OP THE

## SECRETARY OF THE TREASURY OF THE UNITED STATES.

## REPORT ON THE FINANCES.

## DECEMBER, 1815.

In obedience to the acts entitled, respectively, "An act to establish the Treasury Department", and "An act supplementary to the act entitled "An act to establish the Treasury Department," the Secretary of the Treasury has the honor to lay before Congress the following report. comprehending,

1. A' cursory review of the financial operations of the Governments in . reference to the recent state of war:
2. A view of the finances for 1815, with estimates of the public revenue and expenditures for 1816 :
3. Propositions for the improvement and management of the revenue, and for ede support of public credit.
I: A cursory reviex of the financial operations of the Government, in reference to the recent state of war.
In order to introduce to the consideration of Congress, with advantage, the measures which will be respectfilly suggested for replacing the finances of the United States upon the basis of a peace establishment, a review of the financial operations of the Government, in reference to the recent state of war, appears to be a necessary preliminary.

The restrictive system, which commenced in the year 1807, greatly diminished the product of the public revenue; but it was not until the crisis involyed an actual declaration of war, that the augmentation in the expenses of the Government became obvious and important. With the occasional aid oftemporary loans, the ordinary receipts of the Treasury had exceeded the ordinary expenditures, even during a period of suspended commerce; (1) and a report from this department, presenting the estinates for the year 1812, seems to have given the first intimation that the portion of extraordinary expenses to be incurred for the military and naval service, on account of the then existing state of the country, would raise the demands upon the Treasury to a considerable anount beyond the estimated product of the current revenue. (2) The ordinary disbursements for the year ending on the 30 th September, 1811 , were stated as amounting to the sum of $\$ 13,052,65773$; and the ordinary receipts for the same year were stated as amounting to the sum of $\$ 13,541,446 \cdot 37$, independent of a temporary loai, (ratised in 1810 , and repaid in 1811,) as well as of the balances in the Treasury at the commencement and the close of the year. But the

[^0]estimates for the year 1812 required, on account of the current expenses, the sum of $\$ 9,400,000-$
For the civil and diplomatic departments $\$ 1,260,00000$
For the military department, (including the
-militia, the Indian department; the charge
of arsenals, army, and ordnance, \&c.) $=$
For the naval department
For the haval department : $\quad \therefore \quad 2,500,00000$
And for the interest on the public debt - $\quad 2,225,00000$
$\$ 9,400,00000$
And the subsisting revenue to meet these expenses was
estimated at the sum of $\$ 8,200 ; 000$; proceeding-
From the customs : - $\quad \$ 7,500,00000$
From the sale of public lands 600,00000
And from miscellaneous payments - $\quad-\quad 100,00000$
$8,200,00000$
Leaving a deficit, for which it was proposed to provide by a
loan, amounting to the sum of
$\$ 1,200,00000$

- Such were the limited objects of expense, and such the limited means of supply, at the commencement of the year in which war was declared. An increase of the expense, and a diminution of the supply, must have been anticipated, as the inevitable consequences of that event; but the Government reposed with confidence for all the requisite support upon the untried resources of the nation, in credit, in capital, and in industry. Th confidence was justly reposed; yet it may, perhaps, be considered as a subject for regret, and it certainly furnishes a lesson of practical policy, that there existed no system by which the internal resources of the country could be brought at once into action, when the resources of its external commerce became incompetent to answer the exigencies of the time. The existence of such a system would probably have invigorated the early movements of the war; might have preserved the public credit unimpaired; and would have rendered the pecuniary contributions of the people more equal as well as more effective. . But, owing tọ the want of such a system, a sudden and almost exclusive resort to the public credit was necessarily adopted, as the chief instrument of finance. The nature of the instrument employed was soon developed; and it was found that public credit could only be durably maintained upon the broad foundations of public revenue.

On the opening of the session of Congress, in November, 1811, the legislative attention was devoted to the organization of the military and naval departments, upon the enlarged scale of a war establishment; so that the appropriations for this purpose far exceeded; in a short time, the estimates and the resources of the Treasury, as they have been already described. Ways and means were therefore provided to meet the extraordinary demands thus created; but they were derived exclusively from the operations of foreign commerce and of public credit.

1. The Mediterranean fund was at first continued, until the 4 th of March; 1813, and afterwards until March, 1815 , (when it became extinct,) affording an additional duty of 21 per cent ad valorem, on all imported goods paying duties ad valorem; and a discriminating duly of 10 per cent. lipon that additional duty, in respect to all goods imported in vessels not of the United States. (3)
(3) See the act of the 25 th March, 1804 : 7 vol: 133; and the 3tst January, 1812:, 11 vol. 38 ; and the act of the 27th February, 1813: 11 vol. 401.
2. There were imposed an additional duty of 100 per cent. upon the permanent duties on goods imported into the United States from any foreign place; a discriminating duty of 10 per cent. upon that additional duty, in respect to all goods imported in vessels not of the United States; and an additional duty of $11: 50$ per ton (the previous duty being at the rate of 50 cents per ton) upon all-vessels belonging wholly or in part to the subjeects of foreign powers. But the continuance of the act being limited to the expiration of one year after the conclusion of the peace, these additional duties will cease on the 17 th of February, 1816. (4)
3. An authority was given tọ raise, by loan, asum not exceeding $11,000,000$ dollars, and to create stock for the amount, bearing interest not exceeding the rate of 6 per cent per annum, and reimbursable at any time after the expiration of twelve years from the 1st of January, 1813. The payment of the interest, and the redemption or the purchase of this stock, are charged upon the sinking fund. (5)
4. And an authority was given to issue Treasury notes, for a sum not exceeding $\$ 5,000,000$, bearing interest at the rate ot $5 \frac{2}{3}$ per cent. per annum, and reimbursable at such places, respectively, as should be expressed on the face of the notes, one year after the day on which the same shall have been issued. The notes were declared to be receivable in payment of all duties and taxes laid by the United States; and all public land sold by their authority and the payment of the interest, and the redemption or the purchase of these notes, were charged, like the funded debt, upon the sinking fund: (6) The effect of the additional ways and means provided by Congress, from time to time, during the late war, may readily be traced. From the report dated the Ist of December, 1812, it appears, that the actual receipts into the Treasury, during the year ending on the 30 th of September, 1812; including a portion of the loan, and of the issue of Treasury notes, amounted to the sum of \$16,782,159 40, (almost double the amount of the previous estimate,) and that the actual disbursements for the same year amounted to the sum of $\$ 18,368,325.07$, (which was almost double the amount of the previous estimate,) independent of the balances in the Treasury at the commencement and the close of the year. (7) But the estimates for the year 1813 required, on account of the accumulating expenditures, a sum of $\$ 31,925,000$.

For the civil and diplomatic departments $-\quad-\quad$| $\$ 1,500,000$ |
| :--- |

Fer the military department $-\cdots-17,000,000$
For the naval departient - - 4,$925 ; 000$
And for the interest and reimbursement of the principal of the public debt
$8,500,000$

And the subsisting revenue to meet these expenditures
$\$ 31,925,000$ was estimated at the sum of $\$ 12,000,000 ;$ proceeding,
$\begin{array}{lr}\text { From the customs } \\ \text { From the sale of public lands, } \& c & 11,500,000\end{array}$
12;000,000

(6) See the act of the 30th June, 1812: 11 vol. 255 .
(7) See the annual report of the Seceretary of the Treasury, dated the lst of December, 1812.

Leaving a deficit, for which it was proposed to provide : 1st, by the outstanding balances of the authorized loan and issue of theastiry notes; and 2d, by a new authority to borrow, and to issue Treasury notes to the ameunt of
\$19;925,000
During the session of Eongress which conmenced in November, 1812 and closed on the 3 d of March, 1813, the appropriations for the army, the nayy, and the other branches of the public service, were considerably augmented; but; withoût adverting to the imposition of amall duty upon imported ren-wire, ( 8 ) no new soturce of revenue was then opened; but aditional aid was extended to the Treasury by authorizing a repetition of the appeal to public eredit.

1. An authority was given to raise by loan a sum not exceeding $16 ; 000,000$ of dollars, and to create stock for the amount, bearing interest not exceediag the rate of 6 per cent: per anhum, and rembursable at any tinie after the expiration of 12 years from the 1st of January, 1814. The payment of the interest, and the redemption or purehasè of this-stock; are charged upon the sinking fund (9)
2. And an authority was given to issue Treasury notes, for a sum not exceeding $\$ 5,000,000$, absolutely; with a provisional authority to issite an additional sum of $\$ 5,000,000$, to be deemed gid held to be a partof the loan of $\$ 16,000,000$ authôized, as above sáted, to be raised. The notes were to bear interest at the rate of $\$ 5$ pef cent per annum; to be reimbutstoble at such places respectively as should be expressed on the face of them, one year after the day on which they should be issued; to be receitable in pay ment of all duties and taxes laid by the United States, and all public lands sold by the authority; and the payment of the interest, and the fedem tion or puichase of these notes, wêe charrged, tike the funded debt, upon the sinking fund. (10)

The necessities of the Treasury beconng; however, moreurgent, and the reliance on the publị credit becoming môre hazärdons, Congress determined; at a special session which comménced in Thay, 1813 , to lay the foundation of a system of internal revenue; selecting, ih particular, those subjects of taxation which were recommended by the expentence of a former period, and computing their general product at the sum of $\$ 5,000,000$. (11) The continuance of these taxes being limited, at first, to one year affer the termination of the war, they acquired the denomination of the war taxes but by subsequent laws almost all the existing revenues are pledged, with the faith of the United States, to provide for the payment of the expenses of Government, for the punctual payment of the public debt, principal and interest, according to the contracts, and for creating an addequate sinking fund, gradually toreduce, and eventually to extinguish, the public debt; tintil those purposes shail be accomplished; or until Congress shall provide and subbistitute bylaw, for the same purposes, other duties, which shall beè equally productive. In the session of May, 1813-

(11) See the letter of the Secretary of the Treastry to the chairman of the Committee of Ways and Means, dated January 10,1812 , and the report of the acting Secretary of the Treasury; dated June 2d, 1813.

1. A direct tax of $\$ 3,000,000$ was laid upon the United States, and apportioned to the wards suljected to the general pledge above stated. (12):
2. A duty of four cents per pound was laid upon all sugar refined within the United States. The continuance of the duty was limited to one year after the war, and as the general pledge has not been applied to it, the duty will cease on the 17 h of Eebruary, 1816 . (13)
3. A duty was laid upon all carriages for the conveyance: of persons; Kept by any person for his own use, or to be let out for hire, or for the conveyance of passengers, which was graduated, according to the denomination of the carrage, from the yearly sim of twenty dollars to the yearly sum of two dollars? The continuance of this duty was originally limited to the war; but thegeneral pledge has been applied to it, with some modifications in the mode of laying and collecting the duty (14)
4. A duty was imposed on licenses to distillers of spirituous liquors; which was graduated according to the capacity of the still, the time of employing it, and the materials consumed: The continuance of this duty was originally limited tôthe war: but the general pledge has been applied to it, with considerable modifications in the principle and provisions of the law. (15)
5. A duty was laid on sales at auction, of merchandise, and of ships and vessels, at the rate of one per cent. of the purchase money of goods, and of twenty-five cents for every hundred dollars of the purchase money of ships and vessels. The continuance of this duty was originally limited to the war ; but the general pledge has been applied to it, with a considerable ad=: dition to the amount, and a modification of the provisions of the law. (16)
6. A duty was laid on licenses to retailers of wines, spirituous liquors and foreign merchandise, gràduated according to the place of retailing, and the nature of the atticle retailed. "The continuance of this duty was originally limited to the ware but the general pledge has been applied to it. (17)
7. Aduty was laid on notes of banks and bankers, on bonds, obligations, or promissory notes, discounted by banks or bankers, and on foreign or inland bills of exchange above fifty dollars, and having onè or more endorsers', graduated accoirding to the nominal amount of the instrument. The continuance of this duty was limited to one year after the war; and as the general pledge has not been applied to it , the daty will cease on the 17 th of Febriary, 1816: (18)

But besides the direct tax and the internal duties, there were added to the resources of the Treasury, during the sessions of May, 1813-
8. A duty of 20 cents per bushel upon all salt imported from any foreign place intothe United States, which, being limited to the war, and not being included in the general.pledge, will cease on the 17 th of February, 1816. (19)
9. And an authorityito raise by loan a sum not exceeding $\$ 7,500,000$, and to cereate stock for the amount, reimbursable at any time after the expiration of t twelve years from the lst of January, 1814. The rate of interest was not

(17) See the acts of the 2d of August 1813, and 23d December 1814 12 vol. 184.26.
(18) See the act of the 2 d of August 1813: 12 vol. 204.
"19) See the act of the 29th of July 1813: 12 vole 127.
limited by the law, butit was provided that no certificate of stock should be sold at a rate less than 88 per cent., or $\$ 88$ in money for $\$ 100$ in stock: The payment of the interest, and the redemption or the purchase of this stock, are charged upon the sinking fund. (20)

The sources of revenine thus opened in 1813 could not however, be'expected to aid the Treasury until 1814, and, accordingly, in the annual re port from this department, dated the Sth January, 1814, neither the direet tax nor the internal duties will be found as an item of the actual receipts into the Treasury during the year ending the 30th of September, 1813. The amount of those receipts was stated in the proceeds of the customs, of the sales of public lands, \&c., at $\$ 13,568,04243$, and in the proceeds of loans and Treasury notes, at $\$ 23,976,912$ 50, making, together, $\$ 37,544,95493$; and the actual disbursements of the same period were stated at $\$ 32,928,95519$, independent of the balances in the Treasury at the cominencement and the close of the year. (21) But the estimates for the year 1814 required a sum of $\$ 45,350,000$ :
For civil, diplomatic, ánd miscellaneous ex-a penses
For the payment of interest on the old and new debt, and the instalments of the prin. cipal of the old debt
$\$ 1,700,000$

For the military establishment - - -
For the naval éstablishment

$$
\begin{array}{r}
12,200,000 \\
24,550 ; 000 \\
6,900,000
\end{array}
$$

$$
\$ 40,350,000
$$

And the subsisting revenue to meet these expenditures was estimated at; the; sum of $\$ 14,370,000$, proceeding -
From the customs, and sales of public lands $\$ 6,600,000$
From the internal duties and direct tax - $3,500,000$
From a balance of loans and Treasuiry notes

Leaving a deficit; for which it was proposed to provide-
1st By a part of the balance in the Treasury; and
2d. By loans and Treasury notes, amounting to ${ }^{2}-6-230,980,000$
For the deficit thus approaching the sum of $\$ 40,000,000$, the only provision made during the session which commenced in December, 1813, rested again upon the public credit.

1. An authority was given to issue Treasury notes, for amnot exceeding $\$ 5,000,000$ absolutely, with a provisional authority to issue an additional sum of $\$ 5,000,000$, to be deemed and held to be a part of any loan which might be authorized during the session. The notes were to bear interest, at the rate of $\$ 5_{3}^{2}$ per cent. per annum; to be reimbursableat such places, respectively, as should be expressed on the face of them, one year after the day on which they should be issued; to be receivable in payment of all dities and taxes laid by the United States, and all public lands sold by their aithority; and the payment of the interest, and the redemption or purchase of these notes, were charged, like the funded debt; upon the sinking fund. (22)
2. And an authority was given to raise, by loan", a sum not exceeding $\$ 25,000,000$, and to create stock for the amount, reimbursable at any time after the expiration of twelve years, from the last day of December, 1819
(20) See the act of the 2 d of August, 1813.12 vol. 200.
(21) See the annual Reportof the acting Secretary of the Treasury, dated 8th Jan. 1814. Digitized for FR 22 2) See the act of the 4 th March, 1814: 12 vol: 276 .

Neither the rate of the interest, nor the price of the stock, was limited; and the payment of the interest, and the redemption or the purchase of the stock, are charged upon the sinking fund. (23)

The embarrissments of the Treasury, after the adjournment of Congress, in the year 1814, became extreme? It appears (24) that the disbursements during the first half of that year had amounted to the sum of $\$ 19,693,78127$.
For the civil; diplomatic, and misiscellaneons expenses - $\$ 1,444,76260$
For the military department $-\cdots, 11,210,23800$
For the naval department $-4,012,19990$
For the public debt - - $-3,026,58077$
$19,693,781 \quad 27$
And the balance of the appropriations for the same objects:
of expenditure, required during the other half of the
same year, was stated at the sum of
27,576,391:19
$\$ 47,270172.46$
But the actual receipts-into the Treasury; during the: first
half of the year 1814, had amounted to $\$ 19,219,946 \quad 33$; proceeding
From the customs
From the sale of public lands, (including those in the Mississippi Territory, the proceeds of which are payable to the State of Georgia)

$$
\$ 4 ; 182,088 \quad 25
$$

From the internal duties and direct tax 2,189,272 40
From postage and incidental receipts" - 166,74400
From loans $\quad, \quad 0,679,67600$
From Treasury notes - . . . . $2,462,10000$
$\$ 19,219,946-33$
And it was estimated that there woild be received from the same sources of revenue,(iitcluding loans and Tréasury rotes to the amount of $\$ 8,320,000$, , during the other half of the same year; the sum of

To this amount add the balance of the cash in the Treasury, on the ist of July, 1814,

And the estimated aggregate of the funds, to meet the demands on the Treasury, to the close of the year 1814, was the sum of $3 \div-23,102,58555$

Leaving a deficit for the service of 1814 , after absorbing
all the cash of the Treasury, amounting to the sum of $-\$ 10,167,58691$
To supply this deficit of $\$ 10,167,58691$, to provide an additional sum or the contingencies of the yea, and to accelerate the fiscal measures which vere essentíhl to the prosecution of the war in 1815, the interposition of ie Legislature was deemed indispensable. The plan of financè which
(23) See the act of the 24th of March, 181412 vol 309.
?4) See the anmual report of the Secretary of the Treasury dated 23 d September, 1814.
was predicated upon the theory of defraying the extraordinary expenses of the war by successive loans, had already become inoperative. The product of the reveniues had ceased to furnish an amount equal to the expendiz ture of the former peace establishment, with an addition of the interest upon the debt contracted on account of the ware And the sudden suspension of specie payments, at the principal banks, established in the different States, however it may be excused or justified by the apparent necessity of the case; had exposed the Government, as well as private citizens, to all the inconveniences of a-variable currency, devoid olike of national authority and of national circulation. The Treasury could no lenger transfer its funds from place to place, and it became, of course, impracticable to maintain the accustomed punctuality in the payment of the public engagements.

Under these circumstances, the Congress was convened, by the special call of the President, in September, 1814 ; when the citizens of every occupation and pursuit seemed eager to second the legislative efforts to replenish an exhausted Treasury, and to renovate the public credif. Commerce continued to contribute, perhaps, to the extent of its capacity. Agriculture, though suffering the want of a vent forisome of its important staples, was everywhere prepared for the requisite exertion Domestic manufactures, which had scarcely surmounted the first struggle for existence, yielded to the patriotic impulse. And the capital of individuals, in all its variety of form, offered a reeady tribute, to relieve the necessities of the country: Thus, during the session which commenced in September, 1814, and closed on the 3 d of March, 1815 , the following internal duties were increased in their amount, the duties were rendered permanent, and the general pledge was applied to them :
(1) . The direct tax was raised to an annual sum of $\$ 6,000,000$, (25) and it was extended to the District of Columbia. (26)
(2) The duty on carriages was raised, and a-duty on the harness was added. (27)
(3) The duty on licenses to distillers of spirituous liquors was continued, and a duty on the spirits distilled wass added. (23)
(4) The duties on sales at auction, and on liceenses to retail wines, and spirituous liquors, and foreign merchandise, were raised. (29)
(5) The rates of postage were raised 50 per cent. (30)
2. The following new duties were permanently laid, and the general pledge was applied to them. $-\cdots$ But it was at the same time declared, that so long as the duties, imposed on the articles of domestic manufacture shotild contimue to be laid, the duties then payable on the tike description of goods; imported into the United States, should not be discontimed or diminished.

1. Duties on various articles, manufactured or made for sale within the United States, or their Territories; as' specified in the annexed table, marked B.
2 Dutiès on articles-in use : (31) to wit:
On household furniture, the value in any one family (with certain exceptions.) exceeding $\$ 200$ in money, according to a scale graduated fröm $\$ 1$ on a value of $\$ 400$; to $\$ 100$ on a value of $\$ 9,000$.
[^1]On every gold watch kept for use, \$2.
On every silver watch kept for use, $\$ 1$.
But, besides establishing these sources of revenue, (and others were cont templated at the period when the treaty of Ghent was announced;) Congress sought to confer upon the Treasury the means of anticipating the collection of the duties; of recovering the punctuality of its paymens'; and of invit ing the co-operation of the moneyed institutions, and moneyed men of the United States, in plans for restoring a uniform national currency. With these views, varitou's measuxes were sanctioned.

1. An authority was given to raise, by loan, a sum not exceeding $\$ 3 ; 000,000$, (particularly destined to provide for the expenditures of the last quarter of the year 1814) and to create stock for the amount, reimbursable at any time after the 31st December, 1814.. No limitation was prescribed as to the rate of interest, or the price of the stock; but it was declared, that in payment of subscriptions to this lown, or to loans authorized by anyother act of Congress, it shont be lawful to ree eve Treasury notes; becoming duè on or before the lst of January,"1815, at their par value, together with the interest accrued.

The payment of the interest, and the redemption or the purchase of the stock to be thus created; were charged upon the sinking find; but the act contaned théséfurther assurances alst, that in addition to the annual stum of $\$ 8,000,000$, heretofore appoprated to the sink wing fund adequate and permanent funds should be provided and apprôpriated, during that 'session of Congress, for the payment of the interest aid the rembursenent of the principal of the stock, and 2d, that an adequate and permatinent sinking: fund, gradually to reduce, and eventuallyisto extinguish, of public dëbt contracted during the war, should also be established during the same ses sion of Congress: (32)
2. An authority was given to anticipate the collection and receipt of the duites onslicenses to distilters of spirituous liquors, and on distilled spirits, by obtaining a loan upon the pledge of the daties, to an âmout not exceeding, $\$ 6 ; 000,000$, and at ate of intest net exeeding six petent per; anium. (33) And a stailar atithority was given to raise alliee sum; at the samerate, by the pledge of the direct tax. (34)
3. An authority was given to issue Treasury notes, for so muth of the sums authorized to be borrowed under the acts of the 24th of March, and the 15 th of November, sisi4, as had not been borowed, or otherwise employed in the issue of Treasury notes, provided that the whole amount should not exceed the sum of $\$ 7,500,000$. And, by the same act, an aut thority was also givere to issie afüther sum of $\$ 3,000000$, to supply a deficiency in the appropriations for the expenses of the War Department: The Treasury nôtes isstied under thésé âuthorities wère, in all réspects, similar to the prior issues of Treasury notes; except that the payment of the interest, añd the reimbursenent of the principal, were not, as heretofore, chatged upon the sinling fuand but tipon any money in the Treasury not othervise approphateds (35)
4. An authority was given to issue and re-issue Treasury sun hot exceeding $\$ 25,000,000$, upon principles éssentially diferent from the prior issues. (36).
(33) See last sec. of the act of the 21 st of Dec. $1814,12 \mathrm{vol}$. 26 ?
(34) See the lust sec. of the act of the 9th of Jan, 1815 : 12 vol, 56.
(35) See the act of the 26 th of Dec. 1814,12 vol.30
(1.) These Treasury notes might be of any denomination. If they were of a denomination less than $\$ 100$, they were to be payable to the bearer, to be transferable by delivery, and to bear no interest." This denomination has acquired the designation of "small Treasury notes." If they were of the denomination of $\$ 100$ or upwards, they might conform to the foregoing description ; or they were to be payable to order, to be transferable by endorsement, and to bear interest at the rate of $5^{2}$ per cent. per annum. This denomination (of 'which only notes for $\$ 100$ bearing' interest have been issued) has acquired the designation of "Treasury notes of the new emis: sion."
(2.) The principal and interest of these Trasury notes are not payable at any particular time; but the notes are everywhere receivable in all payments to the United States.
(3.) The holders of "small Treasury notes" may exchange them at pleasure, in sums not less than $\$ 100$, for certificates of funded stoelk, bearing interest at 7 per cent. per annum, from the first day of the calendar month next ensuing that in which the notes sliall be presented to the Treasury of the United States, or to a commissioner of loans, for the purpose of exchange.
(4.) The holders of "Treasury notes of the new emission" may exchange them at pleasure, in sums not less than $\$ 100$, for certificates of funded stock, bearing interest at 6 per cent. per annum, from the first day, of the calendar month next ensuing that in which they shall be presented to the Treasury of the United States, or a commissioner of loans.
(5.) The stock thus created, by the exchange of Treasury notes of either denomination, is reimbursable atany time after the $31 \mathrm{st} \mathrm{of} \mathrm{December}, \mathrm{1824}$, and it is charged upon such funds as had been; or should be, established by law for the payment and reimbursement of the funded public debt; contracted since the declaration of war.
5. An anthority was given to raise, by loan, a sum not exceeding $\$ 18,452,800$, and to create stock for the amount, reimbursable at any time after the expiration of twelye years from the last day of December, 1815. (37) Neither the rate of interest, nor the price of the stock, was limited; but it was declared that there might be received, in payment of subscriptions to the loan, such Treasury notes as were actually issued before the passing of the act, and which were made, by law, a charge on the sinking fund: (38) And the payment of the interest, and the reimbursement or the purchase of the principal of the stock, are charged upon the sinking fund. (39)
6. It was declared that any holder of any Treasury notes, issued, or authorized to be issued, under any laws previously passed, might convert them into certificates of funded debt, bearing an interest of 6 per cent. per annum. (40)
7. And it was declared that it should be lawful for the Secretary of the Treasury to cause to be paid the interest upon Treasury notes which have become due and remain unpaid, as well with respect to the time elapsed before they became due, as with respect to the time that shall elapse after they become due, and until funds shall be assigned for the payment of the said Treasury notes, and notice thereof shall be given.

[^2]The progress of expenditure and of revenue, for the entire period of the war, is thus developed; and, independent of the balance of the appropriations for the year 1814, which is transferred to the accounts for the year 1815, the sinbject may be redaced to the following general abstract.

## THE ACTUAL RECEIPTS OF THE TREASURY.

It will be natural here to inquire into the general effects of the war apon the public debt of the United States; and the annexed table (marked C) exhibits a detailed statement of the unsatisfied atiount on the lst day offan. uary, annully, from the year 1791 to the year 1815 both nelusivel sThe subject, however, may be placed distinctly in the following point of view, upon estimates referring to the date of he 30 h of September, 1815

OFTHE PUBLIC DEBT.

1. The amount of the funded debt contracted before the late war, which remained unsatisfied on the $30 t h$ of September; 1815 , may be stated at the sum of $\$ 39,135,48496$, to wit :
(1.) In old six per cent. stock, the nominal amount
being - $\$ 77,350,87139$
And the amount reimbursed being $\quad 13,467,58700$
Balance due on the 30thof September, 1815
$\$ 3,883,28439$
(2.) In deferred six per cent stock, the
nominal amount being , $9,358,32035$
Añethe amount reimbursed being - $\quad 4,152,54393$
Balance due on the 30th of September, $1815: \quad 5,205,77642$

| (3.) In three pèr cent. stock | \$16,158,17\% 43 |
| :---: | :---: |
| (4.) In exchanged six per cent. stock, under the act of 1812 | : $2,984,44672$ |
| (5.) In six per cents stock of 1796 | 80,000 00 |
| (6.) In Louisianasix per cent. stock -4t momat | 10,923,500 00 |
| on the 30th of September, 1815, of the w |  |
| ublic debt con | 9,135,48 |

2. The amount of the funded debt contracted on account of the late war, on the 30 th of September, 1815 , may be stated at the sum of $\$ 63,144,97250$; to wit:
(1.) In six per cent stock of 1812 , (he $\$ 11,000,000$ loan,) authorized by the act of the 4th of March, 1812, obtained at par, and not reimbursable before the year 1825 -
(2.) In six. per cent 'stock of 1813 , (the $\$ 16,000,000$ loan,) authorized by the act of the 8th of February, 1813, obtained at the rate of $\$ 88$ in cásh for $\$ 100$ in stock, and not reimbursable before the year 1826
(3.) In six per cent. stock of 1813 , (the $\$ 7,500,000$ loan,) authorized by the act of the 2 d of August, 1813 , obtained at the rate of $\$ 8825$ in money for $\$ 100$ in stock, and not reimbursable before the year 1826
$\$ 7,860,500 \quad 00$

$$
18,109,37748
$$

(4.) In six per cent. stock of $1 \$ 14$, (which arose from loans in parts of a sum of $\$ 25,000,000$, called the ten million loan and the six million loan,) authorized by the act of the 24th of March, 1814, obtäined at different rates, and not reimbursable before 1827 , to wit:

$$
\begin{aligned}
& \$ 12,292,888 \text { 90 at } 80 \text { per cent, stock-\$15;366,111 } 21 \\
& 140,81000 \text { at } 85 \text { per centit stock } 165,65882 \\
& 43,22222 \text { at } 903 \text { per cent. stock : 47,627 79 } \\
& 74 ; 59075 \text { at } 90 \frac{1}{2} \text { per cent. stock } \quad 82,4 \% 72
\end{aligned}
$$

$8,498,58195$

$$
12,551,51187
$$

$15,661,81854$
(5.) In six per cent. stock of 1815 , the $\$ 12 ; 000,000$ loan,) authorized by the act of the 3d of March, 1815, ob: tained at different rates, payable in Treasury notes, or in cash, and not reimbursable before 1827, to wit:

$$
\begin{aligned}
& \$ 7,924,21959 \text { at } 95 \text { per cent. stock } \$ 8: 341,28377 \\
& 1,047,84630 \text { at } 96 \frac{1}{2} \text { per cent. stock } \quad 1 ; 085,85108 \\
& 32,97849 \text { at } 97 \text { per cent. stock } \quad 33,998,44 \\
& 275,00000 \text { at } 98 \text { per cent. stock , } \quad 280,61224 \\
& 4,00000 \text { at par, stock } \quad 4,00000
\end{aligned}
$$

$9 ; 745,74553$
(6.) In 7 per cent. stock of 1815 , created by funding Treasury notes not bearing interest, issued part at par and part upon an advance, under the act of the 24th of February, 1815 , and not reimbursable until $1825-3,268,94900$

Estimated amount of the whole of the funded public debt in reference to the late war: $\quad-\quad 63,144,97250$
3. The amount of the floating debt contracted since the commencement VoLi. 11.-2
of the late war, calculated to the 30th September, 1815, may be stated at the sum of $\$ 17 ; 355,101$; fo wit.
(1.) The aggregate of Treasury notes issued under the authority of the several acts of Congress passed prior to the act of the 24th of February, 1815, amounted to the sum of $\$ 20,201,600$; to wit:

Payable in 1814, but unpaid - $\quad \$ 2,799,20000$
Payable in 1815 $\because \quad \therefore \quad 7,847,28000$
Payable in 1816
Payable also in 1816 (issued under the special authority of the act of the 26 th of December, 1814).
$\frac{8,318,40009}{21,737,60000}$

Deduct the amount reimbursed in 1815 (at Philadelphia, Baltimore, Washington; Charleston, and Savaniah)
$1,536,000 \quad 00$
$\$ 20,201,60000$
Of this a ggregate there has been subscribed, in principal and interest, to the loan of 1815 , about the sum of
From which deducting an average esti-mate of near one year's interest, about the sum of $\$ 4,531,58706$

There will remain for the amount of principal subscribed to the loan, about the sum of $4,315,00000$

And it is estimated that there has been paid on account of duties and taxes, to the collectors of the customs, the internal duties, and the direct $\operatorname{tax}_{2}$ x, about the sum of - $1,200,00000$

$$
5,515,000 \cdot 00
$$

Outstanding amount of Treasury notes, bearing interest at $5 \frac{2}{2}$ per cent. per annum, about the sum of $14,686,60000$
(2) The aggregate of "small Treasury notes" issued and reissued under the act of the 24th of February, 1815, amounts to about the sum of

- \$4,142,850. 00

Of this aggregate there has been funded for 7 per cent. stock, included in the foregoing statement of the funded public debt, about the sum of $\$ 3,268,949 \cdot 00$

And there has been paid, on account of duties and taxes, about the sum of 50,00000

$$
3,318,94900
$$

Outstanding "small Treasury notes," about the sum of

823,90100
$694,600 \quad 00$
$16,205,101 \mathrm{C}$

But to this amount of the public floating debt, in Treasury notes, there must be added the following temporary loañ, to wit:
(1.) A temporary loan made by the State Bank of Boston, in 1812 , payable the 15 th and 31st of December; 1814 , büt manaid

- $\$ 500,00000$
(2.) A temporary loan made by the Cumberland Bank, in 1812, payable the 15th of Novénber, 1817
(3.) A temporary loan made by the Bank of the State of South Carolina, in 1814, payable the 1st of December, 1815 ,
(4.) A temporary loan made by the Me chanics Bank of New York, in 1815, payable when demanded

50,000 00
(5.) A temporary loan made by the State of New York, payable in the year 1817

200,00000
350,00000
$\$ 1,150,00000$
Making the aggregate amount of the floating public debt about the sum of
$\$ 17,355,10100$

## RECAPITULATION.

1. The amount of the unsatisfied funded public debt; contracted before the war, on the 30 th of September, 1815 , was the sum of
$-\$ 39,135,484.96$
2. The amount of the funded pablic debt; contracted in reference to the late war, on the same day, the sum of

$$
-\$ 63,144,972 \quad 50
$$

3. The amount of the floating public debt, contracted since the war, was, on the:
same day the sum of $-17,355,10100$
Total of the ascertained amount of the public debt cre-
ated since the war, to the 30 th of September, 1815

- \$80,500,073 50

Total amount of the national debt, on the 30th of September, 1815

- $\$ 119,635,55846$

It is proper to remark, that the aggregate of the national debt, thus stated, to the 30th of September, 1815, is subject to considerable changes and additionis. The floating debt in Treasury notes is convertible, at the pleasure of the creditors, into funded debt and, independent of a direet application of the current revenue to discharge the Treasury notes as wèll as the temporary loans, there must be a great; though gradual, reduction of the floating debt by the payments made in Treasury notes for duties, taxes, and public lands. There are, indeed, some claims known to exist for loans, suppliés, and services, during the late war which have not been liquidated, or are not embraced by existing appropriations; and, doubtless, there are other legal and equitable claims which have not yet been brought into view in any form at the accounting departments, but which may eventually rereive the sanction of Congress. It is not, however, within the scope of any
estimate hitherto made, to state the probable addition to the funded debt, under all circumstances, at more than $\$ 7,000,000$; which would consequently place the aggregate of the funded debt, created in consequence of the war, at a sumnot much exceeding $\$ 70,000 ; 000$, But it may be important to recollect, that the war debt has not been entirely incurred for objects limited to the contina ance of the war; and that the military and naval establishments, in particular, have derived durable advantages from the expenditures of the Treasury.

For the payment of the interest, and the reimbirsement or gradual extinguishment of the national debt; the resources of the Treasury are abundant, although the state of the circulating medium (which will be more particularly considered hereafter) has rendered it impracticable to obtain, at all times, upon reasonable terms, the local currency of some of the places appointed for the discharge of the public engagements. These resources depend upon the sinkingfund, connected with the faith of the United States, which is pledged to supply from the existing or from other objects of pevenue the deficiencies of that fund.

## THE SINKING FUND.

The public debt anounted, on the 1st of January 1791, to the sum of $\$ 75 ; 463,47652$; and it consisted
Of the foreign debt . $\$ 12,812,82192$

Of the domestic debt , $\because \quad$ - 62,$650 ; 65460$
$\$ 75,463,47652$
The foreign debt experienced various changes in form and in amount. From 1792 to 1795 , it rose above the amount stated for 1791 phat from that period it was gradually reduced, and on the 1st of January 1801, it;stood at the sum of $\$ 10,419,000$. From the year 1801; however, the annual reduction was more rapid, and in the year 1810 the foreign debt became extinct.

The domestic debt has also experienced various changes in form and amount. It was originally stipulated that it should be subject to xedemption by payments not exceeding, in one year, on account both of principal and interest; the proportion of $\$ 8$ upon $\$ 100$ of the stock; ( 41 ) and when the sinking fund was constituted and organized, provision was made for effecting the payments in that proportion, until the whole debt should be extinguished by dividends; payable. on the larst days of March, June, and Septeimber, in each year, at the rate of $-1 \frac{1}{2}$ per cent., and on the last day: of December, in each year, at the rate of $3 \frac{1}{2}$ per cent. upon the original capital. (42) During the first period of about 10 years, from 1791 until the Ist of January, 1801 , the amount of the domestic debt never fell below the sum which has been stated, and in 1801 it stood at about the sum of $\$ 72,619,05080$. The augmentation created on account of the purchase of Louisiana; (amounting to $\$ 15,000,000$,) raised the capital of the domestic debt, in 1804 , to the sum of $\$ 80,691,12088$; but from that period there was a considerable anmual diminution of the amount; until it was reduced on the 30th of September, 1815 , to the already specified sum of $\$ 39,135,48496$.

The sinking fund, by whose operations these beneficial effects have been produced, may be regarded as coeval with the organization of the present Government; but it has andergone many important modifications.

[^3]1. The early appropriations of the revenue were confined to the payment of the interest and instalments of the foreign debt, and to the payment of the interest of the domestic debt;-but so early as the 4th of August, 1790 , the proceeds of the sales of public lands in the Western Territory were permanently and exclusively appropriated and pledged towards sinking and discharging the debts for which the United States were then holden. (43) The annexed table $D$ will exhibit a statement of the quantity of the public lands which have been annually sold, and of the proceeds of the sales; as far as can be now ascertained.
2. In the year 1792, however, commissioners were designated and anthorized to puirchase the public debt at its market price, not exceeding the par value; and the interest of the debt purchased, together with the surplus of certain other appropriations, was assigned for that purpose. (44). When the annual amount of the fuind thus created should be equal to two per cent on the six per cent. stock it was directed to be first applied to the redemption of that stock, according to the right reserved, and then to the purchase, at its market price, of any other public stock.
3. "In the year 1795, "the sinting fuind" was established by name"(45) its resources were vested in the same commissioners; and its operations were subjected to their direction and management.- The duyyof the commissioners, independent of temporary objects, consisted iiny applying the sinking fund-lst, to the payment of the six per cent stoct, at the stipulated rate of eight per cent. per annum; 2 d , to the payment of the deferred stock, after the year 1801, according to the same stipulation; and $/ 3$ 3, if, any surplus remained, towards the further and final redemption of the public debt of every denomination. For the accomplishment of the purposes, there were permatiently appropriated and pledged, in addition to the other monevs constituting the sinking fund, and the interest of the amount of the purchased or redeemed debt-1st, a sufficient sum arising yearly, and every year, from the duty on imports and tonnage, and the duty on domestic distilled spirits and stills; as might be rightfully paid of the principat of thesix per cent. stock, commencing oni the ist of January, 1802; 2d; thed dividends on the public shares in the Bank of the United States: buit the shares were sold in 1796 and 1802, under an anthority given in 1795; 3d, the nett proceeds of the sales of public lands in the Western Territory; 4th, moneys received into the Treasury or account of old debts; 5th, the surpluses of revenue beyond the amount of the appropriations.
4. Such was the outline of the sinking fund when, on the 6th of April, 1802, (46) the internal duties were repealed; and on the 29th of April, 1802, a new and additional provision was made for the redemption of the public debt. Thus, an anmual sum of $\$ 7,300,000$ was permanently appropriated and vested in the commissioners of the sinking fund, to be produred -1st, by the moneys (other than the surpluses of revenue) which then constituted the find, or should arise to it by virtue of any previous provisions; 2d, by the sums annually required to discharge the interest and charges of the public debt; and, 3d, by so much of the duties on merchandise and tonnage as would be necessary, together with the preceding resources, to complete the annual investment of $\$ 7,300,000$. The act not only placed the reimbursement of the principal, but also the payment on

[^4]account of interest and charges of the public debt, under the superintendence of the commissioners; making ititheir duty to cause the fund to be applied in payment-1st, of such sums as by virtue of any acts they had previously been directed to pay; 2d, of such sums as may be annually wanted to discharge the interest and charges accruing on any other part of the then debt of the United States; 3d, of such sums as may be annually required to discharge any instalment of the principal of the then debt; and, 4th, as to any surplus, to apply it towards the further and final redemption, by payment or purchase of the then debt. (47) The act of the 10 th November, 1803 , having created six per cent. stock to the anount of $\$ 11,250,000$, in pursuance of the convention for the purchase of Louisiana, added an annual sum of $\$ 700,000$ to the sinking fund, to be paid out of the duties on merchandise and tonnage, and to be applied by the commissioners to the payment of the public debt, including the Louisiana stock, in the manner above stated. It may be added that the interest on the Louisiana stock is payable in Europe; but the principal is reimbursable at the Treasury of the United States, in four annual instalments, commencing in 1818. (48)

It is obvious that a sinking fund of $\$ 8,000,000$ (independent of the general pledges in prior laws) was ample for the payment of the interest and the principal of a public debt amounting only to the sum of $\$ 86,000,000$, extinguishing the six per cent. stock in 1818, the deferred stock in 1824 , and the Louisiana stock in 1822, as fast as the terms of the contracts and the policy of Government would permit. The general operation of the fund, indeed, has been shown; but it is proper more particularly to add that, on the 1st of January, 1815, there had been transferred to the credit of the commissioners, in the books of the Treasury, an amount of public debt equal to the sum of $\$ 33,873,46398$, of the following denominations, to wit:

1. FOREIGN DEBT.

| 3 per cent. stock, | - | - | $\$ 8,200,000$ |
| :--- | :--- | :--- | :--- |
| 42 |  |  |  |
| $4 \frac{1}{2}$ per cent. stock | - | 820,000 |  |
| 4 per cent. stock | - | - | $3,180,000$ |
|  |  |  |  |

2. DOMESTIC DEBT.

| 6 per cent. stock | - | - | - | $\$ 1,946,026$ | 92 |

$$

$3,460,00000$
$4,200,00000$
On account of the principal and interest of Treasury notes, issued under the acts of the 30th of June, 1812, the 25th of February, 1813, and the 4th of March, 1814, (after allowing for the amount reimbursed, subscribed to the loan, and paid for duties, about the sum of - $\quad-\quad 6,864,20000$

Deficit in the amount of the sinking fund, compared with the charges upon it, estimated for 1816

- $\$ 6,524,20000$

From this view of the financial operations of the Government, the Secretary of the Treasury, with every sentiment of deference and respect, presents the following general conclusions for the consideration of Congress.

1. That the existing revenue of the United States arises, (1st.) From duties on imported merchandise and the tonnage of vessels; (2d.) Internal duties, including the direct tax upon lands, houses, and slaves; and; (3d:) The proceeds of the sales of public lands. But some of these duties and taxes are permanently imposed, and some are limited in their duration.
2. That the following duties or taxes are either partially or wholly limited in their duration: (1st.) The duties on merchandise and tonnage will be reduced one-half on the 17th of February, 1816; except such as are imposed on goods of the like description with the articles of domestic manufacture on which duties have been laid, and included in the general pledge. (2d.) The new duty on salt, the duty on sugar refined within the United States, and the stamp duty on bank notes, promissory notes discounted, and on bills
of exchange, are not included in the general pledge, and will wholly cease on the 17 th of February, 1816.
3. That the following duties or taxes are not limited in their duration, and are includedin the generat pledge : (1st.) The direct tax upon lands, houses, and slaves; (2d.), The duties upon licenses to distillers of spirituous liquors, and upon the liquors distilled; (3d.) :The duty upon licenses to retailers of wines, spirituous liquors, and foreign merchandise; (4th.) The duty upon sales at auction ; (5th.) The duty upon carriages and harness; (6th.) The duties upon household furniture and watches; (7th.) The duties on articles manufactured or made for sale within the United States; (8th.) The rate of postage.
4. That the faith of the United States, and the revenue arising from the duties and taxes, which are not limited in their duration, are pledged for the punctual payment of the public debt, principal and interest, according to the terms of the contracts, respectively ; and for creating an adequate sinking fund, gradually to reduce, and eventually to extinguish, the debt. But this pledge will be satisfied by the substitution of other adequate duties or taxes; and the increase in the proceeds of the duties on merchandise, subsequent to the pledge, affords an advantageous : opportunity of making such substitution in respect to the more inconvenient and burdensome portion of the internal duties.
5. That the establishment of a revenue system, which shall not be exclusively dependant upon the supplies of foreign commerce, appears, at this, juncture; to claim particular attention.

## II. A view of the finances of 1815 , with estimates of the public revenue and expenses for 1816.

At the close of the last session of Congress, the demands upon the Treasury were interesting in their nature, as well as great in their amount. Exclusively of the ordinary expenses of the Government, they consisted of demands for the payment of the army, preparatory to its reduction to the peace establishment, with other very heanvy arreárages and disbursements in the War and Navy Departments; for the payment of the dividends on the funded debt, and of the arrearages, as well as the accruing claims, on account of the Treasury note debt ; and for the payment of the Louisiana dividends; with other considerable debts contracted in Europe, in consequence of the late war.

The efficiency of the means which were possessed for the liquidation of these demands depended upon. circumstances beyond the control of the Government. The balance of money in the Treasury consisted of bank credits, lying chiefly in the southern and western sections of the Union. The revenue proceeding from the provision made prior to the last séssion of Congress was comparatively of small-amount : the revenue proceeding from the provision made during that session could not be available for a great portion of the present year; and, in both instances, the revenue was payable in Treasury notes, or it assumed the form of bank crëdits, at the respective places of collection. The only remaining resources, for immediate use, were an additional issue of Treasury notes, and a loan; but the successful employment of these resources was rendered, for some time, doubtful, by the peculiar situation of the credit and currency of the nation.

The suspension of specie payments throughout the greater portion of the United States, and the consequent cessation of the iuterchange of bank notes and bank credits between the institutions of the different States, had
deprived the Treasury of all the facilities of transferring its funds from place to place; and a proposition, which was made at an early period, to the principal banks of the commercial cities on the line of the A'tlantic; with a view, in some degree, to restore those facilities, could not be effected for the want of a concurrence in the requisite number of banks. Hence it has happened (and the duration of the evil is without any positive limitation) that, however adequate the puiblic revenue may be; in its general product, to discharge the public engagements, it becomes totally inadequate in the process of its application; since the possession of public funds in one part, no longer affords the evidence of a fiscal capacity to discharge a public debt in any other part of the Union.

From the suspension of specie payments, and from various other causes, real or imaginary, differences in the rate of exchange arose between the several States, and eveñ between the several districts in the same State; and the embarrassments of the Treasury were more and more increased, since Congress had not sanctioned any allowance on account of the rate of exchange, and the amount of the legislative appropriations was the same, wherever the legislative objects were to be effected. But the Treasury notes partook of the inequalities of the exchange, in the transactions of individuals, although the Treasury could only issue them at their par value. The public stock, created in consideration of a loan, also partook of the inequalities of the exchange; although to the Government, the value of the stock created, and the obligation of the debt to be discharged, were the same, wherever the subscription to the loan might be made.: Thus, notwithstanding the ample revenue provided, and permanently pledged for the payment of the public creditor; and notwithstanding the auspicious influence of peace upon the resources of the nation, the market price of the Treasury notes, and of the public stock, was everywhere far below its par or true value, for a considerable period after the adjournment of Congress ; vibrating, however, with a change of place, from the rate of 75 to the rate of 90 per cent. Payments in bank paper were universally preferred, during that period, to payments in the paper of the Government; and it was a natural consequence that, wherever the Treasury failed in procuring a local currency, it failed, also, in making a stipulated payment.

Under these extraordinary and perplexing circumstances, the great effort of the Treasury was, 1st. To provide promptly and effectually for all urgent demands, at the proper place of payment, and to the requisite amount of funds. 2d. To overcome the difficulties of the circulating medium, as far as it was practicable; so that no creditor should receive more, and no debtor pay less, in effective value, on the same account, than every other creditor or every other debtor. And, 3d. To avoid any unreasonable sacrifice of the public property, particularly when it must also be attended with a sacrifice, of the public credit. It was not expected that this effort would everywhere produce the same satisfaction, and the same results.; but the belief is entertained, that it has been successful in the attainment of its objects, to the extent of a just anticipation.

## OF THE ISSUES OF TREASURY NOTES.

The Treasury notes, which were issued under acts passed prior to the 24th of February, 1815, were, for the most part, of a denomination too high to serve as a current medium of exchange; and it was soon ascertained that the small Treasury notes, fundable at an interest of 7 per cent., though of a convenient denomination for common use, would be converted into stock
almost as soon as they were issued. With respect to the first-description, therefore, the issue has not been restrained; but with respect to the second description,the issue has been, generally, limited to cases of peculiar urgency; such as the payment of the army preparatory to its reduction; the payment of the dividends on the public debt, where the local currency could not be obtained; and the payment of an inconsiderable amount of miscellaneeus claims, apparently entitled to distinction. The annexed table (marked E) contains a statement of the amount of the small Treasury notes which had been issued on the 30th of September, 1815 ; from which it appears-

1. That there had been issued for the payment of the army, the sum of -
$\$ 1,465,06900$
2. That there had been issued for the payment of the dividends of the public debt, the sum of

$$
1,203 ; 100 \quad 00
$$

3. That there had been issued for sundry miscellaneous claims; the sum of

109,681: 00
4. That there has been sold at an advance, (producing $\$ 32,10764$,) for the purpose of raising funds to meet the general engagements of the Treasury, a sum of

## OF THE LOAN.

The act of the 3d of March, 1S15, authorized a loan for a sum not exceeding $\$ 18,452,500$; it was made lawful to accept, in payment of subsciptions, such Treasury notes as had been charged on the sinking fund; and a commission not exceeding one quarter of 1 per cent. was allowed for selling the certificates of stock, or procuring subscriptions to the loan. Under this authority, the annexed notice, (marked F,) dated the 10ih of March, 1815, was published, opening a loan for the sum of $\$ 12,000,000$; with a view, 1st, to absorb a portion of the Treasury note debt; 2d, to obtain funds for paying the unsubscribed arrearages of that debt; and, 3d, to aid the Treasury with a supply of the local currencies of different places, in some proportion to the probable amount of the local demands.

The offers to subscribe to the loan, prior to the 19th of April, 1815, placed (as'it was proper to place) money and Treasury notes upon the same footing; but the offers varied essentially in the terms and conditions that were innexed to them; and, in point of fact, no direct offer was made to subscribe at a higher rate than $\delta 9$ per cent., while some of the offers were made at a rate even lower thau 75 per cent. Upon this experiment, therefore, it was seen at once that the new situation of the Treasury required a new course of proceeding; and that neither the justice due to the equal rights of the public creditor, nor a fair estimate of the value of the public property, nor an honorable regard for the public credit, would permit the loan to assume the shape and character of a scramble, subservient to the speculations which create what is called a marlet price, and shifting in every town and village of every State, according to the arbitrary variations of what is called the difference of exchange.

In this view of the subject, all the offers of subscription to the loan, made in the first instance, were declined; but it was declared, at the same time, that offers at the rate of 95 per cent. would be accepted. The rate thus proposed was adopted upon a consideration of the value of the stock, of the equitable as well as legal claim of the holders of 'Treasury notes; and of the
real condition of the public credit. The objects of the loan being (as already stated) to absorb a portion of the Treasury note debt, and to acquire a sufficiency of local currency for local purposes, the price of the stock, at the Treasury, was, of course, independent of the daily up-and-down prices of the various stock markets in the Union, and could only be affected by the progress towards the attainment of those objects. Thus, while the wants of the Treasury were insufficiently supplied, offers to subscribe were freely accepted; and the parties were sometimes anthorized and invited to increase the amount of their offers; but where local funds had so accumulated as to approach the probable amount of the local demands, the price of the stock was raised at the Treasury; and where the accumulation was deemed adequate to the whole amount of the local demands, the loan was closed.

The policy of the course pursued at the Treasury was soon demonstrated. Offers of subscription to the loan, at the rate of 95 per cent. payable in Treasury notes, or in money, were presented to a large amount, soon after the rule of the Treasury was declared ; and the annexed table, marked G, will exhibit the progressive and actual state of all the subscriptions, to the 30th of September last.
, In the District of Columbia, the money subscriptions (including the subscription of certain liquidated claims upon the Treasury) were successively at $95,96 \frac{1}{2}$, 97 , and 98 per cent., and finally at par. In the city of Baltimore, the money subscriptions have been at 95 and $96 \frac{1}{2}$ per cent. In the city of Philadelphia, the money subscriptions have been entirely at 95 per cent. The price was raised at the Treasury, from 95 to 98 per cent. on the 18th of June, (subject, of course, to all unexecuted subscriptions previously accepted or authorized;) and since that time considerable offers hate been received at 95 and 96 per cent., but none have been received at the increased rate of 98 per cent. The subscriptions, payable in Treasury notes, have been made, in all places, at the same rate of 95 per cent. A general abstract of the state of the loan may therefore be reduced to the following form :

In the District of Columbia, the surbscriptions have amounted-

1. In money, to the sum of - - $\$ 2,282,03738$
2. In Treasury notes, to the sum of - . 257,276 65
\$2,539,314 03
In Baltimore, the sulscriptions have amounted-
3. In money; to the sum of
4. In Treasury notes, to the sum of \(\quad \begin{array}{r}1 ; 994,818 <br>

52,386.20 \tag{2}
\end{equation*}
$$

In North Carolina, the subscriptions have amounted, in Treasury notes, to the sum of
\$9,284,044 38
Having thus absorbed a portion of the Treasury note debt, and deeming the Treasury to be possessed of a sufficient supply of the local enrrency of the places at which the Treasury notes, unsubscribed, and in arrears, were payable by law, except in the cities of New York and Boston, the Secretary of the Treasury proceeded to assign funds for the payment of the 'Treasury notes, and to give notice thereof in the form of the annexed copies, marked respectively H and I , in pursuance of the act of Congress passed on the 3d of March, 1815. As a sufficient supply of the local cumencies of Boston and New York had not been obtained, the overture was made, in the same notice, to discharge the Treasury notes payable in those cities, and in arrears, by accepting them in subscriptions to the loan at the rate of 95 per cent., by exchanging them for other Treasary notes, in which the interest due should be included as principal; or by giving drafts for the amount upon any of the banks in which the Government possessed funds. This overture is still open to the consideration and acceptance of the holders of the Treasury notes in question; and has been accepted in the shape of subscriptions to the loan, to a considerable extent." Since the 30th of September, these amount, including some subscriptions, the details of which have not yet been completed, to more than two millions of dollars.

OF TEE TRANSFER OF BALANCES OF APPROPRTATIONS AND OF REVENUE ${ }_{9}$ from 1814 to 1815.

In the administration of the finances, it has been the practice to consider the demands and the supplies of each year as distinct subjects for legislative provision, independent of the balances of appropriations, or of revenue, existing at the close of the preceding years. The'same course will now be pursued, but with a few explanatory remarks. The annual appropriations have never been entirely absorbed during: the year for which they were made; and the credit given by law for payments, in every branch of the revenue, necessarily introduces a discrimination between the amount of duties which accrues within the year; as a debt to the Government, and the amount which is paid within the year, as money into the Treasury. The annual appropriations, however, are not charged upon the sevenue of the year, specifically, in which they are made; and, in point of fact, they are satisfied, whenever demanded, out of any unappropriated money in the Treasury, without reference to the time when the revenue accrued ${ }_{2}$ or when the money was actually received at the Treasury.

The inconvenience of continuing appropriations in force, which were liable to be drawn from the Treasury during an indefinite period, induced Congress to enact, in the year 1795, (49) that any appropriations (except permanent appropriations for the interest of the funded debt, or appropriations for the payment of loans and the accruing interest, for the sinking fund ${ }_{2}$ and
for purposes which specially require, by law, a longer duration) remaining unexpended for more than two years after the expiration of the calendar year in which the act of appropriation was passed, should cease and determine, and that the unexpended sum should be carried to an account on the books of the Treasury, to be denominated "the surplus fund." By the operation of this provision, no ordinary appropriation can now survive the specified period of two years; and notwithstanding the formal designation of a particular account, in which the entry shall be made, the sum disengaged by the determination of each appropriation becomes again an undistinguishable part of the public treasure, which is subject to the future dispositions of the Legislature.

With these remarks, it will be useful, for the purposes of general information, to exhibit the gross amount of the balances of the appropriations for the year 1814, transferred to the year 1815, without entering into a comparative detail of the appropriations and of the revenues during the particular year in which the appropriations were made by law. Thus,
The gross amount of the appropriations for 1814, including the aggregate of the balances of appropriations for the year 1813, amounted to the sum of..
$\$ 55 ; 978,464 \cdot 20$

of the ways and means of the treasury, for the year 1810.
These may be considered in a twofold aspect: 1. As to the ways and means placed by the laws within the power of the Treasury; and, 2. The amount capable of being realized, or made actually available by the Treasury, during the year.

Under the first view, the ways and means consisted-

1. Of the cash in the. Treasury at the commencement of the year, which amounted to
2. Of the outstanding revenue which accrued prior to the year 1815, and remained unpaid at its commencement, estimated, exclusive of the sums due for public lands, at about
3. Of the revenue accruing in the year 1815, estimated at $\$ 38,850,000$, viz :-

| Customs - | - | - | $\$ 25,000,000$ |
| :--- | :--- | :--- | :--- |
| Direct tax, nett product | - | - | $5,400,000$ |
| Internal duties, do. | - | - | $7,000,000$ |
| Public lands - | - | $1,000,000$ |  |
| Postage, and incidental receipts | - | 450,000 |  |

$\$ 1,526,99863$
$4,600,00000$
$38,850,00000$
4. Of the unexecuted authority to borrow money, and to issue Treasury notes,
conferred by acts of Congress passed prior to the year 1815, viz:
The loan act of March 14, 1812 $\because \therefore \$ 765,300$
The loan act of March 24, $1814 \ldots 8,562,119$
The loan act of November 15, 1814 , $3,000,000$
$\$ 12,327,41900$
Treasury note act of March 4,1814 - $2,772,720$
Treasury note act of Décember 26, 1814, estimated at - - - - 8,610,000
$\xrightarrow{8,610,000}: 11,372,72000$
5. Of the authority to borrow money, and to issue Treasury notes, conferred by acts of Congress passed in the year 1815, viz:
The loan act of March 3, $1815 \ldots$. $18,452,800$
The loan act of February 13, 1815, (for public buildings in Washington)

$$
500,000
$$

Treasury note act of February 24, 1815, (exclusive of the re-issues authorized by this act)

This great apparent surplus of ways and means within the power of the Treasury arose, in part, from the great increase in the amount of the customs accruing in the year 1815, which, instead of $\$ 4,000,000$, the amount estimated prior to the peace, will, probably, in consequence of that event, amount to the sum of $\$ 25,000,000$, as here stated. A great portion, also, of the sums authorized to be borrowed' or "raised upon Treasury notes, it was evident, could not be obtained or raised within the year; and the several successive acts by which the authority was given, although they were nominally accumulative, were actually the result of attempts to vary or modify this authority in such way as to render it more easy or more effectual in its execution.

The second view of the ways and means for the year 1815 exhibits the amount actually realized.and received into the Treasury during the year. As the year is not yet terminated, this can only be given by way of estimate.: The result will, probably, not differ materially from the followinig:

1. Cash in the Treasury at the commencement of the year $\$ 1,526,998,63$
2. Receipts from revenue, including that which was out-
standing at the commencement of the year, viz:

Loans under the act of
March 3, 1815 - \$9,284,044 38
Do. temporary loans - 650,000 00
$\$ 9,934,04438$

$\$ 48,849,61301$
The application of the moneys actually received into the Treasury, during the year 1815, will be as follows: To the 30th of September, the payments have amounted to the following sums nearly; the accounts not being yet made up, the precise amount cannot be given :
For civil, diplomatic, and miscellaneous expenses - $\$ 2,537,00000$
Military service - - $\quad$ - $15,190,14471$
Naval service - . - - - $\quad$ - 7,050,000 25
Public debt, (exclusive of the sum of $\$ 300 ; 000$ repaid by the commissioner of loans for Georgia) - -

During the fourth quarter of the year, the payments are estimated to amount to the following sums, viz:

For civil, diplomatic, and miscellaṇeous:

$\$ 38,686,32318$
As the receipts into the Treasury, during the year, have been estimated at $\quad-\because \quad-\quad-48,849,61301$

The sumleft in the Treasury, at the end of the year, will be $\$ 10,163,28983$
And will consist principally of Treasury notes, paid on account of the revenue and of loans.
of teae estimates of the public revenue and Expenditures for 1816.

In the consideration of this subject, it is proper to premise, that the revenue of 1816 must be charged with the payment of a considerable amount of the undiquidated debts incurred during the war ; and, consequently, that the proportions of revenue and expenditure for that year cannot be reduced by the scale of a peace establishment. The arrearages in the War and - Navy Departments, and, generally, the outstanding balance of the floating public debt, including Treasury notes and temporary loans, must be satis(ied, before a permanent and uniform arrangement of the finances can be effected; but it is believed that the period of a single year will be sufficient for that purpose.

It is also proper to premise, that although the estimates of the demands on the Treasury for 1816 may be satisfactorily made, there is no settled ground upon which estimates of the ways and means can be confidently formed. The entire system of external and internal taxation must necessarily be revised, during the present session of Congress; and the sources, as well as the product, of the public revenue, can only be ascertained from the result of the legislative deliberations. In order, however, to obviate this difficulty as far as it is practicable, distinct statements will be presented for 1816-1st. Of the probable demands on the Treasury; 2dly. Of the revenue, estimated according to the laws now in force; and, 3dly. Of the revenue, estimated according to the modifications which will be respectfully submitted.

## I. OF THE PROBABLE DEMANDS ON THE TREASURY.

The amount of the civil, diplomatic, and miscellaneous expenses, is estimated at the sum of
The amount of the military expenses is estimated at the sum of

For the arrearages of 1815 , beyond the amount of the appropriations

The amount of the naval expenses (supposing them to be reduced, on the peace establishment, to one-half of the amount appropriated for 1815, and adding the annual appropriation of 200,000 dollars for the purchase of timber,) is estimated at the sum of
$\$ 2,716,510$
The amount of the payments required on account of the public debt is estimated at the sum of
$23,818,513$
For the interestand annual reimbursement of the principal of the funded debt, prior to the war - $\$ 3,460,000$
For theinterest on the funded.debt created since the war, estimated on a capital of $\$ 70,000,000 \quad 4 ; 200 ; 000$

For the balance of principal and interest on Treasury notes of every denomination now due, or payable in. 1815 and 1816, or estimated to be. paid in those years, by being received for duties and taxes, as set:forth in the annexed table, marked L

- 15,458,513

For the amount of temporary loans due to the State Bank of Boston, $(\$ 500,000$, and the Mechanics' Bank of New. York, ( $\$ 200,000$ ).

42,884,269
From this aggregate of the demands for 1816, the charges of a temporary nature being deducted, to wit:

Deduct the amount of the arrearages for the military service of 1815
And the amount of the floating debt to be liquidated in 1816

- 16,158,513

25,595;600
There will remain as the probable annual expenditure of the peace establishment, independent of any addition to the sinking fund, the sum of

> if. of the revenue for 1816 , estimated according to the Laws now in ferce.

By the laws now in force; the revente arising from customs during the year 1816 will be effected in the following manner. The present rates of duties continue until the 18th of February, 1816, when the duty on salt imported will cease, and the rates of duties on merchandise of every deseription imported in American vessels will fall to one-half of the existing amount, with the exception of certain manufactured articles, being of the same kinds as the manufactüred articlës on which internal duties have been imposed ; the duties on the imported articles continuing at the existing rates, so long as the existing internal duties shall be continued upon the corresponding articles of domestic manufacture. On the 18th of February, the extra duties on merchändise imported in foreign vessels, which is now $15 \frac{1}{2}$ per cent. on the amount of the duty in American vessels, will fall to 10 per cent. on that amount; and the tonnage duty on foreign vessels, which is now
two dollars per toin, will fall to fifty cents per ton. The extra daty is also liable to be affected by the operation of the act for abolishing all discriminating duties, upon a basis of natural reciprocity.

By the laws now in force, the revenue arising from internal daties will be affected in the following manner. The duties on bank notes, on notes discounted by banks, and bills of exchange, (commonly called the stamp duties,) and the duty on refined sugar, will cease on the 18th of February, 1816. All the other internal duties, together with the direct tax, and the increased rates of postage, will continue.

Under these circumstances, the revenue which will accrue to the United States, during the year 1816 , is estimated as follows:

| From customs. | \$13,000;000 |
| :---: | :---: |
| From internal duties | 7,000,000 |
| From direct tax, (nett produce to the Treasury) | 5,600,000 |
| From sales of public lands | 1,000,000 |
| From postage, and incidental receipts | 400,000 |
|  | 27,000,000 |

The sums actually receivable into the Treasury during the year are estimated as follows:
From customs . - . . . . . . . . $\$ 20,000,000$
From internal duties - . - - - $6,500,000$

From direct tax, including arrears of 1815 . . . . $8,500,000$
From the sales of public lands . - - . . . $1,000,000$
From postage, and incidental receipts . . .. . .. 400,000
36,$400 ; 000$
If to this' be added the probable amount of money in the Treasury at the commencement of the year 1816, which may be estimated, exclusive of Treasury notes paid in previously to that time; on account of revenue and of loans, at the sum of

3,000;000
The effective ways and means of 1816 will produce, in the whole, the sum of

39,400,000
But as the demands upon the Treasury for the same year will amount, as above stated; to 42,884,269

There will be left a deficit; to be supplied by means other than the revenue, of the sum of -

3,484,269
III. OF THE REVENUE FOR 1816, ESTIMATED ACCORDING TO THE MODIFICATIONS WHICH WILL BE RESPECTFULLY SUBMITTED.

From the review of the financial measures of the Government, in reference to the recent state of war, which constitutes the first part of the present report, it appears that the almost entire failure of the cistoms, or duties on importations, and the increasing necessities of the Treasury, rendered it necessary to seek for pecuniary supplies in a system of internal duties; but, both in respect to the subjects of taxation and to the amount of the several taxes, the return of peace has always been contemplated as a period for revision and relief. In the fulfilment of that policy, a reduction of the
direct tax; a discontinuance of taxes which, upon trial, have proved unproductive, as well as inconvenient; and, above all, the exoneration of domestic manufactures from every charge that can obstruct or retard their progress, seem to be the objects that particularly invite the legislative attention. There will still remain, however, a sufficient scope for the operation of a permanent system of internal duties, upon those principles of national policy which have already been respectfully suggested.

As an equivalent for the dimination of the revenue by the contemplated abolition or reduction of some of the duties and taxes, and in observance of the public faith, which is pledged; in the case of such abolition or reduction, to provide and substitute other duties and taxes equally productive, it is intended respectfully to recommend a continuance of the duty on imported salt, and a competent addition to the permanent rates of the duties on merchandise imported. In the general tariff, which has been directed by a resolution of the House of Representatives to be prepared, and which will be submitted to Congress as soom as the materials for orming it can be digested and arranged, the subject will be more distinctly as well as more satisfactorily presented; but as it is not probable that this measure can be so matured as to go into operation on the 18th of February next, it becomes necessary to suggest the expediency of continuing the present rates of duties until the 30th of June; when the new rates, with all the necessary details to give effect to the system,'may be introduced, and suffivient notice be given to the merchants to regulate their commercial operations accordingly.

In relation, then, to the internal duties, it is intended respectfully to recommend that the duties imposed at the last session of Congress, on various articles manufactured within the United States, shall be abolished on the 18th day of April next, which will complete the year, commencing from the time the duties went into operation; that the duty imposed during the last session of Congress, on spirits distilled within the United States, shall be abolished on the 30th day of June next, but that, at the same time, there be added 100 per cent. on the rate of the duty which had been charged on licenses to distillers of spirituous liquors in the year 1813; that the duty on household furniture, and on gold and silver watches, be abolished on the 31st day of March next; that the additional duty imposed during the last session of Congress, on licenses to retail wines, spirituous liquors, and foreign merchandise, be abolished on the 31st day of December, 1816; and that the duties on refined sugar, and the stamp duties, be continued; and finally, in relation to the direct tax, it is intended respectfully to recommend that, on the 31st day of March next, it be reduced to one-half of its present amount ; that iss, to the annual amount of $\$ 3,000,000$.

The subtraction from the revenue by these changes and reductions in the direct tax and the internal duties is estimated at the annual sum of $\$ 7,000,000$. But the substitutes for supplying the equivalent amount are estimated to produce, 1st, from the increase of the duty on licenses to distillers, and the continuance of the stamp duties, and duties on refined sugar, the annual sum of $\$ 1,500,000 ; 2 d$, from the continuance of the duty on imported salt, the annual sum of $\$ 500,000$; and, 3d, from an increase upon the permanent rates of duties on the importation of foreign merchandise, the annual sum of $\$ 5,000,000$.

The full effect of the alterations which have been stated will not be developed until some time after the year 1816; but if they be adopted, the state of the revenue for that year, in the two views of which it is susceptible-1st,
of revenue accruing during the year; and; Zdly, of money receivable into the Treasury during the year, may be estimated as follows:'

1. The revenue which will accrue in 1816 may be estimated-

| From customs - | \$17,000,000 |
| :---: | :---: |
| Internal duties - | 4,500,000 |
| Direct tax, (nett product to the Treasury) | 2,700,000 |
| Sales of public lands | 1,000,000 |
| Postage, and incidental receipts | 400,000 |
|  | \$25,600,000 |

2. The moneys which will be actually receivable into the Treasury, from revenue in 1816, may be estimated-

If to the sum thus estimated to be receivable into the Treasury, from the revenue, during the year $1816 \ldots$ $\$ 33,400,000$
There be added the money which will probably be in the Treasury at the beginning of the year, $3,000,000$

The aggregate will be the sum of . . . . $36,400,000$
And the demands being estimated, as above, at . . . $42,884,269$
「There will be left a deficit of - - - $\quad \$ 6,484,269$
It is here, however, to be recollected, that the estimate of the demands on the Treasury comprehends the gross amount of the arrearages of the War Department, and a provision for the whole of the floating public debt; and although, for the purposes of a legislative appropriation, the aggregate of the expenditures to be authorized for the year 1816 is necessarily made the basis of the official estimates, yet the uniform experience of the Treasury evinces that the demands for a considerable portion of the annual appropriation will not be made during the year.

It may also be observed, that to raise a revenue by the imposition, or even by the continuance of taxes, adequate to the immediate discharge of every unliquidated demand upon the Treasury, at the close of an expensive war, seems hardly to be necessary under the present circumstances of the country. The product of the revenue, arranged in the manner which has been stated, may be estimated, after the year 1816, at an annul amount of nearly four millions greater than the sum required for the interest on the public debt, and for the probable expenses of the peace establishment. If: the public debt, therefore, were increased in the year 1816 by a sum equal to the whole amount of the deficit, as above stated, an equïvalent reduction would be effected in less than two years. The unexecuted authority to borrow money, and to issue Treasury notes, already provided by the acts of Congress, is sufficient to enable the Treasury to meet the deficit in either of
these modes; and, consequently, no further legislative aid '(except, perhaps, in the modification of the issues of Treasury notes, ) appears; at this time, to be required.

## III. Propositions for the improvement and management of the revenue, and for the support of public credit.

The propositions which are now to be respectfully submitted, relate- 1 , to the revenue $; 2$, to the sinking fund; and 3 , to the national circulating medium.

1. Propositions relating to the revenue.

The changes contemplated in the revenue, on the estimates of a peace establishment, having been already stated, as the intended objects of recommendation, it is only now necessary to submit to the consideration of Congress the measures requiring their sanction for carrying the plan into effect.

First. It is respectfully proposed that the act of the lst of July, 1812, imposing an additional duty of 100 per cent. upon the permanent duties on goods, wares, and merchandise imported into the United States from any foreign port or place, and the act of the 29th of July, 1813, imposing a duty upon imported salt, be continued in force until the 30th day of June, 1816.

Secend." It is respectfully proposed that the act of the 24th of July, 1813, imposing a duty on sugar refined within the United States; and the act of the 2 d of 'Angust, 1813 , imposing a duty on bank notes, notes discointed, and bills of exchange, be continued by law in foree, without limitation, but with proper amendments, to render the collection of the duties more equal and more certain; and that the act of the 15th of December, 1814, imposing duties on carriages, and the harness therefor'; and thiat so much of the act of the 23d of December, 1814, as relates to the duties on sales at auction, and to the increasing of the rates of postage, be allowed to remain in force.

Third. It is respectfully proposed that there be a reduction or modification in the/following taxes and duties:

1. That the direct tax be reduced from six millions to three millions of dollars, for the year 1816, and for each succeeding year.
2. That the duties on distilled spirits be discontinued after the 30th day. of June, 1816; and that the duty on lieenses to distillers be raised on that day to double the amount fixed by the act of the 24th of July, 1813.
3. That the duties on licenses to retailers of wines, spirituous liquors, and foreign merchandise, be reduced to the rates of the year 1813, with proper regard to the periods when licenses commence and expire.

Fourth. It is respectfully proposed that the act of the 1Sth of January, 1815, and the act of the 27th of February, 1S15, imposing duties on various articles manufactured or made for sale within the United States; and the act of the 18th of January, 1815, imposing duties on household furniture and watches, be absolutely and entirely repealed.

Fifth. It is respectfully proposed that the act of the 3d of March, 1815, further to provide for the collection of the duties on imports and tonnage; and the act of the 3d of March, 1815, to fix the compensations and increase the responsibility of the collectors of the direct tax and internal duties, and for other purposes connected with the collection thereof, so far as it relates to the compensation of the collectors of the direct tax and internal duties, be continued in force, without limitation.
2. Proposition relating to the sinking fund. I

The sinking fund, as it is at present constituted, amounts to the annual sum of $\$ 8,000,000$.

It is charged, in the first instance, with the payment of the interest, and the annual reimbursement of the principal of the old funded debt, which will require for 181.6, and each of the two ensuing years, the sum of

$\$ 3,460,000$

And it is charged with the payment of the interest, and the eventual reimbursement of the principal of the new funded debt.: The interest; computed on a capital of $\$ 70,000,000$, will require for the year 1816, and each subsequent year, the sim of - - . - . . .

14,200,000
The total present charge on the sinking fund, on account of the funded debt, being the annual sum of

$$
\$ 7,660,000
$$

In 1818, the fund will be released from the annual charge of $\$ 1,380,000$, accruing upon the 'old six per cent. stock, as the stock will be then paid and extinguished; but in the same year it will be subjected to a charge of $\$ 3,000,000$ for the first instalment of the principal of the Louisiana stockr, which will then become payable. In each of the two succeeding years, a similar sum will be payable; and in the year 1821, such sum will be payable as may be necessary to complete the reimbursement of that stöck, and which is estimated at $\$ 1,923,500$.

The sinking fund is also, at present, charged with the payment of the principal and interest of the Treasury notes issued under the act of the 4th of March, 1814, and prior acts ; and of certain temporary loans, obtained under the loan acts of 1812 , and of subsequent years. The several acts charging these payments on the sinking fund have directed that such sums, in addition to the annual appropriation of $\$ 8,000,000$, should be taken from any moneys in the Treasury not otherwise appropriated, as should be necessary to meet and satisfy the demand. The temporary loans and Treasury notes will, therefore, be probably paid, or absorbed, in 1817; and it is deemed unnecessary, for the present purpose, to include them in the consideration of the form and extent which it is proposed to give to the sinking fund in that year.

In 1803, when the sinking fund was established on its present footing, the principal of the public debt was about $\$ 86,000,000$; and the interest annually payable upon it about $\$ 4,500,000$. At that time there was assigned to the sinking fund, out of the public revenue, $\$ 8,000,000$; of which about $\$ 3,500,000$ were annually applicable to the reduction of the principal of $\$ 86,000,000$.

At the commencement of the year 1817, it is estimated that the principal of the funded debt will amount to $\$ 110,000,000$, requiring the sumi of $\$ 6,150 ; 000$ for the payment of its anuual interest. If a sum applicable to the reduction of the principal of the debt were now to be assigned, bearing the same proportion to that principal which the sum assigued in 1804 then bore to the principal, it would amount to about $\$ 4,350,000$. When it is added, therefore, to the sum of $\$ 6,150,000$, which is necessary for the payment of the interest, there would be required for the amount now to be set apart, to constitute the sinking fund, the sum of $\$ 10,500,000$ per annum.

It is proposed, however, to carry the amount only to the sum of $\$ 10,000,000$, which will allow about. $\$ 3,850,000$ as applicable to the reduction of the principal of the debt; a sum sufficient, if strictly and regularly applied without interruption, upon a compound principal, to pay off the whole of the funded debt in a period less than eighteen years.

Upon these grounds, then, the Secretary of the Treasury respectfully submits the following

## YROPOSTTION.

That in the year 1817, and annually in every subsequent year, there be appropriated the sum of $\$ 2,000,000$, in addition to the sum of $\$ 8,000,000$ now annually appropriated for the payment of the interest and principal of the public debt; that the-payment of this additional sum be made out of the proceeds of the revenue derived from the customs, the sales of public lands, and the internal dities, or from either of them, available after the payment of the sums for which they are now respectively pledged or appropriated; and that the said additional sum of $\$ 2,000,000$ annually be payable to the commissioners of the sinking fund, to be applied by them in the same manner as the moneys which they are now entitled by law to receive: that is to say, lst, to the payment of the interest on the public funded debt; 2dly, to the reimbursement of the principal, from time to time, as the same, or any portion of it, shall become reimbursable, according to the terms of the contracts by which it has been created; and 3dly, after having answered these purposes, if there shall remain a surplus at their disposal; to the purchase of such parts of the public funded debt as shall appear to them to be most for the advantage of the United States, in the manner prescribed by law, and at a rate not exceeding the par value.

## 3. Proposition relating to the national circulating medium.

The delicacy of this subject is only equalled by its importance. In presenting it, therefore, to the consideration of Congress, there is occasion for an implicit reliance upon the legislative indulgence.

By the constitution of the United States, Congress is expressly vested with the power to coin money, to regulate the value of the domestic and foreign coins in' circulation, and (as a necessary implication from positive provisions ) to emit bills of credit; while it is declared, by the same instrument, that " no State shall coin money, or emit bills of credit." (50) Under this constitutional authority, the money of the United States has been established by law, consisting of coins made with gold, silver, or copper. (51) All foreign gold and silver coins, at specified rates, were placed; in the first instance, upon the same footing with the coins of the United States; but they ceased ( with the exception of Spanish milled dollars, and parts of such dollars) to be a legal tender for the payment of debts and demands, in the year 1809. (52)

The constitutional authority to emit bills of credit has also been exercised in a qualified and limited manner. . During the existence of the Bank of the United States, the bills or notes of the corporation were declared by law to be receivable in all payments to the United States; and the Treasury notes which have been since issued for the services of the late war, have been endowed with the same quality. But Congress has never recognised, by law,
(50) Constitution, art. 1. sec. 8. 10.
(51) See 2 vol. 37. 120. 158. 161 : 3 vol. 7. 221. $316: 4$ vol. 62. 375.395.
(52) See 2 vol. $161: 4$ vol. $62: 8 \mathrm{vol} .66$.
the notes of any other corporation, nor has it ever authorized an issue of bills. of credit to serve as a legal currency. The acceptance of the notes of banks which are not established by the federal authority, in payments to the United States, has been properly left to the vigilance and discretion of the Executive department; -while the circulation of the Treasury notes, employed either to borrow money or to discharge debts, - depends entirely (as it ought to depend) upon the option of the lenders and çreditors to receive them.

The constitutional and legal foundation of the monetary system of the United States is thus distinctly seen; and the power of the Federal Government to institute and regulate it, whether the circulating medium consist of coin or of bills of credit, must, in its general policy, as well as in the terms of its investment, be deemed an exclusive power. It is true, that a system depending úpon the agency of the precious metals will be affected by the various circumstances which diminish their quantity or deteriorate their quality. The coin of a State sometimes vanishes under the influence of political alarms, sometimes in consequence of the explosion of mercantile speculations, and sometimes by the drain of an unfavorable course of trade. But, whenever the emergency occurs that demands a change of system, it seems necessarily to follow that the authority which was alone competent to establish the national coin, is alone competent to create a national substitute. It has happened, however, that the coin of the United States has ceased to be the circulating medium of exchange, and that no substitute has hitherto been provided by the national authority. During the last year, the principal banks established south and west of New England resolved that they would no longer issue coin in payment of their notes, or of the drafts of their customers for money received upon deposite. In this act the Government of the United States had no participation; and yet the immediate effect of the act was to supersede the only legal currency of the nation. ' By this act, although no State: can constitutionally emit bills of credit, corporations, erected by the several States, have been enabled to circulate a paper medium, subject to many of the practical inconveniences of the prohibited bills of credit.

It is not intended, upon this occasion, to condemn, generally, the suspension of specie payments; for appearances indicated an approaching crisis, which would, probably, have imposed it as a measure of necessity, if it had not been adopted as a rneasure of precaution.. But the danger which originally induced, and perhaps justified the conduct of the banks, has passed away; and the continuance of the suspension of specie payments must be ascribed to a new series of causes. The public credit aild resources are no longer impaired by the doubts and agitations excited during the war, by the practices of an enemy, or by the inroads of an illicit commerce; yet the resumption of specie payments is still prevented, either by the reduced state of the national stock of the precions metals, or by the apprehension of a further reduction to meet the balances of foreign trade, or by the redundant issues of bank paper. The probable direction and duration of these latter causes constitute, therefore, the existing subject for deliberation. While they continue to operate, singly or combined, the authority of the States individually, or the agency of the State institutions, cannot afford a remedy commensurate with the evil; and a recurrence to the national authority is indispensable for the restoration of a national currency.

In the selection of the means for the accomplishment of this important object, it may be asked, 1 st, ' Whether it be practicable to renew the circuJation of the gold and silver coins? 2dly, Whether the State banks can be successfully employed'to furmish a uniform currency? 3dly, Whether a national bank can be employed more advantageously than the State banks for the same purpose? and, 4thly, Whether the Government can, itself, supply and maintain a paper medium of exchange, of permanent and uniform value throughout the United States?

1st. As the United States do not possess mines of gold or silver, the supply of those metals must, in a time of scarcity, be derived from foreign commerce. If the balance of foreign commerce be unfavorable, the supply will not be obtained incidentally, as in the case of the returns for a surplus of American exports, but must be the subject of a direct purchase. The purchase of bullion is, however, a common operation of commerce, and depends, like other operations, upon the inducements to import the article.

The inducements to import bullion arise, as in other cases, from its being cheap abroad, or from its being dear at home. Notwithstanding the commotions in South America, as well as in Europe, there is no reason to believe that the quantity of the precious metals is now (more than at any former period) insufficient for the demand throughont the commercial and civilized world.: The price may be higher in some countries than in others, and it may be different in the same country at different times; but, generally, the European stock of gold and silver has been abundant, even during the protracted war which has afflicted the nations of Europe.

The purchase of bullion in foreign markets, upon reasonable terms, is then deemed practicable; nor can its importation into the United States fail, eventually, to become profitable. The actual price of gold and silver, in the American market; would, in itself, afford for some time an ample premium ; although the fall in the price must, of course, be proportionable to the increase of the quantity. But it is within the scope of a wise policy to create additional demands for coin, and in that way to multiply the inducements to import and retain the metals of which it is composed. For instance: the excessive issue of bank paper has usurped the place of the national money; and, under such circlimstances, gold and silver will always continue to be treated as an article of merchandise: but it is hoped that the issue of bank paper will be soon reduced to its just share in the circulating medium of the country; and, consequently, that the coin of the United States will resume its legitimate capacity and character'. Again: The Treasury; yielding from necessity to the general impulse, has hitherto consented to receive bank paper in payment of duties and taxes; but the period approaches when it will probably become a duty to exact the payment either in Freasury notes, or in gold or silver coin, the lawful money of the United States. Again: The institutions which shall be deemed proper, in order to remove existing inconveniences, and to restore the national currency, may be so organized as to engage the interests and enterprise of individuals in providing the means to establish them, And, finally, such regulations may be imposed upon the exportation of gold and silver as will serve, in future, to fix and retain the quantity required for domestic uses,

But it is further believed, that the national stock of the precious metals is not so reduced as to render the operation of reinstating their agency in the national currency either difficult or protracted. The quantity actually possessed by the country is considerable; and the resuscitation of public
confidence in bank paper, or in other substitutes for coin, seems alone to be wanting, to render it equal to the accustomed contribution for a circulating medium. In other countries, as well as in the United States, the effeet of an excessive issue of paper moneý to banish the precious metals has been seen, and under circumstances much nore disadvantageous than the present. The effect of public confidence in national institutions to recall the precious metals to their uses in exchange, has also been experienced.

Even, however, if it were practicable, it has sometimes been questioned whether it would be politic, again to employ gold and silver for the purposes of a national currency. It was long and universally supposed, that, to maintain a paper medium without depreciation, the certainty of being able to convert it into coin was indispensable; nor can the experiment which has given rise to a contrary doctrine be deemed complete or conctusive. But whatever may be the issue of that experiment elsewhere, a difference in the structure of the government, in the physical as well as political situation of the country, and in the various departments of industry, seems to deprive it of any important influence as a precedent for the imitation of the United States.

In offering these general remarks to the consideration of Congress; it is not intended to convey an opinion that the circulation of the gold and silver coins can at once be renewed. Upon motives of public convenience, the gradual attainment of that object is alone contemplated; but a strong though respectful solicitude is felt that the measures adopted by the Legislature should invariably tend to its attainment.

2d. Of the services rendered to the Government, by some of the State banks, during the late war, and of the liberality by which some of them are actuated in their intercourse with the Treasury, justice requires an explicit acknowledgment. It is a fact, however, incontestably proved, that those institutions cannot, at this time, be successfully employed to furnish a uniform national currency. The failure of one attempt to associate them, with that view, has already been stated. Another attempt, by their agency, in circulating Treasury notes, to overcome the inequalities of the exchange, has only been partially successful. And a plan recently proposed, with the design to curtail the issues of bank notes, to fix the public confidence in the administration of the affairs of the banks, and to give to each bank a legitimate share in the circulation, is not likely to receive the general sanction of the banks. The truth is, that the charter restrictions of some of the banks, the mutual relation and dependance of the banks of the same State, and even of the banks of the different States, and the duty which the directors of each bank conceive they owe to their immediate constituents, upon points of security or emolument, interpose an insuperable obstacle to any voluntary arrangement, upon national considerations alone, for the establishment of a national medium through the agency of the State banks. It is, nevertheless, with the State banks that the measures for restoring the national currency of gold and silver must originate ; for, until their issues of paper be reduced, their specie capitals be reinstated, and their specie operations be commenced, there will be neither room, nor employment, nor safety, for the introduction of the precious metals. The policy and the interest of the State banks must, therefore, be engaged in the great fiscal work, by all the means which the Treasury can employ, or the legislative wisdom shall provide.
3d. The establishment of a national bank is regarded as the best, and perhaps the only adequate resource, to relieve the country and the Govern-
ment from the present embarrassments. : Authorized to issue notes which will be received in all payments to the United States, the circulation of its issues will be co-extensive with the Union; and there will exist a constant demand, bearing a just proportion to the annual amount of the duties and taxes to be collected, independent of the general circulation, for commercial and social purposes. A riational bank will, therefore, possess the meaus and the opportunity of supplying a circulating medium, of equal use and value in every State, and in every district of every State. Established by the ainthority of the Government of the United States; accredited by the Government to the whole amount of its notes in circulation; and intrusted, as the depository of the Government, with all the accumulations of the public treasure; the national bank, independent of its immediate capital, will enjoy every recommendation which can merit and secure the confidence of the public. . Organized upon principles of responsibility, but of independence, the national bank will be retained within its legitimate sphere of action, , without just apprehension from the misconduct of its directors, or from the encroachments of the Government. Eminent in its resources and in its example, the national bank will conciliate, aid, and lead the State banks in all that is necessary for the restoration of credit, public and private; and, acting upon a compound capital, partly of stock and partly of gold and silver, the national bank will be the ready instrument to enhance the value of the public securities, and to restore the currency of the national coin.

4th. The power of the Government to supply and maintain a paper medium of exchange will not be questioned; but, for the introduction of that medium, there must be an adequate motive. The sole motive for issuing Tyeasury notes has hitherto been to raise money in anticipation of the revenue. The revenue, however, will probably become, in the course of the year 1816, and continue afterwards, sufficient to discharge all the debts and to defray all the expenses of the Government; and, consequently, there will exist no motive to issue the paper of the Government as an instrument of credit.

It will not be deemed an adequate object for an issue of the paper of the Government, merely, that it may be exchanged for the paper of the banks; since the Treasury will be abundantly supplied with bank paper, by the collection of the revenue; and the Government cannot be expected to render itself a general debtor, in order to become the special creditor of the State banks.

The co-operation of the Government with the national bank in the introduction of a national currency, may, however, be advantageously employed, by issues of Treasury notes, so long as they shall be required for the public service.

Upon the whole, the state of the national currency, and other important considerations connected with the operations of the Treasury, render it a duty respectfully to propose-

That a national bank be established at the city of Philadelphia, having power to erect branches elsewhere; and that the capital of the bank (being of a competent amount) consist, three-fourths of the public stock; and onefourth of gold and silver.

All which is respectfully submitted.

A. J. DALLAS, Secretary of the Treasury.

Treasury Department, December 6, 1815.

## A.

STATEMFNT of the aggregate amount of the receipts and expenditures of the Treasiry, of the United States, for each year, from the commencement of the present Government to the year 1814.

B.

TABLE of duties imposed on goods, wares, and merchandise, manufactured within the United States, or the Territories thereof, by the acts of the 18th of Jaruary, and 27th of February, 1815.

| Articles. | Raies of duty. |
| :---: | :---: |
| Pig iron, bar iron, rolled or slit iron, per ton | 1 dolla |
| Castings, of iron | 1 dollar 50 cents. |
| Nails, brads, and sprigs, other than those usually denominated wrought, per pound | 1 cent. |
| Candles, of white wax, or in part of white and other wax, per pound |  |
| Mould candles, of tallow, or of wax, other than white, or in part of each, per pound | 3 cents. |
| Hats and caps, in whole or in part of leather, wool, or furs; bonnets, in whole or in part of wool or fur, if above two dollars in value; hats, of chip or wood, covered with silk or other materials or not covered, if above two dollars in value | 8 per cent. ad valorem. |
| Umbrellas and parasols, if above the value of two dollars: | 8 per cent. ad valorem. |
| Paper | 3 per cent. ad valorem. |
| Playing and visiting cards | 50 per cent. ad valorem. |
| Saddles and bridles - | 6 per cent. ad valorem. |
| Boots and bootees, exceeding five doilars per pair in value | 5. per cent. ad valorem. |
| Beer, ale, and porter | 6 per cent. ad valorem. |
| Tobacco, manufactured, segars and snoff | 20 per cent. ad valorem. |
| Leather, including therein, all kinds of skins, whether tanned, tawed, dressed, or otherivise made | 5 per cent. ad valorem. |
| GGold, silver, and plated ware, and jewelry and paste-work, except time-pieces - | 6 per cent. ad valorem. |

The notes sold, were sold at the following rates:

## F.

NOTICE.

## Treasury Department, March $10 ; 1515$.

In pursuance of powers which have been duly vested in the Secretary. of the Treasary, under an aet of the Congress of the United States, entitled "An act to althorize a loan for á sum not exceeding eighteen million four hundred and fifty two thousand eight hundred dollars," approved by the President of the United States on the 3d of March current, proposals will'be received by the Secretary of the Treasury from this time until the first day of May next, (unless the amount required should be previously subscribed,) for a loan to the United States of the sum of twelve millions of dollars, or any part thereof, on the following terms, and in the following manner:

1. The proposals must state the amount to be loaned; the rate at which she stock will be received; the instalments in which the party will make the payments, (not exceeding, for the whole, ninety days from the date of the subscription,) and the banks into which the payments will be made.
2. The payments will be received either in money, or in approved bank notes, or in Treasury notes actually isstied before the 3d of Marceh curxent, under the acts of Congress passed, respectively, the 30th June, 1812 , the 25th of February, 1813, and the 4th of March, 1814, at their par value, with the interest accrued thereon at the time of payment. The kind of payment intended to be made must be stated in the proposals; and where the terms of subscription are equal, a preference will be given to offers for paying in Treasury notes which have become due and remain unpaid, with an ollowance of the interest upon such notes, as well since as before they became due.
3. On failure to pay any instalment at the time stipulated, the next preceding instalment shall be forfeited for the use of the United States.
4. Scrip-certificates will be issued by the cashiers of the banks into which the payments shall be made, to the corporation or persons making the payments; the cashiers will also endorse the payment of the successive instalments. The scrip certificates will be assignable by endorsement and delivery; and will be funded at the loan office of the State in which the bank is situated where the payments have been made.
5. For the amount loaned, stock will be issued when the instalments are completed, bearing interest at six per cent. per annum, payable quarteryearly. The stock will be reimbursable at the pleasure of the United States, at any time after trvelve years from the last of December next; and the sinking fund is charged with the punctual payment of the interest; and the reimbursement of the principal, according to contract.

It is desirable, as far as the public interest will permit, to reduce the amount of the Treasury note debt, and particularly the portion of it which is due and unpaid; and, therefore, an early subscription is recommended to the holders of Treasury notes. But, in order to save time and trouble, it may be proper to observe, that the terms of the proposals should bear some relation to the actual fair price of stock in the market of Philadelphia or New York.

A commission of one-fourth per cent. will be allowed to any person collecting subscriptions for the purpose of incorporating them in one proposal, to the amount of 25,000 dollars or upwards, provided such proposals shall be accepted.
A. J. DALLAS,

Secretary of the Treasury.

STATEMENT of sums borrowed prior to the 1st day of October, 1815, under the act of Congress of the $3 d^{2}$ of March, 1815; to" authorize a loan:for a sum not exceeding $\$ 18,452,800$."

## H.

## NOTICE.

## Treasury Departmento, June 15, 1815.

Arrangements are making to discharge the whole of the arrearages of the Treasury note debt, where the same became due and payable, as soon as a competent supply of current money can be obtained at the seat of the several loan offices.

Arrangements are also making to furnish a competent issue of Treasury notes, to assist in the re-establishment of a circulating medium throughoit the United States; but it has been ascertained that an issue of Treasury notes, not bearing interest, and fundable at seven per cent., cannot, at this time, be employed for that purpose.

Notice is therefore hereby given, that funds have been assigned for the payment of such Treasury notes, and the interest thereon, as became due, or shall become due, at the loan office in Philadelphia; in the State of Pemnsylvania, on the following days, to wit:

On the 21st of November ; the 1st and 11th of December, 1814.
The 1st of January ; the 1st and 21st of February ; the 21st of April ; the 1st, 11th, and 21st of May ; the 1st, 11th; and 21st of June; and the 1st, 11th, and 21st of July, 1815; being all the Treasury notes due, or becoming due, at Philadelphia, prior to the 1st day of August, 1815.

And the said Treasury notes will accordingly be paid, upon the application of the holders thereof, respectively, at the said loan office, in the city of Philadelphia, on the lst day of August next; after which day, interest will cease to be payable upon the said Treasury notes.

And notice is hereby further given, that funds have been assigned for the payment of such Treasury notes, and the interest thereon, as became due at the loan office ili Savannah, in the State of Georgia, on the following days, to wit:

On the 1st of April, and the 1st of May, 1815 ; being all the Treasury notes due at Savannah, prior to the 1st day of September, 1815.

And the șaid last mentioned Treasury notes will accordingly bee paid, upon the application of the holders thereof, respectively, at the said loan office, in Savannah aforesaid, on the 1st day of September next; after which day; interest will cease to be payable upon the said Treasiury notes.

And notice is hereby further given, that funds have been assigned for the payment of such Treasury notes, and the interest thereon, as became due at Washington, in the District of Columbia, on the following days, to wit:

On the 11th and. 21st of April; on the 1st and 21st of May ; aud on the 11th of June, 1815; being all the Treasury notes due at Washington.

And the said last mentioned Treasury notes will accordingly be paid, upon the application of the holders thereof, respectively, at the Treasury of the United States in Washington aforesaid, at any time subsequent to the date of this notice ; and interest will cease to be payable upon the said Treasury niotes after the 1st day of July next. And all Treasury notes hereafter payable at the Treasury of the United States, in Washington aforesaid; will
be there punctually paid, from time to time, as the same shall become due and payable; and the interest thereon will cease on the day or days when such Treasury notes shall respectively becoine payable.

Aud notice ịs hereby further given, that funds have been assignied for the payment of such Treasury notes, and the interest thereon, as became due at the loan office in Baltimore, in the State of Maryland, on the 1st of June, 1815; and that the said last mentioned Treasury notes will accordingly be paid, upon'application of the holders thereof, respectively, at the said loan office, in Baltimore aforesaid, at any time subsequent to the date of this notice; and that interest will cease to be payable upon the said Treasury notes after the lst day of July next. And all Treasury notes hereafter payable at the loan office in Baltimore aforesaid, will be there punctually paid, from time to time, as the same shall become due and payable; and the interest thereon will cease on the day or days when such Treasury notes shall respectively become payable.

And notice is hereby further given, that as funds in current money cannot at present be obtained at Boston, in the State of Massachuisetts, to pay such of the Treasury notes as became due, and remain unpaid; at the loan office in Boston, aforesaid, on the following days, to wit:

On the 1st of November, and the 11th and 21st of December, 1814; the 21st of January, and the 1st of February, 1815;

Subscriptions in the principal and interest of the said last mentioned Treasury notes will be received to the loan of twelve millions of dollars, at the rate of 95 dollars in principal and initerest, in Treasury notes, for 100 dollars of six per cent. stock. The holders, respectively, of the said last mentioned Treasury notes may also, at their option, receive drafts on Philadelphia and Baltimore for the amount of their clatims; or they may exchange the old for new Treasury notes, fundable at six per cent., to include the principal and interest now due.

And notice is hereby further given, that as funds in current money cannot at present be obtained at the city of New York, in the State of New York, to pay such of the Treasury notes as became due, and remain unpaid, at. the loan office in Ned York aforesaid; on the following days, to wit:
On the 1st and 11th of December, 1814; the 1st and 11th of January ; the 11th of February ; the 11th of March; the 21st of April; and the 11th of May, 1815 ;

Subscriptions in the principal and interest of the said last mentioned Treasury notes will be received to the loan of twelve millions of dollars, at the rate of 95 dollars of principal and interest in Treasury notes, for 100 dollars of six per cent. stock. The holders, respectively, of thesaid last mentioned Treasury notes may also, at their option, reeeive drafts on Philadelphia and Baltimore for the amount of their claims; or they may exchange the old for new Treasury notes; fundable at six per cent., to include the principal and interest now due.

And, finally, notice is hereby given, that on the 1st day of August next, instructions will be issued, forbidding the collectors of duties on imports and tonnage, the collectors of the internal duties and taxes, and the receivers of all public dues whatsoever, to receive in payment of such duties, taxes, and dues, the bank notes of any bank which does not, on demand, pay its own notes in gold and silver, and, at the same time, refuses to receive, credit, re-issue, and circulate the Treasury notes emitted upon the faith and se-
curity of the United States, in deposites, or in payments to or from the bank in the same manner, and with the like effect, as cash, or its own bank, notes.
The loan officers of the several States are requested to make this notice generally known, by all the means in their power ; and the printers authorized to print the laws of the United States will be pleased to insert it in their respective newspapers.

A. J. DALLAS, Secretary of the Treasury.

## I.

 NOTICE.Treasury Department, June 23, 1815.
Funds having been assigned for the payment of such Treasury notes, and the interest thereon, as will become due at Philadelphia on the 1st day of August, next, and on all subsequent days, prior to the 1st day of January, 1816: ;

Notice is therefore hereby given, that the said Treasury notes will be paid; on the application of the holders thereof, respectively, at the loan office in Philadelphia, on the day or days when they shall respectively become due; and interest on the said notes will cease to be payable thereafter.

The commissioners of loans in the several States are requested to make this notice generally known by all the means in their power; and the printers authorized to pablish the laws, of the United States will be pleased to insert it in their respective newspapers.
A. J. DALLAS, Secretary of the Treasury.
