ADDITIONAL FINANCIAL MANAGEMENT SERVICE RELEASES ON FEDERAL FINANCES

Sold on a subscription basis only (exceptions noted) by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402:†

- Daily Treasury Statement. Provides summary data on the Treasury's cash and debt operations for the Federal Government. Published each Federal working day. Subscription price: \$174 per year (domestic), \$217.50 per year (foreign).
- Monthly Treasury Statement of Receipts and Outlays of the United States Government. Provides Federal budget results, including receipts and outlays of funds, the surplus or deficit, and the means of financing the deficit or disposing of the surplus. Preparation based on agency reporting. Subscription price: \$22 per year (domestic), \$27.50 per year (foreign).
- Consolidated Financial Statements of the United States Government (annual). Provides information about Government financial operations on the accrual basis. Single copy price: \$2.50.
- United States Government Annual Report and Appendix. Annual Report presents budgetary results at the summary level. Appendix presents the individual receipt and appropriation accounts at the detail level. Annual Report single copy price: \$2; Appendix free from Financial Management Service.

TREASURY ISSUES

Issues in the Securities and Futures Markets

Robert R. Glauber

Thank you for this opportunity to discuss the Treasury Department's views on regulatory fragmentation and related issues in the securities and futures markets. We continue to believe that it is important to increase investor confidence and promote innovation in our financial markets. This means taking necessary steps to reduce the chances of major market disruptions, while streamlining and reducing regulation.

As Secretary Brady has said many times, whatever steps we take must include the recognition that securities and derivative markets are really one market. I believe the financial community already recognizes this fact, as do regulators in other countries. The question is whether our regulatory structure needs change in order to recognize this fact as well--whether integrated markets require some form of unified regulation, and whether this will result in additional progress on key intermarket issues.

The Treasury Department believes the answer to this question is yes, both to preserve the preeminence of our markets and to enhance investor confidence. As you know, the President's Working Group on Financial Markets, whose members are all here today, has discussed this issue. This is only appropriate, since the very purpose of the Working Group is to address intermarket issues, and regulatory fragmentation is obviously central to the question of intermarket coordination.

These discussions have proved extremely useful in informing Working Group members of each other's concerns. There is much common ground, and the discussions should continue on this and related intermarket issues in order to promote continued understanding and cooperation. Of course, the Working Group is not and was never intended to be a single agency with a single viewpoint.

Therefore, my testimony today reflects the views of the Treasury Department, just as I am sure that the testimony of my colleagues will reflect their views.

Let me begin with a description of one of the fundamental problems that need to be addressed, the concern that major market disruptions are sapping investor confidence, and discuss certain well-publicized "solutions" that we reject. I will conclude with specific suggestions for more unified regulation, which will address the key issues of competitiveness and enforcement as well.

Need to Enhance Investor Confidence

The linkage among stocks, stock options, and stock index futures directly affected the market breaks in October 1987 and October 1989. Both days demonstrated dramatically how these markets, all operating by their own sets of

rules, can interact to create a major financial disruption.

These events, along with other instances of major market disruptions, appear to have contributed to declining investor participation and capital formation in the United States:

- Initial public offerings (IPOs) have plummeted since the 1987 market break. After peaking at \$18 billion in 1986, IPOs raised only about \$6 billion a year in 1988 and 1989.
- Equity offerings as a percentage of new funds raised domestically has fallen off dramatically. In the early 1980s, equity accounted for about 30-50 percent of all public new issues, but the share dwindled to only 10 percent in 1989.
- The percentage of stock outstanding held by individuals has declined from 84 percent in 1965 to 55 percent in 1989.
- Trading volume in options, futures, and stocks is off substantially from levels that prevailed before the October 1987 market break.

If we are to bring investors back into our markets to stay, we must renew their confidence that market mechanisms are operating efficiently; that markets are fair, not rigged; that they are still a safe place to invest; and that regulation is effective.

Need to Avoid Overreaction

As mentioned at the outset, there are a number of ways to help achieve these results. But it is imperative to avoid overreaction that will stifle innovation.

For example, the Treasury Department shares many of the concerns that have been expressed about problems associated with excessive market volatility. But we completely disagree with those who suggest that the solution is to outlaw financial futures or ban program trading.

The financial futures markets are one of our country's most vital and innovative financial resources. Any attempt to outlaw such futures or to regulate them to a point where they cease to serve an economic purpose would be a grave mistake. Not only is there little evidence that futures contracts have had any negative effect on the economy, but we believe their use has helped keep our cost of capital lower than it otherwise would be.

This was testimony by the Under Secretary of the Treasury for Finance, March 29, 1990, before the Subcommittee on Securities of the Senate Banking, Housing, and Urban Affairs Committee.

DOMESTIC FINANCE

Instead of attempting to limit the use of futures, we need to find better ways to integrate them into the "one market" so that they do not destabilize the system. A more integrated regulatory framework, I believe, will help avoid major disruptions and help make our financial system more stable, efficient, and competitive.

... we continue to strongly oppose program trading restrictions as overly broad and potentially harmful.

Likewise, the Treasury Department has repeatedly stated its view that the blunt approach of Government intervention to stop program trading is an inappropriate way to address problems of excessive market volatility. Rather than trying to restrict particular trading strategies, it would be far better to focus on the fundamental mechanisms of the individual markets and the inconsistency of intermarket regulation that can themselves engender unnecessary volatility.

Provisions to restrict program trading, like the one recently approved by the House Energy and Commerce Committee, represent a fragmented approach that itself could be disruptive. Because this type of provision would apply only in the stock market, it could promote ad hoc responses to market turmoil that would create additional uncertainty, which in turn could actually destabilize markets because of the lack of coordination.

Indeed, the uncertain application of restrictions on trading strategies could simply drive market participants to foreign markets to execute the stock side of program trades. This would directly reduce the competitiveness of U.S. markets. Accordingly we continue to strongly oppose program trading restrictions as overly broad and potentially harmful. Instead, we believe that Senator D'Amato's amendment to the Market Reform bill, which would require the SEC to report on the adequacy of its current authority to protect against market manipulation or fraud caused by program trading, is a more constructive approach.

The Need to Address Regulatory Fragmentation

While banning futures or program trading is not the right approach to addressing intermarket problems, other steps can and should be taken. One is the enactment of S.648, "The Market Reform Act of 1989," which is clearly a step in the right direction. The recent collapse of Drexel Burnham Lambert Group only underscores the need for two of the bill's provisions, holding company risk reporting and measures to improve the clearance and settlement system. Similarly, the market breaks of October 1987 and October 1989 demonstrated the need for timely reporting of large trader transactions. We continue to urge prompt action on

this legislation.

Nevertheless, as important as this legislation is, it does not address the key intermarket issue, which is regulatory fragmentation. In the past we have tended to focus too narrowly on discrete intermarket issues. Instead, we need to embrace a unified regulatory framework to promote innovation and competitiveness; to deal with enforcement problems; and to coordinate market mechanisms to avoid major market disruptions. These goals are extremely important but difficult to accomplish in our currently balkanized system.

We believe that progress on all these issues requires some form of unified regulation. Since securities and their derivatives really comprise one market, this only makes sense. How can we really expect to make substantial progress if our right hand does not always know what our left is doing, and can do very little about it even when it does?

The other countries with major securities markets do not fragment their regulation this way. Japan, the United Kingdom, and France, which together with the United States account for 90 percent of global futures trading, recognize the "one market" reality--each country assures that regulation of stocks, options, and futures is coordinated by a single regulator. Yet here in the United States, by reason of historical accident, the Securities and Exchange Commission regulates stocks and stock options, while the Commodity Futures Trading Commission regulates stock index futures.

By integrating our fragmented system, we stand to gain significant benefits in innovation, enforcement, coordinated market mechanisms, and globalization.

Innovation.--In the past, fragmented regulation sometimes promoted innovation. Competition between Chicago and New York markets spurred new product development, while the practices of different regulators often promoted diversity, experimentation, and creativity.

But regulatory competition also begets jurisdictional squabbles, which can strangle innovation. New products are not merely stifled; they quickly move to overseas markets. This is demonstrated only too well by the recent skirmish over a new "hybrid" product called index participations. The battle over whether it is a stock or a futures product continues to rage in our courts. Meanwhile, trading of the new product has stopped in the United States and begun in Toronto, with London soon to follow.

My point is this: with the globalization of financial markets, other countries have provided us all the regulatory competition we need. We can no longer afford intramural squabbling that stifles innovation at home and drives important business overseas.

Enforcement.--Unified regulation would substantially enhance enforcement efforts to stop intermarket violations. Like State troopers who are forced to stop at the State line when chasing lawbreakers, today the SEC and CFTC are

DOMESTIC FINANCE

often prevented from dealing effectively with intermarket abuses such as manipulation and frontrunning. While progress has been made, there is still no universally accepted definition of illegal frontrunning, and substantial gaps remain in our capacity to detect and deter cross-market abuses.

In short, with our current system it is simply too easy for intermarket abuses to slip through the cracks because of the dispersion of regulatory responsibility. Integrated regulation would enhance surveillance, facilitate intermarket rulemaking, and promote accountability.

Market mechanisms.--Secretary Brady has often cited the problems created by conflicting rules applying to fundamental market mechanisms, including unharmonized margin requirements, uncoordinated circuit breakers, inconsistent short selling rules, and discrete clearance and settlement systems. Taken together, they foster excessive volatility, heighten risk, and drive investors away from markets.

For example, low futures margins indirectly permit high leveraging in stocks. This leverage creates the potential for major market disruptions, starting in the futures market and washing back to the stock market. The active use of this leverage has the potential, when concentrated in short periods of time, to punch a hole in the fabric of the market.

Likewise, uncoordinated circuit breakers and clearance and settlement systems can risk major market disconnections. Coordinating these and other market mechanisms demands a more unified approach.

Globalization.--The clear trend toward globalization of financial markets has now been recognized. I have already discussed how this overseas competition demands that the United States take the steps necessary to foster domestic innovation. But it also requires viewing interrelated domestic markets in a global context and speaking with one voice to our foreign counterparts.

Secretary Brady, testifying before the full Banking Committee last October, described the growing interdependence of the world's financial markets and supported the idea of identifying particular issues where an international and intermarket approach would be useful. Integrating "one market" regulation in the United States would obviously facilitate the process. In addition, integrated regulation would enable us to deal more effectively with foreign governments by speaking in a unified and consistent way.

Recommended Solutions

In short, what we now have is a single market with uncoordinated and even conflicting regulation. That may have created benefits in the past when markets were less connected and overseas competition was minimal. But now it creates problems, as I have just described.

The solution is not complicated, though it may be difficult to put in place. We do not need more regulation. But we do need to move toward more unified regulation as the umbrella under which specific intermarket issues can be much more easily resolved. The result will be more streamlined and efficient regulation.

In the past we have tended to focus too narrowly on piecemeal solutions to particular problems. This has been only partly successful, and it would be a mistake to continue solely down this path. The Market Reform Act, harmonized margins, and jurisdiction over new products are each important issues that need addressing. But they are all pieces of a systemic problem that requires a systemic solution.

By integrating our fragmented system, we stand to gain significant benefits in innovation, enforcement, coordinated market mechanisms, and globalization.

Obviously, the broadest solution would be to merge the SEC and the CFTC. This would make our regulatory system similar to our major foreign competitors. Moreover, by unifying all regulation we could address not only the intermarket issues we now recognize, but new ones that are bound to arise as innovation continues.

A different solution would be to unify regulation of those markets that are particularly connected. This could range from unified regulation of all financial products and their derivatives to unified regulation of stock-related products.

We believe that the minimum course of action would be to unify regulation of stocks, stock options, and stock index futures under the agency with the greatest overall expertise in the combination of these products, the SEC. Margin authority over each of these products would also require consolidation in a single regulator. In addition, it is imperative that we end the jurisdictional disputes over the regulation of new products that simply drive them to overseas markets (this would require elimination of the "exclusivity" clause in the Commodity Exchange Act, which currently requires exclusive CFTC regulation of any instrument that has any element of "futurity").

This minimum solution would deal comprehensively with the most prominent problems we now face. Moreover, because index futures are only a small percentage of the transactions regulated by the CFTC, it would not be a radical departure from the existing regulatory scheme.

Indeed, we believe that any more limited approach will only delay the resolution of intermarket problems that must be addressed. Indeed, if this minimum approach cannot be accomplished soon, it seems very likely that we would be forced to adopt a complete merger approach at a later time

DOMESTIC FINANCE

in response to new major market disruptions.

Conclusion

In conclusion, the benefits of unified regulation are substantial. While we embrace this approach, I want to emphasize our belief that today's problems do not come from the regulators themselves. Both the CFTC and the SEC

are doing a good job under difficult circumstances-administering a scheme of regulation that simply is not designed for the unified marketplace they are expected to regulate. We believe the answer is a coherent regulatory structure that can deal effectively with unified markets. Resolving regulatory fragmentation will promote investor confidence, which is a key to our long-term competitiveness.

Trends in Corporate Tax Receipts

Harvey S. Rosen

I am pleased to have this opportunity to present the views of the administration on recent trends in corporate tax receipts.

INTRODUCTION

Since its inception in 1913, the corporate income tax has generated a sizable share of total U.S. tax receipts. As the committee has requested, my remarks today focus principally on the trend in corporate tax receipts, the importance of the corporate tax in other countries, and the effect of the Tax Reform Act of 1986 on corporate tax receipts.

History of Corporate Income Tax Receipts

In 1989, the corporate income tax produced \$104 billion in revenue for the U.S. Government. The \$104 billion was the most revenue ever produced by corporate taxes and represented the sixth consecutive annual increase in corporate tax receipts. In general, corporate tax receipts have increased over the past 40 years. In the 1950's, corporate tax receipts averaged \$19 billion per year; in the 1960's, \$26 billion per year; in the 1970's, \$38 billion per year; and from 1980 to 1986, \$56 billion per year. Since 1986, corporate tax receipts have averaged \$94 billion per year.

The longrun increase in corporate taxes occurred even though pretax corporate profits as a percentage of gross national product (GNP) fell sharply. In the mid-1950's, when corporate taxes were at their peak as a percentage of total Federal tax receipts, pretax corporate profits were about 11 percent of GNP; by 1986, this percentage had fallen to 5.1 percent.

Although the level of Federal corporate receipts rose from the mid-1950's to 1986, they fell as a percentage of total receipts. But, since 1986, the declining trend in the relative importance of the corporate tax has been reversed. From 1987 to 1989, corporate taxes accounted for an increasing share of total tax receipts. In 1989, corporate tax receipts accounted for 10.5 percent of total tax receipts, which is the highest percentage since 1980. We expect this trend to continue into the future. By 1995, we expect corporate tax receipts to account for 11.4 percent of total tax receipts.

It is important to note that the level of corporate tax receipts depends heavily on the strength of the U.S. economy. When the U.S. economy is growing, as it has been for the past 7 years, corporate profits are strong, and corporate tax receipts increase. But when the economy is in recession, corporate profits tend to fall, and corporate taxes

decrease. During the 1982-83 recession, for example, corporate taxes as a percentage of total receipts fell from 10.2 percent in 1981 to 6.2 percent in 1983. A significant portion of this decline was attributable to the fall in pretax corporate profits, from \$202 billion in 1981 to an average of \$178 billion in 1982 and 1983.

... most recent estimates indicate that the 1986 act will increase corporate tax receipts by \$140 billion over the 1987-91 period.

Corporate Taxes in Foreign Countries

Because of cultural and historical differences, foreign countries have a wide variety of tax systems. For example, some countries have separate individual and corporate tax systems, similar to the U.S. tax system. Others have integrated tax systems, which generally relieve part or all of the double tax on distributed corporate earnings. These differences among tax systems make it difficult to directly compare corporate tax burdens across countries. Nonetheless, we can make some general observations.

In 1987, corporate income taxes accounted for an average of 8 percent of total tax receipts for the 22 countries in the Organization for Economic Cooperation and Development (OECD) for which we have data. The data pertain to corporate taxes at both the central government and local levels. Comparisons of corporate tax receipts for central governments only would be misleading because some countries have much greater corporate taxation at the local level than others.

Although U.S. corporate taxes as a percentage of total tax receipts was 8 percent in 1987, the same as the average for the 22 OECD countries, the U.S. percentage will be higher in subsequent years if current trends continue. Countries that were above the OECD average in 1987 include Japan at 23 percent, the United Kingdom at 11 percent, and Italy at 11 percent. Countries that were below the average include Germany at 5 percent, France at 5 percent, and Switzerland at 6 percent.

These were remarks by the Deputy Assistant Secretary, May 3, 1990, before the Senate Finance Committee.

TAX POLICY

In 1980, corporate income taxes also accounted for 8 percent of total tax receipts in the 22 OECD countries. Thus, there does not appear to be any general trend toward increased or decreased reliance on corporate taxes among OECD countries.

The Tax Reform Act of 1986

The Tax Reform Act of 1986 (1986 act) made significant changes to the corporate tax system. These changes were expected to increase corporate tax receipts significantly. Our most recent estimates indicate that the 1986 act will increase corporate tax receipts by \$140 billion over the 1987-91 period.

Corporate Changes in the 1986 Act

The 1986 act adopted base-broadening measures designed to increase the overall level of corporate income taxes, even though the maximum marginal tax rate was reduced from 46 percent to 34 percent. The corporate tax base broadening was accomplished primarily by repealing the investment tax credit, limiting depreciation deductions, restricting the use of net operating losses, enacting the corporate alternative minimum tax, and adopting important changes in accounting rules; for example, by requiring uniform capitalization of certain expenditures.

The 1986 act also made three changes that affect the taxation of corporations and their shareholders and the desirability of operating in the corporate form: (1) the relative relationship of the top individual and corporate tax rates was reversed, with corporations now subject to a higher marginal tax rate than most individuals; (2) the preference for both corporate and individual capital gains was eliminated; and (3) the so-called *general utilities* doctrine was repealed.

Effect on Corporate Tax Receipts

The 1986 act was expected to be revenue neutral. As we

testified in February, for all practical purposes, the 1986 act has been revenue neutral. Our most recent estimate indicates that the numerous positive and negative provisions of the 1986 act sum to a total change in receipts of less than 1 percent over the 1987-91 period.

The 1986 act was also expected to increase corporate tax receipts and lower individual receipts as a percentage of total income tax receipts. This has also occurred. The percentage of income tax receipts accounted for by corporate taxes increased from 15 percent in 1986 to 19 percent in 1989; correspondingly, the percentage accounted for by individual taxes fell from 85 percent to 81 percent.

CONCLUSION

In summary, I would characterize recent trends in corporate tax receipts as follows:

- Corporate tax receipts forecasts made by both the Treasury and the Congressional Budget Office following the enactment of the 1986 act exceeded actual corporate tax receipts by between \$20 billion and \$25 billion per year for the 1987-89 period.
- The Tax Reform Act of 1986 reversed a long-term decline in the relative importance of corporate taxes in producing revenues for the U.S. Government. The share of total taxes paid by corporations has been steadily rising since 1986. This trend is expected to continue throughout most of the budget period.
- The 1986 act has been revenue neutral because individual tax receipts are higher than expected.
- Lower than expected corporate profits explain much of the underestimate in corporate tax receipts.

In short, the 1986 act was revenue neutral and significantly increased corporate tax receipts both in absolute terms and as a proportion of all income tax receipts.

Abstracts of Recent Taxation Studies

Financing Health and Long-Term Care

The Treasury report, "Financing Health and Long-Term Care," analyzes a variety of existing and proposed tax measures related to the financing of health and long-term care. The report contains no specific recommendations, but instead presents for further consideration and analysis various financing options. The options include adjusting pension, annuity, and individual retirement account payments for long-term care contingencies; clarifying the tax treatment of employers' contributions to prefund long-term care insurance and of distributions from these policies; limiting the employee

exclusion or employer deduction for employer-provided health insurance; providing a credit to families who do not have employer-provided health insurance; and expanding or making permanent the deduction for health insurance purchased by the self-employed. The report should be of interest to health and long-term care providers, legislators, and insurers as well as the general public since Congress is likely to continue to consider these issues in future sessions. The report is available from the Government Printing Office, GPO Stock Number 048-000-00414-8, price \$7.50.

Widely Held Partnerships: Compliance and Administration Issues

"Widely Held Partnerships: Compliance and Administration Issues" is a Treasury study which reviews the Federal income tax treatment of widely held partnerships, which in recent years have grown significantly in number. The study concludes that under current law reporting of income by widely held partnerships and auditing of these partnerships by the IRS have become needlessly complex. The study proposes a streamlined reporting system and revamped audit system for widely held partnerships. The report is expected to be of interest to investors and managers of widely held partnerships as well as to anyone interested in the tax treatment of partnerships and other passthrough entities.

The Taxation of Life Insurance Company Products

In its "Report to the Congress on the Taxation of Life Insurance Company Products," Treasury evaluates the effectiveness of recent changes in the tax treatment of life insurance and annuity products in preventing the sale of life insurance primarily for investment purposes. The report also evaluates the policy justifications for and practical implications of the current tax treatment of the investment earnings on life insurance and annuity products. It concludes that re-

cent tax legislation has curtailed certain tax shelter investments using life insurance and annuity contracts. The report also questions whether the favorable tax treatment of life insurance company products is the most effective means of encouraging private insurance protection and long-term savings. In practice, the current tax rules often result in unintended and undesired effects which conflict with those objectives.

Reinsurance Excise Tax Study

The Treasury "Report to Congress on the Effect on U.S. Reinsurance Corporations of the Waiver by Treaty of the Excise Tax on Certain Reinsurance Premiums" examines the competitiveness of U.S. reinsurance companies *vis-a-vis* foreign companies in light of existing treaty policy and the current 1-percent excise tax on certain reinsurance premiums. The study draws a distinction between foreign firms resident in full-tax and those in no-tax jurisdictions. With respect to foreign companies from full-tax jurisdictions,

the study finds no evidence that waiving the 1-percent excise tax by treaty results in a competitive advantage for foreign insurers. However, in the case of reinsurers resident in notax jurisdictions waiver of the excise tax generally increases the foreign firm's competitive position. An added complexity examined in the study relates to controlled foreign corporations in nontax jurisdictions and the treatment of U.S. shareholders under subpart F.

Depreciation of Horses

Treasury's "Report to Congress on the Depreciation of Horses" recommends that the existing five asset classes for horses under the Modified Accelerated Cost Recovery System (MACRS) be combined into a single class with a 10-year

class life for all horses, regardless of their age when placed in service or the use to which they are put. This recommendation would result in a 7-year regular depreciation MACRS recovery period for all horses. This report was prepared as

TAX POLICY

part of the congressional mandate in the Tax Reform Act of 1986 to study the depreciation of all assets. The legislative history of the 1986 act directed Treasury to give priority to a study of horses. While the study's findings are based primarily on data for thoroughbred horses acquired as yearlings, Treasury believes that the results reasonably apply to all horses. Two major issues that arose during this study and that affected its findings include the treatment of assets that initially appreciate in value and the treatment of assets that change in use over their lifetime.

Depreciation of Scientific Instruments

The "Report to Congress on the Depreciation of Scientific Instruments" describes the results of the Treasury's study of the depreciation of scientific instruments. The study uses 5 methodologies to analyze the depreciation of 12 major types of scientific instruments. The primary method used to determine the equivalent economic life is an analysis of the decline in value with age, as obtained from resale price

data. This method is supplemented by a method in which a specified service flow pattern is assumed. Other factors examined include measures of the actual and anticipated useful lives and the depreciation lives used for financial accounting. The study concludes that the current recovery periods for these assets appear reasonable and does not recommend the establishment of a separate asset class.

Depreciation of Fruit and Nut Trees

Treasury's "Report to Congress on the Depreciation of Fruit and Nut Trees" presents the results of a study of the depreciation of fruit trees and nut trees. Information obtained from published sources (primarily relative to crops grown in California) as well as opinions of industry experts was used to estimate the economic depreciation of fruit and nut trees. Of particular interest is the treatment of the early portion of the fruit and nut tree's life, during which it characteristically

increases in value. The study concludes that the historically measured average equivalent economic life of fruit and nut trees is approximately 60 years; however, the average equivalent economic life of newly planted fruit and nut trees for all regions and types of trees may be shorter than this observed value. No specific recommendation is made to Congress concerning the life of fruit and nut trees.

The Department of the Treasury released the above reports on March 30, 1990. Copies may be purchased from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161, phone: (703) 487-4660.

TREASURY ISSUES INDEX

ECONOMIC POLICY

"Direct Revenue Effects of Capital Gains Taxation: A Reconsideration of the Time-Series Evidence, The." Darby, Michael R., Robert Gillingham, and John S. Greenlees. June 1988, pp. 2-2.8.

A report presenting results that indicate the time-series data, like the cross-section data, provide considerable evidence supporting the likelihood of direct revenue gains from reductions in capital gains tax rates.

"Fiscal 1991 Budget, The." Brady, Nicholas F. March 1990, page 3.

A statement by the Secretary of the Treasury on the elements of the family savings account, the capital gains tax reduction, and the home ownership initiative contained in the administration-proposed Savings and Economic Growth Act.

"Outlook for the Savings and Loan Industry after the Financial Institutions Reform, Recovery, and Enforcement Act of 1989." Glauber, Robert R. December 1989, pp. 4-6.

A discussion of the savings and loan industry's future as it relates to provisions in the Financial Institutions Reform, Recovery, and Enforcement Act of 1989.

"Solution to the Savings and Loan Problem, The." Excerpted. Brady, Nicholas F. September 1989, page 3.

Remarks by the Secretary of the Treasury on the administration's comprehensive reform plan proposed for the overhaul of the savings and loan industry.

FISCAL SERVICE

"Status Report on the Fiscal Operations of the Government, A." Murphy, Gerald. December 1988, pp. 3-7.

A sweeping look by the Fiscal Assistant Secretary of the Treasury at each of nine major responsibilities making up the Fiscal Service's financial leadership role in Government.

International Affairs

"International Debt Strategy, The." Brady, Nicholas F. June 1989, pp. 3-4.

Remarks by the Secretary of the Treasury on the debt problem and the direction needed to be provided to international efforts to strengthen the debt strategy.

"Strengthened Debt Strategy, The." Brady, Nicholas F. December 1989, page 3.

An update from the Secretary of the Treasury on the international debt strategy to improve the quality of creditors' assets and creditworthiness in debtor countries.

"U.S. Policy Toward Direct Foreign Investment." Robson, John E. March 1990, pp. 4-7.

An exploration into the position that the United States is taking on foreign trade and investment policy matters.

FINANCIAL OPERATIONS

INTRODUCTION

Background

Section 114 of the Budget and Accounting Procedures Act of 1950 (31 U.S.C. 3513a) requires the Secretary of the Treasury to prepare reports on the financial operations of the U.S. Government.

The first three Federal fiscal operations (FFO) tables are published quarterly and cover 5 years of data, estimates for 2 years, detail for 13 months, and fiscal year-to-date data. The tables are designed to provide a summary of data relating to Federal fiscal operations reported by Federal entities and disbursing officers, and daily reports from the Federal Reserve banks. These reports detail accounting transactions affecting receipts and outlays of the Federal Government and off-budget Federal entities, and their related effect on the assets and liabilities of the U.S. Government. Data used in the preparation of tables FFO-1, FFO-2, and FFO-3 is derived from the Monthly Treasury Statement of Receipts and Outlays of the United States Government.

Budget authority usually takes the form of "appropriations" which permit obligations to be incurred and payments to be made. Most appropriations for current operations are made available for obligation only during a specified fiscal year (annual appropriations). Some are for a specified longer period (multiple-year appropriations). Others, including most of those for construction, some for research, and many for trust funds, are made available for obligation until the amount appropriated has been expended or until the objectives have been attained (no-year appropriations).

Budget authority can be made available by Congress for obligations and disbursement during a fiscal year from a succeeding year's appropriations (advance funding). For many education programs, Congress provides forward funding—budget authority made available for obligation in one fiscal year for the financing of ongoing grant programs during the succeeding fiscal year. When advantageous to the Federal Government, an appropriation is provided by Congress that will become available 1 year or more beyond the fiscal year for which the appropriation act is passed (advance appropriations). Included as advance appropriations are appropriations related to multiyear budget requests.

When budget authority is made available by Congress for a specific period of time, any part not obligated during that period expires and cannot be used later. Congressional actions that extend the availability of unobligated amounts that have expired or would otherwise expire are known as reappropriations. The amounts involved are counted as new budget authority in the fiscal year of the legislation in which the reappropriation action is included, regardless of when the amounts were originally appropriated or when they would otherwise lapse.

Outlavs.--Obligations generally are liquidated by the issuance of checks or the disbursement of cash; such payments are called outlays. In lieu of issuing checks, obligations also may be liquidated (and outlays recorded) by the accrual of interest on public issues of Treasury debt securities (including an increase in the redemption value of bonds outstanding); or by the issuance of bonds, debentures, notes, monetary credits, or electronic payments. Refunds of collections generally are treated as reductions of collections, rather than as outlays. However, payments for earned-income tax credits in excess of tax liabilities are treated as outlays rather than as a reduction in receipts. Outlays during a fiscal year may be for payment of obligations incurred in prior years or in the same year. Outlays, therefore, flow in part from unexpended balances of prior year budget authority and in part from budget authority provided for the year in which the money is spent. Total outlays include both budget and off-budget outlays and are stated net of offsetting

collections.

Receipts.—Receipts reported in the tables are classified into the following major categories: (1) budget receipts and (2) offsetting collections. Budget receipts are collections from the public that result from the exercise of the Government's sovereign or governmental powers, excluding receipts offset against outlays. These collections, also called governmental receipts, consist mainly of tax receipts (including social insurance taxes), receipts from court fines, certain licenses, and deposits of earnings by the Federal Reserve System. Refunds of receipts are treated as deductions from gross receipts.

Offsetting collections are from other Government accounts or the public that are of a business-type or market-oriented nature. They are classified into two major categories: (1) offsetting collections credited to appropriations or fund accounts, and (2) offsetting receipts (i.e., amounts deposited in receipt accounts). Collections credited to appropriation or fund accounts normally can be used without appropriation action by Congress. These occur in two instances: (1) when authorized by law, amounts collected for materials or services are treated as reimbursements to appropriations and (2) in the three types of revolving funds (public enterprise, intragovernmental, and trust); collections are netted against spending, and outlays are reported as the net amount.

Offsetting receipts in receipt accounts cannot be used without being appropriated. They are subdivided into two categories: (1) proprietary receipts--these collections are from the public and they are offset against outlays by agency and by function, and (2) intragovernmental funds--these are payments into receipt accounts from governmental appropriation or fund accounts. They finance operations within and between Government agencies and are credited with collections from other Government accounts. The transactions may be intrabudgetary when the payment and receipt both occur within the budget or from receipts from off-budget Federal entities in those cases where payment is made by a Federal entity whose budget authority and outlays are excluded from the budget totals.

Intrabudgetary transactions are subdivided into three categories: (1) interfund transactions, where the payments are from one fund group (either Federal funds or trust funds) to a receipt account in the other fund group; (2) Federal intrafund transactions, where the payments and receipts both occur within the Federal fund group; and (3) trust intrafund transactions, where the payments and receipts both occur within the trust fund group.

Offsetting receipts are generally deducted from budget authority and outlays by function, by subfunction, or by agency. There are four types of receipts, however, that are deducted from budget totals as undistributed offsetting receipts. They are: (1) agencies' payments (including payments by off-budget Federal entities) as employers into employees retirement funds, (2) interest received by trust funds, (3) rents and royalties on the Outer Continental Shelf lands, and (4) other interest (i.e., interest collected on Outer Continental Shelf money in deposit funds when such money is transferred into the budget).

Off-budget Federal entities.--The Federal Government has used the unified budget concept as the foundation for its budgetary analysis and presentation since 1969. This concept calls for the budget to include all of the Government's fiscal transactions with the public. Starting in 1971, however, various laws have been enacted under which several Federal entities have been removed from the budget or created outside the budget. Other laws have moved certain off-budget Federal entities onto the budget. Under current law, the off-budget Federal entities consist of the two Social

Security trust funds, Federal old-age and survivors insurance and Federal disability insurance.

The off-budget Federal entities are federally owned and controlled, but their transactions are excluded from the budget totals under provisions of law. When an entity is off-budget, its receipts, outlays, and surplus or deficit are not included in budget receipts, budget outlays, or the budget deficit; its budget authority is not included in the totals of budget authority for the budget; and its receipts, outlays, and surplus or deficit ordinarily are not subject to the targets set by the congressional budget resolution.

Nevertheless, the Balanced Budget and Emergency Deficit Control Act of 1985 (commonly known as the Gramm-Rudman-Hollings Act) included the off-budget surplus or deficit in calculating the deficit targets under that act and in calculating the excess deficit for purposes of that act. Partly because of this reason, attention has focused on the total receipts, outlays, and deficit of the Federal Government instead of the on-budget amounts alone.

Table FFO-1,--Summary of Fiscal Operations

This table summarizes the amount of total receipts, total outlays, total surplus or deficit, transactions in Federal securities and monetary assets, and transactions and balances in Treasury operating cash.

Table FFO-2.--On-budget and Off-budget Receipts by Source

Budget receipts are taxes and other collections from the public that result from the exercise of the Government's sovereign or governmental powers. The amounts in this table represent income taxes, social insurance taxes, net contributions for other insurance and retirement, excise taxes, estate and gift taxes, customs duties, and net miscellaneous receipts by source.

Table FFO-3.--On-budget and Off-budget Outlays by Agency

Congress [usually] provides budget authority which is [generally] in the form of appropriations, then Federal agencies obligate the Government funds to make outlays. The amounts in this table represent a breakdown of on-budget and off-budget outlays by agency.

Table FFO-4.--Summary of Internat Revenue Collections by States and Other Areas

This annual table provides data on internal revenue collections classified by States and other areas and by type of tax. The amounts reported are for collections made in a fiscal year beginning in October and ending the following September.

Fiscal year collections span several tax liability years because they consist of prepayments (e.g., estimated tax payments and taxes withheld by employers for individual income and Social Security taxes), of payments made with tax returns, and of subsequent payments made after tax returns are due or are filed (e.g., payments with delinquent returns or on delinquent accounts).

It is also important to note that these data do not necessarily reflect the Federal tax burden of individual States. The amounts are reported based on the primary filing address furnished by each taxpayer or reporting entity. For multistate corporations, this address may reflect only the State where such a corporation reported its taxes from a principal office rather than other States where income was earned or where individual income and social security taxes were withheld. In addition, an individual may reside in one State and work in another State.

Budget Results for the Second Quarter, Fiscal 1990

Summary

The Federal budget deficit in the second quarter of fiscal 1990 totaled \$80-1/3 billion, up from \$60-3/4 billion in the second quarter of fiscal 1989. For the first 6 months of fiscal 1990, the deficit was \$151 billion, or \$22-1/2 billion wider than for the same period of fiscal 1989 when the deficit for the full fiscal year was \$152 billion. Outlays during the first half of fiscal 1990 were up 7 percent from a year earlier, while receipts increased by 4 percent. In the Budget of the U.S. Government, Fiscal Year 1991, released early this year, a deficit of \$124 billion was projected for the full year fiscal 1990.

Outlays in terms of major functional category in the second quarter of fiscal 1990 were up almost across the board from the readings of a year earlier. There had been a more mixed pattern in the first quarter. In the second quarter, increased spending by the Resolution Trust Corporation (concentrated in March) sharply boosted outlays for the commerce and housing credit function. Second-quarter spending

for the health and medicare functions was up appreciably (18 percent) from the second quarter of fiscal 1989. Spending for income security rose by 11-1/2 percent from the second quarter of fiscal 1989. Outlays for national defense in the second quarter increased almost 5 percent from a year ago after having slowed in the first quarter of fiscal 1990 from the year earlier figure.

Expenditures for health and medicare jumped, spending for income security rose, and outlays for national defense increased.

First-Quarter Receipts

The following capsule analysis of budget receipts, by source, for the first quarter of fiscal 1990 supplements fiscal data earlier reported in the winter issue of the *Treasury Bulletin*. At the time of that issue's release, not enough data was available to analyze adequately collections for the quarter.

Individual income taxes.--Individual income tax receipts were \$107.3 billion for the first quarter of fiscal 1990. This represents an increase of \$6.5 billion over the comparable quarter for fiscal 1989. Withheld receipts were up \$6.2 billion over the comparable quarter for fiscal 1989.

lion, nonwithheld receipts were basically unchanged, and refunds were down \$0.4 billion.

Corporate income taxes.--Net corporate receipts for the

first quarter of fiscal 1990 totaled \$22 billion. This was \$3.4 billion lower than the first quarter of fiscal 1989. This downturn in receipts reflected lower corporate profits. The \$3.4 billion decrease was mostly due to a fall in estimated and final payments of \$2.3 billion and \$0.8 billion, respectively. In addition, refunds increased by \$0.3 billion.

Employment taxes and contributions.--Employment taxes and contributions increased from \$68.7 billion during the first quarter of fiscal 1989 to \$72.7 billion in the first quarter of fiscal 1990. Two adjustments were made to the Social Security trust funds during the quarter. The old-age survivors, disability, and health insurance (OASDHI) trust funds were adjusted to reflect actual withholding data from 1988. As a consequence, \$0.1 billion was returned to the withheld individual income tax account. This adjustment was smaller than a comparable adjustment in the previous year when the trust fund was reduced by \$0.6 billion to reflect 1987 withholding data. Based on self-employment earnings reported on tax returns from 1987 and prior years, the OASDHI trust funds were increased by \$0.1 billion, and the nonwithheld individual income tax account was decreased accordingly. In the prior year, the adjustment to the trust funds for selfemployment taxes was \$0.3 billion.

Unemployment insurance.--Unemployment insurance taxes fell by \$0.8 billion between the first quarters of fiscal 1989 and fiscal 1990. For the 3-month period beginning October 1989, the unemployment insurance account was credited with \$3.1 billion. Department of the Treasury transfers to the Federal Unemployment Tax Act trust fund were adjusted downwards in the quarter to compensate for excessive transfers during 1989.

Contributions for other insurance and retirement.--In

the first quarter of fiscal 1990, contributions for other insurance and retirement were \$1.1 billion, slightly less than for the comparable quarter of fiscal 1989. The slight decrease in receipts reflects the general pattern of a decrease in the number of individuals covered under the old civil service retirement system. These individuals are being replaced with new employees who have relatively lower Federal employees' retirement system contributions.

Excise taxes.--Excise tax receipts for the October-December 1989 quarter were \$8.7 billion, compared with \$9.4 billion for the comparable quarter of fiscal 1989. Year-to-year comparisons of excise tax receipts have been affected by changes in timing of collections and refunds of fuel tax receipts. The decrease of \$0.7 billion in net excise receipts from the comparable prior year level is primarily the result of these timing factors.

Estate and gift taxes.--Estate and gift tax receipts were \$2.4 billion in the October through December quarter of 1989. This represents an increase of \$0.3 billion over the previous quarter as well as over the same quarter in the previous year.

Customs duties.—Customs receipts net of refunds were \$4.2 billion for the first quarter of fiscal 1990. This increase of less than \$0.1 billion over the comparable prior year period is due to an increase in imports.

Miscellaneous receipts.--Net miscellaneous receipts for the first quarter of fiscal 1990 increased by \$1 billion, over the comparable prior year period, to \$7.3 billion. Deposits of Federal Reserve earnings increased by \$1.1 billion, while net other miscellaneous receipts decreased by \$0.1 billion. ◊

Note.—Outlays consist of disbursements less proprietary receipts from the public and certain intrabudgetary transactions. On-budget and off-budget estimates are based on the Budget of the U.S. Government, Fiscal Year 1991, released Jan. 29, 1990, by the Office of Management and Budget.

^{*} Less than \$500,000.

Data for the period do not reflect postyear adjustments published in the Monthly Treasury Statement of Receipts and Outlays of the United States Government, the source for this table.

On-budget outlays have been increased by a net of \$1,070 billion to reflect \$850 million in Federal employees benefit reform and \$220 million in postal rates for Government mail.

"Obligations" are the basis on which the use of funds is controlled in the Federal Government. They are recorded at the point at which the Government makes a firm commitment to acquire goods or services and are the first of the four key events--order, delivery, payment, and consumption--which characterize the acquisition and use of resources. In general, they consist of orders placed, contracts awarded, services received, and similar transactions requiring the disbursement of money.

The obligational stage of Government transactions is a strategic point in gauging the impact of the Government's operations on the national economy, since it frequently represents for business firms the Government commitment which stimulates business investment, including inventory purchases and employment of labor. Disbursements may not occur for months after the Government places its

order, but the order itself usually causes immediate pressure on the private economy.

Obligations are classified according to a uniform set of categories based upon the nature of the transaction without regard to its ultimate purpose. All payments for salaries and wages, for example, are reported as personnel compensation, whether the personal services are used in current operations or in the construction of capital items.

Federal agencies often do business with one another; in doing so, the "buying" agency records obligations, and the "performing" agency records reimbursements. In table FO-1, obligations incurred within the Government are distinguished from those incurred outside the Government. Table FO-2 shows only those incurred outside.

ACCOUNT OF THE U.S. TREASURY

SOURCE AND AVAILABILITY OF THE BALANCE IN THE ACCOUNT OF THE U.S. TREASURY

The operating cash of the Treasury is maintained in Treasury's accounts with the Federal Reserve banks and branches and in tax and loan accounts. Major information sources include the Daily Balance Wire received from the Federal Reserve banks and branches, and electronic transfers through the Letter of Credit Payment, Fedline Payment, and Fedwire Deposit Systems. As the balances in the accounts at the Federal Reserve banks become depleted, they are restored by calling in (withdrawing) funds from thousands of financial institutions throughout the country authorized to maintain tax and loan accounts.

Under authority of Public Law 95-147, the Treasury implemented a program on Nov. 2, 1978, to invest a portion of its operating cash in obligations of depositaries maintaining tax and loan accounts. Under the Treasury tax and loan investment program, depositary financial institutions select the manner in which they will participate in the program. Depositaries that wish to retain funds deposited in their tax and loan accounts in interest-bearing obligations participate under the Note Option; depositaries that wish to remit the funds to the Treasury's account at Federal Reserve banks participate under the Remittance Option.

Deposits to tax and loan accounts occur in the normal course of

business under a uniform procedure applicable to all financial institutions whereby customers of financial institutions deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of funds from a customer's account to the tax and loan account in the same financial institution. On occasion, to the extent authorized by the Treasury, financial institutions are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the accounts of their customers. Also, Treasury can direct the Federal Reserve banks to invest excess funds in these accounts directly from its account at the Federal Reserve banks.

The tax and loan system permits the Treasury to collect funds through financial institutions and to leave the funds in Note Option depositaries and in the financial communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on Note Option financial institution reserves and the economy.

^{*} Less than \$500,000.

¹ Represents transfers from tax and loan note accounts, proceeds from sales of securities other than Government account series, and taxes.
2 Represents chacks poid with transfers.

Represents checks paid, wire transfer payments, drawdowns on letters of credit, redemptions of securities other than Government account series, and investment (transfer) of excess funds out of this account to the tax and loan note accounts.
Special depositaries are permitted to make payment in the form of a deposit credit for the

Special depositaries are permitted to make payment in the form of a deposit credit for the purchase price of U.S. Government securities purchased by them for their own account, of for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues. Effective Oct. 1, 1989, public debt securities, including U.S. savings bonds, will no longer be settled through the tax and loan note accounts.

⁴ Includes U.S. savings bonds, savings notes, retirement plan and tax and loss bonds. U.S. savings notes first offered for sale as of May 1, 1967, and were discontinued after June 30, 1970. Retirement plan bonds first offered for sale as of Jan. 1,1963; tax and loss bonds first issued in March 1968.

Taxes eligible for credit consist of those deposited by taxpayers in the tax and loan depositaries, as follows: Withheld income taxes beginning March 1948; taxes on employers and employees under the Faderal Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; a number of excise taxes beginning July 1953; estimated corporation income taxes beginning April 1967; all corporation income taxes due on or after Mar. 15, 1968; FUTA taxes beginning April 1970, and individual estimated income taxes beginning October 1988.

INTRODUCTION

Treasury securities (i.e., public debt securities) comprise most of the Federal debt, with securities issued by other Federal agencies accounting for the remainder. In addition to the data on the Federal debt presented in the tables in this section of the quarterly *Treasury Bulletin*, the Treasury publishes detailed data on the public debt outstanding in the Monthly Statement of the Public Debt of the United States and on agency securities and the investments of Federal Government accounts in Federal securities in the Monthly Treasury Statement of Receipts and Outlays of the United States Government

Table FD-1.--Summary of Federal Debt

The Federal debt outstanding is summarized as to holdings of public debt and agency securities by the public, which includes the Federal Reserve, and by Federal agencies, largely the social security and other Federal retirement trust funds. Greater detail on holdings of Federal securities by particular classes of investors is presented in the ownership tables, OFS-1 and OFS-2, of the *Treasury Bulletin*

Table FD-2.--Interest-Bearing Public Debt

Interest-bearing marketable and nonmarketable Treasury securities are presented as to type of security. The difference between interest-bearing and total public debt securities reflects outstanding matured Treasury securities on which interest has ceased to accrue. The Federal Financing Bank (FFB) is under the supervision of the Treasury, and FFB securities shown in this table are held by a U.S. Government account.

Table FD-3.--Government Account Series

Nonmarketable Treasury securities held by U.S. Government accounts are summarized as to issues to particular funds within the Government. Many of the funds invest in par-value special series nonmarketables at statutorily determined interest rates, while others whose statutes do not prescribe an interest rate formula invest in market-based special Treasury securities whose terms mirror the terms of marketable Treasury securities.

Table FD-4.--Interest-Bearing Securities Issued by Government Agencies

Federal agency borrowing has been declining in recent years, in part because the Federal Financing Bank has been providing financing to other Federal agencies. This table does not cover Federal agencies.

eral agency borrowing from the Treasury, which is presented in the Monthly Treasury Statement of Receipts and Outlays of the United States Government. The Government-sponsored entities, whose securities are presented in the memorandum section of table FD-4, are not agencies of the Federal Government, nor are their securities presented in table FD-4 guaranteed by the Federal Government.

Table FD-5.--Maturity Distribution and Average Length of Marketable Interest-Bearing Public Debt Held by Private Investors

The average maturity of the privately held marketable Treasury debt has increased gradually since it hit a trough of 2 years, 5 months, in December 1975. In March 1971, the Congress enacted a limited exception to the 4-1/4-percent interest rate ceiling on Treasury bonds that permitted the Treasury to offer securities maturing in more than 7 years at current market rates of interest for the first time since 1965. The exception to the 4-1/4-percent interest rate ceiling had been expanded since 1971 to authorize the Treasury to continue to issue long-term securities. The 4-1/4-percent interest rate ceiling on Treasury bonds was repealed on November 10, 1988. The volume of privately held Treasury marketable securities by maturity class reflects the remaining period to maturity of Treasury bills, notes, and bonds, and the average length comprises an average of remaining periods to maturity, weighted by the amount of each security held by private investors (i.e., excludes the Government accounts and Federal Reserve banks).

Table FD-6.--Debt Subject to Statutory Limitation

The statutory debt ceiling is compared with the outstanding debt subject to limit. The other debt category includes certain Federal debt that the Congress has designated by statute to be subject to the debt ceiling. The changes in non-interest-bearing debt shown in the last column reflect maturities of Treasury securities on nonbusiness days, such as weekends and holidays. In that event, Treasury securities are redeemed on the first business day following a non-business day.

Table FD-7.--Treasury Holdings of Securities Issued by Government Corporations and Other Agencies

Certain Federal agencies are authorized by statute to borrow from the Treasury, largely to finance direct loan programs. In addition, agencies such as the Bonneville Power Administration are authorized to borrow from the Treasury to finance capital projects. The Treasury finances such loans to the Federal agencies with issues of public debt securities.

TREASURY FINANCING OPERATIONS, JANUARY-MARCH 1990

JANUARY

Auction of 7-Year Notes

On January 3 the Treasury announced that it would auction \$7,500 million of 7-year notes to refund \$4,726 million of notes maturing January 15, 1990, and to raise about \$2,775 million of new cash. The notes offered were Treasury Notes of Series D-1997, dated January 16, 1990, due January 15, 1997, with interest payable on July 15 and January 15 until maturity. An interest rate of 8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EST, January 10, 1990, and totaled \$21,999 million, of which \$7,588 million was accepted at yields ranging from 8.00 percent, price 100.000, up to 8.02 percent, price 99.894. Tenders at the high yield were allotted 62 percent. Noncompetitive tenders were accepted in full at the average yield, 8.02 percent, price 99.894. These totaled \$365 million. Competitive tenders accepted from private investors totaled \$7,223 million.

In addition to the \$7,588 million of tenders accepted in the auction process, \$140 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$116 million was accepted from Federal Reserve banks for their own account.

Auction of 2-Year Notes

On January 17 the Treasury announced that it would auction \$10,000 million of 2-year notes to refund \$10,209 million of notes maturing January 31, 1990, and to pay down about \$200 million. The notes offered were Treasury Notes of Series V-1992, dated January 31, 1990, due January 31, 1992, with interest payable on July 31 and January 31 until maturity. An interest rate of 8-1/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EST, January 24, and totaled \$26,908 million, of which \$10,027 million was accepted at yields ranging from 8.19 percent, price 99.882, up to 8.21 percent, price 99.846. Tenders at the high yield were allotted 72 percent. Noncompetitive tenders were accepted in full at the average yield, 8.21 percent, price 99.846. These totaled \$1,326 million. Competitive tenders accepted from private investors totaled \$8,701 million.

In addition to the \$10,027 million of tenders accepted in the auction process, \$677 million was awarded to Federal Reserve banks as agents for foreign and international monetary authorities. An additional \$539 million was accepted from Federal Reserve banks for their own account.

52-Week Bills

On January 5 tenders were invited for approximately \$9,500 million of 364-day Treasury bills to be dated January 18, 1990, and to mature January 17, 1991. The issue was to refund \$9,119 million of maturing 52-week bills and to raise about \$375 million of new cash. Tenders were opened on January 11. They totaled \$30,431 million, of which \$9,515 million was accepted, including \$1,115 million of noncompetitive tenders from the public and \$2,290 million of the bills issued to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. The average bank discount rate was 7.21 percent.

FEBRUARY

February Quarterly Financing

On January 31 the Treasury announced that it would auction \$10,000 million of 3-year notes of Series S-1993, \$10,000 million of 10-year notes of Series A-2000, and \$10,000 million of 30-year bonds of 2020 to refund \$18,051 million of Treasury securities maturing February 15 and to raise about \$11,950 million of new cash.

The notes of Series S-1993 were dated February 15, 1990, due February 15, 1993, with interest payable on August 15 and February 15 until maturity. An interest rate of 8-3/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EST, February 6, and totaled \$34,074 million, of which \$10,001 million was accepted at yields ranging from 8.42 percent, price 99.883, up to 8.44 percent, price 99.831. Tenders at the high yield were allotted 12 percent. Noncompetitive tenders were accepted in full at the average yield, 8.43 percent, price 99.857. These totaled \$1,189 million. Competitive tenders accepted from private investors totaled \$8,812 million.

In addition to the \$10,001 million of tenders accepted in the auction process, \$825 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$3,830 million was accepted from Federal Reserve banks for their own account.

The notes of Series A-2000 were dated February 15, 1990, due February 15, 2000, with interest payable on August 15 and February 15 until maturity. An interest rate of 8-1/2 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EST, February 7, and totaled \$23,943 million, of which \$10,013 million was accepted at yields ranging from 8.58 percent, price 99.470, up to 8.59 percent, price 99.404. Tenders at the high yield were allotted 60 percent. Noncompetitive tenders were accepted in full at the average yield, 8.59

TREASURY FINANCING OPERATIONS, JANUARY-MARCH 1990

percent, price 99.404. These totaled \$565 million. Competitive tenders accepted from private investors totaled \$9,448 million.

In addition to the \$10,013 million of tenders accepted in the auction process, \$200 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$450 million was accepted from Federal Reserve banks for their own account.

The notes of Series A-2000 may be held in STRIPS form. The minimum par amount required is \$400,000.

The bonds of 2020 were dated February 15, 1990, due February 15, 2020, with interest payable on August 15 and February 15 until maturity. An interest rate of 8-1/2 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the bonds were received until 1 p.m. EST, February 8, and totaled \$18,441 million, of which \$10,001 million was accepted at yields ranging from 8.48 percent, price 100.216, up to 8.53 percent, price 99.677. Tenders at the high yield were allotted 54 percent. Noncompetitive tenders were accepted in full at the average yield, 8.50 percent, price 100.000. These totaled \$442 million. Competitive tenders accepted from private investors totaled \$9,559 million.

In addition to the \$10,001 million of tenders accepted in the auction process, \$226 million was accepted from Federal Reserve banks for their own account.

The bonds of 2020 may be held in STRIPS form. The minimum par amount required is \$400,000.

Auction of 2-Year and 5-Year 2-Month Notes

On February 14 the Treasury announced that it would auction \$10,000 million of 2-year notes of Series W-1992 and \$8,000 million of 5-year 2-month notes of Series K-1995 to refund \$9,850 million of publicly held 2-year notes maturing February 28, 1990, and to raise about \$8,150 million of new cash.

The notes of Series W-1992 were dated February 28, 1990, due February 29, 1992, with interest payable on the last day of August and February until maturity. An interest rate of 8-1/2 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EST, February 21, and totaled \$26,337 million, of which \$10,002 million was accepted at yields ranging from 8.48 percent, price 100.036, up to 8.50 percent, price 100.000. Tenders at the high yield were allotted 83 percent. Noncompetitive tenders were accepted in full at the average yield, 8.50 percent, price 100.000. These totaled \$1,189 million. Competitive tenders accepted from private investors totaled \$8,813 million.

In addition to the \$10,002 million of tenders accepted in the auction process, \$840 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$913 million was accepted from Federal Reserve banks for their own account.

The notes of Series K-1995 were dated March 1, 1990, due May 15, 1995, with interest payable on November 15 and May 15 until maturity. An interest rate of 8-1/2 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EST, February 22, and totaled \$30,131 million, of which \$8,045 million was accepted at yields ranging from 8.52 percent, price 99.847, up to 8.53 percent, price 99.805. Tenders at the high yield were allotted 52 percent. Noncompetitive tenders were accepted in full at the average yield, 8.53 percent, price 99.805. These totaled \$464 million. Competitive tenders accepted from private investors totaled \$7,581 million.

In addition to the \$8,045 million of tenders accepted in the auction process, \$220 million was awarded to Federal Reserve banks as agents for foreign and international monetary authorities.

52-Week Bills

On February 2 tenders were invited for approximately \$9,500 million of 364-day Treasury bills to be dated February 15, 1990, and to mature February 14, 1991. The issue was to refund \$9,088 million of maturing 52-week bills and to raise about \$400 million of new cash. Tenders were opened on February 13. They totaled \$36,641 million, of which \$9,568 million was accepted, including \$1,310 million of noncompetitive tenders from the public and \$2,870 million of the bills issued to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. The average bank discount rate was 7.42 percent.

Cash Management Bills

On February 27 tenders were invited for approximately \$10,000 million of 52-day bills to be issued March 5, 1990, representing an additional amount of bills dated October 26, 1989, maturing April 26, 1990. The issue was to raise new cash. Tenders were opened on March 1. They totaled \$52,010 million, of which \$10,177 million was accepted. The average bank discount rate was 7.95 percent.

MARCH

Auction of 2-Year and 4-Year Notes

On March 21 the Treasury announced that it would auction \$10,000 million of 2-year notes of Series X-1992 and \$8,000 million of 4-year notes of Series M-1994 to refund

TREASURY FINANCING OPERATIONS, JANUARY-MARCH 1990

\$16,665 million of Treasury notes maturing March 31 and to raise about \$1,325 million of new cash.

The notes of Series X-1992 were dated April 2, 1990, due March 31, 1992, with interest payable on September 30 and March 31 until maturity. An interest rate of 8-1/2 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EST, March 27, and totaled \$28,786 million, of which \$10,085 million was accepted at yields ranging from 8.58 percent, price 99.856, up to 8.59 percent, price 99.838. Tenders at the high yield were allotted 76 percent. Noncompetitive tenders were accepted in full at the average yield, 8.59 percent, price 99.838. These totaled \$1,569 million. Competitive tenders accepted from private investors totaled \$8,516 million.

In addition to the \$10,085 million of tenders accepted in the auction process, \$607 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$1,750 million was accepted from Federal Reserve banks for their own account.

The notes of Series M-1994 were dated April 2, 1990, due March 31, 1994, with interest payable on September 30 and March 31 until maturity. An interest rate of 8-1/2 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received until 1 p.m. EST, March 28, and totaled \$39,684 million, of which \$8,026 million was accepted at a yield of 8.58 percent, price 99.734, which represented the full range of accepted bids. Competitive tenders at the 8.58-percent yield were allotted 74 percent. Noncompetitive tenders were accepted in full at the average yield, 8.58 percent, price 99.734. These totaled

\$854 million. Competitive tenders accepted from private investors totaled \$7,172 million.

In addition to the \$8,026 million of tenders accepted in the auction process, \$242 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$896 million was accepted from Federal Reserve banks for their own account.

52-Week Bitts

On March 2 tenders were invited for approximately \$9,750 million of 364-day Treasury bills to be dated March 15, 1990, and to mature March 14, 1991. The issue was to refund \$9,056 million of maturing 52-week bills and to raise about \$700 million of new cash. Tenders were opened on March 8. They totaled \$24,936 million, of which \$9,750 million was accepted, including \$1,007 million of noncompetitive tenders from the public and \$2,730 million of the bills issued to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. An additional \$124 million was issued to Federal Reserve banks as agents for foreign and international monetary authorities for new cash. The average bank discount rate was 7.76 percent.

Cash Management Bills

On March 27 tenders were invited for approximately \$13,000 million of 16-day bills to be issued April 3, 1990, representing an additional amount of bills dated August 15, 1989, maturing April 19, 1990. The issue was to raise new cash. Tenders were opened on March 29. They totaled \$51,415 million, of which \$13,004 million was accepted. The average bank discount rate was 8.15 percent.

INTRODUCTION

Background

The Second Liberty Bond Act (31 U.S.C. 3101, et seq.) provides the Secretary of the Treasury with broad authority to borrow and to determine the terms and conditions of issue, conversion, maturity, payment, and interest rate on Treasury securities. Data in the "Public Debt Operations" section, which have been published in the *Treasury Bulletin* in some form since its inception in 1939, pertain only to marketable Treasury securities, currently bills, notes, and bonds. Treasury bills are discount securities that mature in 1 year or less, while Treasury notes and bonds have semiannual interest payments. New issues of Treasury notes mature in 2 to 10 years, and bonds mature in over 10 years from the issue date. Each marketable Treasury security is listed in the Monthly Statement of the Public Debt of the United States.

Table PDO-1.--Maturity Schedule of Interest-Bearing Marketable Public Debt Securities Other than Regular Weekly and 52-Week Treasury Bilts

All unmatured Treasury notes and bonds are listed in maturity order, beginning with the earliest maturity. A separate breakout is provided for the combined holdings of the Government accounts and Federal Reserve banks, so that the "All other investors" category includes all private holdings.

Table PDO-2.--Offerings of Bilts

The results of weekly auctions of 13- and 26-week bills and auctions of 52-week bills every fourth week are presented in table PDO-2. Treasury bills mature each Thursday. New issues of 13-week bills are reopenings of 26-week bills. The 26-week bill issued every fourth week to mature on the same Thursday as an existing

52-week bill is a reopening of the existing 52-week bill. The high, low, and average yields on accepted tenders and the dollar value of total bids is presented, along with the dollar value of awards on a competitive and a noncompetitive basis. The Treasury accepts noncompetitive tenders of up to \$1 million in each auction of Treasury securities in order to assure that individuals and smaller institutions are able to participate in offerings of new marketable Treasury securities. Noncompetitive bids are awarded at the average yield on accepted competitive bids.

Table PDO-3.--Public Offerings of Marketable Securities Other than Regular Weekly Treasury Bills

The results of auctions of marketable Treasury securities, other than weekly bills, are listed in the chronological order of the auction dates over approximately the most recent 2 years. This table includes notes and bonds presented in table PDO-1, 52-week bills in table PDO-2, and data for cash management bills. Treasury offers cash management bills from time to time to bridge temporary or seasonal declines in the cash balance. Cash management bill maturities generally coincide with the maturities of regular issues of Treasury bills.

Table PDO-4.--Atlotments by Investor Ctasses for Public Marketable Securities, Parts A and B

Data on allotments of marketable Treasury securities by investor class are presented in chronological order of the auction date for approximately the most recent 2 years. These data have appeared in the *Treasury Bulletin* since 1956. Tenders in each Treasury auction of marketable securities other than weekly auctions of 13- and 26-week bills are tallied by the Federal Reserve banks into investor classes described in the footnotes to the table.

¹ The 13-week bills represent additional issue of bills with an original maturity of 26 weeks

or 52 weeks.

For bills issued on or after May 2, 1974, includes amounts exchanged on noncompetitive basis by Government accounts and Federal Reserve banks.

For 13-week, 26-week, and 52-week bills tenders for \$1,000,000 or less from any one bidder are accepted in full at average price or accepted competitive bids; for other issues, the corresponding amount is stipulated in each offering announcement.

Equivalent coupon-issue yield.

Equivalent coupon-issue yield.

Except \$2,000,000 at 96.325 percent.

Except \$3,000,000 at 98.104 percent.

⁷ Except \$200,000 at 96,309 percent.

⁸ Except \$300,000 at 98.071 percent, \$1,140,000 at 98.064 percent, and \$770,000 at 98.066 percent.

^{98.066} percent.

98.066 percent.

10 Except \$4,950,000 at 96.193 percent, and \$4,000,000 at 96.168 percent.

11 Except \$825,000 at 96.259 percent.

12 Except \$1,000,000 at 96.033 percent.

13 Except \$2,300,000 at 96.077 percent.

14 Except \$1,850,000 at 92.346 percent, and \$400,000 at 92.326 percent.

15 Except \$1,045,000 at 92.659 percent, and \$1,050,000 at 92.619 percent.

16 Except \$7,250,000 at 92.801 percent.

Currently, all issues are sold at auction. For bill issues, the rate shown is the average bank discount rate. For note and bond issues, the rate shown is the interest rate. For details of bill offerings see table PDO-2.

From date of additional issue in case of a reopening.

In reopenings the amount issued is in addition to the amount of original offerings.

⁴ Includes securities issued to U.S. Government accounts and Federal Reserve banks; and to foreign and international monetary authorities, whether in exchange for maturing securities or for new cash.

Eligible for STRIPS.

⁶ Interest began to accrue before the issue date (settlement date) of this loan.

⁷ Yields accepted ranged from 7.38% (price 99.991) up to 7.40% (price 99.954) with the average at 7.39% (price 99.973).

Yields accepted ranged from 7.89% (price 99.949) up to 7.92% (price 99.848) with the average at 7.90% (price 99.916).

Yields accepted ranged from 8.43% (price 99.714) up to 8.45% (price 99.610) with the erage at 8.44% (price 99.662).

Yields accepted ranged from 7.63% (price 99.991) up to 7.65% (price 99.955) with the erage at 7,64% (price 99,973).

¹¹ Yields accepted ranged from 8.21% (price 99,777) up to 8.24% (price 99.699) with the verage at 8.23% (price 99.725)

average at 8.23% (price 99.725).

Yields accepted ranged from 9.05% (price 99.675) up to 9.06% (price 99.610) with the verage at 9.06% (price 99.610).

¹³ Yields accepted ranged from 9.16% (price 99.643) up to 9.18% (price 99.440) with the average at 9.17% (price 99.542).

14 Yields accepted ranged from 8.15% (price 99.955) up to 8.18% (price 99.900) with the

verage at 8.18% (price 99.900). ¹⁵ Yields accepted ranged from 8.75% (price 99.926) up to 8.77% (price 99.843) with the

average at 8.77% (price 99.843).

16 Yields accepted ranged from 8.04% (price 99.927) up to 8.06% (price 99.891) with the

average at 8.05% (price 99.909).

17 Yields accepted ranged from 8.35% (price 99.666) up to 8.37% (price 99.599) with the

erage at 8.36% (price 99,632). average at 8.36% (price 99.632).

18 Yields accepted ranged from 8.90% (price 99.872) up to 8.92% (price 99.769) with the

average at 8.91% (price 99.821)

19 Yields accepted ranged from 8.40% (price 99.955) up to 8.42% (price 99.919) with the erage at 8.91% (price 99.821)

erage at 8.41% (price 99.907).

average at 8.41% (price 99.947).

20 Yields accepted ranged from 8.76% (price 99.974) up to 8.77% (price 99.948) with the verage at 8.77% (price 99.948).

average at 8.77% (price 99.948).

21 Yields accepted ranged from 9.24% (price 100.064) up to 9.29% (price 99.743) with the average at 9.27% (price 99.871).

The low, high, and average yield was 8.72% (price 99.829).

²³ Yields accepted ranged from 9.03% (price 99.800) up to 9.04% (price 99.759) with the average at 9.04% (price 99.759). ²⁴ Yields accepted ranged from 8.52% (price 99.964) up to 8.53% (price 99.946) with the

average at 8.53% (price 99.946). 25 Yields accepted ranged from 8.74% (price 100.033) up to 8.77% (price 99.934) with the

average at 8.76% (price 99.967),

²⁶ Yields accepted ranged from 8.72% (price 99.510) up to 8.75% (price 99.356) with the

average at 8.73% (price 99.459).

average at 7.87% (price 102.875).

67 Yields accepted ranged from 7.76% (price 99.982) up to 7.79% (price 99.927) with the

average at 7.78% (price 99.945).

68 Yields accepted ranged from 7.76% (price 99.899) up to 7.78% (price 99.815) with the

average at 7.77% (price 99.857).

69 Yields accepted ranged from 7.69% (price 99.882) up to 7.73% (price 99.809) with the

average at 7.71% (price 99.846). 70 Yields accepted ranged from 7.64% (price 99.949) up to 7.65% (price 99.915) with the average at 7.65% (price 99.915).

Yields accepted ranged from 8.00% (price 100.000) up to 8.02% (price 99.894) with the

average at 8.02% (price 99.894). 72 Yields accepted ranged from 8.19% (price 99.882) up to 8.21% (price 99.846) with the average at 8.21% (price 99.846). ⁷³ Yields accepted ranged from 8.42% (price 99.883) up to 8.44% (price 99.831) with the

average at 8.43% (price 99.857).

74 Yields accepted ranged from 8.58% (price 99.470) up to 8.59% (price 99.404) with the

average at 8.59% (price 99.404).

75 Yields accepted ranged from 8.48% (price 100.216) up to 8.53% (price 99.677) with the

average at 8.50% (price 100.000).

76 Yields accepted ranged from 8.48% (price 100.036) up to 8.50% (price 100.000) with the

average at 8.50% (price 100.000). Yields accepted ranged from 8.52% (price 99.847) up to 8.53% (price 99.805) with the

average at 8.53% (price 99.805).

76 Yields accepted ranged from 8.58% (price 99.856) up to 8.59% (price 99.838) with the

average at 8.59% (price 99.838).

The low, high, and average yield was 8.58% (price 99.734).

Note.--All notes and bonds, except for foreign-targeted issues, were sold at auction through competitive and noncompetitive bidding. Foreign-targeted issues were sold at auction through competitive bidding only.

Includes trust funds and accounts that comprise Government accounts under the unified budget concept.
 2 Exclusive of banks and insurance companies.
 3 Included with all other investors are certain Government deposit accounts and

Government-sponsored agencies, formerly included with Government accounts.

Note.-For detail of offerings see table PDO-3.

U.S. SAVINGS BONDS AND NOTES

Series EE bonds, on sale since Jan. 1, 1980, are the only savings bonds currently sold. Series HH bonds are issued in exchange for series E and EE savings bonds and savings notes. Series A-D were sold from Mar. 1, 1935, through Apr. 30, 1941. Series E was on sale from May 1, 1941, through Dec. 31, 1979 (through June 1980 to payroll savers only). Series F and G were sold from May 1, 1941, through Apr. 30, 1952. Series H was sold from June 1, 1952, through Dec. 31, 1979. Series HH bonds were sold for cash from Jan. 1, 1980, through Oct. 31, 1982. Series J and K were

sold from May 1, 1952, through Apr. 30, 1957.

U.S. savings notes were on sale May 1, 1967, through June 30, 1970. The notes were eligible for purchase by individuals with the simultaneous purchase of series E savings bonds. The principal terms and conditions for purchase and redemption and information on investment yields of savings notes appear in the *Treasury Bulletins* of March 1967 and June 1968; and the Annual Report of the Secretary of the Treasury for fiscal year 1974.

OWNERSHIP OF FEDERAL SECURITIES

INTRODUCTION

Federal securities presented in these tables comprise public debt securities issued by the Treasury and debt issued by other Federal agencies under special financing authorities. See the Federal debt (FD) series of tables for a more complete description of the Federal debt.

Table OFS-1.-Distribution of Federal Securities by Class of Investors and Type of Issues

Holdings of Treasury marketable and nonmarketable securities and of debt issued by other Federal agencies are presented for Government accounts, the Federal Reserve banks, and private investors. Government account holdings largely reflect investment by the social security and Federal retirement trust funds. The Federal Reserve banks acquire Treasury securities in the market as a means of executing monetary policy.

Table OFS-2.--Estimated Ownership of Public Debt Securities Held by Private Investors

Privately held Treasury securities are those held by investors other than the Government accounts and Federal Reserve banks. Treasury obtains information on private holdings from a variety of sources, such as data gathered by the Federal financial institution regulatory agencies. State and local holdings and foreign holdings include special issues of nonmarketable securities to municipal entities and foreign official accounts, as well as municipal and foreign official and private holdings of marketable Treasury securities. Data on foreign holdings of marketable Treasury securities are presented in the capital movements tables in the *Treasury Bulletin*. See the footnotes for descriptions of the investor categories.

U.S. savings bonds, series A-F and J, are included at current redemption value.
 Includes domestically chartered banks, U.S. branches and agencies of foreign banks, New York investment companies majority owned by foreign banks, and Edge Act corporations owned by domestically chartered and foreign banks.

Includes partnerships and personal trust accounts.
 Includes U.S. savings notes. Sales began May 1, 1967, and were discontinued June 30, 1970. ⁵ Exclusive of banks and insurance companies.

⁶ Includes State and local pension funds.
7 Consists of the investment of foreign balances and international accounts in the United

7 Consists of the investment of foreign balances and international accounts in the United States. Estimates reflect 1978 benchmark through December 1984, and 1984, benchmark

blacks. Same relations for the date.

B Includes savings and loan associations, credit unions, nonprofit institutions, mutual savings banks, corporate pension trust funds, dealers and brokers, certain Government deposit accounts, and Government-sponsored agencies.

MARKET YIELDS

INTRODUCTION

The tables and charts in this section present yields on Treasury marketable securities and compare long-term Treasury market yields with yields on long-term corporate and municipal securities.

Table MY-1.-Treasury Market Bid Yields at Constant Maturities: Bills, Notes, and Bonds

The Treasury yield curve, presented in the chart that accompanies table MY-1, is based on current market bid quotations on the most actively traded Treasury securities as of 3:30 p.m. each business day. The Treasury obtains quotations from the Federal Reserve Bank of New York, which composites quotations provided by five primary dealers. This yield curve reflects yields based on semiannual interest payments and is read at constant maturity points to develop

a consistent data series. Yields on Treasury bills, which are discount securities, are the coupon equivalent yields of bank discount rates at which Treasury bills trade in the market. The Board of Governors of the Federal Reserve System also publishes the Treasury constant maturity data series in its weekly H.15 press release.

Table MY-2.--Average Yields of Long-Term Treasury, Corporate, and Municipal Bonds

The long-term Treasury rate is the 30-year constant maturity rate presented in table MY-1. The corporate and municipal bond series are developed by the Treasury, using reoffering yields on new long-term securities rated Aa by Moody's Investors Service. See the footnotes for further explanation.

¹ The Treasury long-term bond series has been revised to reflect 30-year maturities rather than the previously used 20-year maturity. The 30-year series was initiated in March 1977.
² Treasury series based on 3-week moving average of reoffering yields of new corporate bonds rated Aa by Moody's Investors Service and having an original maturity of at least 20 years.

³ Index of new reoffering yields on 20-year general obligations rated Aa by Moody's Investors Service.

Monthly Averages

INTRODUCTION

Section 114 of the Budget and Accounting Procedures Act of 1950 (31 U.S.C. 3513a) requires the Secretary of the Treasury to prepare reports on the financial operations of the U.S. Government and provides that each executive agency must furnish the Secretary of the Treasury such reports and information relating to the agency's financial condition and operations as the Secretary may require. The provisions do not apply to the legislative and judicial branches of the Federal Government; however, these entities are encouraged to submit the prescribed reports so the Secretary of the Treasury can prepare comprehensive reports on all the financial activities of the U.S. Government.

The Treasury Financial Manual (I TFM 2-4100) sets the criteria for the submission of annual and quarterly financial reports in accordance with the Reporting Entities Listing (Bulletin No. 88-11). Reports are provided for six fund types: Revolving funds, trust revolving funds, 15 major trust funds, all other trust funds, all other activity combined, and consolidated reports of an organizational unit. The financial transactions supporting the required reports are to be accounted for on the accrual basis. The Report on Operations can be submitted on a cash basis under certain circumstances (see I TFM 2-4180.20). Reports are to be prepared from a budgeting and accounting system which contains an integrated data base that is part of the agency's integrated financial management system as required by the Office of Management and Budget (OMB) Circular No. A-127.

The required reports should include all assets, liabilities, and equities relating to all programs and activities under control of the reporting entity, except for the assets of disbursing officers, which are reported by the Treasury. Reports should include transfer appropriation accounts from other agencies, foreign currencies, opera-

tions conducted in the territories or overseas, and any monetary assets or property received, spent, or otherwise accounted for by the reporting entity. Amounts are reported to the dollar.

Requirements provide that Federal agencies submit to Treasury four financial reports supplemented by three supporting reports. These reports are: Report on Financial Position (SF 220), Report on Operations (SF 221), Report on Cash Flow (SF 222), and Report on Reconciliation (SF 223). The three supporting reports are: Direct and Guaranteed Loans Reported by Agency and Program Due from the Public (SF 220-8), Report on Accounts and Loans Receivable Due from the Public (SF 220-9), and Additional Financial Information (SF 220-1). The report on Direct and Guaranteed Loans is submitted to Treasury quarterly, and annually for publication in the *Treasury Bulletin*. The Report on Accounts and Loans Receivable Due from the Public is submitted quarterly on a selected basis, and by all entities annually. Information captured in the SF 220-8 is shown in the following table:

Table FA-1.--Direct and Guaranteed Loans

This report reflects the direct loans and guaranteed loans to the public through the Federal Credit Program to support credit activities. Actual control of credit program levels remains with authorizing legislation and appropriations acts. The report on Direct and Guaranteed Loans also provides the Federal Reserve Board information to monitor the flow of funds. An accompanying chart depicts direct loans and guaranteed loans for the first quarter of fiscal 1990.

INTERNATIONAL STATISTICS

INTERNATIONAL FINANCIAL STATISTICS

The tables in this section are designed to provide data on U.S. reserve assets and liabilities and other statistics related to the U.S. balance of payments and international financial position.

Table IFS-1 shows the reserve assets of the United States, including its gold stock, special drawing rights held in the Special Drawing Account in the International Monetary Fund, holdings of convertible foreign currencies, and reserve position in the International Monetary Fund.

Table IFS-2 brings together statistics on liabilities to foreign official institutions, and selected liabilities to all other foreigners, which are used in the U.S. balance of payments statistics.

Table IFS-3 shows U.S. Treasury nonmarketable bonds and notes issued to official institutions and other residents of foreign countries.

Table IFS-4 presents a measure of the general foreign exchange value of the U.S. dollar.

Apr	76,283	11,060	10,103	46,433	8,687

Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing right (SDR) based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and reserve position in the IMF are also valued on this basis beginning July 1974.

Fund, plus or minus transactions in SDRs.

4 Includes holdings of Treasury and Federal Reserve System; beginning November 1978, these are valued at current market exchange rates or, where appropriate, as such other rates as may be agreed upon by the parties to the transactions.

5 The United States has the right to purchase foreign currencies equivalent to its reserve position in the Fund automatically if needed. Under appropriate conditions the United States could purchase additional amounts related to the U.S. quota,

² Treasury values its gold stock at \$42.2222 per fine troy ounce and pursuant to 31 U.S.C. 5117(b) issues gold certificates to the Federal Reserve at the same rate against all gold held.

³ Includes allocations of SDRs in the Special Drawing Account In the International Monetary

30-year maturity Treasury bond issue to the Government of Mexico. Face value of issue is \$30,220 million.

² Derived by applying reported transactions to benchmark data.

³ Beginning in March 1988, includes current value of zero-coupon, 20-year maturity Treasury bond issue to the Government of Mexico. Beginning March 1990, also includes current value of zero-coupon, 30-year maturity Treasury bond issue to the Government of Mexico. Also see footnote 1, table IFS-3.

⁴ Includes debt securities of U.S. Government corporations, federally sponsored agencies, and private corporations.

⁵ Includes liabilities payable in dollars to foreign banks and liabilities payable in foreign currencies to foreign banks and to "other foreigners."

⁶ Includes marketable U.S. Government bonds and notes held by foreign banks.

⁷ Principally the International Bank for Reconstruction and Development, the Inter-American

⁶ Data on the two lines shown for this date reflect different benchmark bases for foreigners' holdings of selected U.S. long-term securities. Figures on the first line are comparable to those for earlier dates; figures on the second line are based in part on a benchmark survey as of end-year 1984 and are comparable to those shown for following dates.

Beginning March 1988, indicates current value (principal plus accrued interest) of zero-coupon, 20-year maturity Treasury bond issue to the Government of Mexico. Face value of issue is \$2,556 million. Beginning March 1990, includes current value of zero-coupon.

INTERNATIONAL FINANCIAL STATISTICS

These indices are presented to provide measures of the general foreign exchange value of the dollar that are broader than those provided by single exchange rate levels. They do not purport to represent a guide to measuring the impact of exchange rate levels

on U.S. international transactions. The indices are computed as geometric averages of individual currency levels with weights derived from the share of each country's trade with the United States during 1982-83.

Table IFS-4.--Trade-Weighted Index of Foreign Currency Value of the Dollar

¹ Each index covers (a) 22 currencies of countries represented in the Organization for Economic Cooperation and Development (OECD): Australia, Austria, Belgium-Luxembourg, Canada, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, and the

INTRODUCTION

Background

Data relating to capital movements between the United States and foreign countries have been collected in some form since 1935. Reports are filed with district Federal Reserve banks by commercial banks, other depository institutions, bank holding companies, securities brokers and dealers, and nonbanking enterprises in the United States. Statistics on the principal types of data by country or geographical area are then consolidated and are published in the Treasury Bulletin.

The reporting forms and instructions¹ used in the Treasury International Capital (TIC) Reporting System have been revised a number of times to meet changing conditions and to increase the usefulness of the published statistics. The most recent, general revision of the report forms became effective with the banking reports as of April 30, 1978, and with the nonbanking reports as of December 31, 1978. Revised forms and instructions are developed with the cooperation of other Government agencies and the Federal Reserve System and in consultations with representatives of banks, securities firms, and nonbanking enterprises.

Basic Definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including U.S. citizens domiciled abroad, and the foreign branches, subsidiaries, and other affiliates abroad of U.S. banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located. The term "foreigner" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled, as shown on the records of reporting institutions. For a number of reasons, the geographical breakdown of the reported data may not in all cases reflect the ultimate ownership of the assets. Reporting institutions are not expected to go beyond the addresses shown on their records, and so may not be aware of the country of domicile of the ultimate beneficiary. Furthermore, U.S. liabilities arising from deposits of dollars with foreign banks are reported in the Treasury statistics as liabilities to foreign banks, whereas the liability of the loreign bank receiving the deposit may be to foreign official institutions or to residents of another country.

Data pertaining to branches or agencies of foreign official institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the appropriate international or regional classification except for the Bank for International Settlements, which is included in the classification "Other Europe."

Reporting Coverage

Reports are required from banks, other depository institutions, bank holding companies, International Banking Facilities (IBF's), securities brokers and dealers, and nonbanking enterprises in the

¹ Copies of the reporting forms and instructions may be obtained from the Office of Data Management, Office of the Assistant Secretary for International Affairs, Department of the Treasury, Washington, D.C. 20220, or from district Federal Reserve banks.

United States, including the branches, agencies, subsidiaries, and other affiliates in the United States of foreign banking and nonbanking firms. Entities that have reportable liabilities, claims, or securities transactions below specified exemption levels are exempt from reporting.

Banks, other depository institutions, and some brokers and dealers file monthly reports covering their dollar liabilities to, and dollar claims on, foreigners in a number of countries. Twice a year, as of June 30 and December 31, they also report the same liabilities and claims items with respect to foreigners in countries not shown separately on the monthly reports. Quarterly reports are filed with respect to liabilities and claims denominated in foreign currencies vis-a-vis foreigners. Effective January 31, 1984, the specified exemption level applicable to the monthly and quarterly banking reports was raised from \$10 million to \$15 million. There is no separate exemption level for the semiannual reports.

Banks, other depository institutions, securities brokers and dealers, and other enterprises report monthly their transactions in long-term securities with foreigners. The applicable exemption level is \$500,000 with respect to the grand total of purchases and to the grand total of sales during the month covered by the report.

Quarterly reports are filed by exporters, importers, industrial and commercial concerns, financial institutions other than banks, other depository institutions, brokers, and other nonbanking enterprises if their liabilities to, or claims on, unaffiliated foreigners at quarterend exceed specified exemption levels. Effective March 31, 1982, this exemption level was set at \$10 million, up from \$2 million. Nonbanking enterprises also report for each monthend their U.S. dollar-denominated deposit and certificates of deposit claims of \$10 million or more on banks abroad.

Description of Statistics

Section I presents data on liabilities to foreigners reported by banks, other depository institutions, brokers, and dealers in the United States. Beginning April 1978, the following major changes were made in the reporting coverage: Amounts due to banks' own foreign offices are reported separately; a previous distinction between short-term and long-term liabilities was eliminated; a separation was provided of the liabilities of the respondents themselves from their custody liabilities to foreigners; and foreign currency liabilities are only available quarterly. Also, beginning April 1978, the data on liabilities were made more complete by extending to securities brokers and dealers the requirement to report certain of their own liabilities and all of their custody liabilities to foreigners. Effective as of January 31, 1985, savings and loan associations and other thrift institutions began to file the TIC banking forms. Previously they had reported on TIC forms for nonbanking enterprises.

Section II presents the claims on foreigners reported by banks, other depository institutions, and brokers and dealers in the United States. Beginning with data reported as of the end of April 1978, a distinction was made between banks' claims held for their own account and claims held for their domestic customers. The former are available in a monthly series whereas the latter data are collected on a quarterly basis only. Also, the distinction in reporting of long-term and short-term components of banks' claims was discontinued. Maturity data began to be collected quarterly on a time remaining to maturity basis as opposed to the historic original maturity classification. Foreign currency claims are also collected on a quarterly basis only. Beginning March 1981, this claims coverage

was extended to certain items in the hands of brokers and dealers in the United States. See notes to section I above concerning the reporting of thrift institutions.

Another important change in the claims reporting, beginning with new quarterly data as of June 30, 1978, was the adoption of a broadened concept of "foreign public borrower," which replaced the previous category of "foreign official institution" to produce more meaningful information on lending to the public sector of foreign countries. The term "foreign public borrower" encompasses central governments and departments of central governments of foreign countries and of their possessions; foreign central banks, stabilization funds, and exchange authorities; corporations and other agencies of central governments, including development banks, development institutions, and other agencies which are majority-owned by the central government or its departments; State, provincial, and local governments of foreign countries and their departments and agencies; and any international or regional organization or subordinate or affiliated agency thereof, created by treaty or convention between sovereign states.

Section III includes supplementary statistics on U.S. banks' liabilities to, and claims on, foreigners. The supplementary data on banks' loans and credits to nonbank foreigners combine selected information from the TIC reports with data from the monthly Federal Reserve 2502 reports submitted for major foreign branches of U.S. banks. Other supplementary data on U.S. banks' dollar liabilities to, and banks' own dollar claims on, countries not regularly reported separately are available semiannually in the June and December issues of the *Treasury Bulletin*.

Section IV shows the liabilities to, and claims on, unaffiliated foreigners by exporters, importers, industrial and commercial concerns; financial institutions other than banks, other depository institutions, and brokers; and other nonbanking enterprises in the United States. The data exclude the intercompany accounts of nonbanking enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. (Such transactions are reported by business enterprises to the Department of Commerce on its direct investment forms.) The data

also exclude claims held through banks in the United States. Beginning with data reported as of December 31, 1978, financial liabilities and claims of reporting enterprises are distinct from their commercial liabilities and claims; and items are collected on a time remaining to maturity basis instead of the original maturity basis used previously.

Section V contains data on transactions in all types of long-term domestic and foreign securities by foreigners as reported by banks, brokers, and other entities in the United States (except non-marketable U.S. Treasury notes, foreign series; and nonmarketable U.S. Treasury bonds and notes, foreign currency series, which are shown in the "International Financial Statistics" section, table IFS-3). The data cover new issues of securities, transactions in outstanding issues, and redemptions of securities. They include transactions executed in the United States for the account of foreigners, and transactions executed abroad for the account of reporting institutions and their domestic customers. The data include some transactions which are classified as direct investments in the balance of payments accounts.

The geographical breakdown of the data on securities transactions shows the country of domicile of the foreign buyers and sellers of the securities; in the case of outstanding issues, this may differ from the country of the original issuer. The gross figures contain some offsetting transactions between foreigners. The net figures for total transactions represent transactions by foreigners with U.S. residents; but the net figures for transactions of individual countries and areas may include some transactions between foreigners of different countries.

The data published in these sections do not cover all types of reported capital movements between the United States and foreign countries. The principal exclusions are the intercompany capital transactions of nonbanking business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies, and capital transactions of the U.S. Government. Consolidated data on all types of international capital transactions are published by the Department of Commerce in its regular reports on the U.S. balance of payments.

INTRODUCTION

Background

Data have been collected since 1974 on the foreign currency positions of banks and nonbanking firms in the United States, and on those of foreign branches, majority-owned foreign partnerships, and majority-owned foreign subsidiaries of U.S. banks and nonbanking firms. Reports cover five major foreign exchange market currencies and U.S. dollars held abroad. Reporting has been required pursuant to title II of Public Law 93-110, an amendment to the Par Value Modification Act of September 21, 1973, and implementing Treasury regulations. Statistics on the positions have been published since March 1977 beginning with data for December 1975.

The report forms and instructions used in the collection of bank data were revised effective with reports as of March 16, 1983, for the weekly reports. The most recent revision of the nonbank foreign currency forms (see below) became effective as of the last business day of March 1983.

Common Definitions and Concepts

The term "United States" means the States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, Midway Island, the Virgin Islands, and Wake Island. The term "foreign" means locations other than the "United States." The term "worldwide" is used to describe the sum of "United States" and "foreign" data.

Data for the United States include amounts reported by sole proprietorships, partnerships, and corporations in the United States including the U.S. branches and subsidiaries of foreign nonbanking concerns, in the case of "nonbanking firms' positions," and the agencies, branches, and subsidiaries located in the United States of foreign banks and banking institutions, in the case of the weekly "bank positions."

Data for "foreign branches" and "abroad" include amounts reported by the branches, majority-owned partnerships, and majority-owned subsidiaries of U.S. banking and nonbanking concerns. In general, these data do not reflect the positions of foreign parents or foreign parents' subsidiaries located abroad except through intercompany accounts. The data include the foreign subsidiaries of a few foreign-owned U.S.-based corporations.

Assets, liabilities, and foreign exchange contract data are reported on the basis of time remaining to maturity as of the date of the report, regardless of the original maturity of the instrument involved. "Spot" means due for receipt or delivery within 2 business days from the date of the report. "Short-term" means maturing in 1 year or less from the date of the report.

"Majority-owned foreign partnerships" are those organized under the laws of a foreign country in which one or more nonbanking concerns or nonprofit institutions in the United States, directly or indirectly, own more than 50 percent profit interest. "Majority-owned foreign subsidiaries" are foreign corporations in which one or more nonbanking business concerns or nonprofit institutions located in the United States, directly or indirectly, own stock with more than 50 percent of the total combined voting power of all classes of stock entitled to vote, or more than 50 percent of the total value of all classes of stock.

Reporting Threshold

The exemption level applicable to banks and banking institutions was \$10 million equivalent through January 1982, when it was raised to \$100 million. The exemption level applicable to nonbanking business concerns and nonprofit institutions was \$1 million equivalent on all nonbank forms from March 1975 through November 1976. It was raised to \$2 million equivalent on the monthly reports of positions held in the United States from November 1976 through September 1978. The exemption level was raised to \$3 million on foreign subsidiary positions on June 30, 1977, and for positions held in the United States on September 30, 1978. The exemption level for nonbanking firms was raised to \$100 million on positions in the United States in January 1982 and on foreign branch and subsidiaries positions in March 1982.

Firms must report their entire foreign currency position in a specified foreign currency if a specified U.S. dollar equivalent value is reached in any category of assets, liabilities, exchange contracts bought and sold, or the net position in the currency. In general, exemption levels are applied to the entire firm. In reports on their foreign branches, majority-owned foreign partnerships, and majority-owned foreign subsidiaries, U.S. banks and nonbanks are required to report the U.S. dollar-denominated assets, liabilities, exchange contracts bought and sold, and net positions of those branches, partnerships, and subsidiaries with reportable positions in the specified foreign currencies.

Description of Statistics

Data collected on the Treasury foreign currency forms are published in the *Treasury Bulletin* in seven sections. The first section presents a summary of worldwide net positions in all of the currencies reported. Sections II through VI each present data on a specified foreign currency. Section VII presents the U.S. dollar positions of the foreign branches and subsidiaries of U.S. firms which are required to report in one or more of the specified foreign currencies.

Footnotes to Tables FCP-I through FCP-VII

SECTION I

- Worldwide net positions on the last business day of the calendar quarter of nonbanking business concerns in the United States and their foreign branches and majority-owned partnerships and subsidiaries. Excludes receivables and installment paper which have been sold or discounted before maturity, U.S. parent companies' investment in their majority-owned foreign subsidiaries, fixed assets (plant and equipment), and capitalized leases for plant and equipment.
- ² Foreign branches and majority-owned partnerships and subsidiaries only.
- Weekly worldwide net positions of banks and banking institutions in the United States, and their foreign branches and majority-owned foreign subsidiaries. Excludes capital assets and liabilities
- ⁴ Foreign branches and majority-owned subsidiaries only.

SECTIONS II THROUGH VII

Positions of nonbanking business concerns in the United States and their foreign branches and majority-owned partnerships and subsidiaries. In section VII positions of foreign branches and majority-owned partnerships and subsidiaries only.

- ² Excludes receivables and installment paper sold or discounted before maturity, fixed assets (plant and equipment), and parents' investment in majority-owned foreign subsidiaries.
- ³ Capitalized plant and equipment leases are excluded.
- 4 Includes both spot and forward exchange rates.
- ⁵ Columns 1 and 3 less columns 2 and 4.
- ⁶ Representative rates on the report date. Canadian dollar and United Kingdom pound rates are expressed in U.S. dollars per unit of foreign currency, all others in foreign units per U.S. dollar. The source of the automated representative rates changed as of June 30, 1988.
- 7 Banks and banking institutions in the United States and their foreign branches and majority-owned subsidiaries. In section VII, foreign branches and majority-owned subsidiaries only.
- 8 Excludes capital assets.
- 9 Excludes capital liabilities.
- 10 Includes both spot and forward exchange contracts.
- 11 Columns 3 and 9 less columns 6 and 12.
- 12 See footnote 6.

EXCHANGE STABILIZATION FUND

INTRODUCTION

Background

The Exchange Stabilization Fund (ESF) was established under the Gold Reserve Act of January 30, 1934 (31 U.S.C. 822a). This act authorized the establishment in the Department of the Treasury of a stabilization fund to be operated under the exclusive control of the Secretary of the Treasury, with the approval of the President, for the purpose of stabilizing the exchange value of the dollar. Subsequent amendment of the Gold Reserve Act modified the original purpose somewhat to reflect termination of the fixed exchange rate system.

The resources of the fund consist of dollar balances, partly invested in U.S. Government securities, special drawing rights (SDRs), and balances of foreign currencies.

The principal sources of income or losses for the ESF have been profits or losses on holdings of and transactions in SDRs and foreign exchange, and the interest earned on assets.

Definitions

Special drawing rights.—International assets created by the International Monetary Fund (IMF). They serve to increase international liquidity and provide additional international reserves, and may be purchased and sold among eligible holders through the IMF.

SDR allocations.--The counterpart of SDRs issued by the IMF based on members' quota in the IMF. Although shown in ESF state-

ments as liabilities, they must be redeemed by the ESF only in the event of liquidation of, or U.S. withdrawal from, the SDR Department of the IMF or cancellation of SDRs.

SDR certificates.--Issued to the Federal Reserve System against SDRs when SDRs are "monetized" and the proceeds of the monetization are deposited in an ESF account at the Federal Reserve Bank of New York.

Description of Tables

Table ESF-1 presents the assets, liabilities, and capital of the ESF. Data are presented in U.S. dollars or U.S. dollar equivalents based on current exchange rates computed according to the accrual method of accounting. The capital account represents the original capital appropriated to the ESF by Congress of \$2 billion, less a subsequent transfer of \$1.8 billion to pay for the initial U.S. quota subscription to the IMF. Subsequent gains and losses since inception are reflected in the cumulative net income (loss) account.

Table ESF-2 presents the results of operations by quarter. Data are presented in U.S. dollars or U.S. dollar equivalents computed according to the accrual method of accounting. The "Profit (loss) on foreign exchange" includes realized profits (losses) on sales of foreign currencies as well as revaluation gains (losses) on currencies held. "Adjustment for change in valuation of SDR holdings and allocations" reflects the net gain (loss) on revaluation of SDR holdings and allocations for the quarter.

Note,--Annual balance sheets for fiscal years 1934 through 1940 appear in the 1940 Annual Report of the Secretary of the Treasury and those for succeeding years appear in subsequent reports through 1980. Quarterly balance sheets beginning with Dec. 31, 1938, have been published in the *Treasury Bulletin*. Data from inception to Sept. 30, 1978, may be found on the statements published in the January 1979 *Treasury Bulletin*.

Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing rights (SDRs) based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and allocations are valued on this basis beginning July 1974.
 Excludes foreign exchange transactions for future and spot delivery.
 A non-interest-bearing liability to the U.S. Treasury resulting from the transfer to the Exchange Stabilization Fund of foreign currencies drawn from the IMF by the United States.

SPECIAL REPORTS

U.S. CURRENCY AND COIN OUTSTANDING AND IN CIRCULATION

INTRODUCTION

Purpose and Scope

The U.S. Currency and Coin Outstanding and in Circulation Statement is prepared to inform the public of the face value of currency and coin which are used as a medium of exchange and the total thereof, as of the end of a given accounting month.

The statement defines the total amount of currency and coin outstanding and the portion of which is deemed to be in circulation. Although it still includes some old and current rare issues of coin and currency which do not circulate or may do so to a limited extent, Treasury policy is to continue their inclusion in the statement since such issues were originally intended for general circulation. The statement also provides a brief description of the various issues of U.S. paper money and further presents a comparative amount of money circulated in relation to population.

History

Statements of currency and coin outstanding and in circulation have been published by the Department of the Treasury since 1888. These statements were originally prepared monthly by the Division of Loans and Currency, which was then under the Office of the Secretary of the Treasury but later became part of the Public Debt Service (currently known as the Bureau of the Public Debt) in 1929. The statement was published with the title "Circulation Statement of United States Money" from 1923 through December 31, 1965. Concurrently, from December 31, 1919, to September 30, 1951, the Office of the U.S. Treasurer published a statement entitled "Monthly Statement--Paper Currency of Each Denomination Outstanding. Two months after the Office of the U.S. Treasurer assumed publication of the "Circulation Statement of United States Money," a revision was made to the statement to include denomination detail of the currency in circulation. Publication of the "Monthly Statement--Paper Currency of Each Denomination Outstanding" was discontinued, and the revised version which combines information from both statements became known as the United States Currency and Coin Outstanding and in Circulation Statement. The statement in 1983 ceased to be published as a separate, monthly release and instead was incorporated into the quarterly Treasury Bulletin as a special report.

Definition of Terms

The classification "Amounts outstanding and in circulation" includes all issues by the Bureau of the Mint which are purposely intended as a medium of exchange. Therefore, coins sold by the Bureau of the Mint at premium prices are excluded. However, uncirculated coin sets, sold by the Mint at face value plus a handling charge, are included.

The term "Federal Reserve notes" refers to issues by the U.S. Government to the public through the Federal Reserve banks and their member banks. These notes represent U.S. Government obligations. Currently, the item "Federal Reserve notes--amounts outstanding" consists of new series issues. The Federal Reserve note is the only class of currency currently issued.

"U.S. notes" are also known as legal tender notes and were issued in five different issues; namely, (a) First Issue--1862 (\$5 to \$1,000 notes), (b) Second Issue--1862 (\$1 to \$2 notes), (c) Third Issue--1863 (\$5 to \$1,000 notes), (d) Fourth Issue--1863 (\$1 to \$10,000 notes), and (e) Fifth Issue--1901 (\$10 notes).

The column for "Currency no longer issued" consists of gold certificates (old and new series), silver certificates (old and new series), Federal Reserve notes (old and new series), national bank notes (old and new series), and Treasury notes (1890 series).

"Dollar coins" include standard silver coins and nonsilver coins.

"Fractional coins" include subsidiary coins in denominations of 50 cents, 25 cents, and 10 cents and minor coins (5 cents and 1 cent).

Reporting Sources

Data used in the preparation of the U.S. Currency and Coin Outstanding and in Circulation Statement is derived from monthly reports required from Treasury offices, various U.S. Mint offices, the Federal Reserve banks, and the Federal Reserve Board. Such reports convey information about the amount, class, and denomination of new issues of currency and/or coin, of destroyed and replaced currency, and of currency and coins withdrawn from circulation. Estimates of population from the Bureau of the Census are used in the calculation of money circulated per capita.

¹ Issued on and after July 1, 1929. 2 Excludes coin sold to collectors at premium prices. 3 Includes \$481,781,898 in standard silver dollars.

Based on Bureau of the Census estimates of population,
 Represents value of certain partial denominations not presented for redemption.

Information about the Superintendent of Documents Subscription Service

Current Subscribers	
To know when to expect your renewal notice and keep a good this Government Printing Office mails each subscriber only one renewal	notice. You can learn when you will get your renewal
notice by checking the number that follows ISSDUE on the top line of	your label as shown in this example:
	O, a renewal notice
	will be sent.
. TRBU SMITH212J ISSDUE000 R 1	•
. JOHN SMITH	•
. 212 MAIN ST . FORESTVILLE MD 20747	•
. FORESTVILLE MD 20/4/	
When that number reads ISSDUE000, you have received your last issue notice around the same time that you receive the issue with ISSDUE00	
To be sure that your service continues without interruption, please reservice is discontinued, simply send your mailing label from any issue 20402-9372 with the proper remittance, and your service will be reins	e to the Superintendent of Documents, Washington, DC
To change your address please SEND YOUR MAILING LABEL	
Documents, Attn: Chief, Mail List Branch, Mail Stop: SSOM, Washir	ngton, DC 20402-9373.
To inquire about your subscription service please SEND YOUR	MAILING LAREL along with your correspondence to
