Consumer Prices

(Percent change from a year earlier)

Producer Prices - Finished Goods

(Percent change from a year earlier)

Employment and unemployment

A noticeable slowing developed in labor markets in recent months, consistent with a more moderate pace of economic growth. Labor markets nonetheless remained tight, with the unemployment rate holding steady at a 30-year low and the employment-population ratio at a high level. Even so, growth of earnings of production and other nonsupervisory workers remained tame, with little evidence of wage pressure.

Nonfarm pay roll employment growth through out much of the first three quarters of 2000 was volatile, partly because of the hiring and subsequent lay off of temporary workers hired

to conduct the decennial census. Excluding these workers and adjusting for the summer strike of 85,000 telecommunications workers, job gains tapered to an average of 141,000 in September and October. This was down from 195,000 a month in the first 8 months of the year and 229,000 during all of 1999. Most notable among the weak spots was manufacturing, which lost 130,000 jobs between June and October. Growth in the private service-producing sector also has slowed markedly to a monthly average of 143,000 during the past 4 months. This is down from average increases of 163,000 in the prior months of 2000 and a monthly average of 195,000 during all of 1999. On the other hand, employment growth picked up in recent months

Unemployment Rate

(Percent)

Establishment Employment

(Average monthly change in thousands)

*Based on October data

for construction and finance, insurance, and real estate, probably boosted by the decline in mortgage interest rates since spring.

The economy continues to operate at a very high rate of labor utilization. The unemployment rate declined from 4.1 percent in August to 3.9 percent in both September and October. The latest figure matches the three-decade low first reached in April. The share of the working-age population employed was at 64.4 percent in October. This was only slightly below the 64.5 percent average for the first 10 months of 2000, an all-time record if sustained through the remaining months of the year.

Wage gains, as measured in the payroll employment survey, have remained surprisingly low given recent labor market conditions. Average hourly earnings of production and other nonsupervisory workers grew by 3.8 percent over the 12 months ended in October. Earnings growth has remained fairly stable at about that pace for approximately 2 years. However, other more comprehensive measures of hourly compensation show an acceleration to the 5 percent range recently. In real terms, average hourly earnings were essentially unchanged over the 12 months ended in September (the latest month for which these data are available).

Real disposable personal income and consumer spending

Growth of personal income in nominal terms slowed in the third quarter, although during the first three quarters of 2000 it was stronger than during 1999. Following increases at nearly a 7 percent annual rate in the first two quarters of 2000, income rose at a more moderate 5.5 percent pace in the third quarter. Smaller employment gains tempered the increase in wage and salary payments. Interest payments also were lower, reflecting recent declines in interest rates. Even so, growth in nominal income averaged a 6.4 percent annual rate during the first three quarters of 2000, up from 5.6 percent during all of 1999.

On a real after-tax basis, however, personal income rose at a 2.7 percent annual rate during the first three quarters of 2000. This was slightly less than the 3.1 percent in 1999. The slowdown reflected faster growth of tax payments, as well as somewhat higher inflation generated in part by higher oil prices.

Real consumer spending rose at a 4.5 percent annual rate in the third quarter of 2000, up from a 3.1 percent pace of advance in the second quarter. During the first three quarters of the year, growth of personal consumption averaged a 5.0 percent annual rate. This is still very strong, although about one-half percentage point less than during all of 1999. Growth of spending on discretionary items such as motor vehicles, furniture and appliances, and other durable goods slowed from 11 percent during 1999 to a still vibrant 8 percent annual rate during the first three quarters of 2000.

The greater increase in spending than in disposable income so far during 2000 pulled the personal saving rate down to -0.2 percent by the third quarter from 1.5 percent in the fourth quarter of 1999. The latest figure is the lowest since 1933. The saving rate has declined steadily from a recent high of 8.7 percent in 1992. This decline is primarily the result of the growing "wealth effect" caused by the rise in the stock market. Increases in asset values are not counted as income in the national income and product accounts, from which saving is calculated, but nonetheless contribute to the willingness of consumers to spend.

Industrial production and capacity utilization

Output in the industrial sector slowed sharply in the third quarter of 2000. It rose by only 2.8 percent at an annual rate after jumping by 8.2 percent in the second quarter. This was the largest quarterly gain in 4 years. The deceleration reflected widespread softness, particularly in the manufacturing sector. Due to large gains earlier in 2000, industrial output has risen by 5.6 percent at an annual rate so far. This rate was up from a strong 4.7 percent advance in 1999 and a vast improvement over the tepid 2.5 percent increase recorded in 1998.

Manufacturing production, which accounts for just over 88 percent of all industrial output, rose by only 3.2 percent at an annual rate in the third quarter after three quarters of gains of 7 percent or more. Despite the soft third quarter result, so far this year there has been a 5.7 percent annual rate increase in manufacturing production compared to a 5.1 percent annual increase in 1999.

Much of the underlying strength in manufacturing has been centered in the high-tech sector, which includes computers, communications equipment and semiconductors. These three industries combined experienced production growth of 48.4 percent at an annual rate in the July-to-September period. While only about two-thirds as fast as the second quarter's 70.9 percent pace, it still gave factory output a significant boost in the latest quarter. Excluding high-tech, manufacturing production actually declined by 2.1 percent at an annual rate in the third quarter. This decline extended a downward trend that began earlier this year. The third-quarter drop in manufacturing other than high-tech is slightly larger than the 1.9 percent decline recorded in the first quarter of 1995, when the economy was slowing, and the 1.7 percent dip posted in the third quarter of 1998, during the Asian crisis.

The rate of industrial capacity utilization stood at 82.2 percent for the second consecutive month in September, up from 7-year lows averaging 80.5 percent in the first half of 1999. This rate has been slightly above its long-term average of 82.0 percent since May, but it is still 2.2 percentage points below the expansion high of 84.4 percent reached in early 1995.

Nonfarm productivity and unit labor costs

Despite the record length of the current expansion, U.S. productivity growth has accelerated, not slowed as is typical in the late stages of an expansion. Nonfarm business productivity (real output per hour worked) rose by 3.8 per cent at an annual rate in the third quarter of 2000, bringing the rise over the last four quarters to an impressive 5.0 per cent. Over the past 5 years, nonfarm productivity has risen at a 3.0 per cent annual rate, the fastest rate of growth for any such period since 1968. This exceptional performance has been widely attributed to innovations and investment in information technology. It supports the view that productivity growth has moved to a higher trend rate in recent years.

Hourly compensation costs in the nonfarm business sector shot up at a 6.4 per cent annual rate in the third quarter. That was the largest quarterly gain since early 1992 and followed a sizable 5.9 per cent annual rate increase in the previous quarter. Robust productivity growth largely offset these costs, however, keeping growth of labor costs per unit of output to a 2.5 per cent annual rate in the third quarter and 1.3 per cent at an annual rate so far this year. Subdued growth of unit labor costs has played a key role in helping contain inflation.

Productivity in the manufacturing sector continues to grow at a rapid pace. In the third quarter of 2000, factory output per hour rose at a 6.4 percent annual rate, bringing the increase over the latest four quarters to a record 7.5 per cent. Over the past 5 years, manufacturing productivity has increased by 5.4 per cent annually—strength unprecedented in the post World War II era. Growth of hourly compensation costs accelerated to a 6.7 per cent annual rate in the third quarter, stripping the gain in productivity for the first time in a year. As a result, unit labor costs edged up by 0.3 per cent at an annual rate. Factory unit labor costs have been falling for nearly 7 years and are now almost 10 per cent below the high reached in late 1993.

Current account balance

The current account measures trade in goods and services as well as the flow of investment income and unilateral transfers. The current account has been in deficit almost continuously since the early 1980s. In the second quarter of 2000, the current account deficit swelled to \$424.6 billion at an annual rate. This represents a record high 4.3 per cent share of nominal GDP.

The deficit has widened substantially over the past decade primarily because of a deterioration in the merchandise trade balance. Growth in U.S. domestic demand has recently outpaced that of our major trading partners, causing imports to grow much more rapidly than exports. The appreciation of the dollar from 1995 and higher prices for imported oil over the past 2 years also have contributed to the growing trade gap. As a result, the deficit on merchandise trade has more than

doubled since the mid-1990s, reaching a new high of \$440.9 billion at an annual rate in the second quarter. It continued to rise in the third quarter.

Other major components of the current account also have fueled the growing deficit. The surplus on trade in services has narrowed since 1997. Moreover, what had been a positive balance on investment income turned negative in 1998, as weak foreign growth depressed interest earnings on U.S. investments abroad and U.S. growth supported strong interest income on investments in the United States. The balance on investment income is likely to remain negative in the future, since the accumulation of current account deficits has resulted in an increase in net foreign holdings of U.S. assets and a net negative international investment position.

The current account deficit is, by definition, matched by offsetting transactions in the financial and capital accounts, with any difference in the recorded flows listed as a statistical discrepancy. In the second quarter of 2000, the financial account recorded inflows for foreign assets in the United States that exceeded outflows for U.S. assets abroad by a stunning \$596.4 billion at an annual rate. This was more than double the \$230.4 billion net financial inflow recorded in the first quarter. A substantial increase in foreign direct investment in the United States accounted for much of the jump.

Exchange rate of the dollar

The exchange rate of the dollar against a broad index of 26 currencies of important U.S. trading partners increased markedly through the first 10 months of 2000. This followed a 2-year period during which the exchange rate flatlined after a sharp rise in 1996 and 1997. From December 1999 to October 2000, the exchange rate of the dollar against the broad index of currencies rose by 6.6 per cent.

All of the appreciation this year reflected improvement of the dollar against the major currencies of the most important U.S. trading partners. These partners include the euro-area countries plus Canada, Japan, the United Kingdom, Australia, Sweden and Switzerland. Since the end of 1999, the dollar has increased by 9.8 per cent against that aggregate index of major currencies, and by 18.6 percent against the euro alone. Compared to the Japanese yen, the exchange value of the dollar rose by 5.6 per cent between December and May and has fluctuated within a narrow band since.

The appreciation of the dollar to record highs against the euro reflected a number of factors, including the faster rate of economic growth in the United States than in the euro area. The perception that U.S. asset markets would continue to present generally attractive investment opportunities despite increased volatility contributed to the stronger performance of the dollar as well. Other factors such as differing central bank policies, concerns over foreign exchange policy in the euro area, uncertainty over the course of structural reforms, and changes in euro-area political developments also may have influenced the exchange rate.

Interest rates

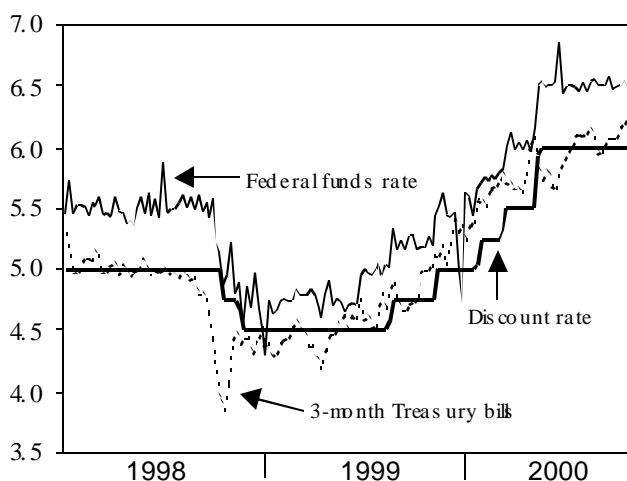

The Federal Reserve Board has left monetary policy unchanged after raising short-term interest rates from June 1999 through May 2000. The tightening moves were made in response to concern that faster growth in demand than in potential supply could result in inflation. The Federal Reserve raised short-term interest rates three times in 1999 by a total of 75 basis points, which reversed the easing moves of 1998 during the period of global financial turmoil. The Federal Reserve increased rates three more times in 2000 by a total of 100 basis points (1 per cent age point). The six increases raised the key federal funds target rate (the rate that banks charge each other for overnight loans) from 4.75 per cent to 6.50 per cent. The discount rate (the rate the Federal Reserve charges banks for short-term funds) was raised from 4.50 per cent to 6.0 per cent. The market interest rate for the 3-month Treasury bill, which usually centers around the level of the discount rate, was about 6.2 per cent at the end of October.

Rates on long-term Treasury securities since the beginning of 2000 have declined as the price of the securities rose. The higher prices largely reflect a shrinking supply of Treasury securities because of buybacks and reduced new long-term debt issuance by the Treasury due to growing budget surpluses. Long-term yields increased through 1999 as economic growth expanded at a rapid pace.

Mortgage interest rates generally follow the pattern of the 10-year Treasury note. The interest rate on a conventional 30-year fixed rate loan rose from a 30-year low of 6.7 per cent in October 1998 to a recent high of 8.5 per cent in May 2000. The rise in mortgage interest rates dampened housing activity in 1999 and through the first half of 2000. Since this past May, however, the mortgage interest rate declined by about 70 basis points to 7.8 per cent in October, prompting some renewed strength in housing demand.

Short-term Interest Rates

(Percent)

Long-term Interest Rates

(Percent)

Housing

Housing sales strengthened in the third quarter after slowing through 1999 and earlier in 2000. The firming reflected a decline in mortgage interest rates from a recent peak in May.

Sales of new single-family homes averaged an annual rate of 910,000 in the third quarter on a seasonally adjusted basis. That was up from a lull in the second quarter when sales averaged just 856,000 at an annual rate. Through the first three quarters of 2000, new home sales registered an 897,000 average pace, in line with the record-setting performance of 1999 when 907,000 new single-family homes were sold. Sales of existing single-family homes also reached a record last year of 5.1 million, and through three quarters of this year maintained a 5.0 million annual pace.

A high level of sales of both new and existing homes over the past several years has led to a dramatic increase in homeownership. Since the beginning of 1993, the number of

new homeowners grew by more than 9 million. In the third quarter of 2000, the homeownership rate rose to 67.7 per cent, an all-time record. Expansion in homeownership has been particularly notable for minorities.

Construction of new housing units lagged behind new home sales in the third quarter, leading to a reduction in the inventory of new houses for sale and a decline in residential investment. Total housing starts through the first 9 months of the year averaged an annual rate of 1.57 million units, down from a record 1.67 million starts last year. The value of residential investment in real terms fell at a 9.2 per cent annual rate in the third quarter and was 1.2 per cent lower than a year earlier. However, the recent increases in new home sales and a pickup in permit authorizations for future building may improve housing construction in the fourth quarter.

Federal budget

The Fed eral bud get posted a uni fied sur plus of \$237 bil lion in fis cal 2000, or 2.4 per cent in re la tion to GDP. That was the larg est sur plus ever in dol lar terms and the larg est rel a tive to GDP since fis cal 1948. The sur plus in fis cal 2000 was the third in a row. It marked the eighth con sec u tive year of im prove ment in the Fed eral bud get po si tion af ter the def i cit peaked at a re cord \$290 bil lion in fis cal 1992. The bud get im prove ment re sulted from a policy of fis cal dis cipline since 1992 and con tributed to the strong econ omic ex pan sion of the past 8 years. This freed up money for pri vate sec tor in vest ment.

In fis cal 2000, re ceipts jumped by 10.8 per cent, the fast est rate of growth of any year of the cur rent ex pan sion and the larg est in crease since 1987. The strong growth re flected large gains in the in come and wealth of in di viduals as well as a marked im prove ment in cor po rate profits fol low ing weak ness in the past sev eral years.

Out lays of the Fed eral Gov ern ment in creased by 5.0 per cent in fis cal 2000, much less than growth in re ceipts and less than growth of the econ omy. Out lays de clined to 18.2 per cent rel a tive to GDP, the low est since 1966. Among ma jor spend ing cate go ries, out lays in fis cal 2000 ac ce ler ated for such func tions as de fense, Med i caid, So cial Se cu rity, and farm price sup port, among oth ers. Out lays for Med i care, which did not in crease at all from 1997 to 1999, be gan to grow again in 2000. Net in ter est ex penses de clined for the third con sec u tive year as debt owed to the pub lic was re duced.

The bud get sur plus in fis cal 2000 re sulted in a \$223 bil lion re duc tion in debt held by the pub lic that year. Over the past 3 years, pub licly held debt has been cut by \$363 bil lion, or 9.6 per cent. At the end of fis cal 2000, debt held by the pub lic re pre sented 34.7 per cent of GDP, down from nearly 50 per cent 7 years ago and the small est ra tio since 1984.

Net national saving and investment

Net national saving averaged 6.7 percent of net national product (NNP) in the first half of 2000. This was lit tle changed from the 6.8 per cent for all of 1999 but down from 7.5 per cent in 1998. (Net sav ing and NNP ex clude de pre ci a tion to re place worn out or ob so lete equip ment, soft ware and struc tures used in pro duc tion.) Re cent fig ures none the less re mained con sid er ably above the 3.9 per cent of 1993, the low est for any year since the 1930s.

The swing in the Fed eral bud get from large def i cits into sur plus has more than ac counted for the im prove ment in na tional sav ing since 1993. As a re sult, the pub lic sec tor moved from dis sav ing equiv a lent to 4.7 per cent of NNP in 1993 (and an even larger 5.4 per cent in 1992) to sav ing of 3.4 per cent in the first half of 2000. De spite the progress, net sav ing still re mains well below the 11.6 per cent of NNP aver aged in the 1950s and 1960s.

Pri vate sav ing de clined from a re cent high of 9.4 per cent of NNP in 1992 to 3.3 per cent in the first half of 2000. A sharp fall in sav ing by house holds more than off set a gain in cor po rate sav ing. In creased wealth gen er ated by a sur ging stock mar ket is an im por tant fac tor in the re duced de sire of house holds to save out of cur rent in come. In the first half of 2000, per sonal sav ing was equiv a lent to only 0.2 per cent of NNP, down from 7.4 per cent in 1992. On the other hand, growth of cor po rate prof its lifted net cor po rate sav ing from 2.2 per cent of NNP in 1992 to 3.1 per cent in the first half of 2000.

Net dom estic in vestment (by gov ern ment and pri vate in dus try in struc tures, equip ment, soft ware, and in ven tory) in creased from a very low 5.2 per cent of NNP in 1991 to 10.5 per cent in the first half of 2000. A large por tion of this in vestment has been fi nanced from ab road, as U.S. net fore ign in vestment swung from 0.3 per cent of NNP in 1991 to -4.7 per cent in the first half of 2000.

Net National Saving

(Saving as a percent of NNP)

*Based on first half

INTRODUCTION: Federal Fiscal Operations

Budget authority usually takes the form of appropriations that allow obligations to be incurred and payments to be made. Reappropriations are Congressional actions that extend the availability of unobligated amounts that have expired or would otherwise expire. These are counted as new budget authority in the fiscal year of the legislation in which the reappropriation act is included, regardless of when the amounts were originally appropriated or when they would otherwise lapse.

Obligations generally are liquidated by the issuance of checks or the disbursement of cash—*outlays*. Obligations may also be liquidated (and outlays recorded) by the accrual of interest on public issues of Treasury debt securities (including an increase in redemption value of bonds outstanding); or by the issuance of bonds, debentures, notes, monetary credits, or electronic payments.

Refunds of collections generally are treated as reductions of collections, whereas payments for earned-income tax credits in excess of tax liabilities are treated as outlays. Outlays during a fiscal year may be for payment of obligations incurred in prior years or in the same year. Outlays, therefore, flow in part from unexpended balances of prior year budget authority and from budget authority provided for the year in which the money is spent. Total outlays include both budget and off-budget outlays and are stated net of offsetting collections.

Receipts are reported in the tables as either budget receipts or offsetting collections. They are collections from the public, excluding receipts offset against outlays. These, also called governmental receipts, consist mainly of tax receipts (including social insurance taxes), receipts from court fines, certain licenses, and deposits of earnings by the Federal Reserve system. Refunds of receipts are treated as deductions from gross receipts. Total Government receipts are compared with total outlays in calculating the budget surplus or deficit.

Offsetting collections from other Government accounts or the public are of a business-type or market-oriented nature. They are classified as either collections credited to appropriations or fund accounts, or offsetting receipts (i.e., amounts deposited in receipt accounts). The former normally can be used without appropriation act by Congress. These occur in two instances: (1) when authorized by law, amounts collected for materials or services are treated as reimbursements to appropriations. For accounting purposes, earned reimbursements are also known as revenues. These offsetting collections are netted against gross outlays in determining net outlays from such appropriations; and (2) in the three types of revolving funds (public enterprise, intragovernmental and trust); offsetting collections are netted against spending, and outlays are reported as the net amount.

Offsetting receipts in receipt accounts cannot be used without appropriation. They are subdivided into three categories: (1) proprietary receipts, or collections from the public, offset against outlays by agency and by function; (2) intragovernmental transactions, or payments into receipt accounts from governmental appropriation or fund accounts.

They finance operations within and between Government agencies and are credited with collections from other Government accounts; and (3) offsetting governmental receipts which include foreign cash contributions.

Intrabudgetary transactions are subdivided into three categories: (1) interfund transactions—payments are from one fund group (either Federal funds or trust funds) to a receipt account in the other fund group; (2) Federal intrafund transactions—payments and receipts both occur within the Federal fund group; and (3) trust intrafund transactions—payments and receipts both occur within the trust fund group.

Offsetting receipts are generally deducted from budget authority and outlays by function, subfunction, or agency. There are four types of receipts, however, that are deducted from budget totals as undistributed offsetting receipts. They are: (1) agencies' payments (including payments by *off-budget Federal entities*) as employers into employees' retirement funds; (2) interest received by trust funds; (3) rents and royalties on the Outer Continental Shelf lands; and (4) other interest (i.e., that collected on Outer Continental Shelf money in deposit funds when such money is transferred into the budget).

The Government has used the unified budget concept set forth in the "Report of the President's Commission on Budget Concepts" as a foundation for its budgetary analysis and presentation since 1969. The concept calls for the budget to include all of the Government's fiscal transactions with the public. Since 1971, however, various laws have been enacted removing several Federal entities from (or creating them outside of) the budget. Other laws have moved certain off-budget Federal entities onto the budget. Under current law, the off-budget Federal entities consist of the two Social Security trust funds, Federal Old-Age and Survivors Insurance and the Federal Disability Insurance Trust Fund, and the Postal Service.

Although an off-budget Federal entity's receipts, outlays, and surplus or deficit ordinarily are not subject to targets set by the Congressional resolution, the Balanced Budget and Emergency Deficit Control Act of 1985 [commonly known as the Gramm-Rudman-Hollings Act as amended by the Budget Enforcement Act of 1990 (2 United States Code 900-922)] included off-budget surplus or deficit in calculating deficit targets under that act and in calculating excess deficit. Partly for this reason, attention has focused on both on- and off-budget receipts, outlays and deficit of the Government.

Tables **FFO-1**, **FFO-2** and **FFO-3** are published quarterly and cover 5 years of data, estimates for 2 years, detail for 13 months, and fiscal year-to-date data. They provide a summary of data relating to Federal fiscal operations reported by Federal entities and disbursing officers, and daily reports from the FRBs. They also detail accounting transactions affecting receipts and outlays of the Government and off-budget Federal entities and their related effect on assets and liabilities of the Government. Data are derived from the "Monthly Treasury Statement of Receipts and Outlays of the United States Government."

- Table **FFO-1** summarizes the amount of total receipts, outlays, and surplus or deficit, as well as transactions in Federal securities, monetary assets and balances in Treasury operating cash.

- Table **FFO-2** includes on- and off-budget receipts by source. Amounts represent income taxes, social insurance taxes, net contributions for other insurance and retirement, excise taxes, estate and gift taxes, customs duties and net miscellaneous receipts.

- Table **FFO-3** details on- and off-budget outlays by agency.

- Table **FFO-4** summarizes on- and off-budget receipts by source and outlays by function as reported to each major fund group classification for the current fiscal year to date and prior fiscal year to date.

- Table **FFO-5** summarizes internal revenue receipts by regions and districts and by type of tax. Amounts reported are collections made in a fiscal year. They span several tax liability years because they consist of prepayments (estimated tax payments and taxes withheld by employers for individual income and Social Security taxes), payments made with tax returns and subsequent payments made after tax returns are due or are filed (that is, payments with delinquent returns or on delinquent accounts).

Amounts are reported based on the primary filing address provided by each tax payer or reporting entity. For multistate corporations, the address may reflect only the district where such a corporation reported its taxes from a principal office rather than other districts where income was earned or where individual income and Social Security taxes were withheld. In addition, an individual may reside in one district and work in another.

Fourth-Quarter Receipts

The following capsule analysis of budget receipts, by source, for the fourth quarter of fiscal 2000 supplements fiscal data reported in the September issue of the "Treasury Bulletin." At the time of that issue's release, not enough data were available to analyze adequately collections for the quarter.

Individual income taxes—Individual income tax receipts, net of refunds, were \$238.7 billion for the fourth quarter of fiscal 2000. This is an increase of \$28.8 billion over the comparable prior year quarter. Withheld receipts increased by \$19.9 billion and non-withheld receipts increased by \$8.6 billion during this period. Refunds decreased by \$0.3 billion over the comparable fiscal 1999 quarter. There was an increase of \$2.6 billion in accounting adjustments between individual income tax receipts and the Social Security and Medicare trust funds over the comparable quarter in fiscal 1999.

Corporation income taxes—Net corporate income tax receipts were \$53.1 billion for the fourth quarter of fiscal 2000. This is an increase of \$5.8 billion compared to the prior year fourth quarter. The \$5.8 billion change is comprised of an increase of \$6.4 billion in estimated and final payments, and an increase of \$0.6 billion in corporate refunds.

Employment taxes and contributions—Employment taxes and contributions receipts for the fourth quarter of fiscal 2000 were \$150.9 billion, an increase of \$6.8 billion over the comparable prior year quarter. Receipts to the Federal Old-Age and Survivors Insurance, Federal Disability Insurance, and Federal Hospital Insurance trust funds changed by \$6.4 billion, \$2.1 billion, and -\$1.3 billion respectively. There was a \$2.1 billion accounting adjustment for prior years employment tax liabilities made in the fourth quarter of fiscal 2000, while there was a \$4.6 billion adjustment in the fourth quarter of fiscal 1999.

Unemployment insurance—Unemployment insurance receipts, net of refunds, for the fourth quarter of fiscal 2000 were \$5.9 billion, a decrease of \$0.1 billion over the comparable quarter of fiscal 1999. Net State taxes deposited in the U.S. Treasury decreased by \$0.1 billion to \$4.6 billion. Net Federal Unemployment Tax Act (FUTA) taxes did not change significantly from \$1.3 billion.

Contributions for other insurance and retirement—Contributions for other retirement were \$1.2 billion for the fourth quarter of fiscal 2000. There was a negligible increase over receipts from the comparable quarter of fiscal 1999. The growth in contributions will remain relatively flat over the next few years as the number of employees covered by the Federal Employees' Retirement System (FERS) grows slowly relative to those covered under the Civil Service Retirement System (CSRS).

Excise taxes—Net excise tax receipts for the fourth quarter of fiscal 2000 were \$19.4 billion, an increase of \$1.1 billion over the comparable prior year quarter. Total excise tax refunds for the quarter were \$0.7 billion, not a significant change over the comparable prior year quarter.

Estate and gift taxes—Net estate and gift tax receipts were \$6.3 billion for the fourth quarter of fiscal 2000. These receipts represent a decrease of \$0.1 billion over the same quarter in fiscal 1999.

Customs duties—Customs duties net of refunds were \$5.7 billion for the fourth quarter of fiscal 2000. This is an increase of \$0.4 billion over the comparable prior year quarter.

Miscellaneous receipts—Net miscellaneous receipts for the fourth quarter of fiscal 2000 were \$10.4 billion, an increase of \$0.3 billion over the comparable prior year quarter. This change is due in part to deposits of earnings by Federal Reserve Banks in excess of \$0.3 billion.

* Less than \$500,000.

¹ Data for the period do not reflect postyear adjustments published in the "Monthly Treasury Statement of Receipts and Outlays of the United States Government," the source for this table.

Note.—These figures are based on the "Mid-Session Review" of the fiscal 2001 budget, released by the Office of Management and Budget on June 26, 2000. The estimates would be

modified by the Administration's proposal to place the Medicare Hospital Insurance Trust Fund off-budget. This would shift that fund's totals of \$110.6 billion in outlays, \$134.4 billion in receipts, and a surplus of \$23.8 billion, estimated for fiscal 2000; and \$87.0 billion in outlays, \$146.6 billion in receipts, and a surplus of \$59.5 billion, estimated for fiscal 2001, from on-budget to off-budget.

* Less than \$500,000.

¹ Data for the period do not reflect postyear adjustments published in the "Monthly Treasury Statement of Receipts and Outlays of the United States Government," the source for this table.

Note.—These figures are based on the "Mid-Session Review" of the fiscal 2001 budget, released by the Office of Management and Budget on June 26, 2000. The estimates would be

modified by the Administration's proposal to place the Medicare Hospital Insurance Trust Fund off-budget. This would shift that fund's totals of \$110.6 billion in outlays, \$134.4 billion in receipts, and a surplus of \$23.8 billion, estimated for fiscal 2000; and \$87.0 billion in outlays, \$146.6 billion in receipts, and a surplus of \$59.5 billion, estimated for fiscal 2001, from on-budget to off-budget.

¹ Collections of individual income tax (with held and not with held) include old-age, survivor's, disability and hospital insurance taxes on salaries and wages (FICA) and self-employment income (SECA).

² Includes fiduciary income tax collections of \$16.8 billion.

³ Includes taxes of \$553.6 million on unrelated business income of exempt or governmental organizations (Forms 990T).

⁴ Designations by taxpayers of a portion of their taxes to the Presidential Election Campaign Fund also are included even though they are not collections, as such, because they do not affect taxpayer liability. Transfer of amounts to this fund was made on a national basis only and had no

effect on regional and/or district office collection data.

⁵ Includes tax payments made to banks under the Federal Tax Deposit (FTD) system that had not been classified by IRS district/region as of the end of the fiscal year because they had not yet been applied to taxpayer accounts. Also, includes credits allowable on income tax returns for certain gasoline, diesel fuel, and special motor fuel tax payments and for excess payments under the Federal Insurance Contributions Act or FICA.

Note.—De tails may not add to totals due to rounding. Amounts reflect adjustments made to data reported in prior years. Negative figures are displayed when prior year adjustments exceed current year receipts.

INTRODUCTION: Source and Availability of the Balance in the Account of the U.S. Treasury

The Department of Treasury's (Treasury) operating cash is maintained in accounts with the Federal Reserve Banks (FRBs) and branches, as well as in tax and loan accounts in other financial institutions. Major information sources include the Daily Balance Wire received from the FRBs and branches, and electronic transfers through the Letter of Credit Payment, Fedline Payment and Fedwire Deposit Systems. As the FRB accounts are depleted, funds are called in (withdrawn) from thousands of tax and loan accounts at financial institutions throughout the country.

Under authority of Public Law 95-147 (codified at 31 United States Code 323), Treasury implemented a program on November 2, 1978, to invest a portion of its operating cash in obligations of depositaries maintaining tax and loan accounts. Under the Treasury tax and loan investment program, depository financial institutions select the manner in which they will participate. Financial institutions wishing to retain funds de-

posited into their tax and loan accounts in interest-bearing obligations participate under the Note Option. The program permits Treasury to collect funds through financial institutions and to leave the funds in Note Option depositaries and in the financial communities in which they arise until Treasury needs the funds for its operations. In this way, Treasury is able to neutralize the effect of its fluctuating operations on Note Option financial institution reserves and on the economy. Likewise, those institutions wishing to remit the funds to the Treasury account at FRBs do so under the Remittance Option.

Deposits to tax and loan accounts occur as customers of financial institutions deposit tax payments, which the financial institutions use to purchase Government securities. In most cases, this involves a transfer of funds from a customer's account to the tax and loan account in the same financial institution. Also, Treasury can direct the FRBs to invest excess funds in tax and loan accounts directly from the Treasury account at the FRBs.

¹ Represents transfers from tax and loan note accounts, proceeds from sales of securities other than Government account series and taxes.

² Represents checks paid, wire transfer payments, drawdown on letters of credit, redemptions of securities other than Government account series and investment (transfer) of excess funds out of this account to the tax and loan note accounts.

³ Taxes eligible for credit consist of those deposited by taxpayers in the tax and loan depositories as follows: Withheld income taxes beginning March 1948; taxes on employers

and employees under the Federal Insurance Contributions Act beginning January 1950 and under the Railroad Retirement Tax Act beginning July 1951; a number of excise taxes beginning July 1953; estimated corporation income taxes beginning April 1967; all corporation income taxes due on or after March 15, 1968; Federal Unemployment Tax Act taxes beginning April 1970 and in individual estimated income taxes beginning October 1988.

INTRODUCTION: Federal Debt

Treasury securities (i.e., public debt securities) comprise most of the Federal debt, with securities issued by other Federal agencies accounting for the rest. Tables in this section of the “Treasury Bulletin” reflect the total. Further detailed information is published in the “Monthly Statement of the Public Debt of the United States.” Likewise, information on agency securities and on investments of Federal Government accounts in Federal securities is published in the “Monthly Treasury Statement of Receipts and Outlays of the United States Government.”

- Table **FD-1** summarizes the Federal debt by listing public debt and agency securities held by the public, including the Federal Reserve. It also includes debt held by Federal agencies, largely by the Social Security and other Federal retirement trust funds. The net unamortized premium and discount also are listed by total Federal securities, securities held by Government accounts and securities held by the public. The difference between the outstanding face value of the Federal debt and the net unamortized premium and discount is classified as the accrual amount. (For greater detail on holdings of Federal securities by particular classes of investors, see the ownership tables, OFS-1 and OFS-2.)

- Table **FD-2** categorizes by type interest-bearing marketable and nonmarketable Treasury securities. The difference between interest-bearing and total public debt securities reflects outstanding matured Treasury securities—that is, unredeemed securities that have matured and are no longer accruing interest. Because the Federal Financing Bank is under the supervision of Treasury, its securities are held by a U.S. Government account.

- In table **FD-3**, nonmarketable Treasury securities held by U.S. Government accounts are summarized by issues to particular funds within Government. Many of the funds invest in par value special series nonmarketables at interest rates determined by law. Others invest in market-based special Treasury securities whose terms mirror those of marketable securities.

- Table **FD-4** presents interest-bearing securities issued by Government agencies. Federal agency borrowing has declined in recent years, in part because the Federal Financing Bank has provided financing to other Federal agencies. (Fed-

eral agency borrowing from Treasury is presented in the “Monthly Treasury Statement of Receipts and Outlays of the United States Government.”)

- Table **FD-5** illustrates the average length of marketable interest-bearing public debt held by private investors and the maturity distribution of that debt.

In March 1971, Congress enacted a limited exception to the amount of bonds with rates greater than 4-1/4 per cent that could be held by the public. This permitted Treasury to offer securities maturing in more than 7 years at current market interest rates for the first time since 1965. In March 1976, the definition of a bond was changed to include those securities longer than 10 years to maturity. This exception has expanded since 1971, authorizing Treasury to continue to issue long-term securities. The ceiling on Treasury bonds was repealed on November 10, 1988.

The volume of privately held Treasury marketable securities by maturity class reflects the remaining period to maturity of Treasury bills, notes and bonds. The average length is comprised of an average of remaining periods to maturity, weighted by the amount of each security held by private investors. In other words, computations of average length exclude Government accounts and the FRBs.

- In table **FD-6**, the debt ceiling is compared with the outstanding debt subject to limitation by law. The other debt category includes Federal debt Congress has designated as being subject to the debt ceiling. Changes in the non-interest-bearing debt shown in the last column reflect maturities of Treasury securities on nonbusiness days, which can be redeemed on the next business day.

- Table **FD-7** details Treasury holdings of securities issued by Government corporations and other agencies. Certain Federal agencies are authorized to borrow money from the Treasury, largely to finance direct loan programs. In addition, agencies such as the Bonneville Power Administration are authorized to borrow from the Treasury to finance capital projects. Treasury, in turn, finances these loans by selling Treasury securities to the public.

¹ Beginning September 1976, the maturity distribution and average length were calculated on the interest-bearing marketable debt privately held. Inflation-indexed notes (first offered in 1997) are excluded from the average length calculation. Published data were changed for the end of the fiscal years back through 1967.

CHARTS FD-A.—Average Length of Privately Held Marketable Debt

(Charts are plotted from figures provided by the Office of Market Finance. See Table FD-5.)

INTRODUCTION: Public Debt Operations

Chapter 31 of Title 31 of the United States Code allows the Secretary of Treasury to borrow money by issuing Treasury securities. The Secretary determines the terms and conditions of issue, conversion, maturity, payment and interest rate. New issues of Treasury notes mature in 2 to 10 years. Bonds mature in more than 10 years from the issue date. Each marketable security is listed in the "Monthly Statement of the Public Debt of the United States." The information in this section of the "Treasury Bulletin" pertains only to marketable Treasury securities, current bills, notes and bonds.

- Table **PDO-1** provides a maturity schedule of interest-bearing marketable public debt securities other than regular weekly and 52-week bills. All unmatured Treasury notes and bonds are listed in maturity order, from earliest to latest. A separate break out is provided for the combined holdings of the Government accounts and Federal Reserve Banks (FRBs), so that the "all other investors" category includes all private holdings.

- Table **PDO-2** presents the results of weekly auctions of 13- and 26-week bills, as well as auctions of 52-week bills.

Treasury bills mature each Thursday. New issues of 13-week bills are *reopening* of 26-week bills. New issues of *cash management bills* also are presented. High yields on accepted tenders and the dollar value of total bids are presented, with the dollar value of awards made both on a competitive and non-competitive basis.

Treasury accepts non-competitive tenders of up to \$1 million for bills and \$5 million for notes and bonds in each auction of securities to encourage participation of individuals and smaller institutions.

- Table **PDO-3** lists the results of auctions of marketable securities, other than weekly bills, in chronological order over the past 2 years. Included are: notes and bonds from table PDO-1, 52-week bills from table PDO-2, and data for cash management bills.

- Table **PDO-4** indicates the total amount of marketable securities allotted to each class of investor. The FRBs tally into investor classes the tenders in each auction of marketable securities other than weekly auctions of 13- and 26-week bills.

TREASURY FINANCING: APRIL-JUNE

[Source: Bureau of the Public Debt, Office of Financing]

On January 13, 2000, Secretary of the Treasury Lawrence H. Summers announced the introduction of debt buybacks as a tool for Treasury's management of the public debt. Treasury plans to conduct several buyback operations in 2000, buying back as much as \$30 billion of Federal debt held by the public. Buybacks will help prevent an increase in the average maturity of American debt by paying off debt that has substantial remaining maturity.

APRIL

Auction of 2-Year Note

On April 19, Treasury announced it would auction \$12,000 million of 2-year notes of Series U-2002. The issue was to refund \$24,198 million of securities maturing April 30 and to pay down about \$12,198 million. The notes of Series U-2002 were dated April 30, 2000, and issued May 1, 2000. They are due April 30, 2002, with interest payable on October 31 and April 30 until maturity. Treasury set an interest rate of 6-3/8

percent after determining which tenders were accepted on a yield auction basis. Accrued interest of \$0.17323 per \$1,000, covering the period from April 30 to May 1, 2000, was payable with each accepted tender.

Treasury received tenders for the notes on April 26. Tenders totaled \$27,682 million; Treasury accepted \$12,002 million at the high yield of 6.484 percent with an equivalent price of 99.798. The median yield was 6.460 percent, and the low yield was 6.390 percent. Noncompetitive tenders totaled \$1,570 million. Competitive tenders accepted from private investors totaled \$10,432 million. Tenders at the high yield were allotted 62 percent.

In addition to the \$12,002 million of tenders accepted in the auction process, Treasury accepted \$1,500 million from FRBs as agents for foreign and international monetary authorities. It also accepted \$3,869 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series U-2002 is \$1,600,000.

Debt Buyback Operations

The first debt buyback operation was held on March 9, 2000, for settlement on March 13. Treasury received \$8,627 million of offers; it accepted \$1,000 million par amount for a total price paid of \$1,345 million (less accrued interest).

In the debt buyback operation held on March 16, 2000, for settlement on March 20, \$6,446 million of offers was received.

TREASURY FINANCING: APRIL-JUNE, con.

Treasury accepted \$1,000 million par amount for a total price paid of \$1,268 million (less accrued interest).

In the debt buyback operation held on April 20, 2000, for settlement on April 25, \$8,525 million of offers was received. Treasury accepted \$2,000 million par amount for a total price paid of \$2,431 million (less accrued interest).

In the debt buyback operation held on April 27, 2000, for settlement on May 1, \$10,831 million of offers was received. Treasury accepted \$3,000 million par amount for a total price paid of \$3,724 million (less accrued interest).

M A Y

May Quarterly Financing

On May 3, Treasury announced it would auction \$12,000 million of 5-year notes of Series E-2005 and \$8,000 million of 9-3/4-year 6-1/2 percent notes of Series B-2010. The issue was to refund \$27,846 million of Treasury securities maturing May 15 and to pay down about \$7,846 million.

The notes of Series E-2005 were dated May 15, 2000. They are due May 15, 2005, with interest payable on November 15 and May 15 until maturity. Treasury set an interest rate of 6-3/4 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes on May 9. Tenders totaled \$23,727 million; Treasury accepted \$12,002 million at the high yield of 6.789 percent with an equivalent price of 99.837. Tenders at the high yield were allotted 22 percent. The median yield was 6.760 percent, and the low yield was 6.700 percent. Noncompetitive tenders totaled \$723 million. Competitive tenders accepted from private investors totaled \$11,278 million.

In addition to the \$12,002 million of tenders accepted in the auction process, Treasury accepted \$1,100 million from FRBs as agents for foreign and international monetary authorities. It also accepted \$2,357 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series E-2005 is \$800,000.

The 6-1/2 percent notes of Series B-2010 were an additional issue of notes dated February 15, 2000. They are due February 15, 2010, with interest payable on August 15 and February 15 until maturity. Accrued interest of \$16.07143 per \$1,000, covering the period from February 15 to May 15, 2000, was payable with each accepted tender.

Treasury received tenders for the notes on May 10. Tenders totaled \$20,941 million; Treasury accepted \$8,006 million at the high yield of 6.475 percent with an equivalent price of 100.153. Tenders at the high yield were allotted 26 percent. The median yield was 6.450 percent, and the low yield was 6.400 percent. Noncompetitive tenders totaled \$109 million. Competitive tenders accepted from private investors totaled \$7,897 million.

In addition to the \$8,006 million of tenders accepted in the auction process, Treasury accepted \$500 million from FRBs as agents for foreign and international monetary authorities. It also accepted \$2,570 million from FRBs for their own ac-

counts. The minimum par amount required for STRIPS of notes of Series B-2010 is \$400,000.

Auction of 2-Year Notes

On May 17, Treasury announced it would auction \$10,000 million of 2-year notes of Series V-2002. The issue was to refund \$25,494 million of securities maturing May 31 and to pay down about \$15,494 million.

The notes of Series V-2002 were dated May 31, 2000. They are due May 31, 2002, with interest payable on November 30 and May 31 until maturity. Treasury set an interest rate of 6-5/8 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes on May 24. Tenders totaled \$25,211 million; Treasury accepted \$10,001 million at the high yield of 6.749 percent with an equivalent price of 99.772. Tenders at the high yield were allotted 70 percent. The median yield was 6.720 percent, and the low yield was 6.650 percent. Noncompetitive tenders totaled \$1,744 million. Competitive tenders accepted from private investors totaled \$8,257 million.

In addition to the \$10,001 million of tenders accepted in the auction process, Treasury accepted \$1,000 million from FRBs as agents for foreign and international monetary authorities. It also accepted \$3,838 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series V-2002 is \$1,600,000.

52-Week Bills

On May 25, Treasury invited tenders for approximately \$10,000 million of 364-day Treasury bills. The bills were dated June 1, 2000, and will mature May 31, 2001. The issue was to refund \$17,266 million of all maturing bills and to raise about \$8,734 million of new cash. Treasury auctioned the bills on May 31. Tenders totaled \$27,067 million; Treasury accepted \$10,012 million. That included \$673 million of noncompetitive tenders from the public and \$2,290 million issued to FRBs as agents for foreign and international monetary authorities. In addition, Treasury awarded \$3,605 million to FRBs for their own accounts. The high bank discount rate was 6.000 percent.

Cash Management Bills

On May 30, Treasury invited tenders for approximately \$7,000 million of 12-day bills. The bills were issued June 2, 2000, and matured June 14, 2000. The issue was to raise new cash. Tenders were opened on June 1. They totaled \$20,045 million; Treasury accepted \$7,018 million. The high bank discount rate was 5.20 percent.

Debt Buyback Operations

In the debt buyback operation held on May 18, 2000, for settlement on May 22, \$9,117 million of offers was received. Treasury accepted \$2,000 million par amount for a total price paid of \$2,556 million (less accrued interest).

In the debt buyback operation held on May 25, 2000, for settlement on May 30, \$8,114 million of offers was received.

TREASURY FINANCING: APRIL-JUNE, con.

Treasury accepted \$2,000 million par amount for a total price paid of \$2,380 million (less accrued interest).

JUNE

Auction of 2-Year Notes

On June 21, Treasury announced it would auction \$10,000 million of 2-year notes of Series W-2002. The issue was to refund \$24,294 million of securities maturing June 30 and to pay down about \$14,294 million.

The notes of Series W-2002 were dated June 30, 2000. They are due June 30, 2002, with interest payable on December 31 and June 30 until maturity. Treasury set an interest rate of 6-3/8 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes on June 28. Tenders totaled \$27,017 million; Treasury accepted \$10,002 million at the high yield of 6.483 percent with an equivalent price of 99.800. Tenders at the high yield were allotted 67 percent. The median yield was 6.470 percent, and the low yield was 6.400

percent. Noncompetitive tenders totaled \$1,616 million. Competitive tenders accepted from private investors totaled \$8,386 million.

In addition to the \$10,002 million of tenders accepted in the auction process, Treasury accepted \$1,200 million from FRBs as agents for foreign and international monetary authorities. It also accepted \$3,109 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series W-2002 is \$1,600,000.

Debt Buyback Operations

In the debt buyback operation held on May 18, 2000, for settlement on May 22, \$9,117 million of offers was received. Treasury accepted \$2,000 million par amount for a total price paid of \$2,556 million (less accrued interest).

In the debt buyback operation held on May 25, 2000, for settlement on May 30, \$8,114 million of offers was received. Treasury accepted \$2,000 million par amount for a total price paid of \$2,380 million (less accrued interest).

TREASURY FINANCING: JULY-SEPTEMBER

[Source: Bureau of the Public Debt, Office of Financing]

JULY

Auction of 9-Year 6-month Inflation-Indexed Notes

On July 5, 2000, Treasury announced it would auction \$5,000 million of 9-year 6-month, 4-1/4 percent, inflation-indexed notes of series A-2010 to raise cash. The 9-1/2-year 4-1/4 percent notes of series A-2010 were dated January 15, 2000, and issued July 17, 2000. They are due January 15, 2010, with interest payable on January 15 and July 15 until maturity. Adjusted accrued interest of \$0.23511 per \$1,000, covering the period from July 15 to July 17, 2000, was payable with each accepted tender.

Treasury received tenders on July 12. Tenders totaled \$11,741 million; Treasury accepted \$5,002 million at the high yield of 4.030 percent with an equivalent adjusted price of 103.539. Tenders at the high yield were allotted 52 percent. The median yield was 3.997 percent, and the low yield was 3.880 percent. Noncompetitive tenders totaled \$48 million. Competitive tenders accepted from private investors totaled \$4,954 million. The minimum par amount required for STRIPS of inflation-indexed securities is \$1,000.

Auction of 2-Year Note

On July 19, Treasury announced it would auction \$10,000 million of 2-year notes of Series X-2002. The issue was to refund \$27,322 million of securities maturing July 31 and to pay down about \$17,322 million. The notes of Series X-2002 were

dated July 31, 2000. They are due July 31, 2002, with interest payable on January 31 and July 31 until maturity.

Treasury set an interest rate of 6-1/4 percent after determining which tenders were accepted on a yield auction basis. Tenders were received on July 26 and totaled \$26,325 million. Treasury accepted \$10,004 million at the high yield of 6.284 percent with an equivalent price of 99.937. The median yield was 6.265 percent, and the low yield was 6.210 percent. Tenders at 6.284 percent were allotted 58 percent. Noncompetitive tenders totaled \$1,553 million. Competitive tenders accepted from private investors totaled \$8,451 million.

In addition to the \$10,004 million of tenders accepted in the auction process, Treasury accepted \$1,700 million from FRBs as agents for foreign and international monetary authorities. It also accepted \$3,333 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series X-2002 is \$32,000.

Debt Buyback Operations

In the debt buyback operation held on July 20, 2000, for settlement on July 24, Treasury received \$4,440 million of offers. It accepted \$1,500 million par amount for a total price paid of \$1,803 million (less accrued interest).

In the debt buyback operation held on July 27, 2000, for settlement on July 31, Treasury received \$3,641 million of offers. It accepted \$1,000 million par amount for a total price paid of \$1,300 million (less accrued interest).

TREASURY FINANCING: JULY-SEPTEMBER, con.

AUGUST

August Quarterly Financing

On August 2, Treasury announced it would auction: \$10,000 million of 4-3/4-year 6-3/4 percent notes of Series E-2005; \$10,000 million of 10-year notes of Series C-2010; and \$5,000 of 29-3/4-year 6-1/4 percent bonds to refund \$25,071 million of Treasury securities maturing August 15 and to pay down about \$71 million.

The 6-3/4 percent notes of Series E-2005 were an additional issue of notes dated May 15, 2000. They are due May 15, 2005, with interest payable on November 15 and May 15 until maturity. Accrued interest of \$16.875 per \$1,000, covering the period from May 15 to August 15, 2000, was payable with each accepted tender.

Treasury received tenders on August 8. Tenders totaled \$30,601 million; Treasury accepted \$10,004 million at the high yield of 6.060 percent with an equivalent price of 102.787. Tenders at the high yield were allotted 78 percent. The median yield was 6.049 percent, and the low yield was 5.990 percent. Noncompetitive tenders totaled \$532 million. Competitive tenders accepted from private investors totaled \$9,472 million.

In addition to the \$10,004 million of tenders accepted in the auction process, Treasury accepted \$1,100 million from FRBs as agents for foreign and international monetary authorities. It also accepted \$2,085 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series E-2005 is \$800,000.

The 10-year notes of Series C-2010 were dated August 15, 2000. They are due August 15, 2010, with interest payable on February 15 and August 15 until maturity. Treasury set an interest rate of 5-3/4 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes on August 9. Tenders totaled \$19,457 million; Treasury accepted \$10,003 million at the high yield of 5.840 percent with an equivalent price of 99.326. Tenders at the high yield were allotted 77 percent. The median yield was 5.800 percent, and the low yield was 5.750 percent. Noncompetitive tenders totaled \$78 million. Competitive tenders accepted from private investors totaled \$9,925 million.

In addition to the \$10,003 million of tenders accepted in the auction process, Treasury accepted \$1,100 million from FRBs as agents for foreign and international monetary authorities. It also accepted \$1,254 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series C-2010 is \$800,000.

The 6-1/4 percent bonds of May 2030 were an additional issue of bonds dated November 15, 1999, issued August 15, 2000. They are due May 15, 2030, with interest payable November 15 and May 15 until maturity. Accrued interest of \$15.625 per \$1,000, covering the period from May 15 to August 15, 2000, was payable with each accepted tender.

Treasury received tenders for the bonds on August 10. Tenders totaled \$18,566 million; Treasury accepted \$5,001

million at the high yield of 5.697 percent with an equivalent price of 107.860. Tenders at the high yield were allotted 68 percent. The median yield was 5.688 percent, and the low yield was 5.650 percent. Noncompetitive tenders totaled \$15 million. Competitive tenders accepted from private investors totaled \$4,985 million.

In addition to the \$5,001 million of tenders accepted in the auction process, Treasury accepted \$50 million from FRBs as agents for foreign and international monetary authorities. It also accepted \$724 million from FRBs for their own accounts. The minimum par amount required for STRIPS of bonds of May 2030 is \$32,000.

Auction of 2-Year Notes

On August 16, Treasury announced that it would auction \$10,000 million of 2-year notes of Series Y-2002. This issue was to refund \$27,731 million of securities maturing August 31 and to pay down about \$17,731 million.

The notes of Series Y-2002 were dated August 31, 2000. They are due August 31, 2002, with interest payable on February 28 and August 31 until maturity. Treasury set an interest rate of 6-1/8 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes on August 23. Tenders totaled \$26,945 million; Treasury accepted \$10,004 million at the high yield of 6.204 percent with an equivalent price of 99.854. Tenders at the high yield were allotted 37 percent. The median yield was 6.185 percent, and the low yield was 6.140 percent. Noncompetitive tenders totaled \$1,385 million. Competitive tenders accepted from private investors totaled \$8,620 million.

In addition to the \$10,004 million of tenders accepted in the auction process, Treasury accepted \$1,700 million from FRBs as agents for foreign and international monetary authorities. It also accepted \$3,333 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series Y-2002 is \$1,600,000.

52-Week Bills

On August 24, Treasury invited tenders for approximately \$10,000 million of 364-day Treasury bills. The bills were dated August 31, 2000, and will mature August 30, 2001. The issue was to refund \$16,957 million of all maturing bills and to raise about \$11,043 million of new cash. Treasury auctioned the bills on August 29. Tenders totaled \$23,431 million; Treasury accepted \$10,005 million. That included \$470 million of noncompetitive tenders from the public and \$1,610 million issued to FRBs as agents for foreign and international monetary authorities. In addition, Treasury awarded \$3,027 million to FRBs for their own accounts. The high bank discount rate was 5.880 percent.

Cash Management Bills

On August 10, Treasury invited tenders for approximately \$21,000 million of 37-day bills. The bills were issued August 15, 2000, and matured September 21, 2000. The issue was to raise new cash. Tenders were opened on August 14. They to-

TREASURY FINANCING: JULY-SEPTEMBER, con.

tailed \$57,909 million; Treasury accepted \$21,018 million. The high bank discount rate was 6.35 per cent.

On August 29, Treasury invited tenders for approximately \$25,000 million of 14-day bills. The bills were issued September 1, 2000, and matured September 15, 2000. The issue was to raise new cash. Tenders were opened on August 31. They totaled \$61,503 million; Treasury accepted \$25,011 million. The high bank discount rate was 6.44 per cent.

Debt Buyback Operations

In the debt buyback operation held on August 17, 2000, for settlement on August 21, Treasury received \$6,879 million of offers. It accepted \$1,500 million par amount for a total price paid of \$1,760 million (less accrued interest).

In the debt buyback operation held on August 24, 2000, for settlement on August 28, Treasury received \$4,949 million of offers. It accepted \$750 million par amount for a total price paid of \$1,068 million (less accrued interest).

SEPTEMBER

Auction of 2-Year Notes

On September 22, Treasury announced that it would auction \$10,000 million of 2-year notes of Series Z-2002. The issue was to refund \$28,005 million of securities maturing September 30 and to pay down about \$18,005 million.

The notes of Series Z-2002 were dated September 30, 2000. They were issued October 2, 2000, and are due September 30, 2002, with interest payable on March 31 and September 30 un-

til maturity. Treasury set an interest rate of 5-5/8 per cent after determining which tenders were accepted on a yield auction basis. Accrued interest of \$0.32967 per \$1,000, covering the period from September 30, 2000, to October 2, 2000, was payable with each accepted tender.

Treasury received tenders for the notes on September 27. Tenders totaled \$29,340 million; Treasury accepted \$10,009 million at the high yield of 6.002 per cent with an equivalent price of 99.995. Tenders at the high yield were allotted 91 per cent. The median yield was 5.995 per cent, and the low yield was 5.970 percent. Noncompetitive tenders totaled \$1,253 million. Competitive tenders accepted from private investors totaled \$8,756 million.

In addition to the \$10,009 million of tenders accepted in the auction process, Treasury accepted \$1,900 million from FRBs as agents for foreign and international monetary authorities. It also accepted \$3,275 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series Z-2002 is \$100,000.

Debt Buyback Operations

In the debt buyback operation held on September 21, 2000, for settlement on September 25, Treasury received \$5,888 million of offers. It accepted \$1,500 million par amount for a total price paid of \$1,917 million (less accrued interest).

In the debt buyback operation held on September 28, 2000, for settlement on October 2, Treasury received \$5,660 million of offers. It accepted \$1,000 million par amount for a total price paid of \$1,394 million (less accrued interest).

¹ All 13-week bills represent additional issues of bills with an original maturity of 26 weeks or 52 weeks. Certain 26-week bills represent additional issues of bills with an original maturity of 32 weeks.

² Includes amounts exchanged on non-competitive basis by Government accounts and Federal Reserve Banks.

³ Tenders for \$1 million or less from any one bidder are accepted in full at the high price of accepted competitive bids. All Treasury marketable auctions are conducted in a single-price format as of November 2, 1998.

⁴ Equivalent coupon-issue yield.

**TABLE PDO-3.—Public Offerings of Marketable Securities
Other than Regular Weekly Treasury Bills, con.**

¹ Currently, all issues are sold at auction. For bill issues, the rate shown is the high bank discount rate. For note and bond issues, the rate shown is the interest rate. For details of bill offerings, see table PDO-2. As of October 1, 1997, all Treasury issues of notes and bonds are eligible for STRIPS.

² From date of additional issue in case of a reopening.

³ In reopenings, the amount accepted is in addition to the amount of original offerings.

⁴ Includes securities issued to U.S. Government accounts and Federal Reserve Banks; and to foreign and international monetary authorities, whether in exchange for maturing securities or for new cash.

⁵ Interest began to accrue before the issue date (settlement date) of this loan.

Note.— Starting with the January 5, 1999, auction, amounts listed as tendered and accepted are amounts tendered and awarded on auction day. Before the January 5, 1999, auction, amounts listed as tendered and accepted are amounts tendered and awarded on issue day.

INTRODUCTION: Savings Bonds and Notes

Series EE bonds, on sale since January 1, 1998, and series I bonds, on sale since September 1, 1998, are the savings bonds currently being sold. Series HH bonds are issued in exchange for Series E and EE savings bonds and savings notes. Series A-D were sold from March 1, 1935, through April 30, 1941. Series E was on sale from May 1, 1941, through December 31, 1979 (through June 1980 to pay roll savers only). Series F and G were sold from May 1, 1941, through April 30, 1952. Series H was sold from June 1, 1952, through December 31, 1979. Series HH bonds were sold for cash from January 1, 1980,

through October 31, 1982. Series J and K were sold from May 1, 1952, through April 30, 1957. U.S. savings notes were on sale May 1, 1967, through June 30, 1970. The notes were eligible for purchase by individuals with the simultaneous purchase of series E savings bonds.

The principal terms and conditions for purchase and redemption and information on investment yields of savings notes appear in the "Treasury Bulletins" of March 1967 and June 1968; and in the Annual Report of the Secretary of the Treasury for fiscal 1974.

TABLE SBN-1.—Sales and Redemptions by Series, Cumulative through Sept. 30, 2000

[In millions of dollars. Source: "Monthly Statement of the Public Debt of the United States;" Bureau of the Public Debt, Office of Public Debt Accounting]

Series	Sales ¹ (1)	Accrued discount (2)	Sales plus accrued discount (3)	Redemptions ¹ (4)	Amount outstanding	
					Interest- bearing debt (5)	Matured non- interest-bearing debt (6)
Savings bonds:						
Series A-D ²	3,949	1,054	5,003	5,002	-	1
Series E, EE, H and HH.....	360,206	214,136	574,342	376,373	177,659	6,544
Series I.....	2,005	41	2,046	69	2,152	-
Series F and G.....	28,396	1,125	29,521	29,517	-	3
Series J and K.....	3,556	198	3,754	3,753	-	-
Savings notes.....	862	707	1,569	1,221	27	-
Total.....	398,974	217,261	616,235	415,935	179,838	6,548

¹ Sales and redemption figures include exchange of minor amounts of (1) matured series E bonds for series G and K bonds from May 1951 through April 1957; (2) series F and J bonds for series H bonds beginning January 1960; and (3) U.S. savings notes for series H bonds beginning January 1972; however, they exclude exchanges of series E bonds for series H and HH bonds.

² Details by series on a cumulative basis and by period of series A-D combined can be found in the February 1952 and previous issues of the "Treasury Bulletin."

Note—Series E and EE include U.S. savings notes (Free dom Shares) on sale from May 1, 1967, through June 30, 1970, to E bond buyers.

INTRODUCTION: Ownership of Federal Securities

Federal securities presented in the following tables are public debt securities such as savings bonds, bills, notes and bonds that the Treasury issues. The tables also detail debt issued by other Federal agencies under special financing authorities. [See the Federal debt (FD) tables for a more complete description of the Federal debt.]

- Table **OFS-1** presents Treasury marketable and non-marketable securities and debt issued by other Federal agencies held by Government accounts, the FRBs and private investors. Social Security and Federal retirement trust fund investments comprise much of the Government account holdings.

The FRBs acquire Treasury securities in the market as a means of executing monetary policy.

- Table **OFS-2** presents the estimated amount of public debt securities held by private investors. Information is obtained from sources such as the Federal financial institution regulatory agencies. State, local and foreign holdings include special issues of non-marketable securities to municipal entities and foreign official accounts. They also include municipal, foreign official and private holdings of marketable Treasury securities. (See footnotes to the table for description of investor categories.)

9 Includes individuals, Government-sponsored enterprises, brokers and dealers, bank personal trusts and estates, corporate and non-corporate businesses, and other investors.

Note.—Ownership data were revised (in June 1999) back to March 1989 in order to update ownership categories and to incorporate greater reliance on Flow of Funds data of the Federal

INTRODUCTION: Market Yields

The tables and charts in this section present yields on Treasury marketable securities, and compare long-term yields on Treasury securities with yields on long-term corporate and municipal securities.

- Table **MY-1** lists Treasury market bid yields at constant maturities for bills, notes and bonds. The Treasury yield curve in the accompanying chart is based on current market bid quotations on the most actively traded Treasury securities as of 3:30 p.m. on the last business day of the calendar quarter.

The Treasury uses quotations obtained by the FRB of New York to derive the yield curve, based on semiannual interest payments and read at constant maturity points to develop a consistent data series. Yields on Treasury bills are coupon equivalent yields of bank *discount rates* at which Treasury bills trade in the market. The Board of Governors of

the Federal Reserve System publishes the Treasury constant maturity data series in its weekly H.15 press release.

- Table **MY-2** shows average yields of long-term Treasury, corporate and municipal bonds. The long-term Treasury average yield is the 30-year constant maturity yield. The corporate bond average yield is developed by Treasury by calculating reoffering yields on new long-term securities maturing in at least 20 years and rated Aa by Moody's Investors Service. The municipal bond average yield prior to 1991 was compiled by Treasury. Beginning with January 1991, the average yield is the "Municipal Bond Yield Average," published by Moody's Investors Service for 20-year reoffering yields on selected Aa-rated general obligations. See the foot notes for further explanation.

INTRODUCTION: U.S. Currency and Coin Outstanding and in Circulation

The U.S. Currency and Coin Outstanding and in Circulation (USCC) statement informs the public of the total face value of currency and coin used as a medium of exchange that is in circulation at the end of a given accounting month. The statement defines the total amount of currency and coin outstanding and the portion deemed to be in circulation. It includes some old and current rare issues that do not circulate or that may do so to a limited extent. Treasury includes them in the statement because the issues were originally intended for general circulation.

The USCC statement provides a description of the various issues of paper money. It also gives an estimated average of currency and coin held by each individual, using estimates of population from the Bureau of the Census. USCC information has been published by Treasury since 1888, and was published separately until 1983, when it was incorporated into the "Treasury Bulletin." The USCC comes from monthly reports compiled by Treasury of figures, various U.S. Mint of figures, the Federal Reserve Banks and the Federal Reserve Board.

¹ Issued on or after July 1, 1929.² Excludes coins sold to collectors at premium prices.³ Includes \$481,781,898 in standard silver dollars.⁴ Represents value of certain partial denominations not presented for redemption.⁵ Based on Bureau of the Census estimates of population.

INTRODUCTION: International Financial Statistics

The tables in this section provide statistics on U.S. Government reserve assets, liabilities to *foreigners* and its international financial position. All monetary figures are in dollars or dollar equivalents.

- Table **IFS-1** shows reserve assets of the United States, including its gold stock, *special drawing rights* held in the Special Drawing Account in the *International Monetary Fund*

(*IMF*), holdings of convertible foreign currencies and reserve position in the *IMF*.

- Table **IFS-2** contains statistics on liabilities to *foreign official institutions*, and selected liabilities to all other *foreigners*, which are used in the U.S. balance of payments statistics.

- Table **IFS-3** shows nonmarketable bonds and notes that the Treasury issues to official institutions and other residents of foreign countries.

[In millions of dollars. Source: Treasury International Capital Reporting System]

End of calendar year or month	Total reserve assets ¹ (1)	Gold stock ² (2)	Special drawing rights ^{1,3} (3)	Foreign currencies ⁴ (4)	Reserve position in International Monetary Fund ^{1,5,6} (5)
1995	85,832	11,050	11,037	49,096	14,649
1996	75,089	11,048	10,312	38,294	15,435
1997	69,954	11,047	10,027	30,809	18,071
1998	81,761	11,046	10,603	36,001	24,111
1999 - Oct.	73,230	11,049	10,232	32,378	19,571
Nov.	72,318	11,049	10,326	32,236	18,707
Dec.	71,516	11,048	10,336	32,182	17,950
2000 - Jan.	69,898	11,048	10,199	30,941	17,710
Feb.	69,309	11,048	10,277	30,406	17,578
Mar.	70,789	11,048	10,335	31,535	17,871
Apr.	66,587	11,048	10,122	30,014	15,403
May.	67,160	11,048	10,310	30,429	15,373
June.	67,955	11,046	10,444	31,037	15,428
July.	66,516	11,046	10,257	30,130	15,083
Aug.	65,333	11,046	10,371	30,118	13,798
Sept.	66,256	11,046	10,316	31,209	13,685
Oct.	65,257	11,046	10,169	30,514	13,528

¹ Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing right (SDR) based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and reserve position in the IMF also are valued on this basis beginning July 1974.

² Treasury values its gold stock at \$42.2222 per fine troy ounce and pursuant to 31 United States Code 5117 (b) issues gold certificates to the Federal Reserve at the same rate against all gold held.

³ Includes allocations of SDRs in the Special Drawing Account in the IMF, plus or minus transactions in SDRs.

⁴ Includes holdings of Treasury and Federal Reserve System; beginning November 1978, these are valued at current market exchange rates or, where appropriate, at such other rates as may be agreed upon by the parties to the transactions.

⁵ The United States has the right to purchase foreign currencies equivalent to its reserve position in the IMF automatically if needed. Under appropriate conditions, the United States could purchase additional amounts related to the U.S. quota.

⁶ Includes an SDR \$361 million loan to the IMF under the General Arrangements to Borrow in July 1998, and an SDR \$619 million loan to the IMF under the New Arrangements to Borrow in December 1998.

¹ Includes Bank for International Settlements.² Derived by applying reported transactions to benchmark data.³ Includes current value of zero-coupon Treasury bond issues to foreign governments as follows: Mexico, beginning March 1988, 20-year maturity issue and beginning March 1990, 30-year maturity issue; Venezuela, beginning December 1990, 30-year maturity issue; Argentina, beginning April 1993, 30-year maturity issue. Also, see foot notes to table IFS-3.⁴ Includes debt securities of U.S. Government corporations, federally sponsored agencies and private corporations.⁵ Includes liabilities payable in dollars to foreign banks and liabilities payable in foreign currencies to foreign banks and to "other for eigners."⁶ Includes marketable U.S. Government bonds and notes held by foreign banks.⁷ Principally the International Bank for Reconstruction and Development, the Inter-American Development Bank and the Asian Development Bank.

Note.—Table is based on Treasury data and on data reported to the Treasury by banks, other depository institutions and brokers in the United States. Data generally correspond to statistics following in this section and in the "Capital Movements" section. Table excludes International Monetary Fund "holdings of dollars" and holdings of U.S. Treasury letters of credit and nonnegotiable noninterest-bearing special U.S. notes held by international and regional organizations.

¹ Beginning April 1993, includes current value (principal and accrued interest) of zero-coupon, 30-year maturity Treasury bond issued to the government of Argentina. Remaining face value of the issue is \$6,148 million.

² Includes the current value of the following zero-coupon Treasury bond issued to the government of Mexico: Beginning March 1988, 20-year maturity issue with remaining face value of \$1,508 million that was retired in full in April 1997; and beginning March 1990, 30-year maturity

issue with remaining face value of \$18,112 million.

³ Beginning December 1990, indicates current value of zero-coupon, 30-year maturity Treasury bond issued to the Republic of Venezuela. Remaining face value of issue is \$2,721 million.

INTRODUCTION: Capital Movements

Treasury collects information about the transference of financial assets and other portfolio capital movements between the United States and for eigners and has since 1935. Commercial banks and other depository institutions, bank holding companies, securities brokers and dealers, and nonbanking enterprises in the United States file capital movement reports with district FRBs. Beginning in late 1998, the Federal Reserve Board also performs services on behalf of the Treasury in support of this data collection system.

Forms and instructions are developed with the cooperation of other Government agencies and the Federal Reserve System and in consultation with representatives of banks, securities firms and nonbanking enterprises. Copies of the reporting forms and instructions may be obtained from the Office of Program Services, Office of the Assistant Secretary for International Affairs, Treasury, Washington, D.C. 20220; the International Finance Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551; or district FRBs.

In general, information is reported opposite the country or geographical area where the foreigner is located, as shown on records of reporting institutions. However, information may not always reflect the ultimate ownership of assets. Reporting institutions are not required to go beyond addresses shown on their records and so may not be aware of the actual country of domicile of the ultimate beneficiary.

Transactions with branches or agencies of foreign of financial institutions, wherever located, are reported opposite the country that has sovereignty over the institutions. Transactions with international and regional organizations are not reported opposite any country, but are accounted for in regional groupings of such organizations. The only exception is information pertaining to the Bank for International Settlements, which is reported opposite "Other Europe."

Banks and other depository institutions, bank holding companies, International Banking Facilities (IBFs), securities brokers and dealers, and nonbanking enterprises in the United States must file reports. These enterprises include the branches, agencies, subsidiaries and other affiliates in the United States of foreign banking and nonbanking firms. Those with liabilities, claims or securities transactions below specified exemption levels are exempt from reporting.

Banks and other depository institutions, and some brokers and dealers, file monthly reports covering their dollar liabilities to, and dollar claims on, foreigners in a number of countries. Twice a year, June 30 and December 31, they also report the same liabilities and claims items attributed to foreigners in countries not shown separately on the monthly reports. Quarterly reports are filed for liabilities and claims denominated in foreign currencies. The exemption level applicable to these banking reports is \$15 million.

Banks and other depository institutions, securities brokers and dealers, and other enterprises report monthly their transactions with foreigners in long-term securities. They must report

securities transactions with foreigners if their aggregate purchases or their aggregate sales amount to at least \$2 million during the covered month.

Exporters, importers, industrial and commercial concerns, financial institutions (other than banks, other depository institutions and brokers), and other nonbanking enterprises must file reports quarterly if liabilities to, or claims on, unaffiliated foreigners amount to \$10 million or more at the end of the covered quarter.

Nonbanking enterprises also report each month their aggregate U.S. dollar denominated deposit and certificates of deposit claims of \$10 million or more on banks abroad.

The data in these tables do not cover all types of reported capital movements between the United States and other countries. The principal exclusions are the intercompany capital transactions of nonbanking business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies (own foreign offices) and capital transactions of the U.S. Government. Consolidated data on all types of international capital transactions are published by the Department of Commerce (Commerce) in its regular reports on the U.S. balance of payments.

- **Section I** presents liabilities to foreigners reported by U.S. banks and other depository institutions, as well as brokers and dealers. Dollar liabilities are reported monthly; those denominated in foreign currencies are reported quarterly. Respondents report certain of their own liabilities and a wide range of their custody liabilities to foreigners.

- **Section II** presents claims on foreigners reported by U.S. banks and other depository institutions, brokers and dealers. Data on banks' claims held for their own account are collected monthly. Information on claims held for their domestic customers as well as on foreign currency claims is collected on a quarterly basis only. Maturity data are reported according to time remaining to maturity. Reporting also covers certain items held by brokers and dealers in the United States.

- **Section III** contains supplementary data on dollar liabilities to, and dollar claims on, countries not listed separately on the monthly reports submitted by banks, other depository institutions, brokers and dealers in the United States. The supplementary reports are filed semiannually as of the end of June and December.

- **Section IV** shows the liabilities to, and claims on, unaffiliated foreigners of exporters, importers, industrial and commercial concerns, financial institutions (other than banks, other depository institutions and brokers), and other nonbanking enterprises in the United States. Information does not include accounts of nonbanking enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. These are reported by business enterprises to Commerce on its direct investment forms. Data

exclude claims on foreigners held through banks in the United States.

• **Section V** contains information on transactions with foreigners in long-term domestic and foreign securities as reported by banks, brokers and other entities in the United States. The data cover transactions executed in the United States for the accounts of foreigners and transactions executed abroad for the accounts of reporting institutions and their domestic customers. This includes transactions in newly issued securities as well as transactions in and redemptions of outstanding issues. However, the data do not include nonmarketable Treasury bonds and notes shown in table IFS-3.

The geographical breakdown of the transactions data does not necessarily reflect the domicile of the ultimate owners or the original issuers of the securities. This is because the path of a security is not tracked prior to its being purchased from, or after it is sold to, a foreigner in a reportable transaction. That is, before it enters and after it departs the reporting system, own-

ership of a security may be transferred between foreigners of different countries. Such transfers may occur any number of times and are concealed among the net figures for U.S. transactions opposite individual countries. Hence, the geographical breakdown shows only the country of domicile of the foreign buyers and sellers of securities in a particular round of transactions.

NOTE: Current and historical data on United States transactions with foreigners in long-term securities and on the gross foreign liabilities and claims reported by banks in the United States are available on the Treasury International Capital (TIC) reporting system website: <http://www.ustreas.gov/tic>. These data may be downloaded as separate time series for each country or geographical area regularly shown in the capital movements tables. Also available on this website is a table on "Major Foreign Holders of Treasury Securities," showing estimated total holdings of U.S. Treasury bills, bonds and notes for current and recent periods. All data series on the TIC website are updated on the last business day of each month.

¹ These data as of June 30, 2000.

² Excludes negotiable time certificates of deposit, which are included in "Other liabilities."

³ U.S. Treasury bills and certificates held in custody for the account of oil-exporting countries in "Other Asia" and "Other Africa" amount to \$1,393 million.

⁴ Beginning with series for December 1992 forward, data for all other republics of the former U.S.S.R. are reported under "Other Europe."

⁵ Includes data on Serbia and Montenegro, which presently form an entity not formally recognized by the United States. Data for entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia and Slovenia; and beginning in June 1994 for the former Yugoslav Republic of Macedonia.

⁶ Formerly known as Zaire.

CHART CM-A.—U.S. Liabilities to Foreigners Reported by U.S. Banks, Brokers and Dealers with Respect to Selected Countries

In the first three quarters of 2000, U.S. banking liabilities grew at about the same pace as in 1998 and 1999. Liabilities increased \$43 billion, primarily due to a \$56 billion increase opposite the Caribbean financial centers.

U.S. banking liabilities to foreigners, excluding long-term securities, are concentrated in international financial centers. The data on this page show that nearly one-half of U.S. banking liabilities currently is reported opposite the United Kingdom and the banking centers in the Caribbean.

Foreigners domiciled in the rest of Europe and in Asia hold an additional 40 percent.

U.S. banking liabilities in the mid-1990s went through a growth spurt. The annual growth rate between 1993 and 1997 averaged 10 per cent. Since 1997, growth has slowed to less than 5 per cent per year, which is more in line with the 1989 through 1992 period.

¹ Beginning with series for December 1992 forward, data for all other republics of the former U.S.S.R. are reported under "Other Europe."

² Includes data on Serbia and Montenegro, which presently form an entity not formally recognized by the United States. Data for entities of the former Yugoslavia are recognized as in dependent

states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia and Slovenia; and beginning in June 1994 for the Former Yugoslav Republic of Macedonia.

³ Formerly known as Zaire.

CHART CM-B.—U.S. Claims on Foreigners Reported by U.S. Banks, Brokers and Dealers with Respect to Selected Countries

The first half of 2000 showed strong growth in banking claims on foreigners, despite a modest decrease in claims in the second quarter. Claims increased \$56 billion, primarily due to a \$62 billion increase in claims opposite Europe.

U.S. banking claims on foreigners, excluding long-term securities, are concentrated in international financial centers. The data on this page show that over three-quarters of U.S. claims currently are reported opposite the United Kingdom, "All other Europe," and the banking centers in the Caribbean. Foreigners domiciled in Asia hold less than 10 percent of U.S. claims, down from 20 percent at the end of 1996.

After extremely strong growth in the mid-1990s, total U.S. banking claims on foreigners are leveling off. Annual growth peaked at 15 percent in 1997. In 1998 and the first three quarters of 1999, claims grew at a much slower annual rate of 3 percent. Starting in the fourth quarter of 1999, growth in banking claims picked up; claims increased at over a 10 percent annual rate in the first half of 2000.

¹ Beginning with series for December 1992 forward, data for all other republics of the former U.S.S.R. are reported under "Other Europe."

² Includes data on Serbia and Montenegro, which presently form an entity not formally recognized by the United States. Data for entities of the former Yugoslavia via recognized as in depend-

ent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia and Slovenia; and beginning in June 1994 for the Former Yugoslav Republic of Macedonia.

³ Formerly known as Zaire.

CHART CM-C.—Net Purchases of Long-Term Domestic Securities by Foreigners, Selected Countries

U.S. banks, brokers, and other persons report foreigners' transactions in long-term U.S. securities (that is, U.S. Treasury and Government agency bonds and notes, and U.S. corporate bonds and stocks), which are conducted largely through international financial centers. The data on this page present aggregate net purchases on an annual basis for 1997 through 1999, as well as activity for the first three quarters of 2000.

The figures show that foreigners' annual net purchases (gross purchases minus gross sales) of U.S. securities have maintained an extremely high level since 1997.

Annual net foreign purchases of U.S. securities first surpassed \$100 billion in 1993. They reached a record high of \$388 billion in 1997. In 2000, net foreign purchases of U.S. securities are on pace to surpass the 1997 record. In the first three quarters, net purchases amounted to \$347 billion, of which \$231 billion was reported opposite Europe.

Over the past few years, the composition of foreigners' net purchases has changed dramatically. In the mid-1990s, the majority of foreigners' net purchases consisted of U.S. Treasury bonds and notes. Since 1997, however, foreigners increasingly have turned to other long-term securities.

¹ Beginning with series for December 1992 forward, data for all other republics of the former U.S.S.R. are reported under "Other Europe."

² Includes data on Serbia and Montenegro, which presently form an entity not formally recognized by the United States. Data for entities of the former Yugoslavia recognized as independent

states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia and Slovenia; and beginning in June 1994 for the former Yugoslav Republic of Macedonia.

³ Formerly known as Zaire.

¹ Beginning with series for December 1992 forward, data for all other republics of the former U.S.S.R. are reported under "Other Europe."

² Includes data on Serbia and Montenegro, which presently form an entity not formally recognized by the United States. Data for entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe" as follows: Beginning in

December 1992 for Bosnia and Herzegovina, Croatia and Slovenia; and beginning in June 1994 for the Former Yugoslav Republic of Macedonia.

³ Formerly known as Zaire.

CHART CM-D.—Net Purchases of Long-Term Foreign Securities by U.S. Investors *

The data on this page represent U.S. investors' purchases and sales of long-term foreign securities as reported to the Treasury International Capital (TIC) reporting system. However, in the past 2 years, U.S. investors also have acquired a substantial amount of foreign stocks, mostly European, through mergers that involve stock swaps. Net acquisitions through stock swaps amounted to \$96 billion in 1998, \$123 billion in 1999, and about \$45 billion in the first three quarters of 2000. (Stock swaps data for the most recent quarter are Federal Reserve Board/Treasury estimates and are subject to substantial revisions.) These stock swaps are not reported under the TIC reporting system.

Taking into account the stock swaps, an annual U.S. net purchases of long-term foreign securities have averaged about \$100 billion since the mid-1990s, with out much variation from year to year. In 1999, net stock purchases, including the stock swaps, totaled \$107 billion, mostly through Europe and Japan. Net bond purchases totaled \$6 billion, far below the levels of the mid-1990s. In the first three quarters of 2000, taking into account the estimated \$45 billion in foreign stocks acquired through mergers, U.S. residents acquired approximately \$65 billion in foreign securities, similar to the pace of previous years.

Foreign bonds	Foreign stocks	Total foreign securities
---------------	----------------	--------------------------

Type	Calendar years					
	1996	1997	1998	1999	2000 Jan. - Sept.	2000 July - Sept.
Foreign bonds	51,369	48,144	17,349	5,676	7,430	9,002
Foreign stocks	59,268	40,939	-6,212	-15,640	12,321	3,240
Total	110,637	89,083	11,137	-9,964	19,751	12,242

*Net purchases by U.S. investors equal net sales by foreign investors, or gross sales minus gross purchases of securities.

INTRODUCTION: Foreign Currency Positions

The "Treasury Bulletin" reports foreign currency holdings of large foreign exchange market participants. These reports provide information on positions in derivative instruments, such as foreign exchange futures and options, that are increasingly used in establishing foreign exchange positions but were not covered in the old reports.

The information is based on reports of large foreign exchange market participants on holdings of six major foreign currencies (Canadian dollar, German mark, Japanese yen, Swiss franc, pound sterling and euro) and the U.S. dollar. Positions in the U.S. dollar, which have been collected since January 1999, are intended to approximate "all other" currency positions of reporting institutions. U.S.-based businesses file a consolidated report for their domestic and foreign subsidiaries, branches and agencies. U.S. subsidiaries of foreign entities file only for themselves, not for their foreign parents. Filing is required by law (31 United States Code 5315; 31 Code of Federal Regulations 128, Subpart C).

Weekly and monthly reports must be filed throughout the calendar year by major foreign exchange market participants, which are defined as market participants with more than \$50 billion equivalent in foreign exchange contracts on the last business day of any calendar quarter during the previous year (end March, June, September or December). Such contracts include the amounts of foreign exchange spot contracts bought and sold, for foreign exchange forward contracts bought and sold, for foreign exchange futures bought and sold, and one

half the notional amount of foreign exchange options bought and sold.

A quarterly report must be filed throughout the calendar year by each foreign exchange market participant that had more than \$5 billion equivalent in foreign exchange contracts on the last business day of any quarter the previous year (end March, June, September or December).

This information is published in seven sections corresponding to each of the major currencies covered by the reports. Tables I-1 through VII-1 present the currency data reported weekly by major market participants. Tables I-2 through VII-2 present more detailed currency data of major market participants, based on monthly Treasury and FFIEC 035 reports. Tables I-3 through VII-3 present quarterly consolidated currency data reported by large market participants and FFIEC reporters that do not file weekly reports.

Principal exchanged under cross-currency interest rate swaps is reported as part of purchases or sales of foreign exchange. Such principal also was noted separately on monthly and quarterly reports through December 1998, when this practice was discontinued. The net options position, or the net delta-equivalent value of an options position, is an estimate of the relationship between an option's value and an equivalent currency hedge. The delta equivalent value is defined as the product of the first partial derivative of an option valuation formula (with respect to the price of the underlying currency) multiplied by the notional principal of the contract.

INTRODUCTION: Exchange Stabilization Fund

To stabilize the exchange value of the dollar, the Exchange Stabilization Fund (ESF) was established pursuant to chapter 6, section 10 of the Gold Reserve Act of January 30, 1934 (codified at 31 United States Code 5302), which authorized establishment of a Treasury fund to be operated under the exclusive control of the Secretary, with approval of the President.

Subsequent amendment of the Gold Reserve Act modified the original purpose somewhat to reflect termination of the fixed exchange rate system.

Resources of the fund include dollar balances, partially invested in U.S. Government securities, *special drawing rights* (SDRs), and balances of foreign currencies. Principal sources of income (+) or loss (-) for the fund are profits (+) or losses (-) on SDRs and for foreign exchange, as well as interest earned on assets.

- Table **ESF-1** presents the assets, liabilities and capital of the fund. The figures are in U.S. dollars or their equivalents based on current exchange rates computed according to the accrual method of accounting. The capital account represents the original capital appropriated to the fund by Congress of \$2 billion, minus a subsequent transfer of \$1.8 billion to pay for the initial U.S. quota subscription to the International Monetary Fund. Gains and losses are reflected in the cumulative net income (+) or loss (-) account.

- Table **ESF-2** shows the results of operations by quarter. Figures are in U.S. dollars or their equivalents computed according to the accrual method. "Profit (+) or loss (-) on foreign exchange" includes realized profits or losses. "Adjustment for change in valuation of SDR holdings and allocations" reflects net gain or loss on revaluation of SDR holdings and allocations for the quarter.

Note.—An nual bal ance sheets for fis cal 1934 through 1940 ap peared in the 1940 "An nual Re port of the Sec re tary of the Treas ury" and those for suc ceed ing years ap peared in sub se quent re ports through 1980. Quar terly bal ance sheets be gin ning with De cem ber 31, 1938, have been pub lished in the "Treas ury Bul le tin." Data from in cep tion to Sep tem ber 30, 1978, may be found on the state ments pub lished in the Jan u ary 1979 "Treas ury Bul le tin."

INTRODUCTION: Trust Funds

The tables and charts in this section present the most recent data available on various trust funds administered by the Treasury. Trust funds are monies held by the Government in accounts established by law or by trust agreement for specific purposes and designated by law as being trust funds.

This report compiles data from many sources and provides information in a consolidated manner.

The Civil Service Retirement and Disability Fund is operated by the Office of Personnel Management. The Federal Hospital Insurance and Federal Supplementary Medical Insurance Trust Funds are under the auspices of the Department of Health and Human Services' Health Care Financing Administration. The Federal Old-age and Survivors Insurance and Federal Disability Insurance Trust Funds are administered by Social Security.

In addition, the Department of Veterans Affairs' Veterans Benefits Administration disburses the National Service Life Insurance Fund. The Department of Labor's Employment and Training Administration is responsible for the Unemployment Trust Fund.

Data for the Railroad Retirement Trust Fund also are included in this section. That trust fund is administered by the Railroad Retirement Board, an independent agency.

The following tables are published in the December issue of the "Treasury Bulletin" each year. Most of the data for the tables came from the "Monthly Treasury Statement of Receipts and Outlays of the United States Government," in which monthly data are published. Estimated figures are based on the "Budget of the United States Government, Fiscal Year 2001," released February 7, 2000.

TABLE TF-15A.—High way Trust Fund

The following information is released according to the provisions of the Byrd Amendment to the Intermodal Surface Transportation Efficiency Act of 1991 [codified at 26 United States Code 9503(d)] and represents data concerning the Highway Trust Fund. The figure described as “unfunded authorizations” is the latest estimate received from the DOT for fiscal 2000.

The 24-month revenue estimates for the highway and mass transit accounts, respectively, include the latest estimates received from Treasury’s Office of Tax Analysis for excise taxes, net of refunds. They represent net highway receipts for those periods beginning at the close of fiscal 2000.

Highway Account

[In millions of dollars. Source: DOT]

Unfunded authorizations (EOY)	36,836
24-month revenue estimate	62,537

Mass Transit Account

[In millions of dollars. Source: DOT]

Unfunded authorizations (EOY)	-6,540
24-month revenue estimate	9,593

Glossary

With References to Applicable Sections and Tables

Source: Financial Management Service

Accrued discount (SBN-1, -2, -3)—Interest that accumulates on savings bonds from the date of purchase until the date of redemption or final maturity, whichever comes first. Series A, B, C, D, E, EE, F, I and J are discount or accrual type bonds—meaning principal and interest are paid when bonds are redeemed. Series G, H, HH and K are current-income bonds, and the semiannual interest paid to their holders is not included in accrued discount.

Amounts outstanding and in circulation (USCC)—Includes all issues by the Bureau of the Mint purposely intended as a medium of exchange. Coins sold by the Bureau of the Mint at premium prices are excluded; however, uncirculated coin sets sold at face value plus handling charge are included.

Average discount rate (PDO-2, -3)—In Treasury bill auctions, purchasers tender competitive bids on a discount rate basis. The average discount rate is the weighted, or adjusted, average of all bids accepted in the auction.

Budget authority (“Federal Fiscal Operations”)—Congress passes laws giving budget authority to Government entities, which gives the agencies the power to spend Federal funds. Congress can stipulate various criteria for the spending of these funds. For example, Congress can stipulate that a given agency must spend within a specific year, number of years, or any time in the future.

The basic forms of budget authority are appropriations, authority to borrow, contract authority, and authority to obligate and expend offsetting receipts and collections. The period of time during which Congress makes funds available may be specified as 1-year, multiple-year or no-year. The available amount may be classified as either definite or indefinite; a specific amount or an unspecified amount can be made available. Authority may also be classified as current or permanent. Permanent authority requires no current action by Congress.

Budget deficit—The total, cumulative amount by which budget outlays (spending) exceed budget receipts (income).

Cash management bills (PDO-2)—Marketable Treasury bills of irregular maturity lengths, sold periodically to fund short-term cash needs of Treasury. Their sale, having higher minimum and multiple purchase requirements than those of other issues, is generally restricted to competitive bidders.

Competitive tenders (“Treasury Financing Operations”)—A bid to purchase a stated amount of one issue of Treasury securities at a specified yield or discount. The bid is accepted if it is within the range accepted in the auction. (See Noncompetitive tenders.)

Coupon issue—The issue of bonds or notes (public debt).

Currency no longer issued (USCC)—Old and new series gold and silver certificates, Federal Reserve notes, national bank notes and 1890 Series Treasury notes.

Current income bonds (“U.S. Savings Bonds and Notes”)—Bonds paying semiannual interest to holders. Interest is not included in accrued discount.

Debt outstanding subject to limitation (FD-6)—The debt incurred by the Treasury subject to the statutory limit set by Congress. Until World War I, a specific amount of debt was authorized to each separate security issue. Beginning with the Second Liberty Loan Act of 1917, the nature of the limitation was modified until, in 1941, it developed into an overall limit on the outstanding Federal debt. As of September 2000, the debt limit was \$5,950,000 million; the limit may change from year to year.

The debt subject to limitation includes most of Treasury’s public debt except securities issued to the Federal Financing Bank, upon which there is a limitation of \$15 billion, and certain categories of older debt (totaling approximately \$595 million as of February 1991).

Discount—The interest deducted in advance when purchasing notes or bonds. (See Accrued discount.)

Discount rate (PDO-2)—The difference between par value and the actual purchase price paid, annualized over a 360-day year. Because this rate is less than the actual yield (coupon-equivalent rate), the yield should be used in any comparison with coupon issue securities.

Dollar coins (USCC)—Include standard silver and nonsilver coins.

Domestic series (FD-2)—Nonmarketable, interest and non-interest-bearing securities issued periodically by Treasury to the Resolution Funding Corporation (RFC) for investment of funds authorized under section 21B of the Federal Home Loan Bank Act (12 United States Code 1441b).

Federal intrafund transactions (“Federal Fiscal Operations”)—Intrabudgetary transactions in which payments and receipts both occur within the same Federal fund group (Federal funds or trust funds).

Federal Reserve notes (USCC)—Issues by the U.S. Government to the public through the Federal Reserve Banks and their member banks. They represent money owed by the Government to the public. Currently, the item “Federal Reserve notes—amounts outstanding” consists of new series issues. The Federal Reserve note is the only class of currency currently issued.

Foreign (“Foreign Currency Positions,” IFS-2, -3)—Locations other than those included under the definition of the United States. (See United States.)

Foreigner (“Capital Movements,” IFS-2)—All institutions and individuals living outside the United States, including U.S. citizens living abroad, and branches, subsidiaries, and other affiliates abroad of U.S. banks and business concerns; central governments, central banks, and other of financial institutions of countries other than the United States, and international and regional organizations, wherever located. Also, refers to persons in the United States to the extent that they are known by reporting institutions to be acting for foreigners.

Foreign official institutions (“Capital Movements”)—Includes central governments of foreign countries, including all

Glossary

departments and agencies of national governments; central banks, exchange authorities, and all fiscal agents of foreign national governments that undertake activities similar to those of a treasury, central bank, or stabilization fund; diplomatic and consular establishments of foreign national governments; and any international or regional organization, including subordinate and affiliate agencies, created by treaty or convention between sovereign states.

Foreign public borrower (“Capital Movements”)—Includes foreign official institutions, as defined above, the corporations and agencies of foreign central governments, including development banks and institutions, and other agencies that are majority-owned by the central government or its departments; and state provincial and local governments of foreign countries and their departments and agencies.

Foreign-targeted issue (PDO-1, -3)—Foreign-targeted issues were notes sold between October 1984 and February 1986 to foreign institutions, foreign branches of U.S. institutions, foreign central banks or monetary authorities, or to international organizations in which the United States held membership. Sold as companion issues, they could be converted to domestic (normal) Treasury notes with the same maturity and interest rates. Interest was paid annually.

Fractional coins (USCC)—Coins minted in denominations of 50, 25, and 10 cents, and minor coins (5 cents and 1 cent).

Government account series (FD-2)—Certain trust fund statutes require the Secretary of the Treasury to apply monies held by these funds to ward the issuance of nonmarketable special securities. These securities are sold directly by Treasury to a specific Government agency, trust fund or account. Their rate is based on an average of market yields on outstanding Treasury obligations, and they may be redeemed at the option of the holder. Roughly 80 per cent of these are issued to five holders: the Federal Old-age and Survivors Insurance Trust Fund; the civil service retirement and disability fund; the Federal Hospital Insurance Trust Fund; the military retirement fund; and the Unemployment Trust Fund.

Interfund transactions (“Federal Fiscal Operations”)—Transactions in which payments are made from one fund group (either Federal funds or trust funds) to a receipt account in an other group.

International Monetary Fund (“Exchange Stabilization Fund,” IFS-1)—(IMF) Established by the United Nations, the IMF promotes international trade, stability of exchange and monetary cooperation. Members are allowed to draw from the fund.

Intrabudgetary transactions (“Federal Fiscal Operations”)—These occur when payment and receipt both occur within the budget, or when payment is made from off-budget Federal entities whose budget authority and outlays are excluded from the budget totals.

Matured non-interest-bearing debt (SBN-1, -2, -3)—The value of outstanding savings bonds and notes that have reached final maturity and no longer earn interest. Includes all Series A-D, F, G, I, J and K bonds. Series E bonds (issued between May 1941 and November 1965), Series EE (issued since January 1980), Series H (issued from June 1952 through December 1979), and savings notes issued between May 1967

and October 1970 have a final maturity of 30 years. Series HH bonds (issued since January 1980) mature after 20 years.

Noncompetitive tenders (“Treasury Financing Operations”)—Offers by an investor to purchase Treasury securities at the price equivalent to the weighted average discount rate or yield of accepted competitive tenders in a Treasury auction. Noncompetitive tenders are always accepted in full.

Off-budget Federal entities (“Federal Fiscal Operations”)—Federally owned and controlled entities whose transactions are excluded from the budget totals under provisions of law. Their receipts, outlays, and surplus or deficit are not included in budget receipts, outlays or deficits. Their budget authority is not included in totals of the budget.

Outlays (“Federal Fiscal Operations”)—Payments on obligations in the form of cash, checks, the issuance of bonds or notes, or the maturing of interest coupons.

Own foreign offices (“Capital Movements”)—Refers to U.S. reporting institutions' parent organizations, branches and/or majority-owned subsidiaries located outside the United States.

Par value—The face value of bonds or notes, including interest.

Quarterly financing (“Treasury Financing Operations”)—Treasury has historically offered packages of several “coupon” securities on the 15th of February, May, August and November, or on the next working day. These issues currently consist of a 3-year note, a 10-year note and a 30-year bond. Treasury sometimes offers additional amounts of outstanding long-term notes or bonds, rather than selling new securities. (See Reopening.)

Receipts (“Federal Fiscal Operations”)—Funds collected from selling land, capital, or services, as well as collections from the public (budget receipts), such as taxes, fines, duties, and fees.

Reopening (PDO-3, -4)—The offer for sale of additional amounts of outstanding issues, rather than an entirely new issue. A reopened issue will always have the same maturity date, CUSIP-number and interest rate as the original issue.

Special drawing rights (“Exchange Stabilization Fund,” IFS-1)—International assets created by IMF that serve to increase international liquidity and provide additional international reserves. SDRs may be purchased and sold among eligible holders through IMF. (See IMF.)

SDR allocations are the counterpart to SDRs issued by IMF based on members' quotas in IMF. Although shown in exchange stabilization fund (ESF) statements as liabilities, they must be redeemed by ESF only in the event of liquidation of, or U.S. withdrawal from, the SDR department of IMF or cancellation of SDRs.

SDR certificates are issued to the Federal Reserve System against SDRs when SDRs are legalized as money. Proceeds of monetization are deposited into an ESF account at the Federal Reserve Bank of New York.

Spot (“Foreign Currency Positions”)—Due for receipt or delivery within 2 work days.

State and local government series (FD-2)—(SLUGs) Special nonmarketable certificates, notes and bonds offered to

Glossary

State and local governments as a means to invest proceeds from their own tax-exempt financing. Interest rates and maturities comply with IRS arbitrage provisions. SLUGs are offered in both time deposit and demand deposit forms. Time deposit certificates have maturities of up to 1 year. Notes mature in 1 to 10 years and bonds mature in more than 10 years. Demand deposit securities are 1-day certificates rolled over with a rate adjustment daily.

Statutory debt limit (FD-6)—By Act of Congress there is a limit, either temporary or permanent, on the amount of public debt that may be outstanding. When this limit is reached, Treasury may not sell new debt issues until Congress increases or extends the limit. For a detailed listing of changes in the limit since 1941, see the Budget of the United States Government. (See debt outstanding subject to limitation.)

STRIPS (PDO-1, -3)—Separate Trading of Registered Interest and Principal Securities. Long-term notes and bonds may be divided into principal and interest-paying components,

which may be transferred and sold in amounts as small as \$1,000. STRIPS are sold at auction at a minimum par amount, varying for each issue. The amount is an arithmetic function of the issue's interest rate.

Treasury bills—The shortest term Federal security (maturity dates normally vary from 3 to 12 months), they are sold at a discount.

Trust fund transaction (“Federal Fiscal Operations”)—An intra-budgetary transaction in which both payments and receipts occur within the same trust fund group.

United States—Includes the 50 States, District of Columbia, Commonwealth of Puerto Rico, American Samoa, Midway Island, Virgin Islands, Wake Island and all other territories and possessions.

U.S. notes (USCC)—Legal tender notes of five different issues: 1862 (\$5-\$1,000 notes); 1862 (\$1-\$2 notes); 1863 (\$5-\$1,000 notes); 1863 (\$1-\$10,000 notes); and 1901 (\$10 notes).
