TREASURY DEPARTMENT

The *Treasury Bulletin* is issued quarterly in March, June, September, and December by the Financial Management Service. The Reports Management Division, Financial Information compiles articles of general interest as well as statistical data from sources within several Treasury departmental offices and bureaus. Readers can contact the Financial Reports Branch at (202) 208-1709 to inquire about any of the published information. Suggestions for article subjects, tables or graphs are welcome.

### Profile of the Economy

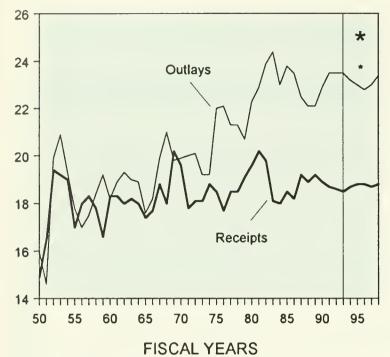

# CHARTS POE-A.--Growth of Real Gross Domestic Product

According to the "advance" estimate, worked up by the Department of Commerce from incomplete data for the fourth quarter, real Gross Domestic Product (GDP) grew at an annual rate of 3.8 percent. This was the fastest rate for any quarter in 4 years, but still left growth over the first seven quarters of the current recovery at a sluggish 2.2 percent. The major thrust for growth came from gains in private domestic final sales-at annual rates of 4.3 percent for consumer spending, 29.1 percent for homebuilding, and 9.7 percent for business capital investment. The major negative was a reduced rate of inventory building. Inflation measures were mixed for quarter. The fixed-weighted index for goods and services purchased in this country, including imports, was up at a 2.8 percent rate, while the fixedweighted index for GDP, covering items produced in the U.S., was up at a faster-than-expected 3.2 percent rate. Both increases were larger than those in the third quarter, but much less than increases in recent

Percent change, fourth quarter to fourth quarter

"Projections from "The Economic and Budget Outlook: Fiscal Years 1994-1998," prepared by the Congressional Budget Office

### CHART POE-B.--Federal Outlays and Receipts as a Percent of Gross Domestic Product

Congressional Budget Office estimates place fis-cal 1993 outlays at 23.5 percent of Gross Domestic Product (GDP), and the receipts share at 18.5 percent, yielding a deficit share of 5 percent. (The Clinton Administration budget was not available at time of publication.)

The outlay share remains relatively high and is less than a percentage point below the peak in the early 1980's when the economy was especially weak and defense spending was rising.

Despite cutbacks in discretionary programs, the outlay share is projected to be little changed by fiscal 1998 at 23.4 percent of GDP, as growth of mandatory programs and net interest continue to put pressure on the budget.

The receipts share is projected to rise some to

18.8 percent of GDP in that year.

The gap between receipts and outlays is estimated at 4.5 percent of GDP by fiscal 1998. With the economy expected to be operating at a high level of employment, most of that figure represents a structural deficit.

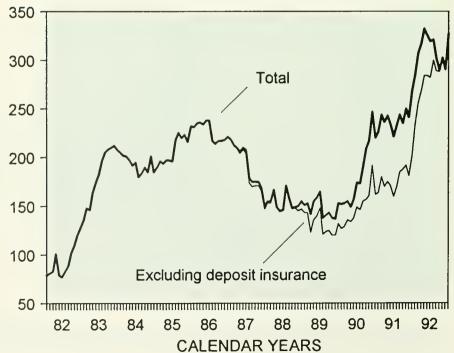

### **CHART POE-C.--Federal Deficit**

A Federal budget deficit of \$38.9 billion in December brought the total for the first 3 months of fiscal 1993 to \$120.5 billion, sharply wider than the \$83.8 billion in the first 3 months of fiscal 1992. Most of that widening was due to the unusual timing of out-

Adjusting for this and excluding deposit insurance and other special factors, the 3-month deficit was about \$10 billion wider than a year earlier.

Cumulated over the latest 12 months, the deficit totaled \$327 billion (about \$300 billion if adjusted for the unusual timing of spending). Deposit insurance outlays were small, on balance, over the latest 12 months and, excluding deposit insurance, the figure changed little.

(Sum over the latest 12 months in billions of dollars)

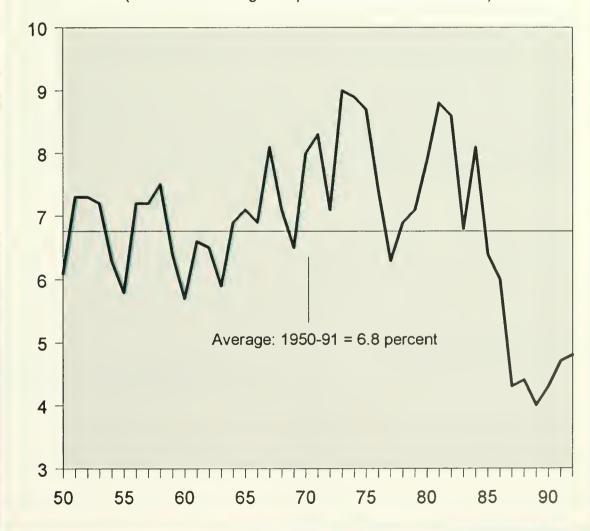

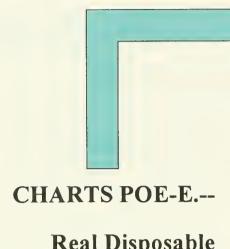

### CHART POE-D .-- Personal Saving

Personal saving as a share of after-tax income was 4.8 percent in 1992, little changed from 4.7 percent in 1991, but up from a 4 percent low in 1989. Recent readings are significantly below yearly highs of 9 percent or more, as well as the 6.8 percent long-term average. The saving rate averaged 5.1 percent in first half 1992, but fell back to 4.6 percent in the second half, as the 4 percent annual rate growth in real consumer spending was almost

double the growth of real after-tax income. In December, the saving rate rose to 4.7 percent from 4.2 percent in November. The improvement was largely the result of an artificially strong 0.9 percent gain in real disposable income for the month. Excluding a series of special factors, income would have increased by only 0.25 percent in December and the saving rate would have been closer to 4 percent.

(Household saving as a percent of after-tax income)

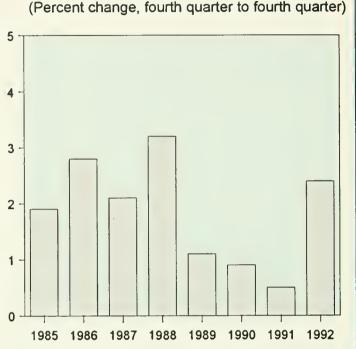

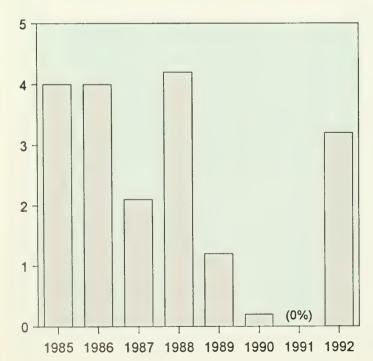

### Real Disposable Personal Income

Real disposable (after-tax) income of households rose by a sizable 0.9 percent in December, but most of that increase reflected special factors—particularly a shift of some income into December that normally would be taken in January. Excluding such factors, the rise was about 0.25 percent.

Excluding special factors, real spendable incomes grew at a moderate pace of about a 3 percent annual rate in the final quarter of 1992, after no change during the summer.

(Percent change, fourth quarter to fourth quarter)

### Real Consumer Spending

Real consumer spending was up 0.4 percent in December. For all of the fourth quarter, real spending rose by a 4.3 percent annual rate, on top of the 3.7 percent rise in the third quarter.

A decline in the personal saving rate to 4.5 percent in the fourth quarter from 5.3 percent in the spring quarter of 1992 was a result of stronger increases in spending than in income.

### CHARTS POE-F.--Merchandise Trade Deficit

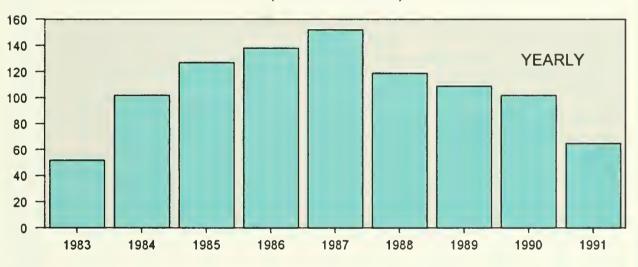

The merchandise trade deficit widened to \$7.6 billion in November, up from the revised \$7.2 billion now posted for October. The trade gap widened in 1992, reflecting an improving U.S. economy and weakness overseas. For the first 11 months of the year, the trade deficit was at an annual rate of \$82.5 billion, versus \$65.5 billion during all of 1991. Both exports and imports were down in November. Exports dropped by 2.8

percent following sizable gains in the prior 2 months. Imports fell by 1.6 percent, including a decline of 6.6 percent in the oil import bill due to lower demand as well

as lower prices.
In real (1987 dollar) terms, the trade deficit for October and November averaged \$79 billion at an annual rate, off significantly from the \$91 billion of the third quarter of 1992.

(In billions of dollars)

Jan. Feb. Mar. Apr. May June July Aug. Sept. Oct. Nov.

### **CHARTS POE-G.--Leading Indicators**

The December index of leading indicators jumped by 1.9 percent, the largest monthly gain since April 1983. Early reports for January suggest another rise of that magnitude is not likely. The index had increased by a revised 0.7 percent in November and 0.5 percent in October. The largest contribution to the increase came from higher consumer expectations and lower initial unemployment claims, both of which reversed in January. Seven other components of the leading index were positive, including new orders for consumer and capital goods. Two compo-nents were slightly negative. The index of coincident indicators rose by 0.6 percent in December after no change in November and a similar 0.6 percent increase in October. The lagging index dipped by 0.1 percent after a 0.9 percent jump in November.

\* Shaded areas represent periods of recession

#### **CHART POE-H.--Consumer Prices**

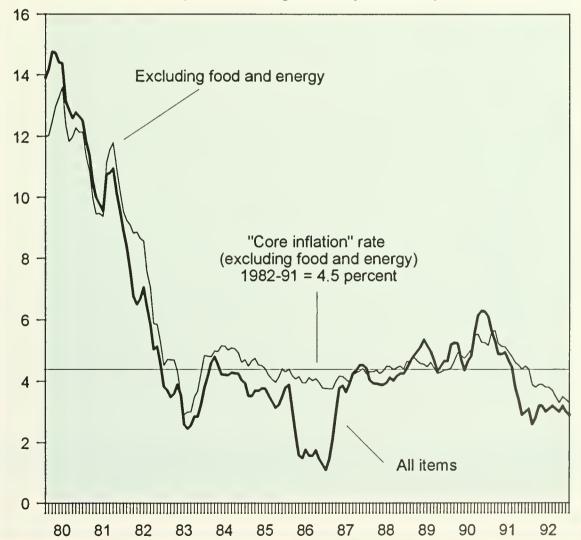

Consumer prices rose by 0.1 percent in December in a generally favorable price report for the month. During the 12 months of 1992, the Consumer Price Index (CPI) rose by 2.9 percent, off from 3.1 percent in 1991 and well below the increases in each of the prior 4 years, which were in excess of 4 percent.

In December, a slight rise in food prices was offset by a 0.6 percent dip in energy prices. The nonfood, nonenergy index, used to meas-

ure "core inflation," rose by 0.1 percent. During 1992 the index increased by 3.3 percent, the smallest gain for any year since 1972, when wage and price controls were in effect.

Deceleration of growth of the nonfood, nonenergy index was broadly based in 1992. Some notable contributions to the slowdown included apparel, autos, medical care, and the costs of renting or owning a home.

(Percent change from a year earlier)

### CHART POE-I.--Civilian Unemployment Rates

The unemployment rate for January dipped 0.2 points to 7.1 percent, down 0.6 points from a high of 7.7 percent last June. The decline in the jobless rate was due to a 0.5 million drop in the labor force, or the number of job seekers plus those holding jobs. The results of the household survey, which tends to be volatile, indicate employment was also down in January. However, the

more reliable establishment survey registered a moderate increase. The number of persons counted as unemployed was 9 million for the month, down 775,000 from June. By race, the jobless rate was 6.2 percent for whites, 14.2 percent for blacks, including 39 percent for black teenagers, and 11.6 percent for Hispanics.

(Percent)

#### **INTRODUCTION: Federal Fiscal Operations**

Budget authority usually takes the form of appropriations that allow obligations to be incurred and payments to be made. Reappropriations are Congressional actions that extend the availability of unobligated amounts that have expired or would otherwise expire. These are counted as new budget authority in the fiscal year of the legislation in which the reappropriation act is included, regardless of when the amounts were originally appropriated or when they would otherwise lapse.

Obligations generally are liquidated by the issuance of checks or the disbursement of cash--outlays. Obligations may also be liquidated (and outlays recorded) by the accrual of interest on public issues of Treasury debt securities (including an Increase in redemption value of bonds outstanding); or by the issuance of bonds, debentures, notes, monetary credits, or electronic payments.

Refunds of collections generally are treated as reductions of collections, whereas payments for eamed-income tax credits in excess of tax liabilities are treated as outlays. Outlays during a fiscal year may be for payment of obligations incurred in prior years or in the same year. Outlays, therefore, flow in part from unexpended balances of prior year budget authority and from budget authority provided for the year in which the money is spent. Total outlays include both budget and off-budget outlays and are stated net of offsetting collections.

Receipts are reported in the tables as either budget receipts or offsetting collections. They are collections from the public, excluding receipts offset against outlays. These, also called governmental receipts, consist mainly of tax receipts (including social insurance taxes), receipts from court fines, certain licenses, and deposits of earnings by the Federal Reserve system. Refunds of receipts are treated as deductions from gross receipts.

Offsetting collections from other Government accounts or the public are of a business-type or market-oriented nature. They are classified as either collections credited to appropriations or fund accounts, or offsetting receipts (i.e., amounts deposited in receipt accounts). The former normally can be used without appropriation act by Congress. These occur in two instances: (1) when authorized by law, amounts collected for materials or services are treated as reimbursements to appropriations, and (2) in the three types of revolving funds (public enterprise, intragovernmental, and trust); collections are netted against spending, and outlays are reported as the net amount.

Offsetting receipts in receipt accounts cannot be used without appropriation. They are subdivided into two categories: (1) proprietary receipts, or collections from the public, offset against outlays by agency and by function, and (2) intra-governmental funds, or payments into receipt accounts from governmental appropriation or fund accounts. They finance operations within and between Government agencies and are credited with collections from other Government accounts.

Intrabudgetary transactions are subdivided into three categories: (1) interfund transactions--payments are from one lund group (either Federal funds or trust funds) to a receipt account in the other fund group; (2) Federal intrafund transactions--payments and receipts both occur within the Federal fund group; and (3) trust intrafund transactions--payments and receipts both occur within the trust fund group.

Offsetting receipts are generally deducted from budget authority and outlays by function, subfunction, or agency. There are four types of receipts, however, that are deducted from budget totals as undistributed offsetting receipts. They are: (1) agencies' payments (including payments by off-budget Federal entities) as employers into employees'

retirement funds; (2) interest received by trust funds; (3) rents and royalties on the Outer Continental Shelf lands; and (4) other interest (i.e., that collected on Outer Continental Shelf money in deposit funds when such money is transferred into the budget).

The Government has used the unified budget concept as a foundation for its budgetary analysis and presentation since 1969. The concept calls for the budget to include all of the Government's fiscal transactions with the public. Since 1971, however, various laws have been enacted removing several Federal entities from (or creating them outside of) the budget. Other laws have moved certain off-budget Federal entities onto the budget. Under current law, the off-budget Federal entities consist of the two Social Security trust funds, Federal old-age and survivors insurance, and Federal disability insurance.

Although an off-budget Federal entity's receipts, outlays, and surplus or deficit ordinarily are not subject to targets set by the congressional resolution, the Balanced Budget and Emergency Deficit Control Act of 1985 (commonly known as the Gramm-Rudman-Hollings Act) included off-budget surplus or deficit in calculating deficit targets under that act and in calculating excess deficit. Partly for this reason, attention has focused on both on- and off-budget receipts, outlays, and deficit of the Government.

Tables FFO-1, FFO-2, and FFO-3 are published quarterly and cover 5 years of data, estimates for 2 years, detail for 13 months, and fiscal year-to-date data. They provide a summary of data relating to Federal fiscal operations reported by Federal entities and disbursing officers, and daily reports from the Federal Reserve banks. They also detail accounting transactions affecting receipts and outlays of the Government and off-budget Federal entities and their related effect on assets and liabilities of the Government. Data are derived from the Monthly Treasury Statement of Receipts and Outlays of the United States Government.

- Table FFO-1 summarizes the amount of total receipts, outlays, and surplus or deficit, as well as transactions in Federal securities, monetary assets, and balances in Treasury operating cash.
- Table FFO-2 includes on- and off-budget receipts by source.
   Amounts represent income taxes, social insurance taxes, net contributions for other insurance and retirement, excise taxes, estate and gift taxes, customs duties, and net miscellaneous receipts.
  - Table FFO-3 details on- and off-budget outlays by agency.
- Table FFO-4 (Fall issue) summarizes internal revenue collections by States and other areas and by type of tax. Amounts reported are collections made in a fiscal year. They span several tax liability years because they consist of prepayments (i.e., estimated tax payments and taxes withheld by employers for individual income and Social Security taxes), of payments made with tax returns, and of subsequent payments made after tax returns are due or are filed (i.e., payments with delinquent returns or on delinquent accounts).

It is important to note that these data do not necessarily reflect the Federal tax burden of individual States. Amounts are reported based on the primary filing address provided by each taxpayer or reporting entity. For multistate corporations, the address may reflect only the State where such a corporation reported its taxes from a principal office rather than other States where income was earned or where individual income and Social Security taxes were withheld. In addition, an individual may reside in one State and work in another.

#### **Budget Results for the First Quarter, Fiscal 1993**

#### SUMMARY

The Federal budget deficit totaled \$120.5 billion in the first quarter of fiscal 1993. This was \$36.7 billion wider than the \$83.8 billion in the corresponding quarter of fiscal 1992. About \$25 billion of that widening reflected the unusual timing of payments this fiscal year. Because of the long New Year's holiday weekend this year, January Social Security checks went out in December, ballooning the outlay total for that month and for the entire first fiscal quarter. Outlays in January and in the second fiscal quarter will be correspondingly smaller.

Two other special factors affected the deficit and outlay totals in the first fiscal quarter compared with a year earlier, but these had largely offsetting impacts. Deposit insurance outlays were negative by \$7.75 billion in the quarter, as asset sales (negative outlays) by the Resolution Trust Corporation and other deposit insurance agencies exceeded gross spending. This compares with negative outlays of about \$4.75 billion in the same quarter a year earlier. Foreign contributions to the Defense Cooperation Account (in support of the Desert Storm operation) had been \$3.6 billion in the first quarter of fiscal 1992. These are treated as negative outlays in budget accounting and helped hold down the deficit in that quarter. Such contributions were negligible in the first quarter of this fiscal year.

Excluding these special factors, and including the unusual timing of payments, the deficit was wider in the first quarter of this fiscal year by \$11 billion than a year earlier.

Total outlays increased from a year earlier by 6.1 percent in the first fiscal quarter, after adjustment for the special factors noted above. That is a little faster than the increases projected for the entire fiscal year by either the Congressional Budget Office or the Bush Administration. (Projections of the new Administration were not available at this writing.)

Among functional categories of outlays, defense spending increased from a year earlier by 0.6 percent (excluding the Defense Cooperation Account). Defense outlays are projected to decline by about 4.5 percent for the entire fiscal year, and the increase for the first quarter appears, at least, partly to reflect some special outlays connected with operations in Somalia and in the Middle East. Net interest outlays decreased by 1.1 percent, as a decline in interest rates more than offset an 11.25 percent increase in the publicly held debt outstanding.

Among spending categories registering sizable increases in the quarter, outlays for income support were up

# Total On- and Off-Budget Results and Financing of the U.S. Government

[In millions of dollar	5]	
	OctDec.	Actual fisca year to date
Total receipts	265,225	265,225
On-budget receipts	195,939	195,936
Off-budget receipts	69,286	69,286
Total outlays	385,688	385,688
On-budget outlays	303,868	303,868
Off-budget outlays	81,821	81,821
Total surplus or deficit (-)	-120,463	-120,463
On-budget surplus or deficit (-)	-107,929	-107,929
Off-budget surplus or deficit (-)	-12,535	-12,535
Means of financing:		
Borrowing from the public	81,494	81,494
Reduction of operating cash	28,899	28,896
Other means	10,071	10,071
Total on- and off-budget financing	120,463	120,463

from a year earlier by 12.6 percent, including a rise of 36.4 percent in unemployment insurance benefits. Much of the latter rise reflects availability of extended benefits. Agriculture-function spending rose by 22.5 percent, reflecting favorable crops and soft crop prices. Outlays for Medicare and other health care rose by a moderate 7.7 percent. However, these are projected to increase substantially faster than that for the entire fiscal year, though not by as much as the 18.5 percent increase for all of fiscal 1992.

Total revenues rose by 4 percent in the first fiscal guarter from a year earlier. This is a little less than projected for the entire fiscal year by either the Congressional Budget Office or the Bush Administration, but that apparent shortfall could easily be made up later in the fiscal year. The increase for the quarter was led by a rise of 11.9 percent in net corporate income tax payments. One notable feature of the results for the quarter was a strong flow of withheld individual income and employment taxes in the final few days of December. This was apparently in response to bonus income and stock options that were taken in calendar 1992 in anticipation of possible increases in marginal income tax rates. That added revenue flow remained strong in January, including a large increase in estimated individual income tax payments, and should help boost the revenue total for the current fiscal year.

#### Fourth-Quarter Receipts

The following capsule analysis of budget receipts, by source, for the fourth quarter of fiscal 1992 supplements fiscal data reported in the December issue of the "Treasury Bulletin." At the time of that issue's release, not enough data was available to analyze adequately collections for the quarter.

Individual income taxes—Individual income tax receipts were \$125.3 billion for the fourth quarter of fiscal 1992. This represents an increase of \$4.4 billion over the comparable quarter for fiscal 1991. Withheld receipts decreased by \$1.1 billion for this period, although the quarterly reconciliation between the general fund and the Social Security and Medicare trust funds increased by \$0.2 billion. Non-withheld receipts increased by \$5.1 billion over the comparable quarter of fiscal 1991, of which \$0.2 billion is an increase in the quarterly reconciliation between the general fund and the Social Security and Medicare trust funds. Refunds decreased by \$0.4 billion over the comparable quarter.

Corporate income taxes—Corporate receipts for the fourth quarter of fiscal 1992 totaled \$24.3 billion. This was \$2.6 billion higher than receipts for the comparable quarter of fiscal 1991. The \$2.6 billion figure is composed of \$2.3 billion in additional estimated and final payments plus \$0.4 billion in lower refunds. The increase in net receipts reflects both increased corporate profits and new estimated payment rules that became effective in June.

Employment taxes and contributions—Employment taxes and contributions receipts for the July-September 1992 quarter were \$91.1 billion, an increase of \$1.6 billion over the comparable prior-year quarter. Receipts to the old-age survivors insurance, the disability insurance, and the hospital insurance trust funds increased by \$1.7 billion, \$0.2 billion, and \$0.5 billion, respectively. Refunds were \$0.8 billion higher than the prior-year quarter. The overall increase in employment taxes and contributions receipts from the prior year offsets a \$0.5 billion decrease in accounting adjustments for previous years.

Contributions for other insurance and retirement—Contributions for other retirement were \$1.2 billion for the fourth quarter of fiscal 1992. There was a negligible change in receipts from the fourth quarter of fiscal 1991. The growth in contributions will remain flat over the next few years as the number of employees covered by the Federal employees' retirement system (FERS) grows slowly relative to those covered under the civil service retirement system (CSRS).

Unemployment insurance—Unemployment insurance receipts for the fourth quarter of fiscal 1992 were \$5.8 billion compared with \$5.2 billion for the comparable quarter of fiscal 1991. The increase primarily reflects an increase of \$0.7 billion in State taxes deposited in the U.S. Treasury. Combined Federal Unemployment Tax Act Receipts (FUTA). Railroad unemployment tax receipts fell \$0.1 billion.

Excise taxes--Excise tax receipts for the July-September 1992 quarter were \$11.7 billion compared to \$12.9 billion for the comparable quarter of fiscal 1991, a decrease of \$1.2 billion over the prior-year level. Refunds increased by \$0.4 billion. The remainder of the decrease in receipts is due to an unusually high level of excise tax receipts in the July-September 1991 quarter. This high level may have been the result of changes in excise tax deposit rules that, when combined with the excise tax increases enacted as part of the Omnibus Budget Reconciliation Act of 1990, resulted in shifting excise tax receipts between quarters.

Estate and gift taxes—Estate and gift tax receipts were \$2.8 billion for the July-September quarter of fiscal 1992. This represents a decrease of \$0.1 billion over the comparable prior-year quarter. Total receipts for fiscal 1992 were \$11.1 billion with a negligible increase over fiscal 1991 receipts.

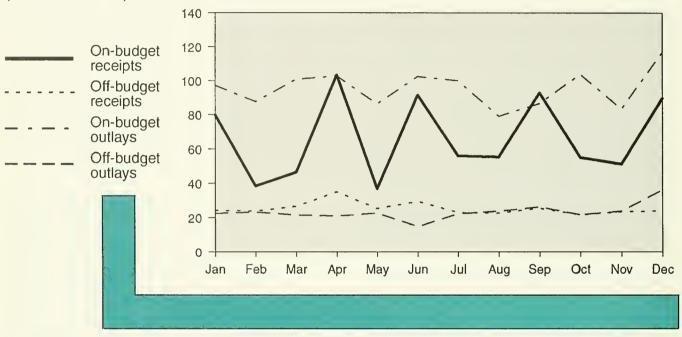

Customs duties—Customs receipts net of refunds were \$4.8 billion for the fourth quarter of fiscal 1992. This is an increase of \$0.5 billion from the comparable prior-year quarter. It is due to an increase in imports.

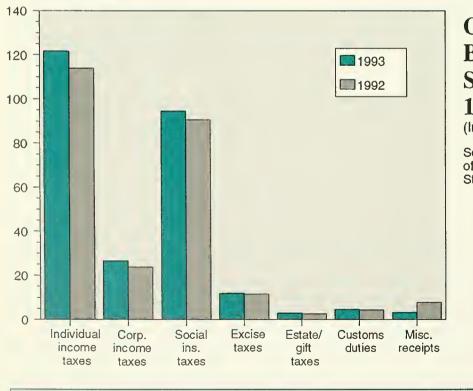

Miscellaneous receipts—Net miscellaneous receipts for the fourth quarter of fiscal 1992 were \$8.5 billion, an increase of \$3.1 billion over the comparable prior-year quarter.

State receipts do not indicate the Federal tax burden of each since, in many instances, taxes are collected in one State from residents of another State. For example, withholding taxes reported by employers located near State lines may include substantial amounts withheld from salanes of employees who reside in neighboring States. Also, the taxes of some corporations are paid from a principal office, although their operations may be located in another State, or throughout several States.

<sup>&</sup>lt;sup>2</sup> Collections of individual income tax (withheld and not withheld) include old-age, survivor's, disability, and hospital insurance taxes on salanes and wages Federal Insurance Contributions Act (FICA) and self-employment income (SECA).

<sup>&</sup>lt;sup>3</sup> Individual income tax rates for tax year 1990 were 15, 28, and 33 percent of taxable income. Includes SECA taxes imposed on taxable selt-employment income.

<sup>&</sup>lt;sup>4</sup> Includes fiduciary income fax collections of \$6.1 billion.

<sup>5</sup> Income tax rates for 1990 were 15, 28, and 33 percent.

<sup>&</sup>lt;sup>8</sup> A tax rate of 6.2 percent was imposed on employers with one or more covered employee in each of 20 days in a year, each day being in a different week, or with a quarterly payroll for covered employment of at least \$1,500 in the current or preceding calendar year. This was applied to the first \$7,000 of taxable wages paid to each covered employee. The tax is reduced by credits of up to 5.4 percent for unemployment contributions paid to States.

<sup>&</sup>lt;sup>7</sup> Corporate tax rates generally ranged from 15 to 39 percent of taxable income.

Includes taxes of \$181.6 million on unrelated business income of exempt organizations (Forms 990T)

<sup>&</sup>lt;sup>9</sup> Estate and giff tax rates ranged from 18 to 55 percent.

To Represents IRS transfer of the Presidential Election Campaign check-off option on individual income tax returns processed during the fiscal year ended Sept. 30, 1991 of \$1 per single return and \$1 or \$2 per joint return from the Individual Income Withholding Receipt Account Number 20-0101 to account number 20-5081. A total of \$29.6 million was designated on 20.5 million returns.

returns.

<sup>11</sup> Amounts not classified by State or district as of the end of the tiscal year. This includes tax payments made to banks under the Federal Tax Deposit System. These payments are included in collections but are not classified by district until applied to taxpayer accounts. Also included are credits allowable on income tax returns for certein gasoline, diesel, and special motor fuel tax payments and for excess payments under FICA.

Note.—Detail may not add to to(als due to rounding. Amounts reflect edjustments made to data reported in prior years. Negative figures are displayed when prior year adjustments exceed current year receipts.

#### **INTRODUCTION: Federal Obligations**

The Federal Government controls the use of funds through obligations. Obligations are recorded when the Government makes a commitment to acquire goods or services. Obligations are the first of four key events that characterize the acquisition and use of resources: order, payment, delivery, and consumption. In general, they consist of orders placed, contracts awarded, services received, and similar transactions requiring the disbursement of money.

The obligational stage of a Government transaction is a strategic point in gauging the impact of the Government's operations on the national economy because it frequently represents a Government commitment that stimulates business investments, such as inventory purchases and employment. Though payment may not occur for

months after the Government places its order, the order itself can cause immediate pressure on the private economy.

An obligation is classified by the nature of the transaction, without regard to its ultimate purpose. For example, all salaries and wages are reported as personnel compensation, whether the services are used in current operations or in the construction of capital items.

Federal agencies often do business with one another. In doing so, the "buying" agency records obligations and the "performing" agency records reimbursements. In table FO-1, these transactions are presented. Conversely, table FO-2 shows only those transactions incurred outside the Federal Government.

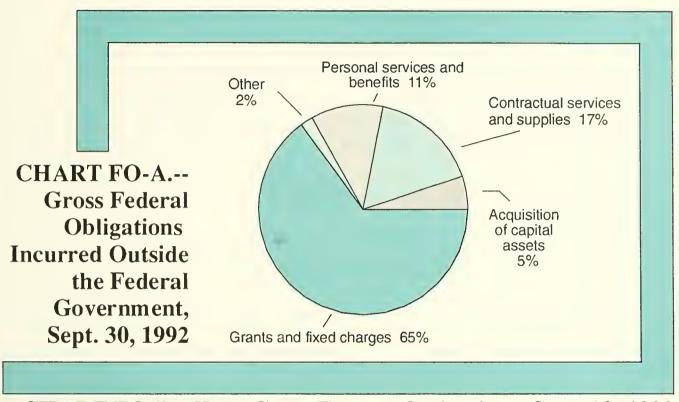

TABLE FO-1.--Gross Obligations Incurred Within and Outside the Federal Government by Object Class, Sept. 30, 1992

#### Statement of Liabilities and Other Financial Commitments

The Statement of Liabilities and Other Financial Commitments of the United States Government is compiled in accordance with 31 U.S.C. 331 (b). The report discloses the liabilities as of September 30, 1991 and 1992. Commitments and contingencies are disclosed as of September 30, 1990 and 1991.

#### TABLE SLOFC-1.--Summary of Liabilities of the United States Government

[In millions of dollars Source Financial Management Service]								
Section	1991	1992						
Liabilities:								
The public debt	3,665,303	4,064,621						
Agency securities outstanding	17,751	18,250						
Total public debt and agency securities	3,683,054	4,082,871						
Deposit fund accounts	20,614	20,951						
Checks and other instruments outstanding	2,814	1,110						
Accrued interest on the public debt	42,026	44,212						
Deferred interest (premium) on public debt subscriptions	823	1,032						
Accounts payable and accruals of Government agencies	1 446,588	1 289,937						
Total liabilities	4,195,919	4,440,113						

<sup>&</sup>lt;sup>1</sup> Figure includes public and Federal accounts payable and accruals of Government agencies

### CHART SLOFC-A.--Commitments and Contingencies

This report contains totals for commitments of the Government that represent the value of goods and services ordered and obligated but not yet received. It also includes other commitments against appropriations, all pursuant to section 1311 of the Supplemental Appropriation Act of 1955 (31 U.S.C. 200). Contingencies represent conditional commitments that may become liabilities due to events beyond the control of the Govemment. The amounts are agency projections stated in terms of maximum theoretical risk exposure. The data for commitments come from agency financial statements while contingency data are from unaudited agency reports, which have not been compared with any other Treasury reports.

Note.—Financial Management Service (FMS) expects to compile 1992 contingencies data by May 31, 1993. A copy of the detailed schedules can be obtained from the Financial Reports Branch (202) 208-1709. Amounts presented in this report were compiled from public debt budget report information and reports submitted by the agencies in accordance with vol. I, part 2, chapter 4100 of the "Treasury Financial Manual" (Trensmittal Letter No. 512). The information turnished by some reporting agencies was based on estimates.

Sources: The "Final Monthly Treasury Statement of Receipts and Outlays of the United States Government," Treasury internal documents, FMS, and the Annual Report Appendix.

## INTRODUCTION: Source and Availability of the Balance in the Account of the U.S. Treasury

The Treasury's operating cash is maintained in accounts with the Federal Reserve banks (FRBs) and branches, as well as in tax and loan accounts in other financial institutions. Major information sources include the Daily Balance Wire received from the FRBs and branches, and electronic transfers through the Letter of Credit Payment, Fedline Payment, and Fedwire Deposit Systems. As the FRB accounts are depleted, funds are called in (withdrawn) from thousands of tax and loan accounts at financial institutions throughout the country.

Under authority of Public Law 95-147, Treasury implemented a program on November 2, 1978, to invest a portion of its operating cash in obligations of depositaries maintaining tax and loan accounts. Under the Treasury tax and loan investment program, depositary financial institutions select the manner in which they will participate. Financial institutions wishing to retain funds deposited into their tax and loan accounts in interest-bearing obligations participate under the Note

Option. The program permits Treasury to collect funds through financial institutions and to leave the funds in Note Option depositaries and in the financial communities in which they arise until Treasury needs the funds for its operations. In this way, Treasury is able to neutralize the effect of its fluctuating operations on Note Option financial institution reserves and on the economy. Likewise, those institutions wishing to remit the funds to the Treasury's account at FRBs do so under the Remittance Option.

Deposits to tax and loan accounts occur as customers of financial institutions deposit tax payments, which the financial institutions use to purchase Government securities. In most cases, this involves a transfer of funds from a customer's account to the tax and loan account in the same financial institution. Also, Treasury can direct the FRBs to invest excess funds in tax and loan accounts directly from the Treasury account at the FRBs.

Tepresents transfers from tax and loan note accounts, proceeds from sales of securities other than Government account series, and taxes.

other than Government account series, and taxes.

Represents checks paid, wire trensfer payments, drawdowns on letters of credit, redemptions of securities other than Government account series, and investment (transfer) of excess funds out of this account to the tax and loan note accounts.

Special depositaries are permitted to make payment in the form of deposit credit for the purchase price of U.S. Government securities purchased by them for their own account, or for the account of their customers who enter subscriptions through them, when this method of payment is permitted under the terms of the circulars inviting subscriptions to the issues Effective Oct. 1, 1989, public debt securities, including U.S. savings bonds, will no longer be

settled through the tax and loan note eccounts.

Includes U.S. savings bonds, savings notes, retirement plan, and tax and loss bonds. U.S. savings notes first offered for sale as of May 1, 1967, and sdiscontinued after June 30, 1970. Retirement plan bonds first offered for sale as of Jan. 1, 1963, tax and loss bonds first issued in March 1968.

Taxes elicible for codd consist of the same sale of the sale of the

In Match 1998.

5 Taxes eligible for credit consist of those deposited by taxpayers in the tax and loan depositeries es follows: Withheld income taxes beginning March 1948; taxes on employees under the Federal Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; a number of excise taxes beginning July 1953; estimated corporation income taxes beginning April 1967; all corporation income taxes beginning April 1967, all corporation income taxes due on or after Mar 15, 1968, FUTA taxes beginning April 1970, and individual estimated income taxes beginning October 1988.

### **INTRODUCTION: Federal Debt**

Treasury securities (i.e., public debt securities) comprise most of the Federal debt, with securities issued by other Federal agencies accounting for the rest. Tables in this section of the *Treasury Bulletin* reflect the total. Further detailed information is published in the Monthly Statement of the Public Debt of the United States. Likewise, information on agency securities and on investments of Federal Government accounts in Federal securities is published in the Monthly Treasury Statement of Receipts and Outlays of the United States Government.

- Table FD-1 summarizes the Federal debt by listing public debt and agency securities held by the public, including the Federal Reserve. It also includes debt held by Federal agencies, largely by the Social Security and other Federal retirement trust funds. (For greater detail on holdings of Federal securities by particular classes of investors, see the ownership tables, OFS-1 and OFS-2.)
- Table FD-2 categorizes by type interest-bearing marketable and nonmarketable Treasury securities. The difference between interestbearing and total public debt securities reflects outstanding matured Treasury securities--that is, unredeemed securities that have matured and are no longer accruing interest. Because the Federal Financing Bank is under the supervision of Treasury, its securities are held by a U.S. Government account.
- In table FD-3, nonmarketable Treasury securities held by U.S. Government accounts are summarized by issues to particular funds within Government. Many of the funds invest in par value special series nonmarketables at interest rates determined by law. Others invest in market-based special Treasury securities whose terms mirror those of marketable securities.
- Table FD-4 presents interest-bearing securities issued by Government agencies. Federal agency borrowing has declined in recent years, in part because the Federal Financing Bank has provided financing to other Federal agencies. Meanwhile, Government-sponsored entities whose securities are presented are not Federal agencies, and their securities are not guaranteed by the Federal

Government. (Federal agency borrowing from Treasury is presented in the Monthly Treasury Statement of Receipts and Outlays of the United States Government.)

- Table FD-5 illustrates the average length of marketable interest-bearing public debt held by private investors and the maturity distribution of that debt. Average maturity has increased gradually since it hit a low of 2 years, 5 months, in December 1975. In March 1971, Congress enacted a limited exception to the 4-1/4-percent interest rate ceiling on Treasury bonds. This permitted Treasury to offer securities maturing in more than 7 years at current market rates of interest for the first time since 1965. This exception has expanded since 1971 authorizing Treasury to continue to issue long-term securities, and the ceiling on Treasury bonds was repealed on November 10, 1988. The volume of privately held Treasury marketable securities by maturity class reflects the remaining period to maturity of Treasury bills, notes, and bonds. The average length is comprised of an average of remaining periods to maturity, weighted by the amount of each security held by private investors. In other words, computations of average length exclude Government accounts and the Federal Reserve banks.
- In table FD-6, the debt ceiling is compared with the outstanding debt subject to limitation by law. The other debt category includes Federal debt Congress has designated as being subject to the debt ceiling. Changes in the non-interest-bearing debt shown in the last column reflect maturities of Treasury securities on nonbusiness days, which can be redeemed on the next business day.
- Table FD-7 details Treasury holdings of securities issued by Government corporations and other agencies. Certain Federal agencies are authorized to borrow money from the Treasury, largely to finance direct loan programs. In addition, agencies such as the Bonneville Power Administration are authorized to borrow from the Treasury to finance capital projects. Treasury, in turn, finances these loans by selling Treasury securities to the public.

## CHARTS FD-A.--Average Length of Marketable Debt\*

Privately Held

# CHART FD-B.--Private Holdings of Treasury Marketable Debt, by Maturity\*

(In billions of dollars)

As of December 31

\* Source: Department of the Treasury, Office of Market Finance

## **INTRODUCTION: Public Debt Operations**

The Second Liberty Bond Act (31 U.S.C. 3101, et seq.) allows the Secretary of the Treasury to borrow money by Issuing Treasury securities. The Secretary determines the terms and conditions of issue, conversion, maturity, payment, and interest rate. New issues of Treasury notes mature in 2 to 10 years. Bonds mature in more than 10 years from the issue date. Each marketable security is listed in the Monthly Statement of the Public Debt of the United States. The information in this section of the "Treasury Bulletin" pertains only to marketable Treasury securities, current bills, notes, and bonds.

- Table PDO-1 provides a maturity schedule of interest-bearing marketable public debt securities other than regular weekly and 52week bills. All unmatured Treasury notes and bonds are listed in maturity order, from earliest to latest. A separate breakout is provided for the combined holdings of the Government accounts and Federal Reserve banks, so that the "all other investors" category includes all private holdings.
- Table PDO-2 presents the results of weekly auctions of 13- and 26-week bills, as well as auctions of 52-week bills, which are held every fourth week. Treasury bills mature each Thursday. New issues of 13-week bills are reopenings of 26-week bills. The 26-week bill issued every fourth week to mature on the same Thursday as an existing

52-weak bill is a reopening of the existing 52-week bill. New issues of cash management bills are also presented. High, low, and average yields on accepted tenders and the dollar value of total bids are presented, with the dollar value of awards made on both competitive and noncompetitive basis.

Treasury accepts noncompetitive tenders of up to \$1 million for bills and \$5 million for notes and bonds in each auction of securities to encourage participation of individuals and smaller institutions.

- Table PDO-3 lists the results of auctions of marketable securities, other than weekly bills, in chronological order over the past 2 years.
   Included are: notes and bonds from table PDO-1; 52-week bills from table PDO-2; and data for cash management bills. The maturities of cash management bills coincide with those of regular issues of Treasury bills.
- Table PDO-4 indicates the total amount of marketable securities allotted to each class of investor. The Federal Reserve banks tally into investor classes the tenders in each auction of marketable securities other than weekly auctions of 13- and 26-week bills.

### TREASURY FINANCING: OCTOBER-DECEMBER

#### **OCTOBER**

#### Auction of 7-Year Notes

September 30 Treasury announced it would auction \$9,750 million of 7-year notes to refund \$6,190 million of notes maturing October 15, 1992, and to raise about \$3,550 million of new cash. The notes offered were Treasury notes of Series H-1999, dated October 15, 1992, due October 15, 1999, with interest payable on April 15 and October 15 until maturity. An interest rate of 6 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received prior to 12 noon, e.d.s.t., for noncompetitive tenders and prior to 1 p.m., e.d.s.t., for competitive tenders on October 7, 1992, and totaled \$19,584 million, of which \$9,754 million was accepted at yields ranging from 5.99 percent, price 100.056, up to 6.05 percent, price 99.718. Tenders at the high yield were allotted 20 percent. Noncompetitive tenders were accepted in full at the average yield, 6.01 percent, price 99.944. These totaled \$324 million. Competitive tenders accepted from private investors totaled \$9,430 million.

In addition to the \$9,754 million of tenders accepted in the auction process, \$473 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$97 million was accepted from Federal Reserve banks for their own account.

#### Auction of 2-Year and 5-Year Notes

October 21 Treasury announced it would auction \$15,000 million of 2-year notes of Series AF-1994 and \$10,750 million of 5-year notes of Series S-1997 to refund \$12,730 million of securities maturing October 31 and to raise about \$13,025 million of new cash.

The notes of Series AF-1994 were dated November 2, 1992, due October 31, 1994, with interest payable on April 30 and October 31 until maturity. An interest rate of 4-1/4 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received prior to 12 noon, e.s.t., for noncompetitive tenders and prior to 1 p.m., e.s.t, for competitive tenders on October 27, and totaled \$49,870 million, of which \$15,087 million was accepted. All competitive tenders at yields lower than 4.37 percent were accepted in full. Tenders at 4.37 percent were allotted 12 percent. All noncompetitive and successful competitive bidders were allotted securities at

the high yield of 4.37 percent with an equivalent price of 99.773. The median yield was 4.35 percent; that is, 50 percent of the amount of accepted competitive bids were tendered at or below that yield. The low yield was 4.30 percent; that is, 5 percent of the amount of accepted competitive bids were tendered at or below that yield. Noncompetitive tenders totaled \$870 million. Competitive tenders accepted from private investors totaled \$14,217 million.

In addition to the \$15,087 million of tenders accepted in the auction process, \$523 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$634 million was accepted from Federal Reserve banks for their own account.

The notes of Series S-1997 were dated November 2, 1992, due October 31, 1997, with interest payable on April 30 and October 31 until maturity. An interest rate of 5-3/4 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received prior to 12 noon, e.s.t., for noncompetitive tenders and prior to 1 p.m., e.s.t., for competitive tenders on October 28, and totaled \$27,200 million, of which \$10,753 million was accepted. All competitive tenders at yields lower than 5.84 percent were accepted in full. Tenders at 5.84 percent were allotted 87 percent. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 5.84 percent with an equivalent price of 99.615. The median yield was 5.79 percent; that is, 50 percent of the amount of accepted competitive bids were tendered at or below that yield. The low yield was 5.73 percent; that is, 5 percent of the amount of accepted competitive bids were tendered at or below that yield. Noncompetitive tenders totaled \$508 million. Competitive tenders accepted from private investors totaled \$10,245 million.

In addition to the \$10,753 million of tenders accepted in the auction process, \$348 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$250 million was accepted from Federal Reserve banks for their own account.

#### 52-Week Bills

October 9 tenders were invited for approximately \$14,250 million of 364-day Treasury bills to be dated October 22, 1992, and to mature October 21, 1993. The issue was to refund \$13,075 million of maturing 52-week bills and to raise about \$1,175 million of new cash. The bills were auctioned on October 15. They totaled \$36,191 million, of which \$14,274 million was accepted, including \$356 million of noncompetitive tenders from the public and \$3,765 million of the bills issued to Federal Reserve banks for themselves and as agents for

## TREASURY FINANCING: OCTOBER-DECEMBER, con.

foreign and international monetary authorities. The average bank discount rate was 3.12 percent.

#### November Quarterly Financing

November 3 Treasury announced it would auction \$15,500 million of 3-year notes of Series R-1995, \$11,250 million of 9-3/4-year 6-3/8 percent notes of Series B-2002, and \$10,250 million of 30-year bonds of November 2022 to refund \$23,096 million of Treasury securities maturing November 15 and to raise about \$13,900 million of new cash.

The notes of Series R-1995 were dated November 16, 1992, due November 15, 1995, with interest payable on May 15 and November 15 until maturity. An interest rate of 5-1/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received prior to 12 noon, e.s.t., for noncompetitive tenders and prior to 1 p.m., e.s.t., for competitive tenders on November 9, and totaled \$36,118 million, of which \$15,557 million was accepted at yields ranging from 5.16 percent, price 99.904, up to 5.18 percent, price 99.849. Tenders at the high yield were allotted 90 percent. Noncompetitive tenders were accepted in full at the average yield, 5.17 percent, price 99.877. These totaled \$530 million. Competitive tenders accepted from private investors totaled \$15.027 million.

In addition to the \$15,557 million of tenders accepted in the auction process, \$701 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$2,895 million was accepted from Federal Reserve banks for their own account.

The 6-3/8 percent notes of Series B-2002 were an additional issue of notes dated August 15, 1992, issued November 16, 1992, due August 15, 2002, with interest payable on February 15 and August 15 until maturity. Accrued interest of \$16.11073 per \$1,000, covering the period from August 15, 1992, to November 16, 1992, was payable with each accepted tender.

Tenders for the notes were received prior to 12 noon, e.s.t., for noncompetitive tenders and prior to 1 p.m., e.s.t., for competitive tenders on November 10, and totaled \$31,057 million, of which \$11,300 million was accepted at yields ranging from 6.92 percent, price 96.155, up to 6.94 percent, price 96.018. Tenders at the high yield were allotted 14 percent. Noncompetitive tenders were accepted in full at the

average yield, 6.93 percent, price 96.086. These totaled \$393 million. Competitive tenders accepted from private investors totaled \$10.907 million.

In addition to the \$11,300 million of tenders accepted in the auction process, \$800 million was accepted from Federal Reserve banks for their own account

The notes of Series B-2002 may be held in STRIPS form. The minimum par amount required is \$1,600,000.

The bonds of November 2022 were dated November 15, 1992, issued November 16, 1992, due November 15, 2022, with interest payable on May 15 and November 15 until maturity. An interest rate of 7-5/8 percent was set after the determination as to which tenders were accepted on a yield auction basis. Accrued interest of \$0.21064 per \$1,000, covering the period from November 15, 1992, to November 16, 1992, was payable with each accepted tender.

Tenders for the bonds were received prior to 12 noon, e.s.t., for noncompetitive tenders and prior to 1 p.m., e.s.t., for competitive tenders on November 12, and totaled \$25,615 million, of which \$10,298 million was accepted at yields ranging from 7.65 percent, price 99.707, up to 7.66 percent, price 99.590. Tenders at the high yield were allotted 66 percent. Noncompetitive tenders were accepted in full at the average yield, 7.66 percent, price 99.590. These totaled \$322 million. Competitive tenders accepted from private investors totaled \$9,976 million.

In addition to the \$10,298 million of tenders accepted in the auction process, \$400 million was accepted from Federal Reserve banks for their own account.

The bonds of November 2022 may be held in STRIPS form. The minimum par amount required is \$1,600,000.

#### Auction of 2-Year and 5-Year Notes

November 18 Treasury announced it would auction \$15,000 million of 2-year notes of Series AG-1994 and \$10,750 million of 5-year notes of Series T-1997 to refund \$13,332 million of securities maturing November 30 and to raise about \$12,425 million of new cash.

The notes of Series AG-1994 were dated November 30, 1992, due November 30, 1994, with interest payable on May 31 and November 30 until maturity. An interest rate of 4-5/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received prior to 12 noon, e.s.t., for noncompetitive tenders and prior to 1 p.m., e.s.t., for competitive tenders on November 23, and totaled \$44,622 million, of which \$15,010 million was accepted. All competitive tenders at yields lower than 4.72 percent were accepted in full. Tenders at 4.72 percent were allotted 35 percent. All noncom-

## TREASURY FINANCING: OCTOBER-DECEMBER, con.

petitive and successful competitive bidders were allotted securities at the high yield of 4.72 percent with an equivalent price of 99.821. The median yield was 4.70 percent; that is, 50 percent of the amount of accepted competitive bids were tendered at or below that yield. The low yield was 4.68 percent; that is, 5 percent of the amount of accepted competitive bids were tendered at or below that yield. Noncompetitive tenders totaled \$652 million. Competitive tenders accepted from private investors totaled \$14,358 million.

In addition to the \$15,010 million of tenders accepted in the auction process, \$498 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$370 million was accepted from Federal Reserve banks for their own account.

The notes of Series T-1997 were dated November 30, 1992, due November 30, 1997, with interest payable on May 31 and November 30 until maturity. An interest rate of 6 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received prior to 12 noon, e.s.t., for noncompetitive tenders and prior to 1 p.m., e.s.t., for competitive tenders on November 24, and totaled \$27,133 million, of which \$10,753 million was accepted. All competitive tenders at yields lower than 6.07 percent were accepted in full. Tenders at 6.07 percent were allotted 34 percent. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 6.07 percent with an equivalent price of 99.702. The median yield was 6.02 percent; that is, 50 percent of the amount of accepted competitive bids were tendered at or below that yield. The low yield was 5.95 percent; that is, 5 percent of the amount of accepted competitive bids were tendered at or below that yield. Noncompetitive tenders totaled \$601 million. Competitive tenders accepted from private investors totaled \$10,152 million.

In addition to the \$10,753 million of tenders accepted in the auction process, \$598 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$150 million was accepted from Federal Reserve banks for their own account.

#### 52-Week Bills

November 6 tenders were invited for approximately \$14,250 million of 364-day Treasury bills to be dated November 19, 1992, and to mature November 18, 1993. The issue was to refund \$12,276 million of maturing 52-week bills and to raise about \$1,975 million of new cash. The bills were auctioned on November 17. They totaled \$34,410 million, of which \$14,255 million was accepted, including \$367 million of noncompetitive tenders from the public and \$3,590 million of the bills issued to Federal Reserve banks for themselves and as agents for

foreign and international monetary authorities. The average bank discount rate was 3.61 percent.

#### Cash Management Bills

October 30 tenders were invited for approximately \$15,000 million of 41-day bills to be issued November 6, 1992, representing an additional amount of bills dated December 19, 1991, maturing December 17, 1992. The issue was to raise new cash. Tenders were opened on November 5. They totaled \$43,767 million, of which \$15,042 million was accepted. The average bank discount rate was 3 percent.

#### Auction of 2-Year and 5-Year Notes

December 16 Treasury announced it would auction \$15,500 million of 2-year notes of Series AH-1994 and \$11,250 million of 5-year notes of Series U-1997 to refund \$20,954 million of securities maturing December 31 and to raise about \$5,800 million of new cash.

The notes of Series AH-1994 were dated December 31, 1992, due December 31, 1994, with interest payable on June 30 and December 31 until maturity. An interest rate of 4-5/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received prior to 12 noon, e.s.t., for noncompetitive tenders and prior to 1 p.m., e.s.t., for competitive tenders on December 22, and totaled \$39,039 million, of which \$15,501 million was accepted. All competitive tenders at yields lower than 4.71 percent were accepted in full. Tenders at 4.71 percent were allotted 27 percent.

All noncompetitive and successful competitive bidders were allotted securities at the high yield of 4.71 percent with an equivalent price of 99.840.

The median yield was 4.68 percent; that is, 50 percent of the amount of accepted competitive bids were tendered at or below that yield. The low yield was 4.65 percent; that is, 5 percent of the amount of accepted competitive bids were tendered at or below that yield. Noncompetitive tenders totaled \$1,045 million. Competitive tenders accepted from private investors totaled \$14,456 million.

In addition to the \$15,501 million of tenders accepted in the auction process, \$503 million was accepted from Federal Reserve banks as agents for foreign and international mone-

## TREASURY FINANCING: OCTOBER-DECEMBER, con.

tary authorities, and \$1,100 million was accepted from Federal Reserve banks for their own account.

The notes of Series U-1997 were dated December 31, 1992, due December 31, 1997, with interest payable on June 30 and December 31 until maturity. An interest rate of 6 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received prior to 12 noon, e.s.t., for noncompetitive tenders and prior to 1 p.m., e.s.t., for competitive tenders on December 23, and totaled \$24,459 million, of which \$11,260 million was accepted. All competitive tenders at yields lower than 6.03 percent were accepted in full. Tenders at 6.03 percent were allotted 62 percent. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 6.03 percent with an equivalent price of 99.872. The median yield was 5.97 percent; that is, 50 percent of the amount of accepted competitive bids were tendered at or below that yield. The low yield was 5.90 percent; that is, 5 percent of the amount of accepted competitive bids were tendered at or below that yield. Noncompetitive tenders totaled \$870 million. Competitive tenders accepted from private investors totaled \$10,390 million.

In addition to the \$11,260 million of tenders accepted in the auction process, \$398 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$470 million was accepted from Federal Reserve banks for their own account.

#### 52-Week Bill

December 4 tenders were invited for approximately \$14,750 million of 364-day Treasury bills to be dated December 17, 1992, and to mature December 16, 1993. The issue was to refund \$13,354 million of maturing 52-week bills and to raise about \$1,400 million of new cash. The bills were auctioned on December 10. They totaled \$35,136 million, of which \$14,775 million was accepted, including \$326 million of noncompetitive tenders from the public and \$3,840 million of the bills issued to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. The average bank discount rate was 3.57 percent.

#### **Cash Management Bills**

November 27 tenders were invited for approximately \$16,000 million of 49-day bills to be issued December 3, 1992, representing an additional amount of bills dated July 23, 1992, maturing January 21, 1993. The issue was to raise new cash. Tenders were opened on December 1. They totaled \$35,738 million, of which \$16,008 million was accepted. The average bank discount rate was 3.29 percent.

<sup>1</sup> Includes trust funds and accounts that comprise Government accounts under the unified budget concept.

<sup>2</sup> Excludes banks and insurance companies.

<sup>3</sup> Included with all other investors are certain Government deposit accounts and Government-

sponsored agencies, formerly included with Government accounts

Note.--For detail of offerings, sea table PDO-3.

## **INTRODUCTION: Savings Bonds and Notes**

Series EE bonds, on sale since January 1, 1980, are the only savings bonds currently sold. Series HH bonds are issued in exchange for Series E and EE savings bonds and savings notes. Series A-D were sold from March 1, 1935, through April 30, 1941. Series E was on sale from May 1, 1941, through December 31, 1979 (through June 1980 to payroll savers only). Series F and G were sold from May 1, 1941, through April 30, 1952. Series H was sold from June 1, 1952, through December 31, 1979. Series HH bonds were sold for cash from January

1, 1980, through October 31, 1982. Series J and K were sold from May 1, 1952, through April 30, 1957. U.S. savings notes were on sale May 1, 1967, through June 30, 1970. The notes were eligible for purchase by individuals with the simultaneous purchase of series E savings bonds. The principal terms and conditions for purchase and redemption and information on investment yields of savings notes appear in the *Treasury Bulletins* of March 1967 and June 1968; and the Annual Report of the Secretary of the Treasury for fiscal 1974.

## **INTRODUCTION: Ownership of Federal Securities**

Federal securities presented in the following tables are public debt securities such as savings bonds, bills, and notes that the Treasury issues. The tables also detail debt issued by other Federal agencies under special financing authorities. (See the Federal debt (FD) tables for a more complete description of the Federal debt.)

 Table OFS-1 presents Treasury marketable and nonmarketable securities and debt issued by other Federal agencies held by Government accounts, the Federal Reserve banks, and private investors. Social Security and Federal retirement trust fund investments comprise much of the Government account holdings. The Federal Reserve banks acquire Treasury securities in the market as a means of executing monetary policy.

• Table OFS-2 presents the estimated amount of public debt securities held by private Investors. Informration is obtained from sources such as the Federal financial institution regulatory agencies. State, local, and foreign holdings include special issues of nonmarketable securities to municipal entities and foreign official accounts. They also include municipal, foreign official, and private holdings of marketable Treasury securities. (See footnotes to the table for description of investor categories.)

TABLE OFS-1.--Distribution of Federal Securities by Class of Investors and Type of Issues

<sup>1</sup> U.S. savings bonds, senes A-F and J, are included at current redemption value
2 Includes domestically chartered banks, U.S. branches and agencies of foreign banks, New
York investment companies majority owned by foreign banks, and Edge Act corporations
owned by domestically chartered and foreign banks.
3 Includes partnerships and personal trust accounts.
4 Includes U.S. sevings notes Sales began May 1, 1967, and were discontinued June 30, 1970.
5 Exclusive of banks and insurance companies.

State and local government estimate includes state and local government series as well as State and local pension funds.
Consists of the investments of foreign and international ecounts (both official and private) in the United States public debt issues. Estimates reflect 1978 benchmark through December 1984 and 1984 benchmark to date.
Includes savings and loan associations, credit unions, nonprofit institutions, mutual savings.

<sup>&</sup>lt;sup>8</sup> Includes savings and loan associations, credit unions, nonprofit institutions, mutual savings banks, corporate pension trust funds, dealers and brokers, certain Government deposit accounts, and Government-sponsored enterprises.

#### **INTRODUCTION:** Market Yields

The tables and charts in this section present yields on Treasury marketable securities, and compare long-term yields on Treasury securities with yields on long-term corporate and municipal securities.

• Table MY-1 lists Treasury market bid yields at constant maturities for bills, notes, and bonds. The Treasury yield curve in the accompanying chart, is based on current market bid quotations on the most actively traded Treasury securities as of 3:30 p.m. on the last business day of the calendar quarter.

Treasury obtains quotations from the Federal Reserve Bank of New York, which compiles quotations provided by five primary dealers. Treasury uses these composite quotations to derive the yield curve, based on semiannual interest payments and read at constant maturity points to develop a consistent data series. Yields on Treasury bills are

coupon equivalent yields of bank discount rates at which Treasury bills trade in the market. The Board of Governors of the Federal Reserve System publishes the Treasury constant maturity data series in its weekly H.15 press release.

• Table MY-2 shows average yields of long-term Treasury, corporate, and municipal bonds. The long-term Treasury average yield is the 30-year constant maturity yield. The corporate bond average yield is developed by Treasury by calculating reoffering yields on new long-term securities maturing in at least 20 years and rated Aa by Moody's Investors Service. The municipal bond average yield prior to 1991 was compiled by Treasury. Beginning with January 1991, the average yield is the "Municipal Bond Yield Average," published by Moody's Investors Service for 20-year reoffering yields on selected Aa-rated general obligations. See the footnotes for further explanation.

### INTRODUCTION: U.S. Currency and Coin Outstanding and in Circulation

The U.S. Currency and Coin Outstanding and in Circulation (USCC) statement informs the public of the total face value of currency and coin used as a medium of exchange that is in circulation at the end of a given accounting month. The statement defines the total amount of currency and coin outstanding and the portion deemed to be in circulation, and includes some old and current rare issues that do not circulate, or that may do so to a limited extent. Treasury includes them in the statement because the issues were originally intended for general circulation.

The USCC statement provides a description of the various issues of paper money. It also gives an estimated average of currency and coin held by each individual, using estimates of population from the Bureau of the Census. USCC information has been published by Treasury since 1888, and was published separately until 1983, when it was incorporated into the "Treasury Bulletin." The USCC comes from monthly reports compiled by Treasury offices, various U.S. Mint offices, the Federal Reserve banks, and the Federal Reserve Board.

Issued on and after July 1, 1929
 Excludes coin sold to collectors at premium prices.
 Includes \$481,781,898 in standard silver dollars

Represents value of certain partial denominations not presented for redemption.
 Based on Bureau of the Census estimates of population.

#### **INTRODUCTION: International Financial Statistics**

The tables in this section provide statistics on the U.S. Government's reserve assets, liabilities to *foreigners*, and its international financial position. All monetary figures are in dollars or dollar equivalents.

- Table IFS-1 shows reserve assets of the United States, including gold stock and special drawing rights held in the Special Drawing account in the International Monetary Fund (IMF). The table also shows U.S. reserve holdings and holdings of convertible foreign currencies in the IMF.
- Table IFS-2 contains statistics on liabilities to foreign official institutions, and selected liabilities to all other foreigners, which are used in the U.S. balance of payments statistics.
- Table IFS-3 shows nonmarketable bonds and notes that Treasury Issues to official institutions and other residents of foreign countries.
- Table IFS-4 presents a measure of weighted-average changes in exchange rates between the U.S. dollar and the currencies of certain other countries.

transactions in SDRs

<sup>&</sup>lt;sup>1</sup> Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing right (SDR) based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and reserve position in the IMF are also valued on this basis beginning July 1974.

<sup>2</sup> Treasury values its gold stock at \$42,2222 per fine troy ounce pursuant to 31 U.S.C. 5117 (b) issues gold certificates to the Federal Reserve at the same rate against all gold held.

<sup>3</sup> Includes allocations of SDRs in the Special Drawing Account in the IMF, plus or minus

transactions in SURs.

Includes holdings of Treasury and Federal Reserve System, beginning November 1978, these are valued at current market exchange rates or, where appropriate, at such other rates as may be agreed upon by the parties to the transactions.

The United States has the right to purchase foreign currencies equivalent to its reserve position in the Fund automatically if needed. Under appropriate conditions, the United States could purchase additional amounts related to the U.S. quota.

Includes Bank for International Settlements.

<sup>2</sup> Derived by applying reported transactions to benchmark data.

3 Beginning in March 1988, includes currant value of zero-coupon, 20-year maturity Treasury bond issue to the Government of Maxico. Beginning March 1990, also includes currant value of zero-coupon, 30-year maturity Treasury bond issue to the Government of Maxico. Beginning December 1990, also includes currant value of zero-coupon, 30-year maturity Treasury bond issue to the Republic of Vanezuela. Also, see footnotes 1 and 2, table IFS-3.

4 Includes debt securities of LIS. Government compositions, indept spring reported generals.

<sup>\*</sup>Includes adolt securities of U.S. Government corporations, federally sponsored agencies, and private corporations.

\*Includes liabilities psyable in dollars to foreign banks and liabilities payable in foreign currances to foreign banks and to \*other foreigners.\*

<sup>8</sup> Includes marketable U.S. Government bonds and notes hald by foreign banks.

Includes marketable U.S. Government uotius and notes had by receipt season.

7. Principally the International Bank for Reconstruction and Development, the Inter-American Development Bank, and the Asian Development Bank.

Note.—Table is based on Treasury Department data and on data reported to the Treasury Department by banks, other depository institutions, and brokers in the United States. Data corraspond generally to statistics following in this section and in the "Capital Movaments" section. Table excludes International Monetary Fund "holdings of dollars" and holdings of U.S. Treasury letters of credit and nonnegotiable noninterest-bearing special U.S. notes held by other international and regional organizations.

Beginning March 1988, indicates current value (principal plus accrued interest) of zero-coupon, 20-year maturity Treasury bond issue to the Government of Mexico. Face value of issue is \$2,274 million. Beginning March 1990, includes current value of zero-coupon, 30-year maturity Treasury bond issue to the Government of Maxico. Face value of issue is \$25,009 million.

<sup>&</sup>lt;sup>2</sup> Beginning December 1990, indicates current value of zaro-coupon, 30-year maturity Treasury bond issue to the Republic of Venezuela. Face value of issue is \$7,209 million.

#### TABLE IFS-4.--Trade-Weighted Index of Foreign Currency Value of the Dollar

[Source: Office of Foreign Exchange Operations-International Affairs] Index of industrial country currencies 1 Dete Annuel Average  $(1980 = 100)^2$ 125.2 133.5 119.9 107.5 100.4 102 B 98.0 97.2 End of period (Dec. 1980 = 100)127.9 140.8 127.8 1144 98.4 100.0 94.4 93.7 101.0 97.3 98.4 98.7 94.7 93.9 92.2 194.0 101.0 101.0 

<sup>1</sup>Each index covers (a) 22 currencies of countries represented in the Organization for Economic Cooperation and Development (OECD): Australia, Austria, Belgium-Luxembourg, Canada, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Japan, the Natherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, end the United Kingdom; and (b) currencies of four major trading economies outside the OECD: Hong Kong, Korea, Singapore, and Taiwan. Exchange rates are drawn from the International Monetary Fund'a "International Financial Statistics" when aveilable.

Index includes average annual rates as raported in "International Financial Statistics." Nots.—These indices are presented to provide measures of the general foreign exchange value of the dollar that are broader than those provided by single exchange rate levels. They do not purport to represent a guide to measuring the impact of exchange rate levels on U.S international transactions. The indices are computed as geometric everages of individual currancy levels with weights derived from the share of each country's frade with the United States during 1982-83.

#### **INTRODUCTION: Capital Movements**

Treasury collects Information about capital movements, or the transference of assets between the United States and other countries. and has since 1935. Commercial banks and other depository institutions, bank holding companies, securities brokers and dealers, and nonbanking enterprises in the United States file capital movement reports with district Federal Reserve banks.

Forms and instructions are developed with the cooperation of other Government agencies and the Federal Reserve System, and in consultations with representatives of banks, securities firms, and nonbanking enterprises. The revised capital movements reporting forms and instructions used in the Treasury International Capital (TIC) Reporting System became effective with the banking reports as of April 30, 1978, and with the nonbanking reports as of December 31 of the same year.

in general, information is reported opposite the country or geographical area where the foreigner is located, as shown on the records of reporting institutions. However, the Information may not always reflect the ultimate ownership of the assets. Reporting institutions are not required to go beyond the addresses shown on their records, and so may not be aware of the actual country of domicile of the ultimate beneficiary.

United States liabilities arising from the deposits of dollars with foreign banks appear as liabilities to foreign banks, although the liability of the foreign bank receiving the deposit may be to foreign official

institutions or to residents of another country.

Information on branches or agencies of foreign official institutions is reported opposite the country to which the entire institution itself belongs. Likewise, information pertaining to international and regional organizations is reported in the same way. The exception to this is information concerning the Bank for International Settlements, which is classified under "Other Europe."

Banks and other depository institutions, bank holding companies. International Banking Facilities (IBFs), securities brokers and dealers, and nonbanking enterprises in the United States must file reports. These enterprises include the branches, agencies, subsidiaries, and other affiliates in the United States of foreign banking and nonbanking firms. Those with liabilities, claims, or securities transactions below specified exemption levels are exempt from reporting.

Banks and other depository institutions, and some brokers and dealers, file monthly reports covering their dollar liabilities to, and dollar claims on, foreigners in a number of countries. Twice a year, June 30 and December 31, they also report the same liabilities and claims items to foreigners in countries not shown separately on the monthly reports. Quarterly reports are filed for liabilities and claims denominated in foreign currencies in relation to foreigners. The exemption level applicable to these banking reports is \$15 million.

Banks and other depository Institutions, securities brokers and dealers, and other enterprises report monthly their transactions with foreigners in long-term securities. Effective January 31, 1991, reports are required for purchases and sales exceeding \$2 million during the covered month.

Exporters, Importers, industrial and commercial concerns, financial institutions and other banks and depository institutions, brokers, and other nonbanking enterprises file reports quarterly if liabilities to. or claims on, unaffiliated foreigners amount to \$10 million or more.

Nonbanking enterprises also report each month their U.S. dollardenominated deposit and certificates of deposit claims of \$10 million or more on banks abroad.

The data in these tables do not cover all types of reported capital movements between the United States and other countries. The

principal exclusions are the intercompany capital transactions of nonbanking business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies, and capital transactions of the U.S. Government, Consolidated data on all types of international capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

Section I presents liabilities to foreigners reported by U.S. banks and other depository institutions, as well as brokers and dealers. Dollar liabilities are reported monthly; those denominated in foreign currencies are reported quarterly. Respondents report certain of their own liabilities and all of their custody liabilities to foreigners. Savings and loan associations and other thrift institutions have filed the TIC banking forms since January 1985.

Section II presents claims on foreigners that are also reported by U.S. banks and other depository institutions, brokers, and dealers. Data on bank claims held for their own account are collected monthly. Information on claims held for their domestic customers, as well as foreign currency claims, is collected on a quarterly basis only. Maturity data are reported according to time remaining to maturity. Reporting also covers certain items held by brokers and dealers in the United

In Section III are supplementary statistics on U.S. banks' liabilities to, and claims on, foreigners. The supplementary data on bank loans and credits to nonbank foreigners combine selected information from the TIC reports with data from the monthly Federal Reserve 2502 reports submitted for major foreign branches of U.S. banks. Other supplementary data on U.S. bank dollar liabilities to, and dollar claims on, countries not regularly reported separately are available in the June and December issues of the Treasury Bulletin.

Section IV shows the liabilities to, and claims on, unaffiliated foreigners by exporters, importers, Industrial and commercial concerns, financial institutions other than banks, other depository institutions, brokers, and other nonbanking enterprises in the United States. Information does not include accounts of nonbanking enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. These are reported by business enterprises to the Department of Commerce on its direct investment forms. The data also exclude claims held through U.S. banks.

Section V contains information on transactions in all types of long-term domestic and foreign securities with foreigners reported by banks, brokers, and other entities in the United States. The data cover new security issues, transactions in outstanding issues, and redemptions of securities. They also include transactions executed in the United States for the account of foreigners, transactions executed abroad for the account of reporting institutions and their domestic customers, and some transactions classified as direct investments in the balance of payments accounts. This, however, does not include nonmarketable Treasury bonds and notes, foreign series, and foreign currency series, shown in table IFS-3.

The geographical breakdown of the data on securities transactions shows the country of domicile of their foreign buyers and sellers. In the case of outstanding issues, this may differ from the country of the original issuer. The gross figures contain some offsetting transactions between foreigners; the net figures for total transactions represent transactions by foreigners with United States residents. However, net figures for transactions of individual countries and areas may include some transactions between foreigners of different countries.

### **INTRODUCTION: Foreign Currency Positions**

Information on holdings of foreign currencies, or foreign currency positions, of banks and nonbanking firms in the United States has been collected since 1974. It has also been collected on those of foreign branches, majority-owned foreign partnerships and subsidiaries of United States banks and nonbanking firms.

Reports cover five major foreign exchange market currencies and U.S. dollars held abroad. This information is published in the "Treasury Bulletin" in seven sections. FCP-I is a summary of world-wide net positions in all of the currencies reported. FCP-II through FCP-VI present information on specified foreign currencies. FCP-VII presents the U.S. dollar positions of the foreign branches and subsidiaries of U.S. firms that are required to report in one or more of the specified foreign currencies. Reporting is required by Title II of Public Law 93-110, which is an amendment to the Par Value Modification Act of September 21, 1973, and by implementing Treasury regulations.

Information for the United States includes amounts reported by sole proprietorships, partnerships, and corporations in the United States, including the U.S. branches and subsidiaries of foreign non-banking concerns. The "weekly bank positions" category includes figures reported by agencies, branches, and subsidiaries of foreign banks as well as banking institutions located in the United States. Data for "foreign branches" and "abroad" include amounts reported by the branches and by majority-owned partnerships and subsidiaries of U.S. banking and nonbanking concerns.

Data generally do not reflect foreign currency positions of foreign parents or their subsidiaries located abroad except through intercompany accounts. Data do include the foreign subsidiaries of a few foreign-owned U.S. corporations. Assets, liabilities, and foreign exchange contract data are reported based on time remaining to maturity as of the date of the report, regardless of the original maturity of the instrument involved.

Since January 1982, the exemption level for banks and banking institutions has been \$100 million. The exemption level for nonbanking firms is also \$100 million on positions in the United States, and on foreign branch's and subsidiaries' positions since March 1982.

Firms must report their entire position in a foreign currency if the specified U.S. dollar equivalent exemption level is exceeded in any category of assets, liabilities, exchange contracts bought and sold, or in the net position of that currency.

In general, exemption levels are applied to the entire firm. In reports on their foreign branches and majority-owned partnerships and subsidiaries, U.S. banks and nonbanks are required to report the U.S. dollar-denominated assets, liabilities, exchange contracts bought and sold, and net positions of those branches, partnerships, and subsidiaries with nonexempt holdings in the specified foreign currencies.

#### SECTION I

- <sup>1</sup> Worldwide net positions on the last business day of the calendar quarter of nonbanking business concerns in the United States, their foreign branches and majority-owned partnerships and subsidiaries. Excludes receivables and installment paper that have been sold or discounted before maturity, U.S. parent companies' investments in their majority-owned foreign subsidiaries, fixed assets (plant and equipment), and capitalized leases for plant and equipment.
- <sup>2</sup> Foreign branches, majority-owned partnerships, and subsidiaries only
- <sup>9</sup> Weekly worldwide net positions of banks and banking institutions in the United States, their toreign branches, and majority-owned foreign subsidieries. Excludes capital assets and liabilities.
- <sup>4</sup> Foreign branches and majority-owned subsidianes only

#### SECTIONS II THROUGH VII

<sup>1</sup> Positions of nonbanking business concerns in the United States, their foreign branches, majority-owned partnerships, and subsidiaries. In section VII, positions of foreign branches, majority-owned partnerships, and subsidiaries only.

- <sup>2</sup> Excludes receivables and installment paper sold or discounted before maturity, fixed assets (plant and equipment), and parents' investment in majority-owned foreign subsidiaries
- 3 Capitalized plant and equipment leases are excluded.
- <sup>4</sup> Includes both spot and forward exchange rates
- <sup>5</sup> Columns 1 and 3 less columns 2 and 4.
- <sup>6</sup> Representative rates on the report date. Canadian dollar and United Kingdom pound rates are expressed in U.S. dollars per unit of toreign currency, all others in foreign units per U.S. dollar. The source of the automated representative rates changed as of June 30, 1988.
- <sup>7</sup> Banks and banking institutions in the United States, their foreign branches, and majority-owned subsidiaries. In section VII, foreign branches and majority-owned subsidiaries only.
- <sup>8</sup> Excludes capital assets.
- <sup>9</sup> Excludes capital liabilities.
- 10 Includes both spot and forward exchange contracts
- 11 Columns 3 and 9 less columns 6 and 12.
- 12 See tootnote 6

### **INTRODUCTION: Exchange Stabilization Fund**

To stabilize the exchange value of the dollar, the Exchange Stabilization Fund (ESF) was established under the Gold Reserve Act of January 30, 1934 (31 U.S.C. 822a), which authorized establishment of a Treasury Department fund to be operated under the exclusive control of the Secretary, with approval of the President.

Subsequent amendment of the Gold Reserve Act modified the original purpose somewhat to reflect termination of the fixed exchange rate system.

Resources of the fund include dollar balances, partially invested in U.S. Government securities, Special drawing rights (SDRs), and balances of foreign currencies. Principal sources of income (losses) for the fund are profits (losses) on SDRs and foreign exchange, as well as interest earned on assets.

- Table ESF-1 presents the assets, liabilities, and capital of the fund. The figures are in U.S. dollars or their equivalents based on current exchange rates computed according to the accrual method of accounting. The capital account represents the original capital appropriated to the fund by Congress of \$2 billion, minus a subsequent transfer of \$1.8 billion to pay for the initial U.S. quota subscription to the IMF. Gains and losses are reflected in the cumulative net income (loss) account.
- Table ESF-2 shows the results of operations by quarter. Figures are in U.S. dollars or their equivalents computed according to the accrual method. "Profit (loss) on foreign exchange" includes realized profits or losses on currencies held. "Adjustment for change in valuation of SDR holdings and allocations" reflects net gain or loss on revaluation of SDR holdings and allocations for the quarter.

<sup>&</sup>lt;sup>1</sup> Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing rights (SDRs) based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and allocations are valued on this basis beginning July 1974.

<sup>2</sup> Excludes foreign exchange transactions for future and spot delivery.

<sup>3</sup> A non-interest-bearing liability to the U.S. Treasury resulting from the transfer to the Exchange.

Stabilization Fund of foreign currencies drawn from the IMF by the United States. Note:—Annual belance sheets for fiscal years 1934 through 1940 appear in the 1940 Annual Report of the Secretary of the Treasury and those for succeeding years appear in subsequent reports through 1980. Ouarterly balance sheets beginning with Dec. 31, 1938, have been published in the "Treasury Bulletin." Data from inception to Sept 30, 1978, may be found on the statements published in the January 1979 "Treasury Bulletin."

## **SPECIAL REPORT**

**Trust Fund Reports** 

### INTRODUCTION: Airport and Airway Trust Fund

The Airport and Airway Trust Fund was established on the books of the Treasury in fiscal 1971, according to provisions of the Airport and Airway Revenue Act of 1970 [49 U.S.C. 1742 (a)]. The trust fund was reestablished in the Internal Revenue Code (26 U.S.C. 9502) as a result of the Tax Equity and Fiscal Responsibility Act of 1982 (Public Law 97-248, dated September 3, 1982), effective September 1, 1982.

Amounts equivalent to the taxes received in the Treasury on transportation of persons and property by air, gasoline and jet fuel used in noncommercial aircraft, and an international departure tax are appropriated from the general fund of the Treasury to the trust fund. The Omnibus Budget Reconciliation Act of 1990 (Public Law 101-508, dated November 5, 1990) increased rates for the excise taxes transferred to the fund.

These transfers are made based on estimates made by the Secretary of the Treasury, subject to adjustments in later transfers in the amount of actual tax receipts.

When the provisions of 26 U.S.C. 9602 (b) are met, amounts available in the fund exceeding outlay requirements are invested in public debt securities with the interest credited to the fund. Additional sums from the general fund are also credited as authorized and made available by law, if necessary, to meet outlay requirements.

Amounts required for outlays to carry out the airport and airway program are made available to the Federal Aviation Administration, Department of Transportation.

Other charges to the trust fund are made by the Secretary of the Treasury for transfers of certain refunds of taxes and certain outfits under section 34 of the Internal Revenue Code of 1986.

Annual reports to Congress, required by 26 U.S.C. 9602 (a), are submitted by the Secretary of the Treasury, after consultation with the Secretary of Transportation. These reports are required to cover the financial condition and results of operations of the fund during the past fiscal year and those expected during the next 5 fiscal years.

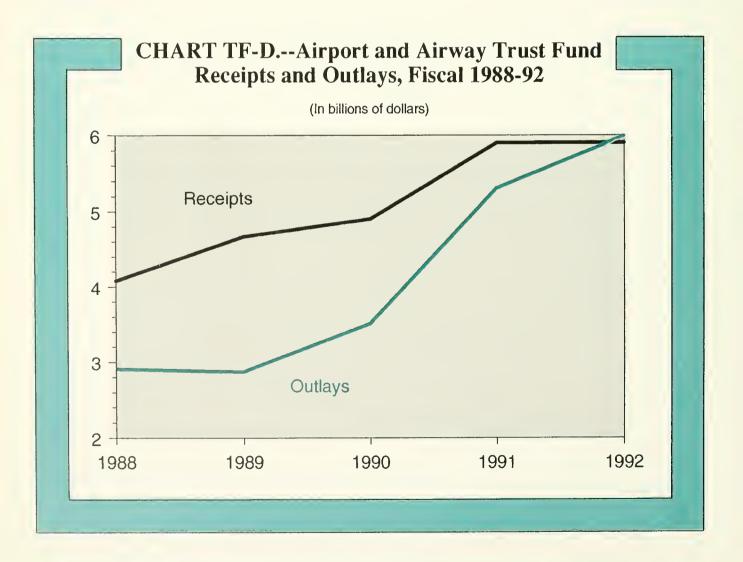

#### TABLE TF-10.--Airport and Airway Trust Fund Results of Operations, Fiscal 1992

Internal Revenue Code section Description (26 U.S.C.)	Amount
Balance Oct. 1, 1991	\$15,262,556,00

### **INTRODUCTION: Asbestos Trust Fund**

Under the credit reform provisions of the Federal Credit Reform Act of 1990, the balance of this trust fund is required to be returned to general revenue.

### INTRODUCTION: Black Lung Disability Trust Fund

The Black Lung Disability Trust Fund was established on the books of the Treasury in fiscal 1978 according to the Black Lung Benefits Revenue Act of 1977 (Public Law 95-227). The Black Lung Benefits Revenue Act of 1981 (Public Law 97-119), reestablished the fund in the IRC, 26 U.S.C. 9501.

The Consolldated Omnibus Budget Reconciliation Act of 1985 (Public Law 99-272), enected April 7, 1986, provided for an increase in the coal tax effective April 1, 1986, through December 31, 1995, and a 5-year forgiveness of interest retroactive to October 1, 1985.

The 5-year moratorlum on interest payments ended on September 30, 1990. Payment of interest on advances resumed fiscal 1991. The Omnibus Budget Reconciliation Act of 1987 (Public Law 100-203), signed December 22, 1987, extends the temporary increase in the coal tax through December 31, 2013.

The Code designates the following receipts to be appropriated and transferred from the general fund of the Treasury to the trust fund: excise taxes on mined coal, taxable expenditures of self-dealing by, and excess contributions to, private black lung benefit trusts; reimbursements by responsible mine operators; and related fines, penalties, and interest charges.

Estimates made by the Secretary of the Treasury determine monthly transfers of amounts for excise taxes to the trust fund subject to adjustments in later transfers to actual tax receipts.

After retirement of the current indebtedness, amounts available in the fund exceeding current expenditure requirements will be invested by the Secretary of the Treasury in interest-bearing public debt securities. Any interest earned will be credited to the fund. Also credited, if necessary, will be repayable advances from the general fund to meet outlay requirements exceeding available revenues.

To carry out the program, amounts are made available to the Department of Labor. Also charged to the fund are administrative expenses incurred by the Department of Health and Human Services and the Department of the Treasury, repayments of advances from the general fund and interest on advances.

The Code requires the Secretary of the Treasury to submit an annual report to Congress after consultation with the Secretary of Labor and the Secretary of Health and Human Services (26 U.S.C. 9602(a). The report must present the financial condition and results of operations of the fund during the past fiscal year and the expected condition and operations of the fund during the next 5 fiscal years.

#### **INTRODUCTION: Harbor Maintenance Trust Fund**

The Harbor Maintenance Trust Fund was established on the books of the Treasury on April 1, 1987, according to the Water Resources Development Act of 1986 (Public Law 99-962, November 17, 1986) (26 U.S.C. 9505).

The Harbor Maintenance Trust Fund consists of such amounts as may be appropriated provided by section 9505 (b), transferred by the Saint Lawrence Seaway Development Corporation (SLSDC) according to section 13 (a) of the Act of May 13, 1954, or credited as provided in section 9602 (b). Amounts are appropriated equivalent to the user fees in the Treasury under section 4461 (relating to harbor maintenance tax).

Amounts In the Harbor Maintenance Trust Fund are available as provided by appropriation acts for making expenditures to carry out section 210 (a) of the Water Resources Development Act of 1986, for payments of rebates of tolls or charges according to section 13 (b) of the Act of May 13, 1954 (as in effect on April 1, 1987), and for the payment of all expenses of administration incurred by the Department of the Treasury in administering subchapter A of chapter 36 (relating to harbor maintenance tax), but not exceeding \$5 million for any fiscal year and for periods during which no fee applies under paragraph (9) or (10) of section 13031 (a) of the Consolidated Omnibus Budget Reconciliation Act of 1985.

The provision in the act for payment of the expenses of the administration costs from this source has been found to be in violation of the General Agreement on Tariffs and Trade (GATT). Therefore, legislation Is being proposed to authorize payment from the trust fund itself of expenses up to \$5 million annually to the Department of the Army for administration costs of the Army, the Department of Commerce, and Treasury.

The Harbor Maintenance user fee was increased by the Omnibus Budget Reconciliation Act of 1990 (Public Law 101-508, approved November 5, 1990). The ad valorem user fee imposed on applicable commercial cargo increased from 0.04 percent to 0.125 percent. The Water Resources Development Act of 1990 increased to 100 percent the amount of the Harbor Maintenance costs that can be financed by the trust fund. Legislation is also being proposed in fiscal 1993 to authorize payment of \$45.5 million to the National Oceanic and Atmospheric Administration (NOAA), which was included in calculating the 0.125 percent ad valorem rate.

Annual reports to Congress are required by 26 U.S.C. 9602 (a) to be submitted by the Secretary of the Treasury. These reports are required to cover the financial condition and the results of operations of the fund during the past fiscal year and its expected condition and operations during the next 5 fiscal years.

<sup>&</sup>lt;sup>1</sup> Includes unrealized discounts on investments as reported by Department of Treasury Financial Management Service's Sept. 30, 1992, "Harbor Maintenance Trust Fund Income Statement."

Outyear projections are based on economic conditions and agencies' best projections of revenues end expenditures. These are planning numbers and are not to be construed as representing the "President's Budget for Fiscal Year 1994."

### INTRODUCTION: Hazardous Substance Superfund

The hazardous substance response trust fund was established on the books of the Treasury in fiscal 1981, in accordance with provisions of the Hazardous Substance Response Revenue Act of 1980 (42 U.S.C. 9631 (a)). Effective fiscal 1987, the trust fund was reestablished as the hazardous substance superfund (superfund) in accordance with provisions of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980 (Public Law 96-510), as amended by the Superfund Amendments and Reauthorization Act (SARA) of 1986 (Public Law 99-499, dated October 17, 1986).

The Internal Revenue Service collects excise taxes on petroleum and chemicals, and an environmental tax from all corporations with modified alternative minimum taxable income in excess of \$2 million. In addition, the superfund is authorized to be appropriated general revenues from the general fund not otherwise appropriated. Cost recoveries, and other miscellaneous receipts (e.g. interest revenue) are deposited directly to the superfund. Also appropriated to the

superfund, if required, are repayable advances from the general fund to meet outlay requirements in excess of available revenues. Amounts available in the superfund, in excess of current expenditure requirements, are invested by the Secretary of the Treasury in interest-bearing Government securities (e.g., Treasury bills). All interest earned is credited directly to the superfund.

To carry out the superfund program, amounts are appropriated from the Superfund to the Environmental Protection Agency for programmatic and administrative expenses, repayment of advances to the general fund, and interest expense associated with outstanding advances from the general fund.

An annual report to Congress by the Secretary of Treasury Is required by section 9633 (b) (1) of CERCLA, as amended. These reports present the financial condition of the superfund and the results of operation for the past fiscal year, and its expected condition and operations during the next 5 years.

#### TABLE TF-14.--Hazardous Substance Superfund Results of Operations, Fiscal 1992

<sup>&</sup>lt;sup>1</sup> Forecasts for these fiscal years assume reauthorization of the superfund by Congress.
<sup>2</sup> On January 1, 1996, the corporate environmental tax expires unless reauthorized by Congress. The estimate includes only the first quarter fiscal 1996 corporate collections.

### **INTRODUCTION: Highway Trust Fund**

The Highway Trust Fund was established on the books of the Treasury in fiscal 1971, according to provisions of the Highway Revenue Act of 1956, as amended (23 U.S.C. 120 note). It was reestablished on the books of the Treasury by the Surface Transportation Assistance Act of 1982, and modified by the Deficit Reduction Act of 1984 (Public Law 98-369, approved July 18, 1984), the Surface Transportation and Uniform Relocation Assistance Act of 1987, and the Omnibus Budget Reconciliation Act of 1990, Amounts equivalent to taxes on gasoline, diesel fuel, special motor fuels, certain tires, vehicles, and truck use, are designated by the Act to be appropriated and transferred from the general fund of the Treasury to the trust fund. These transfers are made monthly based on estimates by the Secretary of the Treasury, subject to adjustments in later transfers to the amount of actual tax receipts. Amounts available in the fund exceeding outlay requirements are invested in public debt securities and interest is credited to the fund.

The termination date of the fund was extended to September 30, 1999, as a result of the Intermodal Surface Transportation Efficiency Act of 1991 (Public Law 102-24, approved December 18, 1991).

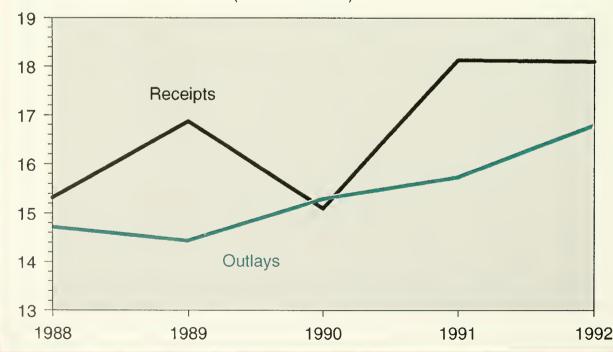

Within the fund is a mass transit account, funded by a portion of the excise tax collections under sections 4041, 4081, and 4091 of the Internal Revenue Code (26 U.S.C.). The funds from this account are used for expenditures according to section 21 (a) (2) of the Urban Mass Transportation Act of 1964 or the Intermodal Surface Transportation Efficiency Act of 1991. The remaining excise taxes collected are included in a higher account within the trust fund, and expenditures from this account are made according to the provisions of various transportation Acts.

Amounts required for outlays to carry out the Federal Highway program are made available to the Federal Highway Administration, Department of Transportation. Other charges to the trust fund are made by the Secretary of the Treasury for transfer of certain taxes to the land and water conservation fund and to the Aquatic Resources Trust Fund and refunds of certain taxes.

Annual reports to Congress are required by 26 U.S.C. 9602 (a) Internal Revenue Code as amended, to be submitted by the Secretary of the Treasury, after consultation with the Secretary of Transportation. These reports cover the financial condition and results of operations of the fund for the past fiscal year and expected condition and operations during the next 5 fiscal years.

### CHART TF-E.--Highway Trust Fund Receipts and Outlays Fiscal 1988-92

(In billions of dollars)

# TABLE TF-15,--Highway Trust Fund Results of Operations, Fiscal 1992

Internal Revenue	
Coda section Description (26 U.S.C.)	Amount
slance Oct. 1, 1991	\$19,875,616,13
eceipts:	
Excise taxes (transferred from general fund):	
Trucks, buses, trailers	
Diesel and special motor tuals	3,313,674,93
Trucks	874,162,00
Gasoline	12,402,733,13
Tires used on highway vehicles. 4071 (a) (1)	256,683,00
Rapealed taxes	-28,00
Usa of cartain vehicles	620,008,00
Fines and penalties	12,465,61
Total taxes	17,479,698,68

# TABLE TF-15A.--Highway Trust Fund, Highway Account

The following information is released according to the provisions of the Byrd Amendment to the Internodal Surface Transportation Efficiency Act of 1991 and represents data concerning only the highway account of the highway trust fund. The figure described as "unfunded authorizations" is the latest estimate received from the Department of

Transportation for fiscal 1993. The "24-month revenue estimate" includes the latest estimate received from the Department of Treasury's Office of Tax Analysis for excise taxes, net of refunds. It represents net highway receipts for the 24-month period beginning at the close of fiscal 1993.

[In millions of dollars]	
Unfunded authorizations	29,420
24-month revenue estimate	33,955

#### **INTRODUCTION: Inland Waterways Trust Fund**

The Inland Waterways Trust Fund was established by the Treasury in fiscal 1984, according to provisions of the Inland Waterways Revenue Act of 1978 (Public Law 95-502) and continued according to the Water Resources Development Act of 1986 (26 U.S.C. 9506). Amounts determined by the Secretary of the Treasury to be section 4042 of the Internal Revenue Code of 1986 (relating to tax on fuel used in commercial transportation on Inland Waterways) shall be appropriated to the trust fund. The Technical and Miscellaneous Revenue Act of 1988 (Public Law 100-647, approved November 10, 1988) increased the tax each year, 1990-1995. These amounts are transferred quarterly from the general fund based on estimates made by the Secretary, subject to adjustments in later transfers to the amounts of actual tax receipts.

The Secretary of the Treasury invests in interest-bearing obligations of the United States that portion of the trust fund, in his judgement, not required to meet current withdrawals. The interest on, and proceeds from the sale or redemption of, any obligation held in the trust fund is credited to the trust fund.

The act provides that amounts in the trust fund shall be available, by appropriations acts, for making construction and rehabilitation expenditures for navigation on the inland and intracoastal waterways of the United States described in 33 U.S.C. 1804. Expenditures must be otherwise authorized by law.

Annual reports to Congress are required by 26 U.S.C. 9602 (a) of the Secretary of the Treasury. These reports are required to cover the financial condition and the results of operations of the fund during the prior fiscal year and its expected condition and operations during the next 5 fiscal years.

## **INTRODUCTION:** Leaking Underground Storage Tank Fund

The Leaking Underground Storage Tank (LUST) Trust Fund was established in fiscal 1981 according to provisions of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980 (Public Law 96-510), as amended by the Superfund Amendments and Re-authorization Act (SARA) of 1986 (Public Law 99-499, dated October 17, 1986) and the Omnibus Budget Reconciliation Act of 1990 (Public Law 101-508, dated November 5, 1990).

The LUST trust fund is financed by taxes collected on gasoline, diesel fuels, special motor fuels, aviation fuels, and fuels used in commercial transportation on inland waterways. Amounts available in the Lust trust fund, exceeding current expenditure requirements, are

invested by the Secretary of the Treasury in interest-bearing Government securities (e.g., Treasury bills). All interest earned is credited directly to the LUST trust fund.

To carry out the LUST program, amounts are appropriated for the LUST trust fund to the Environmental Protection Agency for programmatic and administrative expenses.

An annual report to Congress by the Secretary of the Treasury is required by 26 U.S.C. 9602 (a). These reports present the financial condition of the LUST trust fund and results of operations for the past fiscal year, and its expected condition and operations during the next fiscal 5 years.

#### **INTRODUCTION: Nuclear Waste Fund**

The Nuclear Waste Fund was established on the books of the Treasury in fiscal 1983, according to provisions of the Nuclear Waste Policy Act of 1982 [42 U.S.C. 10222 (c)]. Receipts represent fees collected from public utilities based on electricity generated by nuclear power reactors and spent nuclear fuel. Expenditures from the fund are for purposes of radioactive waste disposal activities.

Amounts available in the fund exceeding current needs may be invested by the Secretary of the Treasury in obligations of the United States (1) having maturities in tandem with the needs of the waste fund, and (2) bearing interest at rates determined appropriate, taking into

consideration the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the maturities of such investments, except that the interest rate on such investments shall not exceed the average interest rate applicable to existing borrowings.

An annual report to Congress by the Secretary of the Treasury, after consultation with the Secretary of Energy, is required by 42 U.S.C. 10222 (e) (1). This report must present the financial condition and the results of operations of the waste fund during the preceding fiscal year.

#### **INTRODUCTION: Reforestation Trust Fund**

The Reforestation Trust Fund was established on the books of the Treasury in fiscal 1981 to continue through September 30, 1985, according to provisions of Title III--Reforestation, of the Recreational Boating Safety and Facilities Improvement Act of 1980 [16 U.S.C. 1606a (a)].

The act provides that the Secretary of the Treasury shall transfer to the trust fund tariffs, limited to not more than \$30 million for any fiscal year, received in the Treasury from October 1, 1979, through September 30, 1985, on (1) rough and primary wood products and wood wastey (2) lumber, flooring, and moldings; and (3) wood veneers, plywood, and other wood-veneer assemblies, and building boards. Public Law 99-190 extended the receipts for the trust fund. Amounts available in the reforestation trust fund exceeding current withdrawals are invested in

interest-bearing obligations of the United States or in obligations guaranteed as to both principal and interest by the United States. The interest on, and the proceeds from the sale or redemption of, any obligations are credited to the trust fund.

The Secretary of Agriculture is authorized to obligate available sums in the trust fund (including any amounts not obligated in previous years) for (1) reforestation and timber stand improvement and (2) administrative costs of the Government for these activities.

Annual reports are required by 16 U.S.C. 1606 a (c) (1) to be submitted by the Secretary of the Treasury, after consultation with the Secretary of Agriculture, on the financial condition and the results of the operations of the trust fund during the past fiscal year and on its expected condition and operations during the next fiscal year.

## **INTRODUCTION: Aquatic Resources Trust Fund**

Aquatic Resources Trust Fund was established on the books of the Treasury pursuant to the Deficit Reduction Act of 1984 (Public Law 98-369, approved July 18, 1984). The fund consists of two accounts: the Sport Fish Restoration Account and Boat Safety Account.

Motorboat fuel taxes are transferred, in amounts up to \$70 million per fiscal year, from the Highway Trust Fund to the Boat Safety Account. Authority for such transfers expires on October 1, 1997.

Amounts equivalent to the excise taxes received on sport fishing equipment and import duties on fishing tackle, yachts and pleasure craft are appropriated into the Sport Fish Restoration Account. Motorboat fuel taxes not transferred to the Boat Safety Account or to the Land and Water Conservation Fund are transferred from the Highway Trust Fund to the Sport Fish Restoration Account. Transfers of motorboat fuel taxes from the Highway Trust Fund to the Land and Water Conservation Fund are limited to \$1 million per fiscal year. In addition, pursuant to the Omnibus Budget Reconciliation Act of 1990 (Public Law 101-508), small engine gasoline taxes are transferred to the Sport Fish Restoration Account.

Amounts in the Sport Fish Restoration Account are used, as provided by appropriation acts, for the purposes of carrying out "An Act to provide that the United States shall aid the States in fish restoration and management projects, and for other purposes," approved August 9, 1950 (as in effect on October 1, 1988) and the Coastal Wetlands Planning, Protection and Restoration Act, as In effect on November 29, 1990.

Amounts in the Boat Safety Account, as provided by appropriations acts are available to carry out the purposes of Public Law 92-75 related to recreational boating safety assistance.

When the provisions of 26 U.S.C. 9602 (b) are met, amounts available in the two accounts exceeding outlay requirements are invested in public debt securities with the interest credited to the respective accounts.

Annual reports to Congress, required by 26 U.S.C. 9602 (a), are submitted by the Secretary of the Treasury. These reports are required to cover the financial condition and results of operations of the fund during the past fiscal year and those expected during the next 5 fiscal years.

## INTRODUCTION: Oil Spill Liability Trust Fund

The Oil Spill Liability Trust Fund was established on the books of the Treasury by the Omnibus Budget Reconciliation Act 1986 (Public Law 99-509). It was made effective on January 1, 1990 by the Omnibus Budget Reconciliation Act of 1989 (Public Law 101-239), and amended by the Oil Pollution Act of 1990 (Public Law 101-380).

Amounts equivalent to the taxes received from the environmental tax on petroleum, but only to the extent of the Oil Spill Liability Trust Fund rate, are appropriated to the fund. The tax is not applied during any calendar quarter if the Secretary of the Treasury estimates that, as of the close of the preceding calendar quarter, the unobligated balance in the fund exceeds \$1 billion. According to Treasury projections, the fund's unobligated balance will exceed \$1 billion at the close of a calendar quarter for the first time on either March 31, 1993, or June 30, 1993. When that happens, the tax will not apply in the following calendar quarter.

Certain amounts were transferred from other funds and were appropriated to the Oil Spill Liability Trust Fund as provided by U.S.C. 26 9509 (b), certain paid penalties and amounts recovered for damages are also appropriated to the fund.

Amounts in the fund are available for oil spill cleanup costs and certain other related purposes as provided by appropriations acts or section 6002 (b) of the Oil Pollution Act of 1990.

When the provisions of 26 U.S.C. 9602 (b) are met, amounts available in the fund exceeding outlay requirements are invested in public debt securities. Interest is credited to the fund.

Annual reports to Congress, required by 26 U.S.C. (a), are submitted by the Secretary of the Treasury. These reports are required to cover the financial condition and results of operations of the fund during the past fiscal year and those expected during the next 5 fiscal years.

# **INTRODUCTION: Vaccine Injury Compensation Trust Fund**

The Vaccine Injury Compensation Trust Fund (VICTF) was created on the books of the Treasury by the Revenue Act of 1987 (Public Law 100-203, approved December 22, 1987). Excise taxes on DPT, DT, MMR and polio vaccines (26 U.S.C. 4131) are appropriated into the fund which serves as a source of funds to pay claims for compensation for vaccine-related injury or death occurring after October 1, 1988. Under current law, the excise tax imposed by the VICTF expires if the project

balance of the VICTF, as of the calendar quarter ending December 31, 1992, is not negative.

Annual reports to Congress, required by 26 U.S.C. (a), are submitted by the Secretary of the Treasury. These reports are required to cover the financial condition and results of operations of the fund during the past fiscal year and those expected during the next 5 fiscal years.

#### **INTRODUCTION:** National Recreational Trails Trust Fund

Provisions relating to a National Recreational Trails Trust Fund were enacted as part of the Intermodal Surface Transportation Efficiency Act of 1991 (Public Law 102-240, approved December 18, 1991). The Act provides that amounts equivalent to the taxes imposed on fuel used In vehicles on recreational trails or back country terrain and in camp stoves and other non-engine uses in outdoor recreational equipment shall be paid from the Highway Trust Fund to the National Recreational Trails Trust Fund (26 U.S.C. 9503 (c) (6). Transfers to the fund are limited to amounts obligated under section 1302 of the Act. Obligated amounts cannot exceed \$30 million per fiscal year over the

1992-97 period. Obligations cannot be made until amounts are appropriated; there have been no appropriations for either fiscal 1992 or 1993.

When the provisions of 26 U.S.C. 9602 (b) are met, amounts evailable in the fund exceeding outlay requirements are invested in public debt securities with the Interest credited to the fund.

Annual reports to Congress, required by 26 U.S.C. 9602 (a), are submitted by the Secretary of the Treasury. These reports are required to cover the financial condition and results of operations of the fund during the past fiscal year and those expected during the next 5 fiscal years.

Note.-- No current figures or future projections are available because funds have yet to be appropriated for the fund.

## **Recent Reports and Studies**

# Treasury Reviews Insurance Issues 1

The Department of the Treasury's Office of Economic Policy recently released two research papers as part of a broad review of insurance issues. Research Paper No. 9202, "Life-Health Insurance Markets," by John S. Greenlees and James E. Duggan, provides an economic overview of the life-health sector of the U.S. insurance market. This sector provides a mix of products and services to firms and individuals including annuities and pension fund management. According to the authors, changes in revenues and profitability in these product markets could have "significant implications for the future prospects of the insurance industry." This paper presents information on the size and growth of the insurance industry, illustrating its role within the larger economy. It also includes a

discussion of health insurance issues and of the role of commercial life-health firms in the health insurance market.

In Research Paper No. 9203, "Property-Casualty Insurance Markets," authors Lucy Huffman and David Bernstein review financial trends and public policy issues affecting the property-casualty insurance industry. The study offers an overview of the structure and financial condition of the industry and discusses economic and legal factors that raise public policy issues and prompt solvency concems, including the impact of the tort liability system on costs and nonmarket regulatory responses. The study also looks at competition in the insurance industry and summarizes performance issues in selected individual lines.

# Report on Social Security and the Public Debt 1

For the next 25 years, the social security program is expected to have average surpluses of .6 percent of Gross National Product (GNP), according to James E. Duggan's Research Paper No. 9102. After that, the senior economist says, deficits will reach 1.7 percent of GNP (4 percent after the

addition of health care). These deficits could result in large, unstable debt ratios and may affect future U.S. debt policy.

The study stresses the public debt implications of the long-run financial status of the program and presents three atternatives, or combinations thereof, for financing Social Security obligations.

# Revenue Impact of Proposed Capital Gains Tax Reductions 1

In recent years, a considerable amount of debate has centered on the likely effect of a decrease in the capital gains tax. While analysis of the issue has been split between two approaches—estimating aggregate responsiveness of capital gains realizations, as well as focusing on individual taxpayer responsiveness—neither has provided conclusive evidence to decide the issue.

Research Paper No. 9003, "The effect of Marginal Tax Rates on Capital Gains Revenue: Another Look at the Evidence," by Robert Gillingham and John S. Greenlees, focuses on aspects of the debate. The authors define the responsiveness of revenue to tax rates at the individual and aggregate

levels. Citing an analysis by the Congressional Budget Office they present an econometric data analysis procedure.

The study also includes time-series evidence incorporating revisions in the National Accounts and Flow of Funds data to demonstrate the effect of the Tax Reform Act of 1986 on the estimated relationship.

The aim of the paper is to give a better understanding of the relationship among capital gains tax realizations, revenues, and tax rates. And although analyses do not give conclusive evidence on the effect of proposed tax rate changes, the authors conclude that the evidence does not suggest that a tax reduction would decrease tax revenues.

\* \* \* \* \*

A related study concludes that a capital gains tax reduction would increase the number and amounts of such gains declared by taxpayers. And it would do so in sufficient amounts to increase tax revenues. Research Paper No. 9004, "An Econometric Model of Capital Gains Realization Behavior," by Robert Gillingham and John S. Greenlees, and by Kimberly D. Zieschang (Office of Prices, Bureau of Labor Statistics), explores the revenue impact of proposed reductions in capital gains taxation, as well as the expected response of taxpayers.

The marginal tax rate on long-term gains has a negative impact on both the proportion of taxpayers realizing capital gains and on the value of those gains declared, according to the study. The researchers further stated that there was no evidence that income switching as a result of the reductions

would offset expected tax revenue increases. The study includes taxpayer data covering three historical tax policy regimes that varied widely in their treatment of capital gains.

The authors supported their predictions by citing a 1988 study finding, in the past, the majority of capital gains were never realized for tax purposes. That 1988 study found only 3.1 percent of the stock of accrued gains realized each year between 1960-84. This large flow of unrealized gains, according to the authors, supports their conclusion that a reduction in the capital gains tax would yield a permanent increase in government revenues.

(For related studies on the capital gains tax issue, see Research Paper Nos. 8801 and 9002.)

# Glossary

## Expanded, With References to Applicable Sections and Tables

Accrued discount (SBN-1, -2, -3)—Interest that accumulates on savings bonds from the date of purchase until the date of redemption or final maturity, whichever comes first. Series A, B, C, D, E, EE, F, and J are discount or accrual type bonds—meaning principal and interest are paid when bonds are redeemed. Series G, H, HH, and K are current-income bonds, and the semiannual Interest paid to their holders is not included in accrued discount.

Amounts outstanding and in circulation (USCC)—includes all issues by the Bureau of the Mint purposely intended as a medium of exchange. Coins sold by the Bureau of the Mint at premium prices are excluded; however, uncirculated coin sets sold at face value plus handling charge are included.

Average discount rate (PDO-2, -3)—In Treasury bill auctions, purchasers tender competitive bids on a discount rate basis. The average discount rate is the weighted, or adjusted, average of all bids accepted in the auction.

Budget authority ("Federal Fiscal Operations")—Congress passes laws giving budget authority to Government entities, which gives the agencies the power to spend Federal funds. Congress can stipulate vanous criteria for the spending of these funds. For example, Congress can stipulate that a given agency must spend within a specific year, number of years, or any time in the future.

The basic forms of budget authority are appropriations, authority to borrow, and contract authority. The period of time during which Congress makes funds available may be specified as 1-year, multiple-year, or no-year. The available amount may be classified as either definite or indefinite; a specific amount or an unspecified amount can be made available. Authority may also be classified as current or permanent. Permanent authority requires no current action by Congress.

Budget deficit—The total, cumulative amount by which budget outlays (spending) exceed budget receipts (income).

Capital ("Federal Obligations")-Assets, such as land, equipment, and financial reserves.

Cash management bills (PDO-2)—Marketable Treasury bills of irregular maturity lengths, sold periodically to fund short-term cash needs of Treasury. Their sale, having higher minimum and multiple purchase requirements than those of other issues, is generally restricted to competitive bidders.

Competitive tenders ("Treasury Financing Operations")—A bid to purchase a stated amount of one issue of Treasury securities at a specified yield or discount. The bid is accepted if it is within the range accepted in the auction. (See Noncompetitive tenders.)

Coupon issue-The issue of bonds or notes (public debt).

Currency no longer issued (USCC)—Old and new series gold and silver certificates, Federal Reserve notes, national bank notes, and 1890 Series Treasury notes.

Current income bonds ("U.S. Savings Bonds and Notes")-Bonds paying semiannual interest to holders. Interest is not included in accrued discount.

Debt outstanding subject to limitation (FD-6)—The debt incurred by the Treasury subject to the statutory limit set by Congress. Until World War I, a specific amount of debt was authorized to each separate security Issue. Beginning with the Second Liberty Loan Act of 1917, the nature of the limitation was modified until, in 1941, it developed into an overall limit on the outstanding Federal debt. In 1991, the debt limit was \$4,145,000 million; the limit may change from year to year.

The debt subject to limitation includes most of Treasury's public debt except securities issued to the Federal Financing Bank, upon which

there is a limitation of \$15 billion, and certain categories of older debt (totaling approximately \$595 million as of February 1991).

Discount-The interest deducted in advance when purchasing notes or bonds. (See Accrued discount)

Discount rate (PDO-2)—The difference between par value and the actual purchase price paid, annualized over a 360-day year. Because this rate is less than the actual yield (coupon-equivalent rate), the yield should be used in any comparison with coupon issue securities.

Dollar coins (USCC)-Include standard silver and nonsilver coins.

Domestic series (FD-2)—Nonmarketable, interest and non-interestbearing securities issued periodically by Treasury to the Resolution Funding Corporation (RFC) for investment of funds authorized under section 21B of the Federal Home Loan Bank Act (12 U.S.C. 1441b).

Federal intrafund transactions ("Federal Fiscal Operations")—Intrabudgetary transactions in which payments and receipts both occur within the same Federal fund group (Federal funds or trust funds).

Federal Reserve notes (USCC)—Issues by the U.S. Government to the public through the Federal Reserve banks and their member banks. They represent money owed by the Government to the public. Currently, the item "Federal Reserve notes—amounts outstanding" consists of new series issues. The Federal Reserve note is the only class of currency currently issued.

Foreign ("Foreign Currency Positions," IFS-2, -3)—(international) Locations other than those included under the definition of the United States. (See United States.)

ForeIgner ("Capital Movements," IFS-2)—All institutions and individuals living outside the United States, including U.S. citizens living abroad, and branches, subsidiaries, and other affiliates abroad of U.S. banks and business concerns; central governments, central banks, and other official institutions of countries other than the United States, and international and regional organizations, wherever located. Also, refers to persons in the United States to the extent that they are known by reporting institutions to be acting for foreigners.

Foreign official Institutions ("Capital Movements")—Includes central governments of foreign countries, including all departments and agencies of national governments; central banks, exchange authorities, and all fiscal agents of foreign national governments that undertake activities similar to those of a treasury, central bank, or stabilization fund; diplomatic and consular establishments of foreign national governments; and any international or regional organization, including subordinate and affiliate agencies, created by treaty or convention between sovereign states.

Foreign public borrower ("Capital Movements")—Includes foreign official institutions, as defined above, the corporations and agencies of foreign central governments, including development banks and institutions, and other agencies that are majority-owned by the central government or its departments; and state provincial and local governments of foreign countries and their departments and agencies.

Foreign-targeted issue (PDO-1, -3)—Foreign-targeted issues were notes sold between October 1984 and February 1986 to foreign institutions, foreign branches of U.S. institutions, foreign central banks or monetary authorities, or to international organizations in which the United States held membership. Sold as companion issues, they could be converted to domestic (normal) Treasury notes with the same maturity and interest rates. Interest was paid annually.

Fractional coins (USCC)—Coins minted In denominations of 50, 25, and 10 cents, and minor coins (5 cents and 1 cent).

# Glossary

Government account series (FD-2)—Certain trust fund statutes require the Secretary of the Treasury to apply monies held by these funds toward the issuance of nonmarketable special securities. These securities are sold directly by Treasury to a specific Government agency, trust fund, or account. Their rate is based on an average of market yields on outstanding Treasury obligations, and they may be redeemed at the option of the holder. Roughly 80 percent of these are issued to five holders: the Federal old-age and survivors insurance trust fund; the civil service retirement and disability fund; the Federal hospital insurance trust fund; the military retirement fund; and the unemployment trust fund;

International Monetary Fund ("Exchange Stabilization Fund," IFS-1)—(IMF) Established by the United Nations, the IMF promotes international trade, stability of exchange, and monetary cooperation. Members are allowed to draw from the fund.

Interfund transactions ("Federal Fiscal Operations").-Trans-actions in which payments are made from one fund group (either Federal funds or trust funds) to a receipt account in another group.

Intrabudgetary transactions ("Federal Fiscal Operations").-These occur when payment and receipt both occur within the budget, or when payment is made from off-budget Federal entities whose budget authority and outlays are excluded from the budget totals.

Majority-owned foreign partnerships ("Foreign Currency Positions")--Partnerships organized under the laws of a foreign country in which one or more U.S. nonbanking concerns or nonprofit institutions, directly or indirectly, owns more than 50 percent profit interest.

Majority-owned foreign subsidiaries ("Foreign Currency Positions")--Foreign corporations in which one or more nonbanking business concerns or nonprofit institutions located in the United States, directly or indirectly, owns stock with more than 50 percent of the total combined voting power, or of the total value of all classes of stock.

Matured non-interest-bearing debt (SBN-1, -2, -3)—The value of outstanding savings bonds and notes that have reached final maturity and no longer earn interest. Includes all Series A-D, F, G, J, and K bonds. Series E bonds (issued between May 1941 and November 1965), Series EE (issued since January 1980), Series H (issued from June 1952 through December 1979), and savings notes issued between May 1967 and October 1970 have a final maturity of 30 years. Series HH bonds (issued since January 1980) mature after 20 years.

Noncompetitive tenders ("Treasury Financing Operations")—Offers by an investor to purchase Treasury securities at the price equivalent to the weighted average discount rate or yield of accepted competitive tenders in a Treasury auction. Noncompetitive tenders are always accepted in full.

Obligation ("Federal Obligations")—An unpaid commitment to acquire goods or services.

Off-budget Federal entities ("Federal Fiscal Operations").-Federally owned and controlled entities whose transactions are excluded from the budget totals under provisions of law. Their receipts, outlays, and surplus or deficit are not included in budget receipts, outlays, or deficits. Their budget authority is not included in lotals of the budget.

Own foreign offices ("Capital Movements")—Refers to U.S. reportlng Institutions' parent organizations, branches and/or majority-owned subsidiaries located outside the United States.

Outlays ("Federal Fiscal Operations")—(expenditures, net disbursements) Payments on obligations in the form of cash, checks, the issuance of bonds or notes, or the maturing of interest coupons.

Par value-The face value of bonds or notes, including interest.

Quarterly financing ("Treasury Financing Operations").-- Treasury has historically offered packages of several "coupon" security issues on the 15th of February, May, August, and November, or on the next working day. These issues currently consist of a 3-year note, a 10-year

note, and a 30-year bond. Treasury sometimes offers additional amounts of outstanding long-term notes or bonds, rather than selling new security issues. (See Reopening.)

Recelpts ("Federal Fiscal Operations")—Funds collected from selling land, capital, or services, as well as collections from the public (budget receipts), such as taxes, fines, duties, and fees.

Reopening (PDO-3, -4).-The offer for sale of additional amounts of outstanding issues, rather than an entirely new Issue. A reopened issue will always have the same maturity date, CUSIP-number, and interest rate as the original issue.

Short-term ("Foreign Currency Positions").--Securities maturing In 1 year or less.

Special drawing rights ("Exchange Stabilization Fund," IFS-1)—International assets created by IMF that serve to increase international liquidity and provide additional international reserves. SDRs may be purchased and sold among eligible holders through IMF. (See IMF.)

SDR allocations are the counterpart to SDRs issued by IMF based on members' quotas in IMF. Although shown in exchange stabilization fund (ESF) statements as liabilities, they must be redeemed by ESF only in the event of liquidation of, or U.S. withdrawal from, the SDR department of IMF or cancellation of SDRs.

SDR certificates are issued to the Federal Reserve System against SDRs when SDRs are legalized as money. Proceeds of monetization are deposited into an ESF account at the Federal Reserve Bank of New York.

Spot ("Foreign Currency Positions")-Due for receipt or delivery within 2 workdays.

State and local government series (FD-2)—(SLUGs) Special non-marketable certificates, notes, and bonds offered to State and local governments as a means to invest proceeds from their own tax-exempt financing. Interest rates and maturities comply with IRS arbitrage provisions. SLUGS are offered in both time deposit and demand deposit forms. Time deposit certificates have maturities of up to 1 year. Notes mature in 1 to 10 years and bonds mature in more than 10 years. Demand deposit securities are 1-day certificates rolled over with a rate adjustment daily.

Statutory debt limit (FD-6)—By Act of Congress there is a limit, either temporary or permanent, on the amount of public debt that may be outstanding. When this limit is reached, Treasury may not sell new debt issues until Congress increases or extends the limit. For a detailed listing of changes in the limit since 1941, see the Budget of the United States Government. (See Debt outstanding subject to limitation.)

STRIPS (PDO-1, -3)—Separate Trading of Registered Interest and Principal Securities. Long-term notes and bonds may be divided into principal and interest-paying components, which may be transferred and sold in amounts as small as \$1,000. STRIPS are sold at auction at a minimum par amount, varying for each issue. The amount is an arithmetic function of the issue's interest rate.

Treasury bills-The shortest term Federal security (maturity dates normally varying from 3 to 12 months), they are sold at a discount.

Trust fund transaction ("Federal Fiscal Operations")—An Intrabudgetary transaction in which both payments and receipts occur within the same trust fund group.

United States—Includes the 50 States, District of Columbia, Commonwealth of Puerto Rico, American Samoa, Midway Island, Virgin Islands, Wake Island, and all other territories and possessions.

U.S. notes (USCC)-Legal tender notes of five different issues: 1862 (\$5-\$1,000 notes); 1862 (\$1-\$2 notes); 1863 (\$5-\$1,000 notes); 1863 (\$1-\$10,000 notes); and 1901 (\$10 notes).

Worldwide ("Foreign Currency Position")—Sum of "United States" and "foreign" trade.

#### Treasury Bulletin User Survey

In order to assist the Financial Reports Branch in our efforts to revise and Improve our publication, please take a few moments to answer the following questions. Your responses will enable us to enhance the quality of the bulletin in order to meet your needs better.

Name/organization, telephone number:_		
Job function:	And And	
How often do you use the "Treasury Bul	letin"? [] Dally [] Weekly [] Monthly	[] Quarterly [] Yearly
For what purpose? [] Investment purposes [] Report Prepare	aration [] School/Work [] Economic Predicti	ons [] Other
How valuable is the "Treasury Bulletin" t	o your work?	
What sections do you use?  [] Articles [] Profile of the Economy [] Federal Fiscal Operations [] Federal Obligations [] Account of the U.S. Treasury [] Federal Debt [] Treasury Financing Operations [] Public Debt Operations	[] U.S. Savings Bonds & Notas [] Ownership of Federal Securities [] Market Yields [] Federal Agencies' Financial Reports [] International Financial Statistics [] Capital Movements [] Foreign Currency Positions [] Exchange Stabilization Fund	[] Consolidated Financial Statements of the United States Government [] Statement of Liabilities/Other Financial Commitments [] Trust Fund Reports [] U.S. Currency & Coin [] Glossary
is the information presented in a manne	r you can use/understand? [] Yes [] No	
Do you find the graphs helpful? [] Yes	[] No	
[] more policy papers [] interviews with Treasury officials [] more data; explain [] better presentation; explain	etin" provide? (check those that apply)	
easier to understand tables     computer data access     more graphs     expanded sections; which ones?		
[] other		
What other suggestions or comments do	you have for Improving the Treasury Bullet	in"?

We appreciate your participation in this survey.
