REPORT ON THE FINANCES.

JUNE, 1841.

In obedience to the directions of the act of Congress of the 10th of May, 1800, supplementary to the "Act to establish the Treasury Department," the Secretary of the Treasury respectfully submits the following report:

I. OF THE PUBLIC REVENUE AND EXPENDITURES.

The receipts and expenditures for the year 1840 were as follows:

The available balance in the Treasury, on the 1st of January, 1840, (exclusive of amount deposited with the States, trust funds and indemnities, and the amount due from banks which failed in 1837,) was, as appears by the books of the Register of the Treasury, $3,663,083 60.

The receipts into the Treasury during the year 1840 were, from—

</table>

Making $27,863,475 41
Leaving a balance in the Treasury on the 1st of January, 1841, of $987,345.03.

The receipts from the 1st of January to the 4th of March, 1841, were, (say)—

- From Customs: $1,974,836.46
- Lands: 386,148.56
- Miscellaneous and incidental sources: 31,349.65
- Banks which failed in 1837: 18,000.00
- Treasury notes issued per act of the 31st of March, 1840: 1,110,611.08
- Treasury notes issued under act of 15th of February, 1841: 673,681.32
- Bond of Bank of the United States: 17,913.00

Making, with the balance in the Treasury, Jan. 1, 1841: $5,199,885.10

The expenditures for the same period were—

- Civil list, miscellaneous, and foreign intercourse: $943,517.14
- Military department: 2,273,097.11
- Naval department: 759,349.60
- Public debt: 3,612.70
- Treasury notes redeemed—including interest: $647,590.09

Making in the aggregate: $4,627,166.64

Leaving the balance in the Treasury on 4th March, 1841: $572,718.46

The balances of appropriations outstanding on the 4th of March, 1841, were, (Statement A)—

- Civil, foreign intercourse, and miscellaneous: $5,237,234.28
- Military: 15,991,895.15
- Naval: 6,910,268.69
- Public debt: 6,387.30
- Treasury notes issued prior to the 1st of January, 1841, and outstanding on the 4th of March, 1841: 3,878,220.00
- Treasury notes issued under the act of 1840, from the 1st January to the 4th March, 1841, which may, and most of which probably will be presented in payment of public dues during the year 1841: 1,110,611.08
- Interest estimated at about: 300,000.00

Making in the aggregate: $33,429,616.50

Of this there will be required for the services of the current year: $24,210,000.00

*This item and the item of expenditure for the payment of Treasury notes, from 1st of January to 4th of March, 1841, include about $500,000 of Treasury notes which were received at the Department on account of customs, during that period, but for which the warrants were not issued until a subsequent period.
1841.]

SECRETARY OF THE TREASURY.

Additional appropriations required by the War Department for the year 1841, viz:

</tbody>
</table>

Making an aggregate of debt and deficit to be provided for in this and the ensuing year, of $12,088,215.18

This estimate is founded on the assumption that all the moneys in the public depositories can be at once made available; and that any and all of the demands upon the Treasury can be satisfied, so long as money to a sufficient amount remains in any or all the depositories. But that is by no means the case. While the power to
issue Treasury notes exists, there should be at all times, for the convenience of the Treasury, a sum equal to $1,000,000 in the various depositories subject to draft. When that power is expended, the sum should be increased to not less than $4,000,000 00

Which sum, added to the above, makes the estimated deficit $16,088,215 18

But the undersigned feels it his duty to call the attention of Congress to the more immediate demands of the public service and the means by which those demands are to be supplied.

The sums which will be required from the 1st of June to the 31st of August next, are estimated as follows, viz:

For the payment of Treasury notes which will fall due within that time, and the interest thereon, about $2,756,900 00.
Balance for taking the 6th census 294,000 00.
For the civil list, miscellaneous, and foreign intercourse 1,309,308 37.
Military service 4,591,098 00.
Naval service 1,844,000 00.
Public debt 6,387 00.
Expenses of the extra session of Congress 350,000 00.

Making about $11,151,693 37.

The ways and means in the power of the Treasury, and which will probably accrue under existing laws, are as follows:
1. Funds in the Treasury, (as per Statement C.) $644,361 16.
2. Treasury notes authorized by the act of 15th of February, 1841 1,505,943 91.
3. Estimated receipts from the customs 3,000,000 00.
Estimated receipts from the lands 700,000 00.
Estimated receipts from the miscellaneous sources 50,000 00.
Making 5,900,305 07.

And leaving a deficit of $5,251,388 30.
To which add the sum recommended to be kept in the Treasury to meet any emergencies of the public service, viz: 4,000,000 00.

Making an aggregate of $9,251,388 30.

In another part of this paper the views of the Department as to the mode of providing for the above deficit, together with the residue of the existing public debt, will be presented.

From the year 1816 to 1837, a period of twenty-one years, the revenues constantly exceeded the expenditures. The average annual surplus during that time
was $11,464,226 87, (*see Tables 1 and 2,) making an aggregate excess of $240,748,764 27. Within that time there was applied to the extinction of the national debt $208,792127 44, and there was, under the provisions of the act of the 23d of June, 1836, deposited with the States, $28,101,644 91, and there remained on the 1st of January, 1837, in the Treasury of the United States, including the fourth instalment due to the States, a surplus of $17,109,473 26.

There were, also, outstanding debts due and falling due to the Treasury, arising from other sources than those of the ordinary revenue, and which were paid between the 1st of January, 1837, and 4th of March, 1841, the amount of (see Statement D) 9,124,747 00.

There were, also, issued within that period, and outstanding on the 4th of March, 1841, Treasury notes, to the amount of 5,648,512 40.

Making the aggregate available means which were in the Treasury on the 1st of January, 1837, and which came into it prior to the 4th of March, 1841, over and above the current revenues 31,882,732 66.

From which, deduct the amount (less the trust funds) remaining in the Treasury on the 4th of March, 1841. 572,718 46.

And there appears an excess of expenditure over the current revenue of $31,310,014 20.

[It is proper to remark, that the entries on the books of the Register of the Treasury do not always show the true dates of the receipts and expenditures. An item involved in the above statement (Table D) will serve to illustrate this fact. The sum of $512,136 47, was on the 2d and 31st October, 1840, paid by the Bank of the United States on its last bond to William Armstrong, superintendent at Fort Gibson, by order of the Secretary of War. Though this sum was in fact received and expended on those days, it did not find its way into the office of the Register until the 4th of March, 1841, on which day it appears on his books both as a receipt and an expenditure.]

Thus, and to this extent, within the last four years, were the expenditures pushed beyond the amount of the revenue. They were made to absorb the surplus in the Treasury, and the outstanding debts due to the United States, so that the Treasury was, on the 4th of March, 1841, exhausted of its means, and subject to heavy and immediate liabilities. It was already burdened with a debt incurred in time of peace, and without any adequate resources except the authority granted by law to augment that debt.

As yet no provision has been made to relieve this debt or to check its constant and rapid increase. We find it, therefore, as far as past legis-

*There was, also, a large balance in the Treasury on the 1st of January, 1837, not taken into view in these tables.*
lation and financial arrangements characterize it, a permanent and increasing national debt. The temporary expedients by which it has been sustained do not at all vary its essential character.

The attention of Congress is respectfully invited to the necessity of early and effectual measures to prevent its further augmentation. The obvious remedy is, to increase the revenue as far as may be without unreasonably burdening commerce, and to reduce the expenditures within the limits of strict economy.

But as it may not comport with the views of Congress to go into a revision and adjustment of the customs so long before the act of March 2, 1833, comes to have its final and permanent operation, the undersigned would respectfully recommend, as a temporary measure, the levy of a duty of 20 per cent. ad valorem on all articles which are now free of duty, or which pay a less duty than 20 per cent., except gold and silver, and the articles specifically enumerated in the 5th section of the act of March 2d, 1833.

If this measure be adopted, it is estimated that there will be received into the Treasury from customs, in the last quarter of the present year, about $5,300,000; in all of the year 1842, about $22,500,000; and in the year 1843, after the final reduction under the act of March 2d, 1833, about $20,500,000. The details of this estimate will be found in the accompanying paper, marked E, and enclosures.

It is believed that, after the heavy expenditures required for the public service in the present year shall have been provided for, the revenues which will accrue from that, or a nearly proximate rate of duty, will be sufficient to defray the expenses of Government, and leave a surplus to be annually applied to the gradual payment of the national debt, leaving the proceeds of the public lands to be disposed of as Congress shall think fit.

The general principles on which the final revision of the tariff is to rest are, perhaps, simple and easy to be apprehended; but the work of revision itself, in its adaptation and detail, must be a work of time. It should be done on calm reflection and careful deliberation, with a view to reconcile, as far as possible, the conflicting opinions, and to promote all the various interests, of the whole people of these United States. And it may be important in that adjustment not only to reciprocate, on fair and equal principles, and in a liberal spirit, the concessions which may be accorded to our commerce by foreign nations, but also to do justice to our own citizens by meeting in a like equal spirit any heavy exactions or prohibitions which foreign nations may think fit to impose upon the importation of our staple productions.

Some legal provisions are also required to correct inequalities between the duties upon sugar and molasses and the drawbacks upon refined sugar and rum manufactured or distilled from foreign materials. The relation between the duty and the drawback was adjusted by the acts of January 21st, 1829, and May 29th, 1830, since which time the duties have been diminished, while the drawbacks remain the same. And a provision of law declaring, that all non-enumerated articles which bear a similitude to any enumerated article chargeable with duty, shall pay the same rate of duty with the article which it most resembles, would
save a large sum annually to the revenue, and prevent much annoyance and litigation between the importer and the officers charged with the collection of the customs.

II. OF THE PUBLIC DEBT.

But it is not expected that any modification of the revenue laws will be operative to supply the immediate wants of the Treasury, and to pay the debts which fall due in the present and in the ensuing year. A further loan is necessary to effect these objects; and the only questions that can arise are, as to the mode of procuring the loan, the character of the securities, and the assumed duration of the debt.

It would, in the opinion of the undersigned, be unwise to charge upon the commerce or the resources of the country, in any form, the burden of paying at once, or at all hastily, the national debt. Before that is done, measures of restoration and relief are required. The currency of the country should be restored, and commerce and industry relieved from their present state of embarrassment and depression, and a benign and liberal policy on the part of the General Government should call forth once more the hardy industry and active enterprise of our people, and the vast resources of our country.

If we assume the period of from five to eight years as that in which this debt can be paid without inconvenience and embarrassment, (and the time appears to be short enough,) we have one of the most essential elements on which to form our judgment as to the best and most convenient mode in which the loan can be kept up, and the credit of the Government sustained.

In the inception and during the progressive increase of a national debt, the issues of Treasury notes, though dangerous and delusive, have yet their advantages. They need not be issued faster than the actual wants of the Treasury require, and the power to issue any given sum is, for all effective purposes of immediate expenditure, a fund in the Treasury available to that amount. But when the debt has acquired its maximum, and ceases to accumulate, or when it becomes larger than the amount necessary to be kept on hand to meet the current wants of the Treasury, these advantages disappear. This mode of loan then becomes to the Government what the sale in market of new promissory notes for the purpose of raising money to take up old promissory notes is to an individual. It is the issue of Treasury notes year after year in succession, and under those circumstances it is inconvenient and expensive.

But the raising of money by the issue of Treasury notes is objectionable, because it is deceptive. By this means a heavy debt may be raised and fastened permanently upon the country, the amount of new issues being involved with the payment of the old, while the people, and even those who administer the finances, may not be impressed with the important fact that a national debt is created or in the process of creation.

Therefore, in the opinion of the undersigned, when a national debt does exist, and must continue for a time, it is better that it should be
made a **funded debt** according to our ancient financial usage. It is then sheltered by no cover, and is the subject of no delusion. It is open, palpable, true. The eyes of the country will be upon it, and will be able at a glance to mark its reduction or its increase; and it is believed that a loan for the requisite amount, having eight years to run, but redeemable at the will of the Government on six months’ notice, could be negotiated at a much less rate of interest than Treasury notes. Much expense would also be saved in dispensing with the machinery of the issue and payment and cancelling of Treasury notes.

It is therefore respectfully recommended, that a sum sufficient to pay the debt at present existing, and such as will necessarily accrue in this and the ensuing year, be raised on loan for the time, and on the condition above suggested.

III. ON KEEPING AND DISBURSING THE PUBLIC MONEYS.

The undersigned would also respectfully invite the attention of Congress to the present mode of keeping and disbursing the public moneys, and also to the subject of the creation or employment of a fiscal agent, to be charged with the performance of these and other duties. The subject is one of great importance both to the Government and to the community. Such agent or depository ought to unite, in the highest practicable degree the safety of the public funds, and convenience and economy in their administration; and it should, if possible, be so selected or framed as to exert a salutary influence over the business and currency of the country.

The mode of keeping and disbursing the public money, provided by the act of July 4, 1840, will be found, on comparison with that heretofore chiefly used by the Government, eminently deficient in all these essential requisites. The financial history of the United States, especially for the last twelve years, furnishes abundant proof that the public money is unsafe in the custody of individuals, and that their official bonds are no sufficient security for its safe keeping and faithful application. Within the period above named, many receiving officers connected with the Treasury Department have become defaulters to the Government. The aggregate loss from that cause within that period, as shown by the books of the Department, amounts to about $2,620,500, but a small part of which will probably be recovered from their bonds. It is true that, in any system which can be adopted, some part of the public money must in the process of collection pass through the hands of individuals, and be subject to their defalcations; but the act of July 4th, 1840, extends and continues the risk beyond the period of collection, and it subjects large masses, which in the fluctuations of commerce sometimes accumulate, to the same dangerous custody.

Not only is the public money in the hands of individuals more exposed to loss from ordinary defalcations than when deposited in a well-regulated bank, but the Government is also liable to the risks of fire, robbery, and other casualties occurring either in deposite or transmission, from which it is entirely protected when a well-regulated bank is the depository and the fiscal agent.
The present system is, also, in many respects, cumbersome and inconvenient. Its tendency is to centre the disbursements of the public moneys at some of the eastern cities, chiefly at New York. That being the great commercial emporium of the United States, is the point at which funds are the most valuable, and therefore the most sought; hence those who are entitled to payments out of the public Treasury claim them there. It is true there is a general discretion in the head of the Department to refuse or grant the favor of such payments according to its convenience; but when the currency is deranged, and the premium on exchanges is high, this discretion involves discrimination to a large amount among creditors equally entitled. It then becomes a dangerous discretion, and one that ought not to exist. But under the present system it cannot be avoided, save in a few cases, without discharging every public liability at the most favored point. This would at once centre all the disbursements at a few of the eastern cities, and involve the Treasury in the risk and expense of transporting the public funds from the various points of collection to the places of disbursement.

An item of less importance, but still worthy of consideration, in settling on a permanent and economical arrangement, is the direct expense of the present system, including the cost of the buildings for the deposit of the public money, and the salaries of the officers and their clerks who receive and disburse it. No portion of this risk, inconvenience, or expense, need to be incurred where a well-regulated bank is made the fiscal agent.

But the present system is also, in the opinion of the undersigned, injurious to the business and currency of the country. Instead of permitting the credit and the finances of the Government to lend their indirect but efficient aid in sustaining the credit and regulating the currency, it brings into direct hostility those important interests. In the progress of the system, a sufficient amount of gold and silver to supply the wants of the Treasury must be withdrawn from circulation and locked up in vaults, leaving no representative to supply its place in the general circulation. A large amount also in the hands of those who pay to, or receive from, the Treasury, is equally withdrawn from general circulation, and made to flow through those channels alone which lead into and out of the public coffers. All other avenues of commerce and intercourse are thus deprived of their proportion of the precious metals.

Within the fifty-two years during which our constitutional Government has existed, we have had for two periods of twenty years each a bank chartered by Congress, as a depository of the public moneys, and as a fiscal agent. We have had also, at two intervals, amounting to about nine years, State banks employed for like purposes; and during the remainder of the time, the funds of the Government have been kept and the finances administered partly by banks and partly by individual officers and agents. The losses sustained by State banks as depositories during the first period of their employment, extending from 1811 to 1816, agreeably to a statement prepared by the Secretary of the Treasury in 1833, and revised and republished in 1837, were $1,000,676. In the latter period, from 1833 to 1837, though no actual loss is believed to
have occurred, yet the Treasury and the country suffered inconvenience and embarrassment from the fiscal arrangements with those numerous and disconnected institutions. But during the forty years that the two banks of the United States were the depositories of the public money and the fiscal agents of the Government, no loss whatever was sustained, nor any delay or any expense incurred in transmitting or disbursing the public moneys, so far as the agency of those institutions extended. Then, as regards the wants of the Treasury merely, the safety of the public funds, and economy in their administration, experience has demonstrated the superior utility of a bank, constituted and adapted by Congress as a fiscal agent. It has also proved to us that the active business of the country, its currency, its credit, its industry, and its commerce, are intimately connected with and dependent upon the financial arrangements of the General Government. If they be wise and beneficial, they indirectly but efficiently promote those great interests of the people; if constant and uniform in their action, they give to those interests confidence and stability.

Since the removal of the public deposits from the Bank of the United States in 1833, the Government has had no permanent fiscal agent and no definite financial system. All has been experiment, transfer, and change. The business of the country has yielded to the unsteady impulse, and moved forward with wild irregularity; at one time, stimulated to excessive action, at another, sunk into lethargy. And in providing for the wants of the Treasury, it is surely important to look also to the wants and the welfare of the community, from the products of whose industry the Treasury is supplied.

And as regards those great interests, we find the testimony of past years is no less distinct and strong in favor of a moneyed institution, chartered by the General Government, and possessed of its confidence and credit. The period embracing the last ten years of the existence of the late Bank of the United States as the fiscal agent, is fresh in the memory of us all, and is looked back to as a period of great public prosperity; and though other causes did doubtless coöperate to produce that favorable condition of things, yet one of the governing principles on which depended the steady advance of the country in commerce, in industry, and in substantial wealth, was the existence of a fiscal agent, established by the General Government, and charged with the equalization of exchanges and the regulation of the currency.

In the present condition of our country, the relief to be anticipated from such an institution cannot be immediate, but must be the work of time. The business of the country would, however, in the opinion of the undersigned, steadily and certainly revive under its influence.

In whatever point of light the undersigned is able to view this subject, he is irresistibly led to the conclusion that such fiscal agent, so framed as to possess those important functions, is alike essential to the wants of the Treasury and of the community. Such an institution should be framed with deliberation, for it must have high duties to perform, and extensive interests to protect and promote; and it should be granted with care, for it will be liable to great and dangerous abuses. As the fiscal agent of the Government, and effective regulator of the currency in a
wide-spread community, it should be steady and uniform in its action, and fixed and stable in its character.

The undersigned has no doubt of the power of Congress to create such an institution. Experience has proved its necessity to carry out other expressly-granted powers; it has been exercised and recognized by the legislative and executive departments of the Government during four-fifths of the whole period of our national existence; and it has received the uniform sanction of our highest judicial tribunal.

Yet that power has been questioned by many wise and patriotic statesmen whose opinions are entitled to consideration and respect; and in a measure, like this, of high political import, which, if wisely conceived and cordially concurred in, must have a great and enduring influence on the prosperity of the country, it is important, as far as possible, to obviate objections and reconcile opinion.

If such an institution can be so conceived in principle, and guarded in its details, as to remove all scruples touching the question of constitutional power, and thus avoid the objections which have been urged against those heretofore created by Congress, it will, in the opinion of the undersigned, produce the happiest results, and confer lasting and important benefits on the country.

The undersigned therefore respectfully recommends the creation of such fiscal agent, and the repeal of the act of July 4th, 1840, providing "for the collection, safe keeping, transfer, and disbursement of the public revenue," except the penal provisions thereof, which will, probably, require revision and modification.

All which is respectfully submitted.

T. EWING,
Secretary of the Treasury.

</table>
Estimate of the amount which will be received from Customs in the last quarter of the year 1841, and in each of the two succeeding years, under the proposed modification of the revenue laws.

The average value of the imports for the last six years, in round numbers, is $144,000,000 00

The average value of exports for the same period, allowing 15 per cent. advance for expenses and profits on transportation, has been $137,000,000 00

The average annual value of the imports for a series of years to come is, upon these data, estimated at $140,000,000 00

The articles proposed to be admitted free of duty are estimated at $14,300,000 00

Which makes the average estimated amount of dutiable articles $125,700,000 00

Which at 20 per cent. would yield an annual gross revenue of $25,140,000 00

Estimated deduction for drawback $3,000,000 00

Estimated deduction for collection 1,250,000 00

4,250,000 00

Net revenue at 20 per cent. $20,890,000 00

The imports for the last quarter of 1841, owing to the depression of business, are estimated to fall below the general average for the last six years. But a considerable addition to the revenue for that quarter will be received from articles paying a higher duty than 20 per cent. The net revenue is estimated at $5,300,000 00

For the year 1842, during which the same causes are expected to operate to some extent, the net revenue is estimated at $22,500,000 00

T. L. Smith, Register.
REPORT ON THE FINANCES.

DECEMBER, 1841.

TREASURY DEPARTMENT, December 20, 1841.

SIR: In obedience to the directions of the act of Congress of the 10th of May, 1800, entitled "An act supplementary to the act entitled 'An act to establish the Treasury Department,'" the Secretary of the Treasury respectfully submits the following report:

I. OF THE PUBLIC REVENUE AND EXPENDITURE.

The balance in the Treasury on the 1st of January, 1841, (exclusive of the amount deposited with the States, trust funds, and indemnities, and the amount due from banks which failed in 1837,) was, as stated in the report of the Secretary of the Treasury submitted to Congress on the 3d day of June last. $987,345 03

The receipts into the Treasury during the three first quarters of the present year amount to $23,467,072 52

Viz:

From customs. $10,847,557 44
From lands 1,104,063 06
From miscellaneous and incidental sources. 90,691 69
From bond of Bank of United States 662,049 47
From banks which failed in 1837 51,127 30
From Treasury notes, per act of 31st March, 1840 1,524,703 80
From Treasury notes, per act of 15th February, 1841 5,956,932 90
From loan, per act of 21st July, 1841 3,229,946 86

The receipts for the fourth quarter, it is estimated, will amount to $6,943,095 25
Viz:

From customs $4,000,000 00
From lands 350,000 00
From miscellaneous and incidental sources 30,000 00
From bond of Bank of United States 10,315 23
From Treasury notes 250,000 02
From loan—
Received $2,202,780 02
Estimate for balance qr. 100,000 00

__________ 2,302,780 02
Making the total estimated receipts for the year $30,410,167 77

And, with the balance in the Treasury on the 1st of January last, an aggregate of 31,397,512 80
The expenditures for the three first quarters of the present year have amounted to $24,734,346 97

Viz:
Civil list, foreign intercourse, and miscellaneous $4,615,363 81
Military service 10,834,104 45
Naval service 4,229,986 94
Treasury notes redeemed, including interest 5,027,811 13
Public debt 27,050 64

The expenditures for the fourth quarter are estimated, on data furnished by the respective Departments, at 7,290,723 73

Viz:
Civil, miscellaneous and foreign intercourse $1,581,205 44
Military service 3,169,773 54
Naval service 1,966,560 80
Interest on loan 70,000 00
Principal and interest on Treasury notes 503,183 95

Making 32,025,070 70

And leaving a deficit to be provided for on the 1st January, 1842 $627,557 90

It being essential that this deficit, arising from the failure in effecting more than a portion of the loan authorized by Congress at its last session, should be provided for by means that might be at once available, it is recommended that an immediate issue of Treasury notes be authorized, to meet the emergency.
II. OF THE ESTIMATES OF THE PUBLIC REVENUE AND EXPENDITURES FOR
THE YEAR 1842.

The receipts for the year 1842 are estimated as follows:

From customs .......................................... $19,000,000 00
(Arising from duties accruing in 1841, and payable in
1842 .......................................................... $3,400,000
From duties accruing and payable in 1842.15,600,000)
Treasury notes ............................................. 50,000 00
Miscellaneous sources .................................... 150,000 00

19,200,000 00

From which deduct the estimated deficiency on the 1st
of January, 1842 ........................................ 627,559 90

Leaving this amount applicable to the service of the year
1842 ........................................................ 18,572,440 10

The expenditures for the year '42, including $7,000,000
for the redemption of Treasury notes, are estimated at
32,791,010 78

Leaving to be provided for this amount ..................... 14,218,570 68

The receipts from the customs for the year 1842 depending for their
amount upon the action of Congress, at its present session, in the adjust­
ment of the tariff, it is not practicable to form estimates of the revenue
which may be derived from that source with much precision. Those
now submitted have in view the present rates of duty, and their final
reduction to 20 per cent, ad valorem after the 30th of June next. The
scale of duties thus established has been necessarily assumed as the
basis of calculation for the remainder of the year 1842, estimated with
reference to the anticipated importations of that year, compared with
the average importations of former years.

In the estimated receipts, the amount which will come into the
Treasury from the sales of the public lands in 1842 has been excluded,
as the act of Congress of the 4th of Sepember last directs its distribu­
tion among the several States and Territories.

With regard to receipts from the loan already authorized by law, it is
to be remarked that, owing to the short period which is to elapse before
it becomes redeemable, together with the unsettled state of the money
market, it would not be safe to expect that any considerable portion will
be obtained, for the service of the year 1842, before the expiration of the
time limited for effecting it.

The law authorizing the issue of Treasury notes also expiring early
in 1842, not more than $50,000, it is supposed, can be made available
from that source.

In estimating the expenditures of the year 1842, it is assumed that no
other appropriations will be made than those now submitted in the esti­
mates from the several Departments; and that the balance of those
appropriations unexpended at the end of the year 1842 will be equal to
that at the close of the present year.
It is proper further to remark that estimates of expenditures can only be made for such as may be required under existing laws, and arise in the ordinary operations of the Government. The power of appropriation, as well as the power of raising revenue, being at all times in the hands of Congress, this Department cannot find estimates upon its own sense of what the public interest may be thought to require, especially at a time when the condition of the country may be supposed to call for more than ordinary means of defence and security.

The amount required for surveys of the public lands, and the compensation of the officers employed in that branch of the public service, being payable out of the proceeds of the sales of those lands, is not included in this estimate of expenditures.

To meet the deficiency in the year 1842, amounting to $14,218,570.68, it is respectfully recommended to Congress to authorize:

1. An extension of the term within which the residue, not yet taken, of the loan already authorized shall be redeemable, amounting to, say $6,500,000.

2. The reissue of the Treasury notes heretofore authorized by law, amounting to $5,000,000.

3. The balance still required, of $2,718,570.68, together with an additional sum of $2,000,000, (a surplus deemed necessary in the Treasury, to meet emergencies of the public service,) to be supplied from imposts upon such foreign articles imported as may be selected, with due regard to a rigid restriction in amount to the actual wants of the Government, and a proper economy in its administration.

III. READJUSTMENT OF THE TARIFF:

The last reduction of duties on imports provided for by the act of the 2d March, 1833, will take effect immediately after the 30th of June next. From that day no duty will exist on any imported article exceeding twenty per cent. ad valorem; and certain other legal provisions of the same act, of great importance, are to come into operation at the same time:

One of them is the enactment which, after that period, requires all duties to be paid in ready money; thus putting an end to a system of credits which has prevailed from the first establishment of this Government—a system which, however necessary or convenient in the infancy of our commerce, when the mercantile capital of the country was considerable, and a strong desire was felt to foster and encourage foreign trade by all practicable means, may at the present day well yield to the important objects to be secured by cash payments.

Another, deemed at the same time an essential provision of the act, is that which declares that, after June, 1842, all duties on imported articles shall be assessed upon the value of such articles at the port where the same shall be entered, under such regulations as shall be prescribed by law. Hitherto, throughout the whole history of the Government, the cost or value in the foreign market has been assumed as the basis for the calculation of ad valorem duties, and to this cost or value certain additions have been made, supposed to be equivalent to the charges of importation. But undervaluations abroad, frauds real or supposed in
invpices, and the unjust advantages which were believed to exist in the hands of foreign manufacturers, who had become, in fact, themselves the importers into the country of a large proportion of the manufactured goods from Europe, led Congress to look to a home valuation for security as well to the American importing merchants as to the revenue, and to the producers of similar articles in the United States.

The legal effect of the act of 1833 would seem to be, to abolish the practice, after June 30th, of assessing duties upon invoices or foreign valuation; and therefore, if Congress shall not at this session prescribe regulations for assessing duties upon a valuation to be made at the port of entry, or pass some law modifying the act of 1833, it may well be questioned whether any ad valorem duties can be collected after the 30th of June. The language of the law seems explicit. It is, that, “from and after the day last aforesaid, (June 30th, 1842,) the duties required to be paid by law on goods, wares, and merchandise, shall be assessed upon the value thereof at the port where the same shall be entered, under such regulations as shall be prescribed by law.” And it is further declared, that so much of any other act as is inconsistent with that act shall be and is repealed.

The assessment of duties, after the day limited, on the basis of the foreign cost or value, is inconsistent with the act; and the law authorizing it must, therefore, as it would seem, be considered as repealed.

The act of 1833, as must be obvious to all, contemplates no other than ad valorem duties after June, 1842; for although in a given case a specific duty may not amount to twenty per cent. on the cost of the article, yet that fact cannot be ascertained without referring to price or value—things constantly fluctuating; and much uncertainty, and perhaps confusion, would arise, as changes in the market price of articles might carry the duty beyond the limit at one period, though within it at another.

Indeed there can be little room for doubt that it was in the contemplation of Congress at the passing of the act, that no duties on imports should exist in the country after June, 1842, but ad valorem duties. It must be admitted that this was a very important change in the whole system of imports into the United States, since it has heretofore been regarded as the dictate of high prudence and the teaching of long experience, that, for the prevention of frauds and the security of the revenue, duties ought, as far as practicable, to be made not ad valorem, but specific.

Of the essential or peremptory provisions of the act, there are two which, it is not to be disguised, were intended to stand towards each other in the relation of equivalents or mutual considerations. These are, the reduction of all duties to twenty per cent. ad valorem, and the assessment of those duties upon a home valuation. It is impossible to read the act itself, and still more impossible to advert to the history of the times, without arriving at the most perfect conviction that the home valuation was resorted to for the purpose of guarding the revenue against fraud, and protecting American manufactures against undervaluations. There could be no other possible object in this provision. It is a part of the act, therefore, connected with another part, and inserted for the purpose of qualifying essentially the operation of that other part.
But it is highly proper to look at the circumstances which led to the passage of the act of 1833, and to regard the motives in which it appears to have had its origin. It was the result of a spirit of compromise and conciliation, at a time when considerable agitation existed and much diversity of opinion prevailed. If events shall appear to make it necessary to reconsider or readjust the provisions of that law, all proceedings towards that end should be conducted under the influence of the same spirit. The undersigned is most deeply impressed with the force of these convictions, while offering suggestions to Congress on the subject. He is constrained to admit that it has appeared to him that the interests of the country required some modification of the act of 1833. In support of this opinion, he would first mention the great, if not insurmountable difficulties of establishing a home valuation at our various ports, without incurring the risk of producing such diversity in the estimates of value as should not only lead to great practical inconvenience, but interfere also, in effect, with the constitutional provision that duties on imports shall be equal in all the States. If such should be the opinion of Congress, then it is clear that some equivalent is to be provided for the home valuation, or else the whole basis upon which the act was expected to rest, as a measure of compromise and adjustment, is taken away or displaced. There ceases in that event to be the mutuality or compromise of interests evidently intended to be produced by placing home valuation as an equivalent against a reduction of ad valorem duties. It remains for the wisdom of Congress to determine whether such equivalent can be found.

But, in the second place, if Congress should be of opinion either that home valuation is practicable, or that some equivalent and proper substitute may be found for it, the undersigned will not disguise his opinion that it cannot be regarded as wise by any portion of the country, as a permanent system of policy, to augment the amount of revenue, when further exigencies may require such augmentation, by raising duties on all articles, including those of absolute necessity, to the full extent of twenty per cent., and preserving that limit, at the same time, as a fixed barrier against higher duties on any article whatever, even those of mere luxury. Such a plan of revenue, if to be regarded as a settled system, appears to the undersigned to be unnatural and inconvenient, and such as is not likely to promote the best interests of the country.

The probable effect of the future operation of the act of 1833 upon the manufactures and mechanical trades of the country, particularly if no home valuation be established, and no equivalent for such home valuation found, gives rise to inquiry too important to be overlooked. It is fully acknowledged that all duties should be laid with primary reference to revenue; and it is admitted without hesitation or reserve, that no more money should be raised under any pretence whatever than such an amount as is necessary for an economical administration of the Government. But within these limits, and as incidental to the raising of such revenue as may be absolutely necessary, it is believed that discrimination may be made and duties imposed in such a manner as that, while no part of the country will suffer loss, or inconvenience, a most beneficial degree of protection will be extended to the labor and industry
of large masses of the people, while the country will be rendered more prosperous in peace, and infinitely stronger and better prepared if foreign war should come upon us. The principle of discrimination has obtained from the period of the foundation of the Government. In many cases it may be found to be indispensable to the interests of the revenue itself; and if, in fixing a system of duties, it consists with the best interests and true policy of the country so to apportion them among the various species of imports as to favor our own manufactures at the same time that the revenue itself is benefited, and no injustice done to any, it would seem proper and wise to reject arbitrary limits and the idea of a forced and unnatural uniformity.

The undersigned feels no difficulty in admitting that a duty of twenty per cent. ad valorem assessed upon the value of imported articles in our own ports, would, in many instances, be a rate sufficiently high for the benefit of the revenue, and also afford reasonable encouragement to home producers of the same articles. As to those, therefore, the object of the act of 1833 will be accomplished if its provision for home valuation be carried out by Congress. But he still supposes that there are several descriptions of imported manufactures and produce, which would well bear a higher duty than twenty per cent. upon the home value, and thus yield a greater revenue to the Government, while in regard to some of them it will be found that, without such increased duty, the labor of large classes engaged in producing similar articles will be greatly depressed, if not entirely supplanted.

It is unquestionably true, and well worthy of remark, that the act of 1833 was avowedly conservative in its objects and character; and while it was designed to remove what was esteemed a grievance by one part of the country, it was not intended that the interests of any other should be sacrificed by it. On the contrary, a reasonable security was intended for all. Its true spirit, therefore, will be but carried out by acting, under any new state of circumstances, with reference to the same great objects, and doing justice alike to all. The great principle of that act was moderation and conciliation, and this should never be lost sight of. But the measures proper and necessary to carry out that principle may be changed, if the altered circumstances of the country call for such change, without any departure from the principle itself.

Nothing is more established by our experience and the experience of other nations, than that the augmentation of duties does not augment, in an equal degree, the cost of the article to the consumer. In many cases it appears not to increase that cost at all. Very often the price to the consumer is kept down, notwithstanding an increase of duties, partly by the greater supply of the home production, and partly by the reduction of the price in the foreign market. It is believed, indeed, that there have been cases in which the joint operation of the two causes has occasioned prices to fall lower than they were before, the increase of duties was laid.

This result in the operation of trade and business might readily be traced to its causes; but a full exposition of those causes, and the modes of their operation, would too much swell this report. Suffice it to say, that when an additional duty is laid on an article in a country in which
that article is extensively consumed, the burden always falls in part, and sometimes, as experience has shown, altogether, upon the foreign producer. The foreign producer must sell; and if in the place of sale he finds an article produced on the spot which comes into advantageous competition with his own by reason of paying no duties, he still must sell; and for the sake of being able to do it, he must be content to bear the burden of the duties himself. The duty borne by the foreign producer in such cases is like the charge for transportation—it is something which is necessary to bring him into the market of competition. Analogous instances occur in domestic trade. The wheat grower of Indiana, who incurs heavy expenses in conveying his flour to an Atlantic port, expects no higher price for it when it arrives there than is paid for flour of the same quality to producers in the immediate neighborhood. The cost of transportation, therefore, does not operate so much to raise the price at the place of sale as to diminish it at the place of production. Now, the great law which regulates prices by demand and supply, is sternly observed in cases of foreign importation, as in this instance of domestic trade. The undersigned cannot forbear to add that vastly the greater proportion of the agricultural population of the United States is obliged to rely mainly upon the home market for a sale of its products, although a large part of those products (wheat, for instance) is such as often enters extensively into the consumption of the world. The quantity of flour and Indian corn exported from this country is altogether inconceivable, in comparison with the quantity consumed in the large cities and manufacturing towns, which have either entirely grown up or added largely to their population under the influence of laws of Congress, passed since the end of the last war, upon domestic labor and industry. The immense interchange of products, all being the result of labor, which now takes place between the producers of subsistence and the population above mentioned, shows the advantage which one class is to the other, and the essential importance to both of preserving their existing relations. If the consumption of flour and grain in the manufacturing districts, especially the North and East, decline, to that extent there is an absolute loss to the wheat and corn grower, since the quantity consumed by them will find a market nowhere else. To say nothing, in this connection, of the incalculable importance of a home market to the producer of the great article of cotton, and limiting his remarks to the grain growers alone, the undersigned cannot but persuade himself that all will see and acknowledge the great value to that class of producers of the northern and eastern market—the only considerable market, indeed, which is permanently open to them upon the face of the earth.

So long as the policy of other countries shall continue to exclude the products of our agriculture from their ports, and thus deny to us the advantage of a fair reciprocity in trade, it would appear to be equally the dictate of policy and of justice to our people to secure to them, as far as may be reasonably and properly done, a market of consumption for their produce in their own country.

The undersigned is of opinion that the condition of the Treasury and of the country demands an augmentation of the revenue. It cannot but be the true policy of Government to extinguish the amount of debt now
existing as soon as practicable, and to avoid increasing it. The creation of debt by loans, and other resorts for revenue to supply deficiencies of regular income, cannot but be regarded, in a time of peace, as injudicious and objectionable. The general credit of the Government, always good, has been greatly raised, both at home and abroad, by the fact that it has fully paid off and discharged the debt created by the Revolution, and by a subsequent war with England, and wars with the Indian tribes. The preservation of this high credit is of the utmost importance. It must be the necessary reliance of the Government, if, in the vicissitudes of human affairs, sudden war should come upon us, requiring large and immediate expenditures. Exact punctuality in the payment of interest while the debt shall continue, and its payment so soon as the time of payment arrives; as well as the known ability and honor of the Government, are the means of inspiring that general confidence which shall at all times enable it to use its credit to the greatest advantage.

The estimated expenditures of the Government for the coming year will exceed its probable income by $14,218,570 68. Should Congress authorize a reissue of Treasury notes to the amount of $5,000,000, and the balance of the loan be disposed of, there will remain a deficit of $2,718,570, for which provision must be made by law. But it is not supposed that Congress will deem it advisable to restrict the income of the Government to the precise amount of its expenditures. There ought to be a surplus of at least two millions to meet unforeseen emergencies in the public service; and, should even the proceeds of the sales of the public lands be withdrawn from the States, a reference to the receipts from that source in the last and present years, will show that a deficiency in the revenue, to meet the wants of the Government, must still remain.

The state of the national affairs, the disposition of the Government, in which it is believed the people fully participate, to put the country into a respectable state of defence, and especially to support and strengthen the military marine, all appear to suggest the propriety of such increase of duties on articles carefully selected as, while the amount shall not bear hard on individuals, by limiting their customary enjoyments, nor oppress nor derange the general business of the country, shall yet supply the Treasury, not extravagantly or excessively, but yet reasonably and justly for all the great purposes of national defence. Economy, that great public virtue, which is so essentially proper to be practiced by republican Governments, would be but half exercised if, while on the one hand it avoids all unnecessary expenditure, it does not, on the other, make a reasonable and judicious provision for such expenditures as are unavoidable.

All which is respectfully submitted.

W. FORWARD, Secretary of the Treasury.

Hon. J. WHITE, Speaker House of Representatives.
Statement of Moneys received into the Treasury from all sources other than customs, public lands, and funds held in trust by the Government, from 1st January to 30th September, 1841.
