ELECTRONIC RETRIEVAL OF TREASURY BULLETIN STATISTICAL TABLES

In August 1986, for the first time, the following Treasury Bulletin international data tables will be provided electronically in the Financial Management Data Base Terminal Access System (TAS):

IFS-1	U.S. Reserve Assets
IFS-2	Selected U.S. Liabilities to Foreigners
CM-I-1	Total Liabilities by Type of Holder
CM-I-4	Total Liabilities by Type and Country
CM-II-1	Total Claims by Type
CM-II-3	Total Claims on Foreigners by Type and Country
CM-IV-1	Total Liabilities and Claims by Type
CM-IV-3	Total Liabilities by Type and Country
CM-IV-5	Total Claims by Type and Country
CM-V-1	Foreign Purchases and Sales of Long-Term Domestic Securities by Type
CM-V-3	Net Foreign Transactions in Long-Term Domestic Securities by Type and Country
CM-V-4	Foreign Purchases and Sales of Long-Term Securities, by Type and Country

Electronic publishing provides the most current data available and does away with the timelag in paper dissemination. In the financial environment, only a short delay in obtaining current data can mean a loss of hundreds of thousands of dollars--time is money!

The TAS is an easily accessible, user-friendly, menu-driven system and can be accessed by those who know nothing about computers. Users may also access all volumes of the Treasury Financial Manual, GAO Title 2, the Federal Account Symbols and Titles book, financial reports such as the Daily Treasury Statement, Monthly Treasury Statement, and Treasury Reporting Rates of Exchange. Soon, OMB circulars and OPM payroll regulations will be added, as well as online draft review of new regulations. The TAS makes research easy--related financial and accounting data are contained in one central system.

There is an annual subscription rate to pay for actual connect hours to the vendor of this system, Proprietary Computer Systems, Inc., as follows:

Government rates:	200 connect hours - \$6,400
	100 connect hours - 3,900
	50 connect hours - 2,340
	25 connect hours - 1,500
Commercial rates:	200 connect hours - \$10,000
	100 connect hours - 6,100
	50 connect hours - 3,660
	25 connect hours - 2,345

(Treasury has absorbed all costs except the actual connect time used.)

Financial Operations

CHANGES IN REPORTING

With this issue, tables in the "Federal Fiscal Operations" and "Federal Debt" sections reflect changes in reporting mandated by the Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99-177). All former off-budget entities are now presented as on-budget. Federal Financing Bank (FFB) figures have been combined with totals of agencies that use the FFB to finance their programs. Additionally, two social security trust funds, Federal old-age and survivors insurance and Federal disability insurance, have been moved off-budget. Historical data, with some exceptions, have been adjusted accordingly in the affected tables.

FEDERAL OBLIGATIONS

"Obligations" are the basis on which the use of funds is controlled in the Federal Government. They are recorded at the point at which the Government makes a firm commitment to acquire goods or services and are the first of the four key events—order, delivery, payment, and consumption—which characterize the acquisition and use of resources. In general, they consist of orders placed, contracts awarded, services received, and similar transactions requiring the disbursement of money.

The obligational stage of Government transactions is a strategic point in gauging the impact of the Government's operations on the national economy, since it frequently represents for business firms the Government commitment which stimulates business investment, including inventory purchases and employment of labor. Disbursements may not occur for months after the Government places its order, but the order itself usually causes immediate pressure on the private economy.

Obligations are classified according to a uniform set of categories based upon the nature of the transaction without regard to its ultimate purpose. All payments for salaries and wages, for example, are reported as personnel compensation, whether the personal services are used in current operations or in the construction of capital items.

Federal agencies often do business with one another; in doing so, the "buying" agency records obligations, and the "performing" agency records reimbursements. In table FO-1, obligations incurred within the Government are distinguished from those incurred outside the Government. Table FO-2 shows only those incurred outside.

ACCOUNT OF THE U.S. TREASURY

SOURCE AND AVAILABILITY OF THE BALANCE IN THE ACCOUNT OF THE U.S. TREASURY

The operating cash of the Treasury is maintained in Treasury's accounts with the Federal Reserve banks and branches and in tax and loan accounts. Major information sources include the Daily Balance Wire received from the Federal Reserve banks and branches, and electronic transfers through the Treasury Financial Communications System. As the balances in the accounts at the Federal Reserve banks become depleted, they are restored by calling in (withdrawing) funds from thousands of financial institutions throughout the country authorized to maintain tax and loan accounts.

Under authority of Public Law 95-147, the Treasury implemented a program on Nov. 2, 1978, to invest a portion of its operating cash in obligations of depositaries maintaining tax and loan accounts. Under the Treasury tax and loan investment program, depositary financial institutions select the manner in which they will participate in the program. Depositaries that wish to retain funds deposited in their tax and loan accounts in interest-bearing obligations participate under the Note Option; depositaries that wish to remit the funds to the Treasury's account at Federal Reserve banks participate under the Remittance Option.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all financial institutions whereby customers of financial institutions deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of funds from a customer's account to the tax and loan account in the same financial institution. On occasions, to the extent authorized by the Treasury, financial institutions are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the accounts of their customers.

The tax and loan system permits the Treasury to collect funds through financial institutions and to leave the funds in Note Option depositaries and in the financial communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuation operations on Note Option financial institution reserves and the economy.

TREASURY FINANCING OPERATIONS, JANUARY-MARCH 1986

J A N U A R Y

Auction of 2-Year Notes

On January 15 the Treasury announced that it would auction \$9,500 million of 2-year notes to refund \$8,632 million of notes maturing January 31, 1986, and to raise about \$875 million new cash. The notes offered were Treasury Notes of Series V-1986, dated January 31, 1986, due January 31, 1988, with interest payable on July 31 and January 31 until maturity. An interest rate of 8-1/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EST, January 22, and totaled \$29,258 million, of which \$9,517 million was accepted at yields ranging from 8.16 percent, price 99.937, up to 8.17 percent, price 99.918. Tenders at the high yield were allotted 77 percent. Noncompetitive tenders were accepted in full at the average yield, 8.17 percent, price 99.918. These totaled \$947 million. Competitive tenders accepted from private investors totaled \$8,570 million.

In addition to the \$9,517 million of tenders accepted in the auction

process, \$305 million was awarded at the average price to Federal Reserve banks as agents for foreign and international monetary authorities. An additional \$596 million was accepted at the average price from Government accounts and Federal Reserve banks for their own account.

52-Week Bills

On January 10 tenders were invited for approximately \$9,000 million of 364-day Treasury bills to be dated January 23, 1986, and to mature January 22, 1987. The issue was to refund \$8,556 million of 52-week bills maturing January 23. Tenders were opened on January 16. They totaled \$25,293 million, of which \$9,033 million was accepted, including \$698 million of noncompetitive tenders from the public and \$1,700 million of the bills issued at the average price to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. An additional \$130 million was issued to Federal Reserve banks as agents for foreign and international monetary authorities for new cash. The average bank discount rate was 7.31 percent.

February Quarterly Financing

On January 29 the Treasury announced that it would sell to the public at auction, under competitive and noncompetitive bidding, up to \$9,000 million of 3-year notes of Series Q-1989, \$7,000 million of 10-year notes of Series A-1996, \$1,000 million of 10-year foreign-targeted notes of Series B-1996, and \$7,000 million of 30-year bonds of 2016 to refund \$9,818 million of publicly held Treasury securities maturing February 15 and to raise \$13,200 million new cash.

An interest rate of 8 percent was set on the notes of Series Q-1989 after the determination as to which tenders were accepted on a yield auction basis. The notes of Series Q-1989 were dated February 18, 1986, due February 15, 1989, with interest payable on August 15 and February 15 until maturity.

Tenders for the notes of Series Q-1989 were received until 1 p.m. EST, February 4, and totaled \$18,693 million, of which \$9,005 million was accepted at yields ranging from 8.07 percent, price 99.817, up to 8.14 percent, price 99.635. Tenders at the high yield were allotted 92 percent. Noncompetitive tenders were accepted in full at the average yield, 8.11 percent, price 99.713. These totaled \$807 million. Competitive tenders accepted from private investors totaled \$8,198 million.

In addition to the \$9,005 million of tenders accepted in the auction process, \$322 million was accepted at the average price from Federal Reserve banks as agents for foreign and international monetary authorities, and \$886 million was accepted at the average price from Government accounts and Federal Reserve banks for their own account.

An interest rate of 8-7/8 percent was set on the notes of Series A-1996 after the determination as to which tenders were accepted on a yield auction basis. The notes of Series A-1996 were dated February 15, 1986, and issued February 18, 1986, with interest payable on August 15 and February 15 until maturity on February 15, 1996. Because the issue was backdated to February 15, accrued interest determined in the auction of \$0.73550 per \$1,000 (covering the period from February 15 to February 18) was payable by purchasers of the notes.

Tenders for the notes of Series A-1996 were received until 1 p.m. EST, February 5, and totaled \$15,765 million, of which \$7,013 million was accepted at yields ranging from 8.94 percent, price 99.573, up to 8.99 percent, price 99.249. Tenders at the high yield were allotted 76 percent. Noncompetitive tenders were accepted in full at the average yield, 8.97 percent, price 99.379. These totaled \$453 million. Competitive tenders accepted from private investors totaled \$6,560 million.

In addition to the \$7,013 million of tenders accepted in the auction process, \$200 million was awarded at the average price to Federal Reserve banks as agents for foreign and international monetary authorities. An additional \$350 million was accepted at the average price from Government accounts and Federal Reserve banks for their own account.

The notes of Series A-1996 may be held in STRIPS form. The minimum par amount required is \$1,600,000.

The foreign-targeted notes were Treasury Notes of Series B-1996, dated February 15, 1986, and issued February 18, 1986, with interest payable on February 15 in each year until maturity on February 15, 1996. The foreign-targeted notes were sold, under competitive bidding only, to foreign institutions or to foreign branches of U.S. financial institutions. The notes were issued in book-entry form and were eligible for exchange into registered notes of the companion domestic issue, Series A-1996, or for conversion into registered foreign-targeted notes after March 22, 1986.

Tenders for the foreign-targeted notes were received until 1 p.m. EST, February 5, at the Federal Reserve Bank of New York, and totaled \$1,585 million, of which \$1,001 million was accepted. The interest rate of 8-7/8 percent was established in the auction of the companion domestic issue. Accepted yields, based on an annual interest payment, ranged from 9.04 percent, price 98.940, up to 9.16 percent, price 98.182. Tenders at the high yield were allotted 40 percent. The average yield of the accepted competitive tenders was 9.12 percent, price 98.434, equivalent to 8.92 percent on a semiannual payment basis. Noncompetitive tenders were not accepted. Because the issue was backdated to February 15, accrued interest of \$0.73958 per \$1,000 (covering the period from February 15 to February 18) was payable by purchasers of the notes.

An interest rate of 9-1/4 percent was set on the bonds of 2016 after the determination as to which tenders were accepted on a yield auction basis. The

bonds of 2016 were dated February 15, 1986, and issued February 18, 1986, with interest payable on August 15 and February 15 until maturity on February 15, 2016. Because the issue was backdated to February 15, accrued interest determined in the auction of \$0.76657 per \$1,000 (covering the period from February 15 to February 18) was payable by purchasers of the bonds.

Tenders for the bonds were received until 1 p.m. EST, February 6, and totaled \$17,776 million, of which \$7,004 million was accepted at yields ranging from 9.27 percent, price 99.795, up to 9.29 percent, price 99.594. Tenders at the high yield were allotted 47 percent. Noncompetitive tenders were accepted in full at the average yield, 9.28 percent, price 99.695. These totaled \$331 million. Competitive tenders accepted from private investors totaled \$6,673 million.

In addition to the \$7,004 million of tenders accepted in the auction process, \$250 million was accepted at the average price from Government accounts and Federal Reserve banks for their own account.

The bonds may be held in STRIPS form. The minimum par amount required is \$800,000.

Auction of 2-Year Notes

On February 12 the Treasury announced that it would auction \$9,500 million of 2-year notes to refund \$8,479 million of publicly held notes maturing February 28, 1986, and to raise about \$1,025 million new cash. The notes offered were Treasury Notes of Series W-1988, dated February 28, 1986, due February 29, 1988, with interest payable on the last day of August and February until maturity. An interest rate of 8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EST, February 19, and totaled \$22,319 million, of which \$9,530 million was accepted at yields ranging from 7.99 percent, price 100.018, up to 8.03 percent, price 99.946. Tenders at the high yield were allotted 100 percent. Noncompetitive tenders were accepted in full at the average yield, 8.02 percent, price 99.964. These totaled \$826 million. Competitive tenders accepted from private investors totaled \$8,704 million.

In addition to the \$9,530 million of tenders accepted in the auction process, \$375 million was accepted at the average price from Federal Reserve banks as agents for foreign and international monetary authorities, and \$662 million was accepted at the average price from Government accounts and Federal Reserve banks for their own account.

Auction of 5-Year 2-Month Notes

On February 18 the Treasury announced that it would auction \$7,500 million of 5-year 2-month notes to raise new cash. The notes offered were Treasury Notes of Series J-1991, dated March 5, 1986, due May 15, 1991, with interest payable on November 15 and May 15 until maturity. An interest rate of 8-1/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EST, February 26, and totaled \$19,156 million, of which \$7,520 million was accepted at yields ranging from 8.10 percent, price 100.043, up to 8.13 percent, price 99.918. Tenders at the high yield were allotted 43 percent. Noncompetitive tenders were accepted in full at the average yield, 8.12 percent, price 99.960. These totaled \$450 million. Competitive tenders accepted from private investors totaled \$7,070 million.

52-Week Bills

On February 7 tenders were invited for approximately \$9,000 million of 364-day Treasury bills to be dated February 20, 1986, and to mature February 19, 1987. The issue was to refund \$8,525 million of 52-week bills maturing February 20 and to raise about \$475 million new cash. Tenders were opened on February 13. They totaled \$23,671 million, of which \$9,003 million was accepted, including \$579 million of noncompetitive tenders from the public and \$2,375 million of the bills issued at the average price to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. An additional \$130 million was issued to Federal Reserve banks as agents for foreign and international monetary authorities for new cash. The average bank discount rate was 7.19 percent.

TREASURY FINANCING OPERATIONS, JANUARY-MARCH 1986

MARCH

Auction of 2-Year Notes

On March 12 the Treasury announced that it would auction \$9,500 million of 2-year notes to refund \$8,348 million of publicly held notes maturing March 31, 1986, and to raise about \$1,150 million new cash. The notes offered were Treasury Notes of Series X-1988, dated March 31, 1986, due March 31, 1988, with interest payable on September 30 and March 31 until maturity. An interest rate of 7-1/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EST, March 19, and totaled \$21,821 million, of which \$9,502 million was accepted at yields ranging from 7.17 percent, price 99.918, up to 7.21 percent, price 99.844. Tenders at the high yield were allotted 25 percent. Noncompetitive tenders were accepted in full at the average yield, 7.19 percent, price 99.881. These totaled \$773 million. Competitive tenders accepted from private investors totaled \$8,729 million.

In addition to the \$9,502 million of tenders accepted in the auction process, \$305 million was accepted at the average price from Federal Reserve banks as agents for foreign and international monetary authorities, and \$1,000 million was accepted at the average price from Government accounts and Federal Reserve banks for their own account.

Auction of 4-Year and 7-Year Notes

On March 18 the Treasury announced that it would sell to the public at auction, under competitive and noncompetitive bidding, up to \$7,000 million of 4-year notes of Series N-1990 and \$6,500 million of 7-year notes of Series F-1993 to refund \$3,746 million of publicly held 4-year notes maturing March 31 and to raise about \$9,750 million new cash.

The Treasury announced that it would not offer the 20-year 1-month bond usually issued in the same offering with the 4-year and 7-year notes. The remaining \$8.4 billion of bond-issuing authority was not enough to allow for the issue of both the 20-year 1-month bond and the 30-year bond scheduled for issue as part of the May quarterly financing. Accordingly, the Department decided to preserve its remaining authority for the 30-year bond.

An interest rate of 7-1/4 percent was set on the notes of Series N-1990 after the determination as to which tenders were accepted on a yield auction basis. The notes of Series N-1990 were dated March 31, 1986, due March 31, 1990, with interest payable on September 30 and March 31 until maturity.

Tenders for the notes of Series N-1990 were received until 1 p.m. EST, March 25, and totaled \$26,754 million, of which \$7,040 million was accepted at 7.29 percent, price 99.863, which represented the full range of accepted bids. Competitive tenders at 7.29 percent were allotted 75 percent. Non-

competitive tenders were accepted in full at the average yield, 7.29 percent, price 99.863. These totaled \$447 million. Competitive tenders accepted from private investors totaled \$6,593 million.

In addition to the \$7,040 million of tenders accepted in the auction process, \$465 million was accepted at the average price from Federal Reserve banks as agents for foreign and international monetary authorities, and \$458 million was accepted at the average price from Government accounts and Federal Reserve banks for their own account.

An interest rate of 7-3/8 percent was set on the notes of Series F-1993 after the determination as to which tenders were accepted on a yield auction basis. The notes of Series F-1993 were dated April 3, 1986, due April 15, 1993, with interest payable on October 15 and April 15 until maturity.

Tenders for the notes of Series F-1993 were received until 1 p.m. EST, March 26, and totaled \$15,996 million, of which \$6,505 million was accepted at yields ranging from 7.44 percent, price 99.640, up to 7.50 percent, price 99.318. Tenders at the high yield were allotted 59 percent. Noncompetitive tenders were accepted in full at the average yield, 7.48 percent, price 99.425. These totaled \$314 million. Competitive tenders accepted from private investors totaled \$6,191 million.

52-Week Bills

On March 7 tenders were invited for approximately \$9,000 million of 364-day Treasury bills to be dated March 20, 1986, and to mature March 19, 1987. The issue was to refund \$8,529 million of 52-week bills maturing March 20 and to raise about \$475 million new cash. Tenders were opened on March 14. They totaled \$22,499 million, of which \$9,014 million was accepted, including \$549 million of noncompetitive tenders from the public and \$2,450 million of the bills issued at the average price to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. An additional \$200 million was issued to Federal Reserve banks as agents for foreign and international monetary authorities for new cash. The average bank discount rate was 6.61 percent.

Cash Management Bills

On March 27 tenders were invited for approximately \$15,000 million of 14-day bills to be issued April 3, 1986, representing an additional amount of bills dated April 18, 1985, maturing April 17, 1986. The issue was to raise new cash. Tenders were opened on April 1. They totaled \$62,801 million, of which \$15,030 million was accepted. The average bank discount rate was 7.22 percent.

U.S. SAVINGS BONDS AND NOTES

Series EE bonds, on sale since Jan. 1, 1980, are the only savings bonds currently sold. Series HH bonds are issued in exchange for series E and EE savings bonds and savings notes. Series A-D were sold from Mar. 1, 1935, through Apr. 30, 1941. Series E was on sale from May 1, 1941, through Dec. 31, 1979 (through June 1980 to payroll savers only). Series F and G were sold from May 1, 1941, through Apr. 30, 1952. Series H was sold from June 1, 1952, through Dec. 31, 1979. Series HH bonds were sold for cash from Jan. 1, 1980, through Oct. 31, 1982. Series J and K were sold from May 1, 1952, through Apr. 30, 1957.

U.S. savings notes were on sale May 1, 1967, through June 30, 1970. The notes were eligible for purchase by individuals with the simultaneous purchase of series E savings bonds. The principal terms and conditions for purchase and redemption and information on investment yields of savings notes appear in the Treasury Bulletins of March 1967 and June 1968; and the Annual Report of the Secretary of the Treasury for fiscal year 1974.

1/ Treasury series is the 20-year constant maturity rate read from daily Treasury yield curves and averaged for the month.

2/ Treasury series based on 3-week moving average of reoffering yields of new corporate bonds rated Aa by Moody's Investors Service and having an original maturity of at least 20 years. Prior to June 1973, this series reflected bonds without call protection. From June 1973 to July 1976, the

series was adjusted to reflect 5 years call protection. Since that time, the series reflects bond yields regardless of the call protection offered.

3/ Index of new reoffering yields on 20-year general obligations rated Aa by Moody's Investors Service. Prior to June 1970, the series was compiled by Securities Industries Association. Since then, the series has been compiled by Treasury.

INTERNATIONAL FINANCIAL STATISTICS

The tables in this section are designed to provide data on U.S. reserve assets and liabilities and other statistics related to the U.S. balance of payments and international financial position.

Table IFS-1 shows the reserve assets of the United States, including its gold stock, special drawing rights held in the Special Drawing Account in the International Monetary Fund, holdings of convertible foreign currencies, and reserve position in the International Monetary Fund.

Table IFS-2 brings together statistics on liabilities to foreign official institutions, and selected liabilities to all other foreigners, which are used in the U.S. balance of payments statistics.

Table IFS-3 shows U.S. Treasury nonmarketable bonds and notes issued to official institutions and other residents of foreign countries.

Table IFS-4 presents a measure of weighted-average changes in exchange rates between the U.S. dollar and the currencies of certain other countries.

1/ Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing right (SDR) based on a weighted-average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and reserve position in the IMF are also valued on this basis beginning July 1974.

2/ Includes gold held by the Exchange Stabilization Fund.

3/ Treasury values its gold stock at \$42.2222 per fine troy ounce and pursuant to 31 U.S.C. 5117(b) issues gold certificates to the Federal Reserve at the same rate against all gold held.

4/ Includes allocations of SDR's in the Special Drawing Account in the International Monetary Fund, plus or minus transactions in SDR's.

Allocations of SDR's on Jan. 1 of respective years are as follows: 1970, 867 million; 1971, 717 million; 1972, 710 million; 1979, 874 million (in SDR terms); 1980, 874 million (in SDR terms); and 1981, 857 million (in SDR terms).

5/ Includes holdings of Treasury and Federal Reserve System; beginning November 1978, these are valued at current market exchange rates or, where appropriate, as such other rates as may be agreed upon by the parties to the transactions.

6/ The United States has the right to purchase foreign currencies equivalent to its reserve position in the Fund automatically if needed. Under appropriate conditions the United States could purchase additional amounts related to the U.S. quota.

2/ Derived by applying reported transactions to benchmark data.

3/ Includes debt securities of U.S. Government corporations, federally sponsored agencies, and private corporations.

4/ Includes liabilities payable in dollars to foreign banks, and liabilities payable in foreign currencies to foreign banks and to "other foreigners."

5/ Includes marketable U.S. Government bonds and notes held by foreign banks.

6/ Includes nonmarketable U.S. Government bonds and notes held by foreign banks.

7/ Principally the International Bank for Reconstruction and Development, the Inter-American Development Bank, and the Asian Development Bank.

Note.—Table is based on Treasury Department data and on data reported to the Treasury Department by banks and brokers in the United States.

Data correspond generally to statistics following in this section and in the "Capital Movements" section, except for the inclusion of investments by foreign official reserve agencies in debt securities of U.S. federally sponsored agencies and U.S. corporations. Table excludes International Monetary Fund "holdings of dollars" and holdings of U.S. Treasury letters of credit and nonnegotiable noninterest-bearing special U.S. notes held by other international and regional organizations.

1/ This table presents calculations of weighted average percentage changes in the rates of exchange between the dollar and certain foreign currencies, in order to provide a measure of changes in the dollar's general foreign exchange value broader than a measure provided by any single exchange rate change. Calculations are provided for two sets of countries that account for a major share of U.S. foreign trade. U.S. bilateral trade patterns in 1972 are used as a convenient, readily available proxy for the assignment of relative weights to individual exchange rate changes, although such weights do not provide a full measure of individual currencies' relative importance in U.S. international transactions because they take no account of factors other than trade. The calculations do not purport to represent a guide to measuring the impact of exchange rate changes on U.S. international transactions.

Exchange rate data used in constructing the indices reported here differ somewhat from those used in earlier calculations to more accurately reflect end-of-period currency values.

The equations used are as follows:

Equation one is used to calculate a trade-weighted average of changes in the dollar cost of foreign currencies:

$$(EQ1) E_m = \sum (\Delta S / f c_i * M_i / \Sigma M)$$

Where: E_m is the weighted average of percentage changes in the dollar cost of individual foreign currencies;

$\Delta S / f c_i$ is the percent change in the dollar cost of foreign currency i ; and

$M_i / \Sigma M$ is U.S. imports from country i , as a proportion of total U.S. imports from all countries in the set.

Equation two is used to calculate a trade-weighted average of changes in the foreign exchange cost of dollars:

$$(EQ2) E_x = \sum (\Delta f c_i / \$ * X_i / \Sigma X)$$

Where: E_x is the weighted average of percentage changes in the foreign currency cost of dollars;

$\Delta f c_i / \$$ is the percent change in the foreign currency i cost of dollars; and

$X_i / \Sigma X$ is U.S. exports to country i , as a proportion of total U.S. exports to all countries in the set.

Equation three combines the above export-weighted and import-weighted averages to provide an overall measure of exchange rate change:

$$(EQ3) E = [(E_m * m / m+x) * (-1)] + [E_x * x / m+x]$$

Where: $m / m+x$ is U.S. imports as a proportion of its total trade with all countries in the set; and

$x / m+x$ is U.S. exports as a proportion of its total trade with all countries in the set.

2/ Australia, Austria, Belgium-Luxembourg, Canada, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, and United Kingdom.

3/ The currencies of 46 IMF member countries which account for approximately 90 percent of U.S. total trade.

CAPITAL MOVEMENTS

INTRODUCTION

Background

Data relating to capital movements between the United States and foreign countries have been collected in some form since 1935. Reports are filed with district Federal Reserve banks by commercial banks, thrift institutions, bank holding companies, securities brokers and dealers, and nonbanking enterprises in the United States. Statistics on the principal types of data by country or geographical area are then consolidated and are published in the Treasury Bulletin.

The reporting forms and instructions^{1/} used in the Treasury International Capital (TIC) Reporting System have been revised a number of times to meet changing conditions and to increase the usefulness of the published statistics. The most recent, general revision of the report forms became effective with the banking reports as of April 30, 1978, and with the nonbanking reports as of December 31, 1978. Revised forms and instructions are developed with the cooperation of other Government agencies and the Federal Reserve System and in consultations with representatives of banks, securities firms, and nonbanking enterprises.

Basic Definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including U.S. citizens domiciled abroad, and the foreign branches, subsidiaries, and other affiliates abroad of U.S. banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located. The term "foreigner" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled, as shown on the records of reporting institutions. For a number of reasons, the geographical breakdown of the reported data may not in all cases reflect the ultimate ownership of the assets. Reporting institutions are not expected to go beyond the addresses shown on their records, and so may not be aware of the country of domicile of the ultimate beneficiary. Furthermore, U.S. liabilities arising from deposits of dollars with foreign banks are reported in the Treasury statistics as liabilities to foreign banks, whereas the liability of the foreign bank receiving the deposit may be to foreign official institutions or to residents of another country.

Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the appropriate international or regional classification except for the Bank for International Settlements which is included in the classification "Other Europe."

Reporting Coverage

Reports are required from banks, bank holding companies, International Banking Facilities (IBF's), savings and loan and other thrift institutions, securities brokers and dealers, and nonbanking enterprises in the United States, including the branches, agencies, subsidiaries, and other affiliates in the United States of foreign banking and nonbanking firms. Entities that have reportable liabilities, claims, or securities transactions below specified exemption levels are exempt from reporting.

Banks, thrift institutions, and some brokers and dealers file monthly reports covering their dollar liabilities to, and dollar claims on, foreigners in a number of countries. Twice a year, as of June 30 and December 31, they also report the same liabilities and claims items with respect to foreigners in countries not shown separately on the monthly reports. Quarterly reports are filed with respect to liabilities and claims denominated in foreign currencies vis-a-vis foreigners. Effective January 31, 1984, the specified exemption level applicable to the monthly and quarterly banking reports was raised from \$10 million to \$15 million. There is no separate exemption level for the semiannual reports.

Banks, securities brokers and dealers, and in some instances nonbanking enterprises report monthly their transactions in securities with foreigners; the applicable exemption level is \$500,000 on the grand total of purchases and on the grand total of sales during the month covered by the report.

Quarterly reports are filed by exporters, importers, industrial and commercial concerns, financial institutions other than banks, thrift institutions and brokers, and other nonbanking enterprises if their liabilities to, or claims on, unaffiliated foreigners exceed a specified exemption level on a two quarter-end average basis. Effective March 31, 1982, this exemption level was set at \$10 million, up from \$2 million. Nonbanking enterprises also report for each month their U.S. dollar-denominated deposit and certificates of deposit claims of \$10 million or more on banks abroad.

Description of Statistics

Section I presents data on liabilities to foreigners reported by banks, thrift institutions, brokers, and dealers in the United States. Beginning April 1978, the following major changes were made in the reporting coverage:

Amounts due to banks' own foreign offices are reported separately; a previous distinction between short-term and long-term liabilities was eliminated; a separation was provided of the liabilities of the respondents themselves from their custody liabilities to foreigners; and foreign currency liabilities are only available quarterly. Also, beginning April 1978, the data on liabilities were made more complete by extending to securities brokers and dealers the requirement to report certain of their own liabilities and all of their custody liabilities to foreigners. Effective as of January 31, 1985, savings and loan associations and other thrift institutions began to file the TIC banking forms. Previously they had reported on TIC forms for nonbanking enterprises.

Section II presents the claims on foreigners reported by banks in the United States. Beginning with data reported as of the end of April 1978, a distinction was made between banks' claims held for their own account and claims held for their domestic customers. The former are available in a monthly series whereas the latter data are collected on a quarterly basis only. Also, the distinction in reporting of long-term and short-term components of banks' claims was discontinued. Maturity data began to be collected quarterly on a time remaining to maturity basis as opposed to the historic original maturity classification. Foreign currency claims are also collected on a quarterly basis only. Beginning March 1981, this claims coverage was extended to certain items in the hands of brokers and dealers in the United States. See notes to section I above concerning the reporting of thrift institutions.

Another important change in the claims reporting, beginning with new quarterly data as of June 30, 1978, was the adoption of a broadened concept of "foreign public borrower," which replaced the previous category of "foreign official institution" to produce more meaningful information on lending to the public sector of foreign countries. The term "foreign public borrower" encompasses central governments and departments of central governments of foreign countries and of their possessions; foreign central banks, stabilization funds, and exchange authorities; corporations and other agencies of central governments, including development banks, development institutions, and other agencies which are majority-owned by the central government or its departments; State, provincial, and local governments of foreign countries and their departments and agencies; and any international or regional organization or subordinate or affiliated agency thereof, created by treaty or convention between sovereign states.

Section III includes supplementary statistics on U.S. banks' liabilities to, and claims on, foreigners. The supplementary data on banks' loans and credits to nonbank foreigners combine selected information from the TIC reports with data from the monthly Federal Reserve 2502 reports submitted for major foreign branches of U.S. banks. Other supplementary data on U.S. banks' dollar liabilities to, and banks' own dollar claims on, countries not regularly reported separately are available semiannually in the May and November issues of the Treasury Bulletin.

Section IV shows the liabilities to, and claims on, unaffiliated foreigners by exporters, importers, industrial and commercial concerns, financial institutions other than banks, thrift institutions, brokers, and other nonbanking enterprises in the United States. The data exclude the intercompany accounts of nonbanking enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. (Such transactions are reported by business enterprises to the Department of Commerce on its direct investment forms.) The data also exclude claims held through banks in the United States. Beginning with data reported as of December 31, 1978, financial liabilities and claims of reporting enterprises are distinct from their commercial liabilities and claims; and items are collected on a time remaining to maturity basis instead of the original maturity basis used previously.

Section V contains data on transactions in all types of long-term domestic and foreign securities by foreigners as reported by banks and brokers in the United States (except nonmarketable U.S. Treasury notes, foreign series; and nonmarketable U.S. Treasury bonds and notes, foreign currency series, which are shown in the "International Financial Statistics" section, table IFS-3). The data cover new issues of securities, transactions in outstanding issues, and redemptions of securities. They include transactions executed in the United States for the account of foreigners, and transactions executed abroad for the account of reporting institutions and their domestic customers. The data include some transactions which are classified as direct investments in the balance of payments accounts. Also, see notes for section I above concerning the reporting of thrift institutions.

The geographical breakdown of the data on securities transactions shows the country of domicile of the foreign buyers and sellers of the securities; in the case of outstanding issues, this may differ from the country of the original issuer. The gross figures contain some offsetting transactions between foreigners. The net figures for total transactions represent transactions by foreigners with U.S. residents; but the net figures for transactions of individual countries and areas may include some transactions between foreigners of different countries.

The data published in these sections do not cover all types of reported capital movements between the United States and foreign countries. The principal exclusions are the intercompany capital transactions of nonbanking business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies, and capital transactions of the U.S. Government. Consolidated data on all types of international capital transactions are published by the Department of Commerce in its regular reports on the U.S. balance of payments.

^{1/} Copies of the reporting forms and instructions may be obtained from the Office of Data Management, Office of the Assistant Secretary for International Affairs, Department of the Treasury, Washington, D.C. 20220, or from district Federal Reserve banks.

FOREIGN CURRENCY POSITIONS

INTRODUCTION

Background

Data have been collected since 1974 on the foreign currency positions of banks and nonbanking firms in the United States, and on those of foreign branches, majority-owned foreign partnerships, and majority-owned foreign subsidiaries of U.S. banks and nonbanking firms. Reports cover five major foreign exchange market currencies and U.S. dollars held abroad. Reporting has been required pursuant to title II of Public Law 93-110, an amendment to the Par Value Modification Act of September 21, 1973, and implementing Treasury regulations. Statistics on the positions have been published since March 1977 beginning with data for December 1975.

The report forms and instructions used in the collection of bank data were revised effective with reports as of March 16, 1983, for the weekly reports. The most recent revision of the nonbank foreign currency forms (see below) became effective as of the last business day of March 1983.

Common Definitions and Concepts

The term "United States" means the States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, Midway Island, the Virgin Islands, and Wake Island. The term "foreign" means locations other than the "United States." The term "worldwide" is used to describe the sum of "United States" and "foreign" data.

Data for the United States include amounts reported by sole proprietorships, partnerships, and corporations in the United States including the U.S. branches and subsidiaries of foreign nonbanking concerns, in the case of "nonbanking firms' positions," and the agencies, branches, and subsidiaries located in the United States of foreign banks and banking institutions, in the case of the weekly "bank positions."

Data for "foreign branches" and "abroad" include amounts reported by the branches, majority-owned partnerships, and majority-owned subsidiaries of U.S. banking and nonbanking concerns. In general, these data do not reflect the positions of foreign parents or foreign parents' subsidiaries located abroad except through intercompany accounts. The data include the foreign subsidiaries of a few foreign-owned U.S.-based corporations.

Assets, liabilities, and foreign exchange contract data are reported on the basis of time remaining to maturity as of the date of the report, regardless of the original maturity of the instrument involved. "Spot" means due for receipt or delivery within 2 business days from the date of the report. "Short-term" means maturing in 1 year or less from the date of the report.

"Majority-owned foreign partnerships" are those organized under the laws of a foreign country in which one or more nonbanking concerns or nonprofit institutions in the United States, directly or indirectly, own more than 50 percent profit interest. "Majority-owned foreign subsidiaries" are foreign corporations in which one or more nonbanking business concerns or nonprofit institutions located in the United States, directly or indirectly, own stock with more than 50 percent of the total combined voting power of all classes of stock entitled to vote, or more than 50 percent of the total value of all classes of stock.

Reporting Threshold

The exemption level applicable to banks and banking institutions was \$10 million equivalent through January 1982, when it was raised to \$100 million. The exemption level applicable to nonbanking business concerns and nonprofit institutions was \$1 million equivalent on all nonbank forms from March 1975 through November 1976. It was raised to \$2 million equivalent on the monthly reports of positions held in the United States from November 1976 through September 1978. The exemption level was raised to \$3 million on foreign subsidiary positions on June 30, 1977, and for positions held in the United States on September 30, 1978. The exemption level for nonbanking firms was raised to \$100 million on positions in the United States in January 1982 and on foreign branch and subsidiaries positions in March 1982.

Firms must report their entire foreign currency position in a specified foreign currency if a specified U.S. dollar equivalent value is reached in any category of assets, liabilities, exchange contracts bought and sold, or the net position in the currency. In general, exemption levels are applied to the entire firm. In reports on their foreign branches, majority-owned foreign partnerships, and majority-owned foreign subsidiaries, U.S. banks and nonbanks are required to report the U.S. dollar-denominated assets, liabilities, exchange contracts bought and sold, and net positions of those branches, partnerships, and subsidiaries with reportable positions in the specified foreign currencies.

Description of Statistics

Data collected on the Treasury foreign currency forms are published in the Treasury Bulletin in seven sections. The first section presents a summary of worldwide net positions in all of the currencies reported. Sections II through VI each present data on a specified foreign currency. Section VII presents the U.S. dollar positions of the foreign branches and subsidiaries of U.S. firms which are required to report in one or more of the specified foreign currencies.

1/ Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing rights (SDRs) based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and allocations are valued on this basis beginning July 1974.

2/ Excludes foreign exchange transactions for future and spot delivery.

3/ A non-interest-bearing liability to the U.S. Treasury resulting from the transfer to the Exchange Stabilization Fund of foreign currencies drawn from the IMF by the United States.

4/ Represents an adjustment to retained earnings for income that was recorded in fiscal 1986 that had been earned in fiscal 1985.

Note.—Annual balance sheets for fiscal years 1934 through 1940 appear in the 1940 Annual Report of the Secretary of the Treasury and those for succeeding years appear in subsequent reports through 1980. Quarterly balance sheets beginning with Dec. 31, 1938, have been published in the Treasury Bulletin. Data from inception to Sept. 30, 1978, may be found on the statements published in the January 1979 Treasury Bulletin.

Cash Management/ Debt Collection

CASH MANAGEMENT INITIATIVES

Collection and Deposit Legislation Developments in Fiscal 1986

The Deficit Reduction Act, passed in 1984, put the Congress on record that the deficit is a major economic concern and under section 2652 (collection and deposit legislation), the Department of the Treasury was given the authority to:

- * Prescribe methods and timeframes for collecting and depositing monies,
- * Assess charges for noncompliance, and
- * Credit charges imposed to the cash management improvements fund.

Responsibility and authority under this legislation was delegated to the Commissioner, Financial Management Service, by Treasury's Fiscal Assistant Secretary. The legislation will allow the Service to promote and institutionalize cash management in all Federal agencies.

In order to implement this legislation, the Department of the Treasury issued a new part 206 to 31 C.F.R., chapter II, entitled "Management of Federal Agency Receipts and Operation of the Cash Management Improvements Fund." The effective date of the regulation was October 3, 1985; highlights of the regulation are as follows:

- * Reinforcement that the purpose of legislation is to promote and institutionalize effective cash management;
- * Billing by agencies is required within 5 days of services rendered, delivery of goods, or payment otherwise due;
- * Treasury's Financial Management Service may prescribe use of specific collection mechanisms by the agencies;
- * Agencies will achieve same-day deposit of monies except what noncost-justified;

* Periodic cash management reviews will be conducted by agencies to identify opportunities for improvement (a Cash Management Review Guide was developed by Treasury to assist agencies in identifying and implementing initiatives. The Review Guide was published as a supplement to I TFM 6-8000);

* As a last resort, if an agency does not implement a proven cost-beneficial initiative, Treasury has the authority to assess a charge against an agency's salary and expense appropriation in the amount determined to be the interest savings lost due to noncompliance;

* An appeals process is in place to ultimately resolve any conflicts between Treasury and an agency over issues of noncompliance;

* Any charges levied against an agency for noncompliance will be deposited into the cash management improvements fund maintained in Treasury's Trust and Revolving Funds Branch. These funds will be made available to agencies to promote new and innovative cash management mechanisms with potential Governmentwide applicability. Agencies were formally notified of the existence of the funds and procedures for applying for funding in a bulletin issued in January 1986.

As an outgrowth of a November 1985 cash management training seminar, additional sessions were held to train agency personnel more specifically on the requirements of the cash management review process. Several 1-day seminars were held in January and again in April 1986 to enhance agency knowledge on the benefits of the review process and the provisions of the collection and deposit legislation impacting upon the review process.

Reform '88 Cash Management

Treasury's Financial Management Service/Federal Finance has lead agency responsibility for monitoring and reporting progress on Reform '88 cash management initiatives undertaken by about 20 Federal departments and agencies. The overall goal of the project is to improve Government's payments and collections systems, with special attention being directed toward identifying additional application for state-of-the-art technology and expanding the use of other mechanisms, such as lockboxes, automated clearinghouses, and cash concentration systems.

Agencies are providing quarterly reports to Treasury on the status of approximately 515 initiatives. For fiscal years 1983, 1984, and 1985, interest savings totaled \$178 million, \$335 million, and \$837 million, respectively.

Interest savings for first-quarter fiscal 1986 and combined interest savings to date for each of the participating agencies are shown below.
