## REPORT ON THE FINANCES.

DECEMBER, 1832.

In obedience to the directions of the "Act supplementary to the act to establish the Treasury Department," the Secretary of the Treasury respectfully submits the following report.

### I. OF THE PUBLIC REVENUE AND EXPENDITURES.

The receipts into the Treasury, from all sources, during the year 1830, were \$24,844,116 51

The expenditures for the same year, including payments on account of the public debt, were 24,585,281 55

The balance in the Treasury on the 1st January, 1831, was 6,014,539 75

The receipts from all sources, during the year 1831, were 28,526,820 82

Viz.

Customs 24,224,441 77

Lands (statement D) 3,210,815 48

Dividends on bank stock (E) 490,000 00

Incidental receipts (E) 152,314 04

First and second instalments under the convention with Denmark 449,249 53

Making, with the balance, an aggregate of 34,541,360 57

The expenditures for the same year were (F) 30,038,446 12

Viz.

Civil list, foreign intercourse, and miscellaneous 3,064,646 10

Military service, including fortifications, ordnance, Indian affairs, pensions, arming the militia, and internal improvements 6,943,238 73

Naval service, including the gradual improvement of the navy 3,856,183 07

Public debt 16,174,378 22

Leaving a balance in the Treasury on the 1st of January, 1832, of 4,502,914 45

The receipts into the Treasury, during the first three quarters of the present year, are estimated at - 23,918,659 51

Viz.

Customs	-	-	21,730,717 99
Lands (G)	-	-	1,610,130 18
Bank dividends (H)	-	-	490,000 00
Incidental receipts (H)	-	-	87,811 34

The receipts for the fourth quarter, including the third instalment of the Danish indemnity, are estimated at - 7,834,000 00

Making the total estimated receipts of the year - 31,752,659 51

And with the balance on the 1st of January, 1832, forming an aggregate of - 36,255,573 96

The expenditures for the first three quarters of the present year, are estimated at (I) - 23,868,691 81

Viz.

Civil list, foreign intercourse, and miscellaneous	-	3,663,955 42
Military service, including fortifications, ordnance, Indian affairs, pensions, arming the militia, and internal improvements	-	5,655,280 52
Naval service, including the gradual improvement of the navy	-	3,213,597 98
Public debt	-	11,335,857 89

The expenditures for the fourth quarter, including \$6,744,199 57 on account of the public debt, are estimated, on data furnished by the respective departments, at 10,742,774 22

Making the total estimated expenditures of the year - 34,611,466 03

And leaving in the Treasury on the 1st of January, 1833, an estimated balance, including the Danish indemnity, of \$1,644,107 93

This balance, however, includes the funds, estimated at \$1,400,000, heretofore reported by this department as not effective.

The appropriations remaining unsatisfied at the close of the year are estimated at \$6,308,421 25; but, of this amount, it is estimated by the proper departments—

1. That the sum of \$5,475,202 26 only will be required for the objects for which they were appropriated.
2. That the sum of \$652,198 27 will not be required, and may therefore be considered as an excess of appropriation, and is proposed to be applied, without being reappropriated, in aid of the service of the

year 1833, as will more fully appear when the estimates of the appropriations for that year are presented.

3. That the sum of \$181,020 72 will be carried to the surplus fund, either because the objects for which it was appropriated are completed, or because these moneys will not be required for, or can no longer be applied to, them.

## II. OF THE PUBLIC DEBT.

The disbursements on account of the public debt, during the year 1832, will amount, as has been already shown, to

	\$18,080,057 46
Of which there will have been applied to the payment of principal	\$17,302,410 82
And to interest	<u>777,646 64</u>

Of this sum, all over the annual appropriation of ten millions of dollars will have been applied, with the President's sanction, under the discretionary authority granted by the act of the 24th of April, 1830.

The stocks which will have been redeemed, by the application of this sum, during the year, are as follows:

The residue of the four and a half per cent. stock issued under the act of the 24th May, 1824, being the last of the stock issued for the purchase of Florida	\$1,739,524 01
The whole of the three per cent. stock issued under the act of the 4th of August, 1790, being the last of the funded debt of the revolution	13,296,705 76
One-half of the exchanged four and a half per cent. stock issued under the act of the 26th of May, 1824	2,227,363 97
And the whole of the exchanged five per cent. stock issued under the act of the 20th of April, 1822	56,704 77

Which two last mentioned stocks are parts of the debt arising out of the late war.

Also certain portions of the old registered debt which have been presented for payment, being part of the unfunded debt of the revolution

	237 84
--	--------

The whole of the public debt which, by the terms of the several loans, the United States have a right to redeem, up to the 1st of January next, will have been then paid off; making the entire sum of about fifty-eight millions of dollars applied to the debt since the 4th of March, 1829.

On the 1st of January next, the public debt will be reduced to (K)

	\$7,001,698 83
--	----------------

Viz.

- |  |                |
|--|----------------|
| 1. The funded debt, amounting to consisting of the five per cents issued under the act of the 3d of March, 1821, and redeemable after the 1st of January, 1835 | \$6,962,660 28 |
| and the residue of the exchanged four and a  | \$4,735,296 30 |

half per cents issued under the act of the 26th of May, 1824, and redeemable after the 31st of December, 1833. -

2,227,363 98

2. The unfunded debt, amounting to - \$39,038 55

consisting of the registered debt, being claims registered prior to the year 1798, for services and supplies during the revolutionary war -

27,602 46

Treasury notes issued during the late war -

7,116 00

and Mississippi stock. -

4,320 09

These three last sums, composing the unfunded debt, are payable on the presentation of the certificates.

After the 1st of January next, no part of the public debt, except the remaining fragments of the unfunded debt, of which only small portions are occasionally presented, will be redeemable before the following year; and though there will be in the treasury, during the year, ample means to discharge the whole debt, they can be applied only to the purchase of stock at the market price. It is now manifest that, if the bank shares had been sold, and the proceeds applied to this object, the entire debt might, in this manner, have been extinguished within the present year. But it is nevertheless pleasing to reflect that, after the present year, it may be considered as only a nominal debt; as the bank shares which have been actually paid for, within the last four years, by the redemption of the stock subscribed for them, are greater in value than the whole amount of that debt; and the debt itself ceases to be a burden, inasmuch as the dividends derived from the bank shares yield more to the treasury than will be required to pay the interest. The debt may, therefore, be considered as substantially extinguished after the 1st of January next; which is earlier than was looked for under the most prosperous and economical administration of our affairs that could have been anticipated. It will nevertheless be gratifying to the national pride, that every thing, having even the appearance of debt, should cease; and measures will therefore be adopted to invite the early presentation of the outstanding stocks, that they may be paid off as fast as the means are received, and the evidences of the public debt finally cancelled. It will be a proud day for the American people, when, to all those honorable characteristics which have rendered their career so memorable among nations, they shall add the rare happiness of being a nation without debt.

### III. OF THE ESTIMATES OF THE PUBLIC REVENUE AND EXPENDITURES FOR THE YEAR 1833.

The statement already presented shows that the receipts from customs, during the present year, will exceed the estimate submitted at the last session of Congress. It is true, that duties to a considerable amount, received in this year, will hereafter be returned under the 18th section of the act of

the last session for altering the duties on imports: but, as those duties are not to be returned until after the 3d of March next, and as, in the mean time, they will be available means in the treasury, they will be so treated, and the probable amount of them will be deducted from the estimated amount of the duties receivable in 1833.

Notwithstanding the unusually large importations in 1831, those of 1832 have also been large—being estimated, for the year ending on the 30th of September last, at \$100,652,677 in value. The exports have somewhat exceeded those during the same period in 1831—being estimated at \$87,037,943 in value; of which, \$63,074,815 were of domestic, and \$23,963,128 of foreign articles. These results are not only satisfactory in reference to their connexion with the finances, but as indicating a prosperous condition of commerce.

The duties which accrued during the first three quarters of the present year are estimated at \$24,505,000; and those for the fourth quarter at \$4,891,000. Though the proceeds of these duties will form a considerable portion of the receipts into the treasury, from customs, during the year 1833, yet it is to be observed that, as the terms of credit will be much shortened on importations subsequent to the 3d of March next, a greater portion of the duties accruing within the year will be received in that year than heretofore. At the same time, the bonds given on previous importations, at the present terms of credit, will continue to fall due as before; and the combined operation of these two causes will increase the proportion which the actual receipts, within the year, will bear to the accruing duties; relatively both to past and future years.

From data in possession of the department, it is estimated that the duties which will be returned out of the revenue of 1833, after the 3d of March next, upon merchandise deposited under the 18th section of the act of the 14th of July last, may be estimated at \$2,500,000. Though these data are necessarily in a great degree conjectural, they are sufficient for the purpose of the present estimate. It is proper to be remarked, however, that if a broader operation be given by Congress to the provisions of that section than it has received at the department, the amount will be proportionately increased.

A considerable reduction, estimated at not less than two hundred and fifty thousand dollars, from the amount receivable from customs in the present year, has also resulted from the refunding of duties heretofore collected, and perhaps an equal amount from the cancelling of bonds falling due on railroad iron, agreeably to the act of the last session. But as this has consisted, in part, of the drawback of duties taken in previous years, the amount forms no criterion for the future.

It has been shown that the actual receipts from public lands, during the present year, will fall much short of the estimate presented at the last session. The sales were necessarily affected by the extensive measures adopted in the western and northwestern country to repel the recent Indian incursions. Owing, also, to the want of the returns of surveys and plats, which the surveyors general found themselves unable to supply, lands, expected to have been sold, were not brought into market. It is expected, however, that the receipts from this source will be somewhat larger next year.

According to the best judgment the department is able to form on the subject, the receipts into the treasury from all sources, during the year 1833, may be estimated at

\$24,000,000 00

Viz.	
Customs	\$21,000,000 00
Public lands	2,500,000 00
Bank dividends, and incidental and miscellaneous receipts of all other kinds	<u>500,000 00</u>

The expenditures for the year 1833, for all objects, other than the reimbursement of the public debt, are estimated at \$17,638,577 35

Viz.	
Civil, foreign intercourse, and miscellaneous	3,045,361 70
Military service, including fortifications, ordnance, Indian affairs, pensions, arming the militia, and internal improvements	6,878,790 09
Revolutionary pensions under the act of 7th of June, 1832, including arrearages from the 4th of March, 1831, in cases in which payment has not been made	4,000,000 00
Naval service	3,377,429 38
Interest on the public debt	<u>336,996 18</u>

During the year 1833, however, the moneys which have been received into the treasury from Denmark, within the two last and present years, for the payment of the indemnities due to American citizens, under the convention, will be payable, estimated at 694,000 00

Which, added to the expenditures, will make the aggregate charge upon the treasury, for the year, exclusive of the reimbursement of the public debt 18,332,577 35

In the year 1833, the first instalment payable under the convention with France, for indemnities to American citizens, will also be received into the treasury, though it will form no part of the disposable means.

Taking an average of the importations for the last six years, as a probable criterion of the ordinary importations for some years to come, the revenue from customs, at the rates of duty payable after the 3d of March next, may be estimated at \$18,000,000 annually. The public lands, bank dividends, and other incidental receipts, may be estimated at \$3,000,000—making an aggregate revenue of about \$21,000,000 a year. In the last annual report on the state of the finances, the probable expenses for all objects, other than the public debt, were estimated at fifteen millions. This is still believed to be a fair estimate; and, if so, there will be an annual surplus of six millions of dollars.

Still firmly convinced of the truth of the reasons then presented for a reduction of the revenue to the wants of the Government, I am again urged, by a sense of duty, to suggest that a further reduction of six millions of dollars be made, to take effect after the year 1833. Whether that shall consist altogether of a diminution of the duties on imports, or partly of a relinquish-

ment of the public lands, as a source of revenue, as then suggested, it will be for the wisdom of Congress to determine.

Without advertising in unnecessary detail to the consideration in favor of lessening the existing duties, which I had the honor to present, as well in the last annual report as in that called for by special resolutions of the House of Representatives, I deem it proper to observe that, in my own mind, those considerations have lost none of their force, but have derived new weight from subsequent reflection.

The purity and simplicity of the institutions under which it has pleased Providence to make us a great and prosperous nation; the few objects, and those of a general nature, to which the powers of the Federal Government can be appropriately applied; and the great diversity of interests which, from their local and geographical position, prevail in the several States composing the Union, imperiously require that the amount of the public expenditure should be regulated by a prudent economy, and that no greater amount of revenue should be collected from the people than may be necessary for such a scale of expenditure.

The main purpose of taxation by the General Government, according to the spirit of the constitution, undoubtedly is, to pay the debts, and to provide for the common defence and general welfare of the Union, by the means confided to Congress. It is freely admitted that this power may, and ought to be, directly exerted to counteract foreign legislation, injurious to our own enterprise, and incidentally to protect our own industry, more especially those branches "necessary to preserve within ourselves the means of national defence and independence." And although the exercise of the power in either case must necessarily depend upon the cause which may call it forth, the power of taxation, imposing large and permanent burdens for the encouragement of particular classes, cannot be exercised, and by slender majorities, consistently with a proper regard to the equal rights of all; and it is not to be concealed, that a permanent system of high protecting duties directly tends to build up favored classes, ultimately prejudicial to the safety of the State.

Deeply impressed with these reflections, which are now rendered more urgent by the reduced and limited demands of the public service, I had the honor, at the last session of Congress, to recommend a reduction of the duties to the revenue standard. The force of those and similar considerations, and of that recommendation, may be supposed to have received, at that time, the sanction of Congress, and to have formed a motive of the act of the 14th of July last, notwithstanding that it was not then deemed practicable fully to adopt the recommendation of the department. By that act, however, besides the positive reduction, both in the rate and in the amount of duty, the expediency of adapting the revenue to the expenditure, and of equalizing the public burdens, was, to a great extent, acknowledged, and the oppressive system of minimums was, for the most part, abolished. By that act, also, those articles principally necessary for the maintenance and clothing of the laborers of the south and southwest, were, to a certain degree, relieved; and, both by its direct enactments, and as incident to its main scope, it encouraged an increased consumption of such articles as depended for their fabrication upon the raw materials and productions of the south. To extend and improve the demand for those productions, by substituting, as far as practicable in general use, cotton fabrics, for those made of mate-

rials from other countries, was not an unimportant object of the bill presented from this department.

In the reduction then recommended, the necessity of adapting the proposed changes to the safety of existing establishments, raised up under the auspices of past legislation, and deeply involving the interests of large portions of the Union, was distinctly recognised; and it is still deemed to be not less imperious in the further changes which may be considered expedient. Such necessity, however, arises rather from a just and prudent regard to the rights and interests of the whole community, than from any absolute pledge of the national faith, uncontrolled by circumstances. The principles of our republican institutions discountenance any system of legislation, not in the nature of compact, independent of the popular will, tending to defeat the action of the constituent upon the representative, and to exclude the operation of changes in the condition of public affairs, or in public opinion, upon the national councils. In this, as in all other instances, the causes which call for the legislative action must determine its duration; and that legislation, especially, which confers favors upon particular classes, has no other claim to permanence than its tendency to advance the interests and prosperity of the whole.

To aid American enterprise in every branch of labor, and, by seasonable encouragement, to foster and preserve within ourselves the means of national defence and independence, led to the protective system in the infancy of the Government. To counteract the policy and rivalry of foreign nations, and to prevent their prejudicial influence upon American industry; to indemnify the latter against the superior skill, and capital, and cheapness of labor in older and more experienced countries; and to succor American capital, which the events of the last war had devoted to manufacturing employments, recommended an occasional extension of that policy, which has been liberally enjoyed by the manufacturing classes since the act of the 4th of July, 1789. In the course of that time, however, the capital and resources of the country have augmented in a ratio beyond the expectations and hopes of the most sanguine. American enterprise and ingenuity are, every where, proverbially the objects of admiration, and, in many branches, maintain, without extraordinary aid, a successful competition with those of other nations. By the abundance of provisions in the United States, and the surprising increase of population; the wide spread facilities of water-power; the improvements, as well in personal skill as in machinery of all kinds, and the general advancement and diffusion of all the lights of arts and science; and the reduction of duty, both on the raw material and other articles of consumption, the cost of labor and production has not only been lessened, but in a great measure equalized: and, in this view of the subject, it is not perceived that there can now exist the same necessity for high protecting duties as that which was consulted in our past legislation. To perpetuate a system of encouragement growing out of a different state of things, would be to confer advantages upon the manufacturing, which are not enjoyed by any other branch of labor in the United States, and to convert the favor and bounty of the Government into permanent obligations of right — acquiring strength in proportion to their continuance.

It will be conceded, that, when the fair rate of profit attendant upon the sagacious employment of capital in the United States is satisfactorily ascertained, it may be wise so far to protect any important branch against the injurious effects of foreign rivalry, as may be necessary to preserve for

the same rate of profit as is enjoyed by others. If, however, by protective legislation, or otherwise, the proprietor of an actual capital shall be enabled to employ it in manufactures as advantageously and profitably as in any other branch of labor, all things considered, he could not reasonably demand more. The rate of protection which should enable manufacturing labor, conducted upon borrowed capital, to indemnify the lender, and, in addition, to realize the regular rate of profit for itself, would not merely confer undue favor upon the manufacturer, at the expense of every other employment, but bring the influence of the capitalist in direct conflict with the general mass of the people. It might even be apprehended that, by such means, there would be an accumulation of power in the hands of particular classes, strong enough to control the Government itself. If these observations are entitled to respect, little doubt is entertained that, in a tariff framed on proper principles, the reduction of six millions, now recommended, may, for the most part, be made upon those commonly denominated protected articles, without prejudice to the reasonable claims of existing establishments.

By the act of the 14th of July last, the anomaly in the tariff of the United States, by which heavy and burdensome duties were imposed upon the raw material, and especially upon the article of wool, was continued; and the necessity was thereby created, of retaining upon the manufactured article a higher degree of protection than would otherwise have been necessary. An adherence to this anomaly, instead of equalizing the burdens of the people, augments that of the consumer, by increasing the number of favored classes. Proper attention to the facility and cheapness of producing, and the amount actually produced, of the raw material in the United States, and an examination of the information collected by this department, and transmitted to the House of Representatives at their last session, will show that, in the extension of manufactures, and in the augmentation of a sure market, the producer of the raw material has long since been in a condition to dispense with a great portion of the protection heretofore afforded. By the same information, it will further appear that, by relieving the manufacturer from the burden of the high duty upon the raw material, the existing duties may be very materially reduced, and gradually removed, consistently with a just regard to the interests which have so long enjoyed the advantages of the protective system.

By these considerations, and the proud and gratifying fact that there no longer exists any public debt requiring the present amount of revenue after the ensuing year, the question is submitted to the Legislature, whether they will continue to raise from the people of the United States six millions of dollars, annually, beyond any demand for the public service, that favors, which have been so long enjoyed, and which may soon be dispensed with without detriment to the national safety or independence, may be indefinitely continued.

The undersigned is duly sensible that the decision of this question belongs properly to Congress. The duty, however, enjoined on him by the laws, to digest and prepare plans for the improvement and management of the revenue, and for the support of public credit, not less than the deep solicitude he feels for the safety of our common country, has urged him to present it, with his own reflections, for the consideration of the Legislature.

In the decision of this question, the present crisis in the United States, pregnant with the deepest interest, must have its weight; an interest arising

not so much from an apprehension of weakness in the laws, or of inability to execute them, as from a universal conviction, throughout a large portion of the Union, of the necessity of a change, and of the propriety of paying a reasonable deference to that opinion. The harmony and brotherly affection of the citizens of different parts of this great republic—if not the preservation of the Union itself—appeal to the patriot and statesman for the exercise of their highest qualities, in regulating the burdens of the people consistently with the equal rights of all, and in rendering the laws not less free and equal than the institutions under which they are enacted. The occasion invokes the spirit of liberal concession and compromise which laid the foundations of our inestimable Union; and on such an occasion, patriotism requires that no one interest should exact more than may be consistent with the welfare of the whole.

Such an appeal comes with force to all, but in an especial manner may be made to those who have so long reaped the advantages of those burdens, from which their brethren throughout the Union, after having submitted to them while the public obligations and the national defence and independence required it, now ask to be relieved.

If this appeal do not find a response in a wise and patriotic moderation, there will be no efficacy in the moral force on which the republican institutions of the Union repose.

The sleepless solicitude of the father of his country has multiplied lessons of patriotic duty, but none of greater emphasis and pertinence in the present crisis than in his admonition, that "it is indispensable, on all occasions, to unite, with a steady and firm adherence to constitutional acts of government, the fullest evidence of a disposition, as far as may be practicable, to consult the wishes of every part of the community, and to lay the foundations of the public administration in the affections of the people."

The operation of the eighteenth section of the act of the 14th of July last, according to the construction given to it at the Treasury, being, in some respects, different from that which the merchants concerned consider important to their interests, it is deemed proper to bring the subject before the attention of Congress, that if, owing to any defect in the law, or any error in the construction, the intentions of the Legislature have not been carried into effect, the necessary remedy may be applied.

By that section, the several articles enumerated in the act, whether imported before or after the passing thereof, were authorized to be put into the custom-house stores; and such as remained under the control of the proper officer of the customs on the 3d of March next, were subjected to no higher duties than if imported after that day; and the duties, or any part thereof, which may have been paid on such articles, were to be refunded to the person importing and depositing the same; and the Secretary of the Treasury was authorized to prescribe such rules and regulations as might be necessary to carry the section into effect.

In executing the section, the fullest disposition was felt to consult the interest and convenience of the merchants; but it was perceived that an unlimited construction of its terms was calculated not merely to conflict with the several members of the same section, and with other sections of the act, but to disturb the financial arrangements of the Government, and postpone the payment of the public debt.

In the last annual report from this department, as well as in that prepared by direction of the House of Representatives, and accompanying the

which formed the chief basis of the act of the 14th of July, it was stated that the existing obligations of the Government, not less than the interests of the community, forbade a reduction of the present duties earlier than the 3d of March, 1833; and by the second section of the act, this recommendation was distinctly recognised and adopted.

Without some limitation, therefore, as to the retrospective operation of the 18th section, the object of the second section would not only have been defeated, but the act itself would in fact have been rendered operative in all past time, so far as concerned any goods in the original packages, no matter when imported; and the owners, whether importers or retailers, in all parts of the country, would have had a right to deposit them in the custom-house stores, and claim a refunding of the duties.

By one of the provisions of the 18th section, the authority to refund the duties which had been paid on articles deposited, is expressly confined to the persons "importing and depositing the same;" thus treating the importer and depositor as identical: and, as it is not reasonable to suppose that the right to deposit was greater than that to claim a refunding of the duties, the words "importer or owner" in other parts of the section were treated as synonymous. The terms "importer or owner," moreover, throughout the revenue laws, refer to importation, and are intended to signify the person importing, whether the actual proprietor, the agent, or the consignee. It is obvious, also, that, by this construction, these terms not only receive their usual revenue meaning, but are reconciled with those of importer and depositor, which could not be if the conjunction were to receive a disjunctive interpretation. It was, therefore, held that goods could be deposited only by the importer.

As the act contained no appropriation for drawing money out of the Treasury for repaying the duties authorized to be refunded, the department was fully warranted in interpreting the 18th section as applying to those duties only which may have been paid to the collector after the passing of the act, and, consequently, in limiting the right of deposit to the goods on which those duties accrued. But, from a desire to give the section as liberal a construction as was consistent with all the other objects of the act, it was allowed to apply to the whole of any importation on which any part of the duties remained unpaid at the date of the law: and, to make this construction operate as equally and favorably among the importers generally as might be, it was allowed to include those goods, also, upon which the duties had been paid in cash, provided that, by the terms of credit allowed by law, such duties; or any part of them, would not have been payable until after the date of the law. It is not believed, however, that any construction of the section, which will not admit of the deposit of goods when in original packages, whether in the hands of the importer or of any other person, and no matter when imported, will be satisfactory to the owners of such goods as may be imported at a lower rate of duty after the 3d of March next. But if it be the intention of Congress so to extend the operation of the section, it is respectfully suggested that, as it will, in that case, necessarily embrace goods upon which the duties must have been accounted for and paid over to the Treasury, an appropriation be made for repaying the amount of such duties out of the Treasury.

With a view to obtain reasonable certainty in the financial operations of the Government, and at the suggestion of the collectors as to the time necessary for the duties to be performed by them, in executing the 18th

section, a regulation was adopted fixing the time to which goods might be deposited, on the 1st of January next. It is, however, the intention of the department to extend the time, if it be found that the duties of the collectors will admit of it.

The alteration in many of the rates of duty, and the repeal of the others, which have been effected by late acts of Congress, seem to require some corresponding modifications of the provisions heretofore made for ascertaining and securing the duties. But as these details might be better brought to the attention of Congress in a separate communication, if such be its pleasure, that course will be adopted.

In the exposition of the public debt presented in this report, it has been assumed that the three per cents, advertised for reimbursement on the 1st of October last, have been actually paid, because the Treasury has provided ample funds at the different loan offices for that purpose, which, upon the presentation of the certificates, should have been applied to their payment. It has recently been understood, however, that on the 18th of July last, the Bank of the United States, on the ground, as stated in the letter of instructions, "that the spread of the cholera might occasion great embarrassment and distress in the community," deemed it expedient for the bank to keep itself in an attitude to afford relief, should its interposition be necessary, and also to mitigate the pressure which the reimbursement of the three per cent. stock held by foreigners might produce in October," despatched an agent to London to make an arrangement with the house of Baring, Brothers, & Co. for the postponement of three millions, for which they were the agents of that house; and also for two millions in addition.

It had not, at that time, been decided by the Government at what period the whole of the three per cents should be paid; and the agent of the bank was authorized to make an arrangement for a postponement for six, nine, or twelve months after that period, the bank agreeing to pay the interest in the mean time.

Under this general authority the agent concluded, on the 22d of August, 1832, a contract with Messrs. Baring, Brothers, & Co. to buy up the three per cent. stocks on the best terms at which they can be obtained, both in London and Holland; the cost thereof to be placed to the debit of the bank, and the certificates of the stock so purchased to remain with Messrs. Baring, Brothers, & Co. It was also stipulated that, if the amount of stock so purchased, and of that retained by the holders, should, together, be less than five millions of dollars, Messrs. Baring, Brothers, & Co. should make up the deficiency in case the bank should find it desirable to draw for it, or any part of it—the whole advance to be reimbursed by the bank in October, 1833. Pursuant to this contract, purchases of the three per cent. stocks were actually made on account of the bank to the amount of \$1,474,827 33.

It is also understood that the bank, by a letter from the president to Messrs. Baring, Brothers, & Co., dated the 15th of October, 1832, disavowed so much of the arrangement made by its agent as related to the purchase of the stock, on the ground of that provision in the charter which declares that "the bank shall not be at liberty to purchase any public debt whatever." In lieu of the stipulation in the contract, in regard to the amount purchased, it was, in the same letter, proposed that the certificates should be transmitted without delay, that the bank might receive payment for the owners, without which it would not be in actual possession of the funds; and that,

the stock being thus reimbursed to the stockholders, the amount should be passed to their credit on the books of the bank, and they continue to receive an interest of three per cent., payable quarterly, until the 1st of October, 1833.

It is supposed to be optional with Messrs. Baring, Brothers, & Co., and with the stockholders who have stipulated for a postponement of payment, to consent to the change proposed by the letter of the president of the bank of the 15th of October, or to insist upon the performance of the original arrangement; and, should they pursue the latter course, the certificates cannot be finally surrendered before October, 1833. However this may be, and notwithstanding the bank has disavowed the authority of the agent to purchase, it is certain that a delay, for a considerable period of time, has been, and must yet be, occasioned in the surrender of the certificates of stock to a large amount; and it is not perceived that there is any sufficient justification, in the grounds of the transaction as assumed by the bank, for an arrangement, in any form, by which so large an amount of the public funds should be retained by the bank, at the risk of the Government, after it had directed their application to the payment of the public creditor.

It is apparent, however, that the apprehensions arising out of the arrangement, as it is understood to have been concluded by the agent of the bank, and of the consequences to which it might lead, more especially should the parties in Europe insist upon its fulfilment; not less than the great amount of the bank's transactions, especially in its western branches, together with other matters connected with its dealings, which have occupied the attention of one branch of the Legislature since the last annual report from this department, have tended to disturb the public confidence in the management of the institution; and these, taken in connexion with the necessary arrangements in anticipation of finally closing its business, have suggested an inquiry into the security of the bank as the depository of the public funds.

The obligation of the Government, however, incurred by the notice for the payment of the public debt in October and January at the several loan offices, rendered any change, in this respect, inexpedient—at least without such an examination into the actual condition of the bank as justice to the institution, not less than to the community at large, required. Such an examination as this department is authorized by the charter to make has been directed, and it is submitted to the wisdom of Congress to decide whether it shall be extended further.

The act of the 10th of May, 1800, which directs the annual report from the Secretary of the Treasury, would seem also to require that he should, in that communication, give information to Congress of any matters, either existing or apprehended, which seriously concern the collection of the revenue; and, in the discharge of that duty, it is his task to advert to the measures now in agitation in the State of South Carolina, altogether to prevent, at an early day, the execution of the present revenue laws within that State.

Such steps as are authorized and required by law have already been taken to continue the due collection of the revenue; but, if the extraordinary measures which have been commenced by those exercising the authority of that State should be carried out to the extent which, unhappily, there seems too much reason to apprehend, it is clear that all the aids which the existing laws afford will be inadequate to that object. Until, however, those measures shall be further matured, and more distinctly and officially known to

the Executive, it is deemed proper to abstain from more specific reference to the subject in this report: though its great importance, and the deep solicitude which it has excited, have already directed the attention of the department to the remedies which that contingency may require.

The notice of Congress is respectfully invited to the accompanying report from the Commissioner of the General Land Office, showing the transactions in that branch of the public service during the present year; and exhibiting both its present condition, and the means deemed necessary by that officer for its proper and successful administration.

All which is respectfully submitted.

LOUIS McLANE;  
*Secretary of the Treasury.*

TREASURY DEPARTMENT,  
*December 5, 1832.*

A.

A STATEMENT exhibiting the duties which accrued on merchandise, tonnage, and light-money; passports and clearances; of debentures issued on the exportation of foreign merchandise; drawback on domestic refined sugar, and domestic distilled spirits exported; bounty on salted fish exported; allowances to vessels employed in the fisheries; and of expenses of collection during the year ending on the 31st of December, 1831.

## REPORT FROM THE GENERAL LAND OFFICE.

GENERAL LAND OFFICE,  
*December 3, 1832.*

SIR: In presenting, for your examination and the consideration of the Government, a review of the operations of this office for the last year, I have to state that the sales of the public lands have not been equal to those of the preceding annual period. This deficiency was not anticipated, and has resulted from causes over which the officers charged with this branch of the public service, with the most active vigilance and industry, could have no control. The inadequacy of the means afforded to the surveyors general, to supply the returns of surveys, and the township plats, in every surveying district of the United States, with the exception of that of Alabama, together with the Indian war on the northern frontier of Illinois and the western part of the Territory of Michigan, and the general prevalence of the Asiatic cholera in those places to which emigration tended, and from which it usually emanates, has not only interrupted the land sales entirely, in some districts, for a portion of the year, but has materially retarded those in others. These unexpected impediments could not have been foreseen at the date of my last report, nor prevented by any efforts within the competency of any officers charged with the superintendence of the sales of the public domain.

The annexed statement (marked A) exhibits the periods to which the monthly accounts of the registers and receivers have been rendered, with the admitted balances of cash in the hands of the several receivers at the date of their last monthly accounts, and the periods to which their last quarterly accounts have been rendered.

The accompanying statement (marked B) shows the quantity of lands sold; the amount of purchase money, designating such portion as has been received for sales made prior to July 1, 1820; the amount received in cash, in forfeited land stock, in military land scrip; the aggregate amount of receipts, and the amount paid into the United States treasury, in each State and Territory, during the year 1831, and the half year and third quarter of 1832.

The embarrassments and impediments which have prevented the several surveying departments from performing all the duties required by law, and which were stated in my last annual communication, still continue, to the great injury of the public service, and to many individuals interested in the prompt discharge of official duty. Until some further provision shall be made by law, to enable the surveyors general to prepare and make returns of the surveys in their respective districts, and the township plats, to the proper registers of land offices, and to this office, these evils will accumulate with increased injury to all concerned. Surveys of nearly four hundred townships have been made, the township plats of which have not been returned to this office, and a greater number not furnished the land offices. I would, therefore, again recommend that such additional provisions be made by Congress for the surveyors' offices as may be sufficient to admit a prompt discharge of public duty. It should also be remarked that, by the provisions of

the act of the 5th of April last, permitting entries, in certain cases, of quarter quarter sections, the office duty of the respective surveyors has been greatly increased. The continued illness of the surveyor general of Florida, and the sickness of the clerks in his office, have prevented, almost entirely, any surveys in that Territory during the past year.

In connexion with the subject of the public surveys, I would recommend that some provision be made for the survey of the public domain, and the resurvey thereof, where gross errors have been committed; for the survey of the principal meridian and base lines, and for private land claims, in all cases where the compensation allowed by law therefor is insufficient to meet the expenses of the same. This office has already been advised that many such cases now exist, and, in consequence thereof, the surveys of the same have been suspended. It is also respectfully submitted to the wisdom of Congress, to require the several surveyor's offices, and the records and documents belonging thereto, to be kept in fire-proof buildings; of the necessity of which, and of the importance of carefully preserving the records of the public surveys, and the papers and documents connected therewith, no reasonable doubt can exist. They form the basis of all the subsequent operations of this office, and of the respective land offices, not only as to the sales and disposition of the public lands, but also of private land claims.

In September last, a circular letter was addressed to the several surveyors general, requesting them to report to this office the amount of arrears in their respective offices, and an estimate of the amount of labor and expense, to bring the same up to the period of current duties; a reply to which has not been transmitted by all, but, so soon as received, will be made the subject of a future report.

The act of the last session of Congress, providing for the issuing of scrip to the officers and soldiers of the Virginia continental and State lines and navy, of the revolutionary war, to the amount of three hundred thousand acres, has been executed as promptly as the means of this office would admit, and to the neglect of other duties. Warrants covering about forty thousand acres only remain to be satisfied, and these await the production of the necessary title-papers, proofs of heirship, and other documentary evidence, from the parties interested. In the two preceding reports, which I have had the honor of presenting to the Treasury Department, I have faithfully stated the arrears of this office, and the physical impossibility of discharging all the duties required of it by law, without additional assistance, provided for by the legislative power. The appropriations of the last session of Congress, for extra clerk hire, have been of great service and benefit, but have only enabled me to perform the current duties. The arrears yet remain, and have increased, with the increased labor thrown upon the office by the numerous acts of the last session. To what crisis it may approach, without the necessary aid for the discharge of public duty, it is not difficult to conjecture. More than three millions of people are interested in the most prompt attention, the vigilant action, and the accurate operations, of this office. It is in the will of Congress, whether so large a portion of the United States shall be deprived of that justice which, by law, they are entitled to.

All which is respectfully submitted.

ELIJAH HAYWARD,

Hon. LOUIS McLANE,

Secretary of the Treasury.

A.
