## REPORT ON THE FINANCES.

DECEMBER, 1830.

In obedience to the directions of the "Act supplementary to the act to establish the Treasury Department," the Secretary of the Treasury respectfully submits the following report.

## I. OF THE PUBLIC REVENUE AND EXPENDITURES.

The receipts into the Treasury, from all sources, during the year 1828; were

- ${ }^{*} \$ 24,763,62923$

The expenditures for the same year, including payments on account of the public debt, and including $\$ 790,06940$ for awards under the first article of the treaty of Ghent, were

$$
25,459,47952
$$

The balance in the Treasury on the 1st of January, 1829, was

$$
\$ 5,972,43581
$$

The receipts from all sources during the year 1829, were 24,827,627. 38 Viz.
Customs - . - - $22,681,96591$
Lands (statement D) $\quad-\quad-\quad-\quad$ - 1,517,175 13
Dividends on bank stock (E) - - 490,00000
Incidental receipts (E) - - $\quad$ - 138,486 34
Making, with the balance, an aggregate of ${ }^{-} \quad-\quad-\quad 30 ; 800,06319$
The expenditures for the same year were ( $F$ ) - - $25,044,35840$ Viz.
Civil list, foreign intercourse, and miscellaneous, including \$9,033 38 for awards under the first article of the treaty of Ghent - - $\quad-\quad 3,101,51487$
Military service, including fortifications, ordnance, Indiau affairs, pensions, arming the militia, and internal improvements - - - - 6,250,230 28
Naval service, including the gradual improvement of the navy _ - $3,305,74547$
Public debt - $\quad$ - $\quad$ - $12,383,86778$
Leaving a balance in the Treasury on the 1st of January, 1830, of

The receipts into the Treasury during the first three quarters of the present year are estimated at $\quad-\quad$ - $\$ 19,136,01879$ Viz.

| Customs | - |

\end{array}
$$

The expenditures for the fourth quarter, including $\$ 1,415,000$ on account of the public debt, are estimated, on data furnished by the respective Departments, at

$$
4,316,004 \cdot 98
$$

Making the total estimated expenditures of the year - 25,096,941 82
And leaving in the Treasury on the 1st of January, 1831, an estimated balance of $\quad$.- $\quad 4,819,78176$
which, however, includes the funds, estimated at $\$ 1,400,000$, heretofore reported by this department as not effective.

The appropriations remaining unsatisfied at the close of the year, are estimated at $\$ 5,256,56632$; but, of this amount, it is estimated by the proper departments,

1. That the sum of $\$ 3,740,55296$, only, will be required for the objects for which they were appropriated;
2. That the sum of $\$ 1,375,15477$ will not be required, and may, there-
fore, be considered as an excess of appropriation, and is intended to: be applied, without being re-appropriated, in aid of the service of the year 1831, as will more fully appear when the estimates of the appropriations for that year are presented;
3. That the sum of $\$ 140,85859$ will be carried to the surplus fund at the close of the year, either because the objects for which it was appropriated are completed, or because these moneys will not be required for, or will be no longer applicable to them.

## II. OF THE PUBLIC DEBT.

Viz.

Of the sum applied to the public debt in the year $1830, \$ 10,000,000$ were the amount of the appropriation for the year, under the 2 d section of the Sinking Fund act of 1817 ; and the remaining $\$ 1,354,63009$, tairen from surplus moneys in the Treasury, were, with the approbation of the President, placed at the disposal of the Commissioners of the Sinking Fund, and applied under the 1 st section of the act of 24th May last.

The five per cent. stock subscribed to the bank being at all times subject to redemption, and the high market price of other stocks not offering any inducement to purchase, the discretionary authority given to the Commissioners of the Sinking Fund, by the 2d section of the act last referred to, has not beén exercised; and, from the large amount of debt that is redeemable in the year 1831, and within the first two days of 1832 , it is not probable that it will be necessary to resort to in the year 1831.

The debt which will remain unpaid on the 1st of January, 1831, will be redeemable as follows:

At the pleasure of the Government $\$ 13,296,39757$ of three per cents. and $4,000,00000$ of inve per cents. subscription to Bank of the United States.
Afier six months' notice
After the 31st of December, 1831
After the 1st of January, 1832

$$
\therefore 1,539,33616 \text { of four and a half per }
$$

$5,000,00000$ of four and a half per cents.
$5,000,00000$ of four and a half per cents.
and
After the 31st of December, 1832
and
After the 3 lst of December, 1833
After the 1st of January, $1835-4,735,29630$ of five per cents.
As the means for the redemption of those portions of the public debt which are redeemable at the commencement of any year are to be provided at the close of the previous year, and are actually drawn from the Treasury at that time, such stocks may be considered, for the purpose of this report, as redeemable in the previous year.

1I1. OF THE ESTMMATES OF THE PUBLIC REVENUE AND EXPENDITURES for the year 1831.

The amount of imports into the United States for the year ending on the 30 th of Septermber, 1830 , is estimated at $\$ 68,500,000$, and the amount of exports at $\$ 73,800,000$; of which $\$ 59,400,000$ were domestic and $\$ 14,400,000$ foreign products.

The amount of custom house bonds in suit on the 30th September last was $\$ 6 ; 865,420$; which sum includes all that remain in suit since the estab-
lishment of the Government, and exceeds; by $\$ 273,706$, the amount in suit on the corresponding day of the last year.

The amount of duties on imports and tonnage which accrued in the first three quarters of the year 1830, is estimated at $\$ 20,570,000$, and in the fourth quarter at $\$ 5,610,000$.

The amount of debentures issued during the first three quarters of the year 1830 , is estimated at $\$ 3,331,895$; and the amount outstanding on the $30 i 1$-Sepiember last, and chargeable upon the year 1831, at-\$1,411,501.

It is estimated that the accruing duty on coffee and cocoa imported in 1830, and remaining in store on the 1st of January, 1831, will be reduced about $\$ 500,000$ by the operation of the acts of the last session reducing the duties on those articles; and that the duties on coffee, cocoa, salt, and molasses, accruing in 1831, and payable within that year, will, upon a like consumption to that of 1829 , be further diminished by those acis about $\$ 600,000$. The repeal of the duties on tomnage, which will take effect on the Ist April next, will further reduce the revenue of the next year about $\$ 75,000$. The subsequent reduction of the duties on tea, coffee, and salt, on the 1st of January, 1832, will probably lessen the usual importation of those articles for the demand of 1831. But the influence of these circumstances upon the revenue will be, in some degree, counteracted by the increased capacity of the country for consumption, as evinced by the enlarged amount of domestic exports, the general prosperity of mercantile business, and the favorable state of exchange with foreign countries, to which may be added the opening of the trade with the British colonies in the West Indies, and on the North American continent.

The revenue arising from the sales of public lands' will be improved by the same general causes which tend to improve that from the customs.
From a view of all those facts and considerations, the re-
ceipts for the year 1831 are estimated at
$\$ 23,340,000.00$ Viz.

| Customs | - | - | - | - | - | - | $21,000,000$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Lands |  |  | 00 |  |  |  |  |
| Bank dividends | - | - | - | - | - | $1,700,000$ | 00 |

| rect tax, and canal tolls | - | - | - |  | 150,000 | 00 |  |

The expenditures for 1831 are estimated at . $23,228,06586$ Viz.
Civil list, foreign intercourse, and miscellaneous - . 2,585,152 68
Military service, including fortifications, ordnance, Indian affairs, persions, arming the militia, and internal improvement

$$
6,789,31789
$$

Naval service, including the gradual improvement of the navy - - - . . . . 3,853,595 29
Public debt - . . . . . $10,000,00000$

In the estimate of expenditures for 1831 are included $\$ 1,375,154.77$ of the appropriations for 1830, which were not tequired for the service of that year, and are applicable for the service of 1831 without being re-appropriated, viz.-civil, foreign intercourse, and miscellaneous, $\$ 40,83318$; military, $\$ 815,92110$; and naval', $\$ 518,40049$.
In respect to the duties on imports and tonnage, the estimate above pre-
sented will not apply for the succeeding year ; for, when the reduction made at the last session shall have gone into full effect, the revenuc will, according to the average of the last four years, viz.-from 1826 to 1829 inclusive, be diminished $\$ 3,664,435$.

The proceeds of the sales of public lands will probably be somewhat increased; but-the amount of these sales will be limited by the ability of those who purchase lands for their own cultivation, adventurous speculation having ceased with the credit system. This source of revenue, therefore, except so far as it may be affected by future legislation, may be relied upon hereafter to sustain the estimate made for 183 I .

Thie reduction in the receipts from the customs will be partially made up by an increased importation of the articles on which the duties have been reduced, at least so far as the consumption of them may have been hitherto restrained by the amount of the duty : but the reduction in the rates of duty is so great, that no increase in the consumption can be looked for, so extensive as to make up any considerable portion of the deficiency; and, although the income and expenditure of the community may continue to bear the same relation to each other as heretofore, the amount of the duty saved to the consumer, instead of being applied wholly to the purchase of an increased quantity of those articles, will be distribnted upon all the articles of consumption, domestic and foreign, dutiable and free.

In looking forward to the probable changes in the fiscal operations of the Government when the public debtshall be completely extinguished, it is worthy of observation, that, with the exception of a single year, (1828,) there has been a gradual reduction of imports since the year 1825; and a continued reduction in the exports of foreign merchandise during the same period. These facts suggest various considerations to be taken into view in estimating the future revenues of the Government: they also show, among other matters worthy of notice, that the navigating interest employed in foreign commerce, and particularly in the carrying trade, must have suffered a material depression. That portion of the carrying trade which is unfettered by navigation laws will necessarily fall into the hands of those who can navigate cheapest; and this falling off gives reason to apprehend that the superiority heretofore claimed for American skill and economy in this pursuit, is yielding to more fortunate rivalry, and suggests the expediency of considering how far that interest may, without injury to others, be relieved from its depression.

The annexed paper, marked $M$, exhibits a detailed statement of the quantity and value of imports and exports liable to specific duties, and the value: of those paying ad valorem duties, and of those free of duty, from the year. 1821 to 1829 inclusive ; and will furnish the means of ascertaining the increase or decrease of each branch of import and export trade, and the probable effect of any proposed change, as well upon the revenue as upon the various interests with which they are connected.

Should it be contemplated by Congress to make any further reduction of the revenues preparatory to the period of the final extinguishment of the public debt, it is respectfully suggested, that, in order to avoid impairing the necessary means for the ordinary expenditures of the Government, or encroaching upon the sinking fund, it will be proper that such reduction should talse effect at a period sufficiently remote for the payment of the entire debt, as the reduction made at the last session will barely leave sufficient revenue for those objects during the ensuing four years. But there are some articles
on which the dnty may be reduced without injury to the revenue, and with advantage to other interests. The most striking example of this nature will be found in the duty laid on spices: If the imports and exports of these articles, known to be extensively consumed, but not produced; in the United States, be compared, it will be seen that, during the seven years preceding 1828, the nominal exports have exceeded in value the nominal imports by the sum of $\$ 168,155$. Whether the consumption has been supplied by fraudulent importations, or whether debentures have been paid on fraudutent exportations; the fact is conclusive evidence that nothing can be lost by imposing a lower duty on those articles. The comparison for the last two years exhibits a more favorable result ; but the difference is still much less than the actual consumption: and where such extensive frauds have been so successfully practised, it is scarcely to be hoped that any degree of vigilance sufficient to prevent them can be permanently maintained under the same temptation.

The atteition of Congress is respectfully invited to the operation of a clause of the $3 d$ section of the act entitled "An act for the more effectual collection of the duties on imports," passed 28th May, 1830. The rule therein prescribed for appraising certain goods in packages, by adopting the value of the best article in each package as an average for the whole, went into effect on the 1st of October last. The notice was too short to allow of new orders being given in all cases : and some, embarrassment has arisen in the appraisement of such articles as had, for the convenience of trade, and without any intent to defraud the revenue, been usually put up in mixed packages. In anticipation of this difficulty, directions were given to the collectors to ascertain, until the 1st of January next, the difference, in each case, between the amount of duty imposed according to this mode, and that which would have accrued according to the customary mode; but, as the bonds have been taken for the duties on the average value, some legislative provision will be necessary to afford the proper relief. It may also be expedient to except some articles from the operation of the clause before referred to. Laces, in particular, are represented to be almost necessarily imported of different qualities in the same package ; and some permanent inconvenience will be incurred to the trade in these articles, if the importer is obliged to have them assorted. It is also desirable that the character of the package for each description of goods required to be appraised upon the average of the best article, should be defined by law. The department has endeavored to obviate some of the incouveniences arising from the change, and at the same time to secure the objects of the act, by allowing the parcels of such goods which were put up separately, and designated as packages on the invoice, though enclosed in one general package, to be regarded as packages for appraisement within the meaning of the law. But the eonstant efforts to abuse this regulation on the part of some of those for whose benefit it was adopted, and the intrinsic difficulty of fixing; without specific legislation, any positive limit to the extent of the parcel to be deemed a package, will probably render it necessary, should no alteration of the law be made, to rescind the order, and to recognise no other package than the eftire quantity put up in one exterior box or envelope. The general operation-of the clause is found, however, to be beneficial : it facilitates despatch and uniformity in the appraisement of goods, as well as prevents frauds on the revenue; and; with the aid of the modifications suggested, mercantile ingenuity wiil, no doubt, find means, by conforming the packages to the objects of the law, to avoid its inconveniences.

Efforts, have been made to give greater efficiency to the revenue cütter
service ; but it has become manifest that the compensation allowed by law to the officers is inadequate." The office of third lieutenant may, withont injury to the service, be abolished; and, if an equivalent of the compensation now allowed to that officer were divided between the other officers, and some addition made to the compensation of the warrant officers, to whom important trusts are confided, the service would be essentially improved, with but little increase of expense.

The regulations adopted for carrying into more cornplete effect the laws in relation to the revenue arising from customs, will be hereafter communicated, in obedience to the directions of the 10 th section of the act in alteration of the several acts imposing duties on imports, passed 19th May, 1828. There is reason to believe that material benefit has already been derived -from them; and that the measures adopted will improve in their effect with the increased experience of the officers:

The reduction of the duty on salt, made at the last session, which will take place on the 1st of January, 1831, and 1st Jaunary, 1832, respectively, would seem to render it proper to make a corresponding reduction'in the drawback allowed on the exportation of pickled fish, which is fixed, by the act of 29th July, 1813, at 20 cents per barrel, that being at the time the duty charged on one bushel of salt. Unless the law allowing the drawback shall be previously modified, the exporter will begin to receive, after the 1st of January next, a greater amount of drawback than the duty previously paid on the salt.

It is of great importauce, as well to the revenue as to all the interests involved in the importation of foreign merchandise, that the action of the custom houses should secure, as nearly as possible, a uniform payment of duty upon the proper value of imports, as contemplated by law; but there are insuperable difficulties opposed to the accomplishment of this object, luder the present system of impost duties, to which the Secretary of the Treasury would respectfully invite the serious atteation of Congress.

The valuation on which the ad valorem duties are now laid, is ascertained from the true or current value of the goods in the market of the foreign country in which they were manufactured or produced, with the addition of certain charges, and 10 or 20 per cent., as the case may be, when imported from this or the other side of the Cape of Good Hope. The aggregate of these items on which the duties are laid is presumed to be the value of the goods when offered for sale in the United States market; but such is rarely the fact. It is not possible for the officers, even at any one custom house, to ascertain the current value in the foreign market with such precision as will render it an item of uniform ratio to that of the current value in the United States; and, whatever approach might be made to this point by one set of officers, aided by long experience and superior skill, it is not to be expected that the officers of nearly one hundred separate custom house establishments can be so well informed of the value of goods at all the places of exportation, or so equally qualified, by ability and disposition, for the performance of this difficult duty, as to secure any reasonable degree of uniformity in the imposition of the customs at all the places of importation. These difficulties, added to the general repugnance of the officers to be drawn into collision with the importers, will always render the invoice prices of merchandise the chief standard of current value in the foreign market; and corrections will only be made in cases of palpable error. This defective operation is the highest perfection which the present system ap-
pears to be capable of; but there are other important objections to it, which are worthy of great consideration. All impost duties are intended to be paid by the consumer. The present plan frequently obliges the importer to pay them, and probably as often compels the consumer to pay more than the proper charge upon his consumption. When goods are bought at high prices in the foreign market, and brought into a depressed market at home, the duty may greatly exceed the advance which the importer is able to sell for; in which event, a part or the whole of it falls on the importer; but if the goods are bought at prices below the usual current value, and brought into a market where the demand is brisk, the consumer pays not only the duty, but nearly as great a price for the goods as if the duty were laid on their true value at the place of importation. In the first case, the operation may prove ruinous to the importer; and, in the last, he receives; in his profits, a portion of what ought to accrue to the Government. By these operations, manifest injury is ofter done, either to the Government, the consumer; or the importer; the uncertainty and hazard of commercial enterprise are increased; and, whatever failures ensue; the Government will generally incur a considerable portion of the loss.

As long as the current value, or rather the invoice price of goods in the foreign market, is made the basis on which duties are laid, peculiar advantages will be given to those who have the best opportunities of purchasing or of making up invoices at rates below the current value. The purchaser who lays in his goods low, not only derives a profit directly from this circumstance, but from the difference in the amount of duty paid on them at the custom house. For instance, a difference of 10 per cent. in the cost of an article paying a duty of 50 per cent. gives an advantage of 15 per cent. to an importer who can purchase his goods at 10 per cent. lower than another. This advantage is greatly increased under the operation of the classificalion of woollen cloths. These are now necessarily imported at prices near the minimum points; and those who can manage, either by making better purchases, or by disguising the current value in the invoice, to introduce cloths under a class of duty below that to which they, belong, derive a much greater advantage than above stated. 'The cloths so transferred on the scale of duties may pay in one case 45 cents per yard, instead of $\$ 112 \frac{1}{2}$; and stich importers may monopolise the supply of an extensive part of the market for that article, to the entire exclusion of those who have'less favorable opportunities of pirchasing, or will not resort to unfair means in preparing their invoices. The necessary effect of the system is, therefore, to throw an extensive branch of the importing business into the hands of foreign merchants, who can always lay in their goods on better terms than American houses having, no connexion abroad; and into the hands of those, who, whether foreign or American, are the least scrupulous of the means of gain. Under ordinary circumstances, the advantage which the American merchant has in selling, is equivalent to that which the foreigner has in purchasing ; but he cannot also compete with a different rate of duty. Such a system, therefore, must either corrupt the American merchant, or expel him from all those branches of business in which these operations can be carried on with success. It is believed that an effectual remedy for this serious and growing evil, is to adopt the current value of all goods (subject to ad valorem duty) in the United States as the rrue dutiable value-disregarding, of course, the cost in the foreign market, and excluding all charges and additions. Such a change, though important in its consequences, will not vary the principle on which impost duties are now presumed to be laid,
and is in conformity with that which has long been practised in the most commercial nation of Europe. According to this plan, instead of resorting to vague and arbitrary rules to ascertain the value of goods in the United States, this object may be attained by direct means. Ordinary experience, skill, and attention, on the part of the proper officers, will enable them to determine, with all necessary accuracy, the current value in their own vicinity; and the mass of information which might readily be collected to correct error, if any should be made by them, could not fail to secure a just and equal appraisement. This being accomplished, the Government will receive the whole duty paid by the consumer, and no more; the price of goods will be more steady; merchants will be exposed to less hazard; and the opportunity of fair competition between the Americun and foreign merchant, so far as it can be effected by the action of the Goveriment, will be restored to that equality which a liberal policy cannot deny to foreigners, and which a wise Government will always desire to secure to its own citizens.

An additional reason for the proposed change may be found in the difference between the relative values of gold and silver, as established by different nations, and the liability to error in estimating by law the value of foreign moneys of account in those of the United States. This may be illustrated by referring to the money relations of the United States with Great Britain and with Portugal. The English pound sterling is fixed by law at $\$ 444$, United States money, while it is worth about $\$ 480$; hence, the importer of goods invoiced in sterling money pays a duty on $7 \frac{1}{2}$ per cent. less than they have actually cost. The millrea of Portugal is established by law at 124 cents: its actual value in United States money'is $111 \frac{233}{10}$ cents; consequently, the importer of goods from Portugal pays duty on about $11 \frac{1}{2}$ per cent. more than their actual cost; which makes the difference between the valuation on which duties are imposed at the custom house, on goods imported from England and Portugal, about 19 per cent. in favor of the importations from the former. These discrepancies, as well as all those which arise from the occasional introduction of paper and other currencies in foreign countries, whose proportional value to gold or silver cannot be accurately ascertained, will be ávoided by adopting the value of the goods in the United States market as the basis for charging duties. This effect of the monetary system should, of course, be taken into consideration in fixing the amount of duty in conformity with the proposed change. It cannot be doubted that a rate of duty imposed in this form somewhat lower than the present, exclusive of the allowance for the difference in the money, would not only produce more revenue, but give more stable and substantial security to the interests of manufactures and commerce.

The only objections to this change which appear to have weight, are; first, the difficulty of making so minute an appraisement as would be necessary of all the articles of importation, without a considerable increase of custom house officers; aud, secondly, of making the appraisement uniform at all the ports. The first may, it is believed, be obviated by arranging the goods into classes according to value, in such manner as to render the appraisement not more laborious than at present. These being so adjusted as not materially to vary the rate of duty between contiguous classes, and yet sufficiently distinct to enable the appraisers to assign each article, with reasonable accuracy, to its proper class, aided by an invoice of the goods at their value in the United States, to be furnished on oath by the importer,
would secure all the facilities desired for expedition and accuracy in the appraisement, with but little addition to the number of officers or the expenses of the custom-house. The second objection applies to the present system with more force than to that proposed; but this difficulty may be removed by establishing a regular intercommunication and transmission of prices current and "samples between the custom-houses, which could not fail to prevent abuses, and secure a more uniform appraisement than when the valuation is based on prices in the foreign market, inasmuch as it will be easier to ascertain the current prices at the principal marts of commerce in the United States, than in those of foreign countries.

In recommending these important modifications in the impost system, as well as those suggested in the last annual report, it may be proper to remark, that it is deemed by the department very undesirable to make frequent changes in measures of public policy which affect so extensively individual. as well as public interests, and that proceedings of this nature should be subjected to a careful scrutiny, and ample time given by way of notice to all who may be affected by them, as well foreigners as citizens of the United States, before they are carried into effect. But, notwithstanding this indisposition to change, it is proper to remark that much of the legislation upon this subject, since the actt of 2d March, 1799, has been adopted chiefly with a view to promote particular objects of special interest pressing upon the Government at the moment of its action; and hence some necessary precautions for guarding the revenue, and avoiding the injuries liable to be inflicted by the changes upon those engaged in commerce and other pursuits, seem to have been overlooked. The approaching crisis in the fiscal policy of the United States will require a revision of an important part of the system ; and the opportunity will be propitions for a general review of its defects. The proposed modifications are, therefore, now presented to the consideration of Congress, to afford time for mature deliberation, and for collecting all the information that may be necessary, if their adoption should be determined on, to reconcile individual interests with those of the Government.

All which is respectfülly submitted.

S. D. INGHAM, Secretary of the Treasury.

Treasury Department, December 15, 1830.

A STATEMENT exhibiting the duties which accrued on merchandisé, tonnage, passports, and clearances; of debentures issued on the exportalion of foreign merchandise; drawback on domestic refited sugar exported; bounty on salted fish, exported; allowances to vessels cmployed in the fisheries; and of expenses of collection, during the year ending on the 31st of December, 1829.
