Additional Financial Management Service Releases on Federal Finances

Sold on a subscription basis only (exceptions noted) by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.†

Monthly Treasury Statement of Receipts and Outlays of the United States

Government. Provides Federal budget results, including receipts and outlays of funds, the surplus or deficit, and the means of financing the deficit or disposing of the surplus. Preparation based on agency reporting. Subscription price: \$58.00 per year (domestic), \$81.20 (foreign).

Combined Statement of Receipts, Outlays, and Balances of the United States Government. This statement presents budget results and the cash-related assets and liabilities of the Federal Government with supporting details. Single copy price: \$65.00 (domestic), \$91.00 (foreign).

† Subscription order form on inside back cover.

The Treasury Bulletin is for sale by the Superintendent of Documents U.S. Government Printing Office Washington, D.C. 20102. The Treasury Bulletin is issued quarterly in March, June, September, and December by the Financial Management Service. The Budget Reports Division, Governmentwide Accounting, compiles statistical data from sources within Treasury departmental offices and bureaus, as well as various other Federal program agencies. Readers can contact the publication staff at (202) 874-9938/9939 to inquire about any of the published information. Suggestions are welcome.

The publication staff can also be reached by electronic mail.

Profile of the Economy

[Source: Office of Macroeconomic Analysis]

Real gross domestic product

The economy expanded at a slower pace in the first quarter of 2007, as the continued weakness in residential investment, a deterioration in the net export deficit, and slower inventory accumulation partly offset continued strength in consumer spending and a modest rebound in business investment.

April's advance estimate of real gross domestic product (GDP) reported a deceleration of annualized growth to 1.3 percent in the first quarter of 2007, following a 2.5 percent gain in the fourth quarter of 2006. Over the past four quarters, the economy has expanded by 2.1 percent. Since the second quarter of 2003, quarterly growth has averaged 3.4 percent.

Consumer spending rose a relatively robust 3.8 percent at an annual rate in the first quarter of 2007, slowing somewhat from the 4.2 percent pace in the fourth quarter. Spending on nondurable goods and on services contributed a combined 2.1 percentage points to GDP growth. Over the past four quarters, consumer spending was up 3.4 percent.

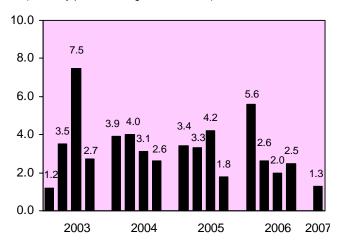

A 17.0 percent annualized rate of decline in residential investment spending in the first quarter marked the fourth straight negative reading for residential building and reduced GDP growth by 1.0 percentage point in the first quarter. Investment in business equipment and software increased by 1.9 percent in the first quarter, only partially retracing the 4.8 percent decline in the fourth quarter. Average growth for the past four quarters for this volatile series was 4.4 percent. Nonresidential investment in structures rose 2.1 percent in the first quarter and was up 9.4 percent over the previous four quarters. Business inventory investment turned up slightly as inventory accumulation slowed in the first quarter, but still subtracted 0.3 percentage point from first quarter GDP growth.

The net export deficit on trade in goods and services widened \$15.2 billion in real terms in the first quarter, and subtracted 0.5 percentage point from GDP growth. Real exports of goods and services declined, falling 1.2 percent, the first decline in 15 quarters, but came after a 10.6 percent surge in the fourth quarter. Meanwhile, real imports of goods and services increased 2.3 percent in the first quarter. Over the past four quarters, real exports of goods and services were up 5.5 percent.

Growth in real public sector spending slowed in the first quarter, up an annualized 0.9 percent after a 3.4 percent rise in the fourth quarter. The slowdown was largely the result of a sharp deceleration in federal defense expenditures, which fell 6.6 percent after rising 12.3 percent in the fourth quarter. Lower Federal spending subtracted 0.8 percentage point from GDP growth, while state and local outlays added 0.1 percentage point.

Growth of Real GDP

(Quarterly percent change at annual rate)

Inflation

Fluctuations in energy prices have been the key factor behind changes in the overall inflation rate over the past several months. In the 12 months through April 2007, the consumer price index (CPI) increased 2.6 percent, slower than the 3.5 percent rate for the previous 12 months. On a quarterly basis, inflation has been slowing for some time: the CPI rose 1.9 percent in the fourth quarter of 2006 and 2.4 percent in the first quarter of 2007, following five consecutive quarterly increases of between 3.3 percent and 4.0 percent. Inflation has receded despite a recent uptick in energy prices: in the first quarter of 2007, energy prices rose 3.8 percent, following a 10.1 percent decline in the fourth quarter. Gasoline prices rose even more rapidly, jumping 4.7 percent in the first quarter following an 18 percent decline in the fourth quarter of 2006. Food prices have also increased, rising 1.3 percent in the first quarter of 2007 after a more

modest 0.5 percent increase in the fourth quarter. The core consumer price index (which excludes food and energy) rose 2.3 percent in the 12 months through April 2007, matching the increase of a year earlier. Over the last 6 months (through April 2007), though, core inflation was 2.0 percent.

Broad declines in energy prices also contributed to a slower rise in the producer price index (PPI) for finished goods, which was up 3.2 percent in the 12 months through April 2007. Prices were up 4.1 percent in the previous 12 month period. On a quarter-over-quarter basis, finished energy goods at the producer level declined 4.7 percent in the fourth quarter of 2006 and 1.1 percent in the first quarter of 2007, after increases of roughly 10 percent to 22 percent in each of the previous 10 quarters. The core PPI (finished goods less food and energy) was unchanged in April (for the second straight month) and rose 1.5 percent over the last 12 months, matching its year-earlier increase.

(Percent change from a year earlier)

Employment and unemployment

The labor market finished 2006 on a strong note, and continued to be solid in the first four months of 2007. Payroll job gains slowed but the unemployment rate is low and workers have achieved solid gains in real hourly earnings.

Nonfarm payroll employment increased a modest 88,000 in April, and data revisions trimmed job counts in the previous 2 months. Average job growth in March and April was about 133,000. Employment increased by more than 2.2 million in 2006, an average of 187,000 per month. Since employment hit its low point in August 2003, the economy has generated 7.9 million jobs. Following its standard practice, the Bureau of Labor Statistics incorporated its annual benchmark revision to payroll employment data in early February. The revision, which reflects more complete estimates of payrolls using unemployment insurance tax records, increased the employment level for March 2006 by about 750,000.

The service sector has been the source of most job gains. Professional and business services and leisure and hospitality each posted employment increases in the range of about 23,000 in April, but that was down from gains of more than 35,000 per month in the first quarter of 2007. Payrolls in education and health services rose 53,000 in April, improving on the first quarter's monthly average of 41,000. Employment in these three sectors rose by more than 1.4 million in 2006, or nearly two-thirds of the total net jobs created during the year. After shedding more than 40,000

Unemployment Rate

jobs in 2006, retail employment is up 27,000 in the first 4 months of 2007.

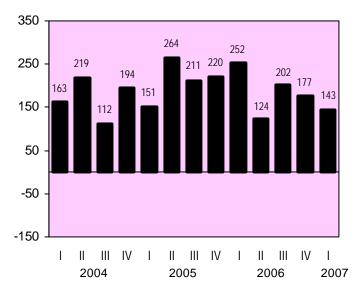

Goods-producing industries have been affected by the housing slowdown and the downshift in automobile production. Construction employment fell 11,000 in April after losing 8,000 jobs in the first quarter of 2007 compared to the fourth quarter of 2006. Since peaking in February 2006, employment in residential specialty trade contractors has declined by more than 120,000, a trend directly related to the housing slowdown. Although the decline had been partly offset by gains in *nonresidential* specialty trade contractor employment earlier this year, more jobs were lost by the nonresidential group than by the residential group in April. Manufacturing employment fell by 19,000 in April, and is down 55,000 so far this year. The factory sector lost 78,000 jobs in 2006.

The unemployment rate edged up from 4.4 to 4.5 percent in April, but remains close to a 5-1/2 year low of 4.4 percent. The labor force participation rate (the share of the noninstitutionalized population over 15 years old in the labor force) ended 2006 at a 3-1/2 year high of 66.4 percent, and has since ticked down to 66.0 percent as of April.

The average workweek edged down from 33.9 hours to 33.8 hours in March causing aggregate production worker hours to decline 0.1 percent. Nominal average hourly earnings increased 0.2 percent in April and were up 3.7 percent from a year earlier. Adjusting for inflation, real earnings were up 1.3 percent from a year earlier in March (latest data available).

Payroll Employment

(Average monthly change in thousands from end of quarter to end of quarter)

Real disposable personal income and consumer spending

Personal income and outlays experienced strong growth in the first quarter of 2007 relative to the final three quarters of 2006. Nominal personal income surged 9.2 percent at an annual rate in the first quarter of 2007, following growth of 4.7 percent, 5.0 percent, and 3.2 percent in the previous three quarters, respectively. Wages and salaries, accounting for more than 50 percent of personal income, rose at a 9.5 percent annual rate in the first quarter, following a gain of 5.7 percent in the fourth quarter. The outsized first-quarter gain was driven by bonuses and exercised stock options, which are counted as wage income in the national accounts. The Federal pay raise, which usually occurs in the first quarter, also contributed.

Growth of personal income receipts on assets jumped to 9.3 percent at an annual rate after slowing to 1.9 percent during the fourth quarter. Growth of personal interest income increased at a 6.9 percent annual pace after declining 4.9 percent in the fourth quarter. Rental income growth in the first quarter slowed to 15.2 percent at an annual rate from 26.9 percent in the fourth quarter and 44.6 percent in the third quarter.

Real disposable (after-tax) income rose 4.5 percent at an annual rate in the first quarter following a 5.3 percent gain in the fourth quarter and a 3.2 percent increase in the third quarter. Real personal consumption expenditures increased at a 3.8 percent annual pace, 0.4 percentage points slower than the fourth quarter growth rate. The personal saving rate (personal saving as a percentage of disposable personal income) crept up 0.2 percentage point to -1.0 percent in the first quarter from -1.2 percent in the fourth quarter. Consumer spending has been larger than personal disposable income since the second quarter of 2005.

Industrial production and capacity utilization

Industrial production from factories, mines, and utilities increased 0.9 percent at an annual rate in the first quarter of 2007, after declining at a 1.5 percent pace in the fourth quarter of 2006. Over the 12 months ending in April, output increased 1.9 percent. On an annual basis, industrial production grew 3.9 percent in 2006, the fastest rate since 2000.

Manufacturing production, which accounts for about 82 percent of all industrial output, also rose 0.9 percent at an annual rate in the first quarter of 2007, after falling 1.7 percent in the fourth quarter of 2006. In the 12 months through April, manufacturing production increased 1.9 percent. Output of high-technology goods (computers, communications equipment, and semiconductors) grew by 10.2 percent at an annual rate, decelerating from the fourth quarter's 24.7 percent pace. Production of motor vehicles and parts fell 8.0 percent at an annual rate in the first quarter of 2007, its third straight quarterly decline. In the 12 months through April, output of motor vehicles and parts was down

1.9 percent. Apart from automobiles, manufacturing output increased at a 1.6 percent annual rate in the first quarter of 2007, reflecting a surge late in the quarter in high-technology output as well as output of nonmetallic mineral products.

Utilities output, accounting for roughly 9.5 percent of total industrial output, rose 3.7 percent at an annual rate in the first quarter of 2007 (following a revised 3.6 percent decline in the fourth quarter of 2006). Weather is usually a factor in this sector, and unseasonable weather in quarters often causes sharp swings in output from 1 month or quarter to the next. Output at mines (the remaining 10 percent of industrial output) fell 3.0 percent in the first quarter of 2007, following a 3.0 percent gain in the fourth quarter. In the 12 months through April 2007, output at utilities rose 2.5 percent and mining output grew 0.8 percent.

The capacity utilization rate for the industrial sector edged down to 81.3 percent in the first quarter of 2007 from 81.5 percent in the fourth quarter. Capacity utilization has trended higher over the past 2 years or so; in the first quarter it was still above its long-term average of 81.0 percent. Capacity utilization ranged between 82 and 85 percent from 1994 through 1999. In manufacturing, capacity utilization was 79.8 percent in the first quarter of 2007, down from 80.1 percent in the fourth quarter, but it remains above its long-term average of 79.8 percent. Utilization in the high-technology industries fell 1.7 percent points to 78.0 percent in the first quarter of 2007 from 79.7 percent in the fourth, returning to its long-term average of 78.0 percent.

Nonfarm productivity and unit labor costs

Productivity growth leveled off during the first quarter of 2007, according to preliminary data, after picking up a bit at the end of last year. Productivity in the nonfarm business sector grew at an annual rate of 1.7 percent in the first quarter following an acceleration to 2.1 percent in the fourth quarter. Growth in output (1.4 percent) outpaced a decline in hours worked (-0.3 percent) in the first quarter of 2007. For 2006 as a whole, productivity increased 1.6 percent. That is slower than the 2.1 percent increase registered over the four quarters of 2005. Still, the longer-term trend of productivity growth appears strong. Since the business cycle peak in the first quarter of 2001, productivity has grown at an annual rate of 2.8 percent, accelerating from the 2.5 percent rate during the preceding 5-year period.

Hourly compensation costs in the nonfarm business sector rose 2.3 percent at an annual rate in the first quarter, slowing notably from the fourth quarter's 8.5 percent surge but in line with the 2.4 percent pace over the most recent four quarters. In real terms, hourly compensation was unchanged over the most recent four quarters.

An alternative measure from the Bureau of Labor Statistics, the employment cost index, shows that nominal compensation rose 3.5 percent in the 12 months through March 2007, the fastest rate of increase since the first quarter of 2005. The employment cost index shows data on the two main components of compensation – wages and salaries and

benefits. Wages and salaries for all civilian workers were up 3.6 percent through March 2007 from a year earlier, while benefits were up 3.1 percent over the same period. Although the growth in benefit costs has slowed over the past 2 years, benefits have generally accounted for a disproportionate share of overall compensation gains.

Unit labor costs, which represent the interaction of productivity and compensation, increased 0.6 percent at an annual rate in the first quarter, slowing significantly from the fourth quarter's 6.2 percent jump. These costs were up just 1.3 percent over the latest four quarters. The growth of unit labor costs has been erratic in recent years, but the first quarter's rate was the slowest since the second quarter of 2005.

Productivity in the manufacturing sector rose 2.7 percent at an annual rate in the first quarter and was up 3.6 percent over the most recent four quarters. Over the past 5 years, productivity has grown at a 4.2 percent annual rate, slowing from the 4.6 percent pace of the previous 5-year period. Hourly compensation costs in manufacturing were up 5.5 percent at an annual rate in the first quarter but were up just 1.5 percent over the most recent four quarters. Factory unit labor costs increased 2.7 percent at an annual rate in the first quarter and have declined 2.0 percent over the past four quarters.

International transactions

The U.S. current account balance improved in the fourth quarter of 2006, narrowing by \$134 billion to \$783 billion at an annual rate (5.8 percent of GDP) from nearly \$918 billion (6.9 percent of GDP) in the third quarter. The merchandise trade deficit fell sharply in the fourth quarter, accounting for more than half of the improvement. A swing in the balance on income (the difference between income receipts on U.S. assets abroad and income payments on foreign assets in the United States) also played a role. After four straight quarters in deficit, the income balance shifted back into surplus - a more normal state of affairs for this component of the current account. Finally, the surplus on trade in services rose in the fourth quarter and net unilateral transfers to foreigners declined. Despite the end-of-the-year improvement, the current account deficit reached a new high in 2006, rising by \$65 billion to \$857 billion. As a share of GDP, however, the current account edged up just 0.1 percentage point to 6.5 percent.

The current account is matched by offsetting transactions in the capital and financial accounts, with any differences in the recorded flows listed as a statistical discrepancy. Net capital account transactions, which mainly consist of debt forgiveness and wealth transfers associated with

immigration, amounted to an outflow of \$2.4 billion at an annual rate in the fourth quarter, up from \$2.2 billion in the prior quarter. For the entire year, net capital account payments totaled \$3.9 billion, down from \$4.4 billion in 2005.

Financial flows into and out of the United States slowed, on net, in the final quarter of 2006 to \$658 billion at an annual rate from \$919 billion in the third quarter. Net foreign purchases of U.S. assets moderated by \$159 billion to \$1.7 trillion. Slower growth of foreign direct investment in the United States and foreign purchases of U.S. stocks and federally-sponsored agency bonds accounted for part of the pullback. Those developments were partly offset by a shift in U.S. Treasury securities transactions from net sales in the third quarter to net acquisitions in the fourth quarter. The deceleration in foreign expenditures for U.S. assets more than offset a \$101 billion pickup in net outflows for U.S.-owned assets abroad to \$1.0 trillion. Net financial inflows for the four quarters of 2006 totaled \$719 billion, down from an all-time high of \$785 billion in 2005.

Exchange rate of the dollar

The value of the U.S. dollar compared to the currencies of America's key trading partners edged upward in the first quarter of 2007 after declining in the fourth quarter of 2006. The nominal exchange value of the dollar (relative to a broad index covering the currencies of 26 important US trading partners) appreciated 1.3 percent during the first quarter of 2007. In March, the dollar settled at its lowest nominal level in about 10 years. Since peaking in February 2002, the U.S. currency as measured by this broad index has depreciated by close to 18 percent.

The aggregate decline since 2002 mainly reflected dollar weakness against the currencies of seven major trading partners, including the euro area countries, Japan, Canada, the United Kingdom, Australia, Sweden, and Switzerland. Between February 2002 and December 2006, the exchange rate of the dollar compared to an index of these currencies fell by nearly 28 percent. Over this period, the dollar was down by 34 percent against the euro and by 12 percent against the yen.

The dollar generally showed much less movement with respect to the currencies of the other 19 important trading partners (including Mexico, China, and India). It strengthened somewhat from February 2002 through the first half of 2004, but since then, the dollar has depreciated against this index by about 8 percent. In December 2006, the dollar was 3.6 percent lower against this basket of currencies than at the February 2002 peak.

Interest rates

At its most recent meeting in May 2007, the Federal Open Market Committee (FOMC)—the Federal Reserve's policy-making arm—maintained the Federal funds target interest rate (the rate that banks and other financial institutions charge each other for overnight loans) at 5.25 percent, where it has stood since late June 2006. The Federal Reserve has paused in the seven most recent meetings, following 17 straight hikes of 25 basis points each in the current cycle of monetary tightening which began in late June 2004. Before that, the FOMC had held the Federal funds target rate constant at 1 percent for one year. The funds target in May 2007 was at its highest level since March 2001.

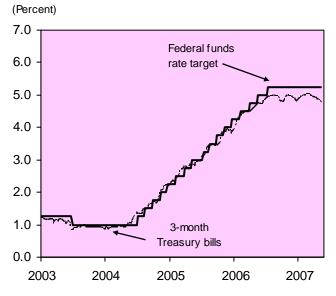

In the Treasury market, the 3-month Treasury bill rate stood at 4.8 percent in early May 2007, and had risen by about 200 basis points over the past 2 years. The 10-year Treasury note rate had moved little as short rates rose during 2004 and 2005, but then moved significantly higher starting in early 2006. At about 5.2 percent as of early June 2006, the rate was about 145 basis points above its level in early 2004. Relative to that recent peak, the rate has trended lower, and has been consistently below 5 percent since August 2006.

This year the rate has fluctuated in a narrow range and was 4.6 percent as of early May.

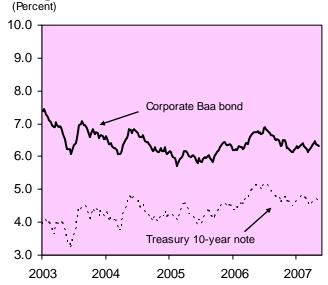

Mortgage interest rates have generally followed movements of the 10-year Treasury rate, trending up since mid-2005, and moving decisively higher through the first half of 2006. In early July 2006, the rate for a 30-year fixed rate mortgage reached 6.8 percent, its highest level in over 4 years. During the latter half of 2006, the mortgage rate generally declined in tandem with the 10-year Treasury rate to about 6.1 percent in December. After rising to 6.3 percent in early February, the rate has trended lower again, and stood at about 6.1 percent in early May.

Corporate bond yields have also generally followed movements in long-term Treasury yields. Moody's seasoned Baa yield moved higher earlier last year, reaching a recent peak of 6.9 percent in late June 2006, but during the latter half of 2006 and early 2007, it retreated, trading between 6.1 percent and 6.5 percent. Since then, the yield has fluctuated in a 20 basis point range and was 6.3 percent in early May. The spread between the Baa yield and the 10-year Treasury yield, a measure of investor risk appetite, has remained essentially unchanged through much of 2005 and 2006. This spread had widened to as much as 4.0 percentage points in October 2002, but over the past several months, has remained quite stable at roughly 1.7 percentage points.

Short-term Interest Rates

Long-term Interest Rates

Housing

Housing activity remained sluggish in the first quarter of 2007. Housing starts and permits continued to decline, but housing affordability increased for the second consecutive quarter, caused in part by smaller price increases and low mortgage rates. Sales of new single-family homes dropped sharply, but the homeownership rate remained close to record levels.

Housing starts fell to a 1.474 million unit pace in the first quarter from a 1.559 million rate in the fourth quarter of 2006. This was well below a three-decade high of 2.123 million the first quarter. Real residential investment declined 17.0 percent at an annual rate in the first quarter, following a 19.8 percent decline in the fourth quarter. Residential investment, a key component of GDP, declined for the sixth straight quarter, subtracting 1.0 percentage points from real GDP in the first quarter. Housing permits signal continued slow growth. The number of permits issued for future construction was at a 1.556 million annual rate in the first quarter, the slowest quarterly rate since the third quarter of 2000.

Measures of consumer homebuying attitudes and home builder sentiment improved in the first quarter, but more recent data does not clearly show an end to the slowdown. The National Association of Home Builder's housing market index rose 3.0 points from December to March. The net gain for the Michigan survey of consumer sentiment's homebuying conditions was 5.0 points in the first quarter, down from 16 points in the fourth. The housing market index retraced all of its first quarter gain in April, and the Michigan survey's homebuying conditions inched up just 1.0 point, leaving doubt about whether the market has reached a trough.

Sales of new single-family homes plummeted 13.7 percent at an annual rate in the first quarter to a 0.856 million unit pace from a 0.992 million unit pace in the fourth quarter. This was the largest quarterly drop since the third quarter of 1981, and the weakest unit rise in nearly 7 years. However, resales of existing single-family homes, accounting for nearly 85 percent of all one-family home sales, fared better in the first quarter, rising 2.2 percent at an annual rate to a 5.623 million unit rate. The homeownership rate slipped by 0.1 percentage points to 68.6 percent in the first quarter but remains at a historically high level, just 0.7 percent below its peak in the spring of 2004. Slowing

home price appreciation should help the homeownership rate stay high. The median sales price of existing single-family homes dropped 3.1 percent to \$212,000 in the first quarter, compared to \$219,000 in the fourth.

Mortgage interest rates remained near their fourth-quarter level during the first quarter of 2007 and have been relatively flat so far in the second quarter. The average rate on a 30-year conventional mortgage slipped from 6.25 percent in the fourth to 6.22 percent in the first, and below the 6.56 percent rate in the third quarter of 2006. In April the rate averaged 6.18 percent, 33 basis points lower than the 30-year mortgage rate in April 2006 and below the 7.5 percent average posted in the second half of the 1990s. The low mortgage interest rate, along with flat or falling housing prices, should continue to make homes more affordable in the coming months. The National Association of Realtors' housing affordability index rose to 114.7 percent in March from a reading of 109.2 percent in December, well above the 2006 average of 106.2 percent.

Federal budget

Budget results for the first 7 months of fiscal year 2007 show the Federal deficit narrowed to \$81 billion, an improvement of roughly \$103 billion compared with the same months of fiscal year 2006. *Receipts* rose \$152 billion or 11.2 percent through 7 months of the fiscal year versus last year. Part of the strength in receipts was due to a faster processing of returns, which moved receipts that would normally be counted in May into the April data. Corporate income taxes were also strong, bolstered by strong growth in corporate profits.

Outlays increased by \$4.4 billion, or 3.2 percent in the first 7 months of fiscal year 2007. The largest increase in outlays was for Medicare, with expenditures up about \$32 billion or roughly 17 percent compared with the first seven months of fiscal year 2006 (the prescription drug benefit started in January 2006 contributed \$30.1 billion to the increase). Net outlays for national defense increased by \$21 billion through the first seven months of the fiscal year compared to the same 7 months of fiscal year 2006, or about 7 percent. Net interest expenses increased by \$6.6 billion or 5.2 percent from fiscal year 2006 due in part to higher short-term interest rates.

Net national saving and investment

Net national saving has been on a downward trend since the 1960s, in part due to declining private saving but also reflecting the growth of Federal government budget deficits since the 1970s. Over this period, net national saving as a share of net national product (NNP) declined from an average of 12.2 percent in the 60s to a slim 0.1 percent in 2005. In 2006, however, the net national saving rate rebounded to 2.2 percent.

The increase recorded in 2006 was mainly due to an improvement in the Federal government's fiscal situation. As a share of NNP, the Federal budget deficit narrowed to 1.3 percent from 2.8 percent in 2005. State and local governments posted a small surplus in 2006, but as a share of NNP the state and local fiscal balance was negligible for a second straight year. Altogether, government deficits as a share of NNP amounted to 1.3 percent in 2006, a notable improvement compared to 2.9 percent in 2005 and a recent high of 4.1 percent in 2003.

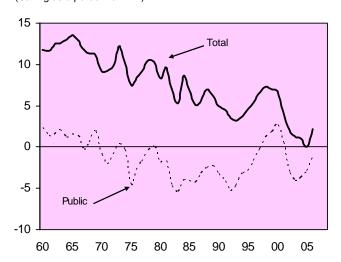

Private saving (of households and businesses) rose to 3.5 percent of NNP in 2006 from 2.9 percent in 2005. The increase reflected a jump in the corporate saving rate to 4.3 percent from an average of 3.3 percent in the prior 4 years. Personal saving as a share of NNP has been on the decline since the early 1980s and turned negative in 2005 for the first time since the 1930s, dipping to -0.3 percent. This downward trend continued in 2006, with the ratio of personal saving to NNP falling to -0.9 percent.

Net domestic investment was equivalent to 9.1 percent of NNP in 2006. That was up from 7.8 percent in 2005. The increase was mostly accounted for by a pickup in private industry outlays for structures, equipment and software, and

inventory, which rose to 7.7 percent of NNP in 2006. Net private domestic investment was around 6-1/2 percent of NNP in each of the prior 2 calendar years. A growing portion of domestic investment has been financed from abroad in recent years. In 2006, foreign inflows were equivalent to 6.9 percent of NNP. That was up from around 1-1/2 percent of NNP in the mid 1990s.

Net National Saving

(Saving as a percent of NNP)

INTRODUCTION: Federal Fiscal Operations

Budget authority usually takes the form of appropriations that allow obligations to be incurred and payments to be made. Reappropriations are Congressional actions that extend the availability of unobligated amounts that have expired or would otherwise expire. These are counted as new budget authority in the fiscal year of the legislation in which the reappropriation act is included, regardless of when the amounts were originally appropriated or when they would otherwise lapse.

Obligations generally are liquidated by the issuance of checks or the disbursement of cash—outlays. Obligations may also be liquidated (and outlays recorded) by the accrual of interest on public issues of Treasury debt securities (including an increase in redemption value of bonds outstanding); or by the issuance of bonds, debentures, notes, monetary credits, or electronic payments.

Refunds of collections generally are treated as reductions of collections, whereas payments for earned-income tax credits in excess of tax liabilities are treated as outlays. Outlays during a fiscal year may be for payment of obligations incurred in prior years or in the same year. Outlays, therefore, flow in part from unexpended balances of prior year budget authority and from budget authority provided for the year in which the money is spent. Total outlays include both budget and off-budget outlays and are stated net of offsetting collections.

Receipts are reported in the tables as either budget receipts or offsetting collections. They are collections from the public, excluding receipts offset against outlays. These, also called governmental receipts, consist mainly of tax receipts (including social insurance taxes), receipts from court fines, certain licenses, and deposits of earnings by the Federal Reserve system. Refunds of receipts are treated as deductions from gross receipts. Total Government receipts are compared with total outlays in calculating the budget surplus or deficit.

Offsetting collections from other Government accounts or the public are of a business-type or market-oriented nature. They are classified as either collections credited to appropriations or fund accounts, or offsetting receipts (i.e., amounts deposited in receipt accounts). The former normally can be used without an appropriation act by Congress. These occur in two instances: (1) when authorized by law, amounts collected for materials or services are treated as reimbursements to appropriations. For accounting purposes, earned reimbursements are also known as revenues. These offsetting collections are netted against gross outlays in determining net outlays from such appropriations; and (2) in the three types of revolving funds (public enterprise, intragovernmental, and trust); offsetting collections are netted against spending, and outlays are reported as the net amount.

Offsetting receipts in receipt accounts cannot be used without appropriation. They are subdivided into three categories: (1) proprietary receipts, or collections from the public, offset against outlays by agency and by function; (2) intragovernmental transactions, or payments into receipt accounts from governmental appropriation or fund accounts. They finance operations within and between Government agencies and are credited with collections from other Government accounts; and (3) offsetting governmental receipts that include foreign cash contributions.

Intrabudgetary transactions are subdivided into three categories: (1) interfund transactions—payments are from one fund group (either Federal funds or trust funds) to a receipt account in the other fund group; (2) Federal intrafund transactions—payments and receipts both occur within the Federal fund group; and (3) trust intrafund transactions—payments and receipts both occur within the trust fund group.

Offsetting receipts are generally deducted from budget authority and outlays by function, subfunction, or agency. There are four types of receipts, however, that are deducted from budget totals as undistributed offsetting receipts. They are: (1) agencies' payments (including payments by offbudget Federal entities) as employers into employees' retirement funds; (2) interest received by trust funds; (3) rents and royalties on the Outer Continental Shelf lands; and (4) other interest (i.e., that collected on Outer Continental Shelf money in deposit funds when such money is transferred into the budget).

The Government has used the unified budget concept set forth in the "Report of the President's Commission on Budget Concepts" as a foundation for its budgetary analysis and presentation since 1969. The concept calls for the budget to include all of the Government's fiscal transactions with the public. Since 1971, however, various laws have been enacted removing several Federal entities from (or creating them outside of) the budget. Other laws have moved certain off-budget Federal entities onto the budget. Under current law, the off-budget Federal entities consist of the two Social Security trust funds, Federal Old-Age and Survivors Insurance and the Federal Disability Insurance Trust Fund, and the Postal Service.

Although an off-budget Federal entity's receipts, outlays, and surplus or deficit ordinarily are not subject to targets set by the Congressional resolution, the Balanced Budget and Emergency Deficit Control Act of 1985 [commonly known as the Gramm-Rudman-Hollings Act as amended by the Budget Enforcement Act of 1990 (2 United States Code 900-922)] included off-budget surplus or deficit in calculating deficit targets under that act and in calculating excess deficit. Partly for this reason, attention has focused on both on- and off-budget receipts, outlays and deficit of the Government.

Tables **FFO-1**, **FFO-2**, **and FFO-3** are published quarterly and cover 5 years of data, estimates for 2 years, detail for 13 months, and fiscal year-to-date data. They provide a summary of data relating to Federal fiscal operations reported by Federal entities and disbursing officers, and daily reports from the FRBs. They also detail accounting transactions affecting receipts and outlays of the Government and off-budget Federal entities and their related effect on assets and liabilities of the Government. Data are derived from the "Monthly Treasury Statement of Receipts and Outlays of the United States Government."

- Table **FFO-1** summarizes the amount of total receipts, outlays, and surplus or deficit, as well as transactions in Federal securities, monetary assets, and balances in Treasury operating cash.
- Table **FFO-2** includes on- and off-budget receipts by source. Amounts represent income taxes, social insurance taxes, net contributions for other insurance and retirement, excise taxes, estate and gift taxes, customs duties, and net miscellaneous receipts.
- Table **FFO-3** details on- and off-budget outlays by agency.

- Table **FFO-4** summarizes on- and off-budget receipts by source and outlays by function as reported to each major fund group classification for the current fiscal year to date and prior fiscal year to date.
- Table **FFO-5** summarizes internal revenue receipts by states and by type of tax. Amounts reported are collections made in a fiscal year. They span several tax liability years because they consist of prepayments (estimated tax payments and taxes withheld by employers for individual income and Social Security taxes), payments made with tax returns and subsequent payments made after tax returns are due or are filed (that is, payments with delinquent returns or on delinquent accounts).

Amounts are reported based on the primary filing address provided by each taxpayer or reporting entity. For multistate corporations, the address may reflect only the district where such a corporation reported its taxes from a principal office rather than other districts where income was earned or where individual income and Social Security taxes were withheld. In addition, an individual may reside in one district and work in another.

• Table **FFO-6** includes customs collection of duties, taxes, and fees by districts and ports.

Second-Quarter Receipts

The following capsule analysis of budget receipts, by source, for the second quarter of fiscal year 2007 supplements fiscal data reported in the March issue of the "Treasury Bulletin." At the time of that issue's release, not enough data were available to analyze adequately collections for the quarter.

Individual income taxes—Individual income tax receipts, net of refunds, were \$228.4 billion for the second quarter of fiscal year 2007. This is an increase of \$26.1 billion over the comparable prior year quarter. Withheld receipts increased by \$22.7 billion and non-withheld receipts increased by \$8.8 billion during this period. Refunds increased by \$5.4 billion over the comparable fiscal year 2006 quarter. There was a decrease of \$0.7 billion in accounting adjustments between individual income tax receipts and the Social Security and Medicare trust funds over the comparable quarter in fiscal year 2006.

Corporate income taxes—Net corporate income tax receipts were \$55.3 billion for the second quarter of fiscal year 2007. This is an increase of \$5.7 billion compared to

the prior year second quarter. The \$5.7 billion change is comprised of an increase of \$6.2 billion in estimated and final payments, and an increase of \$0.5 billion in corporate refunds.

Employment taxes and contributions—Employment taxes and contributions receipts for the second quarter of fiscal year 2007 were \$219.2 billion, an increase of \$12.6 billion over the comparable prior year quarter. Receipts to the Federal Old-Age and Survivors Insurance, Federal Disability Insurance, and Federal Hospital Insurance trust funds changed by \$8.3 billion, \$1.4 billion, and \$2.9 billion respectively. There was a \$4.7 billion accounting adjustment for prior years employment tax liabilities made in the second quarter of fiscal year 2007, while there was a \$4.0 billion adjustment in the second quarter of fiscal year 2006.

Unemployment insurance—Unemployment insurance receipts, net of refunds, for the second quarter of fiscal year 2007 were \$5.8 billion, a decrease of \$0.2 billion over the comparable quarter of fiscal year 2006. Net State taxes deposited in the U.S. Treasury decreased by \$0.1 billion to \$4.4 billion. Net Federal Unemployment Tax Act taxes decreased by \$0.2 billion to \$1.4 billion.

Budget Results and Financing of the U.S. Government and Second-Quarter Receipts by Source, con.

Contributions for other insurance and retirement— Contributions for other retirement were \$1.1 billion for the second quarter of fiscal year 2007. This was a negligible change from the comparable quarter of fiscal year 2006.

Excise taxes—Net excise tax receipts for the second quarter of fiscal year 2007 were \$13.6 billion, a decrease of \$3.7 billion over the comparable prior year quarter. Total excise tax refunds for the quarter were \$2.9 billion, an increase of \$2.4 billion over the comparable prior year quarter.

Estate and gift taxes—Net estate and gift tax receipts were \$5.8 billion for the second quarter of fiscal year 2007.

These receipts represent a decrease of \$1.8 billion over the same quarter in fiscal year 2006.

Customs duties—Customs duties net of refunds were \$6.3 billion for the second quarter of fiscal year 2007. This is an increase of \$0.6 billion over the comparable prior year quarter.

Miscellaneous receipts—Net miscellaneous receipts for the second quarter of fiscal year 2007 were \$12.0 billion, an increase of \$0.7 billion over the comparable prior year quarter. This change is due in part to deposits of earnings by Federal Reserve banks increasing by \$0.2 billion.

INTRODUCTION: Source and Availability of the Balance in the Account of the U.S. Treasury

The Department of the Treasury's (Treasury's) operating cash is maintained in accounts with the Federal Reserve banks (FRBs) and branches, as well as in tax and loan accounts in other financial institutions. Major information sources include FRBs, Treasury Regional Financial Centers, Internal Revenue Service Centers, Bureau of the Public Debt, and various electronic systems. As the FRB accounts are depleted, funds are called in (withdrawn) from thousands of tax and loan accounts at financial institutions throughout the country.

Under authority of Public Law 95-147 (codified at 31 United States Code 323), Treasury implemented a program on November 2, 1978, to invest a portion of its operating cash in obligations of depositaries maintaining tax and loan accounts. Under the Treasury tax and loan (TT&L) investment program, depositary financial institutions select the manner in which they will participate. Financial institutions wishing to retain funds deposited into their tax

and loan accounts in interest-bearing obligations can participate. The program permits Treasury to collect funds through financial institutions and to leave the funds in TT&L depositaries and in the financial communities in which they arise until Treasury needs the funds for its operations. In this way, Treasury is able to neutralize the effect of its fluctuating operations on TT&L financial institution reserves and on the economy. Likewise, those institutions wishing to remit the funds to the Treasury account at FRBs do so as collector depositaries.

Deposits to tax and loan accounts occur as customers of financial institutions deposit tax payments that the financial institutions use to purchase Government securities. In most cases, this involves a transfer of funds from a customer's account to the tax and loan account in the same financial institution. Also, Treasury can direct the FRBs to invest excess funds in tax and loan accounts directly from the Treasury account at the FRBs.

¹ Represents transfers from tax and loan note accounts, proceeds from sales of securities other than Government account series, and taxes.

Represents checks paid, wire transfer payments, drawdowns on letters of credit, redemptions

under the Federal Insurance Contributions Act beginning January 1950 and under the Railroad Retirement Tax Act beginning July 1951; a number of excise taxes beginning July 1953; estimated corporation income taxes beginning April 1967; all corporation income taxes due on or after March 15, 1968; Federal Unemployment Tax Act taxes beginning April 1970; and individual estimated income taxes beginning October 1988.

of securities other than Government account series, and investment (transfer) of excess funds out of this account to the tax and loan note accounts.

Taxes eligible for credit consist of those deposited by taxpayers in the tax and loan depositaries as follows: withheld income taxes beginning March 1948; taxes on employers and employees

INTRODUCTION: Federal Debt

Treasury securities (i.e., public debt securities) comprise most of the Federal debt, with securities issued by other Federal agencies accounting for the rest. Tables in this section of the "Treasury Bulletin" reflect the total. Further detailed information is published in the "Monthly Statement of the Public Debt of the United States." Likewise, information on agency securities and on investments of Federal Government accounts in Federal securities is published in the "Monthly Treasury Statement of Receipts and Outlays of the United States Government."

Treasury's Financial Management Service (FMS) compiles data in the "Treasury Bulletin" tables FD-2 and FD-6 from the "Monthly Statement of the Public Debt of the United States."

- Table **FD-1** summarizes the Federal debt by listing public debt and agency securities held by the public, including the Federal Reserve. It also includes debt held by Federal agencies, largely by the Social Security and other Federal retirement trust funds. The net unamortized premium and discount also are listed by total Federal securities, securities held by Government accounts and securities held by the public. The difference between the outstanding face value of the Federal debt and the net unamortized premium and discount is classified as the accrual amount. (For greater detail on holdings of Federal securities by particular classes of investors, see the ownership tables, OFS-1 and OFS-2.)
- Table **FD-2** categorizes by type, that is, marketable and nonmarketable, the total public debt securities outstanding that are held by the public.
- In table **FD-3**, nonmarketable Treasury securities held by U.S. Government accounts are summarized by issues to particular funds within Government. Many of the funds invest in par value special series nonmarketables at interest rates determined by law. Others invest in market-based special Treasury securities whose terms mirror those of marketable securities.
- Table **FD-4** presents interest-bearing securities issued by Government agencies. Federal agency borrowing

has declined in recent years, in part because the Federal Financing Bank has provided financing to other Federal agencies. (Federal agency borrowing from Treasury is presented in the "Monthly Treasury Statement of Receipts and Outlays of the United States Government.")

• Table **FD-5** illustrates the average length of marketable interest-bearing public debt held by private investors and the maturity distribution of that debt.

In March 1971, Congress enacted a limited exception to the amount of bonds with rates greater than 4-1/4 percent that could be held by the public. This permitted Treasury to offer securities maturing in more than 7 years at current market interest rates for the first time since 1965. In March 1976, the definition of a bond was changed to include those securities longer than 10 years to maturity. This exception has expanded since 1971, authorizing Treasury to continue to issue long-term securities. The ceiling on Treasury bonds was repealed on November 10, 1988.

The volume of privately held Treasury marketable securities by maturity class reflects the remaining period to maturity of Treasury bills, notes and bonds. The average length is comprised of an average of remaining periods to maturity, weighted by the amount of each security held by private investors. In other words, computations of average length exclude Government accounts and the FRBs.

- In table **FD-6**, the debt ceiling is compared with the outstanding debt subject to limitation by law. The other debt category includes Federal debt Congress has designated as being subject to the debt ceiling.
- Table **FD-7** details Treasury holdings of securities issued by Government corporations and other agencies. Certain Federal agencies are authorized to borrow money from the Treasury, largely to finance direct loan programs. In addition, agencies such as the Bonneville Power Administration are authorized to borrow from the Treasury to finance capital projects. Treasury, in turn, finances these loans by selling Treasury securities to the public.

INTRODUCTION: Public Debt Operations

Chapter 31 of Title 31 of the United States Code allows the Secretary of Treasury to borrow money by issuing Treasury securities. The Secretary determines the terms and conditions of issue, conversion, maturity, payment, and interest rate. New issues of Treasury notes mature in 2 to 10 years. Bonds mature in more than 10 years from the issue date. Each outstanding marketable security is listed in the "Monthly Statement of the Public Debt of the United States." The information in this section of the "Treasury Bulletin" pertains only to marketable Treasury securities.

- Table **PDO-1** provides a maturity schedule of interest-bearing marketable Treasury notes and bonds. All unmatured Treasury notes and bonds are listed in maturity order, from earliest to latest. A separate breakout is provided for the combined holdings of the Government accounts and Federal Reserve banks (FRBs), so that the "all other investors" category includes all private holdings.
- Table **PDO-2** presents the results of weekly auctions of 4-, 13-, and 26-week bills. Treasury bills mature each Thursday. Issues of 4- and 13-week bills are *reopenings* of 26-week bills. Issues of *cash management* bills also are

presented. High yields on accepted tenders and the dollar value of total bids are presented, with the dollar value of awards made on both competitive and noncompetitive bases.

To encourage the participation of individuals and smaller institutions, Treasury accepts noncompetitive tenders of up to \$5 million for bills and \$5 million for notes and bonds in each auction of securities.

• Table **PDO-3** lists the results of auctions of marketable securities, other than weekly bills, in chronological order over the past 2 years.

Note: Additional information, including auction allotments by investor class for marketable Treasury coupon and bill securities, is posted on the 7th business day of each month at http://www.treas.gov/offices/domestic-finance/ debt-management/investor_class_auction.shtml.

Note: This is the last time the PDO-1 table will appear in the Treasury Bulletin. It can now be found on the Bureau of Public Debt's website at http://www.treasurydirect.gov/govt/reports/pd/pd_pdotables_downloadable_files.htm.

TREASURY FINANCING: JANUARY-MARCH

[Source: Bureau of the Public Debt, Office of Financing]

JANUARY

Auction of 2-Year Notes

On December 21, 2006, Treasury announced it would auction \$20,000 million of 2-year notes of Series AC-2008. The issue was to refund \$24,004 million of securities maturing December 31 and to raise new cash of approximately \$8,996 million.

The notes of Series AC-2008 were dated December 31, 2006, and issued January 2, 2007. They are due December 31, 2008, with interest payable on June 30 and December 31 until maturity. Treasury set an interest rate of 4-3/4 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12 noon eastern standard time (e.s.t.) for noncompetitive tenders and before 1 p.m. e.s.t. for competitive tenders on December 27. Tenders totaled \$49,229 million; Treasury accepted \$20,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 4.765 percent with the equivalent price of \$99.971175. Treasury accepted in full all competitive tenders at yields lower than 4.765 percent. Tenders at the high yield were allotted 2.57 percent. The median yield was 4.740 percent, and the low

yield was 4.711 percent. Noncompetitive tenders totaled \$765 million. Competitive tenders accepted from private investors totaled \$19,235 million. Accrued interest of \$0.26243 per \$1,000 must be paid for the period from December 31, 2006, to January 2, 2007.

In addition to the \$20,000 million of tenders accepted in the auction process, Treasury accepted \$4,817 million from Federal Reserve Banks (FRBs) for their own accounts. The minimum par amount required for STRIPS of notes of Series AC-2008 is \$1,000.

Auction of 5-Year Notes

On December 21, 2006, Treasury announced it would auction \$13,000 million of 5-year notes of Series R-2011. The issue was to refund \$24,004 million of securities maturing December 31 and to raise new cash of approximately \$8,996 million.

The notes of Series R-2011 were dated December 31, 2006, and issued January 2, 2007. They are due December 31, 2011, with interest payable on June 30 and December 31 until maturity. Treasury set an interest rate of 4-5/8 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12 noon e.s.t. for noncompetitive tenders and before 1:00 p.m. e.s.t. for competitive tenders on December 28. Tenders totaled \$32,460 Treasury accepted \$13,000 million. million: All noncompetitive and successful competitive bidders were allotted securities at the high yield of 4.704 percent with an equivalent price of \$99.651392. Treasury accepted in full all competitive tenders at yields lower than 4.704 percent. Tenders at the high yield were allotted 82.97 percent. The median yield was 4.688 percent, and the low yield was 4.656 percent. Noncompetitive tenders totaled \$110 million. Competitive tenders accepted from private investors totaled \$12,890 million. Accrued interest of \$0.25552 per \$1,000 must be paid for the period from December 31, 2006, to January 2, 2007.

In addition to the \$13,000 million of tenders accepted in the auction process, Treasury accepted \$3,131 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series R-2011 is \$1,000.

Auction of 10-Year Treasury Inflation-Protected Security (TIPS)

On January 8, 2007, Treasury announced it would auction \$9,000 million of 10-year TIPS to refund an outstanding adjusted amount of \$17,809 million of securities maturing January 15 and to pay down approximately \$8,809 million.

The 10-year TIPS of Series A-2017 were dated January 15 and issued January 16. They are due January 15, 2017, with interest payable on July 15 and January 15 until maturity.

Treasury received tenders for the TIPS before 12:00 noon e.s.t. for noncompetitive tenders and before 1:00 p.m. e.s.t. for competitive tenders on January 11. Tenders totaled \$15,050 million; Treasury accepted \$9,000 million. All noncompetitive and successful competitive bidders allotted securities at the high yield of 2.449 percent with an equivalent adjusted price of \$99.342280. Treasury accepted in full all competitive tenders at yields lower than 2.449. Tenders at the high yield were allotted 58.08 percent. The median yield was 2.400 percent, and the low yield was 2.350 percent. Noncompetitive tenders totaled \$58 million. Competitive tenders accepted from private investors totaled \$8,893 million. Adjusted accrued interest of \$0.06561 per \$1,000 must be paid for the period from January 15 to January 16. Both the unadjusted price of \$99.347247 and the unadjusted accrued interest of \$0.06561 were adjusted by an index ratio of 0.99995 for the period from January 15 to January 16.

In addition to the \$9,000 million of tenders accepted in the auction process, Treasury accepted \$2,250 million from FRBs for their own accounts. The minimum par amount required for STRIPS of TIPS of Series A-2017 is \$1,000.

Auction of 20-Year TIPS

On January 18, 2007, Treasury announced it would auction \$8,000 million of 20-year TIPS to raise new cash.

The 20-year TIPS of January 2027 were dated January 15 and issued January 31. They are due January 15, 2027, with interest payable on July 15 and January 15 until maturity.

Treasury received tenders for the TIPS before 12 noon e.s.t. for noncompetitive tenders and before 1:00 p.m. e.s.t. for competitive tenders on January 23. Tenders totaled \$16,413 million; Treasury accepted \$8,000 million. noncompetitive and successful competitive bidders were allotted securities at the high yield of 2.420 percent with an equivalent adjusted price of \$99.213485. Treasury accepted in full all competitive tenders at yields lower than 2.420. Tenders at the high yield were allotted 36.52 percent. The median yield was 2.385 percent, and the low yield was 2.000 percent. Noncompetitive tenders totaled \$25 million. Competitive tenders accepted from private investors totaled \$7,975 million. Adjusted accrued interest of \$1.04891 per \$1,000 must be paid for the period from January 15 to January 31. Both the unadjusted price of \$99.289938 and the unadjusted accrued interest of \$1.04972 were adjusted by an index ratio of 0.99923 for the period from January 15 to January 31.

In addition to the \$8,000 million of tenders accepted in the auction process, Treasury accepted \$1,188 million from FRBs for their own accounts. The minimum par amount required for STRIPS of TIPS of January 2027 is \$1,000.

Auction of 2-Year Notes

On January 22, 2007, Treasury announced it would auction \$20,000 million of 2-year notes of Series V-2009. The issue was to refund \$22,936 million of securities maturing January 31 and to raise new cash of approximately \$10,064 million.

 $^{^1}$ All 4-week and 13-week bills represent additional issues of bills with an original maturity of 26 weeks or 52 weeks. Certain 26-week bills represent additional issues of bills with an original maturity of 52 weeks. 2 Includes amount awarded to the Federal Reserve System.

³ Tenders for \$1 million or less from any one bidder are accepted in full at the high price of accepted competitive bids. However, as of September 21, 2004, the limit was raised to \$5 million. All Treasury marketable auctions are conducted in a single-price format as of November 2, 1998.
⁴ Equivalent coupon-issue yield.

¹ Currently, all issues are sold at auction. For bill issues, the rate shown is the high bank discount rate. For note and bond issues, the rate shown is the interest rate. For details of bill offerings, see table PDO-2. As of October 1, 1997, all Treasury issues of notes and bonds are eligible for STRIPS.

² From date of additional issue in case of a reopening.

³ Is represented in additional issue in addition to the amount of original efforings.

Note.—Amounts listed as tendered and accepted are amounts tendered and awarded on auction day.

³ In reopenings, the amount accepted is in addition to the amount of original offerings.

 $^{^4}$ Includes securities issued to the Federal Reserve System; and to foreign and international monetary authorities, whether in exchange for maturing securities or for new

INTRODUCTION: Savings Bonds and Notes

Series EE bonds, on sale since July 1, 1980, and series I bonds, on sale since September 1, 1998, are the savings bonds currently being sold. As of September 1, 2004, investors are no longer able to reinvest H and HH bonds or exchange E and EE bonds for HH bonds. Series A-D were sold from March 1, 1935, through April 30, 1941. Series E was on sale from May 1, 1941, through December 31, 1979 (through June 1980 to payroll savers only). Series F and G were sold from May 1, 1941, through April 30, 1952. Series H was sold from June 1, 1952, through December 31, 1979. Series HH bonds were sold for cash from January 1, 1980, through October 31, 1982. Series J and K were sold from May 1, 1952, through April 30, 1957. U.S. savings notes were on sale May 1, 1967, through June 30, 1970. The notes

were eligible for purchase by individuals with the simultaneous purchase of series E savings bonds.

The principal terms and conditions for purchase and redemption and information on investment yields of savings notes appear in the "Treasury Bulletins" of March 1967 and June 1968; and in the Annual Report of the Secretary of the Treasury for fiscal year 1974.

Note: This is the last time the SBN tables will appear in the Treasury Bulletin. They can now be found monthly on the Bureau of Public Debt's website at http://www.treasurydirect.gov/govt/reports/pd/pd_sbntables_downloadable_files.htm.

¹ Because there is a normal lag in classifying redemptions, the distribution of redemptions

between sales price and accrued discount has been estimated.

² Entire fiscal year and calendar year totals are included in 2004, 2005, and 2006 totals.

 $\textbf{Note:} \ \ \textbf{This is the last time the SBN tables will appear in the Treasury Bulletin.} \ \ \textbf{They can}$ now be found monthly on the Bureau of Public Debt's website at http://www.treasurydirect.gov/govt/reports/pd/pd_sbntables_downloadable_files.htm.

Exchange of E and EE bonds for H and HH bonds are not included in sales and redemption figures.
 Entire fiscal year and calendar year totals are included in 2004, 2005, and 2006 totals.

Note: This is the last time the SBN tables will appear in the Treasury Bulletin. They can now be found monthly on the Bureau of Public Debt's website at

http://www.treasurydirect.gov/govt/reports/pd/pd_sbntables_downloadable_files.htm.

INTRODUCTION: Ownership of Federal Securities

Federal securities presented in the following tables are public debt securities such as savings bonds, bills, notes, and bonds that the Treasury issues. The tables also detail debt issued by other Federal agencies under special financing authorities. [See the Federal debt (FD) tables for a more complete description of the Federal debt.]

Effective January 1, 2001, Treasury's Bureau of the Public Debt revised formats, titles, and column headings in the "Monthly Statement of the Public Debt of the United States," Table I: Summary of Treasury Securities Outstanding and Table II: Statutory Debt Limit. These changes should reduce confusion and bring the publication more in line with the public's use of terms.

Treasury's Financial Management Service (FMS) compiles data in the "Treasury Bulletin" table OFS-1 from the "Monthly Statement of the Public Debt of the United States." Effective June 2001, FMS revised procedures and categories in this table to agree with the Bureau of the Public Debt's publication changes.

• Table **OFS-1** presents Treasury marketable and nonmarketable securities and debt issued by other Federal agencies held by Government accounts, the FRBs, and private investors. Social Security and Federal retirement trust fund investments comprise much of the Government account holdings.

The FRBs acquire Treasury securities in the market as a means of executing monetary policy.

• Table **OFS-2** presents the estimated ownership of U.S. Treasury securities. Information is primarily obtained from the Federal Reserve Board of Governors Flow of Funds data, Table L209. State, local, and foreign holdings include special issues of nonmarketable securities to municipal entities and foreign official accounts. They also include municipal, foreign official, and private holdings of marketable Treasury securities. (See footnotes to the table for description of investor categories.)

condition, for System Open Market Accounts; and the U.S. Treasury MSPD for intragovernmental holdings. Federal Reserve holdings exclude Treasury securities held under repurchase agreements.

Source: Federal Reserve Board of Governors, Flow of Funds Table L.209.

⁴ Includes commercial banks, savings institutions, and credit unions.
⁵ Source: "Monthly Statement of the Public Debt of the United States." Current accrual value. 6 Includes U.S. Treasury securities held by the Federal Employees Retirement System

Thrift Savings Plan "G Fund."

 $^{^{\}rm 7}$ Includes money market mutual funds, mutual funds, and closed-end investment companies.

8 Source: Federal Reserve Board Treasury International Capital Survey. Includes

nonmarketable foreign series, Treasury securities, and Treasury deposit funds. Excludes Treasury securities held under repurchase agreements in custody accounts at the Federal Reserve Bank of New York. Estimates reflect the 1989 benchmark to 1994, the 1994 benchmark to September 2001, the March 2000 benchmark to September 2002, the June 2002 benchmark to December 2003, the June 2003 benchmark to March 2004, the June 2004 benchmark to March 2005, the June 2005 benchmark to February 2006, and the June 2006 benchmark to February 2007. For additional information see http://www.treas.gov/tic/ticsec2.shtml.

Includes individuals, Government-sponsored enterprises, brokers and dealers, bank personal trusts and estates, corporate and non-corporate businesses, and other investors.

INTRODUCTION: Market Yields

The table in this section presents yields on Treasury marketable securities for maturities ranging from 1 month to 30 years.

Table MY-1 lists Treasury market bid yields at constant maturities for bills, notes, and bonds. These Constant Maturity Treasury rates (CMTs) are interpolated from the Treasury yield curve and published daily at Treasury's Domestic Finance web site, www.ustreas.gov/offices/domestic-finance/debt-management/interest-rate/yield.shtml. The yield curve is fitted daily using a hermite cubic spline. For inputs, Treasury primarily uses the bid yields of the on-therun securities (most recently auctioned Treasury securities in all maturity tranches that Treasury currently auctions) as

quoted in the secondary bond market as of approximately 3:30 p.m. each trading day. CMT yields are based on semiannual interest payments and are read at constant maturity points to develop a consistent data series.

The quotations used by Treasury to calculate the bid yields and fit the yield curve are obtained by the Federal Reserve Bank of New York. The Board of Governors of the Federal Reserve System also publishes the Treasury constant maturity data series in its weekly Statistical Release H.15.

Treasury discontinued the 30-year constant maturity yield during the time period February 18, 2002, through February 8, 2006. Thus, 30-year yields for that time frame are not available.

INTRODUCTION: U.S. Currency and Coin Outstanding and in Circulation

The U.S. Currency and Coin Outstanding and in Circulation (USCC) statement informs the public of the total face value of currency and coin used as a medium of exchange that is in circulation at the end of a given accounting month. The statement defines the total amount of currency and coin outstanding and the portion deemed to be in circulation. It includes some old and current rare issues that do not circulate or that may do so to a limited extent. Treasury includes them in the statement because the issues were originally intended for general circulation.

The USCC statement provides a description of the various issues of paper money. It also gives an estimated average of currency and coin held by each individual, using estimates of population from the Bureau of the Census. USCC information has been published by Treasury since 1888, and was published separately until 1983, when it was incorporated into the "Treasury Bulletin." The USCC comes from monthly reports compiled by Treasury offices, U.S. Mint offices, the Federal Reserve banks (FRBs), and the Federal Reserve Board.

INTRODUCTION: International Financial Statistics

The tables in this section provide statistics on U.S. Government reserve assets, liabilities to foreigners, and its international financial position. All monetary figures are in dollars or dollar equivalents.

- Table IFS-1 shows reserve assets of the United States, including its gold stock, special drawing rights held in the Special Drawing Account in the International Monetary Fund (IMF), holdings of convertible foreign currencies and reserve position in the IMF.
- Table IFS-2 contains statistics on liabilities to foreign official institutions, and selected liabilities to all other foreigners, which are used in the U.S. balance of payments statistics.
- Table **IFS-3** shows nonmarketable bonds and notes that the Treasury issues to official institutions and other residents of foreign countries.

| 2007 - Jan | 65,063 | 11,041 | 8,786 | 40,381 | 4,855 |
| Feb | 66,082 | 11,041 | 8,915 | 41,251 | 4,874 |
| Mar | 66,551 | 11,041 | 8,948 | 41,716 | 4,846 |
| Apr | 66,720 | 11,041 | 9,030 | 42,095 | 4,553 |

¹ Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing right (SDR) based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and reserve position in the IMF also are valued on this basis beginning July 1974.

Note.—Detail may not add to total due to rounding.

² Treasury values its gold stock at \$42.2222 per fine troy ounce and pursuant to 31 United States Code 5117 (b) issues gold certificates to the Federal Reserve at the same rate against all gold held.

Includes allocations of SDRs in the Special Drawing Account in the IMF, plus or minus

transactions in SDRs.

⁴ Includes holdings of Treasury and Federal Reserve System; beginning November 1978, these are valued at current market exchange rates or, where appropriate, at such other rates as may be agreed upon by the parties to the transactions.

The United States has the right to purchase foreign currencies equivalent to its reserve position in the IMF automatically if needed. Under appropriate conditions, the United States could purchase additional amounts related to the U.S. guota.

Note.—Table is based on Treasury data and on data reported to the Treasury by banks, other depository institutions and brokers in the United States. Data generally correspond to statistics following in this section and in the "Capital Movements" section. Table excludes International Monetary Fund "holdings of dollars" and holdings of U.S. Treasury letters of credit and nonnegotiable noninterest-bearing special U.S. notes held by international and regional organizations.

Includes Bank for International Settlements for data before June 2006.
 Derived by applying reported transactions to benchmark data.

³ Includes current value of zero-coupon Treasury bond issues to foreign governments as follows: Mexico, beginning March 1990, 30-year maturity issue; Venezuela, beginning December 1990, 30-year maturity issue; Argentina, beginning April 1993, 30-year maturity

issue. Also, see footnotes to table IFS-3.

Includes debt securities of U.S. Government corporations, federally-sponsored agencies

Includes debt securities of U.S. Government corporations, federally-sponsored agenciand private corporations.

Includes liabilities payable in dollars to foreign banks and liabilities payable in foreign currencies to foreign banks and to "other foreigners."

Includes marketable U.S. Government bonds and notes held by foreign banks.

Principally the International Bank for Reconstruction and Development, the Inter-

American Development Bank, and the Asian Development Bank. For data as of June 2006, also includes Bank for International Settlements.

⁸ Data on the two lines shown for this date reflect different benchmark bases for foreigners' holdings of selected U.S. long-term securities. Figures on the first line are comparable to those for earlier dates; figures on the second line are based in part on benchmark surveys as of end-March 2000, end-June 2002, end-June 2003, end-June 2004, end-June 2005, and end-June 2006, respectively, and are comparable to those shown for the following

TABLE IFS-3.—Nonmarketable U.S. Treasury Bonds and Notes Issued to Official Institutions and Other Residents of Foreign Countries

¹ Beginning April 1993, includes current value (principal and accrued interest) of zero-coupon, 30-year maturity Treasury bond issue to the government of Argentina. Remaining face value of issue is \$264 million.

Z Beginning March 1990, indicates current value of zero-coupon, 30-year maturity issue to the government of Mexico. Remaining face value of issue is \$3,821 million. Note: This issue was paid off in full and retired on January 29, 2004.

³ Beginning December 1990, indicates current value of zero-coupon, 30-year maturity Treasury bond issue to the Republic of Venezuela. Remaining face value of issue is \$2,721 million.

INTRODUCTION: Capital Movements

Background

Data relating to U.S. international transactions in financial instruments and to other portfolio capital movements between the United States and foreign countries have been collected in some form since 1935. This information is necessary for compiling the U.S. balance of payments accounts, for calculating the U.S. international investment position, and for use in formulating U.S. international financial and monetary policies.

From the beginning, reporting under the Treasury data collection program has been mandatory. Under the current Treasury International Capital (TIC) reporting system, an assortment of monthly and quarterly reports are filed with district Federal Reserve banks by commercial banks. securities dealers, other financial institutions, nonbanking enterprises in the United States. These data are centrally processed and maintained at the Federal Reserve Bank of New York, which, along with the district banks, acts as fiscal agent for Treasury. Beginning in late 1998, the Federal Reserve Board also undertakes services on behalf of Treasury in support of the TIC data collection system. The TIC reports of individual respondents are treated as confidential, and access to the respondent level data is strictly limited to specific staff of Treasury and the Federal Reserve System.

Data derived from Treasury reports are published in the Capital Movements section of this quarterly *Treasury Bulletin* and are posted monthly on the TIC website, http://www.ustreas.gov/tic. (See NOTE at the end of the INTRODUCTION text for additional website information.) TIC data aggregates are also published in the *Federal Reserve Bulletin* and are used in the U.S. international transactions and investment position compilations published by the Department of Commerce in the *Survey of Current Business*.

Forms and instructions are developed with the cooperation of other Government agencies and the Federal Reserve System and in consultation with representatives of banks, securities firms, and nonbanking enterprises. Requests for public comments on proposed changes are published in the Federal Register, and any further modifications are based on the comments received. The most recent revisions to selected reporting forms and instructions were effective June 30, 2006. The reporting forms and instructions may be downloaded from the TIC website. Copies of the reporting forms and instructions also may be obtained from the Global Economics Group, Office of the Assistant Secretary for International Affairs, Treasury, Washington, D.C. 20220; the International Finance Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551; or district Federal Reserve banks.

Basic definitions

The term "foreigner" as used in TIC reporting covers all institutions and individuals resident outside the United States, including: U.S. citizens domiciled abroad; the foreign branches, subsidiaries and offices of U.S. banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located. The term "foreigner" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners.

In general, information is reported opposite the country or geographical area where the foreigner is located, as shown on records of reporting institutions. This information may not always reflect the ultimate ownership of assets. Reporting institutions are not required to go beyond addresses shown on their records and may not be aware of the actual country of domicile of the ultimate beneficiary.

Transactions with branches or agencies of foreign official institutions, wherever located, are reported opposite the country that has sovereignty over the institutions. Transactions with international and regional organizations are not reported opposite any single country, but are accounted for in regional groupings of such organizations. Effective beginning with data for June 2006, information pertaining to the Bank for International Settlements is now included with data for international organizations, and information for the European Central Bank is distributed across the individual euro-area countries. For prior dates, information for these organizations is included in "Other Europe".

"Short-term" refers to obligations payable on demand or having an original maturity of one year or less. "Long-term" refers to obligations having an original maturity of more than one year and includes securities having no maturity.

Reporting coverage

TIC reports are required from banks and other depository institutions, bank/financial holding companies (BHCs/FHCs), securities brokers and dealers, and nonbanking concerns in the United States, including the branches, agencies, subsidiaries, and other affiliates in the United States of foreign banking and nonbanking firms. Institutions with total reportable liabilities, claims, or securities transactions below specified reporting thresholds are exempt from reporting.

Beginning in February 2003, substantial revisions to the coverage and formats of the TIC B-series and C-series forms were introduced. The reasons for the changes were to comply with new and expanded international standards for reporting data on portfolio investment; to reduce reporting burden; to clarify reporting concepts and instructions; and to improve the quality of the series by closing known gaps in the data.

Banks, other depository institutions, and securities brokers and dealers file monthly B-series reports covering their dollar liabilities to and dollar claims on foreigners in a number of countries. Quarterly reports are filed for liabilities and claims denominated in foreign currencies and for claims on foreigners held for respondents' domestic customers. All positions are exclusive of long-term securities. Beginning January 2001, the exemption level applicable to the banking reports was raised from \$15 million to \$50 million. This exemption level is also subject to the provision that reportable amounts for any one country do not exceed \$25 million.

Banks and other depository institutions, securities brokers and dealers, and other entities report their transactions with foreigners by country in long-term securities on monthly Form S. Respondents must report securities transactions with foreigners if their aggregate purchases or their aggregate sales amount to at least \$50 million during the covered month.

TIC Form D is filed quarterly by all U.S. resident banks, securities dealers, and other firms with worldwide holding of derivatives in their own and in their customers' accounts exceeding \$100 billion in notional value. Data from this information collection was first released on May 15, 2007, with data on holdings beginning from end-December 2005, and data on net settlements beginning from the first quarter of 2006.

Quarterly reports are also filed by exporters, importers, industrial and commercial concerns, financial institutions (other than banks, other depository institutions, and securities firms), and other nonbanking enterprises on their liabilities and claims positions with unaffiliated foreigners. Separate reports are filed for financial balances and for commercial balances. Effective for reports filed as of March 31, 2003, the threshold applicable to Form CQ-1 for reporting financial liabilities to, and claims on, foreigners is \$50 million, up from \$10 million. At the same time, the reporting threshold for Form CQ-2, which covers commercial liabilities and claims positions with foreigners, was raised from \$10 million to \$25 million.

Effective with the reports filed for June 2006, the country coverage of the monthly TIC forms was expanded significantly and the semiannual reports, which covered the smaller market economies, were discontinued. Country coverage was also expanded for the quarterly banking forms, the Form S, the Form D, and the Forms CQ-1 and CQ-2, effective with reports filed for June 2006.

The data in these tables do not cover all types of reported capital movements between the United States and other countries. Except as noted in Section IV in "Description of statistics" below, the principal exclusions are the intercompany capital transactions of nonbanking business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies (own foreign offices) and capital transactions of the U.S. Government. Consolidated data on all types of international

capital transactions are published by the Department of Commerce in its regular reports on the U.S. balance of payments.

Description of statistics

Data collected on the TIC forms are published in the "Capital Movements" tables in four sections. Each section contains all the data relevant to the same statistical series, with tables showing time series by type and country, and detailed breakdowns of the latest available data. The expansion of the country coverage on the standard report forms allows for publication of additional country detail for data beginning as of June 2006. As a result, the former Capital Movements Section III, which listed bank-reported claims and liabilities of selected countries from the semiannual reports, has been discontinued.

- **Section I** covers liabilities to foreigners reported by banks, other depository institutions, and securities brokers and dealers in the United States. BHCs/FHCs also report for all domestic nonbank, non-securities firm affiliates, other than their insurance affiliates, which report separately on the C-series forms. Dollar-denominated liabilities are reported monthly on Forms BL-1 and BL-2. Liabilities denominated in foreign currencies are reported quarterly on Form BQ-2. Respondents report certain of their own liabilities and a wide range of their custody liabilities to foreigners. Effective with reports filed as of February 28, 2003, coverage was broadened to cover the positions of U.S. broker-dealer respondents with their affiliated foreign offices. (Depository institutions and BHCs/FHCs already reported such positions.) The scope of the reports was also extended to include cross-border brokerage balances as well as offshore sweep accounts and loans to U.S. residents in "managed" foreign offices of U.S. reporting institutions. Additionally, in a new Part 2, Form BQ-2 was expanded to include the foreign currency-denominated liabilities held by respondents for their domestic customers. Further, banks' own positions have been defined to be consistent with regulatory reports such as the FR 2950/2951 to include all amounts in the respondent's "due to/due from" accounts, unless in an instrument that is specifically excluded. Finally, the columns for demand deposits and non-transactions accounts are now combined, as are short-term U.S. agency securities and other negotiable and readily transferable instruments.
- Section II presents claims on foreigners reported by banks, other depository institutions, and securities brokers and dealers in the United States. BHCs/FHCs also report for their domestic nonbank and non-securities firm affiliates, other than their insurance affiliates, which report separately on the C-series forms. Data on respondents' own dollar claims are collected monthly on Form BC. Information on claims held for domestic customers as well as on claims denominated in foreign currencies is collected on a quarterly basis only on Forms BQ-1 and BQ-2, respectively. Effective with reports filed as of February 28,

2003, reporting coverage was expanded as outlined in Section I. Additionally, columns were added for separate reporting of issued by foreigners. Further, the foreigner category, negotiable CDs and other short-term negotiable instruments issued by foreigners. Further, the foreigner category, "foreign official institutions," replaced the former, broader category, "foreign public borrowers," for consistency with the liabilities reporting on this sector.

• Section III (formerly reported as Section IV) shows the liabilities to, and claims on, unaffiliated foreigners of exporters, importers, industrial and commercial concerns, financial institutions (other than banks, other depository institutions, and securities brokers and dealers), and other nonbanking enterprises in the United States. Data exclude claims on foreigners held by banks in the United States.

Historically, the TIC reports CQ-1 and CQ-2 exclude accounts of nonbanking enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. Such accounts with foreign affiliates are reported by business enterprises to Commerce on its direct investment forms. There was an exception when reporting of foreign affiliate positions of insurance underwriting subsidiaries and financial intermediaries was included in Section B of Form CQ-1 for reports between end-March 2003 and end-March 2006. That reporting requirement was discontinued with the reports beginning as of June 2006.

• Section IV (formerly Section V) contains information on transactions with foreigners in long-term domestic and foreign securities as reported by banks, securities brokers and dealers, and other entities in the United States. The data cover transactions executed in the United States for the accounts of foreigners and transactions executed abroad for the accounts of reporting institutions and their domestic customers. This includes transactions in newly-issued securities as well as transactions in, and redemptions of, outstanding issues. However, the data do not include nonmarketable Treasury bonds and notes shown in table IES-3

The geographical allocation of the transactions data indicates the country of location of the foreign buyers and sellers who deal directly with reporting institutions in the United States. The data do not necessarily indicate the country of beneficial owner or issuer, or the currency of denomination of securities. For instance, a U.S. purchaser's order for Japanese securities may be placed directly with an intermediary in London. In this instance, the transaction for Form S reporting purposes would be recorded opposite the United Kingdom and not opposite Japan. Similarly, purchases and sales of U.S. securities for the account of an Italian resident may be placed, for example, in the Swiss

market. In that case, the trades would be reported opposite Switzerland and not opposite Italy.

• Section V presents quarterly data on holdings and net cash settlements of cross-border derivatives contracts reported by banks, securities brokers, dealers, and nonfinancial companies in the U.S. with sizable holdings of derivatives contracts. Total holdings are divided between those contracts with positive fair values and those contracts with negative fair values from the perspective of the reporter. The fair (market) value is generally defined as the amount for which a derivative contract could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

The data on U.S. net settlements with foreign residents include all cash receipts and payments made during the quarter for the acquisition, sale, or final closeout of derivatives, including all settlement payments under the terms of derivatives contracts such as the periodic settlement under a swap agreement and the daily settlement of an exchange-traded contract. In calculating net settlements, U.S. receipts of cash from foreign persons are positive amounts (+), and U.S. payments of cash to foreign persons are negative amounts (-). Items excluded from net settlements are: (a) collateral including initial and maintenance margins, whether or not in the form of cash; and (b) purchases of underlying commodities, securities, or other noncash assets. (e.g., the purchase/sale by foreigners of a long-term security is reported on TIC Form S).

The gross fair (market) values and net settlement payments on derivatives are reported by type of derivative and by country based on the residence of the direct foreign counterparty. Positions of foreign customers on U.S. exchanges are reported opposite the country in which the foreign counterparty resides. In the case of U.S. residents' futures contracts on foreign exchanges, the country of the exchange is reported as the country of the foreign counterparty.

NOTE: Current and historical data on United States transactions with foreigners in long-term securities on the gross foreign liabilities and claims reported by banks and nonbanks in the United States and on derivatives contracts with foreigners are available on the TIC website: http://www.ustreas.gov/tic. These data may be downloaded as separate time series for each country or geographical area regularly shown in the capital movements tables. Also available on this website are other series, including a table on "Major Foreign Holders of Treasury Securities," showing estimated total holdings of U.S. Treasury bills, bonds and notes for current and recent periods. All data series on the TIC website are updated monthly.

SECTION I.—Liabilities to Foreigners Reported by Banks in the United States

Table CM-I-1.—Total Liabilities by Type and Holder

| | Calendar Year | | 200 | | 2007 | | | | |

¹ Before June 2006, data for Cyprus, Iceland, Kazakhstan, Monaco, and Ukraine are included

in "All other Europe."

On February 4, 2003, Yugoslavia changed its name to Serbia and Montenegro. Data for other entities of the former Yugoslavia recognized as independent states by the United States are reported under "All other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia, and Slovenia; and beginning in June 1994 for the former Yugoslav

Herzegovina, Ordana, and Scronns, and Scronns, Republic of Macedonia.

3 Includes Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, and Spain. As of January 2007, the euro area also includes Slovenia; however, separate data for Slovenia are not available.

4 As of May 2004, the European Union includes Austria, Belgium, Cyprus, the Czech Republic, Caronal France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania

Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, and the United Kingdom. Data available beginning June 2006. As of January 2007, also includes Bulgaria and Romania.

⁵ Before June 2006, data for the Belize, Bolivia, Costa Rica, El Salvador, Guyana, Honduras,

Nicaragua, Paraguay, and Suriname are included in "All other Latin America."

Before June 2006, data for Anguilla, Antigua and Barbuda, Aruba, Barbados, the British Virgin Islands, the Dominican Republic, the French West Indies (primarily Guadeloupe and Martinique), Haiti, St. Kitts and Nevis, and the Turks and Caicos Islands are included in "All

other Caribbean."

⁷ Before June 2006, data for Bangladesh, Jordan, Laos, and Yemen are included in "All other Asia." ⁸ Includes Bahrain, Iran, Iraq, Kuwait, Oman, Qatar, Saudi Arabia, and United Arab Emirates

⁽Trucial States).

⁹ Before June 2006, data for Botswana, Kenya, Mauritius, Mozambique, Tanzania, Uganda, Zambia, and Zimbabwe are included in "All other Africa."

10 Includes Algeria, Gabon, Libya, and Nigeria.

11 Before June 2006, data for French Polynesia are included in "All other."

Delote Surie 2000, data to 1101811 C.,11018 at 3 organizations.

¹ Excludes negotiable certificates of deposit.

² U.S. Treasury bills and certificates held in custody for the account of oil-exporting countries in "Other Asia" and "Other Africa" amount to \$1,972 million.

3 Includes both banks' own liabilities and banks' customer liabilities to foreigners

primarily in the form of loans, including loans associated with repurchase agreements, and non-negotiable short-term securities.

These data as of June 30, 2006.

Before June 2006, data for Cyprus, Kazakhstan, Monaco, and Ukraine are included in "All wher Furger".

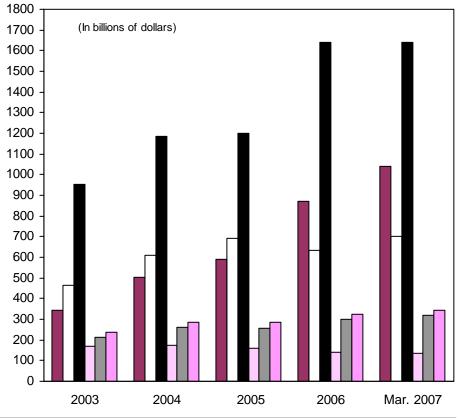

in "All other Europe.

⁶ Includes Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, and Spain. As of January 2007, the euro area also includes Slovenia; however, separate data for Slovenia are not available.
⁷ Before June 2006, data for Belize, Bolivia, Costa Rica, El Salvador, Honduras, and Paraguay are included in "All other Latin America. ⁸ Before June 2006, data for Aruba, Barbados, British Virgin

Islands, Dominican Republic, and Haiti are included in "All other Caribbean."

Before June 2006, data for Jordan are included in "All other Asia."
 Before June 2006, data for Kenya are included in "All other Africa."
 Includes European, Latin American, Caribbean, Asian, African, and Middle East regional organizations.

¹ Includes Bahamas, Bermuda, Cayman Islands, Netherlands Antilles, and Panama. For data beginning June 2006, also includes the British Virgin Islands.

U.S. liabilities to foreigners reported by U.S. banks were recorded at \$4.2 trillion in March 2007, an increase of \$275 billion from yearend 2006. U.S. banking liabilities include foreign holdings of U.S. short-term securities but exclude foreign holdings of U.S. long-term securities. U.S. banking liabilities increased about \$721 billion in 2006, about \$169 billion in 2005, and about \$635 billion in 2004. However, much of the increase in liabilities to foreigners in 2006 reflects changes in coverage in the bank-reported data in the first quarter of 2006. Between March and December of 2006, when data were reported on a consistent basis, banking liabilities increased about \$277 billion.

U.S. banking liabilities are concentrated in international financial centers. The data on this page show that more than 60 percent of U.S. banking liabilities is currently recorded against the United Kingdom and banking centers in the Caribbean. These financial centers have recorded most of the growth in banking liabilities in recent years. Foreigners domiciled in the rest of Europe and in Asia account for about one-third of U.S. banking liabilities.

| Grand total | 1,516,742 | 1,699,999 | 2,188,441 | 2,500,399 | 3,082,183 |

¹ Includes Bahamas, Bermuda, Cayman Islands, Netherlands Antilles, and Panama. For data beginning June 2006, also includes the British Virgin Islands.

In December 2006, U.S. claims on foreigners reported by U.S. banks amounted to about \$3.1 trillion, an increase of \$582 billion from the level recorded at yearend 2005. U.S. banking claims include holdings of foreign short-term securities but exclude holdings of foreign longterm securities. Most of the increase in U.S. banking claims on foreigners in 2006 reflects changes in coverage in the bank-reported data in the first quarter of 2006. Between March and December of 2006, when data were reported on a consistent basis, banking claims increased about \$289 billion. Banking claims increased \$312 billion in 2005, and \$488 billion in 2004.

As with U.S. banking liabilities, U.S. banking claims on foreigners are concentrated in international financial centers. About 60 percent of these claims are reported opposite the United Kingdom and banking centers in the Caribbean. The share of claims against foreigners domiciled in Asia has declined over the past several years from about 20 percent at the end of 1996 to less than 10 percent currently.

SECTION III.—Liabilities to, and Claims on, Unaffiliated Foreigners Reported by Nonbanking Business Enterprises in the United States

 $^{^1}$ Before January 2001, combined data reported for Belgium-Luxembourg. 2 Since December 1992, data for all other republics of the former U.S.S.R. included in

[&]quot;Other Europe."

On February 4, 2003, Yugoslavia changed its name to Serbia and Montenegro. Data for other entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia, and Slovenia; and since June 1994 for the former

Yugoslav Republic of Macedonia.

⁴ Before January 2001, data included in United Kingdom.

 ⁵ Before January 2001, "Other Latin America" and "Other Caribbean" were reported as combined "Other Latin America and Caribbean."
 ⁶ Beginning January 2001, Cayman Islands replaced British West Indies in the data series.
 ⁷ Includes Bahrain, Iran, Iraq, Kuwait, Oman, Qatar, Saudi Arabia, and the United Arab Emirates (Trucial States).
 ⁸ Israhded Alacia, Cabba Libra, and Nicoria.

⁸ Includes Algeria, Gabon, Libya, and Nigeria.
9 Before January 2001, data included in "All other countries."

¹⁰ Includes European, Latin American, Caribbean, Asian, African, and Middle East regional organizations.

 $^{^1}$ Before January 2001, combined data reported for Belgium-Luxembourg. 2 Since December 1992, data for all other republics of the former U.S.S.R. included in "Other Europe."

³ On February 4, 2003, Yugoslavia changed its name to Serbia and Montenegro.

Data for other entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia, and Slovenia; and since June

¹⁹⁹⁴ for the former Yugoslav Republic of Macedonia.

⁴ Before January 2001, data included in United Kingdom.

 ⁵ Before January 2001, "Other Latin America" and "Other Caribbean" were reported as combined "Other Latin America and Caribbean."
 ⁶ Beginning January 2001, Cayman Islands replaced British West Indies in the data series.
 ⁷ Includes Bahrain, Iran, Iraq, Kuwait, Oman, Qatar, Saudi Arabia, and the United Arab

Emirates (Trucial States).

8 Includes Algeria, Gabon, Libya, and Nigeria.

9 Before January 2001, data included in "All other countries."

10 Includes European, Latin American, Caribbean, Asian, African, and Middle East regional organizations.

Before January 2001, combined data reported for Belgium-Luxembourg.
 Since December 1992, data for all other republics of the former U.S.S.R. included in "Other Europe."
 On February 4, 2003, Yugoslavia changed its name to Serbia and Montenegro.

Data for other entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia, and Slovenia; and since June 1994 for the former Yugoslav Republic of Macedonia.

 ⁴ Before January 2001, data included in United Kingdom.
 ⁵ Before January 2001, "Other Latin America" and "Other Caribbean" were reported as combined "Other Latin America and Caribbean."

Beginning January 2001, Cayman Islands replaced British West Indies in the data series.

Before January 2001, data included in "All other countries."
 Includes European, Latin American, Caribbean, Asian, African, and Middle East regional

¹ Before June 2006, data for Cyprus, Kazakhstan, Monaco, and Ukraine are in "All other Europe."

On February 4, 2003, Yugoslavia changed its name to Serbia and Montenegro. Data for other entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia, and Slovenia; and beginning in December 1994 for the former Yugoslav Republic of Macedonia.

beginning in December 1994 for the former Yugoslav Republic of Macedonia.

³ Includes Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, and Spain. As of January 2007, the euro area also includes Slovenia; however, separate data for Slovenia are not available.

⁴ Before June 2006, data for Costa Rica are included in "All other Latin America." ⁵ Before June 2006, data for Anguilla, Barbados, and the British Virgin Islands are included in "All

other Caribbean."
⁶ Includes European, Latin American, Caribbean, Asian, African, and Middle East regional organizations.

¹ On February 4, 2003, Yugoslavia changed its name to Serbia and Montenegro. Data for other entities of the former Yugoslavia recognized as independent states by the United States are reported under "All other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia, and Slovenia; and beginning in December 1994 for the former Yugoslav Republic of Macedonia.

 $^{^{\}rm 2}$ Includes Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, and Spain.

³ Includes European, Latin American, Caribbean, Asian, African, and Middle East regional organizations.

¹ Includes Bahamas, Bermuda, Cayman Islands, Netherlands Antilles, and Panama. For data beginning June 2006, also includes the British Virgin Islands.

The data on this page represent foreign investors' purchases and sales of longterm U.S. securities (that is, U.S. Treasury and Government agency bonds and notes, and U.S. corporate bonds and stocks) as reported to the TIC reporting system. Foreign investors also acquired U.S. equities through mergers and reincorporations that involve stock swaps. Net foreign acquisitions of U.S. equities through stock swaps have been modest, amounting to \$2 billion in 2003, \$36 billion in 2004, \$6 billion in 2005, and \$4 billion in 2006. There are no estimated acquisitions through stock swaps in the first quarter of 2007. (Stock swaps data for the most recent quarter are Federal Reserve Board/Treasury estimates and are subject to substantial revisions.) These stock swaps are not reported under the TIC reporting system, but are available on the TIC web site. The TIC website also provides estimates from the Federal Reserve Bank of New York on principal repayment flows on foreign holdings of U.S. government agency and corporate asset-backed securities (ABS). These repayments also are not reported under the TIC system, but are estimated to have reduced foreign net purchases of U.S. securities by \$123 billion in 2003, \$86 billion in 2004, \$141 billion in both 2005 and 2006, and nearly \$40 billion in the first quarter of 2007.

Net foreign purchases of U.S. securities first surpassed \$100 billion in 1993. In 2003, net foreign acquisitions of U.S. securities (including stock swaps and accounting for ABS repayment flows) totaled \$599 billion. Net acquisitions rose up to \$866 billion in 2004, grew a bit further to \$876 billion in 2005, and reached a new record of \$1,002 billion in 2006. Net purchases were \$263 billion in the first quarter of 2007, about the same pace of acquisition as in 2006.

CHART CM-D.—Net Purchases of Long-Term Foreign Securities by U.S. Investors*

| ■ Foreign bonds | □ Foreign stocks | ■ Total foreign securities |

^{*} Net purchases by U.S. investors equal net sales by foreigners, or gross sales minus gross purchases of securities.

The data on this page represent U.S. investors' purchases and sales of longterm foreign securities as reported to the TIC reporting system. However, in the past several years, U.S. investors also have acquired a substantial amount of foreign stocks, mostly European, through mergers that involve stock swaps. In addition, when foreign firms reincorporate in the United States, the associated stock swap reduces U.S. holdings of foreign equity. Net acquisitions through stock swaps amounted to \$80 billion in 2000, \$47 billion in 2001, \$3 billion in 2002, \$17 billion in 2003, -\$12 billion in 2004, \$4 billion in 2005, \$17 billion in 2006, and \$2 billion in the first quarter of 2007. (Stock swaps data for the most recent quarter are Federal Reserve Board/Treasury estimates and are subject to substantial revisions.) These stock swaps are not reported under the TIC reporting system, but are available on the TIC web site.

Including the stock swaps, annual U.S. net purchases of long-term foreign securities averaged about \$100 billion from the mid-1990s through 2000, without much variation from year to year. U.S. investors' acquisitions of foreign securities (including stock swaps) then slowed over the 2001-2003 period before rebounding to \$141 billion in 2004 and \$176 billion in 2005. The pace of U.S. acquisitions rose further in 2006, as U.S. investors acquired \$264 billion in foreign securities. This strength continued in the first quarter of 2007, as U.S. investors acquired \$80 billion in foreign securities.

Data available beginning June 2006.

INTRODUCTION: Foreign Currency Positions

The "Treasury Bulletin" reports foreign currency holdings of large foreign exchange market participants. These reports provide information on positions in derivative instruments, such as foreign exchange futures and options, that are increasingly used in establishing foreign exchange positions but were not covered in the old reports.

The information is based on reports of large foreign exchange market participants on holdings of five major foreign currencies (Canadian dollar, Japanese yen, Swiss franc, pound sterling, and euro) and the U.S. dollar. Positions in the U.S. dollar, which have been collected since January 1999, are intended to approximate "all other" currency positions of reporting institutions. U.S.-based businesses file a consolidated report for their domestic and foreign subsidiaries, branches, and agencies. U.S. subsidiaries of foreign entities file only for themselves, not for their foreign parents. Filing is required by law (31 United States Code 5315; 31 Code of Federal Regulations 128, Subpart C).

Weekly and monthly reports must be filed throughout the calendar year by major foreign exchange market participants, which are defined as market participants with more than \$50 billion equivalent in foreign exchange contracts on the last business day of any calendar quarter during the previous year (end March, June, September, or December). Such contracts include the amounts of foreign exchange spot contracts bought and sold, foreign exchange forward contracts bought and sold, foreign exchange futures bought and sold, and one half the notional amount of foreign exchange options bought and sold.

A quarterly report must be filed throughout the calendar year by each foreign exchange market participant that had more than \$5 billion equivalent in foreign exchange contracts on the last business day of any quarter the previous year (end March, June, September, or December).

This information is published in six sections corresponding to each of the major currencies covered by the reports. Tables I-1 through VI-1 present the currency data reported weekly by major market participants. Tables I-2 through VI-2 present more detailed currency data of major market participants, based on monthly Treasury reports. Tables I-3 through VI-3 present quarterly consolidated currency data reported by large market participants that do not file weekly reports.

Principal exchanged under cross-currency interest rate swaps is reported as part of purchases or sales of foreign exchange. Such principal also was noted separately on monthly and quarterly reports through December 1998, when this practice was discontinued. The net options position, or the net delta-equivalent value of an options position, is an estimate of the relationship between an option's value and an equivalent currency hedge. The delta equivalent value is defined as the product of the first partial derivative of an option valuation formula (with respect to the price of the underlying currency) multiplied by the notional principal of the contract.

INTRODUCTION: Exchange Stabilization Fund

To stabilize the exchange value of the dollar, the Exchange Stabilization Fund (ESF) was established pursuant to chapter 6, section 10 of the Gold Reserve Act of January 30, 1934 (codified at 31 United States Code 5302), which authorized establishment of a Treasury fund to be operated under the exclusive control of the Secretary, with approval of the President.

Subsequent amendment of the Gold Reserve Act modified the original purpose somewhat to reflect termination of the fixed exchange rate system.

Resources of the fund include dollar balances, partially invested in U.S. Government securities, *special drawing rights* (SDRs), and balances of foreign currencies. Principal sources of income (+) or loss (-) for the fund are profits (+) or losses (-) on SDRs and foreign exchange, as well as interest earned on assets.

- Table **ESF-1** presents the assets, liabilities, and capital of the fund. The figures are in U.S. dollars or their equivalents based on current exchange rates computed according to the accrual method of accounting. The capital account represents the original capital appropriated to the fund by Congress of \$2 billion, minus a subsequent transfer of \$1.8 billion to pay for the initial U.S. quota subscription to the International Monetary Fund. Gains and losses are reflected in the cumulative net income (+) or loss (-) account.
- Table **ESF-2** shows the results of operations by quarter. Figures are in U.S. dollars or their equivalents computed according to the accrual method. "Profit (+) or loss (-) on foreign exchange" includes realized profits or losses. "Adjustment for change in valuation of SDR holdings and allocations" reflects net gain or loss on revaluation of SDR holdings and allocations for the quarter.

TABLE ESF-1.—Balances as of Sept 30, 2006, and Dec. 31, 2006

[In thousands of dollars. See footnote on the following page.

TABLE ESF-2.—Income and Expense

[In thousands of dollars. Source: Office of the Assistant Secretary of the Treasury for Management]

| | Current quarter Oct. 1, 2006, | Fiscal year to date Oct. 1, 2006, |
|---|----------------------------------|--------------------------------------|
| | through Dec. 31, 2006 | through Dec. 31, 2006 |
| income and expense | | |
| Profit (+) or loss (-) on: | | |
| Foreign exchange | 410,862 | 410,862 |
| Adjustment for change in valuation of SDR holdings and allocations ¹ | 27,867 | 27,867 |
| Interest (+) or net charges (-) on: | | |
| SDRs | 14,887 | 14,887 |
| U.S. Government securities | 207,367 | 207,367 |
| Foreign exchange | 109,101 | 109,101 |
| Commissions | - | - |
| Income from operations | 770,084 | 770,084 |
| Net income (+) or loss (-) | 770,084 | 770,084 |

¹ Beginning July 1974, the International Monetary Fund adopted a technique for valuing the SDRs based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and allocations are valued on this basis beginning July 1974.

Note.— Annual balance sheets for fiscal years 1934 through 1940 appeared in the 1940 "Annual Report of the Secretary of the Treasury" and those for succeeding years appeared in subsequent reports through 1980. Quarterly balance sheets beginning with December 31, 1938, have been published in the "Treasury Bulletin." Data from inception to September 30, 1978, may be found on the statements published in the January 1979 "Treasury Bulletin."

TABLE TF-6A.—Highway Trust Fund

The following information is released according to the provisions of the Byrd Amendment [codified at 26 United States Code 9503(d)] and represents data concerning the Highway Trust Fund. The figure described as "unfunded authorizations" is the latest estimate received from the DOT for fiscal year 2008.

The 48-month revenue estimates for the highway and mass transit accounts, respectively, include the latest estimates received from Treasury's Office of Tax Analysis for excise taxes, net of refunds. They represent net highway receipts for those periods beginning at the close of fiscal year 2008.

Highway Account

Glossary

With References to Applicable Sections and Tables

Source: Financial Management Service

Accrued discount (SBN-1, -2, -3)—Interest that accumulates on savings bonds from the date of purchase until the date of redemption or final maturity, whichever comes first. Series A, B, C, D, E, EE, F, I, and J are discount or accrual type bonds—meaning principal and interest are paid when bonds are redeemed. Series G, H, HH, and K are current-income bonds, and the semiannual interest paid to their holders is not included in accrued discount.

Amounts outstanding and in circulation (USCC)—Includes all issues by the Bureau of the Mint purposely intended as a medium of exchange. Coins sold by the Bureau of the Mint at premium prices are excluded; however, uncirculated coin sets sold at face value plus handling charge are included.

Average discount rate (PDO-2, -3)—In Treasury bill auctions, purchasers tender competitive bids on a discount rate basis. The average discount rate is the weighted, or adjusted, average of all bids accepted in the auction.

Budget authority ("Federal Fiscal Operations")—Congress passes laws giving budget authority to Government entities, which gives the agencies the power to spend Federal funds. Congress can stipulate various criteria for the spending of these funds. For example, Congress can stipulate that a given agency must spend within a specific year, number of years, or any time in the future.

The basic forms of budget authority are appropriations, authority to borrow, contract authority, and authority to obligate and expend offsetting receipts and collections. The period of time during which Congress makes funds available may be specified as 1-year, multiple-year, or no-year. The available amount may be classified as either definite or indefinite; a specific amount or an unspecified amount can be made available. Authority also may be classified as current or permanent. Permanent authority requires no current action by Congress.

Budget deficit—The total, cumulative amount by which budget outlays (spending) exceed budget receipts (income).

Cash management bills (PDO-2)—Marketable Treasury bills of irregular maturity lengths, sold periodically to fund short-term cash needs of Treasury. Their sale, having higher minimum and multiple purchase requirements than those of other issues, is generally restricted to competitive bidders.

Competitive tenders ("Treasury Financing Operations")—A bid to purchase a stated amount of one issue of Treasury securities at a specified yield or discount. The bid is accepted if it is within the range accepted in the auction. (See Noncompetitive tenders.)

Coupon issue—The issue of bonds or notes (public debt).

Currency no longer issued (USCC)—Old and new series gold and silver certificates, Federal Reserve notes, national bank notes, and 1890 Series Treasury notes.

Current income bonds ("U.S. Savings Bonds and Notes")—Bonds paying semiannual interest to holders. Interest is not included in accrued discount.

Debt outstanding subject to limitation (FD-6)—The debt incurred by the Treasury subject to the statutory limit set by Congress. Until World War I, a specific amount of debt was authorized to each separate security issue. Beginning with the Second Liberty Loan Act of 1917, the nature of the limitation was modified until, in 1941, it developed into an overall limit on the outstanding Federal debt. As of March 2007, the debt limit was \$8,965,000 million; the limit may change from year to year.

The debt subject to limitation includes most of Treasury's public debt except securities issued to the Federal Financing Bank, upon which there is a limitation of \$15 billion, and certain categories of older debt (totaling approximately \$595 million as of February 1991).

Discount—The interest deducted in advance when purchasing notes or bonds. (See Accrued discount.)

Discount rate (PDO-2)—The difference between par value and the actual purchase price paid, annualized over a 360-day year. Because this rate is less than the actual yield (coupon-equivalent rate), the yield should be used in any comparison with coupon issue securities.

Dollar coins (USCC)—Include standard silver and nonsilver coins.

Domestic series (**FD-2**)—Nonmarketable, interest- and non-interest-bearing securities issued periodically by Treasury to the Resolution Funding Corporation (RFC) for investment of funds authorized under section 21B of the Federal Home Loan Bank Act (12 United States Code 1441b).

Federal intrafund transactions ("Federal Fiscal Operations")—Intrabudgetary transactions in which payments and receipts both occur within the same Federal fund group (Federal funds or trust funds).

Federal Reserve notes (USCC)—Issues by the U.S. Government to the public through the Federal Reserve banks and their member banks. They represent money owed by the Government to the public. Currently, the item "Federal Reserve notes—amounts outstanding" consists of new series

116 GLOSSARY

issues. The Federal Reserve note is the only class of currency currently issued.

Foreign ("Foreign Currency Positions," IFS-2, -3)—Locations other than those included under the definition of the United States. (See United States.)

Foreigner ("Capital Movements," IFS-2)—All institutions and individuals living outside the United States, including U.S. citizens living abroad, and branches, subsidiaries, and other affiliates abroad of U.S. banks and business concerns; central governments, central banks, and other official institutions of countries other than the United States; and international and regional organizations, wherever located. Also refers to persons in the United States to the extent that they are known by reporting institutions to be acting for foreigners.

Foreign official institutions ("Capital Movements")—Includes central governments of foreign countries, including all departments and agencies of national governments; central banks, exchange authorities, and all fiscal agents of foreign national governments that undertake activities similar to those of a treasury, central bank, or stabilization fund; diplomatic and consular establishments of foreign national governments; and any international or regional organization, including subordinate and affiliate agencies, created by treaty or convention between sovereign states.

Foreign public borrower ("Capital Movements")—Includes foreign official institutions, as defined above, the corporations and agencies of foreign central governments, including development banks and institutions, and other agencies that are majority-owned by the central government or its departments; and state provincial and local governments of foreign countries and their departments and agencies.

Foreign-targeted issue (PDO-1, -3)—Foreign-targeted issues were notes sold between October 1984 and February 1986 to foreign institutions, foreign branches of U.S. institutions, foreign central banks or monetary authorities, or to international organizations in which the United States held membership. Sold as companion issues, they could be converted to domestic (normal) Treasury notes with the same maturity and interest rates. Interest was paid annually.

Fractional coins (USCC)—Coins minted in denominations of 50, 25, and 10 cents, and minor coins (5 cents and 1 cent).

Government account series (FD-2)—Certain trust fund statutes require the Secretary of the Treasury to apply monies held by these funds toward the issuance of nonmarketable special securities. These securities are sold directly by Treasury to a specific Government agency, trust fund, or account. Their rate is based on an average of market yields on outstanding Treasury obligations, and they may be redeemed at the option of the holder. Roughly 80 percent of these are issued to five holders: the Federal Old-Age and Survivors Insurance Trust Fund; the civil service retirement and

disability fund; the Federal Hospital Insurance Trust Fund; the military retirement fund; and the Unemployment Trust Fund.

Interfund transactions ("Federal Fiscal Operations")—Transactions in which payments are made from one fund group (either Federal funds or trust funds) to a receipt account in another group.

International Monetary Fund ("Exchange Stabilization Fund," IFS-1)—(IMF) Established by the United Nations, the IMF promotes international trade, stability of exchange, and monetary cooperation. Members are allowed to draw from the fund.

Intrabudgetary transactions ("Federal Fiscal Operations")— These occur when payment and receipt both occur within the budget, or when payment is made from off-budget Federal entities whose budget authority and outlays are excluded from the budget totals.

Matured non-interest-bearing debt (SBN-1, -2, -3)—The value of outstanding savings bonds and notes that have reached final maturity and no longer earn interest. Includes all Series A-D, F, G, I, J, and K bonds. Series E bonds (issued between May 1941 and November 1965), Series EE (issued since January 1980), Series H (issued from June 1952 through December 1979), Series HH bonds (issued since January 1980 through October 1982) mature in 20 years, and savings notes issued between May 1967 and October 1970 have a final maturity of 30 years.

Noncompetitive tenders ("Treasury Financing Operations")—Offers by an investor to purchase Treasury securities at the price equivalent to the weighted average discount rate or yield of accepted competitive tenders in a Treasury auction. Noncompetitive tenders are always accepted in full.

Obligations ("Federal Fiscal Operations")—An unpaid commitment to acquire goods or services.

Off-budget Federal entities ("Federal Fiscal Operations")— Federally owned and controlled entities whose transactions are excluded from the budget totals under provisions of law. Their receipts, outlays, and surplus or deficit are not included in budget receipts, outlays, or deficits. Their budget authority is not included in totals of the budget.

Outlays ("Federal Fiscal Operations")—Payments on obligations in the form of cash, checks, the issuance of bonds or notes, or the maturing of interest coupons.

Own foreign offices ("Capital Movements")—Refers to U.S. reporting institutions' parent organizations, branches and/or majority-owned subsidiaries located outside the United States.

Par value—The face value of bonds or notes, including interest.

GLOSSARY 117

Quarterly financing ("Treasury Financing Operations")— Treasury has historically offered packages of several "coupon" security issues on the 15th of February, May, August, and November, or on the next working day. These issues currently consist of a 3-year note, a 10-year note, and a 30-year bond. Treasury sometimes offers additional amounts of outstanding long-term notes or bonds, rather than selling new security issues. (See Reopening.)

Receipts ("Federal Fiscal Operations")—Funds collected from selling land, capital, or services, as well as collections from the public (budget receipts), such as taxes, fines, duties, and fees.

Reopening (PDO-3)—The offer for sale of additional amounts of outstanding issues, rather than an entirely new issue. A reopened issue will always have the same maturity date, CUSIP-number, and interest rate as the original issue.

Special drawing rights ("Exchange Stabilization Fund," IFS-1)—International assets created by IMF that serve to increase international liquidity and provide additional international reserves. SDRs may be purchased and sold among eligible holders through IMF. (See IMF.)

SDR allocations are the counterpart to SDRs issued by IMF based on members' quotas in IMF. Although shown in Exchange Stabilization Fund (ESF) statements as liabilities, they must be redeemed by ESF only in the event of liquidation of, or U.S. withdrawal from, the SDR department of IMF or cancellation of SDRs.

SDR certificates are issued to the Federal Reserve System against SDRs when SDRs are legalized as money. Proceeds of monetization are deposited into an ESF account at the Federal Reserve Bank of New York.

Spot ("Foreign Currency Positions")—Due for receipt or delivery within 2 workdays.

State and local government series (SLGS) (FD-2)—Special nonmarketable certificates, notes, and bonds offered to State

and local governments as a means to invest proceeds from their own tax-exempt financing. Interest rates and maturities comply with IRS arbitrage provisions. SLGS are offered in both time deposit and demand deposit forms. Time deposit certificates have maturities of up to 1 year. Notes mature in 1 to 10 years and bonds mature in more than 10 years. Demand deposit securities are 1-day certificates rolled over with a rate adjustment daily.

Statutory debt limit (FD-6)—By Act of Congress there is a limit, either temporary or permanent, on the amount of public debt that may be outstanding. When this limit is reached, Treasury may not sell new debt issues until Congress increases or extends the limit. For a detailed listing of changes in the limit since 1941, see the Budget of the United States Government. (See debt outstanding subject to limitation.)

STRIPS (PDO-1, -3)—Separate Trading of Registered Interest and Principal Securities. Long-term notes and bonds may be divided into principal and interest-paying components, which may be transferred and sold in amounts as small as \$1,000. STRIPS are sold at auction at a minimum par amount, varying for each issue. The amount is an arithmetic function of the issue's interest rate.

Treasury bills—The shortest term Federal security (maturity dates normally varying from 3 to 12 months), are sold at a discount.

Trust fund transaction ("Federal Fiscal Operations")—An intrabudgetary transaction in which both payments and receipts occur within the same trust fund group.

United States—Includes the 50 States, District of Columbia, Commonwealth of Puerto Rico, American Samoa, Midway Island, Virgin Islands, Wake Island, and all other territories and possessions.

U.S. notes (**USCC**)—Legal tender notes of five different issues: 1862 (\$5-\$1,000 notes); 1862 (\$1-\$2 notes); 1863 (\$5-\$1,000 notes); 1863 (\$1-\$10,000 notes); and 1901 (\$10 notes).
