## Profile of the Economy

[Source: Office of Macroeconomic Analysis]

## Real gross domestic product

April's advance estimate of real gross domestic product (GDP) reported annualized growth of 4.8 percent in the first quarter of 2006, up from the 1.7 percent registered in the fourth quarter of 2005. This is the fastest growth in nearly 3 years-since the third quarter of 2003. In contrast to the previous quarter, there was an increase in consumer spending on motor vehicles and in Federal government spending, and acceleration in equipment and software spending and in exports. These gains were offset slightly by a decline in private inventory investment and by increased imports. The outlook for the rest of the year is for some slowing from the first quarter snap-back to more sustainable growth.

Consumer spending rebounded in the first quarter of 2006, rising at a 5.5 percent annual rate. With its contribution of 3.8 percentage points to GDP growth, this was the key reason for such strength in the quarter. Motor vehicles and parts recovered some of the losses from the prior quarter, while spending on furniture and household equipment accelerated, up an annualized 23 percent. A significant recovery in consumer spending from the fourth quarter had been anticipated.

Real business fixed investment also accelerated with the equipment and software component up 16.4 percent and spending on structures picking up. Overall, business fixed investment contributed 1.5 percentage points to GDP growth. Residential spending posted a modest gain.

The deficit on trade in goods and services widened $\$ 23$ billion in real terms, subtracting 0.8 percentage point from GDP growth, but this was much less than the 1.4 point subtraction in the fourth quarter. Although exports accelerated to 12.1 percent growth, imports rose even faster at a 13.0 percent rate. Imports of petroleum products
declined after a sharp increase in the fourth quarter to make up for domestic production lost because of the hurricanes.

Federal spending recovered, contributing about 0.7 percent to growth. This was largely the result of an upturn in defense spending which fell in the prior quarter due to technical factors.

Partially offsetting some of the stronger readings in the first quarter was a decline in inventory investment, which contributed about -0.5 percentage point to real growth, following a sharp increase in the prior quarter.

## Growth of Real GDP

(Quarterly percent change at annual rate)

## Inflation

Inflation remains moderate, despite pressure from rising energy prices. The consumer price index rose by 3.4 percent during the 12 months ending in March, in line with the increases during all of 2004 and 2005. Energy prices jumped by 17.3 percent during the latest 12 months, while food prices were up 2.6 percent. Core consumer prices (excluding food and energy) grew by just 2.1 percent over the past year, similar to the pace that prevailed for nearly the past 2 years.

Inflation at the producer level slowed somewhat. The producer price index for finished goods increased by 3.5 percent during the 12 months ending in March, down from a 5.4 percent advance over the 12 months ending in December 2005. The deceleration reflected a slower pace of growth in producer prices for finished energy goods. Those prices were up by 15.6 percent during the year ending in March, compared to an increase of nearly 24 percent during the 12 months of 2005. Growth of core finished goods remained stable at 1.7 percent during the past 12 months.

## Consumer Prices

(Percent change from a year earlier)

Labor costs in the private nonfarm business sector rose moderately in the early part of 2006, but productivity growth continued to offset much of the gain. Hourly compensation costs increased at a 5.7 percent annual rate in the first quarter of 2006 but were up a more moderate 3.8 percent over the latest four quarters. With productivity advancing by 2.4 percent during the latest four quarters, labor costs per unit of output rose only 1.4 percent. The employment cost index for total compensation, a fixed-weighted compensation measure, slowed to only a 2.6 percent increase for private industry workers during the 12-month period ending in March 2006, off from the 3.5 percent gain during the 12-months ending in March 2005. Most of the deceleration resulted from a slowing in the rate of increase in benefit costs, which rose 3.4 percent over the 12 months through March 2006 compared to 5.9 percent over the same period a year earlier. Wage increases remained subdued at 2.4 percent over the latest year.

## Producer Prices - Finished Goods

(Percent change from a year earlier)

## Employment and unemployment

April job gains came in somewhat below expectations as nonfarm payroll employment increased by 138,000 . Still, the pattern of employment over the most recent 6 months suggests labor markets are strong heading into the summer. Following the hurricane-depressed readings of September/October 2005, payrolls have been rising by an average of nearly 200,000 per month. Monthly job gains have averaged 173,000 so far in 2006, in line with the performance over the past 2 years. Since the August 2003 employment trough, the economy has generated nearly 5.3 million jobs.

In April, a 36,000 decline in retail payrolls contributed to slower employment growth for the month. This sector has not shown much net employment growth over the most recent 6 months. Other service-sector industries have shown relatively strong payroll expansions. Employment in professional and business services has risen by an average of 40,000 over the 6 months ending in April. Employment in education and health services has posted monthly job gains of 36,000 over that period, while leisure and hospitality has averaged gains of 28,000 per month.

Turning to goods-producing industries, manufacturing payrolls increased by 19,000 in April. Factory payrolls
have risen by a total of 50,000 over the October-April period. Construction employment rose 10,000 in April. Payrolls in this sector have increased by a strong 163,000 over the October-April period.

The unemployment rate held steady at 4.7 percent in April, the lowest level since July 2001. Since reaching a peak of 6.3 percent in mid-2003, the unemployment rate has fallen 1.6 percentage points. The labor force participation rate (the share of the non-institutionalized population over 15 years old in the labor force) remained flat at 66.1 percent for the third straight month in April. This rate had dipped to a 17 -year low of 65.8 percent in early 2005.

The average workweek increased from 33.8 to 33.9 hours in April, the longest workweek in over 3-1/2 years. This contributed to a 0.5 percent rise in aggregate production worker hours. Average hourly earnings rose 0.5 percent in April and were up 3.8 percent from a year earlier, the strongest year-over-year gain since August 2001. Adjusting for inflation, real earnings were flat in March from a year earlier. (Earnings in real terms are not yet available for April.)

## Payroll Employment

(Average monthly change in thousands
from end of quarter to end of quarter)

## Real disposable personal income and consumer spending

Growth of nominal personal income moderated to a 6.2 percent annual rate in the first quarter of 2006 from the rapid 9.4 percent pace recorded in the previous quarter. Wages and salaries, which account for more than half of personal income, rose at a 6.0 percent pace in the first quarter on top of a 4.8 percent gain in the fourth quarter. In addition, personal current transfer receipts climbed by 10.7 percent at an annual rate after falling by 3.4 percent at the end of 2005. The large swing reflected payments for the new Medicare Part D Prescription Drug Plan. The pickup in those components was partly offset by slower growth of proprietors' income and a decline in rental income after rapid gains in the fourth quarter linked to recovery from the effects of the late summer hurricanes. Growth of personal interest income also moderated in the first quarter, rising by 3.9 percent after a 12.7 percent jump in the fourth quarter.

Disposable (after-tax) income adjusted for inflation rose by 3.2 percent at an annual rate in the first quarter following a 6.7 percent gain in the fourth quarter that was due in part to the after-effects of the third-quarter hurricanes. Despite the moderation in income growth, real consumer spending accelerated to a 5.5 percent annual rate from a sluggish 0.9 percent pace in the fourth quarter. The first-quarter increase in consumer outlays was the strongest since the third quarter of 2003 and largely reflected a rebound in motor vehicle purchases after a steep drop at the end of 2005 . With spending rising faster than income, the personal saving rate deteriorated to -0.7 percent in the first quarter from -0.2 percent in the fourth.

## Industrial production and capacity utilization

Industrial production from factories, mines, and utilities increased at a strong 4.5 percent annual rate in the first quarter after rising at a 5.3 percent pace in the fourth quarter. The fourth-quarter gain reflected recovery following the hurricanes and the Boeing strike in September, and followed growth of 1.6 percent and 1.4 percent in the second and third quarters of 2005, respectively. Over the 12 months ending in March, output increased by a modest 3.6 percent.

Manufacturing production, which accounts for about 81 percent of all industrial output, grew 5.4 percent at an annual rate in the first quarter after the 9.1 percent post-hurricane and post-strike surge in the fourth quarter, and a 2.0 percent advance in the third quarter. Output of high-technology goods (computers, communications equipment, and semiconductors) grew by 15.2 percent at an annual rate, compared with the fourth quarter's 27.1 percent jump. Output of communications equipment continued to lead the high-technology surge, its growth rate easing slightly to about 28 percent in the first quarter, compared with gains in excess of 33 percent in the third and fourth quarters of 2005. On a fourth-quarter over fourth-quarter basis, gains in the technology sector have averaged roughly 22 percent over the
past 3 years. Production of motor vehicles and parts eased by 0.7 percent at an annual rate in the first quarter, extending a 2.3 percent decline in the fourth quarter as the effects of "employee pricing" incentives, evident in the 13.5 percent rise in output in the third quarter of 2005, continued to dissipate. Apart from automobiles, manufacturing output rose at a 6.0 percent annual rate in the first quarter of 2006.

Production at utilities, which accounts for roughly 9 percent of total industrial output, dropped by a 16.7 percent annual rate in the first quarter, following a 5.7 percent decline in the fourth quarter. (Weather is usually a factor in this sector, and unseasonable weather in quarters often causes sharp swings in output from one quarter to the next.) Output at mines (the remaining 10 percent of industrial output) surged 20.4 percent in the first quarter following declines of about 15 percent in each of the two prior quarters. Post-hurricane restoration of oil and gas extraction operations in the Gulf region accounted for the first quarter's sharp increase in output.

The capacity utilization rate for the industrial sector rose to 81.0 percent in the first quarter from 80.5 percent in the fourth quarter. Capacity utilization has trended higher over the past 2 years or so, and in the first quarter matched its long-term average of 81.0. Capacity utilization ranged between 82 and 85 percent in the 1994-1999 period. Capacity utilization in the manufacturing sector was 80.4 percent in the first quarter, up from 79.8 percent in the fourth quarter, and now exceeds its long-term average of 79.8 percent by 0.6 percentage point. Utilization in the hightechnology industries slipped to 74.8 percent in the first quarter from just over 75 percent in each of the two preceding quarters, and was still nearly 3.5 percentage points below its long-term average of 78.1 percent.

## Nonfarm productivity and unit labor costs

Productivity rebounded in the first quarter of 2006 from a fourth quarter decline and the longer-term productivity trend also appears strong. Preliminary data for the first quarter showed that nonfarm business productivity (real output per hour worked) increased 3.2 percent at an annual rate as nonfarm output surged 5.8 percent while worker hours rose 2.5 percent. That comes on the heels of a 0.3 percent productivity decline in the fourth quarter.

Productivity has advanced 2.4 percent over the most recent four quarters, somewhat slower than the 3.0 percent gain posted a year earlier. Since the business cycle peak in the first quarter of 2001, productivity has grown at a 3.4 percent annual rate, a notable acceleration from a 2.3 percent annual rate during the preceding 5-year period.

Hourly compensation costs in the nonfarm business sector rose 5.7 percent at an annual rate in the first quarter, up from 2.7 percent in the fourth quarter. These costs were up 3.8 percent over the most recent four quarters.

Unit labor costs, which represent the interaction of productivity and compensation, increased at a 2.5 percent annual rate in the first quarter, down from the fourth quarter's 3.0 percent rise. These costs were up by just 1.4
percent over the latest four quarters, following an increase of 3.4 percent in the year-earlier four-quarter period. Strong labor productivity growth has held down unit labor costs, contributing to lower inflation.

Productivity in the manufacturing sector rose at a 4.2 percent annual rate in the first quarter and was up 4.1 percent over the most recent four quarters. Since 1995, factory productivity has averaged a 4.5 percent pace. Hourly compensation costs in manufacturing advanced at a 2.4 percent annual rate in the first quarter and were up 3.2 percent over the most recent four quarters. Factory unit labor costs declined at a 1.7 percent annual rate in the first quarter and were down 0.9 percent over the past four quarters.

## International transactions

The U.S. current account deficit reached $\$ 900$ billion at an annual rate (or 7.0 percent of GDP) in the fourth quarter of 2005, up from $\$ 742$ billion ( 5.9 percent of GDP) in the third quarter. The increase reflected a widening in the trade deficit, a swing in the balance on income from a surplus to a deficit, and an increase in net outflows for unilateral transfers. Nearly half of the deterioration in the trade balance reflected increased petroleum imports, in part to offset production lost in the wake of the late summer hurricanes. Unusually large hurricane-related claims received by U.S. firms from foreign insurance companies and donations from abroad for hurricane relief caused the deficit on unilateral transfers to drop sharply in the third quarter. In the fourth quarter, these transactions (which include government grants and pension payments as well as private transfers to and from foreigners) rebounded to a more normal level. The current account deficit for the entire year reached a new high of $\$ 805$ billion, equivalent to 6.4 percent of GDP.

The current account is matched by offsetting transactions in the capital and financial accounts, with any differences in the recorded flows listed as a statistical discrepancy. Net capital account transactions, which consist mainly of debt forgiveness and wealth transfers associated with immigration, held steady at $-\$ 1.7$ billion in the fourth quarter, the same as in the third quarter. Capital account transactions for 2005 totaled - $\$ 5.6$ billion, up sharply from - $\$ 1.6$ billion in 2004. The increase was due mainly to debt forgiveness for Iraq.

The financial account measures transactions that alter the foreign financial assets and liabilities of the United States. Net financial inflows (the difference between net foreign purchases of U.S. assets and U.S. purchases of foreign assets) eased to $\$ 940$ billion at an annual rate in the fourth quarter from $\$ 1.0$ trillion in the third quarter as foreign
purchases of assets in the U.S. slowed more than U.S. outlays for assets overseas. Financial inflows for foreignowned assets in the United States amounted to $\$ 1.1$ trillion at the end of 2005 , down from $\$ 1.6$ trillion in the third quarter. Part of the moderation was due to markedly slower growth of U.S. liabilities to foreigners reported by U.S. banks and nonbanks. A pullback in net foreign purchases of U.S. securities other than Treasuries and foreign direct investment also contributed. At the same time, outflows for U.S.-owned assets abroad dipped back to $\$ 172$ billion from $\$ 566$ billion in the third quarter. Among the more notable developments, claims on foreigners reported by U.S. banks fell, and U.S. direct investment overseas posted another net decrease as corporations continued to take advantage of a provision of the American Jobs Creation Act of 2004 that allowed them to repatriate foreign earnings at a reduced tax rate in 2005. For the year as a whole, net financial inflows totaled $\$ 801$ billion, up from $\$ 585$ billion in 2004.

## Exchange rate of the dollar

After reaching a peak in February 2002, the U.S. currency has trended lower. In the 34-month period between the 2002 peak and December 2004, the nominal exchange value of the dollar, as measured by a broad index covering the currencies of 26 important US trading partners, depreciated by 16 percent. The dollar then rose during 2005, gaining about 3.0 percent against this index. During the first 4 months of 2006, however, the U.S. currency once again reversed course and declined 1.8 percent, such that its cumulative drop from the February 2002 peak was 15.2 percent as of April 2006.

The aggregate decline since 2002 mainly reflected dollar weakness against the seven currencies of the United States’ major trading partners, including the euro area countries, Japan, Canada, the United Kingdom, Australia, Sweden, and Switzerland. Between February 2002 and April 2006, the exchange rate of the dollar compared to an index of these currencies fell by nearly 25 percent. Over this period, the dollar was down by 29 percent against the euro and by 12 percent against the yen.

With respect to the 19 currencies of other important trading partners, the dollar generally showed much less movement, actually strengthening somewhat from February 2002 into 2004. Since mid-2004, however, the dollar has depreciated against the index of other important trading partners by about 6 percent. As of April 2006, the exchange value of the dollar was 1.4 percent lower against these currencies than at the February 2002 peak.

## Interest rates

At its most recent meeting in May 2006, the Federal Open Market Committee (FOMC)-the Federal Reserve's policy-making arm-raised the Federal funds target interest rate by 25 basis points to 5.0 percent. It was the sixteenth hike in the current cycle of monetary tightening which began in late June 2004. Before that, the FOMC had held the Federal funds target (the rate that banks and other financial institutions charge each other for overnight loans) constant at 1 percent for 1 year. The funds target in May was at its highest level since March 2001.

In the Treasury market, the 3 -month Treasury bill rate reached 4.8 percent in early May 2006 and has risen by about 375 basis points over the past 2 years. The 10 -year yield remained subdued in the face of tighter monetary policy, but moved significantly higher starting in early 2006. At about 5.1 percent as of early May, the rate was about 135 basis points above its level in early 2004.

## Short-term Interest Rates

(Percent)

Mortgage interest rates have generally followed movements of the 10-year Treasury rate, and fluctuated in a fairly narrow range around a low level over much of the 2003-2005 period, contributing to record home sales in 2005 and to high levels of mortgage refinancings. Mortgage rates have generally been on an upward trend since mid-2005, and have moved decisively higher in the past few months. In early May, the rate for a 30-year fixed rate mortgage reached 6.59 percent, its highest level in nearly 4 years.

Movements in corporate bond yields have also generally followed movements in long-term Treasury yields. As of September 2005, Moody's seasoned Baa yield started moving more definitively above the 6.0 percent mark, rising to 6.75 percent in early May. The spread between the Baa yield and the 10-year Treasury yield, a measure of investor risk appetite, averaged 1.8 percentage points through much of 2005 but by early May narrowed somewhat to an average of about 1.6 percentage points. This spread had widened to as much as 4.0 percentage points in October 2002.

## Long-term Interest Rates

(Percent)

## Housing

The housing market showed mixed results at the start of 2006. Although housing starts surged in the first quarter, sales of single-family homes moderated. Rising mortgage rates contributed to declining affordability, playing a role in the slowdown.

Housing starts shot up by 14.8 percent at an annual rate in the first quarter to a 2.131 million unit pace-a 33-year high. The marked increase reflected a spurt in building activity at the start of the quarter that was due in large part to unseasonably mild temperatures. The pace of groundbreakings subsequently slowed, however. Growth of real residential investment remained roughly stable in the first quarter at a 2.6 percent annual rate compared to 2.8 percent in the fourth quarter.

Sales of new single-family homes plunged by 33.4 percent at an annual rate in the first quarter to a 1.159 million unit pace-the lowest level since late 2003. Resales of existing one-family homes fell by 6.0 percent at an annual rate to a 5.970 million unit pace. The homeownership rate slipped by 0.2 percentage point to 68.6 percent. Although down from a peak of 69.3 percent in the spring of 2004, homeownership remains historically high.

Mortgage interest rates have started to climb but still remain relatively favorable. The average rate on a 30 -year conventional mortgage reached 6.51 percent in April. That was nearly a full percentage point above the low levels recorded in June 2005. The upward trend in mortgage rates coupled with several years of strong home price appreciation has started to take a toll on housing affordability. The National Association of Realtors' housing affordability index fell by 10 percent over the year ended in March, with
recent readings the lowest since the early 1990s, when mortgage rates were hovering around 10 percent.

## Federal budget

In the first 7 months of fiscal year 2006 (from October 2005 through April 2006) receipts of the U.S. Government totaled \$1.353 trillion, outlays year-to-date were \$1.537 trillion, and the deficit amounted to $\$ 184$ billion. That was about $\$ 52.8$ billion less than the deficit in the same period of fiscal year 2005. Receipts were $\$ 136$ billion (11.2 percent) higher through the first 7 months of fiscal year 2006 than in the comparable period of fiscal 2005. The increase in receipts reflected sizable growth in individual income and employment tax receipts, and a surge in corporate income taxes, which rose about $\$ 40$ billion or 30 percent from last year due in part to strong growth in corporate profits. Outlays increased by $\$ 83.3$ billion, or 5.7 percent in the first 7 months of fiscal year 2006, partly reflecting outlays related to recovery efforts in the Gulf Coast region and to increases for Medicare (up 13.7 percent from the previous year), net interest (up 21.5 percent), and defense (with net outlays 5.7 percent higher). Over the 12 months ending in April, net outlays summed to $\$ 2.56$ trillion and receipts totaled $\$ 2.29$ trillion, resulting in a deficit of $\$ 265.7$ billion over that span.

The Administration's Fiscal Year 2007 Budget projected that the Federal budget would show a deficit of $\$ 423$ billion (3.2 percent of GDP) in fiscal year 2006, but because of a strong economy, the deficit in fiscal year 2006 is on track to come in well below that estimate and could be closer to 2.5 percent of GDP. That would be similar to the 2.6 percent recorded in fiscal year 2005. Further reductions are expected by the end of the decade.

## Net national saving and investment

After a brief period of improvement in the mid to late 1990s, net national saving has fallen sharply since 1999 , from 6.7 percent of net national product (NNP) in 2000 to 1.0 percent in 2005 . That was down from 1.3 percent of NNP in 2004 and 1.5 percent in 2003 and well below a recent high of 7.3 percent in 1998. (Net national saving and NNP exclude depreciation to replace worn-out or obsolete equipment, software, and structures used in production.)

Private saving dipped to an average of 3.9 percent of NNP through the four quarters of 2005 from a 5.3 percent average in 2004, and was a shade above the roughly 6decade low of 3.7 percent recorded in 2001. All of the decline in 2005 was in personal saving, which fell from 1.5 percent of NNP in 2004 to -0.3 percent in 2005, the first negative reading in more than 70 years. Corporate saving, in contrast, increased as a percent of NNP in 2005, rising to 4.2 percent that year from 3.8 percent in 2004 and well above its recent low point of 2.0 percent in 2000 . The 2005 corporate saving share was the highest since the late 1960s.

The Federal deficit narrowed to -3.0 percent of NNP in 2005 from a negative 3.9 percent in each of the previous 2 years as the economic expansion boosted tax receipts. Along with a small surplus for state and local governments, total net government deficits amounted to -2.9 percent of NNP in 2005, below the -3.3 percent average from 1980 through 1997 and the -3.7 percent average over the period 2002 to 2004.

Net domestic investment (by government and private industry in structures, equipment, software, and inventory) rose to 8.5 percent of NNP in 2005, slightly above the 8.4 percent in 2004. While still below the 9.8 percent average posted from 1998 through 2000, the current rate of net investment is considerably higher than readings around 6 percent in the early 1990s. A large portion of domestic investment has been financed from abroad. This is reflected in net foreign investment, which swung from a small surplus of 0.3 percent of NNP in 1991 to a deficit of -7.1 percent through the four quarters of 2005.

## Net National Saving

(Saving as a percent of NNP)

## INTRODUCTION: Federal Fiscal Operations

Budget authority usually takes the form of appropriations that allow obligations to be incurred and payments to be made. Reappropriations are Congressional actions that extend the availability of unobligated amounts that have expired or would otherwise expire. These are counted as new budget authority in the fiscal year of the legislation in which the reappropriation act is included, regardless of when the amounts were originally appropriated or when they would otherwise lapse.

Obligations generally are liquidated by the issuance of checks or the disbursement of cash-outlays. Obligations may also be liquidated (and outlays recorded) by the accrual of interest on public issues of Treasury debt securities (including an increase in redemption value of bonds outstanding); or by the issuance of bonds, debentures, notes, monetary credits, or electronic payments.

Refunds of collections generally are treated as reductions of collections, whereas payments for earned-income tax credits in excess of tax liabilities are treated as outlays. Outlays during a fiscal year may be for payment of obligations incurred in prior years or in the same year. Outlays, therefore, flow in part from unexpended balances of prior year budget authority and from budget authority provided for the year in which the money is spent. Total outlays include both budget and off-budget outlays and are stated net of offsetting collections.

Receipts are reported in the tables as either budget receipts or offsetting collections. They are collections from the public, excluding receipts offset against outlays. These, also called governmental receipts, consist mainly of tax receipts (including social insurance taxes), receipts from court fines, certain licenses, and deposits of earnings by the Federal Reserve system. Refunds of receipts are treated as deductions from gross receipts. Total Government receipts are compared with total outlays in calculating the budget surplus or deficit.

Offsetting collections from other Government accounts or the public are of a business-type or market-oriented nature. They are classified as either collections credited to appropriations or fund accounts, or offsetting receipts (i.e., amounts deposited in receipt accounts). The former normally can be used without an appropriation act by Congress. These occur in two instances: (1) when authorized by law, amounts collected for materials or services are treated as reimbursements to appropriations. For accounting purposes, earned reimbursements are also known as revenues. These offsetting collections are netted against gross outlays in determining net outlays from such appropriations; and (2) in the three types of revolving funds (public enterprise, intragovernmental, and trust); offsetting collections are netted against spending, and outlays are reported as the net amount.

Offsetting receipts in receipt accounts cannot be used without appropriation. They are subdivided into three categories: (1) proprietary receipts, or collections from the public, offset against outlays by agency and by function; (2) intragovernmental transactions, or payments into receipt accounts from governmental appropriation or fund accounts. They finance operations within and between Government agencies and are credited with collections from other Government accounts; and (3) offsetting governmental receipts that include foreign cash contributions.

Intrabudgetary transactions are subdivided into three categories: (1) interfund transactions-payments are from one fund group (either Federal funds or trust funds) to a receipt account in the other fund group; (2) Federal intrafund transactions-payments and receipts both occur within the Federal fund group; and (3) trust intrafund transactionspayments and receipts both occur within the trust fund group.

Offsetting receipts are generally deducted from budget authority and outlays by function, subfunction, or agency. There are four types of receipts, however, that are deducted from budget totals as undistributed offsetting receipts. They are: (1) agencies’ payments (including payments by offbudget Federal entities) as employers into employees' retirement funds; (2) interest received by trust funds; (3) rents and royalties on the Outer Continental Shelf lands; and (4) other interest (i.e., that collected on Outer Continental Shelf money in deposit funds when such money is transferred into the budget).

The Government has used the unified budget concept set forth in the "Report of the President's Commission on Budget Concepts" as a foundation for its budgetary analysis and presentation since 1969. The concept calls for the budget to include all of the Government's fiscal transactions with the public. Since 1971, however, various laws have been enacted removing several Federal entities from (or creating them outside of) the budget. Other laws have moved certain off-budget Federal entities onto the budget. Under current law, the off-budget Federal entities consist of the two Social Security trust funds, Federal Old-Age and Survivors Insurance and the Federal Disability Insurance Trust Fund, and the Postal Service.

Although an off-budget Federal entity's receipts, outlays, and surplus or deficit ordinarily are not subject to targets set by the Congressional resolution, the Balanced Budget and Emergency Deficit Control Act of 1985 [commonly known as the Gramm-Rudman-Hollings Act as amended by the Budget Enforcement Act of 1990 (2 United States Code 900922)] included off-budget surplus or deficit in calculating deficit targets under that act and in calculating excess deficit. Partly for this reason, attention has focused on both on- and off-budget receipts, outlays and deficit of the Government.

Tables FFO-1, FFO-2, and FFO-3 are published quarterly and cover 5 years of data, estimates for 2 years, detail for 13 months, and fiscal year-to-date data. They provide a summary of data relating to Federal fiscal operations reported by Federal entities and disbursing officers, and daily reports from the FRBs. They also detail accounting transactions affecting receipts and outlays of the Government and off-budget Federal entities and their related effect on assets and liabilities of the Government. Data are derived from the "Monthly Treasury Statement of Receipts and Outlays of the United States Government."

- Table FFO-1 summarizes the amount of total receipts, outlays, and surplus or deficit, as well as transactions in Federal securities, monetary assets, and balances in Treasury operating cash.
- Table FFO-2 includes on- and off-budget receipts by source. Amounts represent income taxes, social insurance taxes, net contributions for other insurance and retirement, excise taxes, estate and gift taxes, customs duties, and net miscellaneous receipts.
- Table FFO-3 details on- and off-budget outlays by agency.
- Table FFO-4 summarizes on- and off-budget receipts by source and outlays by function as reported to each major fund group classification for the current fiscal year to date and prior fiscal year to date.
- Table FFO-5 summarizes internal revenue receipts by states and by type of tax. Amounts reported are collections made in a fiscal year. They span several tax liability years because they consist of prepayments (estimated tax payments and taxes withheld by employers for individual income and Social Security taxes), payments made with tax returns and subsequent payments made after tax returns are due or are filed (that is, payments with delinquent returns or on delinquent accounts).

Amounts are reported based on the primary filing address provided by each taxpayer or reporting entity. For multistate corporations, the address may reflect only the district where such a corporation reported its taxes from a principal office rather than other districts where income was earned or where individual income and Social Security taxes were withheld. In addition, an individual may reside in one district and work in another.

- Table FFO-6 includes customs collection of duties, taxes, and fees by districts and ports.

# Budget Results and Financing of the U.S. Government and Second-Quarter Receipts by Source 

## Second-Quarter Receipts

The following capsule analysis of budget receipts, by source, for the second quarter of fiscal year 2006 supplements fiscal data reported in the March issue of the "Treasury Bulletin." At the time of that issue's release, not enough data were available to analyze adequately collections for the quarter.

Individual income taxes-Individual income tax receipts, net of refunds, were $\$ 202.2$ billion for the second quarter of fiscal year 2006. This is an increase of $\$ 17.3$ billion over the comparable prior year quarter. Withheld receipts increased by $\$ 17.5$ billion and non-withheld receipts increased by $\$ 13.6$ billion during this period. Refunds increased by $\$ 13.9$ billion over the comparable fiscal year 2005 quarter. There was a decrease of $\$ 1.1$ billion in accounting adjustments between individual income tax receipts and the Social Security and Medicare trust funds over the comparable quarter in fiscal year 2005.

Corporate income taxes-Net corporate income tax receipts were $\$ 49.6$ billion for the second quarter of fiscal year 2006. This is an increase of $\$ 14.1$ billion compared to the prior year second quarter. The $\$ 14.1$ billion change is
comprised of an increase of $\$ 15.1$ billion in estimated and final payments, and an increase of $\$ 1.0$ billion in corporate refunds.

Employment taxes and contributions-Employment taxes and contributions receipts for the second quarter of fiscal year 2006 were $\$ 206.6$ billion, an increase of $\$ 18.4$ billion over the comparable prior year quarter. Receipts to the Federal Old-Age and Survivors Insurance, Federal Disability Insurance, and Federal Hospital Insurance trust funds changed by $\$ 11.8$ billion, $\$ 2.0$ billion, and $\$ 4.5$ billion, respectively. There was a $\$ 3.5$ billion accounting adjustment for prior years employment tax liabilities made in the second quarter of fiscal year 2006, while there was a $\$ 2.4$ billion adjustment in the second quarter of fiscal year 2005.

Unemployment insurance-Unemployment insurance receipts, net of refunds, for the second quarter of fiscal year 2006 were $\$ 6.0$ billion, an increase of $\$ 0.2$ billion over the comparable quarter of fiscal year 2005. Net State taxes deposited in the U.S. Treasury decreased by $\$ 0.1$ billion to $\$ 4.5$ billion. Net Federal Unemployment Tax Act taxes increased by $\$ 0.4$ billion to $\$ 1.6$ billion.

## Budget Results and Financing of the U.S. Government and Second-Quarter Receipts by Source, con.

Contributions for other insurance and retirementContributions for other retirement were $\$ 1.2$ billion for the second quarter of fiscal year 2006. This was a negligible change from the comparable quarter of fiscal year 2005.

Excise taxes-Net excise tax receipts for the second quarter of fiscal year 2006 were $\$ 17.3$ billion, an increase of $\$ 0.3$ billion over the comparable prior year quarter. Total excise tax refunds for the quarter were $\$ 0.5$ billion, an increase of $\$ 0.3$ billion over the comparable prior year quarter.

Estate and gift taxes-Net estate and gift tax receipts were $\$ 7.6$ billion for the second quarter of fiscal year 2006.

These receipts represent an increase of $\$ 1.5$ billion over the same quarter in fiscal year 2005.

Customs duties-Customs duties net of refunds were $\$ 5.7$ billion for the second quarter of fiscal year 2006. This is an increase of $\$ 0.2$ billion over the comparable prior year quarter.

Miscellaneous receipts-Net miscellaneous receipts for the second quarter of fiscal year 2006 were $\$ 11.2$ billion, an increase of $\$ 3.5$ billion over the comparable prior year quarter. This change is due in part to deposits of earnings by Federal Reserve banks increasing by $\$ 3.3$ billion.

## INTRODUCTION: Source and Availability of the Balance in the Account of the U.S. Treasury

The Department of the Treasury's (Treasury's) operating cash is maintained in accounts with the Federal Reserve banks (FRBs) and branches, as well as in tax and loan accounts in other financial institutions. Major information sources include FRBs, Treasury Regional Financial Centers, Internal Revenue Service Centers, Bureau of the Public Debt, and various electronic systems. As the FRB accounts are depleted, funds are called in (withdrawn) from thousands of tax and loan accounts at financial institutions throughout the country.

Under authority of Public Law 95-147 (codified at 31 United States Code 323), Treasury implemented a program on November 2, 1978, to invest a portion of its operating cash in obligations of depositaries maintaining tax and loan accounts. Under the Treasury tax and loan (TT\&L) investment program, depositary financial institutions select the manner in which they will participate. Financial institutions wishing to retain funds deposited into their tax
and loan accounts in interest-bearing obligations can participate. The program permits Treasury to collect funds through financial institutions and to leave the funds in TT\&L depositaries and in the financial communities in which they arise until Treasury needs the funds for its operations. In this way, Treasury is able to neutralize the effect of its fluctuating operations on TT\&L financial institution reserves and on the economy. Likewise, those institutions wishing to remit the funds to the Treasury account at FRBs do so as collector depositaries.

Deposits to tax and loan accounts occur as customers of financial institutions deposit tax payments that the financial institutions use to purchase Government securities. In most cases, this involves a transfer of funds from a customer's account to the tax and loan account in the same financial institution. Also, Treasury can direct the FRBs to invest excess funds in tax and loan accounts directly from the Treasury account at the FRBs.

# TABLE UST-1.-Elements of Change in Federal Reserve and Tax and Loan Note Account Balances 

| Fiscal year or month | Credits and withdrawals |  |  |  |  |

${ }^{1}$ Represents transfers from tax and loan note accounts, proceeds from sales of securities other than Government account series, and taxes.
${ }^{2}$ Represents checks paid, wire transfer payments, drawdowns on letters of credit, redemptions of securities other than Government account series, and investment (transfer) of excess funds out of this account to the tax and loan note accounts.
${ }^{3}$ Taxes eligible for credit consist of those deposited by taxpayers in the tax and loan depositaries
as follows: withheld income taxes beginning March 1948; taxes on employers and employees
under the Federal Insurance Contributions Act beginning January 1950 and under the Railroad Retirement Tax Act beginning July 1951; a number of excise taxes beginning July 1953; estimated corporation income taxes beginning April 1967; all corporation income taxes due on or after March 15, 1968; Federal Unemployment Tax Act taxes beginning April 1970; and individual estimated income taxes beginning October 1988.

## INTRODUCTION: Federal Debt

Treasury securities (i.e., public debt securities) comprise most of the Federal debt, with securities issued by other Federal agencies accounting for the rest. Tables in this section of the "Treasury Bulletin" reflect the total. Further detailed information is published in the "Monthly Statement of the Public Debt of the United States." Likewise, information on agency securities and on investments of Federal Government accounts in Federal securities is published in the "Monthly Treasury Statement of Receipts and Outlays of the United States Government."

Treasury's Financial Management Service (FMS) compiles data in the "Treasury Bulletin" tables FD-2 and FD-6 from the "Monthly Statement of the Public Debt of the United States."

- Table FD-1 summarizes the Federal debt by listing public debt and agency securities held by the public, including the Federal Reserve. It also includes debt held by Federal agencies, largely by the Social Security and other Federal retirement trust funds. The net unamortized premium and discount also are listed by total Federal securities, securities held by Government accounts and securities held by the public. The difference between the outstanding face value of the Federal debt and the net unamortized premium and discount is classified as the accrual amount. (For greater detail on holdings of Federal securities by particular classes of investors, see the ownership tables, OFS-1 and OFS-2.)
- Table FD-2 categorizes by type, that is, marketable and nonmarketable, the total public debt securities outstanding that are held by the public.
- In table FD-3, nonmarketable Treasury securities held by U.S. Government accounts are summarized by issues to particular funds within Government. Many of the funds invest in par value special series nonmarketables at interest rates determined by law. Others invest in marketbased special Treasury securities whose terms mirror those of marketable securities.
- Table FD-4 presents interest-bearing securities issued by Government agencies. Federal agency borrowing
has declined in recent years, in part because the Federal Financing Bank has provided financing to other Federal agencies. (Federal agency borrowing from Treasury is presented in the "Monthly Treasury Statement of Receipts and Outlays of the United States Government.")
- Table FD-5 illustrates the average length of marketable interest-bearing public debt held by private investors and the maturity distribution of that debt.

In March 1971, Congress enacted a limited exception to the amount of bonds with rates greater than 4-1/4 percent that could be held by the public. This permitted Treasury to offer securities maturing in more than 7 years at current market interest rates for the first time since 1965. In March 1976, the definition of a bond was changed to include those securities longer than 10 years to maturity. This exception has expanded since 1971, authorizing Treasury to continue to issue long-term securities. The ceiling on Treasury bonds was repealed on November 10, 1988.

The volume of privately held Treasury marketable securities by maturity class reflects the remaining period to maturity of Treasury bills, notes and bonds. The average length is comprised of an average of remaining periods to maturity, weighted by the amount of each security held by private investors. In other words, computations of average length exclude Government accounts and the FRBs.

- In table FD-6, the debt ceiling is compared with the outstanding debt subject to limitation by law. The other debt category includes Federal debt Congress has designated as being subject to the debt ceiling.
- Table FD-7 details Treasury holdings of securities issued by Government corporations and other agencies. Certain Federal agencies are authorized to borrow money from the Treasury, largely to finance direct loan programs. In addition, agencies such as the Bonneville Power Administration are authorized to borrow from the Treasury to finance capital projects. Treasury, in turn, finances these loans by selling Treasury securities to the public.

## INTRODUCTION: Public Debt Operations

Chapter 31 of Title 31 of the United States Code allows the Secretary of Treasury to borrow money by issuing Treasury securities. The Secretary determines the terms and conditions of issue, conversion, maturity, payment, and interest rate. New issues of Treasury notes mature in 2 to 10 years. Bonds mature in more than 10 years from the issue date. Each outstanding marketable security is listed in the "Monthly Statement of the Public Debt of the United States." The information in this section of the "Treasury Bulletin" pertains only to marketable Treasury securities.

- Table PDO-1 provides a maturity schedule of interest-bearing marketable Treasury notes and bonds. All unmatured Treasury notes and bonds are listed in maturity order, from earliest to latest. A separate breakout is provided for the combined holdings of the Government accounts and Federal Reserve banks (FRBs), so that the "all other investors" category includes all private holdings.
- Table PDO-2 presents the results of weekly auctions of 4-, 13-, and 26-week bills. Treasury bills mature each

Thursday. Issues of 4 - and 13 -week bills are reopenings of 26-week bills. Issues of cash management bills also are presented. High yields on accepted tenders and the dollar value of total bids are presented, with the dollar value of awards made on both competitive and noncompetitive bases.

To encourage the participation of individuals and smaller institutions, Treasury accepts noncompetitive tenders of up to $\$ 5$ million for bills and $\$ 5$ million for notes and bonds in each auction of securities.

- Table PDO-3 lists the results of auctions of marketable securities, other than weekly bills, in chronological order over the past 2 years.

Note: Additional information, including auction allotments by investor class for marketable Treasury coupon and bill securities, is posted on the $7^{\text {th }}$ business day of each month at http://www.treas.gov/offices/domestic-finance/ debt-management/investor_class_auction.shtml.

## TREASURY FINANCING: JANUARY-MARCH

## J A N U ARY

## Cash Management Bills

On December 27, 2005, Treasury announced it would auction $\$ 12,000$ million of 14 -day bills. They were issued January 3, 2006, and matured January 17. The issue was to raise new cash. Treasury auctioned the bills on December 29. Tenders totaled $\$ 25,200$ million; Treasury accepted $\$ 12,000$ million. The high bank discount rate was 4.100 percent.

## Auction of 2-Year Notes

On December 27, 2005, Treasury announced it would auction \$20,000 million of 2-year notes of Series Y-2007. The issue was to refund $\$ 26,009$ million of securities maturing December 31 and to pay down approximately \$6,009 million.

The notes of Series Y-2007 were dated December 31, 2005, and issued on January 3, 2006. They are due December 31, 2007, with interest payable on June 30 and December 31 until maturity. Treasury set an interest rate of 4-3/8 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12 noon eastern standard time (e.s.t.) for noncompetitive tenders and before 1 p.m. e.s.t. for competitive tenders on December 29.

Tenders totaled \$48,320 million; Treasury accepted \$20,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 4.404 percent with the equivalent price of $\$ 99.944505$. Treasury accepted in full all competitive tenders at yields lower than 4.404 percent. Tenders at the high yield were allotted 6.00 percent. The median yield was 4.383 percent, and the low yield was 4.350 percent. Noncompetitive tenders totaled $\$ 920$ million. Competitive tenders accepted from private investors totaled $\$ 19,080$ million. Accrued interest of $\$ 0.36257$ per $\$ 1,000$ must be paid for the period from December 31, 2005, to January 3, 2006.

In addition to the $\$ 20,000$ million of tenders accepted in the auction process, Treasury accepted $\$ 6,667$ million from Federal Reserve Banks (FRBs) for their own accounts. The minimum par amount required for STRIPS of notes of Series $\mathrm{Y}-2007$ is $\$ 1,000$.

## Auction of 5-Year Notes

On January 9, 2006, Treasury announced it would auction $\$ 13,000$ million of 5-year notes of Series D-2011. The issue was to raise new cash.

The notes of Series D-2011 were dated January 15 and issued January 17. They are due January 15, 2011, with interest payable on July 15 and January 15 until maturity. Treasury set an interest rate of $4-1 / 4$ percent after

## TREASURY FINANCING: JANUARY-MARCH, con.

determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12 noon e.s.t. for noncompetitive tenders and before 1:00 p.m. e.s.t. for competitive tenders on January 11. Tenders totaled $\$ 27,260$ million; Treasury accepted $\$ 13,000$ million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 4.370 percent with an equivalent price of $\$ 99.466250$. Treasury accepted in full all competitive tenders at yields lower than 4.370 percent. Tenders at the high yield were allotted 26.13 percent. The median yield was 4.340 percent, and the low yield was 4.290 percent. Noncompetitive tenders totaled $\$ 90$ million. Competitive tenders accepted from private investors totaled $\$ 12,910$ million. Accrued interest of $\$ 0.23481$ per $\$ 1,000$ must be paid for the period from January 15 to January 17. The minimum par amount required for STRIPS of notes of Series D-2011 is $\$ 1,000$.

## Auction of 10-Year Treasury Inflation-Protected Security (TIPS)

On January 9, 2006, Treasury announced it would auction \$9,000 million of 10-year TIPS to raise new cash.

The 10-year TIPS of Series A-2016 were dated January 15 and issued January 17. They are due January 15, 2016, with interest payable on July 15 and January 15 until maturity. Treasury set an interest rate of 2 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the TIPS before 12 noon e.s.t. for noncompetitive tenders and before 1:00 p.m. e.s.t. for competitive tenders on January 12. Tenders totaled $\$ 16,609$ million; Treasury accepted $\$ 9,000$ million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 2.025 percent with an equivalent price of $\$ 99.722833$. Treasury accepted in full all competitive tenders at yields lower than 2.025. Tenders at the high yield were allotted 86.56 percent. The median yield was 2.000 percent, and the low yield was 1.001 percent. Noncompetitive tenders totaled $\$ 85$ million. Competitive tenders accepted from private investors totaled $\$ 8,865$ million. Adjusted accrued interest of $\$ 0.11044$ per $\$ 1,000$ must be paid for the period from January 15 to January 17. Both the unadjusted price of $\$ 99.774716$ and the unadjusted accrued interest of $\$ 0.11050$ were adjusted by an index ratio of 0.99948 for the period from January 15 through January 17. The minimum par amount required for STRIPS of TIPS is $\$ 1,000$.

## Auction of 20-Year TIPS

On January 19, 2006, Treasury announced it would auction $\$ 10,000$ million of 20-year TIPS to raise new cash.

The 20-year TIPS of January 2026 were dated January 15 and issued January 31. They are due January 15, 2026, with interest payable on July 15 and January 15 until maturity. Treasury set an interest rate of 2 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the TIPS before 12 noon e.s.t. for noncompetitive tenders and before 1:00 p.m. e.s.t. for competitive tenders on January 24. Tenders totaled $\$ 14,804$ million; Treasury accepted 10,000 million at the high yield of 2.039 percent with an equivalent price of $\$ 98.949064$. Tenders at the high yield were allotted 3.80 percent. The median yield was 1.955 percent, and the low yield was 1.900 percent. Noncompetitive tenders totaled $\$ 42$ million. Competitive tenders accepted from private investors totaled \$9,908 million. Adjusted accrued interest of $\$ 0.88030$ per $\$ 1,000$ must be paid for the period from January 15 to January 31. Both the unadjusted price of $\$ 99.362412$ and the unadjusted accrued interest of \$0.88398 were adjusted by an index ratio of 0.99584 for the period from January 15 through January 31.

In addition to the $\$ 10,000$ million of tenders accepted in the auction process, Treasury accepted $\$ 1,765$ million from FRBs for their own accounts. The minimum par amount required for STRIPS of TIPS is $\$ 1,000$.

## Auction of 2-Year Notes

On January 23, 2006, Treasury announced it would auction $\$ 22,000$ million of 2-year notes of Series R-2008. The issue was to refund $\$ 25,605$ million of securities maturing January 31 and to pay down approximately \$3,605 million.

The notes of Series R-2008 were dated and issued on January 31. They are due January 31, 2008, with interest payable on July 31 and January 31 until maturity. Treasury set an interest rate of 4-3/8 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12 noon e.s.t. for noncompetitive tenders and before 1 p.m. e.s.t. for competitive tenders on January 25. Tenders totaled \$46,362 million; Treasury accepted $\$ 22,000$ million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 4.427 percent with the equivalent price of $\$ 99.901510$. Treasury accepted in full all competitive tenders at yields lower than 4.427 percent. Tenders at the high yield were allotted 39.51 percent. The median yield was 4.405 percent, and the low yield was 4.350 percent. Noncompetitive tenders totaled $\$ 967$ million.

## TREASURY FINANCING: JANUARY-MARCH, con.

Competitive tenders accepted from private investors totaled \$21,033 million.

In addition to the $\$ 22,000$ million of tenders accepted in the auction process, Treasury accepted $\$ 5,163$ million from Federal Reserve Banks (FRBs) for their own accounts. The minimum par amount required for STRIPS of notes of Series $\mathrm{R}-2008$ is $\$ 1,000$.

## FEBRUARY

## February Quarterly Financing

On February 1, 2006, Treasury announced it would auction $\$ 21,000$ million of 3 -year notes of Series R-2009, $\$ 13,000$ million of 10 -year notes of Series B-2016, and $\$ 14,000$ million of 30 -year bonds of February 2036 to refund $\$ 17,281$ million of Treasury securities maturing on February 15 and to raise new cash of approximately \$30,719 million.

The 3-year notes of Series R-2009 were dated and issued February 15. They are due February 15, 2009, with interest payable on August 15 and February 15 until maturity. Treasury set an interest rate of $4-1 / 2$ percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12 noon e.s.t. for noncompetitive tenders and before 1 p.m. e.s.t. for competitive tenders on February 7. Tenders totaled \$42,635 million; Treasury accepted $\$ 21,000$ million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 4.595 percent with an equivalent price of $\$ 99.736583$. Treasury accepted in full all competitive tenders at yields lower than 4.595 percent. Tenders at the high yield were allotted 44.01 percent. The median yield was 4.571 percent, and the low yield was 4.538 percent. Noncompetitive tenders totaled $\$ 182$ million. Competitive tenders accepted from private investors totaled \$20,718 million.

In addition to the $\$ 21,000$ million of tenders accepted in the auction process, Treasury accepted $\$ 1,307$ million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series R-2009 is $\$ 1,000$.

The 10-year notes of Series B-2016 were dated and issued February 15. They are due February 15, 2016, with interest payable on August 15 and February 15 until maturity. Treasury set an interest rate of $4-1 / 2$ percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12 noon e.s.t. for noncompetitive tenders and before 1 p.m. e.s.t. for competitive tenders on February 8. Tenders totaled \$30,144 million; Treasury accepted $\$ 13,000$ million. All
noncompetitive and successful competitive bidders were allotted securities at the high yield of 4.540 percent with an equivalent price of $\$ 99.681335$. Treasury accepted in full all competitive tenders at yields lower than 4.540 percent. Tenders at the high yield were allotted 98.55 percent. The median yield was 4.510 percent, and the low yield was 4.470 percent. Noncompetitive tenders totaled $\$ 54$ million. Competitive tenders accepted from private investors totaled \$12,846 million.

In addition to the $\$ 13,000$ million of tenders accepted in the auction process, Treasury accepted $\$ 841$ million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series B-2016 is $\$ 1,000$.

The 30-year bonds of February 2036 were dated and issued February 15. They are due February 15, 2036, with interest payable on August 15 and February 15 until maturity. Treasury set an interest rate of $4-1 / 2$ percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12 noon e.s.t. for noncompetitive tenders and before 1 p.m. e.s.t. for competitive tenders on February 9. Tenders totaled \$28,720 million; Treasury accepted $\$ 14,000$ million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 4.530 percent with an equivalent price of $\$ 99.510492$. Treasury accepted in full all competitive tenders at yields lower than 4.530 percent. Tenders at the high yield were allotted 51.17 percent. The median yield was 4.490 percent, and the low yield was 4.475 percent. Noncompetitive tenders totaled $\$ 39$ million. Competitive tenders accepted from private investors totaled \$13,861 million.

In addition to the $\$ 14,000$ million of tenders accepted in the auction process, Treasury accepted $\$ 841$ million from FRBs for their own accounts. The minimum par amount required for STRIPS of bonds of February 2036 is $\$ 1,000$.

## Auction of 2-Year Notes

On February 16, 2006, Treasury announced it would auction $\$ 22,000$ million of 2-year notes. The issue was to refund $\$ 26,002$ million of securities maturing February 28 and to raise new cash of approximately \$9,998 million.

The notes of Series S-2008 were dated and issued February 28. They are due February 29, 2008, with interest payable on the last calendar day of August and February until maturity. Treasury set an interest rate of $4-5 / 8$ percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon e.s.t. for noncompetitive tenders and before 1:00 p.m. e.s.t. for competitive tenders on February 22. Tenders totaled

## TREASURY FINANCING: JANUARY-MARCH, con.

$\$ 49,265$ million; Treasury accepted $\$ 22,000$ million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 4.689 percent with an equivalent price of $\$ 99.879165$. Treasury accepted in full all competitive tenders at yields lower than 4.689 percent. Tenders at the high yield were allotted 81.01 percent. The median yield was 4.660 percent, and the low yield was 4.620 percent. Noncompetitive tenders totaled $\$ 1,023$ million. Competitive tenders accepted from private investors totaled \$20,977 million.

In addition to the $\$ 22,000$ million of tenders accepted in the auction process, Treasury accepted $\$ 4,500$ million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series S-2008 is $\$ 1,000$.

## Auction of 5-Year Notes

On February 16, 2006, Treasury announced it would auction $\$ 14,000$ million of 5 -year notes of Series E-2011. The issue was to refund $\$ 26,002$ million of securities maturing February 28 and to raise new cash of approximately $\$ 9,998$ million. The notes of Series E-2011 were dated and issued February 28. They are due February 28, 2011, with interest payable on the last calendar day of August and February until maturity. Treasury set an interest rate of 4-1/2 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12 noon e.s.t. for noncompetitive tenders and before 1:00 p.m. e.s.t. for competitive tenders on February 23. Tenders totaled $\$ 30,502$ million; Treasury accepted $\$ 14,000$ million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 4.622 percent with an equivalent price of $\$ 99.460872$. Treasury accepted in full all competitive tenders at yields lower than 4.622 percent. Tenders at the high yield were allotted 56.17 percent. The median yield was 4.594 percent, and the low yield was 4.550 percent. Noncompetitive tenders totaled $\$ 147$ million. Competitive tenders accepted from private investors totaled \$13,853 million.

In addition to the $\$ 14,000$ million of tenders accepted in the auction process, Treasury accepted $\$ 3,500$ million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series E-2011 is $\$ 1,000$.

## MARCH

## Cash Management Bills

On February 28, 2006, Treasury announced it would auction $\$ 25,000$ million of 12 -day bills. They were issued March 3, and matured March 15. The issue was to raise new cash. Treasury auctioned the bills on March 1. Tenders
totaled $\$ 64,333$ million; Treasury accepted 25,000 million. The high bank discount rate was 4.445 percent.

On March 6, Treasury announced it would auction $\$ 7,000$ million of 6-day bills. They were issued March 8 and matured March 14. The issue was to raise new cash. Treasury auctioned the bills on March 7. Tenders totaled $\$ 30,051$ million; Treasury accepted $\$ 7,000$ million. The high bank discount rate was 4.380 percent.

On March 13, Treasury announced it would auction $\$ 4,000$ million of 1-day bills. They were issued March 14 and matured March 15. The issue was to raise new cash. Treasury auctioned the bills on March 14. Tenders totaled $\$ 18,006$ million; Treasury accepted $\$ 4,000$ million. The high bank discount rate was 4.410 percent.

## Auction of 9-Year 11-Month 4-1/2 Percent Notes

On March 6, 2006, Treasury announced it would auction $\$ 8,000$ million of 9 -year 11-month $4-1 / 2$ percent notes of Series B-2016. The issue was to raise new cash.

The notes of Series B-2016 were dated February 15 and issued March 15. They are due February 15, 2016, with interest payable on August 15 and February 15 until maturity.

Treasury received tenders for the notes before 12 noon e.s.t. for noncompetitive tenders and before 1:00 p.m. e.s.t. for competitive tenders on March 9. Tenders totaled \$22,947 million; Treasury accepted $\$ 8,000$ million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 4.760 percent with an equivalent price of $\$ 97.955698$. Treasury accepted in full all competitive tenders at yields lower than 4.760 percent. Tenders at the high yield were allotted 4.91 percent. The median yield was 4.747 percent, and the low yield was 4.710 percent. Noncompetitive tenders totaled $\$ 20$ million. Competitive tenders accepted from private investors totaled $\$ 7,980$ million. Accrued interest of $\$ 3.48066$ per $\$ 1,000$ must be paid for the period from February 15 to March 15. The minimum par amount required for STRIPS of notes of Series B-2016 is $\$ 1,000$.

## Auction of 2-Year Notes

On March 23, 2006, Treasury announced it would auction $\$ 22,000$ million of 2-year notes of Series T-2008. The issue was to refund $\$ 26,005$ million of securities maturing March 31 and to raise new cash of approximately \$9,995 million.

The notes of Series T-2008 were dated and issued March 31. They are due March 31, 2008, with interest payable on September 30 and March 31 until maturity. Treasury set an interest rate of 4-5/8 percent after determining which tenders were accepted on a yield auction basis.

## TREASURY FINANCING: JANUARY-MARCH, con.

Treasury received tenders for the notes before 12 noon e.s.t. for noncompetitive tenders and before 1:00 p.m. e.s.t. for competitive tenders on March 27. Tenders totaled $\$ 46,703$ million; Treasury accepted $\$ 22,000$ million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 4.730 percent with an equivalent price of $\$ 99.801852$. Treasury accepted in full all competitive tenders at yields lower than 4.730 percent. Tenders at the high yield were allotted 12.15 percent. The median yield was 4.700 percent, and the low yield was 4.000 percent. Noncompetitive tenders totaled $\$ 987$ million. Competitive tenders accepted from private investors totaled \$21,013 million.

In addition to the $\$ 22,000$ million of tenders accepted in the auction process, Treasury accepted $\$ 4,834$ million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series T-2008 is $\$ 1,000$.

## Auction of 5-Year Notes

On March 23, 2006, Treasury announced it would auction $\$ 14,000$ million of 5-year notes of Series F-2011. The issue was to refund $\$ 26,005$ million of securities maturing March 31 and to raise new cash of approximately \$9,995 million.

The notes of Series F-2011 were dated and issued March 31. They are due March 31, 2011, with interest payable on September 30 and March 31 until maturity. Treasury set an interest rate of 4-3/4 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12 noon e.s.t. for noncompetitive tenders and before 1:00 p.m. e.s.t. for competitive tenders on March 29. Tenders totaled $\$ 31,555$ million; Treasury accepted $\$ 14,000$ million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 4.785 percent with an equivalent price of $\$ 99.845985$. Treasury accepted in full all competitive tenders at yields lower than 4.785 percent. Tenders at the high yield were allotted 18.09 percent. The median yield was 4.761 percent, and the low yield was 4.707 percent. Noncompetitive tenders totaled $\$ 156$ million. Competitive tenders accepted from private investors totaled \$13,844 million.

In addition to the $\$ 14,000$ million of tenders accepted in the auction process, Treasury accepted $\$ 3,500$ million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series F-2011 is $\$ 1,000$.

# TABLE PDO-3.—Offerings of Marketable Securities Other than Regular Weekly Treasury Bills 

[In millions of dollars. Source: Bureau of the Public Debt, Office of Financing]

## INTRODUCTION: Savings Bonds and Notes

Series EE bonds, on sale since July 1, 1980, and series I bonds, on sale since September 1, 1998, are the savings bonds currently being sold. As of September 1, 2004, investors are no longer able to reinvest H and HH bonds or exchange E and EE bonds for HH bonds. Series A-D were sold from March 1, 1935, through April 30, 1941. Series E was on sale from May 1, 1941, through December 31, 1979 (through June 1980 to payroll savers only). Series F and G were sold from May 1, 1941, through April 30, 1952. Series H was sold from June 1, 1952, through December 31, 1979. Series HH bonds were sold for cash from January 1, 1980,
through October 31, 1982. Series J and K were sold from May 1, 1952, through April 30, 1957. U.S. savings notes were on sale May 1, 1967, through June 30, 1970. The notes were eligible for purchase by individuals with the simultaneous purchase of series E savings bonds.

The principal terms and conditions for purchase and redemption and information on investment yields of savings notes appear in the "Treasury Bulletins" of March 1967 and June 1968; and in the Annual Report of the Secretary of the Treasury for fiscal year 1974.

## INTRODUCTION: Ownership of Federal Securities

Federal securities presented in the following tables are public debt securities such as savings bonds, bills, notes, and bonds that the Treasury issues. The tables also detail debt issued by other Federal agencies under special financing authorities. [See the Federal debt (FD) tables for a more complete description of the Federal debt.]

Effective January 1, 2001, Treasury's Bureau of the Public Debt revised formats, titles, and column headings in the "Monthly Statement of the Public Debt of the United States," Table I: Summary of Treasury Securities Outstanding and Table II: Statutory Debt Limit. These changes should reduce confusion and bring the publication more in line with the public's use of terms.

Treasury's Financial Management Service (FMS) compiles data in the "Treasury Bulletin" table OFS-1 from the "Monthly Statement of the Public Debt of the United States." Effective June 2001, FMS revised procedures and categories in this table to agree with the Bureau of the Public Debt's publication changes.

- Table OFS-1 presents Treasury marketable and nonmarketable securities and debt issued by other Federal agencies held by Government accounts, the FRBs, and private investors. Social Security and Federal retirement trust fund investments comprise much of the Government account holdings.

The FRBs acquire Treasury securities in the market as a means of executing monetary policy.

- Table OFS-2 presents the estimated ownership of U.S. Treasury securities. Information is primarily obtained from the Federal Reserve Board of Governors Flow of Funds data, Table L209. State, local, and foreign holdings include special issues of nonmarketable securities to municipal entities and foreign official accounts. They also include municipal, foreign official, and private holdings of marketable Treasury securities. (See footnotes to the table for description of investor categories.)

TABLE OFS-1.—Distribution of Federal Securities by Class of Investors and Type of Issues

| End of fiscal year or month | Total Federal securities outstanding <br> (1) | Public debt securities |  |  |  |  |

[^15]${ }^{7}$ Includes money market mutual funds, mutual funds, and closed-end investment companies.
${ }^{8}$ Source: Federal Reserve Board Treasury International Capital Survey. Includes nonmarketable foreign series, Treasury securities, and Treasury deposit funds. Excludes Treasury securities held under repurchase agreements in custody accounts at the Federal Reserve Bank of New York. Estimates reflect the 1989 benchmark to 1994, the 1994 benchmark to September 2001, the March 2000 benchmark to September 2002, the June 2002 benchmark to December 2003, the June 2003 benchmark to March 2004, the June 2004 benchmark to March 2005, and the June 2005 benchmark to February 2006.
${ }^{9}$ Includes individuals, Government-sponsored enterprises, brokers and dealers, bank personal trusts and estates, corporate and non-corporate businesses, and other investors.

## INTRODUCTION: Market Yields

The table in this section presents yields on Treasury marketable securities for maturities ranging from 1 month to 30 years.

Table MY-1 lists Treasury market bid yields at constant maturities for bills, notes, and bonds. These Constant Maturity Treasury rates (CMTs) are interpolated from the Treasury yield curve and published daily at Treasury's Domestic Finance web site, www.ustreas.gov/offices/domestic-finance/debt-management/interest-rate/yield.shtml. The yield curve is fitted daily using a hermite cubic spline. For inputs, Treasury primarily uses the bid yields of the on-therun securities (most recently auctioned Treasury securities in all maturity tranches that Treasury currently auctions) as quoted in the secondary bond market as of approximately 3:30 p.m. each trading day. CMT yields are based on semiannual interest payments and are read at constant maturity points to develop a consistent data series.

The quotations used by Treasury to calculate the bid yields and fit the yield curve are obtained by the Federal Reserve Bank of New York. The Board of Governors of the Federal Reserve System also publishes the Treasury constant maturity data series in its weekly Statistical Release H.15.

On July 31, 2001, Treasury expanded its constant maturity index to include a 1-month constant maturity yield. On February 18, 2002, Treasury discontinued the 30 -year constant maturity yield and replaced it in the MY-1 with a 20 -year maturity yield. Historical data for the 20-year maturity is available from the Board of Governors' Statistical Release H.15. On February 9, 2006, Treasury reintroduced the 30 -year yield and is now publishing both the 20- and 30-year constant maturity rates.

Prior to January 2003, this section also included data on long-term Treasury, corporate and municipal yields (Table MY-2 and Chart MY-B). Effective January 2003, Table MY-2 and Chart MY-B were discontinued.

## INTRODUCTION: U.S. Currency and Coin Outstanding and in Circulation

The U.S. Currency and Coin Outstanding and in Circulation (USCC) statement informs the public of the total face value of currency and coin used as a medium of exchange that is in circulation at the end of a given accounting month. The statement defines the total amount of currency and coin outstanding and the portion deemed to be in circulation. It includes some old and current rare issues that do not circulate or that may do so to a limited extent. Treasury includes them in the statement because the issues were originally intended for general circulation.

The USCC statement provides a description of the various issues of paper money. It also gives an estimated average of currency and coin held by each individual, using estimates of population from the Bureau of the Census. USCC information has been published by Treasury since 1888, and was published separately until 1983, when it was incorporated into the "Treasury Bulletin." The USCC comes from monthly reports compiled by Treasury offices, U.S. Mint offices, the Federal Reserve banks (FRBs), and the Federal Reserve Board.

## INTRODUCTION: International Financial Statistics

The tables in this section provide statistics on U.S. Government reserve assets, liabilities to foreigners, and its international financial position. All monetary figures are in dollars or dollar equivalents.

- Table IFS-1 shows reserve assets of the United States, including its gold stock, special drawing rights held in the Special Drawing Account in the International Monetary Fund (IMF), holdings of convertible foreign currencies and reserve position in the IMF.
- Table IFS-2 contains statistics on liabilities to foreign official institutions, and selected liabilities to all other foreigners, which are used in the U.S. balance of payments statistics.
- Table IFS-3 shows nonmarketable bonds and notes that the Treasury issues to official institutions and other residents of foreign countries.

${ }^{1}$ Includes Bank for International Settlements.
${ }^{2}$ Derived by applying reported transactions to benchmark data.
${ }^{3}$ Includes current value of zero-coupon Treasury bond issues to foreign governments as follows: Mexico, beginning March 1990, 30-year maturity issue; Venezuela, beginning December 1990, 30-year maturity issue; Argentina, beginning April 1993, 30-year maturity issue. Also, see footnotes to table IFS-3.
${ }_{4}$ Includes debt securities of U.S. Government corporations, federally-sponsored agencies and private corporations.
${ }^{5}$ Includes liabilities payable in dollars to foreign banks and liabilities payable in foreign currencies to foreign banks and to "other foreigners."
${ }^{6}$ Includes marketable U.S. Government bonds and notes held by foreign banks.
${ }^{7}$ Principally the International Bank for Reconstruction and Development, the Inter-
American Development Bank, and the Asian Development Bank.
${ }^{8}$ Data on the two lines shown for this date reflect different benchmark bases for foreigners' holdings of selected U.S. long-term securities. Figures on the first line are comparable to those for earlier dates; figures on the second line are based in part on benchmark surveys as of end-March 2000, end-June 2002, end-June 2003, end-June 2004, and end-June 2005, respectively, and are comparable to those shown for the following dates.

Note.-Table is based on Treasury data and on data reported to the Treasury by banks, other depository institutions and brokers in the United States. Data generally correspond to statistics following in this section and in the "Capital Movements" section. Table excludes International Monetary Fund "holdings of dollars" and holdings of U.S. Treasury letters of credit and nonnegotiable noninterest-bearing special U.S. notes held by international and regional organizations.

## INTRODUCTION: Capital Movements

## Background

Data relating to U.S. international transactions in financial instruments and to other portfolio capital movements between the United States and foreign countries have been collected in some form since 1935. This information is necessary for compiling the U.S. balance of payments accounts, for calculating the U.S. international investment position, and for use in formulating U.S. international financial and monetary policies.

From the beginning, reporting under the Treasury data collection program has been mandatory. Under the current Treasury International Capital (TIC) reporting system, an assortment of monthly, quarterly, and semiannual reports are filed with district Federal Reserve banks by commercial banks, securities dealers, other financial institutions, and nonbanking enterprises in the United States. These data are centrally processed and maintained at the Federal Reserve Bank of New York, which, along with the district banks, acts as fiscal agent for Treasury. Beginning in late 1998, the Federal Reserve Board also undertakes services on behalf of Treasury in support of the TIC data collection system. The TIC reports of individual respondents are treated as confidential, and access to the respondent level data and to some sensitive data aggregates is strictly limited to specific staff of Treasury and the Federal Reserve System.

Data derived from Treasury reports are published in the Capital Movements section of this quarterly Treasury Bulletin and are posted monthly on the TIC website, http://www.ustreas.gov/tic. (See NOTE at the end of the INTRODUCTION text for additional website information.) TIC data aggregates are also published in the Federal Reserve Bulletin and are used in the U.S. international transactions and investment position compilations published by the Department of Commerce in the Survey of Current Business.

Forms and instructions are developed with the cooperation of other Government agencies and the Federal Reserve System and in consultation with representatives of banks, securities firms, and nonbanking enterprises. The most recent revisions to selected reporting forms and instructions were effective February 28, 2003. The major changes are outlined under "Description of statistics" below. Copies of the reporting forms and instructions may be obtained from the Office of Program Services, Office of the Assistant Secretary for International Affairs, Treasury, Washington, D.C. 20220; the International Finance Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551; or district FRBs. Reporting forms and instructions also may be downloaded from the TIC website.

## Basic definitions

The term "foreigner" as used in TIC reporting covers all institutions and individuals resident outside the United

States, including U.S. citizens domiciled abroad; the foreign branches, subsidiaries and offices of U.S. banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located. The term "foreigner" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners.

In general, information is reported opposite the country or geographical area where the foreigner is located, as shown on records of reporting institutions. This information may not always reflect the ultimate ownership of assets. Reporting institutions are not required to go beyond addresses shown on their records and may not be aware of the actual country of domicile of the ultimate beneficiary.

Transactions with branches or agencies of foreign official institutions, wherever located, are reported opposite the country that has sovereignty over the institutions. Transactions with international and regional organizations are not reported opposite any single country, but are accounted for in regional groupings of such organizations. The only exception is information pertaining to the Bank for International Settlements, which is reported opposite "Other Europe." For purposes of publication only, information on the European Central Bank also is included in "Other Europe."
"Short-term" refers to obligations payable on demand or having an original maturity of one year or less. "Long-term" refers to obligations having an original maturity of more than one year and includes securities having no maturity.

## Reporting coverage

TIC reports are required from banks and other depository institutions, bank/financial holding companies (BHCs/FHCs), securities brokers and dealers, and nonbanking concerns in the United States, including the branches, agencies, subsidiaries, and other affiliates in the United States of foreign banking and nonbanking firms. Institutions with total reportable liabilities, claims, or securities transactions below specified reporting thresholds are exempt from reporting.

Beginning in February 2003, substantial revisions to the coverage and formats of the TIC B-series and C-series forms were introduced. The reasons for the changes were to comply with new and expanded international standards for reporting data on portfolio investment; to reduce reporting burden; to clarify reporting concepts and instructions; and to improve the quality of the series by closing known gaps in the data. Notices of these changes and requests for public comments on them were published in the Federal Register last year and some modifications were made in response to the comments received. A detailed outline of the changes affecting each form may be accessed on the TIC website.

Banks, other depository institutions, and securities brokers and dealers file monthly B-series reports covering their dollar liabilities to, and dollar claims on foreigners in a number of countries. Twice a year, June 30 and December 31, they also report the same liabilities and claims items attributed to foreigners in countries not shown separately on the monthly reports. Quarterly reports are filed for liabilities and claims denominated in foreign currencies and for claims on foreigners held for respondents’ domestic customers. All positions are exclusive of long-term securities. Beginning January 2001, the exemption level applicable to the banking reports was raised from $\$ 15$ million to $\$ 50$ million. This exemption level is also subject to the provision that reportable amounts for any one country do not exceed $\$ 25$ million.

Banks and other depository institutions, securities brokers and dealers, and other entities report their transactions with foreigners by country in long-term securities on monthly Form S. Respondents must report securities transactions with foreigners if their aggregate purchases or their aggregate sales amount to at least \$50 million during the covered month.

Quarterly reports are filed by exporters, importers, industrial and commercial concerns, financial institutions (other than banks, other depository institutions, and securities firms), and other nonbanking enterprises on their liabilities and claims positions with foreigners. Except as noted below under "Description of statistics," the reportable liabilities and claims positions are with unaffiliated foreigners. Separate reports are filed for financial balances and for commercial balances. Effective for reports filed as of March 31, 2003, the threshold applicable to Form CQ-1 for reporting financial liabilities to, and claims on, foreigners is $\$ 50$ million, up from $\$ 10$ million. At the same time, the reporting threshold for Form CQ-2, which covers commercial liabilities and claims positions with foreigners, was raised from $\$ 10$ million to $\$ 25$ million.

The data in these tables do not cover all types of reported capital movements between the United States and other countries. Except as noted in Section IV in "Description of statistics" below, the principal exclusions are the intercompany capital transactions of nonbanking business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies (own foreign offices) and capital transactions of the U.S. Government. Consolidated data on all types of international capital transactions are published by the Department of Commerce in its regular reports on the U.S. balance of payments.

## Description of statistics

Data collected on the TIC forms are published in the "Capital Movements" tables in five sections. Each section contains all the data relevant to the same statistical series, with tables showing time series by type and country, and detailed breakdowns of the latest available data.

- Section I covers liabilities to foreigners reported by banks, other depository institutions, and securities brokers and dealers in the United States. BHCs/FHCs also report for all domestic nonbank, non-securities firm affiliates, other than their insurance affiliates, which report separately on the C-series forms. Dollar-denominated liabilities are reported monthly on Forms BL-1 and BL-2. Liabilities denominated in foreign currencies are reported quarterly on Form BQ-2. Respondents report certain of their own liabilities and a wide range of their custody liabilities to foreigners. Effective with reports filed as of February 28, 2003, coverage was broadened to cover the positions of U.S. broker-dealer respondents with their affiliated foreign offices. (Depository institutions and BHCs/FHCs already reported such positions.) The scope of the reports was also extended to include cross-border brokerage balances as well as offshore sweep accounts and loans to U.S. residents in "managed" foreign offices of U.S. reporting institutions. Additionally, in a new Part 2, Form BQ-2 was expanded to include the foreign currency-denominated liabilities held by respondents for their domestic customers. Further, banks’ own positions have been defined to be consistent with regulatory reports such as the FR 2950/2951 to include all amounts in the respondent's "due to/due from" accounts, unless in an instrument that is specifically excluded. Finally, the columns for demand deposits and non-transactions accounts are now combined, as are short-term U.S. agency securities and other negotiable and readily transferable instruments.
- Section II presents claims on foreigners reported by banks, other depository institutions, and securities brokers and dealers in the United States. BHCs/FHCs also report for their domestic nonbank and non-securities firm affiliates, other than their insurance affiliates, which report separately on the C-series forms. Data on respondents' own dollar claims are collected monthly on Form BC. Information on claims held for domestic customers as well as on claims denominated in foreign currencies is collected on a quarterly basis only on Forms BQ-1 and BQ-2, respectively. Effective with reports filed as of February 28, 2003, reporting coverage was expanded as outlined in Section I. Additionally, columns were added for separate reporting of negotiable CDs and other short-term negotiable instruments issued by foreigners. Further, the foreigner category, "foreign official institutions," replaced the former, broader category, "foreign public borrowers," for consistency with the liabilities reporting on this sector.
- Section III contains supplementary data on dollar liabilities to, and dollar claims on, countries not listed separately on the monthly reports submitted by banks, other depository institutions, and securities brokers and dealers in the United States. The supplementary reports are filed semiannually as of the end of June and December.
- Section IV shows the liabilities to, and claims on, unaffiliated foreigners of exporters, importers, industrial and commercial concerns, financial institutions (other than
banks, other depository institutions, and securities brokers and dealers), and other nonbanking enterprises in the United States. Data exclude claims on foreigners held by banks in the United States.

Historically, the information does not include any accounts of nonbanking enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. These are reported by business enterprises to Commerce on its direct investment forms. However, effective with reports filed as of March 31, 2003, a number of changes were introduced in the coverage and reporting formats of nonbanking forms. A major revision is the addition of Section B to Form CQ-1 to capture foreign affiliate positions (including those with affiliates of the respondent's parent) of insurance underwriting subsidiaries and financial intermediaries. Insurance underwriting subsidiaries of BHCs/FHCs now include positions vis-à-vis all foreign-resident affiliates. From end-March 2003 forward, financial intermediaries are to report positions vis-à-vis all foreign-resident affiliated financial intermediaries.

- Section V contains information on transactions with foreigners in long-term domestic and foreign securities as reported by banks, securities brokers and dealers, and other entities in the United States. The data cover transactions executed in the United States for the accounts of foreigners and transactions executed abroad for the accounts of reporting institutions and their domestic customers. This includes transactions in newly-issued securities as well as transactions in, and redemptions of, outstanding issues.

However, the data do not include nonmarketable Treasury bonds and notes shown in table IFS-3.

The geographical allocation of the transactions data indicates the country of location of the foreign buyers and sellers who deal directly with reporting institutions in the United States. The data do not necessarily indicate the country of beneficial owner or issuer, or the currency of denomination of securities. For instance, a U.S. purchaser's order for Japanese securities may be placed directly with an intermediary in London. In this instance, the transaction for Form S reporting purposes would be recorded opposite the United Kingdom and not opposite Japan. Similarly, purchases and sales of U.S. securities for the account of an Italian resident may be placed, for example, in the Swiss market. In that case, the trades would be reported opposite Switzerland and not opposite Italy.

NOTE: Current and historical data on United States transactions with foreigners in long-term securities and on the gross foreign liabilities and claims reported by banks in the United States are available on the TIC website: http://www.ustreas.gov/tic. These data may be downloaded as separate time series for each country or geographical area regularly shown in the capital movements tables. Also available on this website are other series, including a table on "Major Foreign Holders of Treasury Securities," showing estimated total holdings of U.S. Treasury bills, bonds and notes for current and recent periods. All data series on the TIC website are updated monthly.

${ }^{2}$ Since December 1992, data for all other republics of the former U.S.S.R. included in
"Other Europe."
${ }^{3}$ On February 4, 2003, Yugoslavia changed its name to Serbia and Montenegro. Data for other entities of the former Yugoslavia recognized as independent states by the United
States are reported under "Other Europe" as follows: Beginning in December 1992 for
Bosnia and Herzegovina, Croatia, and Slovenia; and beginning in June 1994 for the former
Yugoslav Republic of Macedonia.
${ }^{4}$ Before January 2001, data included in United Kingdom.
${ }^{5}$ Before January 2001, "Other Latin America" and "Other Caribbean" were reported as combined "Other Latin America and Caribbean."
${ }_{7}^{6}$ Beginning January 2001, Cayman Islands replaced British West Indies in the data series.
${ }^{7}$ Includes Bahrain, Iran, Iraq, Kuwait, Oman, Qatar, Saudi Arabia, and United Arab
Emirates (Trucial States).
${ }_{9}^{8}$ Includes Algeria, Gabon, Libya, and Nigeria.
${ }_{10}{ }^{9}$ Before January 2001, data included in "All other."
${ }^{10}$ Before January 2001, included in "Latin American regional."

[^28]U.S. liabilities to foreigners reported by U.S. banks were recorded at $\$ 3.3$ trillion in March 2006, an increase of $\$ 164$ billion from yearend 2005. U.S. banking liabilities include holdings of shortterm securities but exclude holdings of long-term securities. U.S. banking liabilities increased about $\$ 141$ billion in 2005, about $\$ 635$ billion in 2004, and about $\$ 316$ billion in 2003. Much of the increase in liabilities to foreigners in 2003 reflects changes to the reporting scope of the TIC reporting system effective February 2003. Between March and December of 2003, when data were reported on a consistent basis, banking liabilities increased about $\$ 136$ billion.
U.S. banking liabilities are concentrated in international financial centers. The data on this page show that more than half of U.S. banking liabilities is currently recorded against the United Kingdom and banking centers in the Caribbean. These financial centers have recorded most of the growth in banking liabilities in recent years. Foreigners domiciled in the rest of Europe and in Asia account for about one-third of U.S. banking liabilities.

${ }_{2}^{1}$ Before January 2001, combined data reported for Belgium-Luxembourg.
${ }^{2}$ Since December 1992, data for all other republics of the former U.S.S.R. included in "Other Europe."
${ }^{3}$ On February 4, 2003, Yugoslavia changed its name to Serbia and Montenegro. Data for
other entities of the former Yugoslavia recognized as independent states by the United
States are reported under "Other Europe" as follows: Beginning in December 1992 for
Bosnia and Herzegovina, Croatia, and Slovenia; and beginning in June 1994 for the former
Yugoslav Republic of Macedonia.

In December 2005, U.S. claims on foreigners reported by U.S. banks amounted to about \$2.4 trillion, an increase of $\$ 235$ billion from the level recorded at yearend 2004. U.S. banking claims include holdings of short-term securities but exclude holdings of long-term securities. U.S. banking claims increased $\$ 488$ billion in 2004 and $\$ 183$ billion in 2003. In large part, the increase in claims in 2003 reflects changes to the reporting scope of the TIC reporting system effective February 2003. Between March and December of 2003, when data were reported on a consistent basis, banking claims increased $\$ 12$ billion.

As with U.S. banking liabilities, U.S. banking claims on foreigners are concentrated in international financial centers. About 60 percent of these claims are reported opposite the United Kingdom and banking centers in the Caribbean. The share of claims against foreigners domiciled in Asia has declined over the past several years from about 20 percent at the end of 1996 to less than 10 percent currently.

${ }^{1}$ Before January 2001, combined data reported for Belgium-Luxembourg.
${ }^{2}$ Since December 1992, data for all other republics of the former U.S.S.R. included in "Other Europe,"
${ }^{3}$ On February 4, 2003, Yugoslavia changed its name to Serbia and Montenegro. Data for other entities of the former Yugoslavia recognized as independent states by the
United States are reported under "Other Europe" as follows: Beginning in December
1992 for Bosnia and Herzegovina, Croatia, and Slovenia; and beginning in June 1994 for the former Yugoslav Republic of Macedonia.

| ${ }^{1}$ Includes Bahamas, Bermuda, British West Indies, Netherlands Antilles, and Panama. <br> ${ }^{2}$ Beginning January 2001, Cayman Islands replaced British West Indies in reporting format. |  |  |  |  |  |

The data on this page represent foreign investors' purchases and sales of long-term U.S. securities (that is, U.S. Treasury and Government agency bonds and notes, and U.S. corporate bonds and stocks) as reported to the TIC reporting system. Foreign investors also acquired U.S. equities through mergers and reincorporations that involve stock swaps. Net foreign acquisitions of U.S. equities through stock swaps have been modest, amounting to about \$7 billion in both 2001 and 2002, \$2 billion in 2003, $\$ 36$ billion in 2004, and $\$ 6$ billion in 2005. There are no estimated stock swaps in the first quarter of 2006. (Stock swaps data for the most recent quarter are Federal Reserve Board/Treasury estimates and are subject to substantial revisions.) These stock swaps and certain other adjustments for principal repayment flows of asset-backed securities are not reported under the TIC reporting system, but are now available on the TIC web site.

Annual net foreign purchases of U.S. securities first surpassed $\$ 100$ billion in 1993. In 2004, net foreign acquisitions (including stock swaps) of U.S. securities totaled a record $\$ 953$ billion. Net acquisitions in 2005 were even stronger, reaching a new record of $\$ 1,049$ billion. Data for the first quarter of 2006 show net acquisitions of $\$ 272$ billion, similar to the pace in 2005.

| * Net purchases by U.S. investors equal net sales by foreigners, or gross sales minus gross purchases of securities. |  |  |  |  |  |  |

The data on this page represent U.S. investors' purchases and sales of long-term foreign securities as reported to the TIC reporting system. However, in the past several years, U.S. investors also have acquired a substantial amount of foreign stocks, mostly European, through mergers that involve stock swaps. In addition, when foreign firms reincorporate in the United States, the associated stock swap reduces U.S. holdings of foreign equity. Net acquisitions through stock swaps amounted to $\$ 80$ billion in 2000, $\$ 47$ billion in 2001, $\$ 3$ billion in 2002, $\$ 17$ billion in 2003, $-\$ 12$ billion in 2004, $\$ 4$ billion in 2005 , and $\$ 6$ billion in the first quarter of 2006. (Stock swaps data for the most recent quarter are Federal Reserve Board/Treasury estimates and are subject to substantial revisions.) These stock swaps are not reported under the TIC reporting system, but are now available on the TIC web site.

Including the stock swaps, annual U.S. net purchases of long-term foreign securities averaged about \$100 billion from the mid-1990s through 2000, without much variation from year to year. U.S. investors' acquisitions of foreign securities (including stock swaps) then slowed over the 2001-2003 period before rebounding to $\$ 141$ billion in 2004 and $\$ 159$ billion in 2005. In the first quarter of 2006, U.S. investors acquired $\$ 50$ billion in foreign securities, a pace of acquisition that was slightly higher than in 2005.

## INTRODUCTION: Foreign Currency Positions

The "Treasury Bulletin" reports foreign currency holdings of large foreign exchange market participants. These reports provide information on positions in derivative instruments, such as foreign exchange futures and options, that are increasingly used in establishing foreign exchange positions but were not covered in the old reports.

The information is based on reports of large foreign exchange market participants on holdings of five major foreign currencies (Canadian dollar, Japanese yen, Swiss franc, pound sterling, and euro) and the U.S. dollar. Positions in the U.S. dollar, which have been collected since January 1999, are intended to approximate "all other" currency positions of reporting institutions. U.S.-based businesses file a consolidated report for their domestic and foreign subsidiaries, branches, and agencies. U.S. subsidiaries of foreign entities file only for themselves, not for their foreign parents. Filing is required by law (31 United States Code 5315; 31 Code of Federal Regulations 128, Subpart C).

Weekly and monthly reports must be filed throughout the calendar year by major foreign exchange market participants, which are defined as market participants with more than $\$ 50$ billion equivalent in foreign exchange contracts on the last business day of any calendar quarter during the previous year (end March, June, September, or December). Such contracts include the amounts of foreign exchange spot contracts bought and sold, foreign exchange forward contracts bought and sold, foreign exchange futures bought and sold, and one half the notional amount of foreign exchange options bought and sold.

A quarterly report must be filed throughout the calendar year by each foreign exchange market participant that had more than $\$ 5$ billion equivalent in foreign exchange contracts on the last business day of any quarter the previous year (end March, June, September, or December).

This information is published in six sections corresponding to each of the major currencies covered by the reports. Tables I-1 through VI-1 present the currency data reported weekly by major market participants. Tables I-2 through VI-2 present more detailed currency data of major market participants, based on monthly Treasury reports. Tables I-3 through VI-3 present quarterly consolidated currency data reported by large market participants that do not file weekly reports.

Principal exchanged under cross-currency interest rate swaps is reported as part of purchases or sales of foreign exchange. Such principal also was noted separately on monthly and quarterly reports through December 1998, when this practice was discontinued. The net options position, or the net delta-equivalent value of an options position, is an estimate of the relationship between an option's value and an equivalent currency hedge. The delta equivalent value is defined as the product of the first partial derivative of an option valuation formula (with respect to the price of the underlying currency) multiplied by the notional principal of the contract.

## INTRODUCTION: Exchange Stabilization Fund

To stabilize the exchange value of the dollar, the Exchange Stabilization Fund (ESF) was established pursuant to chapter 6, section 10 of the Gold Reserve Act of January 30, 1934 (codified at 31 United States Code 5302), which authorized establishment of a Treasury fund to be operated under the exclusive control of the Secretary, with approval of the President.

Subsequent amendment of the Gold Reserve Act modified the original purpose somewhat to reflect termination of the fixed exchange rate system.

Resources of the fund include dollar balances, partially invested in U.S. Government securities, special drawing rights (SDRs), and balances of foreign currencies. Principal sources of income (+) or loss (-) for the fund are profits (+) or losses (-) on SDRs and foreign exchange, as well as interest earned on assets.

- Table ESF-1 presents the assets, liabilities, and capital of the fund. The figures are in U.S. dollars or their equivalents based on current exchange rates computed according to the accrual method of accounting. The capital account represents the original capital appropriated to the fund by Congress of $\$ 2$ billion, minus a subsequent transfer of $\$ 1.8$ billion to pay for the initial U.S. quota subscription to the International Monetary Fund. Gains and losses are reflected in the cumulative net income $(+)$ or loss ( - ) account.
- Table ESF-2 shows the results of operations by quarter. Figures are in U.S. dollars or their equivalents computed according to the accrual method. "Profit (+) or loss (-) on foreign exchange" includes realized profits or losses. "Adjustment for change in valuation of SDR holdings and allocations" reflects net gain or loss on revaluation of SDR holdings and allocations for the quarter.

TABLE ESF-1.—Balances as of Sept. 30, 2005, and Dec. 31, 2005

| Assets, liabilities, and capital | Sept. 30, 2005 | Oct. 1, 2005, through Dec. 31, 2005 | Dec. 31, 2005 |
| :---: | :---: | :---: | :---: |
| Assets |  |  |  |
| U.S. dollars: |  |  |  |
| Held with Treasury: |  |  |  |
| U.S. Government securities....................................... | 15,237,881 | 82,247 | 15,320,128 |
| Special drawing rights ${ }^{1}$................................................... | 8,285,432 | -34,681 | 8,250,751 |
| Foreign exchange and securities: |  |  |  |
| European euro ........................................................... | 10,906,264 | -115,833 | 10,790,431 |
| Japanese yen............................................................ | 8,338,055 | -323,414 | 8,014,641 |

| Commissions ... | - | - |
| Income from operations....... | -308,680 | -308,680 |
| Net income ( + ) or loss (-)..... | -308,680 | -308,680 |

${ }^{1}$ Beginning July 1974, the International Monetary Fund adopted a technique for valuing the SDRs based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and allocations are valued on this basis
beginning July 1974

Note.-Annual balance sheets for fiscal years 1934 through 1940 appeared in the 1940 "Annual Report of the Secretary of the Treasury" and those for succeeding years appeared in subsequent reports through 1980. Quarterly balance sheets beginning with December 31, 1938, have been published in the "Treasury Bulletin." Data from inception December 31, 1938, have been published in the "Treasury Bulletin." Data from inception
to September 30, 1978, may be found on the statements published in the January 1979 "Treasury Bulletin."

Trust Funds

## TABLE TF-15A.-Highway Trust Fund

The following information is released according to the provisions of the Byrd Amendment [codified at 26 United States Code 9503(d)] and represents data concerning the Highway Trust Fund. The figure described as "unfunded authorizations" is the latest estimate received from the DOT for fiscal year 2007.

The 48-month revenue estimates for the highway and mass transit accounts, respectively, include the latest estimates received from Treasury's Office of Tax Analysis for excise taxes, net of refunds. They represent net highway receipts for those periods beginning at the close of fiscal year 2007.

## Highway Account

[In billions of dollars. Source: DOT]

## Mass Transit Account

[In billions of dollars. Source: DOT]
Commitments (unobligated balances plus unpaid obligations, fiscal year 2007) ....................................................................................................... 10.2
less:

Cash balance (fiscal year 2007) ............................................................................................................................................................................... . 7.
Unfunded authorizations (fiscal year 2007) ............................................................................................................................................................. $\quad$.

48-month revenue estimate (fiscal years 2008, 2009, 2010, and 2011).

Note: Detail may not add to totals due to rounding.

## Glossary

## With References to Applicable Sections and Tables

Source: Financial Management Service

Accrued discount (SBN-1, -2, -3)—Interest that accumulates on savings bonds from the date of purchase until the date of redemption or final maturity, whichever comes first. Series A, B, C, D, E, EE, F, I, and J are discount or accrual type bonds-meaning principal and interest are paid when bonds are redeemed. Series G, H, HH, and K are current-income bonds, and the semiannual interest paid to their holders is not included in accrued discount.

Amounts outstanding and in circulation (USCC)-Includes all issues by the Bureau of the Mint purposely intended as a medium of exchange. Coins sold by the Bureau of the Mint at premium prices are excluded; however, uncirculated coin sets sold at face value plus handling charge are included.

Average discount rate (PDO-2, -3)—In Treasury bill auctions, purchasers tender competitive bids on a discount rate basis. The average discount rate is the weighted, or adjusted, average of all bids accepted in the auction.

Budget authority ("Federal Fiscal Operations")—Congress passes laws giving budget authority to Government entities, which gives the agencies the power to spend Federal funds. Congress can stipulate various criteria for the spending of these funds. For example, Congress can stipulate that a given agency must spend within a specific year, number of years, or any time in the future.

The basic forms of budget authority are appropriations, authority to borrow, contract authority, and authority to obligate and expend offsetting receipts and collections. The period of time during which Congress makes funds available may be specified as 1-year, multiple-year, or no-year. The available amount may be classified as either definite or indefinite; a specific amount or an unspecified amount can be made available. Authority also may be classified as current or permanent. Permanent authority requires no current action by Congress.
Budget deficit-The total, cumulative amount by which budget outlays (spending) exceed budget receipts (income).

Cash management bills (PDO-2)—Marketable Treasury bills of irregular maturity lengths, sold periodically to fund short-term cash needs of Treasury. Their sale, having higher minimum and multiple purchase requirements than those of other issues, is generally restricted to competitive bidders.

Competitive tenders ("Treasury Financing Operations")A bid to purchase a stated amount of one issue of Treasury securities at a specified yield or discount. The bid is accepted if it is within the range accepted in the auction. (See Noncompetitive tenders.)

Coupon issue-The issue of bonds or notes (public debt).
Currency no longer issued (USCC)—Old and new series gold and silver certificates, Federal Reserve notes, national bank notes, and 1890 Series Treasury notes.

Current income bonds ("U.S. Savings Bonds and Notes")Bonds paying semiannual interest to holders. Interest is not included in accrued discount.

Debt outstanding subject to limitation (FD-6)-The debt incurred by the Treasury subject to the statutory limit set by Congress. Until World War I, a specific amount of debt was authorized to each separate security issue. Beginning with the Second Liberty Loan Act of 1917, the nature of the limitation was modified until, in 1941, it developed into an overall limit on the outstanding Federal debt. As of March 2006, the debt limit was $\$ 8,965,000$ million; the limit may change from year to year.

The debt subject to limitation includes most of Treasury's public debt except securities issued to the Federal Financing Bank, upon which there is a limitation of \$15 billion, and certain categories of older debt (totaling approximately $\$ 595$ million as of February 1991).
Discount-The interest deducted in advance when purchasing notes or bonds. (See Accrued discount.)

Discount rate (PDO-2)—The difference between par value and the actual purchase price paid, annualized over a 360-day year. Because this rate is less than the actual yield (couponequivalent rate), the yield should be used in any comparison with coupon issue securities.
Dollar coins (USCC)—Include standard silver and nonsilver coins.

Domestic series (FD-2)—Nonmarketable, interest- and non-interest-bearing securities issued periodically by Treasury to the Resolution Funding Corporation (RFC) for investment of funds authorized under section 21B of the Federal Home Loan Bank Act (12 United States Code 1441b).

Federal intrafund transactions ("Federal Fiscal Opera-tions")-Intrabudgetary transactions in which payments and receipts both occur within the same Federal fund group (Federal funds or trust funds).
Federal Reserve notes (USCC)—Issues by the U.S. Government to the public through the Federal Reserve banks and their member banks. They represent money owed by the Government to the public. Currently, the item "Federal Reserve notes-amounts outstanding" consists of new series
issues. The Federal Reserve note is the only class of currency currently issued.

Foreign ("Foreign Currency Positions," IFS-2, -3)— Locations other than those included under the definition of the United States. (See United States.)

Foreigner ("Capital Movements," IFS-2)—All institutions and individuals living outside the United States, including U.S. citizens living abroad, and branches, subsidiaries, and other affiliates abroad of U.S. banks and business concerns; central governments, central banks, and other official institutions of countries other than the United States; and international and regional organizations, wherever located. Also refers to persons in the United States to the extent that they are known by reporting institutions to be acting for foreigners.

Foreign official institutions ("Capital Movements")Includes central governments of foreign countries, including all departments and agencies of national governments; central banks, exchange authorities, and all fiscal agents of foreign national governments that undertake activities similar to those of a treasury, central bank, or stabilization fund; diplomatic and consular establishments of foreign national governments; and any international or regional organization, including subordinate and affiliate agencies, created by treaty or convention between sovereign states.
Foreign public borrower ("Capital Movements")—Includes foreign official institutions, as defined above, the corporations and agencies of foreign central governments, including development banks and institutions, and other agencies that are majority-owned by the central government or its departments; and state provincial and local governments of foreign countries and their departments and agencies.
Foreign-targeted issue (PDO-1, -3)—Foreign-targeted issues were notes sold between October 1984 and February 1986 to foreign institutions, foreign branches of U.S. institutions, foreign central banks or monetary authorities, or to international organizations in which the United States held membership. Sold as companion issues, they could be converted to domestic (normal) Treasury notes with the same maturity and interest rates. Interest was paid annually.

Fractional coins (USCC)—Coins minted in denominations of 50, 25, and 10 cents, and minor coins ( 5 cents and 1 cent).

Government account series (FD-2)-Certain trust fund statutes require the Secretary of the Treasury to apply monies held by these funds toward the issuance of nonmarketable special securities. These securities are sold directly by Treasury to a specific Government agency, trust fund, or account. Their rate is based on an average of market yields on outstanding Treasury obligations, and they may be redeemed at the option of the holder. Roughly 80 percent of these are issued to five holders: the Federal Old-Age and Survivors Insurance Trust Fund; the civil service retirement and
disability fund; the Federal Hospital Insurance Trust Fund; the military retirement fund; and the Unemployment Trust Fund.

Interfund transactions ("Federal Fiscal Operations")Transactions in which payments are made from one fund group (either Federal funds or trust funds) to a receipt account in another group.

International Monetary Fund ("Exchange Stabilization Fund," IFS-1)-(IMF) Established by the United Nations, the IMF promotes international trade, stability of exchange, and monetary cooperation. Members are allowed to draw from the fund.

Intrabudgetary transactions ("Federal Fiscal Operations")These occur when payment and receipt both occur within the budget, or when payment is made from off-budget Federal entities whose budget authority and outlays are excluded from the budget totals.

Matured non-interest-bearing debt (SBN-1, -2, -3)—The value of outstanding savings bonds and notes that have reached final maturity and no longer earn interest. Includes all Series A-D, F, G, I, J, and K bonds. Series E bonds (issued between May 1941 and November 1965), Series EE (issued since January 1980), Series H (issued from June 1952 through December 1979), Series HH bonds (issued since January 1980 through October 1982) mature in 20 years, and savings notes issued between May 1967 and October 1970 have a final maturity of 30 years.
Noncompetitive tenders ("Treasury Financing Operations")—Offers by an investor to purchase Treasury securities at the price equivalent to the weighted average discount rate or yield of accepted competitive tenders in a Treasury auction. Noncompetitive tenders are always accepted in full.

Obligations ("Federal Fiscal Operations")—An unpaid commitment to acquire goods or services.

Off-budget Federal entities ("Federal Fiscal Operations")Federally owned and controlled entities whose transactions are excluded from the budget totals under provisions of law. Their receipts, outlays, and surplus or deficit are not included in budget receipts, outlays, or deficits. Their budget authority is not included in totals of the budget.

Outlays ("Federal Fiscal Operations")—Payments on obligations in the form of cash, checks, the issuance of bonds or notes, or the maturing of interest coupons.
Own foreign offices ("Capital Movements")—Refers to U.S. reporting institutions’ parent organizations, branches and/or majority-owned subsidiaries located outside the United States.

Par value-The face value of bonds or notes, including interest.

Quarterly financing ("Treasury Financing Operations")Treasury has historically offered packages of several "coupon" security issues on the 15th of February, May, August, and November, or on the next working day. These issues currently consist of a 3-year note, a 10-year note, and a 30-year bond. Treasury sometimes offers additional amounts of outstanding long-term notes or bonds, rather than selling new security issues. (See Reopening.)
Receipts ("Federal Fiscal Operations")—Funds collected from selling land, capital, or services, as well as collections from the public (budget receipts), such as taxes, fines, duties, and fees.
Reopening (PDO-3)—The offer for sale of additional amounts of outstanding issues, rather than an entirely new issue. A reopened issue will always have the same maturity date, CUSIP-number, and interest rate as the original issue.

Special drawing rights ("Exchange Stabilization Fund," IFS-1)—International assets created by IMF that serve to increase international liquidity and provide additional international reserves. SDRs may be purchased and sold among eligible holders through IMF. (See IMF.)

SDR allocations are the counterpart to SDRs issued by IMF based on members' quotas in IMF. Although shown in Exchange Stabilization Fund (ESF) statements as liabilities, they must be redeemed by ESF only in the event of liquidation of, or U.S. withdrawal from, the SDR department of IMF or cancellation of SDRs.

SDR certificates are issued to the Federal Reserve System against SDRs when SDRs are legalized as money. Proceeds of monetization are deposited into an ESF account at the Federal Reserve Bank of New York.

Spot ("Foreign Currency Positions")—Due for receipt or delivery within 2 workdays.

State and local government series (SLGS) (FD-2)—Special nonmarketable certificates, notes, and bonds offered to State
and local governments as a means to invest proceeds from their own tax-exempt financing. Interest rates and maturities comply with IRS arbitrage provisions. SLGS are offered in both time deposit and demand deposit forms. Time deposit certificates have maturities of up to 1 year. Notes mature in 1 to 10 years and bonds mature in more than 10 years. Demand deposit securities are 1-day certificates rolled over with a rate adjustment daily.
Statutory debt limit (FD-6)—By Act of Congress there is a limit, either temporary or permanent, on the amount of public debt that may be outstanding. When this limit is reached, Treasury may not sell new debt issues until Congress increases or extends the limit. For a detailed listing of changes in the limit since 1941, see the Budget of the United States Government. (See debt outstanding subject to limitation.)

STRIPS (PDO-1, -3)—Separate Trading of Registered Interest and Principal Securities. Long-term notes and bonds may be divided into principal and interest-paying components, which may be transferred and sold in amounts as small as $\$ 1,000$. STRIPS are sold at auction at a minimum par amount, varying for each issue. The amount is an arithmetic function of the issue's interest rate.

Treasury bills-The shortest term Federal security (maturity dates normally varying from 3 to 12 months), are sold at a discount.

Trust fund transaction ("Federal Fiscal Operations")An intrabudgetary transaction in which both payments and receipts occur within the same trust fund group.

United States-Includes the 50 States, District of Columbia, Commonwealth of Puerto Rico, American Samoa, Midway Island, Virgin Islands, Wake Island, and all other territories and possessions.
U.S. notes (USCC)—Legal tender notes of five different issues: 1862 (\$5-\$1,000 notes); 1862 (\$1-\$2 notes); 1863 (\$5\$1,000 notes); 1863 (\$1-\$10,000 notes); and 1901 (\$10 notes).

[^0]:    * These trust funds will no longer be published in the Treasury Bulletin effective December 2006.

[^1]:    Note.-Detail may not add to totals due to independent rounding

[^2]:    * Prior-year data are for the comparable year.

[^3]:    * Less than \$500,000.

[^4]:    See footnote at end of table.

[^5]:    See footnote at end of table.

[^6]:    See footnotes at end of table.

[^7]:    ${ }^{1}$ Consists of guaranteed debt issued by the Federal Housing Administration.
