Financial Operations

BUDGET RESULTS FOR THE THIRD QUARTER, FISCAL 1986

Summary

The deficit for June was \$1 billion, off slightly, from the \$1.4 billion of June 1985 and substantially less than the pace of previous months in the current fiscal year. The deficit typically narrows or swings into surplus in June, a month when quarterly tax payments are due from both corporations and individuals. The cumulative deficit for the first 9 months of the fiscal year stands at \$166.8 billion, or a little wider than the \$162 billion for the comparable period of 1985.

Outlays (on- and off-budget) in June totaled \$78 billion, and receipts were \$77 billion, yielding a deficit of \$1 billion. As noted, deficits typically narrow (or shift to surplus) in June when receipts are boosted by quarterly tax payments by corporations and individuals. Deficits typically widen again in July and August (\$21.5 billion and \$27.5 billion, respectively, last year) before narrowing again in September when additional quarterly payments are due. (The deficit last September was \$3/4 billion.)

Year-over-year this June, receipts were up 6.8 percent. This figure was boosted by the fact that individual tax refund payments had been running slow during the early spring of last year so that catchup payments were being made in June, and this depressed the net receipts total for June 1985. Also some technical factors relating to the timing of revenue payments raised the year-to-year change.

In the context of projections made at the turn of the year and as contained in the budget released in February, individual and especially corporate revenue flows are running well under target. So far in the year total receipts are up only 4.6 percent from the fiscal 1985 total, rather than the budget

projection of 5.9 percent. The most substantial shortfall is in corporate income taxes, which were projected as increasing by 15-1/2 percent this year, but actually have only kept even with year-earlier figures. Shortfalls in receipts from projections of last winter reflect weaker economic activity than had been forecast at that time.

Spending levels for the first 9 months also contrast with the February budget targets. Through June, outlays, including agency spending and other categories, were ahead of the fiscal 1985 total by 4.2 percent, compared with the projected 3.6 percent for the year. Overruns are especially apparent in the Departments of Agriculture and Defense. Fiscal 1986 Agriculture spending so far has exceeded that of 1985 by 6.3 percent. For the final 3 months of the fiscal year, the agency would have to curtail its rate of spending by 30-1/2 percent to reach the goal set in February. Agriculture spending is up this year because of lower than projected loan repayments by financially strapped farmers to the Farmers Home Administration and also advance deficiency payments to farmers by the Commodity Credit Corporation. These latter payments were heavy in April and May and basically represent a shifting of spending into fiscal 1986 of funds originally budgeted for next year. Likewise, the Department of Defense must cut its spending level by 6.7 percent through September, to achieve the projected growth for the year of only 5.3 percent.

Of course, there are areas of underrun as well. Most notable among these is interest on the public debt, reflecting much lower interest rates than had been projected last February.

Second-quarter Receipts

The following capsule analysis of budget receipts, by source, for the second quarter of fiscal 1986 supplements fiscal data earlier reported in detail in the Spring issue of the Treasury Bulletin. At the time of that issue's release, not enough data was available to analyze adequately collections for the quarter. Future analyses of this kind will be published, unavoidably, with the same time lag.

Individual income taxes.--Individual income tax receipts for the period January through March 1986 were \$1.2 billion greater than receipts in the corresponding 1985 period. This increase in net receipts reflected an increase in withheld receipts of \$6.7 billion, and an increase in nonwithheld receipts of \$1.8 billion. These two increases were largely offset by an increase in refunds of \$7.3 billion. The large increase in refunds was due in part to a more timely processing of tax returns by the Internal Revenue Service as compared with the comparable 1985 period. The increase in withheld and nonwithheld receipts reflected an increase in both wage and nonwage income over January through March of 1985.

Corporation income taxes.--Net corporate tax receipts for January-March of 1986 were \$1.39 billion lower than for the same period in 1985. Although corporations' final payments of tax liabilities increased \$0.8 billion, estimated payments made by corporations decreased more than \$1.9 billion. This decline is at least partially due to slower growth in corporate profits. Refunds paid to corporations were \$284 million higher in the quarter than the previous year's quarter.

Employment taxes and contributions.--Second-quarter fiscal 1986 receipts were \$6 billion higher than the similar period in 1985. This largely reflects changes initiated in the Social Security Act of 1985 and adjustments for prior liabilities.

Unemployment insurance.--Unemployment insurance receipts totaled \$3.9 billion for the January-March 1986 quarter. The decrease of \$0.6 billion from the amount reported for the same quarter of 1985 is due in part to a reduction in the average unemployment tax rate and in part to accounting factors.

Contributions for other insurance and retirement.--Employee contributions by Federal and District of Columbia workers were about \$1.1 billion for the second quarter of fiscal 1986, a slight decline from the previous quarter. Employee contributions are expected to continue to decline as new workers with lower contribution rates replace older workers in the Government workforce.

Excise taxes.--Federal excise tax receipts for the second quarter of fiscal 1986 fell by \$0.6 billion from the same period last year to \$6 billion. As a result of falling oil prices, receipts from the windfall profits tax on oil sharply declined during January and February, and were negligible in March.

Estate and gift taxes.--Net estate and gift taxes were \$1.6 billion for the second quarter of fiscal 1986, a \$0.1 billion increase over the same quarter in 1985.

Customs duties.--Customs receipts net of refunds were \$3.1 billion for the second quarter of fiscal 1986, a slight increase from the \$3 billion for the same quarter in 1985. Receipts for 1986 are ahead of those for 1985, suggesting import demand continues to be strong.

Miscellaneous receipts.--Miscellaneous receipts for the first quarter of calendar year 1986 exceeded receipts for the same quarter a year earlier by \$1.3 billion. Deposits of Federal Reserve earnings accounted for \$1.2 billion of the change and other miscellaneous receipts for the remaining \$0.1 billion.

* Less than \$500,000.

Note.—Outlays consist of disbursements less proprietary receipts from the public and certain intrabudgetary transactions. Estimates are based on the Budget of the United States Government, Fiscal Year 1987 released Feb. 5, 1986, by the Office of Management and Budget.

FEDERAL OBLIGATIONS

"Obligations" are the basis on which the use of funds is controlled by the Federal Government. They are recorded at the point at which the Government makes a firm commitment to acquire goods or services and are first of the four key events--order, delivery, payment, and collection--which characterize the acquisition and use of resources. In general, they consist of orders placed, contracts awarded, services provided, and similar transactions requiring the disbursement of money.

The obligational stage of Government transactions is a strategic point in gauging the impact of the Government's operations on the national economy, since it frequently represents for business firms the Government commitment which stimulates business investment, including inventory purchases and employment of labor. Disbursements may not occur for months after the Government places its order, but the order itself usually causes immediate pressure on the private economy.

Obligations are classified according to a uniform set of categories based upon the nature of the transaction without regard to its ultimate purpose. All payments for salaries and wages, for example, are reported as personnel compensation, whether the personal services are used in current operations or in the construction of capital items.

Federal agencies often do business with one another; in doing so, the "buying" agency records obligations, and the "performing" agency records reimbursements. In table FO-1, obligations incurred within the Government are distinguished from those incurred outside the Government. Table FO-2 shows only those incurred outside.

Table FO-1. — Gross Obligations Incurred Within and Outside the Federal Government by Object Class, as of Mar. 31, 1986

[In millions of dollars. Source: Standard Form 225, Report on Obligations, from agencies]

Object class	Gross obligations incurred		
	Outside	Within	Total
Personal services and benefits:			
Personnel compensation.....	64,097	-	64,097
Personnel benefits.....	3,677	10,050	13,727
Benefits for former personnel.....	355	-	355
Contractual services and supplies:			
Travel and transportation of persons.....	2,146	384	2,530
Transportation of things.....	3,583	790	4,373
Rent, communications, and utilities.....	5,182	2,364	7,545
Printing and reproduction.....	447	306	753
Other services.....	62,577	22,836	85,413
Supplies and materials.....	32,531	11,292	43,823
Acquisition of capital assets:			
Equipment.....	38,749	4,786	43,535
Lands and structures.....	5,826	1,904	7,730
Investments and loans.....	25,839	78	25,917
Grants and fixed charges:			
Grants, subsidies, and contributions.....	55,613	9,973	65,586
Insurance claims and indemnities.....	177,083	1	177,084
Interest and dividends.....	82,171	20,175	102,346
Refunds.....	416	-	416
Other:			
Unvouchered.....	-823	-	-823
Undistributed U.S. obligations.....	15,601	3,078	18,679
Gross obligations incurred 1/.....	575,070	88,015	663,086

1/ For Federal budget presentation a concept of "net obligations incurred" is generally used. This concept eliminates transactions within the Government and revenue and reimbursements from the public which by statute may be used by Government agencies without appropriation action by the Congress. Summary figures on this basis follow. (Data are on the basis of Reports on Obligations

presentation and therefore may differ somewhat from the Budget of the U.S. Government.)

Gross obligations incurred (as above).....	663,086
Deduct:	
Advances, reimbursements, other income, etc.....	-88,235
Offsetting receipts.....	-79,461
Net obligations incurred.....	495,390

Includes reports for Library of Congress, Government Printing Office, and General Accounting Office only.

ACCOUNT OF THE U.S. TREASURY

SOURCE AND AVAILABILITY OF THE BALANCE IN THE ACCOUNT OF THE U.S. TREASURY

The operating cash of the Treasury is maintained in Treasury's accounts with the Federal Reserve banks and branches and in tax and loan accounts. Major information sources include the Daily Balance Wire received from the Federal Reserve banks and branches, and electronic transfers through the Treasury Financial Communications System. As the balances in the accounts at the Federal Reserve banks become depleted, they are restored by calling in (withdrawing) funds from thousands of financial institutions throughout the country authorized to maintain tax and loan accounts.

Under authority of Public Law 95-147, the Treasury implemented a program on Nov. 2, 1978, to invest a portion of its operating cash in obligations of depositaries maintaining tax and loan accounts. Under the Treasury tax and loan investment program, depositary financial institutions select the manner in which they will participate in the program. Depositaries that wish to retain funds deposited in their tax and loan accounts in interest-bearing obligations participate under the Note Option; depositaries that wish to remit the funds to the Treasury's account at Federal Reserve banks participate under the Remittance Option.

Deposits to tax and loan accounts occur in the normal course of business under a uniform procedure applicable to all financial institutions whereby customers of financial institutions deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of funds from a customer's account to the tax and loan account in the same financial institution. On occasion, to the extent authorized by the Treasury, financial institutions are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the accounts of their customers.

The tax and loan system permits the Treasury to collect funds through financial institutions and to leave the funds in Note Option depositaries and in the financial communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on Note Option financial institution reserves and the economy.

Table UST-1. — Elements of Changes in Federal Reserve and Tax and Loan Note Account Balances

* Less than \$500,000.

1/ Represents transfers from tax and loan note accounts, proceeds from sales of securities other than Government account series, and taxes.

2/ Represents checks paid, wire transfer payments, drawdowns on letters of credit, redemptions of securities other than Government account series, etc.

3/ Special depositaries are permitted to make payment in the form of a deposit credit for the purchase price of U.S. Government securities purchased by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues.

4/ Includes U.S. savings bonds, savings notes, retirement plan and tax

and loss bonds. U.S. savings notes first offered for sale as of May 1, 1967, and were discontinued after June 30, 1970. Retirement plan bonds first offered for sale as of Jan. 1, 1963; tax and loss bonds first issued in March 1968.

5/ Taxes eligible for credit consist of those deposited by taxpayers in the tax and loan depositaries, as follows: Withheld income taxes beginning March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; a number of excise taxes beginning July 1953; estimated corporation income taxes beginning April 1967; all corporation income taxes due on or after Mar. 15, 1968, and FUTA taxes beginning April 1970.

TREASURY FINANCING OPERATIONS, APRIL-JUNE 1986

A P R I L

Auction of 2-Year Notes

On April 16 the Treasury announced that it would auction \$9,750 million of 2-year notes to refund \$8,079 million of notes maturing April 30, 1986, and to raise about \$1,675 million new cash. The notes offered were Treasury Notes of Series Y-1988, dated April 30, 1986, due April 30, 1988, with interest payable on October 31 and April 30 until maturity. An interest rate of 6-5/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EST, April 23, and totaled \$18,300 million, of which \$9,752 million was accepted at yields ranging from 6.63 percent, price 99.991, up to 6.73 percent, price 99.807. Tenders at the high yield were allotted 42 percent. Noncompetitive tenders were accepted in full at the average yield, 6.68 percent, price 99.899. These totaled \$740 million. Competitive tenders accepted from private investors totaled \$9,012 million.

In addition to the \$9,752 million of tenders accepted in the auction

process, \$385 million was awarded to Federal Reserve banks as agents for foreign and international monetary authorities. An additional \$1,129 million was accepted from Government accounts and Federal Reserve banks for their own account.

52-Week Bills

On April 4 tenders were invited for approximately \$9,250 million of 52-week Treasury bills to be dated April 17, 1986, and to mature April 17, 1987. The issue was to refund \$8,362 million of 52-week bills maturing April 17 and to raise about \$900 million of new cash. Tenders were opened on April 10. They totaled \$29,536 million, of which \$9,258 million was accepted, including \$601 million of noncompetitive tenders from the public and \$1 million of the bills issued to Federal Reserve banks for themselves and \$8,657 million of the bills issued to Federal Reserve banks as agents for foreign and international monetary authorities. An additional \$1,591 million was issued to Federal Reserve banks as agents for foreign and international monetary authorities for new cash. The average bank discount rate was 5.94 percent.

M A Y

May Quarterly Financing

On April 30 the Treasury announced that it would sell to the public at auction, under competitive and noncompetitive bidding, up to \$9,000 million of 3-year notes of Series R-1989, \$9,000 million of 10-year notes of Series C-1996, and \$9,000 million of 30-year bonds of 2016 to refund \$14,190 million of publicly held Treasury securities maturing May 15 and to raise about \$12,800 million new cash.

An interest rate of 6-7/8 percent was set on the notes of Series R-1989 after the determination as to which tenders were accepted on a yield auction basis. The notes of Series R-1989 were dated May 15, 1986, due May 15, 1989, with interest payable on November 15 and May 15 until maturity.

Tenders for the notes of Series R-1989 were received until 1 p.m. EOST, May 6, and totaled \$24,964 million, of which \$9,013 million was accepted at yields ranging from 6.94 percent, price 99.827, up to 6.98 percent, price 99.720. Tenders at the high yield were allotted 8 percent. Noncompetitive tenders were accepted in full at the average yield, 6.97 percent, price 99.747. These totaled \$685 million. Competitive tenders accepted from private investors totaled \$8,328 million.

In addition to the \$9,013 million of tenders accepted in the auction process, \$388 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$1,019 million was accepted from Government accounts and Federal Reserve banks for their own account.

An interest rate of 7-3/8 percent was set on the notes of Series C-1996 after the determination as to which tenders were accepted on a yield auction basis. The notes of Series C-1996 were dated May 15, 1986, and due May 15, 1996, with interest payable on November 15 and May 15 until maturity.

Tenders for the notes of Series C-1996 were received until 1 p.m. EOST, May 7, and totaled \$20,830 million, of which \$9,017 million was accepted at yields ranging from 7.45 percent, price 99.478, up to 7.48 percent, price 99.270. Tenders at the high yield were allotted 80 percent. Noncompetitive tenders were accepted in full at the average yield, 7.47 percent, price 99.339. These totaled \$432 million. Competitive tenders accepted from private investors totaled \$8,585 million.

In addition to the \$9,017 million of tenders accepted in the auction process, \$5 million was awarded to Federal Reserve banks as agents for foreign and international monetary authorities. An additional \$500 million was accepted from Government accounts and Federal Reserve banks for their own account.

The notes of Series C-1996 may be held in STRIPS form. The minimum par amount required is \$1,600,000.

An interest rate of 7-1/4 percent was set on the bonds of 2016 after the determination as to which tenders were accepted on a yield auction basis. The bonds were dated May 15, 1986, due May 15, 2016, with interest payable on November 15 and May 15 until maturity.

Tenders for the bonds were received until 1 p.m. EOST, May 8, and totaled \$19,095 million, of which \$9,015 million was accepted at yields ranging from 7.34 percent, price 98.915, up to 7.40 percent, price 98.202. Tenders at the high yield were allotted 21 percent. Noncompetitive tenders were accepted in full at the average yield, 7.37 percent, price 98.557. These totaled \$337 million. Competitive tenders accepted from private investors totaled \$8,678 million.

In addition to the \$9,015 million of tenders accepted in the auction

process, \$300 million was accepted from Government accounts and Federal Reserve banks for their own account.

The bonds of 2016 may be held in STRIPS form. The minimum par amount required is \$800,000.

Auction of 2-Year Notes

On May 14 the Treasury announced that it would auction \$9,750 million of 2-year notes to refund \$8,548 million of publicly held notes maturing May 15, 1986, and to raise about \$1,200 million new cash. The notes offered were Treasury Notes of Series Z-1988, dated May 31, 1986, due May 31, 1988, with interest payable on November 30 and May 31 until maturity. An interest rate of 7-1/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EOST, May 21, and totaled \$35,599 million, of which \$9,811 million was accepted at a yield of 7.20 percent, price 99.863, which represented the full range of accepted bids. Competitive tenders at 7.20 percent were allotted 81 percent. Noncompetitive tenders were accepted in full at the average yield of 7.17 percent. These totaled \$773 million. Competitive tenders accepted from private investors totaled \$9,038 million.

In addition to the \$9,811 million of tenders accepted in the auction process, \$378 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$644 million was accepted from Government accounts and Federal Reserve banks for their own account.

Auction of 5-Year 2-Month Notes

On May 20 the Treasury announced that it would auction \$7,750 million of 5-year 2-month notes to raise new cash. The notes offered were Treasury Notes of Series K-1991, dated June 3, 1986, due August 15, 1991, with interest payable on February 15 and August 15 until maturity. An interest rate of 7-1/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EOST, May 21, and totaled \$18,080 million, of which \$7,756 million was accepted at yields ranging from 7.50 percent, price 99.946, up to 7.55 percent, price 99.734. Tenders at the high yield were allotted 65 percent. Noncompetitive tenders were accepted in full at the average yield, 7.53 percent, price 99.819. These totaled \$337 million. Competitive tenders accepted from private investors totaled \$7,419 million.

In addition to the \$7,756 million of tenders accepted in the auction process, \$15 million was awarded to Federal Reserve banks as agents for foreign and international monetary authorities.

52-Week Bills

On May 2 tenders were invited for approximately \$9,250 million of 52-week Treasury bills to be dated May 15, 1986, and to mature May 14, 1987. The issue was to refund \$8,550 million of 52-week bills maturing May 15, 1986, and to raise about \$700 million new cash. Tenders were opened on May 13. They totaled \$29,369 million, of which \$9,252 million was accepted, including \$511 million of noncompetitive tenders from the public and \$2,319 million of the bills issued to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. The average bank discount rate was 6.17 percent.

TREASURY FINANCING OPERATIONS, APRIL-JUNE 1986

JUNE

Auction of 2-Year Notes

On June 11 the Treasury announced that it would auction \$9,750 million of 2-year notes to refund \$9,033 million of publicly held notes maturing June 30, 1986, and to raise about \$725 million new cash. The notes offered were Treasury Notes of Series AB-1988, dated June 30, 1986, due June 30, 1988, with interest payable on December 31 and June 30 until maturity. An interest rate of 7 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EDT, June 18, and totaled \$26,720 million, of which \$9,751 million was accepted at yields ranging from 7.00 percent, price 100.000, up to 7.05 percent, price 99.908. Tenders at the high yield were allotted 52 percent. Noncompetitive tenders were accepted in full at the average yield, 7.04 percent, price 99.927. These totaled \$735 million. Competitive tenders accepted from private investors totaled \$9,016 million.

In addition to the \$9,751 million of tenders accepted in the auction process, \$565 million was accepted at the average price from Federal Reserve banks as agents for foreign and international monetary authorities, and \$1,000 million was accepted at the average price from Government accounts and Federal Reserve banks for their own account.

Auction of 4-Year and 7-Year Notes

On June 17 the Treasury announced that it would sell to the public at auction, under competitive and noncompetitive bidding, up to \$7,250 million of 4-year notes of Series P-1990 and \$6,750 million of 7-year notes of Series G-1993 to refund \$4,346 million of publicly held 4-year notes maturing June 30 and to raise about \$9,650 million new cash.

The Treasury had announced on April 30, that it was eliminating the 20-year 1-month bond from the regular offering schedule. Accordingly, the June 17 announcement contained only 4-year and 7-year note issues.

An interest rate of 7-1/4 percent was set on the notes of Series P-1990 after the determination as to which tenders were accepted on a yield auction basis. The notes of Series P-1990 were dated June 30, 1986, due June 30, 1990, with interest payable on December 31 and June 30 until maturity.

Tenders for the notes of Series P-1990 were received until 1 p.m. EDT, June 24, and totaled \$31,930 million, of which \$7,389 million was accepted at 7.26 percent, price 99.966, which represented the full range of accepted yields. Competitive tenders at 7.26 percent were allotted 40 percent. Non-

competitive tenders were accepted in full at the average yield, 7.26 percent. These totaled \$384 million. Competitive tenders accepted from private investors totaled \$7,005 million.

In addition to the \$7,389 million of tenders accepted in the auction process, \$325 million was accepted at the average price from Federal Reserve banks as agents for foreign and international monetary authorities, and \$313 million was accepted at the average price from Government accounts and Federal Reserve banks for their own account.

An interest rate of 7-1/4 percent was set on the notes of Series G-1993 after the determination as to which tenders were accepted on a yield auction basis. The notes of Series G-1993 were dated July 7, 1986, due July 15, 1993, with interest payable on January 15 and July 15 until maturity.

Tenders for the notes of Series G-1993 were received until 1 p.m. EDT, June 25, and totaled \$16,656 million, of which \$6,758 million was accepted at yields ranging from 7.26 percent, price 99.940, up to 7.36 percent, price 99.399. Tenders at the high yield were allotted 30 percent. Noncompetitive tenders were accepted in full at the average yield, 7.33 percent, price 99.561. These totaled \$309 million. Competitive tenders accepted from private investors totaled \$6,449 million.

52-Week Bills

On May 30 tenders were invited for approximately \$9,250 million of 364-day Treasury bills to be dated June 12, 1986, and to mature June 11, 1987. The issue was to refund \$8,533 million of 52-week bills maturing June 12 and to raise about \$725 million new cash. Tenders were opened on June 5. They totaled \$22,436 million, of which \$9,251 million was accepted, including \$382 million of noncompetitive tenders from the public and \$2,285 million of the bills issued at the average price to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. An additional \$152 million was issued to Federal Reserve banks as agents for foreign and international monetary authorities for new cash. The average bank discount rate was 6.59 percent.

Cash Management Bills

On May 30 tenders were invited for approximately \$5,000 million of 15-day bills to be issued June 4, 1986, representing an additional amount of bills dated December 19, 1985, maturing June 19, 1986. The issue was to raise new cash. Tenders were opened on June 3. They totaled \$26,364 million, of which \$5,000 million was accepted. The average bank discount rate was 6.71 percent.

The 13-week bills represent additional issue of bills with an original maturity of 26 weeks or 52 weeks.
 For bills issued on or after May 2, 1974, includes amounts exchanged on noncompetitive basis by Government accounts and Federal Reserve banks.
 For 13-week bills 26-week and 52-week bills tenders for \$1,000,000 or less from any one bidder are accepted in full at average price or accepted competitive bids; for other issues, the corresponding amount is stipulated in each offering announcement.
 Equivalent coupon-issue yield.
 Except \$10,000,000 at 6.70 percent.

6/ Except \$645,000 at 6.45 percent.
 7/ Except \$1,000,000 at 6.29 percent.
 8/ Except \$1,000,000 at 6.12 percent.
 9/ Except \$1,035,000 at 5.80 percent.
 10/ Except \$3,590,000 at 5.81 percent.
 11/ Except \$530,000 at 6.08 percent.
 12/ Except \$100,000,000 at 6.12 percent and \$200,000 at 6.16 percent.
 13/ Except \$700,000 at 7.27 percent and \$485,000 at 7.29 percent.

1/ Currently, all issues are sold at auction. For bill issues, the rate shown is the average bank discount rate. For note and bond issues, the rate shown is the interest rate. For details of bill offerings see table PDO-2.									
2/ From date of additional issue in case of a reopening.									
3/ In reopenings the amount issued is in addition to the amount of original offerings.									
4/ Includes securities issued to U.S. Government accounts and Federal Reserve banks; and to foreign and international monetary authorities, whether in exchange for maturing securities or for new cash.									
5/ Foreign-targeted issue.									
6/ Eligible for STRIPS as of June 30, 1986.									
7/ Yields accepted ranged from 13.06% (price 99.663) up to 13.11% (price 99.812) with the average at 13.10% (price 99.829).									
8/ Yields accepted ranged from 13.65% (price 99.925) up to 13.71% (price 99.745) with the average at 13.69% (price 99.805).									
9/ Yields accepted ranged from 13.80% (price 99.765) up to 13.84% (price 99.589) with the average at 13.83% (price 99.633).									
10/ Yields accepted ranged from 13.71% (price 100.185) up to 13.82% (price 99.441) with the average at 13.76% (price 99.846).									
11/ Yields accepted ranged from 12.63% (price 99.991) up to 12.75% (price 99.785) with the average at 12.69% (price 99.888).									
12/ Yields accepted ranged from 12.42% (price 99.890) up to 12.48% (price 99.744) with the average at 12.46% (price 99.793).									
13/ Yields accepted ranged from 12.61% (price 100.084) up to 12.68% (price 99.693) with the average at 12.65% (price 99.860).									
14/ The low, high, and average yield was 12.52% (price 99.844).									
15/ Yields accepted ranged from 12.41% (price 99.940) up to 12.45% (price 99.871) with the average at 12.43% (price 99.905).									
16/ Yields accepted ranged from 12.77% (price 99.780) up to 12.78% (price 99.742) with the average at 12.78% (price 99.742).									
17/ Yields accepted ranged from 11.91% (price 99.935) up to 12.97% (price 99.836) with the average at 11.94% (price 99.887).									
18/ Yields accepted ranged from 12.30% (price 99.770) up to 12.35% (price 99.541) with the average at 12.34% (price 99.587).									
19/ Yields accepted ranged from 11.69% (price 99.887) up to 11.75% (price 99.783) with the average at 11.73% (price 99.818).									
20/ Yields accepted ranged from 11.55% (price 100.554) up to 11.75% (price 99.016) with the average at 11.69% (price 99.473).									
21/ Yields accepted ranged from 11.38% (price 99.985) up to 11.44% (price 99.799) with the average at 11.42% (price 99.861).									
22/ Yields accepted ranged from 11.30% (price 100.271) up to 11.46% (price 99.768) with the average at 11.41% (price 99.939). Yields were based on an annual interest payment. The 11-3/8% interest rate was established in the auction of the companion domestic issue, Series H-1988.									
23/ Yields accepted ranged from 11.00% (price 100.000) up to 11.03% (price 99.925) with the average at 11.01% (price 99.975).									
24/ Yields accepted ranged from 11.64% (price 99.913) up to 11.73% (price 99.391) with the average at 11.70% (price 99.565).									
25/ Yields accepted ranged from 11.79% (price 99.672) up to 11.87% (price 99.021) with the average at 11.83% (price 99.345).									
26/ Yields accepted ranged from 10.45% (price 99.868) up to 10.48% (price 99.815) with the average at 10.47% (price 99.832).									
27/ Yields accepted ranged from 11.00% (price 99.887) up to 11.03% (price 99.770) with the average at 11.02% (price 99.809).									
28/ Yields accepted ranged from 11.15% (price 99.305) up to 11.30% (price 98.739) with the average at 11.25% (price 98.927). Yields were based on an annual interest payment. The 11% interest rate was established in the auction of the companion domestic issue, Series G-1990.									
29/ Yields accepted ranged from 9.87% (price 100.009) up to 9.93% (price 99.902) with the average at 9.92% (price 99.920).									
30/ Yields accepted ranged from 10.71% (price 99.729) up to 10.74% (price 99.634) with the average at 10.72% (price 99.697).									
31/ Yields accepted ranged from 11.63% (price 99.957) up to 11.70% (price 99.628) with the average at 11.67% (price 99.769).									
32/ Yields accepted ranged from 11.85% (price 98.205) up to 11.86% (price 98.130) with the average at 11.86% (price 98.130).									
33/ Yields accepted ranged from 9.81% (price 99.893) up to 9.84% (price 99.840) with the average at 9.83% (price 99.850).									
34/ Yields accepted ranged from 10.38% (price 99.987) up to 10.40% (price 99.937) with the average at 10.40% (price 99.937).									
35/ Yields accepted ranged from 11.33% (price 99.528) up to 11.37% (price 99.294) with the average at 11.36% (price 99.352).									
36/ Yields accepted ranged from 11.24% (price 100.086) up to 11.31% (price 99.489) with the average at 11.27% (price 99.829).									
37/ Yields accepted ranged from 10.08% (price 99.858) up to 10.14% (price 99.752) with the average at 10.12% (price 99.788).									
38/ Yields accepted ranged from 11.42% (price 99.703) up to 11.43% (price 99.664) with the average at 11.43% (price 99.664).									
39/ Yields accepted ranged from 10.83% (price 99.860) up to 10.88% (price 99.772) with the average at 10.86% (price 99.807).									
40/ Yields accepted ranged from 11.30% (price 99.843) up to 11.32% (price 99.780) with the average at 11.30% (price 99.843).									
41/ Yields accepted ranged from 11.82% (price 99.648) up to 11.85% (price 99.508) with the average at 11.85% (price 99.508).									
42/ Yields accepted ranged from 12.00% (price 99.920) up to 12.05% (price 99.545) with the average at 12.04% (price 99.620).									
43/ Yields accepted ranged from 9.80% (price 99.911) up to 9.82% (price 99.876) with the average at 9.81% (price 99.893).									
44/ Yields accepted ranged from 9.98% (price 100.051) up to 10.03% (price 99.924) with the average at 10.00% (price 100.000).									
45/ Yields accepted ranged from 11.28% (price 99.623) up to 11.32% (price 99.587) with the average at 11.30% (price 99.705).									
46/ Yields accepted ranged from 11.36% (price 98.990) up to 11.39% (price 98.739) with the average at 11.38% (price 98.822).									
47/ Yields accepted ranged from 9.11% (price 100.027) up to 9.14% (price 99.973) with the average at 9.13% (price 99.991).									
48/ Yields accepted ranged from 9.92% (price 99.729) up to 9.96% (price 99.570) with the average at 9.95% (price 99.610).									
49/ Yields accepted ranged from 9.93% (price 99.684) up to 10.03% (price 99.293) with the average at 10.00% (price 99.416). Yields are based on an annual interest payment. The 9-7/8% interest rate was established in the auction of the companion domestic issue, Series K-1990.									
50/ Yields accepted ranged from 8.48% (price 100.036) up to 8.54% (price 99.926) with the average at 8.51% (price 99.962).									
51/ Yields accepted ranged from 9.70% (price 99.756) up to 9.72% (price 99.691) with the average at 9.72% (price 99.691).									
52/ Yields accepted ranged from 10.37% (price 100.006) up to 10.41% (price 99.810) with the average at 10.40% (price 99.859).									
53/ Yields accepted ranged from 10.73% (price 100.058) up to 10.76% (price 99.894) with the average at 10.75% (price 99.934).									
54/ Yields accepted ranged from 8.94% (price 99.883) up to 9.00% (price 99.776) with the average at 8.98% (price 99.812).									
55/ Yields accepted ranged from 9.51% (price 99.974) up to 9.54% (price 99.898) with the average at 9.54% (price 99.923).									
56/ Yields accepted ranged from 10.58% (price 99.514) up to 10.61% (price 99.332) with the average at 10.60% (price 99.392).									
57/ Yields accepted ranged from 10.64% (price 99.865) up to 10.68% (price 99.508) with the average at 10.66% (price 99.686).									
58/ Yields accepted ranged from 8.86% (price 100.027) up to 8.91% (price 99.937) with the average at 8.89% (price 99.973).									
59/ Yields accepted ranged from 9.61% (price 99.974) up to 9.63% (price 99.894) with the average at 9.62% (price 99.934).									
60/ Yields accepted ranged from 9.05% (price 99.910) up to 9.13% (price 99.767) with the average at 9.11% (price 99.803).									
61/ Yields accepted ranged from 8.88% (price 99.991) up to 8.92% (price 99.919) with the average at 8.90% (price 99.955).									
62/ The low, high, and average yield was 9.47% (price 99.695).									
63/ The low, high, and average yield was 9.75% (price 100.000).									
64/ Yields accepted ranged from 10.40% (price 102.809) up to 10.49% (price 102.046) with the average at 10.47% (price 102.215).									
65/ Yields accepted ranged from 6.68% (price 99.859) up to 8.75% (price 99.679) with the average at 8.74% (price 99.705).									
66/ Yields accepted ranged from 8.57% (price 99.874) up to 8.59% (price 99.838) with the average at 8.58% (price 99.856).									
67/ Yields accepted ranged from 9.52% (price 99.858) up to 9.58% (price 99.478) with the average at 9.54% (price 99.731).									
68/ Yields accepted ranged from 9.93% (price 99.936) up to 9.95% (price 99.271) with the average at 9.93% (price 99.460).									
69/ Yields accepted ranged from 9.12% (price 99.942) up to 9.13% (price 99.901) with the average at 9.13% (price 99.901).									
70/ Yields accepted ranged from 7.90% (price 99.955) up to 7.96% (price 99.486) with the average at 7.93% (price 99.900).									
71/ Yields accepted ranged from 8.38% (price 99.983) up to 8.48% (price 99.650) with the average at 8.43% (price 99.816).									
72/ Yields accepted ranged from 8.82% (price 99.640) up to 8.87% (price 99.384) with the average at 8.85% (price 99.486).									
73/ Yields accepted ranged from 9.35% (price 100.190) up to 9.45% (price 99.295) with the average at 9.43% (price 99.473).									
74/ Yields accepted ranged from 8.16% (price 99.937) up to 8.17% (price 99.918) with the average at 8.17% (price 99.918).									
75/ Yields accepted ranged from 8.07% (price 99.917) up to 8.14% (price 99.635) with the average at 8.11% (price 99.713).									
76/ Yields accepted ranged from 8.94% (price 99.573) up to 6.99% (price 99.249) with the average at 8.97% (price 99.379).									
77/ Yields accepted ranged from 9.04% (price 98.940) up to 9.16% (price 98.182) with the average at 9.12% (price 98.434). Yields are based on an annual interest payment. The 8-7/8% interest rate was established in the auction of the companion domestic issue, Series A-1996.									
78/ Yields accepted ranged from 9.27% (price 99.795) up to 9.29% (price 99.594) with the average at 9.28% (price 99.695).									
79/ Yields accepted ranged from 7.99% (price 100.018) up to 8.03% (price 99.946) with the average at 8.02% (price 99.964).									
80/ Yields accepted ranged from 8.10% (price 100.043) up to 8.13% (price 99.918) with the average at 8.12% (price 99.960).									
81/ Yields accepted ranged from 7.17% (price 99.918) up to 7.21% (price 99.844) with the average at 7.19% (price 99.881).									
82/ The low, high, and average yield was 7.29% (price 99.863).									
83/ Yields accepted ranged from 7.44% (price 99.640) up to 7.50% (price 99.318) with the average at 7.48% (price 99.425).									
84/ Yields accepted ranged from 6.63% (price 99.991) up to 6.73% (price 99.807) with the average at 6.68% (price 99.899).									
85/ Yields accepted ranged from 6.94% (price 99.827) up to 6.98% (price 99.720) with the average at 6.97% (price 99.747).									
86/ Yields accepted ranged from 7.45% (price 99.478) up to 7.48% (price 99.270) with the average at 7.47% (price 99.339).									
87/ Yields accepted ranged from 7.34% (price 98.915) up to 7.40% (price 98.202) with the average at 7.37% (price 98.557).									
88/ The low, high, and average yield was 7.20% (price 99.863).									
89/ Yields accepted ranged from 7.50% (price 99.946) up to 7.55% (price 99.734) with the average at 7.53% (price 99.819).									
90/ Yields accepted ranged from 7.00% (price 100.000) up to 7.05% (price 99.908) with the average at 7.04% (price 99.927).									
91/ The low, high, and average yield was 7.26% (price 99.966).									
92/ Yields accepted ranged from 7.26% (price 99.940) up to 7.36% (price 99.399) with the average at 7.33% (price 99.561).									
Note.--All notes and bonds, except for foreign-targeted issues, were sold at auction through competitive and noncompetitive bidding. Foreign-targeted issues were sold at auction through competitive bidding only.									

PUBLIC DEBT OPERATIONS

cludes trust funds and accounts that comprise Government accounts under
 e unified budget concept.
 clusive of banks and insurance companies.
 cluded with all other investors are certain Government deposit accounts

and Government-sponsored agencies, formerly included with Government
 accounts.

Note.--For detail of offerings see table PDO-3.

U.S. SAVINGS BONDS AND NOTES

Series EE bonds, on sale since Jan. 1, 1980, are the only savings bonds currently sold. Series HH bonds are issued in exchange for series E and EE savings bonds and savings notes. Series A-0 were sold from Mar. 1, 1935, through Apr. 30, 1941. Series E was on sale from May 1, 1941, through Dec. 31, 1979 (through June 1980 to payroll savers only). Series F and G were sold from May 1, 1941, through Apr. 30, 1952. Series H was sold from June 1, 1952, through Dec. 31, 1979. Series HH bonds were sold for cash from Jan. 1, 1980, through Oct. 31, 1982. Series J and K were sold from May 1, 1952, through Apr. 30, 1957.

U.S. savings notes were on sale May 1, 1967, through June 1, 1970. The notes were eligible for purchase by individuals with a simultaneous purchase of series E savings bonds. The principal terms and conditions for purchase and redemption and information on investment yields of savings notes appear in the Treasury Bulletins of March 1967 and June 1968; and the Annual Report of the Secretary of the Treasury for fiscal year 1974.

Table SBN-1. — Sales and Redemptions by Series, Cumulative through June 30, 1986

[In millions of dollars. Source: Monthly Statement of the Public Debt of the United States; Market Analysis Section, United States Savings Bonds Division]

Series	Sales <u>1/</u>	Accrued discount	Sales plus accrued discount	Redemptions <u>1/</u>	Amount outstanding	
					Interest-bearing debt	Matured non-interest bearing debt
Savings bonds:						
Series A-0 <u>2/</u>	3,949	1,054	5,003	5,002	-	1
Series E, EE, H, and HH.....	241,131	93,001	334,132	250,543	82,278	1,264
Series F and G.....	28,396	1,125	29,521	29,517	-	3
Series J and K.....	3,556	198	3,754	3,753	-	1
Savings notes.....	862	412	1,274	999	274	-
Total.....	277,894	95,791	373,685	289,814	82,552	1,269

^{1/} Sales and redemption figures include exchange of minor amounts of (1) matured series E bonds for series G and K bonds from May 1951 through April 1957; (2) series F and J bonds for series H bonds beginning January 1960; and (3) U.S. savings notes for series H

bonds beginning January 1972; however, they exclude exchanges of series E bonds for series H and HH bonds.

^{2/} Details by series on a cumulative basis and by period of series A-0 combined will be found in the February 1952 and previous issues of the Treasury Bulletin.

* Yields are from the Treasury yield curve.
 1/ Apr. 30, 1986, the Treasury announced that it would no longer issue 20-year bonds. Consequently, the 20-year

constant maturity is now an interpolation between rates on 10- and 30-year securities.

1/ Treasury long-term bond series has been revised to reflect 30-year maturities rather than the previously used 20-year maturity. The 30-year series was initiated in March 1977.

2/ Treasury series based on 3-week moving average of reoffering yields of new corporate bonds rated Aa by Moody's Investors Service and having an original maturity of at least 20 years. Prior to June 1973, this series reflected bonds without call protection. From June 1973 to July 1976, the

series was adjusted to reflect 5 years call protection. Since that time, the series reflects bond yields regardless of the call protection offered.

3/ Index of new reoffering yields on 20-year general obligations rated Aa by Moody's Investors Service. Prior to June 1970, the series was compiled by Securities Industries Association. Since then, the series has been compiled by Treasury.

of Sept. 30, 1985.
 e Sept. 30, 1965, amounts were \$31.8 billion investments in Federal
 ency debt and \$121.7 billion direct loans.

Note.--If the maximum authority is indefinite, an amount equal to direct
 loans outstanding or guaranteed loans outstanding is shown in the maximum
 authority columns.

International Statistics

INTERNATIONAL FINANCIAL STATISTICS

The tables in this section are designed to provide data on U.S. reserve assets and liabilities and other statistics related to the U.S. balance of payments and international financial position.

Table IFS-1 shows the reserve assets of the United States, including its gold stock, special drawing rights held in the Special Drawing Account in the International Monetary Fund, holdings of convertible foreign currencies, and reserve position in the International Monetary Fund.

Table IFS-2 brings together statistics on liabilities to foreign official institutions, and selected liabilities to all other foreigners, which are used in the U.S. balance of payments statistics.

Table IFS-3 shows U.S. Treasury nonmarketable bonds and notes issued to official institutions and other residents of foreign countries.

Table IFS-4 presents a measure of weighted-average changes in exchange rates between the U.S. dollar and the currencies of certain other countries.

Table IFS-1. — U.S. Reserve Assets

July.....	47,430	11,084	11,084	8,085		16,147	12,114	

Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing right (SDR) based on a weighted-average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and reserve position in the IMF are also valued on this basis beginning July 1974.

Includes gold held by the Exchange Stabilization Fund. Treasury values its gold stock at \$42.2222 per fine troy ounce and pursuant to 31 U.S.C. 5117(b) issues gold certificates to the Federal Reserve at the same rate against all gold held.

Includes allocations of SDR's in the Special Drawing Account in the International Monetary Fund, plus or minus transactions in SDR's.

Allocations of SDR's on Jan. 1 of respective years are as follows: 1970, 867 million; 1971, 717 million; 1972, 710 million; 1979, 874 million (in SDR terms); 1980, 874 million (in SDR terms); and 1981, 857 million (in SDR terms).

5/ Includes holdings of Treasury and Federal Reserve System; beginning November 1978, these are valued at current market exchange rates or, where appropriate, as such other rates as may be agreed upon by the parties to the transactions.

6/ The United States has the right to purchase foreign currencies equivalent to its reserve position in the Fund automatically if needed. Under appropriate conditions the United States could purchase additional amounts related to the U.S. quota.

1/ Includes Bank for International Settlements.

2/ Derived by applying reported transactions to benchmark data.

3/ Includes debt securities of U.S. Government corporations, federally sponsored agencies, and private corporations.

4/ Includes liabilities payable in dollars to foreign banks, and liabilities payable in foreign currencies to foreign banks and to "other foreigners."

5/ Includes marketable U.S. Government bonds and notes held by foreign banks.

6/ Includes nonmarketable U.S. Government bonds and notes held by foreign banks.

7/ Principally the International Bank for Reconstruction and Development, the Inter-American Development Bank, and the Asian Development Bank.

Note.--Table is based on Treasury Department data and on data reported to the Treasury Department by banks and brokers in the United States.

Data correspond generally to statistics following in this section and in the "Capital Movements" section, except for the inclusion of investments by foreign official reserve agencies in debt securities of U.S. federally sponsored agencies and U.S. corporations. Table excludes International Monetary Fund "holdings of dollars" and holdings of U.S. Treasury letters of credit and nonnegotiable noninterest-bearing special U.S. notes held by other international and regional organizations.

This table presents calculations of weighted average percentage changes in the rates of exchange between the dollar and certain foreign currencies, in order to provide a measure of changes in the dollar's general foreign exchange value broader than a measure provided by any single exchange rate change. Calculations are provided for two sets of countries that account for a major share of U.S. foreign trade. U.S. bilateral trade patterns in 1972 are used as a convenient, readily available proxy for the assignment of relative weights to individual exchange rate changes, although such weights do not provide a full measure of individual currencies' relative importance in U.S. international transactions because they take no account of factors other than trade. The calculations do not purport to represent a guide to measuring the impact of exchange rate changes on U.S. international transactions.

Exchange rate data used in constructing the indices reported here differ somewhat from those used in earlier calculations to more accurately reflect end-of-period currency values.

The equations used are as follows:

Equation one is used to calculate a trade-weighted average of changes in the dollar cost of foreign currencies:

$$(EQ1) \quad E_m = \Sigma(\Delta S/FC_i \cdot M_i/\Sigma M)$$

Where: E_m is the weighted average of percentage changes in the dollar cost of individual foreign currencies;

$\Delta S/FC_i$ is the percent change in the dollar cost of foreign currency i ; and

$M_i/\Sigma M$ is U.S. imports from country i , as a proportion of total U.S. imports from all countries in the set.

Equation two is used to calculate a trade-weighted average of changes in the foreign exchange cost of dollars:

$$(EQ2) \quad E_x = \Sigma(\Delta FC_i/\$ \cdot X_i/\Sigma X)$$

Where: E_x is the weighted average of percentage changes in the foreign currency cost of dollars;

$\Delta FC_i/\$$ is the percent change in the foreign currency i cost of dollars; and

$X_i/\Sigma X$ is U.S. exports to country i , as a proportion of total U.S. exports to all countries in the set.

Equation three combines the above export-weighted and import-weighted averages to provide an overall measure of exchange rate change:

$$(EQ3) \quad E = [(E_m \cdot m/m+x) \cdot (-1)] + [E_x \cdot x/m+x]$$

Where: $m/m+x$ is U.S. imports as a proportion of its total trade with all countries in the set; and

$x/m+x$ is U.S. exports as a proportion of its total trade with all countries in the set.

2/ Australia, Austria, Belgium-Luxembourg, Canada, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, and United Kingdom.

3/ The currencies of 46 IMF member countries which account for approximately 90 percent of U.S. total trade.

CAPITAL MOVEMENTS

INTRODUCTION

Background

Data relating to capital movements between the United States and foreign countries have been collected in some form since 1935. Reports are filed with district Federal Reserve banks by commercial banks, thrift institutions, bank holding companies, securities brokers and dealers, and nonbanking enterprises in the United States. Statistics on the principal types of data by country or geographical area are then consolidated and are published in the Treasury Bulletin.

The reporting forms and instructions ^{1/} used in the Treasury International Capital (TIC) Reporting System have been revised a number of times to meet changing conditions and to increase the usefulness of the published statistics. The most recent, general revision of the report forms became effective with the banking reports as of April 30, 1978, and with the nonbanking reports as of December 31, 1978. Revised forms and instructions are developed with the cooperation of other Government agencies and the Federal Reserve System and in consultations with representatives of banks, securities firms, and nonbanking enterprises.

Basic Definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including U.S. citizens domiciled abroad, and the foreign branches, subsidiaries, and other affiliates abroad of U.S. banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located. The term "foreigner" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled, as shown on the records of reporting institutions. For a number of reasons, the geographical breakdown of the reported data may not in all cases reflect the ultimate ownership of the assets. Reporting institutions are not expected to go beyond the addresses shown on their records, and so may not be aware of the country of domicile of the ultimate beneficiary. Furthermore, U.S. liabilities arising from deposits of dollars with foreign banks are reported in the Treasury statistics as liabilities to foreign banks, whereas the liability of the foreign bank receiving the deposit may be to foreign official institutions or to residents of another country.

Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the appropriate international or regional classification except for the Bank for International Settlements which is included in the classification "Other Europe."

Reporting Coverage

Reports are required from banks, bank holding companies, International Banking Facilities (IBF's), savings and loan and other thrift institutions, securities brokers and dealers, and nonbanking enterprises in the United States, including the branches, agencies, subsidiaries, and other affiliates in the United States of foreign banking and nonbanking firms. Entities that have reportable liabilities, claims, or securities transactions below specified exemption levels are exempt from reporting.

Banks, thrift institutions, and some brokers and dealers file monthly reports covering their dollar liabilities to, and dollar claims on, foreigners in a number of countries. Twice a year, as of June 30 and December 31, they also report the same liabilities and claims items with respect to foreigners in countries not shown separately on the monthly reports. Quarterly reports are filed with respect to liabilities and claims denominated in foreign currencies vis-a-vis foreigners. Effective January 31, 1984, the specified exemption level applicable to the monthly and quarterly banking reports was raised from \$10 million to \$15 million. There is no separate exemption level for the semiannual reports.

Banks, securities brokers and dealers, and in some instances nonbanking enterprises report monthly their transactions in securities with foreigners; the applicable exemption level is \$500,000 on the grand total of purchases and on the grand total of sales during the month covered by the report.

Quarterly reports are filed by exporters, importers, industrial and commercial concerns, financial institutions other than banks, thrift institutions and brokers, and other nonbanking enterprises if their liabilities to, or claims on, unaffiliated foreigners exceed a specified exemption level on a two quarter-end average basis. Effective March 31, 1982, this exemption level was set at \$10 million, up from \$2 million. Nonbanking enterprises also report for each month their U.S. dollar-denominated deposit and certificates of deposit claims of \$10 million or more on banks abroad.

Description of Statistics

Section I presents data on liabilities to foreigners reported by banks, thrift institutions, brokers, and dealers in the United States. Beginning April 1978, the following major changes were made in the reporting coverage:

Amounts due to banks' own foreign offices are reported separately; a previous distinction between short-term and long-term liabilities was eliminated; separation was provided of the liabilities of the respondents themselves, their custody liabilities to foreigners; and foreign currency liabilities only available quarterly. Also, beginning April 1978, the data on liabilities were made more complete by extending to securities brokers and dealers the requirement to report certain of their own liabilities and all of their custody liabilities to foreigners. Effective as of January 31, 1985, savings and loan associations and other thrift institutions began to file the banking forms. Previously they had reported on TIC forms for nonbanking enterprises.

Section II presents the claims on foreigners reported by banks in the United States. Beginning with data reported as of the end of April 1978, distinction was made between banks' claims held for their own accounts, claims held for their domestic customers. The former are available in a monthly series whereas the latter data are collected on a quarterly basis only. Also, the distinction in reporting of long-term and short-term components of banks' claims was discontinued. Maturity data began to be collected quarterly on a time remaining to maturity basis as opposed to historic original maturity classification. Foreign currency claims are collected on a quarterly basis only. Beginning March 1981, this coverage was extended to certain items in the hands of brokers and dealers in the United States. See notes to section I above concerning the reporting of thrift institutions.

Another important change in the claims reporting, beginning with quarterly data as of June 30, 1978, was the adoption of a broadened concept of "foreign public borrower," which replaced the previous category of "foreign official institution" to produce more meaningful information on lending to the public sector of foreign countries. The term "foreign public borrower" encompasses central governments and departments of central governments of foreign countries and of their possessions; foreign central banks, stabilized funds, and exchange authorities; corporations and other agencies of central governments, including development banks, development institutions, and other agencies which are majority-owned by the central government or its departments; State, provincial, and local governments of foreign countries and their departments and agencies; and any international or regional organization subordinate or affiliated agency thereof, created by treaty or convention between sovereign states.

Section III includes supplementary statistics on U.S. banks' liabilities to, and claims on, foreigners. The supplementary data on banks' loans and credits to nonbank foreigners combine selected information from the reports with data from the monthly Federal Reserve 2502 reports submitted by major foreign branches of U.S. banks. Other supplementary data on U.S. banks' dollar liabilities to, and banks' own dollar claims on, countries not regularly reported separately are available semiannually in the May and November issues of the Treasury Bulletin.

Section IV shows the liabilities to, and claims on, unaffiliated foreigners by exporters, importers, industrial and commercial concerns, financial institutions other than banks, thrift institutions, brokers, and other nonbanking enterprises in the United States. The data exclude intercompany accounts of nonbanking enterprises in the United States and their own branches and subsidiaries abroad or with their foreign parent companies. (Such transactions are reported by business enterprises to the Department of Commerce on its direct investment forms.) The data also exclude claims held through banks in the United States. Beginning with data reported as of December 31, 1978, financial liabilities and claims of reporting enterprises are distinct from their commercial liabilities and claims; all items are collected on a time remaining to maturity basis instead of the original maturity basis used previously.

Section V contains data on transactions in all types of long-term domestic and foreign securities by foreigners as reported by banks and brokers in the United States (except nonmarketable U.S. Treasury notes, foreign securities, and nonmarketable U.S. Treasury bonds and notes, foreign currency securities which are shown in the "International Financial Statistics" section, IMF-3). The data cover new issues of securities, transactions in outstanding issues, and redemptions of securities. They include transactions executed in the United States for the account of foreigners, and transactions executed abroad for the account of reporting institutions and their domestic customers. The data include some transactions which are classified as direct investments in the balance of payments accounts. Also, see notes for section I above concerning the reporting of thrift institutions.

The geographical breakdown of the data on securities transactions by the country of domicile of the foreign buyers and sellers of the securities, in the case of outstanding issues, may differ from the country of original issuer. The gross figures contain some offsetting transactions between foreigners. The net figures for total transactions represent transactions by foreigners with U.S. residents; but the net figures for transactions of individual countries and areas may include some transactions between foreigners of different countries.

The data published in these sections do not cover all types of reportable capital movements between the United States and foreign countries. The principal exclusions are the intercompany capital transactions of nonbanking business enterprises in the United States with their own branches, subsidiaries abroad or with their foreign parent companies, and capital transactions of the U.S. Government. Consolidated data on all types of international capital transactions are published by the Department of Commerce in its regular reports on the U.S. balance of payments.

^{1/} Copies of the reporting forms and instructions may be obtained from the Office of Data Management, Office of the Assistant Secretary for International Affairs, Department of the Treasury, Washington, D.C. 20220, or from district Federal Reserve banks.

Includes Bank for International Settlements.
Principally the International Bank for Reconstruction and
Development and the Inter-American Development Bank.
Data as of preceding quarter for non-quarter-end months.
Establishment of International Banking Facilities (IBF's)
permitted beginning December 1981.

Note.--Total liabilities include liabilities previously classi-
fied as either "short term" or "long term" on the Treasury reports
filed by banks. The maturity distinction was discontinued with
new reports filed as of Apr. 30, 1978, and historical series ad-
justed accordingly. See introductory text to Capital Movements
tables for discussion of changes in reporting.

FOREIGN CURRENCY POSITIONS

INTRODUCTION

Background

Data have been collected since 1974 on the foreign currency positions of banks and nonbanking firms in the United States, and on those of foreign branches, majority-owned foreign partnerships, and majority-owned foreign subsidiaries of U.S. banks and nonbanking firms. Reports cover five major foreign exchange market currencies and U.S. dollars held abroad. Reporting has been required pursuant to title II of Public Law 93-110, an amendment to the Par Value Modification Act of September 21, 1973, and implementing Treasury regulations. Statistics on the positions have been published since March 1977 beginning with data for December 1975.

The report forms and instructions used in the collection of bank data were revised effective with reports as of March 16, 1983, for the weekly reports. The most recent revision of the nonbank foreign currency forms (see below) became effective as of the last business day of March 1983.

Common Definitions and Concepts

The term "United States" means the States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, Midway Island, the Virgin Islands, and Wake Island. The term "foreign" means locations other than the "United States." The term "worldwide" is used to describe the sum of "United States" and "foreign" data.

Data for the United States include amounts reported by sole proprietorships, partnerships, and corporations in the United States including the U.S. branches and subsidiaries of foreign nonbanking concerns, in the case of "nonbanking firms' positions," and the agencies, branches, and subsidiaries located in the United States of foreign banks and banking institutions, in the case of the weekly "bank positions."

Data for "foreign branches" and "abroad" include amounts reported by the branches, majority-owned partnerships, and majority-owned subsidiaries of U.S. banking and nonbanking concerns. In general, these data do not reflect the positions of foreign parents or foreign parents' subsidiaries located abroad except through intercompany accounts. The data include the foreign subsidiaries of a few foreign-owned U.S.-based corporations.

Assets, liabilities, and foreign exchange contract data are reported on the basis of time remaining to maturity as of the date of the report, regardless of the original maturity of the instrument involved. "Spot" means due for receipt or delivery within 2 business days from the date of the report. "Short-term" means maturing in 1 year or less from the date of the report.

"Majority-owned foreign partnerships" are those organized under the laws of a foreign country in which one or more nonbanking concerns or nonbanking institutions in the United States, directly or indirectly, own more than 50 percent profit interest. "Majority-owned foreign subsidiaries" are nonbanking corporations in which one or more nonbanking business concerns or nonbanking institutions located in the United States, directly or indirectly, own more than 50 percent of the total combined voting power of all classes of stock entitled to vote, or more than 50 percent of the total value of the classes of stock.

Reporting Threshold

The exemption level applicable to banks and banking institutions was \$1 million equivalent through January 1982, when it was raised to \$100 million. The exemption level applicable to nonbanking business concerns and nonbanking institutions was \$1 million equivalent on all nonbank forms from March 1977 through November 1976. It was raised to \$2 million equivalent on the reports of positions held in the United States from November 1976 to September 1978. The exemption level was raised to \$3 million on reports of subsidiary positions on June 30, 1977, and for positions held in the United States on September 30, 1978. The exemption level for nonbanking institutions was raised to \$100 million on positions in the United States in January 1982 on foreign branch and subsidiaries positions in March 1982.

Firms must report their entire foreign currency position in a specified foreign currency if a specified U.S. dollar equivalent value is reached in any category of assets, liabilities, exchange contracts bought and sold, or net position in the currency. In general, exemption levels are applied to the entire firm. In reports on their foreign branches, majority-owned partnerships, and majority-owned foreign subsidiaries, U.S. banks and nonbanking firms are required to report the U.S. dollar-denominated assets, liabilities, exchange contracts bought and sold, and net positions of those banks, partnerships, and subsidiaries with reportable positions in the specified foreign currencies.

Description of Statistics

Data collected on the Treasury foreign currency forms are published in the Treasury Bulletin in seven sections. The first section presents a summary of worldwide net positions in all of the currencies reported. Sections II through VI each present data on a specified foreign currency. Section VII presents the U.S. dollar positions of the foreign branches and subsidiaries of U.S. firms which are required to report in one or more of the specified foreign currencies.

FOREIGN CURRENCY POSITIONS

Section I. — Summary Positions

Table FCP-I-1. — Nonbanking Firms' Positions^{1/}[In millions of foreign currency units,
except yen, which is in billions]

FOREIGN CURRENCY POSITIONS

Footnotes to Tables FCP-I through FCP-VII

SECTION I

1/ Worldwide net positions on the last business day of the calendar quarter of nonbanking business concerns in the United States and their foreign branches and majority-owned partnerships and subsidiaries. Excludes receivables and installment paper which have been sold or discounted before maturity, U.S. parent companies' investment in their majority-owned foreign subsidiaries, fixed assets (plant and equipment), and capitalized leases for plant and equipment.

2/ Foreign branches and majority-owned partnerships and subsidiaries only.

3/ Weekly worldwide net positions of banks and banking institutions in the United States, and their foreign branches and majority-owned foreign subsidiaries. Excludes capital assets and liabilities.

4/ Foreign branches and majority-owned subsidiaries only.

SECTIONS II THROUGH VII

1/ Positions of nonbanking business concerns in the United States and their foreign branches and majority-owned partnerships and subsidiaries. In section VII positions of foreign branches and majority-owned partnerships and subsidiaries only.

2/ Excludes receivables and installment paper sold or discounted before maturity, fixed assets (plant and equipment), and parents' investment in

majority-owned foreign subsidiaries.

3/ Capitalized plant and equipment leases are excluded.

4/ Includes both spot and forward exchange rates.

5/ Columns 1 and 3 less columns 2 and 4.

6/ Representative rates on the report date. Canadian dollar and Kingdom pound rates are expressed in U.S. dollars per unit of foreign currency, all others in foreign units per U.S. dollar.

7/ Banks and banking institutions in the United States and their foreign branches and majority-owned subsidiaries. In section VII, foreign branches and majority-owned subsidiaries only.

8/ Excludes capital assets.

9/ Excludes capital liabilities.

10/ Includes both spot and forward exchange contracts.

11/ Columns 3 and 9 less columns 6 and 12.

12/ See footnote 6.

Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing rights (SDRs) based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and allocations are valued on this basis beginning July 1974. Excludes foreign exchange transactions for future and spot delivery. A non-interest-bearing liability to the U.S. Treasury resulting from the transfer to the Exchange Stabilization Fund of foreign currencies drawn from the IMF by the United States.

4/ Represents an adjustment to retained earnings for income that was recorded in fiscal 1986 that had been earned in fiscal 1985.

Note.—Annual balance sheets for fiscal years 1934 through 1940 appear in the 1940 Annual Report of the Secretary of the Treasury and those for succeeding years appear in subsequent reports through 1980. Quarterly balance sheets beginning with Dec. 31, 1938, have been published in the Treasury Bulletin. Data from inception to Sept. 30, 1978, may be found on the statements published in the January 1979 Treasury Bulletin.

Cash Management/ Debt Collection

CASH MANAGEMENT INITIATIVES

Reform '88 Cash Management

Treasury's Financial Management Service/Federal Finance has lead agency responsibility for monitoring and reporting progress on cash management initiatives undertaken by Federal departments and agencies. The overall goal of the program is to improve Government's payments and collections systems, with special attention being directed toward identifying additional application for state-of-the-art technology and expanding the use of other mechanisms, such as lockboxes, automated clearinghouses, and cash concentration systems.

Agencies are providing quarterly reports to Treasury on the status of initiatives. For fiscal years 1983, 1984, and 1985, interest savings tot \$178 million, \$335 million, and \$837 million, respectively.

Interest savings for second-quarter fiscal 1986 and combined inte savings to date for each of the participating agencies are shown below.

Special Reports

CONSOLIDATED FINANCIAL STATEMENTS
OF THE UNITED STATES GOVERNMENT
FISCAL YEAR 1985/PROTOTYPE

THE SECRETARY OF THE TREASURY
WASHINGTON

July 1, 1986

Statement of the
Secretary of the Treasury

The Department of the Treasury is pleased to present these Consolidated Financial Statements disclosing information on the financial condition of the Federal Government for the fiscal year 1985. They have been prepared in conformity with generally accepted accounting principles (GAAP) but remain a prototype document because GAAP reports are not prepared by all Federal agencies. The statements underline the Treasury's commitment to full disclosure of financial information to the public. In recent years, several Federal agencies have developed consolidated GAAP statements, but the Federal sector still trails the progress of State and local governments--at least 25 States now prepare GAAP-based financial statements.

The renewed emphasis within the Federal Government on improving financial management systems has produced additional agency systems capable of reporting under GAAP, and their progress should be seen in the FY 1986 statements. We expect to have a redesigned Governmentwide accounting and reporting system in place for the FY 1987 statements. Other Federal projects include OMB's development of a standardized general ledger to bring consistency to accounting within all agencies and the efforts to expand use of generic systems and off-the-shelf software.

Improvement in the quality and the timeliness of source data will make the Consolidated Financial Statements a more reliable and useful document in the future. We hope that these statements will enhance public understanding of the complex issues involved in managing the Government's financial resources.

One major change in this year's report involves the reclassification of the social security liability for future benefit payments as a contingent liability. This liability, previously included on the Statement of Financial Position, may now be found in the section on Commitments and Contingencies.

James A. Baker, III

**Comptroller General
of the United States**

Washington, D.C. 20548

July 1, 1986

**STATEMENT OF THE UNITED STATES
GENERAL ACCOUNTING OFFICE**

The need for sound financial management is one of the most critical issues facing the federal government today. With annual spending now exceeding 1 trillion dollars and current budget deficits of over \$200 billion, the federal government must develop modern financial management systems. These systems are necessary for efficient and effective decision making about the size and affordability of government programs and for producing financial reports which accurately portray the government's operations and financial condition.

This consolidated financial report provides useful information, that is not available elsewhere, about the financial condition and operations of the federal government as a whole; it is supplementary to information contained in budget documents. The consolidated statements disclose the magnitude of the government's assets and future claims on government resources not fully disclosed in the budget. This includes information on the government's inventories and fixed assets as well as its pension liabilities, and the size of the public debt.

The amount of liability for social security benefits, which had been included in the Statement of Financial Position in previous consolidated financial reports, has been eliminated by Treasury from the Statement in this report and included in a footnote instead. Social security benefits is the single largest liability of the federal government. In 1985 the liability amounted to over 2 trillion dollars and would have represented about 40 percent of total liabilities had it been reported in the Statement of Financial Position. At present we are not sure whether social security should be a liability or only disclosed in a footnote. The nature of social security is perhaps the most contentious issue in federal financial reporting and is currently under study to determine how best to report it in the consolidated financial statements.

Although this report is a prototype, it is a step toward a goal we strongly support--the annual publication of formal consolidated financial statements of the United States government which can sustain the scrutiny of an independent audit. Achieving this goal will be a significant milestone towards building strong viable financial management systems that will serve the needs of government and help restore public confidence in the management of the government.

Agency summary level statements, along with additional supplemental information, form the basis for preparing this consolidated report. Our ultimate objective is to establish credibility of the financial

statements and to be able to audit them and render a favorable opinion on their fair presentation. To achieve this objective, however, we will first audit the underlying agency statements. We have begun this process with pilot audits at selected major federal agencies.

We are convinced that the need for such an audit is critical since it would give assurance that the information is reliable as well as adding discipline to the overall financial management systems, including the underlying reports needed to manage government programs. Our limited audit work has indicated that some of the numbers in these consolidated statements can be more fairly stated. A primary example of this is the receivables and related allowances in the consolidated statement of financial position. Based on the work we have done, we believe the allowance for losses is substantially understated resulting in a significant overstatement of net receivables and a significant understatement of the costs of the related programs. Likewise, we believe the estimated losses on loan guarantees and insurance is significantly understated.

Regardless of the current shortcomings, these consolidated financial statements are critical to improving financial management. They are the underpinning for budget and management reports and encourage agencies to improve their underlying systems. Although improvements have been and are being made, much still remains to be done to produce formal consolidated statements that can be audited. Currently, the Department of the Treasury estimates certain amounts contained in the accompanying statements based on available data. One of the major improvements undertaken by the Treasury, however, has been the development of a new governmental accounting and reporting system which will facilitate the preparation of the financial statements when it becomes operational, primarily in the consolidation of information received from agencies that the Treasury has estimated for this year's statements.

Treasury also intends to further improve the formats and presentation of the consolidated financial report. We at GAO are committed to achieving the goal of audited consolidated federal financial statements and we are working with the Treasury and the Office of Management and Budget to help make it a reality in the near future. We are particularly interested in further revisions planned for the formats and presentation of the statements and will work closely with Treasury in this endeavor.

As with earlier reports of this nature, we have not audited the accompanying statements and accordingly, we do not express an opinion on them.

Charles A. Bowsher
Comptroller General
of the United States

INTRODUCTION

The reformatting of the Consolidated Financial Statements, begun in the FY 1984 report to more closely approximate corporate annual reports to stockholders, has been continued in the FY 1985 CFS. Five supplemental tables, Flow of Funds Projections, Financial Statements of the U.S. Government Restated for General Price-Level Changes, Effect of Individual and Corporate Tax Benefits on Federal Revenues, Additions to Non-Federal Economic Resources, and Federal Facts and Figures, have been eliminated because these tables were derived entirely from other published reports. For the convenience of the reader, the sources of information for these tables have been listed at the end of the report.

The Financial Highlights and Supplemental Tables have been prepared from data contained in the CFS and are intended to expand significant items in the statements. The reconciliation of accrual operating results to the cash deficit has been augmented by the addition of a summary of cash basis receipts and outlays to better contrast the different results produced by each accounting method. Throughout the CFS, the graphic representations of data have been improved to provide a pictorial overview of data relationships which the user may explore in greater detail in the statements.

The detail of line items in the Statement of Financial Position is now contained in Notes to Financial Statements, and the Statement of Operations presents only expenses by agency which now makes the CFS format consistent with other Treasury reports. With the exception of the reclassification of the accrued actuarial liability for future social security benefit payments from a balance sheet liability to a contingent liability, the statements and the methodology used to prepare them remain unchanged.

FINANCIAL HIGHLIGHTS

Revenues and expenses

The following graphs show revenues and expenses for fiscal years 1975 through 1985, and the major categories of revenues by source and expenses by function for fiscal year 1985. These amounts, taken from the Statement of Operations, have been calculated on an accrual basis and differ from those reported on the cash basis in other reports. The data supporting the graph of expenses by function has been estimated based on calculated amounts in prior years.

TOTAL REVENUES AND TOTAL EXPENSES FY 1975-85

MAJOR SOURCES OF REVENUES

MAJOR EXPENSES BY FUNCTION

Major categories of assets

Assets are resources owned by the Federal Government that are available to pay liabilities or provide public services in the future. The following chart is derived from the Statement of Financial Position and depicts the major categories of assets for FY 1985 as a percent of total assets. The components for each of these major categories are contained in Notes to Financial Statements.

MAJOR CATEGORIES OF ASSETS

Assets, liabilities, and accumulated position

The following graph depicts the assets, liabilities, and accumulated position reported in the Statement of Financial Position for fiscal years 1981 through 1985. Accumulated position, the excess of liabilities over assets, is shown below the base line to emphasize Federal equity claims or interests in assets.

Sources and uses of funds

The charts below have been derived from the Statement of Changes in Financial Position for FY 1985 and show the resources provided during the period and the uses to which they were put. This statement is not intended to substitute for either the Statement of Financial Position or the Statement of Operations; instead, it presents additional useful information not included in those reports.

The accompanying notes are an integral part of this statement.

Notes to Financial Statements

1. Summary of general accounting policies

Principal financial statements.—These consist of a Statement of Financial Position, a Statement of Operations, and a Statement of Changes in Financial Position. Because of their developmental nature, only the most significant changes in format are disclosed in the Notes.

Principles of consolidation.—The statements include the accounts of all significant agencies and funds included in the budget of the U.S. Government. Agencies such as the U.S. Postal Service and the Federal Financing Bank, classified as off-budget (not included in calculating the budget surplus or deficit), have also been included in the statements because they are wholly owned and are clearly within the scope of Government operations. Government-sponsored enterprises such as the Federal land banks are excluded because they are privately owned. Significant intragovernmental transactions of an identifiable nature were eliminated in consolidation.

Estimates of source data.—Because actual amounts as of September 30, 1985, were not available, the Statement of Financial Position contains certain estimated amounts. The amounts have been estimated by calculating a simple average of the change in reported amounts for the fiscal years 1982, 1983, and 1984. In instances where the estimate is the basis for generating subsequent amounts (e.g., accumulated depreciation is derived from amounts for property and equipment), the subsequent amounts should also be considered estimates.

Fiscal year.—The fiscal year of the U.S. Government ends on September 30.

Reclassification and adjustment.—For comparability, certain fiscal 1984 data are reclassified where appropriate to conform to the financial statement presentation for fiscal 1985.

2. Cash and monetary reserves

	Sept. 30, 1985	Sept. 30, 1984
	(\$ billions)	
Operating cash in the Treasury	17.1	30.4
International monetary reserves:		
Gold (monetized at the statutory price of \$42.22 per ounce)	11.1	11.1
Special drawing rights	6.8	5.6
U.S. reserve position in the International Monetary Fund	11.7	11.6
Other cash:		
Accountability for cash and other assets held outside the Treasury	7.3	6.5
Convertible foreign currencies (at market value)	8.7	6.0
Other U.S. Treasury monetary assets	1.3	0.9
Nonpurchased foreign currencies	0.6	0.7
	64.6	72.8

3. Receivables

	Sept. 30, 1985	Sept. 30, 1984
	(\$ billions)	
Accounts receivable	24.8	31.9
Accrued taxes receivable	39.6	30.2
Loans receivable	253.0	229.1
Advances and prepayments	7.0	10.2
	<u>324.4</u>	<u>301.4</u>

All receivables are shown net of reported allowances for losses. The September 30, 1985, total for taxes receivable represents \$36.1 billion for delinquent taxes and \$3.5 billion for accrued corporate taxes.

Outstanding loans and allowances have been recorded as reported by the various lending agencies. The allowances for losses are presumed to be understated and they are under study.

4. Inventories

	Sept. 30, 1985	Sept. 30, 1984
	(\$ billions)	
Goods for sale	64.5	35.6
Work in process	2.6	2.4
Raw materials	17.5	15.8
Materials and supplies for Government use	83.4	81.1
Stockpiled materials and commodities	17.5	16.5
	<u>185.5</u>	<u>151.4</u>

Inventories include nondepreciable personal property and are stated at cost. The inventory accounts do not include the weapons stockpile since the extent of this inventory is classified. Totals for the Department of Defense for fiscal 1985 and 1984 were \$129.8 billion and \$109.6 billion, respectively.

5. Property and equipment

	Sept. 30, 1985	Sept. 30, 1984
	(\$ billions)	
Land	14.8	10.3
Buildings, structures, and facilities	153.7	137.0
Military hardware	350.2	330.2
Equipment	92.9	88.6
Construction in progress	38.4	37.5
Leasehold improvements	2.3	2.2
Other	3.8	5.8
	<u>656.1</u>	<u>611.6</u>

Land is valued at the cost paid by the Government. The cost of land acquired through donation, exchange, bequest, forfeiture, or judicial process is estimated by the General Services Administration at amounts the Government would have paid if purchased at the date of acquisition. Pending the study of valuation methods, the Outer Continental Shelf and other offshore lands and the 655.7 million acres of public domain land have not been included.

Buildings, structures, and facilities include all real property owned by the Federal Government except land. The amounts for the Department of Defense for fiscal years 1985 and 1984 are \$60.8 billion and \$58.5 billion, respectively.

Military hardware and equipment are recorded at acquisition cost and include only depreciable property currently in use or in usable condition.

6. Accumulated depreciation

Most Government agencies do not calculate depreciation on property and equipment; therefore, accumulated depreciation is estimated on a straightline basis, from available information. The useful lives applied to each classification of asset are:

Buildings, structures, and facilities	50 years
Ships and service craft	30 years
Industrial plant equipment	20 years
All other depreciable assets	10 years

7. Borrowing from the public

The amount of Federal debt outstanding is reported net of unamortized premiums and discounts. The amounts reported for fiscal years 1985 and 1984 reflect a reduction for intragovernmental holdings of \$318.1 billion and \$264.7 billion, respectively. As of September 30, 1985, approximately 14.0 percent was held by foreign and international investors.

8. Accrued pension, retirement, and disability plans

The accounting for accrued pension, retirement, and disability plans is subject to several different assumptions, definitions, and methods of calculation. Each of the major plans is summarized below.

	Sept. 30, 1985	Sept. 30, 1984
	(\$ billions)	
Military personnel	437.1	422.3
Civilian employees	561.2	537.0
Veterans compensation	223.7	221.8
Federal employees compensation	11.9	11.3
Other pension plans	18.1	17.9
	<u>1,252.0</u>	<u>1,210.3</u>

Military personnel and civilian employees: The liabilities under these two pension plans represent a major portion of the total unfunded liability which is to be reported under Public Law 95-595. In prior years, the accrued pension liabilities at September 30 represented the actuarial present value of accumulated plan benefits and were calculated in accordance with instructions developed jointly by the General Accounting Office and the Office of Management and Budget under the provisions of Public Law 95-595.

The actuarial liabilities as of September 30, 1985, were not available for either plan and have been estimated in accordance with the methodology outlined in Note 1.

Veterans compensation: Represents the present value of projected annual benefit payments.

Federal employees compensation: Represents estimated future costs for approved Federal Employees Compensation Act cases.

Other annual pension reports received from plans covered by Public Law 95-595 are reported in the same manner as military personnel and civilian employees described above.

9. Social security

In prior years, a liability equalling the amortized portion of the unfunded liability for the social security program was included on the Statement of Financial Position. The unfunded liability is determined annually and the change is amortized over a 30-year period. As of September 30, 1985, the unfunded liability for social security was \$4,647.4 billion of which \$2,059.8 billion was recorded through amortization. The amounts for September 30, 1984, were \$4,207.7 billion and \$1,911.8 billion, respectively. The liability represents the present value of the projected excess of future benefit payments to present participants over the contributions still to be made by the same group and their employers for the next 75 years. This liability has been reclassified as a contingent liability and may be found in the supplemental table, Commitments and Contingencies.

The Congress and the trustees of the funds prepare estimates based on a different financing method they regard as more appropriate for social insurance programs. The actuarial amounts below are calculated on the assumption that future young workers will be covered by the program as they enter the labor force.

	Sept. 30, 1985	Sept. 30, 1984
	(\$ billions)	
Actuarial liabilities	12,328.9	11,655.8
Actuarial assets	12,060.1	11,693.2
Actuarial surplus (or deficit)	<u>-268.8</u>	<u>37.4</u>

10. Contingent liabilities for guarantee and insurance programs

A number of agencies do not make any provision for estimated loss on loan guarantees and insurance, while others provide minimal estimates of losses.

11. Accumulated position

	Sept. 30, 1985	Sept. 30, 1984
	(\$ billions)	
Accumulated position beginning of period	-1,827.8	-1,687.5
Current period results	<u>-192.6</u>	<u>-140.3</u>
Accumulated position end of period	<u>-2,020.4</u>	<u>-1,827.8</u>

The accumulated positions as of September 30, 1984 and 1985, have been restated to reflect the elimination of the actuarial liability for future social security benefits and the associated noncash provision for the increase in the liability between years.

12. Contingencies

Several Government agencies insure businesses and individuals against various types of risks. The amount of insurance coverage in force, representing the maximum risk exposure to the Government, is \$2,659.1 billion as of September 30, 1985.

The Government also guarantees loans by non-Government enterprises to businesses and individuals. These guarantees become liabilities of the Government only when it is required to honor its guarantees. Loan guarantees in force at September 30, 1985, are \$668.7 billion.

Supplemental Tables

SUMMARY OF ACCOUNTS AND LOANS RECEIVABLE DUE FROM THE PUBLIC

Total accounts receivable amounted to \$77.2 billion in FY 1985, an increase of \$13.7 billion from FY 1984. Total loans receivable amounted to \$288.1 billion in FY 1985, an increase of \$27.0 billion from FY 1984. Graphically depicted below are summaries by agency of accounts and loans receivable data.

ACCOUNTS RECEIVABLE

Total: \$77.2 billion

LOANS RECEIVABLE

Total: \$288.1 billion

The Debt Collection Act of 1982 (31 U.S.C. 3719) requires the Director of the Office of Management and Budget, in consultation with the Secretary of the Treasury and the Comptroller General of the United States, to establish regulations requiring each agency with outstanding debts to prepare and transmit to OMB and the Treasury a report which summarizes the status of accounts and loans receivable managed by each agency. These receivables result from a wide range of Federal activities including tax assessments; sale of Government services such as satellite launchings; sale of Government goods such as natural resources from Federal lands; overpayments to annuitants; and various loan programs such as student and housing loans. The data in the reports will enable the Federal Government to improve collection activity.

The table which follows supports the balance sheet receivables, "Accounts receivable" and "Loans receivable" which are shown net of allowances, taxes receivable, and intragovernmental holdings. The information in the table is based on data submitted by Federal agencies to the Treasury and published annually in the Treasury Bulletin.

FEDERAL DEBT

Total net borrowing from the public amounted to \$1,498.8 billion in FY 1985, an increase of \$199.3 billion from FY 1984. This chart has been presented to graphically show the increase in net borrowing from the public.

NET BORROWING FROM THE PUBLIC WITH INTEREST EXPENSE FY 1975-85

The Federal Debt schedule which follows reflects information on the borrowing of the Federal Government needed to finance the Government's operations. This schedule directly supports the balance sheet caption, "Borrowing from the public," which is shown net of intragovernmental holdings and unamortized premium or discount. Intragovernmental holdings represent that portion of the total Federal debt held by Federal entities, including the major trust funds. The distribution of 1985 net borrowing from the public by major source category is graphically depicted.

Federal Debt as of September 30, 1985

NET BORROWING BY MAJOR SOURCE CATEGORY

COMMITMENTS AND CONTINGENCIES

In FY 1985, total commitments amounted to \$472.1 billion and total contingencies amounted to \$5,448.1 billion. The charts below show the percentage distribution of 1985 commitments and contingencies by source category.

COMMITMENTS

Total: \$472.1 billion

CONTINGENT LIABILITIES (Maximum risk exposure)

Total: \$5,448.1 billion

The table that follows shows two basic types of information: the maximum potential liabilities (commitments) and the anticipated liabilities (contingencies) which it is reasonably certain, based on experience and other factors, will occur. The anticipated liabilities are the equivalent to allowances for losses.

A commitment represents an obligation to pay for goods or services upon delivery under a contractual arrangement. Commitments shown in the table are represented by long-term contracts for which appropriations have not yet been provided by the Congress, and undelivered orders represent obligations of currently available appropriations.

A contingency represents a possible exposure to a liability depending upon the outcome of uncertain future events or circumstances. Contingencies are stated in terms of the maximum risk exposure without regard to existing contingent assets which would be available to offset potential losses. The actuarial liability for future social security benefits, previously disclosed on the balance sheet, has been included with other contingencies because the probability that these payments will be continued is high. "Contingent liabilities" supports the balance sheet liability "Contingent liabilities for guarantee and insurance programs" and represents the anticipated liability.

Total contingencies	<u><u>5,448.1</u></u>	
Total contingent liabilities		<u><u>8.7</u></u>

* Less than \$50 million.

SOURCES OF DISCONTINUED TABLES

The supplemental tables listed below have been discontinued. Data may be found in other Government publications as indicated.

Flow of Funds Projections

This table presented actual and projected cash receipts and outlays for a 5-year period and reflected what could happen to cash basis revenues and expenditures considering certain basic assumptions reflected in the budget. The information may be found in the Historical Tables, Budget of the United States Government, Fiscal Year 1987, Tables 2.1 and 3.3.

Financial Statements of the U.S. Government Restated for General Price-Level Changes

This table restated the historical values contained in the Statement of Financial Position and Statement of Operations to account for changes in the general purchasing power of the dollar and provided comparability between years by equating all dollar values to the current level of purchasing power. The preparation of this information has been discontinued until the accounting profession agrees upon the utility of such statements and an appropriate and consistent methodology to be employed. An overview of the accounting-for-inflation theory as well as the current conversion factors calculated by the Bureau of Labor Statistics, Department of Labor, may be found in the Financial Accounting Standards Board, Statement No. 33, Financial Reporting and Changing Prices (FAS 82 and all updates), and the Consumer Price Index for All Urban Consumers (CPI-U), respectively.

Effect of Individual and Corporate Tax Benefits on Federal Revenues

This table presented the approximate cost of tax benefits. It showed revenue losses attributed to tax law provisions that made allowances for income exclusions, income deferrals, exemptions or deductions from gross income, and special tax rates or deferrals. The information may be found in the Special Analyses, Budget of the United States Government, Fiscal Year 1987, Table G-2.

Additions to Non-Federal Economic Resources

This 3-year table showed how the Government used its resources to add to the Nation's physical and human resources in order to enhance productivity and to increase the assets of private institutions or State and local governments. This information may be found in the Special Analyses, Budget of the United States Government, Fiscal Year 1987, Tables D-5, D-7, D-8, and K-2.

Federal Facts and Figures

This table provided benchmarks to use in making comparisons and identifying relationships between the financial statements and tables. Information on personal income, employment, GNP and CPI-U may be found in the Survey of Current Business prepared by the Bureau of Economic Analysis, U.S. Department of Commerce. Estimates of population may be found in the Statistical Abstract of the United States, prepared by the Bureau of the Census, U.S. Department of Commerce. Gross Federal debt information may be found in the Treasury Bulletin, Table FD-1, prepared by Financial Management Service, Department of the Treasury. Information on the number of taxpayers and the amount of income taxes paid may be found in IRS Advanced Data, 1984 Individual Income Tax Returns, Table 1. Borrowing from the public, interest, and expense information may be found in the Statement of Financial Position and the Statement of Operations within this report.
