TREASURY ISSUES

Moderate Growth Projected for U.S. Economy

Sidney L. Jones

The economic forecast prepared by the Bush administration last January projected a resumption of moderate economic growth by mid-1991. (An updated forecast to be released in mid-July will reflect only slight revision.) Various reports of economic activity indicate that a turnaround has begun as the U.S. economy gradually recovers from its ninth postwar recession. The precise date when the recession ended and growth resumed cannot be determined until more information becomes available, but improving consumption and investment statistics indicate that the original forecast of annual real growth in the 2- to 3-percent zone during the next 6 months is a reasonable estimate. Surprises are possible, of course, and the current recovery may accelerate faster than expected or fail to create sustained growth beyond the initial surge of new activity, but the most likely prospect is a gradual recovery and lower inflation extending into 1992.

Background of the Current Economic Situation

The record peacetime expansion, which lasted from November 1982 through July 1990, was based on a combination of factors: 80 million "baby boomers"--children born between 1946 and 1965--increased the labor force and accelerated the demand for housing and consumer goods and services; increased government spending at all levels and tax policy changes designed to encourage investment and growth provided fiscal stimulus; monetary policies became more accommodative as the double-digit inflation rate of the late-1970s and early-1980s was reduced; and international economic growth created trade and investment opportunities.

By the summer of 1990, after almost 8 years of growth, it was apparent that the U.S. economy had slowed and had become vulnerable to an external shock. The Gulf War and related oil price increases provided the unwanted shock. The subsequent erosion of consumer, business, and government spending caused a moderate decline in the real output of goods and services, the gross national product, during the last 3 months of 1990 and the first 3 months of this year. (See chart 1. Shading indicates recession periods.) Much of that decline was concentrated in consumer spending for durable goods, particularly new automobiles, residential construction, commercial and public construction projects, and in a sharp reduction in business inventories and new orders. Underlying the downturn in economic activity was a major decline in consumer and business confidence.

Current Outlook

The consensus view is that the 1990-91 economic recession in the United States probably ended during the second quarter of 1991. Moderate growth at a 2- to 3-percent annual rate during the last 6 months of this year and at a slightly faster pace in 1992 was projected in the January Government forecast and repeated with minor revisions in July. More recent private forecasts show a com-

The consensus view is that the 1990-91 economic recession in the United States probably ended during the second quarter of 1991.

parable path. Indeed, the Blue Chip consensus forecast of some 50 economists released in early June is little different for 1991 than the administration's January forecast. (See chart 2, which also contains the Congressional Budget Office's January forecast.) This cautious optimism about the near-term outlook is based on several recent developments.

• Consumer spending has begun to improve as employment opportunities increased in May and the moderation of inflation has helped to restore real purchasing power. Purchases of services such as medical care, personal care, transportation, household operations, education, personal business, and recreation have held up well even during the recession. Retail sales of durable and nondurable goods, including new cars, have strengthened following the disappointing results of last winter. Future gains are likely to be relatively modest, however, because of the low personal saving rate, continued consumer reluctance to add more debt, and the sluggish pace of prospective job and income gains.

This article was prepared by the Assistant Secretary of the Treasury for Economic Policy for a special July 4, 1991, edition of The Japan Times.

ECONOMIC POLICY

- New housing starts and permits for future building have improved in recent months although long-term demographic trends will probably prevent any rapid recovery of residential construction back to prerecession levels.
- Businesses plan to increase outlays for plant and equipment for the remainder of this year, according to survey results, following a sharp drop in capital spending in the first quarter.
- Net export gains are the most dynamic part of the U.S. economy as exports have continued to grow while the recent recession reduced imports. Positive income inflows and services surpluses now exceed the narrowing merchandise trade deficit.

The imbalance of inadequate national savings compared with the need for increased investment to improve productivity must be corrected.

- Inventory-to-sales ratios remain relatively low for this stage of the business cycle, suggesting that any recovery of new orders will lead to increased production schedules. Industrial production and new orders for durable goods did improve during April and May.
- Government spending guidelines have apparently constrained new Federal spending, and recent operating deficits in many State and local government budgets have restricted new spending initiatives.
- Inflation pressures have declined since last February as the sharp runup of energy prices has been reversed. The Consumer Price Index has risen at only a 2.7-percent annual rate during 1991, and near-term prospects for the Producer Price Index are encouraging. Total crude materials prices have actually declined in recent months. There has been a leveling off of wage gains during the last year, and some productivity gains should occur as the pace of economic activity improves.
- Monetary officials have acted to cut short-term interest rates and increase the pace of money supply growth.
 Nevertheless, there is considerable concern about the problems of prospective borrowers in obtaining new bank

loans, particularly for construction projects. Government officials have attempted to alleviate "credit crunch" problems by clarifying regulatory guidelines and encouraging lenders to "make good loans to good borrowers." In general, existing Government policies are focused on encouraging economic growth.

Economic Policy Context

Recent economic statistics have signaled the beginning of a moderate cyclical expansion in the United States. However, economic policies also must consider longer term issues. The imbalance of inadequate national savings compared with the need for increased investment to improve productivity must be corrected. The financial system must be upgraded and strengthened to meet the evolving needs of a dynamic economy. Economic planning must emphasize long-term priorities. Structural adjustments are needed throughout the U.S. economy to prepare to compete in the integrated world economy.

U.S. Government policies have responded to these long-term issues by emphasizing actions to stimulate economic growth and reduce inflation.

First, the bipartisan Budget Summit agreement of 1990 establishes goals and firm guidelines to reduce prospective Federal budget deficits. This program has introduced a new discipline in the budgeting process, and the Bush administration is firmly committed to fulfilling the deficit-reduction targets.

Second, monetary officials have controlled the growth of money and credit to prevent a return of the disruptive inflation pressures that occurred during the "stagflation" period of the late-1970s and early-1980s. As the temporary distortions created by the oil price increases last summer have been reversed, various measures of inflation have improved. This has enabled the Federal Reserve System to support the resumption of economic growth by cutting short-term interest rates and increasing the growth rate of monetary aggregates to a level near the middle of their target zones. (See chart 3.)

Third, the U.S. Government is currently developing comprehensive legislation to reform the financial system, while continuing to correct the problems created by the widespread failure of financial institutions.

Future success in achieving these three policy initiatives will contribute to the long-term goals of promoting economic growth and avoiding the return of destructive inflation in the world's largest economy, thereby contributing to growth and prosperity in other nations as international trade and investment increase.

Abstracts of Recent Taxation Studies

Property and Casualty Insurance Company Taxation

Treasury's "Report to the Congress on Property and Casualty Insurance Company Taxation" was released on April 30, 1991. The report studies the current tax treatment of policyholder dividends paid by mutual property and casualty insurance companies in order to determine the appropriateness of limiting the deductibility of such dividends and similar distributions. The report concludes that such

dividends should be fully deductible in order to provide equal corporate-level tax treatment of equitylike returns to mutual and stock company investors. The report further concludes that the imposition of a corporate-level proxy tax to offset the disparity in treatment of policyholders and shareholders at the individual level would impose a significant compliance burden but not yield significant revenues.

Depreciation of Business-Use Passenger Cars

On April 30, 1991, Treasury released its "Report to Congress on the Depreciation of Business-Use Passenger Cars." The report responds to a congressional mandate in the Omnibus Budget Reconciliation Act of 1989 (Public Law 101-239). The report recommends that the class life for such cars under the modified accelerated cost recovery system (MACRS) be changed from 3 years to 3.5 years. While the study found significant differences in the economic lives of

fleet passenger cars and nonfleet passenger cars, Treasury does not recommend establishing separate MACRS asset classes for business passenger cars based on their ownership or use. Treasury further makes no recommendations concerning current law provisions that limit the allowable depreciation deductions for business passenger cars.

Effect of the Full Funding Limit on Pension Benefit Security

In response to section 9301 of the Omnibus Budget Reconciliation Act of 1987, Treasury released its "Report to Congress on the Effect of the Full Funding Limit on Pension Benefit Security" on May 31, 1991. The report studies the effects of the new full funding limit imposed by the section 9301 amendments on benefit security under qualified defined benefit pension plans. The report concludes that the effects are likely to be small, but may have an uneven impact

among employers. The report includes three options for further consideration and analysis: maintain current law; allow election of projected liability limit and reduce the current liability limit to achieve revenue neutrality; and allow election of projected liability limit with no reduction in the current liability limit. The third option would require an appropriate revenue offset.

Previous articles appearing in the "Treasury Issues" section of the *Treasury Bulletin* are listed below by title, issue, and page number.

DOMESTIC FINANCE

"Issues in the Securities and Futures Markets." Glauber, Robert R. June 1990, pp. 3-6.

A discussion on regulatory fragmentation and related issues in the securities and futures markets, stressing the importance of integrating the U.S. fragmented system so as to gain significant benefits in innovation, enforcement, coordinated market mechanisms, and globalization.

ECONOMIC POLICY

"Direct Revenue Effects of Capital Gains Taxation: A Reconsideration of the Time-Series Evidence, The." Darby, Michael R., Robert Gillingham, and John S. Greenlees. June 1988, pp. 2-2.8.

A report presenting results that indicate the time-series data, like the cross-section data, provide considerable evidence supporting the likelihood of direct revenue gains from reductions in capital gains tax rates.

"Fiscal 1991 Budget, The." Brady, Nicholas F. March 1990, page 3.

A statement by the Secretary of the Treasury on the elements of the family savings account, the capital gains tax reduction, and the home ownership initiative contained in the administration-proposed Savings and Economic Growth Act.

"Need for Reform in the Financial Markets, The." Brady, Nicholas F. March 1991, pp. 3-6.

Remarks by the Secretary of the Treasury on the administration's plan for establishing strong financial services and markets in a changeable technological environment through legislation, fundamental reforms, and modernization.

"Outlook for the Savings and Loan Industry after the Financial Institutions Reform, Recovery, and Enforcement Act of 1989." Glauber, Robert R. December 1989, pp. 4-6.

A discussion of the savings and loan industry's future as it relates to provisions in the Financial Institutions Reform, Recovery, and Enforcement Act of 1989.

"Role of Saving in a Dynamic U.S. Economy, The." September 1990, pp. 3-6.

A report on the declining U.S. savings rate and its negative impact on investment and productivity growth in the United States.

"Solution to the Savings and Loan Problem, The." Excerpted. Brady, Nicholas F. September 1989, page 3.

Remarks by the Secretary of the Treasury on the administration's comprehensive reform plan proposed for the overhaul of the savings and loan industry.

"Some Economic Aspects of the U.S. Health Care System." Summary. Duggan, James E. December 1990, pp. 3-5.

A report on evolving characteristics of health care and their implications for public sector finance and government regulation.

FISCAL SERVICE

"Status Report on the Fiscal Operations of the Government, A." Murphy, Gerald. December 1988, pp. 3-7.

A sweeping look by the Fiscal Assistant Secretary of the Treasury at each of nine major responsibilities making up the Fiscal Service's financial leadership role in Government.

INTERNATIONAL AFFAIRS

"International Debt Strategy, The." Brady, Nicholas F. June 1989, pp. 3-4.

Remarks by the Secretary of the Treasury on the debt problem and the direction needed to be provided to international efforts to strengthen the debt strategy.

"Strengthened Debt Strategy, The." Brady, Nicholas F. December 1989, page 3.

An update from the Secretary of the Treasury on the international debt strategy to improve the quality of creditors' assets and creditworthiness in debtor countries.

"U.S. Policy Toward Direct Foreign Investment." Robson, John E. March 1990, pp. 4-7.

An exploration into the position that the United States is taking on foreign trade and investment policy matters.

TAX POLICY

Congressional Reports and Staff Working Papers by the Office of Tax Policy. March 1988, pp. 3-4.

A listing of research studies pertaining to important contemporary and anticipated tax policy issues, particularly related to the 1986-7 tax reform effort.

"Effect of the Tax Reform Act of 1986 on Commercial Banks, The." Excerpted. Neubig, Thomas S., and Martin A. Sullivan. June 1988, pp. 3-7.

An analysis of the overall effect of tax reform on the banking industry, which, the study concludes, benefits from tax reform.

"Impact of the Tax Reform Act of 1986 on Trade and Capital Flows, The." Excerpted. Grubert, Harry, and John Mutti. March 1988, pp. 5-8.

An analysis of the international implications of tax reform, based on a general equilibrium model of the United States and the rest of the world.

"New Estimates of Capital Gains Realization Behavior: Evidence from Pooled Cross-Section Data." Summary. Gillingham, Robert, John S. Greenlees, and Kimberly D. Zieschang. September 1989, pp. 4-5.

A paper developing and estimating a behavioral model of taxpayer response to capital gains taxation. Using the econometric approach, the pooled cross-section data represents a set of independent observations from a taxpayer sampling extending over the period 1977-85.

"Noncorporate Business Taxation: Before and After the Tax Reform Act of 1986." Excerpted. Nelson, Susan C. December 1988, pp. 8-12.

An analysis of the effects that the Tax Reform Act of 1986 might have on noncorporate business in terms of tax revenue, incentives for noncorporate versus corporate investment, and individual marginal tax rates on different types of income from noncorporate business.

Operation and Effect of the Domestic International Sales Corporation Legislation: July 1, 1981, to June 30, 1983. June 1988, page 8.

An announcement of the Department of the Treasury's release of the 11th report in a series on domestic international sales corporations, special corporations eligible for deferral of Federal income tax on part of their export profits.

Report on Tax Issues Relating to the 1988/89 Federal Savings and Loan Insurance Corporation Assisted Transactions, June 1991, pp. 3-10.

An analysis of tax issues posed by the financial assistance agreements of 1988/89 between the Federal Government and 91 surviving thrift institutions.

"Tax Expenditure Budget Before and After the Tax Reform Act of 1986, The." Excerpted. Neubig, Thomas S., and David Joulfaian. March 1989, pp. 3-10.

Findings from a recent study showing changes made by the Tax Reform Act of 1986 led to significant reductions in Government subsidies provided through tax expenditures.

Taxation Studies, Abstracts of Recent. September 1988, page 3.

Summaries of four major papers and reports, ranging from an examination of trends in noncorporate business taxation to a study of certain employee benefits not subject to Federal income tax.

Taxation Studies, Abstracts of Recent. June 1989, page 5.

A brief look at four reports covering the taxation of insurance syndicate income, Social Security benefits, and Americans working overseas; and the possessions corporation system of taxation.

Taxation Studies, Abstracts of Recent. September 1989, pp. 6-8.

A summation of the reports to Congress on life insurance taxation and the depreciation of clothing held for rental, and various OTA papers on issues running from transfer pricing to capital gains realization behavior.

Taxation Studies, Abstracts of Recent. June 1990, pp. 9-10.

A summation of reports on tax studies on financing health and long-term care, widely held partnerships, life insurance company products, and reinsurance excise tax and the depreciation of horses, scientific instruments, and fruit and nut trees.

Taxation Studies, Abstracts of Recent. June 1991, pp. 11-12.

Summaries of reports on tax benefits to persons associated with an international boycott, financial assistance agreements of the Federal Government and surviving thrifts, transfers of income tax liabilities to Social Security and retirement trust funds, minimum participation requirements on Government contractors, and classification of workers in technical fields for Federal tax purposes.

"Trends in Corporate Tax Receipts." Rosen, Harvey S. June 1990, pp. 7-8.

A discussion of recent trends in corporate tax receipts, the importance of the corporate tax in foreign countries, and the effect of the Tax Reform Act of 1986 on corporate tax receipts.

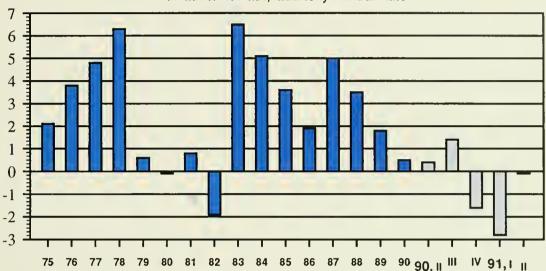

FINANCIAL OPERATIONS

Profile of the Economy

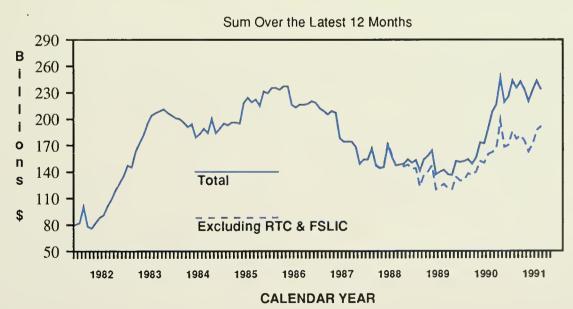

GROWTH OF REAL GROSS NATIONAL PRODUCT

Real GNP was virtually flat in the second quarter, edging down by a narrow 0.1-percent annual rate, after a 2.2-percent rate of decline during the preceding two quarters. Consumer spending and residential investment both rose, suggesting the economy was beginning to recover from the 1990-91 recession. The positive picture was offset by a weakening of the net export balance that reflected a jump in oil and other imports and a weaker balance on investment income.

FEDERAL DEFICIT

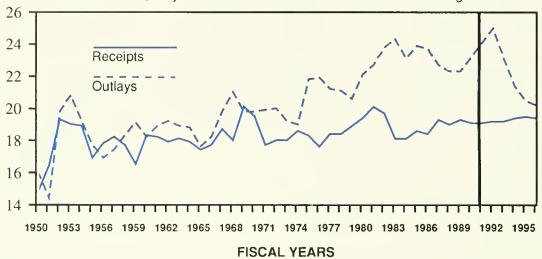

The Federal budget deficit in June 1991 was \$2.5 billion, compared with \$11.1 billion a year earlier and a record deficit of \$53.3 billion in May. Much of the year-to-year decline reflected lighter spending by the Resolution Trust Corporation. Over the 12 months through

Profile of the Economy

June, the deficit totaled \$235 billion, or \$192 billion excluding outlays as part of the savings and loan situation. For the first 9 months of fiscal 1991, the deficit was \$177 billion, compared with about \$163 billion a year earlier.

FEDERAL OUTLAYS AND RECEIPTS AS A SHARE OF GROSS NATIONAL PRODUCT

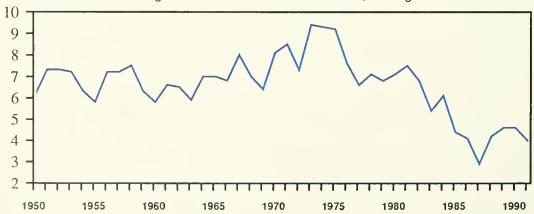

Percent of GNP; Projections 1991-96 from FY 1992 Midsession Budget Review

The Federal budget outlay share of GNP averaged approximately 19 percent during the earlier postwar years, then rose to 23 percent in the 1980s. It is projected to reach a postwar high of 25 percent in fiscal 1992, including spending to deal with the savings and loan situation. The share declines to 20.2 percent by 1996, based on budget projections. Receipts were equal to 19.1 percent of GNP in fiscal 1990, and are projected to stay at 19.1 percent in the current fiscal year and to rise to 19.4 percent by 1996.

PERSONAL SAVING

Household Saving as a Percent of After-Tax Income, Through First Half 1991

The personal saving rate rose from a post-Depression low of 2.9 percent in 1987 to 4.6 percent in both 1989 and 1990, but remained well below the 6.7-percent long-term average. Saving appeared to be rising in early 1990, averaging 4.9 percent in the first half of the year. However, in the second half it dropped to only 4.2 percent as the slowing economy and increasing inflation reduced real incomes. The rate dipped to 3.7 percent in the second quarter of 1991, allowing only a 4-percent average for the first half of the year.

INTRODUCTION

Background

Section 114 of the Budget and Accounting Procedures Act of 1950 (31 U.S.C. 3513a) requires the Secretary of the Treasury to prepare reports on the financial operations of the U.S. Government.

The first three Federal fiscal operations (FFO) tables are published quarterly and cover 5 years of data, estimates for 2 years, detail for 13 months, and fiscal year-to-date data. The tables are designed to provide a summary of data relating to Federal fiscal operations reported by Federal entities and disbursing officers, and daily reports from the Federal Reserve banks. These reports detail accounting transactions affecting receipts and outlays of the Federal Government and off-budget Federal entities, and their related effect on the assets and liabilities of the U.S. Government. Data used in the preparation of tables FFO-1, FFO-2, and FFO-3 is derived from the Monthly Treasury Statement of Receipts and Outlays of the United States Government.

Budget authority usually takes the form of "appropriations" which permit obligations to be incurred and payments to be made. Most appropriations for current operations are made available for obligation only during a specified fiscal year (annual appropriations). Some are for a specified longer period (multiple-year appropriations). Others, including most of those for construction, some for research, and many for trust funds, are made available for obligation until the amount appropriated has been expended or until the objectives have been attained (no-year appropriations).

Budget authority can be made available by Congress for obligations and disbursement during a fiscal year from a succeeding year's appropriations (advance funding). For many education programs, Congress provides forward funding--budget authority made available for obligation in one fiscal year for the financing of ongoing grant programs during the succeeding fiscal year. When advantageous to the Federal Government, an appropriation is provided by Congress that will become available 1 year or more beyond the fiscal year for which the appropriation act is passed (advance appropriations). Included as advance appropriations related to multiyear budget requests.

When budget authority is made available by Congress for a specific period of time, any part not obligated during that period expires and cannot be used later. Congressional actions that extend the availability of unobligated amounts that have expired or would otherwise expire are known as reappropriations. The amounts involved are counted as new budget authority in the fiscal year of the legislation in which the reappropriation action is included, regardless of when the amounts were originally appropriated or when they would otherwise lapse.

Outlays .-- Obligations generally are liquidated by the issuance of checks or the disbursement of cash; such payments are called outlays. In lieu of issuing checks, obligations also may be liquidated (and outlays recorded) by the accrual of interest on public issues of Treasury debt securities (including an increase in the redemption value of bonds outstanding); or by the issuance of bonds, debentures, notes, monetary credits, or electronic payments. Refunds of collections generally are treated as reductions of collections, rather than as outlays. However, payments for earned-income tax credits in excess of tax liabilities are treated as outlays rather than as a reduction in receipts. Outlays during a fiscal year may be for payment of obligations incurred in prior years or in the same year. Outlays, therefore, flow in part from unexpended balances of prior year budget authority and in part from budget authority provided for the year in which the money is spent. Total outlays include both budget and off-budget outlays and are stated net of offsetting collections.

Receipts.—Receipts reported in the tables are classified into the following major categories: (1) budget receipts and (2) offsetting collections. Budget receipts are collections from the public that result from the exercise of the Government's sovereign or governmental powers, excluding receipts offset against outlays. These collections, also called governmental receipts, consist mainly of tax receipts (including social insurance taxes), receipts from court fines, certain licenses, and deposits of earnings by the Federal Reserve System. Refunds of receipts are treated as deductions from gross receipts.

Offsetting collections are from other Government accounts or the public that are of a business-type or market-oriented nature. They are classified into two major categories: (1) collections credited to appropriations or fund accounts, and (2) offsetting receipts (i.e., amounts deposited in receipt accounts). Collections credited to appropriation or fund accounts normally can be used without appropriation action by Congress. These occur in two instances: (1) when authorized by law, amounts collected for materials or services are treated as reimbursements to appropriations and (2) in the three types of revolving funds (public enterprise, intragovernmental, and trust); collections are netted against spending, and outlays are reported as the net amount.

Offsetting receipts in receipt accounts cannot be used without being appropriated. They are subdivided into two categories: (1) proprietary receipts—these collections are from the public and they are offset against outlays by agency and by function, and (2) intragovernmental funds—these are payments into receipt accounts from governmental appropriation or fund accounts. They finance operations within and between Government agencies and are credited with collections from other Government accounts. The transactions may be intrabudgetary when the payment and receipt both occur within the budget or from receipts from off-budget Federal entities in those cases where payment is made by a Federal entity whose budget authority and outlays are excluded from the budget totals.

Intrabudgetary transactions are subdivided into three categories: (1) interfund transactions, where the payments are from one fund group (either Federal funds or trust funds) to a receipt account in the other fund group; (2) Federal intrafund transactions, where the payments and receipts both occur within the Federal fund group; and (3) trust intrafund transactions, where the payments and receipts both occur within the trust fund group.

Offsetting receipts are generally deducted from budget authority and outlays by function, by subfunction, or by agency. There are four types of receipts, however, that are deducted from budget totals as undistributed offsetting receipts. They are: (1) agencies' payments (including payments by off-budget Federal entities) as employers into employees retirement funds, (2) interest received by trust funds, (3) rents and royalties on the Outer Continental Shelf lands, and (4) other interest (i.e., interest collected on Outer Continental Shelf money in deposit funds when such money is transferred into the budget).

Off-budget Federal entities.—The Federal Government has used the unified budget concept as the foundation for its budgetary analysis and presentation since 1969. This concept calls for the budget to include all of the Government's fiscal transactions with the public. Starting in 1971, however, various laws have been enacted under which several Federal entities have been removed from the budget or created outside the budget. Other laws have moved certain off-budget Federal entities onto the budget. Under current law, the off-budget Federal entities consist of the two Social

Security trust funds, Federal old-age and survivors insurance and Federal disability insurance.

The off-budget Federal entities are federally owned and controlled, but their transactions are excluded from the budget totals under provisions of law. When an entity is off-budget, its receipts, outlays, and surplus or deficit are not included in budget receipts, budget outlays, or the budget deficit; its budget authority is not included in the totals of budget authority for the budget; and its receipts, outlays, and surplus or deficit ordinarily are not subject to the targets set by the congressional budget resolution.

Nevertheless, the Balanced Budget and Emergency Deficit Control Act of 1985 (commonly known as the Gramm-Rudman-Hollings Act) included the off-budget surplus or deficit in calculating the deficit targets under that act and in calculating the excess deficit for purposes of that act. Partly because of this reason, attention has focused on the total receipts, outlays, and deficit of the Federal Government instead of the on-budget amounts alone.

Table FFO-1.--Summary of Fiscal Operations

This table summarizes the amount of total receipts, total outlays, total surplus or deficit, transactions in Federal securities and monetary assets, and transactions and balances in Treasury operating cash.

Table FFO-2.--On-budget and Off-budget Receipts by Source

Budget receipts are taxes and other collections from the public that result from the exercise of the Government's sovereign or governmental powers. The amounts in this table represent income taxes, social insurance taxes, net contributions for other insurance and retirement, excise taxes, estate and gift taxes, customs duties,

and net miscellaneous receipts by source.

Table FFO-3.--On-budget and Off-budget Outlays by Agency

Congress [usually] provides budget authority which is [generally] in the form of appropriations, then Federal agencies obligate the Government funds to make outlays. The amounts in this table represent a breakdown of on-budget and off-budget outlays by agency.

Table FFO-4.--Summary of Internat Revenue Collections by States and Other Areas

This annual table provides data on internal revenue collections classified by States and other areas and by type of tax. The amounts reported are for collections made in a fiscal year beginning in October and ending the following September.

Fiscal year collections span several tax liability years because they consist of prepayments (e.g., estimated tax payments and taxes withheld by employers for individual income and Social Security taxes), of payments made with tax returns, and of subsequent payments made after tax returns are due or are filed (e.g., payments with delinquent returns or on delinquent accounts).

It is also important to note that these data do not necessarily reflect the Federal tax burden of individual States. The amounts are reported based on the primary filing address furnished by each taxpayer or reporting entity. For multistate corporations, this address may reflect only the State where such a corporation reported its taxes from a principal office rather than other States where income was earned or where individual income and Social Security taxes were withheld. In addition, an individual may reside in one State and work in another State.

Budget Results for the Third Quarter, Fiscal 1991

Summary

The Federal budget was in deficit by \$25.7 billion in the third quarter of fiscal 1991, compared with a deficit of \$11.8 billion in the corresponding quarter a year earlier. This widening of the deficit came despite nearly \$12 billion in cash contributions to the Defense Cooperation Account (designed to compensate for U.S. outlays incurred during the effort in the Middle East this past winter) and also despite a \$14 billion reduction in deposit insurance outlays. The latter was due entirely to reduced spending by the Resolution Trust Corporation.

For the first three quarters of the current fiscal year, the deficit totaled \$177.5 billion, compared with \$162.6 billion a year earlier. Deposit insurance outlays were down from a year earlier by \$11 billion, and contributions to the Middle-East effort of \$38.9 billion were only partly offset during the period by higher defense spending associated with the effort. A significant portion of cash outlays resulting from the Desert Storm operation will occur during coming fiscal years when materials and supplies expended during that effort are replaced. For the entire fiscal year, the deficit is now projected at \$282.2 billion, according to the midsession review of the budget, released in mid-July. A major portion of the expected increase from the \$177.5 billion so far in the year is predicated on sharply stepped-up outlays for deposit insurance.

Receipts in the third fiscal quarter fell by 3.8 percent from the corresponding quarter a year earlier. This primarily reflected a drop in individual tax payments, net of refunds, around the April 15 deadline as well as a drop in both individual and corporate quarterly income tax payments for June. Deposits of Federal Reserve bank earnings also fell, reflecting the impact of exchange rate movements on the value of their asset holdings. Withheld income and employment taxes rose by only a narrow 1.7 percent from a

year earlier in response to the impact of the soft economy on wage and salary income. For the first three quarters of the fiscal year, receipts increased by 1.6 percent from a year earlier and were projected in the midsession review to rise by 3.6 percent for the entire fiscal year.

Outlays rose by only 0.6 percent in the third fiscal quarter from a year earlier. Major factors holding down the increase were a decline in deposit insurance outlays and the inflow of funds to the Defense Cooperation Account (treated as negative defense outlays in budget accounting). Excluding deposit insurance and the Defense Cooperation Account, outlays were up by 9.2 percent from the third fiscal quarter of 1990

Large increases were recorded for income support areas--spending for the health function (including Medicaid) jumped 23.4, Medicare payments rose 9.9 percent, and income security payments (including unemployment insurance, family support payments, food stamps, etc.) increased 14.7 percent. Such increases can be attributed to a combination of the lingering effects of the recession and a trend toward increased reliance on "safety net" programs--a trend that predates the recession. Agricultural support payments rose by 25.7 percent in the quarter from a year earlier, defense outlays exclusive of the Defense Cooperation Account were up by 5.3 percent, while net interest payments increased by 7.4 percent.

During the first 9 months of the fiscal year, total outlays rose by 2.9 percent (8.6 percent excluding deposit insurance and the Defense Cooperation Account). In the midsession budget review, the rise in outlays for the entire fiscal year was projected at 7.9 percent (10.2 percent excluding deposit insurance and the Defense Cooperation Account).

Second-Quarter Receipts

The following capsule analysis of budget receipts, by source, for the second quarter of fiscal 1991 supplements fiscal data earlier reported in the spring issue of the *Treasury Bulletin*. At the time of that issue's release, not enough data was available to analyze adequately collections for the quarter.

Individual income taxes.--Individual income tax receipts were \$90.1 billion for the second quarter of fiscal 1991. This represented a decrease of \$7.5 billion from the comparable quarter for fiscal 1990. Withheld receipts were down \$5.7 billion for this period. Nonwithheld receipts decreased \$0.9 billion from the comparable quarter of fiscal 1990, while refunds increased by \$0.8 billion.

Corporate income taxes.--Net corporate receipts for the second quarter of fiscal 1991 totaled \$19.1 billion. This was \$2.1 billion higher than the second quarter of fiscal 1990. The \$2.1 billion was comprised of \$1.5 billion more in estimated and final payments and \$0.6 billion less in refunds paid to corporations.

Employment taxes and contributions.--Employment taxes and contribution receipts for the January-March 1991 quarter were \$98.7 billion, an increase of \$8.1 billion over the comparable prior year quarter. Receipts to the old-age and survivors insurance, the disability insurance, and the hospital insurance trust funds increased by \$5.8 billion, \$0.6 billion, and \$1.7 billion, respectively. Of the total increase from the prior year, \$6.2 billion was due to differences in accounting adjustments for previous years, and \$1.9 billion reflected the estimated difference in liability for the January-March quarter.

Unemployment insurance.--Unemployment insurance receipts for the January-March 1991 quarter were \$2.7 billion. This represented a decline of \$0.5 billion from the comparable prior year period.

Contributions for other insurance and retirement.--Contributions for other retirement were \$1.1 billion for the second quarter of fiscal 1991. This represented

no change from the second quarter of fiscal 1990. Contributions are expected to remain flat over the next few years as the number of employees covered by the Federal employees' retirement system grows slowly relative to those covered under the civil service retirement system.

Excise taxes.--Excise tax receipts for the January-March 1991 quarter were \$9.7 billion, compared with \$7.7 billion for the comparable quarter of fiscal 1990. The increase of \$2 billion over the prior year level resulted from the combination of a significant (24.6 percent) increase in gross receipts and a slight decline in refunds. The increase in gross receipts primarily reflected increased excise tax rates and broadened excise tax bases enacted as part of the Omnibus Budget Reconciliation Act of 1990.

Estate and gift taxes.--Estate and gift tax receipts were \$2.5 billion in the January-March quarter of fiscal 1991. This represented a decline of \$0.1 billion over the previous quarter and an increase of \$0.3 billion over the same quarter in the previous year.

Customs dutles.--Customs receipts were \$3.8 billion for the second quarter of fiscal 1991. This was a slight decrease from the comparable prior year period due to a decrease in imports.

Miscellaneous receipts.--Miscellaneous receipts for the second quarter of fiscal 1991 decreased by \$0.7 billion from the comparable prior year period to \$5.4 billion. Deposits of Federal Reserve earnings decreased by \$0.8 billion, while other miscellaneous receipts increased slightly. ◊

TAXES AND OTHER RECEIPTS

FEDERAL OBLIGATIONS

"Obligations" are the basis on which the use of funds is controlled in the Federal Government. They are recorded at the point at which the Government makes a firm commitment to acquire goods or services and are the first of the four key events--order, delivery, payment, and consumption--which characterize the acquisition and use of resources. In general, they consist of orders placed, contracts awarded, services received, and similar transactions requiring the disbursement of money.

The obligational stage of Government transactions is a strategic point in gauging the impact of the Government's operations on the national economy, since it frequently represents for business firms the Government commitment which stimulates business investment, including inventory purchases and employment of labor. Disbursements may not occur for months after the Government places its

order, but the order itself usually causes immediate pressure on the private economy.

Obligations are classified according to a uniform set of categories based upon the nature of the transaction without regard to its ultimate purpose. All payments for salaries and wages, for example, are reported as personnel compensation, whether the personal services are used in current operations or in the construction of capital items.

Federal agencies often do business with one another; in doing so, the "buying" agency records obligations, and the "performing" agency records reimbursements. In table FO-1, obligations incurred within the Government are distinguished from those incurred outside the Government. Table FO-2 shows only those incurred outside.

Table FO-1.--Gross Obligations Incurred Within and Outside the Federal Government by Object Class, as of Mar. 31, 1991

		oort on Obligations, from agencies]

ACCOUNT OF THE U.S. TREASURY

SOURCE AND AVAILABILITY OF THE BALANCE IN THE ACCOUNT OF THE U.S. TREASURY

The operating cash of the Treasury is maintained in Treasury's accounts with the Federal Reserve banks and branches and in tax and loan accounts. Major information sources include the Daily Balance Wire received from the Federal Reserve banks and branches, and electronic transfers through the Letter of Credit Payment, Fedline Payment, and Fedwire Deposit Systems. As the balances in the accounts at the Federal Reserve banks become depleted, they are restored by calling in (withdrawing) funds from thousands of financial institutions throughout the country authorized to maintain tax and loan accounts.

Under authority of Public Law 95-147, the Treasury implemented a program on Nov. 2, 1978, to invest a portion of its operating cash in obligations of depositaries maintaining tax and loan accounts. Under the Treasury tax and loan investment program, depositary financial institutions select the manner in which they will participate in the program. Depositaries that wish to retain funds deposited in their tax and loan accounts in interest-bearing obligations participate under the Note Option; depositaries that wish to remit the funds to the Treasury's account at Federal Reserve banks participate under the Remittance Option.

Deposits to tax and loan accounts occur in the normal course of

business under a uniform procedure applicable to all financial institutions whereby customers of financial institutions deposit with them tax payments and funds for the purchase of Government securities. In most cases the transaction involves merely the transfer of funds from a customer's account to the tax and loan account in the same linancial institution. On occasion, to the extent authorized by the Treasury, financial institutions are permitted to deposit in these accounts proceeds from subscriptions to public debt securities entered for their own account as well as for the accounts of their customers. Also, Treasury can direct the Federal Reserve banks to invest excess funds in these accounts directly from its account at the Federal Reserve banks.

The tax and loan system permits the Treasury to collect funds through financial institutions and to leave the funds in Note Option depositaries and in the financial communities in which they arise until such time as the Treasury needs the funds for its operations. In this way the Treasury is able to neutralize the effect of its fluctuating operations on Note Option linancial institution reserves and the economy.

Represents checks paid, wire transfer payments, drawdowns on letters of credit, redemptions of securifies other than Government account series, and investment (transfer) of excess funds out of this account to the tax and loan note accounts.
Special depositaries are permitted to make payment in the form of a deposit credit for the

³ Special depositaries are permitted to make payment In the form of a deposit credit for the purchase price of U.S. Government securities purchased by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues. Effective Oct. 1, 1989, public debt securities, including U.S. savings bonds, will no longer be settled through the tax and loan note accounts.

Includes U.S. savings bonds, savings notes, retirement plan and tax and loss bonds. U.S. savings notes first offered for sale as of May 1, 1967, and were discontinued after June 30, 1970. Retirement plan bonds first offered for sale as of Jan. 1,1963; tax and loss bonds first issued in March 1968.

⁵ Taxes eligible for credit consist of those deposited by taxpayers in the tax and loan depositaries, as follows: Withheld income taxes beginning March 1948; taxes on employees and employees under the Federal Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; a number of excise taxes beginning July 1952; estimated corporation income taxes beginning April 1967; all corporation income taxes due on or after Mar. 15, 1968; FUTA taxes beginning April 1970, and Individual estimated income taxes beginning October 1988.

TREASURY FINANCING OPERATIONS, APRIL-JUNE 1991

APRIL

Auction of 7-Year Notes

On April 3 the Treasury announced that it would auction \$8,500 million of 7-year notes to refund \$5,162 million of notes maturing April 15, 1991, and to raise about \$3,350 million of new cash. The notes offered were Treasury notes of Series F-1998, dated April 15, 1991, due April 15, 1998, with interest payable on October 15 and April 15 until maturity. An interest rate of 7-7/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received prior to 12 noon EDST for noncompetitive tenders and prior to 1 p.m. EDST for competitive tenders on April 10, 1991, and totaled \$17,230 million, of which \$8,534 million was accepted at yields ranging from 7.92 percent, price 99.762, up to 7.94 percent, price 99.656. Tenders at the high yield were allotted 96 percent. Noncompetitive tenders were accepted in full at the average yield, 7.93 percent, price 99.709. These totaled \$291 million. Competitive tenders accepted from private investors totaled \$8,243 million.

In addition to the \$8,534 million of tenders accepted in the auction process, \$25 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$216 million was accepted from Federal Reserve banks for their own account.

Auction of 2-Year and 5-Year Notes

On April 17 the Treasury announced that it would auction \$12,000 million of 2-year notes of Series Z-1993 and \$9,000 million of 5-year notes of Series N-1996 to refund \$10,573 million of securities maturing April 30, 1991, and to raise about \$10,425 million of new cash.

The notes of Series Z-1993 were dated April 30, 1991, due April 30, 1993, with interest payable on October 31 and April 30 until maturity. An interest rate of 7 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received prior to 12 noon EDST for noncompetitive tenders and prior to 1 p.m. EDST for competitive tenders on April 24, and totaled \$44,117 million, of which \$12,006 million was accepted at yields ranging from 6.99 percent, price 100.018, up to 7.00 percent, price 100.000. Tenders at the high yield were allotted 96 percent. Noncompetitive tenders were accepted in full at the average yield, 7.00 percent, price 100.000. These totaled \$1,317 million. Competitive tenders accepted from private investors totaled \$10,689 million.

In addition to the \$12,006 million of tenders accepted in the auction process, \$928 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$577 million was accepted from Federal Reserve banks for their own account.

The notes of Series N-1996 were dated April 30, 1991, due April 30, 1996, with interest payable on October 31 and April 30 until maturity. An interest rate of 7-5/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received prior to 12 noon EDST for noncompetitive tenders and prior to 1 p.m. EDST for competitive tenders on April 25, and totaled \$32,496 million, of which \$9,057 million was accepted at yields ranging from 7.69 percent, price 99.734, up to 7.70 percent, price 99.694. Tenders at the high yield were allotted 84 percent. Noncompetitive tenders were accepted in full at the average yield, 7.70 percent, price 99.694. These totaled \$550 million. Competitive tenders accepted from private investors totaled \$8,507 million.

In addition to the \$9,057 million of tenders accepted in the auction process, \$215 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$200 million was accepted from Federal Reserve banks for their own account.

52-Week Bills

On March 28 tenders were invited for approximately \$10,750 million of 364-day Treasury bills to be dated April 11, 1991, and to mature April 9, 1992. The issue was to refund \$9,807 million of maturing 52-week bills and to raise about \$950 million of new cash. Tenders were opened on April 4. They totaled \$32,679 million, of which \$10,811 million was accepted, including \$887 million of noncompetitive tenders from the public and \$3,010 million of the bills issued to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. An additional \$185 million was issued to Federal Reserve banks as agents for foreign and international monetary authorities for new cash. The average bank discount rate was 5.88 percent.

MAY

May Quarterly Financing

On May 1 the Treasury announced that it would auction \$13,500 million of 3-year notes of Series S-1994, \$11,750 million of 10-year notes of Series B-2001, and \$11,750 million of 30-year bonds of May 2021 to refund \$18,976 million of Treasury securities maturing May 15 and to raise about \$18,025 million of new cash.

The notes of Series S-1994 were dated May 15, 1991, due May 15, 1994, with interest payable on November 15 and May 15 until maturity. An interest rate of 7 percent was set after the determination as to which tenders were accepted on a yield auction basis.

TREASURY FINANCING OPERATIONS, APRIL-JUNE 1991

Tenders for the notes were received prior to 12 noon EDST for noncompetitive tenders and prior to 1 p.m. EDST for competitive tenders on May 7, and totaled \$33,801 million, of which \$13,560 million was accepted at yields ranging from 7.07 percent, price 99.814, up to 7.09 percent, price 99.761. Tenders at the high yield were allotted 59 percent. Noncompetitive tenders were accepted in full at the average yield, 7.09 percent, price 99.761. These totaled \$1,080 million. Competitive tenders accepted from private investors totaled \$12,480 million.

In addition to the \$13,560 million of tenders accepted in the auction process, \$1,453 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$3,062 million was accepted from Federal Reserve banks for their own account.

The notes of Series B-2001 were dated May 15, 1991, due May 15, 2001, with interest payable on November 15 and May 15 until maturity. An interest rate of 8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received prior to 12 noon EDST for noncompetitive tenders and prior to 1 p.m. EDST for competitive tenders on May 8, and totaled \$34,884 million, of which \$11,956 million was accepted at yields ranging from 8.06 percent, price 99.593, up to 8.07 percent, price 99.526. Tenders at the high yield were allotted 49 percent. Noncompetitive tenders were accepted in full at the average yield, 8.07 percent, price 99.526. These totaled \$530 million. Competitive tenders accepted from private investors totaled \$11,426 million.

In addition to the \$11,956 million of tenders accepted in the auction process, \$17 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$400 million was accepted from Federal Reserve banks for their own account.

The notes of Series B-2001 may be held in STRIPS form. The minimum par amount required is \$25,000.

The bonds of May 2021 were dated May 15, 1991, due May 15, 2021, with interest payable on November 15 and May 15 until maturity. An interest rate of 8-1/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the bonds were received prior to 12 noon EDST for noncompetitive tenders and prior to 1 p.m. EDST for competitive tenders on May 9, and totaled \$17,350 million, of which \$11,753 million was accepted at yields ranging from 8.19 percent, price 99.278, up to 8.24 percent, price 98.728. Tenders at the high yield were allotted 41 percent. Noncompetitive tenders were accepted in full at the average yield, 8.21 percent, price 99.057. These totaled \$239 million. Competitive tenders accepted from private investors totaled \$11,514 million.

In addition to the \$11,753 million of tenders accepted in

the auction process, \$200 million was accepted from Federal Reserve banks for their own account.

The bonds of May 2021 may be held in STRIPS form. The minimum par amount required is \$320,000.

Auction of 2-Year and 5-Year Notes

On May 15 the Treasury announced that it would auction \$12,250 million of 2-year notes of Series AB-1993 and \$9,250 million of 5-year notes of Series P-1996 to refund \$9,994 million of securities maturing May 31, 1991, and to raise about \$11,500 million of new cash.

The notes of Series AB-1993 were dated May 31, 1991, due May 31, 1993, with interest payable on November 30 and May 31 until maturity. An interest rate of 6-3/4 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received prior to 12 noon EDST for noncompetitive tenders and prior to 1 p.m. EDST for competitive tenders on May 22, and totaled \$40,525 million, of which \$12,255 million was accepted at yields ranging from 6.81 percent, price 99.890, up to 6.83 percent, price 99.853. Tenders at the high yield were allotted 14 percent. Noncompetitive tenders were accepted in full at the average yield, 6.81 percent, price 99.890. These totaled \$1,059 million. Competitive tenders accepted from private investors totaled \$11,196 million.

In addition to the \$12,255 million of tenders accepted in the auction process, \$753 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$1,024 million was accepted from Federal Reserve banks for their own account.

The notes of Series P-1996 were dated May 31, 1991, due May 31, 1996, with interest payable oi: November 30 and May 31 until maturity. An interest rate of 7-5/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received prior to 12 noon EDST for noncompetitive tenders and prior to 1 p.m. EDST for competitive tenders on May 23, and totaled \$25,478 million, of which \$9,259 million was accepted at yields ranging from 7.66 percent, price 99.857, up to 7.70 percent, price 99.694. Tenders at the high yield were allotted 79 percent. Noncompetitive tenders were accepted in full at the average yield, 7.69 percent, price 99.734. These totaled \$597 million. Competitive tenders accepted from private investors totaled \$8,662 million.

In addition to the \$9,259 million of tenders accepted in the auction process, \$125 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$200 million was accepted from Federal Reserve banks for their own account.

TREASURY FINANCING OPERATIONS, APRIL-JUNE 1991

52-Week Bills

On April 26 tenders were invited for approximately \$11,750 million of 364-day Treasury bills to be dated May 9, 1991, and to mature May 7, 1992. The issue was to refund \$10,139 million of maturing 52-week bills and to raise about \$1,600 million of new cash. Tenders were opened on May 2. They totaled \$32,890 million, of which \$11,811 million was accepted, including \$845 million of noncompetitive tenders from the public and \$3,200 million of the bills issued to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. An additional \$20 million was issued to Federal Reserve banks as agents for foreign and international monetary authorities for new cash. The average bank discount rate was 5.71 percent.

Cash Management Bills

On May 15 tenders were invited for approximately \$16,000 million of 335-day bills to be issued May 24, 1991, and to mature April 23, 1992. The issue was to raise new cash. Tenders were opened on May 21. They totaled \$49,632 million, of which \$16,014 million was accepted. The average bank discount rate was 5.89 percent.

On May 28 tenders were invited for approximately \$7,000 million of 17-day bills to be issued June 3, 1991, representing an additional amount of bills dated December 20, 1990, maturing June 20, 1991. The issue was to raise new cash. Tenders were opened on May 29. They totaled \$35,178 million, of which \$7,068 million was accepted. The average bank discount rate was 5.65 percent.

Treasury Changes Time for Announcement of Offerings

On May 6, 1991, the Department of the Treasury announced a new standard release time of 2:30 p.m. Eastern time for all announcements of regularly scheduled bill, note, and bond issues.

JUNE

Auction of 2-Year and 5-Year Notes

On June 19 the Treasury announced that it would auction \$12,500 million of 2-year notes of Series AC-1993 and \$9,250 million of 5-year notes of Series Q-1996 to refund \$17,291 million of Treasury notes maturing June 30 and to raise about \$4,450 million of new cash.

The notes of Series AC-1993 were dated July 1, 1991, due June 30, 1993, with interest payable on December 31 and June 30 until maturity. An interest rate of 7 percent was

set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received prior to 12 noon EDST for noncompetitive tenders and prior to 1 p.m. EDST for competitive tenders on June 25, and totaled \$37,199 million, of which \$12,529 million was accepted at yields ranging from 7.03 percent, price 99.945, up to 7.06 percent, price 99.890. Tenders at the high yield were allotted 64 percent. Noncompetitive tenders were accepted in full at the average yield, 7.06 percent, price 99.890. These totaled \$1,080 million. Competitive tenders accepted from private investors totaled \$11,449 million.

In addition to the \$12,529 million of tenders accepted in the auction process, \$1,228 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$1,514 million was accepted from Federal Reserve banks for their own account.

The notes of Series Q-1996 were dated July 1, 1991, due June 30, 1996, with interest payable on December 31 and June 30 until maturity. An interest rate of 7-7/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received prior to 12 noon EDST for noncompetitive tenders and prior to 1 p.m. EDST for competitive tenders on June 26, and totaled \$25,907 million, of which \$9,301 million was accepted at yields ranging from 7.95 percent, price 99.696, up to 7.97 percent, price 99.615. Tenders at the high yield were allotted 37 percent. Noncompetitive tenders were accepted in full at the average yield, 7.96 percent, price 99.655. These totaled \$888 million. Competitive tenders accepted from private investors totaled \$8,413 million.

In addition to the \$9,301 million of tenders accepted in the auction process, \$100 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$300 million was accepted from Federal Reserve banks for their own account.

52-Week Bills

On May 24 tenders were invited for approximately \$12,250 million of 364-day Treasury bills to be dated June 6, 1991, and to mature June 4, 1992. The issue was to refund \$10,668 million of maturing 52-week bills and to raise about \$1,575 million of new cash. Tenders were opened on May 30. They totaled \$31,559 million, of which \$12,271 million was accepted, including \$720 million of noncompetitive tenders from the public and \$3,395 million of the bills issued to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. The average bank discount rate was 5.73 percent.

INTRODUCTION

Background

The Second Liberty Bond Act (31 U.S.C. 3101, et seq.) provides the Secretary of the Treasury with broad authority to borrow and to determine the terms and conditions of issue, conversion, maturity, payment, and interest rate on Treasury securities. Data in the "Public Debt Operations" section, which have been published in the Treasury Bulletin in some form since its inception in 1939, pertain only to marketable Treasury securities, currently bills, notes, and bonds. Treasury bills are discount securities that mature in 1 year or less, while Treasury notes and bonds have semiannual interest payments. New issues of Treasury notes mature in 2 to 10 years, and bonds mature in over 10 years from the issue date. Each marketable Treasury security is listed in the Monthly Statement of the Public Debt of the United States.

Table PDO-1.-Maturity Schedule of Interest-Bearing Marketable Public Debt Securities Other than Regular Weekly and 52-Week Treasury Bilts

All unmatured Treasury notes and bonds are listed in maturity order, beginning with the earliest maturity. A separate breakout is provided for the combined holdings of the Government accounts and Federal Reserve banks, so that the "All other investors" category includes all private holdings.

Table PDO-2.--Offerings of Bitts

The results of weekly auctions of 13- and 26-week bills and auctions of 52-week bills every fourth week are presented in table PDO-2. Treasury bills mature each Thursday. New issues of 13-week bills are reopenings of 26-week bills. The 26-week bill issued every fourth week to mature on the same Thursday as an existing

52-week bill is a reopening of the existing 52-week bill. The high, low, and average yields on accepted tenders and the dollar value of total bids is presented, along with the dollar value of awards on a competitive and a noncompetitive basis. The Treasury accepts noncompetitive tenders of up to \$1 million in each auction of Treasury securities in order to assure that individuals and smaller institutions are able to participate in offenings of new marketable Treasury securities. Noncompetitive bids are awarded at the average yield on accepted competitive bids.

Table PDO-3.--Public Offerings of Marketable Securities Other than Regular Weekly Treasury Bills

The results of auctions of marketable Treasury securities, other than weekly bills, are listed in the chronological order of the auction dates over approximately the most recent 2 years. This table includes notes and bonds presented in table PDO-1, 52-week bills in table PDO-2, and data for cash management bills. Treasury offers cash management bills from time to time to bridge temporary or seasonal declines in the cash balance. Cash management bill maturities generally coincide with the maturities of regular issues of Treasury bills.

Table PDO-4.--Allotments by Investor Classes for Public Marketable Securities, Parts A and B

Data on allotments of marketable Treasury securities by investor class are presented in chronological order of the auction date for approximately the most recent 2 years. These data have appeared in the *Treasury Bulletin* since 1956. Tenders in each Treasury auction of marketable securities other than weekly auctions of 13- and 26-week bills are tallied by the Federal Reserve banks into investor classes described in the footnotes to the table.

¹ The 13-week bills represent additional issue of bills with an original maturity of 26 weeks

or 52 weeks.

For bills issued on or after May 2, 1974, includes amounts exchanged on noncompetitive basis by Government accounts and Federal Reserve banks.

For 13-week, 26-week, and 52-week bills tenders for \$1,000,000 or less from any one

For 13-week, 26-week, and 52-week bills tenders for \$1,000,000 or less from any one bidder are accepted in full at average price or accepted competitive bids; for other issues, the corresponding amount is stipulated in each offering announcement.

Equivalent coupon-issue yield.

Except \$10,000 at 98.483 percent, and \$1,000,000 at 98.478 percent.

Except \$10,000 at 96.962 percent.

Except \$3,000,000 at 97.073 percent.

⁸ Except \$935,000 at 98.612 percent.

⁹ Except \$100,000 at 98.592 percent. ¹⁰ Except \$1,500,000 at 97,128 percent.

¹¹ Except \$13,400,000 at 98.610 percent.

¹² Except \$1,400,000 at 97,169 percent.

¹³ Except \$10,000 at 97.159 percent, and \$30,000 at 97.154 percent.

¹⁴ Except \$10,000 at 98.660 percent, \$15,000 at 98.617 percent, and \$1,245,000 at 98.610 percent.

15 Except \$5,000,000 at 97.103 percent.

16 Except \$100,000 at 92.417 percent, and \$75,000 at 92.295 percent.

¹⁷ Except \$1,500,000 at 94.237 percent.

¹ Currently, all issues are sold at auction. For bill issues, the rate shown is the average bank discount rate. For note and bond issues, the rate shown is the interest rate. For details of bill offerings see table PDO-2.

From date of additional issue in case of a reopening.

In reopenings the amount issued is in addition to the amount of original offerings.

⁴ Includes securities issued to U.S. Government accounts and Federal Reserve banks; and to foreign and international monetary authorities, whether in exchange for maturing securities or for new cash.

Eligible for STRIPS.

⁶ Interest began to accrue before the issue date (settlement date) of this loan.

⁷ Yields accepted ranged from 8.25% (price 100.000) up to 8.27% (price 99.964) with the average at 8.26% (price 99.982).

Yields accepted ranged from 8.19% (price 99.782) up to 8.20% (price 99.749) with the average at 8.19% (price 99.782).

Yields accepted ranged from 7.88% (price 99.974) up to 7,90% (price 99.868) with the erage at 7.89% (price 99.921).

average at 7.89% (price 99.921).

10 Yields accepted ranged from 7.73% (price 100.036) up to 7.75% (price 100.000) with the

average at 7.75% (price 100,000).

11 Yields accepted ranged from 7.92% (price 99.882) up to 7.94% (price 99.829) with the erage at 7.93% (price 99.856).

average at 7.93% (price 99.85b), 12 Yields accepted ranged from 8.02% (price 99.864) up to 8.05% (price 99.661) with the verage at 8.03% (price 99.796).

average at 8.03% (price 99.796).

13 Yields accepted ranged from 8.13% (price 99.944) up to 8.15% (price 99.721) with the average at 8.14% (price 99.833).

14 Yields accepted ranged from 8.35% (price 99.819) up to 8.38% (price 99.765) with the

verage at 8.37% (price 99.783).

average at 8.37% (price 99.783).

15 Yields accepted ranged from 8.24% (price 99.976) up to 8.26% (price 99.893) with the erage at 8.26% (price 99.893).

average at 8.26% (price 99.853).

15 Yields accepted ranged from 8.37% (price 100.009) up to 8.40% (price 99.955) with the erage at 8.39% (price 99.973).

average at 8.39% (price 99.973).

17 Yields accepted ranged from 8.34% (price 99.699) up to 8.35% (price 99.666) with the average at 8.35% (price 99.666).

18 Yields accepted ranged from 8.07% (price 99.631) up to 8.08% (price 99.579) with the

verage at 8.08% (price 99.579).

average at 8.08% (price 99.579).

19 Yields accepted ranged from 7.72% (price 99.827) up to 7.75% (price 99.772) with the

average at 7.74% (price 99.791). ²⁰ Yields accepted ranged from 7.76% (price 99.974) up to 7.78% (price 99.921) with the verage at 7.77% (price 99.947).

average at 7.77% (price 99.947). ²¹ Yields accepted ranged from 7.93% (price 99.625) up to 7.94% (price 99.557) with the average at 7.94% (price 99.557). ²² Yields accepted ranged from 7.86% (price 102.992) up to 7.87% (price 102.875) with the

average at 7.87% (price 102.875). ²³ Yields accepted ranged from 7.76% (price 99.982) up to 7.79% (price 99.927) with the

average at 7.78% (price 99.945).

²⁴ Yields accepted ranged from 7.76% (price 99.899) up to 7.78% (price 99.815) with the

average at 7.77% (price 99.857). 25 Yields accepted ranged from 7.69% (price 99.882) up to 7.73% (price 99.809) with the average at 7.71% (price 99.846).

Yields accepted ranged from 7.64% (price 99.949) up to 7.65% (price 99.915) with the average at 7.65% (price 99.915).

27 Yields accepted ranged from 8.00% (price 100.000) up to 8.02% (price 99.894) with the

average at 8.02% (price 99.894). ²⁸ Yields accepted ranged from 8.19% (price 99.882) up to 8.21% (price 99.846) with the erage at 8.21% (price 99.846).

Yields accepted ranged from 8.42% (price 99.883) up to 8.44% (price 99.831) with the average at 8.43% (price 99.857), 30 Yields accepted ranged from 8.58% (price 99.470) up to 8.59% (price 99.404) with the

verage at 8.59% (price 99.404). Yields accepted ranged from 8.48% (price 100.216) up to 8.53% (price 99.677) with the

average at 8.50% (price 100.000). 32 Yields accepted ranged from 8.48% (price 100.036) up to 8.50% (price 100.000) with the

average at 8.50% (price 100.000). 33 Yields accepted ranged from 8.52% (price 99.847) up to 8.53% (price 99.805) with the

average at 8.53% (price 99.805). Yields accepted ranged from 8.58% (price 99.856) up to 8.59% (price 99.838) with the

average at 8.59% (price 99.838).

The low, high, and average yield was 8.58% (price 99.734).

³⁶ Yields accepted ranged from 8.62% (price 99.379) up to 8.63% (price 99.328) with the average at 8.62% (price 99.379).

Yields accepted ranged from 8.88% (price 99.991) up to 8.91% (price 99.937) with the erage at 8.90% (price 99.955).

Yields accepted ranged from 8.73% (price 99.728) up to 8.75% (price 99.676) with the average at 8.74% (price 99.702). 39 Yields accepted ranged from 8.87% (price 100.033) up to 8.88% (price 99.967) with the

average at 8.88% (price 99.967).

40 Yields accepted ranged from 8.83% (price 99.162) up to 8.85% (price 98.954) with the erage at 8.88% (price 99.967).

average at 8.84% (price 99.058).

41 Yields accepted ranged from 8.51% (price 99.982) up to 8.53% (price 99.946) with the

average at 8.52% (price 99.964). 42 Yields accepted ranged from 8.52% (price 99.847) up to 8.56% (price 99.681) with the

¹ includes trust funds and accounts that comprise Government accounts under the unified

budget concept.

2 Exclusive of banks and insurance companies

³ included with all other investors are certain Government deposit accounts and

U.S. SAVINGS BONDS AND NOTES

Series EE bonds, on sale since Jan. 1, 1980, are the only savings bonds currently sold. Series HH bonds are issued in exchange for series E and EE savings bonds and savings notes. Series A-D were sold from Mar. 1, 1935, through Apr. 30, 1941. Series E was on sale from May 1, 1941, through Dec. 31, 1979. (through June 1980 to payroll savers only). Series F and G were sold from May 1, 1941, through Apr. 30, 1952. Series H was sold from June 1, 1952, through Dec. 31, 1979. Series HH bonds were sold for cash from Jan. 1, 1980, through Oct. 31, 1982. Series J and K were

sold from May 1, 1952, through Apr. 30, 1957.

U.S. savings notes were on sale May 1, 1967, through June 30, 1970. The notes were eligible for purchase by individuals with the simultaneous purchase of series E savings bonds. The principal terms and conditions for purchase and redemption and information on investment yields of savings notes appear in the *Treasury Bulletins* of March 1967 and June 1968; and the Annual Report of the Secretary of the Treasury for fiscal year 1974.

Because there is a normal lag in classifying redemptions, the distribution of redemptions between sales price and accrued discount has been estimated.

 $^{^2}$ Details by series on a cumulative basis and by period of series A-D combined will be found in the February 1952 and previous issues of the $\it Treasury\,Bulletin$.

Note.-Series E and EE Include U.S. savings notes (Freedom Shares) on sale from May 1, 1967, through June 30, 1970, to E bond buyers.

OWNERSHIP OF FEDERAL SECURITIES

INTRODUCTION

Federal securities presented in these tables comprise public debt securities issued by the Treasury and debt issued by other Federal agencies under special financing authorities. See the Federal debt (FD) series of tables for a more complete description of the Federal debt.

Table OFS-1.-Distribution of Federal Securities by Class of Investors and Type of Issues

Holdings of Treasury marketable and nonmarketable securities and of debt issued by other Federal agencies are presented for Government accounts, the Federal Reserve banks, and private investors. Government account holdings largely reflect investment by the social security and Federal retirement trust funds. The Federal Reserve banks acquire Treasury securities in the market as a means of executing monetary policy.

Table OFS-2.--Estimated Ownership of Public Debt Securities Held by Private Investors

Privately held Treasury securities are those held by investors other than the Government accounts and Federal Reserve banks. Treasury obtains information on private holdings from a variety of sources, such as data gathered by the Federal financial institution regulatory agencies. State and local holdings and foreign holdings include special issues of nonmarketable securities to municipal entities and foreign official accounts, as well as municipal and foreign official and private holdings of marketable Treasury securities. Data on foreign holdings of marketable Treasury securities are presented in the capital movements tables in the *Treasury Bulletin*. See the footnotes for descriptions of the investor categories.

 $^{^1}$ U.S. savings bonds, series A-F and J, are included at current redemption value. 2 includes domestically chartered banks, U.S. branches and agencies of foreign banks, New York Investment companies majority owned by foreign banks, and Edge Act corporations owned by domestically chartered and foreign banks.

Includes partnerships and personal trust accounts.

Includes U.S. savings notes. Sales began May 1, 1967, and were discontinued June 30,

^{1970.} Exclusive of banks and insurance companies.

 $^{^{\}rm S}$ includes State and local pension funds. $^{\rm 7}$ Consists of the investment of foreign balances and international accounts in the United States. Estimates reflect 1978 benchmark through December 1984, and 1984, benchmark

to date.

8 Includes savings and loan associations, credit unions, nonprofit institutions, mutual savings banks, corporate pension trust funds, dealers and brokers, certain Government deposit accounts, and Government-sponsored agencies.

MARKET YIELDS

INTRODUCTION

The tables and charts in this section present yields on Treasury marketable securities and compare long-term Treasury market yields with yields on long-term corporate and municipal securities.

Table MY-1,--Treasury Market Bid Yields at Constant Maturities: Bitts, Notes, and Bonds

The Treasury yield curve, presented in the chart that accompanies table MY-1, is based on current market bid quotations on the most actively traded Treasury securities as of 3:30 p.m. each business day. The Treasury obtains quotations from the Federal Reserve Bank of New York, which composites quotations provided by five primary dealers. This yield curve reflects yields based on semiannual interest payments and is read at constant maturity points to develop a consistent data series. Yields on Treasury bills, which are discount securities, are the coupon equivalent yields of bank discount rates at

which Treasury bills trade in the market. The Board of Governors of the Federal Reserve System also publishes the Treasury constant maturity data series in its weekly H.15 press release.

Table MY-2.--Average Yields of Long-Term Treasury, Corporate, and Municipat Bonds

The long-term Treasury rate is the 30-year constant maturity rate presented in table MY-1. The corporate bond series is developed by the Treasury, using reoffering yields on new long-term securities rated Aa by Moody's Investors Service. The municipal bond series prior to 1991 was compiled by the Treasury. Beginning with January 1991, the series is the "Municipal Bond Yield Averages," published by Moody's Investors Service for 20-year reoffering yields on selected Aa-rated general obligations. See the footnotes for further explanation.

¹ Treasury series based on 3-week moving average of reoffering yields of new corporate bonds rated Aa by Moody's Investors Service and having an original maturity of at least 20 years.

² Index of new reoffering yields on 20-year general obligations rated Aa by Moody's Investors Service. Source: U.S. Treasury, 1980-90; Moody's Investors Service, January 1991 to present.

AVERAGE YIELDS OF LONG-TERM TREASURY, CORPORATE, AND MUNICIPAL BONDS

Aa Corporate Bonds

INTRODUCTION

Section 114 of the Budget and Accounting Procedures Act of 1950 (31 U.S.C. 3513a) requires the Secretary of the Treasury to prepare reports on the financial operations of the U.S. Government and provides that each executive agency must furnish the Secretary of the Treasury such reports and information relating to the agency's financial condition and operations as the Secretary may require. The provisions do not apply to the legislative and judicial branches of the Federal Government; however, these entities are encouraged to submit the prescribed reports so the Secretary of the Treasury can prepare comprehensive reports on all the financial activities of the U.S. Government.

The Treasury Financial Manual (I TFM 2-4100) sets the criteria for the submission of annual and quarterly financial reports in accordance with the Reporting Entities Listing (Bulletin No. 90-05). Reports are provided for six fund types: Revolving funds, trust revolving funds, 15 major trust funds, all other trust funds, all other activity combined, and consolidated reports of an organizational unit. The financial transactions supporting the required reports are to be accounted for on the accrual basis. The Report on Operations can be submitted on a cash basis under certain circumstances (see I TFM 2-4180.20). Reports are to be prepared from a budgeting and accounting system which contains an integrated data base that is part of the agency's integrated financial management system as required by the Office of Management and Budget (OMB) Circular No. A-127.

The required reports should include all assets, liabilities, and equities relating to all programs and activities under control of the reporting entity, except for the assets of disbursing officers, which are reported by the Treasury. Reports should include transfer appropriation accounts from other agencies, foreign currencies, opera-

tions conducted in the territories or overseas, and any monetary essets or property received, spent, or otherwise accounted for by the reporting entity. Amounts are reported to the dollar.

Requirements provide that Federal agencies submit to Treasury four financial reports supplemented by three supporting reports. These reports are: Report on Financial Position (SF 220), Report on Operations (SF 221), Report on Cash Flow (SF 222), and Report on Reconciliation (SF 223). The three supporting reports are: Direct and Guaranteed Loans Reported by Agency and Program Due from the Public (SF 220-8), Report on Accounts and Loans Receivable Due from the Public (SF 220-9), and Additional Financial Information (SF 220-1). The report on Direct and Guaranteed Loans is submitted to Treasury quarterly, and annually for publication in the *Treasury Bulletin*. The Report on Accounts and Loans Receivable Due from the Public is submitted quarterly on a selected basis, and by all entities annually. Information captured in the SF 220-8 is shown in the following table:

Table FA-1.--Direct and Guaranteed Loans

This report reflects the direct loans and guaranteed loans to the public through the Federal Credit Program to support credit activities. Actual control of credit program levels remains with authorizing legislation and appropriations acts. The report on Direct and Guaranteed Loans also provides the Federal Reserve Board information to monitor the flow of funds. An accompanying chart depicts direct loans and guaranteed loans for the second quarter of fiscal 1991.

INTERNATIONAL STATISTICS

INTERNATIONAL FINANCIAL STATISTICS

The tables in this section are designed to provide data on U.S. reserve assets and liabilities and other statistics related to the U.S. balance of payments and international financial position.

Table IFS-1 shows the reserve assets of the United States, including its gold stock, special drawing rights held in the Special Drawing Account in the International Monetary Fund, holdings of convertible foreign currencies, and reserve position in the International Monetary Fund.

Table IFS-2 brings together statistics on liabilities to foreign official institutions, and selected liabilities to all other foreigners, which are used in the U.S. balance of payments statistics.

Table IFS-3 shows U.S. Treasury nonmarketable bonds and notes issued to official institutions and other residents of foreign countries.

Table IFS-4 presents a measure of the general foreign exchange value of the U.S. dollar.

¹ Beginning July 1974, the international Monetary Fund (IMF) adopted a technique for valuing the special drawing right (SDR) based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and reserve position in the IMF are also valued on this basis beginning July 1974.

Fund, plus or minus transactions in SDRs.

² Treasury values its gold stock at \$42.2222 per fine troy ounce and pursuant to 31 U.S.C. 5117(b) issues gold certificates to the Federal Reserve at the same rate against ell gold held

³ Includes allocations of SDRs in the Special Drawing Account in the International Monetary

⁴ Includes holdings of Treasury and Federal Reserve System; beginning November 1978, these are valued at current market exchange rates or, where appropriate, as such other rates as may be egreed upon by the parties to the transactions.

⁵ The United States has the right to purchase foreign currencies equivalent to its reserve position in the Fund automatically if needed. Under appropriate conditions the United States could purchase additional amounts related to the U.S. quota.

Beginning March 1988, indicates current value (principal plus accrued interest) of zero-coupon, 20-year maturity Treasury bond issue to the Government of Mexico. Face value of issue is \$2,556 million. Beginning March 1990, Includes current value of zero-coupon, 30-year maturity Treasury bond Issue to the Government of Mexico. Face value of Issue is

² Derived by applying reported transactions to benchmark data.

³ Beginning in March 1988, includes current value of zero-coupon, 20-year maturity Treasury bond Issue to the Government of Mexico. Beginning March 1990, also includes current value of zero-coupon, 30-year maturity Treasury bond issue to the Government of Mexico. Beginning December 1990, also includes current value of zero-coupon, 30-year maturity Treasury bond issue to the Republic of Venezuela. Also see footnotes 1 and 2, table IFS-3.

⁴ Includes debt securities of U.S. Government corporations, federally sponsored agencies, and private corporations.

⁵ Includes liabilities payable in dollars to foreign banks and liabilities payable in foreign currencies to foreign banks and to "other foreigners."

⁶ Includes marketable U.S. Government bonds and notes held by foreign banks.

⁷ Principally the International Bank for Reconstruction and Development, the Inter-American Development Bank, and the Asian Development Bank.

^{\$30,220} million.

2 Beginning December 1990, indicates current value of zero-coupon, 30-year maturity Treasury bond issue to the Republic of Venezuela. Face value of Issue is \$7,258 million.

INTERNATIONAL FINANCIAL STATISTICS

These indices are presented to provide measures of the general foreign exchange value of the dollar that are broader than those provided by single exchange rate levels. They do not purport to represent a guide to measuring the impact of exchange rate levels

on U.S. international transactions. The indices are computed as geometric averages of individual currency levels with weights derived from the share of each country's trade with the United States during 1982-83.

Table IFS-4.--Trade-Weighted Index of Foreign Currency Value of the Dollar

Index includes average annual rates as reported in "International Financial Statistics."

¹ Each Index covers (a) 22 currencies of countries represented in the Organization for Economic Cooperation and Development (OECD): Australia, Austria, Belgium-Luxembourg, Canada, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, and the

INTRODUCTION

Background

Data relating to capital movements between the United States and foreign countries have been collected in some form since 1935. Reports are filed with district Federal Reserve banks by commercial banks, other depository institutions, bank holding companies, securities brokers and dealers, and nonbanking enterprises in the United States. Statistics on the principal types of data by country or geographical area are then consolidated and are published in the Treasury Bulletin.

The reporting forms and instructions¹ used in the Treasury International Capital (TIC) Reporting System have been revised a number of times to meet changing conditions and to increase the usefulness of the published statistics. The most recent, general revision of the report forms became effective with the banking reports as of April 30, 1978, and with the nonbanking reports as of December 31, 1978. Revised forms and instructions are developed with the cooperation of other Government agencies and the Federal Reserve System and in consultations with representatives of banks, securities firms, and nonbanking enterprises.

Basic Definitions

The term "foreigner" as used in the Treasury reports covers all institutions and individuals domiciled outside the United States, including U.S. citizens domiciled abroad, and the foreign branches, subsidiaries, and other affiliates abroad of U.S. banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located. The term "foreigner" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners.

In banks' claims reporting, the term "foreign public borrower" encompasses central governments and departments of central governments of foreign countries and of their possessions; foreign central banks, stabilization funds, and exchange authorities; corporations and other agencies of central governments, including development banks, development institutions, and other agencies which are majority-owned by the central government or its departments; State, provincial, and local governments of foreign countries and their departments and agencies; and any international or regional organization or subordinate or affiliated agency thereof, created by treaty or convention between sovereign states.

In general, data are reported opposite the foreign country or geographical area in which the foreigner is domiciled, as shown on the records of reporting institutions. For a number of reasons, the geographical breakdown of the reported data may not in all cases reflect the ultimate ownership of the assets. Reporting institutions are not expected to go beyond the addresses shown on their records, and so may not be aware of the country of domicile of the ultimate beneficiary. Furthermore, U.S. liabilities arising from deposits of dollars with foreign banks are reported in the Treasury statistics as liabilities to foreign banks, whereas the liability of the foreign bank receiving the deposit may be to foreign official institutions or to residents of another country.

Data pertaining to branches or agencies of foreign official

¹Copies of the reporting forms and instructions may be obtained from the Office of Data Management, Office of the Assistant Secretary for Economic Policy, Department of the Treasury, Washington, D.C. 20220, or from district Federal Reserve banks.

institutions are reported opposite the country to which the official institution belongs. Data pertaining to international and regional organizations are reported opposite the appropriate international or regional classification except for the Bank for International Settlements, which is included in the classification "Other Europe."

Reporting Coverage

Reports are required from banks, other depository institutions, bank holding companies, International Banking Facilities (IBFs), securities brokers and dealers, and nonbanking enterprises in the United States, including the branches, agencies, subsidiaries, and other affiliates in the United States of foreign banking and nonbanking firms. Entities that have reportable liabilities, claims, or securities transactions below specified exemption levels are exempt from reporting.

Banks, other depository institutions, and some brokers and dealers file monthly reports covering their dollar liabilities to, and dollar claims on, foreigners in a number of countries. Twice a year, as of June 30 and December 31, they also report the same liabilities and claims items with respect to foreigners in countries not shown separately on the monthly reports. Quarterly reports are filed with respect to liabilities and claims denominated in foreign currencies vis-a-vis foreigners. The specified exemption level applicable to the monthly and quarterly banking reports is \$15 million. There is no separate exemption level for the semiannual reports.

Banks, other depository institutions, securities brokers and dealers, and other enterprises report monthly their transactions in long-term securities with foreigners. The applicable exemption level is \$2 million with respect to the grand total of purchases and to the grand total of sales during the month covered by the report. This reporting threshold was raised from \$500,000 effective January 31, 1991.

Quarterly reports are filed by exporters, importers, industrial and commercial concerns, financial institutions other than banks, other depository institutions, brokers, and other nonbanking enterprises if their liabilities to, or claims on, unaffiliated foreigners at quarterend amount to \$10 million or more. Nonbanking enterprises also report for each monthend their U.S. dollar-denominated deposit and certificates of deposit claims of \$10 million or more on banks abroad.

Description of Statistics

Section I presents data on liabilities to foreigners reported by banks, other depository institutions, brokers, and dealers in the United States. Liabilities denominated in dollars are reported monthly; those denominated in foreign currencies are reported quarterly. Respondents report certain of their own liabilities and all of their custody liabilities to foreigners. Effective as of January 31, 1985, savings and loan associations and other thrift institutions began to file the TIC banking forms. Previously they had reported on TIC forms for nonbanking enterprises.

Section II presents the claims on foreigners reported by banks, other depository institutions, and brokers and dealers in the United States. Banks' claims held for their own account are available in a monthly series. Data on claims held for their domestic customers are collected on a quarterly basis only. Maturity data are on a time remaining to maturity basis. Foreign currency claims are also collected on a quarterly basis only. This claims coverage also ex-

tends to certain items in the hands of brokers and dealers in the United States. See notes to section I above concerning the reporting of thrift institutions.

Section III includes supplementary statistics on U.S. banks' liabilities to, and claims on, foreigners. The supplementary data on banks' loans and credits to nonbank foreigners combine selected information from the TIC reports with data from the monthly Federal Reserve 2502 reports submitted for major foreign branches of U.S. banks. Other supplementary data on U.S. banks' dollar liabilities to, and banks' own dollar claims on, countries not regularly reported separately are available semiannually in the June and December issues of the *Treasury Bulletin*.

Section IV shows the liabilities to, and claims on, unaffiliated foreigners by exporters, importers, industrial and commercial concerns; financial institutions other than banks, other depository institutions, and brokers; and other nonbanking enterprises in the United States. The data exclude the intercompany accounts of nonbanking enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. (Such transactions are reported by business enterprises to the Department of Commerce on its direct investment forms.) The data also exclude claims held through banks in the United States.

Section V contains data on transactions in all types of long-term (original maturity of 1 year or more) domestic and foreign securities with foreigners as reported by banks, brokers, and other entities in the United States (except nonmarketable U.S. Treasury notes,

foreign series; and nonmarketable U.S. Treasury bonds and notes, foreign currency series, which are shown in the "International Financial Statistics" section, table IFS-3). The data cover new issues of securities, transactions in outstanding issues, and redemptions of securities. They include transactions executed in the United States for the account of foreigners, and transactions executed abroad for the account of reporting institutions and their domestic customers. The data include some transactions which are classified as direct investments in the balance of payments accounts.

The geographical breakdown of the data on securities transactions shows the country of domicile of the foreign buyers and sellers of the securities; in the case of outstanding issues, this may differ from the country of the original issuer. The gross figures contain some offsetting transactions between foreigners. The net figures for total transactions represent transactions by foreigners with U.S. residents; but the net figures for transactions of individual countries and areas may include some transactions between foreigners of different countries.

The data published in these sections do not cover all types of reported capital movements between the United States and foreign countries. The principal exclusions are the intercompany capital transactions of nonbanking business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies, and capital transactions of the U.S. Government. Consolidated data on all types of international capital transactions are published by the Department of Commerce in its regular reports on the U.S. balance of payments.

INTRODUCTION

Background

Data have been collected since 1974 on the foreign currency positions of banks and nonbanking firms in the United States, and on those of foreign branches, majority-owned foreign partnerships, and majority-owned foreign subsidiaries of U.S. banks and nonbanking firms. Reports cover five major foreign exchange market currencies and U.S. dollars held abroad. Reporting has been required pursuant to title II of Public Law 93-110, an amendment to the Par Value Modification Act of September 21, 1973, and implementing Treasury regulations. Statistics on the positions have been published since March 1977 beginning with data for December 1975.

The report forms and instructions used in the collection of bank data were revised effective with reports as of March 16, 1983, for the weekly reports. The most recent revision of the nonbank foreign currency forms (see below) became effective as of the last business day of March 1983.

Common Definitions and Concepts

The term "United States" means the States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, Midway Island, the Virgin Islands, and Wake Island. The term "foreign" means locations other than the "United States." The term "worldwide" is used to describe the sum of "United States" and "foreign" data.

Data for the United States include amounts reported by sole proprietorships, partnerships, and corporations in the United States including the U.S. branches and subsidiaries of foreign nonbanking concerns, in the case of "nonbanking firms' positions," and the agencies, branches, and subsidiaries located in the United States of foreign banks and banking institutions, in the case of the weekly "bank positions."

Data for "foreign branches" and "abroad" include amounts reported by the branches, majority-owned partnerships, and majority-owned subsidiaries of U.S. banking and nonbanking concerns. In general, these data do not reflect the positions of foreign parents foreign parents' subsidiaries located abroad except through intercompany accounts. The data include the foreign subsidiaries of a few foreign-owned U.S.-based corporations.

Assets, liabilities, and foreign exchange contract data are reported on the basis of time remaining to maturity as of the date of the report, regardless of the original maturity of the instrument involved. "Spot" means due for receipt or delivery within 2 business days from the date of the report. "Short-term" means maturing in 1 year or less from the date of the report.

"Majority-owned foreign partnerships" are those organized under the laws of a foreign country in which one or more nonbanking concerns or nonprofit institutions in the United States, directly or indirectly, own more than 50 percent profit interest. "Majority-owned foreign subsidiaries" are foreign corporations in which one or more nonbanking business concerns or nonprofit institutions located in the United States, directly or indirectly, own stock with more than 50 percent of the total combined voting power of all classes of stock entitled to vote, or more than 50 percent of the total value of all classes of stock.

Reporting Threshold

The exemption level applicable to banks and banking institutions was \$10 million equivalent through January 1982, when it was raised to \$100 million. The exemption level applicable to nonbanking business concerns and nonprofit institutions was \$1 million equivalent on all nonbank forms from March 1975 through November 1976. It was raised to \$2 million equivalent on the monthly reports of positions held in the United States from November 1976 through September 1978. The exemption level was raised to \$3 million on foreign subsidiary positions on June 30, 1977, and for positions held in the United States on September 30, 1978. The exemption level for nonbanking firms was raised to \$100 million on positions in the United States in January 1982 and on foreign branch and subsidiaries positions in March 1982.

Firms must report their entire foreign currency position in a specified foreign currency if a specified U.S. dollar equivalent value is reached in any category of assets, liabilities, exchange contracts bought and sold, or the net position in the currency. In general, exemption levels are applied to the entire firm. In reports on their foreign branches, majority-owned foreign partnerships, and majority-owned foreign subsidiaries, U.S. banks and nonbanks are required to report the U.S. dollar-denominated assets, liabilities, exchange contracts bought and sold, and net positions of those branches, partnerships, and subsidiaries with reportable positions in the specified foreign currencies.

Description of Statistics

Data collected on the Treasury foreign currency forms are published in the *Treasury Bulletin* in seven sections. The first section presents a summary of worldwide net positions in all of the currencies reported. Sections II through VI each present data on a specified foreign currency. Section VII presents the U.S. dollar positions of the foreign branches and subsidiaries of U.S. firms which are required to report in one or more of the specified foreign currencies.

Footnotes to Tables FCP-I through FCP-VII

SECTION I

- Worldwide net positions on the last business day of the calendar quarter of nonbanking business concerns in the United States and their foreign branches and majority-owned partnerships and subsidiaries. Excludes receivables and installment paper which have been sold or discounted before maturity, U.S. parent companies' investment in their majority-owned foreign subsidiaries, fixed assets (plant and equipment), and capitalized leases for plant and equipment.
- ² Foreign branches and majority-owned partnerships and subsidiaries only.
- ³ Weekly worldwide net positions of banks and banking institutions in the United States, and their foreign branches and majority-owned foreign subsidiaries. Excludes capital assets and liabilities.
- ⁴ Foreign branches and majority-owned subsidiaries only.

SECTIONS II THROUGH VII

¹ Positions of nonbanking business concerns in the United States and their foreign branches and majority-owned partnerships and subsidiaries. In section VII positions of foreign branches and majority-owned partnerships and subsidiaries only.

- 2 Excludes receivables and installment paper sold or discounted before maturity, fixed assets (plant and equipment), and parents' investment in majority-owned foreign subsidiaries.
- ³ Capitalized plant and equipment leases are excluded.
- ⁴ Includes both spot and forward exchange rates.
- ⁵ Columns 1 and 3 less columns 2 and 4.
- 6 Representative rates on the report date. Canadian dollar and United Kingdom pound rates are expressed in U.S. dollars per unit of foreign currency, all others in foreign units per U.S. dollar. The source of the automated representative rates changed as of June 30, 1988.
- 7 Banks and banking institutions in the United States and their foreign branches and majority-owned subsidiaries. In section VII, foreign branches and majority-owned subsidiaries only.
- ⁸ Excludes capital assets.
- 9 Excludes capital liabilities.
- 10 includes both spot and forward exchange contracts.
- 11 Columns 3 and 9 less columns 6 and 12.
- 12 See footnote 6.

EXCHANGE STABILIZATION FUND

INTRODUCTION

Background

The Exchange Stabilization Fund (ESF) was established under the Gold Reserve Act of January 30, 1934 (31 U.S.C. 822a). This act authorized the establishment in the Department of the Treasury of a stabilization fund to be operated under the exclusive control of the Secretary of the Treasury, with the approval of the President, for the purpose of stabilizing the exchange value of the dollar. Subsequent amendment of the Gold Reserve Act modified the original purpose somewhat to reflect termination of the fixed exchange rate system.

The resources of the fund consist of dollar balances, partly invested in U.S. Government securities, special drawing rights (SDRs), and balances of foreign currencies.

The principal sources of income or losses for the ESF have been profits or losses on holdings of and transactions in SDRs and toreign exchange, and the interest earned on assets.

Definitions

Special drawing rights.—International assets created by the International Monetary Fund (IMF). They serve to increase international liquidity and provide additional international reserves, and may be purchased and sold among eligible holders through the IMF.

SDR allocations.--The counterpart of SDRs issued by the IMF based on members' quota in the IMF. Although shown in ESF state-

ments as liabilities, they must be redeemed by the ESF only in the event of liquidation of, or U.S. withdrawal from, the SDR Department of the IMF or cancellation of SDRs.

SDR certificates.—Issued to the Federal Reserve System against SDRs when SDRs are "monetized" and the proceeds of the monetization are deposited in an ESF account at the Federal Reserve Bank of New York.

Description of Tables

Table ESF-1 presents the assets, liabilities, and capital of the ESF. Data are presented in U.S. dollars or U.S. dollar equivalents based on current exchange rates computed according to the accrual method of accounting. The capital account represents the original capital appropriated to the ESF by Congress of \$2 billion, less a subsequent transfer of \$1.8 billion to pay for the initial U.S. quota subscription to the IMF. Subsequent gains and losses since inception are reflected in the cumulative net income (loss) account.

Table ESF-2 presents the results of operations by quarter. Data are presented in U.S. dollars or U.S. dollar equivalents computed according to the accrual method of accounting. The "Profit (loss) on foreign exchange" includes realized profits (losses) on sales of foreign currencies as well as revaluation gains (losses) on currencies held. "Adjustment for change in valuation of SDR holdings and allocations" reflects the net gain (loss) on revaluation of SDR holdings and allocations for the quarter.

Note.--Annual balance sheets for fiscal years 1934 through 1940 appear in the 1940 Annual Report of the Secretary of the Treasury and those for succeeding years appear In subsequent reports through 1980. Quarterly balance sheets beginning with Dec. 31, 1938, have been published in the *Treasury Bulletin*. Data from inception to Sept. 30, 1978, may be found on the statements published in the January 1979 *Treasury Bulletin*.

¹ Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing rights (SDRs) based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and allocations

are valued on this basis beginning July 1974.

2 Excludes foreign exchange transactions for future and spot delivery.

3 A non-Interest-bearing liability to the U.S. Treasury resulting from the transfer to the Exchange Stabilization Fund of foreign currencles drawn from the IMF by the United States.

SPECIAL REPORTS

Consolidated Financial Statements of the United States Government Fiscal Year 1990/Prototype

INTRODUCTION

The fiscal year 1990 edition of the Consolidated Financial Statements of the United States Government was recently released and an extract follows. The statements and accompanying information, prepared and published annually by Treasury's Financial Management Service, are unique because they are modeled after corporate-type reports and are developed on the accrual basis of accounting. The following excerpts present some of the most noteworthy information in the statements.

Data for the Consolidated Financial Statements is compiled from program agency accounting systems Governmentwide and captured in five consolidated statements: Financial position, operations, cash flows, receipts and outlays, and reconciliation of accrual operating results to the cash basis budget. This general purpose report, for example, provides a snapshot of what the Federal Government owns and owes by presenting summary information on its financial condition and operations. Customary notes to the financial statements as well as several broad supplemental tables--from accounts and loans receivable due from the public to Federal obligations--complete the publication.

The entire 44-page document is for sale through the Superintendent of Documents, U.S. Government Printing Office. An order form is provided at the end of the *Treasury Bulletin*.

FINANCIAL HIGHLIGHTS

Revenues and expenses

The following graphs show revenues and expenses for fiscal years 1988 through 1990, and the major categories of revenues by source and expenses by agency for fiscal years 1990 and 1989. Revenues levied under the Government's sovereign power are reported on the cash basis. Amounts earned through Government business-type operations are reported on the accrual basis. The data supporting the graph of expenses by agency are reported on the accrual basis.

SUPPLEMENTAL TABLES

SUMMARY OF ACCOUNTS AND LOANS RECEIVABLE DUE FROM THE PUBLIC

The Federal Government is the Nation's largest source of credit and underwriter of risk. Its financial commitments are increasing at a rate that exceeds the growth of the U.S. economy.

The Debt Collection Act of 1982 (31 U.S.C. 3719) requires that the Director of the Office of Management and Budget (OMB) consult with the Secretary of the Treasury and the Comptroller General of the United States to establish regulations for agencies with outstanding debts. Each agency prepares and transmits a report summarizing the status of accounts and loans receivable it manages to OMB and Treasury. The Federal Government uses the data in these reports to improve the quality of collection methods.

Total accounts receivable amounted to \$105.9 billion in fiscal 1990, an increase of \$7.4 billion over fiscal 1989. Total loans receivable amounted to \$214.0 billion in fiscal 1990, an increase of \$2.2 billion from fiscal 1989. Graphically depicted below are summaries by selected agencies of accounts and loans receivable data.

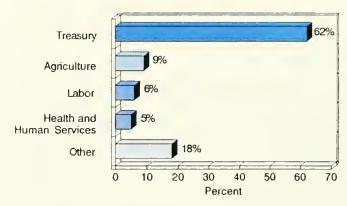

The credit reform provisions of the Omnibus Budget Reconciliation Act of 1990 (OBRA) recognized the implicit cost of Federal credit programs. OBRA seeks reform in several major credit and insurance programs and establishes a policy of risk assessment and program review.

The fiscal 1992 budget requested, for the first time, funding to handle the cost of direct loans and loan guarantees at the time credit is extended. The administration and the Congress will allocate budgetary resources by comparing credit program costs and their accompanying benefits on an equal basis with the costs and benefits of other programs.

The fiscal 1992 budget also recognized the need for additional reforms to reduce the underwriting risk inherent in federally sponsored programs. The budget also proposed reforms in deposit insurance, financial services regulation, Veterans Affairs (VA) mortgage guarantees, and the guaranteed student loan (GSL) program. The reforms in GSLs would reduce defaults and costs to the Government while increasing the program's effectiveness in helping students. A program recommended for review is the Federal Housing Administration (FHA) multifamily loan program.

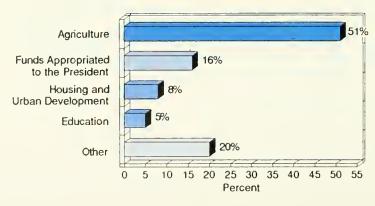

GROSS ACCOUNTS RECEIVABLE

\$105.9 billion

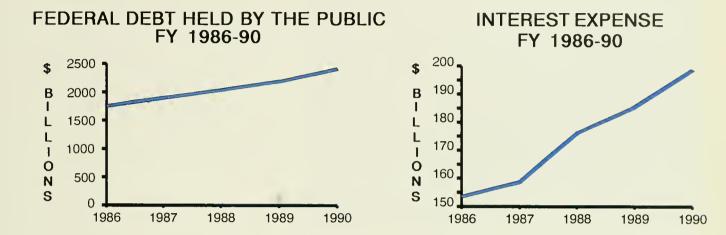

GROSS LOANS RECEIVABLE

\$214.0 billion

FEDERAL DEBT

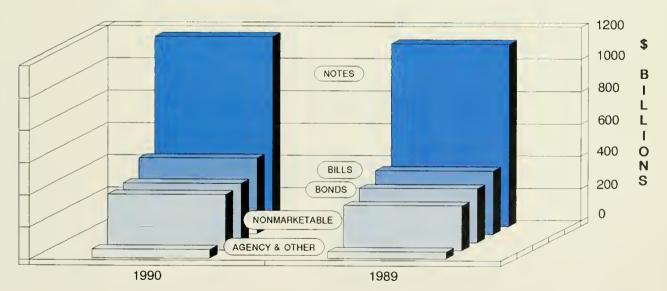

Total Federal debt held by the public amounted to \$2,410.4 billion in fiscal 1990, an increase of \$220.1 billion from fiscal 1989. The following charts show the increase in Federal debt and the interest expense.

The two debt tables which follow reflect information on the borrowing of the Federal Government needed to finance the Government's operations. These tables support the Statement of Financial Position caption, "Debt issued under financing authority," shown net of intragovernmental holdings and unamortized premium or discount. Intragovernmental holdings represent that portion of the total Federal debt held by Federal entities, including the major trust funds.

The distribution of 1990 and 1989 net debt from the public by major type of securities is graphically depicted.

NET DEBT BY TYPE OF SECURITIES

COMMITMENTS AND CONTINGENCIES

Commitments are long-term contracts for which appropriations have not been provided by the Congress and undelivered orders which represent obligations.

A contingency is a liability involving uncertainty as to a possible loss to the Government that will be resolved when one or more future events occur or fail to occur. If the future event or events are likely to occur and the amounts can be reasonably estimated, the liabilities are reported in the Statement of Financial Position under "Financial liabilities" or "Other liabilities." Contingencies within the Federal Government result from a number of sources including loan and credit guarantees, insurance programs, and unadjudicated claims.

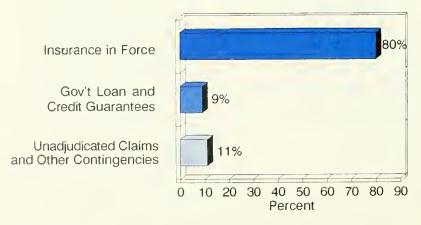

In fiscal 1990, total commitments amounted to \$539.7 billion and total contingencies amounted to \$5,800.3 billion. Total contingencies represent the maximum risk of exposure without regard to probability of occurrence and without deduction for existing and contingent assets which would be available to offset potential losses. The charts below show the percentage distribution of 1990 commitments and contingencies by source category.

Federal and federally sponsored credit and insurance have grown faster than the gross national product over the past 20 years. The loans and securitization provided by Government-sponsored enterprises is the fastest growing category. The largest commitment is to Federal deposit insurance at commercial banks, thrifts, and credit unions; but Federal loan guarantees have grown rapidly, too.

Programs with high default costs are multifamily housing, farm ownership and operating loans, Export-Import Bank lending, small business credit, and Rural Electrification Administration power supply loans. Loan guarantees with high default rates include guaranteed student loans and Veterans Affairs (VA) guaranteed and Federal Housing Administration (FHA) insured mortgages with high loan-to-value ratios.

U.S. Currency and Coin Outstanding and in Circulation

U.S. CURRENCY AND COIN OUTSTANDING AND IN CIRCULATION

INTRODUCTION

Purpose and Scope

The U.S. Currency and Coin Outstanding and in Circulation Statement is prepared to inform the public of the face value of currency and coin which are used as a medium of exchange and the total thereof, as of the end of a given accounting month.

The statement defines the total amount of currency and coin outstanding and the portion of which is deemed to be in circulation. Although it still includes some old and current rare issues of coin and currency which do not circulate or may do so to a limited extent, Treasury policy is to continue their inclusion in the statement since such issues were originally intended for general circulation. The statement also provides a brief description of the various issues of U.S. paper money and further presents a comparative amount of money circulated in relation to population.

History

Statements of currency and coin outstanding and in circulation have been published by the Department of the Treasury since 1888. These statements were originally prepared monthly by the Division of Loans and Currency, which was then under the Office of the Secretary of the Treasury but later became part of the Public Debt Service (currently known as the Bureau of the Public Debt) in 1929. The statement was published with the title "Circulation Statement of United States Money" from 1923 through December 31, 1965. Concurrently, from December 31, 1919, to September 30, 1951, the Office of the U.S. Treasurer published a statement entitled "Monthly Statement--Paper Currency of Each Denomination Outstanding." Two months after the Office of the U.S. Treasurer assumed publication of the "Circulation Statement of United States Money," a revision was made to the statement to include denomination detail of the currency in circulation. Publication of the "Monthly Statement--Paper Currency of Each Denomination Outstanding" was discontinued, and the revised version which combines information from both statements became known as the United States Currency and Coin Outstanding and in Circulation Statement. The statement in 1983 ceased to be published as a separate, monthly release and instead was incorporated into the quarterly Treasury Bulletin as a special report.

Definition of Terms

The classification "Amounts outstanding and in circulation" includes all issues by the Bureau of the Mint which are purposely intended as a medium of exchange. Therefore, coins sold by the Bureau of the Mint at premium prices are excluded. However, uncirculated coin sets, sold by the Mint at face value plus a handling charge, are included.

The term "Federal Reserve notes" refers to issues by the U.S. Government to the public through the Federal Reserve banks and their member banks. These notes represent U.S. Government obligations. Currently, the item "Federal Reserve notes--amounts outstanding" consists of new series issues. The Federal Reserve note is the only class of currency currently issued.

"U.S. notes" are also known as legal tender notes and were issued in five different issues; namely, (a) First Issue--1862 (\$5 to \$1,000 notes), (b) Second Issue--1862 (\$1 to \$2 notes), (c) Third Issue--1863 (\$5 to \$1,000 notes), (d) Fourth Issue--1863 (\$1 to \$10,000 notes), and (e) Fifth Issue--1901 (\$10 notes).

The column for "Currency no longer issued" consists of gold certificates (old and new series), silver certificates (old and new series), Federal Reserve notes (old and new series), national bank notes (old and new series), and Treasury notes (1890 series).

"Dollar coins" include standard silver coins and nonsilver coins.

"Fractional coins" include subsidiary coins in denominations of 50 cents, 25 cents, and 10 cents and minor coins (5 cents and 1 cent).

Reporting Sources

Data used in the preparation of the U.S. Currency and Coin Outstanding and in Circulation Statement is derived from monthly reports required from Treasury offices, various U.S. Mint offices, the Federal Reserve banks, and the Federal Reserve Board. Such reports convey information about the amount, class, and denomination of new issues of currency and/or coin, of destroyed and replaced currency, and of currency and coins withdrawn from circulation. Estimates of population from the Bureau of the Census are used in the calculation of money circulated per capita.

¹ Issued on and after July 1, 1929. 2 Excludes coin sold to collectors at premium prices. 3 Includes \$481,781,898 in standard silver dollars.

Based on Bureau of the Census estimates of population,
 Represents value of certain partial denominations not presented for redemption.

Glossary

With References to Applicable Sections and Tables

- Accrued discount (SBN-1, -2, -3)--This is the interest that has accumulated from the sale of savings bonds and notes issued at a discount to the date of redemption or final maturity, whichever comes first. Series A, B, C, D, E, EE, F, and J are discount or accrual type bonds. Principal and accrued interest are paid when bonds are presented for redemption. Series G, H, HH, and K are current-income bonds, and interest paid semiannually is not included in accrued discount.
- Average discount rate (PDO-3)--In Treasury bill auctions, purchasers tender competitive bids on a discount rate basis. The average discount rate represents the weighted average of all discount rates accepted in the auction. (Same as average discount rate in table PDO-2.)
- Cash management bills (PDO-2)--Cash management bills are marketable Treasury bills of irregular maturity lengths sold periodically for the general purpose of funding short-term cash needs. Cash management bills usually are restricted to competitive bidders, with higher minimum and multiple purchase requirements than regular bills.
- Competitive tenders ("Treasury Financing Operations")--A tender is an application by a prospective investor to buy
 Treasury securities. With a competitive tender, the investor offers to purchase a stated amount of an issue at
 a specified discount rate for bills or a specified yield for notes and bonds. If the bid is within the range
 accepted in the auction, the purchaser will pay the price equivalent of the bid.
- Debt outstanding subject to limitation (FD-6)--This is the debt incurred by the Treasury that is subject to the statutory debt limit set by Congress. Until World War I, Congress authorized a specific amount of debt that could be raised by each separate security issue. Beginning with the Second Liberty Loan Act of 1917, the nature of the limitation was modified until it developed by 1941 into an overall limit on the outstanding Federal debt.

The debt subject to limitation includes almost all Treasury public debt except for securities issued to the Federal Financing Bank, upon which there is a limitation of \$15 billion, and certain categories of older debt (totaling approximately \$595 million as of February 1991).

- Discount rate (PDO-2)--The rate for Treasury bills is on the basis of a discount rate, which is the rate of return based on the difference between par and the actual purchase price paid (i.e., discount). The discount rate is annualized over a 360-day year. This rate understates the real rate of return; accordingly, the yield (coupon-equivalent rate) is a better measure of return and should be used in any comparison with coupon-issue (note or bond) securities.
- Domestic series (FD-2)--This is composed of nonmarketable, interest and non-interest-bearing securities issued periodically by the Treasury to the Resolution Funding Corporation (RFC) for RFC's investment of funds authorized under section 21B of the Federal Home Loan Bank Act (12 U.S.C. 1441b).
- Foreign-targeted Issue (PDO-1, -3)--Foreign-targeted notes were sold between October 1984 and February 1986 to foreign institutions, foreign branches of U.S. institutions, foreign central banks or monetary authorities, or to international organizations of which the United States was a member. They were sold as companion issues to domestic (normal) Treasury notes, having the same maturity and interest rate, and could be converted into domestic notes of their companion issues. They paid interest annually rather than semiannually.

Glossary

- Government account series (FD-2)--The statutes of certain trust funds require the Secretary of the Treasury to apply the monies held by these funds toward the issuance of nonmarketable special securities. These securities are sold directly by the Treasury to the specific Government agency, trust fund, or account. Their rate is usually based on an average of market yields on outstanding Treasury obligations, and they may be redeemed at the option of the holder. Roughly 80 percent of the Government account series securities are issued to five holders: the Federal old-age and survivors insurance trust fund (Social Security), the civil service retirement and disability fund, the Federal hospital insurance trust fund, the military retirement fund, and the unemployment trust fund.
- Matured non-interest-bearing debt (SBN-1, -2, -3)--This is the value of outstanding savings bonds and notes that have reached final maturity and no longer earn interest. Series A-D, F, G, J, and K bonds have reached final maturity. Series E bonds issued between May 1941 and November 1965 have a final maturity of 40 years from their issue dates; E bonds issued between December 1965 and June 1980 have a final maturity of 30 years. Series EE bonds issued since January 1980 mature 30 years from their issue dates. Series H bonds issued from June 1952 through December 1979 mature in 30 years. Series HH bonds issued since January 1980 mature in 20 years. Savings notes issued between May 1967 and October 1970 mature 30 years from their issue dates.
- Noncompetitive tenders ("Treasury Financing Operations")--A tender is an application by a prospective investor to buy Treasury securities. With a noncompetitive tender, the investor offers to purchase the securities at the price equivalent to the weighted average discount rate (for bills) or yield (for notes and bonds) of accepted competitive tenders in the auction. Noncompetitive tenders are always accepted in full.
- Quarterly financing ("Treasury Financing Operations")--The Treasury has historically offered packages of several "coupon" (note or bond) security issues on the four quarterly financing dates, which are the 15th of February, May, August, and November. If these dates fall on nonbusiness days, the securities are issued on the next business day. Since the late 1970s, the standard quarterly financing has consisted of a 3-year note, a 10-year note, and a 30-year bond, although the package may vary. Sometimes, the Treasury offers additional amounts of outstanding long-term notes or bonds, rather than selling new issues.
- Reopening (PDO-3, -4)--A reopening is when the Treasury offers for sale an additional amount of an outstanding issue, rather than an entirely new issue.

All 52-week and three-quarters of the 26-week bills are new issues (i.e., are the first issue of a CUSIP-number-identified security that will mature on a specific date). All 13-week bills, all cash management bills, and one-quarter of 26-week bills are reopenings of previously issued 26-week or 52-week bills, with the additional issues maturing on the same date as the original issue.

Some note and bond issues are also reopened. A reopened issue will always have the same maturity date, the same CUSIP number, and, if a note or bond, the same interest rate as the original issue.

State and local government series (FD-2)--The Treasury offers special nonmarketable certificates, notes, and bonds to State and local governments as a means to invest proceeds from their own tax-exempt financing.

The interest rates and maturities on these securities are set to ensure compliance with IRS arbitrage provisions. These securities, commonly nicknamed "SLUGs," are offered in both time deposit and demand deposit forms. Time deposit securities have maturities of up to 1 years for certificates, 1 to 10 years for notes, and over 10 years for bonds. Demand deposit securities are 1-day certificates rolled over with a rate adjustment daily.

Statutory debt limit (FD-6)--At any time, there is a limit, set by Act of Congress, on the amount of public debt that may be outstanding. This limit may be permanent or it may be temporary through a fixed date. When the limit is reached, the Treasury may not sell any new marketable or nonmarketable debt issues until the limit is increased or extended. A detailed listing of the changes in the limit since 1941 may be found in a table attached to the Budget of the United States Government.

Glossary

STRIPS (PDO-1, -3)—Under the Treasury's STRIPS (Separate Trading of Registered Interest and Principal of Securities) program, long-term notes and bonds may be divided into their principal and interest payment components. The STRIPS components may then be transferred and sold in amounts as small as \$1,000. When the strippable notes or bonds are auctioned, STRIPS are sold at a minimum par amount. This par amount varies for each issue and is an arithmetic function of the issue's interest (coupon) rate.

Information about the Superintendent of Documents Subscription Service

Current Subscribers

To know when to expect your renewal notice and keep a good thing coming to keep subscription prices down, the
Government Printing Office mails each subscriber only one renewal notice. You can learn when you will get your renewal
notice by checking the number that follows ISSDUE on the top line of your label as shown in this example:

	When this	digit is 0, a	a renewal notice
	/		will be sent.
. TRBU SMITH212J			
. JOHN SMITH	_	•	
. 212 MAIN ST		•	
. FORESTVILLE MD	20747	4	

When that number reads ISSDUE000, you have received your last issue unless you renew. You should receive your renewal notice around the same time that you receive the issue with ISSDUE000 on the top line.

To be sure that your service continues without interruption, please return your renewal notice promptly. If your subscription service is discontinued, simply send your mailing label from any issue to the Superintendent of Documents, Washington, DC 20402-9372 with the proper remittance, and your service will be reinstated.

To change your address . . . please SEND YOUR MAILING LABEL, along with your new address, to the Superintendent of Documents, Attn: Chief, Mail List Branch, Mail Stop: SSOM, Washington, DC 20402-9373.

To inquire about your subscription service . . . please SEND YOUR MAILING LABEL, along with your correspondence, to the Superintendent of Documents, Attn: Chief, Mail List Branch, Mail Stop: SSOM, Washington, DC 20402-9375.
