## ADDITIONAL FINANCIAL MANAGEMENT SERVICE RELEASES ON FEDERAL FINANCES

*Sold on a subscription basis only (exceptions noted) by the Superintendent of Documents,  
U.S. Government Printing Office, Washington, D.C. 20402:†*

- **Daily Treasury Statement.** Provides summary data on the Treasury's cash and debt operations for the Federal Government. Published each Federal working day. Subscription price: \$174 per year (domestic), \$217.50 per year (foreign).
- **Monthly Treasury Statement of Receipts and Outlays of the United States Government.** Provides Federal budget results, including receipts and outlays of funds, the surplus or deficit, and the means of financing the deficit or disposing of the surplus. Preparation based on agency reporting. Subscription price: \$22 per year (domestic), \$27.50 per year (foreign).
- **Consolidated Financial Statements of the United States Government** (annual). Provides information about Government financial operations on the accrual basis. Single copy price: \$2.50.
- **United States Government Annual Report and Appendix.** Annual Report presents budgetary results at the summary level. Appendix presents the individual receipt and appropriation accounts at the detail level. Annual Report single copy price: \$2.50; Appendix free from Financial Management Service.

*† Subscription order form on inside back cover of this issue.*

**ON THE COVER:** *A line drawing from an old photograph of  
Treasury's West Portico, looking toward the Washington Monument.*

## TREASURY ISSUES

# The Strengthened Debt Strategy

Nicholas F. Brady

Last spring this Committee agreed on major innovations in the debt strategy in order to reinforce the resolve of debtor countries to pursue their economic reform efforts and to encourage debtor countries and commercial banks to negotiate new financial packages that incorporate debt and debt service reduction in addition to new money. It should be a source of satisfaction for all of us that, over a relatively short period of time, we have been able to turn the broad outline of the strengthened strategy into clear progress in individual countries.

---

***Priority needs to be given by all parties to negotiating agreements that assure financial support for those countries carrying out significant reform programs.***

---

Our experience to date reaffirms that the basic thrust of this strategy is sound and has benefits for both debtors and creditors. Incentives for reform in debtor countries have been increased; there are signs that flight capital will return to countries making major adjustment efforts; and the strategy is working to improve both the quality of creditors' assets and creditworthiness in debtor countries.

Our progress is due to the cooperation of many parties. We should pay special thanks to the International Monetary Fund (IMF) and World Bank for moving promptly to adopt guidelines governing their support for debt and debt service reduction and to help a number of debtor countries develop medium-term economic reform programs as the basis for extending this support. With these programs in place, and prompt action by the Paris Club, the banks and debtor nations have been able to negotiate financial support packages. Both Mexico and the Philippines have reached agreement with their commercial bank advisory committees. We look forward to the early completion of these understandings as banks make the choice among the options agreed.

However, to be successful, the strategy must also reach other debtors. Several other countries are now discussing financial packages with their commercial bank creditors. We are optimistic that these discussions will lead to agreements that take advantage of the new debt strategy.

Priority needs to be given by all parties to negotiating agreements that assure financial support for those countries carrying out significant reform programs. This will require the engagement of top-level policy people on both sides.

Perhaps it will also require improvements in the process presently followed in negotiations, including the efficacy of the current Bank Advisory Committee structure.

However, the main challenge at the moment appears to be the problem of unrealistic expectations--both among the debtor countries and the banks. In one sense, improving expectations was essential to restoring forward momentum in the debt strategy. Progress had come to a halt, and there was a growing sense of hopelessness. In another sense, however, we must recognize that rising expectations need to be tempered by realism on the part of both debtor countries and the banks. This is part of the negotiating process--but in this case time is money. Excessive expectations can only promote delays, increase the risk of breakdown in negotiations, and ultimately raise the economic costs both to the banks and debtor countries.

The foundation for external financial support--and for improving growth in debtor nations--is the adoption of sound macroeconomic and structural reform programs. These should include measures which improve the climate for foreign and domestic investment and encourage the repatriation of flight capital. Workable debt/equity programs can also play a useful role in this process.

IMF and World Bank technical and financial support for these reform efforts is critical to the success of the debt strategy. I continue to believe both institutions can do more to address the problem of capital flight. Mexico's experience after agreement was reached with its creditors is a compelling example of the result we should seek. This is a strong reason why debtor countries should accelerate their implementation of policies that help repatriate flight capital and liberalize domestic capital markets. Bold measures will produce big results and reduce the need for external bank financing. It will also lower financing costs and improve the management of external obligations.

## Conclusion

In conclusion, the process that we have put in place over the past 6 months is working. I am heartened by the decisive actions taken to date, but we must persevere. Important work remains. With continued cooperation, we can extend the beachhead. Working together, the debt problem can be made better, and we can advance our ultimate objectives of sustained growth in the developing world and a stronger international financial system. ◇

*These were remarks by the Secretary of the Treasury, September 24, 1989, before the Interim Committee of the International Monetary Fund.*

# The Outlook for the Savings and Loan Industry after the Financial Institutions Reform, Recovery, and Enforcement Act of 1989

*Robert R. Glauber*

I am delighted to be here with you today to discuss some major provisions in the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (FIRREA), particularly as they relate to the outlook for the savings and loan industry.

## FIRREA's Focus

The responsibility to ensure that the thrift crisis does not reoccur required the administration to craft legislation that focused on four major areas--improved capital standards, structural reform, enhanced enforcement, and resolution of insolvent thrifts.

Improved capital standards focused on changing the incentive structure under which thrifts are owned and managed, requiring private sector capital at risk up front. In addition, higher premiums for commercial banks and thrifts will strengthen insurance fund integrity. Both changes increase the resources available before taxpayer funds are called on.

Structural reform focused on the separation of the Federal Savings and Loan Insurance Corporation (FSLIC) insurance function from its chartering function by assigning the former to the Federal Deposit Insurance Corporation (FDIC) and the latter to a newly reconstituted Office of Thrift Supervision (OTS), which is located in the Treasury and operates under Treasury's general oversight.

Enhanced enforcement provisions made available \$65 million a year for 3 years to the Justice Department to help it better address financial institution fraud and other illegal activities. Maximum legal penalties for such actions were also greatly increased, in some cases to \$1 million per day.

Finally, the need to resolve insolvent thrifts resulted in the creation of the Resolution Trust Corporation (RTC), with its policies to be established and monitored by the Oversight Board. Industry and taxpayer funds totaling \$50 billion are to be spent to dispose of the institutions that fail over the next 3 years and their assets.

## Oversight Board and RTC Accomplishments

FIRREA was enacted just 6 weeks ago, and the resolu-

tion process is well underway. The RTC and the Oversight Board have already accomplished much. To clarify the role of each of these agencies, let me take a moment to describe their respective duties and responsibilities.

The RTC, which will be managed exclusively by the FDIC, will execute the thrift cleanup. The RTC will determine the prioritization of the thrift caseload, carry out the resolutions, and sell any residual assets. In doing so, it must fulfill the legislation's objectives of (1) maximizing returns on the sale of institutions and assets, (2) minimizing the effects of its activities on distressed local markets, and (3) maximizing the affordability and availability of low-income housing. The RTC, therefore, must meet objectives which will require unavoidable tradeoffs.

The Oversight Board, chaired by the Secretary of the Treasury, provides the policies to guide the RTC's activities, furnishes funds, and monitors the RTC's execution of its responsibilities. The Oversight Board does not work on case-specific matters.

---

***The RTC has used its funds to close, or transfer the deposits of, 24 insolvent thrifts and to lower the cost of funds at other institutions.***

---

Here are some of the RTC and the Oversight Board's accomplishments to date:

- The Oversight Board has authorized and released to the RTC over \$18 billion for thrift resolutions, liquidity needs, and replacement of high cost funds. These funds are available from the FIRREA funding plan, \$20 billion in Treasury and industry funding in fiscal 1989, and \$30 billion to be raised by REFCORP in 1990 and 1991. The funding plan makes dollars immediately available to resolve thrift cases, retains the full industry "self-help" contribution, and avoids dismantling Gramm-Rudman-Hollings budget discipline.

---

*These were remarks by the Under Secretary of the Treasury for Finance, September 25, 1989, before the National Council of Savings Institutions.*

## ECONOMIC POLICY

- The RTC has used its funds to close, or transfer the deposits of, 24 insolvent thrifts and to lower the cost of funds at other institutions.

- The Oversight Board has issued 12 interim policies for the RTC, covering topics ranging from financial procedures to the terms of RTC funding of thrift resolutions. One interim policy just adopted last Thursday deals with limitations on guarantees. It would allow the RTC to enter into asset guarantees, capital loss coverage, or asset puts to accommodate completion of an acquiror's due diligence but for no longer than 6 months. This policy is to limit the RTC's financial risk and is in sharp contrast to earlier FSLIC guarantees that stretched up to 10 years.

- The Oversight Board has established a joint Oversight Board-RTC policy development task force to make recommendations concerning strategies, policies, and goals for the RTC as well as the strategic plan for the RTC which the Oversight Board must submit to Congress by December 31, 1989.

- Most importantly, the Oversight Board and the RTC have successfully begun an orderly, cooperative, and professional working relationship. This may be the most significant initial step in getting the job done well.

---

*The benefits of FIRREA are appearing already--the cost of funds for thrifts is declining, and the prices of many institutions' stocks have begun to rise.*

---

### Questions about FIRREA

Although the thrift resolution process is well underway, some have raised certain ongoing questions about FIRREA. First, with regard to capital standards, a dispute apparently exists as to the meaning of the leverage limit capital standard. FIRREA requires that S&Ls maintain core capital to assets of no less than 3 percent and that the standard be no less stringent than that for national banks.

Chairmen Gonzalez and Riegle have recently sent letters to the Treasury setting forth their views that the thrift standard in FIRREA is different from the existing Office of the Comptroller of the Currency standard of 5.5-percent primary capital to assets and 6-percent total capital to assets.

The final regulations establishing the thrift capital standard must reflect a careful reading of both the statutory language and congressional intent. OTS is currently drafting these regulations, and after receiving Treasury review and approval, they will become effective by the statutory deadline of December 7, 1989.

### RTC Caseload and Adequacy of Funding

Second, some have raised concern whether FIRREA provides for adequate funding for case resolutions. We expect the RTC to merge or liquidate approximately 450 to 550 insolvent thrifts, with total assets of about \$300 billion. These are institutions that have failed or will fail from January 1989 through August 1992.

The \$50 billion available in the legislation is in line with estimates of the size of the problem from the FDIC, Federal Reserve, and OTS; also, the General Accounting Office did not determine this amount to be inadequate. The numbers and assumptions underlying this estimate were examined fully during Congress' consideration of the bill and were not adjusted.

The ultimate cost of resolving such a large number of institutions depends on the relative stability of a number of factors--for example, future interest rates, real economic growth, inflation, real estate prices. Should an unexpected economic scenario occur, such as a sharp recession or a significant rise in interest rates, which would markedly increase the cost of the RTC resolution task--either by increasing the cost of resolving the institutions or by adding a large number of presently solvent institutions to the caseload--some portion of an additional \$24 billion in FIRREA funding would be available for resolutions from 1992-99. This amount is in addition to about \$9 billion which is allocated to capitalizing Savings Association Insurance Fund.

What is most important, however, is that the RTC gets on with the job, for delay is costly. To ensure additional funds are available for resolutions, Treasury expects to begin marketing REFCORP bonds early in the next quarter. At the administration's request, the Securities and Exchange Commission (SEC) has exempted the REFCORP bonds from registration under the 1933 Securities Act and from regulation of trading under the 1934 Exchange Act. The exemptions recognize that the credit of the United States stands behind REFCORP interest, industry funds having defeased the principal. That will permit the bonds to trade as Government securities. The marketing of REFCORP bonds by Treasury and the SEC exemptions should further reduce the spread between Treasury securities and REFCORP bonds.

### The Future for Thrifts

What of the future for thrifts? The problem institutions may make better press copy, but from a longrun perspective the more relevant statistic is the large number of profitable, well-managed savings and loans operating today.

OTS reported that, at the end of the second quarter of 1989, approximately 2,000 thrifts were profitable--over 80 percent of all thrifts with tangible capital. These S&Ls had an average return on assets of a respectable 56 basis points. And raising individual thrift capital levels will lead to new capital from outside the industry and consolidation within.

## ECONOMIC POLICY

Will a thrift industry survive? I think the answer is yes, a system of housing finance will survive. Although no one knows the precise future form of the industry, it will largely depend on providing a product the customer wants at a reasonable price.

We can be sure that demand will continue to exist for home mortgages, as well as for the other financial products that S&Ls offer. Therefore, it seems reasonably clear that there will be institutions successfully and profitably specializing in housing finance.

The well-capitalized, well-managed savings and loans that provide these services surely will be the greatest beneficiaries of FIRREA. The industry that emerges from the resolution process will be one with an attractive and viable charter, with a clean, recapitalized insurance fund, and one prepared to provide its traditional support for home financing. The benefits of FIRREA are appearing already--the cost of funds for thrifts is declining, and the prices of many institutions' stocks have begun to rise.

Despite the landmark changes in thrift supervision and regulations, the legislation preserves many of the special benefits of being a savings association.

- Thrifts can still engage in insurance and real estate brokerage activities denied to commercial banks.
- Thrifts can continue to diversify their portfolios, which will help reduce their traditional vulnerability to interest rate risk.

- Thrifts will retain special access to Federal Home Loan Bank advances, even though commercial banks and credit unions are now allowed to join the system.

### Future Organization of the Financial Services Industry

And what of the broader financial landscape? It is logical that as financial institutions continue to diversify their portfolios--and the administration is actively supporting responsible financial reform legislation that would encourage this process--certain types of institutions will group together. This grouping may not be based on artificial distinctions, such as membership in a particular deposit insurance fund, but rather on the financial services the institutions provide.

I expect that community bankers could well find the thrift charter attractive given the markets that they serve. Likewise, some of the large savings and loans might have more in common with their commercial bank counterparts.

### Conclusion

We have discussed today the tangible impact of FIRREA on the future of the thrift industry. However, the legislation also has an effect at a more intangible level--what the President called "restoring public confidence." This may be one of the bill's most important legacies, since Americans must have faith in the savings and loan industry in order for it to serve the purpose for which it was created--financing the American dream of homeownership. ◇

## FINANCIAL OPERATIONS

# FEDERAL FISCAL OPERATIONS

## INTRODUCTION

### Background

Section 114 of the Budget and Accounting Procedures Act of 1950 (31 U.S.C. 3513a) requires the Secretary of the Treasury to prepare reports on the financial operations of the U.S. Government.

The first three Federal fiscal operations (FFO) tables are published quarterly and cover 5 years of data, estimates for 2 years, detail for 13 months, and fiscal year-to-date data. The tables are designed to provide a summary of data relating to Federal fiscal operations reported by Federal entities and disbursing officers, and daily reports from the Federal Reserve banks. These reports detail accounting transactions affecting receipts and outlays of the Federal Government and off-budget Federal entities, and their related effect on the assets and liabilities of the U.S. Government. Data used in the preparation of tables FFO-1, FFO-2, and FFO-3 is derived from the Monthly Treasury Statement of Receipts and Outlays of the United States Government.

Budget authority usually takes the form of "appropriations" which permit obligations to be incurred and payments to be made. Most appropriations for current operations are made available for obligation only during a specified fiscal year (annual appropriations). Some are for a specified longer period (multiple-year appropriations). Others, including most of those for construction, some for research, and many for trust funds, are made available for obligation until the amount appropriated has been expended or until the objectives have been attained (no-year appropriations).

Budget authority can be made available by Congress for obligations and disbursement during a fiscal year from a succeeding year's appropriations (advance funding). For many education programs, Congress provides forward funding--budget authority made available for obligation in one fiscal year for the financing of ongoing grant programs during the succeeding fiscal year. When advantageous to the Federal Government, an appropriation is provided by Congress that will become available 1 year or more beyond the fiscal year for which the appropriation act is passed (advance appropriations). Included as advance appropriations are appropriations related to multiyear budget requests.

When budget authority is made available by Congress for a specific period of time, any part not obligated during that period expires and cannot be used later. Congressional actions that extend the availability of unobligated amounts that have expired or would otherwise expire are known as reappropriations. The amounts involved are counted as new budget authority in the fiscal year of the legislation in which the reappropriation action is included, regardless of when the amounts were originally appropriated or when they would otherwise lapse.

**Outlays.**--Obligations generally are liquidated by the issuance of checks or the disbursement of cash; such payments are called outlays. In lieu of issuing checks, obligations also may be liquidated (and outlays recorded) by the accrual of interest on public issues of Treasury debt securities (including an increase in the redemption value of bonds outstanding); or by the issuance of bonds, debentures, notes, monetary credits, or electronic payments. Refunds of collections generally are treated as reductions of collections, rather than as outlays. However, payments for earned-income tax credits in excess of tax liabilities are treated as outlays rather than as a reduction in receipts. Outlays during a fiscal year may be for payment of obligations incurred in prior years or in the same year. Outlays, therefore, flow in part from unexpended balances of prior year budget authority and in part from budget authority provided for the year in which the money is spent. Total outlays include both budget and off-budget outlays and are stated net of offsetting

collections.

**Receipts.**--Receipts reported in the tables are classified into the following major categories: (1) budget receipts and (2) offsetting collections. Budget receipts are collections from the public that result from the exercise of the Government's sovereign or governmental powers, excluding receipts offset against outlays. These collections, also called governmental receipts, consist mainly of tax receipts (including social insurance taxes), receipts from court fines, certain licenses, and deposits of earnings by the Federal Reserve System. Refunds of receipts are treated as deductions from gross receipts.

Offsetting collections are from other Government accounts or the public that are of a business-type or market-oriented nature. They are classified into two major categories: (1) offsetting collections credited to appropriations or fund accounts, and (2) offsetting receipts (i.e., amounts deposited in receipt accounts). Collections credited to appropriation or fund accounts normally can be used without appropriation action by Congress. These occur in two instances: (1) when authorized by law, amounts collected for materials or services are treated as reimbursements to appropriations and (2) in the three types of revolving funds (public enterprise, intragovernmental, and trust); collections are netted against spending, and outlays are reported as the net amount.

Offsetting receipts in receipt accounts cannot be used without being appropriated. They are subdivided into two categories: (1) proprietary receipts--these collections are from the public and they are offset against outlays by agency and by function, and (2) intragovernmental funds--these are payments into receipt accounts from governmental appropriation or fund accounts. They finance operations within and between Government agencies and are credited with collections from other Government accounts. The transactions may be intrabudgetary when the payment and receipt both occur within the budget or from receipts from off-budget Federal entities in those cases where payment is made by a Federal entity whose budget authority and outlays are excluded from the budget totals.

Intrabudgetary transactions are subdivided into three categories: (1) interfund transactions, where the payments are from one fund group (either Federal funds or trust funds) to a receipt account in the other fund group; (2) Federal intrafund transactions, where the payments and receipts both occur within the Federal fund group; and (3) trust intrafund transactions, where the payments and receipts both occur within the trust fund group.

Offsetting receipts are generally deducted from budget authority and outlays by function, by subfunction, or by agency. There are four types of receipts, however, that are deducted from budget totals as undistributed offsetting receipts. They are: (1) agencies' payments (including payments by off-budget Federal entities) as employers into employees retirement funds, (2) interest received by trust funds, (3) rents and royalties on the Outer Continental Shelf lands, and (4) other interest (i.e., interest collected on Outer Continental Shelf money in deposit funds when such money is transferred into the budget).

**Off-budget Federal entities.**--The Federal Government has used the unified budget concept as the foundation for its budgetary analysis and presentation since 1969. This concept calls for the budget to include all of the Government's fiscal transactions with the public. Starting in 1971, however, various laws have been enacted under which several Federal entities have been removed from the budget or created outside the budget. Other laws have moved certain off-budget Federal entities onto the budget. Under current law, the off-budget Federal entities consist of the two social security

## FEDERAL FISCAL OPERATIONS

trust funds, Federal old-age and survivors insurance and Federal disability insurance.

The off-budget Federal entities are federally owned and controlled, but their transactions are excluded from the budget totals under provisions of law. When an entity is off-budget, its receipts, outlays, and surplus or deficit are not included in budget receipts, budget outlays, or the budget deficit; its budget authority is not included in the totals of budget authority for the budget; and its receipts, outlays, and surplus or deficit ordinarily are not subject to the targets set by the congressional budget resolution.

Nevertheless, the Balanced Budget and Emergency Deficit Control Act of 1985 (commonly known as the Gramm-Rudman-Hollings Act) included the off-budget surplus or deficit in calculating the deficit targets under that act and in calculating the excess deficit for purposes of that act. Partly because of this reason, attention has focused on the total receipts, outlays, and deficit of the Federal Government instead of the on-budget amounts alone.

### Table FFO-1.--Summary of Fiscal Operations

This table summarizes the amount of total receipts, total outlays, total surplus or deficit, transactions in Federal securities and monetary assets, and transactions and balances in Treasury operating cash.

### Table FFO-2.--On-budget and Off-budget Receipts by Source

Budget receipts are taxes and other collections from the public that result from the exercise of the Government's sovereign or governmental powers. The amounts in this table represent income taxes, social insurance taxes, net contributions for other insurance and retirement, excise taxes, estate and gift taxes, customs duties,

and net miscellaneous receipts by source.

### Table FFO-3.--On-budget and Off-budget Outlays by Agency

Congress [usually] provides budget authority which is [generally] in the form of appropriations, then Federal agencies obligate the Government funds to make outlays. The amounts in this table represent a breakdown of on-budget and off-budget outlays by agency.

### Table FFO-4.--Summary of Internal Revenue Collections by States and Other Areas

This annual table provides data on internal revenue collections classified by States and other areas and by type of tax. The amounts reported are for collections made in a fiscal year beginning in October and ending the following September.

Fiscal year collections span several tax liability years because they consist of prepayments (e.g., estimated tax payments and taxes withheld by employers for individual income and social security taxes), of payments made with tax returns, and of subsequent payments made after tax returns are due or are filed (e.g., payments with delinquent returns or on delinquent accounts).

It is also important to note that these data do not necessarily reflect the Federal tax burden of individual States. The amounts are reported based on the primary filing address furnished by each taxpayer or reporting entity. For multistate corporations, this address may reflect only the State where such a corporation reported its taxes from a principal office rather than other States where income was earned or where individual income and social security taxes were withheld. In addition, an individual may reside in one State and work in another State.

## FEDERAL FISCAL OPERATIONS

### Budget Results for the Fourth Quarter, Fiscal 1989

#### Summary

The Federal budget for the fourth quarter of fiscal 1989 was in deficit by about \$46-1/2 billion, or more than \$10 billion wider than in the comparable quarter of the preceding year. For the entire fiscal year, the deficit was \$152 billion, off from a deficit of slightly more than \$155 billion in fiscal 1988. Federal receipts for fiscal 1989 rose by 9 percent from the year before, slightly more rapidly than an increase of 7-1/2 percent in Federal outlays.

In the fourth quarter of fiscal 1989, receipts totaled \$241-1/2 billion, up 6 percent from the corresponding quarter of fiscal 1988. Outlays in the fourth quarter were about \$288 billion, up 9-1/3 percent from a year earlier.

In terms of outlays by functional category, spending for national defense rose by 7 percent during the fourth quarter of fiscal 1989 from the year before when spending had been

artificially depressed by the special timing of payments. Fourth-quarter spending on the commerce and housing function rose sharply (but not as much as projected) in conjunction with the legislation enacted to resolve financial difficulties in the savings and loan industry. Net interest payments and outlays for medicare in the fourth quarter both were up by double-digit rates from year earlier figures. Spending on the agriculture, energy, and natural resources functions in the fourth quarter were below outlays a year ago.

---

*Net interest payments and outlays for medicare were up by double-digit rates.*

#### Third-Quarter Receipts

The following capsule analysis of budget receipts, by source, for the third quarter of fiscal 1989 supplements fiscal data earlier reported in the summer issue of the *Treasury Bulletin*. At the time of that issue's release, not enough data was available to analyze adequately collections for the quarter.

**Individual income taxes.**--Individual income tax receipts for the period April through June 1989 were \$26.4 billion higher than the prior year comparable period. The large increase over the prior year reflects in part a disproportionate amount of 1988 liability paid in the second calendar quarter of 1989. Withheld receipts were up \$3.1 billion, nonwithheld receipts were up \$18.2 billion, and refunds were down \$5.1 billion. The higher nonwithheld receipts and lower refunds

reflect on balance a higher 1988 tax year liability.

**Corporate income taxes.**--Net corporate receipts for the third quarter of fiscal 1989 totaled \$37.2 billion, \$5.2 billion higher than the comparable prior year period. The largest component of the increase was in estimated payments, which rose by \$3 billion. Final payments rose by \$1.8 billion, \$1.1 billion of which was for prior liability exceeding 2 years

## FEDERAL FISCAL OPERATIONS

(back taxes). Offsetting these increases in gross receipts, corporate refunds were down by \$0.4 billion.

**Employment taxes and contributions.**--In the third quarter of fiscal 1989, employment taxes and contributions were \$94.6 billion, an increase of \$8 billion over the comparable prior year period. Two adjustments were made to the Social Security trust funds during the quarter. The Federal Insurance Contributions Act trust fund was adjusted to reflect actual withholding data from 1987. As a consequence, \$1.3 billion was returned to the individual income tax account. This correction exceeded a comparable adjustment to the prior year by \$1 billion. Based on tax returns from 1986, the Self-Employment Contributions Act (SECA) trust fund was increased by \$0.1 billion, and the individual income tax account was reduced accordingly. The adjustment to the SECA trust fund was about the same amount as an adjustment the previous year.

**Unemployment insurance.**--Unemployment insurance tax receipts for the April-June 1989 quarter were \$10.3 billion, compared with \$10.9 billion for the comparable prior year period. The decline in reported receipts for this source is due to the widespread reduction in State unemployment insurance tax rates for the 1989 tax year compared with 1988.

**Contributions for other insurance.**--In the third quarter of fiscal 1989, contributions for other insurance and retire-

ment were \$50 million lower than in the comparable prior year period due to decreased Federal employees retirement contributions.

**Excise taxes.**--Excise tax receipts for the April-June 1989 quarter were \$9.2 billion, compared with \$8.9 billion for the same quarter of fiscal 1988. Year-to-year comparisons of excise tax receipts have been affected by changes in the timing of collections and refunds. The increase of \$0.3 billion in net excise receipts from the prior year level is in part the result of these timing factors.

**Estate and gift taxes.**--Estate and gift tax receipts were \$2.7 billion in the April through June quarter of fiscal 1989. This represents an increase of \$0.8 billion over the previous quarter and an increase of \$0.5 billion over the same quarter in the previous fiscal year. Most of the increase can be attributed to an increase in gift tax receipts in April and May.

**Customs duties.**--Customs receipts net of refunds were \$4.2 billion for the third quarter of fiscal 1989. This is an increase of \$0.3 billion over the same quarter of the prior fiscal year and is due to an increase in imports.

**Miscellaneous receipts.**--Net miscellaneous receipts for the third quarter of fiscal 1989 increased by \$0.1 billion from the comparable prior year period to \$5.2 billion. Deposits of Federal Reserve earnings increased by \$0.3 billion, while net other miscellaneous receipts decreased by \$0.2 billion. ◇

Note.--Outlays consist of disbursements less proprietary receipts from the public and certain intrabudgetary transactions. On-budget and off-budget estimates are based on the

midsession review of the fiscal 1990 budget, released July 18, 1989, by the Office of Management and Budget.

## FEDERAL OBLIGATIONS

"Obligations" are the basis on which the use of funds is controlled in the Federal Government. They are recorded at the point at which the Government makes a firm commitment to acquire goods or services and are the first of the four key events—order, delivery, payment, and consumption—which characterize the acquisition and use of resources. In general, they consist of orders placed, contracts awarded, services received, and similar transactions requiring the disbursement of money.

The obligational stage of Government transactions is a strategic point in gauging the impact of the Government's operations on the national economy, since it frequently represents for business firms the Government commitment which stimulates business investment, including inventory purchases and employment of labor. Disbursements may not occur for months after the Government places its

order, but the order itself usually causes immediate pressure on the private economy.

Obligations are classified according to a uniform set of categories based upon the nature of the transaction without regard to its ultimate purpose. All payments for salaries and wages, for example, are reported as personnel compensation, whether the personal services are used in current operations or in the construction of capital items.

Federal agencies often do business with one another; in doing so, the "buying" agency records obligations, and the "performing" agency records reimbursements. In table FO-1, obligations incurred within the Government are distinguished from those incurred outside the Government. Table FO-2 shows only those incurred outside.

**Table FO-1.--Gross Obligations Incurred Within and Outside the Federal Government by Object Class, as of June 30, 1989**

[In millions of dollars. Source: Standard Form 225, Report on Obligations, from agencies]

Object class	Gross obligations incurred		
	Outside	Within	Total
<b>Personal services and benefits:</b>			
Personnel compensation .....	102,915	14	102,929
Personnel benefits .....	6,237	17,297	23,534
Benefits for former personnel .....	673	-	673
<b>Contractual services and supplies:</b>			
Travel and transportation of persons .....	3,900	489	4,389
Transportation of things .....	3,959	1,229	5,188
Rent, communications, and utilities .....	13,790	7,419	21,209
Printing and reproduction .....	768	1,029	1,797
Other services .....	122,007	34,620	156,627
Supplies and materials .....	55,067	20,857	75,924
<b>Acquisition of capital assets:</b>			
Equipment .....	52,704	4,280	56,984
Lands and structures .....	11,518	1,794	13,312
Investments and loans .....	24,318	23	24,341
<b>Grants and fixed charges</b>			
Grants, subsidies, and contributions .....	163,586	25,114	188,700
Insurance claims and indemnities .....	310,078	1,713	311,791
Interest and dividends .....	156,985	48,131	205,116
Refunds .....	597	-	597
<b>Other:</b>			
Unvouchered .....	73	3	76
Undistributed U.S. obligations .....	9,202	7,412	16,614
<b>Gross obligations incurred <sup>1</sup></b>	<b>1,038,377</b>	<b>171,424</b>	<b>1,209,801</b>

\* Less than \$500,000.

<sup>1</sup> For Federal budget presentation a concept of "net obligations incurred" is generally used. This concept eliminates transactions within the Government and revenue and reimbursements from the public which by statute may be used by Government agencies without appropriation action by the Congress. Summary figures on this basis follow. (Data are on the basis of Reports on Obligations presentation and therefore may differ somewhat from the Budget of the U.S. Government.)

Gross obligations incurred (as above) .....	1,209,801
Deduct:	
Advances, reimbursements, other income, etc. ....	-211,312
Offsetting receipts .....	-160,552
<b>Net obligations incurred .....</b>	<b>837,937</b>

## FEDERAL OBLIGATIONS

## GROSS FEDERAL OBLIGATIONS AS OF JUNE 30, 1989

## GROSS FEDERAL OBLIGATIONS INCURRED OUTSIDE THE FEDERAL GOVERNMENT

As of June 30, 1989

## ACCOUNT OF THE U.S. TREASURY

## SOURCE AND AVAILABILITY OF THE BALANCE IN THE ACCOUNT OF THE U.S. TREASURY

The operating cash of the Treasury is maintained in Treasury's accounts with the Federal Reserve banks and branches and in tax and loan accounts. Major information sources include the Daily Balance Wire received from the Federal Reserve banks and branches, and electronic transfers through the Letter of Credit Payment, Fedline Payment, and Fedwire Deposit Systems. As the balances in the accounts at the Federal Reserve banks become depleted, they are restored by calling in (withdrawing) funds from thousands of financial institutions throughout the country authorized to maintain tax and loan accounts.

Under authority of Public Law 95-147, the Treasury implemented a program on Nov. 2, 1978, to invest a portion of its operating cash in obligations of depositories maintaining tax and loan accounts. Under the Treasury tax and loan investment program, depository financial institutions select the manner in which they will participate in the program. Depositories that wish to retain funds deposited in their tax and loan accounts in interest-bearing obligations participate under the Note Option; depositories that wish to remit the funds to the Treasury's account at Federal Reserve banks participate under the Remittance Option.

Deposits to tax and loan accounts occur in the normal course of

business under a uniform procedure applicable to all financial institutions whereby customers of financial institutions deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of funds from a customer's account to the tax and loan account in the same financial institution. On occasion, to the extent authorized by the Treasury, financial institutions are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the accounts of their customers. Also, Treasury can direct the Federal Reserve banks to invest excess funds in these accounts directly from its account at the Federal Reserve banks.

The tax and loan system permits the Treasury to collect funds through financial institutions and to leave the funds in Note Option depositories and in the financial communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on Note Option financial institution reserves and the economy.

Table UST-1.--Elements of Changes In Federal Reserve and Tax and Loan Note Account Balances

\* Less than \$500,000.

<sup>1</sup> Represents transfers from tax and loan note accounts, proceeds from sales of securities other than Government account series, and taxes.<sup>2</sup> Represents checks paid, wire transfer payments, drawdowns on letters of credit, redemptions of securities other than Government account series, and investment (transfer) of excess funds out of this account to the tax and loan note accounts.<sup>3</sup> Special depositories are permitted to make payment in the form of a deposit credit for the purchase price of U.S. Government securities purchased by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues. Effective Oct. 1, 1989, public debt securities, including U.S. savings bonds, will no longer be settled through the tax and loan note accounts.<sup>4</sup> Includes U.S. savings bonds, savings notes, retirement plan and tax and loss bonds. U.S. savings notes first offered for sale as of May 1, 1967, and were discontinued after June 30, 1970. Retirement plan bonds first offered for sale as of Jan. 1, 1963; tax and loss bonds first issued in March 1968.<sup>5</sup> Taxes eligible for credit consist of those deposited by taxpayers in the tax and loan depositories, as follows: Withheld income taxes beginning March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; a number of excise taxes beginning July 1953; estimated corporation income taxes beginning April 1967; all corporation income taxes due on or after Mar. 15, 1968; FUTA taxes beginning April 1970, and individual estimated income taxes beginning October 1988.

## FEDERAL DEBT

### INTRODUCTION

Treasury securities (i.e., public debt securities) comprise most of the Federal debt, with securities issued by other Federal agencies accounting for the remainder. In addition to the data on the Federal debt presented in the tables in this section of the quarterly *Treasury Bulletin*, the Treasury publishes detailed data on the public debt outstanding in the Monthly Statement of the Public Debt of the United States and on agency securities and the investments of Federal Government accounts in Federal securities in the Monthly Treasury Statement of Receipts and Outlays of the United States Government.

#### Table FD-1.--Summary of Federal Debt

The Federal debt outstanding is summarized as to holdings of public debt and agency securities by the public, which includes the Federal Reserve, and by Federal agencies, largely the social security and other Federal retirement trust funds. Greater detail on holdings of Federal securities by particular classes of investors is presented in the ownership tables, OFS-1 and OFS-2, of the *Treasury Bulletin*.

#### Table FD-2.--Interest-Bearing Public Debt

Interest-bearing marketable and nonmarketable Treasury securities are presented as to type of security. The difference between interest-bearing and total public debt securities reflects outstanding matured Treasury securities on which interest has ceased to accrue. The Federal Financing Bank (FFB) is under the supervision of the Treasury, and FFB securities shown in this table are held by a U.S. Government account.

#### Table FD-3.--Government Account Series

Nonmarketable Treasury securities held by U.S. Government accounts are summarized as to issues to particular funds within the Government. Many of the funds invest in par-value special series nonmarketables at statutorily determined interest rates, while others whose statutes do not prescribe an interest rate formula invest in market-based special Treasury securities whose terms mirror the terms of marketable Treasury securities.

#### Table FD-4.--Interest-Bearing Securities Issued by Government Agencies

Federal agency borrowing has been declining in recent years, in part because the Federal Financing Bank has been providing financing to other Federal agencies. This table does not cover Fed-

eral agency borrowing from the Treasury, which is presented in the Monthly Treasury Statement of Receipts and Outlays of the United States Government. The Government-sponsored entities, whose securities are presented in the memorandum section of table FD-4, are not agencies of the Federal Government, nor are their securities presented in table FD-4 guaranteed by the Federal Government.

#### Table FD-5.--Maturity Distribution and Average Length of Marketable Interest-Bearing Public Debt Held by Private Investors

The average maturity of the privately held marketable Treasury debt has increased gradually since it hit a trough of 2 years, 5 months, in December 1975. In March 1971, the Congress enacted a limited exception to the 4-1/4-percent interest rate ceiling on Treasury bonds that permitted the Treasury to offer securities maturing in more than 7 years at current market rates of interest for the first time since 1965. The exception to the 4-1/4-percent interest rate ceiling had been expanded since 1971 to authorize the Treasury to continue to issue long-term securities. The 4-1/4-percent interest rate ceiling on Treasury bonds was repealed on November 10, 1988. The volume of privately held Treasury marketable securities by maturity class reflects the remaining period to maturity of Treasury bills, notes, and bonds, and the average length comprises an average of remaining periods to maturity, weighted by the amount of each security held by private investors (i.e., excludes the Government accounts and Federal Reserve banks).

#### Table FD-6.--Debt Subject to Statutory Limitation

The statutory debt ceiling is compared with the outstanding debt subject to limit. The other debt category includes certain Federal debt that the Congress has designated by statute to be subject to the debt ceiling. The changes in non-interest-bearing debt shown in the last column reflect maturities of Treasury securities on nonbusiness days, such as weekends and holidays. In that event, Treasury securities are redeemed on the first business day following a non-business day.

#### Table FD-7.--Treasury Holdings of Securities Issued by Government Corporations and Other Agencies

Certain Federal agencies are authorized by statute to borrow from the Treasury, largely to finance direct loan programs. In addition, agencies such as the Bonneville Power Administration are authorized to borrow from the Treasury to finance capital projects. The Treasury finances such loans to the Federal agencies with issues of public debt securities.

# TREASURY FINANCING OPERATIONS, JULY-SEPTEMBER 1989

## JULY

### Auction of 7-Year Notes

On July 5 the Treasury announced that it would auction \$7,250 million of 7-year notes to refund \$4,437 million of notes maturing July 15, 1989, and to raise about \$2,825 million new cash. The notes offered were Treasury Notes of Series G-1996, dated July 17, 1989, due July 15, 1996, with interest payable on January 15 and July 15 until maturity. An interest rate of 7-7/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EDST, July 12, 1989, and totaled \$20,456 million, of which \$7,289 million was accepted at yields ranging from 7.88 percent, price 99.974, up to 7.90 percent, price 99.868. Tenders at the high yield were allotted 37 percent. Noncompetitive tenders were accepted in full at the average yield, 7.89 percent, price 99.921. These totaled \$338 million. Competitive tenders accepted from private investors totaled \$6,951 million.

In addition to the \$7,289 million of tenders accepted in the auction process, \$150 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$286 million was accepted from Federal Reserve banks for their own account.

### Auction of 2-Year Notes

On July 19 the Treasury announced that it would auction \$9,000 million of 2-year notes to refund \$10,569 million of notes maturing July 31, 1989, and to pay down about \$1,575 million. The notes offered were Treasury Notes of Series AC-1991, dated July 31, 1989, due July 31, 1991, with interest payable on January 31 and July 31 until maturity. An interest rate of 7-3/4 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EDST, July 26, and totaled \$28,675 million, of which \$9,007 million was accepted at yields ranging from 7.73 percent, price 100.036, up to 7.75 percent, price 100.000. Tenders at the high yield were allotted 49 percent. Noncompetitive tenders were accepted in full at the average yield, 7.75 percent, price 100.000. These totaled \$1,491 million, including \$750 million awarded to Federal Reserve banks as agents for foreign and international monetary authorities. Competitive tenders accepted from private investors totaled \$7,516 million.

In addition to the \$9,007 million of tenders accepted in the auction process, \$787 million was accepted from Federal Reserve banks for their own account.

### 52-Week Bills

On June 23 tenders were invited for approximately

\$9,000 million of 364-day Treasury bills to be dated July 6, 1989, and to mature July 5, 1990. As the 52-week bills maturing on July 6 were outstanding in the amount of \$9,234 million, this issue resulted in a paydown of about \$225 million. Tenders were opened on June 29. They totaled \$21,714 million, of which \$9,003 million was accepted, including \$641 million of noncompetitive tenders from the public and \$2,800 million of the bills issued to Federal Reserve banks for their own account. The average bank discount rate was 7.58 percent.

## AUGUST

### August Quarterly Financing

On August 2 the Treasury announced that it would auction \$10,000 million of 3-year notes of Series T-1992, \$9,750 million of 10-year notes of Series C-1999, and \$9,750 million of 30-year bonds of 2019 to refund \$15,904 million of Treasury securities maturing August 15 and to raise about \$13,600 million of new cash.

The notes of Series T-1992 were dated August 15, 1989, due August 15, 1992, with interest payable on February 15 and August 15 until maturity. An interest rate of 7-7/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EDST, August 8, and totaled \$28,608 million, of which \$10,031 million was accepted at yields ranging from 7.92 percent, price 99.882, up to 7.94 percent, price 99.829. Tenders at the high yield were allotted 9 percent. Noncompetitive tenders were accepted in full at the average yield, 7.93 percent, price 99.856. These totaled \$566 million. Competitive tenders accepted from private investors totaled \$9,465 million.

In addition to the \$10,031 million of tenders accepted in the auction process, \$922 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$2,534 million was accepted from Federal Reserve banks for their own account.

The notes of Series C-1999 were dated August 15, 1989, due August 15, 1999, with interest payable on February 15 and August 15 until maturity. An interest rate of 8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EDST, August 9, and totaled \$18,682 million, of which \$9,763 million was accepted at yields ranging from 8.02 percent, price 99.864, up to 8.05 percent, price 99.661. Tenders at the high yield were allotted 4 percent. Noncompetitive tenders were accepted in full at the average yield, 8.03 percent, price 99.796. These totaled \$344 million. Competitive tenders accepted from private investors totaled \$9,419 million.

In addition to the \$9,763 million of tenders accepted in

## TREASURY FINANCING OPERATIONS, JULY-SEPTEMBER 1989

the auction process, \$400 million was accepted from Federal Reserve banks for their own account.

The notes of Series C-1999 may be held in STRIPS form. The minimum par amount required is \$25,000.

The bonds of 2019 were dated August 15, 1989, due August 15, 2019, with interest payable on February 15 and August 15 until maturity. An interest rate of 8-1/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the bonds were received until 1 p.m. EDST, August 10, and totaled \$20,100 million, of which \$9,752 million was accepted at yields ranging from 8.13 percent, price 99.944, up to 8.15 percent, price 99.721. Tenders at the high yield were allotted 53 percent. Noncompetitive tenders were accepted in full at the average yield, 8.14 percent, price 99.833. These totaled \$374 million. Competitive tenders accepted from private investors totaled \$9,378 million.

In addition to the \$9,752 million of tenders accepted in the auction process, \$200 million was accepted from Federal Reserve banks for their own account.

The bonds of 2019 may be held in STRIPS form. The minimum par amount required is \$320,000.

### Auction of 2-Year and 5-Year 2-Month Notes

On August 16 the Treasury announced that it would auction \$9,500 million of 2-year notes of Series AD-1991 and \$7,750 million of 5-year 2-month notes of Series L-1994 to refund \$10,619 million of publicly held 2-year notes maturing August 31, 1989, and to raise about \$6,625 million of new cash.

The notes of Series AD-1991 were dated August 31, 1989, due August 31, 1991, with interest payable on February 28 and August 31 until maturity. An interest rate of 8-1/4 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EDST, August 22, and totaled \$24,016 million, of which \$9,501 million was accepted at yields ranging from 8.35 percent, price 99.819, up to 8.38 percent, price 99.765. Tenders at the high yield were allotted 46 percent. Noncompetitive tenders were accepted in full at the average yield, 8.37 percent, price 99.783. These totaled \$1,033 million. Competitive tenders accepted from private investors totaled \$8,468 million.

In addition to the \$9,501 million of tenders accepted in the auction process, \$650 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$892 million was accepted from Federal Reserve banks for their own account.

The notes of Series L-1994 were dated September 1, 1989, due November 15, 1994, with interest payable on May 15 and November 15 until maturity. An interest rate of 8-1/4

percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EDST, August 23, and totaled \$26,150 million, of which \$7,800 million was accepted at yields ranging from 8.24 percent, price 99.976, up to 8.26 percent, price 99.893. Tenders at the high yield were allotted 60 percent. Noncompetitive tenders were accepted in full at the average yield, 8.26 percent, price 99.893. These totaled \$341 million. Competitive tenders accepted from private investors totaled \$7,459 million.

In addition to the \$7,800 million of tenders accepted in the auction process, \$450 million was awarded to Federal Reserve banks as agents for foreign and international monetary authorities.

---

***Legislation enacted on August 7, 1989, temporarily increased the statutory debt limit to \$2,870,000 million through October 31, 1989.***

---

### 52-Week Bills

On July 21 tenders were invited for approximately \$9,000 million of 364-day Treasury bills to be dated August 3, 1989, and to mature August 2, 1990. The issue was to refund \$9,287 million of maturing 52-week bills and to pay down about \$275 million. Tenders were opened on July 27. They totaled \$31,641 million, of which \$9,037 million was accepted, including \$550 million of noncompetitive tenders from the public and \$2,226 million of the bills issued to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. The average bank discount rate was 7.22 percent.

On August 18 tenders were invited for approximately \$9,250 million of 364-day Treasury bills to be dated August 31, 1989, and to mature August 30, 1990. This issue was to refund \$9,211 million of maturing 52-week bills and to raise about \$50 million of new cash. Tenders were opened on August 24. They totaled \$27,546 million, of which \$9,264 million was accepted, including \$535 million of noncompetitive tenders from the public and \$2,880 million of the bills issued to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. An additional \$10 million was issued to Federal Reserve banks as agents for foreign and international monetary authorities for new cash. The average bank discount rate was 7.68 percent.

### Cash Management Bills

On August 1 tenders were invited for approximately

## TREASURY FINANCING OPERATIONS, JULY-SEPTEMBER 1989

\$5,000 million of 45-day bills to be issued August 7, 1989, representing an additional amount of bills dated March 23, 1989, maturing September 21, 1989. The issue was to raise new cash. Tenders were opened on August 3. They totaled \$23,855 million, of which \$5,002 million was accepted. The average bank discount rate was 7.98 percent.

On August 2 tenders were invited for approximately \$10,000 million of 247-day bills to be issued August 15, 1989, and to mature April 19, 1990. On August 7, 1989, the offering announcement was amended to increase the amount offered by \$5,000 million to \$15,000 million. The issue was to raise new cash. Tenders were opened on August 10. They totaled \$45,312 million, of which \$15,020 million was accepted. The average bank discount rate was 7.88 percent.

### Public Debt Limit

Legislation enacted on August 7, 1989, temporarily increased the statutory debt limit to \$2,870,000 million through October 31, 1989. This enabled the Treasury to resume the issue of time deposit State and Local Government Series securities which had been suspended effective July 20, 1989.

## SEPTEMBER

### Auction of 2-Year and 4-Year Notes

On September 20 the Treasury announced that it would auction \$9,750 million of 2-year notes of Series AE-1991 and \$7,750 million of 4-year notes of Series Q-1993 to refund \$16,529 million of Treasury notes maturing September 30 and to raise about \$975 million of new cash.

The notes of Series AE-1991 were dated October 2, 1989, due September 30, 1991, with interest payable on March 31 and September 30 until maturity. An interest rate of 8-3/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EDST, September 26, and totaled \$26,773 million, of which \$9,754 million was accepted at yields ranging from 8.37 percent, price 100.009, up to 8.40 percent, price 99.955. Tenders at the high yield were allotted 29 percent. Noncompetitive tenders were accepted in full at the average yield, 8.39 percent, price 99.973. These totaled \$1,131 million. Competitive tenders accepted from private investors totaled \$8,623 million.

In addition to the \$9,754 million of tenders accepted in the auction process, \$980 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$650 million was accepted from Federal Reserve banks for their own account.

The notes of Series Q-1993 were dated October 2, 1989, due September 30, 1993, with interest payable on March 31 and September 30 until maturity. An interest rate of 8-1/4 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EDST, September 27 and totaled \$21,675 million, of which \$7,787 million was accepted at yields ranging from 8.34 percent, price 99.699, up to 8.35 percent, price 99.666. Tenders at the high yield were allotted 86 percent. Noncompetitive tenders were accepted in full at the average yield, 8.35 percent, price 99.666. These totaled \$474 million. Competitive tenders accepted from private investors totaled \$7,313 million.

In addition to the \$7,787 million of tenders accepted in the auction process, \$620 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$316 million was accepted from Federal Reserve banks for their own account.

### 52-Week Bills

On September 15 tenders were invited for approximately \$9,500 million of 364-day Treasury bills to be dated September 28, 1989, and to mature September 27, 1990. The issue was to refund \$9,419 million of maturing 52-week bills and to raise about \$75 million of new cash. Tenders were opened on September 21. They totaled \$25,560 million, of which \$9,506 million was accepted, including \$470 million of noncompetitive tenders from the public and \$2,340 million of the bills issued to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. The average bank discount rate was 7.61 percent.

### Cash Management Bills

On August 29 tenders were invited for approximately \$4,000 million of 8-day bills to be issued September 6, 1989, representing an additional amount of bills dated March 16, 1989, maturing September 14, 1989. The issue was to raise new cash. Tenders were opened on August 31. They totaled \$25,180 million, of which \$4,011 million was accepted. The average bank discount rate was 8.25 percent. ◇

## PUBLIC DEBT OPERATIONS

### INTRODUCTION

#### Background

The Second Liberty Bond Act (31 U.S.C. 3101, et seq.) provides the Secretary of the Treasury with broad authority to borrow and to determine the terms and conditions of issue, conversion, maturity, payment, and interest rate on Treasury securities. Data in the "Public Debt Operations" section, which have been published in the *Treasury Bulletin* in some form since its inception in 1939, pertain only to marketable Treasury securities, currently bills, notes, and bonds. Treasury bills are discount securities that mature in 1 year or less, while Treasury notes and bonds have semiannual interest payments. New issues of Treasury notes mature in 2 to 10 years, and bonds mature in over 10 years from the issue date. Each marketable Treasury security is listed in the Monthly Statement of the Public Debt of the United States.

#### Table PDO-1.--Maturity Schedule of Interest-Bearing Marketable Public Debt Securities Other than Regular Weekly and 52-Week Treasury Bills

All unmatured Treasury notes and bonds are listed in maturity order, beginning with the earliest maturity. A separate breakout is provided for the combined holdings of the Government accounts and Federal Reserve banks, so that the "All other investors" category includes all private holdings.

#### Table PDO-2.--Offerings of Bills

The results of weekly auctions of 13- and 26-week bills and auctions of 52-week bills every fourth week are presented in table PDO-2. Treasury bills mature each Thursday. New issues of 13-week bills are reopenings of 26-week bills. The 26-week bill issued every fourth week to mature on the same Thursday as an existing

52-week bill is a reopening of the existing 52-week bill. The high, low, and average yields on accepted tenders and the dollar value of total bids is presented, along with the dollar value of awards on a competitive and a noncompetitive basis. The Treasury accepts noncompetitive tenders of up to \$1 million in each auction of Treasury securities in order to assure that individuals and smaller institutions are able to participate in offerings of new marketable Treasury securities. Noncompetitive bids are awarded at the average yield on accepted competitive bids.

#### Table PDO-3.--Public Offerings of Marketable Securities Other than Regular Weekly Treasury Bills

The results of auctions of marketable Treasury securities, other than weekly bills, are listed in the chronological order of the auction dates over approximately the most recent 2 years. This table includes notes and bonds presented in table PDO-1, 52-week bills in table PDO-2, and data for cash management bills. Treasury offers cash management bills from time to time to bridge temporary or seasonal declines in the cash balance. Cash management bill maturities generally coincide with the maturities of regular issues of Treasury bills.

#### Table PDO-4.--Allotments by Investor Classes for Public Marketable Securities, Parts A and B

Data on allotments of marketable Treasury securities by investor class are presented in chronological order of the auction date for approximately the most recent 2 years. These data have appeared in the *Treasury Bulletin* since 1956. Tenders in each Treasury auction of marketable securities other than weekly auctions of 13- and 26-week bills are tallied by the Federal Reserve banks into investor classes described in the footnotes to the table.

<sup>1</sup> The 13-week bills represent additional issue of bills with an original maturity of 26 weeks or 52 weeks.

<sup>2</sup> For bills issued on or after May 2, 1974, includes amounts exchanged on noncompetitive basis by Government accounts and Federal Reserve banks.

<sup>3</sup> For 13-week, 26-week, and 52-week bills tenders for \$1,000,000 or less from any one bidder are accepted in full at average price or accepted competitive bids; for other issues, the corresponding amount is stipulated in each offering announcement.

<sup>4</sup> Equivalent coupon-issue yield.

<sup>5</sup> Except \$1,150,000 at 96.082 percent.

<sup>6</sup> Except \$6,670,000 at 98.054 percent.

<sup>7</sup> Except \$5,300,000 at 98.016 percent.

<sup>8</sup> Except \$1,500,000 at 96.122 percent.

<sup>9</sup> Except \$1,500,000 at 96.299 percent.

<sup>10</sup> Except \$4,110,000 at 98.003 percent, and \$400,000 at 97.993 percent.

<sup>11</sup> Except \$1,000,000 at 96.138 percent, and \$1,000,000 at 96.122 percent.

<sup>12</sup> Except \$1,650,000 at 97.981 percent.

<sup>13</sup> Except \$3,025,000 at 98.023 percent.

<sup>14</sup> Except \$1,300,000 at 96.178 percent, and \$1,625,000 at 96.168 percent.

<sup>15</sup> Except \$1,650,000 at 96.087 percent, and \$1,035,000 at 96.082 percent.

<sup>16</sup> Except \$10,000 at 91.658 percent.

<sup>17</sup> Except \$10,000 at 91.406 percent.

<sup>18</sup> Except \$1,850,000 at 92.346 percent, and \$400,000 at 92.326 percent.

<sup>1</sup> Currently, all issues are sold at auction. For bill issues, the rate shown is the average bank discount rate. For note and bond issues, the rate shown is the interest rate. For details of bill offerings see table PDO-2.

<sup>2</sup> From date of additional issue in case of a reopening.

<sup>3</sup> In reopenings the amount issued is in addition to the amount of original offerings.

<sup>4</sup> Includes securities issued to U.S. Government accounts and Federal Reserve banks; and to foreign and international monetary authorities, whether in exchange for maturing securities or for new cash.

<sup>5</sup> Eligible for STRIPS.

<sup>6</sup> Interest began to accrue before the issue date (settlement date) of this loan.

<sup>7</sup> Yields accepted ranged from 8.55% (price 99.910) up to 8.59% (price 99.838) with the average at 8.57% (price 99.874).

<sup>8</sup> Yields accepted ranged from 9.22% (price 99.691) up to 9.24% (price 99.626) with the average at 9.24% (price 99.626).

<sup>9</sup> Yields accepted ranged from 9.48% (price 100.101) up to 9.54% (price 99.799) with the average at 9.51% (price 99.950).

<sup>10</sup> Yields accepted ranged from 7.91% (price 99.937) up to 8.00% (price 99.774) with the average at 7.95% (price 99.864).

<sup>11</sup> Yields accepted ranged from 8.00% (price 100.000) up to 8.05% (price 99.869) with the average at 8.03% (price 99.921).

<sup>12</sup> Yields accepted ranged from 8.84% (price 100.228) up to 8.93% (price 99.640) with the average at 8.88% (price 99.966).

<sup>13</sup> The low, high, and average yield was 8.79% (price 100.844).

<sup>14</sup> Yields accepted ranged from 7.74% (price 100.018) up to 7.78% (price 99.945) with the average at 7.76% (price 99.982).

<sup>15</sup> Yields accepted ranged from 8.29% (price 99.767) up to 8.31% (price 99.684) with the average at 8.30% (price 99.725).

<sup>16</sup> Yields accepted ranged from 7.92% (price 99.918) up to 7.94% (price 99.882) with the average at 7.93% (price 99.900).

<sup>17</sup> Yields accepted ranged from 8.32% (price 99.766) up to 8.34% (price 99.699) with the average at 8.33% (price 99.733).

<sup>18</sup> Yields accepted ranged from 8.65% (price 99.871) up to 8.68% (price 99.716) with the average at 8.67% (price 99.768).

<sup>19</sup> Yields accepted ranged from 7.39% (price 99.973) up to 7.41% (price 99.936) with the average at 7.40% (price 99.954).

<sup>20</sup> Yields accepted ranged from 7.40% (price 99.934) up to 7.43% (price 99.855) with the average at 7.42% (price 99.881).

<sup>21</sup> Yields accepted ranged from 8.17% (price 99.696) up to 8.23% (price 99.293) with the average at 8.21% (price 99.427).

<sup>22</sup> Yields accepted ranged from 8.48% (price 102.858) up to 8.53% (price 102.309) with the average at 8.51% (price 102.528).

<sup>23</sup> Yields accepted ranged from 7.15% (price 99.954) up to 7.17% (price 99.918) with the average at 7.16% (price 99.936).

<sup>24</sup> Yields accepted ranged from 7.64% (price 99.881) up to 7.66% (price 99.797) with the average at 7.65% (price 99.839).

<sup>25</sup> Yields accepted ranged from 7.38% (price 99.991) up to 7.40% (price 99.954) with the average at 7.39% (price 99.973).

<sup>26</sup> Yields accepted ranged from 7.89% (price 99.949) up to 7.92% (price 99.848) with the average at 7.90% (price 99.916).

<sup>27</sup> Yields accepted ranged from 8.43% (price 99.714) up to 8.45% (price 99.610) with the average at 8.44% (price 99.662).

<sup>28</sup> Yields accepted ranged from 7.63% (price 99.991) up to 7.65% (price 99.955) with the

average at 7.64% (price 99.973).

<sup>29</sup> Yields accepted ranged from 8.21% (price 99.777) up to 8.24% (price 99.699) with the average at 8.23% (price 99.725).

<sup>30</sup> Yields accepted ranged from 9.05% (price 99.675) up to 9.06% (price 99.610) with the average at 9.06% (price 99.610).

<sup>31</sup> Yields accepted ranged from 9.16% (price 99.643) up to 9.18% (price 99.440) with the average at 9.17% (price 99.542).

<sup>32</sup> Yields accepted ranged from 8.15% (price 99.955) up to 8.18% (price 99.900) with the average at 8.18% (price 99.900).

<sup>33</sup> Yields accepted ranged from 8.75% (price 99.926) up to 8.77% (price 99.843) with the average at 8.77% (price 99.843).

<sup>34</sup> Yields accepted ranged from 8.04% (price 99.927) up to 8.06% (price 99.891) with the average at 8.05% (price 99.909).

<sup>35</sup> Yields accepted ranged from 8.35% (price 99.666) up to 8.37% (price 99.599) with the average at 8.36% (price 99.632).

<sup>36</sup> Yields accepted ranged from 8.90% (price 99.872) up to 8.92% (price 99.769) with the average at 8.91% (price 99.821).

<sup>37</sup> Yields accepted ranged from 8.40% (price 99.955) up to 8.42% (price 99.919) with the average at 8.41% (price 99.937).

<sup>38</sup> Yields accepted ranged from 8.76% (price 99.974) up to 8.77% (price 99.948) with the average at 8.77% (price 99.948).

<sup>39</sup> Yields accepted ranged from 9.24% (price 100.064) up to 9.29% (price 99.743) with the average at 9.27% (price 99.871).

<sup>40</sup> The low, high, and average yield was 8.72% (price 99.829).

<sup>41</sup> Yields accepted ranged from 9.03% (price 99.800) up to 9.04% (price 99.759) with the average at 9.04% (price 99.759).

<sup>42</sup> Yields accepted ranged from 8.52% (price 99.964) up to 8.53% (price 99.946) with the average at 8.53% (price 99.946).

<sup>43</sup> Yields accepted ranged from 8.74% (price 100.033) up to 8.77% (price 99.934) with the average at 8.76% (price 99.967).

<sup>44</sup> Yields accepted ranged from 8.72% (price 99.510) up to 8.75% (price 99.356) with the average at 8.73% (price 99.459).

<sup>45</sup> Yields accepted ranged from 8.31% (price 99.891) up to 8.34% (price 99.837) with the average at 8.33% (price 99.855).

<sup>46</sup> Yields accepted ranged from 8.58% (price 99.792) up to 8.60% (price 99.740) with the average at 8.59% (price 99.766).

<sup>47</sup> Yields accepted ranged from 8.93% (price 99.641) up to 8.94% (price 99.576) with the average at 8.94% (price 99.576).

<sup>48</sup> Yields accepted ranged from 9.09% (price 99.072) up to 9.11% (price 98.869) with the average at 9.10% (price 98.970).

<sup>49</sup> Yields accepted ranged from 8.86% (price 100.027) up to 8.89% (price 99.973) with the average at 8.88% (price 99.991).

<sup>50</sup> Yields accepted ranged from 8.95% (price 99.616) up to 8.98% (price 99.493) with the average at 8.97% (price 99.534).

<sup>51</sup> Yields accepted ranged from 9.21% (price 99.848) up to 9.24% (price 99.795) with the average at 9.23% (price 99.813).

<sup>52</sup> Yields accepted ranged from 9.19% (price 99.787) up to 9.22% (price 99.689) with the average at 9.22% (price 99.689).

<sup>53</sup> Yields accepted ranged from 9.29% (price 99.798) up to 9.30% (price 99.747) with the average at 9.30% (price 99.747).

## PUBLIC DEBT OPERATIONS

Table PDO-3.--Public Offerings of Marketable Securities Other than Regular Weekly Treasury Bills--Con.

<sup>54</sup>Yields accepted ranged from 9.06% (price 99.892) up to 9.08% (price 99.857) with the average at 9.08% (price 99.857).

<sup>1</sup> Includes trust funds and accounts that comprise Government accounts under the unified budget concept.

<sup>2</sup> Exclusive of banks and insurance companies.

<sup>3</sup> Included with all other investors are certain Government deposit accounts and

Government-sponsored agencies, formerly included with Government accounts.

Note.--For detail of offerings see table PDO-3.

## U.S. SAVINGS BONDS AND NOTES

Series EE bonds, on sale since Jan. 1, 1980, are the only savings bonds currently sold. Series HH bonds are issued in exchange for series E and EE savings bonds and savings notes. Series A-D were sold from Mar. 1, 1935, through Apr. 30, 1941. Series E was on sale from May 1, 1941, through Dec. 31, 1979 (through June 1980 to payroll savers only). Series F and G were sold from May 1, 1941, through Apr. 30, 1952. Series H was sold from June 1, 1952, through Dec. 31, 1979. Series HH bonds were sold for cash from Jan. 1, 1980, through Oct. 31, 1982. Series J and K were

sold from May 1, 1952, through Apr. 30, 1957.

U.S. savings notes were on sale May 1, 1967, through June 30, 1970. The notes were eligible for purchase by individuals with the simultaneous purchase of series E savings bonds. The principal terms and conditions for purchase and redemption and information on investment yields of savings notes appear in the *Treasury Bulletins* of March 1967 and June 1968; and the Annual Report of the Secretary of the Treasury for fiscal year 1974.

Table SBN-1.--Sales and Redemptions by Series, Cumulative through Sept. 30, 1989

[In millions of dollars. Source: Monthly Statement of the Public Debt of the United States; Market Analysis Section, United States Savings Bonds Division]

Series	Sales <sup>1</sup>	Accrued discount	Sales plus accrued discount	Redemptions <sup>1</sup>	Amount outstanding	
					Interest-bearing debt	Matured non-interest-bearing debt
Savings bonds:						
Series A-D <sup>2</sup>	3,949	1,054	5,003	5,002	-	1
Series E, EE, H, and HH	269,439	115,860	385,299	269,906	114,025	1,367
Series F and G	28,396	1,125	29,521	29,518	-	3
Series J and K	3,556	198	3,754	3,753	-	1
Savings notes	862	490	1,352	1,042	310	-
Total	306,202	118,727	424,929	309,221	114,336	1,372

<sup>1</sup> Sales and redemption figures include exchange of minor amounts of (1) matured series E bonds for series G and K bonds from May 1951 through April 1957; (2) series F and J bonds for series H bonds beginning January 1960; and (3) U.S. savings notes for series H bonds beginning January 1972; however, they exclude exchanges of series E bonds for series H and HH bonds.

<sup>2</sup> Details by series on a cumulative basis and by period of series A-D combined will be found in the February 1952 and previous issues of the *Treasury Bulletin*.

Table SBN-2.--Sales and Redemptions by Period, All Series of Savings Bonds and Notes Combined

[In millions of dollars. Source: Monthly Statement of the Public Debt of the United States; Market Analysis Section, United States Savings Bonds Division]

Period	Sales	Accrued discount	Sales plus accrued discount	Redemptions			Amount outstanding

Note.--Series E and EE include U.S. savings notes (Freedom Shares) on sale from May 1, 1967, through June 30, 1970, to E bond buyers.

## OWNERSHIP OF FEDERAL SECURITIES

## INTRODUCTION

Federal securities presented in these tables comprise public debt securities issued by the Treasury and debt issued by other Federal agencies under special financing authorities. See the Federal debt (FD) series of tables for a more complete description of the Federal debt.

**Table OFS-1.--Distribution of Federal Securities by Class of Investors and Type of Issues**

Holdings of Treasury marketable and nonmarketable securities and of debt issued by other Federal agencies are presented for Government accounts, the Federal Reserve banks, and private investors. Government account holdings largely reflect investment by the social security and Federal retirement trust funds. The Federal Reserve banks acquire Treasury securities in the market as a means of executing monetary policy.

**Table OFS-2.--Estimated Ownership of Public Debt Securities Held by Private Investors**

Privately held Treasury securities are those held by investors other than the Government accounts and Federal Reserve banks. Treasury obtains information on private holdings from a variety of sources, such as data gathered by the Federal financial institution regulatory agencies. State and local holdings and foreign holdings include special issues of nonmarketable securities to municipal entities and foreign official accounts, as well as municipal and foreign official and private holdings of marketable Treasury securities. Data on foreign holdings of marketable Treasury securities are presented in the capital movements tables in the *Treasury Bulletin*. See the footnotes for descriptions of the investor categories.

<sup>1</sup> U.S. savings bonds, series A-F and J, are included at current redemption value.<sup>2</sup> Includes domestically chartered banks, U.S. branches and agencies of foreign banks, New York investment companies majority owned by foreign banks, and Edge Act corporations owned by domestically chartered and foreign banks.<sup>3</sup> Includes partnerships and personal trust accounts.<sup>4</sup> Includes U.S. savings notes. Sales began May 1, 1967, and were discontinued June 30, 1970.<sup>5</sup> Exclusive of banks and insurance companies.<sup>6</sup> Includes State and local pension funds.<sup>7</sup> Consists of the investment of foreign balances and international accounts in the United States. Estimates reflect 1978 benchmark through December 1984 and 1984 benchmark to date.<sup>8</sup> Includes savings and loan associations, credit unions, nonprofit institutions, mutual savings banks, corporate pension trust funds, dealers and brokers, certain Government deposit accounts, and Government-sponsored agencies.

## MARKET YIELDS

### INTRODUCTION

The tables and charts in this section present yields on Treasury marketable securities and compare long-term Treasury market yields with yields on long-term corporate and municipal securities.

**Table MY-1.--Treasury Market Bid Yields at Constant Maturities: Bills, Notes, and Bonds**

The Treasury yield curve, presented in the chart that accompanies table MY-1, is based on current market bid quotations on the most actively traded Treasury securities as of 3:30 p.m. each business day. The Treasury obtains quotations from the Federal Reserve Bank of New York, which composites quotations provided by five primary dealers. This yield curve reflects yields based on semiannual interest payments and is read at constant maturity points to develop

a consistent data series. Yields on Treasury bills, which are discount securities, are the coupon equivalent yields of bank discount rates at which Treasury bills trade in the market. The Board of Governors of the Federal Reserve System also publishes the Treasury constant maturity data series in its weekly H.15 press release.

**Table MY-2.--Average Yields of Long-Term Treasury, Corporate, and Municipal Bonds**

The long-term Treasury rate is the 30-year constant maturity rate presented in table MY-1. The corporate and municipal bond series are developed by the Treasury, using reoffering yields on new long-term securities rated Aa by Moody's Investors Service. See the footnotes for further explanation.

<sup>1</sup> The Treasury long-term bond series has been revised to reflect 30-year maturities rather than the previously used 20-year maturity. The 30-year series was initiated in March 1977.  
<sup>2</sup> Treasury series based on 3-week moving average of reoffering yields of new corporate bonds rated Aa by Moody's Investors Service and having an original maturity of at least 20 years.

<sup>3</sup> Index of new reoffering yields on 20-year general obligations rated Aa by Moody's Investors Service.

# FEDERAL AGENCIES' FINANCIAL REPORTS

## INTRODUCTION

Section 114 of the Budget and Accounting Procedures Act of 1950 (31 U.S.C. 3513a) requires the Secretary of the Treasury to prepare reports on the financial operations of the U.S. Government and provides that each executive agency must furnish the Secretary of the Treasury such reports and information relating to the agency's financial condition and operations as the Secretary may require. The provisions do not apply to the legislative and judicial branches of the Federal Government; however, these entities are encouraged to submit the prescribed reports so the Secretary of the Treasury can prepare comprehensive reports on all the financial activities of the U.S. Government.

The Treasury Financial Manual (I TFM 2-4100) sets the criteria for the submission of annual and quarterly financial reports in accordance with the Reporting Entities Listing (Bulletin No. 88-11). Reports are provided for six fund types: Revolving funds, trust revolving funds, 15 major trust funds, all other trust funds, all other activity combined, and consolidated reports of an organizational unit. The financial transactions supporting the required reports are to be accounted for on the accrual basis. The Report on Operations can be submitted on a cash basis under certain circumstances (see I TFM 2-4180.20). Reports are to be prepared from a budgeting and accounting system which contains an integrated data base that is part of the agency's integrated financial management system as required by the Office of Management and Budget (OMB) Circular No. A-127.

The required reports should include all assets, liabilities, and equities relating to all programs and activities under control of the reporting entity, except for the assets of disbursing officers, which are reported by the Treasury. Reports should include transfer appropriation accounts from other agencies, foreign currencies, opera-

tions conducted in the territories or overseas, and any monetary assets or property received, spent, or otherwise accounted for by the reporting entity. Amounts are reported to the dollar.

Requirements provide that Federal agencies submit to Treasury four financial reports supplemented by three supporting reports which are consolidated and published annually in the winter issue of the *Treasury Bulletin*. These reports are: Report on Financial Position (SF 220), Report on Operations (SF 221), Report on Cash Flow (SF 222), and Report on Reconciliation (SF 223). The three supporting reports are: Direct and Guaranteed Loans Reported by Agency and Program Due from the Public (SF 220-8), Report on Accounts and Loans Receivable Due from the Public (SF 220-9), and Additional Financial Information (SF 220-1). The report on Direct and Guaranteed Loans is submitted to Treasury quarterly, and annually for publication in the *Treasury Bulletin*. The Report on Accounts and Loans Receivable Due from the Public is submitted quarterly on a selected basis, and by all entities annually. Information captured in the SF 220-8 is shown in the following table:

**Table FA-2.--Direct and Guaranteed Loans**

This report reflects the direct loans and guaranteed loans to the public through the Federal Credit Program to support credit activities. Actual control of credit program levels remains with authorizing legislation and appropriations acts. The report on Direct and Guaranteed Loans also provides the Federal Reserve Board information to monitor the flow of funds. An accompanying chart depicts direct loans and guaranteed loans for the third quarter of fiscal 1989.

## INTERNATIONAL STATISTICS

## INTERNATIONAL FINANCIAL STATISTICS

The tables in this section are designed to provide data on U.S. reserve assets and liabilities and other statistics related to the U.S. balance of payments and international financial position.

Table IFS-1 shows the reserve assets of the United States, including its gold stock, special drawing rights held in the Special Drawing Account in the International Monetary Fund, holdings of convertible foreign currencies, and reserve position in the International Monetary Fund.

Table IFS-2 brings together statistics on liabilities to foreign official institutions, and selected liabilities to all other foreigners, which are used in the U.S. balance of payments statistics.

Table IFS-3 shows U.S. Treasury nonmarketable bonds and notes issued to official institutions and other residents of foreign countries.

Table IFS-4 presents a measure of the general foreign exchange value of the U.S. dollar.

Table IFS-1.--U.S. Reserve Assets

(In millions of dollars)

End of calendar year or month	Total reserve assets <sup>1</sup>	Gold stock <sup>2</sup>	Special drawing rights <sup>1 3</sup>	Foreign currencies <sup>4</sup>	Reserve position in International Monetary Fund <sup>1 5</sup>
1985 .....	43,186	11,090	7,293	12,856	11,947
1986 .....	48,511	11,064	8,395	17,322	11,730
1987 .....	45,798	11,078	10,283	13,088	11,349
1988 .....	47,802	11,057	9,637	17,363	9,745
1988 - Oct. ....	50,204	11,062	9,464	19,603	10,075
Nov .....	48,944	11,059	9,785	17,997	10,103
Dec .....	47,802	11,057	9,637	17,363	9,745
1989 - Jan. ....	48,190	11,056	9,388	18,324	9,422
Feb .....	49,373	11,061	9,653	19,306	9,353
Mar .....	49,854	11,061	9,443	20,298	9,052
Apr .....	50,303	11,061	9,379	20,731	9,132
May .....	54,941	11,060	9,134	26,234	8,513
June .....	60,502	11,063	9,034	31,517	8,888
July .....	63,462	11,066	9,340	34,001	9,055
Aug .....	62,364	11,066	9,240	33,413	8,644
Sept .....	68,418	11,065	9,487	39,080	8,786
Oct .....	70,809	11,062	9,472	41,552	8,722

<sup>1</sup> Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing right (SDR) based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and reserve position in the IMF are also valued on this basis beginning July 1974.

<sup>2</sup> Treasury values its gold stock at \$42.2222 per fine troy ounce and pursuant to 31 U.S.C. 5117(b) issues gold certificates to the Federal Reserve at the same rate against all gold held.

<sup>3</sup> Includes allocations of SDRs in the Special Drawing Account in the International Monetary Fund, plus or minus transactions in SDRs. Allocations of SDRs on Jan. 1 of respective years are as follows: 1970, \$867 million; 1971, \$717 million; 1972, \$710 million; 1979, 874

million (in SDR terms); 1980, 874 million (in SDR terms); and 1981, 857 million (in SDR terms).

<sup>4</sup> Includes holdings of Treasury and Federal Reserve System; beginning November 1978, these are valued at current market exchange rates or, where appropriate, as such other rates as may be agreed upon by the parties to the transactions.

<sup>5</sup> The United States has the right to purchase foreign currencies equivalent to its reserve position in the Fund automatically if needed. Under appropriate conditions the United States could purchase additional amounts related to the U.S. quota.

<sup>1</sup> Includes Bank for International Settlements.<sup>2</sup> Derived by applying reported transactions to benchmark data.<sup>3</sup> Beginning in March 1988, includes current value of zero-coupon, 20-year bond issue to the Government of Mexico. Also see footnote 1, table IFS-3.<sup>4</sup> Includes debt securities of U.S. Government corporations, federally sponsored agencies, and private corporations.<sup>5</sup> Includes liabilities payable in dollars to foreign banks and liabilities payable in foreign currencies to foreign banks and to "other foreigners."<sup>6</sup> Includes marketable U.S. Government bonds and notes held by foreign banks.<sup>7</sup> Principally the International Bank for Reconstruction and Development, the Inter-American Development Bank, and the Asian Development Bank.<sup>8</sup> Data on the two lines shown for this date reflect different benchmark bases for foreigners' holdings of selected U.S. long-term securities. Figures on the first line are comparable to those for earlier dates; figures on the second line are based in part on a benchmark survey as of end-year 1984 and are comparable to those shown for following dates.

Note.--Table is based on Treasury Department data and on data reported to the Treasury Department by banks, other depository institutions, and brokers in the United States. Data correspond generally to statistics following in this section and in the "Capital Movements" section. Table excludes International Monetary Fund "holdings of dollars" and holdings of U.S. Treasury letters of credit and nonnegotiable noninterest-bearing special U.S. notes held by other international and regional organizations.

## INTERNATIONAL FINANCIAL STATISTICS

These indices are presented to provide measures of the general foreign exchange value of the dollar that are broader than those provided by single exchange rate levels. They do not purport to represent a guide to measuring the impact of exchange rate levels

on U.S. international transactions. The indices are computed as geometric averages of individual currency levels with weights derived from the share of each country's trade with the United States during 1982-83.

<sup>1</sup> Each Index covers (a) 22 currencies of countries represented in the Organization for Economic Cooperation and Development (OECD): Australia, Austria, Belgium-Luxembourg, Canada, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, and the

United Kingdom; and (b) currencies of 4 major trading economies outside the OECD: Hong Kong, Korea, Singapore, and Taiwan. Exchange rates are drawn from the International Monetary Fund's "International Financial Statistics" when available.

<sup>2</sup> Index includes average annual rates as reported in "International Financial Statistics."

## CAPITAL MOVEMENTS

### INTRODUCTION

#### Background

Data relating to capital movements between the United States and foreign countries have been collected in some form since 1935. Reports are filed with district Federal Reserve banks by commercial banks, other depository institutions, bank holding companies, securities brokers and dealers, and nonbanking enterprises in the United States. Statistics on the principal types of data by country or geographical area are then consolidated and are published in the *Treasury Bulletin*.

The reporting forms and instructions<sup>1</sup> used in the Treasury International Capital (TIC) Reporting System have been revised a number of times to meet changing conditions and to increase the usefulness of the published statistics. The most recent, general revision of the report forms became effective with the banking reports as of April 30, 1978, and with the nonbanking reports as of December 31, 1978. Revised forms and instructions are developed with the cooperation of other Government agencies and the Federal Reserve System and in consultations with representatives of banks, securities firms, and nonbanking enterprises.

#### Basic Definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including U.S. citizens domiciled abroad, and the foreign branches, subsidiaries, and other affiliates abroad of U.S. banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located. The term "foreigner" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled, as shown on the records of reporting institutions. For a number of reasons, the geographical breakdown of the reported data may not in all cases reflect the ultimate ownership of the assets. Reporting institutions are not expected to go beyond the addresses shown on their records, and so may not be aware of the country of domicile of the ultimate beneficiary. Furthermore, U.S. liabilities arising from deposits of dollars with foreign banks are reported in the Treasury statistics as liabilities to foreign banks, whereas the liability of the foreign bank receiving the deposit may be to foreign official institutions or to residents of another country.

Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the appropriate international or regional classification except for the Bank for International Settlements, which is included in the classification "Other Europe."

#### Reporting Coverage

Reports are required from banks, other depository institutions, bank holding companies, International Banking Facilities (IBF's), securities brokers and dealers, and nonbanking enterprises in the

United States, including the branches, agencies, subsidiaries, and other affiliates in the United States of foreign banking and nonbanking firms. Entities that have reportable liabilities, claims, or securities transactions below specified exemption levels are exempt from reporting.

Banks, other depository institutions, and some brokers and dealers file monthly reports covering their dollar liabilities to, and dollar claims on, foreigners in a number of countries. Twice a year, as of June 30 and December 31, they also report the same liabilities and claims items with respect to foreigners in countries not shown separately on the monthly reports. Quarterly reports are filed with respect to liabilities and claims denominated in foreign currencies *vis-a-vis* foreigners. Effective January 31, 1984, the specified exemption level applicable to the monthly and quarterly banking reports was raised from \$10 million to \$15 million. There is no separate exemption level for the semiannual reports.

Banks, other depository institutions, securities brokers and dealers, and other enterprises report monthly their transactions in long-term securities with foreigners. The applicable exemption level is \$500,000 with respect to the grand total of purchases and to the grand total of sales during the month covered by the report.

Quarterly reports are filed by exporters, importers, industrial and commercial concerns, financial institutions other than banks, other depository institutions, brokers, and other nonbanking enterprises if their liabilities to, or claims on, unaffiliated foreigners at quarterend exceed specified exemption levels. Effective March 31, 1982, this exemption level was set at \$10 million, up from \$2 million. Nonbanking enterprises also report for each monthend their U.S. dollar-denominated deposit and certificates of deposit claims of \$10 million or more on banks abroad.

#### Description of Statistics

Section I presents data on liabilities to foreigners reported by banks, other depository institutions, brokers, and dealers in the United States. Beginning April 1978, the following major changes were made in the reporting coverage: Amounts due to banks' own foreign offices are reported separately; a previous distinction between short-term and long-term liabilities was eliminated; a separation was provided of the liabilities of the respondents themselves from their custody liabilities to foreigners; and foreign currency liabilities are only available quarterly. Also, beginning April 1978, the data on liabilities were made more complete by extending to securities brokers and dealers the requirement to report certain of their own liabilities and all of their custody liabilities to foreigners. Effective as of January 31, 1985, savings and loan associations and other thrift institutions began to file the TIC banking forms. Previously they had reported on TIC forms for nonbanking enterprises.

Section II presents the claims on foreigners reported by banks, other depository institutions, and brokers and dealers in the United States. Beginning with data reported as of the end of April 1978, a distinction was made between banks' claims held for their own account and claims held for their domestic customers. The former are available in a monthly series whereas the latter data are collected on a quarterly basis only. Also, the distinction in reporting of long-term and short-term components of banks' claims was discontinued. Maturity data began to be collected quarterly on a time remaining to maturity basis as opposed to the historic original maturity classification. Foreign currency claims are also collected on a quarterly basis only. Beginning March 1981, this claims coverage

<sup>1</sup> Copies of the reporting forms and instructions may be obtained from the Office of Data Management, Office of the Assistant Secretary for International Affairs, Department of the Treasury, Washington, D.C. 20220, or from district Federal Reserve banks.

## CAPITAL MOVEMENTS

was extended to certain items in the hands of brokers and dealers in the United States. See notes to section I above concerning the reporting of thrift institutions.

Another important change in the claims reporting, beginning with new quarterly data as of June 30, 1978, was the adoption of a broadened concept of "foreign public borrower," which replaced the previous category of "foreign official institution" to produce more meaningful information on lending to the public sector of foreign countries. The term "foreign public borrower" encompasses central governments and departments of central governments of foreign countries and of their possessions; foreign central banks, stabilization funds, and exchange authorities; corporations and other agencies of central governments, including development banks, development institutions, and other agencies which are majority-owned by the central government or its departments; State, provincial, and local governments of foreign countries and their departments and agencies; and any international or regional organization or subordinate or affiliated agency thereof, created by treaty or convention between sovereign states.

Section III includes supplementary statistics on U.S. banks' liabilities to, and claims on, foreigners. The supplementary data on banks' loans and credits to nonbank foreigners combine selected information from the TIC reports with data from the monthly Federal Reserve 2502 reports submitted for major foreign branches of U.S. banks. Other supplementary data on U.S. banks' dollar liabilities to, and banks' own dollar claims on, countries not regularly reported separately are available semiannually in the June and December issues of the *Treasury Bulletin*.

Section IV shows the liabilities to, and claims on, unaffiliated foreigners by exporters, importers, industrial and commercial concerns; financial institutions other than banks, other depository institutions, and brokers; and other nonbanking enterprises in the United States. The data exclude the intercompany accounts of nonbanking enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. (Such transactions are reported by business enterprises to the Department of Commerce on its direct investment forms.) The data

also exclude claims held through banks in the United States. Beginning with data reported as of December 31, 1978, financial liabilities and claims of reporting enterprises are distinct from their commercial liabilities and claims; and items are collected on a time remaining to maturity basis instead of the original maturity basis used previously.

Section V contains data on transactions in all types of long-term domestic and foreign securities by foreigners as reported by banks, brokers, and other entities in the United States (except non-marketable U.S. Treasury notes, foreign series; and nonmarketable U.S. Treasury bonds and notes, foreign currency series, which are shown in the "International Financial Statistics" section, table IFS-3). The data cover new issues of securities, transactions in outstanding issues, and redemptions of securities. They include transactions executed in the United States for the account of foreigners, and transactions executed abroad for the account of reporting institutions and their domestic customers. The data include some transactions which are classified as direct investments in the balance of payments accounts.

The geographical breakdown of the data on securities transactions shows the country of domicile of the foreign buyers and sellers of the securities; in the case of outstanding issues, this may differ from the country of the original issuer. The gross figures contain some offsetting transactions between foreigners. The net figures for total transactions represent transactions by foreigners with U.S. residents; but the net figures for transactions of individual countries and areas may include some transactions between foreigners of different countries.

The data published in these sections do not cover all types of reported capital movements between the United States and foreign countries. The principal exclusions are the intercompany capital transactions of nonbanking business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies, and capital transactions of the U.S. Government. Consolidated data on all types of international capital transactions are published by the Department of Commerce in its regular reports on the U.S. balance of payments.

## FOREIGN CURRENCY POSITIONS

### INTRODUCTION

#### Background

Data have been collected since 1974 on the foreign currency positions of banks and nonbanking firms in the United States, and on those of foreign branches, majority-owned foreign partnerships, and majority-owned foreign subsidiaries of U.S. banks and nonbanking firms. Reports cover five major foreign exchange market currencies and U.S. dollars held abroad. Reporting has been required pursuant to title II of Public Law 93-110, an amendment to the Par Value Modification Act of September 21, 1973, and implementing Treasury regulations. Statistics on the positions have been published since March 1977 beginning with data for December 1975.

The report forms and instructions used in the collection of bank data were revised effective with reports as of March 16, 1983, for the weekly reports. The most recent revision of the nonbank foreign currency forms (see below) became effective as of the last business day of March 1983.

#### Common Definitions and Concepts

The term "United States" means the States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, Midway Island, the Virgin Islands, and Wake Island. The term "foreign" means locations other than the "United States." The term "worldwide" is used to describe the sum of "United States" and "foreign" data.

Data for the United States include amounts reported by sole proprietorships, partnerships, and corporations in the United States including the U.S. branches and subsidiaries of foreign nonbanking concerns, in the case of "nonbanking firms' positions," and the agencies, branches, and subsidiaries located in the United States of foreign banks and banking institutions, in the case of the weekly "bank positions."

Data for "foreign branches" and "abroad" include amounts reported by the branches, majority-owned partnerships, and majority-owned subsidiaries of U.S. banking and nonbanking concerns. In general, these data do not reflect the positions of foreign parents or foreign parents' subsidiaries located abroad except through inter-company accounts. The data include the foreign subsidiaries of a few foreign-owned U.S.-based corporations.

Assets, liabilities, and foreign exchange contract data are reported on the basis of time remaining to maturity as of the date of the report, regardless of the original maturity of the instrument involved. "Spot" means due for receipt or delivery within 2 business days from the date of the report. "Short-term" means maturing in 1 year or less from the date of the report.

"Majority-owned foreign partnerships" are those organized under the laws of a foreign country in which one or more nonbanking concerns or nonprofit institutions in the United States, directly or indirectly, own more than 50 percent profit interest. "Majority-owned foreign subsidiaries" are foreign corporations in which one or more nonbanking business concerns or nonprofit institutions located in the United States, directly or indirectly, own stock with more than 50 percent of the total combined voting power of all classes of stock entitled to vote, or more than 50 percent of the total value of all classes of stock.

#### Reporting Threshold

The exemption level applicable to banks and banking institutions was \$10 million equivalent through January 1982, when it was raised to \$100 million. The exemption level applicable to nonbanking business concerns and nonprofit institutions was \$1 million equivalent on all nonbank forms from March 1975 through November 1976. It was raised to \$2 million equivalent on the monthly reports of positions held in the United States from November 1976 through September 1978. The exemption level was raised to \$3 million on foreign subsidiary positions on June 30, 1977, and for positions held in the United States on September 30, 1978. The exemption level for nonbanking firms was raised to \$100 million on positions in the United States in January 1982 and on foreign branch and subsidiaries positions in March 1982.

Firms must report their entire foreign currency position in a specified foreign currency if a specified U.S. dollar equivalent value is reached in any category of assets, liabilities, exchange contracts bought and sold, or the net position in the currency. In general, exemption levels are applied to the entire firm. In reports on their foreign branches, majority-owned foreign partnerships, and majority-owned foreign subsidiaries, U.S. banks and nonbanks are required to report the U.S. dollar-denominated assets, liabilities, exchange contracts bought and sold, and net positions of those branches, partnerships, and subsidiaries with reportable positions in the specified foreign currencies.

#### Description of Statistics

Data collected on the Treasury foreign currency forms are published in the *Treasury Bulletin* in seven sections. The first section presents a summary of worldwide net positions in all of the currencies reported. Sections II through VI each present data on a specified foreign currency. Section VII presents the U.S. dollar positions of the foreign branches and subsidiaries of U.S. firms which are required to report in one or more of the specified foreign currencies.

## FOREIGN CURRENCY POSITIONS

### Footnotes to Tables FCP-I through FCP-VII

#### SECTION I

<sup>1</sup> Worldwide net positions on the last business day of the calendar quarter of nonbanking business concerns in the United States and their foreign branches and majority-owned partnerships and subsidiaries. Excludes receivables and installment paper which have been sold or discounted before maturity, U.S. parent companies' investment in their majority-owned foreign subsidiaries, fixed assets (plant and equipment), and capitalized leases for plant and equipment.

<sup>2</sup> Foreign branches and majority-owned partnerships and subsidiaries only.

<sup>3</sup> Weekly worldwide net positions of banks and banking institutions in the United States, and their foreign branches and majority-owned foreign subsidiaries. Excludes capital assets and liabilities.

<sup>4</sup> Foreign branches and majority-owned subsidiaries only.

#### SECTIONS II THROUGH VII

<sup>1</sup> Positions of nonbanking business concerns in the United States and their foreign branches and majority-owned partnerships and subsidiaries. In section VII positions of foreign branches and majority-owned partnerships and subsidiaries only.

<sup>2</sup> Excludes receivables and installment paper sold or discounted before maturity, fixed assets (plant and equipment), and parents' investment in majority-owned foreign subsidiaries.

<sup>3</sup> Capitalized plant and equipment leases are excluded.

<sup>4</sup> Includes both spot and forward exchange rates.

<sup>5</sup> Columns 1 and 3 less columns 2 and 4.

<sup>6</sup> Representative rates on the report date. Canadian dollar and United Kingdom pound rates are expressed in U.S. dollars per unit of foreign currency, all others in foreign units per U.S. dollar. The source of the automated representative rates changed as of June 30, 1988.

<sup>7</sup> Banks and banking institutions in the United States and their foreign branches and majority-owned subsidiaries. In section VII, foreign branches and majority-owned subsidiaries only.

<sup>8</sup> Excludes capital assets.

<sup>9</sup> Excludes capital liabilities.

<sup>10</sup> Includes both spot and forward exchange contracts.

<sup>11</sup> Columns 3 and 9 less columns 6 and 12.

<sup>12</sup> See footnote 6.

# EXCHANGE STABILIZATION FUND

## INTRODUCTION

### Background

The Exchange Stabilization Fund (ESF) was established under the Gold Reserve Act of January 30, 1934 (31 U.S.C. 822a). This act authorized the establishment in the Department of the Treasury of a stabilization fund to be operated under the exclusive control of the Secretary of the Treasury, with the approval of the President, for the purpose of stabilizing the exchange value of the dollar. Subsequent amendment of the Gold Reserve Act modified the original purpose somewhat to reflect termination of the fixed exchange rate system.

The resources of the fund consist of dollar balances, partly invested in U.S. Government securities, special drawing rights (SDRs), and balances of foreign currencies.

The principal sources of income or losses for the ESF have been profits or losses on holdings of and transactions in SDRs and foreign exchange, and the interest earned on assets.

### Definitions

*Special drawing rights.*--International assets created by the International Monetary Fund (IMF). They serve to increase international liquidity and provide additional international reserves, and may be purchased and sold among eligible holders through the IMF.

*SDR allocations.*--The counterpart of SDRs issued by the IMF based on members' quota in the IMF. Although shown in ESF state-

ments as liabilities, they must be redeemed by the ESF only in the event of liquidation of, or U.S. withdrawal from, the SDR Department of the IMF or cancellation of SDRs.

*SDR certificates.*--Issued to the Federal Reserve System against SDRs when SDRs are "monetized" and the proceeds of the monetization are deposited in an ESF account at the Federal Reserve Bank of New York.

### Description of Tables

Table ESF-1 presents the assets, liabilities, and capital of the ESF. Data are presented in U.S. dollars or U.S. dollar equivalents based on current exchange rates computed according to the accrual method of accounting. The capital account represents the original capital appropriated to the ESF by Congress of \$2 billion, less a subsequent transfer of \$1.8 billion to pay for the initial U.S. quota subscription to the IMF. Subsequent gains and losses since inception are reflected in the cumulative net income (loss) account.

Table ESF-2 presents the results of operations by quarter. Data are presented in U.S. dollars or U.S. dollar equivalents computed according to the accrual method of accounting. The "Profit (loss) on foreign exchange" includes realized profits (losses) on sales of foreign currencies as well as revaluation gains (losses) on currencies held. "Adjustment for change in valuation of SDR holdings and allocations" reflects the net gain (loss) on revaluation of SDR holdings and allocations for the quarter.

## EXCHANGE STABILIZATION FUND

Table ESF-1.--Balances as of Mar. 31, 1989, and June 30, 1989

[In thousands of dollars]

See footnotes at end of table ESF-2.

Table ESF-2.--Income and Expense

[In thousands of dollars]

	Current quarter Apr. 1, 1989, through June 30, 1989	Year to date Oct. 1, 1988, through June 30, 1989
<b>Income and expense:</b>		
Profit (loss) on:		
Foreign exchange .....	(500,553)	(510,067)
Adjustment for change in valuation of SDR holdings and allocations <sup>1</sup> .....	(113,905)	(117,988)
Interest (net charges) on:		
Special drawing rights .....	61,165	175,250
U.S. Government securities .....	18,021	75,646
Foreign exchange .....	156,391	371,905
Income from operations .....	(378,881)	(5,254)
Net Income .....	(378,881)	(5,254)

<sup>1</sup> Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing rights (SDRs) based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and allocations are valued on this basis beginning July 1974.

<sup>2</sup> Excludes foreign exchange transactions for future and spot delivery.

<sup>3</sup> A non-interest-bearing liability to the U.S. Treasury resulting from the transfer to the Exchange Stabilization Fund of foreign currencies drawn from the IMF by the United States.

Note.--Annual balance sheets for fiscal years 1934 through 1940 appear in the 1940 Annual Report of the Secretary of the Treasury and those for succeeding years appear in subsequent reports through 1980. Quarterly balance sheets beginning with Dec. 31, 1938, have been published in the *Treasury Bulletin*. Data from inception to Sept. 30, 1978, may be found on the statements published in the January 1979 *Treasury Bulletin*.

*U.S. CURRENCY AND COIN OUTSTANDING  
AND IN CIRCULATION*

# U.S. CURRENCY AND COIN OUTSTANDING AND IN CIRCULATION

## INTRODUCTION

### Purpose and Scope

The U.S. Currency and Coin Outstanding and in Circulation Statement is prepared to inform the public of the face value of currency and coin which are used as a medium of exchange and the total thereof, as of the end of a given accounting month.

The statement defines the total amount of currency and coin outstanding and the portion of which is deemed to be in circulation. Although it still includes some old and current rare issues of coin and currency which do not circulate or may do so to a limited extent, Treasury policy is to continue their inclusion in the statement since such issues were originally intended for general circulation. The statement also provides a brief description of the various issues of U.S. paper money and further presents a comparative amount of money circulated in relation to population.

### History

Statements of currency and coin outstanding and in circulation have been published by the Department of the Treasury since 1888. These statements were originally prepared monthly by the Division of Loans and Currency, which was then under the Office of the Secretary of the Treasury but later became part of the Public Debt Service (currently known as the Bureau of the Public Debt) in 1929. The statement was published with the title "Circulation Statement of United States Money" from 1923 through December 31, 1965. Concurrently, from December 31, 1919, to September 30, 1951, the Office of the U.S. Treasurer published a statement entitled "Monthly Statement--Paper Currency of Each Denomination Outstanding." Two months after the Office of the U.S. Treasurer assumed publication of the "Circulation Statement of United States Money," a revision was made to the statement to include denomination detail of the currency in circulation. Publication of the "Monthly Statement--Paper Currency of Each Denomination Outstanding" was discontinued, and the revised version which combines information from both statements became known as the United States Currency and Coin Outstanding and in Circulation Statement. The statement in 1983 ceased to be published as a separate, monthly release and instead was incorporated into the quarterly *Treasury Bulletin* as a special report.

### Definition of Terms

The classification "Amounts outstanding and in circulation" includes all issues by the Bureau of the Mint which are purposely intended as a medium of exchange. Therefore, coins sold by the Bureau of the Mint at premium prices are excluded. However, uncirculated coin sets, sold by the Mint at face value plus a handling charge, are included.

The term "Federal Reserve notes" refers to issues by the U.S. Government to the public through the Federal Reserve banks and their member banks. These notes represent U.S. Government obligations. Currently, the item "Federal Reserve notes--amounts outstanding" consists of new series issues. The Federal Reserve note is the only class of currency currently issued.

"U.S. notes" are also known as legal tender notes and were issued in five different issues; namely, (a) First Issue--1862 (\$5 to \$1,000 notes), (b) Second Issue--1862 (\$1 to \$2 notes), (c) Third Issue--1863 (\$5 to \$1,000 notes), (d) Fourth Issue--1863 (\$1 to \$10,000 notes), and (e) Fifth Issue--1901 (\$10 notes).

The column for "Currency no longer issued" consists of gold certificates (old and new series), silver certificates (old and new series), Federal Reserve notes (old and new series), national bank notes (old and new series), and Treasury notes (1890 series).

"Dollar coins" include standard silver coins and nonsilver coins.

"Fractional coins" include subsidiary coins in denominations of 50 cents, 25 cents, and 10 cents and minor coins (5 cents and 1 cent).

### Reporting Sources

Data used in the preparation of the U.S. Currency and Coin Outstanding and in Circulation Statement is derived from monthly reports required from Treasury offices, various U.S. Mint offices, the Federal Reserve banks, and the Federal Reserve Board. Such reports convey information about the amount, class, and denomination of new issues of currency and/or coin, of destroyed and replaced currency, and of currency and coins withdrawn from circulation. Estimates of population from the Bureau of the Census are used in the calculation of money circulated per capita.
