23 U.S.C. 12 note). It was reestablished on the books of the Treasury by the Surface Transportation Assistance Act of 1982. Amounts equivalent to excise taxes on gasoline, diesel fuel, special motor fuels, tires, tubes, tread rubber, commercial motor vehicles, truck use, lubricating oil, and parts and accessories for trucks, buses, etc., are designated by the act to be appropriated and transferred from the general fund of the Treasury to the trust fund. These transfers are made at least monthly on the basis of estimates by the Secretary of the Treasury, subject to adjustments in later transfers to the amount of actual receipts. Amounts available in the fund in excess of outlay requirements are invested in public debt securities and interest thereon is credited to the fund. There are also credited to the fund repayable advances from the general fund, as authorized and made available by law, to meet outlay requirements in excess of available revenues during a portion of a fiscal year, if necessary.

The termination date of the fund was extended to Sept. 30, 1988, as a result of the Surface Transportation Assistance Act of 1982 (Public Law 97-424, approved Oct. 6, 1982). The act also established a mass transit account within the trust fund to be funded by one-ninth of the excise tax collections under sections 4041

and 4081 of the Internal Revenue Code (26 U.S.C.) imposed after Mar. 31, 1983. The funds from this account shall be used for expenditures in accordance with section 21(a)(2) of the Urban Mass Transportation Act of 1964. The remaining excise taxes collected shall be included in a highway account within the trust fund and expenditures for this account shall be made in accordance with the provisions of Public Law 97-424.

Amounts required for outlays to carry out the Federal-aid highway program are made available to the Federal Highway Administration, Department of Transportation. Other charges to the trust fund are made by the Secretary of the Treasury for transfers of certain taxes to the land and water conservation fund, refunds of certain taxes, repayments of advances from the general fund, and the interest on advances.

Annual reports to Congress are required by 26 U.S.C. 9602 (a). Internal Revenue Code as amended, to be submitted by the Secretary of the Treasury, after consultation with the Secretary of Transportation. These reports cover the financial condition and the results of operations of the fund for the past fiscal year and its expected condition and operations during the next 6 fiscal years.

Inland Waterways Trust Fund

The Inland Waterways Trust Fund was established on the books of the Treasury in fiscal 1981, in accordance with provisions of section 1801 (a) of the Inland Waterways Revenue Act of 1978 (33 U.S.C. 1801). Amounts determined by the Secretary of the Treasury to be equivalent to the amount of taxes received in the Treasury under section 4042 of the Internal Revenue Code of 1954 (relating to tax on fuel used in commercial transportation in inland waterways) shall be appropriated to the trust fund. These amounts shall be transferred at least quarterly from the general fund on the basis of estimates made by the Secretary, subject to adjustments in later transfers to the amounts of actual tax receipts. It shall be the duty of the Secretary of the Treasury to invest in interest-bearing obligations of the United States that portion of the trust fund in his judgement not required to meet current withdrawals. The interest on, and the proceeds from the sale or redemption of, any obligation held in the trust

fund shall be credited to and form a part of the trust fund.

Section 1803(i) of the act provides that amounts in the trust fund shall be available, by appropriation acts, for making construction and rehabilitation expenditures for navigation on the inland and intracoastal waterways of the United States described in section 1804 of the act. Expenditures must be otherwise authorized by law.

Reports to Congress are required by section 1801 (c)(1) of the act to be submitted each year ending on or after Sept. 30, 1981, by the Secretary of the Treasury. These reports are required to cover the financial condition and the results of operations of the fund during the past fiscal year and its expected condition and operations during the next 5 fiscal years.

Reforestation Trust Fund

The Reforestation Trust Fund was established on the books of the Treasury in fiscal 1981 to continue through Sept. 30, 1985, in accordance with provisions of Title III--Reforestation, of the Recreational Boating Safety and Facilities Improvement Act of 1980 (16 U.S.C. 1606a (a)). The act provides that the Secretary of the Treasury shall transfer to the trust fund tariffs, limited to not more than \$30 million for any fiscal year, received in the Treasury from Oct. 1, 1979, through Sept. 30, 1985, on (1) rough and primary wood products, and wood waste; (2) lumber, flooring, and moldings; and (3) wood veneers, plywood, and other wood-veneer assemblies, and building boards.

Amounts available in the trust fund in excess of current withdrawals are invested in interest-bearing obligations of the United States or in obligations guaranteed as to both principal and interest by the United States. The interest on, and the proceeds from, the sale or redemption of any obligations are credited to the trust fund.

For each of the first 5 fiscal years beginning after Sept. 30, 1980, there is authorized after that date to be appropriated to the Secretary of Agriculture,

out of any amounts in the trust fund, an amount equal to the sum of the amount by which the sum estimated by the Secretary of Agriculture for the fiscal year under section 3(d)(2) of the Forest and Rangeland Renewable Resources Planning Act of 1974 (16 U.S.C. 1601 (d)(2)) to be necessary for reforestation and other treatment of acreage, as set forth in the report transmitted by the Secretary to the Congress under that section for the fiscal year, exceeds the sum of the amounts appropriated for the fiscal year under the authorization contained in section 3(d)(3) of such act and under any other provision of law to carry out the same purpose; and such sums as are determined by the Secretary of Agriculture to be properly allocable to administrative costs of the Federal Government incurred for the fiscal year in connection with the reforestation program carried out under that act.

Section 1606a (c)(1) of the act requires the Secretary of the Treasury after consultation with the Secretary of Agriculture, to submit an annual report on the financial condition and the results of the operations of the trust fund during the past fiscal year and on its expected condition and operations during the next fiscal year.

Cash Management/ Debt Collection

Treasury Responsibilities under Reform '88 Cash Management

In conjunction with the Reform '88 cash management initiatives, Treasury has assumed additional agency responsibilities to support an overall Federal cash management program. These increased responsibilities encompass negotiating with agency management officials for the identification of cash management improvements to current operations and the establishment of planned action milestones and dates, and the monitoring the progress of agencies in implementing action plans to ensure the fulfillment of established goals and reporting requirements.

Under OMB Bulletin 83-6 (October 22, 1982), Federal agencies were required to submit an agency action plan containing: (1) an inventory, stratified by dollar amount, identifying each cash receipt and disbursement activity subject to cash management controls and projecting for each activity the significant interest savings that can result from improving cash management practices, and (2) a detailed action plan describing each major cash management problem, issue, deficiency, and opportunity in the agency, the specific steps needed to correct the problem or issue and a timetable, for accomplishing each step. Treasury's Cash Management Staff has worked closely with OMB in negotiating with agencies the elements and timeframes of the action plans. To date, 11 of the agency action plans are in the final stages of approval. The projected cash management savings resulting from these plans exceed \$88 billion.

Many of the projected cash management savings identified can be attributed to the conversion from manual collection and disbursement practices to state-of-the-art funds transfer systems and techniques. Among the more highly sophisticated mechanisms available for use, Treasury's Bureau of Government Financial Operations is actively pursuing the implementation of electronic funds transfer, nationwide lockbox network, automated clearinghouse system, and letter of credit (via Treasury Financial Communications System) throughout the Federal Government to improve the efficiency of funds flow.

Progress by agencies in implementing their action plans and achieving their goals will be closely monitored by the Treasury Cash Management Staff. The Staff, in turn, will provide periodic progress reports to the Reform '88 Steering Committee and the Cabinet Council on Management and Administration. In addition, Treasury staff will continue to work with agency representatives to identify and implement additional cash management improvements.

Future tables will provide the status of agency initiatives. The information shown in these tables will be based on the quarterly status reports on their initiatives submitted by agencies under the Reform '88 reporting system.
