REPORTS

OF THE

SECRETARY OF THE TREASURY OF THE UNITED STATES.

REPORT ON THE FINANCES.

DECEMBER, 1829.

In obedience to the directions of the "Act supplementary to the act to establish the Treasury Department," the Secretary of the Treasury respectfully submits the following report:

I. OF THE PUBLIC REVENUE AND EXPENDITURES.

The receipts into the Treasury, from all sources of revenue, during the year 1827, were - - - - \$22,966,363 96

The expenditures for the same year, including public debt, were - - - - 22,656,764 04

The balance in the Treasury on the 1st January, 1828, was 6,668,286 10

The receipts from all sources, during the year 1828, were 24,789,463 61

Viz.

Customs - - - - \$23,205,523 64

Lands (Statement D) - - - - 1,018,308 75

Dividends on bank stock - - - - 455,000 00

Incidental receipts (E) - - - - 110,631 22

Making an aggregate of - - - - 31,457,749 71

The expenditures for the year 1828, were (F) - - - - 25,485,313 90

Viz.

Civil, diplomatic, and miscellaneous - - - - 3,676,052 64

Military service, including fortifications,
ordnance, Indian affairs, pensions, and
arming the militia - - - - 5,719,956 06

Naval service, including the gradual in-
crease and improvement of the navy - - - - 3,925,867 13

Public debt - - - - 12,163,438 07

Leaving a balance in the Treasury on the 1st January, 1829,
of - - - - 5,972,435 81

The receipts into the Treasury, during the three first quarters of the present year, are estimated to have amounted to \$19,437,230 98

Viz.

Customs	-	-	17,770,744 59
Lands (G)	-	-	972,059 33
Bank dividends	-	-	490,000 00
Miscellaneous (H)	-	-	204,427 06

The receipts for the fourth quarter are estimated at - - - 5,165,000 00

Making the total estimated receipts of the year - - - 24,602,230 98

And, with the balance on the 1st of January, 1829, forming an aggregate of - - - 30,574,666 79

The expenditures for the three first quarters of the present year, have amounted, by estimate, to (I) - - - 18,919,114 05

Viz.

Civil, diplomatic, and miscellaneous	-	-	2,482,415 50
Military service, including fortifications, ordnance, Indian affairs, pensions, arming the militia, and internal improvement	-	-	5,155,256 44
Naval service, including the gradual improvement of the navy	-	-	2,565,979 24
Public debt	-	-	8,715,462 87

The expenditures for the fourth quarter, including \$3,689,542 93 on account of the public debt, are estimated at - - - 7,245,481 05

Making the total estimated expenditures of the year - - - 26,164,595 10

Leaving in the Treasury, on the 1st January, 1830, an estimated balance of - - - 4,410,071 69

Of this balance, which includes the funds heretofore reported by this department as not effective, there have been reserved, under the 4th section of the Sinking Fund act of 1817, \$2,000,000, and the residue has been held to meet existing appropriations.

But, of those appropriations, amounting to \$3,435,387 03, it is estimated, on data recently furnished by the proper departments—

1. That there will be required, to complete the service of the year 1829, and of previous years, \$2,457,173 16; which sum will be expended in the year 1830.
2. That the sum of \$862,251 84 will not be required for the service of those years, and may, therefore, be applied, without being re-appro-

priated, in aid of the service of the year 1830, as will be more fully stated when the estimates of the appropriations for that year are presented.

3. That the sum of \$115,962 03 will be carried to the surplus fund at the close of the present year, either because the objects for which it was appropriated are completed, or because those moneys will not be required for, or will no longer be applicable to them.

II. OF THE PUBLIC DEBT.

The total amount of the public debt of the United States, was, on the 1st of January, 1829 - - - \$58,406,418 05

Viz.

Funded debt - - - - - \$58,362,135 78

Consisting of—

Six per cent. stocks - 16,279,822 02

Five per cent. stocks, including \$7,000,000 subscribed to the Bank of the United States - 12,792,000 20

Four and a half per cent. stocks - 15,994,064 11

Three per cent. stock - 13,296,249 45

Unfunded debt - - - - - 44,282 27

Consisting of—

Registered debt, being claims registered prior to the year 1798, for services and supplies during the Revolutionary war - 28,965 91

Treasury notes, outstanding 9,261 27

Mississippi stock, outstanding 6,055 09

The payments made, and to be made, on account of the public debt, for the year 1829, amount to - 12,405,005 80

Of this sum there will have been paid for interest - - - - - 2,563,994 25

And on account of principal - - - - - 9,841,011 55

Leaving the total debt on the 1st January, 1830 - - - 48,565,406 50

Viz.

Funded debt, as per statement (K) - 48,522,869 93

Unfunded debt, as per statement (L) - 42,536 57

Of the sum applied to the payment of the public debt in the year 1829, \$10,049,630 50 have accrued under the second section of the Sinking Fund act of 1817, which completes the whole amount of that appropriation up to the 1st January, 1830; and \$2,355,375 30 have been derived, under the fourth section of the act, from the surplus moneys in the Treasury.

The payments of the present year being applied exclusively to the redemption of the six per cent. stocks, there will remain the following stocks, redeemable according to the respective contracts, viz :

In 1830—6 per cents.	-	-	\$6,440,556	17
5 per cents.	-	-	18,901	59
4½ per cents.	-	-	1,539,336	16
On the 1st January, 1831, and sub- ject to the last payment of 1830	-	-	18,901	59
Total redeemable in 1830	-	-	\$8,017,695	51
In 1831—(viz. on the 1st January, 1832)	-	-		
5 per cents.	-	-	1,018,900	72
4½ per cents.	-	-	5,000,000	00
Total redeemable in 1831	-	-	6,018,900	72
In 1832—4½ per cents.	-	-	5,000,000	00
On the 1st Jan., 1833, 4½ per cents.	-	-	2,227,363	97
Total redeemable in 1832	-	-	7,227,363	97
In 1833—(viz. on the 1st January, 1834) 4½ per cents.	-	-	2,227,363	98
In 1834—(viz. on the 1st January, 1835) 5 per cents.	-	-	4,735,296	30
Making together	-	-	28,226,620	48
Redeemable at the pleasure of the Government	-	-	20,296,249	45
Viz.	-	-		
5 per cents. subscribed to Bank U. States	-	-	7,000,000	00
3 per cents.	-	-	13,296,249	45
Making a total of	-	-	48,522,869	93

From the above statement it is apparent that the Sinking Fund, as hereafter estimated, at \$11,500,000, for the year 1830, and subsequently at an average of \$12,000,000, can only be applied to the reimbursement of those stocks which are not redeemable at pleasure, as follows :

In 1830—to the payment of principal	\$8,017,695	51
interest	1,951,437	05
	<u>\$9,969,132</u>	<u>56</u>
In 1831—to the payment of principal	6,018,900	72
interest, say	1,687,060	08
	<u>7,705,960</u>	<u>80</u>
In 1832—to the payment of principal	7,227,363	97
interest, say	1,186,115	04
	<u>8,413,479</u>	<u>01</u>
In 1833—to the payment of principal	2,227,363	98
interest, say	1,085,883	66
	<u>3,313,247</u>	<u>64</u>
In 1834—to the payment of principal	4,735,296	30
interest, say	985,652	29
	<u>5,720,948</u>	<u>59</u>

The inconvenience to which the Treasury will be exposed by this cause, may be averted by redeeming the stock subscribed to the Bank of the United States, and authorizing the Commissioners of the Sinking Fund to purchase the three per cents. when, in their opinion, the terms on which such purchase can be made, will render it as favorable to the United States as the payment of other stocks then redeemable. This stock is now quoted in the market at about 87½. An unlimited authority to redeem it would, no doubt, somewhat enhance the price; but this effect would, in a great degree, be counteracted by the option to redeem other stocks. If, however, the revenues can, in the opinion of Congress, be more advantageously reduced, or otherwise disposed of, when the other stocks shall be redeemed, the payment of the three per cents. may be postponed, subject to the operation of a small sinking fund, to be applied conditionally, viz: when the stock can be bought at a reasonable price, to be fixed by law. In such case, it will be necessary, to the full employment of the present Sinking Fund, to give the Commissioners power to purchase the five and four and a half per cents. at their market price.

III. OF THE ESTIMATES OF THE PUBLIC REVENUE AND EXPENDITURES FOR THE YEAR 1830.

The amount of duties on imports and tonnage, which accrued from the 1st of January to the 30th September, 1829, is estimated at \$21,821,500; being \$2,621,300 less than that which accrued in the corresponding period of the preceding year. This deficiency has arisen almost entirely in the first quarter of the present year; and was probably caused by the extensive importations which had been made in the early part of 1828, in anticipation of the increased duties. In the second and third quarters of the year, however, the importations have so augmented, that the accruing duties secured in those quarters, are but \$49,300 less than those secured in the second and third quarters of the preceding year. This improvement still continues; and there is reason to believe that the duties accruing in the fourth quarter will nearly equal those of the fourth quarter of last year. It is worthy of remark, that the accruing revenue of the three first quarters of the year 1829, though so much below that of 1828, is only \$270,200 less than that of the same period of the year 1827.

The debentures issued, during the three first quarters of 1829, were \$3,059,060 25, which exceeds the amount issued during the corresponding period of the year 1828, by \$96,475 70.

The amount of debentures, outstanding on the 30th September last, and chargeable upon the revenue of 1830, was \$1,111,136, exceeding, by \$65,992, the amount chargeable on the same day, in 1828, on the revenue of 1829.

The value of domestic articles, exported from the United States, for the year ending on the 30th September last, is estimated at \$55,800,000, being \$5,130,331 more than the value of those exported, during the same period, in the preceding year.

The amount of custom house bonds in suit on the 30th September last, was \$6,591,714 20, being \$1,967,435 45 more than on the same day, in the preceding year. It may be observed, that the great increase of this item for several years past, has arisen from the heavy failures in the China trade; in which, series of bonds falling due from the same houses commence in one year, and terminate in another.

From a view of all those facts and considerations, the receipts for the year 1830 are estimated at - \$23,840,000 00
 Viz.

Customs	-	-	-	\$22,000,00 00
Lands	-	-	-	1,200,000 00
Bank dividends	-	-	-	490,000 00
Incidental receipts, including arrears of internal duties, direct tax, and canal tolls,				<u>150,000 00</u>

To which is to be added the balance estimated to be in the Treasury on the 1st January, 1830 - - - 4,410,071 69

Making an aggregate of - - - - 28,250,071 69

The expenditures for 1830 are estimated at - - - 23,755,526 67

Viz.

Civil, diplomatic, and miscellaneous	-	2,473,225 62
Military service, including fortifications, ordnance, Indian affairs, pensions, arming the militia, and internal improvement	5,525,189 95	
Naval service, including the gradual improvement of the navy	-	4,257,111 10
Public debt	-	<u>11,500,000 00</u>

Which will leave an estimated balance in the Treasury on the 1st January, 1831, of - - - \$4,494,545 02

If the foregoing estimate of the revenue and expenditure be correct, the sum at the disposal of the Commissioners of the Sinking Fund, for the year 1830, will be \$11,500,000, and, when the increase of population is considered, may, probably, be safely computed at \$12,000,000 for the four succeeding years. This sum will complete the payment of the whole public debt within the year 1834, without applying the bank shares.

Should it be determined to reduce the revenue, so as to correspond with the existing expenditure, it will require the exercise of a wise forecast, on the part of the Legislature, to avert serious injury. Merchants having goods on hand, liable to be affected in price by a change in the fiscal system of the Government, have a just right to expect from it a reasonable notice, corresponding with the magnitude of the change proposed. In accordance with these views, it is respectfully suggested, that, whatever diminution of duties shall be determined upon, it be made to take effect prospectively and gradually.

It will, in such case, be proper, at an early period, to select the articles upon which to commence the reduction. As auxiliary to this undertaking, the annexed tables, M and N, have been prepared. Table M exhibits the amount of duties accruing on such articles of importation as are generally of foreign production. Table N exhibits the tariff of duties imposed by foreign Governments on such articles as are produced in, or exported from, the United States, as far as has been ascertained at the Treasury Department.

The precise effect of a reduction of duties on the revenue can only be ascertained by experience; but, as the imports will be somewhat increased by the operation, it is not apprehended that a gradual reduction, commencing at an early day, would sensibly prolong the total extinguishment of the public debt.

The various duties devolved on the Treasury Department, in relation to custom houses and land offices, have led to the exercise of powers not sufficiently defined by law. These are liable to be enlarged by successive gradations, under special exigencies, without legislative sanction, until the powers of the department to perform indispensable duties are derived from usage, rather than the statutes. Of this nature are those exercised in the payments for contingent expenses of the cutter service, repairs of custom houses, wharves, and warehouses belonging to the United States; expenses to inspectors employed in special services, in addition to their *per diem* compensation; in the allowances to persons instructed to investigate transactions of custom houses and land officers; to assistant counsel, and for costs in suits and prosecutions; and for various services of less magnitude. The payments for these objects are usually made by collectors and receivers of public moneys, or by drafts on them from the Treasury Department, being considered as incidental to these branches of revenue. It is desirable that all such payments should be as specifically sanctioned by law, as those made out of moneys in the Treasury.

The Secretary of the Treasury deems it proper to make known to Congress that the duties imposed upon woollen goods, under the act of the 19th May, 1828, have, in pursuance of an instruction from the Treasury Department, dated 15th October, 1828, been charged upon the value of such goods, without the addition of 20 per centum on the cost of those imported from the Cape of Good Hope, or any place beyond the same, or from beyond Cape Horn; or 10 per centum on those from any other place or country.

The law, it is believed, may admit of a different construction; but, as the orders for the importations, since the instruction above referred to, were given with a knowledge of its operation, now, to add the 20 or 10 per cent. to the cost of such goods, would probably transfer the whole of them into a class higher than was fairly contemplated by the importer, and increase the duty very prejudicially to his interest. Under these circumstances, and as there may be some doubt as to the intention of the law, it has been deemed proper not to disturb the existing construction, but to submit the matter to the consideration of Congress.

Another subject, somewhat similar in character, has been, for special reasons, differently disposed of. A deduction of five per cent. on the invoices of broadcloths, for measurement, has become an established usage of trade. This usage was particularly noticed in an instruction issued by the Treasury Department on the 9th September, 1828, but which had been differently construed by the custom house officers at different ports: at some the deduction having been made from the measurement, and at others from the cost; by which different rates of duties were imposed. It was deemed not only a legal, but constitutional obligation, so far as the powers vested in the department would admit, to render the duty uniform throughout the United States. In preparing the necessary regulation for this purpose, it was considered that the five per cent. deduction was originally intended, as it purports to be, on "measurement," and not on price. This basis was also recommended by another and more important consideration, viz: the uniformity of its effect. The allowance being made for measurement, the merchant pays duty on the number of yards purporting to be imported; but, if made on price, it is nugatory, except the cloths are thereby transferred from a higher to a lower class, in which case it diminishes the duty by the amount of the difference between the duties charged on such classes. An

instruction was accordingly issued, on the 8th August, 1829, directing the allowance of the five per cent. to be made on the measurement only. But this unavoidably deprived a number of importers, whose orders had been previously given, of the expected benefit of the deduction, in determining the classes of dutiable prices to which their cloths belonged: such cloths are, consequently, subjected to a rate of duty higher than was contemplated when the orders were given. The regulation has, therefore, injuriously affected the interest of these importers; and their case is submitted to the favorable consideration of Congress, who alone can give the proper relief.

The Secretary of the Treasury respectfully invites the attention of Congress to some modification of the existing revenue laws, as well for the convenience of those employed in commerce and navigation, as for the better security of the revenue.

The law in relation to licenses for coasting and fishing vessels operates unequally and injuriously upon some branches of that business; it requires, upon every change of structure of the vessel, or of ownership, by the transfer of the right of one partner, the taking out of a new license, and the payment of a new duty.

The bounty allowed on vessels employed in the cod fisheries is understood to be unlawfully obtained by some of those engaged in the mackerel fisheries. It is believed that a bounty on the fish cured or exported, without reference to the origin of the salt, would better promote whatever encouragement may be considered as proper to be given to the fisheries. This could be graduated to any scale, and, being more simple in its form, would be less liable to abuse.

It is found that the present mode of compensating custom house officers operates unequally, and not in proportion to the service rendered. As striking instances of this inequality, inspectors, in many places, receive more than double the compensation of the collectors who employ them; and, at some ports, custom houses are built or purchased by the Government, while, at others, they are provided at the expense of collectors.

The fees of office are liable to be variously computed, and are a constant source of embarrassment in the transaction of business. These, it is believed, may be generally abolished, and the mode of compensation by salary beneficially substituted; retaining, however, those on manifests, clearances, entries, and permits, and that class of service which makes it the interest of the officers to require a strict observance of those acts, on the part of masters of vessels and shippers, which may be deemed essential to the security of the revenue.

The commissions now allowed to collectors on bonds put in suit, might be advantageously divided between them and the district attorneys. The former would thereby be more interested in taking proper security, and the latter have a salutary stimulus to the discharge of their duties.

Some additional provision of law is deemed necessary to compel the surrender of public books and papers, of district attorneys, marshals, custom house and land officers, in pursuance of orders from the proper department.

The labors of appraisers of imported goods have been greatly increased by the "Act in alteration of the several acts imposing duties on imports," passed 19th May, 1828. To give the proper efficiency to that branch of service, it is necessary to have warehouses and offices con-

veniently adapted for the examination, measuring, and repacking of goods; and that the persons employed by appraisers should be more immediately under their control. In the port of New York, where nearly half the importations into the United States are made, the whole labor of appraising devolves on two officers, who are exclusively responsible for that duty; and yet, all the assistance which can be provided for them, is supplied indirectly, and under an implied power. To avoid the embarrassment that must arise from sickness, or other necessary absence of one or both of these officers, an additional appraiser at that port seems indispensable. It is also deemed advisable that the commissioned appraisers at all the ports should be authorized, under proper restrictions, to employ persons to act as assistants, under regular official responsibility. These being distributed upon the different classes of business, could not fail to increase the power of the appraisers for an efficient and faithful performance of their duties, and without any material increase of expense.

The present system of storing goods for debenture, or in security for duties, may, it is believed, be beneficially modified. Goods are now stored under various circumstances:—

1. Teas may, at the option of the importer, and at his expense, be stored under the direction of the custom house officers, in security for the duties, for two years.

2. Wine and spirits may be stored, in like manner, for one year.

3. All other goods may be stored, in like manner, for the term of credit on the duties, respectively.

4. Wine and spirits, to be entitled to drawback, must be deposited in a public store, and there remain, from their landing, until shipment, or, on being transported coastwise, may be again stored or shipped.

5. Goods, irregularly imported, are stored until they can be disposed of according to law.

Private stores are usually rented, for these purposes, by the collectors, but the facility of access to such buildings renders the security of little avail; and, that abuses have not more frequently occurred, is attributable much more to the integrity of the merchants, than the efficacy of the system. The remedy proposed, is, to erect warehouses, at the public expense, at the principal ports, for all the permanent objects connected with this branch of service; to be so situated and constructed as to be conveniently guarded, and rendered inaccessible except by permission of officers in charge. This being done, the warehouse system may be extended to all goods entered for drawback, and the right of debenture continued as long as they remain in store. There can be no doubt, that a moderate charge for storage would remunerate the Government for the expenditure, while the revenue would be rendered more secure, and the interests of navigation essentially promoted.

The intercourse between the United States and adjacent foreign territories requires some special regulation, as well for the convenience of the officers of the customs, as of travellers; and, also, for the better security of the revenue. Persons transiently coming into the United States on business, and returning, are obliged to pay duty for the horses and vehicles employed; without benefit of drawback. Ferry-boats, having foreign goods on board, are required by law to enter and pay fees upon every trip across a boundary water. It is, also, desirable that United States vessels, of whatever burden, laden with foreign goods, passing on those waters, should be

subjected to the same regulations that are now imposed on coasting vessels passing from one district to another, not in an adjoining State. It may, however, be doubted, whether any regulation, short of a total prohibition of the importation of goods not the growth or product of the territories contiguous to the United States, and of their transportation upon the boundary waters in vessels of the United States, without accompanying evidence of the duties having been paid, will effectually prevent illicit importations from those countries.

The laws in relation to the coasting trade do not afford the necessary means for preventing the unlawful introduction of foreign goods through that channel. The United States are divided into three great districts: 1. From their eastern limits to the southern limits of Georgia; 2. From the southern limits of Georgia to the Perdido river; 3. From the Perdido river, to the western limits of the United States. Masters of vessels licensed for carrying on the coasting trade, may now, with a given amount of cargo, pass from one port to another, within either of these districts, or to a port in an adjoining State, without delivering a manifest, or obtaining a permit, previous to their departure, and without making any report, or entering their vessels at the port of destination: nor does the law require any evidence, except the oath of the master, in certain cases, of duties having been paid on foreign goods transported from one port to another, except by a defective provision as to wine, spirits, and teas, and goods entitled to drawback. It is apparent, from these facts, that very great facilities are given for illicit trade. If a single port can be found, where, through the negligence of the officers of the customs, or other cause, goods can be thus introduced, there is no sufficient obstacle to their being transported by water to another and a better market. The mere power to board a coasting vessel and demand her manifest, without any obligation on the master to report her to the collector, is wholly insufficient for proper security against frauds; and, especially, in those ports where an extensive coasting and foreign navigation is carried on.

There is also a feature in the law in relation to the seizure of goods suspected to have been smuggled, which, it is believed, may be beneficially modified. These goods are usually seized in small quantities; the owners, perhaps, escape, or no one appears to claim them, and yet the goods cannot be sold until labelled, and condemned in a court of the United States; the costs attending which frequently amount to more than the proceeds of the articles when sold. The officer not only loses his reward, but the United States are subjected to costs, and what was intended as an inducement to vigilance becomes worse than nugatory. This might be remedied, by authorizing the sale, without condemnation, of such goods as may be unclaimed, after a reasonable notice. An additional and salutary stimulus may also be given to the activity of revenue officers, by authorizing a relinquishment to them of a portion of the proceeds of forfeited goods, which may accrue to the Government. The sum thus relinquished would probably be much more than repaid in the increased security of the revenue, arising from the incitement to greater vigilance.

The power to search for and seize goods found on land, requires to be enlarged and better defined. To avoid unnecessary vexation, the exercise of the power might be limited to a reasonable distance from the coast, navigable rivers, canals, or the interior border. It is known that considerable exertions are making for introducing goods into the United States, in violation of the revenue laws; and the Secretary of the Treasury finds him-

self compelled to invite the special attention of Congress to the adoption of such measures as may be calculated to prevent an evil, not less dangerous to the morals of those exposed to the temptation, than injurious to the interests of the nation. Every measure intended for this object will unavoidably subject the fair trader to some inconvenience; but this should be considered as more than counterbalanced by the protection it affords against the ruinous competition of those who can only be restrained by efficient laws, rigorously executed.

The present credit system, it is believed, may be materially improved. If the purchaser of goods, or any other person than the importer, could be lawfully substituted, as the principal on custom house bonds, in all cases where the importer was not indebted on bonds due and unpaid, the security of these debts might be greatly increased. It would, in such case, depend on the solvency of a class of merchants exposed to less hazard in their business, besides being divided among a greater number. The credits now allowed, are, also, unnecessarily complicated. The long credits on teas have been a source of heavy loss to the revenue, and consequently injurious to the interests they were intended to promote. Experience has proved, that, by furnishing an opportunity for, they stimulate adventurous speculation, not less ruinous to those connected with them, than prejudicial to the Government. The terms of payment for duties now prescribed by law are as follows:

All sums not exceeding \$50 are payable in cash; all sums exceeding \$50, for duties on the produce of the West Indies (except salt) or places north of the equator, and situate on the eastern shores of America, or its adjacent seas, bays, and gulfs, one half in six months, and one half in nine months:—

On salt, nine months;

On wines, twelve months;

On all goods imported from Europe, (other than wines, salt, and teas,) one third in eight months, one third in ten months, and one third in twelve months;

On all goods (other than wines, salt, and teas) imported from any other place than Europe and the West Indies, one third in eight months, one third in ten months, and one third in eighteen months;

On teas imported from China or Europe, stored as security for duties, a credit of two years is allowed: when delivered for consumption, the duties not exceeding \$100, on a credit of four months, with security; if over \$100, and not exceeding \$500, eight months; over \$500, twelve months: the credit not in any case to extend beyond two years allowed on deposit of the teas;

On wines and spirits, stored as security for duties, the same credit, on delivery, as if not stored, not to exceed twelve months.

The term of six, nine, and twelve months, might be adopted as a fair average of existing credits. A change, if introduced prospectively, could not be sensibly felt in the price of any article of importation; and the reduction of the duties on teas, and some other importations from countries south of the equator, if that be thought advisable, would counteract the effect of a shortened credit upon the interests of navigation in that region.

The average proposed somewhat increases the length of the credits on importations from the West Indies. Upon this point it may be observed, that the profits of the West India trade being reduced to their minimum, every proper facility given to it could not but be felt in the agriculture, as

well as the commerce and navigation of the United States ; those colonies being almost the only market for many of the staple products of several of the States. The same object may be further promoted by the reduction of duties on coffee, spices, and some other products of these islands.

It is also worthy of consideration, whether any modification of the revenue system, with a view to improve the West India trade, might not, with advantage, be arranged in such a manner as to give preference to the productions of those colonies into which American navigation is permitted.

The effects of a change in the credit system, and of a reduction of duties, upon the various interests of the nation, other than revenue, are suggested as incidental considerations, which, though they might not be deemed of such a character as to justify a revision of the revenue laws, yet, cannot safely be overlooked in a modification called for by other indispensable objects. It may be proper, however, in all measures of this nature, to keep in view, that the money power of the Government, whether exerted in the imposition, distribution, or reduction of taxes, or in the disbursement of the public treasure, requires to be exercised with the most guarded and steady purpose of uniting absolute and relative justice in the same point.

Whatever propels an undue portion of capital into one pursuit, must tend, where capital is abundant, sooner or later, to overcharge it, and lessen the profits. The same operation will cause at least a relative increase in the profits of other pursuits, from which capital has been withdrawn. The application of the money power of the Government to regulate the unequal action caused by such, or any other changes in human economy, is, in its nature, incapable of precise and certain adaptation to its end ; hence, the necessity for care and moderation, in all measures of this character. Every mistake must increase the irregularities intended to be remedied, and interrupt and disturb that gradual growth which best promotes and secures substantial prosperity. So injurious are great and sudden fluctuations in human employments, that it has been even doubted whether the inventive genius of man, in the development of means for saving labor and multiplying mechanical power, has not proved rather an evil than a benefit. A close observance of this operation, will, however, demonstrate, that, whatever there may be of evil in it, arises only from the suddenness of the change. Employments essential to the support of many, have been superseded so suddenly as to leave them dependent on the charities of those who may have profited by the event ; this would not have occurred, had the process been graduated, as to time, more conformably to the habits and conditions of those liable to be affected by it. The employments thus superseded, will, however, scarcely be known to, or needed by, the next generation ; others will take their place ; and those who cannot enter upon new pursuits, though without hope for themselves, may yet be consoled with a better prospect for posterity.

It may not be unprofitable to observe, that a total revolution is taking place in many of the productive employments throughout the civilized world. The improvements in science and arts, no longer interrupted by war, have been directed to other objects, and have so increased the power of production, that the tide of prices, which had been long on the flood, is gradually ebbing, even under a depreciated currency. The relative values between labor and products have also changed, but are not yet adjusted. The depression of prices, falling unequally on the different species of property, is ruinous to many, and repugnant to the feelings even of those who do not really suffer. It may be long before a proper adjustment of these

values removes the evil; and, until then, the busy world will be agitated by the convulsive struggles of its various interests, each to avert from itself, and throw upon others, the impending adversity. The ramifications of these connecting and conflicting operations are so complicated, that it may be doubted whether any degree of intelligence, however free from the influence of special interests, could, by the exercise of a political power, materially lessen the evil. The active energies of man, stimulated by necessity, emulation, and love of wealth, are, perhaps, the agents most to be relied upon, in maintaining a salutary equilibrium in the various operations of human enterprise. Every new disposition, therefore, of the money power, to be safe, should be gradual, and requires great caution to avoid increasing the unequal and irregular action, which is so obviously prejudicial both to individual and public welfare.

Whatever objects may, in the wisdom of the Government, be found, for the application of surplus revenue, after the public debt shall be paid, there will probably remain a considerable amount, which may be dispensed with, by a reduction of the import duties, without prejudice to any branch of domestic industry. Such a reduction will present a favorable opportunity for averting a portion of the evil resulting from the general depression in the price of property, before referred to. The repeal of a tax is similar, in its effect, to the relinquishment of so much annual debt; relieving, to that amount, the various species of labor upon which it was charged, and distributing its benefits, in proportion to consumption, upon every individual of the nation.

The extinguishment of the public debt tends to the same result in another way. The interest is now paid to capitalists, out of the profits of labor; not only will this labor be released from the burden, but the capital, thus thrown out of an unproductive, will seek a productive employment; giving thereby a new impetus to enterprise in agriculture, the arts, commerce, and navigation, at a lower charge for interest than before. The heavy impositions on the labor employed in these pursuits, in those nations where the arts have attained their highest perfection, had become, in a great measure, counterbalanced, in latter years, by the increased capacity of that labor; but these burdens still remain, and with but little prospect of diminution. In the mean time, the industry of the United States will have a positive advantage over that of other countries, equal to the difference between their respective rates of taxation; and it is worthy of consideration, that there has been probably no period in which such an opportunity for advancing the general economy of the American people, and aiding them to maintain a successful competition with that of other countries, could have been more propitious, or more necessary to their interests, than that which is now approaching. It is known that the most unexampled exertions are making, in all civilized nations, to increase the productive power; and those who shall stand foremost in this laudable strife, will be assured of success in maintaining, not merely the prosperity of their people, but a high rank among the family of nations.

All which is respectfully submitted.

S. D. INGHAM,
Secretary of the Treasury.

TREASURY DEPARTMENT,
December 14, 1829.

VOL. III.—2

A.

A STATEMENT exhibiting the duties which accrued on merchandise, tonnage, passports, and clearances; of debentures issued on the exportation of foreign merchandise; drawback on domestic distilled spirits, and domestic refined sugar, exported; bounty on salted fish, exported; allowances to vessels employed in the fisheries, and of expenses of collection, during the year ending on the 31st of December, 1828.

Year.	Duties on			Debentures issued.	Drawback on domestic distilled spirits, and domestic refined sugar.	Bounties and allowances.	Gross revenue.	Expenses of collection.	Net revenue.
	Merchandise.	Tonnage and light money.	Passports and clearances.

†Watches and parts of watches	- - - - -	48,725 00
†Articles composed chiefly of pearls and precious stones, set, or otherwise	- - - - -	7,809 00
†Lace, other than coach lace	- - - - -	92,052 00
Tin in plates and sheets	- - - - -	91,310 00
Opium	- - - - -	3,582 00
†Raw silk	- - - - -	205 00
All other non-enumerated articles, paying an ad valorem duty	- - - - -	418,710 00
		<u>\$7,550,842 13</u>

* The examination of Mississippi stock paid off, or received in payment for lands, was completed within the last year, and this sum ascertained to be the true amount unpaid. It exceeds, including the certificates paid off within the year ending on the 30th September, 1829, the amount stated on the 1st of October, 1828, by \$6,726 40. The difference arose from stating an excess in the amount of stock received in payment for lands; the receiver's accounts not being adjusted up to that time.

† The like of these partially manufactured in the United States.

Books, being of editions printed in or since the year 1801, bound or unbound, the cwt.	- - -	5 0 0	22 22 $\frac{1}{8}$
NOTE.—For the description of books prohibited to be imported, see the act for the regulation of the customs, and acts for securing copy rights.			
To prevent foreign books or maps, the property of individuals, from being charged with duty more than once, the proprietor shall, on each importation subsequent to the original one, make oath that the duties were paid thereon on their original importation, or that he purchased them in Great Britain, in a fair way of trade; that such are the same he exported from thence, and are now brought back for his private use, and not for sale in this country.			
No book, first composed, written, or printed, and published in the United Kingdom, and reprinted in any other country or place, shall be imported into Great Britain, on forfeiture of the same, and also of £10 and double the value of every copy.			
—See page 40 of <i>Ellis's abridgment, in conclusion.</i>			
Maps and charts, bound together in books, charged with duty as bound books.
