TREASURY BULLETIN

The Treasury Bulletin is for sale
by the Superintendent of Documents
U.S. Government Printing Office
Washington, D.C. 20402

The Treasury Bulletin is issued quarterly in March, June, September, and December by the Financial Management Service, Governmentwide Accounting, Budget Reports Division. Statistical data is compiled from sources within Treasury departmental offices and bureaus, as well as various other Federal program agencies. Readers can contact the publication staff at (202) 874-9939/9937 to inquire about any of the published information. Suggestions are welcome.

The publication staff can also be reached by electronic mail.

treasury.bulletin@fms.treas.gov

Internet service subscribers can access the Treasury Bulletin in Microsoft Word or PDF format through the Financial Management Service's home page.

Profile of the Economy

[Source: Office of Macroeconomic Analysis]
As of February 16, 2012

Introduction

The recovery continued to firm in the final quarter of 2011, as various components of private demand strengthened further and the temporary factors that had weighed on growth earlier in the year reversed. Labor market conditions also improved. Since the recovery began in mid-2009, the economy has added 3.2 million payroll jobs, and the unemployment rate has declined 1.2 percentage points, but is still high at 8.3 percent. Activity in the housing sector remains weak and continues to be restrained by a number of factors, including the high level of unemployment, excess supply, relatively tight lending standards, and uncertainty about future home price values, but recent data have brightened somewhat.

The run-up in oil and food prices earlier last year impacted inflation as well as private consumption. Headline inflation has moved higher since February 2011, and core inflation (which excludes food and energy) has stabilized very recently at a higher level, although it remains low by historical standards. In financial markets, equity indexes have rallied in recent weeks as risk appetite begins to recover, and Treasury bond yields have generally trended substantially lower.

Financial disbursements under the American Recovery and Reinvestment Act of 2009 (ARRA, or the “Recovery Act”) were increased from \$787 billion to \$840 billion, reflecting additional measures to restore financial stability, create jobs, and improve housing markets. Late last year, the Federal Housing Finance Agency (FHFA) announced changes to the Home Affordable Refinance Program (HARP) in an effort to attract more eligible borrowers who can benefit from refinancing their mortgage loans. At the very end of 2011, the 2 percentage point employee payroll tax cut and unemployment insurance benefits were each extended for 2 months. Most recently, the Administration announced a proposal to help eligible homeowners with mortgage refinancing, and continues to push a number of initiatives designed to boost growth and create jobs in the near term.

Pursuing its statutory mandate to foster maximum employment and price stability, the Federal Reserve continues to bolster liquidity by maintaining holdings of securities at current levels and rolling over holdings of Treasury securities as they mature. At the end of June 2011, the Federal Reserve completed its purchases of longer-term Treasury securities. At its latest meeting in late January, the Federal Open Market Committee (FOMC) extended the timeframe for maintaining the federal funds rate target in its current range of 0 to 0.25 percent from mid-2013 to late 2014, citing weak labor market conditions and a variety of

Growth of Real GDP

significant downside risks to the economy. At that meeting, the FOMC also took the historic step of announcing a long-run inflation goal of 2 percent for the price index for personal consumption expenditures (measured on an annual basis).

Economic Growth

Since the current expansion began in mid-2009, the economy has grown by 6.2 percent and, as of the most recent quarter, real gross domestic product (GDP) was 0.7 percent above its level at the end of 2007, when the recession began. According to the advance estimate, real GDP growth accelerated from a 1.8 percent annual rate in the third quarter of 2011 to a 2.8 percent annual rate in the fourth quarter of 2011—the tenth straight quarter of growth since the economy emerged from recession in mid-2009. While the acceleration was mainly due to a marked pick-up in private inventory accumulation, faster growth of personal consumption expenditures and a notably stronger pace of residential investment also contributed. Consensus forecasts currently put real GDP growth in the first quarter of 2012 at around a 2.0 percent annual rate.

Private domestic final demand (consumption plus private fixed investment, considered a better measure of underlying demand because it subtracts out inventory movements) grew at a 2.2 percent annual rate in the fourth quarter, slowing from the 3.3 percent rate in the third quarter, but above the 1.9 percent pace posted in the first half of 2011. Real personal consumption expenditures—which account for about 70 percent of GDP—advanced by 2.0 percent at an annual

rate in the fourth quarter, faster than the 1.7 percent rise in the third quarter. Consumption added 1.5 percent points to real GDP growth in the latest quarter.

Residential investment—mostly residential homebuilding—surged 10.9 percent in the fourth quarter, after rising 1.3 percent in the third quarter. Residential activity added 0.2 percentage point to real GDP growth in the fourth quarter. Although the housing sector remains weak, recent data have been more favorable. Single-family housing starts fell 1.0 percent in January to 508,000 units (annualized), 72 percent below the January 2006 peak, and well below the 1.1 million average level from 1980 to 2004. New single-family home sales fell 2.2 percent in December to 307,000 (annualized) and were 78 percent below the July 2005 peak of 1.39 million. Existing single-family home sales rose 4.6 percent in December at 4.1 million units (annualized). The number of new single-family homes for sale is at its lowest level on record (back to 1963). Relative to sales, there was a 6.1-month supply of new homes on the market at the end of December. The supply of new homes available for sale has returned to its long-run average; the inventory of existing single-family homes has fallen, but was still high relative to sales at a 6.2-month supply in December. Selected home price measures appear to have stabilized recently, but continue to fall on a year-over-year basis. The Federal Housing Financing Authority (FHFA) purchase-only house price index rose 1.0 percent in November and was down 1.8 percent in the year through November, slowing from the 4.3 percent decline a year earlier. The Standard & Poor's (S&P)/Case-Shiller composite home price indexes declined in November: the 10-city and 20-city indexes each fell 0.7 percent. On a 12-month basis through November 2011, the 10-city index declined 3.6 percent while the 20-city index was 3.7 percent lower. Despite the deceleration in year-over-year declines, the large inventory of homes on the market and in the foreclosure pipeline augur for future weakness in home prices. According to the December 2011 Pulsenomics/Zillow survey of price expectations, home prices are expected to show no recovery during 2012, and a 1.9 percent rise during 2013.

Nonresidential fixed investment—about 10 percent of GDP—rose 1.7 percent at an annual rate in the fourth quarter of 2011, decelerating markedly from an annual rate of 15.7 percent in the third quarter. For the past eight quarters, nonresidential fixed investment growth has averaged 9.3 percent. Growth in business spending on equipment and software slowed to 5.2 percent in the fourth quarter from a 16.2 percent pace in the third quarter. Outlays for structures dropped 7.2 percent in the fourth quarter after jumping by nearly 23 percent and about 14 percent in the second and third quarters, respectively. Altogether, nonresidential fixed investment contributed 0.2 percentage point to real GDP growth in the fourth quarter. Inventory accumulation strengthened, adding nearly 2 percentage points to growth.

Exports account for about 12 percent of GDP, while imports (which are subtracted from total domestic spending

to calculate GDP) account for about 17 percent. In each of the 3 years prior to 2010, the net export deficit (exports less imports) narrowed, reflecting weak demand for imports that exceeded softer foreign demand for U.S. goods and services. The improvement in the net export deficit contributed 1 percentage point on average to quarterly real GDP growth during this period. In 2010, this trend reversed, and for the year as a whole, net exports posed a drag on growth of 0.5 percentage point. Net exports posed a modest drag on growth in the first and fourth quarters of 2011, but contributed to growth in the second and third quarters, such that net exports added 0.1 percentage point to growth in 2011. In the fourth quarter of 2011, exports grew 4.7 percent and imports grew 4.4 percent.

The current account balance (reflecting international trade in goods and services, investment income flows, and unilateral transfers) has been in deficit almost continuously since the early 1980s and, in 2006, reached a record \$803 billion, equivalent to 6.0 percent of GDP. By 2009, the current account deficit had narrowed to \$377 billion (2.7 percent of GDP), as the trade deficit narrowed, but it widened in 2010 to \$471 billion (3.2 percent of GDP) as the U.S. economy recovered. The current account deficit continued to grow in 2011, reaching \$499 million in the second quarter (3.3 percent), but narrowed in the third quarter to \$441 million (2.9 percent).

Government purchases—which account for roughly 20 percent of GDP—fell for the fifth straight quarter in the final quarter of 2011. Purchases fell 4.6 percent after edging down 0.1 percent in the third quarter. Federal spending declined 7.3 percent in the fourth quarter, subtracting 0.6 percentage point from GDP growth, and State and local Government expenditures fell 2.6 percent, subtracting 0.3 percentage point from growth.

Labor Markets

During the recession (from December 2007 through June 2009), the economy lost 7.7 million private-sector jobs. Job losses continued even after the recovery began, but in March 2010 nonfarm payrolls began to rise again. Since then, total employment has grown by nearly 3.2 million. In the private sector, employment has increased by almost 3.7 million during the same period.

Job losses during the recession were spread broadly across most sectors, but with the resumption of job growth, many of these sectors have added jobs. Since the labor market recovery began in early 2010, payrolls in professional and business services have risen by more than 1.1 million, and leisure and hospitality industries' employment has increased by 575,000. Manufacturing payrolls have grown by 400,000 since early 2010. A few sectors continued to add jobs throughout the recession and continue to hire new workers: since early 2010, the health care and social assistance sector has added 541,000 jobs. On the other hand, the Government sector, notably at the local level, has lost more jobs in recent months than during the 19

Payroll Employment

(Average monthly change in thousands
from end of quarter to end of quarter)

months of recession. Since early 2010, Government payrolls have declined by nearly 500,000, including 364,000 local government jobs.

The unemployment rate peaked at 10.0 percent in October 2009—a 26-year high and 5.6 percentage points above the May 2007 low of 4.4 percent. More recently, the unemployment rate has declined, falling from 9.1 percent in mid 2011 to 8.3 percent in January 2012. A broader measure of unemployment that includes workers who are underemployed and those who are only marginally attached to the labor force (the U-6 unemployment rate) reached a record high of 17.2 percent in October 2009 (series dates from 1994)—nearly double its level of 8.8 percent in December 2007. This measure stood at 15.1 percent in January 2012. The percentage of the unemployed who have been out of work for 27 weeks or more peaked at an all-time high of 45.5 percent in March 2011, then edged down briefly before climbing again to reach 45.0 percent in May 2011. As of January 2012, it had eased to 42.9 percent.

Inflation

Headline inflation is higher, but is beginning to stabilize. Core inflation (excluding food and energy) is also rising but remains relatively low by historical standards. Headline consumer prices rose 3.0 percent over the 12 months ending in December, accelerating from the previous year's 1.5 percent increase. Energy prices rose 6.6 percent in the year through December, slowing somewhat from the year-earlier increase of 7.7 percent. On a 12-month basis core consumer

Unemployment Rate

(Percent)

prices (excluding food and energy) rose 2.2 percent through December 2011, compared with a 0.8 percent advance a year earlier. Labor market slack and the continued low level of capacity utilization will likely remain a moderating influence on core inflation and wage growth in the foreseeable future.

Energy prices rose sharply early last year, reflecting political turmoil in the Middle East and North Africa and concerns about supply disruptions. From mid-February to late April 2011, the front-month futures price of West Texas Intermediate (WTI) crude oil increased by almost \$30 (about 35 percent) to nearly \$114 per barrel. Retail gasoline prices climbed in response, reaching a peak of \$3.97 per gallon in May 2011. Energy prices fell over last summer and fall, but have recently moved higher. The front-month futures price of WTI has climbed from an average of \$86 per barrel in October to \$98 per barrel thus far in February 2012. The retail price of regular gasoline was \$3.48 per gallon in the week ending February 6, 2012, down roughly 50 cents from its May 2011 peak but up 35 cents from a year ago.

Food prices have accelerated further in recent months. In the year through December 2011, consumer food prices increased 4.7 percent, much faster than the 1.5 percent rise of the previous year.

Federal Budget and Debt

The federal budget deficit was \$1.3 trillion (8.7 percent of GDP) in fiscal year 2011, little changed from fiscal year 2010 in nominal terms, but down from 9.0 percent of GDP.

Consumer Prices

(Percent change from a year earlier)

The Administration's Fiscal Year 2013 Budget projects the deficit will rise slightly to \$1.33 trillion in fiscal year 2012, but decline as a share of GDP to 8.5 percent, from 8.7 percent in fiscal year 2011. The deficit is projected to narrow to 5.5 percent of GDP in fiscal year 2013 and to 3.9 percent in fiscal year 2014. By 2018, the deficit will fall to less than 3 percent of GDP, and the debt-to-GDP ratio will be on a declining path. The primary deficit – receipts less outlays, excluding net interest – is expected to fall from 7.1 percent of GDP in fiscal year 2012 to 4.0 percent of GDP in fiscal year 2013. The primary deficit is projected to continue to drop until reaching balance in fiscal year 2018, at which point spending will no longer add to the national debt.

Economic Policy

Key fiscal and monetary policy actions taken over the past few years have aided the recovery. On the fiscal policy side, the ARRA authorized the Federal Government to spend \$787 billion to stimulate domestic demand, an amount that was increased to \$840 billion, to be consistent with the President's 2012 Budget. In recent years, this spending provided an important boost to economic activity, but the Administration also proposed and implemented a variety of additional programs to maintain the recovery's momentum. These included an extension and expansion of the first-time home buyer tax credit, a new Small Business Jobs and Wages Tax Credit, and additional financial support for State and local Governments. In December 2010, the 2010 Tax Relief Act authorized a 2 percent payroll tax cut, extensions of unemployment benefits, extensions of refundable tax credits, and a 2-year extension of the 2001 tax cuts.

In late December 2011, the 2 percentage point employee payroll tax cut and unemployment benefits included in the 2010 tax legislation were each extended for two additional months. The Administration has also proposed more than \$350 billion in short-term job creation and growth-boosting

initiatives as part of the fiscal year 2013 budget, including the extension of the 2 percentage point payroll tax cut as well as unemployment benefits through the rest of 2012, an extension of the 100 percent bonus depreciation provision through 2012, and a new tax credit for 2012, focused on small businesses, that gives a 10 percent tax credit equal to 10 percent of wages added up to \$500,000. The Administration recently announced a plan to help eligible homeowners refinance their mortgages in order to take advantage of historically low rates. Presently, an agreement is pending in Congress that would allow an extension of the 2 percent payroll tax cut, unemployment insurance, and existing levels of payments to participating Medicare physicians, all through the end of 2012.

Partly in response to rising financial market stress, as well as to signs of more slowing in the broader economy, the Federal Reserve began easing monetary policy in August 2007. By late 2008, the FOMC had lowered the federal funds target interest rate dramatically, reducing it to a historically low target range of 0 percent to 0.25 percent at the December 2008 FOMC meeting. That target range was maintained at the FOMC's most recent meeting in late January 2012. At the same time, the Committee acknowledged moderate economic expansion as well as improving labor market conditions, but also an elevated unemployment rate and depressed housing market conditions. Significantly, it extended the timeframe for its current monetary policy stance, stating that, "economic conditions...are likely to warrant exceptionally low levels for the federal funds rate at least through late 2014." Previous statements had indicated the target rate would remain low until mid-2013.

In addition to lowering the federal funds rate target, in late 2008, the Federal Reserve significantly expanded its tools to increase liquidity in credit markets, and eased lending terms to sectors in need of liquidity, including a variety of facilities and funds directed at specific financial markets. As of June 30, 2010, all of these special facilities had expired. At the August 2010 FOMC meeting, the Federal Reserve announced it would maintain its holdings of securities at current levels by reinvesting principal payments from agency debt and agency mortgage-backed securities in longer-term Treasury securities and to continue rolling over the Federal Reserve's holdings of Treasury securities as they mature. At the end of June 2011, the FOMC completed purchases of \$600 billion of longer-term Treasury securities. At the September 2011 meeting, the FOMC announced it would extend the average maturity of its holdings (a so-called "twist" operation) by purchasing \$400 billion of longer-term (6 to 30 years) Treasury securities and selling an equal amount of shorter-term (3 years or less) Treasury securities, all by the end of June 2012. The Committee also announced a reinvestment of principal payments from its holdings of agency debt and agency mortgage-backed securities into the latter securities. The FOMC reaffirmed these policies at its January meeting.

Financial Markets

Financial markets have largely recovered from the unprecedented strains experienced in the fall of 2008, but came under renewed pressure in 2011 as investors expressed concerns about slowing economic growth in the U.S. as well as globally and about strains in debt markets in Europe. Credit flows have improved substantially since early 2009, although credit conditions in some markets remain relatively tight. Bank lending conditions have tightened somewhat in standards and terms, but demand for loans, especially various types of commercial loans, has increased. Demand for residential loans has increased in connection with mortgage refinancing. Measures of risk tolerance and volatility deteriorated in late summer, reflecting renewed concerns about economic conditions in the U.S. and abroad, but more recently, have improved.

After plunging 38.5 percent in 2008, the sharpest loss since 1931 (when an earlier version of the index, containing only 90 stocks, dropped 47 percent), the S&P 500 index rose 23.5 percent in 2009, 12.8 percent in 2010, and was flat in 2011. However, thus far in 2012, the S&P 500 is about 8.0 percent higher. The S&P Stock Market Volatility Index (VIX), often used as a measure of financial market uncertainty, surged to an all-time high of 80 percent in late October 2008, after hovering in a range of 20 to 30 percent for most of that year. The VIX retreated fairly steadily during 2009, ending that year at about 20 percent. Since then, the VIX has fluctuated more widely, resurging to 46 percent in mid-May 2010 and to that level again in early October 2011. Since the most recent peak, this index has trended lower, and stood at about 18 percent as of early February.

A variety of factors have buffeted long-term Treasury interest rates, including flight-to-quality flows in response to a variety of specific risk events as well as supply concerns related to funding of the government's debt, concern about the need for fiscal retrenchment, the downgrade of U.S. Treasury debt by rating agency S&P in August 2011, and ongoing concerns about European debt markets and debt downgrades in some European countries. The yield on the 10-year note traded above the 3 percent level during the first half of 2011, but has since trended lower, reaching a record low of 1.72 percent in late September 2011. The 3-month Treasury bill yield fluctuated in a range from about 0.05 percent to 0.17 percent for much of 2011, but since last August, the yield has fluctuated in a range of 0.0 percent to 0.02 percent. It stood at just under 0.01 percent as of early February 2012. The 2- to 10-year Treasury yield spread, one measure of the steepness of the yield curve, widened to 291 basis points in early February 2011, but since then, it has trended noticeably lower, reaching 163 basis points as of early February 2012.

Key interest rates on private securities, which spiked in response to financial market turbulence in late 2008, have since retraced as conditions have stabilized. The spread between the 3-month London Inter-bank Offered Rate (LIBOR) and the 3-month Treasury bill rate (the TED spread, a measure of inter-bank liquidity and credit risk) rose to an all-time high of nearly 460 basis points in early October 2008. However, improvements in short-term credit availability have led to a narrowing of this spread since. In 2011, through early August, the TED spread fluctuated in a range from 14 to 25 basis points. Since then, this spread has widened, reaching almost 60 basis points earlier this year, before narrowing again to 45 basis points in early February.

Long-Term Interest Rate Spreads

Short-Term Interest Rate Spreads

The spread between the Baa corporate bond yield and the 10-year Treasury yield peaked at nearly 620 basis points in December 2008. After narrowing, on trend, in the intervening years and trading below 300 basis points for much of 2011, it widened above that level again in early August 2011 and as of early February, stood at 325 basis points, still very high by historical standards.

Rates for conforming mortgages have trended lower in recent years, as have rates for jumbo mortgages. The interest rate for a 30-year conforming fixed-rate mortgage fell to a record low of 3.87 in mid-February 2012.

Foreign Exchange Rates

The value of the U.S. dollar compared with the currencies of seven major trading partners (the euro area countries, Japan, Canada, the United Kingdom, Australia, Sweden, and Switzerland) has depreciated significantly from

its peak in February 2002. For example, between February 2002 and July 2009, the exchange value of the dollar compared to an index of these currencies fell by about 19 percent. Over the past 2 years (January 2010 to January 2012), the dollar has depreciated by about 1.5 percent against this index. Over the longer timeframe, the dollar depreciated by nearly 30 percent against the yen and by almost 40 percent against the euro. Over the past 2 years, the dollar has depreciated by 15.5 percent against the yen and has appreciated by nearly 11 percent against the euro. Against an index of currencies of 19 other important trading partners (including China, India, and Mexico), the dollar depreciated 2 percent over the longer timeframe, and has depreciated roughly 2 percent against this basket over the past 2 years.

INTRODUCTION: Federal Fiscal Operations

Budget authority usually takes the form of appropriations that allow *obligations* to be incurred and payments to be made. Reappropriations are Congressional actions that extend the availability of unobligated amounts that have expired or would otherwise expire. These are counted as new budget authority in the fiscal year of the legislation in which the reappropriation act is included, regardless of when the amounts were originally appropriated or when they would otherwise lapse.

Obligations generally are liquidated by the issuance of checks or the disbursement of cash—*outlays*. Obligations may also be liquidated (and outlays recorded) by the accrual of interest on public issues of Treasury debt securities (including an increase in redemption value of bonds outstanding); or by the issuance of bonds, debentures, notes, monetary credits, or electronic payments.

Refunds of collections generally are treated as reductions of collections, whereas payments for earned-income tax credits in excess of tax liabilities are treated as outlays. Outlays during a fiscal year may be for payment of obligations incurred in prior years or in the same year. Outlays, therefore, flow in part from unexpended balances of prior year budget authority and from budget authority provided for the year in which the money is spent. Total outlays include both budget and off-budget outlays and are stated net of offsetting collections.

Receipts are reported in the tables as either budget receipts or offsetting collections. They are collections from the public, excluding receipts offset against outlays. These, also called governmental receipts, consist mainly of tax receipts (including social insurance taxes), receipts from court fines, certain licenses, and deposits of earnings by the Federal Reserve system. Refunds of receipts are treated as deductions from gross receipts. Total Government receipts are compared with total outlays in calculating the budget surplus or deficit.

Offsetting collections from other Government accounts or the public are of a business-type or market-oriented nature. They are classified as either collections credited to appropriations or fund accounts, or offsetting receipts (i.e., amounts deposited in receipt accounts). The former normally can be used without an appropriation act by Congress. These occur in two instances: (1) when authorized by law, amounts collected for materials or services are treated as reimbursements to appropriations. For accounting purposes, earned reimbursements are also known as revenues. These offsetting collections are netted against gross outlays in determining net outlays from such appropriations; and (2) in the three types of revolving funds (public enterprise, intragovernmental, and trust); offsetting collections are netted against spending, and outlays are reported as the net amount.

Offsetting receipts in receipt accounts cannot be used without appropriation. They are subdivided into three categories: (1) proprietary receipts, or collections from the public, offset against outlays by agency and by function; (2) intragovernmental transactions, or payments into receipt accounts from governmental appropriation or fund accounts. They finance operations within and between Government agencies and are credited with collections from other Government accounts; and (3) offsetting governmental receipts that include foreign cash contributions.

Intrabudgetary transactions are subdivided into three categories: (1) interfund transactions—payments are from one fund group (either Federal funds or trust funds) to a receipt account in the other fund group; (2) Federal intrafund transactions—payments and receipts both occur within the Federal fund group; and (3) trust intrafund transactions—payments and receipts both occur within the trust fund group.

Offsetting receipts are generally deducted from budget authority and outlays by function, subfunction, or agency. There are four types of receipts, however, that are deducted from budget totals as undistributed offsetting receipts. They are: (1) agencies' payments (including payments by *off-budget Federal entities*) as employers into employees' retirement funds; (2) interest received by trust funds; (3) rents and royalties on the Outer Continental Shelf lands; and (4) other interest (i.e., that collected on Outer Continental Shelf money in deposit funds when such money is transferred into the budget).

The Government has used the unified budget concept set forth in the "Report of the President's Commission on Budget Concepts" as a foundation for its budgetary analysis and presentation since 1969. The concept calls for the budget to include all of the Government's fiscal transactions with the public. Since 1971, however, various laws have been enacted removing several Federal entities from (or creating them outside of) the budget. Other laws have moved certain off-budget Federal entities onto the budget. Under current law, the off-budget Federal entities consist of the two Social Security trust funds, Federal Old-Age and Survivors Insurance and the Federal Disability Insurance Trust Fund, and the Postal Service.

Although an off-budget Federal entity's receipts, outlays, and surplus or deficit ordinarily are not subject to targets set by the Congressional resolution, the Balanced Budget and Emergency Deficit Control Act of 1985 [commonly known as the Gramm-Rudman-Hollings Act as amended by the Budget Enforcement Act of 1990 (2 United States Code 900-922)] included off-budget surplus or deficit in calculating deficit targets under that act and in calculating excess deficit. Partly for this reason, attention has focused on both on- and off-budget receipts, outlays and deficit of the Government.

Tables **FFO-1**, **FFO-2**, and **FFO-3** are published quarterly and cover 5 years of data, estimates for 2 years, detail for 13 months, and fiscal year-to-date data. They provide a summary of data relating to Federal fiscal operations reported by Federal entities and disbursing officers, and daily reports from the FRBs. They also detail accounting transactions affecting receipts and outlays of the Government and off-budget Federal entities and their related effect on assets and liabilities of the Government. Data are derived from the “Monthly Treasury Statement of Receipts and Outlays of the United States Government.”

- Table **FFO-1** summarizes the amount of total receipts, outlays, and surplus or deficit, as well as transactions in Federal securities, monetary assets, and balances in Treasury operating cash.

- Table **FFO-2** includes on- and off-budget receipts by source. Amounts represent income taxes, social insurance taxes, net contributions for other insurance and retirement, excise taxes, estate and gift taxes, customs duties, and net miscellaneous receipts.

- Table **FFO-3** details on- and off-budget outlays by agency.

- Table **FFO-4** summarizes on- and off-budget receipts by source and outlays by function as reported to each major fund group classification for the current fiscal year to date and prior fiscal year to date.

- Table **FFO-5** summarizes internal revenue receipts by states and by type of tax. Amounts reported are collections made in a fiscal year. They span several tax liability years because they consist of prepayments (estimated tax payments and taxes withheld by employers for individual income and Social Security taxes), payments made with tax returns and subsequent payments made after tax returns are due or are filed (that is, payments with delinquent returns or on delinquent accounts).

Amounts are reported based on the primary filing address provided by each taxpayer or reporting entity. For multistate corporations, the address may reflect only the district where such a corporation reported its taxes from a principal office rather than other districts where income was earned or where individual income and Social Security taxes were withheld. In addition, an individual may reside in one district and work in another.

- Table **FFO-6** includes customs collection of duties, taxes, and fees by districts and ports.

First-Quarter Receipts

The following capsule analysis of budget receipts, by source, for the first quarter of fiscal year 2012 supplements fiscal data reported in the December issue of the “Treasury Bulletin.” At the time of that issue’s release, not enough data were available to adequately analyze collections for the quarter.

Individual income taxes—Individual income tax receipts, net of refunds, were \$270.4 billion for the first quarter of fiscal year 2012. This is an increase of \$14.3 billion over the comparable prior year quarter. Withheld receipts increased by \$5.7 billion and non-withheld receipts increased by \$3.0 billion during this period. Refunds decreased by \$5.6 billion over the comparable fiscal year 2011 quarter. There was a decrease of \$9.1 billion in accounting adjustments between individual income tax receipts and the Social Security and Medicare trust funds over the comparable quarter in fiscal year 2011.

Corporate income taxes—Net corporate income tax receipts were \$55.6 billion for the first quarter of fiscal year 2012. This is an increase of \$19.7 billion compared to the

prior year first quarter. The \$19.7 billion change is comprised of an increase of \$7.0 billion in estimated and final payments, and a decrease of \$12.7 billion in corporate refunds.

Employment taxes and contributions—Employment taxes and contributions receipts for the first quarter of fiscal year 2012 were \$167.7 billion, a decrease of \$12.8 billion over the comparable prior year quarter. Receipts to the Federal Old-Age and Survivors Insurance, Federal Disability Insurance, and Federal Hospital Insurance trust funds changed by -\$14.0 billion, -\$2.4 billion, and \$3.6 billion respectively. There was a -\$7.7 billion accounting adjustment for prior years’ employment tax liabilities made in the first quarter of fiscal year 2012, while there was a -\$16.8 billion adjustment in the first quarter of fiscal year 2011.

Unemployment insurance—Unemployment insurance receipts, net of refunds, for the first quarter of fiscal year 2012 were \$11.3 billion, an increase of \$2.2 billion over the comparable quarter of fiscal year 2011. Net State taxes deposited in the U.S. Treasury increased by \$2.2 billion to \$10.7 billion. Net Federal Unemployment Tax Act taxes decreased by \$0.1 billion to \$0.6 billion.

Budget Results and Financing of the U.S. Government and First-Quarter Receipts by Source, con.

Contributions for other insurance and retirement—Contributions for other retirement were \$1.0 billion for the first quarter of fiscal year 2012. This was a negligible change from the comparable quarter of fiscal year 2011.

Excise taxes—Net excise tax receipts for the first quarter of fiscal year 2012 were \$17.8 billion, an increase of \$1.0 billion over the comparable prior year quarter. Total excise tax refunds for the quarter were \$0.5 billion, an increase of \$0.1 billion over the comparable prior year quarter.

Estate and gift taxes—Net estate and gift tax receipts were \$3.0 billion for the first quarter of fiscal year 2012. These

receipts represent an increase of \$2.3 billion over the same quarter in fiscal year 2011.

Customs duties—Customs duties net of refunds were \$7.7 billion for the first quarter of fiscal year 2012. This is an increase of \$0.3 billion over the comparable prior year quarter.

Miscellaneous receipts—Net miscellaneous receipts for the first quarter of fiscal year 2012 were \$21.0 billion, a decrease of \$3.2 billion over the comparable prior year quarter. This change is due in part to deposits of earnings by Federal Reserve banks decreasing by \$2.9 billion.

INTRODUCTION: Source and Availability of the Balance in the Account of the U.S. Treasury

The Department of the Treasury's (Treasury's) operating cash is maintained in accounts with the Federal Reserve banks (FRBs) and branches, as well as in tax and loan accounts in other financial institutions. Major information sources include FRBs, Treasury Regional Financial Centers, Internal Revenue Service Centers, Bureau of the Public Debt, and various electronic systems. As the FRB accounts are depleted, funds are called in (withdrawn) from thousands of tax and loan accounts at financial institutions throughout the country.

Under authority of Public Law 95-147 (codified at 31 United States Code 323), Treasury implemented a program on November 2, 1978, to invest a portion of its operating cash in obligations of depositaries maintaining tax and loan accounts. Under the Treasury tax and loan (TT&L) investment program, depository financial institutions select the manner in which they will participate. Financial institutions wishing to retain funds deposited into their tax

and loan accounts in interest-bearing obligations can participate. The program permits Treasury to collect funds through financial institutions and to leave the funds in TT&L depositaries and in the financial communities in which they arise until Treasury needs the funds for its operations. In this way, Treasury is able to neutralize the effect of its fluctuating operations on TT&L financial institution reserves and on the economy. Likewise, those institutions wishing to remit the funds to the Treasury account at FRBs do so as collector depositaries.

Deposits to tax and loan accounts occur as customers of financial institutions deposit tax payments that the financial institutions use to purchase Government securities. In most cases, this involves a transfer of funds from a customer's account to the tax and loan account in the same financial institution. Also, Treasury can direct the FRBs to invest excess funds in tax and loan accounts directly from the Treasury account at the FRBs.

¹ This report includes Supplementary Financing Program (SFP) balances.

² Represents transfers from tax and loan note accounts, proceeds from sales of securities other than Government account series, and taxes.

³ Represents checks paid, wire transfer payments, drawdowns on letters of credit, redemptions of securities other than Government account series, and investment (transfer) of excess funds out of this account to the tax and loan note accounts.

⁴ Taxes eligible for credit consist of those deposited by taxpayers in the tax and loan depositories as follows: withheld income taxes beginning March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950 and under the Railroad Retirement Tax Act beginning July 1951; a number of excise taxes beginning July 1953; estimated corporation income taxes beginning April 1967; all corporation income taxes due on or after March 15, 1968; Federal Unemployment Tax Act taxes beginning April 1970; and individual estimated income taxes beginning October 1988.

INTRODUCTION: Federal Debt

Treasury securities (i.e., public debt securities) comprise most of the Federal debt, with securities issued by other Federal agencies accounting for the rest. Tables in this section of the “Treasury Bulletin” reflect the total. Further detailed information is published in the “Monthly Statement of the Public Debt of the United States.” Likewise, information on agency securities and on investments of Federal Government accounts in Federal securities is published in the “Monthly Treasury Statement of Receipts and Outlays of the United States Government.”

Treasury’s Financial Management Service (FMS) compiles data in the “Treasury Bulletin” tables FD-2 and FD-6 from the “Monthly Statement of the Public Debt of the United States.”

- Table **FD-1** summarizes the Federal debt by listing public debt and agency securities held by the public, including the Federal Reserve. It also includes debt held by Federal agencies, largely by the Social Security and other Federal retirement trust funds. The net unamortized premium and discount also are listed by total Federal securities, securities held by Government accounts and securities held by the public. The difference between the outstanding face value of the Federal debt and the net unamortized premium and discount is classified as the accrual amount. (For greater detail on holdings of Federal securities by particular classes of investors, see the ownership tables, OFS-1 and OFS-2.)

- Table **FD-2** categorizes by type, that is, marketable and nonmarketable, the total public debt securities outstanding that are held by the public.

- In table **FD-3**, nonmarketable Treasury securities held by U.S. Government accounts are summarized by issues to particular funds within Government. Many of the funds invest in par value special series nonmarketables at interest rates determined by law. Others invest in market-based special Treasury securities whose terms mirror those of marketable securities.

- Table **FD-4** presents interest-bearing securities issued by Government agencies. Federal agency borrowing

has declined in recent years, in part because the Federal Financing Bank has provided financing to other Federal agencies. (Federal agency borrowing from Treasury is presented in the “Monthly Treasury Statement of Receipts and Outlays of the United States Government.”)

- Table **FD-5** illustrates the average length of marketable interest-bearing public debt held by private investors and the maturity distribution of that debt.

In March 1971, Congress enacted a limited exception to the amount of bonds with rates greater than 4-1/4 percent that could be held by the public. This permitted Treasury to offer securities maturing in more than 7 years at current market interest rates for the first time since 1965. In March 1976, the definition of a bond was changed to include those securities longer than 10 years to maturity. This exception has expanded since 1971, authorizing Treasury to continue to issue long-term securities. The ceiling on Treasury bonds was repealed on November 10, 1988.

The volume of privately held Treasury marketable securities by maturity class reflects the remaining period to maturity of Treasury bills, notes and bonds. The average length is comprised of an average of remaining periods to maturity, weighted by the amount of each security held by private investors. In other words, computations of average length exclude Government accounts and the FRBs.

- In table **FD-6**, the debt ceiling is compared with the outstanding debt subject to limitation by law. The other debt category includes Federal debt Congress has designated as being subject to the debt ceiling.

- Table **FD-7** details Treasury holdings of securities issued by Government corporations and other agencies. Certain Federal agencies are authorized to borrow money from the Treasury, largely to finance direct loan programs. In addition, agencies such as the Bonneville Power Administration are authorized to borrow from the Treasury to finance capital projects. Treasury, in turn, finances these loans by selling Treasury securities to the public.

INTRODUCTION: Public Debt Operations

Chapter 31 of Title 31 of the United States Code allows the Secretary of Treasury to borrow money by issuing Treasury securities. The Secretary determines the terms and conditions of issue, conversion, maturity, payment, and interest rate. New issues of Treasury notes mature in 2 to 10 years. Bonds mature in more than 10 years from the issue date. Each outstanding marketable security is listed in the "Monthly Statement of the Public Debt of the United States." The information in this section of the "Treasury Bulletin" pertains only to marketable Treasury securities.

Table **PDO-1** presents the results of weekly auctions of 4-, 13-, and 26-week bills. Treasury bills mature each Thursday. Issues of 4- and 13-week bills are *reopenings* of 26-week bills. High yields on accepted tenders and the dollar value of total bids are presented, with the dollar value of awards made on both competitive and noncompetitive bases.

To encourage the participation of individuals and smaller institutions, Treasury accepts noncompetitive tenders of up to \$5 million for bills and \$5 million for notes and bonds in each auction of securities.

Table **PDO-2** lists the results of auctions of marketable securities, other than weekly bills, in chronological order over the past 2 years. Issues of *cash management* bills also are presented.

Note: Cash management bills identified below are issued as part of the Supplementary Financing Program (SFP). For more details about the SFP, visit www.treasury.gov/press/releases/hp1144.htm or call 202-622-2960.

Note: On February 4, 2009, Treasury announced the reintroduction of the 7-year note. The first auction of this security took place on February 26, 2009.

TREASURY FINANCING: OCTOBER-DECEMBER

OCTOBER

Cash Management Bills

On October 5, 2011, Treasury announced it would auction \$10,000 million of 5-day bills. They were issued October 12 and matured October 17. Treasury auctioned the bills on October 6. Tenders totaled \$60,450 million; Treasury accepted \$10,000 million. The high bank discount rate was 0.000 percent.

Auction of 3-Year Notes

On October 6, 2011, Treasury announced it would auction \$32,000 million of 3-year notes. The issue was to raise new cash of approximately \$66,000 million.

The 3-year notes of Series AE-2014 were dated October 15 and issued October 17. They are due October 15, 2014, with interest payable on April 15 and October 15 until maturity. Treasury set an interest rate of 0-1/2 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon eastern time (e.t.) for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on October 11. Tenders totaled \$105,629 million; Treasury accepted \$32,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 0.544 percent with the equivalent price of \$99.869476. Treasury accepted in full all competitive tenders at yields lower than 0.544 percent. Tenders at the high yield were allotted 31.18 percent. The median yield was 0.500 percent, and the low yield was 0.410 percent. Noncompetitive tenders totaled \$28 million.

Competitive tenders accepted from private investors totaled \$31,972 million. Accrued interest of \$0.02732 per \$1,000 must be paid for the period from October 15 to October 17. The minimum par amount required for STRIPS of notes of Series AE-2014 is \$100.

Auction of 9-Year 10-Month 2-1/8 Percent Notes

On October 6, 2011, Treasury announced it would auction \$21,000 million of 9-year 10-month 2-1/8 percent notes. The issue was to raise new cash of approximately \$66,000 million.

The 9-year 10-month notes of Series E-2021 were dated August 15 and issued October 17. They are due August 15, 2021, with interest payable on February 15 and August 15 until maturity.

Treasury received tenders for the notes before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on October 12. Tenders totaled \$60,085 million; Treasury accepted \$21,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 2.271 percent with an equivalent price of \$98.717572. Treasury accepted in full all competitive tenders at yields lower than 2.271 percent. Tenders at the high yield were allotted 32.58 percent. The median yield was 2.190 percent, and the low yield was 2.097 percent. Noncompetitive tenders totaled \$11 million. Competitive tenders accepted from private investors totaled \$20,989 million. Accrued interest of \$3.63791 per \$1,000 must be paid for the period from August 15 to October 17. The minimum par amount required for Separate Trading of

TREASURY FINANCING: OCTOBER-DECEMBER, con.

Registered Interest and Principal Securities (STRIPS) of notes of Series E-2021 is \$100.

Auction of 29-Year 10-Month 3-3/4 Percent Bonds

On October 6, 2011, Treasury announced it would auction \$13,000 million of 29-year 10-month 3-3/4 percent bonds. The issue was to raise new cash of approximately \$66,000 million.

The 29-year 10-month bonds of August 2041 were dated August 15 and issued October 17. They are due August 15, 2041, with interest payable on February 15 and August 15 until maturity.

Treasury received tenders for the bonds before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on October 13. Tenders totaled \$38,268 million; Treasury accepted \$13,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 3.120 percent with an equivalent price of \$112.166894. Treasury accepted in full all competitive tenders at yields lower than 3.120 percent. Tenders at the high yield were allotted 84.23 percent. The median yield was 3.095 percent, and the low yield was 3.000 percent. Noncompetitive tenders totaled \$13 million. Competitive tenders accepted from private investors totaled \$12,987 million. Accrued interest of \$6.41984 per \$1,000 must be paid for the period from August 15 to October 17. The minimum par amount required for STRIPS of bonds of August 2041 is \$100.

52-Week Bills

On October 13, 2011, Treasury announced it would auction \$25,000 million of 364-day Treasury bills. They were issued October 20, and will mature October 18, 2012. The issue was to refund \$109,012 million of all maturing bills and raise new cash of approximately \$1,988 million. Treasury auctioned the bills on October 18. Tenders totaled \$112,924 million; Treasury accepted \$25,001 million. That included \$147 million of noncompetitive tenders from the public. The high bank discount rate was 0.120 percent.

Auction of 29-Year 4-Month 2-1/8 Percent Treasury Inflation Protected Security (TIPS)

On October 13, 2011, Treasury announced that it would auction \$7,000 million of 29-year 4-month 2-1/8 percent TIPS. The issue was to refund \$57,236 million of securities maturing October 31 and to raise new cash of approximately \$48,764 million.

The 29-year 4-month TIPS of February 2041 were dated August 15 and issued October 31. They are due February 15, 2041, with interest payable on February 15 and August 15 until maturity.

Treasury received tenders for the TIPS before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on October 20. Tenders totaled \$21,448 million; Treasury accepted \$7,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 0.999 percent with an equivalent adjusted price of \$132.953297. Treasury accepted in full all competitive tenders at yields lower than 0.999 percent. Tenders at the high yield were allotted 87.47 percent. The median yield was 0.960 percent, and the low yield was 0.890 percent. Noncompetitive tenders totaled \$14 million. Competitive tenders accepted from private investors totaled \$6,986 million. Adjusted accrued interest of \$4.59928 per \$1,000 must be paid for the period from August 15 to October 31. Both the unadjusted price of \$128.531803 and the unadjusted accrued interest of \$4.44633 were adjusted by an index ratio of 1.03440, for the period from February 15 to October 31.

In addition to the \$7,000 million of tenders accepted in the auction process, Treasury accepted \$266 million from Federal Reserve banks (FRBs) for their own accounts. The minimum par amount required for STRIPS of TIPS of February 2041 is \$100.

Auction of 2-Year Notes

On October 20, 2011, Treasury announced it would auction \$35,000 million of 2-year notes. The issue was to refund \$57,236 million of securities maturing October 31 and to raise new cash of approximately \$48,764 million.

The 2-year notes of Series AR-2013 were dated and issued October 31. They are due October 31, 2013, with interest payable on April 30 and October 31 until maturity. Treasury set an interest rate of 0-1/4 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on October 25. Tenders totaled \$127,420 million; Treasury accepted \$35,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 0.281 percent with an equivalent price of \$99.938217. Treasury accepted in full all competitive tenders at yields lower than 0.281 percent. Tenders at the high yield were allotted 10.48 percent. The median yield was 0.265 percent, and the low yield was 0.210 percent. Noncompetitive tenders totaled \$198 million. Competitive tenders accepted from private investors totaled \$34,802 million.

In addition to the \$35,000 million of tenders accepted in the auction process, Treasury accepted \$1,331 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series AR-2013 is \$100.

TREASURY FINANCING: OCTOBER-DECEMBER, *con.*

Auction of 5-Year Notes

On October 20, 2011, Treasury announced it would auction \$35,000 million of 5-year notes. The issue was to refund \$57,236 million of securities maturing October 31 and to raise new cash of approximately \$48,764 million.

The 5-year notes of Series AD-2016 were dated and issued October 31. They are due October 31, 2016, with interest payable on April 30 and October 31 until maturity. Treasury set an interest rate of 1 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on October 26. Tenders totaled \$101,458 million; Treasury accepted \$35,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 1.055 percent with an equivalent price of \$99.732813. Treasury accepted in full all competitive tenders at yields lower than 1 percent. Tenders at the high yield were allotted 57.79 percent. The median yield was 1.029 percent, and the low yield was 0.975 percent. Noncompetitive tenders totaled \$29 million. Competitive tenders accepted from private investors totaled \$34,971 million.

In addition to the \$35,000 million of tenders accepted in the auction process, Treasury accepted \$1,331 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series AD-2016 is \$100.

Auction of 7-Year Notes

On October 20, 2011, Treasury announced it would auction \$29,000 million of 7-year notes. The issue was to refund \$57,236 million of securities maturing October 31 and to raise new cash of approximately \$48,764 million.

The 7-year notes of Series R-2018 were dated and issued October 31. They are due October 31, 2018, with interest payable on April 30 and October 31 until maturity. Treasury set an interest rate of 1-3/4 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on October 27. Tenders totaled \$75,061 million; Treasury accepted \$29,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 1.791 percent with an equivalent price of \$99.731389. Treasury accepted in full all competitive tenders at yields lower than 1.791 percent. Tenders at the high yield were allotted 59.51 percent. The median yield was 1.708 percent, and the low yield was 1.600 percent. Noncompetitive tenders totaled \$14 million. Competitive tenders accepted from private investors totaled \$28,986 million.

In addition to the \$29,000 million of tenders accepted in the auction process, Treasury accepted \$1,103 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series R-2018 is \$100.

NOVEMBER

November Quarterly Financing

On November 2, 2011, Treasury announced it would auction \$32,000 million of 3-year notes, \$24,000 million of 10-year notes and \$16,000 million of 30-year bonds to refund \$23,934 million of securities maturing on November 15 and to raise new cash of approximately \$48,066 million.

The 3-year notes of Series AF-2014 were dated and issued November 15. They are due November 15, 2014, with interest payable on May 15 and November 15 until maturity. Treasury set an interest rate of 0-3/8 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on November 8. Treasury accepted in full all competitive tenders at yields lower than 0.352 percent. Tenders at the high yield were allotted 7.09 percent. The median yield was 0.319 percent, and the low yield was 0.256 percent. Noncompetitive tenders totaled \$49 million. Competitive tenders accepted from private investors totaled \$31,951 million.

In addition to the \$32,000 million of tenders accepted in the auction process, Treasury accepted \$1,171 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series AG-2014 is \$100.

Auction of 9-Year 11-Month 2 Percent Notes

On December 8, 2011, Treasury announced that it would auction \$21,000 million of 9-year 11-month 2 percent notes. The issue was to refund \$26,426 million of securities maturing December 15 and to raise new cash of approximately \$39,574 million.

The 9-year 11-month notes of Series F-2021 were dated November 15 and issued December 15. They are due November 15, 2021, with interest payable on May 15 and November 15 until maturity.

Treasury received tenders for the notes before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on December 13. Tenders totaled \$74,207 million; Treasury accepted \$21,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 2.020 percent with an equivalent price of \$99.819684. Treasury accepted in full all competitive tenders at yields lower than 2.020 percent. Tenders at the high yield were allotted 67.48 percent. The median yield was 1.989 percent, and the low yield was 1.850 percent. Noncompetitive tenders totaled \$33 million. Competitive tenders accepted from private investors totaled \$20,967 million. Accrued interest of \$1.64835 per \$1,000 must be paid for the period from November 15 to December 15.

In addition to the \$21,000 million of tenders accepted in the auction process, Treasury accepted \$769 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series F-2021 is \$100.

TREASURY FINANCING: OCTOBER-DECEMBER, con.

Auction of 29-Year 11-Month 3-1/8 Percent Bonds

On December 8, 2011, Treasury announced it would auction \$13,000 million of 29-year 11-month 3-1/8 percent bonds. The issue was to refund \$26,426 million of securities maturing December 15 and to raise new cash of approximately \$39,574 million.

The 29-year 11-month bonds of November 2041 were dated November 15 and issued December 15. They are due November 15, 2041, with interest payable on May 15 and November 15 until maturity.

Treasury received tenders for the bonds before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on December 14. Tenders totaled \$39,635 million; Treasury accepted \$13,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 2.925 percent with an equivalent price of \$103.966337. Treasury accepted in full all competitive tenders at yields lower than 2.925 percent. Tenders at the high yield were allotted 98.64 percent. The median yield was 2.890 percent, and the low yield was 2.815 percent. Noncompetitive tenders totaled \$20 million. Competitive tenders accepted from private investors totaled \$12,980 million. Accrued interest of \$2.57555 per \$1,000 must be paid for the period from November 15 to December 15.

In addition to the \$13,000 million of tenders accepted in the auction process, Treasury accepted \$476 million from FRBs for their own accounts. The minimum par amount required for STRIPS of bonds of November 2041 is \$100.

52-Week Bills

On December 8, 2011, Treasury announced it would auction \$25,000 million of 364-day Treasury bills. They were issued December 15, and will mature December 13, 2012. The

issue was to refund \$109,998 million of all maturing bills and to raise new cash of approximately \$6,002 million. Treasury auctioned the bills on December 13. Tenders totaled \$114,654 million; Treasury accepted \$25,001 million, which included \$161 million of noncompetitive tenders from the public. The high bank discount rate was 0.110 percent.

Auction of 4-Year 4-Month 0-1/8 Percent TIPS

On December 8, 2011, Treasury announced it would auction \$12,000 million of 4-year 4-month 0-1/8 percent TIPS. The issue was to raise new cash of approximately \$12,000 million.

The 4-year 4-month TIPS of Series W-2016 were dated October 15 and issued December 30. They are due April 15, 2016, with interest payable on April 15 and October 15 until maturity.

Treasury received tenders for the TIPS before 12:00 noon e.t. for noncompetitive tenders and before 1:00 p.m. e.t. for competitive tenders on December 15. Tenders totaled \$36,115 million; Treasury accepted \$12,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of -0.877 percent with an equivalent adjusted price of \$107.098375. Treasury accepted in full all competitive tenders at yields lower than -0.877 percent. Tenders at the high yield were allotted 63.94 percent. The median yield was -0.930 percent, and the low yield was -1.010 percent. Noncompetitive tenders totaled \$58 million. Competitive tenders accepted from private investors totaled \$11,942 million. Adjusted accrued interest of \$0.26629 per \$1,000 must be paid for the period from October 15 to December 30. Both the unadjusted price of \$104.392521 and the unadjusted accrued interest of \$0.25956 were adjusted by an index ratio of 1.02592, for the period from April 15 to December 30. The minimum par amount required for STRIPS of TIPS of Series W-2016 is \$100.

¹ Currently, all issues are sold at auction. For bill issues, the rate shown is the high bank discount rate. For note and bond issues, the rate shown is the interest rate. For details of bill offerings, see table PDO-1. As of October 1, 1997, all Treasury issues of notes and bonds are eligible for STRIPS.

² From date of additional issue in case of a reopening.

³ In reopenings, the amount accepted is in addition to the amount of original offerings.

⁴ Includes securities issued to the Federal Reserve System; and to foreign and international monetary authorities, whether in exchange for maturing securities or for new cash.

Note.—Amounts listed as tendered and accepted are amounts tendered and awarded on auction day.

INTRODUCTION: Ownership of Federal Securities

Federal securities presented in the following tables are public debt securities such as savings bonds, bills, notes, and bonds that the Treasury issues. The tables also detail debt issued by other Federal agencies under special financing authorities. [See the Federal debt (FD) tables for a more complete description of the Federal debt.]

Effective January 1, 2001, Treasury's Bureau of the Public Debt revised formats, titles, and column headings in the "Monthly Statement of the Public Debt of the United States," Table I: Summary of Treasury Securities Outstanding and Table II: Statutory Debt Limit. These changes should reduce confusion and bring the publication more in line with the public's use of terms.

Treasury's Financial Management Service (FMS) compiles data in the "Treasury Bulletin" table OFS-1 from the "Monthly Statement of the Public Debt of the United States." Effective June 2001, FMS revised procedures and categories in this table to agree with the Bureau of the Public Debt's publication changes.

- Table **OFS-1** presents Treasury marketable and nonmarketable securities and debt issued by other Federal agencies held by Government accounts, the FRBs, and private investors. Social Security and Federal retirement trust fund investments comprise much of the Government account holdings.

The FRBs acquire Treasury securities in the market as a means of executing monetary policy.

- Table **OFS-2** presents the estimated ownership of U.S. Treasury securities. Information is primarily obtained from the Federal Reserve Board of Governors Flow of Funds data, Table L209. State, local, and foreign holdings include special issues of nonmarketable securities to municipal entities and foreign official accounts. They also include municipal, foreign official, and private holdings of marketable Treasury securities. (See footnotes to the table for description of investor categories.)

INTRODUCTION: U.S. Currency and Coin Outstanding and in Circulation

The U.S. Currency and Coin Outstanding and in Circulation (USCC) statement informs the public of the total face value of currency and coin used as a medium of exchange that is in circulation at the end of a given accounting month. The statement defines the total amount of currency and coin outstanding and the portion deemed to be in circulation. It includes some old and current rare issues that do not circulate or that may do so to a limited extent. Treasury includes them in the statement because the issues were originally intended for general circulation.

The USCC statement provides a description of the various issues of paper money. It also gives an estimated average of currency and coin held by each individual, using estimates of population from the Bureau of the Census. USCC information has been published by Treasury since 1888, and was published separately until 1983, when it was incorporated into the "Treasury Bulletin." The USCC comes from monthly reports compiled by Treasury offices, U.S. Mint offices, the Federal Reserve banks (FRBs), and the Federal Reserve Board.

INTRODUCTION: International Financial Statistics

The tables in this section provide statistics on U.S. Government reserve assets, liabilities to *foreigners*, and its international financial position. All monetary figures are in dollars or dollar equivalents.

- Table **IFS-1** shows reserve assets of the United States, including its gold stock, *special drawing rights* held in the Special Drawing Account in the *International Monetary Fund (IMF)*, holdings of convertible foreign currencies and reserve position in the *IMF*.

- Table **IFS-2** contains statistics on liabilities to *foreign official institutions*, and selected liabilities to all other *foreigners*, which are used in the U.S. balance of payments statistics.

- Table **IFS-3** shows nonmarketable bonds and notes that the Treasury issues to official institutions and other residents of foreign countries.

2012 - Jan	149,280	11,041	55,521	52,279	30,438

¹ Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing right (SDR) based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and reserve position in the IMF also are valued on this basis beginning July 1974.

² Treasury values its gold stock at \$42.2222 per fine troy ounce and pursuant to 31 United States Code 5117 (b) issues gold certificates to the Federal Reserve at the same rate against all gold held.

³ Includes allocations of SDRs in the Special Drawing Account in the IMF, plus or minus transactions in SDRs. Recent allocations are as follows: August 2009—\$43,069 million and September 2009—\$4,529 million.

⁴ Includes holdings of Treasury and Federal Reserve System; consistent with the Quarterly Report on Treasury and Federal Reserve Foreign Exchange Operations, foreign currency dominated assets are shown not at market value but rather at amortized cost revalued at current foreign currency market exchange rates in order to report these assets in U.S. dollars. Excludes outstanding reciprocal currency swaps with foreign central banks. As of end-January 2012, swaps outstanding were \$104.5 billion: \$84.5 billion with the European Central Bank, \$475 million with the Swiss National Bank, and \$19.5 billion with the Bank of Japan.

⁵ The United States has the right to purchase foreign currencies equivalent to its reserve position in the IMF automatically if needed. Under appropriate conditions, the United States could purchase additional amounts related to the U.S. quota.

⁶ IMF data include the reserve tranche position and, as of May 2011, New Arrangements to Borrow.

Note.—Detail may not add to totals due to rounding.

TABLE IFS-2.—Selected U.S. Liabilities to Foreigners

[In millions of dollars. Source: Treasury International Capital Reporting System]

Liabilities to foreign countries												Liabilities to non- monetary international and regional organiza- tions ⁷
End of calendar year or month	Official institutions ¹							Liabilities to other foreigners

¹ Includes Bank for International Settlements.² Derived by applying reported transactions to benchmark data.³ Includes current value of zero-coupon Treasury bond issues to foreign governments as follows: Mexico, beginning March 1990, 30-year maturity issue (Note: this bond was paid off in full in January 2004); Venezuela, beginning December 1990, 30-year maturity issue; Argentina, beginning April 1993, 30-year maturity issue. Also, see footnotes to table IFS-3.⁴ Includes debt securities of U.S. Government corporations, federally-sponsored agencies, and private corporations.⁵ Includes liabilities payable in dollars to foreign banks and liabilities payable in foreign currencies to foreign banks and to "other foreigners."⁶ Includes marketable U.S. Government bonds and notes held by foreign banks.⁷ Principally the International Bank for Reconstruction and Development, the Inter-American Development Bank, and the Asian Development Bank.⁸ Data on the two lines shown for this date reflect different benchmark bases for foreigners' holdings of selected U.S. long-term securities. Figures on the first line are comparable to those for earlier dates; figures on the second line are based in part on benchmark surveys as of end-June 2002, end-June 2003, end-June 2004, end-June 2005, end-June 2006, end-June 2007, end-June 2008, end-June 2009, and end-June 2010, respectively, and are comparable to those shown for the following dates.

Note.—Table is based on Treasury data and on data reported to the Treasury by banks, other depository institutions, and brokers in the United States. Data generally correspond to statistics following in this section and in the "Capital Movements" section. Table excludes International Monetary Fund "holdings of dollars" and holdings of U.S. Treasury letters of credit and nonnegotiable noninterest-bearing special U.S. notes held by international and regional organizations.

TABLE IFS-3.—Nonmarketable U.S. Treasury Bonds and Notes Issued to Official Institutions and Other Residents of Foreign Countries

¹ Beginning April 1993, indicates current value (principal and accrued interest) of zero-coupon, 30-year maturity Treasury bond issue to the government of Argentina. Remaining face value of issue is \$264 million.

² Beginning December 1990, indicates current value of zero-coupon, 30-year maturity Treasury bond issue to the Republic of Venezuela. Remaining face value of issue is \$2,721 million.

INTRODUCTION: Capital Movements

Background

Data relating to U.S. international transactions in financial instruments and to other portfolio capital movements between the United States and foreign countries have been collected in some form since 1935. This information is necessary for compiling the U.S. balance of payments accounts, for calculating the U.S. international investment position, and for use in formulating U.S. international financial and monetary policies.

From the beginning, reporting under the Treasury data collection program has been mandatory. Under the current Treasury International Capital (TIC) reporting system, an assortment of monthly and quarterly reports are filed with district Federal Reserve banks by commercial banks, securities dealers, other financial institutions, and nonbanking enterprises in the United States. These data are centrally processed and maintained at the Federal Reserve Bank of New York, which, along with the district banks, acts as fiscal agent for Treasury. Beginning in late 1998, the Federal Reserve Board also undertakes services on behalf of Treasury in support of the TIC data collection system. The TIC reports of individual respondents are treated as confidential, and access to the respondent level data is strictly limited to specific staff of Treasury and the Federal Reserve System.

Data derived from Treasury reports are published in the Capital Movements section of this quarterly *Treasury Bulletin* and are posted monthly on the TIC website, <http://www.ustreas.gov/tic>. (See **NOTE** at the end of the INTRODUCTION text for additional website information.) TIC data aggregates are also published in the *Federal Reserve Bulletin* and are used in the U.S. international transactions and investment position compilations published by the Department of Commerce in the *Survey of Current Business*.

Forms and instructions are developed with the cooperation of other Government agencies and the Federal Reserve System and in consultation with representatives of banks, securities firms, and nonbanking enterprises. Requests for public comments on proposed changes are published in the *Federal Register*, and any further modifications are based on the comments received. The most recent revisions to selected reporting forms and instructions were effective June 30, 2006. The reporting forms and instructions may be downloaded from the TIC website. Copies of the reporting forms and instructions also may be obtained from the Global Economics Group, Office of the Assistant Secretary for International Affairs, Treasury, Washington, D.C. 20220; the International Finance Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551; or district Federal Reserve banks.

Basic definitions

The term “foreigner” as used in TIC reporting covers all institutions and individuals resident outside the United States, including: U.S. citizens domiciled abroad; the foreign branches, subsidiaries and offices of U.S. banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located. The term “foreigner” also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners.

In general, information is reported opposite the country or geographical area where the foreigner is located, as shown on records of reporting institutions. This information may not always reflect the ultimate ownership of assets. Reporting institutions are not required to go beyond addresses shown on their records and may not be aware of the actual country of domicile of the ultimate beneficiary.

Transactions with branches or agencies of foreign official institutions, wherever located, are reported opposite the country that has sovereignty over the institutions. Transactions with international and regional organizations are not reported opposite any single country, but are accounted for in regional groupings of such organizations. Effective beginning with data for June 2006, information pertaining to the Bank for International Settlements is now included with data for international organizations, and information for the European Central Bank is distributed across the individual euro-area countries. For prior dates, information for these organizations is included in “Other Europe.”

“Short-term” refers to obligations payable on demand or having an original maturity of one year or less. “Long-term” refers to obligations having an original maturity of more than one year and includes securities having no maturity.

Reporting coverage

TIC reports are required from banks and other depository institutions, bank/financial holding companies (BHCs/FHCs), securities brokers and dealers, and nonbanking concerns in the United States, including the branches, agencies, subsidiaries, and other affiliates in the United States of foreign banking and nonbanking firms. Institutions with total reportable liabilities, claims, or securities transactions below specified reporting thresholds are exempt from reporting.

Beginning in February 2003, substantial revisions to the coverage and formats of the TIC B-series and C-series forms were introduced. The reasons for the changes were to comply with new and expanded international standards for reporting data on portfolio investment; to reduce reporting burden; to clarify reporting concepts and instructions; and to improve the quality of the series by closing known gaps in the data.

Banks, other depository institutions, and securities brokers and dealers file monthly B-series reports covering their dollar liabilities to and dollar claims on foreigners in a number of countries. Quarterly reports are filed for liabilities and claims denominated in foreign currencies and for claims on foreigners held for respondents' domestic customers. All positions are exclusive of long-term securities. Beginning January 2001, the exemption level applicable to the banking reports was raised from \$15 million to \$50 million. This exemption level is also subject to the provision that reportable amounts for any one country do not exceed \$25 million.

Banks and other depository institutions, securities brokers and dealers, and other entities report their transactions with foreigners by country in long-term securities on monthly Form S. Respondents must report securities transactions with foreigners if their aggregate purchases or their aggregate sales amount to at least \$50 million during the covered month.

TIC Form D is filed quarterly by all U.S. resident banks, securities dealers, and other firms with worldwide holding of derivatives in their own and in their customers' accounts exceeding \$100 billion in notional value. Data from this information collection was first released on May 15, 2007, with data on holdings beginning from end-December 2005, and data on net settlements beginning from the first quarter of 2006.

Quarterly reports are also filed by exporters, importers, industrial and commercial concerns, financial institutions (other than banks, other depository institutions, and securities firms), and other nonbanking enterprises on their liabilities and claims positions with unaffiliated foreigners. Separate reports are filed for financial balances and for commercial balances. Effective for reports filed as of March 31, 2003, the threshold applicable to Form CQ-1 for reporting financial liabilities to, and claims on, foreigners is \$50 million, up from \$10 million. At the same time, the reporting threshold for Form CQ-2, which covers commercial liabilities and claims positions with foreigners, was raised from \$10 million to \$25 million.

Effective with the reports filed for June 2006, the country coverage of the monthly TIC forms was expanded significantly and the semiannual reports, which covered the smaller market economies, were discontinued. Country coverage was also expanded for the quarterly banking forms, the Form S, the Form D, and the Forms CQ-1 and CQ-2, effective with reports filed for June 2006.

The data in these tables do not cover all types of reported capital movements between the United States and other countries. Except as noted in Section IV in "Description of statistics" below, the principal exclusions are the intercompany capital transactions of nonbanking business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies (own foreign offices) and capital transactions of the U.S. Government. Consolidated data on all types of international

capital transactions are published by the Department of Commerce in its regular reports on the U.S. balance of payments.

Effective with the December 2009 Treasury Bulletin, a number of data reporters were reclassified in the TIC system as bank holding companies, beginning with the reports as of the fourth quarter of 2008. These data reporters are now included in the monthly bank-reported statistics and are no longer reporting as nonbanks.

Description of statistics

Data collected on the TIC forms are published in the "Capital Movements" tables in four sections. Each section contains all the data relevant to the same statistical series, with tables showing time series by type and country, and detailed breakdowns of the latest available data. The expansion of the country coverage on the standard report forms allows for publication of additional country detail for data beginning as of June 2006. As a result, the former Capital Movements Section III, which listed bank-reported claims and liabilities of selected countries from the semiannual reports, has been discontinued.

- **Section I** covers liabilities to foreigners reported by banks, other depository institutions, and securities brokers and dealers in the United States. BHCs/FHCs also report for all domestic nonbank, non-securities firm affiliates, other than their insurance affiliates, which report separately on the C-series forms. Dollar-denominated liabilities are reported monthly on Forms BL-1 and BL-2. Liabilities denominated in foreign currencies are reported quarterly on Form BQ-2. Respondents report certain of their own liabilities and a wide range of their custody liabilities to foreigners. Effective with reports filed as of February 28, 2003, coverage was broadened to cover the positions of U.S. broker-dealer respondents with their affiliated foreign offices. (Depository institutions and BHCs/FHCs already reported such positions.) The scope of the reports was also extended to include cross-border brokerage balances as well as offshore sweep accounts and loans to U.S. residents in "managed" foreign offices of U.S. reporting institutions. Additionally, in a new Part 2, Form BQ-2 was expanded to include the foreign currency-denominated liabilities held by respondents for their domestic customers. Further, banks' own positions have been defined to be consistent with regulatory reports such as the FR 2950/2951 to include all amounts in the respondent's "due to/due from" accounts, unless in an instrument that is specifically excluded. Finally, the columns for demand deposits and non-transactions accounts are now combined, as are short-term U.S. agency securities and other negotiable and readily transferable instruments.

- **Section II** presents claims on foreigners reported by banks, other depository institutions, and securities brokers and dealers in the United States. BHCs/FHCs also report for their domestic nonbank and non-securities firm affiliates, other than their insurance affiliates, which report

separately on the C-series forms. Data on respondents' own dollar claims are collected monthly on Form BC. Information on claims held for domestic customers as well as on claims denominated in foreign currencies is collected on a quarterly basis only on Forms BQ-1 and BQ-2, respectively. Effective with reports filed as of February 28, 2003, reporting coverage was expanded as outlined in Section I. Additionally, columns were added for separate reporting of negotiable CDs and other short-term negotiable instruments issued by foreigners. Further, the foreigner category, "foreign official institutions," replaced the former, broader category, "foreign public borrowers," for consistency with the liabilities reporting on this sector.

- **Section III** (formerly reported as Section IV) shows the liabilities to, and claims on, unaffiliated foreigners of exporters, importers, industrial and commercial concerns, financial institutions (other than banks, other depository institutions, and securities brokers and dealers), and other nonbanking enterprises in the United States. Data exclude claims on foreigners held by banks in the United States.

Historically, the TIC reports CQ-1 and CQ-2 exclude accounts of nonbanking enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. Such accounts with foreign affiliates are reported by business enterprises to Commerce on its direct investment forms. There was an exception when reporting of foreign affiliate positions of insurance underwriting subsidiaries and financial intermediaries was included in Section B of Form CQ-1 for reports between end-March 2003 and end-March 2006. That reporting requirement was discontinued with the reports beginning as of June 2006.

- **Section IV** (formerly Section V) contains information on transactions with foreigners in long-term domestic and foreign securities as reported by banks, securities brokers and dealers, and other entities in the United States. The data cover transactions executed in the United States for the accounts of foreigners and transactions executed abroad for the accounts of reporting institutions and their domestic customers. This includes transactions in newly-issued securities as well as transactions in, and redemptions of, outstanding issues. However, the data do not include nonmarketable Treasury bonds and notes shown in Table IFS-3.

The geographical allocation of the transactions data indicates the country of location of the foreign buyers and sellers who deal directly with reporting institutions in the United States. The data do not necessarily indicate the country of beneficial owner or issuer, or the currency of denomination of securities. For instance, a U.S. purchaser's order for Japanese securities may be placed directly with an intermediary in London. In this instance, the transaction for Form S reporting purposes would be recorded opposite the United Kingdom and not opposite Japan. Similarly,

purchases and sales of U.S. securities for the account of an Italian resident may be placed, for example, in the Swiss market. In that case, the trades would be reported opposite Switzerland and not opposite Italy.

- **Section V** presents quarterly data on holdings and net cash settlements of cross-border derivatives contracts reported by banks, securities brokers, dealers, and nonfinancial companies in the U.S. with sizable holdings of derivatives contracts. Total holdings are divided between those contracts with positive fair values and those contracts with negative fair values from the perspective of the reporter. The fair (market) value is generally defined as the amount for which a derivative contract could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

The data on U.S. net settlements with foreign residents include all cash receipts and payments made during the quarter for the acquisition, sale, or final closeout of derivatives, including all settlement payments under the terms of derivatives contracts such as the periodic settlement under a swap agreement and the daily settlement of an exchange-traded contract. In calculating net settlements, U.S. receipts of cash from foreign persons are positive amounts (+), and U.S. payments of cash to foreign persons are negative amounts (-). Items excluded from net settlements are: (a) collateral including initial and maintenance margins, whether or not in the form of cash; and (b) purchases of underlying commodities, securities, or other noncash assets. (e.g., the purchase/sale by foreigners of a long-term security is reported on TIC Form S).

The gross fair (market) values and net settlement payments on derivatives are reported by type of derivative and by country based on the residence of the direct foreign counterparty. Positions of foreign customers on U.S. exchanges are reported opposite the country in which the foreign counterparty resides. In the case of U.S. residents' futures contracts on foreign exchanges, the country of the exchange is reported as the country of the foreign counterparty.

NOTE: Current and historical data on United States transactions with foreigners in long-term securities on the gross foreign liabilities and claims reported by banks and nonbanks in the United States and on derivatives contracts with foreigners are available on the TIC website: <http://www.ustreas.gov/tic>. These data may be downloaded as separate time series for each country or geographical area regularly shown in the capital movements tables. Also available on this website are other series, including a table on "Major Foreign Holders of Treasury Securities," showing estimated total holdings of U.S. Treasury bills, bonds and notes for current and recent periods. All data series on the TIC website are updated monthly.

SECTION I.—Liabilities to Foreigners Reported by Banks in the United States

¹ Includes Bahamas, Bermuda, Cayman Islands, Netherlands Antilles, and Panama. For data beginning June 2006, also includes the British Virgin Islands.

U.S. liabilities to foreigners reported by U.S. banks were recorded at \$4.9 trillion in December 2011, an increase of \$226 billion from yearend 2010. U.S. banking liabilities include foreign holdings of U.S. short-term securities but exclude foreign holdings of U.S. long-term securities. U.S. banking liabilities decreased about \$427 billion in 2009 but increased about \$200 billion in 2008 and about \$161 billion in 2010. However, the 2008 increase is primarily attributable to the addition of several new bank holding companies to the reporter panel.

U.S. banking liabilities are concentrated in international financial centers. The data on this page show that nearly 60 percent of U.S. banking liabilities is currently recorded against the United Kingdom and banking centers in the Caribbean. These financial centers, particularly the United Kingdom, recorded much of the decline in banking liabilities during the financial crisis and much of the rebound in 2010. In 2011, liabilities to all of Europe grew rapidly as European banks provided funds to support their U.S. branches. U.S. liabilities to foreigners also grew in 2011 for most other regions except the Caribbean, where the decline may partially result from regulatory changes that made positions with offshore branches less advantageous to U.S. banks.

SECTION II.—Claims on Foreigners Reported by Banks in the United States

All other Asia	111,059	66,572	97,448	143,482	199,102
Subtotal	3,505,229	3,390,589	3,588,227	4,026,177	3,848,632
All other countries	309,079	328,604	393,304	519,541	551,768
Grand total	3,814,308	3,719,193	3,981,531	4,545,718	4,400,400

¹ Includes Bahamas, Bermuda, Cayman Islands, Netherlands Antilles, and Panama. For data beginning June 2006, also includes the British Virgin Islands.

In September 2011, U.S. claims on foreigners reported by U.S. banks amounted to about \$4.4 trillion, a decrease of \$145 billion from that recorded at yearend 2010. U.S. banking claims include holdings of foreign short-term securities, but exclude holdings of foreign long-term securities. U.S. banking claims increased \$262 billion in 2009 and \$564 billion in 2010. However, they decreased \$95 billion during the global financial crisis in 2008, despite an increase from the addition of several new bank holding companies to the reporter panel.

As with U.S. banking liabilities, U.S. banking claims on foreigners are concentrated in international financial centers. Over 60 percent of these claims are reported opposite the United Kingdom and banking centers in the Caribbean. These financial centers accounted for much of the decline in U.S. banking claims in 2008. Although U.S. banking claims on most regions rebounded during 2009 and 2010, they fell again during the first three quarters of 2011. Similar to liabilities, the decline in claims against Europe reflects stress on European banks, while the decline in claims against the Caribbean may be partially attributable to regulatory changes affecting this region. The share of U.S. claims accounted for by “All other countries”, which includes Australia and Canada as well as countries in Latin America, has increased steadily over the past 4 years.

SECTION III.—Liabilities to, and Claims on, Unaffiliated Foreigners Reported by Nonbanking Business Enterprises in the United States

¹ Includes Bahamas, Bermuda, British Virgin Islands, Cayman Islands, Netherlands Antilles, and Panama.

The data on this page represent foreign investors' purchases and sales of long-term U.S. securities (that is, U.S. Treasury and Government agency bonds and notes, and U.S. corporate bonds and stocks) as reported in the Treasury International Capital (TIC) reporting system. Foreign investors have also acquired U.S. equities through mergers and reincorporations that involve stock swaps, but these acquisitions have been relatively small in recent years, with no acquisitions in 2008, and acquisitions of less than \$1 billion in 2009. Stock swap acquisitions picked up to over \$8 billion in 2010, but this pace of acquisition again slowed during 2011 to \$5.1 billion. (Stock swaps data for the most recent quarter are Federal Reserve Board/Treasury estimates and are subject to substantial revisions.) These stock swaps are not reported under the TIC reporting system, but are available on the TIC Website. The TIC Website also provides estimates from the Federal Reserve Bank of New York on principal repayment flows of foreign holdings of U.S. government agency and corporate asset-backed securities (ABS). These repayments are estimated to have reduced foreign net purchases of U.S. securities by \$191 billion in 2008, \$204 billion in 2009, \$232 billion in 2010, and \$168 billion in 2011.

After including stock swaps and accounting for ABS repayment flows, net foreign acquisitions of U.S. securities totaled \$224 billion in 2008, as foreign investors acquired U.S. securities in the first half of the year, but on net sold U.S. securities in the second half of the year. Foreign net purchases recovered to \$436 billion in 2009. The pace of acquisition picked up further in 2010, when foreign net purchases were recorded at \$685 billion, surpassing those in 2008 and 2009 and nearly recovering the momentum recorded in 2007. More recently, the pace of acquisition has slowed, with net foreign purchases recorded at only \$276 billion in 2011.

CHART CM-D.—Net Purchases of Long-Term Foreign Securities by U.S. Investors*

[In millions of dollars. Source: Treasury International Capital Reporting System]

Type	Calendar years					2011 Oct. - Dec.
	2007	2008	2009	2010	2011	
Foreign bonds.....	133,905	-53,942	127,474	54,644	52,688	-28,156
Foreign stocks	95,300	-20,246	59,360	60,615	71,218	-9,996
Total.....	229,205	-74,188	186,834	115,259	123,906	-38,152

* Net purchases by U.S. investors equal net sales by foreigners, or gross sales minus gross purchases of securities.

The data on this page represent U.S. investors' purchases and sales of long-term foreign securities as reported to the TIC reporting system. U.S. investors also have acquired foreign stocks through mergers that involve stock swaps. Net acquisitions through stock swaps amounted to \$12 billion in 2007, \$7 billion in 2008, \$2 billion in 2009, \$12 billion in 2010, and \$11 billion in 2011. (Stock swaps data for the most recent quarter are Federal Reserve Board/Treasury estimates and are subject to substantial revisions.) These stock swaps are not reported under the TIC reporting system, but are available on the TIC Website.

Including acquisitions through stock swaps, U.S. net purchases of long-term foreign securities amounted to \$241 billion in 2007. U.S. investors switched to net sales of \$67 billion in foreign securities in 2008, but resumed their net purchases of foreign securities in 2009 with acquisitions of \$189 billion. Net purchases slowed in 2010 to \$127 billion, but have slightly picked up in 2011 to \$135 billion.

¹ As of January 2009, includes Austria, Belgium, Cyprus, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Malta, the Netherlands, Portugal, Slovakia, Slovenia, and Spain. For data as of January 2011, also includes Estonia.

² As of January 2007, the European Union (E.U.) includes Austria, Belgium, Bulgaria, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, and the United Kingdom.

Note.—Negative figures indicate net cash payments or a net outflow of capital from the United States.

INTRODUCTION: Foreign Currency Positions

The “Treasury Bulletin” reports foreign currency holdings of large foreign exchange market participants. These reports provide information on positions in derivative instruments, such as foreign exchange futures and options that are increasingly used in establishing foreign exchange positions but were not covered in the old reports.

The information is based on reports of large foreign exchange market participants on holdings of five major foreign currencies (Canadian dollar, Japanese yen, Swiss franc, pound sterling, and euro) and the U.S. dollar. Positions in the U.S. dollar, which have been collected since January 1999, are intended to approximate “all other” currency positions of reporting institutions. U.S.-based businesses file a consolidated report for their domestic and foreign subsidiaries, branches, and agencies. U.S. subsidiaries of foreign entities file only for themselves, not for their foreign parents. Filing is required by law (31 United States Code 5315; 31 Code of Federal Regulations 128, Subpart C).

Weekly and monthly reports must be filed throughout the calendar year by major foreign exchange market participants, which are defined as market participants with more than \$50 billion equivalent in foreign exchange contracts on the last business day of any calendar quarter during the previous year (end March, June, September, or December). Such contracts include the amounts of foreign exchange spot contracts bought and sold, foreign exchange forward contracts bought and sold, foreign exchange futures bought and sold, and one half the notional amount of foreign exchange options bought and sold.

A quarterly report must be filed throughout the calendar year by each foreign exchange market participant that had more than \$5 billion equivalent in foreign exchange contracts on the last business day of any quarter the previous year (end March, June, September, or December).

This information is published in six sections corresponding to each of the major currencies covered by the reports. Tables I-1 through VI-1 present the currency data reported weekly by major market participants. Tables I-2 through VI-2 present more detailed currency data of major market participants, based on monthly reports. Tables I-3 through VI-3 present quarterly consolidated currency data reported by large market participants that do not file weekly reports. The information in the tables referenced above is based on the reports referenced in this Introduction: Foreign Currency Positions and is not audited by the Federal Reserve banks or the Treasury Department.

Principal exchanged under cross-currency interest rate swaps is reported as part of purchases or sales of foreign exchange. Such principal also was noted separately on monthly and quarterly reports through December 1998, when this practice was discontinued. The net options position, or the net delta-equivalent value of an options position, is an estimate of the relationship between an option’s value and an equivalent currency hedge. The delta equivalent value is defined as the product of the first partial derivative of an option valuation formula (with respect to the price of the underlying currency) multiplied by the notional principal of the contract.

INTRODUCTION: Exchange Stabilization Fund

To stabilize the exchange value of the dollar, the Exchange Stabilization Fund (ESF) was established pursuant to chapter 6, section 10 of the Gold Reserve Act of January 30, 1934 (codified at 31 United States Code 5302), which authorized establishment of a Treasury fund to be operated under the exclusive control of the Secretary, with approval of the President.

Subsequent amendment of the Gold Reserve Act modified the original purpose somewhat to reflect termination of the fixed exchange rate system.

Resources of the fund include dollar balances, partially invested in U.S. Government securities, *special drawing rights* (SDRs), and balances of foreign currencies. Principal sources of income (+) or loss (-) for the fund are profits (+) or losses (-) on SDRs and foreign exchange, as well as interest earned on assets.

- Table **ESF-1** presents the assets, liabilities, and capital of the fund. The figures are in U.S. dollars or their equivalents based on current exchange rates computed according to the accrual method of accounting. The capital account represents the original capital appropriated to the fund by Congress of \$2 billion, minus a subsequent transfer of \$1.8 billion to pay for the initial U.S. quota subscription to the International Monetary Fund. Gains and losses are reflected in the cumulative net income (+) or loss (-) account.

- Table **ESF-2** shows the results of operations by quarter. Figures are in U.S. dollars or their equivalents computed according to the accrual method. "Profit (+) or loss (-) on foreign exchange" includes realized profits or losses. "Adjustment for change in valuation of SDR holdings and allocations" reflects net gain or loss on revaluation of SDR holdings and allocations for the quarter.

¹ Beginning July 1974, the International Monetary Fund adopted a technique for valuing the SDRs based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and allocations are valued on this basis beginning July 1974.

Note. — Annual balance sheets for fiscal years 1934 through 1940 appeared in the 1940 "Annual Report of the Secretary of the Treasury" and those for succeeding years appeared in subsequent reports through 1980. Quarterly balance sheets beginning with December 31, 1938, have been published in the "Treasury Bulletin." Data from inception to September 30, 1978, may be found on the statements published in the January 1979 "Treasury Bulletin."

REPORTS

Financial Report of the
United States Government
Excerpt

Trust Funds

INTRODUCTION: Financial Report of the United States Government

The following pages are excerpted from the 2011 *Financial Report of the United States Government* (*Financial Report*). The report and accompanying information, prepared and published annually by the Financial Management Service, are modeled after corporate-type reports and are developed on an accrual basis of accounting.

The excerpts represent some of the most noteworthy information contained in the *Financial Report*. Data for the *Financial Report* are compiled from Federal program agency

accounting systems Governmentwide. Treasury also presents a management discussion and analysis, the customary notes to the financial statements, a section on stewardship information, and supplemental information in the complete document.

The Government Accountability Office (GAO) is required by law to audit the *Financial Report*. GAO's report, as well as the complete *Financial Report*, can be accessed easily through the internet at www.fms.treas.gov/fr.

Financial Statements of the United States Government for the Years Ended September 30, 2011, and September 30, 2010

Statements of Net Cost

These statements present the net cost of fiscal years 2011 and 2010 Government¹ operations, including the operations related to earmarked funds (funds financed by specifically identified revenues, often supplemented by other financing sources, which remain available over time). The Government's fiscal year begins October 1 and ends September 30. Costs and earned revenues are categorized on the Statement of Net Cost by significant entity, providing greater accountability by showing the relationship of the agencies' net cost to the Governmentwide net cost. Costs and earned revenues are presented in this report by department on an accrual basis, while the budget presents costs and revenues by obligations and receipts, generally on a cash basis. The focus of the budget of the United States is by agency. Budgets are prepared, defended, and monitored by agency. In reporting by agency, we are assisting the external users in assessing the budget integrity, operating performance, stewardship, and systems and controls of the Government.

These statements contain the following four components:

- Gross cost—is the full cost of all the departments and entities excluding (gain)/loss from changes in assumptions. These costs are assigned on a cause-and-effect basis, or reasonably allocated to the corresponding departments and entities.
- Earned revenue—is exchange revenue resulting from the Government providing goods and services to the public at a price.
- (Gain)/loss from changes in assumptions—is the loss or gain from changes in long-term assumptions used to measure the liabilities reported for Federal civilian and military employee pensions, other post-employment benefits and other retirement benefits, including veterans' compensation.
- Net cost—is computed by subtracting earned revenue from gross cost, plus/minus the (gain)/loss from changes in assumptions.

Net cost for Governmentwide reporting purposes includes the General Services Administration (GSA) and the Office of Personnel Management (OPM) agency allocations, and is net of intragovernmental eliminations. For this reason, individual agency net cost amounts will not agree with the agency's financial statements. Because of their specific functions, most of the costs originally associated with GSA and OPM have been allocated to their user agencies for Governmentwide reporting purposes. The remaining costs for GSA and OPM on the Statements of Net Cost are the administrative operating costs, the expenses from prior and past costs from health and pension plan amendments, and the actuarial gains and losses for these agencies, if applicable. The interest on securities issued by the Department of the Treasury (Treasury) and held by the public is reported on Treasury's financial statements, but because of its importance, and the dollar amounts involved, it is reported separately in these statements.

Statements of Operations and Changes in Net Position

These statements report the results of Government operations, which include the results of operations for earmarked funds. They include non-exchange revenues that are generated principally by the Government's sovereign power to tax, levy duties, and assess fines and penalties. These statements also present the cost of Government operations, net of revenue earned from the sale of goods and services to the public (exchange revenue). They further include certain adjustments and unreconciled transactions that affect the net position.

¹ For purposes of this document, "Government" refers to the U.S. Government.

Revenue

Individual income tax and tax withholdings include Federal Insurance Contributions Act (FICA)/Self-Employment Contributions Act (SECA) taxes and other taxes. These taxes are characterized as non-exchange revenue.

Excise taxes consist of taxes collected for various items, such as airline tickets, gasoline products, distilled spirits and imported liquor, tobacco, firearms, and others. These also are characterized as non-exchange revenue.

Other taxes and receipts include Federal Reserve banks (FRBs) earnings, tax related fines, penalties and interest, and railroad retirement taxes.

Miscellaneous earned revenues consist of earned revenues received from the public with virtually no associated cost. These revenues include rents and royalties on the Outer Continental Shelf Lands resulting from the leasing and development of mineral resources on public lands.

Earmarked revenues are required by statute to be used for designated activities, benefits or purposes and must be accounted for separately from the rest of the Government's non-earmarked revenues. See Note 24—Earmarked Funds for detailed information.

Intragovernmental interest represents interest earned from the investment of surplus earmarked revenues, which finance the deficit spending of non-earmarked operations. These investments are recorded as intragovernmental debt holdings and are included in Note 14—Federal Debt Securities Held by the Public and Accrued Interest, in the table titled Intragovernmental Debt Holdings: Federal Debt Securities Held as Investments by Government Accounts. These interest payments and the associated investments are eliminated in the consolidation process.

Net Cost of Government Operations

The net cost of Government operations (gross cost [including (gains)/losses from changes in assumptions] less earned revenue) flows through from the Statements of Net Cost. The net cost associated with earmarked activities is separately reported.

Intragovernmental Transfers

Intragovernmental transfers reflect amounts required by statute to be transferred from the General Fund of the Treasury to earmarked funds (an example is the annual transfer to the Department of Health and Human Services' (HHS) Supplementary Medical Insurance Trust Fund (Medicare Parts B and D) which receives approximately 76 percent and 80 percent, respectively, of its funding from the General Fund.

Unmatched Transactions and Balances

Unmatched transactions and balances are adjustments needed to bring the change in net position into balance due to unreconciled intragovernmental differences, agency reporting errors, timing differences, and General Fund transactions in the consolidated financial statements. See Note 1.T—Summary of Significant Accounting Policies and the Supplemental Information—Unmatched Transactions and Balances for detailed information.

Net Position, Beginning of Period

The net position, beginning of period, reflects the net position reported on the prior year's balance sheet as of the end of that fiscal year. The net position for earmarked funds is shown separately.

Prior-period adjustments are revisions to adjust the beginning net position and balances presented on the prior year financial statements due to corrections of errors or changes in accounting principles. See Note 1.B—Basis of Accounting and Revenue Recognition and Note 21—Prior Period Adjustments for detailed information.

Net Position, End of Period

The net position, end of period, amount reflects the net position as of the end of the fiscal year. The net position for earmarked funds is separately shown.

Reconciliations of Net Operating Cost and Unified Budget Deficit

These statements reconcile the results of operations (net operating cost) on the Statements of Operations and Changes in Net Position to the unified budget deficit. The premise of the reconciliation is that the accrual and budgetary accounting bases share transaction data.

Receipts and outlays in the budget are measured primarily on a cash basis and differ from the accrual basis of accounting used in the *Financial Report*. Refer to Note 1.B—Basis of Accounting and Revenue Recognition for details. These statements begin with the net results of operations (net operating cost), where operating revenues are reported on a modified cash basis of accounting and the net cost of Government operations on an accrual basis of accounting and reports activities where the bases of accounting for the components of net operating cost and the unified budget deficit differ.

Components of Net Operating Cost Not Part of the Budget Deficit

This information includes the operating components, such as the changes in benefits payable for veterans, military and civilian employees, the environmental liabilities, and depreciation expense not included in the budget results.

Components of the Budget Deficit Not Part of Net Operating Cost

This information includes the budget components, such as capitalized fixed assets which are recorded as outlays in the budget when purchased, and reflected in net operating cost through depreciation expense over the useful life of the asset and increases in other assets that are not included in the operating results.

Statements of Changes in Cash Balance from Unified Budget and Other Activities

The primary purpose of these statements is to report how the annual unified budget deficit relates to the change in the Government's cash and other monetary assets and debt held by the public. It explains why the unified budget deficit normally would not result in an equivalent change in the Government's cash and other monetary assets.

These statements reconcile the unified budget deficit to the change in cash and other monetary assets during the fiscal year and explain how the budget deficits (fiscal years 2011 and 2010) were financed. A budget deficit is the result of outlays (expenditures) exceeding receipts (revenue) during a particular fiscal year.

The budget deficit is financed through borrowings from the public. Other transactions also require cash disbursements and are not part of the deficit. These other transactions, such as the payment of interest on debt held by the public, contributed to the use of cash. The budget deficit also includes certain amounts that are recognized in the budget and will be disbursed in a future period or are adjustments that did not affect the cash balance. These amounts include interest accrued on debt issued by Treasury and held by the public and subsidy

expense related to direct and guaranteed loans as well as equity investment activity and did not contribute to the change in the cash balance.

These statements show the adjustments for noncash outlays included in the budget and items affecting the cash balance not included in the budget to explain the change in cash and other monetary assets.

Balance Sheets

The balance sheets show the Government's assets, liabilities, and net position. When combined with stewardship information, this information presents a more comprehensive understanding of the Government's financial position. The net position for earmarked funds is shown separately.

Assets

Assets included on the balance sheets are resources of the Government that remain available to meet future needs. The most significant assets that are reported on the balance sheets are property, plant, and equipment (PP&E), net; inventories and related property, net; cash and other monetary assets; loans receivable and mortgage-backed securities, net; and Troubled Asset Relief Program (TARP) direct loans and equity investments, net. There are, however, other significant resources available to the Government that extend beyond the assets presented in these financial statements. Those resources include stewardship assets, including natural resources, and the Government's sovereign powers to tax, regulate commerce, set monetary policy, and the power to print additional currency.

Liabilities and Net Position

Liabilities are obligations of the Government resulting from prior actions that will require financial resources. The most significant liabilities reported on the balance sheets are Federal debt securities held by the public and accrued interest and Federal employee and veteran benefits payable. Liabilities also include environmental and disposal liabilities, liabilities to Government-Sponsored Enterprises, and benefits due and payable as of the reporting date.

As with reported assets, the Government's responsibilities, policy commitments, and contingencies are much broader than these reported balance sheet liabilities. They include the social insurance programs in the Statements of Social Insurance disclosed in the Supplemental Information—Social Insurance section, the fiscal long-term projections of non-interest spending disclosed in the Supplemental Information—Statement of Fiscal Projections for the U.S. Government section, and a wide range of other programs under which the Government provides benefits and services to the people of this Nation, as well as certain future loss contingencies.

The Government has entered into contractual commitments requiring the future use of financial resources and has unresolved contingencies where existing conditions, situations, or circumstances create uncertainty about future losses. Commitments, as well as contingencies that do not meet the criteria for recognition as liabilities on the balance sheets, but for which there is at least a reasonable possibility that losses have been incurred, are disclosed in Note 22—Contingencies and Note 23—Commitments.

The collection of earmarked taxes and other earmarked revenue is credited to the corresponding Earmarked Fund that will use these funds to meet a particular Government purpose. If the collections from taxes and other sources exceed the payments to the beneficiaries, the excess revenue is invested in Treasury securities or "loaned" to Treasury's General Fund; therefore, the trust fund balances do not represent cash. An explanation of the trust funds for social insurance and many of the other large trust funds is included in Note 24—Earmarked Funds. That note also contains information about trust fund receipts, disbursements, and assets.

Because of its sovereign power to tax and borrow, and the country's wide economic base, the Government has unique access to financial resources through generating tax revenues and issuing Federal debt securities. This provides the Government with the ability to meet present obligations and those that are anticipated from future operations and are not reflected in net position.

Net position is the residual difference between assets and liabilities and is the cumulative results of operations since inception. For detailed components that comprise the net position, refer to the section “Statement of Operations and Changes in Net Position.”

Statements of Social Insurance and Changes in Social Insurance Amounts

The Statements of Social Insurance provide estimates of the status of the most significant social insurance programs: Social Security, Medicare, Railroad Retirement, and Black Lung social insurance programs, which are administered by the Social Security Administration (SSA), HHS, the Railroad Retirement Board (RRB), and the Department of Labor (DOL), respectively. The estimates are actuarial present values² of the projections and are based on the economic and demographic assumptions representing the trustees’ reasonable estimates as set forth in the relevant Social Security and Medicare trustees’ reports and in the agency financial report of HHS and DOL (Black Lung) and in the relevant agency performance and accountability reports for the SSA and RRB. The projections are based on the continuation of program provisions contained in current law.

The magnitude and complexity of social insurance programs, coupled with the extreme sensitivity of projections relating to the many assumptions of the programs, produce a wide range of possible results. In preparing the Statements of Social Insurance, Government management considers and selects assumptions and data that it believes provide a reasonable basis for the assertions in the statement. However, because of the large number of factors that affect the Statements of Social Insurance and the fact that such assumptions are inherently subject to substantial uncertainty (arising from the likelihood of future events, significant uncertainties, and contingencies), there will be differences between the estimates in the Statements of Social Insurance and the actual results, and those differences may be material. Note 26—Social Insurance describes the social insurance programs, reports long-range estimates that can be used to assess the financial condition of the programs, and explains some of the factors that impact the various programs. Using this information, readers can apply their own judgment as to the condition and sustainability of the individual programs. The Statement of Changes in Social Insurance Amount reconciles the change between the current valuation period and the prior valuation period.

² Present values recognize that a dollar paid or collected in the future is worth less than a dollar today, because a dollar today could be invested and earn interest. To calculate a present value, future amounts are thus reduced using an assumed interest rate, and those reduced amounts are summed.

United States Government
Statements of Changes in Cash Balance from Unified Budget and Other Activities
for the Years Ended September 30, 2011, and 2010

(In billions of dollars)	2011	2010
Unified budget deficit	(1,298.6)	(1,294.1)
Adjustments for noncash outlays included in the budget:		
Interest accrued by Treasury on debt held by the public	244.2	206.8
TARP yearend re-estimates	(46.9)	(86.4)
TARP Subsidy expense/(income) (Note 5).....	7.2	(24.2)
Other Federal entity subsidy expense/(income) (Note 4)	(43.9)	(9.4)
Subtotal	160.6	86.8
Items affecting the cash balance not included in the Budget:		
<i>Net Transactions from financing activity:</i>		
Borrowings from the public	7,962.8	8,525.5
Repayment of debt held by the public	(6,854.2)	(7,054.5)
Agency securities	1.0	0.7
Subtotal	1,109.6	1,471.7
<i>Transactions from monetary and other activity:</i>		
Interest paid by Treasury on debt held by the public	(239.7)	(201.2)
Net TARP direct loans and equity investments activity	59.0	111.8
Net GSE—mortgage-backed securities activity	93.7	9.1
Net loan receivable activity	(157.6)	(160.3)
Allocations of special drawing rights	0.2	(1.0)
Other	21.2	12.6
Subtotal	(223.2)	(229.0)
Cash and other monetary assets (Note 2):		
(Decrease)/increase in cash and other monetary assets	(251.6)	35.4
Balance, beginning of period	428.6	393.2
Balance, end of period	177.0	428.6

The accompanying notes are an integral part of these financial statements.

For budgetary purposes, the effect of the yearend downward re-estimates (reduction of net outlays) and upward re-estimates (increase of net outlays) is not recognized until the subsequent fiscal year. As such, for fiscal year 2011, the budget deficit reflected a reduction of noncash outlays for \$23.6 billion relating to the fiscal year 2010 yearend downward re-estimates. Also, for fiscal year 2011, TARP subsidy expense includes \$23.3 billion in yearend upward re-estimates, which will be reflected in the fiscal year 2012 budget. For fiscal year 2010, the budget deficit reflected a reduction of noncash outlays for \$110 billion relating to the fiscal year 2009 yearend downward re-estimates. Also, for fiscal year 2010, TARP subsidy income includes \$23.6 billion in yearend downward re-estimates, which was reflected in the fiscal year 2011 budget.

Revenue (e.g., Contributions and earmarked taxes)	29,037	28,075	25,491	24,743	22,828
Expenditures for scheduled future benefits	(16,594)	(15,875)	(19,224)	(18,578)	(18,714)
Present value of future revenue in excess of future expenditures	12,443	12,200	6,267	6,165	4,114
Open-group – Total present value of future expenditures in excess of future revenue.....	(33,830)	(30,857)	(45,878)	(42,970)	(40,948)

¹ The projection period is 1/1/2011 -12/31/2085 and the valuation date is 1/1/2011.

² The projection period is 1/1/2010 -12/31/2084 and the valuation date is 1/1/2010.

³ The projection period is 1/1/2009 -12/31/2083 and the valuation date is 1/1/2009.

⁴ The projection period is 1/1/2008 -12/31/2082 and the valuation date is 1/1/2008.

⁵ The projection period is 1/1/2007 -12/31/2081 and the valuation date is 1/1/2007.

⁶ These amounts represent the present value of the future transfers from the General Fund of the Treasury to the Supplementary Medical Insurance Trust Fund. These future intragovernmental transfers are included as income in both HHS' and the Centers for Medicare & Medicaid Services' Financial Reports but are not income from the Governmentwide perspective of this report.

⁷ These amounts approximate the present value of the future financial interchange and the future transfers from the General Fund of the Treasury to the Social Security Equivalent Benefit Account (see discussion of Railroad Retirement Program in the unaudited supplemental information section of this report). They are included as income in the Railroad Retirement Financial Report but are not income from the Governmentwide perspective of this report.

⁸ Does not include interest expense accruing on the outstanding debt.

⁹ The projection period is 9/30/2011 -9/30/2040 and the valuation date is 9/30/2011.

¹⁰ The projection period is 9/30/2010 -9/30/2040 and the valuation date is 9/30/2010.

¹¹ The projection period is 9/30/2009 -9/30/2040 and the valuation date is 9/30/2009.

¹² The projection period is 9/30/2008 -9/30/2040 and the valuation date is 9/30/2008.

¹³ The projection period is 9/30/2007 -9/30/2040 and the valuation date is 9/30/2007.

¹⁴ Participants for the Social Security and Medicare programs are assumed to be the "closed-group" of individuals who are at least 15 years of age at the start of the projection period, and are participating as either taxpayers, beneficiaries, or both, except for the 2007 Medicare programs for which current participants are assumed to be at least 18 instead of 15 years of age.

Totals may not equal the sum of components due to rounding.

TRUST FUNDS

INTRODUCTION: Airport and Airway Trust Fund

The Airport and Airway Trust Fund was established on the books of Treasury in fiscal year 1971, according to provisions of the Airport and Airway Revenue Act of 1970 [49 United States Code 1742(a), *repealed*]. The Tax Equity and Fiscal Responsibility Act of 1982 (Public Law 97-248, dated September 3, 1982) reestablished the trust fund in the Internal Revenue Code (26 United States Code 9502) effective September 1, 1982.

Treasury transfers from the general fund to the trust fund amounts equivalent to the taxes received from transportation of persons and property by air, gasoline and jet fuel used in commercial and noncommercial aircraft, and an international arrival and departure tax. The Omnibus Budget Reconciliation Act of 1990 (Public Law 101-508, dated November 5, 1990) increased rates for the excise taxes transferred to the fund.

Treasury bases these transfers on estimates made by the Secretary of the Treasury. These are subject to adjustments in later transfers in the amount of actual tax receipts.

On February 6, 2012, Congress passed a 4 year authorization bill extending taxes through September 2015 (Public Laws 112-7, 112-16, 112-21, 112-27), Surface and Air Transportation Programs Extension of 2011 (Public Law 112-30), and Airport and Airway Extension Act of 2012 (PL 112-91).

The FAA Modernization and Reform Act 2012 (Public Law 112-095), effective February 18, 2012, extended the aviation excise taxes until September 30, 2015. The Act included provisions that:

- Retained the existing passenger ticket, flight segment, and freight waybill taxes. The flight segment tax is indexed to the Consumer Price Index; effective calendar year 2012, the tax is \$3.80. It also retained a special rule applied to flights between the continental United States and Alaska or Hawaii. This departure tax is indexed to the Consumer Price Index; effective calendar year 2012, the tax is \$8.40.
- Retained the existing international and departure per passenger tax. The tax is indexed to the Consumer Price Index; effective calendar year 2012, the tax is \$16.70.

- Retained the existing tax on payments to airlines for frequent flyer and similar awards by banks and credit card companies, merchants and frequent flyer program partners, such as other airlines, hotels and rental car companies, and other businesses.

- Retained the commercial aviation fuel tax and the general aviation jet fuel/gas taxes.

- Imposed a new surtax on fuel used in aircraft that is part of a fractional ownership program; the surtax applies to fuel used after March 31, 2012. It also changed the classification of transportation as part of a fractional ownership program from commercial aviation to noncommercial aviation.

- Repealed the excise tax exemption for transportation by small aircraft operating on nonestablished lines. (IRS defines the term “operated on an established line” to mean operated with some degree of regularity between definite points).

When the provisions of 26 United States Code 9602(b) are met, amounts available in the trust fund exceed outlay requirements, Treasury invests excess amounts in public debt securities and credits the interest to the fund. Additional sums from the general fund also are credited as authorized and made available, by law, if they are needed to meet outlay requirements.

Treasury makes available to the Federal Aviation Administration (FAA), Department of Transportation (DOT), amounts required for outlays to carry out the Airport and Airway program. The Secretary of the Treasury makes other charges to the trust fund to transfer certain refunds of taxes and certain outfits, under section 34 of the Internal Revenue Code (IRC).

Annual reports to Congress, required by 26 U.S.C. 9602 (a), are submitted by the Secretary of the Treasury, after consultation with the Secretary of Transportation. These reports are required to cover the financial condition and results of operations of the trust fund during the past fiscal year and those expected during the next 5 fiscal years.

INTRODUCTION: Uranium Enrichment Decontamination and Decommissioning (D&D) Fund

The Uranium Enrichment D&D Fund was established on the books of the Treasury in fiscal year 1993, according to provisions of the Energy Policy Act of 1992 (42 United States Code 2297g). Receipts represent (1) fees collected from domestic public utilities based on their pro rata share of purchases of separative work units from the Department of Energy (DOE) and (2) appropriations toward the Government contribution based on the balance of separative work unit purchases.

Expenditures from the fund are for the purpose of (1) decontamination and decommissioning of the three gaseous diffusion plants, (2) remedial actions and related environmental restoration costs at the gaseous diffusion plants, and (3) reimbursement to uranium/thorium producers for the costs of decontamination, decommissioning, reclamation, and remedial action of uranium/thorium sites that are incident to sales to the U.S. Government.

Amounts available in the fund exceeding current needs may be invested by the Secretary of the Treasury in obligations of the United States (1) having maturities congruent with the needs of the fund and (2) bearing interest at rates determined appropriate, taking into consideration the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to these investments.

The Secretary of the Treasury is required by 42 United States Code 2297g(b)(1) to provide an annual report to Congress, after consultation with the Secretary of Energy. This report must present the financial condition and the

results of operations of the fund during the preceding fiscal year.

The Energy Policy Act of 1992 (42 United States Code 2297g-1, as amended) authorizes funding to ensure annual deposits to the fund of \$518.2 million before adjustments for inflation. The Act stipulates that the Government deposit \$369.6 million, adjusted for inflation, annually. The Act also calls for deposits of \$150 million from domestic public utility assessments. The assessments were authorized for 15 years with the final assessment scheduled for fiscal year 2007. Between fiscal years 1993 and 2007, the total Government contribution amount authorized by the Act was \$6,281.0 million. During that time span, the Government contributed only \$5,362.4 million to the fund. The resulting shortfall in authorized Government contributions was, therefore, \$918.6 million.

The Government continued to make annual contributions to eliminate this shortfall. Through fiscal year 2009 contributions, the overall shortfall (after adjustments for inflation) was \$40.6 million. Also, during fiscal year 2009, the Government designated \$390 million of American Recovery and Reinvestment Act (ARRA) funding for the fund's mission. The ARRA funding was not an actual deposit into the fund's invested balances, but it provides a dollar for dollar reduction in the required outlays from the invested balances. DOE recognizes the ARRA funding as an offset to the Government's contribution shortfall, thereby satisfying the Government's contribution responsibility.

INTRODUCTION: Black Lung Disability Trust Fund

The Black Lung Disability Trust Fund was established on the books of the Treasury in fiscal year 1978 according to the Black Lung Benefits Revenue Act of 1977 (Public Law 95-227). The Black Lung Benefits Revenue Act of 1981 (Public Law 97-119) reestablished the fund in the Internal Revenue Code (IRC), 26 United States Code 9501.

The Consolidated Omnibus Budget Reconciliation Act of 1985 (Public Law 99-272), enacted April 7, 1986, provided for an increase in the coal tax rates effective April 1, 1986, through December 31, 1995, and a 5-year forgiveness of interest retroactive to October 1, 1985. The 5-year moratorium on interest payments ended on September 30, 1990. Payment of interest on advances resumed in fiscal year 1991. The Omnibus Budget Reconciliation Act of 1987 (Public Law 100-203, title X, section 10503), signed December 22, 1987, extended the temporary increase in the coal tax through December 31, 2013.

The Emergency Economic Stabilization Act of 2008 (Public Law 110-343, title I, subtitle B, section 113), enacted October 3, 2008, restructured the Trust Fund Debt by 1) refinancing the outstanding principal of the repayable advances and unpaid interest on such advances and 2) providing a one time Appropriation to the Trust Fund in an amount sufficient to pay to the general fund of the Treasury the difference between the market value of the outstanding repayable advances, plus accrued interest and the proceeds from the obligations issued by the Trust Fund to the Secretary of the Treasury. The Act also extends the temporary increase in the coal tax through December 31, 2018, and allows the prepayment of the Trust Fund debt prior to the maturity date.

The Code designates the following receipts to be appropriated and transferred from the general fund of the Treasury to the trust fund: excise taxes on coal sold; taxable expenditures of self-dealing by, and excess contributions to, private black lung benefit trusts; reimbursements by responsible mine operators; and related fines, penalties and interest charges.

Estimates made by the Secretary of the Treasury determine monthly transfers of amounts for excise taxes to the trust fund subject to adjustments in later transfers to actual tax receipts.

After retirement of the current indebtedness, amounts available in the fund exceeding current expenditure requirements will be invested by the Secretary of the Treasury in interest-bearing public debt securities. Any interest earned will be credited to the fund. Also credited, if necessary, will be repayable advances from the general fund to meet outlay requirements exceeding available revenues.

To carry out the program, amounts are made available to the Department of Labor (DOL). Also charged to the fund are administrative expenses incurred by the Department of Health and Human Services (HHS) and the Treasury, repayments of advances from the general fund and interest on advances.

The Code requires the Secretary of the Treasury to submit an annual report to Congress after consultation with the Secretary of Labor and the Secretary of HHS [26 United States Code 9602(a)]. The report must present the financial condition and results of operations of the fund during the past fiscal year and the expected condition and operations of the fund during the next 5 fiscal years.

INTRODUCTION: Harbor Maintenance Trust Fund

The Harbor Maintenance Trust Fund was established on the books of the Treasury on April 1, 1987, according to the Water Resources Development Act of 1986 (Public Law 99-662, November 17, 1986) (26 United States Code 9505).

Amounts in the Harbor Maintenance Trust Fund are available as provided by appropriation acts for making expenditures to carry out section 210(a) of the Water Resources Development Act of 1986. The appropriations act for the Department of Transportation (DOT) for fiscal year 1995 (Public Law 103-331, September 28, 1994), section 339, waived collection of charges or tolls on the Saint Lawrence Seaway in accordance with section 13(b) of the Act of May 13, 1954 (as in effect on April 1, 1987). Legislation was passed in the North American Free Trade Agreement Implementation Act (Public Law 103-182, section 683), which amends paragraph (3) of section 9505(c) of the IRC of 1986, to authorize payment of up to \$5 million annually to Treasury for all expenses of administration incurred by the Treasury, the U.S. Army Corps of Engineers and the Department of Commerce (Commerce) related to the administration of subchapter A of chapter 36 (relating to harbor maintenance tax). Section 201 of the Water

Resources Development Act of 1996 (Public Law 104-303) authorizes use of the Harbor Maintenance Trust Fund for construction of dredged material disposal facilities associated with the operation and maintenance of Federal navigation projects for commercial navigation.

A summary judgment issued October 25, 1995, by the United States Court of International Trade in the case United States Shoe Corp. v. United States (Court No. 94-11-00668) found the Harbor Maintenance fee unconstitutional under the Export Clause of the Constitution (Article I, section 9, clause 5) and enjoined the Customs Service from collecting the fee.

The decision was affirmed by the Supreme Court on March 31, 1998 (118 Supreme Court 1290). With the tax on exports no longer collected, revenues have been reduced by approximately 30 percent.

The Code requires the Secretary of the Treasury to submit an annual report to Congress [26 United States Code 9602(a)]. The report must present the financial condition and results of operations of the fund during the past fiscal year and the expected condition and operations of the fund during the next 5 fiscal years.

INTRODUCTION: Hazardous Substance Superfund

The Hazardous Substance Response Trust Fund was established on the books of the Treasury in fiscal year 1981, in accordance with section 221 of the Hazardous Substance Response Revenue Act of 1980 [42 United States Code 9631(a), *repealed*]. The trust fund was renamed the Hazardous Substance Superfund (Superfund) and relocated in accordance with section 517 of the Superfund Amendments and Reauthorization Act of 1986 [Public Law 99-499, dated October 17, 1986 (26 United States Code 9507)].

The authority to collect excise taxes on petroleum and chemicals, and an environmental tax for all corporations

with modified alternative taxable income in excess of \$2 million, expired in 1995. To implement the Superfund program, amounts are appropriated from the Superfund to the Environmental Protection Agency (EPA) for programmatic and administrative expenses.

An annual report to Congress by the Secretary of Treasury is required by 26 United States Code 9602(a). These reports present the financial condition of the Superfund and the results of operation for the past fiscal year, and its expected condition during the next 5 fiscal years.

² The Fiscal Year 2013 President's Budget includes a proposal to reinstate the Superfund tax; therefore, taxes have been estimated.

INTRODUCTION: Highway Trust Fund

The Highway Trust Fund was established on the books of the Treasury in fiscal year 1957, according to provisions of the Highway Revenue Act of 1956 (Act of June 29, 1956, chapter 462, section 209). It has been amended and extended by various highway surface transportation and other acts since 1959. Section 1110(d) of the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy For Users (SAFETEA-LU) (Public Law 109-59) extended the Highway Trust Fund to be available for making expenditures before September 30, 2009 (October 1, 2009, in the case of expenditures for administrative expenses).

Amounts equivalent to taxes on gasoline, diesel fuel, special motor fuels, certain tires, heavy trucks and trailers, and heavy vehicle use are designated by the Act to be appropriated and transferred from the general fund of the Treasury to the trust fund. These transfers are made twice monthly based on estimates by the Secretary of the Treasury, subject to later adjustments to reflect the amount of actual tax receipts. Amounts available in the fund exceeding outlay requirements are invested in non-interest-bearing public debt securities.

Within the fund is a mass transit account, funded by a portion of the excise tax collections under sections 4041 and 4081 of the IRC (title 26 United States Code). The funds from this account are used for expenditures in accordance with chapter 53 of title 49 United States Code, the Intermodal Surface Transportation Efficiency Act of 1991 (Public Law 102-240), the Transportation Equity Act for the 21st Century (TEA-21), and SAFETEA-LU. The remaining excise taxes are included in a separate account within the

trust fund commonly referred to as the highway account. Expenditures from this account are made according to the provisions of various transportation acts.

Amounts required for outlays to carry out the eligible surface transportation programs are made available to the responsible operating administrations within the Department of Transportation. Other charges to the trust fund are made by the Secretary of the Treasury for transfer of certain taxes to the Land and Water Conservation Fund and the Aquatic Resources Trust Fund.

The Secretary of the Treasury, in consultation with the Secretary of Transportation, is required to submit annual reports to Congress by section 9602(a) of title 26 United States Code. These reports cover the financial condition and results of operations of the fund for the past fiscal year and expected condition and operations during the next 5 fiscal years.

In addition, the Secretary of the Treasury is required by 26 U.S.C. 9503(d)(7) to report to specified Congressional Committees any estimate which he, in consultation with the Secretary of Transportation, makes pursuant to 26 U.S.C. 9503(d)(1) or any determination which he makes pursuant to 26 U.S.C. 9503(d)(2). The Congressional Committees are the Committee on Ways and Means of the House of Representatives, the Committee on Finance of the Senate, the Committees on the Budget of both Houses, the Committee on Transportation and Infrastructure of the House of Representatives, and the Committee on Environment and Public Works of the Senate.

The following information is released according to the provisions of the Byrd Amendment [codified at 26 United States Code 9503(d)] and represents data concerning the Highway Trust Fund. The figure described as “unfunded authorizations” is the latest estimate received from the DOT for fiscal year 2011.

The 48-month revenue estimates for the highway and mass transit accounts, respectively, include the latest estimates received from Treasury’s Office of Tax Analysis for excise taxes, net of refunds. They represent net highway receipts for those periods beginning at the close of fiscal year 2011.

INTRODUCTION: Inland Waterways Trust Fund

The Inland Waterways Trust Fund was established by the Treasury in fiscal year 1984, pursuant to section 203 of the Inland Waterways Revenue Act of 1978 (Public Law 95-502) and continued pursuant to section 1405 of the Water Resources Development Act of 1986 (Public Law 99-662, codified at 26 United States Code 9506). Under 26 United States Code 9506(b), amounts from taxes on fuel used in commercial transportation on inland waterways, as determined by the Secretary of the Treasury, are appropriated to the trust fund.

The Technical and Miscellaneous Revenue Act of 1988 (Public Law 100-647, approved November 10, 1988) increased the tax each year, 1990 through 1995. These amounts are transferred quarterly from the general fund based on estimates made by the Secretary, subject to adjustments in later transfers to the amounts of actual tax receipts.

The Secretary of the Treasury invests in interest-bearing obligations of the United States that portion of the trust fund, in his judgment, not required to meet current withdrawals. The interest on, and proceeds from, the sale or redemption of any obligation held in the trust fund is credited to the trust fund. The Inland Waterways Revenue Act of 1978 (Public Law 95-502) provides that amounts in the trust fund shall be available as provided, by appropriations acts, for construction and rehabilitation expenditures for navigation on the inland and intracoastal waterways of the United States described in 33 United States Code 1804. Expenditures must be otherwise authorized by law.

Annual reports to Congress are required by 26 United States Code 9602(a) to be submitted by the Secretary of the Treasury. These reports are required to cover the financial condition and the results of operations of the fund during the past fiscal year and its expected condition and operations during the next 5 fiscal years.

INTRODUCTION: Leaking Underground Storage Tank Trust Fund

The Leaking Underground Storage Tank (LUST) Trust Fund was established in fiscal year 1981 according to provisions of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (Public Law 96-510, codified at 26 United States Code 9508), as amended by the Superfund Amendments and Re-authorization Act of 1986 (Public Law 99-499, dated October 17, 1986), sections 13163I and 13242(d)(42) of the Omnibus Budget Reconciliation Act of 1993 (Public Law 103-66, dated August 10, 1993), and section 1032(e)(13) of the Taxpayer Relief Act of 1987 (Public Law 105-34, dated August 5, 1997).

The LUST Trust Fund is financed by taxes collected on gasoline, diesel fuels, special motor fuels, aviation fuels and fuels used in commercial transportation on inland

waterways. Amounts available in the LUST Trust Fund, exceeding current expenditure requirements, are invested by the Secretary of the Treasury in interest-bearing Government securities (e.g., Treasury bills). All interest earned is credited directly to the LUST Trust Fund.

To carry out the LUST program, amounts are appropriated for the LUST Trust Fund to the EPA for programmatic and administrative expenses.

An annual report to Congress by the Secretary of the Treasury is required by 26 United States Code 9602(a). These reports present the financial condition of the LUST Trust Fund and results of operations for the past fiscal year and its expected condition and operations during the next 5 fiscal years.

INTRODUCTION: Nuclear Waste Fund

The Nuclear Waste Fund was established on the books of the Treasury in fiscal year 1983, according to section 302 of the Nuclear Waste Policy Act of 1982 [Public Law 97-425, codified at 42 United States Code 10222I]. Receipts represent fees collected from public utilities based on electricity generated by nuclear power reactors and spent nuclear fuel. Expenditures from the fund are for purposes of radioactive waste disposal activities.

Amounts available in the fund exceeding current needs may be invested by the Secretary of the Treasury in obligations of the United States (1) having maturities in tandem with the needs of the waste fund and (2) bearing interest at rates determined appropriate, taking into

consideration the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the maturities of such investments, except that the interest rate on such investments shall not exceed the average interest rate applicable to existing borrowings.

An annual report to Congress by the Secretary of the Treasury, after consultation with the Secretary of the Department of Energy (DOE), is required by 42 United States Code 10222(e)(1). This report must present the financial condition and the results of operations of the waste fund during the preceding fiscal year.

INTRODUCTION: Reforestation Trust Fund

The Reforestation Trust Fund was established on the books of the Treasury in fiscal year 1981 to continue through September 30, 1985, according to provisions of Title III—Reforestation, of the Recreational Boating Safety and Facilities Improvement Act of 1980 [Public Law 96-451, codified at 16 United States Code 1606a(a)].

The act provides that the Secretary of the Treasury shall transfer to the trust fund tariffs, limited to not more than \$30 million for any fiscal year, received in the Treasury from October 1, 1979, through September 30, 1985, on (1) rough and primary wood products and wood waste; (2) lumber, flooring and moldings; and (3) wood veneers, plywood, other wood-veneer assemblies and building boards. Public Law 99-190, title II, 99 Statutes at Large 1245, extended the receipts for the trust fund. Amounts available in the reforestation trust fund exceeding current withdrawals are invested in interest-bearing obligations of the United States

or in obligations guaranteed as to both principal and interest by the United States. The interest on, and the proceeds from the sale or redemption of, any obligations are credited to the trust fund.

The Secretary of the Department of Agriculture is authorized to obligate available sums in the trust fund (including any amounts not obligated in previous years) for (1) reforestation and timber stand improvement and (2) administrative costs of the Government for these activities.

Annual reports are required by 16 United States Code 1606aI (1) to be submitted by the Secretary of the Treasury, after consultation with the Secretary of Agriculture, on the financial condition and the results of the operations of the trust fund during the past fiscal year and on its expected condition and operations during the next fiscal year.

INTRODUCTION: Sport Fish Restoration and Boating Trust Fund

The Aquatic Resources Trust Fund (ARTF) was established on the books of the Treasury pursuant to the Deficit Reduction Act of 1984 [Public Law 98-369, division A, title X, section 1016(a), approved July 18, 1984]. The ARTF was restructured and renamed the Sport Fish Restoration and Boating Trust Fund by the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users or “SAFETEA-LU” [Public Law 109-59, title XI, subtitle B, part 2, section 11115, approved August 10, 2005,] as amended by the Sportfishing and Recreational Boating Safety Amendments Act of 2005 [Public Law 109-74, approved September 29, 2005]. P.L. 109-59 (The Transportation Equity Act) comprehensively amended and reauthorized the Sport Fish Restoration Program to (beginning in fiscal years 2006-2009) permanently appropriate boat safety funding and modify distribution of funds whereby all accounts will annually receive a fixed percentage of the total fund revenue, eliminated the ARTF to create a Sport Fish Restoration and Boating Trust Fund, and modified the excise tax on certain sport fishing equipment. P.L. 109-59 expired September 30, 2009. P.L. 112-30, Surface Transportation Extension Act of 2011, extends authority to operate through March 31, 2012. Reauthorization of the Sport Fish Restoration and Boating Trust Fund is currently pending before Congress.

Effective October 1, 2005, motorboat fuel taxes (less \$1 million transferred to the Land and Water Conservation

Fund) and small engine gasoline taxes [pursuant to the Omnibus Budget Reconciliation Act of 1990, Public Law 101-508, title XI, section 11211(i)(2) and (3)] were transferred from the Highway Trust Fund to the Sport Fish Restoration and Boating Trust Fund. In addition, amounts equivalent to the excise taxes received on sport fishing equipment and import duties on fishing tackle, yachts, and pleasure craft are appropriated into the fund.

Amounts in the trust fund are used, as provided by appropriation acts, for the purposes of carrying out the Dingell-Johnson Sport Fish Restoration Act, approved August 9, 1950, the purposes of section 13106 of title 46, United States Code, the purpose of section 7404(d) of the Transportation Equity Act for the 21st Century, and the Coastal Wetlands Planning, Protection and Restoration Act (as amended by SAFETEA-LU).

When the provisions of 26 United States Code 9602(b) are met, amounts available in the fund exceeding outlay requirements are invested in public debt securities with the interest credited to the fund.

Annual reports to Congress required by 26 United States Code 9602(a), are submitted by the Secretary of the Treasury. These reports are required to cover the financial condition and results of operations of the fund during the past fiscal year and those expected during the next 5 fiscal years.

INTRODUCTION: Oil Spill Liability Trust Fund

The Oil Spill Liability Trust Fund was established on the books of the Treasury by section 8033 of the Omnibus Budget Reconciliation Act of 1986 (Public Law 99-509). It was made effective on January 1, 1990, by section 7811(m)(3) of the Omnibus Budget Reconciliation Act of 1989 (Public Law 101-239) and amended by section 9001 of the Oil Pollution Act of 1990 (Public Law 101-380). The Energy Improvement and Extension Act of 2008 (Public Law 110-343) increased the barrel tax on petroleum from five cents per barrel to eight cents from 2009 through 2016, and to nine cents in 2017. The act also repeals the requirement that the tax be suspended when the unobligated balance exceeds \$2.7 billion.

Amounts equivalent to the taxes received from the environmental tax on petroleum, but only to the extent of the Oil Spill Liability Trust Fund rate, are appropriated to the fund.

Certain amounts were transferred from other funds and were appropriated to the Oil Spill Liability Trust Fund as

provided by 26 United States Code 9509(b). Certain paid penalties and amounts recovered for damages are also appropriated to the fund.

Amounts in the fund are available for oil spill cleanup costs and certain other related purposes as provided by appropriations acts or section 6002(b) of the Oil Pollution Act of 1990 (Public Law 101-380).

When the provisions of 26 United States Code 9602(b) are met, amounts available in the fund exceeding outlay requirements are invested in public debt securities. Interest is credited to the fund.

Annual reports to Congress, required by 26 United States Code 9602(a), are submitted by the Secretary of the Treasury. These reports are required to cover the financial condition and results of operations of the fund during the past fiscal year and those expected during the next 5 fiscal years.

INTRODUCTION: Vaccine Injury Compensation Trust Fund

The Vaccine Injury Compensation Trust Fund was created on the books of the Treasury by section 9202 of the Revenue Act of 1987 (Public Law 100-203, approved December 22, 1987). Excise taxes on diphtheria, pertussis, tetanus, measles, mumps, rubella, polio, hepatitis B, *haemophilus influenza* type b, varicella, rotavirus, pneumococcal conjugate vaccines, hepatitis A (26 United States Code 4131), and trivalent influenza are appropriated into the trust fund, which is the source of funds to pay compensation awards for a vaccine-related injury or death

occurring after October 1, 1988, as well as program administrative expenses. Additionally, two new vaccines have been added for coverage effective February 1, 2007; the meningococcal vaccine and the human papillomavirus vaccine.

Annual reports to Congress, required by 26 United States Code 9602(a), are submitted by the Secretary of the Treasury. These reports are required to cover the financial condition and results of operations of the fund during the past fiscal year and those expected during the next 5 fiscal years.

INTRODUCTION: Wool Research, Development, and Promotion Trust Fund

The Wool Research, Development, and Promotion Trust Fund was established in fiscal year 2000 with a sunset provision effective January 1, 2004, according to provisions of the Trade and Development Act of 2000 (Public Law 106-200, signed May 18, 2000). The Trade Act of 2002 (Public Law 107-210, signed August 6, 2002) extended the sunset provision to January 1, 2006. The Miscellaneous Trade and Technical Corrections Act of 2004 (Public Law 108-429, signed December 3, 2004) extended the sunset provision to 2008. The Pension Protection Act of 2006 (Public Law 109-280, signed August 17, 2006) extended the sunset provision to 2010. The Emergency Economic Stabilization Act of 2008 (Public Law 110-343, signed October 3, 2008) extended the sunset provision to 2015.

The Act provides that the Secretary of the Treasury shall transfer to the trust fund out of the general fund of the U.S. Treasury amounts determined to be equivalent to the duty received on articles under chapters 51 and 52 of the Harmonized Tariff Schedule of the United States. The

amount to be transferred is limited to \$2,500,000 in any fiscal year and may be invested in U.S. Treasury securities. The Secretary of Agriculture is authorized to provide grants to a nationally recognized council established for the development of the United States wool market for the following purposes:

- Assist United States wool producers in improving the quality of wool and wool production methods for wool produced in the United States.
- Disseminate information on improvements to United States wool producers.
- Assist United States wool producers in developing and promoting the wool market.

Annual reports to Congress are required on the financial condition and the results of the operations of the trust fund during the past fiscal year and on its expected condition and operations during the next fiscal year.

INTRODUCTION: Agriculture Disaster Relief Trust Fund

The Food, Conservation, and Energy Act of 2008 (Public Law 110-246) created the “Agriculture Disaster Relief Trust Fund” (Disaster Trust Fund). The Disaster Trust Fund is described in Section 902 of the public law.

The Disaster Trust Fund is appropriated an amount equivalent to 3.08 percent of the amounts received in the general fund of the Treasury of the United States during fiscal years 2008 through 2011 attributable to the duties collected on articles entered, or withdrawn from the warehouse, for consumption under the Harmonized Tariff Schedule of the United States. The collection activity is made by the U.S. Department of Homeland Security, U.S. Customs and Border Protection (CBP). The CBP transfers the funds monthly to the Disaster Trust Fund Receipt Account.

The Disaster Trust Fund shall make amounts available for the purpose of expenditures to meet obligations of the United States incurred under Section 901 of the Trade Act of 1974 and Section 531 of the Federal Crop Insurance Act. The Disaster Trust Fund will be used to make payments to farmers and ranchers under five disaster programs.

- Supplemental Revenue Assistance Payments Program (SURE)
- Livestock Forage Disaster Program (LFP)

- Livestock Indemnity Program (LIP)
- Tree Assistance Program (TAP)
- Emergency Assistance for Livestock, Honey Bees, and Farm-Raised Fish Program (ELAP)

The Farm Service Agency shall invest such portions of the Disaster Trust Fund that is not required to meet current payment amounts. Investments may only be made in interest bearing obligations of the United States.

The American Recovery and Reinvestment Act (ARRA) of 2009 (Public Law 111-5) created the “Agriculture Disaster Relief Trust Fund, Recovery Act” (Disaster Trust Fund-Recovery Act). The Disaster Trust Fund-Recovery Act provided for additional payments to farmers and ranchers from the SURE and TAP programs. The additional payments are tracked separately to meet the ARRA reporting requirements.

The Disaster Trust Fund has indefinite borrowing authority via repayable advances.

Annual reports to Congress, required by 26 United States Code 9602(a), are submitted by the Secretary of the Treasury. These reports are required to cover the financial condition and results of operations of the fund during the past fiscal year and those expected during the next 5 fiscal years.

Glossary

With References to Applicable Sections and Tables

Source: Financial Management Service

Amounts outstanding and in circulation (USCC)—Includes all issues by the Bureau of the Mint purposely intended as a medium of exchange. Coins sold by the Bureau of the Mint at premium prices are excluded; however, uncirculated coin sets sold at face value plus handling charge are included.

Average discount rate (PDO-1, -2)—In Treasury bill auctions, purchasers tender competitive bids on a discount rate basis. The average discount rate is the weighted, or adjusted, average of all bids accepted in the auction.

Budget authority (“Federal Fiscal Operations”)—Congress passes laws giving budget authority to Government entities, which gives the agencies the power to spend Federal funds. Congress can stipulate various criteria for the spending of these funds. For example, Congress can stipulate that a given agency must spend within a specific year, number of years, or any time in the future.

The basic forms of budget authority are appropriations, authority to borrow, contract authority, and authority to obligate and expend offsetting receipts and collections. The period of time during which Congress makes funds available may be specified as 1-year, multiple-year, or no-year. The available amount may be classified as either definite or indefinite; a specific amount or an unspecified amount can be made available. Authority also may be classified as current or permanent. Permanent authority requires no current action by Congress.

Budget deficit—The total, cumulative amount by which budget outlays (spending) exceed budget receipts (income).

Cash management bills (PDO-1)—Marketable Treasury bills of irregular maturity lengths, sold periodically to fund short-term cash needs of Treasury. Their sale, having higher minimum and multiple purchase requirements than those of other issues, is generally restricted to competitive bidders.

Competitive tenders (“Treasury Financing Operations”)—A bid to purchase a stated amount of one issue of Treasury securities at a specified yield or discount. The bid is accepted if it is within the range accepted in the auction. (See Noncompetitive tenders.)

Currency no longer issued (USCC)—Old and new series gold and silver certificates, Federal Reserve notes, national bank notes, and 1890 Series Treasury notes.

Debt outstanding subject to limitation (FD-6)—The debt incurred by the Treasury subject to the statutory limit set by Congress. Until World War I, a specific amount of debt was authorized to each separate security issue. Beginning with the

Second Liberty Loan Act of 1917, the nature of the limitation was modified until, in 1941, it developed into an overall limit on the outstanding Federal debt. As of December 2011, the debt limit was \$15,194,000 million; the limit may change from year to year.

The debt subject to limitation includes most of Treasury’s public debt except securities issued to the Federal Financing Bank, upon which there is a limitation of \$15 billion, and certain categories of older debt (totaling approximately \$595 million as of February 1991).

Discount—The interest deducted in advance when purchasing notes or bonds. (See Accrued discount.)

Discount rate (PDO-1)—The difference between par value and the actual purchase price paid, annualized over a 360-day year. Because this rate is less than the actual yield (coupon-equivalent rate), the yield should be used in any comparison with coupon issue securities.

Dollar coins (USCC)—Include standard silver and nonsilver coins.

Domestic series (FD-2)—Nonmarketable, interest- and non-interest-bearing securities issued periodically by Treasury to the Resolution Funding Corporation (RFC) for investment of funds authorized under section 21B of the Federal Home Loan Bank Act (12 United States Code 1441b).

Federal intrafund transactions (“Federal Fiscal Operations”)—Intrabudgetary transactions in which payments and receipts both occur within the same Federal fund group (Federal funds or trust funds).

Federal Reserve notes (USCC)—Issues by the U.S. Government to the public through the Federal Reserve banks and their member banks. They represent money owed by the Government to the public. Currently, the item “Federal Reserve notes—amounts outstanding” consists of new series issues. The Federal Reserve note is the only class of currency currently issued.

Foreign (“Foreign Currency Positions,” IFS-2, -3)—Locations other than those included under the definition of the United States. (See United States.)

Foreigner (“Capital Movements,” IFS-2)—All institutions and individuals living outside the United States, including U.S. citizens living abroad, and branches, subsidiaries, and other affiliates abroad of U.S. banks and business concerns; central governments, central banks, and other official institutions of countries other than the United States; and

international and regional organizations, wherever located. Also refers to persons in the United States to the extent that they are known by reporting institutions to be acting for foreigners.

Foreign official institutions (“Capital Movements”)—Includes central governments of foreign countries, including all departments and agencies of national governments; central banks, exchange authorities, and all fiscal agents of foreign national governments that undertake activities similar to those of a treasury, central bank, or stabilization fund; diplomatic and consular establishments of foreign national governments; and any international or regional organization, including subordinate and affiliate agencies, created by treaty or convention between sovereign states.

Foreign public borrower (“Capital Movements”)—Includes foreign official institutions, as defined above, the corporations and agencies of foreign central governments, including development banks and institutions, and other agencies that are majority-owned by the central government or its departments; and state provincial and local governments of foreign countries and their departments and agencies.

Foreign-targeted issue (PDO-2)—Foreign-targeted issues were notes sold between October 1984 and February 1986 to foreign institutions, foreign branches of U.S. institutions, foreign central banks or monetary authorities, or to international organizations in which the United States held membership. Sold as companion issues, they could be converted to domestic (normal) Treasury notes with the same maturity and interest rates. Interest was paid annually.

Fractional coins (USCC)—Coins minted in denominations of 50, 25, and 10 cents, and minor coins (5 cents and 1 cent).

Government account series (FD-2)—Certain trust fund statutes require the Secretary of the Treasury to apply monies held by these funds toward the issuance of nonmarketable special securities. These securities are sold directly by Treasury to a specific Government agency, trust fund, or account. Their rate is based on an average of market yields on outstanding Treasury obligations, and they may be redeemed at the option of the holder. Roughly 80 percent of these are issued to five holders: the Federal Old-Age and Survivors Insurance Trust Fund; the civil service retirement and disability fund; the Federal Hospital Insurance Trust Fund; the military retirement fund; and the Unemployment Trust Fund.

Interfund transactions (“Federal Fiscal Operations”)—Transactions in which payments are made from one fund group (either Federal funds or trust funds) to a receipt account in another group.

International Monetary Fund (“Exchange Stabilization Fund,” IFS-1)—(IMF) Established by the United Nations, the IMF promotes international trade, stability of exchange, and monetary cooperation. Members are allowed to draw from the fund.

Intrabudgetary transactions (“Federal Fiscal Operations”)—These occur when payment and receipt both occur within the budget, or when payment is made from off-budget Federal entities whose budget authority and outlays are excluded from the budget totals.

Noncompetitive tenders (“Treasury Financing Operations”)—This is a tender or bid to purchase a stated par amount of securities at the highest yield or discount rate awarded to competitive bidders for a single-price auction.

Obligations (“Federal Fiscal Operations”)—An unpaid commitment to acquire goods or services.

Off-budget Federal entities (“Federal Fiscal Operations”)—Federally owned and controlled entities whose transactions are excluded from the budget totals under provisions of law. Their receipts, outlays, and surplus or deficit are not included in budget receipts, outlays, or deficits. Their budget authority is not included in totals of the budget.

Outlays (“Federal Fiscal Operations”)—Payments on obligations in the form of cash, checks, the issuance of bonds or notes, or the maturing of interest coupons.

Own foreign offices (“Capital Movements”)—Refers to U.S. reporting institutions’ parent organizations, branches and/or majority-owned subsidiaries located outside the United States.

Par value—The face value of bonds or notes, including interest.

Quarterly financing (“Treasury Financing Operations”)—Treasury has historically offered packages of several “coupon” security issues on the 15th of February, May, August, and November, or on the next working day. These issues currently consist of a 3-year note, a 10-year note, and a 30-year bond. Treasury sometimes offers additional amounts of outstanding long-term notes or bonds, rather than selling new security issues. (See Reopening.)

Receipts (“Federal Fiscal Operations”)—Funds collected from selling land, capital, or services, as well as collections from the public (budget receipts), such as taxes, fines, duties, and fees.

Reopening (PDO-2)—The offer for sale of additional amounts of outstanding issues, rather than an entirely new issue. A reopened issue will always have the same maturity date, CUSIP-number, and interest rate as the original issue.

Special drawing rights (“Exchange Stabilization Fund,” IFS-1)—International assets created by IMF that serve to increase international liquidity and provide additional international reserves. SDRs may be purchased and sold among eligible holders through IMF. (See IMF.)

SDR allocations are the counterpart to SDRs issued by IMF based on members’ quotas in IMF. Although shown in Exchange Stabilization Fund (ESF) statements as liabilities,

they must be redeemed by ESF only in the event of liquidation of, or U.S. withdrawal from, the SDR department of IMF or cancellation of SDRs.

SDR certificates are issued to the Federal Reserve System against SDRs when SDRs are legalized as money. Proceeds of monetization are deposited into an ESF account at the Federal Reserve Bank of New York.

Spot (“Foreign Currency Positions”)—Due for receipt or delivery within 2 workdays.

State and local government series (SLGS) (FD-2)—Special nonmarketable certificates, notes, and bonds offered to State and local governments as a means to invest proceeds from their own tax-exempt financing. Interest rates and maturities comply with IRS arbitrage provisions. SLGS are offered in both time deposit and demand deposit forms. Time deposit certificates have maturities of up to 1 year. Notes mature in 1 to 10 years and bonds mature in more than 10 years. Demand deposit securities are 1-day certificates rolled over with a rate adjustment daily.

Statutory debt limit (FD-6)—By Act of Congress there is a limit, either temporary or permanent, on the amount of public debt that may be outstanding. When this limit is reached, Treasury may not sell new debt issues until Congress

increases or extends the limit. For a detailed listing of changes in the limit since 1941, see the Budget of the United States Government. (See debt outstanding subject to limitation.)

STRIPS (PDO-2)—Separate Trading of Registered Interest and Principal Securities. Long-term notes and bonds may be divided into principal and interest-paying components, which may be transferred and sold in amounts as small as \$1,000. STRIPS are sold at auction at a minimum par amount, varying for each issue. The amount is an arithmetic function of the issue’s interest rate.

Treasury bills—The shortest term Federal security (maturity dates normally varying from 3 to 12 months), are sold at a discount.

Trust fund transaction (“Federal Fiscal Operations”)—An intrabudgetary transaction in which both payments and receipts occur within the same trust fund group.

United States—Includes the 50 States, District of Columbia, Commonwealth of Puerto Rico, American Samoa, Midway Island, Virgin Islands, Wake Island, and all other territories and possessions.

U.S. notes (USCC)—Legal tender notes of five different issues: 1862 (\$5-\$1,000 notes); 1862 (\$1-\$2 notes); 1863 (\$5-\$1,000 notes); 1863 (\$1-\$10,000 notes); and 1901 (\$10 notes).
