Note. --Outlays consist of disbursements less proprietary receipts from the public and certain intrabudgetary transactions. 8udget estimates are based on the midsession review of the 1984 budget released July 25, 1983, by the Office of Management and Budget.
"Obligations" are the basis on which the use of funds is controlled in the Federal Government. They are recorded at the point at which the Government makes a firm commitment to acquire goods or services and are the first of the four key events-order, delivery, payment, and con-sumption-which characterize the acquisition and use of resources. In general, they consist of orders placed, contracts awarded, services received, and similar transactions requiring the disbursement of money.

The obligational stage of Government transactions is a strategic point in gauging the impact of the Government's operations on tho national economy, since it frequent ly represents for business firms the Government commitment which stimulates business investment, including inventory purchases and employment of labor. Disbursements may not occur for months after the Government places its order, but the order itself usually causes immediate pressure on the private economy.

Obilgations are classified according to a uniform set of categories
based upan the nature of the transaction withaut regard to its ultimate purpose. All payments for salaries and wages, for example, are reported as personnel compensation, whether the personal services are used in current operations or in the construction of capital items

Federal agencies often do business with one another; in doing so, the "buying" agency records obligations, and the "performing" agency records reimbursements. In table F0-1, obligations incurred within the Government are distinguished from those incurred outside the Government. Table FO-2 shows only those incurred outside.

Obligation data for the administrative budget fund accounts were first published in the September 1967 Treasury 8ulletin, and the trust fund accounts were first published in the October 1967 8ulletin. Beginning with the April 1968 8ulletin, the data are on the basis of the budget concepts adopted pursuant to the recommendations of the President's Commission on Budget Concepts.

## Table FO-1. - Gposs Obligations Incurred Within and Outside the Federal Government by Object Class, as of Mar. 31, 1983

[In millians of dallars. Source: 5tandard form 225, Report on Obligations, from agencies]

|  |  |
| :--- | :--- |

1/ For Federal budget presentation a concept of "net obligations incurred" is generally used. This concept eliminates transactions within the Government and revenue and reimbursements from the public which by statute may be used by Government agencies without appropriation action by the Congress. Summary figures on this basis follow. (Oata are on the basis of Reports on Obligations recelved from the agencies prior to reports submitted for oudget
presentation and therefore may differ somewhat from the Budget of the U.5. Government.)

Table FO-2. - Gross Obligations Incurred Outside the Federal Government by Department or Agency, as of Mar. 31, 1983-Con.
[In militions of dollars]

|  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

* Less than $\$ 500,000$.

1/ Includes reports for Library of Congress, Government Printing office, and General Accounting office only.
2/ This fund was reclassified from an off-budget to a budgetary account pursuant to an act approved Oct. 4, 1977.

3/ Postal 5ervice since July 1, 1973, Rural Electrification Administration revoluing funds since May 12, 1973, and strategic petroleum reserve account since 1981.

Note.--Agency shifts are shown in this table beginning with the periods of such shifts. The amounts for the complete fiscal year are adjusted at that time.

## Source and Availability of the Balance in the Account of the U.S. Treasury

The operating cash of the Treasury is maintained in Treasury's accounts with the Federal Reserve banks and branches and in tax and loan accounts. As the balances in the accounts at the Federal Reserve banks become depleted, they are restored by calling in (withdrawing) funds from thousands of financial institutions throughout the country authorized to maintain tax and loan accounts.

Under authority of Public Law 95-147, the Treasury implemented a program on Nov. 2, 1978, to invest a portion of its operating cash in obligations of depositaries maintaining tax and loan accounts. Under the Treasury tax and loan investment program, depositary financial institutions select the manner in which they will participate in the program. Depositaries that wish to retain funds deposited in their tax and loan accounts in interest-bearing obilgations participate under the Note Option: depositaries that wish to remit the funds to the Treasury's account at Federal Reserve banks participate under the Remittance Option.

Depasits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all financial institutions whereby customers of financial institutions deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of funds from a customer's account to the tax and loan account in the same financial insticution. On occasions, to the extent authorized by the Treasury, financial institutions are permitted to deposit in these accounts proceeds from subscriptions to pubilc debt securities entered for their own account as well as for the accounts of their customers.

The tax and loan system permits the Treasury to collect funds through financial institutions and to leave the funds in Note Option depositaries and in the financial communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuation operations on Note Option financial institution reserves and the economy.

1/ For bill issues, always sold at auction, the rate shown is the equivalent average rate (bank discount basis) of accepted bids. Other securities issued at par except those sold at auction. For detalls of bill offerings see table poo-2.
$\frac{2 /}{3}$ / In rem date of additional issue in case of a reopening.
$\frac{3}{3}$ / In reopenings the amount issued is in addition to the amount of original of ferings.
4) As of the April 1982 7ssue of the 8ulletin, includes securities issued to U.S. Government accounts and Federal Reserve banks; and to foreign and international monetary authorities, whether in exchange for maturing securities or for new cash.

1/ Includes trust funds and accounts that comprise Government
accounts under the unified budget concept.
2/ Exclusive of banks and insurance companies.
ㅍ/ Included with all other investors are certain Government
deposit accounts and Government-sponsored agencies, formeriy included with Government accounts.
Note. --For detail of offerings see table poo-3.
U.S. SAVINGS BONDS AND NOTES

Series EE bonds, on sale since Jan. 1, 1980, are the only savings bonds current ly sold. Series $H M$ bonds are issued in exchange for series $E$ and EE savings bonds and savings notes. Series $A=0$ were sold from Mar. 1, 1935, through Apr. 30, 1941. Series E was on sale from May 1, 1941, through Dec. 31, 1979 (through June 1980 to payroll savers only). Series F and $G$ were sold from May 1, 1941, through Apr. 30, 1952. Series $H$ was sold from June 1, 1952, through Oec. 31, 1979. Series HH bonds were sold for cash from Jan. 1, 1980, through Oct. 31, 1982. Series J and K were sold from May 1, 1952, through Apr. 30, 1957.
U.S. savings notes were on sale May 1, 1967, through June 30, 1970. The notes were eligible for purchase by individuals with the simultaneous purchase of series $E$ savings bonds. The principal terms and conditions for purchase and redemptions and information on investment yields of savings notes appear in the Treasury 8ulletins of March 1967 and June 1968; and the Annual Report of the Secretary of the Treasury for fiscal year 1974.

Table SBN-1. - Sales and Redemptions by Series, Cumulative through June 30, 1983

## Internetional Statistics

The tables th this section are designed to provide data on U.S. reserve assets and liabilities and other statistics related to the U.S. balance of payments and international financial position.

Table lF5-1 shows the reserve assets of the United states, including its gald stock, special drawing rights held in the 5pectal Drawing Account in the International Mónetary fund, holdings of convertible foreign currencies, and reserve position in the International Monetary Fund.

Table IFS-2 brings together statistics on liabilities to foreign of ficial institutions, and selected liabilities to all other foreigners. which are used in the U.S. balance of payments statistíes.

Table IFS-3 shows U.5. Treasury nonmarketable bonds and notes issued to official institutions and other residents of foreign countries.

Table IfS-4 presents a measure of wetghted-average changes in exchange rates between the U.S. dollar and the currencies of certain other countries.

1/ 8eginning July 1974 , the International Monetary Fund (IMF) adopted a technique for valuing the special drawing right (SDR) based on a weighted-average of exchange rates for the currencies of selected member countries. The U.S. SOR holdings and reserve position in the IMF are also valued on this basis beginning July 1974.
$2 /$ Includes gold held by the Exchange Stabilization Fund.
3) Treasury values its gold stock at $\$ 42.2222$ per fine troy ounce and pursuant to 31 U.S.C. 5117 (b)issues gold certificates to the rederal Reserve at the same rate against Includes allo
4/ Includes allocations of SDR's in the 5pecial Drawing Account in the International Monetary Fund, plus or minus transactions in 5 DR's.

Allocations of SDR's on Jan. l of respective years are as follows: 1970, \$867million; I971, \$717million; 1972, \$710 million; 1979, $874 \mathrm{million}(i n 50 \mathrm{n}$ terms); $1980,874 \mathrm{million}$ (in $50 R$ terms); and $1981,857 \mathrm{million}$ (in SOR terms).
5/ Includes holdings of Treasury and Federal Reserve System; beginning November 1978, these are valued at current market exchange rates or, where appropriate, as such other rates as exchange rates or, where appropriate, as such other rat
6/ The United states has the right to purchase foreign
currencies equivalent to its reserve position in the fund automatically if needed. Under appropriate conditions the United States could purchase additional amounts related to the U.S. quota.

Table IFS-2. - Selected U.S. Liabilities to Foreigners
[in millions of dollars]

$\frac{1}{2}$ Includes Bank for International Settlements.
2/ Derived by applying reported transactions to benchmark data.
3/ Excludes notes issued to foreign official nonreserve agencies.
4/ Includes debt securities of U.S. Government corporations, federally sponsored agencies, and private corporations.
5/ Jncludes liabilities payable in dollars to foreign banks, and liabilities payable in foreign currencies to foreign banks and to "other foreigners."
6/ Includes marketable U.S. Government bonds and notes held by foreign banks.
7/ Includes nonmarketable U.5. Government bonas and notes held by foreign banks.
8) Principally the International Bank for Reconstruction and Development, the Inter-American Development 8ank, and the Asían Development 8ank.

Note. - Table is based on Treasury Department data and on data reported to the Treasury Department by banks and brokers in the United States.

0ata correspond generally to statistlcs following in this section and in the "Capital Movements" section, except for the exclusion of nonmarketable, nonconvertible U.S. Treasury notes issued to foreign official nonreserve agencies and the inclusion of investments by foreign official reserve agencies in debt securities of U. 5 . federally sponsored agencies and U.S. corporations. Table excludes International Monetary fund "holdings of dollars" and holdings of U.S. Treasury letters of credit and nonnegotiable noninterest-bearing specíal U.5. notes held by other international and regional organizations.

Table IFS-3. - Nonmarketable U.S. Treasury Bonds and Notes Issued to Official Institutions and Other Residents of Foreign Countries

$\frac{1 /}{2}$ geginning 1978, indicates notes publicly issued to private German residents.
2/ geginning 1979, indicates notes publicly issued to private swiss residents.

1/ This table presents calculations of weighted average percentage changes in the rates of exchange between the dollar and certain foreign currencies, in order to provide a measure of changes in the dollar's general foreign exchange value broader than a measure provided by any single exchange rate change. Calculations are provided for two sets of countries that account for a major share of U.S. foreign trade. U.5. bllateral trade patterns in 1972 are used as a convenient, readily available proxy for the assignment of relative weights to individual exchange rate changes, although such weights do not provide a full measure of individual currencies' relative importance in U.S. international transactions because they take no account of factors other than trade. The calculations do not purport to represent a guide to measuring the impact of exchange rate changes on U.S. international transactions.
Exchange rate data used in constructing the indices reported here differ somewhat from those used in earliter calculations to more accurately reflect end-of-period currency values.

The equations used are as follows:
Equation one is used to calculate a trade-weighted average of changes in the dollar cost of foreign currencies:
(EQ1) $\varepsilon_{m}=\Sigma\left(\Delta S / f c_{i} * M_{i} / \Sigma M\right)$
Where: ' $E_{m}$ is the weighted average of percentage
changes in the dollar cost of individual foreign currencies;
$\Delta \$ / f c_{i}$ is the percent change in the dollar cost of foreign currency i; and
$M_{i} / \Sigma M$ is $U . S$. imports from country $i$, as a proportion of total U.S. imports from
all countries in the set.

Equation two is used to calculate a trade-weighted average of changes in the foreign exchange cost of dollars:
(EOZ) $E_{x}=\Sigma\left(\Delta f c_{i} / \$ * x_{j} / \Sigma x\right)$
Where: Ex is the weighted average of percentage
changes in the forejon currency cost of dollars:
$\Delta \mathrm{Cc}_{\mathrm{i}} / \mathrm{s}$ is the percent change in the
forelgn currency $i$ cost of dollars; and
$X_{i} / \Sigma X$ is U.S. exports to country 1, as
a proportion of total U.S. exports to
all countries in the set.
Equation three combines the above export-weighted and import-weighted averages to provide an overall measure of exchange rate change:
(EQ3) $E=\left[\left(E_{m} * m / m+x\right) *(-1)\right]+\left[E_{x} * x / m+x\right]$
Where: $m / m+x$ is U.S. imports as a proportion of its total trade with all countries in the set; and
$x / m+x$ is U.S. exports as a proportion of
its total trade with all countries in the set.

2/ Australia, Austria, Belgium-Luxembourg, Canada, Denmark, Finland, France. Germany, Greece, Iceland. Ireland, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, and United Kingdom.
3/ The currencies of 46 IMF member countries which account for approximately 90 percent of $U .5$. total trade.

## Background

Data relating to capital movements between the United States and foreign countries have been collected in some form since 1935. Reports are filed with district Federal Reserve banks by banks, bank holding companies, securities brokers and dealers, and nonbanking enterprises in the United States. Statistics on the principal types of data by country or geographical area are then consolidated and are published in the Treasury Bulletin.

The reporting forms and instructions $1 /$ used in the Treasury international Capital (IIC) Reporting System have been revised a number of times to meet changing conditions and to increase the usefulness of the pubilished statistics. The most recent, general revision of the report forms became effective with the banking reports as of April 30, 1978, and with the nonbanking reports as of December 31, 1978. Revised forms and instructions are developed with the cooperation of other Government agencies and the Federal Reserve System and in consultations with representatives of banks, securities firms, and nonbanking enterprises.

## Basic Definitions

The term "forefgner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including U.S. citizens domictled abroad, and the foreign branches, subsidiaries, and other affiliates abroad of U.S. banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located. The term "forelgner" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners.

In general, data are reported opposite the foreign country or geographical ared in which the foreigner is domiclled, as shown on the records of reporting institutions. For a number of reasons, the geographical breakdown of the reported data may not in all cases reflect the ultimate ownership of the assets. Reporting institutions are not expected to go beyond the addresses shown on their records, and so may not be aware of the country of domicile of the ultimate beneficiary. Furthermore, U.S. liabilities arising from deposits of dollars with foreign banks are reported in the Treasury statistics as liabilities to foreign banks, whereas the liability of the foreign bank receiving the deposit may be to foreign official institutions or to residents of another country.

Qata pertaining to branches or agencies of forefign official institutions are reported opposite the country to which the official institution belongs. Data pertainting to international and regional organizations are reported opposite the appropriate international or regional classification except for the Bank for International Settlements which is included in the classification "Other Europe."

## Reporting Coverage

Reports are required from banks, bank holding companfes, international Banking Facilities (IBF's), securities brokers and dealers, and nonbanking Banking Facilities (IBF's) securities brokers and dealers, and nonbanking iaries, and other affiliates in the United States of foreign banking and laries, and other affiliates in the United States of foreign banking and
nonbanking firms. Entities that have reportable liabilities, claims, or nonbanking firms. Entities that have reportable liabilities, claims, or
securities transactions below specifled exemption levels are exempt from securities
reporting.

Banks and some brokers and dealers file reports monthiy covering their dollar liabilities to, and dollar claims on, foreigners in a number of countrtes. Twice a year, as of June 30 and 0ecember 31 , they also report the same liabllities and claims items with respect to foreigners in countries not shown separately on the monthly reports. Beginning with reports due as of June 30 , 1978, quarterly reports are filed with respect to liabilities and claims denominated in foreign currencies vis-d-vis foreigners. Effective January 31, 1982, the specified exemption level applicable to the monthly and quarterly banking reports was raised from $\$ 2$ million to $\$ 10 \mathrm{million}$ and is based on the average for the report dates during a 6 -month period, including the current report date. There is no separate exemption level for the semiannual reports.

Banks, securities brokers and dealers, and in some instances nonbanking enterprises report monthly their transactions in securities with forelgners; the applicable exemption level is $\$ \$ 00,000$ on the grand total of purchases and on the grand total of sales during the month covered by the report.

Quarterly reports are filed by exporters, importers, industrial and commercial concerns, financial institutfons other than banks and brokers, and other nonbanking enterprises if their liabilities to, or claims on, unaffiliated foreigners exceed a specified exemption level on a two quarter-end average basis. Effective March 31, 1982, this exemption level was set at $\$ 10$ million, up from $\$ 2$ million. Nonbanking enterprises also report for each monthend their U.S. dollar-denominated deposit and certificates of deposit claims of $\$ 10 \mathrm{mili} i o n$ or more on banks abroad.

## Description of Statistics

Section I presents data on liabilities to foreigners reported by banks, brokers, and dealers in the United States. Beginning April 1978, the following major changes were made in the reporting coverage: Amounts due to banks own foreign offices are reported separately; a previous distinction between short-term and long-term liabilities was eliminated; a separation was
provided of the liabllities of the respondents themselves from their custody lfabilities to forelgners; and foreign currency liabilitles are only avallable quarterly. Also, beginning April 1978, the data on liabilitles were made more complete by extending to securlties brokers and dealers the requirement to report certain of their own liabilities and all of thelr custody liabilities to forelgners.

Section II presents the claims on foreigners reported by banks in the United States. Beginning with data reported as of the end of April 1978, a distinction was made between banks' claims held for their own account and claims held for their domestic customers. The former are available in a monthly series whereas the latter data are collected on a quarterly basis only. Also, the distinction in reporting of long-term and short-term components of banks' claims was discontinued. Maturity data began to be collected quarterly on a time remaining to maturity basis as opposed to the historic original maturity classification. Foreign currency clalms are also collected only on a quarterly basis. Beginning March 1981, this claims collected only on a quarterly basis. Beginning March 1981, this claims coverage was extend
the United States.

Another important change in the claims reporting, beginning with new quarterly data as of June 30,1978 , was the adoption of a broadened concept of "foreign public borrower," which replaced the prevlous category of "forelgn official institution to produce more meaningful information on lending to the public sector of foreign countries. The term "foreign public borrower" encompasses central governments and departments of central governments of foreign countries and of their possessions; foreign central banks, stabilization funds, and exchange authorities; corporations and other agencies of central governments, including development banks, development institutions, and other agencies which are majority-owned by the central government or its departments; State, provincial, and local governments of forefgn countries and their departments and agencies; and any international or regional organization or subordinate or affiliated agency thereof, created by treaty or convention between sovereign states.

Section 111 includes supplementary statistics on U.S. banks' liabilftes to, and claims on, foreigners. The supplementary data on banks' loans and credits to nonbank foreigners combine selected information from the IIC reports with data from the monthly Federal Reserve 2502 reports submitted for major foreign branches of U.S. banks. Other supplementary data on U.S. banks' dollar liabilities to, and banks own dollar claims on countries not regularly reported separately are available semiannually in the May and November issues of the Treasury Bulletin.

Section IV shows the liabilities $t o$, and claims on, unaffillated forefgners by exporters, importers, industrial and commercial concerns, financial institutions other than banks and brokers, and other nonbanking enterprises in the United States. The data exclude the intercompany accounts of nonbanking enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. (Such transactions are reported by business enterprises to the Department of Commerce on its direct investment forms.) The data also exclude claims held through banks in the United States. Beginning with data reported as of Necember 31, 1978, there is separation of the financial liabilities and claims of reporting enterprises from their commercial liabilities and clalms; and items are collected on a time-remaining basis instead of the prior original maturity basis.

Section $V$ contains data on transactions in all types of long-term domestic and foreign securities by foreigners as reported by banks and brokers in the United States (except nonmarketable U.S. Treasury notes, forelgn series; and nonmarketable U.S. Treasury bonds and notes, foreign currency series, which are shown in the "International Financial Statistics" section, table [FS-3). The data cover new issues of securities, transactions in outstanding issues, and redemptions of securities. They include transactions executed in the United States for the account of foreigners, and transactions executed abroad for the account of reporting institutions and their domestic customers. The data include some transactions which are classified as direct investments in the balance of payments accounts.

The geographical breakdown of the data on securities transactions shows the country of domicile of the foreign buyers and sellers of the securities; in the case of outstanding issues, this may differ from the country of the original issuer. The gross figures contain some offsetting transactions between foreigners. The net figures for total transactions represent transactions by foreigners with U.S. residents; but the net figures for transactions of individual countries and areas may include some transactions between foreigners of different countries.

The data published in these sections do not cover all types of reported capital movements between the United States and foreign countries. The principal exclusions are the intercompany capital transactions of nonbanking business enterprises in the United States with their awn branches and subsidiaries abroad or with their foreign parent companies, and capital transactions of the U.S. Government. Consolidated data on all types of international capital transactions are published by the Department of Commerce in its regular reports on the U.S. balance of payments.

Section I. - Liabilities to Foreigners Reported by Banks in the United States
Table CM-I-1. - Total Liabilities by Type of Holder
[1n millions of dollars]

1/ Includes Bank for International 5ettlements.
2/ Principally the International Bank for Reconstruction and development and the inter-American Development 8ank.
3/ Oata as of preceding quarter for non-quarter-end months.
3/ Oata as of preceding quarter for non-quarter-end months.
4/ Establishment of International Banking Facilities (IEF's) permitted beginning December 1981 .

Note.--Total liabilities include liabilities previously classified as either "short term" or "long term" on the Treasury reports filed by banks. The maturity distinction was discontinued with new reports filed as of Apr. 30, 1978, and historical series adnew reports filed as of Apr.
justed accordingly. See introductory text to capital Movements jables for discussion of changes in reporting.

Table CM-V-4. - Foreign Purchases and Sales of Long Term Securities, by Type and Country, During Second Quarter 1983, Preliminary
[In millilons of dollars]

Table CM-V-5. - Foreign Purchases and Sales of Long-Term Securities, by Type and Country, During Calendar Year 1982 [In millions of dollars]

*Less than $\$ 500,000$.

## Background

Oata have been collected since 1974 on the foreign currency positions of banks and nonbanking firins in the United States, and on those of foreign branches, indjority-owned foreign partnerships, and majority-owned forelgn subsidiaries of U.S. banks and nonbanking firins. Reports cover five major foreign exchange market currencies and U.S. dollars held abroad. Reparting has been required pursuant to title II of Public Law 93-110, an amendment to the Par Value Modification Act of September 21. 1973, and Implementing Treasury regulations. Statistics on the positions have been published since March 1977 beginning with data for December 1975.

The report forms and instructions used in the collection of bank data were revised effective with reports as of March 16, 1983, for the weekly reports. The most recent reviston of the nonbank foreign currency forms (see below) became effective as of the last business day of March 1983.

## Conmon Definttions and Concepts

The term "United States" means the States of the United States, the District of Columbia, the Commonwealth of Puerto Rico. American Samoa, Mi dway Island, the Virgin Islands, and Wake lsland. The term "foreign" means locations other than the "United States." The term "worldwide" is used to describe the sum of "United States" and "foreign" data.

Data for the United States include amounts reported by sole proprietorships, partnerships, and corporations in the United States including the U.S. branches and subsidiaries of foreign nonbanking concerns, in the case of "nonbanking firms" positions," and the agencies, branches, and substdtaries located in the United States of foreign banks and banking institutions, in the case of the weekly "bank positions."

Oata for "foreign branches" and "abroad" include amounts reported by the branches, majority-owned partnerships, and majorlty-owned subsidiarles of U.S. banking and nonbanking concerns. In general, these data do not reflect the positions of foreign parents or forelgn parents' subsidlaries located abroad except through intercompany accounts. The data inciude the foreign subsidiartes of a few foreign-owned U.S.-based corporations.

Assets, liabilities, and forelgn exchange contract data are reported on the basis of time remaining to maturity as of the date of the report, regardless of the original maturity of the instrument involved. "Spot" means due for recelpt or delivery within 2 business days from the date of the report. "Short-term" means maturing in 1 year or less from the date of the report.
"Majority-owned foreign partnerships" are those organized under the laws of a forelgn country in which one or more nonbanking concerns or nonprafit instituttons in the United States. directly or indirectly, own more than 50 percent profit interest. "Majority-owned foreign subsidiaries" are foreign corporations in which one or more nonbanking business concerns or nonprofit institutions located in the United States, directly or tndirectly, own stock with more than 50 percent of the tatal combined voting power of all classes of stock entitled to vote, or more than $S 0$ percent of the total value of all classes of stock.

## Reparting Threshoid

The exemption level applicable to banks and banking institutions was $\$ 10$ milion equivalent through January 1982, when it was raised to $\$ 100 \mathrm{milli}$ ion. The exemption level applicable to nonbanking business concerns and nonprofit institutions was \$1 miliion equivalent on all nonbank forms from March 197 S through November 1976 . It was raised to $\$ 2$ million equivalent on the monthly reports of posittons held in the United States from November 1976 through September 1978. The exemption level was rafsed to $\$ 3$ million on foreign subsidiary positions on June 30 , 1977, and for positions held in the United States on september 30, 1978. The exemption level for nonbanking firms was raised to $\$ 100 \mathrm{milli}$ on on positions in the United States in January 1982 and on foreign branch and subsidiaries positions in March 1982.

Firms must report their entire foreign currency position in a specified foreign currency if a specified U.S. dollar equivaient value is reached in any category of assets, llabiltties, exchange contracts bought and sold, or the net position in the currency. In general, exemption levels are applied to the entire firm. In reports on their forelgn branches, majority-owned foreign partnerships, and majority-owned foreign subsidiaries, U.S. banks and nonbanks are required to report the U.S. dollar-denominated assets, liabilities, exchange contracts bought and sold, and net positions of those branches, partnerships, and subsidiaries with reportable positions in the specified foreign currencies.

## Description of Statistics

Data collected on the Treasury foretgn currency forms are published in the Treasury Bulletin in seven sections. The first section presents a summary of worldwide net positions in all of the currencies reported. Sections il through VI each present data on a specified foreign currency. Section VII presents the U.S. dollar positions of the foreign branches and subsidiaries of U.S. firms which are required to report in one or more of the specified foreign currencies.

## FOREIGN CURRENCY POSITIONS

## Footnotes to Tables FCP-I through FCP-VII

## SECTION 1

1/ Worldwide net positions on the last business day of the calendar quarter of nonbanking business concerns in the United States and their foreign branches and majority-owned partnerships and subsidiaries. Excludes receivables and installment paper which have been sold or discounted before maturity, U.S. parent companies' investment in their majorityowned forelgn subsidlaries, fixed assets (plant and equipment), and capltallzed leases for plant and equipment.

2/ Foreign branches and majority-owned partnerships and subsidiaries only.
3/ Weekly worldwide net positions of banks and banking institutions in the United States, and their forelgn branches and majority-owned forelgn subsidiaries. Exciudes capital assets and llabilities.

4/ Forelgn branches and majority-owned subsidiaries only.
SECTIONS II THROUGH VII
1/ Positions of nonbanking business concerns in the United States and their forelgn branches and majority-owned partnerships and subsidiaries. In section VJI positions of forelgn branches and majortty-owned partnerships and subsidiarles only.
2/ Includes unsettied spot forelgn exchange purchase contracts, as well as currency, demand, and time depostts, negotiable and other readily transferable financlal instruments maturing in I year or less from the report date, and intracompany claims and loans to other parties repayable on demand. Other loans, accounts recefvable, and unaccepted irade drafts are excluded.

3/ Includes unsettled spot foreign exchange sales contracts, intracompany liabilities, other than short-term trade payables, short-term borrowings due in I year or less from the report date, and the current portion of long-term debt. Other loans, accrued expenses, and accounts payable are excluded.

4/ Due in 1 year or less; includes intracompany trade recelvables. Recefvables and installment paper sold or discounted before maturity are exciuded.

S/ Oue in 1 year or less; includes intracompany trade payables.
6) All current assets other than liquid assets and short-term trade recelvables, and financial assets maturing in more than 1 year from the report date. includes intracompany accounts, inventories, prepayments, long-term trade receivables, long-term intracompany claims, and stocks, bonds, and other securities. Fixed assets (plant and equipment) and parents' Investment in majority-owned foreign subsidiaries are excluded.
7/ All financlal liabllfties other than short-term debt and short-term trade payables: includes long-term trade payables, intracompany liabilities, accrued expenses, and liabilities maturing in more than lyear from the report date. Capitalized plant and equipment leases are excluded.
8/ Outstanding amounts of foreign exchange which have been contracted to be recelved or dellvered in the future. Excludes spot exchange.

9/ Columns $1,3,5$, and 7 less columns 2, 4, 6, and 8 .
10) Representative rates on the report date. Canadian dollar and United Kingdom pound rates are expressed in U.S. dollars per unit of foreign currency, all others in foreign units per U.S. dollar.

11/ Banks and banking institutions in the United States and their foreign branches and majority-owned subsidiaries. In section VII, foreign branches and majority-owned subsidiaries only.

12/ Excludes capital assets.
13/ Excludes capital liabilities.
14/ Includes both spot and forward exchange contracts.
15/ Columns 3 and $g$ less columns 6 and 12.
16/ See footnote 10 .

1/ Beginning July 1974, the International Monetary Fund (IMF) adopted weighted average of exchange rates for foring rights (SOR's) based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SOR holdings and allocations are valued on this basis beginning July 1974.
$\frac{2 /}{3 /}$ Excludes foreign exchange transactions for future and spot delivery.
3/ The exchange translation liability represents the amount of loss the Exchange Stabilization Fund (ESF) would sustain on outstanding \$1.1 blliion equivalent of German mark swaps with the Federal Reserve if those swaps were liquidated on Mar. 31, 1983.
4/ A non-interest-bearing liability to the U.S. Treasury resulting from
the transfer to the ESF of foreign currencies drawn from the IMF by the United States.
5) In addition, the ESF has a contingent liability up to $\$ 500$ million, in connection with 8ank for International Settlements financing for 8razil.

Note.--Annual balance sheets for fiscal years 1934 through 1940 appear in the 1940 Annual Report of the Secretary of the Treasury and those for succeeding years appear in subsequent reports through 1980. Quarterly balance sheets beginning with Dec. 31, 1938, have been published in the Treasury 8ulletin. Data from inception to Sept. 30, 1978, may be found on the statements published in the January 1979 Ireasury 8ulletin.

## Cash Management/ Debt collection

In recognition of tis established role as the federal Government's chief accountant and cash manager. Treasury has been designated as the lead agency in coordinating the Reform ' 88 Cash Management Project.

Consequently, Treasury is actively pursuing enhancements to the Governme collection systems. These initiatives include wiring payments over $\$ 25,000$ to vendors, exploring the use of teleprocessing for disbursements, collecting receipts through a nationwide lockbox system, and establishing an automated clearinghouse system for recurring
recelpts. Many of these stateof $\quad$ the-art techniques are recelpts. Many of these state-of othe-art
included as elements in agencies action plans.

Such action pians were required under om8 Bulietin 83-6 (October 22, 1982). These plans contain: (1) an inventory, stratified by dollar amount. Identifying each cash receipt and disbursement activity subject to cash management controls and projecting for each activity the significant interest savings that can result from improving cash management practices, and (2) a detailed action plan describing each major cash management problem, issue, deficiency, and opportunity in the agency, the specific steps needed to correct the problem or issue, and a timetable for accomplishing each step.

As lead agency, Treasury has assumed responsibility for coordinating and monitoring agency action plan initiatives. Utilizing the existing Lialson Program network. Treasury's Cash Management Program staff has been working with Federal agencies
to establish fiscal year saving goals. monitor the to establish fiscal year saving goals. monitor the according to specified timetabies. and identify Government-wide cash management issues which have significant financial impact on agency operations.

As part of its reporting responsibility to OMB's Reform ' 88 Steering Committee, Ireasury's Cash Management Program

Staff has devised a two-prong approach. Monthly meetings will be held with agency officials to discuss action plan initi. atives. Through these meetings Treasury hopes to resolve any issues which may impede progress on individual elements and to inftiate efforts which may lead to ddditional action plan inltiatives. The Cash Management program 5taff will continue to serve in a liaison capacity in assisting agencies through joint on-site reviews of operations and jointly sponsored seminars on controversial cash management issues.

The second phase of Treasury's approach focuses on its coordination role of agency action plans. Treasury will soon be releasing reporting guldelines to agencles to assist them in preparing progress reports. Previousiy, agenctes have reported quarterly to OMB a summary of activities. However, future reports will be forwarded to Treasury. In turn. Treasury will consolidate this reporting information and forward a summary of Government-wide activity to the Reform ' 88 5teering Committee.

Based on a joint Treasury/agency review and evaluation, it is estimated that the acceleration of receipts and the timely disbursement of payments accomplished through these action plan Initiatives will favorably impact the Government's cash position by $\$ 4,144,053,830$, resulting in an annual savings, position by fully implemented, of $\$ 385,140,767$. figures for two
once agencies are still pending.

The table below summarizes agencies currently reporting under the Reform ' 88 Cash Management Project, the one-time acceleration/deferral savings to be realized from implementing various cash management initiatives, and the related interest savings. Future tables will provide the status of agency initiatives. The information shown in these tables will be based on the status reports on the initiatives submitted by agencies under the Reform ' 88 reporting system.

[^15]The Treasury Fiscal Manual (Bulletin 82-18, July 1, 1982) advised agencies of a continuing reporting requirement to obtain data on the status of accounts and loans receivable due from the public, and on agencies' accounting and debt collection practices. The bulletin also required all agencies to prepare a supporting schedule to the 5tatement of Financial Condition $(5 \mathrm{~F}-220)$ which gives data concerning reconciliation of account balances; an aging schedule of amounts due; the disposition of writeoffs and adjustments to allowances; administrative action taken on delinquent amounts; an aging schedule of rescheduled receivables; and a reconciliation of interest and penalties assessed on delinquencies. The following accounts and loans receivable tables were compiled from $5 \mathrm{~F}-220$ supporting schedules and included in

## the 1982 Consolidated Financial Statements of the United States

 Government.The first table gives accounts and loans receivable information by functional category for 1981 and 1982. The accompanying pie graphs are a representation of the 1982 receivables in each functional category as a percentage of the total amount of receivables for that year. The three remaining tables categorize receivables by agency for 1981 and 1982, show a summary reconciliation of gross accounts and loans receivable, and provide the summary aging schedule of gross accounts and loans receivable.

Accounts and Loans Receivable by Function [In billions]

|  |  |
| :--- | :--- |

[^16]1/ Includes accounts receivable from Internal Revenue 5ervice of $\$ 27.3$ billion in 1982 and $\$ 20.5$ billion in 1981.
2) Includes loans receivable from the Federal Financing Bank of $\$ 124.4$ billion in 1982 and $\$ 107.3$ billion in 1981.

## Accounts Receivable as of Sept. 30, 1982

(Percent)

Loans Receivable as of Sept. 30, 1982
(Percent)

Total: $\$ 240.6$ billion

Note - Government accounts and loans receivable are amounts due from non-Government entities for goods furnished or services rendered. These receivahies result from a wide range of $\&$ ederal activities including tax assessments; sale of Government services such as satellite launchings; sale of Government qoods such as natural resources from Federal lands: over nayments to beneficiaries or annuitants; and various loan programs such as student and housing loans.

CONSOLIDATED FINANCIAL STATEMENTS OF THE UNITED STATES GOVERNMENT FISCAL YEAR 1982/PROTOTYPE

August 12, 1983

Statement of the Secretary of the Treasury

This Consolidated Financial Statements of the United States Government is a prototype report which provides information about financial operations of the Government and the Government's ability to raise revenues and acquire resources. This report is not meant to compete with the budget of the United States Government as the primary tool for planning and controlling the allocation of economic resources. Rather, it is an attempt to improve the financial reporting of the Federal Government by applying the principles of business accounting to the Government.

At present, there is a great deal of attention being given to the management and collection of debt owed to the Federal Government. The data collected will enable the Federal Government to improve debt collection activity. Pursuant to the Debt Collection Act of 1982 (Public Law 97-365), regulations were established requiring each agency to report to the Office of Management and Budget and the Department of the Treasury the status of their accounts and loans receivable. These agency submissions are included in this report as Schedule VIII, "Summary of Accounts and Loans Receivable Due from the Public."

Reader comments and reactions on this prototype report are welcome.

# COMPTROLLER GENERAL OF THE UNITED STATES WASHINGTON D.C. 20548 

August 12, 1983

## STATEMENT OF THE UNITED STATES

## GENERAL ACCOUNTING OFFICE

This consolidated financial report for fiscal year 1982 provide information that can be useful in assessing the financial activities of the Federal Government as a whole. This report demonstrates the value of an idea we strongly support--the annual publocation of formal Consolidated Financial Statements of the United States Government.

Consolidated financial information can provide a broader perspective on the overall financial condition of the Government than is provided by the budgetary process alone. For example, a consolidated report could disclose the magnitude of the Government's pension liabilities, public debt, and estimated losses on guarantee and insurance programs.

Since the enactment of the Federal Managers' Financial Integrity Act of 1982, changes have been made to improve financial accounting and reporting by the Federal Government. First, the General Accounting Office has developed and issued the internal control standards to be followed by executive agencies as required by the act. Secondly, agencies are implementing improvements in their internal control and accounting systems as a result of the passage of the act.

As with our earlier reports of this nature, we did not audit the accompanying consolidated financial statements for the fiscal year ended September 30, 1982; accordingly, we do not express an opinion on them.

Charles A. Bowsher Comptroller General of the United States

## Introduction

In a continuing effort to provide more complete Consolidated Financial Statements for the United States Government (CFS), additional data has been included in the statements and the supporting schedules of this year's report.

Leasehold improvements have been included in the fixed assets category "Property and equipment." The accounting industry recommends that improvements on leased property should be capitalized by the lessee in a tangible fixed asset account and depreciated over the term of the lease or the service life of the improvement, whichever is the shorter.

Schedule VII, "Analysis of Pension and Retirement Plans," has been changed. The accrued pension liability for military and civil service retirement plans are still included. Additional pension reports have been received from several other plans and the pension liability amount is reported on Schedule VII. The total assets and liability net of trust fund balance is not available for all the "other" pension plans due to the diversity of the funding arrangements.

A new Schedule VIII, "Summary of Accounts and Loans Receivable Due from the Public," summarizes reports received from Federal agencies. The Debt Collection Act of 1982 requires agencies to report the amount and aging schedules of accounts and loans receivable. The data from these reports has been categorized by agency and function for both 1981 and 1982. The schedule supports the balance sheet receivables which are net of allowances, taxes receivable and intragovernmental holdings.

The alternative financial statements section has again been included in the CFS. The excess of current liabilities over current assets is defined by identifying the approximate amount of liabilities incurred that will mature over the next year and the assets presently available to liquidate them.

## Notes to Financial Statements

## 1. Summary of general accounting policies

Principal financial statements.--These consist of a statement of financial position, a statement of operations, and a statement of changes in financial position. Because of their levelopmental nature, only the most significant =hanges in format are disclosed in the Notes.

Principles of consolidation.--The statements include the accounts of all significant agencies ind funds included in the budget of the U.S. iovernment. Agencies such as the U.S. Postal iervice and the Federal Financing Bank, :lassified as off-budget (not included in :alculating the budget surplus or deficit), have ilso been included in the statements because they re wholly owned and are clearly within the scope If Government operations. Government-sponsored nterprises such as the Federal land banks are xcluded because they are privately owned. ntragovernmental transactions were eliminated in onsolidation.

Fiscal year.--The fiscal year of the U.S. overnment ends on September 30.

Reclassification and adjustment.--After eview, certain 1981 income and expense accruals ave been restated where appropriate to reflect ignificant reclassifications and adjustments ade after the end of the fiscal year. This may ccur for one of two reasons. Agency subunits or rograms may have been transferred from one epartment or agency to another or a eclassification of an item may have taken lace. As a result, the income and expense otals presented as prior year data may not kactly match those originally published.

## International monetary reserves

This category, as of September 30, 1982, mprises the following items: $\$ 11.2$ billion in ild, recorded at $\$ 42.22$ per ounce, the statutory ice at which gold is monetized by the issuance
gold certificates to the Federal Reserve stem; $\$ 4.8$ billion of special drawing rights,
international reserve asset; and $\$ 6.4$ billion presenting the U.S. reserve position in the ternational Monetary Fund.

## Accrued taxes receivable

The September 30, 1982, total for taxes ceivable represents $\$ 24.0$ billion (net) for linquent taxes and $\$ 3.6$ billion of accrued rporate taxes.

## 8. Depreciable personal property

Military hardware and equipment are recorded at acquisition cost and include only depreciable property currently in use or in usable condition. The major components of each category are summarized as follows:

|  | $\begin{aligned} & 1982 \quad 1981 \\ & (\ln \text { billions) } \end{aligned}$ |  |
| :---: | :---: | :---: |
| Military hardware |  |  |
| Aircraft and related equi pment | \$91.5 | \$82.6 |
| Ships and service craft. | 70.7 | 63.8 |
| Combat and tactical vehicles. | 54.8 | 38.0 |
| Missiles and related equipment. | 24.0 | 21.4 |
| Other................. | 3.8 | 3.6 |
| Total. | \$244.8 | \$209.4 |
| Equipment |  |  |
| Department of Defense |  |  |
| Industrial plant equipment...................... | \$16.9 | \$26.3 |
| Communications and electronics.................. | 2.6 | 2.9 |
| Other. | 34.2 | 4.7 |
|  | 53.7 | 33.9 |
| Other agencies................ | 30.6 | 47.3 |
| Total. | \$84.3 | \$81.2 |

## 9. Accumulated depreciation

Most Government agencies do not calculate depreciation on property and equipment; therefore, accumulated depreciation is estimated on a straightline basis, from available information. The useful lives applied to each classification of asset are as follows: Buildings, structures, and facilities--50 years; ships and service craft--30 years; industrial plant equipment--20 years; all other depreciable assets--10 years.

## 10. Borrowing from the public

As of September 30, 1982, the gross amount of Federal debt outstanding net of unamortized
premiums and discounts was $\$ 1,136.8$ billion. Thi amount was reduced by $\$ 218.0$ billion for intra governmental holdings. The amount of Federa debt outstanding net of unamortized premiums an discounts, as of September 30, 1981, was $\$ 994$. billion. This amount was reduced by $\$ 209$. billion for intragovernmental holdings. As o September 30, 1982, foreign and internationa investors held approximately $\$ 146.4$ billion o the debt outstanding with the public. The amoun as of September 30, 1981, was $\$ 135.5$ billion. Fo additional information on borrowing from th public, see the Federal Debt Maturity schedule i the supplemental section (page 105).
11. Accrued pension, retirement, and disability plans

The accounting for accrued pension, retire ment, and disability plans is subject to severa different assumptions, definitions, and method of calculation. Each of the major plans $i$ summarized below.

Military personnel and civilian employees Accrued pension liabilities for September 30 1982, represent the excess of accumulate benefits over net assets available under the tw plans and were calculated in accordance wit instructions developed jointly by the Genera Accounting Office and the Office of Managemen and Budget under the provisions of Public Law 95 595. The liabilities under these two plan represent a major portion of the total unfunde liability which is to be reported under Publi Law 95-595.

Social security: Based on the present valu of the projected excess of benefits ove contributions for present participants for th next 75 years.

It has not yet been determined whether th requirements for Federal pension plans, estab lished as a result of Public Law $95-595$, shoul be applied to the Social Security System due t the uniqueness of the actuarial cost methods use for measuring benefits under the system.

Veterans compensation: Represents the resent value of annual benefit payments.

Federal employees compensation: Represents stimated future costs for approved Federal mployees Compensation Act cases.

Other annual pension reports received from lans covered by Public Law $95-595$ are reported $n$ the same manner as military personnel and ivilian employees described above.

For additional information on accrued ensions, see Analysis of Pension and Retirement lans schedule in the supplemental section page 106).
2. Contingent liabilities for guarantee and insurance programs

A number of agencies do not make any rovision for estimated losses on loan guarantees nd insurance, while others do not provide easonable estimates of losses.

For additional information on estimated osses for guarantee and insurance programs, see he Commitments and Contingencies of the U.S. iovernment schedule in the supplemental section page 104).

## 3. Current noncash provision for social security

The noncash provision for social security epresents changes in the social security accrued iability between periods based on a $30-y e a r$ mortization of the actuarial deficit. Accounting ethods for this provision require additional tudy.

The noncash amount is not included in the itatement of Operations because a substantial but ndeterminate portion is not applicable to the urrent period. The Statement of Operations does nclude cash benefit payments. The current roncash provision for social security is $\$ 186.6$ illion in 1982.

## 14. Contingencies

Several Government agencies insure usinesses and individuals against various types of risks. The amount of insurance coverage in
force, representing the maximum risk exposure to the Government, is $\$ 2,074.0$ billion as of September 30, 1982.

The Government also guarantees loans by nonGovernment enterprises to businesses and individuals. These guarantees become liabilities of the Government only when it is required to honor its guarantees. Loan guarantees in force at September 30,1982 , are $\$ 488.0$ billion. For further information on contingencies, see the Commitments and Contingencies of the U.S. Government schedule in the supplemental section (page 104).

## 15. Open-ended programs and fixed costs

The Government commits itself to provide services by passing laws that make spending mandatory. Since a significant amount of future spending is fixed by law, it is very probable that the Government will pay for these programs in future years. Listed below are the programs for fiscal 1982 that can be terminated only if the laws are changed.

1982
(In billions)

| Payments for individuals |  |

## Introductory Statement to the Supplemental Schedules

#### Abstract

The following schedules present information which in some cases is unique to the Federal Government or is not generally shown as a part of published financial statements. The information in the schedules reflects various operations of the Government under laws passed by the Congress, and in some cases shows the financial costs to the Government of providing benefits through the tax system or through other indirect means as opposed to direct Federal revenue collection or spending.

There are certain schedules that are incomplete. As a prototype, this report attempts to show what is planned with regard to providing a comprehensive overview of Federal financial operations. In some cases, the schedules support the financial results shown in the consolidated financial statements; in others, there is little relationship between the schedules and the statements. Consequently, each of the tables should be considered individually as a specialized information source.

The following schedules are presented in this section:

I Flow of Funds Projections
The information in this schedule was obtained from the 1984 Budget of the U.S. Government prepared by the Office of Management and Budget. It presents actual and projected 1983-86 cash receipts and outlays. Although the consolidated financial statements are prepared on an accrual basis and reflect historical financial data, no attempt has been made here to develop projections on an accrual basis. The data presented here also differ from the statements in that certain receipts are treated as reductions of outlays, according to conventions adopted for budgeting purposes.

These projections are not forecasts of future receipts and outlays, nor are they recommendations for policy-setting purposes. They simply reflect what may happen to cash basis revenues and expenditures considering certain basic assumptions reflected in the budget. The receipts projections are consistent with the continuation of current tax laws as modified in the 1984 Budget. Outlay estimates indicate the degree to which resources would be committed by the continuation of existing and currently proposed programs through fiscal 1986.

II Financial Statements of the U.S. Government Restated for General Price-Level Changes
This schedule is developed from the Statement of Financial Position and Statement of Operations. Historical values have been restated to account for changes in the general purchasing power of the dollar. Accounting for inflation by this method provides comparability between years, since all dollars are equivalent to the current level of purchasing power. This restatement generally follows the Financial Accounting Standards Board Statement No. 33, "Financial Reporting and Changing Prices."

Derived from the Consumer Price Index for All Urban Consumers (CPI-U), the average conversion factors used here are: fiscal 1982-1.034 and fiscal 1981-1.083. Monetary assets and liabilities as of September 30,1982 , are not restated because they already represent dollars of current general purchasing power.

III Effect of Tax Benefits on Federal Revenues
The Effect of Tax Benefits on Federal Revenues schedule is designed to show the revenue losses attributable to tax law provisions that allow special exclusions, exemptions, or deductions from gross income or provide special credits, tax rates, or deferrals. The schedule shows the approximate cost of tax benefits.

It should be noted that the effect on revenues of adding or deleting a particular tax benefit would not be the same as the dollar amount currently associated with the benefit. Consequently, it is not possible to say what the effects of increasing or decreasing selected benefits would be without considering a number of variables.

Some minor distortions may have occurred since data presented have been condensed for purposes of this report.

IV Commitments and Contingencies of the U.S. Government
The Commitments and Contingencies schedule is designed to show two basic types of financial information. These are the maximum potential liabilities and the anticipated liabilities which it is reasonably certain, based on experience and other factors, will occur. The anticipated liabilities are the equivalent to allowance for losses.

As used in commercial accounting, a commitment represents an obligation to pay for goods or services upon delivery under a contractual arrangement. Commitments shown here are represented by long-term contracts for which appropriations have not yet been provided by the Congress, and undelivered orders representing obligations of currently available appropriations.

A contingency represents a possible exposure to a liability depending upon the outcome of uncertain future events or circumstances. Contingencies are stated in terms of the maximum risk exposure without regard to existing contingent assets which would be available to offset potential losses. The "ratio of losses incurred to premiums written" represents the probability of incurring those losses. "Contingent liabilities" supports the balance sheet liability "contingent liabilities for guarantee and insurance programs" and represents the anticipated liability.

## Federal Debt Maturity

The Federal Debt Maturity schedule reflects information on the borrowing of the Federal Government needed to finance the Government's operations.

Information on the debt is provided by type of debt instrument, average interest rate charged for each type, and maturity. This schedule directly supports the balance sheet caption, "Borrowing from the public," which is shown net of intragovernmental holdings and unamortized premium or discount. Intragovernmental holdings represent that portion of the total Federal debt held by Federal entities, including the major trust funds.

VI Additions to Non-Federal Economic Resources
This schedule indicates the ways in which the Government uses its resources to add to the physical and human resources of the Nation without acquiring physical assets. Some of these investment-type expenditures, while not adding to the Federal assets, add to the assets of State and local governments or private institutions, and all enhance the future productivity of the Nation.

While this schedule does not provide a precise measure of the difference between capital and current items, it does indicate a useful general magnitude.

Additions to State, local, and private assets include construction grants for highways, hospitals, and airports, subsidies to the merchant fleet, and conservation projects, which increase the value of private farmland and water resources. Other developmental expenditures reflect current

Federal expenditures and grants which will benefit the Nation in future years by increasing productivity or well-being. These include research and development costs and education and training.

VII Analysis of Pension and Retirement Plans
The Analysis of Pension and Retirement Plans schedule is designed to provide an insight into the size of these programs and associated future financing requirements as of September 30, 1982, for all Government-financed plans. Amounts for social security, military personnel, civilian employees, and other plans support the liabilities on the Consolidated Statement of Financial position. The third part of this schedule provides information on benefits paid to pensioners.

To the extent that information for this schedule was available, it was obtained from direct contact with actuaries for the respective agencies, from published Department of the Treasury reports, and from annual reports filed with the General Accounting Office under Public Law 95-595. The schedule is incomplete in that the number of plans ultimately to be included in the schedule is not yet resolved-as many as 38 separate plans might be included. GAO has developed instructions regarding the information to be contained in and the format to be used in the annual reports. Figures developed under the GAO guidelines have been used in this schedule for 1982.

VIII Summary of Accounts and Loans Receivable Due from the Public
The Debt Collection Act of 1982 (Public Law 97-365) requires the Director of the Office of Management and Budget (OMB), in consultation with the Secretary of the Treasury and the Comptroller General of the United States, to establish regulations requiring each agency with outstanding debts to prepare and transmit to $O M B$ and the Treasury a report which summarizes the status of accounts and loans receivable managed by each agency. These receivables result from a wide range of Federal activities including tax assessments; sale of Government services such as satellite launchings; sale of Government goods such as natural resources from Federal lands; overpayments to people like annuitants; and various loan programs such as student and housing loans. The data in the reports will enable the Federal Government to improve collection activity.

This schedule supports the balance sheet receivables, "Accounts receivable" and "Loans receivable" which are shown net of allowances, taxes receivable and intragovernmental holdings. The information in this schedule is based on data submitted by Federal agencies to the Treasury and published annually in the Treasury Bulletin.

IX Federal Facts and Figures
The schedule is designed to provide readers of the financial statements and schedules a set of recognizable benchmarks to use in making comparisons and identifying any relationships. Major emphasis has been given to providing information on the gross national product, the Consumer Price Index, employment, Federal debt, Federal expenses, and personal income taxes. In all cases, the most current data available have been provided.
