TREASURY BULLETIN

Department of the Treasury
Financial Management Service

Additional Financial Management Service Releases on Federal Finances

Sold on a subscription basis only (exceptions noted) by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.†

Daily Treasury Statement. Provides summary data on the Treasury's cash and debt operations for the Federal Government. Published each Federal working day. Subscription price: \$463.00 per year (domestic), \$578.75 (foreign).

Monthly Treasury Statement of Receipts and Outlays of the United States Government. Provides Federal budget results, including receipts and outlays of funds, the surplus or deficit, and the means of financing the deficit or disposing of the surplus. Preparation based on agency reporting. Subscription price: \$35.00 per year (domestic), \$43.75 (foreign).

Consolidated Financial Statements of the United States Government (annual). Provides information about Government financial operations on the accrual basis. S/N 048-000-00484-9. Single copy price: \$4.50 (domestic), \$5.63 (foreign).

United States Government Annual Report and Appendix. Annual Report presents budgetary results at the summary level. Appendix presents the individual receipt and appropriation accounts at the detail level. Annual Report single copy price: \$2.75. Appendix free from Financial Management Service.

† *Subscription order form on inside back cover.*

The illustration is a blue and white line drawing. On the left, a series of tall, fluted classical columns recede into the distance, creating a sense of depth. The columns are supported by a series of steps that lead up to a platform. In the background, the Washington Monument stands prominently against a dark blue sky. To the right of the monument, there are several trees with detailed foliage. The overall style is that of a technical or architectural drawing.

TREASURY BULLETIN

Compiled and Published by Financial Management Service

Office of the Secretary • Department of the Treasury • Washington, D.C.

The Treasury Bulletin is for sale by the Superintendent of Documents,
U.S. Government Printing Office, Washington, D.C. 20402

The Treasury Bulletin is issued quarterly in March, June, September, and December by the Financial Management Service. The Reports Management Division, Financial Information, compiles articles of general interest as well as statistical data from sources within several Treasury departmental offices and bureaus. Readers can contact the Financial Reports Branch at (202) 874-9913 or 874-9914 to inquire about any of the published information. Suggestions are welcome.

**FINANCIAL
OPERATIONS**

Profile of the Economy

CHARTS POE-A.--Growth of Real Gross Domestic Product

Real Gross Domestic Product (GDP) grew at a 4.5 percent annual rate in the final quarter of 1994, bringing growth across all four quarters to 4.0 percent, the strongest since 1987.

Fourth-quarter growth was led by business investment and consumer spending. Investment rose at a 17.6 percent annual rate, with spending on equipment up at more than a 20.0 percent pace and spending on structures increasing at a 9.0 percent rate. Consumer purchases were particularly strong for motor vehicles and for other discretionary-type durable goods. Inventory growth also accelerated.

Growth was held down by a retreat in Federal defense spending after a one-time boost in the third quarter. The net export deficit was also a drag on growth.

Inflation, as measured by the fixed-weighted price index for GDP, was at a low 2.6 percent rate in the final quarter, down from 3.0 percent over the first three quarters.

(Percent change, quarterly annual rate)

(Percent change, fourth quarter to fourth quarter)

CHARTS POE-B.-- The Federal Budget Deficit

(As a percent of Gross Domestic Product)

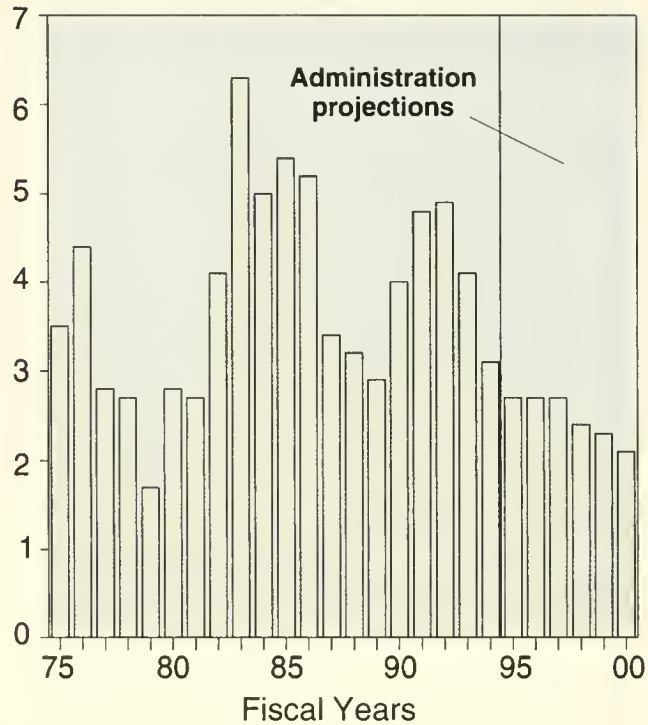

In fiscal 1994, the Federal deficit fell to \$204 billion, which was a significant drop from the previous 2 fiscal years. That figure was \$51 billion lower than the \$255 billion deficit in fiscal 1993 and \$86 billion below the record \$290 billion deficit in fiscal 1992.

Strong economic growth and passage of the Omnibus Budget Reconciliation Act of 1993 were responsible for the improvement. Outlays rose by only 3.7 percent in fiscal 1994, while revenues expanded by 9.0 percent.

As a share of GDP, the deficit dropped from a recent high of 4.9 percent in fiscal 1992 to just 3.1 percent in the fiscal year just ended.

In the new fiscal 1996 budget, the Administration projects that the deficit will decline to \$193 billion in fiscal 1995. This would mark the third straight year of deficit reduction and the first such successive declines since the Truman Administration.

By fiscal 2000, the deficit is expected to decline to just 2.1 percent of GDP, the lowest since 1979.

(In billions of dollars)

CHARTS POE-C.--Net Saving and Investment

National saving (net of depreciation) rose to a still low 3.3 percent of the net national product (NNP) in the first three quarters of 1994 from 2.1 percent in 1993 and a postwar trough of 1.2 percent in 1992. The saving rate averaged 8.0 percent or more in the 1950's through the 1970's. The main source of the recent improvement is a reduction of Government dissaving to 3.3 percent of NNP by 1994 from 6.0 percent in 1992. Government dissaving is still considerably greater than in the 1950's and 1960's, when it accounted for less than 1.0 percent of NNP. Private saving, at 6.6 percent last year, is down from 7.0 percent in 1993 and below averages of more than 9.5 percent in the 1960's and 1970's. Total net investment was up to 2.8 percent of NNP in the first three quarters of 1994 from 2.1 percent in 1993 and a low of 1.4 percent in 1992. Net investment had averaged over 8.0 percent until the 1980's. In 1994, supplemented by foreign inflows, domestic investment rose more sharply to 5.1 percent of NNP from 3.7 percent in 1993 and 2.4 percent in 1992. Domestic investment had averaged near 8.0 percent in the 1950's through the 1970's.

Net National Saving*
(As a percent of net national product)

* Through first three quarters of 1994

** Includes pension funds of State and local governments

Net National Investment*
(As a percent of net national product)

* Through first three quarters of 1994.

** Includes U.S. net foreign investment (or disinvestment).

CHARTS POE D.-- Real Disposable Personal Income

Growth of personal income improved in 1994, reflecting stronger job growth as well as an increase in interest income after declines tied to falling interest rates over the prior 3 years.

Real disposable (after-tax) personal income rose by 4.3 percent through the four quarters of 1994, up from 1.6 percent during 1993. In the final quarter of 1994, income growth soared at a 7.4 percent annual rate. This gain was the best performance for any quarter since 1985, with the exception of late 1992 when figures were artificially boosted by a shift in timing of incomes for tax considerations.

(Percent change, fourth quarter to fourth quarter)

* Income for fourth quarter, 1992, adjusted for shifts in bonus payments from 1993 into 1992 to avoid higher taxes

** Based on the advance estimate for the fourth quarter

Real Consumer Spending

(Percent change, fourth quarter to fourth quarter)

Real consumer spending rose by 3.4 percent in 1994. This trend followed the third successive year of growth.

The spending pattern advanced at a 4.6 percent annual rate during the fourth quarter of 1994 and personal incomes strengthened.

The personal savings rate averaged 4.1 percent in 1994 and 1993 respectively, compared with readings of roughly 5.0 percent in the prior 2 years.

CHARTS POE-E.-- Current Account Balance

The current account is the most comprehensive measure of U.S. international transactions. The current account deficit widened from a recent low of \$50 billion in 1991, excluding Desert Storm contributions, to an annual rate of \$149 billion in the first three quarters of 1994. Much of this reflects the economic recovery here, which has been drawing in imports at a faster pace than the rate of expansion in exports.

In the first three quarters of 1994, the deficit on trade in goods was \$164 billion at an annual rate, compared with \$133 billion in 1993. The surplus of \$57 billion in services was in line with figures for 1992 and 1993.

The balance on income payments, which includes interest, dividends, and direct investment income, fell into deficit to about \$10 billion at an annual rate. In 1993, the investment income balance was in surplus by \$4 billion.

(All charts in billions of dollars)

* First three quarters of 1994 are at an annual rate

Merchandise

Services

Investment Income

CHARTS POE-F.--Leading Indicators

(Index: 1987 = 100)

The index of leading economic indicators showed very little change through most of 1994. Except for gains of 0.6 percent in both March and August, monthly increases have ranged between 0.0 and 0.3 percent.

This pattern is still consistent with growth in the economy. The leading index was designed to point to economic turning points, and the small changes suggest that growth should continue at a moderate pace.

The composite index is comprised of 11 components. In most months last year, more than half of the components made positive contributions to the index. Rising sensitive materials prices had been consistently positive earlier in the year but slowed in the second half, while the real money supply decreased over the last five months of 1994.

The index of coincident indicators, which tracks current economic activity, shows that the expansion is on a steady path. Except for a few slight declines due to special factors, such as the earthquake or floods, this measure has been rising since early 1993.

*Shaded areas represent periods of recession.

CHARTS POE-G.--Consumer and Producer Prices

Inflation remained extremely favorable through 1994. The consumer price index (CPI) rose by 2.7 percent during the 12 months of 1994, the same as 1993. During the fourth quarter of 1994, the CPI grew modestly at a 2.2 percent annual rate.

Core inflation, or the CPI less food and energy, slowed to 2.6 percent in 1994 compared with 3.2

percent in 1993. This pace was the lowest in nearly 30 years and the best performance since 1965.

The total producer price index (PPI) for finished goods rose by 1.7 percent, while the core index increased by 1.6 percent over all of 1994. Growth in the total PPI and the core rate remained small in 1994, but both were up from the 0.2 percent total and 0.4 percent core increases during 1993.

Consumer Prices
(Percent change from a year earlier)

Producer Prices
(Percent change from a year earlier)

CHARTS POE-H.-- Employment and Unemployment

In 1994, job growth accelerated and unemployment fell. Employment growth as measured by the survey of nonfarm establishments averaged 290,000 a month in 1994, compared with average monthly gains of 194,000 in 1993 and 96,000 in 1992. New jobs totaled almost 3-1/2 million over all of 1994.

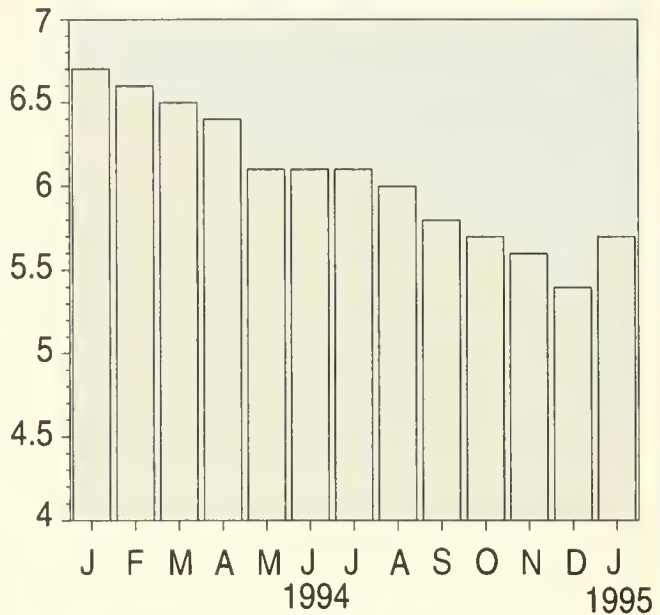

Employment growth was especially strong in the private sector, which accounted for more than nine out of every ten new jobs.

Service industries added the most new jobs. Employment in construction rose by more than 300,000, and jobs in manufacturing increased by 276,000.

In 1994, the civilian unemployment rate fell from 6.7 percent in January to 5.4 percent in December, the lowest rate in 4-1/2 years.

So far in 1995, employment has grown slowly. In January, 134,000 jobs were added and the unemployment rate was up to 5.7 percent.

Civilian Unemployment Rate (In percentages)

Establishment Employment (Monthly change in thousands)

Nonfarm Productivity

(Percent change, fourth quarter to fourth quarter)

CHARTS POE-I.-- Nonfarm Productivity and Unit Labor Costs

Growth of nonfarm productivity, or output per workhour, slowed to a 1.3 percent annual rate during the first three quarters of 1994 compared with 1.8 percent during all of 1993 and 3.2 percent in 1992. Declines in the second quarter offset increases approaching 3.0 percent in the first and third quarters.

Productivity in manufacturing remained strong, rising at a 5.2 percent pace over the first three quarters of 1994, following gains of 3.8 percent during 1993 and 2.1 percent during 1992.

Nonfarm unit labor costs rose by a narrow 0.6 percent during 1993, the smallest advance in 10 years. Growth picked up to a 2.0 percent annual rate during the first three quarters of 1994, as weak productivity offset only a small portion of the fairly modest 3.3 percent annual rate rise in hourly compensation. Even so, growth of unit labor costs remains subdued.

Unit Labor Costs

(Percent change, fourth quarter to fourth quarter)

* Percent change from fourth quarter 1993 to third quarter 1994 at an annual rate

CHART POE-J.--Interest Rates

During 1993, long-term interest rates declined dramatically in response to the deficit reduction program, low inflation, and moderate economic growth. As a result, confidence rose and economic growth strengthened rapidly. Private demands for credit increased and interest rates began to rise.

The economy continued to expand through 1994 and into 1995. The Federal Reserve Board made seven tightening moves between last February and this Feb-

ruary as a pre-emptive measure to avoid inflation. The Federal Reserve Board raised both the discount rate and the target for the Federal funds rate.

These actions have translated into a rise of roughly 300 basis points, or 3 percentage points, in short-term rates. Long-term rates have also increased since the lows reached in October 1993. In early February, the 30-year Treasury bond was just below 8 percent.

Selected Interest Rates (In percentages; Weekly data*)

Short Term

* Average for week ending Friday, Federal funds ending Wednesday

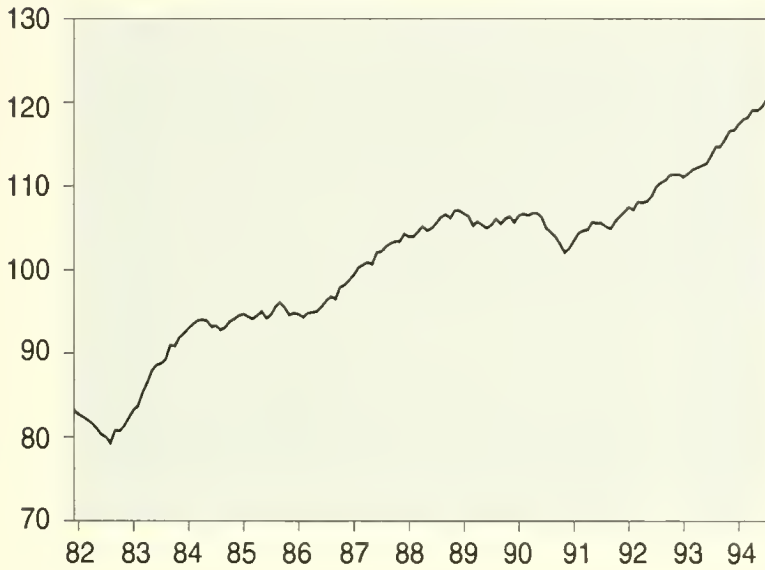

Long Term

CHARTS POE-K.-- Industrial Production and Capacity Utilization

Industrial Production

(Index, 1987 = 100)

Monthly Percent Change

Over the 12 months of 1994, industrial production in manufacturing, mining, and utilities rose by 5.8 percent, following the biggest increase in 7 years. Output in manufacturing edged up by 6.7 percent during 1994 and accounted for 85.0 percent of the total. This increase was spurred by strong growth for computer equipment, electrical machinery, metals, and rubber and plastics.

Industrial capacity grew by 2.8 percent in 1994. With output rising faster, the industrial capacity utilization rate shot up to 85.4 percent by December, the highest level in 15 years. The utilization rate in manufacturing was at 85.1 percent, below the 1989 high of 85.2 percent.

The tightest conditions at yearend were in the primary processing industries, such as steel, textiles, and paper, which were operating at 90.0 percent of capacity. In December of 1994, the advanced processing industries, including apparel, furniture, and autos, averaged utilization rates of only 83.0 percent.

Industrial Capacity Utilization

(In percentages)

INTRODUCTION: Federal Fiscal Operations

Budget authority usually takes the form of appropriations that allow *obligations* to be incurred and payments to be made. Reappropriations are Congressional actions that extend the availability of unobligated amounts that have expired or would otherwise expire. These are counted as new budget authority in the fiscal year of the legislation in which the reappropriation act is included, regardless of when the amounts were originally appropriated or when they would otherwise lapse.

Obligations generally are liquidated by the issuance of checks or the disbursement of cash--*outlays*. Obligations may also be liquidated (and outlays recorded) by the accrual of interest on public issues of Treasury debt securities (including an increase in redemption value of bonds outstanding); or by the issuance of bonds, debentures, notes, monetary credits, or electronic payments.

Refunds of collections generally are treated as reductions of collections, whereas payments for earned-income tax credits in excess of tax liabilities are treated as outlays. Outlays during a fiscal year may be for payment of obligations incurred in prior years or in the same year. Outlays, therefore, flow in part from unexpended balances of prior year budget authority and from budget authority provided for the year in which the money is spent. Total outlays include both budget and off-budget outlays and are stated net of offsetting collections.

Receipts are reported in the tables as either budget receipts or offsetting collections. They are collections from the public, excluding receipts offset against outlays. These, also called governmental receipts, consist mainly of tax receipts (including social insurance taxes), receipts from court fines, certain licenses, and deposits of earnings by the Federal Reserve system. Refunds of receipts are treated as deductions from gross receipts.

Offsetting collections from other Government accounts or the public are of a business-type or market-oriented nature. They are classified as either collections credited to appropriations or fund accounts, or offsetting receipts (i.e., amounts deposited in receipt accounts). The former normally can be used without appropriation act by Congress. These occur in two instances: (1) when authorized by law, amounts collected for materials or services are treated as reimbursements to appropriations, and (2) in the three types of revolving funds (public enterprise, intragovernmental, and trust); collections are netted against spending, and outlays are reported as the net amount.

Offsetting receipts in receipt accounts cannot be used without appropriation. They are subdivided into two categories: (1) proprietary receipts, or collections from the public, offset against outlays by agency and by function, and (2) intra-governmental funds, or payments into receipt accounts from governmental appropriation or fund accounts. They finance operations within and between Government agencies and are credited with collections from other Government accounts.

Intrabudgetary transactions are subdivided into three categories: (1) interfund transactions--payments are from one fund group (either Federal funds or trust funds) to a receipt account in the other fund group; (2) Federal intrafund transactions--payments and receipts both occur within the Federal fund group; and (3) trust intrafund transactions--payments and receipts both occur within the trust fund group.

Offsetting receipts are generally deducted from budget authority and outlays by function, subfunction, or agency. There are four types of receipts, however, that are deducted from budget totals as undistributed offsetting receipts. They are: (1) agencies' payments (including payments by *off-budget Federal entities*) as employers into employees'

retirement funds; (2) interest received by trust funds; (3) rents and royalties on the Outer Continental Shelf lands; and (4) other interest (i.e., that collected on Outer Continental Shelf money in deposit funds when such money is transferred into the budget).

The Government has used the unified budget concept as a foundation for its budgetary analysis and presentation since 1969. The concept calls for the budget to include all of the Government's fiscal transactions with the public. Since 1971, however, various laws have been enacted removing several Federal entities from (or creating them outside of) the budget. Other laws have moved certain off-budget Federal entities onto the budget. Under current law, the off-budget Federal entities consist of the two Social Security trust funds, Federal old-age and survivors insurance, and Federal disability insurance.

Although an off-budget Federal entity's receipts, outlays, and surplus or deficit ordinarily are not subject to targets set by the congressional resolution, the Balanced Budget and Emergency Deficit Control Act of 1985 (commonly known as the Gramm-Rudman-Hollings Act) included off-budget surplus or deficit in calculating deficit targets under that act and in calculating excess deficit. Partly for this reason, attention has focused on both on- and off-budget receipts, outlays, and deficit of the Government.

Tables **FFO-1**, **FFO-2**, and **FFO-3** are published quarterly and cover 5 years of data, estimates for 2 years, detail for 13 months, and fiscal year-to-date data. They provide a summary of data relating to Federal fiscal operations reported by Federal entities and disbursing officers, and daily reports from the Federal Reserve banks. They also detail accounting transactions affecting receipts and outlays of the Government and off-budget Federal entities and their related effect on assets and liabilities of the Government. Data are derived from the Monthly Treasury Statement of Receipts and Outlays of the United States Government.

- Table **FFO-1** summarizes the amount of total receipts, outlays, and surplus or deficit, as well as transactions in Federal securities, monetary assets, and balances in Treasury operating cash.
- Table **FFO-2** includes on- and off-budget receipts by source. Amounts represent income taxes, social insurance taxes, net contributions for other insurance and retirement, excise taxes, estate and gift taxes, customs duties, and net miscellaneous receipts.
- Table **FFO-3** details on- and off-budget outlays by agency.
- Table **FFO-4** (Fall issue) summarizes internal revenue collections by States and other areas and by type of tax. Amounts reported are collections made in a fiscal year. They span several tax liability years because they consist of prepayments (i.e., estimated tax payments and taxes withheld by employers for individual income and Social Security taxes), of payments made with tax returns, and of subsequent payments made after tax returns are due or are filed (i.e., payments with delinquent returns or on delinquent accounts).

It is important to note that these data do not necessarily reflect the Federal tax burden of individual States. Amounts are reported based on the primary filing address provided by each taxpayer or reporting entity. For multistate corporations, the address may reflect only the State where such a corporation reported its taxes from a principal office rather than other States where income was earned or where individual income and Social Security taxes were withheld. In addition, an individual may reside in one State and work in another.

Summary of Budget Results for the First Quarter, Fiscal 1995

The Federal budget was in deficit by \$74.0 billion in the first fiscal quarter of 1995 (the fourth calendar quarter of 1994). That was narrower by \$17.5 billion than the deficit of \$91.0 billion in the corresponding quarter of fiscal 1994. That narrowing exaggerates the underlying improvement in the budget balance, however. Because the start of the current fiscal year fell on a weekend, some outlays that normally would have been recorded early in the fiscal year were shifted into fiscal 1994. Also, there was improvement of about \$4.0 billion in the deposit insurance account (covering outlays of the Resolution Trust Corporation and other deposit insurance agencies). Adjusting for these two special factors, improvement from a year earlier is reduced to about \$6-1/2 billion.

Total On- and Off-Budget Results and Financing of the U.S. Government

[In millions of dollars]

	Oct.-Dec.	Actual fiscal year to date
Total on- and off-budget results:		
Total receipts	307,507	307,507
On-budget receipts	231,327	231,327
Off-budget receipts	76,179	76,179
Total outlays	381,485	381,485
On-budget outlays	318,262	318,262
Off-budget outlays	63,224	63,224
Total surplus or deficit (-)	-73,979	-73,979
On-budget surplus or deficit (-)	-86,934	-86,934
Off-budget surplus or deficit (-)	12,956	12,956
Means of financing:		
Borrowing from the public	59,669	59,669
Reduction of operating cash	9,362	9,362
Other means	4,948	4,948
Total on- and off-budget financing	73,979	73,979

In early February, the Administration released its fiscal 1996 budget, including revised projections for the current fiscal year. These new figures show the deficit for all of fiscal 1995 declining to \$192.5 billion from \$203.2 billion in fiscal 1994, or a reduction of \$10.6 billion. Because the improvement in the first quarter was greater than the amount projected for the entire year, that implies some modest deterioration in the budget balance during the final three quarters of the fiscal year. A similar pattern is shown if deposit insurance outlays are excluded and if adjustment is made for the unusual timing of spending at the start of the fiscal year. On that basis, the budget projects a slight widening of the deficit for the entire fiscal year from fiscal 1994, versus the narrowing of \$6-1/2 billion on the books for the first quarter.

In the first quarter, the improvement in the deficit from a year earlier was the result of an increase in revenues of 7.1 percent and a more modest rise in outlays of about 3-3/4 percent, after adjustment to eliminate impacts of unusual timing and the swing in the deposit insurance account.

On the revenue side of the accounts, the major element of strength in the quarter was in the form of an 11.9 percent increase from a year earlier in corporate income tax receipts. That would indicate that the strong real economic growth recorded for the quarter translated into a sizable increase in corporate profits for which comprehensive figures are not yet available. Also up sharply were remittances to the Treasury of Federal Reserve earnings. Those earnings were boosted by the rise in short-term interest rates of more than 2.0 percentage points in the quarter from a year earlier. Withheld individual income and employment tax receipts rose by 5.4 percent, which were a bit smaller than might have been expected given the 6.6 percent increase in the underlying wage and salary tax base, as carried in the national income and product accounts.

Among outlay components, one of the sharpest increases was the 12.7 percent rise in net interest payments, reflecting the effects both of higher interest rates and a 5-1/4 percent increase from a year earlier in the volume of debt outstanding. For the entire fiscal year, the budget projects an increase of 15.4 percent in net interest outlays.

Moderating growth of overall outlays in the first quarter was a decrease of 8.8 percent in defense spending (about 5-1/2 percent if adjusted for unusual timing). Most of the reduction represented a drop of 14.4 percent in the procurement account which covers purchases of military equipment. The 5.3 percent decline in defense spending projected in the budget for the entire fiscal year is concentrated in procurement, with smaller cuts in defense personnel costs. The research, development, test, and evaluation account is projected to hold about flat in dollar terms (implying some decline in real terms) in fiscal 1995, while a slight increase is budgeted for operations and maintenance. A decline of one-fourth in procurement outlays from the peak in fiscal 1991 to fiscal 1994 was accompanied by sizable cutbacks in employment among defense contractors.

Also holding down total outlays in the first quarter was a drop of 36.1 percent in unemployment insurance costs. The economic assumptions underlying budget projections do not contain further reductions in the unemployment rate from the figure for the first quarter, so that declines in unemployment insurance benefit payments should narrow sharply as the fiscal year progresses. Figures for the first quarter also benefited from a small increase of 1.8 percent in Medicaid outlays. Increases are likely to be significantly larger during the remainder of the fiscal year, but the overall outlook for Medicaid spending has improved significantly. Compared with the budget projections of a year ago, the estimate of Medicaid spending in fiscal 1995 has been lowered by \$8.0 billion (8-1/4 percent).

Fourth-Quarter Receipts

The following capsule analysis of budget receipts, by source, for the fourth quarter of fiscal 1994 supplements fiscal data reported in the December issue of the "Treasury Bulletin." At the time of that issue's release, not enough data was available to analyze adequately collections for the quarter.

Individual income taxes—Individual income tax receipts were \$138.5 billion for the fourth quarter of fiscal 1994. This is an increase of \$6.0 billion over the comparable quarter for fiscal 1993. Withheld receipts increased by \$5.9 billion and non-withheld receipts increased by \$0.4 billion in this period. There was an increase of \$0.4 billion in refunds over the comparable fiscal 1993 quarter. There was an increase of \$0.1 billion in accounting adjustments between individual income tax receipts and the Social Security and Medicare trust funds over the comparable quarter in fiscal 1993.

Corporate income taxes—Net corporate receipts for the fourth quarter totaled \$34.2 billion. This was \$5.0 billion higher than net receipts for the comparable quarter of fiscal 1993. The \$5.0 billion figure consists of \$5.4 billion in higher estimated and final payments offset by \$0.4 billion in higher refunds. The increase in net receipts mainly reflects increased corporate profits.

Employment taxes and contributions—Employment taxes and contributions receipts for the fourth quarter were \$105.9 billion, an increase of \$7.3 billion over the comparable prior year quarter. Receipts to the Old-age Survivors Insurance, the Disability Insurance, and the Hospital Insurance trust funds increased by \$4.5 billion, \$0.5 billion, and \$2.7 billion, respectively. There was an accounting adjustment of \$0.8 billion for prior years' employment tax liabilities made in the fourth quarter of fiscal 1993, and a -\$0.1 billion adjustment in the fourth quarter of fiscal 1994.

Contributions for other insurance and retirement—Contributions for other retirement were \$1.2 billion for the fourth quarter. There was a negligible change in receipts from the fourth quarter of fiscal 1993. The growth in contributions will remain flat over the next few years as the number of employees covered by the Federal employees' retirement system (FERS) grows slowly relative to those covered under the civil service retirement system (CSRS).

Unemployment insurance—Unemployment insurance receipts for the fourth quarter were \$6.6 billion compared with \$6.9 billion for the comparable quarter of fiscal 1993. State taxes deposited in the U.S. Treasury decreased by \$0.3 billion. There were negligible changes in the Federal Unemployment Tax Act (FUTA) and railroad unemployment tax receipts, compared with the comparable quarter of fiscal 1993.

Excise taxes—Net excise tax receipts for the fourth quarter were \$15.7 billion compared with \$12.9 billion for the comparable quarter of fiscal 1993, an increase of \$2.8 billion over the prior-year level. Excise tax refunds were \$0.5 billion, a significant increase over the prior-year level. Gross excise tax receipts for the quarter were \$16.2 billion.

Estate and gift taxes—Estate and gift tax receipts were \$3.6 billion for the fourth quarter. This represents a decrease of \$1.2 billion over the previous quarter and an increase of \$0.5 billion over the same quarter in the previous year.

Customs duties—Customs receipts net of refunds were \$5.6 billion for the fourth quarter. This is an increase of \$0.4 billion from the comparable prior year quarter. It is due to an increase in imports.

Miscellaneous receipts—Net miscellaneous receipts for the fourth quarter were \$6.8 billion, an increase of \$1.7 billion over the comparable prior year quarter. The bulk of the increase is attributable to higher deposits of Federal Reserve earnings.

Total	1,276,466,776	1,063,650,505	184,480,268	869,406,129	4,193,751	5,570,356	154,204,684	15,606,793	43,004,794

¹ Receipts in the various States do not indicate the Federal tax burden of each since, in many instances, taxes are collected in one State from residents of another State. For example, withholding taxes reported by employers located near State lines may include substantial amounts withheld from salaries of employees who reside in neighboring States. Also, the taxes of some corporations are paid from a principal office, although their operations may be located in another State, or throughout several States.

² Collections of individual income tax (withheld and not withheld) include old-age, survivor's, disability, and hospital insurance taxes on salaries and wages (FICA) and self-employment income (SECA).

³ Includes fiduciary income tax collections of \$6.2 billion.

⁴ Includes taxes of \$372.4 million on unrelated business income of exempt organizations (Forms 990T).

⁵ Represents IRS transfer of the Presidential Election Campaign check-off option on individual

income tax returns processed during the fiscal year ended September 30, 1994, of \$3 per single return and \$3 or \$6 per joint return from the Individual Income Withholding Receipt Account Number 20-0101 to account number 20-5081. A total of \$69.7 million was designated on 16.3 million returns.

⁶ Amounts not classified by State or district as of the end of the fiscal year. This includes tax payments made to banks under the Federal Tax Deposit (FTD) System. These payments are included in collections but are not classified by district until applied to taxpayer accounts. Also included are credits allowable on income tax returns for certain gasoline, diesel, and special motor fuel tax payments and for excess payments under the Federal Insurance Contributions Act.

Note.--Details may not add to totals due to rounding. Amounts reflect adjustments made to data reported in prior years. Negative figures are displayed when prior year adjustments exceed current year receipts.

INTRODUCTION: Federal Obligations

The Federal Government controls the use of funds through *obligations*. Obligations are recorded when the Government makes a commitment to acquire goods or services. Obligations are the first of four key events that characterize the acquisition and use of resources: order, payment, delivery, and consumption. In general, they consist of orders placed, contracts awarded, services received, and similar transactions requiring the disbursement of money.

The obligational stage of a Government transaction is a strategic point in gauging the impact of the Government's operations on the national economy because it frequently represents a Government commitment that stimulates business investments, such as inventory purchases and employment. Though payment may not occur for

months after the Government places its order, the order itself can cause immediate pressure on the private economy.

An obligation is classified by the nature of the transaction, without regard to its ultimate purpose. For example, all salaries and wages are reported as personnel compensation, whether the services are used in current operations or in the construction of capital items.

Federal agencies often do business with one another. In doing so, the "buying" agency records obligations and the "performing" agency records reimbursements. In table **FO-1**, these transactions are presented. Conversely, table **FO-2** shows only those transactions incurred outside the Federal Government.

TABLE FO-1.--Gross Obligations Incurred Within and Outside the Federal Government by Object Class, Sept. 30, 1994

(In millions of dollars. Source: Standard Form 225, Report on Obligations, from agencies)

Object class	Gross obligations incurred		Total (3)

Refunds	448	-	448
Other:			
Unvouchered	2,417	97	2,514
Undistributed U.S. obligations	9,122	10,940	20,062
Gross obligations incurred ¹	1,720,724	258,639	1,979,363
Gross obligations incurred (as above)			1,979,363
Deduct			
Advances, reimbursements, other income, etc.			-383,043
Offsetting receipts			-270,904
Net obligations incurred			1,325,416

¹ For Federal budget presentation a concept of "net obligations incurred" is generally used. This concept eliminates transactions within the Government and revenue and reimbursements from the public, which by statute may be used by Government agencies without appropriation action

by Congress. Summary figures on this basis follow. (Data are on the basis of Reports on Obligations presentation and therefore may differ somewhat from the "Budget of the U.S. Government.")

INTRODUCTION: Source and Availability of the Balance in the Account of the U.S. Treasury

The Treasury's operating cash is maintained in accounts with the Federal Reserve banks (FRBs) and branches, as well as in tax and loan accounts in other financial institutions. Major information sources include the Daily Balance Wire received from the FRBs and branches, and electronic transfers through the Letter of Credit Payment, Fedline Payment, and Fedwire Deposit Systems. As the FRB accounts are depleted, funds are called in (withdrawn) from thousands of tax and loan accounts at financial institutions throughout the country.

Under authority of Public Law 95-147, Treasury implemented a program on November 2, 1978, to invest a portion of its operating cash in obligations of depositories maintaining tax and loan accounts. Under the Treasury tax and loan investment program, depository financial institutions select the manner in which they will participate. Financial institutions wishing to retain funds deposited into their tax and loan accounts in interest-bearing obligations participate under the Note

Option. The program permits Treasury to collect funds through financial institutions and to leave the funds in Note Option depositories and in the financial communities in which they arise until Treasury needs the funds for its operations. In this way, Treasury is able to neutralize the effect of its fluctuating operations on Note Option financial institution reserves and on the economy. Likewise, those institutions wishing to remit the funds to the Treasury's account at FRBs do so under the Remittance Option.

Deposits to tax and loan accounts occur as customers of financial institutions deposit tax payments, which the financial institutions use to purchase Government securities. In most cases, this involves a transfer of funds from a customer's account to the tax and loan account in the same financial institution. Also, Treasury can direct the FRBs to invest excess funds in tax and loan accounts directly from the Treasury account at the FRBs.

¹ Represents transfers from tax and loan note accounts, proceeds from sales of securities other than Government account series, and taxes

² Represents checks paid, wire transfer payments, drawdowns on letters of credit, redemptions of securities other than Government account series, and investment (transfer) of excess funds out of this account to the tax and loan note accounts.

³ Taxes eligible for credit consist of those deposited by taxpayers in the tax and loan depositories

as follows: Withheld income taxes beginning March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; a number of excise taxes beginning July 1953; estimated corporation income taxes beginning April 1967; all corporation income taxes due on or after Mar. 15, 1968; Federal Unemployment Tax Act taxes beginning April 1970, and individual estimated income taxes beginning October 1988.

INTRODUCTION: Federal Debt

Treasury securities (i.e., public debt securities) comprise most of the Federal debt, with securities issued by other Federal agencies accounting for the rest. Tables in this section of the "Treasury Bulletin" reflect the total. Further detailed information is published in the "Monthly Statement of the Public Debt of the United States." Likewise, information on agency securities and on investments of Federal Government accounts in Federal securities is published in the "Monthly Treasury Statement of Receipts and Outlays of the United States Government."

- Table **FD-1** summarizes the Federal debt by listing public debt and agency securities held by the public, including the Federal Reserve. It also includes debt held by Federal agencies, largely by the Social Security and other Federal retirement trust funds. The net unamortized premium and discount are also listed by total Federal securities, securities held by Government accounts, and securities held by the public. The difference between the outstanding face value of the Federal debt and the net unamortized premium and discount is classified as the accrual amount. (For greater detail on holdings of Federal securities by particular classes of investors, see the ownership tables, OFS-1 and OFS-2.)

- Table **FD-2** categorizes by type interest-bearing marketable and nonmarketable Treasury securities. The difference between interest-bearing and total public debt securities reflects outstanding matured Treasury securities--that is, unredeemed securities that have matured and are no longer accruing interest. Because the Federal Financing Bank is under the supervision of Treasury, its securities are held by a U.S. Government account.

- In table **FD-3**, nonmarketable Treasury securities held by U.S. Government accounts are summarized by issues to particular funds within Government. Many of the funds invest in *par value* special series nonmarketables at interest rates determined by law. Others invest in market-based special Treasury securities whose terms mirror those of marketable securities.

- Table **FD-4** presents interest-bearing securities issued by Government agencies. Federal agency borrowing has declined in recent

years, in part because the Federal Financing Bank has provided financing to other Federal agencies. (Federal agency borrowing from Treasury is presented in the "Monthly Treasury Statement of Receipts and Outlays of the United States Government.")

- Table **FD-5** illustrates the average length of marketable interest-bearing public debt held by private investors and the maturity distribution of that debt. Average maturity has increased gradually since it hit a low of 2 years, 5 months, in December 1975. In March 1971, Congress enacted a limited exception to the 4-1/4-percent interest rate ceiling on Treasury bonds. This permitted Treasury to offer securities maturing in more than 7 years at current market rates of interest for the first time since 1965. This exception has expanded since 1971 authorizing Treasury to continue to issue long-term securities, and the ceiling on Treasury bonds was repealed on November 10, 1988. The volume of privately held Treasury marketable securities by maturity class reflects the remaining period to maturity of Treasury bills, notes, and bonds. The average length is comprised of an average of remaining periods to maturity, weighted by the amount of each security held by private investors. In other words, computations of average length exclude Government accounts and the Federal Reserve banks.

- In table **FD-6**, the debt ceiling is compared with the outstanding debt subject to limitation by law. The other debt category includes Federal debt Congress has designated as being subject to the debt ceiling. Changes in the non-interest-bearing debt shown in the last column reflect maturities of Treasury securities on nonbusiness days, which can be redeemed on the next business day.

- Table **FD-7** details Treasury holdings of securities issued by Government corporations and other agencies. Certain Federal agencies are authorized to borrow money from the Treasury, largely to finance direct loan programs. In addition, agencies such as the Bonneville Power Administration are authorized to borrow from the Treasury to finance capital projects. Treasury, in turn, finances these loans by selling Treasury securities to the public.

INTRODUCTION: Public Debt Operations

The Second Liberty Bond Act (31 U.S.C. 3101, et seq.) allows the Secretary of the Treasury to borrow money by issuing Treasury securities. The Secretary determines the terms and conditions of issue, conversion, maturity, payment, and interest rate. New issues of Treasury notes mature in 2 to 10 years. Bonds mature in more than 10 years from the issue date. Each marketable security is listed in the Monthly Statement of the Public Debt of the United States. The information in this section of the "Treasury Bulletin" pertains only to marketable Treasury securities, current bills, notes, and bonds.

- Table **PDO-1** provides a maturity schedule of interest-bearing marketable public debt securities other than regular weekly and 52-week bills. All unmaturing Treasury notes and bonds are listed in maturity order, from earliest to latest. A separate breakout is provided for the combined holdings of the Government accounts and Federal Reserve banks, so that the "all other investors" category includes all private holdings.

- Table **PDO-2** presents the results of weekly auctions of 13- and 26-week bills, as well as auctions of 52-week bills, which are held every fourth week. Treasury bills mature each Thursday. New issues of 13-week bills are *reopenings* of 26-week bills. The 26-week bill issued

every fourth week to mature on the same Thursday as an existing 52-week bill is a reopening of the existing 52-week bill. New issues of *cash management bills* are also presented. High, low, and average yields on accepted tenders and the dollar value of total bids are presented, with the dollar value of awards made on both competitive and noncompetitive basis.

Treasury accepts noncompetitive tenders of up to \$1 million for bills and \$5 million for notes and bonds in each auction of securities to encourage participation of individuals and smaller institutions.

- Table **PDO-3** lists the results of auctions of marketable securities, other than weekly bills, in chronological order over the past 2 years. Included are: notes and bonds from table PDO-1; 52-week bills from table PDO-2; and data for cash management bills. The maturities of cash management bills coincide with those of regular issues of Treasury bills.

- Table **PDO-4** indicates the total amount of marketable securities allotted to each class of investor. The Federal Reserve banks tally into investor classes the tenders in each auction of marketable securities other than weekly auctions of 13- and 26-week bills.

TREASURY FINANCING: OCTOBER-DECEMBER

OCTOBER

Auction of 2-Year and 5-Year Notes

October 19 Treasury announced it would auction \$17,250 million of 2-year notes of Series AM-1996 and \$11,000 million of 5-year notes of Series T-1999 to refund \$15,431 million of securities maturing October 31 and to raise about \$12,825 million of new cash.

The notes of Series AM-1996 were dated October 31, 1994, due October 31, 1996, with interest payable April 30 and October 31 until maturity. An interest rate of 6-7/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders were received prior to 12 noon, e.d.t., for noncompetitive tenders and prior to 1 p.m., e.d.t., for competitive tenders on October 25, and totaled \$41,586 million, of which \$17,271 million was accepted. All competitive tenders at yields lower than 6.88 percent were accepted in full. Tenders at 6.88 percent were allotted 10 percent. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 6.88 percent with an equivalent price of 99.991. The median yield was 6.85 percent; and the low yield was 6.80 percent. Noncompetitive tenders totaled \$1,287 million. Competitive tenders accepted from private investors totaled \$15,984 million.

In addition to the \$17,271 million of tenders accepted in the auction process, \$1,080 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$450 million was accepted from Federal Reserve banks for their own account.

Since the interest rate was 6-7/8 percent, these notes were considered to be a reopening of the 5-year notes of Series U-1996 (CUSIP No. 912827C83).

The notes of Series T-1999 were dated October 31, 1994, due October 31, 1999, with interest payable April 30 and October 31 until maturity. An interest rate of 7-1/2 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders were received prior to 12 noon, e.d.t., for noncompetitive tenders and prior to 1 p.m., e.d.t., for competitive tenders on October 26, and totaled \$33,059 million, of which \$11,019 million was accepted. All competitive tenders at yields lower than 7.55 percent were accepted in full. Tenders at 7.55 percent were allotted 95 percent. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 7.55 percent with an equivalent price of 99.795. The median yield was 7.53 percent; and the low yield was 7.45 percent. Noncompetitive tenders totaled \$692 million. Competi-

tive tenders accepted from private investors totaled \$10,327 million.

In addition to the \$11,019 million of tenders accepted in the auction process, \$630 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$412 million was accepted from Federal Reserve banks for their own account.

52-Week Bills

October 7 tenders were invited for approximately \$17,000 million of 364-day Treasury bills to be dated October 20, 1994, and to mature October 19, 1995. The issue was to refund \$15,875 million of maturing 52-week bills and to raise about \$1,125 million of new cash. The bills were auctioned on October 13. Tenders totaled \$50,978 million, of which \$17,013 million was accepted, including \$736 million of noncompetitive tenders from the public and \$4,191 million of the bills issued to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. The average bank discount rate was 5.72 percent.

Cash Management Bills

October 11 tenders were invited for approximately \$15,000 million of 66-day bills to be issued October 17, 1994, representing an additional amount of bills dated June 23, 1994, maturing December 22, 1994. The issue was to raise new cash. Tenders were opened on October 12. They totaled \$49,580 million, of which \$15,040 million was accepted. The average bank discount rate was 4.98 percent.

Treasury Calls 7-7/8 Percent Bonds of 1995-00

October 12, 1994, Treasury announced the call for redemption at par on February 15, 1995, of the 7-7/8 percent Treasury bonds of 1995-00, dated February 18, 1975, due February 15, 2000. There were \$2,749 million of these bonds outstanding, of which \$1,972 million are held by private investors.

NOVEMBER

November Quarterly Financing

November 2 Treasury announced it would auction \$17,000 million of 3-year notes of Series Y-1997 and \$12,000 million of 10-year notes of Series D-2004 to refund \$28,838 million of Treasury securities maturing November 15 and to raise about \$150 million of new cash.

The notes of Series Y-1997 were dated November 15, 1994, due November 15, 1997, with interest payable May 15 and November 15 until maturity. An interest rate of 7-3/8 per-

TREASURY FINANCING: OCTOBER-DECEMBER, con.

cent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders were received prior to 12 noon, e.s.t., for noncompetitive tenders and prior to 1 p.m., e.s.t., for competitive tenders on November 8, and totaled \$49,638 million, of which \$17,158 million was accepted at yields ranging from 7.40 percent, price 99.934, up to 7.42 percent, price 99.881. Tenders at the high yield were allotted 21 percent. Noncompetitive tenders were accepted in full at the average yield, 7.41 percent, price 99.907. These totaled \$1,056 million. Competitive tenders accepted from private investors totaled \$16,102 million.

In addition to the \$17,158 million of tenders accepted in the auction process, \$770 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$2,800 million was accepted from Federal Reserve banks for their own account.

The notes of Series D-2004 were dated November 15, 1994, due November 15, 2004, with interest payable May 15 and November 15 until maturity. An interest rate of 7-7/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders were received prior to 12 noon, e.s.t., for noncompetitive tenders and prior to 1 p.m., e.s.t., for competitive tenders on November 9, and totaled \$27,737 million, of which \$12,051 million was accepted at yields ranging from 7.95 percent, price 99.489, up to 7.97 percent, price 99.354. Tenders at the high yield were allotted 60 percent. Noncompetitive tenders were accepted in full at the average yield, 7.96 percent, price 99.421. These totaled \$623 million. Competitive tenders accepted from private investors totaled \$11,428 million.

In addition to the \$12,051 million of tenders accepted in the auction process, \$650 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$1,603 million was accepted from Federal Reserve banks for their own account.

The notes of Series D-2004 may be held in STRIPS form. The minimum par amount required is \$1,600,000.

Auction of 2-Year and 5-Year Notes

November 16 Treasury announced it would auction \$17,250 million of 2-year notes of Series AN-1996 and \$11,000 million of 5-year notes of Series U-1999 to refund \$15,381 million of securities maturing November 30 and to raise about \$12,875 million of new cash.

The notes of Series AN-1996 were dated November 30, 1994, due November 30, 1996, with interest payable May 31 and November 30 until maturity. An interest rate of 7-1/4 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders were received prior to 11 a.m., e.s.t., for noncompetitive tenders and prior to 11:30 a.m., e.s.t., for competitive tenders on November 21, and totaled \$47,324 million, of which

\$17,316 million was accepted. All competitive tenders at yields lower than 7.30 percent were accepted in full. Tenders at 7.30 percent were allotted 98 percent. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 7.30 percent with an equivalent price of 99.908. The median yield was 7.29 percent; and the low yield was 7.28 percent. Noncompetitive tenders totaled \$1,195 million. Competitive tenders accepted from private investors totaled \$16,121 million.

In addition to the \$17,316 million of tenders accepted in the auction process, \$1,090 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$265 million was accepted from Federal Reserve banks for their own account.

The notes of Series U-1999 were dated November 30, 1994, due November 30, 1999, with interest payable May 31 and November 30 until maturity. An interest rate of 7-3/4 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders were received prior to 12 noon, e.s.t., for noncompetitive tenders and prior to 1 p.m., e.s.t., for competitive tenders on November 22, and totaled \$32,924 million, of which \$11,016 million was accepted. All competitive tenders at yields lower than 7.81 percent were accepted in full. Tenders at 7.81 percent were allotted 78 percent. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 7.81 percent with an equivalent price of 99.756. The median yield was 7.80 percent, and the low yield was 7.75 percent. Noncompetitive tenders totaled \$798 million. Competitive tenders accepted from private investors totaled \$10,218 million.

In addition to the \$11,016 million of tenders accepted in the auction process, \$530 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$265 million was accepted from Federal Reserve banks for their own account.

52-Week Bills

November 4 tenders were invited for approximately \$17,000 million of 364-day Treasury bills to be dated November 17, 1994, and to mature November 16, 1995. The issue was to refund \$16,155 million of maturing 52-week bills and to raise about \$850 million of new cash. The bills were auctioned on November 10. Tenders totaled \$55,185 million, of which \$17,060 million was accepted, including \$817 million of noncompetitive tenders from the public and \$4,385 million of the bills issued to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. The average bank discount rate was 6.09 percent.

Cash Management Bills

November 2 tenders were invited for approximately \$12,000 million of 37-day bills to be issued November 15, 1994,

TREASURY FINANCING: OCTOBER-DECEMBER, con.

representing an additional amount of bills dated June 23, 1994, maturing December 22, 1994. The issue was to raise new cash. Tenders were opened on November 10. They totaled \$49,807 million, of which \$12,009 million was accepted. The average bank discount rate was 5.11 percent.

November 29 tenders were invited for approximately \$8,000 million of 20-day bills to be issued December 2, 1994, representing an additional amount of bills dated June 23, 1994, maturing December 22, 1994. The issue was to raise new cash. Tenders were opened on November 30. They totaled \$35,651 million, of which \$8,005 million was accepted. The average bank discount rate was 5.45 percent.

DECEMBER

Auction of 2-Year and 5-Year Notes

December 14 Treasury announced it would auction \$17,250 million of 2-year notes of Series AP-1996 and \$11,000 million of 5-year notes of Series V-1999 to refund \$24,387 million of securities maturing December 31 and to raise about \$3,875 million of new cash.

The notes of Series AP-1996 were dated January 3, 1995, due December 31, 1996, with interest payable June 30 and December 31 until maturity. An interest rate of 7-1/2 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders were received prior to 12 noon, e.s.t., for noncompetitive tenders and prior to 1 p.m., e.s.t., for competitive tenders on December 21, and totaled \$49,369 million, of which \$17,289 million was accepted. All competitive tenders at yields lower than 7.57 percent were accepted in full. Tenders at 7.57 percent were allotted 41 percent. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 7.57 percent with an equivalent price of 99.873. The median yield was 7.55 percent; and the low yield was 7.53 percent. Noncompetitive tenders totaled \$2,382 million. Competitive tenders accepted from private investors totaled \$14,907 million.

In addition to the \$17,289 million of tenders accepted in the auction process, \$760 million was accepted from Federal Reserve banks as agents for foreign and international mone-

tary authorities, and \$1,250 million was accepted from Federal Reserve banks for their own account.

The notes of Series V-1999 were dated January 3, 1995, due December 31, 1999, with interest payable June 30 and December 31 until maturity. An interest rate of 7-3/4 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders were received prior to 12 noon, e.s.t., for noncompetitive tenders and prior to 1 p.m., e.s.t., for competitive tenders on December 22, and totaled \$24,439 million, of which \$11,011 million was accepted. All competitive tenders at yields lower than 7.85 percent were accepted in full. Tenders at 7.85 percent were allotted 42 percent. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 7.85 percent with an equivalent price of 99.593. The median yield was 7.80 percent; and the low yield was 7.76 percent. Noncompetitive tenders totaled \$918 million. Competitive tenders accepted from private investors totaled \$10,093 million.

In addition to the \$11,011 million of tenders accepted in the auction process, \$220 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$1,180 million was accepted from Federal Reserve banks for their own account.

52-Week Bills

December 2 tenders were invited for approximately \$17,000 million of 364-day Treasury bills to be dated December 15, 1994, and to mature December 14, 1995. The issue was to refund \$16,238 million of maturing 52-week bills and to raise about \$750 million of new cash. The bills were auctioned on December 8. Tenders totaled \$41,927 million, of which \$17,000 million was accepted, including \$1,196 million of noncompetitive tenders from the public and \$4,525 million of the bills issued to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. The average bank discount rate was 6.75 percent.

Cash Management Bills

December 28 tenders were invited for approximately \$14,000 million of 16-day bills to be issued January 3, 1995, representing an additional amount of bills dated July 21, 1994, maturing January 19, 1995. The issue was to raise new cash. Tenders were opened on December 29. They totaled \$42,975 million, of which \$14,009 million was accepted. The average bank discount rate was 5.59 percent. ◇

¹ The 13-week bills represent additional issue of bills with an original maturity of 26 weeks or 52 weeks

² For bills issued on or after May 2, 1974, includes amounts exchanged on noncompetitive basis by Government accounts and Federal Reserve banks

³ For 13-week, 26-week, and 52-week bills, tenders \$1,000,000 or less from any one bidder are accepted in full at average price or accepted competitive bids; for other issues, the corresponding amount is stipulated in each offering announcement

⁴ Equivalent coupon-issue yield

⁵ Except \$10,000 at 97 523 percent.

⁶ Except \$10,000,000 at 98 842 percent.

⁷ Except \$10,000 at 97 472 percent

⁸ Except \$1,980,000 at 97 295 percent

⁹ Except \$5,000,000 at 98 792 percent, \$2,500,000 at 98 784, and \$11,000,000 at 98 774 percent

¹⁰ Except \$4,000,000 at 98 774 percent

¹¹ Except \$4,000,000 at 97 396 percent

¹² Except \$15,000 at 98 736 percent.

¹³ Except \$20,000 at 98 663 percent

¹⁴ Except \$20,000,000 at 97 079 percent and \$3,440,000 at 97 069 percent

¹⁵ Except \$3,520,000 at 98 635 percent

¹⁶ Except \$10,000 at 98 592 percent and \$4,050,000 at 98 554 percent.

¹⁷ Except \$45,000 at 96 962 percent.

¹⁸ Except \$3,000,000 at 98 559 percent

¹⁹ Except \$10,000 at 95 066 and \$1,425,000 at 94 934 percent

²⁰ Except \$46,000 at 94 904 percent.

²¹ Except \$12,000 at 94 641 percent and \$100,000 at 94 611 percent.

²² Except \$10,000 at 93 286 percent

See footnotes at end of table

TABLE PDO-3.--Public Offerings of Marketable Securities Other than Regular Weekly Treasury Bills, con.

¹ Currently, all issues are sold at auction. For bill issues, the rate shown is the average bank discount rate. For note and bond issues, the rate shown is the interest rate. For details of bill offerings, see table PDO-2.

² From date of additional issue in case of a reopening.

³ In reopenings the amount issued is in addition to the amount of original offerings.

⁴ Includes securities issued to U.S. Government accounts and Federal Reserve banks, and to foreign and international monetary authorities, whether in exchange for maturing securities or for new cash.

⁵ Eligible for STRIPS.

⁶ Interest began to accrue before the issue date (settlement date) of this loan.

⁷ Accepted yields ranged up to 4.71% (price 99 840) in this single-price auction.

⁸ Accepted yields ranged up to 6.03% (price 99 872) in this single-price auction.

⁹ Yields accepted ranged from 6.39% (price 99 916) up to 6.44% (price 99 638) with the average at 6.41% (price 99 805).

¹⁰ Accepted yields ranged up to 4.28% (price 99 943) in this single-price auction.

¹¹ Accepted yields ranged up to 5.66% (price 99 849) in this single-price auction.

¹² Yields accepted ranged from 4.71% (price 99 765) up to 4.73% (price 99 710) with the average at 4.73% (price 99 710).

¹³ Yields accepted ranged from 6.31% (price 99 560) up to 6.35% (price 99 268) with the average at 6.33% (price 99 413).

¹⁴ Yields accepted ranged from 7.21% (price 98 961) up to 7.22% (price 98 840) with the average at 7.22% (price 98 840).

¹⁵ Accepted yields ranged up to 3.94% (price 99 876) in this single-price auction.

¹⁶ Accepted yields ranged up to 5.23% (price 99 543) in this single-price auction.

¹⁷ Accepted yields ranged up to 3.92% (price 99 914) in this single-price auction.

¹⁸ Accepted yields ranged up to 5.19% (price 99 717) in this single-price auction.

¹⁹ Yields accepted ranged from 5.50% (price 100 000) up to 5.58% (price 99 542) with the average at 5.54% (price 99 770).

²⁰ Accepted yields ranged up to 3.88% (price 99 990) in this single-price auction.

²¹ Accepted yields ranged up to 5.18% (price 99 760) in this single-price auction.

²² Yields accepted ranged from 4.25% (price 100 000) up to 4.27% (price 99 944) with the average at 4.27% (price 99 944).

²³ Yields accepted ranged from 5.95% (price 102 173) up to 5.97% (price 102 024) with the average at 5.96% (price 102 098).

²⁴ Yields accepted ranged from 6.96% (price 102 031) up to 6.98% (price 101 777) with the average at 6.97% (price 101 904).

²⁵ Accepted yields ranged up to 4.17% (price 99 915) in this single-price auction.

²⁶ Accepted yields ranged up to 5.39% (price 99 935) in this single-price auction.

²⁷ Accepted yields ranged up to 4.16% (price 99 933) in this single-price auction.

²⁸ Accepted yields ranged up to 5.23% (price 99 543) in this single-price auction.

²⁹ Accepted yields ranged up to 4.26% (price 99 981) in this single-price auction.

³⁰ Accepted yields ranged up to 5.25% (price 100 000) in this single-price auction.

³¹ Yields accepted ranged from 4.48% (price 99 709) up to 4.49% (price 99 681) with the average at 4.49% (price 99 681).

³² Yields accepted ranged from 5.77% (price 99 849) up to 5.78% (price 99 774) with the average at 5.78% (price 99 774).

³³ Yields accepted ranged from 6.32% (price 99 063) up to 6.35% (price 98 666) with the average at 6.33% (price 98 931).

³⁴ Accepted yields ranged up to 3.94% (price 99 876) in this single-price auction.

³⁵ Accepted yields ranged up to 4.87% (price 99 473) in this single-price auction.

³⁶ Accepted yields ranged up to 3.94% (price 99 876) in this single-price auction.

³⁷ Accepted yields ranged up to 4.83% (price 99 648) in this single-price auction.

³⁸ Accepted yields ranged up to 3.94% (price 99 876) in this single-price auction.

³⁹ Accepted yields ranged up to 4.81% (price 99 736) in this single-price auction.

⁴⁰ Yields accepted ranged from 4.42% (price 99 875) up to 4.46% (price 99 764) with the average at 4.44% (price 99 819).

⁴¹ Yields accepted ranged from 5.68% (price 100 499) up to 5.69% (price 100 424) with the average at 5.69% (price 100 424).

⁴² Accepted yields ranged up to 4.27% (price 99 962) in this single-price auction.

⁴³ Accepted yields ranged up to 5.20% (price 99 673) in this single-price auction.

⁴⁴ Accepted yields ranged up to 4.28% (price 99 943) in this single-price auction.

⁴⁵ Accepted yields ranged up to 5.19% (price 99 717) in this single-price auction.

⁴⁶ Accepted yields ranged up to 4.11% (price 99 791) in this single-price auction.

⁴⁷ Accepted yields ranged up to 5.10% (price 99 564) in this single-price auction.

⁴⁸ Yields accepted ranged from 4.82% (price 99 807) up to 4.83% (price 99 779) with the average at 4.83% (price 99 779).

⁴⁹ Yields accepted ranged from 5.91% (price 99 739) up to 5.93% (price 99 590) with the average at 5.92% (price 99 664).

⁵⁰ Yields accepted ranged from 6.42% (price 97 763) up to 6.43% (price 97 633) with the average at 6.43% (price 97 633).

⁵¹ Accepted yields ranged up to 4.66% (price 99 934) in this single-price auction.

⁵² Accepted yields ranged up to 5.61% (price 99 526) in this single-price auction.

⁵³ Accepted yields ranged up to 5.15% (price 99 953) in this single-price auction.

⁵⁴ Accepted yields ranged up to 5.91% (price 99 850) in this single-price auction.

⁵⁵ Accepted yields ranged up to 5.59% (price 99 832) in this single-price auction.

⁵⁶ Accepted yields ranged up to 6.60% (price 99 580) in this single-price auction.

⁵⁷ Yields accepted ranged from 6.54% (price 99 893) up to 6.55% (price 99 866) with the average at 6.54% (price 99 893).

⁵⁸ Yields accepted ranged from 7.33% (price 99 439) up to 7.40% (price 99 953) with the average at 7.36% (price 99 230).

⁵⁹ Accepted yields ranged up to 5.94% (price 99 879) in this single-price auction.

⁶⁰ Accepted yields ranged up to 6.78% (price 99 875) in this single-price auction.

⁶¹ Accepted yields ranged up to 6.04% (price 99 926) in this single-price auction.

⁶² Accepted yields ranged up to 6.77% (price 99 916) in this single-price auction.

⁶³ Accepted yields ranged up to 6.17% (price 99 917) in this single-price auction.

⁶⁴ Accepted yields ranged up to 6.98% (price 99 563) in this single-price auction.

⁶⁵ Yields accepted ranged from 6.59% (price 99 759) up to 6.62% (price 99 678) with the average at 6.61% (price 99 705).

⁶⁶ Yields accepted ranged from 7.32% (price 99 510) up to 7.33% (price 99 440) with the average at 7.33% (price 99 440).

⁶⁷ Yields accepted ranged from 7.55% (price 99 373) up to 7.59% (price 98 904) with the average at 7.56% (price 99 256).

⁶⁸ Accepted yields ranged up to 6.27% (price 99 963) in this single-price auction.

⁶⁹ Accepted yields ranged up to 6.91% (price 99 854) in this single-price auction.

⁷⁰ Accepted yields ranged up to 6.55% (price 99 908) in this single-price auction.

⁷¹ Accepted yields ranged up to 7.18% (price 99 772) in this single-price auction.

⁷² Accepted yields ranged up to 6.88% (price 99 991) in this single-price auction.

⁷³ Accepted yields ranged up to 7.55% (price 99 795) in this single-price auction.

⁷⁴ Yields accepted ranged from 7.40% (price 99 934) up to 7.42% (price 99 881) with the average at 7.41% (price 99 907).

⁷⁵ Yields accepted ranged from 7.95% (price 99 489) up to 7.97% (price 99 354) with the average at 7.96% (price 99 421).

⁷⁶ Accepted yields ranged up to 7.30% (price 99 908) in this single-price auction.

⁷⁷ Accepted yields ranged up to 7.81% (price 99 756) in this single-price auction.

Note --All notes and bonds, except for foreign-targeted issues, were sold at auction through competitive and noncompetitive bidding. Foreign-targeted issues were sold at auction through competitive bidding only.

¹ Includes trust funds and accounts that comprise Government accounts under the unified budget concept

² Exclusive of banks and insurance companies.

³ Included with "All other" investors are certain Government deposit accounts and Government-sponsored agencies, formerly included with Government accounts

Note --For detail of offerings, see table PDO-3.

INTRODUCTION: Savings Bonds and Notes

Series EE bonds, on sale since January 1, 1980, are the only savings bonds currently sold. Series HH bonds are issued in exchange for Series E and EE savings bonds and savings notes. Series A-D were sold from March 1, 1935, through April 30, 1941. Series E was on sale from May 1, 1941, through December 31, 1979 (through June 1980 to payroll savers only). Series F and G were sold from May 1, 1941, through April 30, 1952. Series H was sold from June 1, 1952, through December 31, 1979. Series HH bonds were sold for cash from January

1, 1980, through October 31, 1982. Series J and K were sold from May 1, 1952, through April 30, 1957. U.S. savings notes were on sale May 1, 1967, through June 30, 1970. The notes were eligible for purchase by individuals with the simultaneous purchase of series E savings bonds. The principal terms and conditions for purchase and redemption and information on investment yields of savings notes appear in the "Treasury Bulletin"s of March 1967 and June 1968; and the Annual Report of the Secretary of the Treasury for fiscal 1974.

TABLE SBN-1.--Sales and Redemptions by Series, Cumulative through Dec. 31, 1994

[In millions of dollars. Source: "Monthly Statement of the Public Debt of the United States", Market Analysis Section, U.S. Savings Bonds Division]

Series	Sales ¹ (1)	Accrued discount (2)	Sales plus accrued discount (3)	Redemptions ¹ (4)	Amount outstanding	
					Interest- bearing debt (5)	Matured non-interest- bearing debt (6)
Savings bonds						
Series A-D ²	3,949	1,054	5,003	5,002	-	1
Series E, EE, H, and HH	328,729	163,435	492,164	312,047	177,786	2,331
Series F and G	28,396	1,125	29,521	29,517	-	3
Series J and K	3,556	198	3,754	3,753	-	-
Savings notes						
	862	617	1,479	1,124	352	-
Total	365,492	166,429	531,921	351,443	178,138	2,335

¹ Sales and redemption figures include exchange of minor amounts of (1) matured series E bonds for series G and K bonds from May 1951 through April 1957, (2) series F and J bonds for series H bonds beginning January 1960, and (3) U.S. savings notes for series H bonds beginning January 1972, however, they exclude exchanges of series E bonds for series H and

HH bonds. ² Details by series on a cumulative basis and by period of series A-D combined can be found in the February 1952 and previous issues of the "Treasury Bulletin."

Note --Series E and EE include U.S. savings notes (Freedom Shares) on sale from May 1, 1967, through June 30, 1970, to E bond buyers

INTRODUCTION: Ownership of Federal Securities

Federal securities presented in the following tables are public debt securities such as savings bonds, bills, and notes that the Treasury issues. The tables also detail debt issued by other Federal agencies under special financing authorities. (See the Federal debt (FD) tables for a more complete description of the Federal debt.)

- Table **OFS-1** presents Treasury marketable and nonmarketable securities and debt issued by other Federal agencies held by Government accounts, the Federal Reserve banks, and private investors. Social Security and Federal retirement trust fund investments comprise much of the Government account holdings.

The Federal Reserve banks acquire Treasury securities in the market as a means of executing monetary policy.

- Table **OFS-2** presents the estimated amount of public debt securities held by private investors. Information is obtained from sources such as the Federal financial institution regulatory agencies. State, local, and foreign holdings include special issues of nonmarketable securities to municipal entities and foreign official accounts. They also include municipal, foreign official, and private holdings of marketable Treasury securities. (See footnotes to the table for description of investor categories.)

¹ U.S. savings bonds, series A-F and J, are included at current redemption value.² Includes domestically-chartered banks, U.S. branches and agencies of foreign banks, New York investment companies majority owned by foreign banks, and Edge Act corporations owned by domestically chartered and foreign banks.³ Includes partnerships and personal trust accounts.⁴ Includes U.S. savings notes. Sales began May 1, 1967, and were discontinued June 30, 1970.⁵ Exclusive of banks and insurance companies.⁶ State and local government estimate includes State and local government series as well as State and local pension funds.⁷ Consists of the investments of foreign and international accounts (both official and private) in the United States public debt issues. Estimates reflect 1978 benchmark to September 1984; the 1984 benchmark to September 1989, and the 1989 benchmark to date.⁸ Includes savings and loan associations, credit unions, nonprofit institutions, mutual savings banks, corporate pension trust funds, dealers and brokers, certain Government deposit accounts, and Government-sponsored enterprises.

INTRODUCTION: Market Yields

The tables and charts in this section present yields on Treasury marketable securities, and compare long-term yields on Treasury securities with yields on long-term corporate and municipal securities.

- Table **MY-1** lists Treasury market bid yields at constant maturities for bills, notes, and bonds. The Treasury yield curve in the accompanying chart, is based on current market bid quotations on the most actively traded Treasury securities as of 3:30 p.m. on the last business day of the calendar quarter.

Treasury obtains quotations from the Federal Reserve Bank of New York, which compiles quotations provided by five primary dealers. Treasury uses these composite quotations to derive the yield curve, based on semiannual interest payments and read at constant maturity points to develop a consistent data series. Yields on Treasury bills are

coupon equivalent yields of bank *discount rates* at which Treasury bills trade in the market. The Board of Governors of the Federal Reserve System publishes the Treasury constant maturity data series in its weekly H.15 press release.

- Table **MY-2** shows average yields of long-term Treasury, corporate, and municipal bonds. The long-term Treasury average yield is the 30-year constant maturity yield. The corporate bond average yield is developed by Treasury by calculating reoffering yields on new long-term securities maturing in at least 20 years and rated Aa by Moody's Investors Service. The municipal bond average yield prior to 1991 was compiled by Treasury. Beginning with January 1991, the average yield is the "Municipal Bond Yield Average," published by Moody's Investors Service for 20-year reoffering yields on selected Aa-rated general obligations. See the footnotes for further explanation.

¹ Treasury series based on 3-week moving average of reoffering yields of new corporate bonds rated Aa by Moody's Investors Service with an original maturity of at least 20 years.

² Index of new reoffering yields on 20-year general obligations rated Aa by Moody's Investors Service. Source: U.S. Treasury, 1980-90, Moody's, January 1991 to present.

CHART MY-B.--Average Yields of Long-Term Treasury, Corporate, and Municipal Bonds

Monthly averages (in percentages)

INTRODUCTION: U.S. Currency and Coin Outstanding and in Circulation

The U.S. Currency and Coin Outstanding and in Circulation (USCC) statement informs the public of the total face value of currency and coin used as a medium of exchange that is in circulation at the end of a given accounting month. The statement defines the total amount of currency and coin outstanding and the portion deemed to be in circulation, and includes some old and current rare issues that do not circulate, or that may do so to a limited extent. Treasury includes them in the statement because the issues were originally intended for general circulation.

The USCC statement provides a description of the various issues of paper money. It also gives an estimated average of currency and coin held by each individual, using estimates of population from the Bureau of the Census. USCC information has been published by Treasury since 1888, and was published separately until 1983, when it was incorporated into the "Treasury Bulletin." The USCC comes from monthly reports compiled by Treasury offices, various U.S. Mint offices, the Federal Reserve banks, and the Federal Reserve Board.

¹ Issued on or after July 1, 1929² Excludes coins sold to collectors at premium prices.³ Includes \$481,781,898 in standard silver dollars⁴ Represents value of certain partial denominations not presented for redemption⁵ Based on Bureau of the Census estimates of population.

**INTERNATIONAL
STATISTICS**

INTRODUCTION: International Financial Statistics

The tables in this section provide statistics on the U.S. Government's reserve assets, liabilities to *foreigners*, and its international financial position. All monetary figures are in dollars or dollar equivalents.

- Table **IFS-1** shows reserve assets of the *United States*, including gold stock and special drawing rights held in the Special Drawing account in the *International Monetary Fund (IMF)*. The table also shows U.S. reserve holdings and holdings of convertible foreign currencies in the IMF.

- Table **IFS-2** contains statistics on liabilities to *foreign official institutions*, and selected liabilities to all other foreigners, which are used in the U.S. balance of payments statistics.

- Table **IFS-3** shows nonmarketable bonds and notes that Treasury issues to official institutions and other residents of foreign countries.

- Table **IFS-4** presents a measure of weighted-average changes in exchange rates between the U.S. dollar and the currencies of certain other countries.

1995 - Jan.	76,027	11,050	10,154	42,703	12,120

¹ Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing right (SDR) based on a weighted-average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and reserve position in the IMF are also valued on this basis beginning July 1974.

² Treasury values its gold stock at \$42 2222 per fine troy ounce and pursuant to 31 U.S.C. 5117 (b) issues gold certificates to the Federal Reserve at the same rate against all gold held.

³ Includes allocations of SDRs in the Special Drawing Account in the IMF, plus or minus transactions in SDRs.

⁴ Includes holdings of Treasury and Federal Reserve System, beginning November 1978, these are valued at current market exchange rates or, where appropriate, at such other rates as may be agreed upon by the parties to the transactions.

⁵ The United States has the right to purchase foreign currencies equivalent to its reserve position in the IMF automatically if needed. Under appropriate conditions, the United States could purchase additional amounts related to the U.S. quota.

¹ Includes Bank for International Settlements² Derived by applying reported transactions to benchmark data³ Includes current value of zero-coupon Treasury bond issues to foreign governments as follows: Mexico, beginning March 1988, 20-year maturity issue and beginning March 1990, 30-year maturity issue; Venezuela, beginning December 1990, 30-year maturity issue; Argentina, beginning April 1993, 30-year maturity issue. Also, see footnotes to table IFS-3⁴ Includes debt securities of U.S. Government corporations, federally sponsored agencies, and private corporations⁵ Includes liabilities payable in dollars to foreign banks and liabilities payable in foreign currencies to foreign banks and to "other foreigners."⁶ Includes marketable U.S. Government bonds and notes held by foreign banks⁷ Principally the International Bank for Reconstruction and Development, the Inter-American

Development Bank, and the Asian Development Bank

⁸ Data for the two lines shown for this date reflect different benchmark bases for foreigners' holdings of selected long-term U.S. securities. Figures on the first line are comparable to those for earlier dates. Figures on the second line are based in part on a benchmark survey as of yearend 1989 and are comparable to those shown for the following dates.

Note.--Table is based on Department of Treasury data and on data reported to the Department of Treasury by banks, other depository institutions, and brokers in the United States. Data correspond generally to statistics following in this section and in the "Capital Movements" section. Table excludes International Monetary Fund "holdings of dollars" and holdings of U.S. Treasury letters of credit and nonnegotiable noninterest-bearing special U.S. notes held by other international and regional organizations.

¹ Each index covers (a) 22 currencies of countries represented in the Organization for Economic Cooperation and Development (OECD): Australia, Austria, Belgium-Luxembourg, Canada, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, and the United Kingdom; and (b) currencies of four major trading economies outside the OECD: Hong Kong, Korea, Singapore, and Taiwan. Exchange rates are drawn from the International Monetary Fund's "International Financial Statistics" when available.

² Index includes average annual rates as reported in "International Financial Statistics."

Note.--These indices are presented to provide measures of the general foreign exchange value of the dollar that are broader than those provided by single exchange rate levels. They do not purport to represent a guide to measuring the impact of exchange rate levels on U.S. international transactions. The indices are computed as geometric averages of individual currency levels with weights derived from the share of each country's trade with the United States during 1982-83.

INTRODUCTION: Capital Movements

Treasury collects information about the transference of financial assets and other portfolio capital movements between the United States and foreigners, and has since 1935. Commercial banks and other depository institutions, bank holding companies, securities brokers and dealers, and nonbanking enterprises in the United States file capital movement reports with district Federal Reserve banks.

Forms and instructions are developed with the cooperation of other Government agencies and the Federal Reserve System, and in consultation with representatives of banks, securities firms, and nonbanking enterprises. Copies of the reporting forms and instructions may be obtained from the Office of Data Management, Office of the Assistant Secretary for Economic Policy, Department of the Treasury, Washington, D.C., 20220, or from district Federal Reserve banks.

In general, information is reported opposite the country or geographical area where the foreigner is located, as shown on records of reporting institutions. However, information may not always reflect the ultimate ownership of assets. Reporting institutions are not required to go beyond addresses shown on their records, and so may not be aware of the actual country of domicile of the ultimate beneficiary.

United States liabilities arising from the deposits of dollars with foreign banks appear as liabilities to foreign banks, although the liability of the foreign bank receiving the deposit may be to *foreign official institutions* or to residents of another country.

Transactions with branches or agencies of foreign official institutions, wherever located, are reported opposite the country that has sovereignty over the institutions. Transactions with international and regional organizations are not reported opposite any country, but are accounted for in regional groupings of such organizations. The only exception is information pertaining to the Bank for International Settlements, which is reported opposite 'Other Europe.'

Banks and other depository institutions, bank holding companies, International Banking Facilities (IBFs), securities brokers and dealers, and nonbanking enterprises in the United States must file reports. These enterprises include the branches, agencies, subsidiaries, and other affiliates in the United States of foreign banking and nonbanking firms. Those with liabilities, claims, or securities transactions below specified exemption levels are exempt from reporting.

Banks and other depository institutions, and some brokers and dealers, file monthly reports covering their dollar liabilities to, and dollar claims on, foreigners in a number of countries. Twice a year, June 30 and December 31, they also report the same liabilities and claims items to foreigners in countries not shown separately on the monthly reports. Quarterly reports are filed for liabilities and claims denominated in foreign currencies in relation to foreigners. The exemption level applicable to these banking reports is \$15 million.

Banks and other depository institutions, securities brokers and dealers, and other enterprises report monthly their transactions with foreigners in long-term securities. They must report securities transactions with foreigners if their aggregate purchases or their aggregate sales amount to at least \$2 million during the covered month.

Exporters, importers, industrial and commercial concerns, financial institutions (other than banks, other depository institutions, and brokers), and other nonbanking enterprises must file reports quarterly if liabilities to, or claims on, unaffiliated foreigners amount to \$10 million or more during the covered quarter.

Nonbanking enterprises also report each month their U.S. dollar denominated deposit and certificates of deposit claims of \$10 million or more on banks abroad.

The data in these tables do not cover all types of reported capital movements between the United States and other countries. The principal exclusions are the intercompany capital transactions of non-

banking business enterprises in the United States with their own branches and subsidiaries abroad (own foreign offices) or with their foreign parent companies, and capital transactions of the U.S. Government. Consolidated data on all types of international capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

- **Section I** presents liabilities to foreigners reported by U.S. banks and other depository institutions, as well as brokers and dealers. Dollar liabilities are reported monthly; those denominated in foreign currencies are reported quarterly. Respondents report certain of their own liabilities and a wide range of their custody liabilities to foreigners.

- **Section II** presents claims on foreigners also reported by U.S. banks and other depository institutions, brokers, and dealers. Data on bank claims held for their own account are collected monthly. Information on claims held for their domestic customers as well as foreign currency claims, is collected on a quarterly basis only. Maturity data are reported according to time remaining to maturity. Reporting also covers certain items held by brokers and dealers in the United States.

- **Section III** contains supplementary data on dollar liabilities to, and dollar claims on, countries not listed separately on the monthly reports submitted by banks, other depository institutions, brokers and dealers in the United States. The supplementary reports are filed semiannually as of the end of June and December. (Note: Beginning with the September 1994 issue of the "Treasury Bulletin," former table CM-III-1, Dollar Claims on Nonbank Foreigners, will no longer appear. Former table CM-III-2, Dollar Liabilities to, and Dollar Claims on, Foreigners in Countries and Areas Not Regularly Reported Separately, has been redesignated as table CM-III-1. This semiannual data series will now appear in each issue of the "Treasury Bulletin.")

- **Section IV** shows the liabilities to, and claims on, unaffiliated foreigners by exporters, importers, industrial and commercial concerns, financial institutions (other than banks, other depository institutions, and brokers), and other nonbanking enterprises in the United States. Information does not include accounts of nonbanking enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. These are reported by business enterprises to the Department of Commerce on its direct investment forms. Data exclude claims on foreigners held through banks in the United States.

- **Section V** contains information on transactions in all types of long-term domestic and foreign securities with foreigners reported by banks, brokers, and other entities in the United States. The data cover transactions executed in the United States for the accounts of foreigners, and transactions executed abroad for the accounts of reporting institutions and their domestic customers. This includes transactions in newly issued securities as well as transactions in, and redemptions of, outstanding issues. Also, some transactions classified as direct investments in the balance of payments accounts may be included. However, the data do not include nonmarketable Treasury bonds and notes shown in table IFS-3.

In the case of outstanding securities, the geographical breakdown of the transactions data does not necessarily reflect the ultimate owners of or the original issuers of the securities. This is because the path of a security is not tracked prior to its being purchased from, or after it is sold to, a foreigner in a TIC reportable transaction. That is, before it enters and after it departs the reporting system, ownership of a security may be transferred between foreigners of different countries. Such transfers may occur any number of times and are concealed among the net figures for U.S. transactions opposite individual countries. Hence, the geographical breakdown shows only the country of domicile of the foreign buyers and sellers of securities in a particular round of transactions.

¹ Beginning with series for December 1992 forward, data for all other republics of the former U.S.S.R. are reported under "Other Europe."

² Beginning with series for December 1992 forward, data for the former Yugoslav republics of Bosnia and Herzegovina, Croatia, and Slovenia are reported under "Other Europe."

INTRODUCTION: Foreign Currency Positions

The "Treasury Bulletin" publishes series on foreign currency holdings of large foreign exchange market participants. The series provide information on positions in derivative instruments, such as foreign exchange futures and options, that are increasingly used in establishing foreign exchange positions but were not covered in the old reports.

The information is based on reports of large foreign exchange market participants on holdings of five major foreign currencies (Canadian dollar, German mark, Japanese yen, Swiss franc, and pound sterling). U.S.-based businesses file a consolidated report for their domestic and foreign subsidiaries, branches, and agencies. U.S. subsidiaries of foreign entities file only for themselves, not for their foreign parents. Filing is required by law (31 U.S.C. 5315; 31 C.F.R. 128, Subpart C).

Weekly and monthly reports must be filed throughout the calendar year by major foreign exchange market participants, which are defined as market participants with more than \$50 billion equivalent in foreign exchange contracts on the last business day of any calendar quarter during the previous year (end March, June, September, or December). Such contracts include the amounts of foreign exchange spot contracts bought and sold, foreign exchange forward contracts bought and sold, foreign exchange futures bought and sold, and one half the notional amount of foreign exchange options bought and sold. Exemptions from filing the monthly report are given to banking institutions that file the Federal Financial Institution Examination Council (FFIEC) 035 report ("Monthly Consolidated Foreign Currency Report").

A quarterly report must be filed throughout the calendar year by each foreign exchange market participant that had more than \$1 billion equivalent in foreign exchange contracts on the last business day of any quarter the previous year (end March, June, September, or December). Exemptions from filing the quarterly report are given to major nonbank market participants that file weekly and monthly reports, and banking institutions that file FFIEC 035 reports.

This information is published in five sections corresponding to each of the major currencies covered by the reports. Tables I-1 through V-1 present the foreign currency data reported weekly by major market participants. Tables I-2 through V-2 present more detailed currency data of major market participants, based on monthly Treasury and FFIEC 035 reports. Tables I-3 through V-3 present quarterly consolidated foreign currency data reported by large market participants and FFIEC reporters which do not file weekly reports.

Principal exchanged under cross currency interest rate swaps is reported as part of purchases or sales of foreign exchange. Such principal is also separately noted on monthly and quarterly reports. The net options position, or the net delta-equivalent value of an options position, is an estimate of the relationship between an option's value and an equivalent currency hedge. The delta equivalent value is defined as the product of the first partial derivative of an option valuation formula (with respect to the price of the underlying currency) multiplied by the notional principal of the contract.

SECTION I.--Canadian Dollar Positions

INTRODUCTION: Exchange Stabilization Fund

To stabilize the exchange value of the dollar, the Exchange Stabilization Fund (ESF) was established under the Gold Reserve Act of January 30, 1934 (31 U.S.C. 822a), which authorized establishment of a Treasury Department fund to be operated under the exclusive control of the Secretary, with approval of the President.

Subsequent amendment of the Gold Reserve Act modified the original purpose somewhat to reflect termination of the fixed exchange rate system.

Resources of the fund include dollar balances, partially invested in U.S. Government securities, *Special drawing rights (SDRs)*, and balances of foreign currencies. Principal sources of income (losses) for the fund are profits (losses) on SDRs and foreign exchange, as well as interest earned on assets.

- Table **ESF-1** presents the assets, liabilities, and *capital* of the fund. The figures are in U.S. dollars or their equivalents based on current exchange rates computed according to the accrual method of accounting. The capital account represents the original capital appropriated to the fund by Congress of \$2 billion, minus a subsequent transfer of \$1.8 billion to pay for the initial U.S. quota subscription to the *IMF*. Gains and losses are reflected in the cumulative net income (loss) account.

- Table **ESF-2** shows the results of operations by quarter. Figures are in U.S. dollars or their equivalents computed according to the accrual method. "Profit (loss) on foreign exchange" includes realized profits or losses on currencies held. "Adjustment for change in valuation of *SDR holdings and allocations*" reflects net gain or loss on revaluation of SDR holdings and allocations for the quarter.

TABLE ESF-2.--Income and Expense

[In thousands of dollars. Source: Office of the Secretary of the Treasury]

Income and expense	Current quarter	Fiscal year to date
	July 1, 1994, through Sept. 30, 1994	Oct. 1, 1993, through Sept. 30, 1994
Profit (loss) on		
Foreign exchange	101,646	1,256,970
Adjustment for change in valuation of SDR holdings and allocations ¹	36,571	95,616
Interest (net charges) on		
Special drawing rights	28,896	101,254
U.S. Government securities	79,368	218,784
Foreign exchange	130,960	706,599
Income from operations	377,441	2,379,223
Net income (loss)	377,441	2,379,223

¹ Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing rights (SDRs) based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and allocations are valued on this basis beginning July 1974.

² Excludes foreign exchange transactions for future and spot delivery.

Note -- Annual balance sheets for fiscal years 1934 through 1940 appeared in the 1940 "Annual Report of the Secretary of the Treasury" and those for succeeding years appeared in subsequent reports through 1980. Quarterly balance sheets beginning with Dec. 31, 1938, have been published in the "Treasury Bulletin." Data from inception to Sept. 30, 1978, may be found on the statements published in the January 1979 "Treasury Bulletin."

Statement of Liabilities and Other Financial Commitments

The Statement of Liabilities and Other Financial Commitments of the United States Government is compiled in accordance with 31 U.S.C. 331 (b). The report discloses the liabilities as of September 30, 1993 and 1994. Commitments and contingencies are disclosed as of September 30, 1992 and 1993.

TABLE SLOFC-1.--Summary of Liabilities of the United States Government

[In millions of dollars. Source: Financial Management Service]

Section	1994	1993
Liabilities		
Borrowing from the public ²		
Public debt securities issued	4,692,751	¹ 4,411,491
Plus premium on public debt securities	1,333	1,373
Less discount on public debt securities	78,631	86,397
Total public debt securities net of premium and discount	4,615,453	4,326,467
Agency securities issued	28,543	¹ 24,877
Total Federal securities	4,643,996	4,351,344
Less net Federal securities held as investments of Government accounts	1,211,421	1,103,989
Total borrowing from the public	3,432,575	3,247,355
Accrued interest payable to the public	43,287	43,819
Deposit funds ³	7,316	⁴ 6,249
Miscellaneous liability accounts, includes checks outstanding ³	4,938	3,228
Accounts payable and accruals of Government agencies ⁵	243,055	244,784
Total liabilities	3,731,171	⁶ 3,545,435

¹ This is a revised fiscal 1993 amount obtained from "Schedule 1-U S Summary General Ledger Account Balances, 1994 Annual Report-Appendix"

² The public debt section has been expanded to report the net borrowing from the public as a liability

³ This line title has been changed to more accurately describe what is included

⁴ This is an improved fiscal 1993 figure obtained from a better source

⁵ Figure includes both public and Federal accounts

⁶ Revised fiscal 1993 amount.

CHART SLOFC-A.-- Commitments and Contingencies

This report contains totals for commitments of the Government that represent the value of goods and services ordered and obligated but not yet received. It also includes other commitments against appropriations, all pursuant to section 1311 of the Supplemental Appropriation Act of 1955 (31 U.S.C. 200). Contingencies represent conditional commitments that may become liabilities due to events beyond the control of the Government. The amounts are agency projections stated in terms of maximum theoretical risk exposure. The data for commitments and contingencies come from either agency financial statements or unaudited agency reports, which have been submitted to the Financial Management Service.

Note --Financial Management Service (FMS) expects to compile 1994 contingencies data by May 31, 1995. A copy of the detailed schedules can be obtained from the Financial Reports Branch (202) 874-9922. Amounts presented in Chart SLOFC-A were compiled from reports submitted by the agencies in accordance with vol. 1, part 2, chapter 4100 of the "Treasury Financial Manual" (Transmittal Letter No 512). The information furnished by some reporting agencies was based on estimates. Amounts presented in Table SLOFC-1 were compiled from "Schedule 1-U S General Ledger Account Balances, 1994 Annual Report-Appendix" and Treasury internal documents.

INTRODUCTION

The following pages are excerpted from the "Consolidated Financial Statements of the United States Government," (CFS) prototype 1993. The statements and accompanying information, prepared and published annually by the Department of the Treasury's Financial Management Service, are modeled after corporate-type reports and are developed on an accrual basis of accounting. These excerpts represent some of the most noteworthy information contained in the statements.

Data for the CFS are compiled from program agency accounting systems Governmentwide and are captured in five consolidated statements: Financial position, operations, cash flows, budget receipts and outlays, and reconciliation of accrual operating results to the budget. Customary notes to the financial statements as well as several broad supplementary tables—from accounts and loans receivable due from the public to Federal obligations—complete the publication.

United States Government Consolidated Statements of Financial Position, as of September 30, 1993 and 1992 (Unaudited)

Revenues and Expenses

The graphs on this page show the amounts of the U.S. Federal Government revenues and expenses for fiscal 1991 through 1993. The first graph on the following page separates revenue figures for 1992 and 1993 into major categories of revenues by source. The next graph provides a breakdown of the Government's expenses for those years by agency. Revenues levied under the Government's sovereign power are reported on the cash basis.

Revenues earned through Government business-type operations and the data supporting the graph of expenses by agency are reported on the accrual basis.

(Charts are in billions of dollars.)

Sources of Revenues

Categories of Expenses

¹ Does not include interest on investments held by Government agencies

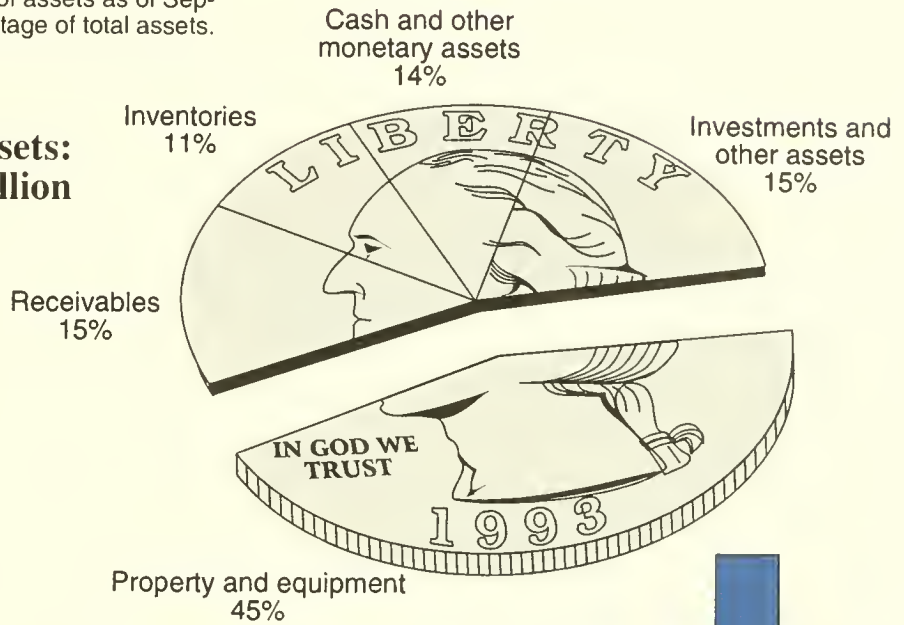

² Includes EPA, GSA, NASA, OPM, SBA, and other independent agencies.

³ Departmental agencies with expenses less than \$50 billion

Major Categories of Assets, as of September 30, 1993

Assets are resources owned by or owed to the Federal Government that are available to pay liabilities or to provide future public services. The next chart is derived from the Statements of Financial Position. It depicts the major categories of assets as of September 30, 1993, as a percentage of total assets.

**Total Assets:
\$1,362.4 billion**

Assets, Liabilities, and Accumulated Position, as of September 30, 1991-1993

The adjacent graph depicts assets, liabilities, and accumulated position reported in the Statements of Financial Position, as of September 30, 1991 through 1993.

(In billions of dollars)

Sources of Funds Provided and Applied

The charts on this page are derived from the Statements of Operations and the Statements of Cash Flows. Figures represent percentages for fiscal 1993.

Funds Provided

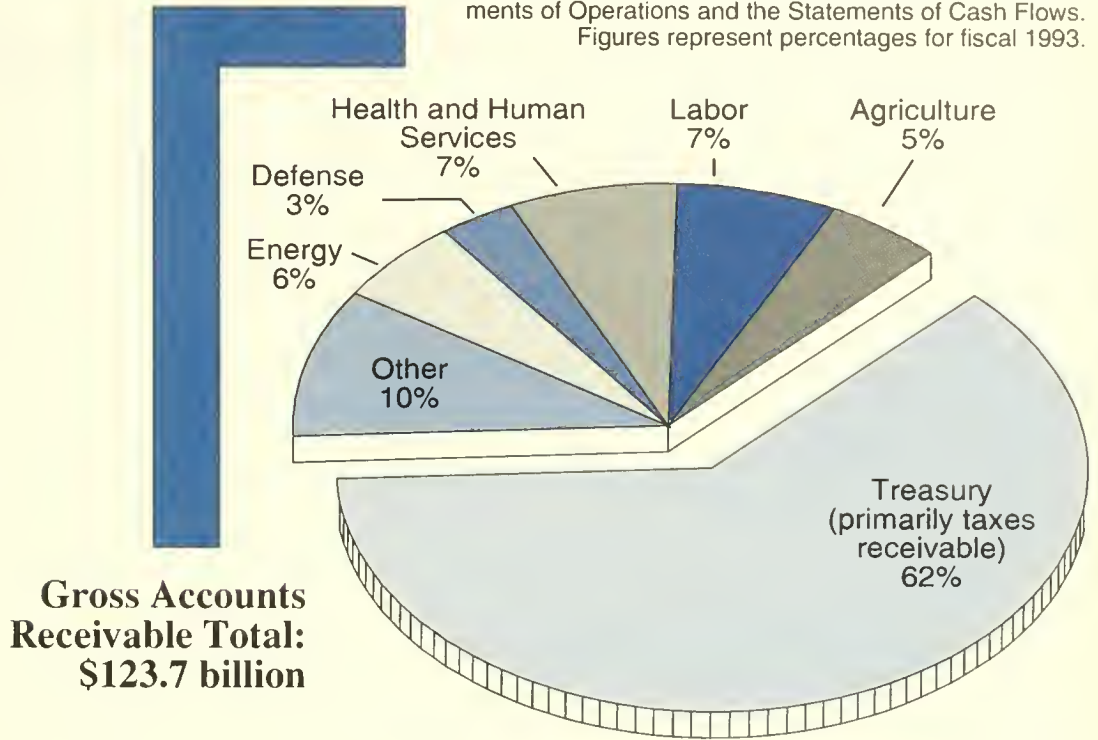

Funds Applied

Gross Accounts and Loans Receivable

The amounts in these graphs were derived from the Statements of Operations and the Statements of Cash Flows. Figures represent percentages for fiscal 1993.

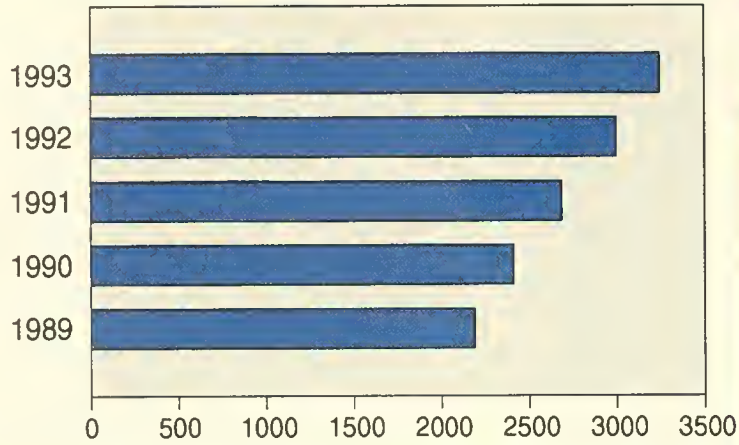

* These funds are primarily liquidating accounts for the Foreign Military Loan Account, the Economic Support Fund, Agency for International Development loans, and the Functional Development Assistance Program

Federal Debt

The following tables represent different facets of the net Federal debt, excluding intragovernment investments.

Federal Debt Held by the Public, Fiscal 1989-1993

(In billions of dollars)

Interest Expense, Fiscal 1989-1993

(In billions of dollars)

Types of Securities

(In billions of dollars)

Commitments and Contingencies

Commitments are long-term contracts for which appropriations have not been provided by the Congress and undelivered orders representing obligations. Contingencies are liabilities involving uncertainty as to a possible loss to the Government that will be resolved when one or more future events occur or fail to occur.

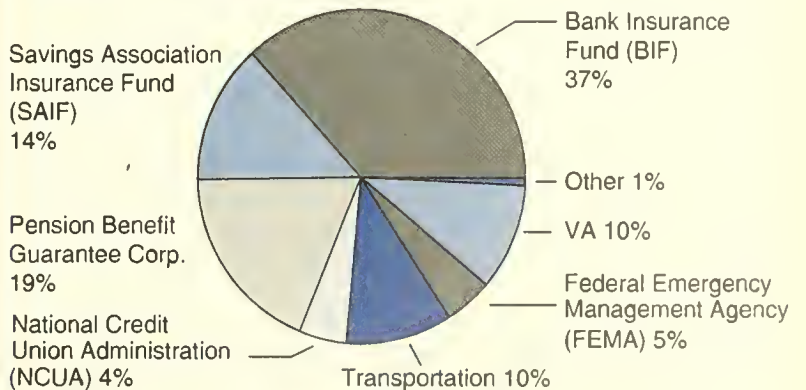

Commitments Total: \$387.6 billion

Contingencies (at face value) Total: \$5,867.7 billion

Insurance components

INTRODUCTION: Airport and Airway Trust Fund

The Airport and Airway Trust Fund was established on the books of the Treasury in fiscal 1971, according to provisions of the Airport and Airway Revenue Act of 1970 [49 U.S.C. 1742 (a)]. The trust fund was reestablished in the Internal Revenue Code (26 U.S.C. 9502) as a result of the Tax Equity and Fiscal Responsibility Act of 1982 (Public Law 97-248, dated September 3, 1982), effective September 1, 1982.

Amounts equivalent to the taxes received in the Treasury on transportation of persons and property by air, gasoline and jet fuel used in noncommercial aircraft, and an international departure tax are appropriated from the general fund of the Treasury to the trust fund. The Omnibus Budget Reconciliation Act of 1990 (Public Law 101-508, dated November 5, 1990) increased rates for the excise taxes transferred to the fund.

These transfers are made based on estimates made by the Secretary of the Treasury, subject to adjustments in later transfers in the amount of actual tax receipts.

When the provisions of 26 U.S.C. 9602 (b) are met, amounts available in the fund exceeding outlay requirements are invested in public debt securities with the interest credited to the fund. Additional sums from the general fund are also credited as authorized and made available by law, if necessary, to meet outlay requirements.

Amounts required for outlays to carry out the airport and airway program are made available to the Federal Aviation Administration, Department of Transportation.

Other charges to the trust fund are made by the Secretary of the Treasury for transfers of certain refunds of taxes and certain outfits under section 34 of the Internal Revenue Code of 1986.

Annual reports to Congress, required by 26 U.S.C. 9602 (a), are submitted by the Secretary of the Treasury, after consultation with the Secretary of Transportation. These reports are required to cover the financial condition and results of operations of the fund during the past fiscal year and those expected during the next 5 fiscal years.

Note --Under the Department of Transportation's reinvention proposal, Transportation infrastructure programs previously funded under separate modal grant programs, including airport grants, will be consolidated and replaced by Unified Transportation Infrastructure Investment Program (UTIIP). All activities of the UTIIP will be funded from a new Transportation

Trust Fund. The Airport and Airway Trust Fund is a separate account under the new Transportation Trust Fund.

INTRODUCTION: Uranium Enrichment Decontamination and Decommissioning Fund

The Uranium Enrichment Decontamination and Decommissioning Fund was established on the books of the Treasury in fiscal 1993, according to provisions of the Energy Policy Act of 1992 [42 U.S.C. 2297 (g)]. Receipts represent (1) fees collected from domestic public utilities based on their pro rata share of purchases of separative work units from the Department of Energy and (2) appropriations toward the Government contribution based on the balance of separative work unit purchases.

Expenditures from the fund are for the purpose of (1) decontamination and decommissioning of the three gaseous diffusion plants, (2) remedial actions and related environmental restoration costs at the gaseous diffusion plants, and (3) reimbursement to uranium/thorium producers for the costs of decontamination, decommissioning, reclamation, and remedial action of uranium/thorium sites that are incident to sales to the U.S. Government.

Amounts available in the fund exceeding current needs may be invested by the Secretary of the Treasury in obligations of the United States (1) having maturities congruent with the needs of the fund, and

(2) bearing interest at rates determined appropriate, taking into consideration the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to these investments.

The Secretary of the Treasury is required by 42 U.S.C. 2297 (g) to provide an annual report to Congress, after consultation with the Secretary of Energy. This report must present the financial condition and the results of operations of the fund during the preceding fiscal year.

The Energy Policy Act of 1992 [42 U.S.C. 2297 (g)(1)] authorizes appropriations to ensure annual deposits to the fund of \$480 million adjusted for inflation. In fiscal 1993, the Department of Energy received no appropriations for the Government contribution of \$330 million. In fiscal 1993, the Department of Energy received \$129.805 million from the Defense Environmental Restoration and Waste Management Appropriation and a transfer of \$68.531 million from the Uranium Enrichment Activity Appropriation. The shortfall of contributions from appropriations is approximately \$463.2 million.

INTRODUCTION: Black Lung Disability Trust Fund

The Black Lung Disability Trust Fund was established on the books of the Treasury in fiscal 1978 according to the Black Lung Benefits Revenue Act of 1977 (Public Law 95-227). The Black Lung Benefits Revenue Act of 1981 (Public Law 97-119), reestablished the fund in the IRC, 26 U.S.C. 9501.

The Consolidated Omnibus Budget Reconciliation Act of 1985 (Public Law 99-272), enacted April 7, 1986, provided for an increase in the coal tax effective April 1, 1986, through December 31, 1995, and a 5-year forgiveness of interest retroactive to October 1, 1985.

The 5-year moratorium on interest payments ended on September 30, 1990. Payment of interest on advances resumed in fiscal 1991. The Omnibus Budget Reconciliation Act of 1987 (Public Law 100-203), signed December 22, 1987, extends the temporary increase in the coal tax through December 31, 2013.

The Code designates the following receipts to be appropriated and transferred from the general fund of the Treasury to the trust fund: excise taxes on mined coal, taxable expenditures of self-dealing by, and excess contributions to, private black lung benefit trusts; reimbursements by responsible mine operators; and related fines, penalties, and interest charges.

Estimates made by the Secretary of the Treasury determine monthly transfers of amounts for excise taxes to the trust fund subject to adjustments in later transfers to actual tax receipts.

After retirement of the current indebtedness, amounts available in the fund exceeding current expenditure requirements will be invested by the Secretary of the Treasury in interest-bearing public debt securities. Any interest earned will be credited to the fund. Also credited, if necessary, will be repayable advances from the general fund to meet outlay requirements exceeding available revenues.

To carry out the program, amounts are made available to the Department of Labor. Also charged to the fund are administrative expenses incurred by the Department of Health and Human Services and the Department of the Treasury, repayments of advances from the general fund and interest on advances.

The Code requires the Secretary of the Treasury to submit an annual report to Congress after consultation with the Secretary of Labor and the Secretary of Health and Human Services (26 U.S.C. 9602(a)). The report must present the financial condition and results of operations of the fund during the past fiscal year and the expected condition and operations of the fund during the next 5 fiscal years.

INTRODUCTION: Harbor Maintenance Trust Fund

The Harbor Maintenance Trust Fund was established on the books of the Treasury on April 1, 1987, according to the Water Resources Development Act of 1986 (Public Law 99-962, November 17, 1986) (26 U.S.C. 9505).

The Harbor Maintenance Trust Fund consists of such amounts as may be appropriated provided by section 9505 (b), transferred by the Saint Lawrence Seaway Development Corporation (SLSDC) according to section 13 (a) of the Act of May 13, 1954, or credited as provided in section 9602 (b). Amounts are appropriated equivalent to the user fees in the Treasury under section 4461 (relating to harbor maintenance tax).

Amounts in the Harbor Maintenance Trust Fund are available as provided by appropriation acts for making expenditures to carry out section 210 (a) of the Water Resources Development Act of 1986. The appropriations act for the Department of Transportation for fiscal 1995 (Public Law 103-331, September 28, 1994), Section 13, waived collection of charges or tolls on the Saint Lawrence Seaway in accordance with section 13 (b) of the Act of May 13, 1954 (as in effect on April 1,

1987). Legislation was passed in the North American Free Trade Agreement (NAFTA) Implementation Act of 1994 (Public Law 103-182, Sec. 683), which amends paragraph (3) of section 9505 (c) of the Internal Revenue Code of 1986, to authorize payment of up to \$5 million annually to the Department of the Treasury, for all expenses of administration incurred by the Department of the Treasury, the U.S. Army Corps of Engineers, and the Department of Commerce related to the administration of subchapter A of chapter 36 (relating to harbor maintenance tax).

Legislation is being proposed in fiscal 1995 to authorize payment from the fund of \$45.5 million annually to the National Oceanic and Atmospheric Administration (NOAA) to fund programs that benefit the commercial navigation industry.

Annual reports to Congress are required by 26 U.S.C. 9602 (a) to be submitted by the Secretary of the Treasury. These reports are required to cover the financial condition and the results of operations of the fund during the past fiscal year and its expected condition and operations during the next 5 fiscal years.

INTRODUCTION: Hazardous Substance Superfund

The Hazardous Substance Response Trust Fund was established on the books of the Treasury in fiscal 1981, in accordance with provisions of the Hazardous Substance Response Revenue Act of 1980 (42 U.S.C. 9631 (a)). Effective fiscal 1987, the trust fund was reestablished as the Hazardous Substance Superfund (Superfund) in accordance with provisions of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980 (Public Law 96-510), as amended by the Superfund Amendments and Reauthorization Act (SARA) of 1986 (Public Law 99-499, dated October 17, 1986).

The Internal Revenue Service collects excise taxes on petroleum and chemicals, and an environmental tax from all corporations with modified alternative minimum taxable income in excess of \$2 million. In addition, the Superfund is authorized to be appropriated general revenues from the general fund not otherwise appropriated Cost recoveries, and other miscellaneous receipts (e.g. interest revenue) are deposited directly to the Superfund. Also appropriated to the

Superfund, if required, are repayable advances from the general fund to meet outlay requirements in excess of available revenues. Amounts available in the Superfund, in excess of current expenditure requirements, are invested by the Secretary of the Treasury in interest-bearing Government securities (e.g., Treasury bills). All interest earned is credited directly to the Superfund.

To carry out the Superfund program, amounts are appropriated from the Superfund to the Environmental Protection Agency (EPA) for programmatic and administrative expenses, repayment of advances to the general fund, and interest expense associated with outstanding advances from the general fund.

An annual report to Congress by the Secretary of Treasury is required by section 9633 (b) (1) of CERCLA, as amended. These reports present the financial condition of the Superfund and the results of operation for the past fiscal year, and its expected condition and operations during the next 5 years.

² On January 1, 1996, the corporate environmental tax expires unless reauthorized by Congress. The estimate includes only the first quarter fiscal 1996 corporate collections.

INTRODUCTION: Highway Trust Fund

The Highway Trust Fund was established on the books of the Treasury in fiscal 1971, according to provisions of the Highway Revenue Act of 1956, as amended (23 U.S.C. 120 note). It was reestablished on the books of the Treasury by the Surface Transportation Assistance Act of 1982, and modified by the Deficit Reduction Act of 1984 (Public Law 98-369, approved July 18, 1984), the Surface Transportation and Uniform Relocation Assistance Act of 1987, and the Omnibus Budget Reconciliation Act of 1990. Amounts equivalent to taxes on gasoline, diesel fuel, special motor fuels, certain tires, vehicles, and truck use, are designated by the Act to be appropriated and transferred from the general fund of the Treasury to the trust fund. These transfers are made monthly based on estimates by the Secretary of the Treasury, subject to adjustments in later transfers to the amount of actual tax receipts. Amounts available in the fund exceeding outlay requirements are invested in public debt securities and interest is credited to the fund.

The termination date of the fund was extended to September 30, 1999, as a result of the Intermodal Surface Transportation Efficiency Act of 1991 (Public Law 102-24, approved December 18, 1991).

Within the fund is a mass transit account, funded by a portion of the excise tax collections under sections 4041, 4081, and 4091 of the

Internal Revenue Code (26 U.S.C.). The funds from this account are used for expenditures according to section 21 (a) (2) of the Urban Mass Transportation Act of 1964 or the Intermodal Surface Transportation Efficiency Act of 1991. The remaining excise taxes collected are included in a higher account within the trust fund, and expenditures from this account are made according to the provisions of various transportation Acts.

Amounts required for outlays to carry out the Federal Highway program are made available to the Federal Highway Administration, Department of Transportation. Other charges to the trust fund are made by the Secretary of the Treasury for transfer of certain taxes to the land and water conservation fund and to the Aquatic Resources Trust Fund and refunds of certain taxes.

Annual reports to Congress are required by 26 U.S.C. 9602 (a) Internal Revenue Code as amended, to be submitted by the Secretary of the Treasury, after consultation with the Secretary of Transportation. These reports cover the financial condition and results of operations of the fund for the past fiscal year and expected condition and operations during the next 5 fiscal years.

INTRODUCTION: Inland Waterways Trust Fund

The Inland Waterways Trust Fund was established by the Treasury in fiscal 1984, according to provisions of the Inland Waterways Revenue Act of 1978 (Public Law 95-502) and continued according to the Water Resources Development Act of 1986 (26 U.S.C. 9506). Amounts determined by the Secretary of the Treasury to be section 4042 of the Internal Revenue Code of 1986 (relating to tax on fuel used in commercial transportation on Inland Waterways) shall be appropriated to the trust fund.

The Technical and Miscellaneous Revenue Act of 1988 (Public Law 100-647, approved November 10, 1988) increased the tax each year, 1990-1995. These amounts are transferred quarterly from the general fund based on estimates made by the Secretary, subject to adjustments in later transfers to the amounts of actual tax receipts.

The Secretary of the Treasury invests in interest-bearing obligations of the United States that portion of the trust fund, in his judgment, not required to meet current withdrawals. The interest on, and proceeds from the sale or redemption of, any obligation held in the trust fund is credited to the trust fund. The act provides that amounts in the trust fund shall be available, by appropriations acts, for making construction and rehabilitation expenditures for navigation on the inland and intracoastal waterways of the United States described in 33 U.S.C. 1804. Expenditures must be otherwise authorized by law.

Annual reports to Congress are required by 26 U.S.C. 9602 (a) of the Secretary of the Treasury. These reports are required to cover the financial condition and the results of operations of the fund during the prior fiscal year and its expected condition and operations during the next 5 fiscal years.

INTRODUCTION: Leaking Underground Storage Tank Trust Fund

The Leaking Underground Storage Tank (LUST) Trust Fund was established in fiscal 1981 according to provisions of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980 (Public Law 96-510), as amended by the Superfund Amendments and Re-authorization Act (SARA) of 1986 (Public Law 99-499, dated October 17, 1986) and the Omnibus Budget Reconciliation Act of 1990 (Public Law 101-508, dated November 5, 1990).

The LUST Trust Fund is financed by taxes collected on gasoline, diesel fuels, special motor fuels, aviation fuels, and fuels used in commercial transportation on inland waterways. Amounts available in the LUST Trust Fund, exceeding current expenditure requirements,

are invested by the Secretary of the Treasury in interest-bearing Government securities (e.g., Treasury bills). All interest earned is credited directly to the LUST Trust Fund.

To carry out the LUST program, amounts are appropriated for the LUST Trust Fund to the Environmental Protection Agency (EPA) for programmatic and administrative expenses.

An annual report to Congress by the Secretary of the Treasury is required by 26 U.S.C. 9602 (a). These reports present the financial condition of the LUST Trust Fund and results of operations for the past fiscal year, and its expected condition and operations during the next 5 fiscal years.

INTRODUCTION: Nuclear Waste Fund

The Nuclear Waste Fund was established on the books of the Treasury in fiscal 1983, according to provisions of the Nuclear Waste Policy Act of 1982 [42 U.S.C. 10222 (c)]. Receipts represent fees collected from public utilities based on electricity generated by nuclear power reactors and spent nuclear fuel. Expenditures from the fund are for purposes of radioactive waste disposal activities.

Amounts available in the fund exceeding current needs may be invested by the Secretary of the Treasury in obligations of the United States (1) having maturities in tandem with the needs of the waste fund, and (2) bearing interest at rates determined appropriate, taking into

consideration the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the maturities of such investments, except that the interest rate on such investments shall not exceed the average interest rate applicable to existing borrowings.

An annual report to Congress by the Secretary of the Treasury, after consultation with the Secretary of Energy, is required by 42 U.S.C. 10222 (e) (1). This report must present the financial condition and the results of operations of the waste fund during the preceding fiscal year.

INTRODUCTION: Reforestation Trust Fund

The Reforestation Trust Fund was established on the books of the Treasury in fiscal 1981 to continue through September 30, 1985, according to provisions of Title III--Reforestation, of the Recreational Boating Safety and Facilities Improvement Act of 1980 [16 U.S.C. 1606a (a)].

The act provides that the Secretary of the Treasury shall transfer to the trust fund tariffs, limited to not more than \$30 million for any fiscal year, received in the Treasury from October 1, 1979, through September 30, 1985, on (1) rough and primary wood products and wood waste; (2) lumber, flooring, and moldings; and (3) wood veneers, plywood, and other wood-veneer assemblies, and building boards. Public Law 99-190 extended the receipts for the trust fund. Amounts available in the reforestation trust fund exceeding current withdrawals are invested

in interest-bearing obligations of the United States or in obligations guaranteed as to both principal and interest by the United States. The interest on, and the proceeds from the sale or redemption of, any obligations are credited to the trust fund.

The Secretary of Agriculture is authorized to obligate available sums in the trust fund (including any amounts not obligated in previous years) for (1) reforestation and timber stand improvement and (2) administrative costs of the Government for these activities.

Annual reports are required by 16 U.S.C. 1606 a (c) (1) to be submitted by the Secretary of the Treasury, after consultation with the Secretary of Agriculture, on the financial condition and the results of the operations of the trust fund during the past fiscal year and on its expected condition and operations during the next fiscal year.

INTRODUCTION: Aquatic Resources Trust Fund

Aquatic Resources Trust Fund was established on the books of the Treasury pursuant to the Deficit Reduction Act of 1984 (Public Law 98-369, approved July 18, 1984). The fund consists of two accounts: the Sport Fish Restoration Account and Boat Safety Account.

Motorboat fuel taxes are transferred, in amounts up to \$70 million per fiscal year, from the Highway Trust Fund to the Boat Safety Account. Authority for such transfers expires on October 1, 1997.

Amounts equivalent to the excise taxes received on sport fishing equipment and import duties on fishing tackle, yachts, and pleasure craft are appropriated into the Sport Fish Restoration Account. Motorboat fuel taxes not transferred to the Boat Safety Account or to the Land and Water Conservation Fund are transferred from the Highway Trust Fund to the Sport Fish Restoration Account. Transfers of motorboat fuel taxes from the Highway Trust Fund to the Land and Water Conservation Fund are limited to \$1 million per fiscal year. In addition, pursuant to the Omnibus Budget Reconciliation Act of 1990 (Public Law 101-508), small engine gasoline taxes are transferred to the Sport Fish Restoration Account.

Amounts in the Sport Fish Restoration Account are used, as provided by appropriation acts, for the purposes of carrying out "An Act to provide that the United States shall aid the States in fish restoration and management projects, and for other purposes," approved August 9, 1950 (as in effect on October 1, 1988) and the Coastal Wetlands Planning, Protection and Restoration Act, as in effect on November 29, 1990.

Amounts in the Boat Safety Account, as provided by appropriation acts are available to carry out the purposes of Public Law 92-75 related to recreational boating safety assistance.

When the provisions of 26 U.S.C. 9602 (b) are met, amounts available in the two accounts exceeding outlay requirements are invested in public debt securities with the interest credited to the respective accounts.

Annual reports to Congress, required by 26 U.S.C. 9602 (a), are submitted by the Secretary of the Treasury. These reports are required to cover the financial condition and results of operations of the fund during the past fiscal year and those expected during the next 5 fiscal years.

INTRODUCTION: Oil Spill Liability Trust Fund

The Oil Spill Liability Trust Fund was established on the books of the Treasury by the Omnibus Budget Reconciliation Act 1986 (Public Law 99-509). It was made effective on January 1, 1990, by the Omnibus Budget Reconciliation Act of 1989 (Public Law 101-239), and amended by the Oil Pollution Act of 1990 (Public Law 101-380).

Amounts equivalent to the taxes received from the environmental tax on petroleum, but only to the extent of the Oil Spill Liability Trust Fund rate, are appropriated to the fund. The tax is not applied during any calendar quarter if the Secretary of the Treasury estimates that, as of the close of the preceding calendar quarter, the unobligated balance in the fund exceeds \$1 billion.

Certain amounts were transferred from other funds and were appropriated to the Oil Spill Liability Trust Fund as provided by U.S.C.

26 9509 (b). certain paid penalties and amounts recovered for damages are also appropriated to the fund.

Amounts in the fund are available for oil spill cleanup costs and certain other related purposes as provided by appropriations acts or section 6002 (b) of the Oil Pollution Act of 1990.

When the provisions of 26 U.S.C. 9602 (b) are met, amounts available in the fund exceeding outlay requirements are invested in public debt securities. Interest is credited to the fund.

Annual reports to Congress, required by 26 U.S.C. (a), are submitted by the Secretary of the Treasury. These reports are required to cover the financial condition and results of operations of the fund during the past fiscal year and those expected during the next 5 fiscal years.

INTRODUCTION: Vaccine Injury Compensation Trust Fund

The Vaccine Injury Compensation Trust Fund (VICTF) was created on the books of the Treasury by the Revenue Act of 1987 (Public Law 100-203, approved December 22, 1987). Excise taxes on DPT, DT, MMR and polio vaccines (26 U.S.C. 4131) are appropriated into the fund which serves as a source of funds to pay claims for compensation for vaccine-related injury or death occurring after October 1, 1988. Under current law, the excise tax imposed by the VICTF expires if the

project balance of the VICTF, as of the calendar quarter ending December 31, 1992, is not negative.

Annual reports to Congress, required by 26 U.S.C. (a), are submitted by the Secretary of the Treasury. These reports are required to cover the financial condition and results of operations of the fund during the past fiscal year and those expected during the next 5 fiscal years.

INTRODUCTION: National Recreational Trails Trust Fund

Provisions relating to a National Recreational Trails Trust Fund were enacted as part of the Intermodal Surface Transportation Efficiency Act of 1991 (Public Law 102-240, approved December 18, 1991). The Act provides that amounts equivalent to the taxes imposed on fuel used in vehicles on recreational trails or back country terrain and in camp stoves and other non-engine uses in outdoor recreational equipment shall be paid from the Highway Trust Fund to the National Recreational Trails Trust Fund (26 U.S.C. 9503 (c) (6)). Transfers to the fund are limited to amounts obligated under section 1302 of the Act. Obligated amounts cannot exceed \$30 million per fiscal year over the 1992-97 period. Obligations cannot be made until amounts are

appropriated; there have been no appropriations for fiscal 1992, 1993, or 1994.

When the provisions of 26 U.S.C. 9602 (b) are met, amounts available in the fund exceeding outlay requirements are invested in public debt securities with the interest credited to the fund.

Annual reports to Congress, required by 26 U.S.C. 9602 (a), are submitted by the Secretary of the Treasury. These reports are required to cover the financial condition and results of operations of the fund during the past fiscal year and those expected during the next 5 fiscal years.

Note.-- No current figures or future projections are available because funds have yet to be appropriated to the fund

TECHNICAL PAPERS

Recent Reports and Studies

*A Recommendation for Tax System Integration*¹

The Department of the Treasury released "A Recommendation for Integration of the Corporate and Individual Tax Systems" on December 11, 1992. The paper summarizes a dividend exclusion system whereby dividends are treated either as excludable or a return of capital. The system prevents

the double taxation of retained earnings through a dividend reinvestment plan. The report is a follow-up to the "Report of the Department of the Treasury on Integration of the Individual and Corporate Tax Systems: Taxing Business Income Once," released in January 1992.

*Report on the Taxation of Americans Working Overseas, 1987*¹

On January 12, 1993, the Department of the Treasury submitted to Congress an interim report entitled "Taxation of Americans Working Overseas, The Operation of the Foreign Earned Income Exclusion in 1987." Under section 911, qualified individuals may exclude up to \$70,000 of foreign earned income as well as the excess of reasonable foreign housing costs from their U.S. tax liability. The report covers the 1987 tax year, in which more than 150,000 returns are estimated to have been

filed by those who qualified for the section 911 benefits. Of the \$7.1 billion in foreign earned income reported on these returns, Americans working abroad claimed an estimated \$5.7 billion in excludable income and more than half of those persons were able to completely eliminate their U.S. tax liability. For 1987, the use of section 911, as opposed to the foreign tax credit, is estimated to have resulted in a revenue loss to the U.S. fisc of \$740 million.

*Foreign Sales Corporation Report*¹

On January 13, 1993, the Department of the Treasury submitted to Congress its report on "The Operation and Effect of the Foreign Sales Corporation Legislation: January 1, 1985 to June 30, 1988." The report covers the first 3 years of the operation of the foreign sales corporation (FSC) program, created as part of the Deficit Reduction Act of 1984. By using an FSC as an exporter or commission agent, a U.S. firm typically can save 15 percent of the U.S. income tax of export profits. The report estimates that the revenue cost of the

program was \$790 million in 1985, \$811 million in 1986, and \$760 million in 1987. The program is estimated to have increased total U.S. merchandise exports by about \$1.5 billion (or 0.7 percent of total merchandise exports) in 1985 and in 1986, and by about \$1.2 billion (0.5 percent) in 1987. It is estimated to have improved the U.S. merchandise trade balance by about \$1.6 billion in 1985 and in 1986, and by about \$1.5 billion in 1987.

*The Sales Source Rules Report*¹

The Department of the Treasury released its "Report to the Congress on the Sales Source Rules" on January 13, 1993. The sales source rules of the Internal Revenue Code determine when income from the sale of inventory property can be considered to arise within the United States and when it can be considered to arise abroad. The rules allow a U.S. taxpayer, in some cases, to treat up to half of the income from the sale of exports as arising abroad, regardless of where the activity producing the income actually occurs, and may substantially

reduce the effective rate of tax on export income earned by U.S. exporters with operations in high-tax countries. Based on corporate tax returns for 1986 and 1988 and recent Department of Commerce surveys of international trade, the report estimates that, compared to rules that would determine the source of export income based upon where the activity producing the income occurs, the sales source rules increased U.S. merchandise exports in 1990 by up to \$4 billion and decreased income tax revenues by \$1.8 to 2.1 billion.

*Fraternal Benefit Societies Report*¹

The Department of the Treasury released its "Report to the Congress on Fraternal Benefit Societies" on January 15, 1993. The report examines the operations of large fraternal benefit societies as mandated under section 1012 (c) of the Tax Reform Act of 1986. Fraternal Benefit Societies provide insurance and fraternal or club services to members, and charitable goods and services to the community. They are exempt from corporate income tax (including tax on their insurance income) under section 501 (c) (8) of the Internal Revenue Code. The report concludes that the insurance operations of fraternal benefit societies are similar to those of commercial insurers. Fraternal benefit societies do not appear to use their tax exemption to

compete unfairly with commercial insurers in terms of price or to operate inefficiently. The study also determines that, in general, large fraternal benefit societies do not use their tax exemption to subsidize the purchase of insurance by low-income members or those with poor health. The tax exemption of their insurance operations does appear to allow fraternal benefit societies to finance fraternal and charitable goods and services and to accumulate surplus. The report makes no recommendation as to the taxation of the insurance income of these entities. However, it notes some options—ranging from no change in current tax treatment to taxation of insurance income.

*International Tax Reform: Interim Report*¹

The Department of the Treasury released "International Tax Reform: An Interim Report" on January 15, 1993. The report describes various options for simplification of the Internal Revenue Code provisions regarding taxation of income from foreign direct investment by U.S. multinational corporations. In addition, the report discusses the simplification potential of two alternative taxation structures: a modified exemption system and a current inclusion system. The report is a preliminary part

of a reassessment of the international income tax provisions. While the final conclusions of the study will depend upon the results of ongoing analysis, the interim report makes clear that international income tax provisions should be simplified to reduce compliance costs, facilitate the free flow of capital, and promote the competitiveness of U.S. multinational corporations.

*Social Security and Railroad Retirement Benefits Taxation, 1990*¹

The "Report on the Taxation of Social Security and Railroad Retirement Benefits in Calendar Year 1990" was released by the Department of the Treasury on January 15, 1993. In the report, Treasury explains the methodology used in determining transfers of income tax liabilities to the social security and Railroad Retirement Trust Funds. These transfers are required by the Social Security Amendments of 1983. The transfers consist of tax liabilities resulting from the taxation of social security and railroad social security equivalent benefits received by high income taxpayers. Transfers are initially based

on Treasury estimates and are adjusted when actual tax return data are available. Based on actual 1990 tax returns, the report finds that the initial transfers of \$4,667 million fell short of actual tax liabilities by \$50 million. The report estimates that \$31.4 billion will be transferred to the trust funds for calendar years 1991 through 1995 as a consequence of the taxation of benefits. The report also finds that about 16 percent of tax returns filed by beneficiaries have taxable benefits. On average, returns with taxable benefits include almost 40 percent of their benefits in adjusted gross income.

*Assessment of Bank-Reported Data in the U.S. Balance of Payments*²

On February 18, 1993, the Department of the Treasury's Office of Data Management released Research Paper No. 9301, "The Bank-Reported Data in the U.S. Balance of Payments: Basic Features and an Assessment of their Reliability." Written by Michael Cayton, the paper provides results of the on-going examination of data collected by the Department of Treasury in the Treasury International Capital (TIC) data base. In an attempt to assess the data's reliability and possible role

in recent balance-of-payments statistical discrepancies, the paper compares TIC data with Federal Reserve data and with data from the Bank for International Statistics. Through this comparison and through econometric analysis, the author suggests the bank-reported data are not unreliable and do not contribute significantly to the discrepancies. This tentative conclusion casts doubt on the possibility of large random errors in banking data.

*Treasury Reviews Insurance Issues*²

The Office of Economic Policy released two research papers as part of a broad review of insurance issues. Research Paper No. 9202, dated July 21, 1992, "Life-Health Insurance Markets," by John S. Greenlees and James E. Duggan, provides an economic overview of the life-health sector of the U.S. insurance market. This sector provides a mix of products and services to firms and individuals including annuities and pension fund management. According to the authors, changes in revenues and profitability in these product markets could have "significant implications for the future prospects of the insurance industry." This paper presents information on the size and growth of the insurance industry, illustrating its role within the larger economy. It also includes a discussion of health insur-

ance issues and of the role of commercial life-health firms in the health insurance market.

In Research Paper No. 9203, dated August 14, 1992, "Property-Casualty Insurance Markets," authors Lucy Huffman and David Bernstein review financial trends and public policy issues affecting the property-casualty insurance industry. The study offers an overview of the structure and financial condition of the industry and discusses economic and legal factors that raise public policy issues and prompt solvency concerns, including the impact of the tort liability system on costs and nonmarket regulatory responses. The study also looks at competition in the insurance industry and summarizes performance issues in selected individual lines.

Glossary

With References to Applicable Sections and Tables

Accrued discount (SBN-1, -2, -3)—Interest that accumulates on savings bonds from the date of purchase until the date of redemption or final maturity, whichever comes first. Series A, B, C, D, E, EE, F, and J are discount or accrual type bonds—meaning principal and interest are paid when bonds are redeemed. Series G, H, HH, and K are current-income bonds, and the semiannual interest paid to their holders is not included in accrued discount.

Amounts outstanding and in circulation (USCC)—Includes all issues by the Bureau of the Mint purposely intended as a medium of exchange. Coins sold by the Bureau of the Mint at premium prices are excluded; however, uncirculated coin sets sold at face value plus handling charge are included.

Average discount rate (PDO-2, -3)—In Treasury bill auctions, purchasers tender competitive bids on a discount rate basis. The average discount rate is the weighted, or adjusted, average of all bids accepted in the auction.

Budget authority (“Federal Fiscal Operations”)—Congress passes laws giving budget authority to Government entities, which gives the agencies the power to spend Federal funds. Congress can stipulate various criteria for the spending of these funds. For example, Congress can stipulate that a given agency must spend within a specific year, number of years, or any time in the future.

The basic forms of budget authority are appropriations, authority to borrow, and contract authority. The period of time during which Congress makes funds available may be specified as 1-year, multiple-year, or no-year. The available amount may be classified as either definite or indefinite; a specific amount or an unspecified amount can be made available. Authority may also be classified as current or permanent. Permanent authority requires no current action by Congress.

Budget deficit—The total, cumulative amount by which budget outlays (spending) exceed budget receipts (income).

Capital (“Federal Obligations”)—Assets, such as land, equipment, and financial reserves.

Cash management bills (PDO-2)—Marketable Treasury bills of irregular maturity lengths, sold periodically to fund short-term cash needs of Treasury. Their sale, having higher minimum and multiple purchase requirements than those of other issues, is generally restricted to competitive bidders.

Competitive tenders (“Treasury Financing Operations”)—A bid to purchase a stated amount of one issue of Treasury securities at a specified yield or discount. The bid is accepted if it is within the range accepted in the auction. (See Noncompetitive tenders.)

Coupon issue—The issue of bonds or notes (public debt).

Currency no longer issued (USCC)—Old and new series gold and silver certificates, Federal Reserve notes, national bank notes, and 1890 Series Treasury notes.

Current income bonds (“U.S. Savings Bonds and Notes”)—Bonds paying semiannual interest to holders. Interest is not included in accrued discount.

Debt outstanding subject to limitation (FD-6)—The debt incurred by the Treasury subject to the statutory limit set by Congress. Until World War I, a specific amount of debt was authorized to each separate security issue. Beginning with the Second Liberty Loan Act of 1917, the nature of the limitation was modified until, in 1941, it developed into an overall limit on the outstanding Federal debt. As of December 1994,

the debt limit was \$4,900,000 million; the limit may change from year to year.

The debt subject to limitation includes most of Treasury’s public debt except securities issued to the Federal Financing Bank, upon which there is a limitation of \$15 billion, and certain categories of older debt (totaling approximately \$595 million as of February 1991).

Discount—The interest deducted in advance when purchasing notes or bonds. (See Accrued discount.)

Discount rate (PDO-2)—The difference between par value and the actual purchase price paid, annualized over a 360-day year. Because this rate is less than the actual yield (coupon-equivalent rate), the yield should be used in any comparison with coupon issue securities.

Dollar coins (USCC)—Include standard silver and nonsilver coins.

Domestic series (FD-2)—Nonmarketable, interest and non-interest-bearing securities issued periodically by Treasury to the Resolution Funding Corporation (RFC) for investment of funds authorized under section 21B of the Federal Home Loan Bank Act (12 U.S.C. 1441b).

Federal intrafund transactions (“Federal Fiscal Operations”)—Intrabudgetary transactions in which payments and receipts both occur within the same Federal fund group (Federal funds or Trust funds).

Federal Reserve notes (USCC)—Issues by the U.S. Government to the public through the Federal Reserve banks and their member banks. They represent money owed by the Government to the public. Currently, the item “Federal Reserve notes—amounts outstanding” consists of new series issues. The Federal Reserve note is the only class of currency currently issued.

Foreign (“Foreign Currency Positions,” IFS-2, -3)—(international) Locations other than those included under the definition of the United States. (See United States.)

Foreigner (“Capital Movements,” IFS-2)—All institutions and individuals living outside the United States, including U.S. citizens living abroad, and branches, subsidiaries, and other affiliates abroad of U.S. banks and business concerns; central governments, central banks, and other official institutions of countries other than the United States, and international and regional organizations, wherever located. Also, refers to persons in the United States to the extent that they are known by reporting institutions to be acting for foreigners.

Foreign official institutions (“Capital Movements”)—Includes central governments of foreign countries, including all departments and agencies of national governments; central banks, exchange authorities, and all fiscal agents of foreign national governments that undertake activities similar to those of a treasury, central bank, or stabilization fund; diplomatic and consular establishments of foreign national governments; and any international or regional organization, including subordinate and affiliate agencies, created by treaty or convention between sovereign states.

Foreign public borrower (“Capital Movements”)—Includes foreign official institutions, as defined above, the corporations and agencies of foreign central governments, including development banks and institutions, and other agencies that are majority-owned by the central government or its departments; and state provincial and local governments of foreign countries and their departments and agencies.

Foreign-targeted issue (PDO-1, -3)—Foreign-targeted issues were notes sold between October 1984 and February 1986 to foreign institutions, foreign branches of U.S. institutions, foreign central banks or monetary authorities, or to international organizations in which the

Glossary

United States held membership. Sold as companion issues, they could be converted to domestic (normal) Treasury notes with the same maturity and interest rates. Interest was paid annually.

Fractional coins (USCC)—Coins minted in denominations of 50, 25, and 10 cents, and minor coins (5 cents and 1 cent).

Government account series (FD-2)—Certain trust fund statutes require the Secretary of the Treasury to apply monies held by these funds toward the issuance of nonmarketable special securities. These securities are sold directly by Treasury to a specific Government agency, trust fund, or account. Their rate is based on an average of market yields on outstanding Treasury obligations, and they may be redeemed at the option of the holder. Roughly 80 percent of these are issued to five holders: the Federal Old-age and Survivors Insurance Trust Fund; the civil service retirement and disability fund; the Federal Hospital Insurance Trust Fund; the military retirement fund; and the Unemployment Trust Fund.

International Monetary Fund ("Exchange Stabilization Fund," IFS-1)—(IMF) Established by the United Nations, the IMF promotes international trade, stability of exchange, and monetary cooperation. Members are allowed to draw from the fund.

Interfund transactions ("Federal Fiscal Operations")—Transactions in which payments are made from one fund group (either Federal funds or trust funds) to a receipt account in another group.

Intrabudgetary transactions ("Federal Fiscal Operations")—These occur when payment and receipt both occur within the budget, or when payment is made from off-budget Federal entities whose budget authority and outlays are excluded from the budget totals.

Matured non-interest-bearing debt (SBN-1, -2, -3)—The value of outstanding savings bonds and notes that have reached final maturity and no longer earn interest. Includes all Series A-D, F, G, J, and K bonds. Series E bonds (issued between May 1941 and November 1965), Series EE (issued since January 1980), Series H (issued from June 1952 through December 1979), and savings notes issued between May 1967 and October 1970 have a final maturity of 30 years. Series HH bonds (issued since January 1980) mature after 20 years.

Noncompetitive tenders ("Treasury Financing Operations")—Offers by an investor to purchase Treasury securities at the price equivalent to the weighted average discount rate or yield of accepted competitive tenders in a Treasury auction. Noncompetitive tenders are always accepted in full.

Obligation ("Federal Obligations")—An unpaid commitment to acquire goods or services.

Off-budget Federal entities ("Federal Fiscal Operations")—Federally owned and controlled entities whose transactions are excluded from the budget totals under provisions of law. Their receipts, outlays, and surplus or deficit are not included in budget receipts, outlays, or deficits. Their budget authority is not included in totals of the budget.

Own foreign offices ("Capital Movements")—Refers to U.S. reporting institutions' parent organizations, branches and/or majority-owned subsidiaries located outside the United States.

Outlays ("Federal Fiscal Operations")—(expenditures, net disbursements) Payments on obligations in the form of cash, checks, the issuance of bonds or notes, or the maturing of interest coupons.

Par value—The face value of bonds or notes, including interest.

Quarterly financing ("Treasury Financing Operations")—Treasury has historically offered packages of several "coupon" security issues on the 15th of February, May, August, and November, or on the next working day. These issues currently consist of a 3-year note, a 10-year

note, and a 30-year bond. Treasury sometimes offers additional amounts of outstanding long-term notes or bonds, rather than selling new security issues. (See Reopening.)

Receipts ("Federal Fiscal Operations")—Funds collected from selling land, capital, or services, as well as collections from the public (budget receipts), such as taxes, fines, duties, and fees.

Reopening (PDO-3, -4)—The offer for sale of additional amounts of outstanding issues, rather than an entirely new issue. A reopened issue will always have the same maturity date, CUSIP-number, and interest rate as the original issue.

Special drawing rights ("Exchange Stabilization Fund," IFS-1)—International assets created by IMF that serve to increase international liquidity and provide additional international reserves. SDRs may be purchased and sold among eligible holders through IMF. (See IMF.)

SDR allocations are the counterpart to SDRs issued by IMF based on members' quotas in IMF. Although shown in exchange stabilization fund (ESF) statements as liabilities, they must be redeemed by ESF only in the event of liquidation of, or U.S. withdrawal from, the SDR department of IMF or cancellation of SDRs.

SDR certificates are issued to the Federal Reserve System against SDRs when SDRs are legalized as money. Proceeds of monetization are deposited into an ESF account at the Federal Reserve Bank of New York.

Spot ("Foreign Currency Positions")—Due for receipt or delivery within 2 workdays.

State and local government series (FD-2)—(SLUGs) Special non-marketable certificates, notes, and bonds offered to State and local governments as a means to invest proceeds from their own tax-exempt financing. Interest rates and maturities comply with IRS arbitrage provisions. SLUGs are offered in both time deposit and demand deposit forms. Time deposit certificates have maturities of up to 1 year. Notes mature in 1 to 10 years and bonds mature in more than 10 years. Demand deposit securities are 1-day certificates rolled over with a rate adjustment daily.

Statutory debt limit (FD-6)—By Act of Congress there is a limit, either temporary or permanent, on the amount of public debt that may be outstanding. When this limit is reached, Treasury may not sell new debt issues until Congress increases or extends the limit. For a detailed listing of changes in the limit since 1941, see the Budget of the United States Government. (See Debt outstanding subject to limitation.)

STRIPS (PDO-1, -3)—Separate Trading of Registered Interest and Principal Securities. Long-term notes and bonds may be divided into principal and interest-paying components, which may be transferred and sold in amounts as small as \$1,000. STRIPS are sold at auction at a minimum par amount, varying for each issue. The amount is an arithmetic function of the issue's interest rate.

Treasury bills—The shortest term Federal security (maturity dates normally varying from 3 to 12 months), they are sold at a discount.

Trust fund transaction ("Federal Fiscal Operations")—An intrabudgetary transaction in which both payments and receipts occur within the same trust fund group.

United States—Includes the 50 States, District of Columbia, Commonwealth of Puerto Rico, American Samoa, Midway Island, Virgin Islands, Wake Island, and all other territories and possessions.

U.S. notes (USCC)—Legal tender notes of five different issues: 1862 (\$5-\$1,000 notes); 1862 (\$1-\$2 notes); 1863 (\$5-\$1,000 notes); 1863 (\$1-\$10,000 notes); and 1901 (\$10 notes).
