Note. - Out lays consist of disbursements less proprietary receipts from the public and certain intrabudgetary transactions. 8udget estimates are based on current budget estimates released Apr. 10, 1984, by the Office of Management and Budget.

The March 31, 1984, tables on "Federal Obligations" are not being published in this issue because of processing difficulties.--Ed.

The operating cash of the Treasury is maintained in Treasury's accounts with the Federal Reserve banks and branches and in tax and loan accounts. As the balances in the accounts at the Federal Reserve Danks become depleted, they are restored by calling in (withdrawing) funds from thousands of financial institutions throughout the country authorized to maintain tax and loan accounts.

Under authority of Public Law 95-147, the Treasury implemented a program on Nov. 2, 1978, to invest a portion of its operating cash in obligations of depositaries maintaining tax and loan accounts. Under the Treasury tax and loan investment program, depositary financial institutions select the manner in which they will participate in the program. Depositaries that wish to retain funds deposited in their tax and loan accounts in interest-bearing obligations participate under the Note Option; depositaries that wish to remit the funds to the Jreasury's account at Federal Reserve banks participate under the Remittance Option.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all financial institutions whereby customers of financial institutions deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of funds from a customer's account to the tax and loan account in the same financial institution. On occasions, to the extent authorized by the Treasury, financial institutions are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the accounts of their customers.

The tax and loan system permits the Treasury to collect funds through financial institutions and to leave the funds in Note Uption depositaries and in the financial cormunities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuation operations on Note Option financial institution reserves and the economy.

Noncompetitive tenders were accepted in full at the average yield of accepted tenders, 13.83 percent, price 99.633 . These tataled $\$ 750$ million. Competitive tenders accepted from private investors totaled $\$ 4,756$ miliion.

An interest rate of $13-3 / 4$ percent was set on the bonds of 2004 after the determination as to which tenders were accepted on a yield auction basis. The bonds of 2004 were dated July 10, 1984, due August 15, 2004, with interest payable on February 15 and August 15 in each year until maturity.

Tenders for the bonds of 2004 were received until 1 p.m. EOST, July 5 , and totaled $\$ 8,061$ million, of which $\$ 4,001$ million was accepted at yields ranging from 13.71 percent, price 100.185 , up to 13.82 percent, price 99.441. Noncompetitive tenders were accepted in full at the average yield of accepted tenders, 13.76 percent, price 99.846 . These totaled $\$ 226$ million. Competitive tenders accepted from private investors totaled $\$ 3,775$ million.

## 52-Week Bills

On June 1 tenders were invited for approximately $\$ 8,250 \mathrm{million}$ of 364 day Treasury bills to be dated June 14,1984 , and to mature June $13,1985$. The issue was to refund $\$ 7,776$ million of 364 -day bills maturing June 14 and to raise about $\$ 474$ million new cash. Tenders were opened on June 7. They totaled $\$ 16,281$ million, of which $\$ 8,259$ million was accepted, including $\$ 591$ miliion of noncompetitive tenders from the public and $\$ 2,055$ million of the bills issued at the average price to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. An additional $\$ 95$ million of the bills was issued to Federal Reserve banks as agents for foreign and international monetary authorities for new cash. The average bank discount rate was 10.92 percent.

## Public Debt Limit

Public Law 98-342, signed by the President on July 6, raised the public debt limit to $\$ 1,573$ billion. The 7 -year notes issued July 9 and the 20 -year 1 -month bonds issued July 10 were auctioned the week following their normal dates to avoid exceeding the previous debt ceiling of $\$ 1,520$ billion.

YIELDS OF TREASURY SECURITIES, JUNE 29, 1984

AVERAGE YIELDS OF LONG-TERM BONDS
Table AY-1. - Average Yıelds of Long-Term Treasury, Corporate, and Municipal Bonds

1/ Treasury series is the $20-y e a r$ constant maturity rate read from dally
1/ Treasury series is the 20-year constant maturity rat
2) Treasury series based on 3 -week moving average of reoffering yields of new corporate bonds rated Aa by Moody's Investors Service and having an
original maturity of at least 20 years. Prior to June 1973 , this series
reflected bonds without call protection. From June 1973 to July 1976, the
series was adjusted to reflect 5 years call protection. Since that time,
he series reflects bond yields regardless of the call protection offered.
3/ Index of new reoffering yields on 20 -year general obligations rated $A$ a by Moody's Investars Service. Prior to June 1970, the series was compiled by Securities Industries Association. Since then, the series has been compiled by Treasury.

## INTERNATIONAL FINANCIAL STATISTICS

The tables in this section are designed to provide data on U.S. reserve assets and liabilities and other statistics related to the U.S. balance of payments and international financtal position.

Table IFS-1 shows the reserve assets of the United States, including its gold stock. special drawing rights held in the Special Orawing Account in the International Monetary fund. holdings of convertible forefgn currencies, and reserve posi= tion in the International Monetary Fund.

Table lfS-2 brings together statistics on liabilities to forefgn official institutions, and selected liabllities to all other foreigners, which are used in the U.S. balance of payments statistics.

Table IFS-3 shows U.S. Treasury nonmarketable bonds and notes issued to official institutions and other residents of foreign countries.

Table IFS-4 presents measure of weighted-average changes in exchange rates between the U.S. dollar and the currencies of certain other countries.

1/ Beginning July 1974, the international Monetary fund (IMF) adopted a technique for valuing the special drawing right (SDR) based on a weighted-average of exchange rates for the currencies of selected member countries. The U.S. SDR currencies of selected member countries. The $\begin{aligned} & \text { holdings and reserve position in the lMF are also valued on }\end{aligned}$ holdings and reserve position i
2f Includes gold held by the Exchange Stabilization Fund.

- Treasury values its gold stock at $\$ 42.2222$ per fine troy ounce and pursuant to 31 U.S.C. $5117(b)$ issues gold certificates to the Federal Reserve at the same rate against all gold held.

4) Includes allocations of SOR's in the Special Orawing Account in the International Monetary Fund, plus or minus trans= actions in SOR's.

Allocations of SOR's on Jan. lof respective years are as follows: 1970, 867 million; 1971, $717 \mathrm{million} ; 1972,710$ million: 1979, 874 miliion (in SDR terms); 1980, 874 milifon (in SOR terms); and $1981,857 \mathrm{million}$ (in SOR terms).
S/ Includes holdings of Treasury and Federal Reserve System beginning November 1978, these are valued at current market exchange rates or, where appropriate, as such other rates as may be agreed upon by the parties to the transactions.
6/ The United States has the right to purchase foreign currencies equivalent to its reserve position in the fund automatically if needed. Under appropriate conditions the United States could purchase additional amounts related to the U.S. quota.

# INTERNATIONAL FINANCIAL STATISTICS 

Table IFS-2. - Selected U.S. Liabilities to Foreigners
[In millions of dollars]

Note.:-Table is based on Treasury 0epartment gata and on data reported to the Treasury Department by banks and brokers in the United 5 tates.

Data correspond generally to statistics following in this section and in the "Capital Movements" section, except for the inclusion of investments by foreign official reserve agencies inclusion of investments by forelgn official reserve agencies in debt securities of U.5. federally sponsored agencies an U.S. corporations. Table excludes Internat tonal Monetary Fund "holdings of dollars" and holdings of U.S. Treasury letters of credit and nonnegotiable noninterest-bearing
special U.5. notes held by other international and regional organizations.

1/ This table presents calculations of weighted average percentage changes in the rates of exchange between the dollar and certain foreign currencies, in order to provide a measure of changes in the dollar's general foreign exchange value broader than a measure provided by any single exchange rate change. Calculations are provided for two sets of countries that account for a major share of U.S. foreign trade. U.S. bilateral trade patterns in 1972 are used as a convenient, readily available proxy for the assignment of relative weights to individual exchange rate changes, al though such weights do not provide a full measure of individual currencies' relative importance in U.S. international transactions because they take no account of factors other than trade. The calculations do not purport to represent a guide to measuring the impact of exchange rate changes on U.S. international transactions.
Exchange rate data used in constructing the indices reported here differ somewhat from those used in earlier calculations to more accurately reflect. end-of-period currency values.

The equations used are as follows:
Equation one is used to calculate a trade-weighted average of changes in the dollar cost of foreign currencies:
(EQ1) $E_{m}=\Sigma\left(\Delta \$ / f c_{j} * M_{j} / \Sigma M\right)$
Where: $\mathrm{E}_{\mathrm{m}}$ is the weighted average of percentage changes in the dollar cost of individual foreign currencies;
$\Delta \$ / \mathrm{f}_{\mathrm{j}}$ is the percent change in the dollar cost of foreign currency $i$; and
$M_{1} / E M$ is U.S. imports from country i, as
a proportion of total U.S. imports from
all countries in the set.

Equation two is used to calculate a trade-weighted average of changes in the foreign exchange cost of dollars:
(E02) $\quad E_{x}=\Sigma\left(\Delta f c_{i} / \$ * x_{i} / \Sigma x\right)$
Where: $E_{x}$ is the weighted average of percentage changes in the foreign currency cost of dollars:
$\Delta f c_{i} / \$$ is the percent change in the foreign currency $i$ cost of dollars; and
$x_{i} / E x$ is U.S. exports to country $i$, as
a proportion of total U.S. exports to
all countries in the set.
Equation three combines the above export-weighted and import-weighted averages to provide an overall measure of exchange rate change:
(EQ3) $E=\left[\left(E_{m} * m / m+x\right) *(-1)\right]+\left[E_{x} * x / m+x\right]$
Where: $m / m+x$ is U.S. imports as a proportion of its total trade with all countries in the set; and
$x / m+x$ is U.S. exports as a proportion of
its total trade with all countries in the set.

2/ Australia, Austria, Belgium-Luxembourg, Candda, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, and United Kingdom.
3) The currencies of 46 IMF member countries which account for approximately 90 percent of U.S. total trade.

## CAPITAL MOVEMENTS

## Background

Data relating to capital movements between the United States and foreign countries have been collected in some form since 1935. Reports are filed with district Federal Reserve banks by banks, bank holding companies, securities brakers and dealers, and nonbanking enterprises in the United States. Statistics on the principal types of data by country or geographical area are then consolidated and are published in the Treasury Bulletin.

The reporting forms and instructions $1 /$ used in the Treasury International Capital (TIC) Reporting System have been revised a number of times to meet changing conditions and to increase the usefulness of the published statistics. The most recent, general revision of the report forms became statistics. The most recent, general revision of the report forms became
effective with the banking reports as of April 30, 1978, and with the effective with the banking reports as of April 30, 1978, and with the nanbanking reports as of December 31 . 197日. Revised forms and instructions
are developed with the cooperation of other Government agencies and the Federal Reserve System and in consultations with representatives of banks, securities firms, and nonbanking enterprises.

## Basic Oefinitions

The term "foreigner" as used in the Treasury reports covers all institu tions and individuals domiciled outside the United States, including U.S. citizens domiciled abroad, and the foreign branches, subsidiaries, and other affiliates abroad of U.S. banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located. The term "foreigner" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled, as shown on the records of reporting institutions. For a number of reasons, the geographical breakdown of the reported data may not in all cases reflect the ultimate ownership of the assets. Reporting institutions are not expected to go beyond the addresses shown on their records, and so may not be aware of the country of domicile of the ultimate beneficiary. Furthermore, U.S. liabilities arising from deposits of dollars with foreign banks are reported in the Treasury
statistics as liabilities to foreign banks, whereas the liability of the statistics as liabilities to foreign banks, whereas the liability of the foreign bank receiving the deposit may be to foreign official institutions or to residents of another country.

Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regionat organizations are reported opposite the appropriate international or regional classification except for opposite the appropriate international or regional classification except for the Bank for

## Reporting Coverage

Reports are required from banks, bank holding companies, International Banking Facilities (IBF's), securtties brokers and dealers, and nonbanking enterprises in the United States, including the branches, agencies, subsidiaries, and other affiliates in the United States of foreign banking and nonbanking firms. Entities that have reportable liabilities, claims, or securities transactions below specified exemption levels are exempt from reporting.

Banks and some brokers and dealers file reports monthty covering their dollar liabilities to, and dollar claims on, foreigners in a number of countries. Twice a year, as of June 30 and December 31, they also report the sande liabilities and claims items with respect to foreigners in countries not shown separately on the monthly reports. Beginning with reports due as of june 30 , 197B, quarterly reports are filed with respect to llabilities and claims denominated in foreign currencies vis-a-vis foreigners. Effective January 31, 1982, the specified exemption level applicable to the monthly and quarterly banking reports was raised fram $\$ 2$ million to $\$ 10 \mathrm{million}$ and is based on the average for the report dates during a 6 -month period, including the current report date. There is no separate exemption level for the semiannual reports.

Banks, securities brokers and dealers, and in some instances nonbanking enterprises report monthly their transactions in securities with foreigners; the applicable exemption level is $\$ 500,000$ on the grand total of purchases and on the grand total of sales during the month covered by the report.

Quarterly reports are filed by exporters, importers, industrial and commercial concerns, financial institutions other than banis and brokers, and other nonbanking enterprises if their liabilities to, or claims on, unaffiliated forelgners exceed a specified exemption level on a two quarter-end average basis. Effective March 31, 1982, this exemption level was set at $\$ 10$ million, up from $\$ 2$ million. Nonbanking enterprises also report for each monthend their $U . S$. dollar-denomtnated deposit and certificates of deposit claims of $\$ 10$ million or more on banks abroad.

## Description of Statistics

Section I presents data on liabilities to foreigners reported by banks, brokers, and dealers in the United States. Beginning April 197B, the fol: lowing major changes were made in the reporting coverage: Amounts due to banks' own forelgn offices are reported separately; a previous distinction between short-term and long-term liabtlities was eliminated; a separation was
provided of the habilities of the respondents themselves from their custody liabilities to foreigners; and foreign currency liabilities are only available quarterly. Also, heginning Aprit 1978, the data on liabilities were made more complete by extending to securities brokers and dealers the requirement to report certain of their own liabilities and all of their custody liabilities to foreigners.

Section II presents the claims on foreigners reported by banks in the United States. Beginning with data reported as of the end of April 1978, a distinction was made between banks' claims held for their own account and claims held for their domestic customers. The former are available in a monthly series whereas the latter data are collected on a quarterly basis only. Also, the distinction in reporting of longeterm and short-term components of banks' claims was discontinued. Maturity data began to be collected quarterly on a time remaining to maturity basis as opposed to the historic original maturity classification. Foreign currency claims are also collected only on a quarterly basis. Beginning March 1981, this clalms coverage was extended to certain items in the hands of brokers and dealers in the United States.

Another important change in the claims reporting, beginning with new quarterly data as of June 30,1978 , was the adoption of a oroadened concept of "foreign public borrower, which replaced the prewious category of "foreign official institution" to produce more meaningful information on lending to the public sector of foreign countries. The term "foreign public borrower" encompasses central governments and departments of central governments of foreign countries and of their possessions; foreign central banks, stabilization funds, and exchange authorities. corporations and other agencies of central governments, including development banks, development institutions, and other governments, including development banks, development institutions, and other agencies which are majority-owned by the central government or its departdepartments and agencies; and any international or regional organization or departments and agencies; and any international or regional organization or
subordinate or affiliated agency thereof, created by treaty or convention subordinate or affiliated
between sovereign states.

Section TII includes supplementary statistics on U.S. banks ' liabilities to, and claims on, foreigners. The supplementary data on banks' loans and credits to nonbank foreigners combine selected information from the TIC reports with data from the monthly Federal Reserve 2502 reports submitted for major foreign branches of U.S. banks. Other supplementary data on U.S. banks" dollar liabilities to, and banks own dollar claims on, countries not regularly reported separately are available semiannually in the May and November issues of the Treasury Bulletin.

Section iV shows the liabilities $t o$, and claims on, unaffiliated foreigners by exporters, importers, industrial and commercial concerns, financial institutions other than banks and brokers, and other nonbanking enterprises in the United States. The data exclude the intercompany accounts of nonbanking enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. (Such transactions are reported by business enterprises to the Department of Commerce on its direct investment forms.) The data also exclude claims held through banks in the United States. Reginning with data reported as of December 31, 1978 , there is separation of the financial liabilities and claims of reporting enterprises from their commercial liabilities and claims; and items are collected on a time-remaining basis instead of the prior original maturity basis.

Section $V$ contains data on transactions in all types of long-term domes tic and foreign securities by foreigners as reported by banks and brokers in the United States (except nonmarketable U.S. Treasury notes, foreign series; and nonmarketable U.S. Treasury bonds and notes, foreign currency series, which are shown in the "International Financial Statistics" section, table 1FS-3). The data cover new issues of securities, transactions in outstanding issues, and redemptions of securities. They include transactions executed in the United States for the account of foreigners, and transactions executed abroad for the account of reporting institutions and their domestic customers. The data include some transactions which are classified as direct investments in the balance of payments accounts.

The geographical breakdown of the data on securities transactions shows the country of domicile of the foreign buyers and sellers of the securities; in the case of outstanding issues, this may differ from the country of the original issuer. The gross figures contain some offsetting transactions between foreigners. The net figures for total transactions represent transactions by foreigners with U.S. residents; but the net figures for transactions of individual countries and areas may include some transactions between foreigners of different countries.

The data published in these sections do not cover all types of reported capital movements between the United States and foreign countries. The principal exclusions are the intercompany capital transactions of nonbanking business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies, and capital trans-
actions of the U.S. Government. Consolidated data on all types of interactions of the U.S. Government. Consolidated data on all types of international capital transactions are published by the Department of Commerce in its regular reports on the U.S. balance of payments.

## Background

Data have been collected since 1974 on the foreign currency positions of banks and nonbanking firms in the United States, and on those of foreign branches, majority-owned foreign partnerships, and majority-owned foreign subsidiaries of U.S. banks and nonbanking firms. Reports cover five major foreign exchange market currencies and U.S. dollars held abroad. Reporting has been required pursuant to title II of Pubiic Law 93-110, an amendment to the Par Value Modification Act of September 21, 1973, and implementing Treasury regulations. Statistics on the positions have been published since March 1977 beginning with data for December 1975.

The report forms and instructions used in the collection of bank data were revised effective with reports as of March 16, 1983, for the weekly reports. The most recent revision of the nonbank foreign currency forms (see below) became effective as of the last business day of March 1983.

Common Oefinitions and Concepts
The term "United States" means the States of the United States, the District of Columbia, the Commonweal th of Puerto Rico. American Samoa, Midway Island, the Virgin Islands, and Wake Island. The term "foreign" means locations other than the "United States." The term "worl dwide" is used to describe the sum of "United States" and "foreign" data.

Data for the United States include amounts reported by sole proprietorships, partnerships, and corporations in the United States including the U.S. branches and subsidiaries of foreign nonbanking concerns, in the case of nonbanking firms positions," and the agencies, branches, and subsidiaries focated in the United States of foreign banks and banking institutions, in the case of the weekly "bank positions."

Data for "foreign branches" and "abroad" include amounts reported by the branches, majority-owned partnerships, and majority-owned subsidiaries of U.S. banking and nonbanking concerns. In general, these data do not reflect the positions of foreign parents or foreign parents' subsidiaries located abroad except through intercompany accounts. The data include the foreign subsidiaries of a few foreign-owned U.S.-based corporations.

Assets, liabilities, and foreign exchange contract data are reported on the basis of time remaining to maturity as of the date of the report, regardless of the original maturity of the instrument involved. "Spot" means due for receipt or delivery within 2 business days from the date of the repart. "Short-term" means maturing in I year or less from the date of the
"Majority-owned foreign partnerships" are those organized under the laws of a foreign country in which one or more nonbanking concerns or nonprof it institutions in the United States, directly or indirectly, own more than SD percent profft interest. "Majority-owned foreign subsidiaries" are foreign corporations in which one or more nonbanking business concerns or nonprofit institutions located in the United States, directly or indirectly, own stock with more than 50 percent of the total combined voting power of all classes of stock entitled to vote, or more than 50 percent of the total value of all classes of stock.

## Reporting Threshold

The exemption level applicable to banks and banking institutions was $\$ 10$ million equivalent through January 1982, when it was raised to $\$ 100$ million. The exemption level applicable to nonbanking business concerns and nonprofit institutions was $\$ 1$ million equivalent on all nonbank forms from March I975 through November 1976. It was raised to $\$ 2$ million equivalent on the monthly reports of positions held in the United States from November 1976 through September 1978. The exemption level was raised to $\$ 3 \mathrm{million}$ on foreign subsidfary positions on June 30,1977 , and for positions held in the United States on September 30, 1S78. The exemption level for nonbanking firms was raised to $\$ 100$ million on positions in the United States in January 1982 and on foreign branch and subsidiaries positions in March 1982.

Firms must report their entire foreign currency position in a specified foreign currency if a specified U.S. dollar equivalent value is reached in any category of assets, liabilities, exchange contracts bought and sold, or the net position in the currency. In general, exemption levels are applied to the entire firm. In reports on their foreign branches, majority-owned fareign partnerships, and majority-owned foreign subsidiaries. U.S. banks and nonbanks are required to report the U.S. dollar-denominated assets, liabilities, exchange contracts bought and sold, and net positions of those branches, partnerships, and subsidiaries with reportable positions in the specified foreign currencies.

## Description of Statistics

Data collected on the Treasury foreign currency forms are published in the Treasury bulletin in seven sections. The first section presents a summary of worldwide net positions in all of the currencies reported. Sections II through VI each present data on a specified foreign currency. Section VII presents the U.S. dollar positions of the foreign branches and subsidiaries of U.S. firms which are required to report in one or more of the specified foreign currencies.

Table ESF -2. - Income and Expense

## [In thousands of dollars]

1/ Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing rights (SOR's) based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SOR holdings and allocations are valued on this basis beginning July 1974.
2) Excludes foretgn exchange transactions for future and spot delivery.

3/ A non-interest-bearing liability to the U.S. Treasury resulting from the transfer to the Exchange 5tabilization Fund of foreign currencies drawn from the IMF by the United States.

Note. --Annual balance sheets for fiscal years 1934 through 1940 appear in the 1940 Annual Report of the Secretary of the Treasury and those for succeeding years appear in subsequent reports through 1980. Quarterly balance sheets beginning with 0ec. 31, 1938, have been published in the Treasury 8ulletin. Data from inception to Sept. 30,1978 , may be found on the statements published in the January 1979 Treasury Bulletin. Meify

CASH MANAGEMENT INITIATIVES

While the Department of the Treasury has been in the business of managing the Government's money for approximately 200 years, only recently has it become obvious that cash management is a critical element in department and agency activities. In the l970's and 1980's to date, sustained high-interest rates meant that the opportunity cost became sufficiently high to justify the expense of managing cash. Also, the birth and rapid growth of the coupling of highspeed data processing capabilities with telecommunications has given cash managers more opportunities to monitor and control funds flow.

The history of federal cash management is charted on the following page. Cash management studies, legislation, new procedures, and additional Treasury personnel resources are all contributing to the evolution of cash management in the Federal Government. Below are short explanations of the items chronologically arranged on the chart.

Treasury General Accounts (TGA).--"Flow-through" accounts for Government collections and payments at 700 financial institutions. Funds are transferred every day to respective Federal Reserve banks.

Treasury Tax and Loan System (TT\&L). --Treasury collects Government receipts through over 14,000 depositary financial institutions located throughout the country.

Letter of Credit (LOC). --Method of disbursing funds on a drawdown basis over a period of time. This method permits Treasury to retain interest-bearing funds until needed by the recipient.

Banking and Cash Management ( $B C M$ ). --Division was established within Treasury's Bureau of Government Financial Operations.

Joint Financial Management Improvement Program (JFMIP).--Conducted a study which looked at cash management problems and identified possible solutions.

Treasury Financial Manual (TFM CH8000). --Incorporated a new section dealing with cash management.

President's Reorganization Project (PRP).--Assisted in internal reviews of cash management practices conducted by Federal agencies.

Financial Management Integrity Act. --Places the implementation and maintenance responsibilities of adequate internal control systems with agency heads and requires them to evaluate and report to the President and Congress on the adequacy of the systems of internal accounting and administrative control.

Reform '88. - A 6 -year effort to make the Government run as efficiently as a "Fortune 500 " company. It is expected to save as much as $\$ 4.7$ billion by fiscal 1985 by improving cash management at 20 agencies.

Prompt Payment Act.--Requires Federal agencies to pay bills on time, neither early nor late, and allows claims for interest to be filed against the Federal Government due to late payments to vendors, contractors, and others.

Debt Collection Act.--Law which enables the Government to use many of the tools and techniques employed by the private sector to aid in the collection of delinquent debts and eliminates the disincentives that exist in the Government's debt collection process.

Grace Commission. --An 18 month, $\$ 75$ million study of Government overspending containing nearly 2,500 recommendations to reduce Federal spending. Numerous proposals from the study pertained to better cash management practices.

Treasury's Bureau of Government Financial Operacions/Federal Finance has lead agency responsibility for monftoring and reporting progress on Reform ' 88 cash management initiatives undertaken by 20 Federal departments and agencies. The overall goal of the project is to improve Government's payments and collections systems, with special attention being directed toward identifying additional applications for state-of-the-art technology and expanding the use of other mechanisms, such as lockboxes.

Agencies are providing monthly reports to Treasury on the status of appraximately 340 initiatives. For fiscal 1983, interest savings totaled $\$ 176$ million while acceleration/deferral amounts totaled $\$ 879$ million.
projected and actual figures for fiscal 1984 for each of the participating agencies are shown below.

Fiscal I 984 Interest Savings and Acceleration/0eferral Figures*

[^10]"CashMan" is the abbreviated term used to describe Treasury's cash management monitoring system which tracks agency initiatives under Reform '88. This monitoring tool is needed to help both the agencies and Treasury track initiatives and keep them on target. Each month 20 agencies submit information regarding the status of their cash management initiatives.

The following table shows the status, as of June 30, 1984, of the 338 agency initiatives. "Green" represents an initiative which is on target, "yellow" means the initiative has minor difficulties, and "red" indicates an initiative which has run into major difficulties.

| Status | Number of initiatives | Percent of total | Number of new initiatives |
| :---: | :---: | :---: | :---: |
| Green....................... | 80 | 23.7 | 27 |

| Red. . . . . . . . . . . . . . . . . . | 4 | 1.2 | - |
| Terminated................. | 9 | 2.7 | - |
| Completed.................. | 185 | 54.7 | 11 |
| Total................... | 338 | 100.0 | 40 |

## Current Value of Funds and Renegotiation Board Rates

Treasury's current value of funds rate (CVFR) is used (1) to assess late fees against those who have debts outstanding with the Federal Government that have not been paid by the specified due date and (2) to decide whether to take a purchase discount from a vendor. The rate is based on a 12 -month average of Treasury tax and loan investment rates and is referenced by the Debt Collection Act of 1982.

The Renegotiation Board rate is used to calculate the interest the Government owes for overdue payments to vendors, contractors, etc. The rate is based on the current private commercial rates of interest for new loans maturing in 5 years and is referenced by the Prompt Payment Act of 1982.

Historical data and current CVFR and Renegotiation 8oard rates are shown below.
