REPORT.

TREASURY DEPARTMENT, Washington, D. C., December 2, 1878.

\$20,799,551 90

SIR: I have the honor to submit the following annual report: The ordinary revenues, from all sources, for the fiscal year ending June 30, 1878, were-From internal revenue..... 110, 581, 624 74 From sales of public lands..... 1,079,743 37 From tax on circulation and deposits of national 6,863,052 96 From repayment of interest by Pacific Railway Companies.... 1, 366, 954 36 From customs' fees, fines, penalties, &c..... 1,046,864 36 From fees—consular, letters-patent, and lands 2,056,515 13 From proceeds of sales of Government property..... 249,469 88 From premium on sales of coin..... 317, 102 30 From profits on coinage, &c..... 1,690,762 33 From miscellaneous sources..... 2, 341, 109 07 Total ordinary receipts..... 257, 763, 878 70 The ordinary expenditures for the same period were-For civil expenses **\$**16, 551, 323 16 For foreign intercourse..... 1, 229, 216 78 For Indians..... 4,629,280 28 For pensions..... 27, 137, 019 08 For the military establishment, including river and harbor improvements, and arsenals..... 32, 154, 147 85 For the naval establishment, including vessels, machinery, and improvements at navy yards...... 17, 365, 301 37 For miscellaneous expenditures, including public buildings, light-houses, and collecting the revenue. 35, 397, 163 63 For interest on the public debt..... 102, 500, 874 65 Total ordinary expenditures..... 236, 964, 326 80

Leaving a surplus revenue of.....

Which was applied as follows:

To the redemption of United States notes, &c	\$13, 119, 825	33
To the redemption of fractional currency	3,855,368	57
To the redemption of six per cent. bonds for the		•
sinking-fund	73,950	00
To increase of cash balance in the Treasury	3, 750, 408	00
	20, 799, 551	
	20, 199, 991	

The amount due the sinking fund for the year was \$35,429,001 80, leaving a deficiency on this account of \$14,629,449 90.

Compared with the previous fiscal year, the receipts for 1878 have decreased \$11,984,796 09, in the following items: in customs revenue, \$785,812 87; in internal revenue, \$8,048,783 09; in semi-annual tax on banks, \$215,498; in sales of Government property, \$84,485 08; in profits on coinage, \$1,582,476 75; and in miscellaneous items, \$1,267,740 30. There was an increase of \$748,088 17, as follows: in proceeds of sales of public lands, \$103,489 69; in premium on sales of coin, \$67,521 52; and in miscellaneous items, \$577,076 96—making a net decrease, in the receipts from all sources for the year, of \$11,236,707 92.

The decrease of revenue is principally due to the falling off in the receipts from internal revenue, which was probably caused by the agitation in Congress, for a long time, of the reduction of the tax on spirits and tobacco.

The expenditures show an increase of \$7,781,729 08, as follows: in the Navy Department, \$2,405,366 01, and in the interest on the public debt, \$5,376,363 07, the latter of which was due to the large balance of \$7,426,619 81 unpaid interest at the commencement of the year, and to the change from semi-annual to quarterly payments of interest on six per cent. bonds converted into four per cents. which would not otherwise have been made until after the close of the year. There was a decrease of \$9,477,411 21, as follows: in the War Department, \$4,928,588 05; in the Interior Department, \$1,474,460 13; and in the civil and miscellaneous, \$3,074,363 03—making a net decrease in the expenditures of \$1,695,682 13.

FISCAL YEAR 1879.

For the present fiscal year the revenue, actual and estimated, will be as follows:

Excluding the sinking fund, the estimated expenditures will be \$236,334,912 68, showing a surplus of \$28,165,087 32.

By direction of the President, the estimated expenditures for the next-fiscal year have been based upon the appropriations made by Congress for the present fiscal year. The rule has been departed from only as to those branches of the public service belonging to Departments the heads of which deem the estimated increase indispensable, or where existing law demands a greater sum than was appropriated. Such increase is estimated for as follows:

Legislative	\$115, 198 11	en e
Treasury Department	319,680 13	· · · · · · · ·
War Department	740, 848 14

		\$4,666,505 21
Less decrease in estimates for Departm	nent of State	111,841 35
Net increase	-	4, 554, 663 86

Earnestly desirous of co-operating with Congress in the reduction of expenditures to the lowest sum consistent with the proper execution of the law, the Secretary has reduced the expenses of the customs service, during the last fiscal year, compared with the previous year, in the sum of \$778,492 25, and herein recommends changes of the law which will enable him to make further reductions therein. The great body of expenditures is fixed by laws which leave no discretion to executive officers. The reduction of appropriations does not reduce expenditures when the law requires the service to be performed, or fixes the salary and number of employés. It must be accompanied by a careful

revision of the laws, reducing the objects of expenditure or the number or compensation of employés. It is believed that, by such a revision, especially of the postal laws, and by a limitation of the amount of appropriations for public works in progress, by the postponement of new works not indispensable for the public service, and by judicious scrutiny of disbursements, that the expenditures for the next fiscal year need not, in the aggregate, exceed the appropriations for the present fiscal year.

The estimate of revenue, based upon existing law, is \$6,736,121 30 more than the actual revenue of the past year. This estimate can only be realized by strict and impartial enforcement of the revenue laws. This is not only a legal duty of revenue officers, but is the right of every honest tax-payer. The enforcement of the tax on spirits and to-bacco has, in some places, been resisted by formidable combinations too powerful for the Department, with the forces at its command, to overcome. The customs duties, in many cases, have been evaded by smuggling, fraud, undervaluation, and false claims for drawbacks and damage allowance. Some of these obstructions are incident to the execution of any tax law, but many of them may be overcome by such modifications of the laws as are hereinafter recommended.

It is manifest, from these estimates, that, however desirable it may be to reduce existing taxes, it ought not now to be done except by supplying the reductions from other sources of revenue. Stability and certainty in the rate and subject of taxation are of great importance, and, therefore, the Secretary recommends that no change be made in them during the present session, except to convert certain ad-valorem duties, hereinafter stated, into specific duties.

RESUMPTION OF SPECIE PAYMENTS:

The important duty imposed on this Department by the resumption act, approved January 14, 1875, has been steadily pursued during the past year. The plain purpose of the act is to secure to all interests and all classes the benefits of a sound currency, redeemable in coin, with the least possible disturbance of existing rights and contracts. Three of its provisions have been substantially carried into execution by the gradual substitution of fractional coin for fractional currency, by the free coinage of gold, and by free banking. There remains only the completion of preparations for resumption in coin on the 1st day of January, 1879, and its maintenance thereafter upon the basis of existing law.

At the date of my annual report to Congress in December, 1877, it was deemed necessary as a preparation for resumption to accumulate

in the Treasury a coin reserve of at least forty per cent. of the amount of United States notes outstanding. At that time it was anticipated that under the provisions of the resumption act the volume of United States notes would be reduced to \$300,000,000 by the 1st day of January, 1879, or soon thereafter, and that a reserve in coin of \$120,000,000 would then be sufficient. Congress, however, in view of the strong popular feeling against a contraction of the currency, by the act approved May 31, 1878, forbade the retirement of any United States notes after that date, leaving the amount in circulation \$346,681,016. Upon the principle of safety upon which the Department was acting, that forty per cent. of coin was the smallest reserve upon which resumption could prudently be commenced, it became necessary to increase the coin reserve to \$138,000,000.

At the close of the year 1877 this coin reserve, in excess of coin liabili. . ties, amounted to \$63,016,050 96, of which \$15,000,000 were obtained by the sale of four and a half per cent., and \$25,000,000 by the sale of four per cent. bonds, the residue being surplus revenue. Subsequently, on the 11th day of April, 1878, the Secretary entered into a contract with certain bankers in New York and London—the parties to the previous contract of June 9, 1877, already communicated to Congress—for the sale of \$50,000,000 four and a half per cent. bonds for resumption purposes. The bonds were sold at a premium of one and a half per cent. and accrued interest, less a commission of one-half of one per cent. The contract has been fulfilled, and the net proceeds, \$50,500,000, have been paid into the Treasury in gold coin. The \$5,500,000 coin paid on the Halifax award have been replaced by the sale of that amount of four per cent. bonds sold for resumption purposes, making the aggregate amount of bonds sold for these purposes, \$95,500,000, of which \$65,000,000 were four and a half per cent. bonds, and \$30,500,000 four To this has been added the surplus revenue from per cent. bonds. time to time. The amount of coin held in the Treasury on the 23d day of November last, in excess of coin sufficient to pay all accrued coin liabilities, was \$141,888,100, and constitutes the coin reserve prepared for resumption purposes. This sum will be diminished somewhat on the 1st of January next by reason of the large amount of interest accruing on that day in excess of the coin revenue received meanwhile.

In anticipation of resumption, and in view of the fact that the redemption of United States notes is mandatory only at the office of the assistant treasurer in the city of New York, it was deemed important to secure the co-operation of the associated banks of that city in the ready collection of drafts on those banks and in the payment of

Treasury drafts held by them. A satisfactory arrangement has been made by which all drafts on the banks held by the Treasury are to be paid at the clearing-house, and all drafts on the Treasury held by them are to be paid to the clearing-house at the office of the assistant treasurer, in United States notes; and, after the 1st of January, United States notes are to be received by them as coin. This will greatly lessen the risk and labor of collections both to the Treasury and the banks.

Every step in these preparations for resumption has been accompanied with increased business and confidence. The accumulation of coin, instead of increasing its price, as was feared by many, has steadily reduced its premium in the market. The depressing and ruinous losses that followed the panic of 1873 had not diminished in 1875, when the resumption act passed; but every measure taken in the execution or enforcement of this act has tended to lighten these losses and to reduce the premium on coin, so that now it is merely nominal. The present condition of our trade, industry, and commerce, hereafter more fully stated, our ample reserves, and the general confidence inspired in our financial condition seem to justify the opinion that we are prepared to commence and maintain resumption from and after the first day of January, A. D. 1879.

The means and manner of doing this are left largely to the discretion of the Secretary, but, from the nature of the duty imposed, he must restore coin and bullion, when withdrawn in the process of redemption, either by the sale of bonds, or the use of the surplus revenue, or of the notes redeemed from time to time.

The power to sell any of the bonds described in the refunding act continues after as well as before resumption. Though it may not be often used, it is essential to enable this Department to meet emergencies. By its exercise it is anticipated that the Treasury at any time can readily obtain coin to reinforce the reserve already accumulated. United States notes must, however, be the chief means under existing law with which the Department must restore coin and bullion when withdrawn in process of redemption. The notes, when redeemed, must necessarily accumulate in the Treasury until their superior use and convenience for circulation enables the Department to exchange them at par for coin or bullion.

The act of May 31, 1878, already referred to, provides that when United States notes are redeemed or received in the Treasury under any law, from any source whatever, and shall belong to the United States, they shall not be retired, cancelled, or destroyed, but shall be reissued and paid out again and kept in circulation.

The power to reissue United States notes was conferred by section 3579, Revised Statutes, and was not limited by the resumption act. As this, however, was questioned, Congress wisely removed the doubt.

Notes redeemed are like other notes received into the Treasury. Payments of them can be made only in consequence of appropriations made by law, or for the purchase of bullion, or for the refunding of the public debt.

The current receipts from revenue are sufficient to meet the current expenditures as well as the accruing interest on the public debt. Authority is conferred by the refunding act to redeem six per cent. bonds as they become redeemable, by the proceeds of the sale of bonds bearing a lower rate of interest. The United States notes redeemed under the resumption act are, therefore, the principal means provided for the purchase of bullion or coin with which to maintain resumption, but should only be paid out when they can be used to replace an equal amount of coin withdrawn from the resumption fund. They may, it is true, be used for current purposes like other money, but when so used their place is filled by money received from taxes or other sources of revenue.

In daily business, no distinction need be made between moneys from whatever source received, but they may properly be applied to any of the purposes authorized by law. No doubt coin liabilities, such as interest or principal of the public debt, will be ordinarily paid and willingly received in United States notes, but, when demanded, such payments will be made in coin; and United States notes and coin will be used in the purchase of bullion. This method has already been adopted in Colorado and North Carolina, and arrangements are being perfected to purchase bullion in this way in all the mining regions of the United States.

By the act approved June 8, 1878, the Secretary of the Treasury is authorized to constitute any superintendent of a mint or assayer of any assay office an assistant treasurer of the United States to receive gold coin or bullion on deposit. By the legislative appropriation bill approved June 19, 1878, the Secretary of the Treasury is authorized to issue coin-certificates in payment to depositors of bullion at the several mints and assay offices of the United States. These provisions, intended to secure to the producers of bullion more speedy payment, will necessarily bring into the mints and Treasury the great body of the precious metals mined in the United States, and will tend greatly to the easy and steady supply of bullion for coinage. United States notes, when at par with coin, will be readily received for bullion

instead of coin-certificates, and with great advantage and convenience to the producers.

Deposits of coin in the Treasury will, no doubt, continue to be made after the 1st of January, as heretofore. Both gold and silver coin, from its weight and bulk, will naturally seek such a safe deposit, while notes redeemable in coin, from their superior convenience, will be circulated instead. After resumption the distinction between coin and United States notes should be, as far as practicable, abandoned in the current affairs of the Government; and therefore no coin-certificates should be issued except where expressly required by the provisions of law, as in the case of silver-certificates. The gold-certificates hitherto issued by virtue of the discretion conferred upon the Sccretary will not be issued after the 1st of January next. The necessity for them during a suspension of specie payments is obvious, but no longer exists when by law every United States note is, in effect, a coin-certificate. The only purpose that could be subserved by their issue hereafter would be to enable persons to convert their notes into coin-certificates, and thus contract the currency and hoard gold in the vaults of the Treasury without the inconvenience or risk of its custody. For convenience United States notes of the same denomination as the larger coin-certificates will be issued.

By existing law customs duties and the interest of the public debt are payable in coin, and a portion of the duties was specifically pledged as a special fund for the payment of the interest, thus making one provision dependent upon the other. As we cannot, with due regard to the public honor, repeal the obligation to pay coin, we ought not to impair or repeal the means provided to procure coin. When, happily, our notes are equal to coin, they will be accepted as coin, both by the public creditor and by the Government; but this acceptance should be left to the option of the respective parties, and the legal right on both sides to demand coin should be preserved inviolate.

The Secretary is of the opinion that a change of the law is not necessary to authorize this Department to receive United States notes for customs duties on and after the 1st day of January, 1879, while they are redeemable and are redeemed on demand in coin. After resumption it would seem a useless inconvenience to require payment of such duties in coin rather than in United States notes. The resumption act, by clear implication, so far modifies previous laws as to permit payments in United States notes as well as in coin. The provision for coin payments was made in the midst of war when the notes were depreciated and the public necessities required an assured revenue in

coin to support the public credit. This alone justified the refusal by the Government to take its own notes for the taxes levied by it. It has now definitely assumed to pay these notes in coin, and this necessarily implies the receipt of these notes as coin. To refuse them is only to invite their presentation for coin. Any other construction would require the notes to be presented to the assistant treasurer in New York for coin, and if used in the purchase of bonds, to be returned to the same officer, or, if used for the payment of customs duties, to be carried to the collector of customs, who must daily deposit in the Treasury all money received by him. It is not to be assumed that the law requires this indirect and inconvenient process after the notes are redeemable in coin on demand of the holder. They are then at a parity with coin, and both should be received indiscriminately.

If United States notes are received for duties at the port of New York, they should be received for the same purpose in all other ports of the United States, or an unconstitutional preference would be given to that port over other ports. If this privilege is denied to the citizens of other ports, they could make such use of these notes only by transporting them to New York and transporting the coin to their homes for payment; and all this not only without benefit to the Government, but with a loss in returning the coin again to New York, where it is required for redemption purposes.

The provision in the law for redemption in New York was believed to be practical redemption in all parts of the United States. Actual redemption was confined to a single place from the necessity of maintaining only one coin reserve and where the coin could be easily accumulated and kept.

With this view of the resumption act, the Secretary will feel it to be his duty, unless Congress otherwise provides, to direct that after the 1st day of January next, and while United States notes are redeemed at the Treasury, they be received the same as coin by the officers of this Department in all payments in all parts of the United States.

If any further provision of law is deemed necessary by Congress to authorize the receipt of United States notes for customs dues or for bonds, the Secretary respectfully submits that this authority should continue only while the notes are redeemed in coin. However desirable continuous resumption may be, and however confident we may feel in its maintenance, yet the experience of many nations has proven that it may be impossible in periods of great emergency. In such events the public faith demands that the customs duties shall be collected in coin and paid to the public creditors, and this pledge should never be violated or our ability to perform it endangered.

Heretofore, the Treasury, in the disbursement of currency, has paid out bills of any denomination desired. In this way the number of bills of a less denomination than five dollars is determined by the demand for them. Such would appear to be the true policy after the 1st of January. It has been urged that, with a view to place in circulation silver coins, no bills of less than five dollars should be issued. would seem to be more just and expedient not to force any form of money upon a public creditor, but to give him the option of the kind and denomination. The convenience of the public, in this respect, should be consulted. The only way by which moneys of different kinds and intrinsic values can be maintained in circulation at par with each other is by the ability, when one kind is in excess, to readily exchange it for the other. This principle is applicable to coin as well as to paper-money. In this way the largest amount of money of different kinds can be maintained at par, the different purposes for which each is issued making a demand for it. The refusal or neglect to maintain this species of redemption inevitably effects the exclusion from circulation of the most valuable, which, thereafter, becomes a commodity, bought and sold at a premium.

When the resumption act passed, gold was the only coin which by law was a legal tender in payment of all debts. That act contemplated resumption in gold coin only. No silver coin of full legal tender could then be lawfully issued. The only silver coin provided was fractional coin, which was a legal tender for five dollars only. The act approved February 28, 1878, made a very important change in our coinage system. The silver dollar provided for was made a legal tender for all debts, public and private, except where otherwise expressly stipulated in the contract. The amount of this coin issued will more properly be stated hereafter, but its effect upon the problem of resumption should be here considered.

The law itself clearly shows that the silver dollar was not to supersede the gold dollar; nor did Congress propose to adopt the single standard of silver, but only to create a bimetallic standard of silver and gold, of equal value and equal purchasing power. Congress, therefore, limited the amount of silver dollars to be coined to not less than two millions nor more than four millions per month, but did not limit the aggregate amount nor the period of time during which this coinage should continue. The market value of the silver in the dollar, at the date of the passage of the act, was $93\frac{1}{4}$ cents in gold coin. Now it is about 86 cents in gold coin. If it was intended by Congress to adopt the silver instead of the gold standard, the

amount provided for is totally inadequate for the purpose. Experience, not only in this country, but in European countries, has established that a certain amount of silver coin may be maintained in circulation at par with gold, though of less intrinsic bullion value? It was, no doubt, the intention of Congress to provide a coin in silver which would answer a multitude of the purposes of business life, without banishing from circulation the established gold coin of the country. To accomplish this it is indispensable either that the silver coin be limited in amount, or that its bullion value be equal to that of the gold dollar. If not, its use will be limited to domestic purposes. cannot be exported except at its commercial value as bullion. If issued in excess of demands for domestic purposes, it will necessarily fall in market value, and, by a well-known principle of finance, will become the sole coin standard of value. Gold will be either hoarded or exported. When two currencies, both legal, are authorized without limit, the cheaper alone will circulate. If, however, the issue of the silver dollars is limited to an amount demanded for circulation, there will be no depreciation, and their convenient use will keep them at par with gold, as fractional-silver coin, issued under the act approved February 21, 1853, was kept at par with gold.

The amount of such coin that can thus be maintained at par with gold cannot be fairly tested until resumption is accomplished. As yet paper-money has been depreciated, and silver dollars being receivable for customs dues, have naturally not entered into general circulation, but have returned to the Treasury in payment of such dues, and thus the only effect of the attempt of the Department to circulate them has been to diminish the gold revenue. After resumption these coins will circulate in considerable sums for small payments. To the extent that such demand will give employment to silver dollars their use will be an aid to resumption rather than a hindrance, but if issued in excess of such demand they will at once tend to displace gold and become the sole standard, and gradually, as they increase in number, will fall to their value as bullion. Even the fear or suspicion of such an excess tends to banish gold, and, if well established, will cause a continuous drain of gold until imperative necessity will compel resumption in silver alone. The serious effects of such a radical change in our standards of value cannot be exaggerated; and its possibility will greatly disturb confidence in resumption, and may make necessary larger reserves and further sales of bonds.

The Secretary, therefore, earnestly invokes the attention of Congress to this subject, with a view that either during the present or the next

session the amount of silver dollars to be issued be limited, or their ratio to gold for coining purposes be changed.

Gold and silver have varied in value from time to time in the history of nations, and laws have been passed to meet this changing value. In our country, by the act of April 2, 1792, the ratio between them was fixed at one of gold to fifteen of silver. By the act of June 28, 1834, the ratio was changed to one of gold to sixteen of silver. For more than a century the market value of the two metals had varied between these two ratios, mainly resting at that fixed by the Latin nations, of one to fifteen and a half.

But we cannot overlook the fact that within a few years, from causes frequently discussed in Congress, a great change has occurred in the relative value of the two metals. It would seem to be expedient to recognize this controlling fact—one that no nation alone can change by a careful readjustment of the legal ratio for coinage of one to sixteen, so as to conform to the relative market values of the two metals. The ratios heretofore fixed were always made with that view, and, when made, did conform as near as might be. Now, that the production and use of the two metals have greatly changed in relative value, a corresponding change must be made in the coinage ratio. There is no peculiar force or sanction in the present ratio that should make us hesitate to adopt another, when, in the markets of the world, it is proven that such ratio is not now the true one. The addition of one-tenth or one-eighth to the thickness of the silver dollar would scarcely be perceived as an inconvenience by the holder, but would inspire confidence, and add greatly to its circulation. As prices are now based on United States notes at par with gold, no disturbance of values would result from the change.

It appears from the recent conference at Paris, invited by us, that other nations will not join with us in fixing an international ratio, and that each country must adapt its laws to its own policy. The tendency of late among commercial nations is to the adoption of a single standard of gold and the issue of silver for fractional coin. We may, by ignoring this tendency, give temporarily-increased value to the stores of silver held in Germany and France until our market absorbs them, but by adopting a silver standard as nearly equal to gold as practicable, we make a market for our large production of silver, and furnish a full, honest dollar that will be hoarded, transported, or circulated, without disparagement or reproach.

It is respectfully submitted that the United States, already so largely interested in trade with all parts of the world, and becoming, by its

population, wealth, commerce, and productions, a leading member of the family of nations, should not adopt a standard of less intrinsic value than other commercial nations. Alike interested in silver and gold, as the great producing country of both, it should coin them at such a ratio and on such conditions as will secure the largest use and circulation of both metals without displacing either. Gold must necessarily be the standard of value in great transactions, from its greater relative value, but it is not capable of the division required for small transactions; while silver is indispensable for a multitude of daily wants, and is too bulky for use in the larger transactions of business, and the cost of its transportation for long distances would greatly increase the present rates of exchange. It would, therefore, seem to be the best policy for the present to limit the aggregate issue of our silver dollars, based on the ratio of sixteen to one, to such sums as can clearly be maintained at par with gold, until the price of silver in the market shall assume a definite ratio to gold, when that ratio should be adopted, and our coins made to conform to it: and the Secretary respectfully recommends that he be authorized to discontinue the coinage of the silver dollar when the amount outstanding shall exceed fifty million dollars.

The Secretary deems it proper to state that in the meantime, in the execution of the law as it now stands, he will feel it to be his duty to redeem all United States notes presented on and after January 1, next, at the office of the assistant treasurer of the United States in the city of New York, in sums of not less than fifty dollars, with either gold or silver coin, as desired by the holder, but reserving the legal option of the Government; and to pay out United States notes for all other demands on the Treasury, except when coin is demanded on coin liabilities.

It is his duty as an executive officer to frankly state his opinions, so that if he is in error Congress may prescribe such a policy as is best for the public interests.

FUNDING.

The amount of four per cent. bonds sold during the present year, prior to November 23, is \$100,270,900, of which \$94,770,900 were sold under the refunding act approved July 14, 1870. Six per cent. bonds, commonly known as five-twenties, to an equal amount, have been redeemed, or will be redeemed as calls mature. This beneficial process was greatly retarded by the requirement of the law that subscriptions must be paid in coin, the inconvenience of obtaining which, to the great body of the people ontside of the large cities, deterred many sales.

XVIII REPORT OF THE SECRETARY OF THE TREASURY.

This will not affect sales after resumption, when bonds can be pa for with United States notes. The large absorption of United States securities in the American market, by reason of their return from Europe, together with the sale of four and a half per cent. bonds for resumption purposes, tended to retard the sale of four per cent. bonds. As from the best advices, not more than \$200,000,000 of United States bonds are now held out of the country, it may be fairly anticipated that the sale of four per cent. bonds, hereafter, will largely increase.

Prior to May, 1877, United States bonds were mainly sold through an association of bankers. Experience proves that under the present plan of selling to all subscribers on terms fixed by public advertisement, though the aggregate of sales may be less, their distribution is more satisfactory. Under a popular loan the interest is paid at home, and the investment is available at all times, without loss, to meet the needs of the holder. This policy has been carefully fostered by other nations, and should be specially so in ours, where every citizen equally participates in the government of his country. The holding of these bonds at home, in small sums well distributed, is of great importance in enlisting popular interest in our national credit, and in encouraging habits of thrift, and such holding in the country is far more stable and less likely to disturb the market than it would be in cities or by corporations, where the bonds can be promptly sold in quantities.

The three months' public notice required by the fourth section of the refunding act to be given to the holders of the five-twenty bonds to be redeemed, necessarily involves a loss to the Government by the payment of double interest during that time. The notice should not be given until subscriptions are made or are reasonably certain to be made. When they are made and the money is paid into the Treasury, whether it is kept there idle during the three months or deposited with national banks under existing law, the Government not only pays interest on both classes of bonds during the ninety days, but, if the sales are large, the hoarding of large sums may disturb the market. Under existing law this is unavoidable; and to mitigate it, the Secretary deemed it expedient during the last summer to make calls in anticipation of subscriptions, but this, though legal, might, in case of failure of subscriptions, embarrass the Government in paying called bonds. long notice required by law is not necessary in the interest of the holder of the bonds, for, as the calls are made by public notice and the bonds are indicated and specified by class, date, and number, in the order of their numbers and issue, he by ordinary diligence can know beforehand when his bonds in due course will probably be called, and will not be taken by surprise.

The Secretary therefore recommends that the notice to be given for called bonds be, at his discretion, not less than ten days nor more than three months. In this way he will be able largely to avoid the payment of double interest, as well as the temporary contraction of the currency, and may fix the maturity of the call at a time when the interest of the called bonds becomes due and payable.

SAVINGS.

It has been the desire of the Department to popularize the public loans and bring them within easy reach of every citizen who desires to invest his savings, whether small or great, in these securities. The popular loan of 1877, open to all alike by public advertisement, absorbed \$75,000,000 of four per cent. bonds, and during the present year these bonds have been sold in the same manner.

It is believed that without a change of existing law the sale of these bonds will largely increase, but it would appear advisable so to modify the law that smaller sums may be invested from time to time through popular subscriptions, and that through the post offices, or other agents of the Government, the freest opportunity may be given in all parts of the country for such investments.

The best mode suggested is, that the Department be authorized to issue certificates of deposit of the United States of the denomination of ten dollars, bearing interest at the rate of 3.65 per cent. per annum and convertible at any time within one year after their issue into the four per cent. bonds authorized by the refunding act, and to be issued only in exchange for United States notes sent to the Treasury by mail or otherwise. Such a provision of law, supported by suitable regulations, would enable any person readily, without cost or risk, to convert his money into an interest-bearing security of the United States, and the money so received could be applied to the redemption of six per cent. bonds. The Secretary therefore recommends the prompt passage of such a law.

PUBLIC MONEYS.

The monetary transactions of the Government have been conducted without loss through the offices of the Treasurer, ten assistant treasurers, one depositary, and one hundred and nineteen national-bank depositaries, exclusive of those designated to receive only loan subscriptions.

Of the entire receipts of the Government, during the year, there was deposited in national bank depositories the amount of \$99,781,053 48.

Deposits received by the bank depositaries are secured by a pledge of United States bonds held by the Treasurer, and are paid out, from time to time, as the convenience of the public service may require, or transferred by the bank, without expense to the Government, to an independent-treasury office.

By an act approved March 3, 1857, public disbursing officers were required to place all public funds, intrusted to them for disbursement, on deposit with a public depositary, and to draw for the same only in favor of the persons to whom payment was to be made, excepting that they might check in their own names when the payments did not exceed twenty dollars.

The enforcement of this provision, according to its letter, was found impracticable, and the attention of Congress was called to it in the annual reports of the Secretary for 1857 and 1858, with a recommendation for its modification.

No action in the matter appears to have been taken by Congress until the act of June 14, 1866, reproduced as section 3620, Revised Statutes, was passed. This appeared to supersede the act of 1857, in removing the restrictions as to the method in which the money was to be drawn, but by an act approved February 27, 1877, section 3620 has been amended by requiring the checks to be drawn only in favor of the persons to whom payments are to be made.

The object which the law evidently seeks to accomplish meets the entire approval of the Department, but to carry its provisions into effect would require paymasters in the army to draw their checks in favor of the soldiers to be paid, by name, and paymasters on naval vessels, even during absences for years from the United States, to pay the officers and men only by drawing checks, in their favor, on depositaries in the United States.

The same embarrassment extends to all public disbursements, and the attention of Congress is called to the matter, with the recommendation that the section be so amended that disbursements may be made under regulations to be prescribed by the Secretary of the Treasury.

NATIONAL BANKS.

The report of the Comptroller of the Currency presents full and interesting information as to the national banks. The number in existence on October 1 was 2,053. The amount of their circulating notes outstanding, including those in liquidation, was \$323,147,719; the capital invested was \$466,147,436; the surplus fund and profits were \$157,833,993; the loans and discounts were \$830,521,542.

This system of banks, though of recent growth and adopted as an experiment amid the necessities developed by the civil war, has, under wise management, become the most important business agency in the country. Though still under trial and subject at all times to the discretion of Congress to discontinue and limit its existence and operations, it may be fairly claimed, as already established by experiment, that the system possesses certain advantages over any other heretofore existing in this country, and possible only with a national system.

First. The security of the bill-holder from loss through failure of the bank.

Second. The rapidity and certainty of the detection and prevention of counterfeiting, from the fact that the notes are engraved, printed, and redeemed at the Treasury Department.

Third. The frequent and careful examination of the banks, and the publication of the detailed statements of their condition.

Fourth. Uniformity and free circulation of the notes throughout the United States, without respect to the place of their issue.

Fifth. The admirable provisions by which failing banks are placed in liquidation, and their assets cheaply and promptly applied to the payment of creditors.

These and other advantages, derived to the public from a national system of banks over a State system, seem to be fully demonstrated, and, though irksome and apparently hard to the banks, are a benefit and security to the stockholders and a safeguard to the public.

The only franchise conferred by this system, that cannot be freely enjoyed by private bankers under State law, is the power to issue circulating-notes. This, it is conceded, is a franchise conferred by the Government, but it is not in the nature of a monopoly. It may be exercised by any five persons who have the means, and will comply with the law.

Whether the power to issue circulating notes should be granted to private corporations or be exercised only by the Government, is purely a question of public policy and public interest. In behalf of a circulation issued by the Government, it is claimed that interest is saved to the public on the full amount of the notes issued. To this it is replied that the issue of such notes necessarily involves their redemption in coin, and this can be secured only by coin reserves and the ordinary machinery of banks. If the banks issue notes they expect to derive a profit from their loan, but this profit is diminished by the burden of redemption, by the large taxes imposed upon the franchise, and by the risk always incident to the issue of circulating-

XXII REPORT OF THE SECRETARY OF THE TREASURY.

notes. These are considerations which will, no doubt, enter into the question of the permanency of the national banking system; but as the banks of this system are each organized under the law for twenty years, and none of them expire until June, 1883, it is respectfully submitted that it is good policy to continue the experiment until that date, when the public mind will be better prepared to consider the questions involved.

COINS AND COINAGE.

The annual report of the Director of the Mint exhibits in detail the operations of the several mints and assay offices, and also presents interesting information relative to the production of gold and silver in the United States, the estimated amount of gold and silver coin and bullion in the country, the depreciation of silver, the position of the American trade-dollar in the Oriental trade, and other subjects connected directly or indirectly with the coinage.

connected directly or indirectly with the coinage.	· .
The value of the gold coinage executed during the	
last fiscal year was	\$52, 798, 980 00
Of trade-dollars	11, 378, 010 00
Of standard-silver dollars	8, 573, 500 00
Of fractional-silver coin	8, 339, 315 50
And of minor coin	30, 694 00
·	

In addition to the coinage, fine and unparted bars were prepared for depositors in the amount of \$12,501,926 23 in gold, and \$11,854,385 87

81, 120, 499 50

A total coinage of.....

in silver.

It is manifest, from the proven capacity of the several mints, that our

coinage facilities are ample for all purposes.

The present production of bullion from the mines of the United States appears to approximate one hundred million dollars in value. All the gold bullion produced in the country contains more or less silver, and the greater portion of the silver bullion from our mines contains a percentage of gold, making it difficult to determine with accuracy the proportion of each. It is safe, however, to state that the production, of the two metals, calculated at their coining-rates,

During the year 1877 and the first few months of the present year, trade-dollars, to the amount of probably four million pieces, were placed in circulation in the States east of the Rocky Mountains, with

is nearly equal.

Ş

a full knowledge on the part of the parties engaged in the business that the coin was not a legal tender.

This coin is in no sense money of the United States which the Government is bound to redeem or care for. The Government stamp upon it is to certify to its weight and fineness for the convenience of dealers in silver bullion. It is precisely like any other silver bullion assayed at any assay office or mint. The limited legal-tender quality originally given to it was taken away before any of the coins were put into domestic circulation, and it should not now be given any value or attribute at the expense of the public that is not incident to any other silver bullion. The Government has received no benefit from this coinage, and has neither received it nor paid it out. The whole connection of the Government with this bullion was to perform the mechanical work of assaying and dividing it into convenient form for the merchant, at his cost, and for his benefit, for exportation only.

Recent advices from our Minister to China indicate that a considerable amount of trade-dollars is now being hoarded in that empire, and will be returned to us if a discrimination is made in their favor over other bullion. No distinction can be made between trade-dollars in the United States and those out of the United States; but, if redeemed at all, they must all be redeemed alike. The bullion in 35,853,360 trade-dollars outstanding can now be purchased from our miners for \$31,256,050. It would be a manifest injustice to deprive them of our market for their bullion, in order to discriminate in favor of bullion coined for exportation and held chiefly in foreign countries.

At times the fractional coins of the United States accumulate at certain places and are wanted at others. It is recommended that this Department be authorized to redeem them in United States notes when presented in sums of one hundred dollars, or any multiple thereof, at the mint at Philadelphia, where they can be recoined, if necessary, and distributed.

The amount of gold coin and bullion in the country September 30, is estimated by the Director at \$259,353,390, and of silver coin and bullion at \$99,090,557—a total of \$358,443,947.

The estimating of the production of the precious metals in this country, and of the amount of coin and bullion, is a matter attended with great difficulties, and the estimates can only be regarded as approximately correct, though they have been compiled from the best attainable sources.

By reason of the acts authorizing this Department to purchase gold and silver bullion at the several mints and assay offices, its trans-

portation is thrown upon the Government. The great body of the bullion accumulates in San Francisco and Carson, and the chief transportation is from those places to New York. Efforts were made to secure favorable rates, but the lowest offer was three-tenths of one per cent. for gold and one and two-tenths per cent. for silver, which was deemed to be excessive. Silver coin and bullion can be transported with but little risk, while at the rate proposed for transporting a car containing \$250,000, or about eight tons, the cost would be \$3,000. The chief cost is in the transportation over the Central and Union Pacific Railroads, both largely indebted to the United States. It is respectfully submitted that the rate over these roads be prescribed by Congress, and that the proceeds form part of the sinking-fund of said railroads, provided by law.

BUREAU OF ENGRAVING AND PRINTING.

At the close of the last fiscal year there was an unexpended balance of \$652,836 17 of the appropriation for labor and other expenses of this bureau. Of this amount, in accordance with the act approved June 20, 1878, the sum of \$327,536 50 will be expended in the purchase of a site for and the erection of a fire-proof building for the bureau, the work on which is now progressing satisfactorily, and will probably be completed during the fall of 1879. It is assumed, from the action of Congress at its last session, that it holds that the engraving and printing of the public securities can be more cheaply, perfectly, and safely done in this bureau than in private establishments, and the Secretary has, therefore, directed that all work of this description, except certain proprietary stamps, shall be done therein. The cost of the work is less than one-half the prices previously paid.

After careful inquiry, it has been ascertained that the prices paid for the paper used for public securities are greatly in excess of its cost, and proposals have been invited for the manufacture of a suitable paper, of a distinctive character, for this purpose, no action upon which has yet been taken.

DISBURSEMENTS OF THE COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

The act of Congress of last session providing a permanent form of government for the District of Columbia, committed Congress to an appropriation for the fiscal year ending June 30, 1879, and for future years, so long as said act should remain in force, of one-half of the expenses for the government of said District, as estimates therefor should

be approved by Congress. It also provided that all taxes collected should be paid into the Treasury of the United States, and that they, as well as the appropriations to be made by Congress, should be disbursed for the expenses of said District on itemized vouchers, audited and approved by the auditor of the District, and certified by said commissioners, or a majority of them; and that the accounts of said commissioners, and the tax-collectors, and all other officers required to account, should be settled and adjusted by the accounting officers of the Treasury Department of the United States.

A provision was, however, enacted that the interest on the 3.65 bonds of the District should be paid by the Secretary of the Treasury and credited as a part of the appropriation for the year, by the United States, towards the District's expenses.

The act was approved June 11, 1878, and the approval was consequently too near the end of the session of Congress to have estimates prepared for the fiscal year ending June 30, 1879, in conformity to the provisions of said act.

The commissioners of the District had, however, on the 21st of January, 1878, submitted estimates to Congress, amended afterwards by them on the 4th of June of that year, for the general expenses of the District for the fiscal year ending June 30, 1879, and Congress, by the sundry civil act, approved June 20, 1878, appropriated, for the general expenses of the District, one million two hundred and fifty thousand dollars, to be disbursed by the commissioners for the purposes set forth in said last-named estimates; and the Secretary of the Treasury was authorized to advance, from time to time, to said commissioners, from the money thus appropriated, such sums as, in his judgment, might be necessary to carry on the government of the District, including accruing interest on bonds.

It has been held by the accounting officers that these acts are to be construed together as parts of one scheme of legislation. It will be perceived that the disbursements made by the commissioners are to be regulated and limited by estimates approved by Congress; that accounts are to be kept by the commissioners of the District, independent of those kept by the tax-collector and other officers.

It has also been held that all disbursements for the expenses of the District, except where otherwise particularly specified, are to be made by the commissioners; that these disbursements are to be regulated and limited by estimates approved by Congress; that an accurate account is to be kept by the commissioners of receipts and disbursements that they are to be made upon vouchers, audited and

XXVI REPORT OF THE SECRETARY OF THE TREASURY.

approved by the auditor of the District, and certified by at least two commissioners; that the accounts of the commissioners, with the original vouchers for disbursements, are to be submitted to the accounting officers of the Treasury Department of the United States for settlement and adjustment; and that advances for the payment of the current expenses of the District are to be made to the commissioners, from time to time, by the Secretary of the Treasury, as he shall approve requisitions made by them.

This construction has been adopted after a careful examination of the acts, and will be continued unless Congress shall signify its disapproval by additional legislation.

CLAIMS.

The attention of Congress is again called to the necessity of some legislation as to the adjudication of claims which are now within the jurisdiction of this Department.

While the Department is well organized for the investigation of accounts accruing in the ordinary course of current business, it is not adapted to the examination of old and disputed claims of a different character.

For the proper investigation of such claims the methods adopted in all our courts for ascertaining the truth, are undoubtedly the best. For this purpose a tribunal, which will require the best evidence of which the nature of the case will admit, the production of original papers rather than pretended copies, the sworn statement of the witness himself to facts in his own knowledge and not the hearsay of third parties, the examination and cross-examination of the witness, not his *ex parte* statement privately taken, a public hearing, and a public record of proceedings open to inspection, is essential.

These are some of the safeguards which the experience of the wisest 'legislators has placed around the judicial investigation of questions of law and fact.

It is evident that this Department cannot furnish these safeguards; and a provision of law which will relieve the Department of all important disputed questions of law and fact is recommended. The Court of Claims is a tribunal well qualified for such jurisdiction. It has the prestige of a court of justice; its judges are appointed for life, and transact their business deliberately, systematically, and publicly. They are governed by the ordinary rules of law, and their decisions are of record, with an appeal in proper cases to the Supreme Court of the United States.

In this connection, your attention is invited to the importance of providing some limitation of time within which claims against individuals and against the Government shall be prosecuted, or, for want of such prosecution, be forever barred. Such limitations, which form part of the codes of all civilized nations, rest partly upon the theory that the public peace demands an end of litigation, but mainly upon the well-founded assumption that a delay beyond a reasonable time to prosecute a claim, furnishes a presumption that it is unfounded.

Even as to real estate, an acquiescence in a known adverse possession for twenty years, in most of our States furnishes a conclusive bar to the claim of any person out of possession. The limitation of six years after the claim against the Government first accrues, established by law in the Court of Claims, seems to be reasonable.

With regard to the claims in favor of the Government, especially against those who have executed bonds as sureties, it seems just that some provision should be made for the protection of the defendants. Cases frequently arise where suits are brought against a surety upon a bond, upon the revision of some account which has been apparently finally settled for many years, where the principal and other sureties have died or are insolvent, and where the Government should have enforced its claim while they were alive and solvent. In such cases the only relief which the Secretary can extend is under the general law authorizing compromises, a remedy subject to much doubt and embarrassment.

All legislation upon this subject should look to the quieting of old claims, whether against or in favor of the Government. A decision, made as final by the accounting officers or by the Secretary or other officer of this Department having jurisdiction, should be regarded as final, both in the Department and in all other tribunals; and all propositions providing for the revision, in the Court of Claims or elsewhere, of such decisions, are opposed to the true principles of legislation.

DUTIES ON IMPORTS.

The embarrassments alluded to in the last annual report in regard to the collection of duties on sugar have not ceased. Seizures have been made of cargoes of sugar claimed to be artificially colored for the purpose of reducing the duties at the custom-house, and a suit involving one of these cases was tried at Baltimore at great expense to the Government and to the importers, and was recently concluded, the verdict being that the sugars were artificially colored after the process of manufacture was completed, but that it was not proven that the

XXVIII REPORT OF THE SECRETARY OF THE TREASURY.

importer of the sugars had a knowledge thereof at the time of making entry. Though the claim of the Government, that the sugars had been artificially colored for the purpose of defrauding the revenue, is maintained, it is powerless, under the anti-moiety act of June 22, 1874, to enforce fines, penalties, and forfeitures, against persons or property, unless there is proof of guilty knowledge of fraud.

It is deemed imperative that some change in the mode of collecting duties on sugar should be had, and it is preferred, as stated in the last report, that the duty should be at one rate on all sugars, up to a point which will exclude temptation either to color sugar for the purpose of reducing the duty, or to commit fraud by means of sampling and classification. The duties now are, to a large extent, dependent upon the fidelity of the sampler, one of the lowest-paid officers in the public service.

In the event that duties upon sugars are made dependent to any considerable extent upon color by the Dutch standard, it is recommended that authority be given to this Department to ascertain the true saccharine strength of imported sugars by means of the polariscope, and that the relations between the color of sugars and their saccharine strength be definitely prescribed by Congress.

Difference between duties remitted by the United States in 1877, and value of excess of imports in 1877 over 1875.... 15, 661

So that we have surrendered duties in an amount greater than the entire excess of exports in 1877 over those of 1875.

Of the duties thus surrendered in 1877, \$716,732 was on sugars alone. The advantages have thus far not been reciprocal, but, as has been shown, have been largely in favor of Hawaii, and it is probable that the benefits in favor of Hawaii will increase largely.

While not recommending a general revision of the tariff at the present time, it is deemed important that upon some articles the ad-valorem

duties now assessed should be converted into specific duties. As a rule specific duties are to be preferred to either ad-valorem or compound rates, and, in any future revision of the tariff, it is hoped that Congress will give preference to this system of imposing duties, as far as practicable. The argument in favor of specific duties applies with great force to kid gloves, concerning the value of which, under the present ad-valorem duties, serious differences of opinion have occurred between the importers and the Government during the past year, which have led to protracted delays in the ascertainment of the dutiable value, and consequent injury to the mercantile community.

While it may not be practicable to frame a specific duty which would be entirely equitable upon all classes of leather gloves, it is believed that such specific rates of duty can be levied, as, while yielding as much revenue as the present rate based upon the market value, will make a just distinction between the higher and lower grades of gloves, and avoid the uncertainty and contention produced by the present duty.

The subject of specific duties upon silk piece goods is also commended to the consideration of Congress. The efforts of the Department to collect duties on silks upon such a basis of value as shall meet the demands of the present law, have not been attended in all cases with success. The law contemplates the assessment of duty on the market value or wholesale price, and presupposes a price at which any person in the ordinary course of trade may purchase the goods. European manufacturers of silks consign their goods to agents in this country for sale and no sales for shipment to the United States are made in the open foreign market of such goods. Consequently there is no basis upon which their dutiable value can be ascertained.

It is believed that invoices of goods consigned to the United States for sale are as a rule undervalued, and that by such consignments the trade in silks and kid gloves is kept within the control of a small number of commission merchants, while the mass of American importers are excluded therefrom. This faulty system has had the effect, if not so designed, largely to defraud the revenue, and to enable the few who control the business to invoice their goods at the lowest rates and to command the highest rates from purchasers.

The adoption of specific duties would place the importer who purchases in the foreign market, and the manufacturer who ships his goods on consignment, upon an equal footing at the custom-house, and obviate the difficulties in collecting the revenue on this class of goods.

Examinations made during the past year by the officers of this Department, have led to the conviction that the present provisions of

law allowing abatements of duties on account of damage to imported merchandise on the voyage of importation, are neither, upon the whole, equitable to the importer, nor just to the Government. The extent of such damage on many classes of goods can only be conjectured; and it has been alleged that larger allowances have been made at some ports than at others, on goods of the same class, which occupy about the same time in transit from the foreign market.

The repeal of all laws allowing damage upon the voyage of importation, would place all persons upon an equal footing, as loss by damage can be guarded against by prior insurance. There is reason to believe that the larger importing houses of the United States would gladly favor such a measure, and its adoption is therefore recommended.

The continued experience of this Department, during the past year, has justified the recommendation made in the last report in favor of such a change in the law as will offer increased inducements to parties who may be able to secure a knowledge of frauds upon the customs revenue, to bring it to the attention of the customs officers.

The pecuniary inducements which this Department has been able to offer, under existing laws, have not been sufficient to induce parties to make active efforts to search out such frauds, and bring the offenders The Secretary does not recommend a return to the to punishment. system which prevailed prior to the passage of the so-called anti-moiety act of June 22, 1874, so far as that system conferred large emoluments upon officers of the Government, but he is satisfied that additional legislation is necessary in order to place within the control of this Department the machinery necessary to develop proof of frauds, which under any system of customs duties are likely to arise.

There appears to be a necessity for the adoption of some measure by Congress to secure greater efficiency and uniformity in appraisements of imported merchandise.

Under the present system, each local appraiser is independent, and has no knowledge of the action taken by appraisers at other ports upon the articles which he is called upon to appraise. It thus occurs that the values found at the various ports are not at all times uniform upon the same class of goods. It is also a matter of frequent occurrence that merchandise is classified under one rate of duty at one port, while at other ports it is entered by a different name, and subjected to a different rate of duty. A bill will be prepared and submitted to the proper committee of Congress to remedy this and other defects in the present machinery for collecting the customs revenue.

Every possible effort has been made during the past year to reduce

the expenses of collecting the revenue from customs, with the result already stated. There are many customs districts, however, which might be abolished, and in which the interests of the Government could be well protected by subordinate officers connected with the more important districts in the same region of country, and with considerable saving of expense.

Under section 253 of the Revised Statutes, the Secretary of the Treasury may discontinue any port of delivery, the revenue received at which does not amount to the sum of \$10,000 a year. It is recommended that authority be given, also, to abolish ports of entry where the receipts do not amount to the sum specified, placing subordinate officers, if necessary, at such ports, to be attached to other collection districts; or to consolidate two or more districts, should it be found desirable.

Attention is called to the report of the chief of the special agents, showing the nature and character of the duties performed by them during the past year. The importance of this service is manifested in the economy and efficiency produced by the efforts of these agents, who, being generally familiar with the customs service, are able to discover and check irregularities, and to detect and prevent frauds.

EXPORTS AND IMPORTS.

The gold values of the exports of merchandise from the United States, and imports of merchandise into the United States, during the last fiscal year, as appears from returns made to, and compiled by, the Bureau of Statistics, are as follows:

Exports of domestic merchandise \$680, 709, 26	•
Exports of foreign merchandise 14, 156, 49	8
	_
Total exports of merchandise 694, 865, 76	6
Imports of merchandise	2
	_
Excess of exports over imports of merchandise 257, 814, 23	4

Compared with the previous year, the importations are less by \$14,271,594, and the exportations greater by \$92,390,546.

The annual average of the excess of imports over exports of merchandise, for the ten years ended June 30, 1873, was \$104,706,922; but, during the last three years there has been an excess of exports over imports as follows: in 1876, \$79,643,481; in 1877, \$151,152,094; and in 1878, \$257,814,234.

XXXII REPORT OF THE SECRETARY OF THE TREASURY.

The total amount of exports and imports of specie and bullion, during the last fiscal year, has been as follows:

Exports of specie and bullion	§33, 740, 125
Imports of specie and bullion	29,821,314
· <u>-</u>	
Excess of exports over imports	3, 918, 811

The importation of specie and bullion was less than for the preceding year by \$10,953,100, and the exportation less than for the preceding year by \$22,422,112.

The excess of such exports over imports has decreased from \$71,231,425 in 1875, to \$3,918,811 in 1878, as above stated.

The excess of exports over imports of merchandise during the first four months of the current fiscal year amounted to \$81,415,477, and during the corresponding months of the last fiscal year to only \$34,295,076.

During the first four months of the last fiscal year there was an excess of exports over imports of coin and bullion amounting to \$3,430,787, whereas, during the first four months of the current fiscal year, there has been an excess of imports over exports of coin and bullion amounting to \$3,355,882, making a change in this respect of \$6,786,669.

The total gold value of exports of domestic merchandise, from the United States, has increased from \$269,389,900 in 1868, to \$680,709,268 in 1878—an increase of .153 per cent.

With one or two unimportant exceptions, the United States stands alone among the commercial nations of the globe, with respect to the excess of exports over imports.

The increase in our exports consisted mainly of breadstuffs, provisions, agricultural implements, iron and manufactures of iron, copper and manufactures of copper, manufactures of cotton, leather and manufactures of leather, and petroleum.

The exportation of the manufactured articles referred to, increased from \$14,287,486 in 1868, to \$37,250,882 in 1878.

Many highly-wrought products of American manufacture, previously exported in very small quantities, or not at all, now find profitable markets in foreign countries, and certain of these commodities are now being exported to countries from which, a few years ago, they were largely imported into the United States.

Many branches of industry are now feeling the quickening influences of a foreign demand, and the possibility of successfully competing in the markets of the world with some of our older commercial and manufacturing rivals, is a source of the highest encouragement and of confidence in the future.

Of the exports of domestic merchandise, during the year, the products of agriculture comprised 77 per cent., and exceeded the entire value of our imports of all classes of merchandise from foreign countries.

The exports of these products have risen from \$368,852,972 in 1872, to \$536,039,951 in 1878, and the capacity for their further increase would seem to be limited only by the demand therefor.

In connection with the increase of our exports, attention is invited to the decrease of our imports of merchandise from \$642,136,210 for 1873, when they reached their maximum, to \$437,051,532 for 1878—a decrease of \$205,084,678.

This decrease of imports consisted chiefly of manufactures of cotton, flax, and silk, of wool and manufactures of wool, and of iron and steel and manufactures thereof.

Of the latter, the importation of railroad-bars of iron and steel, decreased from 595,321 tons, in 1872, to 12 tons, in 1878; but their product in the United States increased from 2,958,141 tons, during the five years from 1867 to 1871, to 4,056,340 tons, during the five years from 1873 to 1877, and from this product has been supplied the demand for such bars necessary for the extension and renewal of railroads, of which there are in operation seventy-nine thousand miles.

ALASKA.

Amicable relations have, generally, been sustained between the Indians and whites in the Territory of Alaska during the past year. Some outrages have, however, occurred, and the collector of customs at Sitka states that bloody outbreaks may be apprehended at any time in consequence of the means now existing for producing intoxicating liquor, and from the lack of any organized government in the Territory.

It is recommended that authority be conferred upon this Department to prevent the shipment to that Territory of molasses, or other articles from which intoxicating liquors are ordinarily made. The condition of affairs there also demands the establishment of some form of government competent to restrain disorder, and insure the safety of the inhabitants. No expensive system is necessary; but the establishment of some supreme authority for the Territory would tend to encourage immigration, and insure protection to those who may go there. At present, the only officers exercising any authority on the main-land

XXXIV REPORT OF THE SECRETARY OF THE TREASURY.

are the collector of customs at Sitka, and his subordinates, and their authority is confined to the execution of the customs laws. There is but little customs business transacted in the Territory, and it is possible that the additional authority necessary might be wisely conferred upon these officers.

The Alaska Commercial Company, under its lease of the seal islands, has taken during the present season the maximum number of one hundred thousand skins allowed by law, upon which the tax due the Government is \$262,500, which, with the rental of \$55,000, will make a total revenue of \$317,500 derived from that source. The Alaska Commercial Company appears to have faithfully complied with all the conditions of its contract with the Government.

INTERNAL REVENUE.

The receipts from the several sources of taxation under the internalrevenue laws for the fiscal years ended, respectively, June 30, 1877, and June 30, 1878, are shown in the following tabular statement:

Sources.	1877.	1878.	Increase.	Decrease.
Spirits. Tobacco Fermented liquors. Banks and bankers Penalties, &c Adhesive stamps Back taxes under repealed laws	9, 480, 789 1 3, 829, 729 3 419, 999 4	2 40, 091, 754 67 9, 937, 051 78 3, 492, 031, 85 346, 007 55 6, 380, 405 13	\$456, 262 61	73, 991 86
Total	118, 995, 184 2	111, 097, 725 49	647,660 77	8, 545, 119 53

The amount of collections exhibited in the foregoing table includes commissions on sales of stamps, paid in kind, as well as certain sums collected, but not deposited during their respective fiscal years. An apparent discrepancy is thus caused between the amounts of collections given in the table and those shown by the covering-warrants of the Treasury.

By comparing the internal revenue for the fiscal year terminated in June last, with that for the fiscal year ended June 30, 1877, it will be seen that there has been a decrease during the past year of nearly eight millions of dollars, and that of this amount upwards of seven millions arose in the collections on spirits, owing to causes which have been already adverted to.

The needs of the public service require that no reduction of internal revenue taxes be made. The commodities from which the internal revenue is mostly collected, namely, spirits, tobacco, fermented liquors, and stamps, are those which properly bear the burden of the tax, and the present rates are, in the main, equitable and satisfactory; and to them the trade in those commodities has become adjusted. Any change in these rates, or agitation of change, disturbs the course of business, and is prejudicial both to dealers and the revenue. Stability in the rates of taxation is, in view of the present condition of the country, especially desirable.

The number of collectors is, at present, one hundred and twenty-six, (126.)

COMMERCE AND NAVIGATION.

The total tonnage of vessels of the United States is 4,212,764 tons, a decrease of 29,836 tons from that of the fiscal year ended June 30, 1877. The following table exhibits the total tonnage for the last two years:

	1877.		1878.	
	Vessels.	Tons.	Vessels.	Tons.
Registered, engaged in foreign trade Enrolled and licensed, engaged in domes- tic commerce	2, 988 22, 398	1, 611, 193 2, 631, 407	3,037	1, 629, 047 2, 583, 717
Total	25, 386	4, 242, 600	25, 264	4,212,764

The decrease in the total tonnage is exhibited in the following table:

Increase.	No.	Tons.	Decrease.	No.	Tons.
Vessels built Wrecked and rebuilt Balance—(Absolute de- crease)	1,258 1 122	235, 504 185 29, 836	Sold to foreigners	138 760 463	43, 607 165, 547 56, 195
	1,381	265, 525		1,381	265, 525

The tonnage of vessels built is about 33 per cent. in excess of that of last year.

By reference to the foregoing table, it will be seen that the excess of the losses of tonnage by wrecks, sales to foreigners, and other causes,

XXXVI REPORT OF THE SECRETARY OF THE TREASURY.

over the gains by building, amounts to 29,836 tons. On the other hand, the increase of tonnage in vessels built is about 30 per cent. over that of last year. But the number of vessels built includes only such as have been documented, and does not embrace vessels built and sold to foreigners without registration.

The vessels built during the year ended June 30, 1878, are classed as follows:

	Number.	Tonnage.
Sail-vessels	532	106, 066. 51
Steam-vessels	334	81, 859. 60
Enrolled canal-boats	19	1, 908. 50
Barges	373	45, 668. 96

The discrimination between boats and barges, not propelled by sail or steam, which arises from the operation of the act of April 18, 1874, still continues to exist, to the great embarrassment of the Department. Under the construction which it has been considered necessary to give to this statute, one class of barges, that are partially employed in the internal waters of a State, is exempt from enrolment and license, while other vessels of similar structure, employed exclusively on the navigable waters of the United States, are required to be enrolled and licensed.

This discrimination is pernicious, and should not be permitted to exist. But I see no practical remedy for it other than by restricting the issue of enrolments and licenses to vessels propelled by sail or steam. A bill to that effect has already received the favorable consideration of one branch of Congress.

The total number of entries of vessels into ports of the United States from foreign countries, as returned by the Bureau of Statistics, during the year ended June 30, 1878, was 30,796; of these entries, 10,594 were of American vessels; the total number of clearances foreign, during the same time, was 31,364; of this number, 10,872 were clearances of American vessels. Of the total tonnage thus entered, about 25 per cent. was American and 75 per cent. foreign; of the total number of clearances foreign, about 26 per cent. was American, and 74 per cent. foreign.

STEAMBOAT INSPECTION.

During the past year, there have been inspected 4,137 steam-vessels, of an aggregate tonnage of 1,017,432.03 tons, and licenses have been issued to 14,489 officers.

The total receipts from the inspection of vessels and licensing of officers amounted to \$272,703 85, and the total disbursements for sala-

ries and travelling and other expenses were \$216,249 65, leaving a surplus unexpended of \$56,454 20.

REVENUE MARINE.

The thirty-seven vessels of the Revenue Marine have cruised during the year an aggregate of 238,505 miles, and their officers have boarded and examined 31,096 vessels, of which 2,009 were found to have violated the law in some particular, and, accordingly, were reported to the proper authorities or seized. One hundred and ninety-two vessels wrecked or in distress, with an aggregate of nine hundred and twenty-six persons on board, have been assisted. The estimated value of property saved, consisting of these vessels and their cargoes, is about \$1,700,000. One hundred and forty-two persons have been saved from drowning.

The expenses of the service for the last fiscal year were \$844,001-70. Under the law passed at the last session of Congress, fifteen officers of the Revenue Marine have been detailed for duty in connection with the Life-saving Service. In addition to these services such officers are required, whenever practicable, to perform their regular duties.

Special services have been rendered by the vessels of the Revenue Marine in assisting the United States Commissioner of Fish and Fisheries in the prosecution of his labors; in placing buoys and transporting supplies on the Pacific coast for the light-house establishment; in aiding the officers of the Government to recover timber wrongfully taken from the public reservations; and in conveying to the life-saving stations their supplies and outfits.

To maintain the public peace on the main-land and enforce the laws and regulations relative to the seal-fisheries and sea-otter hunting-grounds, two revenue steamers were detailed to cruise in the Alaska region the past season. One of them, the "Richard Rush," remained during the season in the region of the seal islands. The reports received from the commanders of these vessels show that their presence is effective in accomplishing the object sought. Mining operations upon the Stikene river are reported as active, and to have attracted to that locality a large number of miners.

The revenue-cutters which can be made available for service in Alaskan waters were not designed originally for such long voyages as this work requires, and are not well adapted to this cruising. Should Congress deem it advisable to continue such service, a vessel specially designed to perform the duty should be provided.

A few of the older vessels of the Revenue Marine will soon need exensive repairs. Some of them are provided with machinery of the old

XXXVIII REPORT OF THE SECRETARY OF THE TREASURY.

patterns, and are expensive in the consumption of fuel. It is believed that to replace them with new vessels, of improved design, would be true economy.

The recommendation, contained in the last annual report, for an appropriation of \$25,000 to provide a new vessel for use in the shoal waters upon the Gulf coast, between Lake Pontchartrain and Mobile bay, is renewed.

LIFE-SAVING SERVICE.

The report of the General Superintendent of this service exhibits the usual gratifying results.

The statistics of the past year show that the cases of disaster have been more numerous and severe than during any year of the existence of the service. The number of disasters to vessels reported by the superintendents of the several districts during the fiscal year, is one hundred and sixty-nine. These vessels had on board one thousand six hundred and eleven persons, of whom two hundred and twenty-one were lost. Of this latter number, one hundred and eightythree perished at the wrecks of the Huron and Metropolis. Three hundred and ninety shipwrecked persons were cared for at the stations, eight hundred and eighteen days of succor being afforded The value of property involved was \$2,622,335, of which \$1,094,975 was saved, and \$1,527,360 lost, there having been fifty-nine instances of the total loss of vessels and cargoes. Five of the fatal disasters reported, occurred at seasons when the appropriations did not admit of the stations being open for service, and two at such distances from the stations as to prevent early and efficient assistance conditions which had repeatedly been pointed out by the officer immediately in charge of the establishment, as defects calling for remedy, and likely to involve calamitous consequences. If allowance is made for the partial failure to save life in these cases, the mortuary record is smaller in proportion to the number of disasters and the number of lives imperilled than in any previous year since the enlargement of the field of the operations of the establishment under the legislation of 1874. the seven disasters referred to, one hundred and ninety-seven persons perished, leaving the loss of life where the efforts of the service were not thus trammelled at twenty-four. The report of the General Superintendent gives in detail the circumstances attending the loss of all the lives referred to.

Since the passage of the act of June 18, 1878, providing for the extension and development of the service, measures for carrying into

effect this legislation have been pursued as rapidly as possible. Thirteen new stations have been erected, and most of them manned for service, upon the coasts of North Carolina and Virginia, and three upon the coasts of Delaware and Maryland, at points especially needing this protection. Sites have been selected for all the stations designated by the act on the sea and lake-coasts, with one exception, and titles for these have been secured except in one instance. The establishment of the contemplated stations upon the Gulf coast has been delayed by the prevalence of yellow fever at the South; but steps have been taken for the commencement of work early in the spring upon these, and the other stations authorized. The organization of the life-boat service upon the lakes has been placed upon a better footing than before, and this, together with the earlier opening of the stations for service at all points, has had the effect of saving many lives during the late autumnal storms, which would otherwise have been lost.

A corps of efficient keepers has been secured under the operation of the provision for the increase of their compensation, and they have been duly clothed with the powers of inspectors of customs, and have received such instructions as will enable them to perform satisfactorily their added duties in regard to the protection of the revenue and of private property. The recent examinations of the keepers and crews show that the detail of revenue-marine officers as assistant inspectors in the several districts, has resulted in their improvement in *personnel* and discipline.

The great good which this service has accomplished in recent years, and the marked progress which it is making, amply justify this extension of its powers and resources, and promise still greater usefulness in the future, corresponding to the aid it may receive from fostering legislation.

LIGHT-HOUSE ESTABLISHMENT.

During the last fiscal year, eight new light-houses, one hundred and fifty-one river-lights, one fog-signal, fifty-one day-beacons, and forty-seven buoys have been established, and one light-house, sixty-four river-lights, and two light-ships have been discontinued.

The total at the close of the year was six hundred and sixty light-houses, six hundred and thirty river-lights, twenty-two light-ships, fifty-five steam fog-signals, four hundred and seventy-one day-beacons, and three thousand and two buoys.

The board has commenced using the mineral oil in the smaller lights on the New England coast, and by the end of the year it is expected

that this oil will be used in all the lights of the fourth, fifth, and sixth orders located on land.

The Fowey Rocks light-house has been completed, and is now in operation. It gives the anticipated protection to shipping in the more dangerous part of the Florida reefs. When the light-house for American Shoal is completed, these reefs will be thoroughly lighted.

The lights on the western rivers give great satisfaction to all interested in the river commerce. They are economically and thoroughly kept. A new lantern has been introduced which protects the light from wind and rain, and at the same time lessens the obscuration.

The lighting of these rivers has now fairly passed through the stage of experiment, and may be considered as forming a part of the lighthouse system.

The Department, as well as the whole scientific world, has suffered a great loss by the death, during the past year, of Prof. Joseph Henry, chairman of the board. Rear-Admiral John Rodgers has been selected to fill the chair thus vacated.

COAST SURVEY.

An abstract of the report of the Superintendent, for the present year, shows that the work in its several branches has been advanced at upwards of one hundred localities on the Atlantic, Gulf of Mexico, and Pacific coast of the United States, and at geodetic points on land.

The results of this important national survey include, amongst many intricate details, the accurate marking on charts of the dangers that beset navigation, and of the soundings generally in our sea approaches, of all light-houses, buoys, sea-marks, and life-saving stations in true position, and the variation of the compass; and the giving of exact information respecting tides and currents, and of the position and aspect from the sea of objects that serve as aids to the mariner. tion respecting the variation of the compass, like all marine features represented on the charts, depends greatly upon field-work. mination of the curves of equal compass variation for the use of mariners along the coast, can be well ascertained only by a combination of the results obtained by observations at sea and at stations in the interior of the country. So, also, coast lines for charts of considerable extent can be correctly traced only from inland points precisely known in relation to each other; and of these upwards of sixteen thousand have been finally determined in latitude and longitude. For present and future uses the positions are marked in the ground, and the locality of each is described in the records of the survey.

It will be readily seen that work for the coast development serves very important purposes in the interior. From that quarter calls are frequent for exact geographical positions on which future State surveys may be founded.

Much of the field-work involves computation requiring in the office the highest mathematical ability. From long-continued series the daily tides are computed at the office, and published a year in advance. In each year data of special importance for public uses are supplied from the computing division.

The coast topography, as far as completed, has been mapped on a scale sufficient for any purpose, not only of navigation, but for nearly all cases of engineering, and is represented by fourteen hundred and sixty sheets. The soundings are contained on thirteen hundred and eighty sheets. Many of the topographical and hydrographic sheets are yearly in request when local or harbor improvements are under consideration.

As heretofore, close relations are maintained between this and other branches of the public service, especially with the Navy, the Engineer department, and the Light-house Board.

The Coast-Survey office is the depository of the standard weights and measures of the United States. Copies there constructed have been supplied to many, and are being supplied to others, of the States and Territories, and to the custom houses, as rapidly as the appropriation for the purpose will permit. The comparisons are made with the originals by methods which meet every requirement for exactness.

THE MARINE-HOSPITAL SERVICE.

On the basis of expenditures as here stated, the average per capita cost of the relief furnished was \$20 04, which is less by \$4 18 than the lowest average cost for any previous year, and \$18 37 less than the

average for 1870. At the same time the character of the relief furnished has steadily improved.

The national quarantine act, with the execution of which the Surgeon-General is charged, was passed so late in the last session of Congress that the appropriation necessary to carry out its provisions could not be made. Notwithstanding this fact, everything has been done under the act which could be accomplished without the expenditure of money.

By the aid of voluntary contributions, an investigation as to the cause of the yellow-fever epidemic of 1878 has been undertaken, under the direction of the Surgeon-General, by a commission of experts, whose report will be submitted to Congress. The attention of Congress is called to the expediency of requiring, by law, an examination of the officers of this service as a requisite to their appointment. The Secretary renews the recommendation several times made to that effect.

The metric system of weights and measures has been adopted for medical and pharmaceutical purposes in the service during the year. No embarrassment has resulted from its adoption.

PUBLIC BUILDINGS.

The report of the Supervising Architect shows a satisfactory progress in the construction of the public buildings. During the year, four buildings have been commenced, seven have been practically completed, and five others are so far advanced that they will be completed by spring—some of these latter considerably within the estimates and appropriations made therefor. In addition to the work of construction, necessary repairs have been made upon various public buildings under control of this Department, of which there are one hundred and thirty-four besides those in course of erection. Large vaults are being constructed for the storage of silver dollars at the sub-treasuries in New York, Philadelphia, and San Francisco, the aggregate cost of which will be about \$65,000.

The details pertaining to the rental of buildings and rooms for officers of customs, supervising and local inspectors of steam-vessels, and assistant treasurers, are under charge of the Supervising Architect, and he reports that the number of buildings and portions of buildings rented for these purposes is one hundred and eighty-eight, the aggregate rental of which is \$149,878 per annum.

OFFICIAL SERVICE.

In closing his annual report, the Secretary deems it proper to cal attention to the great variety of jurisdiction imposed by law upon the

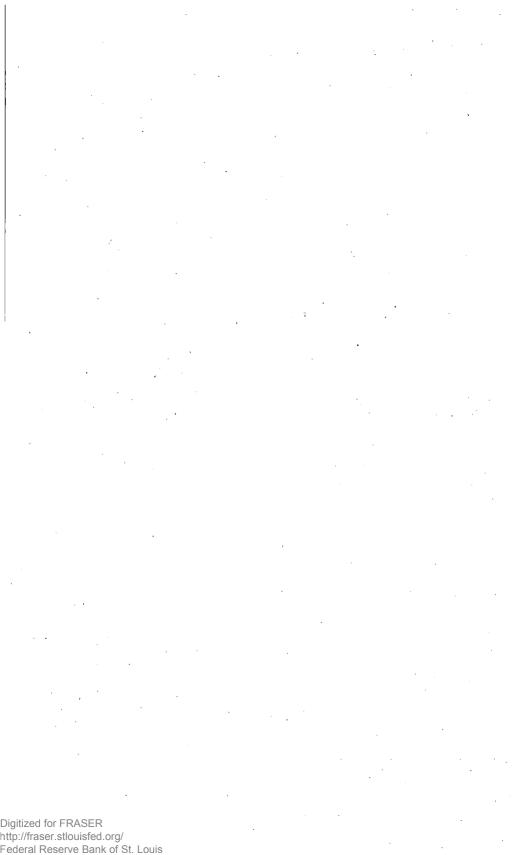

Treasury Department. Since its organization, by act approved September 2, 1789, it has been placed in charge of the commerce and navigation of the country; of a revenue marine, consisting of thirty-seven steam and sailing-vessels, engaged in the prevention of smuggling and the assistance of distressed and wrecked vessels; of the engraving, printing, and redemption of United States notes; of the collection of commercial and other statistics; and of the construction and custody of public buildings. It has also the exclusive supervision of the National Banks, of the Light-house Establishment, the Coast Survey, the Life-saving Service, and the Marine-hospital Service-together constituting a diversity of duties requiring the highest skill, learning, fidelity, and enterprise on the part of its officers. The laws relative to these matters have been supplemented by regulations and decisions, and all combined form an admirable system for the administration of the business of the Department. It will, accordingly, be seen that the collection and disbursement of public revenues, and the settlement of the accounts therefor, constitute a small part of the work of the Department, and it would seem proper that the persons performing duties so varied and important, should have a tenure of office terminable only for cause, as is the case in the army and navy, and that provision be made for increased pay as a reward for long-continued and faithful service.

The general conduct of the officers of this Department has been exemplary, and probably no service presents a better record of responsible trusts faithfully and honestly discharged.

The several reports of the heads of bureaus and divisions are herewith respectfully submitted.

JOHN SHERMAN, Secretary of the Treasury.

Hon. SAMUEL J. RANDALL, Speaker of the House of Representatives.

Table E.—Statement of outstanding principal of the public debt, &e.—Continued.

Year.	Amount.
July 1, 1869	2, 353, 211, 332, 35 2, 253, 251, 328, 75 *2, 234, 482, 993, 20 *2, 251, 690, 468, 46 *2, 232, 284, 531, 96 *2, 180, 395, 067, 16 *2, 205, 301, 392, 10

^{*} In the amount here stated as the outstanding principal of the public debt are included the certificates of deposit outstanding on the 30th of June, issued under act of June 8, 1872, amounting to \$31,730,000, in 1873; \$58,760,000, in 1874; \$58,415,000, in 1875; \$32,840,000, in 1876; \$54,950,000, in 1877, and \$46,755,000, in 1878, for which a like amount in United States notes was on special deposit in the Treasury for their redemption, and added to the cash balance in the Treasury. These certificates, as a matter of accounts, are treated as a part of the public debt, but, being offset by notes held on deposit for their redemption, should properly be deducted from the principal of the public debt in making comparison with former years.

Statement of the principal of the public debt, including accrued interest thereon, less cash in the Treasury on the 1st day of July of each year, from July 1, 1869, to July 1, 1878, compiled from the published monthly debt-statements of those dates.

Year.	Outstanding principal.	Accrued interest.	Cash in the Treasury.	Debt less cash in the Treasury.
July 1, 1869 1870 1871 1872 1872 1873 1874 1875 1876 1877 1878	2, 353, 211, 332, 32 2, 253, 251, 328, 78 2, 234, 482, 993, 20 2, 251, 690, 468, 43 2, 232, 284, 531, 95 2, 180, 395, 067, 15	\$47, 447, 310 79 50, 607, 556 52 45, 036, 766 23 41, 705, 813 27 42, 356, 652 82 38, 939, 087 47 38, 647, 556 19 38, 514, 004 54 40, 882, 791 89 36, 404, 551 37		\$2, 489, 002, 480, 58 2, 386, 358, 599, 74 2, 292, 039, 634, 90 2, 191, 486, 343, 62 2, 147, 818, 713, 57 2, 148, 088, 241, 16 2, 128, 688, 726, 32 2, 099, 439, 344, 99 2, 060, 158, 223, 26 2, 035, 786, 831, 82

^{*} It will be noticed that there is a difference in the amounts represented by these two statements as the principal of the debt July 1, 1869, and July 1, 1870. This difference is explained thus: In the principal of the debt as shown by the monthly debt-statements of those dates, the bonds purchased for the sinking-fund and paid for from money in the Treasury, were included as a part of the outstanding debt and were also treated in the cash as a cash item, or asset, for the reason that at that time there was no authority of law for deducting them from the outstanding debt. Congress, by the sixth section of the amount of each class of the outstanding debt to which they respectively belonged, and such deductions were accordingly made on the books of the department and in the table of the debt in the annual report,

OLD DEMAND-NOTES.	I	1	ī	,	1	1	1
The act of July 17, 1861 (12 Statutes, 259), authorized the issue of \$50,000,000 Treasury notes, not bearing interest, of a less denomination than fifty dollars and not less than ten dollars, and payable on demand by the assistant treasurers at Philadelphia, New York, or Boston. The act of August 5, 1861 (12 Statutes, 313), authorized the issue of these notes in denomination of five dollars; it also added the assistant treasurer at Saint Louis and the designated depositary at Cincinnati to the places where these notes were made payable. The act of February 12, 1862 (12 Statutes, 338), increased the amount of demand notes authorized \$10,000,000.		On demand	None	Par	60, 000, 000 00	60, 000, 000 00	62, 297 50
SEVEN-THIRTIES OF 1861.	}						
The act of July 17, 1861 (12 Statutes, 259), authorized a loan of \$250,000,000, part of which was to be in Treasury notes, with interest at 7.7 per centum per amum, payable three years after date. FIVE TWENTIES OF 1862.	3 years	August 19 and October 1, 1864.	71 per cent	Par	140, 094, 750 00	140, 094, 750 00	16, 800, 00
The act of February 25, 1862 (12 Statutes, 345), authorized a loan of \$500,000,000 for the purpose of funding the Treasury notes and floating debt of the United States, and the issue of bonds therefor, with interest at 6 per centum per annum. These bonds were redeemable after five and payable twenty years from date. The act of March 3, 1864 (13 Statutes, 13), authorized an additional issue of \$11,000,000 of bonds to persons who subscribed for the loan on or before January 21, 1864. The act of January 28, 1865 (13 Statutes, 425), authorized an additional issue of \$4,000,000 of these bonds and their sale in the United States or Europe. LEGAL-TENDER NOTES. The act of February 25, 1862 (12 Statutes, 345), authorized the issue of \$150,000,000 United States notes, not bearing interest, payable to bearer, at the Treasury of the United States, and of such denominations, not less than five dollars, as the Secretary of the Treasury might deem expedient, \$50,000,000 to be in lieu of demand-notes authorized by the act of July 17, 1861; these notes to be a legal tender. The act of July 11, 1862 (12 Statutes, 532), authorized an additional issue of \$150,000,000 United States Treasury notes, of such denominations as the Secretary	1	On demand	None	Par	450, 000, 000 00	†449, 338, 902 10	346, 681, 016 00
of the Treasury might deem expedient, but no such note should be for a fractional part of a dollar, and not more than \$35,000,000 of a lower denomination than five dollars; these notes to be a legal tender. The act of March 3, 1863 (12 Statutes, 710), authorized an additional issue of \$150,000,000 United States notes, payable to bearer, of such denominations, not less than one dollar, as the Secretary of the Treasury might prescribe; which notes were made a legal tender. The same act limited the time at which Treasury notes might be exchanged for United States bonds to July 1, 1863. The amount of notes authorized by this act were to be in lien of \$100,000,000 authorized by the resolution of January 17, 1863 (12 Statutes, 822).							14.00 P. 1

^{*\$50,000,000 6} per cent. stock issued at a discount of \$5,338,768.09, being equivalent to 7 per cent.

A system of examining custom houses upon an unusually thorough basis was inaugurated during the year. Printed instructions for such examinations were issued to the agents, in which were embodied a series of questions, to answer which required a careful inspection of the books, accounts, &c., of each district. Under these instructions there were sixty-seven customs districts examined. Eight cases of defalcation by customs officers were discovered, amounting in all to \$22,662 29. Of this amount, \$4,754 83 has been paid, \$15,340 75 is in suit on official bonds of collectors, and \$2,566 71 has been charged to collectors by the accounting officers.

At the beginning of the fiscal year the supervision of the transportation of dutiable merchandise in bond, and of bonded warehouses, and correspondence connected therewith, was assigned to this division. During the year eighty-seven bonds for warehouses were approved, and one hundred and twenty-three warehouses discontinued, leaving in force, on June 30, 1878, three hundred and forty-eight bonds, covering four hundred and ninety-eight buildings, forty-four yards, and ten elevators; in all of which bonded goods are stored. There were twenty-two bonds of common-carriers approved, and eighteen discontinued, leaving one hundred and twenty-five bonded routes (of which twenty-seven are for the transportation of unappraised goods) in operation June 30, last. These routes are bonded by railroad, steamboat, and canal companies, and, in a few instances, by single individuals.

The number of packages of unappraised merchandise transported from ports of first arrival to ports of destination, under immediate transportation bonds, during the year, was 304,706, on which the invoice value was \$7,861,239, and the estimated duties \$4,044,162 18.

By means of monthly reports from the ports of importation and of destination, supervision is exercised over the goods forwarded under immediate transportation bonds, and all missing packages traced and discrepancies reconciled.

From the monthly reports of collectors of customs, showing the amount of business transacted, the receipts from all sources, and the cost of collection, a statement has been prepared, from which it appears that the saving during the last fiscal year, in the cost of collecting the revenue, over that of the year previous, was \$778,492 25. It is also shown by this statement that, in a large number of districts, the cost of collection forms a large percentage of the amount collected, while in thirty-three districts the cost exceeds the receipts. In many of these districts, which were established in 1799, when all commerce was carried on in sailing-vessels, there are now no importations of foreign merchandise whatever, and the duties of the collectors are confined to routine matters pertaining to the coastwise trade.

It is respectfully suggested, that if the Secretary of the Treasury were authorized by law to consolidate two or more customs districts, whenever in his judgment the public interests so require, the Department would be able to materially increase the efficiency of the service and lessen expenses without endangering the revenue.

UNDERVALUATIONS.

It has been estimated by many persons, well-informed in respect to customs matters, that the loss to the revenue by undervaluations, since the repeal of the moiety acts, would reach as high as \$25,000,000 per annum. There can be no doubt that many millions are lost every year on this account. In some classes of merchandise, American merchants

have been compelled by reason of undervaluations to stop importing on their own account, and to buy their goods from commission merchants, who receive the merchandise on consignment from manufacturers in Europe. It has been argued that the increase of importations by consignment in this country is the result of progress in business, and is simply following the course of European trade; and that the fact that merchandise of a particular character is imported into the United States on consignment only, and is never purchased in Europe by an American dealer, is no indication that such merchandise is undervalued. To this, it may be answered that goods of the same character and quality as those sent to the United States on consignment only are freely sold at the places of manufacture in Europe to other markets than the United States, and would be purchased by importers in this country, having resident buyers in the European markets, if it were possible for them to buy the goods at the market rates, and import and sell them in competition with consigned goods without loss. This cannot be done so long as consigned goods are allowed to be entered at the values fixed by the manufacturers in Europe, who send them to their regular agents in this country for sale.

Special efforts have been made by this division to ascertain the true market value of certain lines of goods which are imported by consignment only, and these efforts have been partially successful.

Owing to the provisions of the act of June 22, 1874, under which it is necessary to prove an intent on the part of the importers to defraud the revenue before forfeiture of merchandise seized for undervaluation can be obtained, the Government is practically barred from any remedy in the courts for frauds by the undervaluation of consigned goods. The invoices of this character are made by the manufacturers, whose agents in the United States, making the entry and oath as to value according to their best knowledge and belief, (their knowledge of such value being ostensibly derived from the invoices only,) need not, necessarily, be familiar with the actual foreign-market value of the goods.

In all cases where reliable information has been obtained respecting market values the facts have been laid before the appraisers, who, when they found the evidence of a character to warrant it, have made proper advances upon the invoices, and where such advances are above 10 per cent., and therefore involve an additional duty of 20 per cent., it has been the almost invariable practice of the importers to demand a reappraisement. In many of these reappraisements, the advances made by the appraisers have been sustained. In a recent instance, where, upon information furnished by this division, an advance of 35

per cent. was made upon a consigned invoice of silks, such advance was sustained upon a reappraisement, the head of one of the largest American dry-goods firms being the merchant appraiser. A subsequent invoice of the same class of goods was voluntarily advanced by the consignee 25 per cent. upon entry, and this advance was afterwards increased by the appraiser to equal the value fixed upon the reappraisement referred to, without appeal or protest on the part of the consignee.

The evasion of full payment of duties by undervaluations of certain standard goods, notably silks, velvets, laces, and fine kid gloves, has not only been a subject of comment among merchants, but has for the past four years, with the exception of a few invoices of gloves imported at Philadelphia, prevented direct importations of such goods by American merchants.

With respect to silks, it is very difficult to obtain conclusive evidence of value, because the element of weighting by the dyer is an uncertain, and to all except the manufacturer of the particular goods which may be under examination, an unknown quantity. The best experts are nable to give a confident opinion within 10 per cent. of the relative values of two pieces of silk.

The determination by reappraisement of the true market value of certain importations is rendered difficult by the prevailing practice among agents of foreign manufacturers of acting as expert witnesses for one another. It also not unfrequently happens that the merchant member of the reappraising board is connected, directly or indirectly, with some one of the foreign agencies referred to.

Another obstacle in the way of obtaining accurate information on this subject, is the reticence of merchants. Compelled, by reason of the existing monopoly of the trade in silks and gloves, to have business relations with the agents of foreign mannfacturers, it is readily seen that a due regard for their own interests is sufficient to prevent that assistance in exposing and suppressing the evil of undervaluations which could and would under other circumstances, no doubt, be rendered to the Government.

The disposition on the part of European manufacturers and tradesmen, particularly on the Continent, to evade the American tariff, has grown so wide-spread that even retail dealers, milliners, dress makers, and other trades-people are in the habit of tendering to American tourists, as an inducement to them to purchase goods, false invoices to enable such tourists, upon their return home, to evade a portion of the legal duty. Although the fact of the existence of a system of deliberate undervaluations is known to every well-informed merchant in

the country, the difficulties attending the production of such convincing proof in specific cases as will justify proper advances on appraisement are almost insuperable. The appraising officers may be sustained in one or two, or a dozen, reappraisements, but, sooner or later, through the persistent and continued efforts of the commission agents, the invoices of foreign manufacturers again become the basis for assessment of duty. By thus undervaluing their invoices the manufacturers are really enabled to fix the duty to be paid, without regard to the rate prescribed by law.

Take, for instance, the importations of kid gloves. A merchant in Philadelphia bought an invoice of kid gloves, of the first quality, at 54 francs per dozen, from a manufacturer in Europe who had not established an agency in the United States. These gloves were entered at the custom-house in Philadelphia, at that price, and the duties upon them were paid. At the same time, gloves equal in quality to those above mentioned, and manufactured in the same town in France, were invoiced and entered at the custom-house, New York, at 42 francs per dozen. In the one case the merchant pays the Government, after deducting the usual discounts, \$4.79 per dozen, or 50 per cent. ad valorem, while in the other the manufacturer, through his agent, pays \$3.72 per dozen, or $38\frac{8}{10}$ per cent. ad valorem, assuming that the sales to the Philadelphia merchant were made at the true market value.

In his charge to the jury in the Sherry-wine case, 2d Benedict, page 249, Judge Blatchford illustrates this condition of affairs as follows:

"Every ad-valorem system of revenue must be made, as far as possible, uniform in its operation, or it will be oppressive and unjust. Merchandise, as a matter of course, will be shipped to this country by the man who manufactures it, and like merchandise will be shipped here by the man who purchases it. If the manufacturer is allowed to invoice his merchandise at what it costs him to make it, and the purchaser is compelled to invoice his goods at what it costs him to buy them, inasmuch as the purchaser must pay for the goods, not only what it costs the manufacturer to make them, but the profit of the manufacturer to make them. turer in addition, an unfair discrimination is made against the purchaser, enabling the manufacturer to undersell him in the market here, and, in the end, surely drive him out. This is a principle which is easy to be understood, and commends itself to the good sense of every man. Hence the rule referred to, and which finds expression in the language which I have cited from the act of 1863. In the case of a purchaser of goods, the cost to him to buy the goods abroad is assumed, as a general rule, by the law to indicate the actual market value of what he buys, it being presumed that he buys at the ordinary actual market value; and to put the purchaser upon the same footing with the manufacturer, to make an unjust discrimination against the purchaser, and in favor of the manufacturer, and to enable the Government to collect substantially the same amount of duty, at the same

4 F

ad-valorem rate, on the same quantity of the same description of merchandise, whether shipped here for account of the purchaser of it, or for account of its manufacturer, the law requires the manufacturer to invoice his goods, when he imports them here as his own, at their actual market value in the principal markets of the country where they were manufactured, no matter what their cost to him, no matter whether they cost more or less than such actual market value—in substance and effect it requires the manufacturer to invoice them at what the purchaser would have to pay for them and invoice them at. That is the theory of the law, and the object of the law; and its language endeavors to carry out that theory and object, as far as it is possible for human legislation to carry out a principle."

There appears to be but one effectual remedy for these difficulties, and that is the substitution of specific for ad-valorem duties, both as to silks and gloves.

In this connection attention is called to a provision of the British customs laws, in existence at the time when ad-valorem duties were collected in Great Britain, under which merchandise alleged to be undervalued was taken possession of by the customs officers, and the value as stated in the invoice, with 5 per cent. addition, was paid to the importer as a full equivalent for his goods. A law of this kind on our statute-books would have a wholesome effect upon foreign manufacturers.

CHARGES AND COMMISSION CASES.

An examination of the claims known as the charges and commission cases was begun during the year, and is not yet completed. Facts were developed, however, prior to the close of the last session of Congress, sufficient to show that a great number of these claims were based upon fraudulent protests; and upon being advised of these facts the Committee on Appropriations declined to make the necessary appropriations to pay ten of the claims which were at that time adjusted, amounting to \$42,201 71. An appropriation of \$350 only was made to pay the amount of one claim, which was found to be based upon a genuine protest. It is estimated by the officers who have examined these claims that the sum of \$800,000 has been paid since 1866, to authorized attorneys of importers in cases upon which no legal protests had been made. The papers in five hundred and fifty three of the six hundred and fifty suits still pending have been examined, and of that number five hundred and thirty-three are pronounced invalid, for want of legal protests. To state the exact amount involved in these cases would necessitate the computation of the duties paid on the charges and commissions, and the interest thereon, in each invoice and entry. This can only be done by the employment of a large clerical force. An

estimate based upon the average amount paid upon the cases heretofore settled, however, indicates that the saving to the Government by the investigation of these cases will be more than a million of dollars.

SUGAR FRAUDS.

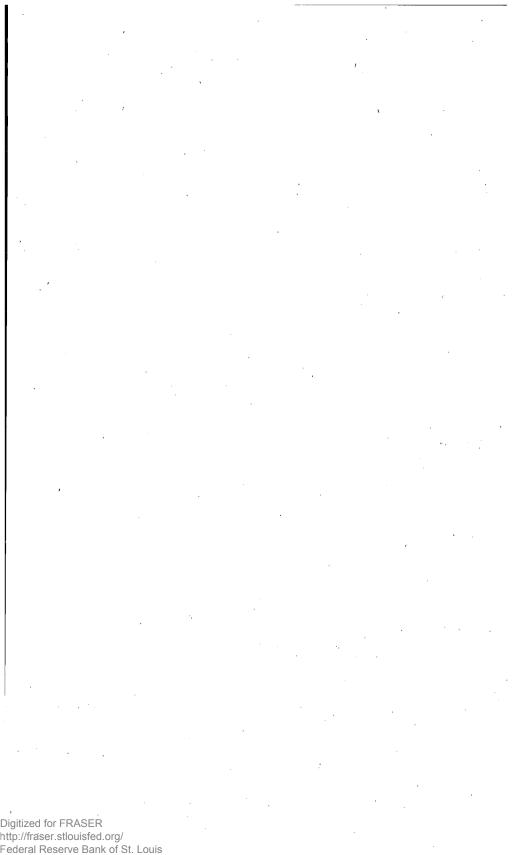

Investigations of alleged frauds in the importation and exportation of sugar, begun before the close of the fiscal year, are still in progress. Such frauds are believed to have been perpetrated—1st, by artificial coloring to reduce the rate of duty; 2d, by false weights; 3d, by improper sampling and classification; and 4th, by fraudulent claims for drawback on adulterated sugars.

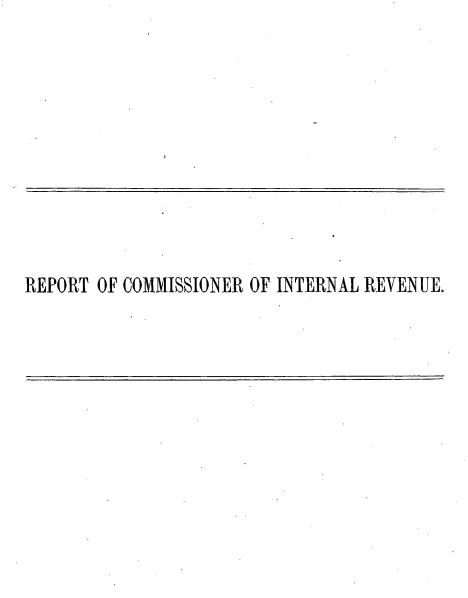

Several cargoes of sugar alleged to be artificially colored have been seized and suits for their condemnation are still pending.

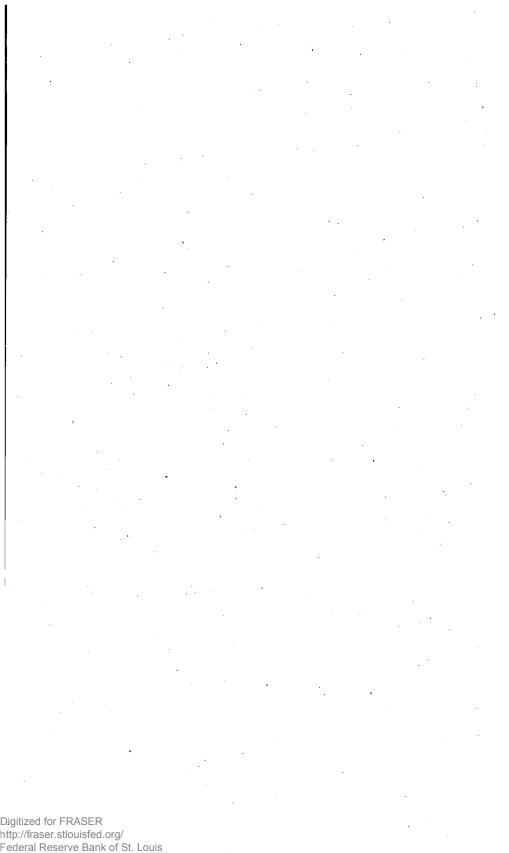

Very respectfully,

A. K. TINGLE,
Supervising Special Agent.

Hon. John Sherman, Secretary of the Treasury.

OF

THE COMMISSIONER OF INTERNAL REVENUE.

TREASURY DEPARTMENT,
OFFICE OF INTERNAL REVENUE,
Washington, November 25, 1878.

SIR: I have the honor to submit the report of the Bureau of Internal Revenue for the fiscal year ended June 30, 1878, accompanied by additional facts and figures bringing down the operations of this branch of the public service as nearly as possible to the present date. It affords me gratification to note that the heavy falling off in the receipts from internal revenue taxation which marked the closing months of the past fiscal year has ceased, and that the receipts for the current fiscal year have thus far shown an increase.

I am glad to be able to report that in a majority of the States the internal revenue laws have been enforced without serious difficulty or obstruction. There has been a commendable spirit exhibited on the part of manufacturers and dealers to observe the law, and it is believed that the tax on distilled spirits is now being collected with fewer frauds and less loss to the government than at any time since the establishment of the internal revenue system. Collectors and their subordinate officers have manifested praiseworthy zeal in the enforcement of the laws, and are entitled to the commendation of the government for their integrity and fidelity to duty. In the majority of districts prosecutions for violations of the internal revenue laws have been reduced to a minimum, in consequence of the steady enforcement of the laws and a state of public opinion favorable to their observance and enforcement. In other districts, however, it has been found necessary greatly to multiply prosecutions for violatious of internal revenue laws and to institute vigorous and systematic efforts for the suppression of frauds.

RESISTANCE TO LAW.

It is with extreme regret I find it my duty to report the great difficulties that have been and still are encountered in many of the Southern States in the enforcement of the laws. In the mountain regions of West Virginia, Virginia, Kentucky, Tennessee, North Carolina, South Carolina, Georgia, and Alabama, and in some portions of Missouri, Arkansas, and Texas, the illicit manufacture of spirits has been carried on for a number of years, and I am satisfied that the annual loss to the government from this source has been very nearly if not quite equal to the annual appropriation for the collection of the internal revenue tax throughout the whole country. In the regions of country named there are known to exist about five thousand copper stills, many of which at certain times are lawfully used in the production of brandy from apples and peaches,

but I am convinced that a large portion of these stills have been and are used in the illicit manufacture of spirits. Part of the spirits thus produced has been consumed in the immediate neighborhood; the balance has been distributed and sold throughout the adjacent districts. This nefarious business has been carried on, as a rule, by a determined set of men, who in their various neighborhoods league together for defense against the officers of the law, and at a given signal are ready to come together with arms in their hands to drive the officers of internal revenue out of the country.

As illustrating the extraordinary resistance which the officers have had on some occasions to encounter I refer to occurrences in Overton County, Tennessee, in August last, where a posse of eleven internal revenue officers, who had stopped at a farmer's house for the night, were attacked by a band of armed illicit distillers, who kept up a constant fusillade during the whole night, and whose force was augmented during the following day till it numbered nearly two hundred men. The officers took shelter in a log house, which served them as a fort, returning the fire as best they could, and were there besieged for forty-two hours, three of their party being shot—one through the body, one through the arm, and one in the face. I directed a strong force to go to their relief, but in the mean time, through the intervention of citizens, the besieged officers were permitted to retire, taking their wounded with them, and without surrendering their arms.

So formidable has been the resistance to the enforcement of the laws that in the districts of fifth Virginia, sixth North Carolina, South Carolina, second and fifth Tennessee, second West Virginia, Arkansas, and Kentucky, I have found it necessary to supply the collectors with breechloading carbines. In these districts, and also in the States of Georgia, Alabama, Mississippi, in the fourth district of North Carolina, and in the second and fifth districts of Missouri, I have authorized the organization of posses ranging from five to sixty in number, to aid in making seizures and arrests, the object being to have a force sufficiently strong to deter resistance if possible, and, if need be, to overcome it.

SYMPATHY OF CITIZENS AND STATE OFFICERS WITH VIOLATORS OF LAW.

In some of the districts where illicit distilling was carried on to any great extent leading citizens were either directly interested in the business, or else were in active sympathy with the distillers, and the officers of the law have usually received but little aid or encouragement from the people in their efforts for the collection of the revenue and the arrest and punishment of offenders. This state of things has been extremely discouraging, and added to it is the fact that in some cases State officers, including judges on the bench, have sided with the illicit distillers and have encouraged the use of the State courts for the prosecution of the officers of the United States upon all sorts of charges, with the evident purpose of obstructing the enforcement of the laws of the United States. The illicit distillers have on numerous occasions fired A table in another part of this report shows in detail upon our officers. the loss in killed and wounded that the service has sustained since my I regret to have to record the fact that when the officers of the United States have been shot down from ambuscade, in cold blood, as a rule no efforts have been made on the part of the State officers to arrest the murderers; but in cases where the officers of the United States have been engaged in the enforcement of the laws, and have unfortunately come in conflict with the violators of the law, and homicides have

occurred, active steps have been at once taken for the arrest of such officers, and nothing would be left undone by the State authorities to bring them to trial and punishment.

TWO CASES IN POINT.

Two cases occurring in the State of South Carolina forcibly illustrate this position. In April last, Rufus H. Springs, a United States deputy marshal, accompanied a posse of deputy collectors in their search for an illicit still among the foot hills of the Blue Ridge. Without the slightest provocation, or any overt act of his against the person of his assassin, he was fired upon from ambush and instantly killed. This deed scarcely created a ripple on the surface of the public mind. There has been no attempt on the part of the State authorities to ferret out the murderer or to bring him to trial and punishment. The murdered man was an excellent officer, of unimpeachable personal character, and left a widow and one child.

In strong contrast with this case are the circumstances attending the arrest of Hugh P. Kane, William Durham, and R. P. Scruggs in the same State. They were deputy collectors and deputy marshals who were intrusted with a warrant for the arrest of one Amos Ladd, who had been long engaged in the business of illicit distilling and formed one of a band of lawless men in Pickens County who had openly defied and attacked the officers of the United States. Ladd resisted arrest, gun in hand, and the officers, acting as I believe upon a well-grounded apprehension of danger to their own lives, fired upon him and killed him. sooner had this unfortunate act occurred than great excitement prevailed throughout the State. The local newspapers denounced the officers as murderers, and, though they promptly surrendered to the nearest State authorities outside of Pickens County, where they deemed their lives would be unsafe, bail was refused them and they were com-At the next sitting of the State court they were indicted mitted to jail. for murder, and the State judge, in an elaborately prepared opinion, refused to recognize the transfer of their cases to the United States cir cuit court.

While this statement of facts correctly illustrates what the condition of public sentiment has been in regard to the killing of a United States officer by a citizen and the killing of a citizen by a United States officer, it is proper to add, in regard to the latter case, that, believing these officers to have acted in necessary self-defense in the killing of Ladd, I have deemed it right to direct the collector to keep them on his pay-roll as deputy collectors, although they still remain incarcerated in one of the county jails awaiting their trial before the circuit court of the United States, to which court their case was duly transferred.

THE ROOT OF THE EVIL.

Much of the opposition to the enforcement of the internal revenue laws is properly attributable to a latent feeling of hostility to the government and laws of the United States still prevailing in the breasts of a portion of the people of these districts, and in consequence of this condition of things the officers of the United States have often been treated very much as though they were emissaries from some foreign country quartered upon the people for the collection of tribute. The courts of the United States have come in for a due share of suspicion and abuse, upon the ground that they are organized for the oppression of the citizen and for the protection of the officers of the United States in oppression and wrong. I have endeavored to disabuse the minds of the people upon these questions by having our officers point out that the laws of the

United States are enacted by the representatives of the whole people; that the law providing for the imposition of a tax upon distilled spirits is uniform throughout the country, and realizes to the government nearly sixty million of dollars per annum, and that while the law remains upon the statute book it is the duty of every good citizen to observe it, and of every officer of the United States assigned to that duty to enforce it. I have stated to them that the pains and penalties for violation of this law are severe, that no man can with safety infringe its provisions, and that any community in which violations of the law become general must soon be given over to anarchy and disorder. I have further endeavored to extend to the people in the mountain districts where illicit distilling has mostly prevailed every facility for the establishment of small distilleries in conformity with law. In this connection I respectfully refer to a proposed modification of existing laws elsewhere suggested with a view of facilitating the establishment of legal distilleries in the mountain regions of the South and Southwest.

CHARACTER OF THE OFFICERS EMPLOYED.

It has been my wish, and I have so directed collectors, that in the employment of special deputies, as well as in the appointment of their regular force, they should select men of integrity, character, and discretion, and I am satisfied that in the main they have been able to procure the services of men of this description. It must be borne in mind, however, that operations against illicit distillers for the seizure of their distilleries and the arrest of their persons are extremely hazardous, and in fact, an officer who goes upon a mission of this kind feels that he takes his life in his hand. For this desperate work it has not been found practicable to obtain the services of the most educated and refined citizens, especially in view of the fact that the service is temporary and the pay not large. I am, however, glad to be able to report that, with very rare exceptions, the officers so employed have proven themselves trustworthy, courageous, and discreet, and although they have often been resisted and fired upon by violators of the law, and though frequently their characters have been traduced by the local press, they have gone forward earnestly in the discharge of their duties, and have received the commendation of the collectors and of this office.

CONDITIONAL AMNESTY TO OFFENDERS.

Open violations of law in the manufacture and sale of illicit spirits have gone on in some districts, from year to year, until whole neighborhoods, and in some cases hundreds of men in a single county, became involved, so that it seemed wholly impracticable to bring all the violators of the law to trial and punishment. Consequently, after demonstrating to the minds of these men, by vigorous efforts to suppress the frauds with strong bodies of armed officers, that the government had not only the disposition but the ability to put an end to these violations of the law, offenders, who have not been actually engaged in resisting the officers by force, have been permitted to come forward and plead guilty, and have their sentences suspended during good behavior. This course has been pursued with your approbation and with that of the honorable the Attorney General and the President. The object has been to induce illicit distillers to abandon their evil practices, and also to arouse in the breasts of law-abiding citizens a sentiment favorable to the observance and enforcement of the laws. I am not without hope that some good results may follow the course that has been pursued. One advantage that has been derived from the amnesty accorded is seen in the fact that whereas, previously, our officers could scarcely enter the infected counties without being fired upon, they are now able, in most cases, to police the districts with comparative safety. I am, however, opposed to a repetition of this business of wholesale amnesty. Hereafter, in my opinion, violators of the law should be required to endure the penalties provided by law for their offenses.

WAYS AND MEANS.

The usual force of deputies heretofore allowed collectors for the collection of the revenue in the districts where illicit distilling has mostly prevailed, has been found totally inadequate for the suppression of frauds, and with your approval I have adopted the plan of giving collectors authority to employ, from time to time, a suitable number of special deputies to aid in making seizures. These internal revenue officers have also usually constituted a posse to assist the deputy marshals in making To meet the extraordinary expenses thus incurred I have found it necessary to cut down the salaries of officers throughout the country, so as to be able to set aside from the general appropriation a sum of money for that purpose, which has been supplemented by the use of a considerable portion of the appropriation for the suppression of frauds. But, with the best care I could bestow upon the subject, I have been unable to provide a suitable sum for paying these extraordinary expenses during the present fiscal year. I am of opinion that if active measures can be kept up against illicit distillers for twelve months more the business will be substantially broken up, and that violations of internal revenue laws in the districts named will be scarcely more frequent than in other portions of the country. The accomplishment of this object seems to me so exceedingly desirable that I wish to bring the subject prominently to the attention of Congress, with the hope that that honorable body may deem it proper to make a suitable appropriation for the early suppression of these frauds.

The illicit manufacture and sale of spirits have so demoralizing an effect upon the people in the neighborhood where they are practiced, that, as government has undertaken to collect a tax upon the product of the still, no efforts should be left untried to compel manufacturers of spirits to pay the tax imposed by law, and to sell their products only

in accordance with the provisions of law.

RESULTS ATTAINED.

By the efforts already put forth we virtually have peaceable possession of the districts of 4th and 5th North Carolina, Georgia, West Tennessee, Kentucky, Alabama, and Arkansas, in many of which formidable resistance to the enforcement of the law has prevailed. We can no doubt retain the advantage thus gained if sufficient means are allowed for thoroughly policing the districts, for it is only by continuous policing that frauds can be kept down. In the western portion of the 5th Virginia district, in part of West Virginia, in the 6th North Carolina district, in part of South Carolina, and in the 2d and 5th districts of Tennessee I apprehend further serious difficulties in the enforcement of the laws. is very desirable, in order to prevent bloodshed, that the internal revenue forces sent into these infected regions to make seizures and arrests shall be so strong as to deter armed resistance. Experience has shown that the temptation for defrauding the government of its revenues on spirits, is so great that these distillers will not voluntarily observe the law, and that these frauds cannot be suppressed and prevented without the organization of posses in sufficient strength, to demonstrate to violators of the law the determination and ability of the government to enforce its laws by its own officers and through its own courts

I therefore respectfully recommend that a special appropriation of \$75,000 be at once made for the above purpose, for the balance of the present fiscal year.

STATISTICS OF OPERATIONS AGAINST ILLICIT DISTILLERS.

The following table shows the number of illicit distilleries seized, arrests made, and officers killed or wounded in the execution of their duty:

PROTECTION OF REVENUE OFFICERS.

Attention is called to the large number of officers who have been either killed or wounded by persons engaged in resisting the enforce-

ment of the laws, and also to the fact that the State authorities, as a rule, have done little or nothing to insure the punishment of the persons guilty of these wrongful acts. Under the existing laws of the United States there is no adequate punishment for homicide perpetrated upon an officer of the government while in the performance of his duty as such. In my judgment, it is highly important that additional legislation should be had upon this subject. The power to lay and collect taxes conferred by Article I, section 8, of the Constitution, is one of the highest attributes of sovereignty, and it seems to me that this provision of the Constitution contains ample power for the enactment by Congress of such laws as would be necessary and proper for the protection of the lives and persons of officers of the United States by the punishment of persons who, while such officers are in the performance of their duty, assault them with intent to kill, or actually commit murder upon their persons.

PROPOSED REDUCTION OF THE TOBACCO TAX.

The subject of the reduction of the tax on tobacco has been largely discussed, in and out of Congress, and will no doubt receive the attention of the Senate, where a bill is now pending, it having passed the House at its last session, reducing the tax on tobacco from twenty-four to sixteen cents per pound. The subject is of such importance, as respects the income of the government from this source that I deem it expedient to examine the grounds upon which the friends of the measure mainly rest their arguments in favor of a reduction of the tax. These grounds, as I understand them, briefly stated, are:

1. That a reduction of the tax will not result in a decrease of the revenue from this source, but by stimulating consumption will ultimately

increase the receipts.

2. That the present rate of taxation depresses the value of leaf tobacco in the hands of the producers, and that the proposed reduction of the rate of taxation will inure to their benefit by enhancing the market value of their products.

The proposition is to reduce the rate of taxation one-third, *i. e.* to sixteen cents a pound instead of twenty-four cents a pound, as now provided by law. The receipts from the tax on manufactured tobacco for the four years preceding the past fiscal year have been as follows:

1875	 	2	4, 133, 726 48
1876	 	\dots 2	5, 694, 312 56
1877	 ·	2	7,053,072 38

From these figures it will be seen there has been a steady growth in the receipts from this source, and it would seem that if the rate of taxation is reduced one-third there will be a corresponding reduction in the income.

The tax on tobacco, while primarily paid by the manufacturer, is in fact paid by the consumer, and it is well known that the retail sales both before and since the passage of laws providing for a tax on manufactured tobacco have been in small quantities, being usually in quantities of from one to four ounces. The present tax is at the rate of one and a half cents per ounce, and the present retail price is almost without exception five cents or ten cents per ounce, according to quality. It seems quite incredible that a reduction of half a cent on the ounce in the tax would affect to any appreciable extent the retail prices charged or the

quantity consumed. To maintain the income of the government at its present amount, with the proposed reduction in the tax, it would be necessary that the consumption of manufactured tobacco should be immediately increased from one hundred and five and a half millions of pounds to one hundred and fifty-eight and a quarter millions of pounds. It is believed that persons who are in the habit of using manufactured tobacco would not, because of the reduction of the tax, consume more than they do at the present time; it is not to be credited that persons who are not in the habit of using tobacco would be induced to commence its use in consequence of the reduction of the tax, and I am satisfied that growers of tobacco, who have acquired a taste for the raw leaf in the twist, would not change their habits in this regard because of a reduction of half a cent an ounce in the tax on manufactured tobacco. therefore express the unqualified opinion that a reduction of the tax onethird will inevitably result in a corresponding reduction of the revenue derived from that source.

In respect to the second proposition, I would state that an examination of the market quotations of tobacco for a series of years fails to show that the tax on manufactured tobacco has had any depressing effect on the market price of leaf tobacco. It will be seen by a table in another part of this report that the business of manufacturing tobacco has year by year increased; that it is now diffused throughout the whole United States, and that some of the largest manufactories are located at great distances from the source of supply of the leaf. So it will be seen that there must be a constant competition among manufacturers for the purchase of the various choice grades of leaf tobacco that are used in the production of the great variety of brands of manufactured tobacco, and I fail to comprehend how this competition would be increased by a reduction of the rate of taxation on the manufactured article. of the people would not be changed by legislation, and the manufacturers would therefore continue to seek for stocks of tobacco suited to the demands of their customers.

It must be borne in mind that fully three-fifths of the entire crop of tobacco grown in the United States is exported, and it is obvious that the price received for this surplus practically controls the price of the tobacco retained for home consumption. The value of each crop of tobacco depends largely upon its quality and the manner in which it is cured and handled, and the value of the entire crop of the country is controlled by the laws of supply and demand.

The stocks of tobacco have been steadily increasing during the past four years, as will be seen by the following figures, taken from the Tobacco Circular of Messrs. Sawyer, Wallace & Co., of New York City, of November 1, 1878:

	1878.	1877.	1876.	1875.
Stock in Liverpool, October 1 Stock in London, October 1 Stock in Bremen, October 1 Stock in New Orleans, October 26 Stock in Baltimore, October 26 Stock in New York, November 1.	29, 334 5, 472 3, 627	Hhds. 36, 854 21, 486 4, 579 6, 063 26, 257 28, 130	Hhds. 34,584 16,233 1,892 10,975 14,250 34,257	Hhds. 27, 915 14, 848 1, 994 2, 961 12, 212 29, 726
Total	159, 761	123, 369	112, 191	89, 656

And there has been a steady decline in price for the same period, evidently in consequence of the heavy surplus stocks. The same authority gives the quotations as follows:

	18	378.	1877.	1876.	1875.
Lugs Common Medium Good Fine	4½05½ 6 07½ 7½08	Gold, Less ½% do do do	Gold. 27@57 48@— 61@— 81@—	Gold. 4½@ 7¼ 5½@ 8½ 7½@10 9½@11½ 11½@14½	Gold. 55 @ 81 75 @ 97 103 @ 125 12 @ 145 133 @ 168

These figures are confirmed by reference to the circular of Messrs. M. Rader & Co., of the same date. It appears from the foregoing statements that there were 159,761 hogsheads of tobacco in warehouse on the 1st of the present month, against 89,656 hogsheads for the corresponding period of 1875. If to the depressing influence which this large surplus stock must necessarily exert there is now added a prolonged agitation for the reduction of the tax, so as to withdraw the manufacturers from the market, the result to the planters cannot be otherwise than detrimental.

It may be insisted that shipping leaf is unsuited for manufacturing purposes, and that, therefore, its price would have no material effect upon the value of the manufacturing leaf. This statement, however, would be fallacious, for it is an ascertained fact that the tastes of the people vary so much that, to produce manufactured tobacco to meet all demands, manufacturers are compelled to draw their stocks from all portions of the Not only are the light tobaccos of Virginia and North Carolina, and the red tobaccos of Kentucky, in request for manufacturing purposes, but tobaccos grown in Tennessee, Missouri, Illinois, Indiana, and Ohio enter largely into the manufactured tobacco of this country; so that, in fact, all the various grades of tobacco grown go to make up the stocks which manufacturers find it necessary to use in order to meet the wants of their customers. It is, therefore, obvious that the price of the tobacco used by our manufacturers is affected by the foreign demand for the surplus product. A small accumulated surplus, light crops, and an active foreign demand will increase the price of all grades, while large accumulated stocks, heavy crops, and a sluggish foreign demand will result in a depression of prices of all grades, and these results would be produced whether the tax on manufactured tobacco remained at twenty-four cents or should be reduced to sixteen cents per pound, or if the tax were entirely removed.

The bill before the Senate proposes a reduction of the tax on eigars from \$6 to \$5 per thousand. Though in the aggregate this proposal, if adopted, would diminish the revenue derived from this source \$2,000,000, yet in detail the effect would only be equivalent to reducing the tax on each eigar one mill, and it is incredible that such a reduction could affect the retail price, or in any degree operate to stimulate the consumption of eigars, and, in my opinion, the reduction would be an absolute loss of revenue without any compensating advantage. It is to be noted that the agitation for the reduction of the tax on manufactured tobacco does not come from the consumers, who alone pay the tax. Not a single tax-payer has yet come forward, as such, to demand its reduction. The whole movement, in my judgment, involves an absolute sacrifice of \$11,000,000 of revenue without reasonable prospect of benefit to the producer or relief to the tax-payer.

EFFECTS OF AGITATING THE QUESTION.

The agitation of the question of reducing the tax on manufactured tobacco last year paralyzed the trade during the time the uncertainty

prevailed. Many manufacturers were compelled to temporarily suspend operations, and large numbers of work-people were thrown out of employment. The tax on manufactured tobacco from December, 1877, to June, 1878, showed a falling off as compared with the corresponding months of the preceding year of \$1,947,041, while, immediately upon the adjournment of Congress, when it became known that the tax would for a time remain undisturbed, the trade began to recover, the receipts from the tobacco tax for July, 1878, showing an increase of \$546,427 over the corresponding month of the previous year. I have no doubt that similar results would follow a prolonged agitation of the subject this year. It therefore appears to me very desirable that whatever action is had by Congress in regard to the proposed change of the tax should be had as early as possible, in the interest of the revenue, as well as of the manufacturers, their thousands of employés, and the producers, to all of whom continued suspense must prove injurious.

SPECIAL RECOMMENDATIONS.

As a means of encouraging the establishment of legal distilleries in the mountain districts of the South and Southwest, I respectfully suggest the propriety of the passage of a law conferring authority upon the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, to exempt distilleries of the producing capacity of twenty gallons per diem, or less, from such provisions of the existing law in regard to grain distilleries as require the processes of distillation to be carried on through closed pipes or vessels. This would remove what has been alleged as a serious objection to the establishment of legal distilleries by many persons owning copper vessels who desire to enter upon the manufacture of spirits.

I respectfully refer to the reasons assigned at pages xli and xlii of my last report for the remission and refunding of certain assessments made for excessive use of material by distillers. Great care has been exercised during the past year by distillers to avoid, as far as possible, incurring liability to assessments of this class. The reasons heretofore assigned why Congress should relieve the distillers from this class of assessments remain in full force, and I respectfully suggest that early action in this regard would relieve distillers and this office from much embarrassment. A bill which passed the House of Representatives at its last session, and is now before the Senate for consideration, con-

tains a provision affording the required relief.

I also respectfully renew the recommendations contained in my last report that the law may be so modified as to permit the use of American alcohol in the manufacture of perfumery on the same terms as foreign alcohol is now employed; and that, for the purpose of preventing frauds in the manufacture of matches, the number of matches to be contained in a single box be limited to five hundred.

LEASEHOLDERS BONDS FOR DISTILLERIES.

It is provided by Section 3262 of the Revised Statutes that "no bond of a distiller shall be approved unless he is the owner in fee, unincumbered by any mortgage, judgment, or other lien, of the lot or tract of land on which the distillery is situated, or unless he files with the collector, in connection with his notice, the written consent of the owner of the fee, and of any mortgage, judgment-creditor, or other person having a lien thereon, duly acknowledged, that the premises may he used for

the purpose of distilling spirits, subject to the provisions of law, and expressly stipulating that the lien of the United States for taxes and penalties shall have priority of such mortgage, judgment, or other encumbrance", and that in case of the forfeiture of the distillery premises, or of any part thereof, the title of the same shall vest in the United States, discharged from such mortgage, judgment, or other encum-It is further provided in the same section that in certain cases where the distillery was erected prior to the twentieth of July, eighteen hundred and sixty-eight, "the collector may at the discretion of the Commissioner, be authorized to accept, in lieu of the said written consent of the owner of the fee, the bond of such distiller, in such form as the Commissioner may prescribe, with not less than two sureties, conditioned that in case the distillery, distilling apparatus, or any part thereof, shall by final judgment be forfeited for the violation of any of the provisions of law, the obligors shall pay the amount stated in said

A case sometimes arises where a distiller operating a distillery erected prior to July 20, 1868, finds it desirable to enlarge the distillery prem-This is occasionally especially desirable, since the passage of the joint resolution of March 28, 1878, entitled "Joint resolution to prescribe the time for the payment of the tax on distilled spirits, and for other purposes," for it often becomes necessary for the distiller to enlarge his distillery warehouse to avail himself of the privileges conferred by that In some instances the distiller finds it impossible to obtain the written consent of the owner of the adjoining land which it is neces. sary to include as part of the distillery premises. The present statute makes no provision for a case of that character.

I recommend such an amendment of the law as will in such a case. authorize the acceptance of a bond in lieu of the written consent of the owner.

REVENUE AGENTS.

Since my last report the number of internal revenue agents has been increased by law from twenty-five to thirty-five. The force is now distributed as follows:

One in charge of the division of revenue agents at this office.

Four to the examination of the accounts of collectors.

Twenty-four to divisions of collection districts.

Six assistants in the more important divisions. This corps is of great importance in aiding in the enforcement of the aws and in promoting the efficiency of the public service. I earnestly ecommend that the increase from twenty-five to thirty-five revenue

igents be maintained.

EXAMINATION OF COLLECTORS' OFFICES.

I have made provision for the careful quarterly examination of the offices and accounts of collectors by skilled accountants, so as to have xact information as to the manner in which the business of the office is onducted and the public money accounted for. These examinations ave had the effect of creating a spirit of emulation among officers of he different districts, and it affords me great pleasure to report that, ith very rare exceptions, it was found that the business of the offices ad been conducted in a careful and efficient manner, the records proprly kept and written up to date, and the public funds faithfully acounted for.

5 F

INSPECTION OF OFFICERS.

In my last report I had the honor of calling attention to the fact that I had organized a system of inspecting the officers of the Internal Revenue Service, and I then expressed an opinion that important and favorable results would accrue from such inspections. Since that report the system of inspections has been very much enlarged upon, so that now the inquiry involves an examination into the character and standing of the officers and their moral fitness for their positions, and also into their knowledge of the internal revenue laws and regulations and the practical operations of these laws and regulations in respect to distilleries, breweries, rectifying establishments, wholesale and retail liquor dealers, tobacco and cigar manufacturers, and other manufactories and employments coming under the provisions of the internal revenue tax system. The object has been to make the inspections a kind of school for the officers.

In connection with these inspections, the revenue agent, who is the inspecting officer, visits with the officers inspected the various establishments for the manufacture and sale of taxable articles, with a view of seeing that the laws are properly complied with and enforced, and also with the view of enlightening the manufacturer or tax payer upon any point of law or regulations upon which he may seem to need information. To make these inspections more thorough, I have pursued the policy of transferring the agents from time to time, so as to have the reports of different revenue agents upon the same officers and districts. The reports of the inspecting officers have in the main been very full and complete. Taken in conjunction with the reports of the agents assigned to the examination of collectors' offices, they give this office a correct statement of the condition of the force in all the collection districts, and they have had the effect of increasing the knowledge, diligence, and efficiency of the great majority of the officers, so that at this time the officers of the internal revenue force, taken as a whole, comprise a body of men of whose intelligence, integrity, and fidelity to duty the people of the United States may well be proud.

AMOUNTS COLLECTED AND ACCOUNTED FOR, BY DISTRICTS.

Subjoined is a statement of the collections of internal revenue tax, by districts, for the fiscal year ended June 30, 1878, giving the name of each collector, the amount of money collected and paid into the United States Treasury, and the amount collected and unaccounted for. It will be seen therefrom that the sum of \$110,654,163.37 was collected and accounted for during the past fiscal year, and that the sum of \$9,705.55 remains unaccounted for. During the fiscal year ended June 30, 1877, the internal revenue collections, as shown in my last report, were \$118,995,184.25. There remains unaccounted for for that period the sum of \$1,900. It thus appears that during the last two fiscal years the sum of \$229,649,347.62 has been collected and accounted for, and the sum of \$11,605.55 has been collected and not accounted for. Each item making up this last amount has been reported to the honorable First Comptroller for suit.

I am assured that the amounts due will be paid during the present year, the sureties on the collectors' bonds being entirely good, so that there will be no actual loss to the United States. The defaulting collectors have been removed from office.

It is proper to state that the deficiency that occurred in the accounts

of Collector Fannin, of Georgia, was occasioned by the dishonesty of his cashier. The two other deficiencies were referred to in my last annual report.

Statement showing the aggregate collections made and reported to the Commissioner of Internal Revenue by the collectors of the several collection districts, together with the amount of collections made and unaccounted for, during the fiscal year ended June 30, 1878.

COST OF COLLECTION.

The total cost of collecting internal revenue in the United States for the fiscal year ended June 30, 1878, was as follows:

For salaries and expenses of collectors, including pay of deputy collectors, clerks, &c	\$1,810,000	00
gaugers, storekeepers, and miscellaneous expenses.	1, 466, 000	00
For dies, paper, and stamps	452,000	00
For salaries of officers, clerks, and employés in the office of Commis-		
sioner of Internal Revenue	253,410	00
Detecting and bringing to trial and punishment persons guilty of vio-		
lating the internal revenue laws	\$7 5, 000	00
Total	4, 056, 410	00

Being less than three and three-quarters per cent upon the whole amount collected. A final adjustment of the accounts may change the foregoing figures in some regard, but not to any material extent.

ESTIMATED RECEIPTS FOR THE CURRENT FISCAL YEAR.

There has been an increase in the receipts from internal revenue up to this date (November 25th), as compared with the same period of last year, of a little over a million of dollars, and as the information from various points seems to indicate a favorable reaction in the general business of the country, I am strongly inclined to the opinion that the internal revenue receipts will sympathize largely with the improved condition of It will be seen from the comparative tables of receipts that the decrease in last year's revenue commenced in November and continued during the balance of the fiscal year. I am well satisfied that this decrease was mainly attributable to the threatened change in the tax on spirits and tobacco. It will be observed that during the past four months the receipts compare favorably with those of the two preceding years, and it would seem probable that the receipts for the balance of this fiscal year will be maintained equal to those of the fiscal year 1877, unless the causes which produced the decrease of last year again prevail. event, it appears to me entirely safe, if the rate of taxation is not disturbed, to estimate that the revenues for the present fiscal year will not fall short of \$115,000,000.

ESTIMATED EXPENSES FOR NEXT FISCAL YEAR.

I estimate the expenses of the internal revenue service for	the fiscal
year ending June 30, 1880, as follows:	
For salaries and expenses of collectors	
For salaries and expenses of thirty-five revenue agents, for surveyors, for	
fees and expenses of gaugers, for salaries of storekeepers, and for miscel-	
laneous expenses	
For dies, paper, and stamps	375,000
For detecting and bringing to trial and punishment persons guilty of vio-	
lating the internal revenue laws, including payment for information and	
detection	100,000

ORGANIZATION OF THE BUREAU.

I have the honor to recommend that Congress appropriate for the fiscal year ending June 30, 1880, the sum of \$254,330, as salaries for the following number of officers, clerks, and employés in this bureau:

One Commissioner, at			
One deputy commissione	r, at	· · · · · · · · · · · · · · · · · · ·	
Two heads of division, a	t		2,500
Five heads of division, a	t		2,250

One stenographer, at	·	' \$1,800
Twenty-three clerks, class four, at		1,800
Twenty-six clerks, class three, at		1,600
Thirty-six clerks, class two, at		1,400
Twenty-one clerks, class one, at		1, 200
Thirteen clerks, at		1,000
Fifty clerks, at		
Four assistant messengers, at	• · · · • • • • • • • • • • • • • • • •	720
Ten laborers, at	:	660
•		

An aggregate of one hundred and ninety-three persons.

In making this recommendation I would state that it is the same amount that Congress appropriated for the fiscal year ending June 30, 1879; and I find that it will be wholly impracticable to reduce the force in any particular without material injury to the public service.

The force connected with this bureau in the various districts through-

out the United States is as follows:

One hundred and twenty-six collectors, who receive salaries as follows:

One	4, 375 4, 250 4, 125 4, 000 3, 875 3, 750 3, 625 3, 500	Seven	3, 125 3, 000 2, 875 2, 750 2, 625 2, 500 2, 375

There are also employed eight hundred and seven deputy collectors who receive salaries as follows:

		·	
Eleven	\$2,000	Two	\$1,050
Ten	1,900	Thirty-four	1,000
One	1, 850	Two	950
Twenty-five	1, 800	Twenty	900
One	1,750	Ten	800
Thirty-five	1,700	Three	750
Thirty-seven	1,600	Twelve	700
Seventy-eight	1,500	One	650
One	1, 450	One	625
Two hundred and sixty-eight	1, 400	Twenty-two	600
One	$\hat{1}, 375$	Seven	500
Two	1, 350	Four	.400
One	1,325	One	360
Fifty-one	1,300	Nine	300
Nine	1,300 $1,250$	Three	250
Seventy-eight	1,200	One	240
One	,	I =1	200
	1, 175	Nine	180
Five	1,150	One	
Forty-nine	1,100	One	100
		3	,

Also two hundred clerks, messengers, and janitors, who receive salaries as follows:

			, `
Three clerks	\$1,600	Twenty clerks	\$600
Eight clerks	1,500	Seven clerks	500
Seven clerks	1,400	Three clerks	420
Five clerks	1,300	Two clerks	400
Thirty-one clerks	1,200	Two clerks	300
Twenty-five clerks	1,100	One messenger	800
Twenty-two clerks	1,000	One messenger	400
Twenty-eight clerks	· 900	One messenger	300
Twenty-one clerks	800	One messenger	- 180
One clerk	720	Four janitors	100
Six clerks	700	One janitor	52

There are also employed 679 gaugers, who receive fees not to exceed \$5 per diem; 632 storekeepers and gaugers, who receive not to exceed \$4 per diem; 450 storekeepers, who receive not to exceed \$4 per diem; and 41 tobacco inspectors, who receive fees to be paid by the manufacturers.

ACKNOWLEDGMENTS TO OFFICERS.

My acknowledgments are due to the several heads of divisions and their subordinate officers, to the corps of revenue agents, and to the employés of the Internal Revenue Bureau generally for the signal fidelity with which they have discharged the duties imposed upon them; for the watchful zeal they have manifested for the protection of the public interests, and the energy with which they have devoted themselves to the advancement of the public service.

EXPENSES BY DISTRICTS.

SALARIES OF COLLECTORS.

The recommendations made for the salaries of collectors for the fiscal year ended June 30, 1878, were based upon an estimate of their probable collections according to the following scale, with the qualification that if the actual collections should vary from the amounts estimated, the salaries would be readjusted at the end of the fiscal year:

For collection of—		
\$25,000 or less	· · · · · · · · · · · · · · · · · · ·	\$2,000
37,500 to 50,000 - 12,500		2,250
50,000 to 75,000 — 25,000		2,375
75,000 to 100,000 — 25,000		2,500
100,000 to 125,000 — 25,000		2,625
125,000 to 175,000 — 50,000		2,750
175,000 to 225,000 — 50,000		2,875
225,000 to 275,000 - 50,000	***************************************	3,000
275,000 to 325,000 — 50,000		3,125
325,000 to 375,000 50,000		3,350
375,000 to 425,000 — 50,000		3,375
425,000 to 475,000 — 50,000		3,500

In these tables and in others to be found in this report relative to the different kinds of spirits, separate columns are provided for bourbon whisky, rye whisky, alcohol, rum, gin, high wines and pure, neutral or cologné spirits; all other kinds of spirits are reported in a column headed "Miscellaneous." In many instances, however, the particular kind of spirits reported on a given line in the miscellaneous column is stated on the same line in the last column of the table. The information as to the different kinds of spirits produced, &c., in each district is embodied in these tables as furnished to this office by the collectors of their respective districts, and must be understood as indicating the kind of spirits known to the distillers in the producing districts; for instance, the tables show that bourbon whisky was produced in Arkansas, Illinois, Indiana, Nebraska, New York, Ohio, and Texas, as well as in Ken-It is, however, believed that by taking into account the fact that the names given in the tables are those by which the spirits are known at the place of production, the trade in general will not be deceived by any unusual classifications made in certain localities.

It appears from the foregoing tables that of the forty-nine and one-half million gallons withdrawn from distillery warehouses for domestic use during the year, nearly thirty-seven million gallons were comprised in the three varieties of "high wines," "pure, neutral or cologne spirits," and "alcohol," the approximate quantity of each of these varieties being

as follows:

"High wines," over 20,000,000 gallons; "pure spirits," over 11,000,000

gallons; "alcohol," over 5,500,000 gallons.

The quantity of "bourbon whisky" placed upon the market exceeded five million gallons, the quantity of "rye whisky" so disposed of did not quite reach two million gallons, and the quantity of other "whiskies," such as "corn whisky," "wheat whisky," "malt whisky," "corn and rye whisky," &c., reported in miscellaneous column in tables, exceeded two million gallons, the other varieties reported in this column swelling the amount of "miscellaneous" to nearly four million gallons.

The quantity of "rum" withdrawn from warehouse for consumption was less than four hundred thousand gallons. Of the five and one-half million gallons withdrawn from warehouse for exportation, more than four and one-half million gallons were "alcohol," and over seven hundred and fifty thousand gallons were "rum," the small balance being made up of "bourbon whisky" (about 20,000 gallons), "rye whisky" (about 15,000 gallons), "high wines" (less than 6,000 gallons), and "cologne spirits" (3,224 gallons).

THE EXTENSION OF THE BONDED PERIOD.

Under the provisions of a joint resolution of Congress approved March 28, 1878, the time during which distilled spirits entered into distillery warehouses under the provisions of section 3293 of the Revised Statutes was extended to three years. This extension was made to apply to spirits theretofore entered for deposit and required to be withdrawn from the warehouse within one year prior to the passage of the resolution, as well as to all spirits thereafter entered for deposit into distillery warehouses, provided that certain conditions securing an extension of the obligation on the old bond or the filing of additional bonds with new sureties and upon payment of interest at the rate of five per centum per annum on the tax on all spirits remaining in warehouse more than one year are complied with.

The spirits reported in a foregoing table as actually remaining in ware-

house June 30, 1878, and as produced in March, April, and May, 1877, remain in warehouse in conformity with this joint resolution of March 28, 1878, as follows:

April	h, 1877. , 1877 1877	 . 1,095,605
	Total	3 046 262

It will be observed that the bulk of these spirits were in warehouses located in Kentucky, as follows: March, 1877, 601,185 gallons; April, 1877, 840,337 gallons; May, 1877, 892,490 gallons; total, 2,334,012

gallons.

By reference to the tables in this report it will be seen that the larger portion of the spirits in warehouse June 30, 1878, of the product of March, April, and May, 1877, was of the kind known generally as whisky; bourbon whisky and rye whisky predominating. Only a small quantity of spirits in warehouse more than one year appears to have been withdrawn; the interest collected thereon amounted to \$313.26. Since June 30, 1878, the collections have been much larger; the interest collected in the fifth district of Kentucky for September, 1878, alone, amounting to nearly two thousand dollars.

SPIRITS WITHDRAWN FOR EXPORT.

The following table shows the quantity of spirits withdrawn from warehouse for exportation.

Statement by districts and in taxable gallons of the quantity of the different kinds of spirits as known to the trade, and of the total quantity withdrawn for export during the fiscal year ended June 30, 1878.

SPIRITS NOT IN WAREHOUSE.

The following is a statement by districts of the quantity at ninety cents (162,158 gallons), not actually in warehouse, and unaccounted for:

Districts.	Gallons.	Remarks.
Second Alabama	286	Seized May, 1878, placed in hands of S. A. Porter by United States marshal, and stolen from Porter in October, 1877.
Third Arkansas	153	129 gallons of this quantity lost in April and May, 1878, and tax as- sessed on April and May, 1878, lists, and 24 gallons lost June, 1878, and assessed on June, 1878, list.
Second Georgia	1, 887	Bonds in suit.
First Illinois	36, 930	Forfeited and sold by United States marshal. Bonds in suit.
Second Kentucky	30, 877	Bonds in suit.
Fifth Kentucky	2, 316	Seized July 10, 1877, for violations of internal revenue laws, and in hands of United States marshal.
First Missouri	74, 806	Seized, forfeited, and sold by United States marshal for fraud.
Second Missouri	191	Destroyed by fire May, 1878.
Sixth Missouri	217	Lost by casualty. Claim pending.
Twelfth New York	1, 577	Destroyed by fire. Claim for abatement pending.
Sixth North Carolina	2, 955	1,599 gallons claimed lost by easualty, and 1,356 gallons lost by leakage. Part assessed, and suits pending for part.
Sixth Ohio	27	Lost by leakage June, 1878.
Tenth Ohio	. 20	Lost on regauging.
Second Tennessee	793	Claim for abatement pending. Part seized for violation of law, and part destroyed by fire.
Fifth Tennessee		Part seized for violation of law, and part destroyed by fire.
Third Texas	564	238 gallons destroyed by fire, and 326 gallons stolen.
Fifth Virginia	1, 312	238 gallons destroyed by fire, and 326 gallons stolen. 21 gallons stolen. Suits pending on 1,291 gallons. 279 gallons assessed; 295 gallons stolen and assessed. Claim for
Sixth Virginia	6, 299	279 gallons assessed; 295 gallons stolen and assessed. Claim for abatement pending on 5,725 gallons.
Total	162, 158	

MOVEMENTS OF SPIRITS FOR THREE YEARS.

OPERATIONS AT DISTILLERY WAREHOUSES DURING THE FIRST FOUR MONTHS OF THE PRESENT FISCAL YEAR.

The following tables show as to operations at distillery warehouses during the months of July, August, September, and October, 1878, (1) by districts and in aggregate, the quantity of spirits produced and placed in said warehouses, the quantity withdrawn and the amount of tax

paid during said months; (2) a statement, by districts and different kinds, of the quantity of spirits withdrawn for export during said months; (3) a comparative statement of the quantities of spirits withdrawn for export during said months of the years 1877 and 1878; (4) a comparative statement of the quantities of spirits produced, withdrawn tax-paid and for export from distillery warehouses, and the amount of tax paid on the spirits during said months in the years 1875, 1876, 1877, and 1878; (5) a statement of the quantity of each of the different kinds of tax-paid spirits as known to the trade and the aggregate of all kinds held by wholesale liquor dealers and rectifiers October 1, 1878; and by districts of the quantity of tax-paid spirits held by wholesale liquor dealers and rectifiers January 1, 1878.

Statement of the quantity, in taxable gallons, of spirits produced and withdrawn, and the amount of tax paid during the months of July, August, September, and October, 1878.

a And 50 gallons alcohol.

b And 22 gallons Scotch whisky.

c And 58 gallons high wines.

It will be seen from the preceding tables that the quantity of spirits remaining in warehouse November 1, 1878, was 15,807,164 gallons, being an increase of 5,808,457 gallons as compared with the amount on hand on the same date last year. This large increase in the stock of spirits has, no doubt, been in great part occasioned by the extension of the bonded period provided for in the act of March 28, 1878, and the withdrawals hereafter will be made to meet the wants of the trade. The production of spirits for the months of July, August, September, and October, of this year, amounted to 19,046,600 gallons, while the production for the corresponding months of last year amounted to 15,145,444 gallons.

I desire to call special attention to the large increase in the exportation of alcohol. It is a marked feature in the year's business and indicates that the foreign demand for this article is keeping pace with the increased demand for many other articles of American production. The quantity of spirits withdrawn from warehouse for exportation for the past fiscal year was 5,499,252 gallons, and for the first four months of the present fiscal year, 3,302,766 gallons, a total of 8,802,018 gallons,

being equivalent to 2,347,200 bushels of grain.

In the first district of California:

OPERATIONS AT SPECIAL BONDED WAREHOUSES FOR STORAGE OF GRAPE BRANDY.

The act of Congress authorizing the establishment of special bonded warehouses for the storage of brandy made from grapes was approved March 3, 1877. The year ended June 30, 1878, is the first full fiscal year during which this law has been in operation. The number of warehouses established under the said act up to this date is seven, as follows:

	Date	of approval.
No. 1. Bode & Danforth	June	21, 1877.
No. 2. Juan Bernard	August	
No. 3. George C. Carlon	August	24, 1877.
In the fourth district of California:		
No. 1. George Lichthardt	August	1, 1877.
No. 2. John F. Boyce		
No. 3. Royal A. Haskin		
No. 4. John Tivnen		
The following statement shows the quantity in taxal brandy received into and withdrawn from these war year ended June 30, 1878, viz:	ole gallon ehouses d	uring the
Quantity received during the year		Gallons. 178, 544
Quantity withdrawn, tax-paid, during the year	42,	427
In warehouse June 30, 1878		42, 919 135, 625
		178, 544
		====

Of the quantity in warehouse June 30, 1878, 86,819 gallons were in the following named-warehouses, located in the first district of California, viz: No. 1, Bode & Danforth, 50,569 gallons; No. 2, Juan Bernard, 22,419 gallons; No. 3, George C. Carlon, 13,831 gallons; and 48,806 gallons were in the following-named warehouses in the fourth district of

California, viz: No. 1, George Lichthardt, 23,357 gallons; No. 2, John F. Boyce, 5,797 gallons; No. 3, Royal A. Haskin, 4,767 gallons; No. 4,

John Tivnen, 14,885 gallons.

Up to the present time the only warehouses established under the provisions of this act are those above mentioned. There appears to have been no demand for such warehouses thus far, either in grape-brandy producing districts other than those named in the first and fourth districts of California, or in any district in which grape brandy is a marketable commodity.

RECEIPTS FROM FERMENTED LIQUORS.

The following statement shows the receipts from fermented liquors for the fiscal years 1877 and 1878:

Sources.	Receipts for fi ed Jui	iscal year end- ne 30—	Increase.	Decrease.
;	1877.	1878.		
Fermented liquors, tax of \$1 per barrrel on Brewers' special tax. Dealers in malt liquors' special tax.	216, 681 10	\$9, 473, 360 70 212, 802 77 250, 888 31	\$399, 054 77 61, 086 17	\$3, 878 33
Total	9, 480, 789 17	9, 937, 051 78	460, 140 94.	3, 878 33

TOBACCO.

The collections from tobacco for the fiscal year ended June 30, 1878, as compared with the collections for the previous year, show a decrease of \$1,014,792.25. This decrease was owing to the diminished collections on manufactured tobacco taxed at the rate of 24 cents per pound, and occurred during the last half of the year, and while the question of a reduction of the tax was under discussion. Upon a cessation of the discussion, the business of tobacco manufacturers and dealers resumed its normal condition. This fact is shown by the collections for the first quarter of the present fiscal year, these collections being in excess of the first quarter of the last fiscal year by \$397,527.94 on manufactured tobacco and cigars. The total amount collected under the head of tobacco from all its sources, including special tax of leaf dealers, manufacturers of tobacco, snuff, and cigars, and dealers, was \$40,091,754.67.

DETAILS OF COLLECTIONS.

The subjoined statements show the exact amount collected from each specific source for the year ended June 30, 1878, and the increase or decrease of collections, as compared with the collections from the same sources for the year ended June 30, 1877:

Manufactured tobacco at 24 cents per pound	93	00.
Total for the year ended June 30, 1878	26, 383, 872	30
Decrease of collections on tobacco and snuff	1,764,895	60

Of this decrease \$1,732,914.30 was on chewing and smoking tobacco, and \$31,981.30 on snuff.

Cigars and cigarettes.

Cigars, taxed at \$6 per thousand	\$11, 428, 955 32 1, 189 28 289, 081 79
Total collections for the year ended June 30, 1878	11,719,226 39 11,061,278 15
Increase in collections from cigars and cigarettes	657, 948 24
Other collections.	
Export stamps, year ended June 30, 1878	
Decrease in sales of export stamps	1,007 00
Dealers in manufactured tobacco, year ended June 30, 1878	
Increase in collections from dealers in manufactured tobacco	84,392 20
Special taxes, manufacturers of tobacco and cigars in 1878	
Increased collections, manufacturers of tobacco and cigars	5, 121 78
Special taxes, peddlers of tobacco, year ended June 30, 1878	32, 899 30 32, 471 93
Increased collections from peddlers of tobacco	427 37
Dealers in leaf tobacco, year ended June 30, 1878	\$100,643 25 97,422 49
Increase in collections from dealers in leaf tobacco	3,220 76

PRODUCTION OF MANUFACTURED TOBACCO, CIGARS, &C.

Computing the annual production of manufactured tobacco, snuff, and cigars from the amount of taxes collected on the same during the fiscal year ended June 30, 1878, and adding thereto the quantities removed in bond for export, we have, as the products of the last fiscal year, the following:

Tobacco taxed at 24 cents per pound	Pounds. 105, 500, 271 465
Total quantity removed for consumption	105, 500, 736 3, 324, 107
Total tobacco and snuff for consumption Tobacco removed in bond for export Snuff removed in bond for export	108, 824, 843 10, 550, 475 31, 270
Total production for year ended June 30,1878	119, 406, 588 127, 481, 149
Decrease of production	8,074,561

The number of cigars and cigarettes, &c., including imported cigars, which pay also an internal revenue tax in addition to the import duty, on

which taxes were collected during the fiscal year ended June 30, 1878, was as follows:

Cigars, cheroots, &c., taxed at \$6 per thousand Cigars and cheroots taxed at \$5 per thousand Cigarettes taxed at \$1.75 per thousand Cigars exported Cigarettes exported	165, 189, 594 $2, 914, 025$
Total product for year 1878	
Increase during year 1878 of	123, 964, 874

IMPORTED CIGARS.

Allowing 13½ pounds to the thousand as the weight of imported cigars, the number of imported cigars included in the above table would be 42,001,000.

GROWTH AND DISTRIBUTION OF THE TOBACCO INDUSTRY.

The following figures and tables show the growth and development of the tobacco industry of the country during the last twenty years, the extent to which it is distributed throughout the different States and Territories of the Union, the number of manufactories, and relative size and capacity for producing manufactured tobacco and cigars.

These figures are of interest in view of the close supervision exercised by the government over this industry in connection with its system of internal taxation. This supervision commences with the leaf tobacco produced by the farmer or planter, and follows it through all subsequent hands till it reaches the consumer of manufactured tobacco, or is exported to foreign countries. It would seem, from the figures given, that the government supervision over this industry, and the government revenue derived from the taxes imposed upon manufacturers of and dealers in tobacco, so far from encouraging or favoring monopolies in the business, have had a contrary tendency. The greater proportion of all the factories, both of tobacco and cigars, are small in size and capacity; and a large proportion of the factories appearing in the upper groups are old establishments, that have long been in the business.

According to the census table of 1860, there were at that period 1,478 cigar manufacturing establishments and 626 tobacco and snuff manufacturing establishments in the United States. The crop of leaf tobacco reported was 428,121,000 pounds. This was, undoubtedly, the crop raised in 1859, which was unusually large. Of this quantity there were exported in 1860 167,274 hogsheads, 15,035 cases, and 17,817 bales, estimated to contain, in round numbers, 214,000,000 pounds, and leaving a like quantity for consumption, or as surplus on the market. The census tables do not give the number of pounds of manfactured tobacco and snuff produced is given at \$21,820,535, and the value of the cigars made

at \$9,068,778, or a total value of \$30,889,313.

At the present time the records of this office show that there are in the country 15,992 cigar manufacturers and 1,049 tobacco manufacturers. The average annual product of cigars, cheroots, and cigarettes for the last five fiscal years is 1,960,709,213, and the average annual product of manufactured tobacco and snuff for the same period is 122,769,654 pounds. The estimated quantity of leaf tobacco consumed in the manufacture of tobacco, snuff, and cigars annually for the last five years averages 193,453,806 pounds, while the average quantity exported annually for four years immediately preceding the last fiscal year was 260,674,102 pounds, as shown by tables furnished by the Bureau of Statistics. At a moderate estimate, the value of the combined products of all the manufactures of tobacco, snuff, and cigars annually for the last five years, exclusive of the tax, is not less than \$75,000,000, or two and one-half times the reported value of the same products for the year 1860.

The following tables have been carefully prepared from reports made by the collectors of internal revenue on printed forms prepared in such a manner as to give detailed statements of the annual operations of

every tobacco and cigar manufacturer in the United States:

Table showing by States and Territories the number of tobacco manufactories in the United States in the calendar year 1877, classed in separate columns according to the production at each manufactory per annum.

States and Torritories.	Manufactories producing not exceeding 25,000 pounds.	Manufactories producing over 25,000 pounds and not over 50,000 pounds.	Manufactories producing over 50,000 pounds and not over 100,000 pounds.	Manufactories producing over 100,000 pounds and not over 250,000 pounds.	Manufactories producing over 250,000 pounds and not over 500,000 pounds.	Manufactories producing over 500,000 pounds and notover 1,000,000 pounds.	Manufactories producing over 1,000,000 pounds.

REAL ESTATE ACQUIRED.

The following-described realty has been acquired for non-payment of taxes and on executions, viz: 180 acres of land in the State of Georgia; one distillery property in State of Illinois (since redeemed); one distillery property in State of Michigan (since redeemed); one lot of land in State of Missouri; one store and dwelling house combined, and 960 acres of land, in State of Tennessee; and 8 lots of land in State of Texas. The amount of taxes, &c., due on this property, and for which it was sold and bought in by the government, aggregates \$7,800.20. There have been sold in the States of Alabama, Illinois, Indiana, Nebraska, Virginia, and Wisconsin 11 parcels of real estate, realizing the sum of \$4,816.25, which has been deposited in the United States Treasury. There has been received from rents of property in the States of Alabama, Illinois, and Wisconsin the sum of \$1,143.30, also deposited in the United States Treasury.

The Bingham distillery, in Evansville, Ind., declared forfeited by the United States district court, was sold on the 17th July, 1877, for \$10,000, less all State and county taxes. Negotiations are being carried on continually for the sale of the other property coming under charge of this bureau under section 3208, Revised Statutes, nearly as many parcels having been disposed of since the commencement of this fiscal year as were sold during the last one. The epidemic prevailing throughout the South the past summer has interfered with the receipt of the reports heretofore called for as to the situation of the large amount of property held in the Southern States, and the completion of negotiations for the sale of several parcels commenced in the spring of this year.

ASSESSMENTS.

The following table gives the assessments made by the Commissioner of Internal Revenue during the fiscal years ended June 30, 1877, and June 30, 1878, respectively, showing the increase or decrease on each article or occupation:

, Article or occupation.	Amount ass fiscal yea	essed during r ended—	Fiscal year ended June 30, 1878.		
	June 30, 1877.	June 30, 1878.	Increase over 1877.	Decrease from 1877.	
Tax on deficiencies in the production of distilled spirits. Tax on excess of materials used in the production	\$77, 867 55	\$75, 583 21		\$2, 284 34	
of distilled spirits Tax on deposits, capital, and circulation of banks	58, 473 86	. 18, 050 73		40, 423 13	
and bankers Distilled spirits seized or fraudulently removed Fermented liquors removed from brewery un-	3, 877, 246 23 255, 931 71	3, 489, 694 20 207, 416 14		387, 552 03 48, 515 57	
stamped	2,577 50	2, 608 41	\$30 91		
Tobacco, snuff, and cigars removed from factory unstamped	419, 308 77 916 73 109, 259 35	130, 431 60 4, 349 12 128, 405 70	3, 432 39 19, 146 35	288, 877 17	
Legacies and successions Unassessed and unassessable penalties, interest, taxes previously abated, conscience money and deficiencies in bonded accounts which have	49, 747 61	127, 189 94	77, 442 33		
been collected, also fines, penalties, and forfeit- ures paid to collectors by order of court or by order of Secretary, and amount of penalties and interest received for validating unstamped in-					
struments. (Form 58) Special taxes (licenses) Tax on income and dividends	478, 653 03 104, 133 89 52, 318 50	370, 133 88 128, 716 83 123, 928 54	24, 582 94 71, 610 04	108, 519 15	
Total	5, 486, 434 73	4, 806, 508 30		679, 926 43	

The foregoing statement shows a decrease in the assessments for the year ended June 30, 1878, as compared with the previous year, of \$679,926.43. The decrease occurred in taxes on deficiencies in the production of distilled spirits, on excess of materials used in the production of distilled spirits, on distilled spirits seized or fraudulently removed, on tobacco, snuff, and cigars removed unstamped, in the collections reported on Form 58, and on deposits, capital, and circulation of banks and bankers.

DRAWBACKS.

The following statement shows the amount of drawback allowed on exported merchandise during the years named:

1864	687, 431 99 698, 655 36 798, 866 73 1, 864, 631 68 1, 379, 980 01 377, 411 31	1871 1872 1873 1874 1875 1876 1877	13, 704 67 *52, 346 31 35, 495 31 28, 941 83 30, 546 88 55, 092 40
		1878	

^{*}Including drawback on distilled spirits.

SUITS AGAINST EX-COLLECTORS...

Subjoined is a list of suits against late collectors of internal revenue, in which judgments have been rendered during the fiscal year ended June 30, 1878, furnished by courtesy of the honorable Solicitor of the Treasury.

M-A. Williams, late collector of internal revenue for the district of

Florida. Judgment for \$240.65. John T. Harper, late collector of internal revenue for eighth district of Illinois.

Judgment for \$1,520.92 v. parties to first bond. Judgment for \$72,840.31 v. parties to second bond. Judgment for \$31,197.26 v. parties to third bond.

William C. Stanberry, late collector of internal revenue for sixth collection district of Iowa. Judgment for \$1,195.18. Motion made by defendants for a new trial, and continuance granted by court.

Henry B. McClure, late collector of internal revenue second district of

Mississippi. Judgment for \$273.22.

George S. Dennison, late collector internal revenue first collection district of Louisiana. Judgment for \$7,983.70.

E. T. McGee, late collector internal revenue sixth district Tennessee.

Judgment for \$631.05.

F. Travis, late collector internal revenue seventh district Tennessee.

Judgment for \$31,679 44.

Milton Sapp, late collector internal revenue first district Texas. Judgment for \$620.15, and set aside by court.

COMPROMISES AFTER JUDGMENT.

The records of the Solicitor of the Treasury also show that for the fiscal year ended June 30, 1878, six cases were compromised after judgment, the amount accepted being \$2,548.88, and two were compromised at costs; thirty-two offers of compromise after judgment were rejected, the amount involved being \$39,100.56, and six were rejected the offer

being to pay costs; ten offers in compromise are pending, the amount involved being \$21,317.91.

REWARDS.

The following is a statement of the reward claims allowed and recommended for payment during the fiscal year ended June 30, 1878.

Under circular letter No. 99, from this office:	
Number of claims	276
Amount of rewards on same	\$32,765 28
Amount of collections upon which said claims were based:	
Taxes on interest, dividends, and undivided net gains of railroad com-	
, nanies	\$189, 476 79
Taxes on legacies and successions	86, 108 21
For fines, penalties, and forfeitures	60, 083 10
Taxes on various objects	2, 117 25
Total collections	337, 785 35
Under circulars dated March 17, 1869, and March 10, 1875:	
Number of claims.	158
Amount of rewards on same	
Number of stills seized and forfeited	
Number of persons engaged in operating said stills illicitly, arrested ar	ıd .
convicted or held to bail for appearance at court	165

MANUFACTURE OF PAPER.

In response to the advertisement referred to in my last report, bids were received from a number of the most prominent paper manufacturers of the country for furnishing paper for internal revenue stamps, and the lowest bid, which was made by Messrs. S. D. Warren & Co., of Boston, Mass., was accepted. The prices paid under the contract are 10½ cents per pound for vegetable-sized paper and 11½ cents per pound for animal-sized paper, about nine-tenths of the quantity used being of the former kind. The price paid under the previous contract was 20 cents per pound, and the annual saving effected by this change amounts to nearly \$25,000. The paper furnished is distinctive in color, and is water-marked with the letters "U. S. I. R." in such a way that each square inch of every sheet bears some portion of the water-mark. paper is manufactured under the supervision of an agent, who, with a suitable guard, is stationed at the mill. The paper is counted, boxed, and shipped to the Secretary of the Treasury, who issues the same to the Bureau of Engraving and Printing. No change has been made during the year in the contracts for the manufacture of paper or for the printing of such stamps as are not printed by the Bureau of Engraving and Printing of this department.

PRINTING AND ISSUE OF STAMPS.

The stamps issued by this office are engraved and printed in the highest style of the art of bank note engraving and printing, and it is a matter of congratulation that successful counterfeiting thereof has not been accomplished. Stamps for documents and proprietary articles continue to be printed by the National Bank Note Company, of New York; stamps for checks, drafts, or orders by the Graphic Company, of New York, and stamps for foil tobacco wrappers by Mr. John J. Crooke, of New York. The stamps furnished have been satisfactory, and it is believed that the rates paid are as low as can be obtained.

The following statement shows the number, kind, and value of stamps issued from this office during the fiscal year ended June 30, 1878:

Number.	Value.
3,720,050	\$52, 157, 195 00
198, 185, 951	29, 521, 431 07
25,352,665	12, 027, 751 75
34,910,860	10, 368, 150 00
637,990	9,091,350 00
478,689,531	6, 473, 401 19
741, 497, 047	119, 639, 279 01
	3,720,050 198,185,951 25,352,665 34,910,860 637,990 478,689,531

STAMPS REDEEMED AND EXCHANGED.

Number of claims for redemption of stamps allowed	628
Amount of claims for redemption of stamps allowed	\$32,821 01
Number of claims for the exchange of stamps allowed	702
Amount of claims for the exchange of stamps allowed	\$67,741 28

PRECAUTIONS AGAINST FRAUD.

The desirability of providing an ink with properties as nearly indelible as could be found, to be used in filling up and signing internal revenue stamps by collectors, has long been apparent. During the year many samples of ink claimed to be indelible have been submitted to this office, and all have been tested. Samples of the ink seeming to possess the requisite quality in the highest degree have been furnished to collectors for the purpose of giving it a practical test.

A mucilage to be used in affixing stamps to wooden packages, which after application would resist both heat and moisture, would undoubtedly be of great advantage to the service by making it impossible to

detach and re-use the same.

The plan which was adopted in 1875 of preparing certain stamps for distilled spirits, with slips of paper affixed to the backs thereof to prevent the body of the stamp from adhering to the package so that a designated portion could be cut out when the package was emptied, and returned to this office as conclusive evidence of the destruction of the stamp, and as a voucher for the issue of other stamps, has undoubtedly been of the greatest value as a preventive of frauds. It is claimed by four different parties that this plan is an infringement of patents owned by them, and four suits have been commenced against collectors for damages on account of such alleged infringements. The suits are being energetically defended by the United States district attorneys.

RECEIPTS FOR FIRST FOUR MONTHS OF PRESENT FISCAL YEAR.

The following table shows the receipts from the several objects of taxation for the first four months of the last two fiscal years. A comparison of the receipts for the two periods is also given.

/ Sources of revenue.	Receipts from July 1, 1877, to October 31, 1877.	Receipts from July 1, 1878, to October 31, 1878.	Increase.	Decrease.

REPORT OF WORK PERFORMED DURING THE FISCAL YEAR ENDED JUNE 30, 1878.

Division of law:	
Offers in compromise received and briefed	8
Opinions prepared	4
Offers in compromise acted upon	4
Reward-claims received and acted upon 569	2
Railroad cases adjusted 39	2
Orders for abatement of taxes issued	1
Claims for abatement of taxes disposed of	1
Amount of claims	
Claims for abatement scheduled	
Reports received and examined	
Division of accounts:	
Accounts, reports, and returns received, examined, and disposed of	2
Certificates of deposit received and recorded	
Division of distilled spirits:	
Returns and reports relating to distilled spirits received, examined,	
and disposed of	2
Returns and reports relating to fermented liquors received, exam-	
ined, and disposed of 37, 110	0
Seal-locks issued	
Hydrometer sets issued	
Gauging-rods issued	5

	•
Division of stamps:	
Value of stamps received and counted (nine months)	\$108,957,365 32
Value of stamps counted and issued to collectors	\$119,639,279 01
Value of stamps counted and transmitted to the Secretary of the	. , ,
Treasury for destruction	\$34,662,597 11
Stubs examined	8, 247, 550
Stamps and coupons received for credit and counted	19, 263, 376
Stamps and coupons received for credit and counted	
Reports received, examined, and disposed of	98,753
Division of assessments:	
Reports relating to assessments received, examined, and disposed	
of	34, 417
Claims for drawback disposed of	567
Reports relating to bonded accounts received, examined, and dis-	
posed of.	436, 441
Reports and vouchers covering exportations received, examined,	100, 111
and disposed of	131,001
and disposed of	151,001
Division of tobacco:	1 000
Reports relating to tobacco received, examined, and disposed of.	1,032
Reports relating to cigars received, examined, and disposed of	17,747
Division of appointments, records, and files:	
Commissions of storekeepers, storekeepers and gaugers, gaugers	
and tobacco-inspectors, prepared, and bonds examined and ap-	_
proved	524
Collectors' bonds recorded	69
Pages of letters recorded	29, 540
Press-copies of letters briefed, registered, and arranged for refer-	. 23, 340
	EC 904
ence	56, 324
Pages of miscellaneous copying	20,868
Letters for the entire bureau received and registered	50,573
Letters indorsed, briefed, and filed	36, 417
Aggregate number of letters mailed by the bureau	76, 324
	.

The foregoing table shows only a part of the work performed. The keeping of records and books of account by the various divisions embraces a large proportion of the work done by the bureau, which it is impracticable to tabulate, owing to the diversified nature thereof.

TABULAR STATEMENTS.*

I append tabular statements as follows:

Table A, showing the receipts from each specific source of revenue, and the amounts refunded in each collection-district, State, and Territory

of the United States, for the fiscal year ended June 30, 1878.

Table B, showing the number and value of internal revenue stamps ordered mouthly by the Commissioner and from the office of the Commissioner; the receipts from the sale of stamps and the commissions allowed thereon; also, the number and value of stamps for special taxes, tobacco, cigars, cigarettes, snuff, distilled spirits, and fermented liquors issued monthly to collectors during the fiscal year ended June 30, 1878.

Table C, showing the percentages of receipts from the several general sources of revenue in each State and Territory of the United States to the aggregate receipts from the same sources, by fiscal years, from July

1, 1863, to June 30, 1878.

Table D, showing the aggregate receipts from all sources in each collection district, State, and Territory of the United States, by fiscal

years, from September 1, 1862, to June 30, 1878.

Table E, showing the receipts in the United States from each specific source of revenue, by fiscal years, from September 1, 1862, to June 30, 1878.

^{*}These tabular statements are printed in pamphlet form, but are omitted from this report for want of space.

Table F, showing the ratio of receipts in the United States from specific sources of revenue to the aggregate receipts from all sources, by fiscal years, from July 1, 1863, to June 30, 1878.

Table G, showing the receipts from special taxes in each collection district, State, and Territory for the special tax year ended April 30, 1878.

Table H, an abstract of reports of district attorneys concerning suits and prosecutions under the internal revenue laws during the fiscal year ended June 30, 1878.

Table I, an abstract of seizures of property for violation of internal

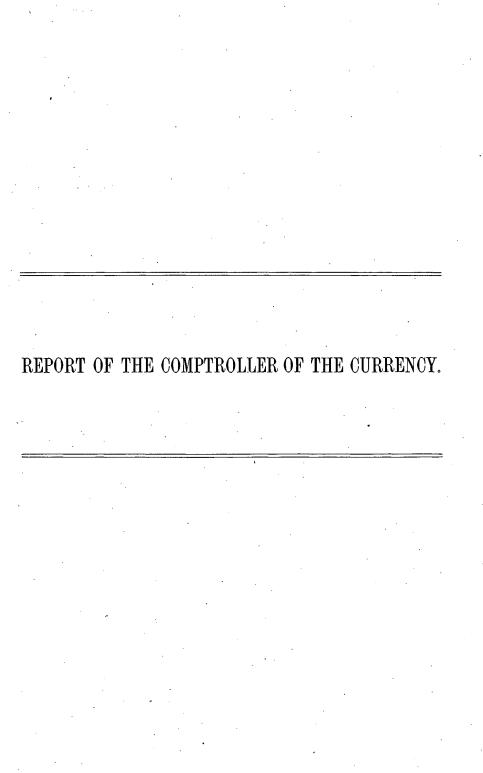

revenue laws during the fiscal year ended June 30, 1878.

And have the honor to remain, very respectfully, your obedient servant,

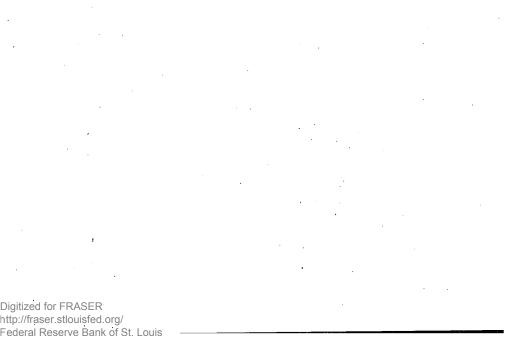

GREEN B. RAUM, Commissioner.

Hon. John Sherman, Secretary of the Treasury.

Digitized for FRASER

THE COMPTROLLER OF THE CURRENCY.

TREASURY DEPARTMENT,
OFFICE OF COMPTROLLER OF THE CURRENCY,
Washington, November 25, 1878.

I have the honor to submit for the consideration of Congress the sixteenth annual report of the Comptroller of the Currency, in compliance with section three hundred and thirty-three of the Revised Statutes of the United States. This section provides that the Comptroller shall make annually a report to Congress at the commencement of its session exhibiting—

1st. A summary of the state and condition of every association from which reports have been received during the preceding year, at the several dates to which such reports refer, with an abstract of the whole amount of banking capital returned by them, of the whole amount of their debts and liabilities, the amount of circulating notes outstanding, and the total amount of means and resources, specifying the amount of lawful money held by them at the times of their several returns, and such other information in relation to such associations as, in his judgment, may be useful.

2d. A statement of the associations whose business has been closed during the year, with the amount of their circulation redeemed and the

amount outstanding.

3d. Any amendment to the laws relative to banking by which the system may be improved and the security of the holders of its notes and

other creditors may be increased.

This section further provides that a statement shall be prepared by the Comptroller, exhibiting, under appropriate heads, the resources and liabilities and condition of the banks, banking companies, and savings-banks organized under the laws of the several States and Territories; such information to be obtained by the Comptroller from the reports made by such banks, banking-companies, and savings-banks to the legislatures or officers of the different States and Territories, and where such reports cannot be obtained, the deficiency to be supplied from such other authentic sources as may be available.

This last provision became a law by act of February 19, 1873, but owing to the defective legislation of the several States it has thus far been found impracticable to procure reliable statistics showing the condition of all the banks organized under State laws. All private bankers and banking associations, however, of whatever nature other than national, are required by law, for purposes of taxation, to make semi-annual returns to the Commissioner of Internal Revenue of the average amount of their capital and deposits. From these returns the following table has been compiled in this Office, exhibiting in a coneise form, by geographical divisions, the total average

capital and deposits of all State and savings-banks and private bankers in the country, for the six months ending May 31, 1878:

Geographical divis-	State banks and trust companies.		Pri	ivate bar	ikers.	Sav	ings-ban capita	Savings-banks without cap- ital.			
10118.	No.	Capital.	Depos- its.	No.	Capital.	Depos- its.	No.	Capital.	Deposits.	No.	Deposits.
New England States. Middle States. Southern States and Territories.	42 217 233 361	Millions. 8. 19 42. 45 27. 38 46. 33	Millions. 15. 06 122. 10 30. 67 61. 65	71 916 280 1, 589	Millions. 2. 86 34. 48 7. 30 33. 16	Millions. 3. 23 61. 92 13. 68 105. 00	1 3 4 15	Millions. 0: 07 0. 16 0. 88	Millions. 1. 14 1. 37 1. 28 22. 39	441 190 3	Millions. 403. 43 358. 68 2. 14 39. 05
United States	853	124. 35	229. 48	2, 856	77. 80	183. 83	23	3. 24	26. 18	668	803. 30

The capital of the 2,056 national banks in operation on June 29, 1878, as will be seen by a subsequent table, was \$470,393,366, not including surplus, which latter fund amounted at that date to more than 118 millions; while the average capital of all the State banks, private banks, and savings-banks having capital stock, for the six months ending May 31 previously, was, as seen below, but \$205,382,832; which amount is considerably less than one-half that of the national banks. The net deposits of the national banks were \$677,159,298, while the average deposits of all other banks and bankers, including savings-banks, were \$1,242,794,903. The average deposits for the same period of 668 savings-banks having no capital stock were \$803,299,345.

The table below exhibits the aggregate average capital and deposits for the period named of all banks other than national, together with the capital and deposits of the national banks on June 29 following:

Geographical divisions.	State banks, savings- banks, private bankers, &c.			N	fational ba	mks.	Total.			
	No.	Capital.	Deposits.	No.	Capital.	Deposits.	, No.	Capital.	Deposits.	
New England States. Middle States. Southern States. Western States and Territories.	555 1, 326 520 1, 999	Millions. 11. 12 77. 09 35. 55 81. 62	Millions. 422. 86 544. 07 47. 77 228. 09	542 634 176 704	Millions. 166. 52 177. 18 31. 40 95. 20	Millions. 128. 83 374. 89 35. 94 137. 50	1, 097 1, 960 696 2, 703	Millions. 177. 64 254. 27 67. 04 176. 82	Millions. 551. 69 918. 96 83. 71 365. 59	
United States	4, 400	205. 38	1, 242. 79	2, 056	470. 39	677. 16	6, 456	675. 77	1, 919. 95	

From this table it will be seen that the total number of banks and bankers in the country at the dates named was 6,456, with a total banking capital of \$675,776,198, and total deposits of \$1,919,954,201.

Tables similar to the foregoing for previous periods, together with other tables giving the assets and liabilities of State institutions during the past year, so far as they could be obtained from the official reports of the several States, will be found in the appendix.

A table arranged by States and principal cities, giving the number, capital and deposits, and the tax on capital and deposits, of all banking institutions other than national, for the six months ending May 31, 1878, will be found on page 54 of this report. Similar tables for previous years are printed in the appendix.

The total number of national banks organized, from the establishment of the national banking system on February 25, 1863, to November 1 of the present year, is 2,400. Of these, 273 have gone into voluntary liquidation by vote of shareholders owning two-thirds of their respective capitals, and 74 have been placed in the hands of receivers for the pur-

pose of closing up their affairs, leaving 2,053 in existence on November 1 of this year. Included in the number organized are nine national gold banks, in the State of California, with an aggregate capital of \$4,300,000, and circulation of \$1,468,920, which redeem their circulating-notes in gold coin at their places of issue and in the city of San Francisco.

During the past year twenty-eight banks have been organized, with an authorized capital of \$2,775,000, to which \$1,598,800 in circulating-notes has been issued. Fifteen banks have failed within this period, having an aggregate capital of \$2,712,500, and forty-one banks, with a total capital of \$5,200,000, have voluntarily discontinued business.

The following table exhibits the resources and liabilities of the banks on the 1st day of October, 1878, the returns from New York, from Boston, Philadelphia, and Baltimore, from the other reserve cities, and from the remaining banks of the country, being tabulated separately:

	New York City.	Boston, Phil- adelphia, and Balti- more.	*Other re- serve cities.	Country banks.	Aggregate.
·	47 banks.	99 banks.	85 banks.	1,822 banks.	2,053 banks.

THE NATIONAL BANKING SYSTEM.

The Comptroller, in his report for 1876, in addition to the usual national-bank statistics, gave an historical sketch of the two Banks of the United States, and also of the several State systems of banking, with tables showing, by geographical divisions and by States, so far as they could be obtained from official sources, the resources and liabilities of the State banks from the earliest dates to that of the organization of the national system, together with a comparative view of the State and national systems of banking.

In his report to Congress for the year 1875 he sketched the origin and growth of the national-banking system, and answered the principal arguments advanced against its continuance. The establishment of the system was not advocated in the interest of any political party, and it has been free from the control of partisan or sectional influence, its benefits being now open to all who desire to engage in the business of bank-The opportunity occasioned by a great war was seized upon, in the interest of the government, to get rid of a circulation issued by authority of many different States, which had been, almost from the beginning of the government, a grievous tax upon the business and the commerce of this country. It was shown, from the discussions in Congress at the time of the passage of the legal-tender act, from the reports of this department, and from the uniform legislation since that time, that the national-banking system was intended to be permaneut, the institutions organized under it being, by the express terms of the law, authorized to continue for a term of twenty years; while it was equally evident that the Treasury notes issued and still in circulation were intended to be funded, to constitute a temporary currency, issued from necessity, and to furnish the government with the means to save itself from destruction; that the amount was not to be increased, but to be

withdrawn from circulation as rapidly as possible.

It was further shown that the system was not a monopoly, its privileges being free to all, but that it uprooted many real banking monopolies authorized by the several States, and which had been in existence almost from the foundation of the government; that the profits upon circulation were small, and that the earnings of the banks were not too great a compensation for the risks incident to the business of banking, to which capital loaned directly on mortgage security is not subject; that the taxation imposed upon the banks is unequaled in the history of monetary institutions; that the losses by failures had been insignificant in proportion to the liabilities; and that the losses on circulation had not been one dollar; that the restrictions of the act are such as experience has shown to be necessary for the success of great banking systems; that publicity is one of the principal features of the national system; that a surplus of more than one hundred millions of dollars—equal to one-fourth of the capital, and derived largely from profits accruing from transactions during the war—had accumulated and remained as a security to stockholders and depositors during times of revulsion and panic.

This report, which, since its publication, has been constantly in demand, is out of print. The proposition for the substitution of Treasury notes in place of national-bank notes having been again revived and discussed, it is thought advisable again to answer the principal objections urged against the national banking-system, even at the risk of repeating to some extent, although with more recent data, what has already

appeared in previous reports.

The chief reasons urged in favor of the substitution of Treasury notes for national-bank notes are, that the banks in the national system are a favored class, enjoying special privileges at the cost of the people; that they derive a large profit from the issue of circulating notes; and that a large amount of money may be saved to the government by authorizing

it to issue all the paper currency of the country.

Before the passage of the act of June 20, 1874, no national bank could reduce its circulation and take up its bonds except by returning a proportionate amount of its own circulating notes, and these were usually difficult to obtain; and prior to the act of January 14, 1875, the total amount of circulation authorized to be issued was limited to 354 millions. But these acts provided both for a reduction of circulation and withdrawal of bonds at the pleasure of the banks, upon a deposit by them of lawful money in sums of not less than \$9,000, and for an issue of bank-notes to any association organized in conformity with law. the law, then, as it now stands, any number of persons not less than five, in any part of the country, who together may have \$50,000 of capital at command, may organize a national bank and receive circulating notes equal in amount to 90 per cent. of such capital—the law discriminating in the latter respect only against the large institutitions, as no bank organized since the passage of the act of July 12, 1870, is entitled to circulation in excess of \$500,000. A bank organized prior to that time, and having a capital of between \$500,000 and \$1,000,000, can receive in circulating notes but 80 per cent. thereon; if between \$1,000,000 and \$3,000,000, it can receive but 75 per cent.; and if over \$3,000,000, but

Since the passage of the act of June 20, 1874, the national banks,

10 F

so far from considering the privilege of issuing circulation a profitable monopoly, have voluntarily surrendered \$66,237,323 of their notes, which is \$29,463,467 more than has been issued to all of the banks organized since that date, while 144 banks, with capital stock amounting to \$15,517,000, and a circulation of \$9,190,718, have gone into voluntary

liquidation.

The capital stock of the national banks is not largely in the hands of capitalists. Among their shareholders may be found persons in every station of life, and great numbers of women and children rely for their support upon the successful management of these institutions. orate tables which appeared in the Comptroller's Report for 1876 showed that there were then only 767 persons anywhere who held as much as \$50,000 each of national-bank stock; that more than one-half of the whole number of shareholders in these associations held, each, but \$1,000, or less, of such stock; and that, taking the whole number of shareholders together, the average amount held by each one was but \$3,100. Of shareholders owning not more than \$1,000 each, there were 32,235 in Massachusetts alone, 12,784 in New York, 14,621 in Pennsylvania, 1,441 in Kentucky, 2,388 in Ohio, 1,608 in Illinois, 832 in Georgia, and 617 in Of those holding the stock in amounts ranging between \$2,000 and \$3,000 there were 17,743 in the New England States, 15,614 in the Middle States, 2,305 in the Southern States, and 3,422 in the Western States. Moreover, citizens of the Western States held 26,455 shares, and citizens of the Southern States 13,319 shares, of the stock of banks located in the Eastern and Middle States. It is not probable that the stock of any other class of corporations in the country is more widely distributed among people of moderate means than is that of the national It is also largely distributed among members of all political parties, and, as a rule, is free from the control of partisan influence.

The national banks have not at any time monopolized the business of banking, nor do they at the present time. On May 31 of this year there were in existence more than 3,700 State banks and private banking-houses, having an aggregate capital of 202 millions of dollars, and deposits of 413 millions. These banking establishments are located in all of the principal cities and villages of the country, and it is to be presumed that if the privilege of issuing circulating-notes were so great as it is persistently claimed to be, these associations and individuals, who are already engaged in the business of banking, and who are free to enter the national system, would hasten to organize under that system.

The amount of interest accruing annually upon the bonds held by the national banks on November 1—less the tax paid by them upon their circulation—is \$14,544,692 only, while the annual profit upon the entire circulation of the national banks, as will be shown in another place in this report, is but \$8,961,519, or less than two and one-half per centum upon their capital. As the 3,700 banks and bankers mentioned still continue to transact their business as State banks or private associations, it seems very clear that this annual profit of \$2,500 only, upon a capital of \$100,000, does not present to them, or any of them, a sufficient inducement to transfer their business to the national system. The reason is obvious. The laws governing the national banks contain numerous and burdensome restrictions, and impose many and severe penalties for their violation. On the one hand they authorize the issue of circulating notes, but on the other they require that the business of banking shall be conducted under a uniform system, which insures the greatest possible degree of safety to the depositor and bill-holder and prompt and certain convertibility to the circulating note. If, on the one hand, the right to issue circulating

notes is given, on the other, wholesome restraints are insisted upon as a condition of that privilege. These legal prohibitions and restrictions, which are the compensations that the public receive from these corporations in return for their right to issue circulating notes, are too numerous to be given here in detail. But it is proposed now to notice specially some of the more important of the restrictions, and to give a general summary of the whole of them, for the information of the public, in a subsequent portion of this report.

CAPITAL STOCK.

One of the most important requirements of the national bank act is that the capital stock of all institutions organized thereunder shall be fully paid in. The organization of banks without capital was one of the great abuses of previous banking systems. The history of banking in this country is full of instances of institutions of this character, which were not only permitted to receive deposits and transact a general banking business, but were authorized to issue circulating notes; and to the frequent failures of these associations may be attributed, in a great degree, the prejudice still existing in this country against all banking corporations.

When the national system was established especial care was exercised in the framing of the banking act, not alone to insure the safety and convertibility of the circulating notes, but also to guard against the organization of banks without bona fide capital. At least fifty per cent. of the capital stock of a national bank must be paid in before it can be authorized to commence business, and the remainder must be thereafter paid in installments of not less than one-fifth monthly, the payment of each installment being certified to this office, under oath, by the president

or cashier of the association.

It is frequently stated, and it seems to be believed by many, that banks of circulation, only, may be organized under the act-that is, that a bank may use its circulating notes either to increase its existing capital or to assist in organizing other banks without real capital. carefully guards against such an abuse. In the first place, as has been already stated, the officers and directors are required at the outset to certify under oath to the Comptroller the amount of stock which has been paid into the bank as permanent capital, while subsequent installments must be similarly certified. In addition to this, section 5203 of the Revised Statutes provides that "no association shall, either directly or indirectly, pledge or hypothecate any of its notes of circulation for the purpose of procuring money to be paid in on its capital stock, or to be used in its banking operations or otherwise; nor shall any association use its circulating notes, or any part thereof, in any manner or form to create or increase its capital stock." The Comptroller is also authorized to examine every banking association before granting it authority to commence business, in order to ascertain whether or not its capital has been actually paid in. It is impossible, therefore, for a bank of circulation only, without capital, to be organized under the national system, if proper precaution be exercised and the examiner is competent and faithful in the performance of his duty.

Neither can an association increase its circulation at pleasure, for the circulation can never exceed a certain proportion of the paid-up capital. There never has been an instance of the organization of one national bank by the use of the circulation issued to another. Such an illegitimate transaction could scarcely fail to be at once detected and the facts reported to the United States district attorney for his action thereon. If any association fails to pay up its capital stock, as required by law, or if its capital shall become impaired, an assessment must be made upon the shareholders, pro rata, for the amount of the deficiency or impairment, the interest upon the bonds held as security for its circulation being in the mean time withheld by the Treasnrer, while a receiver may be appointed by the Comptroller if the capital be not restored after three months' notice by him to the association.

The proportion of capital, and of capital and surplus, to liabilities, is much greater in this country than elsewhere, which is undoubtedly owing to the fact that our law requires that the full amount of authorized capital shall be actually paid in. In England, as a rule, only a portion of the capital is paid in, but the stockholders are individually liable for the full amount of their subscriptions. This restricted liability is true of the limited banks only, the stockholders of other corporations not limited being each liable for all of the debts of the corporation.

The following table, compiled from statements in the London Economist of October 19, 1878, exhibits the amount of capital, reserve and liabilities, and the ratio of capital, and of capital and reserve, to liabilities, of 3,417 banks (141 banks and 3,276 branches) of the United

Kingdom:

	Number of—				Reserve			Ratio to liabil- ities of—	
Banks.	Bks	Br'chs.	Total.	Capital.	fund and undivided profits.		Liabilities.	Capi- tal.	Capital and profits.
								Pr: ct.	Pr. ct.
England and Wales	72	1, 144	1, 216	£26, 046, 420	£13, 761, 814	£39, 808, 234	£223, 679, 548

National banks.

October 1, 1878	2, 053 \$466, 147, 43	6 \$157, 833, 993 \$623, 981, 42	9 \$1, 140, 179, 314 40. 88 54. 73

A comparison of this table with a similar statement regarding the national banks, which is also given above, shows the ratio of capital to liabilities of the 3,417 banks in the United Kingdom to be 16.78 per cent., and the ratio of their capital and reserve to liabilities to be 23.07 per cent.; while the corresponding ratios of the national banks are 40.88, and 54.73; the ratios of the national banks being in each instance more than double those of the United Kingdom. In the national banking system the existing ratio of capital to liabilities is nearly four times greater than is that of the 1,216 banks in England and Wales; while the ratio of the combined capital and reserve of the former banks to their liabilities is more than three times greater than that of the latter.

CONVERTIBILITY OF THE NOTE.

Previous to the passage of the national bank act, the circulating notes of banks located elsewhere than in New York or New England were not redeemable except at the counters of the issuing banks. As only about one-third of the circulation of the country consisted of New York and New England notes, it may be said that the remaining two-thirds had practically no general system of redemption. The legislation of the New England States provided only for redemption at the counter, although what was known as the Suffolk system compelled redemption in the city of Boston also. The New York law required redemption at the counter at par, and also in New York, Albany or Troy at one-fourth of 1 per cent. discount. The New England currency, therefore, consisted of unsecured notes redeemable at par at the place of issue and in the city of Boston, while the New York currency was a secured note redeemable at par at its counter, and at a discount at its agency. The notes of the national banks constitute the only secured circulation* ever required by law to be redeemed at par at a central agency, as well as at their place of issue.

be redeemed at par at a central agency, as well as at their place of issue.

If the New York system of redemption were to be applied to the national-bank circulation, in place of the existing method, it would probably at once raise the price of exchange to the rate current under that system, which was generally one-half of one per cent. The Suffolk system was excellent, as a voluntary arrangement entered into by 500 banks, having an aggregate circulation of fifty millions only, and all located within the comparatively moderate area of the six New England States; but it would not be a practicable one if extended to more than 2,000 banks, distributed, as are the national banks, throughout all the States of the Union, and having a circulation more than six times as great as that of the New England banks. So large a volume of circulating notes, issued at points so remote from each other, could not be made uniformly convertible by the legislative action of separate States, nor by the agency of individual corporations. Congressional action alone is adequate to accomplish this; and accordingly full provision was made by Congress for the convertibility of the national-bank circulation, by providing for its redemption at par, both at its place of issue and at the Treasury of the United States. For the latter purpose the banks are, by a late act, required to keep on deposit with the Treasurer an amount of lawful money equal to five per cent. of their circulation.

At the time of the passage of the last-named act a very large propor-

^{*}The following extract from the London Economist of October 26, 1878, clearly illustrates the superiority of the national banking system of this country, so far as the safety of circulating notes is concerned, over the systems of Great Britain. The closing sentence, contrasting the superior system of the Isle of Man with those of the United Kingdom, is significant:

[&]quot;A curious detail in the business of the City of Glasgow Bank has been brought to light. The Bank of Mona, an institution in the Isle of Man, was incorporated with it, and a large circulation of notes existed in that island. The House of Keys, which regulates these matters with more foresight than the House of Commons, in 1845 required adequate security on real estate to be held, not only against every note which was issued, but against every note signed by the authorities of the bank, whether held by them or by the public. The manager of the Bank of Mona, faithful to his trust while his superiors at Glasgow were so unmindful of theirs, has published a statement that the security is intact and immediately available. The gold which the City of Glasgow Bank should but does not hold would have been no security to the note-holder more than to any other creditor of the bank. The annual migrations of sovereigns to the north, in accordance with the act of 1845, is a continual inconvenience to the Bank of England, and but little benefit to any one. One is tempted to ask whether something like the precedent set by the House of Keys might not be followed with advantage in Great Britain."

The London Bankers' Magazine for November of the present year, in referring to this bank failure, says:

[&]quot;At all events, a strong argument in favor of the deposit of government securities, instead of the dispatch of gold to meet the periodical expansion of the Scotch circulation, is desirable from what has happened."

tion of the notes of the national banks was in a worn and mutilated condition, but within eighteen months thereafter more than \$248,000,000 in such notes were received at the Treasury for redemption. For this amount about \$177,000,000 of new currency was issued by the Comptroller to replace the mutilated portion, the remainder, which was fit for circulation, being returned to the banks.

In transmitting national-bank notes to the Treasury for redemption, they may be sent unassorted, that is, without reference to denominations or banks of issue, the only restriction being that they shall be presented in sums of \$1,000 or a multiple thereof, while the only expense to the sender is the cost of transportation to the place of redemption. Under this system the notes of the national banks, wherever located, have possessed a uniform value, and the prices of exchange have ruled at the lowest rate. The rates of exchange between Saint Louis, Cincinnati, Chicago, and New York have been frequently at par and under, not exceeding, say, 80 cents for \$1,000, instead of from ten to fifteen dollars per thousand, as was common under previous systems. Redemptions have not been so frequent under this as under the previous systems of New York and New England, for the reason that the notes are more fully secured, and also because the demand for Treasury notes has not been so great as was formerly the demand for gold under similar circumstances. The machinery of the law is, however, in operation, and the frequency of redemptions will, to a great extent, depend upon the demand for gold after specie payment shall have been resumed. But the notes of the banks being secure beyond peradventure, this demand will, in all probability, be much less than under former systems of unsecured currency.

PROFITS AND LOSSES.

The law provides that no association shall, during the time it continues its banking operations, withdraw or permit to be withdrawn, in dividends or otherwise, any portion of its capital, and that no dividend shall ever be made to an amount greater than the net profits then on hand, deducting therefrom losses and bad debts. With these restrictions, the banks are permitted to declare dividends semi-annually from their net profits, but are also required, before making any such dividend, to carry to surplus fund one-tenth part of their net profits of the preceding half year, until this fund shall equal twenty per cent of their capital The law thus designates three uses for the profits of the national banks: First, for building up a surplus fund; secondly, to protect the capital stock from impairment by losses in business, by the use of such fund when the other profits are insufficient; and, thirdly, for the declaration of dividends out of any remaining profits. As a rule, the banks in In determining the national system have not made excessive dividends. the true ratio of their profits, their accumulated surplus, as well as what is technically known as capital, must be considered, as it is from the use of both capital and surplus that their profits are derived. Even during the most prosperous years of the system, the ratio of annual earnings to the combined capital and surplus of the banks was not greatly in excess of the usual legal rates of interest in the States where they were located, while during the last two years this ratio has been less than six per cent. on the combined capital and surplus.

The surplus of the national banks amounted on October 1 to nearly \$117,000,000. A part of this sum represents the profits earned by former State banks previous to their conversion into national organizations, and brought by them into the system. The greater portion was, however,

accumulated by the banks during the years of business prosperity immediately succeeding the close of the war. The following table exhibits the amount of surplus held by the banks on or near the 1st day of January and July in each year since 1863, as shown by their reports for the dates nearest thereto, together with the semi-annual increase or decrease therein:

	Sur	plus.		Surplus.			
Dates.	Amount.	Semi-annual increase or decrease.	Dates.	Amount.	Semi-annual increase or decrease.		
July 4, 1864 January 2, 1865 July 3, 1865 January 1, 1866 July 2, 1866 January 7, 1867 July 1, 1867 July 6, 1868 January 4, 1869 June 12, 1869 January 22, 1870 June 9, 1870 December 28, 1870	81, 169, 937 82, 218, 576 90, 174, 281 91, 689, 834	Increase. \$7, 533, 401 22, 640, 255 11, 696, 805 7, 151, 621 9, 840, 883 3, 239, 936 7, 253, 315 5, 253, 993 5, 329, 813 1, 048, 639 7, 955, 705 1, 515, 553 3, 015, 906 3, 616, 464	December 16, 1871. June 10, 1872 December 27, 1872 June 13, 1873 December 26, 1873 December 26, 1874 December 31, 1874 June 30, 1875 December 17, 1875 June 30, 1876 December 22, 1876 June 22, 1877 December 28, 1877 June 29, 1878	111, 410, 249 116, 847, 455 120, 961, 268 126, 239, 308 130, 485, 641 133, 169, 095 133, 085, 422 131, 897, 107 131, 390, 665 124, 714, 073	Increase. \$3, 250, 950 3, 608, 789 6, 228, 806 5, 437, 206 4, 113, 813 5, 278, 040 4, 246, 333 2, 683, 454 Decrease. \$83, 673 1, 188, 225 6, 676, 592 3, 145, 618 3, 389, 924		

It will be seen that the maximum surplus was reached in June, 1875, and that there has since then been a gradual diminution of this fund. The diminution has been caused by charging thereto, from time to time, portions of the losses sustained by the national banks, such losses aggregating, during the last three years, the large sum of \$64,119,415, as shown in the following table:

Six months ending—	New England States.		Mid	Middle States.		Southern States.		Western States and Territories.

Of the \$36,224,427 of losses charged off within the last eighteen months, as shown above, \$5,326,072 was on account of depreciation in the premium on the United States bonds held by the banks.

The total losses thus charged off equal nearly fourteen per cent. of the entire capital of the banks. Although the charging up of losses has very considerably reduced the surplus of the banks, yet if the total losses incurred had been wholly charged to this fund it would have been still more

largely diminished. The greater portion of the losses mentioned has been canceled by charging it to the account of current profits, in consequence of which 357 banks, with an aggregate capital of \$58,736,950, have, in the last six months, paid no dividends at all; while during the last three years the average number of banks semi-annually passing dividends on account of losses has been 288. This number is equal to about one-seventh of the whole number now in operation. The average amount of capital upon which no dividends have been paid during that time is \$44,583,515; from which it follows that for a continuous period of three years more than one-tenth of the total capital of the national banks has been without profit to its owners. This is exhibited in the following table:

Many of the banks, also, which have declared dividends within the last three years have done so wholly or in part out of profits other than surplus previously accumulated by them, and not out of their current earnings.

The following table shows by geographical divisions the ratio to capital and surplus of the dividends declared by all the national banks during the last nine years:

Commonhinal diminions	Ratio of dividends to capital and surplus.									
Geographical divisions.	1870.	1871.	1872.	1873.	1874.	1875.	1876.	1877.	1878.	Average

United States	8. 4	8. 3	8. 3	8. 3	7. 9	7.8	7. 5	7. 1	6. 2	7.

The ratio to capital and surplus of the total net earnings of all the national banks was, in 1876, 6.9 per cent., in 1877, 5.6 per cent., and in 1878, 5.1 per cent.

The average ratio of dividends to capital in the New England and Middle States, where the greater portion of the capital of the national banks is held, was during the last three years 8.2 per cent. In the same States the ratio of dividends to the combined capital and surplus was 6.5 per cent., and the ratio of the net earnings to capital and surplus was 5.1 per cent.

The belief, so widely entertained, that the profits made by the national banks are excessive, is in great part due to the exceptionally large dividends paid by a few banks which are favorably located and have a large surplus, and which make large returns to their shareholders on the amount of their nominal capital. The profits of these banks are not to any considerable extent derived from their circulation, but from surplus and deposits. Many of the banks making these exceptional dividends have a much less amount of circulation than those making moderate dividends only, while a few of them have no circulation whatever.

If the bank act gives to the national banks the privilege of circulation, it also provides for a United States tax upon circulation, deposits and capital, and for a State tax upon the shares of each bank, to be determined by the legislature of each State, at a rate estimated to be not greater than is assessed upon other money capital in the hands of individual citizens of each State. The total amount of United States taxes collected from the commencement of the system to the present time is

as follows:

On circulation. \$39,775,817 35

On deposits. \$40, 328, 256 32 On capital.

Total. \$86, 033, 554 40

The annual amount of taxation, national and State, has for the last four years been as follows:

	Years.		National.	State.	Total.
1876			\$7, 256, 083 7, 317, 531 7, 076, 087 6, 902, 573	\$9, 620, 326 10, 058, 122 9, 701, 732 8, 829, 304	\$16, 876, 409 17, 375, 653 16, 777, 819 15, 731, 877
Totals	••••••	· · · · · · · · · · · · · · · · · · ·	28, 552, 274	38, 209, 484	66, 761, 758

More complete tables, showing the amount of taxes collected from the banks of each State and principal city of the Union, will be found upon subsequent pages of this report. The rate of taxation upon the banks in the city of New York and in other cities has averaged more than five per cent. annually during the past four years, and there is no doubt that the annual taxes collected from these institutions has been greatly in excess of the rate collected upon the capital of other corporations, private firms, and individuals, which cannot be as accurately determined as is that of the national banks from their published statements.

NATIONAL BANK FAILURES.

The failures in this country of State banks and private bankers are known to have been numerous and frequent; but information as to their numbers, or to the consequent losses to their stockholders or creditors, has not been attainable by the Comptroller. The bank departments of the different States give no information on this subject except as to the losses upon bank currency, and even that information has been of a scanty character. As a rule, under the different State laws, the affairs of insolvent institutions have been liquidated by a receiver appointed by the court, and the receiver has not reported to any State officer, but to the court which appointed him. Full information with reference to these insolvent institutions is therefore in most cases unattainable. The losses upon currency are estimated to have been five per cent. annually upon the

amount issued, but no estimate has ever been made of the losses to creditors and shareholders. Under the national-bank system, however, the losses as well as profits of each bank are reported to this Office. bank becomes insolvent, the Comptroller, by law, appoints the receiver, and exercises full supervision over the closing up of its affairs. of this Office, therefore, contain a complete record of everything pertaining to the settlement of the business of such associations. The following table exhibits the number of failures of national banks in each State, together with their capital, amount of claims proved, the amount of dividends paid, and the estimated losses to creditors, from the organization of the system to July 1 of the present year:

State.	No. of banks.	Capital.	Claims proved.	Dividends paid.	Estimated losses.	Percentage of claims paid.
Connecticut New York Pennsylvania District of Columbia Virginia Alabama Mississippi Lonisiana Texas Avkansas Tennessee Missouri Ohio Indiana Illinois Wisconsin Iowa Minnesota Kansas Nevada Colorado Utah	16 8 2 4 1 1 3 1 1 1 3 3 4 8 1 3 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2	\$60, 000 4, 076, 100 1, 312, 000 700, 000 800, 000 100, 000 50, 000 1, 600, 000 50, 000 100, 000 250, 000 250, 000 2, 250, 000 200, 000 200, 000 250, 000 250, 000 250, 000 250, 000 250, 000 250, 000 250, 000 250, 000 250, 000	\$97, 541 5, 722, 248 1, 558, 564 2, 288, 828 1, 679, 045 289, 407 33, 562 2, 981, 554 60, 330 15, 142 376, 932 2, 683, 093 422, 891 505, 531 3, 366, 767 134, 445 290, 477 313, 429 141, 576 170, 012 178, 135 88, 200	\$82, 910 5, 060, 536 898, 103 1, 785, 173 646, 818 121, 551 11, 746 1, 805, 060 	\$10, 000 320, 498 416, 850 503, 655 931, 789 107, 856 20, 900 922, 900 60, 000 178, 800 1, 096, 198 70, 000 90, 998 61, 000 57, 381 17, 001 177, 000	85. 88. 43 57. 62 78. 38. 52 42. 35. 61. 02 100. 17. 33 35. 48 45. 06 47. 45 42. 01 35. 00 62. 35 67. 59. 47 90. 18. 19
Totals	. 69	16, 015, 100	23, 398, 709	14, 010, 313	6, 415, 423	59. 88

From the above table it will be seen that the total amount of capital of all the insolvent national banks is \$16,015,100; amount of claims proved, \$23,398,709; of dividends paid, \$14,010,313; while the estimated losses are but \$6,415,423. The average number of failures during each of the past fifteen years has been less than five, and the average annual loss less than \$430,000.

The City of Glasgow Bank, which recently failed in Scotland, had a capital and surplus of less than \$8,000,000, and liabilities of more than \$50,000,000. It loaned to four debtors of the bank more than \$28,000,000, upon which there is a loss of more than \$21,000,000. The deficiency in the assets is nearly \$26,000,000, which is four times as great as the losses to all the creditors of national banks which have failed since the organization of The bank superintendent of the State of New York reports the liabilities of twenty-two savings banks which have failed in that State during the last six and one half years at \$12,188,777, and estimates the losses to their creditors at \$4,303,616, which is more than one-third of their entire indebtedness. He estimates the losses during the last three years at \$3,400,000, which is more than one-half of the estimated losses to the creditors of all the national banks in the United States from the beginning of the system until now. The losses from five State banks in the city of Chicago during the last two years, which banks were organized under special charters, under which neither State supervision nor reports were required, is estimated to be \$3,819,500, on liabilities of \$5,785,572. The losses from the State and savings banks of the

country during the last two years only are known to have been greater than the total loss resulting from all the failures which have occurred of national banking associations. The government has had large amounts on deposit continually with a great number of national banks throughout the country, for its convenience in making disbursements, but has suffered no loss during the past twelve years. Upon the circulating notes of the national banks there has been no loss whatever.

PUBLIC STATEMENTS AND EXAMINATIONS.

One of the most important provisions of law relating to the national banks is that requiring statements of their resources and liabilities to be made at such times and in such manner as the Comptroller may direct, and the publication of these statements in the daily newspapers of the country. The banks are also required to make returns to the Comptroller, semi-annually, of their earnings, losses and dividends; and all of these returns are compiled by him and annually transmitted to Congress. The Comptroller has authority to call upon the banks for any and all information concerning their affairs which may be thought of value; and it is his endeavor to communicate annually to Congress and the people the fullest possible knowledge attainable upon every question of interest connected with the business of banking. Letters, also, from whatever source, asking for proper information on these subjects, are always fully answered. The annual reports which have been issued from this Office are themselves evidence of the great amount and value of the information to be derived from the returns made by the national banks.

The law also provides for a thorough examination of the banks by competent persons as frequently as the Comptroller may think desirable. This feature of the law was at first exceedingly unpopular, but it is now generally approved by the banks themselves, and has been attended with the best results. Irregularities are not so likely to be allowed when it is known that they may be exposed by a competent examiner. In numerous instances unlawful dividends have been prevented, impaired capital discovered and its restoration compelled, and large losses to both shareholders and creditors avoided, by the prompt action of this office, based upon the report of an examiner. The excellent system now in operation is in strong contrast with the generally lax systems of bank reports and supervision which prevailed previous to the passage of the national-bank act.

The Comptroller, in his report for 1876, made an effort to collect from official sources the general bank statistics of the country. Only two balanced statements of the first Bank of the United States could be found, and previous to 1832 the published bank statistics consisted mainly of estimates made, or statements unofficially compiled, by individuals. Subsequently statements were obtained by this department from the several State officials, and were compiled annually for the use of Congress. But the State laws differed widely in their requirements, both as to the nature of the returns to be made by the banks and the dates which they should bear. Instead of a uniform time and similarity in form being required by all the States, as is now required under the national system, there was great diversity in both date and form, so that when the compilation of the reports was completed by this department the work was very unsatisfactory, and it was found impracticable to give anything like a just or true presentment of the condition of the banks of the country on or near any given day.

For the last five years the Comptroller, in obedience to an act of Con-

gress, has endeavored to compile annually the returns made by the State banks to the different State officials; but the same difficulties in this regard exist now that existed before the establishment of the national-banking system. The constitution of the State of Illinois provides "that every banking association now and which may hereafter be organized under the laws of the State, shall make and publish a full and accurate quarterly statement of its affairs, which shall be certified to under oath by one or more of its officers"; but although bills designed to carry out this provision of the constitution have been often introduced into the legislature, they have thus far failed to be enacted in the form of law. Many other States have no laws whatever upon the subject, and complete returns can be obtained from not more than one-half of the States in the Union.

For many years past there has been a growing desire to obtain the fullest data possible concerning the condition of all public corporations, and especially of all financial institutions; but if the present homogeneous system, which has accomplished so much in this direction, be now abolished, all further hope of obtaining full and reliable banking statistics may be at once abandoned.

The London Economist of October 26, 1878, in commenting upon the

report of the directors of the City of Glasgow Bank, says:

A more complete publication of banking accounts, as well as a more rigid audit, will probably be insisted on for the future. A real audit of such accounts is most difficult to make, but some authentication by qualified persons outside the business is obviously required. Though publication of accounts is not by any means a complete safeguard, yet a more thorough statement of the position of the business would have prevented much of the mischief.

In contrast with the beneficial workings of the national system in this respect, the Comptroller presents below an extract from the London Bankers' Magazine for May, 1877, commenting upon the statement contained in a previous annual report to Congress. The editor says:

Our last number contained a statement as to the position of banking in the United States of America. It is not possible, as our readers know, to publish any similar statement as to banking in England. No private bank in England has, we believe, ever put forward any authorized statement as to the position of its accounts, and it is barely possible to imagine a time in which such an innovation on the established practice could occur. Most of the joint-stock banks in England now publish their accounts; even among them, however, the custom is far from universal, though the number of those who prefer to keep the state of their affairs in privacy is steadily on the decrease; and it is very desirable that this should be the case. It cannot be doubted that a statement of the position of the main facts of banking would be often of service. In times of pressure a reliable official statement would tend to allay anxiety among many, and the careful banker would obtain from it information ready to his hand which might assist him in shaping his course at such periods. No such statement, however, is possible in England at the present time. The nearest approach to any such return was made in 1875, when a great many English banks, both private and joint-stock, sent returns to Sir Stafford Northcote, in connection with the proceedings before the select committee of the House of Commons on banks of issue in that year. But the manner in which this return was made, and the fact that many banks abstained from making it, and that it was impossible to supply the names either of those banks which complied with the request, or of those who did not, render the return of no value as a basis for estinating the deposits held by English banks at the present time.

FUNDING THE NATIONAL DEBT.

One of the chief objects in view in the organization of the national system was, not only to furnish bank-notes which were safe and convertible, but to supply a steady market for and facilitate the negotiation of United States bonds; and there is no doubt that the credit of the government and its ability to borrow money at low rates of interest have

been greatly increased by making its bonds a basis for the issue of national-bank notes.

Of the United States bonds held by the national banks on November 1, 1868, and deposited with the Treasurer as security for their circulating notes, nearly three-fourths bore interest at the rate of six per cent. The amount of this class of bonds has since been gradually reduced, until it is now less than one-fourth of all the bonds held, while nearly one-fourth of the whole amount bears interest at the rate of four and one-half and four per cent. only. About one-fifth of the entire issues of the latter classes of bonds is now held by the national banks. This will be seen from the following table, which exhibits the amount and classes of bonds held as security for circulation on the 1st day of November, for each year since 1865, and the rate of interest which they respectively bear:

Date.	6 per cent. bonds.	5 per cent. bonds.	4½ per cent. bonds.	4 per cent. bonds.	Total.
November 1, 1865	244, 993, 200 251, 274, 800 252, 623, 750 249, 724, 650 181, 158, 600 173, 303, 100 157, 834, 950 145, 981, 650 128, 503, 212 103, 819, 300 81, 984, 550	90, 076, 450 91, 376, 450	\$10, 305, 800 45, 089, 700	\$15, 884, 150	342, 651, 250 341, 512, 500 342, 455, 950 344, 745, 550 367, 114, 450 384, 968, 900 392, 852, 100 385, 421, 756 367, 549, 412

The government has still outstanding more than 693 millions of six per cent and more than 703 millions of five per cent bonds. The reduction of the interest on this amount to four per cent would s ve to the government nearly 21 millions of interest annually. The funding of the six per cent bonds into four per cents has made rapid progress during the last year, and the banks have been of great service to the government in this process of refunding, by negotiating and absorbing a very considerable part of the new issues. Should the national system continue there is no doubt that the present rapid reduction in the burden of interest will continue also. If the national bank system is to be abolished, and an additional amount of United States notes is to be issued, all hope of reducing the rate of interest on the public debt must be abandoned.

The larger portion of the five and six per cent. gold-bearing bonds of the United States is payable at the option of the government, and the remainder will be payable in 1881—two years hence. As already stated, 21 millions yearly may be saved to the government by funding these bonds into four per cents., while the amount which it is claimed may be annually saved by the repeal of the national bank act and the issue of 320 millions of unconvertible Treasury notes, is 13 millions only.* With the issue of this large amount of government notes the funding of the public debt will be rendered impossible; for the pledges of the government will then be violated and its credit permanently injured.

^{*}The currency value of the interest upon the bonds deposited as security for circulation is \$17,689,372, as is shown in a table on the next page. If from this amount be deducted ten per cent., \$1,768,937, which is the interest upon that portion of the bonds on which the banks receive no circulation, and the tax upon the circulation issued, \$3,144,680, there will remain \$12,775,755, which is the net amount of currency interest received by the banks upon ninety per cent. of the bonds deposited as security for their circulating notes.

Which is the wiser course—to continue the work of funding the debt, which has so successfully progressed during the present year, thus saving the greater amount of interest named, while adding to the credit of the country, or to attempt, by the repeal of the national-bank act, to save the less amount, and at the loss, as well, of reputation and credit? Is there not danger that attempts to remove an imaginary evil may be followed by the introduction of a real and much greater evil? Success in funding the national debt through the co-operation of two thousand of the principal monetary institutions of the country may be assured, but the effects of the issue of a large amount of irredeemable government currency cannot be foretold.

VALUE OF CIRCULATION TO THE NATIONAL BANKS.

The profit to the national banks derived from the issue of circulating notes is not great, as is frequently asserted, being but about $2\frac{1}{2}$ per cent. more per annum on the capital invested in the bonds pledged to secure the circulation than could be obtained by lending directly the same amount of capital. The table below shows the amount of bonds deposited in the Treasury on November 1, 1878, to secure national bank circulation, their various classes, their currency value, the circulation issuable thereon, and the annual interest upon them:

Class of bonds.	Par value.	Currency value.	Circulation issuable.	Annual gold interest.	Currency value of interest.
Five-twenties of 1865, 2d series. Five-twenties of 1865, 3d series, 1867s Five-twenties of 1864, 4th series, 1868s Ten-forties of 1864. Fives of 1881, funded 1881s. Four-and-one-halfs of 1891, funded	825, 700 8, 172, 100 1, 764, 500 70, 688, 850 125, 926, 750	\$61, 072, 730 851, 503 8, 672, 641 1, 905, 660 75, 195, 264 132, 223, 088	7, 354, 890 1, 588, 050 63, 619, 965 113, 334, 075	\$3, 389, 007 49, 542 490, 326 105, 534, 443 6, 296, 337	\$3, 397, 480 49, 666 491, 552 106, 135 3, 543, 279 6, 312, 078
1891s. Fours of 1907, eonsols of 1907 Pacific Railroad bonds	49, 397, 250 30, 566, 300 5, 584, 000	51, 311, 393 30, 566, 300 6, 735, 700	44, 457, 525 27, 509, 670 5, 025, 600	2, 222, 876 1, 222, 652	2, 228, 433 1, 225, 709 335, 040
Total	349, 408, 900	368, 534, 279	314, 468, 010	17, 311, 053	17, 689, 372

It will be seen that the currency value of the bonds, which represents the amount of capital invested in their purchase, is \$368,534,279. If this amount of capital were placed at interest at eight per cent. per annum, estimated as the average rate of interest obtainable throughout the country, it would produce \$29,482,742. The annual interest on the bonds of the banks amounts, as shown by the table, to \$17,311,053 in gold and \$335,040 in currency, the total currency value of the interest on November 1, 1878 (gold being quoted at the New York stock exchange on that date at one-quarter of one per cent. premium), being \$17,689,372, which is the whole amount received annually by the banks; but as they are required to pay into the Treasury of the United States a tax of one per cent. per annum upon their circulation, which, upon the amount issuable, is \$3,144,680, the net amount of interest received by them is thereby reduced to \$14,544,692. This amount, together with the interest which the banks receive on the amount of their circulation available for use, gives the whole income derived by them from their circulation and the bonds deposited to secure it.

The amount available for use is that issuable (being 90 per cent. of the par value of the bonds pledged), less an amount equal to five per cent. thereof, which the banks are required, by the act of June 20, 1874,

to place with the Treasurer of the United States, as a redemption fund. Therefore, even if the banks could keep loaned out all the time the whole of their circulation available for use, which is in practice an impossibility, they could have free for loaning but \$298,744,610 of the \$314,468,010 issuable upon their bonds; and that amount loaned at the rate named, eight per cent. per annum, would produce \$23,899,569, which, together with the net interest received on the bonds, makes \$38,444,261 as the income derived by the banks from their bonds and circulation, as against \$29,482,742 that would be produced by lending the capital invested in the bonds directly at the same rate of interest. The difference between the two sums, which is \$8,961,519, or 2.43 per cent. on the capital invested, represents the true amount of profit that the banks can, under the most favorable circumstances, receive from their circulation.

To recapitulate:

The interest at 8 per cent. per annum on the loanable amount of circulation, which, as shown above, is \$298,744.610, is	\$23, 899, 569
Gross amount received by the banks from bonds and loanable circulation From which deduct one per cent. of the issuable amount of circulation as the tax thereon	41, 588, 941 3, 144, 680
Net income upon the capital employed	38, 444, 261
as shown above, is \$368,534.279, loaned at 8 per cent. per annum would produce	29, 482, 742
Difference, representing the profit on circulation if the whole amount available for use be loaned continually throughout the year	

Two and forty-three hundredths per cent. on the capital employed (\$368,534,279) is \$8,955,383, which, as shown above, is about the value of circulation to the national banks if they could keep the whole amount of their issues loaned out all the time.

In the above calculation no deduction is made for the costs of the redemption of the bank circulation, which lessens by so much the profits on circulation. The cost of redemption for the fiscal year ending June 30, 1878, was \$317,942.48; for the year ending June 30, 1876, \$365,193.31; and for the year ending June 30, 1875, \$290,965.37.

In localities where the annual rate of interest is seven per cent., the value of circulation is about two and sixty-two hundredths per cent. per annum, and where the rate is ten per cent., its value is about two and

five-hundredths per cent.

The large margin (\$54,066,269) between the value of the bonds owned by the banks and the circulation issuable thereon, would, in case of disaster, be available as a reserve for the payment of the depositors or other creditors; and this is an additional argument in favor of issuing circu-

tion under the restrictions of the law as now provided.

Another thing that should be considered in estimating the value of circulation is, that the banks held their bonds at a premium, which, though it has been greatly reduced in the past, still appears among their assets for a large amount, and which will disappear when the bonds shall mature and be paid by the United States. The amount of premium appearing as an asset of the banks on October 1, 1878, the date of the last report of their condition, is \$7,134,736.

If all of the bonds of the banks necessary to secure their circulation were converted into four per cent. bonds, the value of circulation, taking the same amounts of bonds and circulation as are used above, would be shown as follows:

Interest on \$298,744,610 of circulation, loaned at 8 per c Currency value of interest on bonds	
Total	37 910 866

Less tax on circulation	
Total profit on capital employed	

The average rate of State taxation upon the capital of the national banks is about two per cent per annum; and if they should go into liquidation, and the owners of the bonds should continue to hold them, the amount of State taxation saved to them would nearly or quite equal the benefit they now derive from circulation.

NO SAVING TO THE GOVERNMENT BY THE SUBSTITUTION OF TREASURY FOR NATIONAL-BANK NOTES.

The amount of legal-tender notes outstanding is 346 millions; of national bank notes, 322 millions; making a total of 668 millions. It is not probable that additional legal-tender notes can be constitutionally issued. If, therefore, Treasury notes shall be substituted for the present national-bank notes, it is doubtful if they can be made a legal tender in the payment of all debts. Two kinds of Treasury notes will then be in circulation, one of which will be a full legal tender and the other not, even between national banks, as is now the case with their own notes. The full legal-tender notes will be of greater value than the other class, unless both are alike redeemable in gold at the commercial centers.

The banks hold among their resources 830 millions in bills receivable, and an equally large amount of other assets, a large proportion of which is readily convertible into money. Their deposits and bank balances amount to more than 600 millions, and their circulating notes are promptly redeemed, with but little expense to the holders, through the use of their assets, which represent their capital, surplus, and deposits. notes are issued to the banks than are necessary for the requirements of business, they can be easily retired. If a larger amount is desired, they can be readily obtained upon application in the manner provided by On the other hand, if the entire circulation of the country is to be issued by the government, its amount must be fixed by Congress, and can be neither increased nor diminished except by its action. The Treasury note represents no business capital, and the volume of the currency will be controlled, not by the demands of business and the wants of the country, but by the views and action of political parties and of Congress.

The government, unlike the banks, does not receive deposits nor loan money, and it must therefore provide for the redemption of its notes from its own resources. If it issues a small amount of currency, the amount of reserve required and the expense of redemption will be small; but if it issues the whole paper currency of the country, it must, when specie payments are reached, maintain a ratio of reserve equal to that of the Bank of England or the Bank of France, which is not less in either case than one-third of the amount of its issues. If the amount of government issues should reach 668 millions, which is the present volume of the currency, a reserve of 223 millions in coin must be kept on

hand. The interest upon this amount of reserve, at the lowest government rate (4 per cent.), would be \$8,920,000. The expense of issuing the notes and the cost of redemption would also be large, and the total cost to the government, including the hazards attending the issue of so large an amount of money, would not probably be less than 10 millions of dollars annually. This amount is but three millions less than that of the net annual interest received by the national banks upon their bonds, and is much greater than the profits derived by them from their entire circulation.

If the amount of Treasury notes should be largely increased, and be subject, as they will, to additional increase by each successive Congress, the ability of the government to redeem them will in time be questioned, and the amount and proportion of reserve required will need to be increased, thus adding materially to the expense attending the issue. If United States Treasury notes are substituted for the national bank notes and specie payments are resumed, it is evident that the government will save but little, if anything, by the transaction. If not convertible, two kinds of Treasury notes, as before stated, will then be in circulation. The old legal-tender note will be preferred, separate accounts of each kind of notes will be kept, and the difference of exchange, which has practically disappeared under the present system, will again appear in every business transaction.

Nearly all of the United States bonds held by the national banks are, by the explicit terms of the acts under which they were issued, payable, both principal and interest, in coin. These coin bearing bonds will bear a high premium in the market, in comparison with the new issues of unconvertible Treasury notes. Only three years ago, in 1875, the five and six per cent. bonds of the United States were at a premium of from 15 to 20 per cent. in Treasury notes, which were a full legal tender, and which were limited in the amount of issue. The issue of the new Treasury notes in place of national bank notes will therefore be attended with an advance in premium upon the bonds of the government held by the banks, in amount not less than from fifty to sixty millions of dollars, and probably exceeding that sum; and if the bonds held by the banks are purchased with the proposed new issue of Treasury notes, this loss of premium must at the outset be borne by the government.

It is believed by the Comptroller that this proposed substitution is impracticable, and that the repeal of the national bank act will result, not in an additional issue of Treasury notes, but in the restoration of State systems similar to those which were previously in operation. Secretary Chase, in his report for 1861, said that the establishment or the national bank system would "avoid the evils of a great and sudden change in the currency, by offering inducements to solvent existing institutions to withdraw the circulation issued under State authority, and substitute that provided by the authority of the Union"; and that "through the voluntary action of the existing institutions, ordered by wise legislation, the great transition from a currency heterogeneous, unequal, and unsafe, to one uniform, equal, and safe, may be speedily and almost imperceptibly accomplished."

The national bank act became a law on February 25, 1863, but the inducements offered by the Secretary were not sufficient to bring about, to any great extent, the conversion of existing State into national associations. Subsequently, on March 3, 1865, an act was passed, which provided "that every national banking association, State bank, or State banking association, shall pay a tax of ten per centum on the amount of notes of any State bank or State banking association paid out by them

11 F

after the first day of July, 1866." As soon as it became apparent that this bill, in effect taxing out of existence the State bank notes, would become a law, the State banks of New York, New England, and of other States, surrendered their old charters and entered into the national system; not as a matter of choice, but either because they foresaw that the banks in the national system would, in the future, possess a higher character than that of other similar institutions, or because, having always had the privilege of issuing circulating notes, they desired to retain that privilege.

According to the Comptroller's report for December, 1865, 731 State banks became national associations during the year preceding the report, and of the 1,601 national banks in operation at the close of the year named, 922 were conversions. These banks, however, almost without exception, came into the system reluctantly, but with the expectation of a continuance of their charters for twenty years, as provided in They had conducted a successful business as State associations for many years previous to and during the war. They had loaned gold dollars to the people and received in return the greenback, which purchased the bonds now held as security for their circulating notes; and, therefore, contrary to the existing general belief, they did not realize large profits upon the purchase of these bonds. The restrictions of the act were burdensome and unpopular with the banks. Experience has shown them to be good, and the banks have become habituated to those prohibitions which at first were so objectionable. The strong banks, with their large surplus and deposits and loans, do not ask for a change; but others, comprising a large class, not so favorably located nor so prosperous, would welcome again the condition they once enjoyed of freedom from legal restrictions and official supervision.

The national banks, as a class, are by no means enthusiastic advocates of the national system, as is implied in the assertions of those who proclaim that these banks will form a combination or union for its defense at any hazard. No formidable combination can be organized among them to save the system from repeal. On the contrary, it will be found that large numbers of the banks will quietly acquiesce in such repeal, provided they shall be satisfied that the old State systems are certain to be revived. Bills for the repeal of the act of March 3, 1865, which taxed the State bank circulation out of existence, have been already introduced in Congress, speeches favoring this measure have, during the late canvas, been made by representatives of many States, and resolutions of chambers of commerce in many of the principal Southern cities ask for the repeal of the 10 per cent. prohibition. The national-banking system, with its restrictions and wise provisions, may, under the excitement of an unfounded prejudice, be destroyed, but its destruction will soon be followed by a revival of the old objectionable State systems, with all the evils which formerly accompanied them, and from which they are inseparable.

In New York and Massachusetts, Wisconsin, Minnesota, Iowa, and other States, provisions either of law or of the constitution now exist, which prohibit the issue of circulating notes, unless secured in a manner similar to those issued under the provisions of the national banking system. As a consequence of these laws and constitutional provisions, the bonds now held in the Treasury at Washington will be largely transferred to the capitals of many of the States, the result being that while, contrary to the expectation of many, no great saving of interest to the government will ensue, the circulating notes of State associations, secured and unsecured, will soon fill the places now occupied by the uniform circulation of the national banks. But even if this circulation shall all

be well secured, it will be impossible, under the varying legislation of different States, to secure the issue of a homogeneous currency of equal value throughout the country. Many useful restrictions may be adopted, but it would be hopeless to expect all the States to agree upon a central point of redemption outside of their own respective boundaries, or upon a uniform system of cash reserve, or upon similarity in form of public State lines, as formerly, will bound the field of circulation of many of the Southern and Western issues, while the notes of New York and New England will not only monopolize the field within their own boundaries, but will successfully contest the privilege of circulation in those States remote from the commercial centers, which have no Eastern agency for the redemption of their notes. Eastern communities will suffer comparatively little from the unsound issues of other States, but those which are less favored with capital will, as of old, be the chosen field for the establishment of illegitimate corporations. The cost of exchange, which under the present system has, during the last fifteen years, nearly disappeared, will be again revived. The rate will not, perhaps, be so large as in former times, but yet large enough to be a grievous burden upon the business of the country.

Few persons have a just conception of the many advantages possessed by a homogeneous currency, fully secured, the issue of a single system, redeemable at a common point, and exempt from the discount occasioned by an irregularity of value in different localities. Great pains have been taken to obtain an estimate of the amount of exchange issued annually upon New York by the Western and Southern States. The amount drawn upon New York alone is estimated at nearly three thousand millions of dollars annually; and it will not probably be an exaggeration to say that not less than four thousand millions of dollars are annually drawn in exchange by the West and South upon the East. The amounts drawn upon each other by the banks in the commercial cities and States of the East is also great. In 1859 the average cost of Southern and Western exchange upon New York, was not less than from 1 to $1\frac{1}{2}$ per cent. this latter rate should be restored, the cost of exchange alone would be sixty millions annually; while if the rate were but one-half of one per cent., which was the current rate in the State of New York in the year 1860, a loss in exchange of twenty millions annually would ensue, to say nothing of the loss upon the issues of banks not properly organized.

The overthrow of the present well-established system, with its abundant capital and reserve, its large surplus, and its wise provisions, will be succeeded, either by two kinds of government notes, one or both at a discount for gold and of unequal current value, or by circulating notes issued under State authority. Either system will be bad. The one will be subject to the changing opinion of each successive Congress, and the other to the independent caprice of the legislatures of forty States.

The proposition is, to save money to the government by placing the principal existing monetary institutions of the country in liquidation at a time when specie payment is assured. There will be no saving to the government, but a loss of millions of dollars annually to the people, which loss will increase yearly with the growth of business and commerce between the different States.

Since 1863 the measure of value has been subject to such frequent changes that business men, no matter how careful their calculations or prudent their arrangements, have been continually deceived by the false regulator which measures every transaction. If any single day is selected, for the purpose of comparison, from the business days of each

of the last sixteen years, the measure of value will be found to have been as variable as the thermometer. This will be clearly seen in the following table, which gives the value, in standard gold coin, of the legaltender paper dollar on July 1 of each year from 1864 to 1878, and also its value on November 18 of the present year:

1864.	1865.	1866.	1867.	1868.	1869.	1870.	1871.	1872.	1873.	1874.	1875.	1876.	1877.	1878.	1878.
Cts.	Cts.	Cts.	Cts.	Cts.	Cts.	Cts.	Cts.	Cts.	Cts.	Cts.	Cts.	Cts	Cts.	Cts.	Cts.
38. 7	70. 4	66. 0	71. 7	70. 1	73. 5	85. 6	89. 0	87. 5	86. 4	91. 0	87. 2	89. 2	94. 5	99. 4	99. 8

In 1864 the value both of the Treasury note and the national-bank note was less than thirty-nine cents to the dollar. They are now alike worth ninety-nine and eighty-seven one hundredths cents. It is within the province of the present Congress to discountenance henceforth in this country the use of a false and fluctuating measure of value, and to insure in its stead the use of a measure which is everywhere recognized as honest and true. The business interests of this country demand a permanent system of fluance, free from the influence of political parties and from the ever-varying opinions of legislative bodies.

President Lincoln, in his annual message to Congress of December 1, 1862, said:

The condition of the finances will claim your most diligent consideration. vast expenditures incident to the military and naval operations required for the suppression of the rebellion, have hitherto been met with promptitude, and certainty, unusual in similar circumstances; and the public credit has been fully maintained. continuance of the war, however, and the increased disbursements made necessary by the augmented forces now in the field, demand your best reflections as to the best modes of providing the necessary revenue, without injury to business, and with the least possible burdens upon labor.

The suspension of specie payments by the banks, soon after the commencement of your last session, made large issues of United States notes unavoidable. In no other way could the payment of the troops, and the satisfaction of other just demands, be so economically, or so well provided for. The judicious legislation of Congress, securing the receivability of these notes for loans and internal duties, and making them a legal tender for other debts, has made them an universal currency; and has satisfied, partially, at least and for the time, the long-felt want of an uniform circulating medium, saving thereby to the people, immense sums in discounts and exchanges.

A return to specie payments, however, at the earliest period compatible with due regard to all interests concerned, should ever be kept in view. Fluctuations in the value of currency are always injurious, and to reduce these fluctuations to the lowest possible point will always be a leading purpose in wise legislation. Convertibility, prompt and certain convertibility into coin, is generally acknowledged to be the best and surest safeguard against them; and it is extremely doubtful whether a circulation of United States notes, payable in coin, and sufficiently large for the wants of the people, can be permanently, usefully, and safely maintained.

Is there, then, any other mode in which the necessary provision for the public wants can be made, and the great advantages of a safe and uniform currency secured? I

know of none which promises so certain results, and is, at the same time, so unobjectionable as the organization of banking associations, under a general act of Congress,

tionable as the organization of banking associations, under a general act of Congress, well gnarded in its provisions. To such associations the government might furnish circulating notes, on the security of United States bonds deposited in the Treasury. These notes, prepared under the supervision of proper officers, being uniform in appearance and security, and convertible always into coin, would at once protect labor against the evils of a vicious currency, and facilitate commerce by cheap and safe exchanges. A moderate reservation from the interest on the bonds would compensate the United States for the preparation and distribution of the notes, and a general supervision of the system, and would lighten the burden of that part of the public debt employed as securities. The public credit, moreover, would be greatly improved, and the negotiation of new loans greatly facilitated by the steady market demand for government bonds which the adoption of the proposed system would create. ernment bonds which the adoption of the proposed system would create.

It is an additional recommendation of the measure, of considerable weight, in my

judgment, that it would reconcile, as far as possible, all existing interests, by the oppor-

tunity offered to existing institutions to reorganize under the act, substituting only the secured uniform national circulation for the local and various circulation, secured and unsecured, now issued by them.

In his annual message of December 8, 1863, he refers to the same subject as follows:

The operations of the Treasury during the last year have been successfully conducted. The enactment by Congress of a national-banking law has proved a valuable support of the public credit; and the general legislation in relation to loans has fully answered the expectations of its favorers. Some amendments may be required to perfect existing laws; but no change in their principles or general scope is believed to be needed. Since these measures have been in operation, all demands on the Treasury, including the pay of the army and navy, have been promptly met and fully satisfied. No considerable body of troops, it is believed, were ever more amply provided, and more liberally and punctually paid; and it may be added that by no people were the burdens incident to a great war ever more cheerfully borne.

In his message of December 6, 1864, he again refers to the subject, and says:

The national-banking system is proving to be acceptable to capitalists and to the people. On the twenty-fifth day of November five hundred and eighty-four national banks had been organized, a considerable number of which were conversions from State banks. Changes from State systems to the national system are rapidly taking place, and it is hoped that, very soon, there will be in the United States no banks of issue not authorized by Congress, and no bank-note circulation not secured by the government. That the government and the people will derive great benefit from this change in the banking systems of the country can hardly be questioned. The national system will create a reliable and permanent influence in support of the national credit, and protect the people against losses in the use of paper money. Whether or not any further legislation is advisable for the suppression of State bank issues, it will be for Congress to determine. It seems quite clear that the Treasury cannot be satisfactorily conducted unless the government can exercise a restraining power over the bank-note circulation of the country.

More than a year before the passage of the national bank act, Secretary Chase, in referring to the proposed system, said:

Its principal features are, first, a circulation of notes bearing a common impression and authenticated by a common authority; second, the redemption of these notes by the associations and institutions to which they may be delivered for issue; and, third, the security of that redemption by the pledge of United States stocks and an adequate provision of specie. In this plan the people, in their ordinary business, would find the advantages of uniformity in currency; of uniformity in security; of effectual safeguard, if effectual safegnard is possible, against depreciation; and of protection from losses in discounts and exchanges; while in the operations of the government the people would find the further advantage of a large demand for government securities, of increased facilities for obtaining the loans required by the war, and of some alleviation of the burdens on industry, through a diminution in the rate of interest or a participation in the profit of circulation, without risking the perils of a great money monopoly. A further and important advantage to the people may be reasonably expected in the increased security of the Union, springing from the common interest in its preservation, created by the distribution of its stocks to associations throughout the country as the basis of their circulation.

The Secretary entertains the opinion that if a credit circulation in any form be desirable it is most desirable in this. The notes thus issued and secured would, in his judgment, form the safest currency which this country has ever enjoyed, while their receivability for all government dues, except customs, would make them, wherever payable, of equal value as a currency in every part of the Union. The large amount of specie now in the United States will easily support payments of duties in coin, while these payments and ordinary demands will aid in retaining this specie in the country as a solid basis, both of circulation and loans.

The whole circulation of the country, except a limited amount of foreign coin, would, after the lapse of two or three years, bear the impress of the nation, whether in coin or notes; while the amount of the latter, always easily ascertainable and, of course, always generally known, would not be likely to be increased beyond the real wants of business. He expresses an opinion in favor of this plan with the greater confidence, because it has the advantage of recommendation from experience. It is not an untried theory. In the State of New York, and in one or more of the other States, it has been subjected in its most essential parts to the test of experiment, and has been found practicable and useful. The probabilities of success will not be diminished but increased by its adoption under national sanction and for the whole country.

These anticipations have been realized. The national banks have held, almost continually, nearly one-fifth of the bonds of the United States, thus increasing the value of these bonds and the credit of the government, so that, when recently returned to us in large amounts from abroad, they could be taken at home without depreciation, and they have also furnished a currency both safe and uniform. banks have received a profit from their circulation, the discounts and exchanges and the rates of interest in most of the States have been reduced, and the people have thus participated in that profit. notes are of equal value in every part of the Union, and the whole circulation of the country, both paper and coin, bears the impress of the nation. The amount of coin held by the country is now much larger than then estimated, the amount held by the Treasury Department being 160 millions, and the total coin and bullion in the country being estimated by the Director of the Mint at more than 358 millions. This amount is constantly increasing, and it is to-day "a solid basis" for circulation. Congress has fixed the day for the restoration of the specie standard, and the legislation needed is that which will not overthrow but co-operate with the present well-managed monetary institutions of the country in accomplishing this result. When this is done the present. banking system, if then thought desirable, may be modified without danger to the credit or the business and commercial interests of this great nation.

RESUMPTION AND RESERVE.

The law provides that banks in New York City shall hold a cash reserve of 25 per cent. upon their deposits, and that banks in the other principal cities shall hold an equal ratio of reserve, one-half of which must be in bank, while the remainder may be on deposit in New York. All other banks must hold a reserve of 15 per centum upon deposits, two-fifths of which must be on hand in lawful money, and the remainder may be on deposit with banks in the reserve cities. The amount of reserve held on the first day of October last was greater than that required by law, as may be seen by reference to the following table:

Cities.	No. of	Circu-	Net de-	Legal-	Due from		Ratio of der fur	legal-ten- ids to—	Ratio of reserve funds to

The amount of legal tender funds held by the banks in New York City on October 1 was \$50,921,576, which was 26.8 per cent. upon their deposits and 24.3 per cent. upon circulation and deposits. held by the banks in the principal cities, including New York, was \$92,934,123, or 112.4 per cent. upon their circulation, and 23.9 per cent. upon their deposits; and the total cash reserve of all the national banks was \$142,955,718, or 47.3 per cent. of the total outstanding circulation of the banks then in operation, and 21.1 per cent. of their deposits. reserve consisted of \$30,688,606 of specie, \$97,061,571 of legal-tender notes, and \$15,205,541 deposited in the Treasury for the redemption of circulating notes. It is evident that the banks are well prepared to redeem their circulating notes in legal-tender notes, in accordance with law. The national and State banks in New York City and in Boston have already signified their intention to co-operate with the Treasury Department in the resumption of specie payments, which takes place on the 1st day of January next, as provided by law, as may be seen from the late action of the Clearing House Association of that city, which will be found upon another page. It is for the interest not only of the banks with their large assets, but also of the depositors of more than 800 millions of dollars in savings banks, as well as depositors in other banks, to encourage resumption and permanently fix the coin value of their deposits. The legal-tender note will then become a coin certificate payable on demand at the office of the Assistant Treasurer of New York, and will be more convenient and desirable for general use than coin itself.

The Treasury department owns 140 millions of coin, which is equal to more than forty per cent. of the entire issues of the legal-tender notes, and is available for their redemption, while the banks hold nearly one-third of the legal-tender notes. If, therefore, the banks of the country co-operate with the Treasury, it is impossible that resumption shall fail. But even if this co-operation should not be universal, it could not affect the ultimate result; for if any considerable portion of the legal-tender notes be exchanged for coin at the Treasury and withdrawn from use, the notes will become scarce and the coin be forced into circulation to supply the requirements of business and fill the gap. The coin will soon thereafter be returned to the Treasury in payment of customs duties and internal-revenue taxes, and offered in exchange for the greenback coin-certificates, which will be more generally acceptable to the people, for the same reason that the notes of the Bank of England and of the Bank of France are now preferred to coin.

But while it is conceded that both the Treasury and the banks can readily redeem their circulating notes, it is said that it will not be possible for the banks to provide for their deposits. In answer to this statement the Comptroller repeats what has been previously said by him:

Those who take this view proceed on the assumption that the banks will be called upon to pay their deposits in specie. This was not true during any former period of specie payment, and is less likely to be true under the national banking system than it was under any previous system of banking. The banks in this country, from their first organization, have, in times of resumption as well as of suspension, received from their dealers current bank-notes and have paid out the same. This is true to-day in England, Scotland, Germany, and France, in all of which countries the bank-note is preferred, as a rule, to either gold or silver. Only a small portion of the bank circulation of the country, at any period prior to 1863, was either safe or convertible; yet even this circulation, poor as it was, was freely received by the banks outside of the commercial cities, and was paid out by them to their depositors, so closely identified were the interests of the one with the other. The notes which were returned from the commercial centers for redemption were readily paid out and circulated at home, and

the demand for specie, wherever it existed, was almost entirely owing either to an excess of currency or to a want of confidence in the institutions which issued it.

The people throughout the country now know that the national-bank notes are safe, and that if these notes are not paid at the counters of the banks which issued them they will be paid at the Treasury Department in lawful money, and that the securities held for their redemption are amply sufficient for that purpose. No reason therefore exists why the people, who, in the last fourteen years, have not lost one dollar through the use of bank-notes, should decline to receive such notes in payment of their deposits. These notes are not only guaranteed by the government, but they are received by it in payment of all taxes and other dues except duties on imports, and are disbursed by it in payment of all demands except interest on the public debt, and in the redemption of pational-bank notes.

The national banks hold eight hundred and eighty millions of loans made to the people, and each bank is required, by section 5196 of the Revised Statutes, "to take and receive at par, for any debt or liability to it, any and all notes or bills issued by any lawfully-organized national banking association." There are, therefore, eight hundred and eighty millions of liabilities of the people due to the national banks—a sum largely exceeding the whole amount of deposits—which may be paid in the notes of any or all of the national banks in the country. The national-bank notes are therefore very different in character from the heterogeneous bank-notes formerly issued by authority of the several States. Moreover, the deposits of the banks are largely owned by their own shareholders and by their borrowers; and surely business men, who look to the banks for accommodations, and stockholders, whose profits depend upon their successful management, will be the last to conspire to injure their credit.

Deposits consist chiefly of bank-credits, are derived largely from the discount of commercial paper, and are paid mainly by transfers upon the books—not with either coin or currency. Throughout the country all large payments are made, not with money, but with checks. In the principal cities these payments are accomplished through the operations of clearing-houses. During the last twenty-four years the exchanges of the New York clearing-house were 454 thousand millions, while the balances paid in money were less than 19 thousand millions. The average daily exchanges during this whole period were more than sixty-one millions, while the average daily balances paid in money were but two and one-half millions, or but four and one-fifth cents more the dollar, as will be seen by a table on another page.

upon the dollar, as will be seen by a table on another page.

Immediately after resumption in England, in 1821, there was but little demand for gold, and the same was true in France after resumption by the Bank of France in 1850, and in this country in 1838 and 1858. The Bank of France is at present in a state of suspension,* but its notes are preferred by the public to specie, and the bank has found it difficult to reduce the volume of its circulating notes in exchange for coin. All thought of demanding actual payment in specie will vanish as soon as resumption is assured, and those timid bankers who fear that coin will be demanded for every dollar of their deposits can reassure themselves by an agreement with their dealers that their deposits shall be payable, as at the present time, "in current funds," which will then consist of legal-tender notes and the notes of specie-paying banks.

RECENT ACTION OF THE NEW YORK CLEARING-HOUSE IN REFERENCE TO RESUMPTION—ITS EXCHANGES SINCE ORGANIZATION.

The New York Clearing-House Association, which is composed of forty-five national and thirteen State banks, has, during the present month, consummated an arrangement with this department greatly facilitating the payment of drafts and checks which constantly pass between the office of the assistant treasurer and the banks. The basis of this arrange ment is as follows:

First. Hereafter, drafts drawn upon any bank represented in the Clearing-House Association in the city of New York, received by the assistant treasurer in that city, may be presented to such bank at the clearing-house for payment.

Second. Hereafter, drafts drawn upon the assistant treasurer at New York may be adjusted by him at the clearing house, and the balance due from the United States may be paid at his office in United States notes or clearing house certificates.

^{*}Since this was written the Bank of France has resumed, and there has been no special demand for coin, the transition having taken place almost imperceptibly.

Third. After the 1st of January next payment of checks presented to the assistant treasurer by any bank connected with the clearing-house may be made by him in United States notes.

The Association subsequently adopted a report, and the following propositions for the guidance of the banks in the transaction of business after the first day of January, 1879, which propositions have also since been adopted by the Clearing-House in Boston:

1. Decline receiving gold coins as "special deposits," but accept and treat them only as "lawful money."

2. Abolish special exchanges of gold checks at the clearing-house.

3. Pay and receive balances between banks at clearing house either in gold or United States legal tender.

4. Receive silver dollars upon deposit only under special contract to withdraw the same in kind.

5. Prohibit payments of balances at clearing-house in silver certificates or in silver dollars, excepting as subsidiary coin in small sums (say under \$10).

dollars, excepting as subsidiary coin in small sums (say under \$10).

6. Discontinue gold special accounts by notice to dealers to terminate them on 1st January next.

The following is an extract from the report referred to:

There are diverse views honestly entertained respecting the relative merits and powers of circulating notes, of banks or of government, as to which will best promote the public interests and meet the requirements of the people. Avoiding all discussion of this subject as not pertinent to the immediate occasion, let us accept the situation as it now exists, and as it will continue until after the day of resumption, and remit all such questions to the test of future experience.

At present there is a marked distinction made in the daily transactions of banks between their deposits of gold and their deposits of currency, by treating the former as a special fund, payable in kind. It must be evident that if this discrimination continues to be made after resumption, it will prolong the idea of the inferiority of circulating notes after they have been declared to be restored to an equality with gold by becoming interchangeable, and will therefore falsify the proclamation of the government. It will not only be a practical denial by the banks of the sincere purpose of the government to maintain its resolution, but, by affording protection and facility to those who draw coin from the Treasury, will place the moral force and power of the banks in direct opposition to the effort of government.

Specie payments will not have been truly accomplished until all distinctions in the use of gold coin and currency as money are obliterated in ordinary commercial trans-

actions.

To make resumption effective, the banks must cordially co-operate by practically treating lawful currency and gold coin as equivalent in value, as they did before the war, declining to receive all deposits of gold as subject to special contract as hitherto, and accepting it only as lawful money. They should also abolish all existing arrangements in which gold coin is preferred, by giving notice that they will expire on the 1st January next, the day of resumption, and terminate all special gold exchanges at the clearing-house.

If the government, also, forbearing all further legislation upon the subject, will discontinue the issue of gold-certificates at the Treasury, and regard gold coin as practically the equivalent of lawful money in all its disbursements, the distinction which has so long existed between coin and currency will rapidly fade away, and natural law will reassert its beneficent dominion over our financial affairs. Resumption of the coin standard being assured, it is entirely safe to leave the circulating notes to find their true place, as their constitutional merits and the demands of trade and the public interest may naturally determine. But resumption of the coin standard can be successfully reached only by the fearless disbursement of gold both by banks and government, and by such unreserved and confident action as will manifest to the public that they are working harmoniously together, and feel the utmost assurance of its practicability and permanence.

The exchanges at the clearing house in New York City for the year ending October 1, 1878, were nearly twenty thousand millions, and the balances paid in money were about nine hundred and fifty millions. The average daily exchanges were about sixty-five millions, and the average daily balances paid in money were but about three and one-tenth millions, or only 4.8 per cent. of the amount of the settlements.

The New York clearing-house was organized in 1853, and the following table exhibits its transactions, and the amount and ratio of currency

required for the payment of daily balances, yearly, for the last twenty-five years:

Years.	No. of banks.	*Capital:	Exchanges.	Balances paid in money.	Average daily exchanges.	Average daily bal- ances paid in money.	Ra- tios.

Section 5175 of the Revised Statutes provides "that not more than one-sixth part of the notes furnished to any association shall be of a less denomination than five dollars, and that after specie payments are resumed, no association shall be furnished with notes of a less denomination than five dollars." In view of this provision, the printing of one and two dollar notes was discontinued on November 1 last, and it is not expected that any notes of these denominations will be issued after the close of the present year. Section 5182 of the Revised Statutes requires that the circulating notes of national banks shall be "signed by the president or

^{*} The capital stock is stated at various dates, the amount at a uniform date in each year not being obtainable.

[†] Yearly averages for twenty-five years.

† Totals for twenty-five years.

2,845,907,626

vice-president and cashier thereof." The written signature of at least one bank officer is necessary, as a check between this office and the issuing bank; for, if the question of an overissue of notes should arise, the signature of such officer would be a means of determining the genuineness of the note. A number of banks, however, issue their notes with printed signatures, and in some cases with lithographic ones, which are frequently so badly executed as to excite suspicion as to the genuineness of the notes. The Comptroller, in his last report, recommended an amendment of section 5182 of the Revised Statutes, imposing a penalty of twenty dollars for every note issued by a national bank without the written signature of at least one of the officers of the bank, which recommendation is now renewed.

PUBLIC DEBT AT ITS MAXIMUM - CURRENCY AND ITS COIN VALUE.

The public debt reached its maximum on August 31, 1865, when it amounted to \$2,845,907,626, composed as follows:

Funded debt	\$1, 109, 568, 192
Matured debt	1,503,020
Temporary loans	107, 148, 713
Certificates of debt	
Five per cent. legal-tender notes	33, 954, 230
Compound-interest legal-tender notes	217, 024, 160
Seven-thirty notes	830, 000, 000
United States notes, (legal-tenders)	
Fractional currency	26, 344, 742
Suspended requisitions uncalled for	2, 111, 000
	

Of these obligations \$684,138,959 were a legal tender in the payment of all debts, public and private, except customs duties and interest on the public debt.

The amount of legal-tender notes, demand notes, fractional currency, and national-bank notes, outstanding on August 31, 1865, and annually thereafter, from January 1, 1866, to January 1, 1878, and the amounts outstanding November 1, 1878, are shown by the following table, together with the currency price of gold and the gold price of currency at each date:

The act of February 25, 1863, and the subsequent act of June 3, 1864, authorized the issue of 300 millions of dollars of national bank circulation, which was increased by the act of July 12, 1870, to 354 millions. The act of June 20, 1874, authorized any national bank desiring to withdraw its circulating notes, in whole or in part, to deposit lawful money with the Treasurer of the United States, in sums of not less than \$9,000, and to withdraw a proportionate amount of the bonds held as security for such notes; and the act of January 14, 1875, repealed all provisions restricting the aggregate amount of national bank circulation, and required the Secretary of the Treasury to retire legal-tender notes to an amount equal to 80 per cent. of the national bank notes thereafter issued, until the amount of such legal-tender notes outstanding should be \$300,000,000, and no more. That portion of the above act which required a reduction of United States legal-tender notes was repealed by the act of May 31, 1878, which provides:

That from and after the passage of this act it shall not be lawful for the Secretary of the Treasury, or other officer under him, to cancel or retire any more of the United States legal-tender notes; and when any of said notes may be redeemed, or be received into the Treasury under any law, from any source whatever, and shall belong to the United States, they shall not be retired, canceled, or destroyed, but they shall be reissued, and paid out again and kept in circulation: Provided, That nothing herein shall prohibit the cancellation and destruction of mutilated notes, and the issue of other notes of like denomination in their stead, as now provided by law.

Subsequent to the passage of the act of June 20, 1874, and of that of January 14, 1875, which authorized the retirement and reissue of national-bank notes at the pleasure of the banks, the circulation steadily decreased in volume until the year 1877, the total decrease being \$30,869,655, since which time there has been a small increase. This will be seen from the following table, which exhibits the total outstanding circulation, not including mutilated notes in transit, upon the 1st day of November for the last twelve years, and also upon the dates of the acts above named:

November 1, 1867	\$299, 153, 296	June 20, 1874	\$349, 894, 182
November 1, 1868	300, 002, 234	November 1, 1874	351, 927, 246
November 1, 1869	299, 910, 419	January 14, 1875	351, 861, 450
November 1, 1870	302, 607, 942	November 1, 1875	345, 586, 902
		November 1, 1876	
November 1, 1872	341, 512, 772	November 1, 1877	316, 775, 111
November 1, 1873	348 382,046	November 1, 1878	320, 991, 795

Since the passage of the act of June 20, 1874, \$79,910,488 of legal-tender notes have been deposited in the Treasury for the purpose of retiring circulation, and \$74,095,965 of bank notes have been redeemed, destroyed, and retired. From the date of passage of the act of January 14, 1875, to that of the act of May 31, 1878, which prohibited the further cancellation of legal-tender notes, \$44,148,730 of additional circulation was issued, and legal-tender notes equal to 80 per cent. thereof, or \$35,318,984, have been retired, leaving \$346,681,016 of legal-tender notes outstanding at the latter date. The amount of additional circulation issued for the year ending November 1, 1878, was \$16,291,685, of which \$1,598,800 was issued to twenty-eight banks organized during the year; while within the same period \$12,075,001 of circulation was retired without reissue, the actual increase for the year being \$4,216,684.

During the year ending November 1, 1878, lawful money to the amount of \$7,502,943 was deposited with the Treasurer to retire circulation, of

which amount \$3,366,469 was deposited by banks in liquidation. The amount previously deposited under the act of June 20, 1874, was \$61,028,049, and by banks in liquidation, \$11,379,496; to which is to be added a balance of \$3,813,675, remaining from deposits made by liquidating banks prior to the passage of that act. Deducting from the total of the sums named (\$83,724,163) the amount of circulating notes redeemed and destroyed, and for which no reissue has been made (\$74,095,965), there remained in the hands of the Treasurer on November 1, 1878, \$9,628,198 of lawful money for the redemption and retirement of circulation.

The following table exhibits by States the issue and retirement of circulation during the year ending November 1, 1878, and the total amount issued and retired since June 20, 1874:

The following summary exhibits concisely the operations of the acts of June 20, 1874, and of January 14, 1875, from the dates of their passage to November 1, 1878.

to November 1, 1878:	
National-bank notes outstanding when act of June 20, 1874, was passed. Amount of same issued from June 20, 1874, to January 14,	\$349, 894, 182
1875	
Increase from June 20, 1874, to January 14, 1875	1,967,268
Total amount notes outstanding January 14, 1875	351, 861, 450
Total redeemed and surrendered 81, 547, 725 Amount issued between same dates 50, 678, 070	
Decrease from January 14, 1875, to date	30, 869, 655
National-bank notes outstanding at date	320, 991, 795

Greenbacks on deposit in the Treasury June 20, 1874, to retire notes of insolvent and liquidating banks	\$3,813,675 79,910,488
Total deposits	83, 724, 163 74, 095, 965
Greenbacks on deposit at date	9, 628, 198
Greenbacks retired under act of January 14, 1875	35, 318, 984
Greenbacks outstanding at date	346, 681, 016

The circulation of the nine National Gold Banks located in the State of California, having a capital of \$4,300,000 and a circulation of \$1,468,920, is not included in the above table.

LOST OR UNREDEEMED BANK-NOTES.

The belief is very generally entertained that a considerable proportion of the circulating notes of each national bank will ultimately be lost or destroyed, and will therefore never be presented for redemption. is also frequently stated that the loss of such notes inures to the benefit of the banks. Neither supposition is correct. Section 5222 of the Revised Statutes requires that all national banks which go into voluntary liquidation shall, within six months thereafter, deposit in the Treasury an amount of lawful money equal to the amount of their circulating notes outstanding. The law also requires that full provision shall be made for the redemption of the circulating notes of any insolvent bank, before a dividend is made to its creditors. Thus it will be seen that no association can close up its business without first providing for the payment of all of its circulating notes, and that the amount deposited for their redemption must remain in the Treasury until the last outstanding note shall have been presented. It is therefore plain that the government, and not the bank, receives all the benefit arising from lost or unredeemed circulating notes.

In a previous report returns as to unredeemed circulation were given for 286 State banks organized under the authority of the legislature of the State of New York. The maximum amount of circulation issued to them was \$50,754,514, and the amount of unredeemed circulation at the date of the report named was \$1,336,337, or 2.63 per cent. of the highest The maximum amount of circulation issued to 30 State amount issued. banks in the city of New York, which are still in operation either as national or State associations, was \$7,763,010, while the amount remaining unredeemed in October, 1875, was \$142,365, or only 1.83 per cent. of the highest amount issued. The amount of circulation issued to 240 State banks in Wisconsin was \$7,565,409, and the amount unredeemed is \$134,747, the percentage of unredeemed notes being 1.78 only. The maximum issue to 210 State banks in the six New England States was \$39,245,380, while the amount remaining unredeemed is but \$792,767, the proportion of the latter to the former being 2.02 per cent. The returns from 332 State banks in New York, New Jersey, Delaware and Maryland show their maximum circulation to have been \$65,664,176, while the amount unredeemed is \$1,707,428, and the percentage 2.60. The percentage of unredeemed is \$1,707,428, and the percentage 2.60. The percentage of unredeemed notes of 25 State banks in Ohio, having a circulation of \$2,196,381, The greatest amount of circulation issued to 707 State banks, in 12 States, was \$114,671,346, the amount outstanding \$2,696,282, and the proportion unredeemed 2.4 per cent.

It is probable that, under the national system of redemption, the pro-

portion of national bank notes redeemed will be much greater than that of the State-bank notes under the old systems. The highest amount of circulation issued to 15 national banks which failed previous to 1870 was \$1,554,400, and the amount outstanding on November 1, 1878, was \$13,440.50, the proportion of notes remaining unredeemed being only 0.86 per cent. of the amount issued. The total amount issued to 23 national banks which failed previous to the year 1873 was \$3,196,693; and the amount outstanding on November 1, 1878, was \$57,074, the proportion of notes remaining unredeemed being but 1.78 per cent. of the amount issued. This is shown in the following table:

Name and location of bank.	Receiver appointed.	Circulation issued.	Circulation outstanding.	Percentage unredeemed.

Of the circulation of 51 national banks in voluntary liquidation previous to 1870, amounting to \$5,832,940, there yet remains outstanding \$151,484, or 2.59 per cent. only, of the amount issued; and of the circulation of 75 banks in liquidation prior to 1872, amounting to \$8,648,980, there remains outstanding \$227,448, which is equal to a percentage of 2.63; and of the circulation of 89 banks in liquidation prior to 1873, in amount \$10,764,080, there remains outstanding \$303.274, or 2.82 per cent. of the amount issued.

The amount of demand Treasury notes issued from July 17, 1861, to December 31, 1862, was \$60,000,000, in denominations of five, ten, and twenty dollars; and the amount remaining outstanding on the 1st of November last was \$62,065, the proportion unredeemed being a little more than one-tenth of one per cent., \$3,627 having been redeemed within the last two years.

SPECIE IN BANK AND ESTIMATED SPECIE IN THE COUNTRY.

The table below exhibits the amount of specie held by the national banks at the dates of their reports for the last ten years; the coin, coin-

The amount of silver coin held by the national banks on June 30 and October 2, 1876, was \$1,627,566 and \$2,557,599 respectively. The amount held on October 1, 1877, was \$3,700,703, and on October 1, 1878, \$5,387,738. The aggregate amount of specie held by the State banks in New England, in New York, New Jersey, Pennsylvania, Maryland, Louisiana, Ohio, and Wisconsin, as shown by their official reports for 1878, was \$3,023,429, of which the banks in New York City held \$2,629,839. In the returns from California the amount of coin is not given separately.

In my last annual report a statement was given from estimates made by the Director of the Mint, showing that the probable amount of coin and bullion in the country on June 30, 1877, was \$242,855,858, of which \$50,135,628 was silver. Assuming this estimate to have been substantially correct, the movement of coin and bullion for the year ending June 30, 1878, and the amount in the country at the latter date, is shown, from further estimates of the Director of the Mint, to have been as follows:

Estimated amount of coin and bullion in the country June 30, 1877 Estimated product of the mines for the year	\$242, 855, 858 99, 000, 000 13, 330, 715 16, 490, 599
Total Deduct exportations of gold \$9, 197, 555 Deduct exportations of silver 24, 535, 670	371, 677, 172
Deduct amount used in the arts and manufactures 5,500,000	39, 233, 225
Total estimated amount of coin and bullion in the country on June 30, 1878	332, 443, 947

Of this amount, \$244,353,390 was in gold coin and bullion, and \$88,090,557 in silver coin and bullion. The increase for the fiscal year was \$89,588,089, of which \$51,633,160 was in gold coin and bullion and \$37,954,929 in silver coin and bullion. The Director estimates the amount of gold coin and bullion in the country on September 30, 1878, at about \$259,353,390, and of silver coin and bullion at about \$99,090,557, making a total of \$358,443,947.

LOANS AND RATES OF INTEREST OF NEW YORK CITY NATIONAL BANKS.

The following table contains a classification of the loans of the national banks in New York City for the last five years:

Loans and discounts.	October 2, 1874.	October 1, 1875.	October 2, 1876.	October 1, 1877.	October 1, 1878.

Totals	201, 777, 054	202, 089, 733	184, 243, 225	169, 162, 391	169, 585, 98

The average rate of interest in New York City for each of the fiscal years from 1874 to 1878, as ascertained from data derived from the Journal of Commerce and the Financial Chronicle of that city, was as follows:

```
1874, call loans, 3.8 per cent.; commercial paper, 6.4 per cent. 1875, call loans, 3.0 per cent.; commercial paper, 5.6 per cent. 1876, call loans, 3.3 per cent.; commercial paper, 5.3 per cent. 1877, call loans, 3.0 per cent.; commercial paper, 5.2 per cent. 1878, call loans, 4.4 per cent.; commercial paper, 5.1 per cent.
```

The average rate of interest of the Bank of England for the same years was as follows:

```
During the calendar year ending December 31, 1874, 3.69 per cent. During the calendar year ending December 31, 1875, 3.23 per cent. During the calendar year ending December 31, 1876, 2.61 per cent. During the calendar year ending December 31, 1877, 2.91 per cent. During the fiscal year ending June 30, 1878, 3.07 per cent.
```

The rate of interest in the city of New York, on November 22 of the present year, as quoted in the Daily Bulletin, was, on call loans, from 3 to 4 per cent., and on commercial paper of the best grade, from $4\frac{1}{2}$ to 5 per cent. The rate of interest of the Bank of England, which, on No-

vember 29 of last year, was 4 per cent., had fallen on January 30 following to 2 per cent., from which date to October 14 there were seven changes, and, with a single exception on May 29, a gradual increase. The rate was fixed on the date last named at 6 per cent. and reduced on November 21 to 5 per cent.

SECURITY OF CIRCULATING NOTES.

The following table exhibits the kinds and amounts of United States bonds held by the Treasurer on the 1st day of November, 1878, to secure the redemption of the circulating notes of national banks:

Class of bonds.	Authorizing act.	Rate of interest.	Amount.
Loan of February, 1861 (81s)	July 17 and August 5, 1861 March 3, 1863 March 3, 1865 do	dododododododododododo	\$2, 276, 000 34, 416, 550 19, 790, 900 825, 700 8, 172, 100

Funded loan of 1891	do	4 per cent	49, 397, 256 30, 566, 300 5, 584, 000
Total			349, 408, 900

All of these bonds, with the exception of \$53,038.50 of 6 per cents, are, by the terms of the acts under which they were issued, payable in coin. Of the latter amount, \$36,692,550 consist of sixes of 1881, which were issued prior to the passage of the legal-tender act; \$10,762,300 of five-twenties, which were issued under the act of March 3, 1865, which law does not specify the kind of money in which the bonds issued under it shall be paid; and \$5,584,000 of Pacific Railroad currency sixes.

On October 1, 1870, the banks held \$246,891,300 of 6 per cent. bonds, and \$95,942,550 of 5 per cents. Since that time there has been a decrease of \$174,061,550 in 6 per cent. bonds, and an increase of \$100,673,050 in

the 5 per cents.

During the three years ending November 1, 1878, there has been a decrease of \$55,673,462 in 6 per cent., and of \$42,430,600 in 5 per cent. bonds, while in the same period \$49,397,250 of 4½ per cents., and within the last eighteen months \$30,566,300 of 4 per cents. have been deposited.

TAXATION, EARNINGS, AND DIVIDENDS.

The Comptroller has in former reports discussed at considerable length the question of bank taxation, and he respectfully repeats at the present time his previous recommendations for the repeal of the law impos-

ing a tax upon capital and deposits.

Special attention is called in this connection to the elaborate tables herewith presented, showing, for a series of years, the amount of national and State taxation paid by the national banks, the amount of losses charged off by them, the number of banks which have been compelled to pass dividends, and the low ratio of their earnings and dividends to capital and surplus. It will be seen that the average rate of taxation upon capital for the past four years has been nearly three and one-half per cent., while in the city of New York it has exceeded five per cent.; that during the last three years the banks have suffered losses amounting to more than sixty-four million dollars; and that the ratio of their earnings to capital and surplus was, in 1877, but 5.62, and in 1878, but 5.14 per cent. No more conclusive proof of the justice of the request

for the repeal of the law imposing these taxes can be given than is contained in these various tables.

The national banks pay annually to the government, in semi-annual installments; a duty or tax of one per cent. upon the average amount of their circulating notes outstanding, one-half of one per cent. upon the average amount of their deposits, and a like rate upon the average amount of their capital stock not invested in United States bonds. The following table exhibits the amount of such duties paid by the national banks yearly, from the commencement of the system to July 1 of the present year:

Years.	On circulation.	On deposits.	On capital.	Totals.

It will be seen by the above tables that, since 1864, the total taxes collected by the government from the banks and bankers of the country amount to \$137,261,949.09, of which the national banks have paid nearly two-thirds. One object in imposing these taxes upon the national banks was to make the system self-sustaining, so far as cost to the government is concerned; but while the whole expenses of this Office, from its establishment to July 1 of this year, have been but \$4,525,022.66, the first of the foregoing tables shows that the national banks have returned to the government in taxes during this period the large sum of \$86,033,554, of which \$39,775,817 was paid on circulation alone. It is to be further observed that the whole of this amount has been collected without any expense to the government.

From returns made to this office by the national banks in several dif-

ferent years, in response to requests therefor by the Comptroller, the amount of State taxes paid by them for the years 1866, 1867, 1869, 1874, 1875, 1876, and 1877 has been definitely ascertained. No returns were obtained for the missing years in this series; but from the data furnished for the known years, estimates have been made in this Office for the intervening ones, and the whole amount of taxes, State and national, paid by the national banks from the year 1866 to the present time is shown, yearly, in the table below:

			Ratio of tax to capital.

The States in which the ratios of taxation to capital were most excessive during the years 1875, 1876 and 1877, are shown in the table below:

States.	l:	1875.			1876.			1877.		
	v. s.	State.	Total.	U.S.	State.	Total.	. U.S.	State.	Total.	
New York New Jersey Ohio Indiana Illinois Wisconsin Kansas Nebraska South Carolina Tennessee	1.8 1.4 1.2 1.8 1.7 1.4 2.2	Per cent 2. 9 2. 1 2. 4 2. 6 2. 4 2. 1 3. 2 2. 3 3. 4 2. 3	Per cent 4.7 3.6 3.8 4.2 3.8 4.6 4.5 4.5 3.7	Per cent 1.8 1.4 1.3 1.2 1.8 1.7 1.5 2.2 1.0 1.4	Per cent 3. 1 2. 1 2. 7 2. 5 2. 4 2. 1 3. 0 2. 5 2. 7 2. 1	Per cent 4.9 3.5 4.0 3.7 4.2 3.8 4.5 4.7 3.7	Per cent 1. 9 1. 4 1. 0 1. 2 1. 6 1. 7 1. 7 2. 3 1. 0 1. 6	Per cent 2. 7 1. 9 2. 4 2. 3 2. 2 2. 1 2. 6 2. 3 2. 6 2. 2	Per cent 4.6 3.3 4.3 5.5 3.8 4.3 4.3 6.6 3.8	

The evil effect of these high rates of taxation may be seen in the reduction of capital and surplus by the banks in the city of New York alone, during the last five years, which has been upon capital \$16,435,000, and upon surplus \$6,002,981; making a total of \$22,437,981. The State banks of the same city are reported to have also reduced their capital \$4,794,000, and surplus \$1,340,300; making a total reduction for all of the New York city banks, during that period, of \$28,572,281.

The inequality in the rate of taxation imposed by State authority upon banking capital in different localities is well illustrated by the following table, which gives the rate of such taxation in the principal cities of the country for the years 1875, 1876, and 1877, the ratio of United States taxation upon deposits, capital, and circulation combined, being also given for purposes of comparison:

^{*}The capital of the banks that paid State, county, and municipal taxes on stock and real estate is \$474.667,771.
†California banks pay no State taxes on capital, except such as is invested in real estate.

Tables similar to the foregoing, for the years 1867 and 1869, and from

1874 to 1876 inclusive, appear in the appendix.

The amount of losses charged off by the banks during the last three years have been tabulated from the semi-annual reports of dividends and earnings made by the banks, and the results appear in the table below, which shows the number of banks which have suffered losses, and the amounts charged off by them, during each of the semi-annual periods ending on March 1 and September 1 of the years named:

Geographical divisions.		ch 1, 1878.	Septer	nber 1, 1878.	Aggregate losses.
	No. of banks.	Losses.	No. of banks.	Losses.

In his last two reports, the Comptroller gave tables showing the amount of losses thus charged off by the banks in each State and principal city in the Union during the years 1876 and 1877. A similar table is here presented for the present year, which gives the number of banks and amount of losses for each dividend period, to which are added the losses of the years 1876 and 1877:

	Mar	ch 1, 1878.	Septer	mber 1, 1878.

Totals for 1878	1, 304 980 806	10, 903, 145 04 8, 175, 960 56 6, 501, 169 82 25, 580, 275 42	1, 108 1, 034	13, 563, 654, 85 11, 757, 627, 43 13, 217, 856, 60 38, 539, 138, 88	24, 466, 799 89 19, 933, 587 99 19, 719, 026 42 64, 119, 414 30	

It will be seen from the foregoing tables that the total losses charged off by the banks during the current year were \$24,466,799.89; that in 1877 they amounted to \$19,933,587.99, and in 1876 to \$19,719,026.42; making a grand aggregate of \$64,119,414.30 of losses which the banks have sustained during the three years named, and have wiped off from their books by charging them largely to their previously accumulated undivided profit and surplus accounts.

The amount of losses sustained by the banks in the more important cities during the same period is shown in the following table:

Cities.	1876.	1877.	1878.
New York Boston Philadelphia Pittsburgh Baltimore New Orleans	1, 598, 722 68 152, 976 14 333, 851 56 876, 207 32	\$4, 247, 941 66 2, 192, 053 81 393, 248 47 289, 466 59 200, 597 74 286, 259 47	\$5, 147, 319 98 2, 490, 197 46 561, 676 30 419, 036 51 368, 915 99 338, 496 90

In consequence of the losses above shown, many of the banks have been compelled to entirely forego dividends for a longer or shorter period. A tabular statement is given below, showing by geographical divisions the number of banks, with their capital, which passed dividends during each of the semi-annual dividend periods of 1877 and 1878:

	Six months ending—								
Geographical divisions.	March 1, 1877.		September 1, 1877.		March 1, 1878.		September 1, 1878.		
	No.	Capital.	No.	Capital.	No.	Capital.	No.	Capital.

Totals	245	40, 452, 000	288	41, 166, 200	328	48, 797, 900	357	58, 736, 950	

The number of banks passing dividends in the first dividend period of 1876 was 235, with a capital of \$34,290,320; and in the second period the number was 273, and the capital represented was \$44,057,725. It will be seen that during the last three years, an average amount of \$44,583,516 of capital of the national banks has paid no dividends whatever to its owners.

But the foregoing table of the number of banks which have passed dividends during the last three years does not fully represent the effect of the great losses suffered by them, nor the diminution of their profits in later years. For, in addition to what is here shown, very many of the banks which have declared dividends have been compelled to reduce them to rates which cannot be considered a fair compensation for the use of the capital employed. This additional effect is shown in the following table, which exhibits the amount of capital, surplus, dividends, and total earnings of all the national banks, for each half year, from March 1, 1869, to September 1, 1878, together with the ratios of such dividends and earnings to capital and surplus:

							RATIOS.	
	No. of banks.	Capital.	Surplus.	Total divi- dends.	Total net earnings.	Dividends to capital.	Dividends to capital and sur- plus.	to capital

This table shows a gradual and steady decline in the ratio, not only of dividends but of earnings, from 1870 to the present time. The ratio of dividends to capital has declined from 10.12 per cent. in 1870 to 7.80 per cent. in the present year; the ratio of dividends to capital and surplus, which in 1870 was 8.35, is this year but 6.21; while the ratio of total net earnings to capital and surplus has receded during the same period from 10.96 to 5.14. The latter fact shows how largely the dividends of late years have been drawn from the accumulated earnings of former periods, and that even the diminished dividends of to day much exceed the actual current earnings of the banks.

A table is given in the appendix which shows concisely the ratio of dividends to capital, and to capital and surplus, and of total net earnings to capital and surplus, of each State and principal city in the Union, for each balf room form March 1, 1874 to Startendard 1, 1879

for each half year from March 1, 1874, to September 1, 1878.

The following table exhibits by geographical divisions ratios similar to those on the foregoing page, for the years 1876 1877, and 1878:

	1876.				1877.		1878.

During the year ending November 1, 1878, there was received at the redemption-agency of the Treasury \$202,499,740 of national-bank notes, of which amount \$65,847,000, or about 32½ per cent., was received from the banks in New York City, and \$75,396,000, or about 37½ per cent., from Boston. The amount received from Philadelphia was \$10,756,000; from Baltimore, \$1,215,000; Pittsburgh, \$1,026,000; Cincinnati, \$2,223,000; Chicago, \$2,866,000; Saint Louis, \$814,000; Providence, \$4,945,000. The amount of circulating notes, fit for circulation, returned by the agency to the banks during the year was \$151,683,200. The total amount received by the Comptroller for destruction, from the redemption-agency and from the national banks direct, was \$57,061,509. Of this

amount \$5,830,516 were issues of the banks in the city of New York; \$4,447,325 of Boston; \$1,811,160 of Philadelphia; \$1,107,323 of Baltimore; \$1,087,470 of Pittsburgh; \$435,200 of Cincinnati; \$444,398 of Chicago; \$169,673 of Saint Louis; \$360,281 of New Orleans; \$351,800 of Albany; and \$359,490 of Cleveland.

There were, on November 1, \$282,991,768 of national-bank notes outstanding upon which the charter number had been printed, and

\$36,660,353 not having that imprint.

The following table exhibits the number and amount of national-bank notes of each denomination which have been issued and redeemed since the organization of the system, and the number and amount outstanding on November 1, 1878:

Denominations.		Number.		Amount.

(D. 1.)	

INSOLVENT BANKS.

Since November 1, 1877, receivers have been appointed for banks in operation at that date, as follows:

	Capital.
Third National Bank of Chicago, Ill	\$750,000
Central National Bank of Chicago, Ill	200,000
First National Bank of Kansas City, Mo	500, 000
Commercial National Bank of Kansas City, Mo	100, 000
First National Bank of Tarrytown, N. Y	100, 000
Washington County National Bank of Greenwich, N. Y	

^{*} Subtract or add for portions of notes lost or destroyed.

	Capital.
First National Bank of Dallas, Tex	\$50,000
People's National Bank of Helena, Mont	100, 000
First National Bank of Bozeman, Mont	. 50, 000
Farmers' National Bank of Platte City, Mo	

2,100,000

Receivers have also been appointed, since the date named, for the following banks which had previously gone into voluntary liquidation: First National Bank of Ashland, Pa.; First National Bank of Allentown, Pa.; First National Bank of Waynesburg, Pa.; Citizens' National Bank of Charlottesville, Va.; and Merchants' National Bank of Fort Scott, Kans. The receivers for the five last-mentioned banks were appointed under authority of an act "authorizing the appointment of receivers of national banks, and for other purposes," approved June 30, This action was rendered necessary by the complaints of creditors that the affairs of the several banks were not being properly or efficiently settled by the officers or agents having them in charge.

Dividends have been paid to the creditors of six of the banks that

have failed during the year, as follows:

Third National Bank of Chicago, Ill	70 per cent.
Central National Bank of Chicago, Ill	40 per cent.
First National Bank of Kansas City, Mo	30 per cent.
Commercial National Bank of Kansas City, Mo	100 per cent.
First National Bank of Tarrytown, N. Y	70 per cent.
Washington County National Bank of Greenwich, N. Y	
	-

The aggregate amount of these dividends is \$1,309,167; the average rate being 53.8 per cent.

Dividends have also been paid during the year to creditors of banks which failed previous to November 1, 1877, as follows:

```
Merchants' National Bank of Washington, D. C. 1470 per cent.; total,
                                                                                                                                                                                                             24_{10}^{7} per cent.
 per cent.; total,
                                                                                                                                                                                                              42
                                                                                                                                                                                                                           per cent.
                                                                                                                                                           per cent.; total,

```

The total amount of dividends disbursed by the Comptroller to creditors of insolvent banks during the year ending November 1, 1878, was \$2,856,851. The total dividends paid since the organization of the system is \$14,010,313, upon proved claims amounting to \$23,147,393, or 60.53 sper cent. of the amount of the claims.

Assessments amounting to \$5,703,500 have been made upon the share-

holders of thirty-four insolvent banks for the purpose of enforcing their

individual liability, of which \$1,458,834 has been collected.

A table showing the national banks which have been placed in the hands of receivers, the date of appointment of receivers, the amount of capital and of claims proved, and the rates of dividends paid; and also one showing the amount of circulation of such banks, issued, redeemed, and outstanding, on November 1, 1878, will be found in the appendix.

STATE BANKS AND SAVINGS BANKS.

The laws of the United States require returns of capital and deposits to be made to the Commissioner of Internal Revenue, for purposes of taxation, by all State banks, savings-banks, and private bankers. The data for the following table were obtained from the Commissioner and compiled in this Office. This table exhibits, by geographical divisions, the number of State banks and trust companies, private bankers, and savings-banks, and their average capital and deposits for the six months ending May 31, 1878:

- 4. They are required to have a paid-up capital of not less than \$100,000 each, and in cities of 50,000 inhabitants their capital must be not less than \$200,000 each. In the discretion of the Secretary of the Treasury, however, banks with not less than \$50,000 capital may be organized in places having less than 6,000 inhabitants. The design and effect of these provisions is to prevent, as far as possible, the establishment of feeble organizations, unequal to the wants of the communities in which they are located.
- 5. At least one-half of the authorized capital must be paid in before commencing business, and the remaining portion must be paid in at the rate of not less than one-fifth monthly from the time the association is authorized to commence business. Proper provision is made for enforcing payment of installments of capital stock subscribed, or for making good any impairment of capital which may occur in the course of business.
- ô. The Comptroller is also authorized and required, before issuing his certificate of authority to any association to commence business, to ascertain if such association has in good faith complied with all the requirements of law preliminary to its organization, and he may appoint a special commission for this purpose if thought necessary. He must also obtain a sworn statement of the president and cashier and of a majority of the directors of the proposed association, setting forth all the facts properly bearing on this inquiry.

7. No increase or reduction of the authorized capital of an association can be made without the approval of the Comptroller being first obtained, and no increase is valid until the whole amount is actually paid in and contilled to under ooth

certified to under oath.

8. Every director must be a citizen of the United States, and three-fourths of the directors of any association must be residents of the State, Territory, or District in which it is located. Each director must also, during his whole continuance in office, be the bona-fide owner of not less than ten shares of the capital stock of the association of which he is a director, which shares must not be hypothecated or in any way pledged as security for any loan or debt. To all of which he must make oath.

9. Every director must also, immediately upon his election or appointment, make and transmit to the Comptroller an oath that he will faithfully administer the affairs of his association, and will not knowingly violate, or permit to be violated, any of the provisions of the national-

bank act.

10. The shareholders of every national bank are each made individually responsible, equally and ratably, and not one for another, for all contracts, debts, and engagements of such association, to the extent of their stock therein, at its par value, in addition to the amount invested in such shares; thus giving a double security to the general creditors of these associations.

11. Each national bank, before it is authorized to commence business, must have first deposited with the Treasurer of the United States an amount of interest-bearing, registered United States bonds, not less in any case than \$30.000, nor less than one-third of the paid-in capital of the bank, except that, by a late act, the maximum deposit of bonds required for any bank is \$50,000. These bonds are primarily held as security for the redemption of the circulating notes of the bank; but as the amount of circulation issued equals ninety per cent, only of the par value of the bonds deposited, any excess in the value of the bonds above the amount of circulation to be redeemed becomes an added security, in the possession of the government, applicable to the payment

of claims of the general creditors of the association depositing them, should it become insolvent.

12. National banks are forbidden to make transfers or assignments of any of their assets or credits after an act of insolvency, or in contemplation thereof, with a view to the preference of one creditor to another;

and any transfer or assignment so made is null and void.

13. Every association in the national system is required to receive at par, for any debt or liability to it, the circulating notes of any and all other banks in the system, and these notes are also receivable by the government for all taxes or other dues, except duties on imports, and are payable for all debts or demands owing by the government, except interest on the public debt. These features give to the notes an additional value beyond that which they possess through a deposit of United States bonds.

14. One of the most invaluable features of the national banking system is that requiring each association to have at all times on hand an available cash reserve of specified proportions as compared with its deposits and circulation. The proportion required for banks located in the financial centers of the country is 25 per cent. of their deposits. For all other banks the required proportion is 15 per cent. of their deposits. The proportion of reserve to circulation is the same for all banks, namely, five per cent., which amount is to be at all times on deposit with the Treasurer of the United States, to be held and used by him in the redemption of their notes. This sum is also permitted to be counted as part of the required reserve on deposits. Most stringent means are placed at the disposal of the Comptroller for enforcing compliance by the banks with the requirements of the law relating to the maintenance of a cash reserve.

15. Equal in importance with the requirements as to a cash reserve are the provisions which compel the accumulation by each national bank of a surplus fund, to be set apart by it from time to time out of the profits of its business, and which fund may not be used by the bank for any purpose other than to meet and charge off losses in excess of its current earnings. These provisions require that each association shall, before making any dividend, carry to its surplus fund one-tenth part of its net profits since its last preceding dividend, until the same shall amount to 20 per cent. of its capital stock. It is further provided that no dividend shall ever be declared by any association to an amount greater than its undivided profits (not surplus) then on hand, deducting therefrom its losses and bad debts, and that if such losses shall equal or exceed its profits on hand other than surplus, no dividend shall be made. Careful provision is thus made for the steady growth of the surplus fund of each national bank, until its sum shall equal one-fifth of the capital of the association, thereby establishing a reserve fund against which it may charge any excess of losses over and above its other profits on hand, and thus preserve its capital stock unimpaired. Under these provisions the amount of surplus accumulated by all the banks now in operation is \$116,897,800, against an aggregate capital of \$466,147,436.

16. Another very important feature of the law is the requirement that detailed statements of the condition of each national bank, verified by the oath of its president or cashier, and attested by not less than three of its directors, shall, not less than five times in each year, be made to the Comptroller, and also be published in the city or town where the bank is established; and to guard against the possibility of any bank fortifying itself, in advance of a known day for making a report, so as to make a good showing on that particular day, it is further provided that each report shall be for some past day, to be specified by the Comptroller.

This Office, also, under the law, makes annually a report to Congress, containing a great number and variety of statistical tables compiled from the various reports of the banks, through the wide distribution of which full information concerning the banks and the working of the system

is annually placed before the public.

17. The national banks are also required to make semi-annual reports to the Comptroller of their dividends declared, and the amount of their profits in excess of such dividends, which returns are also tabulated by him and the results presented to Congress and the country in his annual reports. Full means are provided for enforcing compliance by the banks with the provisions of law concerning both classes of reports here named, by authorizing a severe penalty for any failure or neglect to make and transmit the same.

18. In addition to the means for acquiring a knowledge of the condition of the banks furnished by the reports already mentioned, the law provides for their examination periodically by disinterested persons to be appointed by the Comptroller. These persons visit the banks, inspect their books of account, securities, and assets and liabilities generally, have power to examine their officers and directors under oath and inquire into all matters necessary to a full understanding of their actual, existing condition, and then make immediate and full report in writing of the results of such examination. This feature of the law is an invaluable one, operating not only as a restraint against irregular practices by any banks so disposed, but as a means of detecting them and preventing their recurrence. These examinations may be as frequent as is thought necessary, and their expense is borne by the banks themselves.

19. All necessary publicity as to the ownership of shares in any national banking association is secured by a provision requiring that a list of the names and residences of all its shareholders, and the number of shares held by each, shall be kept in the office where its business is transacted, and shall, during business hours, be subject to the inspection of any shareholder or creditor of the association, and of the officers authorized to assess taxes under State authority. A copy of such list, verified by oath, must also be transmitted to the Comptroller annually.

20. The national banks serve a very useful purpose, both to the government and the public, more especially in localities where there is not a subtreasury, by acting, when so authorized by the Secretary of the Treasury, as depositories of public moneys and financial agents of the United States. For their services in this regard they receive no direct compensation, and are, moreover, required to give satisfactory security for the faithful performance of their duties and the safe custody and prompt payment of all public moneys intrusted to them, by a deposit with the Treasurer of a sufficient amount of United States bonds.

21. The national banks are prohibited from loaning to any person, company, corporation or firm, an amount exceeding one-tenth part of their capital; and in estimating the liabilities of a company or firm the liabilities of its several members are to be included. They are thus, by law, made conservative in their management, and restrained from granting excessive loans, which would at least lessen their general usefulness to the communities in which they are situated and perhaps impair their safety.

22. They are further prohibited from making any loan or discount whatever on the security of the shares of their own capital stock, or from purchasing or holding the same unless to prevent loss upon a debt previously contracted in good faith. And, even in the latter case, they are not permitted permanently to hold or to cancel shares so obtained, but

must, within six months from the date of their acquirement, sell or dis-

pose of them at public or private sale.

23. They are also prohibited from becoming indebted or in any way liable to an amount exceeding that of their capital stock actually paid in, except on account (1) of their circulating notes; (2) their deposits or collections; (3) bills of exchange or drafts drawn against money actually on deposit to their credit or due to them; and (4) liabilities to their own stockholders for reserved profits. The purpose and effect of these provisions are to make the national banks lenders and not borrowers of

24. They are further forbidden, either directly or indirectly to pledge or hypothecate any of their circulating notes for the purpose of procuring money with which to pay in or increase their capital stock, or for use in their banking operations, or otherwise. This restriction effectually precludes the practice, which was common in some former State systems, of employing the circulating notes of an association in the increase of its own capital, or in furnishing capital for a new association. which practice has at times been carried to an extreme limit.

25. The national banks are restricted in the rate of interest which they may take, receive, or reserve, to the rate allowed by the laws of

the State, Territory, or District in which they are located.

26. A system of redemption of the circulating notes of the national banks is provided, whereby not only may they be readily converted into lawful money, but the mass of the circulation may be kept clean through the retirement of such portion as becomes worn or mutilated and the issue of new notes by the Comptroller, in their stead. demption is accomplished and compelled by requiring, first, that each national bank shall redeem its circulating notes at its own counter, at par, in lawful money on demand; second, that the notes of all closed banks shall be redeemed by the Treasurer; third, that all worn, mutilated, or defaced national-bank notes which are received by any assistant treasurer or designated depository of the United States shall be forwarded to the Treasury for redemption; and, fourth, by providing that when the notes of any associations, assorted or unassorted, are presented in sums of \$1,000, or any multiple thereof, to the Treasurer they shall be redeemed by that officer. The government is indemnified for all redemptions made by it, either by the bonds which it holds, as in the case of insolvent banks, or by a deposit of lawful money which is required to be previously made by all other banks.

27. If a national bank fails to pay its circulating notes, the Comptroller is authorized to sell its bonds and provide for their payment. The government is indemnified against any possible loss from its guaranty of the payment of such circulating notes, by having reserved to it by law a paramount lien upon all the assets of any association which defaults in the redemption of its notes, to make good any deficiency aris-

ing from the sale of its bonds.

28. The destruction of all mutilated notes and of notes of closed banks, redeemed by the Treasurer, is regulated by instructions of the Secretary, given in pursuance of law. All notes destroyed are previously counted by separate agents or representatives of the Secretary, the Treasurer, the Comptroller of the Currency, and the banks which issued the notes; they are effectually mutilated by clipping and punching, to prevent their possible circulation should they by any remote chance pass out of the possession of the Treasury before destruction; they are, in the presence of each of the agents mentioned, placed in a triple-locked macerating machine, where they are immediately ground

into pulp; and their destruction is certified to by all the agents, both upon proper books in the Treasury department and in certificates sent to the banks of issue.

29. The banks are prohibited, under a severe penalty, from certifying any check drawn upon them, unless the person or company drawing the check has at the time on deposit with them an amount of money equal to that specified in the check.

30. They are also prohibited from making any loan on the security of United States or national-bank notes, or from agreeing for a consideration to withhold the same from use, the purpose of the prohibition being to prevent the "locking up" of money by the national-banks, in the

interests of speculators.

31. The officers of national banks are required to make returns under oath to the Treasurer of the United States and to pay to him in semi-annual installments an annual duty of one per cent. upon the average amount of their circulating notes, one half of one per cent. upon the average amount of their deposits, and a like rate upon the average amount of their capital stock beyond the amount invested in United States bonds. This duty is in lieu of all other government taxes.

32. The payment to the United States of the duties named does not, however, relieve the national banks from any liability to taxation by other than government authority, as it is expressly provided that nothing in the act shall prevent the shares of these associations from being taxed by the States as is other similar property, or shall exempt their real property from State, county, or municipal taxation, to the same ex-

tent as other real property.

33. Should the capital stock of any association become impaired in the course of business, by losses or otherwise, it must, within three months after the association shall have received notice from the Comptroller, be made good by assessment upon the shareholders pro rata for the amount of stock held by them; and during such impairment the Treasurer is required, upon notification from the Comptroller, to withhold the interest on all bonds held by him in trust for such association. The authorized capital of the banks is thus by law compelled to be kept always intact, for the protection of their creditors.

34. When a national bank goes into voluntary liquidation, it must, within six months thereafter, deposit in the Treasury au amount of lawful money equal to its entire outstanding circulation, which circulation is thereafter redeemed by the Treasurer. Thus the banks, under existing law, derive no benefit from the accidental loss or destruction of any portion of their notes, such benefit inuring solely to the government.

35. Should any bank become insolvent, the most ample powers are possessed by the Comptroller to take possession of such association, through a receiver to be appointed by him, and to proceed to collect its assets, and pay off, by dividends from time to time, the claims of its creditors. The note holders are in such cases as secure as though the bank had remained solvent, the notes being protected by the bonds held by the government; while the other creditors have as a protection, in addition to the assets of the bank, the individual liability of the shareholders before mentioned, together with the capital paid in, no part of which can be returned to the shareholders until all approved claims against the association shall have been paid.

36. Mention has several times been made herein of the ample means provided in the national bank act for enforcing compliance with its provisions, by the infliction of penalties for their violation or non-observ-

ance. All of these penalties are severe, and many of them summary, the principal ones being here enumerated:

I. For charging or exacting a usurious rate of interest, the whole interest agreed to be paid is forfeited; or, if actually paid, twice its amount

may be recovered back by the person paying the same.

II. For certifying any check, unless the person by whom the check is drawn has on deposit with the association an amount of money equal to that represented by the check, the bank may be immediately closed by

the appointment of a receiver.

III. For every day, after five days, in which a national bank shall fail to make and transmit to the Comptroller any report of its condition called for by him, and for similar delay in transmitting to him the required proof of publication of such report, and also for every day, after ten days, in which a bank shall fail to transmit its semi-annual report of dividends and earnings, a penalty of one hundred dollars is imposed. And if any association fails or refuses to pay the amount of such penalty when assessed and demanded, the Treasurer of the United States is authorized to retain it, upon the order of the Comptroller, out of the interest, as it may become due to the association, upon the bonds deposited to secure its circulation.

IV. For failure of the president or cashier of any association to report to the Treasurer semi annually, for purposes of taxation, the average amount of its notes in circulation, deposits, and capital stock not invested in United States bonds, a penalty of \$200 is imposed, which may be collected as in the preceding paragraph. The Treasurer may also, in such cases, assess the association upon the highest amount of its circulation, deposits, and capital stock, to be ascertained in such manner as

he may deem best.

V. If an association fails to pay the duties assessed upon its circulation, deposits, and capital, such duties also may be reserved by the

Treasurer out of the interest falling due upon its bonds.

VI.) The making of any loan upon the security of United States or national-bank notes, or agreeing for a consideration to withhold the same from use—in other words, the "locking up" of money—is made a misdemeanor, punishable by a fine of \$1,000 and a further sum of one-third of the money so loaned; and the officers making the loan are subject to the further penalty of one-quarter of the money loaned.

VII. Embezzlement of the funds of an association by any of its officers, directors or agents, or any false entry by any of them, in any book, statement or report, with intent to injure or defraud the association or any other company or person, is punishable by imprisonment of not less than

five nor more than ten years.

VIII. If any officer or agent of an association whose charter has expired knowingly reissues or puts into circulation any note, draft, check, or other security of such association, he is punishable by a fine of \$10,000, or by imprisonment of from one to five years, or by both such fine and imprisonment.

IX. If the capital stock of any national bank falls below the minimum amount required by law, through the failure of any shareholder to pay the whole or any part of the amount of his subscription for such stock, and the deficiency in capital shall not be made good within thirty days thereafter, a receiver may be appointed to close up the affairs of the association.

X. Whenever the lawful money reserve of a national bank falls below the limit required by law, and remains below such limit for thirty days after receiving notice from the Comptroller to make its reserve good, a received may be appointed and the bank closed.

receiver may be appointed and the bank closed.

XI. A receiver may also be appointed for any association which fails to redeem its circulating notes at its own counter or at the Treasury, at

par, on demand.

XII. If an association which accepts any shares of its own capital stock in order to prevent a loss upon a debt previously contracted in good faith (which is the only way in which such stock can be legally acquired by it), shall fail to sell such stock, at public or private sale, within six months thereafter, it may be closed by the appointment of a

XIII. Whenever an association fails to pay up its capital stock as required by law, or an impairment of its capital occurs by losses or otherwise, and it shall not, within three months after receiving notice from the Comptroller, make good the deficiency by an assessment upon its shareholders, it may, unless it consents to go into liquidation, be placed in possession of a receiver and its business closed.

37. Finally, if the directors of any national banking association knowingly violate, or knowingly permit any of its officers, agents or servants to violate, any of the provisions of the national-bank act, all the rights, privileges, and franchises of the association become thereby forfeited; in addition to which, every director who participates in or assents to such violation is held personally and individually responsible for all damages sustained by any person in consequence thereof.

SYNOPSIS OF JUDICIAL DECISIONS.

The synopsis of decisions of the Supreme Court of the United States, and other inferior tribunals as heretofore prepared, is reproduced in this report, but it is not deemed expedient at present to extend it. the past year several important cases have been adjudicated in circuit courts which will probably be taken to the Supreme Court and there

affirmed or reversed. It is best to await such final results.

In this connection it is proper, however, to note that the case of Casey, receiver, vs. La Societé de Ĉréđit Mobilier et al., cited in the synopsis from 2 Woods, 77, under the head of "Transfers of Assets," and two other cases in which similar rulings upon similar facts had been pronounced, were reversed by the Supreme Court at its last term; the latter tribunal holding that the attempted pledges on the part of the bank were invalid as against the general creditors. The cases are fully reported in 96th U. S. (6 Otto), pp. 467-496, and are not only important because of the amount involved, but are of interest to bankers and the business public generally, on account of the legal question involved and settled.

ABATEMENT.

I. An action brought by a creditor of a national bank is abated by a decree of a

district or circuit court dissolving the corporation and forfeiting its franchises. (First National Bank of Selma vs. Colby, 21 Wallace, p. 609.)

II. Suit by the receiver of the New Orleans National Banking Association (formerly a State organization called the Bank of New Orleans) against a shareholder to enforce his personal liability. Plea in abatement that "at the date of the appointment of said receiver there was not, nor has there since been, nor is there now, any such corporation as said New Orleans National Association, because said Bank of New Orleans had no power by its charter, nor authority otherwise from the State of Louisiana, to change its organization to that of a national association under the laws of the United States."

On general demurrer this plea was held bad, because no authority from the State was necessary to enable the bank to make such change. The option to do so was given by the forty-fourth section of the banking act of Congress, 13 Statutes, 112. "The power there conferred was ample, and its validity cannot be dealers," (Congress, 13 Statutes, 112. "The power there conferred was ample, and its validity cannot be such as the state of the conferred was appled to the conferred was

n it be doubted." (Casey, receiver, &c., vs. Galli, 4 Otto, p. 673.)

ABATEMENT—Continued.

This plea was also held bad upon the additional ground that "where a shareholder of a corporation is called upon to respond to a liability as such, and where a party has contracted with a corporation, and is sued on his con-

tract, neither is permitted to deny the existence and legal validity of such corporation." (*Ibid.*)
"To hold otherwise," says Mr. Justice Swayne (p. 680), "would be contrary to the plainest principles of reason and good faith, and involve a mockery of justice. Parties must take the consequences of the positions they assume." "They are estopped to deny the reality of the state of things which they have made to appear to exist, and upon which others have been led to rely. ethics require that the apparent, in its effects and consequences, should be as if it were real, and the law properly so regards it."

ACCOMMODATION INDORSEMENTS.

I. Where bills, indorsed by a national bank for accommodation only, had been negotiated by the bank through its usual channels of communication with its correspondents as its own bills, and the proceeds thereof had been placed to the credit of the bank, which thereupon gave the same credit to the parties for whom it had thus indorsed, and received no benefit therefrom—

Held, That although an accommodation indorsement by a national bank, in such cases, was void in the hands of holders against whom notice of the character of the indorsement could be concluded, yet that the bank was liable for the same to holders, for value, without notice. (Blair vs. First National Bank, Mansfield, Ohio. United States circuit court for Ohio, at Cleveland, Novem-

ber term, 1875, Émmons, J.).

Query, whether, under the provisions of section 5202 of the Revised Statutes of the United States, any indorsement by a national bank is not ultra vires.

ACTIONS.

I. A national bank may be sued in proper State court. (Bank of Bethel vs. Pahquioque Bank, 14 Wall., 383, p. 395.)

II. Such banks may sue in Federal courts. The word "by" was omitted in section 57 of act of 1864 by mistake. (Kennedy vs. Gibson, 8 Wall., pp. 506-7.) Receivers may also sue in United States courts. (Ibid., pp. 506-7.)

III. When the full personal liability of shareholders is to be enforced the action must be at law. (Kennedy vs. Gibson, 8 Wall., p. 505; see also Casey, &c., vs. Galli,

supra.)

IV. But if contribution only is sought, the proceedings may be in equity, joining all the shareholders within the jurisdiction of the court. (Ibid., pp. 505-6.) See, also, title "Shareholders, Individual Liabilities of," VI, post. Judge Swayne says "may," and Nelson, J., says that "we may sue at law."

ATTACHMENT OF ASSETS.

I. When a creditor attaches the property of an insolvent national bank, he cannot hold such property against the claim of a receiver appointed after the attachment suit was commenced. Such creditor must share pro rata with all others. (First National Bank of Selma vs. Colby, 21 Wall., p. 609.)
See, also, title "JURISDICTION," II, post.

ATTORNEYS.

I. Section 56 of currency act is directory only, and it cannot be objected by defense that a suit is brought by private attorney instead of the United States district attorney. (Kennedy vs. Gibson, 8 Wall., p. 504.)

BY-LAWS.

I. A national bank cannot by its by-laws create a lien on the shares of a stockholder who is a debtor of the association. (Bullard vs. National Bank, &c., 18 Wall., p. 589.)

See, also, ease of Bank vs. Lanier, 11 Wall., p. 369, cited under "Loans on

SHARES," post.
[Note.—In Young vs. Vaugh, 23 N. J. Equity R., p. 325, it was held that a national bank could by its by-laws prohibit the transfer of shares by a shareholder while indebted to the bank, and that transfers in violation of such by-laws were void. As it is held by the Supreme Court of the United States that such by-laws can create no lien for indebtedness, it would seem that a regulation prohibiting such transfers can be of little practical use, even if the power exists.

CHECKS.

I. The holder of a check on a national bank cannot sue the bank for refusing payment, in the absence of proof that it was accepted by the bank. (National Bank of the Republic vs. Millard, 10 Wall., p. 152.)

II. The relation of banker and customer is that of debtor and creditor. Receiv-

ing deposits is an important part of the business of banking, but the moment they are received they become the moneys of the bank, may be loaned as a part of its general fund, and the check of the depositor gives no lien upon them. (Ibid., per Davis, J., p. 155.)

III. Perhaps, on proof that check had been charged to the drawer, and that the

bank had settled with him on that basis, the holder or payee could recover on a count for "money had and received." (Ibid., pp. 155-6.)

IV. The facts that the bank was a United States depository and the check was drawn by a United States officer to a United States creditor do not vary the

(Ibid., pp. 155-6.)

V. Where a bank pays a check drawn on it, in favor of a party whose indorsement thereon is forged, and the same has passed through several hands, only reasonable diligence is required to be exercised in giving notice to prior holders of the forgery, after its discovery, in order to hold them liable. (Schroeder vs. Harvey, 75 Il., p. 638.)

VI. A clerk of plaintiffs' received from their debtors checks, payable to their (plaintiffs') order, in payment of sums due. The clerk, wrongfully and without authority, indorsed the names of the plaintiffs on these checks and transferred them to other persons, appropriating the proceeds to his own use. Subsequently these checks were deposited with a bank which in good faith collected them and paid over the proceeds to the depositors. In a suit by plaintiffs against the bank, to recover the amounts so collected by it: Held, that the bank was liable. (Johnson vs. First National Bank, 13 N. Y. Sup. Court, p. 121.)

VII. The act of Congress of March 3, 1869, making it unlawful for a national bank to certify checks unless the drawer has at the time funds on deposit to an amount equal to the amount specified in the check, does not invalidate a conditional acceptance of a check by such bank, having no funds of the drawer in its hands at the time, but engaging to pay the same when a draft left with it for collection by the drawer shall have been paid. (National Bank vs. Na-

tional Bank, West Va. St., p. 544.)

CITIZENSHIP.

I. National banks are citizens of the State in which they are organized and located, and when sued by national banks of other States have a right to demand a removal of the suit from a State to the proper Federal court. (Chatham National Bank vs. Merchants' National Bank, 4 Thomp. & C. (Thompson & Cook) N. Y. Sup. C., p. 196, and 1 Hunter N. Y., p. 702.)

Collections.

I. A collection agent who receives from his principal a bill of lading of merchandise, deliverable to order, and attached to it a time draft, may, in the absence of special instructions, deliver the bill of lading to the drawee of the draft, upon the latter's acceptance of the draft. It is not the duty of the agent to hold the bill after such acceptance. (National Bank of Commerce vs. Merchants'

National Bank, 1 Otto, p. 92.)

II. Woolen & Co., bankers at Indianapolis, sent to defendant, a bank at Buffalo, a draft on one Bugbee; also bills of lading for sundry car-loads of lumber. The remittance was by letter, which merely stated that the draft and bills were sent to defendant for collection and remittance of proceeds to plaintiffs, Woolen & Co. The draft was drawn by, and to the order of, Coder & Co., indorsed by them, by Mayhew, and the plaintiffs. By the terms of draft the drawer, indorsers, and acceptor waived presentment for payment and notice of protest and non-payment. It was payable fifteen days after its date, and it was admitted that by ordinary course of transit the lumber would reach its destination eight days prior to the maturity of the draft. There had been no business transactions between plaintiffs and defendants, save one collection similar to this. Defendants presented the draft to Bugbee for acceptance, and, upon such acceptance, delivered to him the bills of lading. Bugbee failed before the draft matured, and plaintiffs sued defendants for delivering the bills of lading to Bugbee before payment of the draft. It was conceded that the draft was drawn for the price or value of the lumber: Held, per Wallace, J., that, the draft being on time, it must be presumed that it was the intent of parties that Bugbee should realize from sale of the lumber the funds to meet the draft at maturity. Therefore, upon his acceptance of

Collections—Continued.

the draft, he was entitled to the bills of lading, and defendants were not liable for thus delivering them, but if the draft had not been upon time, a different rule might have prevailed. (Woolen & Webb vs. N. Y. and Erie Bank, 12

Blatchf., p. 359.)
III. The Corn Exchange National Bank of Chicago sent defendant, the Dawson Bank at Wilmington, N. C., a draft drawn upon one Wiswall, living at Washington, N. C., for collection. Defendant by letter acknowledged the receipt of the draft, stating that it had been credited to the Corn Exchange Bank, and entered for collection. Thereupon defendant sent draft to Burbank & Gallagher, bankers at Washington, N. C., for collection. The latter house collected to the draft but failed and proceed into bankruntary before remitting lagher, bankers at Washington, N. C., for collection. The latter house collected the draft, but failed and passed into bankruptcy before remitting. In a suit brought by the assignee of the Corn Exchange National Bank against the Dawson Bank to recover the proceeds of the draft: Held, per Wallace, J., that the latter bank was liable for the amount. (Kent, Assignee, &c., vs. The Dawson Bank, 13 Blatchf., p. 237.)

[NOTE.—The court concedes that the authorities are conflicting upon the point involved in this case. In New York, Ohio, and in England, the decisions sustain the conclusion of Judge Wallace, while in Connecticut, Massa-busetts. Hibmis and Pennsulvania, precisely the contrary rule prevails. The

chusetts, Illinois, and Pennsylvania. precisely the contrary rule prevails. The point was made in this case that the law of Illinois should control the rights

of parties, but it was held otherwise.]

IV. In an action by G against a bank it appeared that a note was made to G's order, indorsed by him and sent through the house of B, a banker, for collection, and by B indorsed to the defendant bank, "for collection and credit": Held, that B, by the indorsement of the bank, "for collection and credit": Held, that B, by the indorsement, did not become the owner of the note, and had no right to pledge it, or direct its proceeds to be credited to him in payment of his indebtedness to the defendant bank. (First National Bank vs. Gregg, 79 Pa. St., p. 384.)
V. In such case if the defendant bank had made advances, or given new credit to

B on the faith of the note, it would have been entitled to retain the amount

out of the proceeds. (Ihid.)

VI. A bank holding a customer's demand-note has a lieu upon the proceeds of drafts delivered to it for collection, after the giving of the note, though collected after the filing of a petition in bankruptcy, and can apply such proceeds upon the notes. (Re Farnsworth, 5 Biss., p. 223.)

I. In adjusting and compromising contested claims against it, growing out of a legitimate banking transaction, a national bank may pay a larger sum than would have been exacted in satisfaction of them, so as to thereby obtain a transfer of stocks of railroad and other corporations, in the honest belief that by turning them into money under more favorable circumstances than then existed, a loss, which it would otherwise suffer from the transaction, might be averted or diminished. (First National Bank vs. National Exchange Bank, 2 Otto, p. 122.)

II. So, also, it may accept stocks in satisfaction of a doubtful debt, with a view to their subsequent conversion into money, in order to make good or reduce an

anticipated loss. (1bid.) See, also, ESTATE, REAL, I, post.

COMPTROLLER.

I. The Comptroller appoints the receiver, and can therefore remove him. (Kennedy

vs. Gibson, 8 Wall., p. 498.)

II. The Comptroller's certificate, reciting the existence of the facts of which he is required to be satisfied, to justify the appointment of a receiver, under section 50 of the national-bank act, is sufficient evidence of the validity of such appointment, in an action brought by such receiver. (Platt vs. Bebee, 57 N. Y., p. 339.)

III. The Comptroller must authorize any increase of the capital stock of a national

bank; and such increase must be certified by him as prescribed by sec. 13 of the act of Congress providing for the organization of national banks. (R. S., sec. 5142. Charleston vs. People's National Bank, 5 S. C., p. 103.)

IV. The Comptroller cannot subject the United States Government to the jurisdic-

tion of a court, though he appears and answers to the suit. (Case vs. Terrill, 11 Wall., p. 199.)

CURRENCY ACT.

I. The purpose of the currency act was, in part, to provide a currency for the whole country, and, in part, to create a market for the government loans. (Per Strong, J., in Tiffany vs. Missouri, 18 Wall., p. 413.)

CURRENCY ACT-Continued.

II. National banks organized under the act of Congress of June 3, 1864, are the instruments designed to be used to aid the government in the administration of an important branch of the public service; and Congress, which is the sole judge of the necessity for their creation, having brought them into existence, the States can exercise no control over them, nor in any wise affect their ope-

ration, except so far as Congress may see proper to permit. (Per Swayne, J., in Farmers and Mechanics' National Bank vs. Dearing, 1st Otto, p. 29.)

III. The constitutionality of the act of June 3, 1864, is unquestioned. It rests on the same principle as the act creating the second Bank of the United States. The reasoning of Secretary Hamilton, and of this court in McCulloch vs. Maryland, 4 Wheat., p. 316, and in Osborne vs. Bank U. S., 7 Wheat., p. 708, therefore

applies.

IV. The power to create carries with it the power to preserve. The latter is a corollary of the former. (Ibid., per Swayne, J., pp. 33-34.)

DEBTORS OF NATIONAL BANKS.

I. Debtors of an insolvent national bank, when sued by the receiver, cannot object that pleadings do not show a compliance with all the steps prescribed by statutes as preliminary to the appointment of such receiver. (Cadle, Receiver, &c., vs. Baker & Co., 20 Wall., p. 650.)

II. Such ordinary debtors may be sued by receiver without previous order of the Comptroller. (Bank vs. Kennedy, 17 Wall., p. 19.)

DEPOSITS, GENERAL.

I. The relation between a bank and its depositors is that of debtor and creditor only, and is not fiduciary. Thus, a note deposited for collection, if passed to the credit of the depositor in his general account, then overdrawn, becomes the property of the bank, which becomes indebted to him for the proceeds. Upon the bankruptcy of the bank, the proceeds are assets available to the general creditors. And the fact that the account was made good by other

(In re Bank of

deposits, before collection of the note, makes no difference.

Madison, 5 Bissell, p. 515.)

II. A deposit is general, unless the depositor makes it special, or deposits it expressly in some particular capacity. And in case of a general deposit of money with a banker, a previous demand by the depositor, or some other person by his order, is indispensable to the maintenance of an action for the deposit, unless circumstances are shown which amount to a legal excuse. (Brahm vs. Adkins, 77 Ill., p. 263.)

DEPOSITS, CERTIFICATES OF.

I. A certificate of deposit was issued by a bank for a certain sum, subject to the order of the depositor at a certain date, payable on the return of the certifi-

Held, in an action on said certificate against the bank, brought by an assignee, that there could be no recovery without proof of an actual demand and re-

fusal of payment. (Brown vs. McElroy, 52 Ind., p. 404.)

II. In a suit against the bank, upon a stolen certificate of deposit given by the defendant to the plaintiff, reciting that he had deposited in the bank a certain number of dollars, payable to his order in current funds, on the return of the

certificate properly indorsed:

Held, first, that the instrument should be regarded as the promissory note of the bank, assignable under the statute (of Indiana), but that it was not negotiable as an inland bill of exchange, being made payable, not in money, but "in current funds"; second, that the payee could recover on said stolen certificate without giving a bond against a subsequent claim thereunder by another person. (National State Bank vs. Ringel, 51 Ind., p 393.)

III. Where a bank issues a certificate of deposit, payable on its return properly indorsed, it is liable thereon to a bond-fide holder, to whom it was transferred

seven years after it was issued, notwithstanding the payment thereof to the original holder. Such certificate is not dishonored until presented. (National (National Bank Fort Edward vs. Washington Co. National Bank, 5 Hun., N. Y. Sup. Court,

p. 605.

Deposits, special.

I. The taking of special deposits to keep, merely for the accommodation of the depositor, is not within the authorized business of national banks; and the cashiers of such banks have no power to bind them on any express contract accompanying, or any implied contract arising out of, such taking. (Wiley vs. First National Bank, 47 Vt., p. 546.)

DEPOSITS, SPECIAL—Continued,

II. If a banking association, under the national-currency act, has power to assume the duties and obligations of a naked bailee of property, either gratuitously or for hire (as to which point the court does not decide, though apparently inclined to deny such power), it is clearly outside its ordinary business; and it is not within the scope of the general powers or general authority of its executive or ministerial offices to bind such corporation by a contract for such bail-Therefore, in the absence of proof of special authority for that purpose, delegated by the board of directors, or evidence that such powers have been exercised by their knowledge and sanction, or that such has been the habit and custom of the bank, it is not responsible for property thus received by its cashier. (First National Bank Lyons vs. Ocean National Bank, 60 N. Y.,

III. A circular issued by such corporation, inviting the correspondence of other banks, and offering to buy and sell securities for them, is no evidence of a consent, on its part, to become a general bailee and depository of such securities

for its correspondents. (Ibid.)

IV. The corporations formed under the national-currency act are banks of deposit, They are authorized to issue their own notes, and as well as circulation. receive from others their money and circulate it. Money so received is termed a deposit, although it has none of the qualifications of a bailment, thus named. There is no trust or promise to redeliver the same money. By the deposit the money becomes the property of the bank, and only the relation of debtor and

creditor is created. (Ibid., per Allen, J., p. 288.)
[Note.—In the last cited case the cashier of the Ocean National Bank bad, at sundry times, received United States bonds belonging to the Lyons bank. Some of these bonds had been purchased by said cashier and the assistant cashier for the Lyons bank. Two or three times, by the order of the latter bank, the coupons of these bonds had been cut off by said eashier and proceeds credited to the Lyons bank. But there was no proof that these transactions were done, or that said bonds were kept in the vault of said Ocean Bank, with the knowledge of the directors. While said bonds were thus kept, burglars broke in and stole them. The court held, and the opinion was unanimous, that there was no difference under the currency act between such a deposit of United States bonds and a deposit of other valuable property, such as plate, diamonds, or jewelry, for safe-keeping, gratuitously. It was a naked bailment of deposit, without reward, and such an act of the cashier as did not bind the bank.

For definition of the bailment called "deposit," and the liabilities of such a bailee, see Story on Bailments, section 4, and sections 61 to 135.

As to special deposits of money with a bank, see Story on Bailments, section 88; also Smith vs. First National Bank, 99 Mass., p. 605. In this last case there had been a special deposit of gold coin, to be returned when called for. The cashier embezzled the funds: *Held*, that the bank was not liable, as there was no gross negligence on the part of the corporation.

DIRECTORS OF NATIONAL BANKS.

I. Directors of a national bank may remove the president, both under the law of Congress and the articles of association, where the latter so provide. The power exists if the bank has adopted no by-laws. (Taylor vs. Hutton, 43 Barb., N. Y. Sup. Court, p. 195; S. C., 18 Abb. Pr. R., p. 16.)

ESTATE, REAL.

I. The want of power of a bank, or of its trustee (receiver) in insolvency, to purchase and hold real estate, does not render void an arrangement whereby land subject to a lien in favor of the bank, and to other liens, is discharged of those other liens by funds from the assets of the bank, the land being then sold, and the entire proceeds of such sale realized to the bank assets, provided the title does not pass through the bank or its trustee. (Zantzingers vs. Gunton, 19 Wall., p. 32.)

INTEREST.

I. Under section 30, act of 1864, a national bank in any State may take as high rate of interest as by the laws of such State a natural person may stipulate for, although State banks of issue are restricted to a less rate. (Tiffany vs. National Bank of Missouri, 18 Wall., p. 409.)

[Note.—In Missouri, natural persons may take ten per cent., but State banks are restricted to eight per cent. In this case the national bank had taken

nine per cent. : Held, legal.]

Interest—Continued.

H. Held, also, that as the action was virtually brought tor ecover the penalty for usury, the statute (section 30) must receive a strict construction.

See also Title "USURY," post.

INTEREST ON CLAIMS OF CREDITORS.

I. Where a national bank is put in charge of a receiver, under section 50 of the original currency act (R. S., sec. 5234), and a sufficient sum is realized from its assets to pay all claims against it and leave a surplus, the Comptroller ought to allow interest on the claims during the period of administration, before appropriating the surplus to the stockholders of the bank. An action of assumpsit by the holder of such a claim will not lie against the Comptroller, nor against the receiver, but will lie against the bank. (Chemical National Bank vs. Bailey, 12 Blatchf., p. 480.)

II. In such action interest is recoverable on all demands originating in contract conditioned for the payment of interest, and on all demands for money due and unpaid, by way of damages for non-payment after such demands became due. And interest is recoverable on a balance due a depositor in such bank, although he has made no formal demand of payment. (Îbid.) But, as to this

last point, see the ruling of the Supreme Court.

III. In the case of National Bank of the Commonwealth vs. Mechanics' National Bank, 4 Otto, p. 437, the Supreme Court United States, at its last term, decided that a depositor in a national bank, when it suspends payment and a receiver is appointed, is entitled from the date of his demand to interest upon the deposit; that the claims of depositors in such bank at date of suspension for the amount of their deposits are, when proved to the satisfaction of the Comptroller of the Currency, placed upon the same footing as if reduced to judgments; that is to say, they draw interest from the time of such proof and allowance.

It was also decided that, such interest being a liquidated sum at the time of the payment of the deposit, an action lies to recover it, and interest thereon.

JUDGMENTS.

I. A judgment against a national bank in the hands of a receiver, upon a claim, only establishes the validity of such claim; the plaintiff can have no execution on such judgment, but must await pro rata distribution. (Bank of Bethel vs. Pahquioque Bank, 14 Wall., p. 383. Clifford, J., p. 402.)

JURISDICTION.

I. A United States district court has jurisdiction to authorize a receiver of an insolvent national bank to compromise a debt. (Matter of Platt, 1 Ben., p. 534.)

II. A resident (citizen) of Kentucky was a creditor of a national bank located in

Alabama, and commenced a suit on his claim against said bank in the supreme court of the State of New York, at the same time attaching certain moneys belonging to said bank, in the hands of the National Park Bank, in New York. Subsequently the receiver of the Alabama bank (which had failed) was, on his own motion, made party defendant to the action pending in the New York supreme court, and pleaded "want of jurisdiction," and other The supreme court overruled his plea to the jurisdiction, rendered judgment against the receiver on the morits, and ordered satisfaction to be made from the moneys attached. Thereupon the receiver filed his bill in chancery in the *United States circuit court* for the proper circuit, praying an injunction to restrain the collection of the judgment rendered by said supreme court, and that the moneys attached be paid to him as receiver.

Held, that, by the provisions of the currency act, the State court was deprived of jurisdiction of the attachment proceedings; that the receiver was not estopped by the proceedings in said State court from asserting his rights in said circuit court, and that he was entitled to the relief prayed for in his bill.

(Cadle, receiver, &c., vs. Tracy, 11 Blatchf., p. 101.) (Vide Title "RECEIVERS, VII," post.)

LOANS ON SHARES.

I. National banks are governed by the act of 1864, which repealed the act of 1863, and cannot, therefore, make loans on the security of their own shares, unless to secure a pre-existing debt, contracted in good faith. (Bank, gc., vs. Lanier, 11 Wall., p. 369.)

II. The placing of funds by one bank on permanent deposit with another bank is a loan within the spirit of section 35 of act of 1864. (Ibid., p. 369.)

III. Loans by such banks to their shareholders do not create a lien on the shares of such borrowers. (*Ibid.*, p. 369. See also *Bullard* vs. *Bank*, 18 *Wall.*, p. 580; and "BY-LAWS," supra.)

Digitized for FRASER

LOANS IN EXCESS.

I. A loan by a national bank in excess of the restriction of section 29 of the act of 1864 (Revised Statutes, section 5200), which provides that the total liabilities 1864 (Revised Statutes, section 5200), which provides that the total habilities of any person (borrower) shall not exceed ten per centum of the capital stock, &c., is not void on that account. The loan may be enforced, though the bank may be liable to proceedings for forfeiture of its privileges, &c., for making it. (Stewart vs. National Union Bank of Maryland, 2 Abb., United States, p. 424. See also O'Hare vs. Second National Bank, 77 Pa. St., p. 96.) In Samuel M. Shoemaker vs. The National Mechanics' Bank, and The Same vs. The National Union Bank, application for injunction, &c., United States circuit court, Baltimore, Md., Judge Giles held * * * "As to the first charge in this bill against the defendant, in reference to the amount loaned to Bayne & Co. in violation of the twenty-pirth section of the set of June 3, 1864.

& Co., in violation of the twenty-ninth section of the act of June 3, 1864, I would only say that the loan made under such circumstances is not void; it can be enforced as any other loan made by the bank." * * *

LOCATION.

1. Under sections 6, 8, 10, 15, 18, and 44 of the original currency act (13 Stat. at Large, 101), respecting the location of banking associations, a national bank is to be regarded as located at the place specified in its organizationcertificate. If such place is in a State, the association is located in that State. (Manufacturers' National Bank vs. Baack, 8 Blatchf., p. 137.)

I. It is the duty of directors of a bank to use ordinary diligence in acquiring knowledge of its business. They cannot be heard, when sued, to say that they were not apprised of facts, the existence of which is shown by the books, accounts, and correspondence of the bank. They should control the subordinate officers of the bank in all important transactions. under the circumstances proved in this particular case, they were held liable for the abstraction and sale of special deposit by the latter. (United Society,

fc., vs. Underwood, 9 Bush, Ky., p. 609.)

II. The cashier of a national bank, who had executed no bond, embezzled its funds, discovery whereof might have been effected by use of slight diligence on the part of the directory. They, however, published, according to law, a statement of the condition of the bank, which showed that its affairs were being prudently and honestly administered, and from which the public had a right to believe that he was trustworthy. Afterward, persons who had seen this report became sureties on the official bond of the cashier, and for his subsequent embezzlements were sought to be held liable thereon: Held, that such sureties, being misled by the statement; were released. They had a right to believe that the directors, before publishing it, investigated the condition of the bank. (Graves vs. Lebanon National Bank, 10 Bush, Ky., p. 23.)

III. A guaranty against loss for signing as sureties, given by a bank president, without authority from the directors, to those whom he had solicited thus to sign a note given to the bank to retire a micro note held by it against their principals.

a note, given to the bank to retire a prior note held by it against their principal, is held to be the individual contract of the president, and not binding upon the bank. (First National Bank vs. Bennett, 33 Mich., p. 520.)

IV. A cashier, who has made sale of corporate property, and holds a balance in his

hands, is the agent of the board of directors, and not of the respective stock-holders, and cannot be charged by an individual stockholder as holding such balance for his benefit. (Brown vs. Adams, 5 Biss., p. 181.)
V. A cashier, without special authority, cannot bind his bank by an official indorse-

went of his individual note, and the onus is on the payee to show such authority. (West Saint Louis Savings Bank vs. Shawnee Co. Bank, 3 Dill, p. 403.)

VI. Although the cashier of a bank may, in the ordinary course of business, without the action of the directors, dispose of the negotiable securities of the bank, he has not the power to pledge its assets for the payment of an antecedent debt. (State of Tennessee vs. Davis, 50 How. (N. Y.), p. 447.)

RECEIVERS.

I. The receiver of a national bank is the instrument of the Comptroller, and may be removed by him. (Kennedy vs. Gibson, 8 Wall., p. 505.)

II. Such receiver is the statutory assignee of the assets of the bank, and may sue

to collect the same in his own name, or in the name of the bank, for his use. (Ibid., p. 506.)

III. In such suit it is not necessary to make the bank or creditors parties. (Ibid., p. 506.)

IV. The receiver of a national bank represents such bank and its creditors, but he in no sense represents the United States Government, and cannot subject the government to the jurisdiction of any court. (Case vs. Terrill, 11 Wall., p. 199.)

RECEIVERS—Continued.

V. The decision of a receiver, rejecting a claim against his bank, is not final. Claimant may still sue. (Bank of Bethel vs. Pahquioque Bank, 14 Wall, p. 383.)
VI. The clause of section 50, act of 1864, which prescribes that the receiver shall be "under the direction of the Comptroller," means only that he shall be subject to his direction, not that he shall not act without orders. He may and must to his direction, not that he shall not act without orders. He may and must collect the assets. That is what he is appointed for. (Bradley, J., in Bank vs. Kennedy, 17 Wall., pp. 22-3.)

VII. Receivers of national banks are officers of the United States, within the meaning of the act of Congress of March 3, 1815, giving United States courts jurisdiction of actions by United States officers, and may sue in such courts.

(Platt, receiver, &c., vs. Beach, 2 Ben., p. 303.)

[NOTE.—The judge places stress upon the provision of section 31 of the act of 1864, which requires (in that particular instance) that the Secretary of the

Treasury shall concur in the appointment of the receiver.

SET-OFF.

I. In an action brought to enforce the individual liability of a shareholder of an insolvent bank, such shareholder cannot set off against such liability the amount due to him as a creditor of the bank. (Garrison vs. Howe, 17 N. Y.,

p. 458; In re Empire City Bank, 18 N. Y., p. 199.)
[Note.—Though these cases were decided by a State tribunal (New York court of appeals), and the rulings were based upon provisions of a State constitution and a State statute, yet the principle they enunciate is recognized and fully affirmed in Sawyer vs. Hoag, 17 Wall., p. 610, and Scammon vs. Kimball,

2 Otto, p. 362.

SHAREHOLDERS, INDIVIDUAL LIABILITY OF.

I. Comptroller must decide when and for what amount the personal liability of the shareholders of an insolvent national bank shall be enforced. (Kennedy vs. Gibson, 8 Wall., p. 505.)

II. His decision as to this is conclusive. Shareholders cannot controvert it. (Ibid.,

p. 505.)

III. In any suit brought to enforce such personal liability, such decision of the Comptroller must be averred by the plaintiff, and, if put in issue, must be proved. (*Ibid.*, p. 505.)

IV. The liability of shareholders is several, and not joint. (*Ibid.*, p. 505.)
V The limit of such liabilities is the par value of the stock held by each one.

(Ibid., p. 505.) VI. Where the whole amount is sought to be recovered, the proceeding must be at law; where less is required the proceeding may be in equity, and in such case an interlocutory decree may be taken for contribution, and the case may stand over for the further action of the court, if such action should subsequently prove to be necessary, until the full amount of the liability is exhansted. (Ibid., p. 505.)

But in Bailey, receiver, &c., vs. First National Bank Duluth, U. S. circuit court for Minnesota, Nelson, J., held that even where less than the par value was assessed the suit might be at law; and this would seem to be the true theory. Vide Bankers' Magazine, April 1877, p. 793.

VII. In such equity suit, all shareholders within the jurisdiction of the court should be made parties defendants; but it is no defense that those not within the jurisdiction are not joined. (*Ibid.*, p. 506.)

VIII. Suits to enforce personal liability of shareholders may properly be brought

before other assets are exhausted. (Ibid., pp. 505-6.)

SHAREHOLDER, LIABILITY OF TRANSFEREE.

I. The transferee of shares, when such transfer is absolute on the books of the bank, is liable to creditors to the amount of such shares, although in fact he holds them as collateral security for a loan to the shareholder who transferred them. (Hale vs. Walker, 31 Iowa, p. 344.)
[Note.—This also is a State court adjudication, but it is believed to be in

harmony with the rulings of other high and eminent State tribunals upon the same question.] (Adderly vs. Storm, 6 Hill, p. 624, and Worrall vs. Johnson, 5

Barb., p. 210.)
[In the Bankers' Magazine for January, 1875, is a notice of the case of Mann, receiver, vs. Dr. Cheeseman, decided by Blatchford, J., in the United States circuit court, in New York, in which the judge held that until there was a transfer of shares on the books of the bank the shareholder whose name there appeared was liable for the debts of the bank; that an actual sale and the signing the ordinary power of attorney on the back of the certificate will not relieve the SHAREHOLDER, LIABILITY OF TRANSFEREE—Continued.

The learned judge also held that such shareholder could not question the action of the Comptroller as to the necessity of suing the shareholder.]

(See also Set-off, supra.)

In the case of Bowden vs. Farmers and Merchants' National Bank of Baltimore, decided by Judge Giles in the United States circuit court, Maryland district, April, 1877, it was held that the defendant was liable, though the shares had originally been transferred to it as security for a loan, which loan had been paid, and though, upon such payment, defendant delivered the certificate of stock to the original owner, with a power of attorney authorizing him to retransfer the stock to himself.

SHARES OF STOCK.

I. A national bank whose certificates of stock specify that the shares are transferable on the books of the bank on surrender of the certificates, and not otherwise, and which suffers a shareholder to transfer without such surrender, is liable to a bona fide transferee, for value of same stock, who produces such certificate with usual power of attorney to transfer; and this is so though no notice had been given to the bank of the transfer. (Bank vs. Lanier, 11 Wall., p. 369.)

II. Shares quasi negotiable. (Ibid., p. 369.)

TAXATION OF SHARES.

I. The act of 1864, rightly construed, subjects the shares of the association in the hands of shareholders to taxation by the States, under certain limitations set forth in section 41, without regard to the fact that part or the whole of the capital of such association is invested in national securities which are declared by law exempt from State taxation. (Van Allen vs. Assessors, 3, Wall.,

p. 573.) (Chase, C. J., and other judges dissented.)
II. Act thus construed is constitutional. (*Ibid.*, p. 573.)
III. A certain statute of New York, which taxed shares of national-bank stock, declared void, because shares of State banks were not taxed, although their capital. clared void, because shares of State banks were not taxed, atthough their capital was; the act of Congress prescribing that shares of national banks shall be taxed only as shares of State banks are. (Ibid., p. 573.)

The ruling as to taxing shares of stock reaffirmed in Bradley vs. People, 4 Wall., p. 459; National Bank vs. Commonwealth, 9 Wall., p. 353.

In last case, held that a State law requiring the cashier to pay the tax was valid. Held, also, that a certain State tax law virtually taxed "shares of moneyed corporations," &c., (Ibid., p. 353.)

IV. Shares of stock in national banks are personal property, and though in one sense incorporeal the law which created them could separate them from the

sense incorporeal, the law which created them could separate them from the person of their owner, for taxation, and give them a situs of their own. (Tappan, collector, vs. Bank, 19 Wall., p. 490.)

V. Sec. 41 did thus separate them and give them a situs of their own. (Ibid., p.

490.)

VI. This provision of the national-currency act became a law of the property (in shares), and every State in which a bank was located acquired jurisdiction,

for taxation, of all the shares, whether owned by residents or non-residents, and power to legislate accordingly. (*Ibid.*, p. 490.)

VII. Under the act of Congress of February 10, 1868, enacting that each State legislature may direct the manner of taxing all shares of stock of national banks located within the State, subject to the restriction that the taxation shall not be greater than the rate assessed upon other moneyed capital in the hands of individual citizens of such State, and of a certain act of the legislature of Pennsylvania which provided that such shares shall be assessed for school, municipal, and local purposes at the same rate as is now or may hereafter be assessed and imposed upon other moneyed capital in the hands of individual citizens of the State; held, that shares of national-bank stock may be valued for taxation, for county, school, municipal, and local purposes, at an amount above their par value. (Hepburn vs. School Directors of the Borough of Carlisle,

23 Wall., p. 480.)
[Note.—In this case it appeared that Hepburn owned several thousand dollars of national-bank stock, the par value of which was \$100 per share, and that it was valued for taxation, for a school tax, at \$150 per share. This assessment was held valid, notwithstanding that by a certain act of the State legislature, applicable to the county of Cumberland, in which the borough of Carlisle was situated, certain specified kinds of moneyed obligations were

exempt from taxation, except for State purposes.]

TAXATION OF SHARES-Continued.

See also Saint Louis National Bank, National Bank of Missouri, Third National Bank, Valley National Bank, and Merchants' National Bank of Saint Louis vs. Papin, in United States circuit court, eastern district of Missouri, September term, 1876. Also, Gallatin National Bank of New York vs. Commissioners of Taxes, supreme court of New York, first department, general term, November, 1876. These latter cases are published in the Bankers' Magazine for December, 1876.

TAXATION OF INTEREST AND DIVIDENDS.

 Under the internal-revenue act of July, 1870, interest paid and dividends de-clared during the last five months of 1870 are taxable, as well as those declared during the year 1871. (Blake vs. National Banks, 23 Wall., p. 307.)

LICENSE TAX.

I. The District of Columbia imposed a license tax on all the national banks in the District, the rate being 50 cents annually on each \$1,000 of the capital invested. The Citizens' National Bank refused to pay this assessment, and a test case was made in the District criminal court, Mr. Justice Mac Arthur presiding. This court, after full argument, held the tax illegal and void, as being contrary to the mode of taxation prescribed by Congress, which mode was held to be exclusive.

TRANSFERS OF ASSETS.

I. When binding. The receiver of a national bank cannot repudiate a pledge of its assets made by the bank for advances to it, either on the ground that the pledge was not formally executed, or that the transfer was void because not authorized by the charter of the bank, so long as he retains, as assets, the advances, to secure repayment of which the pledge was given. (Casey vs. Le Société de Crédit Mobilier, 2 Woods, p. 77.)

A preference of one creditor to another, within the meaning of section 5242, Revised Statutes, is a preference given by the bank to secure or pay a pre-

existing debt. Where a person, knowing that a national bank is embarrassed, makes to it a loan, taking as security therefor a pledge of part of the assets of the bank, this transfer does not give him the preference prohibited by the statute. (Ibid.)

II. When not binding. Under said section 5242, which declares void transfers of its property by a national bank, made in contemplation of insolvency, and with a view to give a preference to one creditor over another, or with a view to prevent the application of the assets of the bank in the manner prescribed by law, such a transfer is void if the insolvency is in the contemplation of the bank making the transfer, although the party to whom it is made does not know or contemplate the insolvency of the bank. (Case, receiver, vs. Citizens' Bank, 2 Woods, p. 23.)

Ultra vires, what is.

I. National banks cannot sell railroad bonds for third parties on commission, or

engage in business of that character. (Susan Welcker vs. First National Bank

of Hagerstown, Court of Appeals of Maryland, 43 Md., p. 581.)

II. In an action of deceit against a national bank, for alleged false representations of its teller in the sale to plaintiff of certain railroad bonds:

Held, That the selling of such bonds on commission was not within the authorized business of a national bank, and being thus beyond the scope of its corporate powers, the defense of ultra vires was open to it, and it was not respon-

sible for the deceit of its teller. (Ibid.)

III. The national-bank act confers no power on a national bank to take a deed of trust of real estate as security for a contemporaneous loan; and such bank has no power not conferred by Congress. A sale under such a deed enjoined. (Matthews vs. Skinner, 62 Mo., p. 329. See also Deposits, special, I, II, III, IV.)

ULTRA VIRES, WHAT IS NOT.

IV. A national bank took a lien upon real estate to secure a pre-existing debt. Afterward, the bank paid \$500 to discharge a prior lien upon the land, taking a note and mortgage on land in Kansas to secure this advance. Lien and mortgage held valid and warranted by law. (Orum vs. National Bank, 16 Kans., p. 341.)

V. A chattel mortgage taken by a national bank to secure a pre-existing debt is valid, and will be enforced. (Spofford vs. First National Bank, 37 Iowa, p. 181.)

USURY.

I. State laws relative to usury do not apply to national banks. (Farmers and Mechanics' National Bank vs. Dearing, 1 Otto, p. 29.)
II. The only forfeiture declared by the 30th section of the act of June 3, 1864 (Revised Statutes, section 5198), is of the entire interest which the note or bill carries with it, or which has been agreed to be paid thereon, when the rate knowingly received, reserved, or charged by a national bank is in excess of that allowed by that section; and no loss of the entire debt is incurred by such bank, as a penalty or otherwise, by reason of the provision of the usury law of a State. (Ibid.)

To same effect are National Exchange Bank vs. Moore, 2 Bond, p. 170, and several State decisions.

several State decisions.

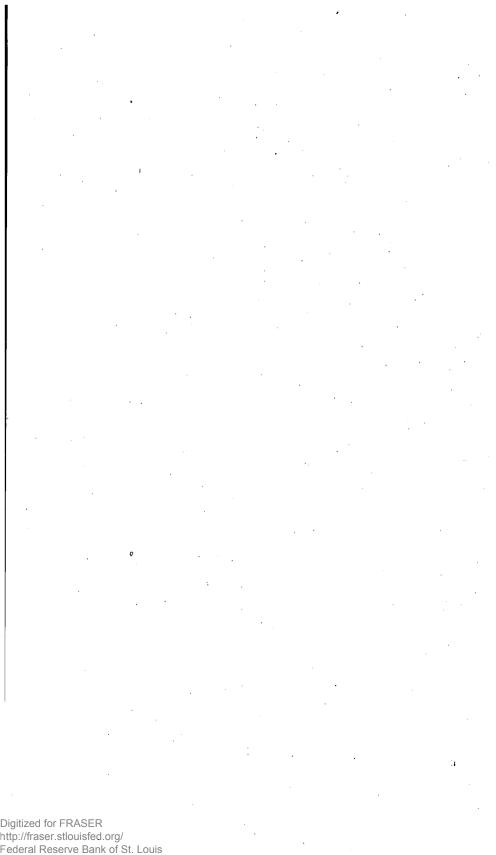

(The New York court of appeals had decided the other way.)

APPENDIX.

In concluding, the Comptroller deems it but just that he should gratefully acknowledge the zealous and efficient co-operation of the officers and clerks associated with him in the performance of official duties. JOHN JAY KNOX.

Comptroller of the Currency.

Hon. SAMUEL J. RANDALL, Speaker of the House of Representatives.

Expenses of the office of the Comptroller of the Currency for the fiscal year ending June 30, 1878.

226, 752 32

The contingent expenses of the office are not paid by the Comptroller, but from the general appropriation for contingent expenses of the Treasury Department; and, as separate accounts are not kept for the different bureaus, the amount cannot be stated.

Amount and rate of taxation (United States and State) of the national banks for the year 1867.

^{*}The capital of the banks that paid State, county, and municipal taxes on stock and real estate is \$488,272,782.

California banks pay no State taxes on capital, except such as is invested in real estate.

Dividends and earnings of the national banks, arranged by geographical divisions, for semiannual periods from September 1, 1869, to September 1, 1878.

REPORT

OF THE

DIRECTOR OF THE MINT.

TREASURY DEPARTMENT, OFFICE DIRECTOR OF THE MINT, November 1, 1878.

24, 356, 312 10

SIR: In compliance with section 345, Title VII, Revised Statutes United States, I have the honor to submit the following report of the operations of the mints and assay-offices for the fiscal year ended June 30, 1878:

The amounts of gold and silver deposits and purchases, coins struck, and bars manufactured were as follows:

DEPOSITS AND PURCHASES.

Gold deposits		••••••	\$65, 251, 773 22 39, 843, 127 07

	Fine silver.	Standard silver.	Unparted silver.	Mint silver.	Total.	
Mint at Philadelphia Mint at San Francisco Mint at Carson Mint at Denver Mint at Denver Mint at New Orleans Assay-office at New York Assay-office at Boise Assay-office at Helena Assay-office at Charlotte	171, 379 07 11, 037, 682 10	\$87, 928 29	\$7,712 09 13,960 80 1,155 45		171, 379 07 7, 712 09 13, 960 80 11, 158, 087 08 1, 155 45	
Total silver	11, 325, 690 29	87, 928 29	408, 290 60	32, 476 69	11, 854, 385 87	

The following is a statement of the earnings and expenditures of the mints and assay-offices during the fiscal year:

Seigniorage on coins is not properly an earning of the mint; neither is the expense of distributing the coin manufactured on government account properly an expenditure; but these items are included in the statement as the most convenient place to exhibit them.

The coinage of the last year and bars manufactured is the largest in

value ever executed in one year in the history of the mint.

As nearly as can be ascertained, the cost of manufacturing silver coin is, on the average, about four times as great as that of gold when the gold coinage is in denominations less than ten-dollar pieces. Our gold coinage since the suspension of specie payments in 1861 has consisted principally of double eagles, and the relative cost, as stated, of coining the two metals has, therefore, been exceeded. There is practically no difference in the cost of manufacturing a double eagle from that of a silver dollar.

SILVER PURCHASES.

The Director being charged with the supervision of the details of the purchases of silver bullion made by the Secretary of the Treasury, it is proper that a brief account of the purchases should be submitted in this report.

Purchases of silver bullion were made during the year under the provisions of the specie-resumption act and also the act to authorize the coinage of the standard silver dollar. Those made under the former act were for the requirements of the fractional coinage, and under the latter,

for the coinage of the dollar.

Purchases of bullion for the fractional coinage were made from time to time during the year until February 28, 1878, and amounted to 5,984,693.64 fine ounces, at a cost of \$7,114,548.69, an average of 118.879 cents per ounce fine. The London rate for silver bullion during this period averaged 54.3107 pence per ounce, British standard, equivalent

to 119.055 cents per ounce fine.

The total amount of silver bullion purchased by the government for coinage into fractional coins from January, 1875, to February 28, 1878, at which time this coinage was intermitted, was 31,603,905.87 fine ounces, for which \$37,571,148.04 was paid in gold coin, an average of 118.881 cents per ounce fine. The average London rate during the above-mentioned period was 54.674 pence, the parity of which is 119.911 cents per ounce fine.

At the date of the authorization of the standard silver dollar there was on hand in the Treasury and mints in fractional silver coins \$6,253,624.76; and the demand for these coins being light, this amount was regarded as sufficient to meet any probable demand for some time to come, and the coinage of fractional silver was temporarily suspended and preparations made to work the mints to their full capacity in striking the dollar.

Purchasing silver for the dollar coinage was commenced in March, and continued from time to time as advantageous offers of the same were made, or as the mints required additional bullion for their current work.

The total amount purchased for the dollar coinage up to September 30 was 17,925,701.99 fine ounces, at a cost to the government of \$21,057,369.17, an average cost of 117.47 cents per ounce fine. The average London rate during this period was 53.1208 pence, which, calculated at the par of exchange, is equivalent to 116.447 cents per ounce fine. In arriving at the parity of the London rate in all purchases that have been made, the price of sterling exchange is an element in the calculation. The average rate for sterling exchange from March to September, inclusive, was \$4.88, at which rate the parity of 53.1208 pence is 116.77 cents per ounce fine.

At the coining rate for standard silver dollars, \$1.16⁴, per standard ounce, the above amount purchased will produce \$23,176,665.19.

All silver is purchased at its gold value, and of the amount paid for silver bullion for the dollar coinage \$7,672,792.95 was paid in gold coin,

and \$13,384,576.22 in standard silver dollars.

Soon after the passage of the act authorizing the coinage of the standard silver dollar, and an attempt being made to procure the requisite bullion for its coinage at the mints on the Pacific coast, it was found that the producers and dealers would not sell silver to the government at the equivalent of the London rate, but demanded in addition thereto an amount equal to the cost of bringing it from London and laying it down in San

Francisco. These terms being deemed exorbitant were rejected, and arrangements were immediately made to bring the capacity of the Mint at Philadelphia to its maximum with a view to meet the provisions of law, which required two millions of silver dollars to be coined in each month, and the available supplies of silver from domestic sources being entirely insufficient for the coinage of this amount, the foreign market was indirectly resorted to and an amount sufficient to meet the requirements of law secured.

In July, 1878, the principal holders of bullion on the Pacific coast receded from their position and accepted the equivalent of the London rate, at which price sufficient bullion was purchased to employ the mints at San Francisco and Carson on the coinage of the dollar. All pur-

chases since made have been of domestic bullion.

PURCHASES OF GOLD BULLION.

Arrangements have been made, under the provisions of existing laws and pursuant to your instructions, for the purchase by the government of gold bullion deposited at the mint at Denver and the assay-office at Charlotte, N. C.

Heretofore bullion deposited at these institutions has been melted and assayed and the resulting unparted bar or bars returned to the de-

positor, a charge being imposed for the operation.

While this benefited the depositor in so far as it enabled him to ascertain the value of his bullion, which was placed also in a more convenient marketable shape, yet to obtain the value in money he was necessitated to resort to local bullion-dealers.

By the arrangement lately consummated, however, the government becomes the purchaser, and takes the bullion at its coining value, paying for the same in United States legal-tender notes at par, or in standard silver dollars, at the option of the seller. In addition to the charge for melting and assaying, the usual mint charges are imposed for parting, refining, or toughening, should any of these operations be required to fit the metal for coinage, and also the cost of transportation to the Mint at Philadelphia, where the bullion is coined on government account. Bullion so purchased is transmitted to the Mint at Philadelphia in registered packages by mail as third-class mail matter.

The purchase of gold bullion at the assay-offices at Helena, Mont., and Boise City, Idaho, will also be commenced so soon as satisfactory arrangements can be made with the express companies for the transportation of the bullion to the mints. The insecurity of the mail, which is carried by stage-coach through the Territories named, precludes sending govern-

ment bullion by that method.

This measure, by which the miners can exchange their bullion at its mint value for circulating money, will no doubt prove of great advantage to the mining interests, and will remove all necessity for additional coining facilities for many years to come.

THE MINT AT NEW ORLEANS.

At the last session of Congress provision was made for reopening the mint at New Orleans for coinage purposes. Some little delay was occasioned in preparations for this object from the fact that the square of ground upon which the mint is located belonged to the city of New Orleans, and had been deeded to the government, at the time of the erection of the building, for only so long as it should be used by the government for minting purposes.

The act of Congress making appropriations for the mint at New

Orleans provided that no expenditure of money should be made for that mint until the city should release all title and claim and all conditions of forfeiture to the lands or premises upon which the mint is located, and negotiations looking to that effect were entered into with the city authorities, which resulted in the square of ground being deeded in feesimple to the government.

During the late war much of the machinery, apparatus, &c., had been injured and otherwise rendered ineffective from disuse and other causes incident to war, and extensive repairs besides additional machinery

were required.

As soon as the title to the property had been secured to the government, and the officers of the mint had been appointed, the necessary repairs were commenced, but they have been impeded to a considerable extent by the prevalence of yellow fever in New Orleans, which not only delayed the repairs but prevented skilled mint operatives from going to that city until the epidemic should subside. As many mint operations require special skill and knowledge on the part of the operatives, a few of the appointees to that mint were assigned to duty at the mint at Philadelphia in order to familiarize themselves with the work which they will be called upon to perform, and will be transferred to New Orleans as soon as it is safe for them to go there.

The various operative rooms in the mint have been placed in good condition, the melting and annealing furnaces restored, the engine and machinery repaired, and such additional machinery as is required to render this mint effective for coinage has been procured, and it is believed that by the end of the current calendar year everything pertaining to the mint will be in a condition to commence coinage. The New Orleans mint will add to the coining capacity of the mints about \$1,000,000 in silver dollars per month, but this capacity would be somewhat reduced if called upon to execute any considerable amount of gold or frac-

tional silver coinage.

PRECAUTIONS AGAINST COUNTERFEITING.

I have long been impressed with the belief that the worst danger which threatens our gold coin, from counterfeiters, is the filling with an inferior metal or alloy. By this art the piece presents genuine exteriors, but the inner part having been removed, a disk of platinum, pure or alloyed, is inserted in its place and closed with a ribbed rim of gold. It is, therefore, partly genuine and partly counterfeit, and its value is reduced by several dollars, differing according to the denomination of the piece.

The largest chance of spoliation of course occurs with the twenty-dollar piece, but the pieces of ten and five dollars have also been filled. So far the mischief has been very limited, as it evidently requires first-class workmen, and is slow work; but pieces of this sort are, of all false

issues, the most difficult to detect.

Some experiments were made at the Philadelphia mint in 1860 to determine whether this fraud might not be prevented by materially lessening the thickness of the coin and consequently enlarging its diameter, at the same time giving the disks a slight concavity, so as to make the piece of a minimum thickness at the center. A pair of dies were engraved for the half-eagle, and a few specimens prepared on this basis.

Nothing further was done, for in fact in the very next year gold disappeared from circulation and has so continued, until we are now on the eve of resuming its use. I have therefore thought it desirable, in order to give our gold coin greater security, to experiment still farther in this

line, and to this end experimental dies are being prepared for the half and quarter eagle denominations. The larger piece will be expanded to nearly the surface of the present eagle, and adjusted both to ordinary and metrical scales, viz, one inch or about twenty-six millimeters in

The smaller piece will be of the diameter of the present three-dollar

piece, about four-fifths of an inch, or twenty millimeters.

These measures make the planchet so thin that sawing out the interior part would be a very critical, not to say impossible, feat, and not likely to pay for the labor. At the same time the coins would be thick enough at the raised border to be easily taken up by the fingers and stiff enough to resist bending.

The dimensions of our coins have never been a matter of legal enactment, and alteration could be made, if so desired, with the approval of

the Secretary of the Treasury.

THE TRADE-DOLLAR.

The purpose for which the trade-dollar was instituted and the mode in which these coins were supplied by the mints are already well known, and it is unnecessary to advert in this report to that subject. It is sufficient to state that wherever they have been introduced in China they have met with a favorable reception and continue to grow in the estimation of the Chinese.

It is only in the southern ports, however, of the Chinese empire, that the people are familiarized with these coins; in the northern part they are as yet unknown. The extracts* from reports made by the Hong-

*The United States trade-dollar has been well received in China, and is eagerly welcomed in those parts of the country where the true value of the coin is known. It is a legal tender at the ports of Foochow and Canton in China, and also at Saigon and Singapore, and, although not legally current in this colony, it is anxiously sought after by the Chinese, and in the bazaars it is seldom to be purchased. In proof of the estimation in which the trade-dollar is held in the south of China, we need only state that the bulk of the direct exchange business between San Francisco and Hong-Kong (which is very considerable) is done in this coin, the natives preferring it to the Mexi-

Late advices from San Francisco report that so great is the demand for trade-dollars. for shipment to China, that the California mint is unequal to the task of turning out the coin fast enough to satisfy requirements. This is, in our estimation, evidence powerful enough to convince the most skeptical as to whether the United States tradedollar has been a success or not. It is the best dollar we have ever seen here, and as there can be no doubt as to the standard and purity being maintained, it will become more popular day by day, and, we doubt not, ultimately find its way into the north of China, where the people are more prejudiced against innovation.

Trade-dollars are current by count at Singapore, Penang, Bangkok, and Saigon; they are current by weight at Swatow, Amoy, Foochow, and Canton. In Hong-Kong they are not a legal tender, and the banks will only take them from each other by special arrangement; but the Chinese take them freely in Hong-Kong when they want coin of any description, which is very seldom, as they prefer bank-notes, and only take coin from the banks when they require to export it from the colony. In the South of Chine the Strait and Cockin Chine the trade dellar is not because with China, the Straits and Cochin China, the trade-dollar is well known and passes without comment along with the clean Mexican dollars, but in Shanghai and the northern ports it is unknown, and is not likely to be current for a length of time.

My opinion is that ultimately it will be current all over China; it is the best coin

that ever has been imported, and, being produced at the fountain-head of silver, can be laid down more cheaply than any other dollar. The reliable character of the coin (for weight or purity) is a further consideration which must be favorably entertained.

China requires many millions of dollars annually, and while the clean Mexican dol-

lar will be imported for the North of China, the trade-dollar will be imported for the South. I would roughly estimate that the San Francisco steamers will bring from four to six lacs (four to six hundred thousand) of trade-dollars each fortnightly trip, all the year round. I base this estimate upon the experience of last season's requirements.

Kong and Shanghai Banking Corporation, and the Oriental Bank, two of the principal foreign banking companies, dated respectively January 30 and 31, 1877, as well as the dispatches from the United States legation in China and consuls at the various ports (contained in the appendix) establish satisfactorily the fact that the trade-dollar has proved beneficial to the Chinese, the American merchant, and the producer of silver. It has benefited the Chinese by giving them a coin of more uniform fineness and value and of better execution than any other current in their country; it has proved advantageous to the American merchant by furnishing him a coin more acceptable to his foreign customer and at a cheaper rate to himself; and the producer of silver has not only obtained a better price for his silver, but an increased demand for the same has been created.

So long as gold continued at a premium and silver bullion commanded a price sufficient to keep the bullion value of 420 grains of standard silver, together with the coinage charge for a trade-dollar, above the gold value of a United States legal-tender dollar note, there was no likelihood of trade-dollars finding their way into domestic circulation, at least not to any embarrassing extent; but when, from the appreciation of United States notes as compared with gold, and the decline in the value of silver, a trade-dollar added to its coinage charge became of less intrinsic value than the gold value of a dollar note, owners of silver bullion deposited the same at the mints for returns in trade-dollars, and placed them in circulation at a profit to themselves. This state of affairs first manifested itself in the latter part of 1877, and in October of that year the Secretary of the Treasury directed that the receipt of deposits of silver for coinage into trade-dollars should be discontinued at the coinage mints and at the assay office at New York.

In November of the same year an increased demand arose on the Pacific coast for trade-dollars for Chinese new-year settlements, and as it was alleged that the coins were required for export, the Secretary so far modified the former order for discontinuance as to authorize receipts at the Western mints for returns in these coins.

It subsequently transpired that trade-dollars manufactured under this authorization at the mint at San Francisco were not all shipped to China, but the larger portion were transported to the Mississippi Valley as well as to the Eastern States, and there placed in circulation; accordingly, on February 22, 1878, an order was issued for the final discontinuance of the receipt of deposits for returns in trade-dollars at the Western mints.

At the time of the order being issued to the Philadelphia mint and New York assay-office, October, 1877, there was due depositors for bullion previously deposited at those institutions 590,795 trade-dollars, and at the San Francisco mint at the date of the final order, February, 1878, 1,695,819 trade-dollars; the superintendent was instructed to settle for these deposits in trade-dollars, upon satisfactory evidence being given that the same would be exported, or, if the depositor preferred, he could receive his silver back in fine mint-bars. The bullion was accordingly coined, and settlement made with the depositors; the last coinage for this purpose being executed at Philadelphia in the beginning of December, 1877, and at San Francisco early in the ensuing April, since which time none have been coined.

At the mint at Carson no trade-dollars were due depositors for deposits made prior to the date of the order for discontinuance, and the coinage, therefore, ceased with the reception of the order.

The total amount of trade-dollars struck at the mints since the passage

of the act authorizing their coinage has been 35,959,360, and the total number exported, as shown by the returns of the United States customs collectors, has been 25,703,950, leaving a balance of 10,255,410, a considerable portion of which has found its way out of the country through Chinese returning to their own land. It is impossible to ascertain with any degree of accuracy what this last may amount to, but I estimate that during the past five years it would not fall far short of \$5,000,000, leaving about five and a quarter millions held by California banks and in circulation as money; about \$106,000 of this last amount has been melted as bullion at the mints.

The principal portion of trade-dollars now in circulation were coined since the passage of the act depriving them of their limited legal-tender quality, and they were manufactured for depositors with the distinct understanding that they were to be exported and not placed in domestic circulation; and it was also well understood that they had been deprived of their limited legal tender character (to the extent of five dollars) by the act of July $2\overline{2}$, 1876. The government, having received nothing whatever for executing these coins except the actual expense of coinage. is in no degree responsible for their redemption. It would not do to give them a legal-tender character, lest it should result in bringing back large amounts from other countries; nor would it be right to add a large per centage to the value of these coins by making them a legal tender or redeeming them in legal-tender money. If made a legal tender, the purposes of the act authorizing their coinage would be practically destroyed.

It appears from the dispatches of Minister Seward to the Department of State that all efforts to induce the Chinese Government to establish a mint have failed, and it is quite certain that that empire must depend on foreign coins, the use of which has been gradually increasing for some years past at the principal ports of the empire. It will be to our advantage to furnish these coins, so far as we can without detriment to our own money system, and the trade-dollar having attained such a favorable position in China, it would not appear to be advisable to repeal the law authorizing its coinage.

The Secretary of the Treasury possesses the power under existing laws to restrict this coinage to the actual export demand. Silver is the money standard of Oriental nations, and the extent of our silver producing territory justifies the belief that our production, together with the silver that our trade will naturally command from Mexico and South America, will, in the near future, be in excess of any probable demand for our coinage purposes, and we must look to China principally for a market for our surplus.

CIRCULATION OF THE MEXICAN SILVER DOLLAR.

After trade-dollars could no longer be procured to be placed in domestic circulation, money dealers and speculators imported Mexican silver dollars to a large extent, and placed them in circulation at par in the same manner as had previously been done with the trade-dollar. On these coins being offered on deposit or in payment at the banks and savings institutions by persons who had taken them at par, they were refused.

This was followed by the receipt at the Treasury Department of numerous letters from different parts of the country, in which the question was in almost all cases asked why the United States Treasury would

not receive these coins. To furnish accurate and uniform information upon the subject, as well as to protect the people as far as possible from the imposition practiced upon them, it was decided, after consultation with the Secretary, to issue a circular, in which should be plainly stated the fact that these coins were not a legal tender in the United States, and could be received only at the mints as bullion.

The trade-dollar, occupying the same position in respect to legal tender, was also referred to in the circular. The effect of this circular was to put an almost immediate stop to the placing of Mexican dollars

in circulation in the United States.

DOMESTIC PRODUCTION OF GOLD AND SILVER.

All available means have been employed to ascertain as accurately as possible the domestic production of gold and silver, and the following are the estimates and actual returns which have been furnished of the outturn from the various States and Territories during the last fiscal year, the aggregate of which, however, appears to be somewhat below, in gold at least, the actual amount deposited at the mints.

Locality.	Gold.	Silver.	Total.
California			\$17, 634, 068
Nevada Colorado	3, 366, 404	5, 394, 940	47, 676, 863 8, 761, 344
Montana Idaho	1, 150, 000	200, 000	3, 930, 146 1, 350, 000
Utah Arizona	500, 000	3, 000, 000	5, 600, 000 3, 500, 000
New MexicoOregon	1,000,000	100, 000	675, 000 1, 100, 000
Washington Dakota	3, 000, 000		325, 000 3, 000, 000
Lake Superior	150, 000		
Georgia Other sources			100, 000 50, 000
Total	47, 226, 107	46, 726, 314	93, 952, 421

The returns from California, Nevada, Colorado, Montana, and Utah, the largest bullion-producing States and Territories in the country, have been compiled from reports made by the express companies and State officials, and for the other States and Territories from the best known and most reliable sources of information obtainable. A considerable amount of gold bullion, produced chiefly in California and Colorado, does not appear in the returns made by the express companies; in California being taken direct to the mint at San Francisco by the owners, and in Colorado being shipped from the State through private hands. I estimate that this would add to the gold product as above given of California at least \$2,500,000, and to that of Colorado \$500,000. amounts added to the foregoing returns would bring the total gold production for the year to \$50,226,107, an estimate which I believe to be not far from the actual amount.

The records of the mints show that \$48,075,123.76 of domestic gold bullion was actually deposited, and the reports of the customs authorities exhibit \$205,319 of domestic bullion exported, thus leaving about \$2,000,000 of the estimated production of the country unaccounted for, an amount most likely consumed in manufactures and also held by private parties, particularly in the Black Hills region and other remote

mining sections of the country.

The returns of silver as made by the express companies more nearly approximate the actual production of the respective States and Territories, as silver, from its greater bulk and weight, is not so readily transported by private parties as gold. A considerable amount is extracted, however, from ores shipped as freight and not by express.

During the fiscal year, \$28,795,195.80 of domestic silver was deposited at the mints or purchased by the government, and \$15,035,045 of the domestic production was exported in the form of bullion. At the close of the year a large amount was being held for higher prices by the principal was a superficient of the princ

of the year a large amount was being held for higher prices by the principal producers on the Pacific coast (sold a short time afterward to the government), and this, together with the amount consumed in the arts and manufactures, probably in all about \$5,000,000, would bring the total domestic production of silver for the year to about \$49,000,000.

In view of the near approach to specie resumption and the placing of

In view of the near approach to specie resumption and the placing of our currency upon a sound basis, it is very gratifying to know that during the past year the mines of the United States have added to the solid wealth of the country nearly one hundred millions of dollars in the precious metals, and that this large production is not only likely to continue, but probably will increase in the near future.

MONEY STATISTICS.

In estimating the stock of gold and silver coin and bullion in the country, the principal difficulty encountered is to ascertain the amount consumed in the arts and manufactures. I estimate, however, that during the past year no greater amount of the precious metals has been thus consumed than during the previous year, and the estimate is sufficiently large to be a safe amount to deduct from the net amount on hand June 30, 1877, added to the year's production and excess of importations over exportations, in order to ascertain the net or available stock of coin and bullion on hand June 30, 1878.

Basing an estimate for the past fiscal year upon the estimate of the previous year, 1877, we have:

Amount of gold coin and bullion on hand June 30, 1877 Add the product of the mines during the year, about Importations	\$192, 720, 230 50, 000, 000 13, 330, 715
Deduct exportations	256, 050, 945 11, 697, 555
Leaves a net balance of	244, 353, 390 30, 1878.
The estimated amount of silver coin and bullion June 30, 1877	\$50, 135, 628 49, 000, 000 16, 490, 599
Deduct exportations	115, 626, 227 27, 535, 670
Leaves a net balance of	88,090,557 30, 1878; a ng the year

During the first quarter of the current fiscal year, July to September inclusive, the imports of gold exceeded the exports by \$225,485, and the

of \$89,588,089.

domestic production would probably reach \$15,000,000, that portion of the year being the season of greatest activity in gold-mining operations. It would be safe to add at least this last amount to the stock of gold coin and bullion in the country at the close of the fiscal year, making a total of \$259,353,390 September 30, 1878.

During the quarter the imports of silver exceeded the exports by \$1,036,096, and the domestic production may be placed at \$10,000,000, thus giving an addition of about \$11,000,000, or a total of \$99,090,557

as the stock of silver coin and bullion September 30, 1878.

The large excess of imports of silver over the amount exported during the quarter ended September 30, 1878, is due to the fact that the United States has been during that time a large buyer of domestic silver for the coinage of the dollar, and to the additional fact that, owing to the decline in the value of silver, United States fractional silver coins are returning in large quantities from the West India islands and South America, where they have been hitherto circulating at par, aggregating over \$1,000,000 within the three months mentioned.

THE COURSE OF SILVER BULLION.

At the date of the passage of the act authorizing the coinage of the dollar of 412½ grains, the price of bar-silver was about 55 pence per ounce, British standard. From that date, February 28 last, the price gradually declined until it reached 49½ pence, on the 17th of October;

the price at the date of this report is $50\frac{1}{2}$ pence.

From the foregoing it will be seen that the expectation entertained by many, that the remonetization of the silver dollar would be followed by an appreciation in the value of silver, has not as yet been realized. The causes of the decline in value during the present calendar year have been a very large decrease in the demand for export to India and China, the continued closure of the mints of the States of the Latin Monetary Union and of the Netherlands against the coinage of legal-tender silver coins, the use of irredeemable paper currency by Austria and Russia, and the readiness of the German Government to meet any fair market with free supplies, making a sale recently in London of £100,000 as low as $51\frac{\pi}{2}$ pence per ounce.

It will, of course, be readily understood that as long as the supply of silver is in excess of the demand there can be no permanent rise in value. An increased demand of any magnitude can only arise for India and China, or in the event of the resumption of the coinage of legal-tender

silver coins by France, Belgium, and the Netherlands.

When the report of the United States Commissioners to the Paris International Monetary Convention shall have been received, we will be better able to form an opinion as to the probable action of France and other countries in reference to the opening of their mints to silver than

we are with our present information.

While this complicated, uncertain, and unsatisfactory condition of affairs with reference to the relative value of gold and silver continues, it will require that the course to be pursued by the United States should be very cautious in respect to the issue of legal-tender silver coins in which silver is rated so much above its market value, if gold is to be retained as the principal money of payment and of commerce.

It should be added in this connection that while silver is the monetary standard of the Austrio-Hungarian and Russian Empires, their more recent public loans have been made upon the gold basis, which will require their tariff duties to be collected in that metal. The foreign

exchanges are likewise settled on the gold basis.

ANNUAL SETTLEMENT, ETC.

The annual settlement of the accounts of the operative officers of the various mints, made at the close of the fiscal year, was in all respects

highly satisfactory, the wastages having been unusually light.

The mints and assay-offices operated during the fiscal year upon \$105,094,400.29 in gold and silver bullion, and returned the same in the form of coin and bars, and, so far as the Director is informed, without a single complaint on the part of a depositor or seller of bullion or, in fact, of any person having business transactions with these institutions, and the bullion and ordinary expense accounts have been promptly rendered and settled according to law.

These results attest the skill and fidelity with which the mints and assay-offices are managed and conducted, and reflect credit upon all

connected with the coinage.

The usual detailed statements of the various operations of the mints and assay-offices will be found in the appendix, together with information respecting the trade-dollar in China, quotations for silver bullion during the year, and reports from various mining sections of the country in reference to the present and probable future yield of the mines of precious metals, and for which I am under obligations to State and Territorial officials and others connected with the mining interests of their respective I have, however, for obvious reasons, omitted the names of individual mines and mining companies.

My acknowledgments are especially due to my assistants and clerks

for their faithful and efficient attention to their responsible duties.

I have the honor to be, very respectfully,

H. R. LINDERMAN. Director of the Mint.

Hon. John Sherman, Secretary of the Treasury.

APPENDIX.

- I. Deposits and purchases of bullion during the fiscal year.
- II. Coinage executed during the fiscal year.
- III. Bars manufactured during the fiscal year. IV. Deposits of gold and silver (including purchases of silver) of domestic production during the fiscal year.
 - V. Total deposits and purchases of domestic bullion from the organization of the Mint.
- VI. Total coinage from the organization of the Mint. VII. Coinage and medal dies manufactured at the Mint at Philadelphia during the fiscal year.
- VIII. Medals struck at the Mint at Philadelphia during the fiscal year.
 - IX. Medals and proof-sets sold during the fiscal year.
- X. Minor coins redeemed, reissued, and exchanged during the fiscal year.
 XI. Imports and exports of gold and silver coin and bullion during the fiscal year.
 XII. Weekly quotations for bar silver during the fiscal year.
 XIII. Coins of the United States, authority for coining, and changes in weight and
- fineness. XIV. The United States trade-dollar in China. XV. The Japanese trade-dollar.
- XVI. United States assay of Japanese "pyx" coins.
- XVII. Reduction in value of coins of Tunis.
- XVIII. Domestic bullion production.

Digitized for FRASER

XIII.—Coins of the United States, authority for coining, and changes in weight and fineness.

GOLD COINS.

Doublc-eagle.

Authorized to be coined, act of March 3, 1849. Weight, 516 grains; finéness, 900. Total amount coined to close of fiscal year ended June 30, 1878, \$931,001,780.

Eagle.

Weight, 270 grains; fineness, 9163.
Weight changed, act of June 28, 1834, to 258 grains.
Fineness changed, act of June 28, 1834, to 899.225.
Fineness changed, act of January 18, 1837, to 900.
Total amount coined to close of fiscal year ended June 30, 1878, \$56,862,710.

Half-eagle.

Authorized to be coined, act of April 2, 1792. Weight, 135 grains; fineness, 9163. Weight changed, act of June 28, 1834, to 129 grains. Fineness changed, act of June 28, 1834, to 899.225. Fineness changed, act of January 18, 1837, to 900.

Authorized to be coined, act of April 2, 1792.

Total amount coined to close of fiscal year ended June 30, 1878, \$70,101,495.

Quarter-eagle.

Authorized to be coined, act April 2, 1792.
Weight, 67.5 grains; fineness, 916\(^3_4\).
Weight changed, act of June 28, 1834, to 64.5 grains.
Fineness changed, act of June 28, 1834, to 899.225.
Fineness changed, act of Junuary 18, 1837, to 900.
Total amount coined to close of fiscal year ended June 30, 1878, \\$26,933,600.

Three-dollar piece.

Anthorized to be coined, act of February 21, 1853. Weight, 77.4 grains; fineness, 900. Total amount coined to close of fiscal year ended June 30, 1878, \$1,708,932.

One-dollar.

Authorized to be coined, act March 3, 1849. Weight, 25.8 grains; fineness, 900. Total amount coined to close of fiscal year ended June 30, 1878, \$19,346,158.

SILVER COINS.

Dollar.

Anthorized to be coined, act of April 2, 1792.
Weight, 416 grains; fineness, 892.4.
Weight changed, act of January 18, 1837, to 412½ grains.
Fineness changed, act of January 18, 1837, to 900.
Coinage discontinued, act of February 12, 1873.
Total amount coined, \$8,045,838.
Coinage reauthorized, act of February 28, 1878.
Amount coined to close of fiscal year ended June 30, 1878, \$8,573,500.

Trade-dollar.

Anthorized to be coined, act of February 12, 1873. Weight, 420 grains; fineness, 900. Total amount coined to close of fiscal year ended June 30, 1878, \$35,959,360.

Half-dollar.

Authorized to be coined, act of April 2, 1792.
Weight, 208 grains; fineness, 892.4.
Weight changed, act of January 18, 1837, to 206‡ grains.
Fineness changed, act of January 18, 1837, to 900.
Weight changed, act of February 21, 1853, to 192 grains.
Weight changed, act of February 12, 1873, to 12‡ grains, or 192.9 grains.
Total amount coined to close of fiscal year ended June 30, 1878, \$122,744,795.50.

Quarter-dollar.

Authorized to be coined, act of April 2, 1792.
Weight, 104 grains; fineness, 892.4.
Weight changed, act of January 18, 1837, to 103\(\) grains.
Fineness changed, act of January 18, 1837, to 900.
Weight changed, act of February 21, 1853, to 96 grains.
Weight changed, act of February 12, 1873, to 64 grains, or 96.45 grains.
Total amount coined to close of fiscal year ended June 30 1878, \$38,477,149.

Twenty-eent piece.

Authorized to be eoined, act of March 3, 1875. Weight, 5 grams, or 77.16 grains; fineness, 900. Coinage discontinued, act of May 2, 1878. Total amount coined, \$271,000.

Dime.

Authorized to be coined, act of April 2, 1792. Weight, 41.6 grains; fineness, 892.4. Weight changed, act of January 18, 1837, to 41½ grains.
Fineness changed, act of January 18, 1837, to 900.
Weight changed, act of February 21, 1853, to 38.4 grains.
Weight changed, act of February 12, 1873, to 2½ grams, or 38.58 grains.
Total amount coined to close of fiscal year ended June 30, 1878, \$16,902,677.30.

Half-dime.

Authorized to be coined, act of April 2, 1792. Weight, 20.8 grains; fineness, 892.4. Weight changed, act of January 18, 1837, to 205 grains. Fineness changed, act of January 18, 1837, to 900. Weight changed, act of February 21, 1853, to 19.2 grains. Coinage discontinued, act of February 12, 1873. Total amount coined, \$4,906,946.90.

Three-cent piece.

Authorized to be coined, act of March 3, 1851. Weight, 12\square\text{grains}; fineness, 750. Weight changed, act of March 3, 1853, to 11.52 grains. Fineness changed, act of March 3, 1853, to 900. Coinage discontinued, act of February 12, 1873. Total amount coined, \$1,281,850.20.

MINOR COINS.

Five-cent (nickel).

Authorized to be coined, act of May 16, 1866. Weight, 77.16 grains, composed of 75 per cent. copper and 25 per cent. nickel. Total amount coined to close of fiscal year ended June 30, 1878, \$5,773,170.

Three-cent (nickel).

Authorized to be coined, act of March 3, 1865. Weight, 30 grains, composed of 75 per cent. copper and 25 per cent. nickel. Total amount coined to close of fiscal year ended June 30, 1878, \$855,138.

Two-cent (bronze).

Authorized to be coined, act of April 22, 1864. Weight, 96 grains, composed of 95 per cent. copper and 5 per cent. tin and zinc. Coinage discontinued, act of February 12, 1873. Total amount coined, \$912,020.

Cent (copper).

Authorized to be coined, act of April 2, 1792.

Weight, 264 grains.

Weight changed, act of January 14, 1793, to 208 grains. Weight changed by proclamation of the President January 26, 1796, in conformity with act of March 3, 1795, to 168 grains.

Coinage discontinued, act of February 21, 1857. Total amount coined, \$1,562,887.44.

Cont (nickel).

Authorized to be coined, act of February 21, 1857. Weight, 72 grains, composed of 88 per cent. copper and 12 per cent. nickel. Coinage discontinued, act of April 22, 1864. Total amount coined, \$2,007,720.

Cent (bronze).

Coinage authorized, act of April 22, 1864. Weight, 48 grains, composed of 95 per cent. copper and 5 per cent. tin and zinc. Total amount coined to close of fiscal year ended June 30, 1878, \$1,764,546. Half-cent (copper).

Authorized to be coined, act of April 2, 1792.

Weight, 132 grains.

Weight changed, act of January 14, 1793, to 104 grains.

Weight changed by proclamation of the President, January 26, 1796, in conformity with act of March 3, 1795, to 84 grains.

Coinage discontinued, act of February 21, 1857. Total amount coined, \$39,926.10.

XIV.—THE UNITED STATES TRADE-DOLLAR IN CHINA.

No. 398.]

UNITED STATES LEGATION, Peking, February 7, 1878.

SIR: In view of the decision of the Chinese Government to take no steps for the establishment of a mint and a currency, I have thought the moment opportune to inquire of our consuls whether the trade-dollar is coming into circulation, and whether any official action may be taken which will increase the demand for it. I inclose the

form of a 1—388 letter, which I am addressing to them.

You will notice that in my 2—398 letter to the officer at Canton, I point out the fact that an official assay of the coin mentioned, made at his port in 1873, did not produce

a correct result, and ask whether it is desirable to request another assay.

The Canton assays are accepted by the customs at other ports, and the matter seems important under these circumstances. In point of fact, however, foreign coins are not imported for use at their bullion value, but to be put into circulation at the higher value which their convenience for circulating purposes creates. I have understood that the trade-dollar sometimes commands two or three per cent. premium at Canton, but it has not come into circulation, so far as I have heard, elsewhere.

At Shanghai, in 1876, the singular spectacle was seen of Mexican dollars ranging in

value in the local currency from 72.6 per cent. of the tael to 82.5 per cent., a fluctuation of 10 per cent. between silver in the form of dollars and silver as bullion. A more pertinent commentary on the fact that the Chinese would appreciate a coinage system could not well be offered.

I have the honor to be, sir, your obedient servant,

GEORGE F. SEWARD.

Hon. WILLIAM M. EVARTS, Secretary of State.

[Dispatch No. 398, inclosure 1.]

Mr. Seward to Mr. Stahel.

No. 107.]

FEBRUARY 5, 1878.

SIR: Please be so good as to inform me whether the trade-dollar has come into circulation at your port; if so, to what extent, and whether official action may be taken which will be likely to create or increase demand for it.

I am, &c.,

GEORGE F. SEWARD.

Same sent mutatis mutandis to consuls at Amoy, Foo-Chow, Ningpo, Chin Kiang, Hankow, New Chwang, and Tien-Tsin.

[Dispatch No. 398, inclosure 2.]

Mr. Seward to Mr. Lincoln.

No. 31.]

FEBRUARY 5, 1878.

Sir: By an assay, made at your port in 1873, the trade-dollar was declared to be 896.1 fine, and 111.9 taels weight of them to be equal in value to 100 taels Haikwan (or pure) sycee.

In point of fact, however, the trade-dollar is 900 fine, and 111.11 taels weight of them should be equal to 100 taels Haikwan sycee. By the same assay 100 trade-dollars were found to weigh 72 taels 6 m. 8 c. The Haikwan tael is declared to weigh, however, 1 oz. 4 dwt. 3.84 grains, or, say 579.84 grains. The trade-dollar weighs 420 grains, and its weight by the Haikwan standard should be 72-4-3-2 taels.

Please be so good as to inform me whether, looking to the facts recited above and

to the course of exchange and any other considerations which may be involved, it is worth while for us, in your opinion, to ask for another assay of the trade-dollar. Please advise me also whether any official action may be taken, which, in your opinion, will tend to increase the demand for trade-dollars in this country.

I am, &c.,

GEORGE F. SEWARD.

No. 19.]

LEGATION OF THE UNITED STATES,

Peking, July 1, 1878.
SIR: Recurring to Mr. Seward's dispatch, No. 398, of February 7 last, inclosing a copy of a circular-letter addressed to our consuls at the several ports, inquiring whether the trade-dollar is coming into circulation, and whether any official action may be taken which will increase the demand for it, I now have the honor to hand to you copies of the several replies which have been received.

From these you will see that the coin in question has obtained no circulation in China, except at Amoy, Canton, Foo-Chow, Swatow, and the Formosa ports. At these places it seems to be preferred by the natives to the Mexican, and to command a small

The burden of opinion would appear to be that no official effort to extend its circulation is advisable, unless it can be made a legal tender for the payment of customs dues at a fixed rate.

I desire to request your special attention to the remarks contained in the dispatches from the consuls at Amoy, Foochow, and Ningpo as to the desirability of preventing, if possible, the "chopping" or mutilation of the trade-dollar.

This practice, which had its origin in a rule made by mercantile houses in the south of China, requiring each firm to guarantee the geuuineness of dollars paid out by affixing to each coin its "chop" or Chinese firm name, and which was done by stamping with a die upon the surface of the coin, has grown into such an abuse that current dollars are defaced beyond all possibility of recognition, and not infrequently coins are found in circulation through which holes have been punched.

In some cases indeed there is good reason to believe that the die has been displaced by a gouge, and a small portion of the metal has thus been abstracted from the coin.

In this connection I inclose a copy of a memorial upon this subject presented to the governor of Hong-Kong in June, 1877, by the leading bankers and merchants of that colony, in which the evils of the "chopping" system are set forth.

It is evident that the mutilation and defacement of any coin tends largely to limit and interfere with its circulation. Whether it is wise to undertake negotiations with this government at the present time, looking to a suppression of this practice in China so far as it affects United States coins, is a question for the department to decide.

I desire, however, to point out that steps in that direction, if entered upon at all,

should be undertaken simultaneously in Peking and London, as the practice referred to is not more common in this country than in Hong-Kong, which, as you are aware, is a British colony.

I have the honor to be, sir, your obedient servant,

CHESTER HOLCOMBE.

Hon. WILLIAM M. EVARTS, Secretary of State.

[Dispatch No. 19, inclosure 1.]

Mr. Henderson to Mr. Seward.

No. 77. 7

AMOY, May 2, 1878.

SIR: I now have the honor to submit the following in reply to the inquiries made in your dispatch No. 46. The American trade-dollar is and has been for more than two years past in use at the ports in this consular district, though not so extensively as the Mexican. At present it commands a premium to buyers of one and a half cents as the Mexican. At present it commands a premium to ouyers of one and a half cents at the cash shops in Amoy, and payers everywhere have a decided preference for it. One thousand trade-dollars are 1-23-6 too heavy, or over the weight of 72 Amoy currency. But for the universal and unrestricted tendency of people who have payments to make to procure and use the worst dollars that will pass, they might, for aught I can see, become the exclusive currency. They are better than the Japanese trade-dollars, and neither the tael nor "dollar Spanish" has any existence in reality. Any official action that would restrict or prevent the circulation of debased or muti-ated coins, or those of lesser weight and value, would necessarily promote the use of the trade-dollar. Any measure of this kind would, however, encounter the opposition of the schroffs, money-brokers, and compradores, as well as those concerned for the moneys of other countries affected by it.

If the Chinese Government could be induced to make it the only legal-tender for customs-duties, much would be gained for it, but this could not be easily accomplished, and might not be desirable. I have for a year past required all official fees at the consulate to be paid in clean trade-dollars, but the amount collected has been small, and no favorable influence of the plan can be perceived.

I am, &c.,

J. A. HENDERSON, Consul.

Mr. Lincoln to Mr. Seward.

No 9. 1

Canton, March 9, 1878.

SIR: I had the honor to receive your dispatch, No. 31, of February 5, 1878, regarding the weight and circulation of the United States trade-dollar, on the 4th instant.

Inasmuch as this coin is taken here at its actual fineness (900), I do not think it would be advantageous to have another assay.

Some months since the German consul wrote me on the subject of assaying the coins

in circulation here, as per copy of his letter marked Inclosure No. 1. After due consideration and consultation with my colleagues, I wrote him as per

Inclosure No. 2.

Regarding its circulation, I wrote the department some time since, as per Inclosure

No. 3. I am convinced that the trade-dollar is gradually increasing in circulation; that it is better liked than the Mexicans. I find that in cases where money is hoarded up or laid by, by the natives, the trade-dollar is invariably selected. Believing inclosures Nos. 2 and 3 give my views fully on the subject,

I have the honor to be, sir, your obedient servant,

C. P. LINCOLN, Consul.

[Inclosure No. 1.]

GERMAN CONSULATE Canton, June 22, 1877.

DEAR SIR AND COLLEAGUE: According to article 22 of the treaty between Germany and China, payments due to the Chinese customs may be made in bars or in foreign coin whose relative value to the Chinese sycee silver shall be fixed by special agreement, according to circumstances, between the consular officers and the superintendent of customs.

The provisions of the article of this treaty have as yet not been carried out at Canton, inasmuch as the above-mentioned agreement between the German consul and the

superintendent of customs there has never been entered into.

I have therefore lately been instructed to cause the relative value of the coins current at the Chinese customs to the Chinese sycee silver to be fixed in the manner provided by the article in question.

The motive for the instruction is the following:
As regards the value of the Mexican dollar. The result of 52 assays lately made at the Japanese imperial mint at Osaka was that the fineness of Haikwan silver varies between 984.5 and 986.5, and that by far the greater number of pieces examined showed a fineness of 985.5, containing besides from .002 to .002,2 of gold.

The loss incurred by melting 54,018.34 ounces was 83.03 ounces.

According to American assays, weight and fineness of the Mexican dollar are: the old Mexican dollar, 415.68 grains troy and 901 fineness; the new Mexican dollar (bal-

ance dollar), 415.68 grains troy and 902.5 fineness.

By an assay made on the 23d December, 1873, by Her Britannic Majesty's consulate and the Chinese authorities at Canton, the value of 100 old Mexican dollars was fixed at 63.9 Haikwan taels, and that of the new dollar at 64.8 Haikwan taels—that is to say, 100 Haikwan taels are 154.32 new and 156.49 old Mexican dollars.

This unfavorable proportion can only be traced to the fact that the loss sustained by melting, &c., of the dollars was more considerable than what it would have been in the event of a careful and conscientious manipulation.

The weight of 100 dollars being 72.67 Haikwan taels, and assuming the fineness of the tael to be 1,000 and that of the dollar 900, which is too favorable for the former and too unfavorable for the latter, \$152.90 would have to be paid for 100 Haikwan

It hence follows, since Mexican dollars are of an actual fineness of, respectively, 901 and 902.5, instead of 900, and the average fineness of Haikwan taels not being 1,000, but only 985.5, that for every 100 Haikwan taels \$4.96 are paid in excess of their value in new and \$5.98 in old Mexican dollars.

DIRECTOR OF THE MINT.

All consuls of the treaty powers having a right, and, in view of the above facts, sufficient cause, to desire the relative values of the current coins regulated upon a sound basis, I embrace the opportunity, dear sir and colleague, to inform you of my intention of engaging the Chinese authorities to subject the different coins to a fresh assay.

As this is a matter of common interest to all foreigners, I beg to inquire if you will

act conjointly with me and our other colleagues, to whom I have addressed a similar letter. It will be a matter for future consideration in what manner the new assay has to be carried out in order to be just and reliable.

Requesting the favor of an early reply,

I have, &c.,

SODEN.

CHARLES P. LINCOLN, Esq., United States Consul, Canton.

[Inclosure No. 2.]

No. 322.]

UNITED STATES CONSULATE AT CANTON, July 5, 1877.

SIR: I have had the honor to receive your dispatch regarding a reassay of the current coins at this port.

I am fully convinced that such an assay would not prove beneficial to those whom I

know it is your desire, as well as my own, to serve.

The assays heretofore made at this port of the American trade and Mexican dollar do not agree with the assays made in the United States of the same coins, these coins being declared here a little less fine than their true value, though I understand they are taken for customs duty and by all bankers and merchants at 900 fineness.

While it would be desirable to know the exact value of a Haikwan tael, I fear it is a thing not so easily ascertained, as I learn that by some strange arithmetical calculation, known only to those familiar with its working, the value of the Haikwan varies as much as the rates of exchange upon Europe or America.

I am, &c.,

C. P. LINCOLN, United States Consul,

Baron von Soden, H. I. German Consul, Canton.

Mr. Colby to Mr. Seward.

No. 69.]

CHINKIANG, March 12, 1878.

Sin: In response to the inquiry made in your No. 27, in regard to trade-dollars, I beg to say that there are none in circulation at this port, and, from the best information I can gather on the subject, any effort to introduce them commercially would be attended with a considerable loss to the introducer, as they would not be received except at a discount of at least five per cent. as compared with the Mexican dollar, now in universal use hére.

I am, sir, your obedient servant,

J. C. S. COLBY,

Consul.

M. M. De Lano to Mr. Seward.

FOOCHOW, March 4, 1878.

Sir: I have to acknowledge the receipt of your dispatch No. 52, making inquiries about the circulation of the American trade-dollar at this port.

In reply I have to say that the annual import of the dollar, say for three years past, has been from ten to twenty lakhs. It is eagerly sought for by the Chinese, when not mutilated, and when brought up from Hong-Kong without having been subjected to the process of "chopping" it is taken in preference to the Mexican dollar.

Upon first appearance of the trade-dollar here, there was an effort made to place it at a discount of two per cent. as compared with the Mexican, but at my instance the Chinese authorities were induced to order it to be taken for customs duties at the same into the taken for customs duties at the same

rate as the Mexican, also to issue public proclamations commending it to the people and forbidding its mutilation. This action had the effect to bring it into notice, and it is still looked upon by the natives with much favor.

I know of no official action which would tend to increase its circulation here unless means could be taken to prohibit the chopping of it in Hong-Kong and Canton.

I am of the opinion that if official action could be taken to place it at par with the Mexican dollar at Shanghai, its circulation in China would thereby be increased fourfold.

I have the honor to be, sir, your obedient servant,

M. M. DE LANO, Consul.

Mr. Shepard to Mr. Seward.

No: 18.]

HANKOW, March 8, 1878.

Sir: I have the honor to acknowledge your several dispatches, numbers 41, 42, and 43.

Referring to the first, I have to report, from inquiries of merchants and the bank, I cannot learn that an American trade-dollar was ever seen in Hankow. The Chinese are very notional about "dollars," and while the "sun-dollar" is taken without question, the "scale-dollar" is at a heavy discount. As you know, both are Mexicans, and even the manager of the Hong-Kong Bank tells me he does not know any real difference in their value.

Intelligent compradores assert, that if the trade-dollar were introduced, the Mandarins "would order it boiled, chop, chop"; i. e., condemn it to be smelted. I have no doubt such would be the case, and I can, therefore, recommend no official action to create or increase a demand for it at this particular point.

Its recognition as the standard at banking institutions, and by native officials, would doubtless pave the way for unquestioned circulation. I see no way to this result otherwise, except by the very slow process of a gradual familiarity with the coin, extending from the great ports of Shanghai and Hong-Kong.

I am, sir, your obedient servant,

ISAAC F. SHEPARD, Consul.

Mr. Baudinel to Mr. Seward.

No. 14, 482.7

NEW CHWANG, February 27, 1878.

SIR: In reply to your excellency's dispatch, No. 36, of the 5th instant, I have the honor to state, the trade-dollar has come into circulation at this port, but only to a very limited extent; it is sold at a premium as a curiosity to dealers from the interior, but can only be passed at a discount in general business. Official intervention would, I think, be undesirable as tending to prejudice the Chinese commercial mind against anything thus recommended, unless, indeed, it would be proper to insist on the foreign customs taking them (and Mexican dollars) in payment of duties, tonnage dues, &c. At present they only accept dollars as matter of favor, not of right, and then at a discount on the market rate.

Dollars, with the above exception, are seldom used here, except for ships' disbursements and at the foreign stores; the native currency of the port and district being

sycee (small and in shoes) copper cash and tiao notes. I have the honor to be, sir, your obedient servant,

FREDK. BAUDINEL, Vice-Consul.

Mr. Lord to Mr. Seward.

No. 88.7

NINGPO, February 23, 1878.

SIR: In reply to your inquiries relating to the introduction of the trade-dollar at this port, I have to say that it has not been introduced here to any extent whatever.

It would have been a great blessing if it could have been introduced, for we are suffering very grievous evils for the want of it or something like it.

The Mexican dollar, the only coin (Chinese cash excepted) now current here, is so uncertain in its value and so liable to be counterfeited that there is for us no end of trouble, and this trouble has greatly increased of late. There have been several attempts made here to coin this dollar by natives, and the work produced was so well executed that only schroffs or experienced money-changers could detect them. The value of some of them was also quite fair, being only short some four or five per cent.

I think the trade-dollar or any other invariably good and well-executed one would find great difficulty in coming into use here without official action. Bankers and schroffs control the currency here, and it is for their interest to have this as defective and difficult as possible so as to gain from those who are ignorant. For this reason the

bright or newly coined Mexican dollar is usually at a discount here.

I am inclined to think that if an arrangement could be made with the customs authorities to take the trade-dollar in payment of dues, and at a fair rate of exchange, it might be brought into use, and if in addition it could be made a penal offense for the Chinese to melt, deface, or counterfeit it, I think there would soon be a large demand for it.

The practical currency now of this port is the dollar. The tael is becoming more and more nominal, and the old method of keeping accounts and prices in cash is fast

changing into dollars and cents.

I have the honor to be, sir, your obedient servant,

EDWARD C. LORD. United States Consul.

Mr. Stahel to Mr. Seward.

Shanghai, April 3, 1878.

SIR: Referring to your dispatch No. 107, I have now the honor to inclose copy of a letter just received from the vice-chairman of the Shanghai Chamber of Commerce, to which body I applied for information on the subject, being myself so little acquainted with matters in China.

I have, &c.,

J. STAHEL, Vice-Consul-General.

. Chamber of Commerce to Mr. Stahel.

Shanghai, *March* 30, 1878.

Your letter of 21st February on the subject of the introduction of the trade-dollar was briefly acknowledged on the 23d of the same month, and the committee has since gathered information which shows that there is no present prospect of inducing the natives to accept the coin or of influencing official action on the part of the Chinese authorities to facilitate its recognition as a legal tender.

The dollar has been imported in small quantities and has failed to make its way, having always been refused at its full value, while application to the Taoutai for assistance in introducing it has led to no result beyond a declaration of the inability of the officials to move in the matter, as the currency of this port for trade purposes is

Those parcels of trade-dollars which have been received have therefore been reshipped. to the south, where the coin is easier of exchange.

I have, &c.,

F. B. FORBES, Vice-Chairman.

Mr. Denny to Mr. Seward.

No. 8.7

TIEN-TSIN, February 14, 1878.

SIR: In reply to your dispatch of the 5th instant, I have the honor to say that the American trade-dollar is not known as a circulating medium at this port. As you are aware, nothing will be received in payment of obligations in the interior but sycee silver or copper cash, and the same rule is also observed at this port in most all transactions. For this reason the larger proportion of Mexican dollars shipped to this port are converted into sycee, leaving very few in circulation.

The trade-dollar being of equal fineness with the Mexican, and a trifle heavier in weight (its weight being 420 grains troy), and also more accurately and uniformly milled, there would be sufficient inducement for the Chinese to use it in preference to the Mexican if coined money circulated here as it does in western countries by its nominal value rather than by weight or intrinsic value; but under the prevailing custom of circulating by weight alone, I do not see that any official action can be taken that would be of practical use to create or increase demand for our trade-dollars to any considerable extent in this part of the country. Greater familiarity with the new dollar will perhaps overcome the present strong prejudice of the natives in favor of the Mexican, but its circulation as a dollar would even then be limited, as the clean Mexican now is, to small transactions with foreigners.

I am, &c.,

O. N. DENNY, Consul.

XV.—THE JAPANESE TRADE-DOLLAR.

United States Legation, Japan. Tokei, June 6, 1878.

SIR: This government on the 27th ultimo issued additional coinage regulations, declaring that the silver trade-dollar of 420 grains, authorized by the regulations of 1878, shall hereafter be free to circulate generally, and shall be used in paying taxes and in all business transactions, public and private, and shall also be legal tender to any amount. I have the honor to inclose herewith translations of the several notifications on the subject as issued by his excellency Sanjo Saneyoshi, His Imperial Majesty's prime minister.

I note and inclose herewith an article on this subject which appeared with the notifications in the Japanese Times of the 1st inst., in which, among other things, the English editor predicts that the British dollar will push out of China at least the Mexican dollar and the Japanese yen. This is the same editor who issued the article transmitted with my No. 766, in which he claimed that the treaty powers were entitled to demand of Japan guarantees when restoring "her imperial right of coinage" by treaty revision. It seems that Japan paid no heed to the editor's proclamation of last March that "the Japanese trade-dollar must be abolished," and has ordered this extended coinage without waiting for "the restoration of her imperial right of coinage" by coinage without waiting for "the restoration of her imperial right of coinage" by treaty revision and the favor of the treaty powers, as, in my opinion, she had the right to do.

I have the honor to be, sir, your obedient servant,

JNO. A. BINGHAM.

Hon. WILLIAM M. EVARTS. Secretary of State, Washington, D. C.

THE FINANCE NOTIFICATIONS.

The following important negotiations respecting the trade-dollar and revising certain of the coinage regulations were issued in Tôkiô on the 27th instant:

[Notification No. 12, by the prime minister.]

It is hereby notified that the silver trade-dollars which have hitherto been coined for the convenience of trade in all the open ports, but which have hitherto only been circulated within the limits of those ports, shall hereafter be free to circulate generally, and may therefore be used in paying taxes and in all business transactions; either public or private.

SANJO SANEYOSHI,

Prime Minister.

[Notification No. 13, by the prime minister.]

It is hereby notified that silver trade-dollars having, by Notification No. 12, been authorized to circulate generally, the coinage regulations notified in Notification No. 108, the 6th month of the 8th year of Meiji (June, 1878), have been revised as under. The limit of circulation of the coin is enlarged; the charges for coining and the limit of bullion received for coinage are decreased; and the period shortened between receipt of the bullion and delivery of the coin. That is to say, in the coinage regulations the undermentioned changes are made: In the 5th clause of Notification 108, in the note to Article 4 of the coinage rules, and in Articles 9, 11, and 13 of the same.

SANJO SANEYOSHI, Prime Minister.

[Revisions mentioned above.]

Fifth clause of the limit of circulation of coin revised thus:

"These trade-dellars may be used in paying the customs-duties and any other taxes paid by foreigners and in all business transactions between Japanese and foreigners; also in payment of all taxes in the interior, and in all other payments, public or

also in payment of all taxes in the interior, and in all other payments, public or private, the same shall be legal-tender to any amount.

"In note to Article 4 of the coinage regulations (respecting the fixed amount of silver bullion receivable by the mint for coinage), for 'silver bullion will be received in quantities of 1,000 ounces' read 'in quantities of 500 ounces'; in Article 9 of the same (respecting the period to clapse between receipt of bullion and delivery of coin), for 'twentieth day' read 'tenth day'. In Article 11 of the same (respecting the charge for coinage), for '1½ (one and a half) per cent.' read '1 (one) per cent.!' in Article 13 of the same (respecting the charge for recoining), for '10 (ten) per thousand' read '5 (five) per thousand.'

[Extract from the Japan Times, June 1 1878]

[Extract from the Japan Times, June 1, 1878.]

We should hail these notifications with pleasure, as steps toward the point at which we are anxious to see Japan arrive—that of issue of coin for the China trade as well as for her own-were the changes made in favor of the Japanese silver yen of the same weight and fineness as the Mexican dollar. But as an attempt to bring into circula-

tion as coin the stamped ingots of silver which are called trade-dollars, of 420 grains weight, we regret their publication. Our hope is as far as ever from fulfillment, and the expectations of the authors of the notifications will not be attained. The tradedollars will continue to pass out of one set of melting-pots only to go into another; foreign bullion will not be attracted to the Japanese mint; the opportunity now offering in China for a successful attack upon the Mexican dollar will be allowed to slip past unseized; the Mexican dollar and the tyranny of the schroff will remain excrescences from our trade, or Hong Kong will establish a mint of her own, and then not only will all hope of a profitable coinage business for Japan in the China trade be lost, but the British dollar will push out the Mexican and push out the Japanese yen too.

All the profit hereafter to be made from subsidiary coinage for use in China will also in that case, go to the Hong Kong establishment instead of to that at Osaka, and whatever bullion Japan may coin into trade-dollars for her own use will continue to be drained out of the country as fast as they are produced, and quietly sold back to

her as bar-silver to coin over again.

Another outlet for them, which has evidently escaped the finance minister's observation, has just been provided, in addition to those previously existing, by recent legislation in America. Is there no one in the financial bureau of this country who can point out to his chief that it will pay foreign bankers to send Japanese trade-dollars to the United States mints to be coined into the new silver currency just legalized

It will be remarked, also, that in three notifications no mention is made of gold coin. As the law stands at present gold is a legal tender to any amount, and now the silver trade-dollar is given equal currency. The finance minister appears bent on committing as many mistakes as he can. He oppresses his country with the evils of bi-metal-lism at the same time that he orders the mintage of the wrong description of silver

As matters of practice and fact and of interest to the foreign trade, of course these notifications are valueless, because trade will be carried on as before, with the Mexican dollar and the paper currency as the media of exchange. Foreigners will certainly not send in bullion to be coined into trade-dollars, and what little bullion government has to coin, gold or silver, will be drained away as before by the Mexicans.

It is vexatious to friends of the country and well-wishers of her government to see an opportunity like this lost, and a wrong course taken, in direct opposition to the advice of experts, to the teaching of experience, and to common sense. But we abandon the subject in despair, and the only questions relative to it which retain for us a spark of interest are: Who are the finance minister's advisers? By what arguments have they induced him to the step he has taken, and how will he justify it to his colleagues in the government when his failure is apparent? More than ever, perhaps, are now felt the deficiencies of the native press. We find in it as yet neither attack nor defense of the notifications; the subject appears to be beyond the grasp of native journalists. And regrettable, too, is the unwisdom which killed in its birth what might have grown into a most useful means of education—a combined native and alien journalism. Did newspapers now exist conducted by foreign and native editors in partnership, this most important question of the currency might have been fully argued out on both sides and in both languages. The finance minister then, with all the arguments before him in clear light, could hardly have failed to arrive at a right decision. It would not have been that which we have now to condemn.

XVI.—UNITED STATES ASSAY OF JAPANESE "PYX" COINS OF THE COIN-AGE OF THE MINT AT OSAKA FOR THE FISCAL YEAR ENDED JUNE 30, 1878.

> LEGATION OF JAPAN, Washington, 14th 9th month, Eleventh year, Meiji.

SIR: I have the honor to transmit herewith, from the mint of Osaka, fourteen packets of samples of money coined and assayed at that mint during the year ending June, 1878. As on several previous occasions with other specimens, my government would be glad to have these samples assayed at the mint of the United States; and I have only to repeat that I will cheerfully pay any expenses which may be incurred by this additional request

With this letter I also send you a copy of another, written by Mr. W. Gowland, of the imperial mint, which will enable the assayer of the United States to make com-

parisons.

Accept, sir, the renewed assurances of my high consideration.

YOSHIDA KIYONARI.

Hon. WILLIAM M. EVARTS, Secretary of State. THE IMPERIAL MINT, ASSAY DEPARTMENT June 25, 1878.

SIR: Four five-yen and four trade-dollar coins, selected by Mr. Yokura this morning from the pyx coins which represent the coinage of the mint for the financial year 1877-1878, have been individually assayed by me.

The remainder of the five-yen coins, 67 in number, have been melted and cast into a

bar, and a cutting has been taken from this bar and assayed.

The remainder of the trade-dollar coins, 84 in number, the whole of the 57 coins in the pyx, 92 in number, and 1,000 each of the twenty, ten, and five sen have been melted and "dip assay pieces" taken from the molten metal, and these dips assayed.

 Gold five-yen coin, No. 1, October 4, 1877
 900.0

 Gold five-yen coin, No. 2, November 26, 1877
 900.3

 Gold five-yen coin, No. 3, February 22, 1878
 900.1

 Gold five-yen coin, No. 4, March 18, 1878
 900.2

 Gold five-yen coin cutting from bar
 899.9

 Silver trade-dollar coin, No. 1, August 25, 1877
 901.2

 Silver trade-dollar coin, No. 2, November 5, 1877
 900.8

 Silver trade-dollar coin, No. 3, March 13, 1878
 899.8

 Silver trade-dollar coin, No. 4, June 15, 1878
 901.0

 Silver trade-dollar coin, coin, cutting from dip
 900.5

 Subsidiary silver:

 Fifty-sen, cutting from dip
 799.6

 Twenty-sen, cutting from dip
 800.6

 Ten-sen, cutting from dip
 800.1

 Five-sen, cutting from dip
 799.0

Each coin dip and cutting was divided into four parts, and one part was assayed by me and the other three parts were separately sealed up in your presence and delivered to you.

In every case the coins are within the limits of the legal remedy as to fineness.

I have the honor to be, sir, your obedient servant,

W. GOWLAND, F. C. S. Associate of the Royal School of Mines.

The COMMISSIONER.

MINT OF THE UNITED STATES, Philadelphia, September 27, 1878.

SIR: Herewith I offer my report of assays of fourteen samples from the Japanese mint, forwarded to you, with documents by the Director of the United States Mint. The samples represent the gold and silver coinage of the mint of Osaka "during the year ending June, 1878."

Our results agree very well with those given by Mr. Gowland, of the assay department of that mint. I will make a remark upon the subsidiary silver, that the "cuttings from dips" cannot be so uniform as granulations made by casting the dips into

water, which prevents segregation. I therefore give the averages:

	Japanese assay.	United States assay.
Five yen coin GOLD. Do Do Do Do To To To To To To To To To To To To To	900. 3 900. 1 900. 2	900. 900. 900. 900. 900.
Trade-dollar. Do Do Do Do Do	900, 8 899, 8 901, 0	901. 900. 900. 900. 900.
SUBSIDIARY. Fifty sen, cutting from dip. Twenty sen, cutting from dip. Ten sen, cutting from dip. Five sen, cutting from dip.	800. 6 800. 1	800. 800. 800. 800.

Very respectfully,

Hon. JAMES POLLOCK, Superintendent. WM. E. DU BOIS, Assayer.

XVII.-REDUCTION IN VALUE OF COINS OF TUNIS.

CONSULATE OF THE UNITED STATES, Tunis, June 5, 1878.

Sir: In consequence of a considerable quantity of 4-piaster silver pieces having been smuggled into the country, the Bey has sent a circular to the consuls, informing them that he had decided to reduce the nominal values of the 10 and 5 piasters, gold, and the 4, 3, 2, and 1 piaster silver pieces in the proportions mentioned in his communication, a translation of which is inclosed, as well as two printed documents in French on the same subject.

This arbitrary decision has thrown the internal trade of the country into confusion, and the people, particularly the Arabs of the interior, who hold large sums in silver, are in dismay at a measure which at once reduces its value by about one-fifth; for it is unnecessary to say that the offer of the government to pay in promissory notes the difference between the nominal value of the coin and its intrinsic value as fixed by the

circular is quite illusory.

It is to be remarked that the coin introduced from abroad is of the same fineness as that struck at the mint, and there is no pretense that any other coin than the 4-piaster

silver piece has been smuggled into the country.

In 1572 the Bey reduced the fineness of the silver coinage by about 20 per cent., and that of the gold 10 and 5 piaster pieces by 2½ and 4 per cent. respectively. He issued at the same time a decree, which, after stating that he had been obliged to resort to this measure to prevent the exportation of the subsidiary coinage, limited payments in silver to the sum of 10 piasters. A large quantity of this coin was struck, and the government, disregarding its own decree, at once proceeded to pay its employes and its creditors in general with this depreciated currency. About the same time a lot of spurious gold 10-piaster pieces were brought from Europe and circulated among the Arabs, who, when they discovered the fraud, refused to accept gold of any denomination in payment for their produce, but required to be paid entirely in silver.

In this manner a vast quantity of the depreciated silver coin is in their hands. The financial commission has also added to the trouble by a bit of sharp practice which has not elevated it in the estimation of the public. They had on hand a considerable sum in silver which they had received for taxes, &c. Before recommending to the Bey the adoption of the late measure they gradually changed their silver for gold of a larger denomination than 10 piasters, at a small discount (about one-quarter of one per cent.), and having emptied their coffers they induced the Bey to send the circular. Silver fell at once 20 per cent, and the price of all articles of daily consumption rose

Silver fell at once 20 per cent. and the price of all articles of daily consumption rose from 25 to 50 per cent. Many shops were closed and for some days the greatest excitement and confusion prevailed. It is stated that about 4,000,000 of piasters in 4-piaster pieces have been imported. The impunity with which this has been done, although the parties are well known, gives rise to the belief that persons in high station near the Bey have had a hand in the fraud.

I am, sir, very respectfully, your obedient servant,

G. H. HEAP, United States Consul.

Hon. WILLIAM HUNTER,

Second Assistant Secretary of State, Washington, D. C.

[Translation.]

Circular from the Bey modifying the value of certain denominations of coin.

Praise to God.

The gold piece of ten piasters shall hereafter be worth nine and three-quarters piasters.

The gold piece of five piasters shall hereafter be worth four and thirteen-sixteenths piasters.

The silver piece of four piasters shall hereafter be worth three and one-quarter piasters.

The silver piece of three piasters shall hereafter pass current for two and seven-

sixteenths piasters.

The silver piece of two piasters shall hereafter be worth one piaster and ten-six-

teenths.

The silver piece of one piaster shall be worth thirteen-sixteeuths of a piaster.

Federal Reserve Bank of St. Louis

From the servant of God, &c., the Musclier Pasha Bey of Tunis, to the illustrious, &c., G. C. Heap, consul-general of the United States of America at Tunis, &c.

It has come to our knowledge that a considerable sum in silver coin of the denomination of four piasters has been imported into our capital.

This importation by its extraordinary quantity has caused the exportation of the gold coinage and a fall in the agio of that of silver.

Under these circumstances we have deemed it advisable for the public good to

modify the gold and silver coinage in the manner following:

The gold piece of one hundred piasters shall be the standard coin of this country.

It does not change in value, and the same may be said in regard to the fifty and twenty-five piaster pieces.

All other gold and silver coins shall be subjected to the modifications indicated above. In this manner transactions will be equal, whether they be in silver or in gold.

The piece of one-half piaster and the copper coinage shall continue to have the same value as heretofore, only no one shall be obliged to accept payment of more than two piasters in coin of these denominations in accordance with our decree of 12th of Sofat,

Whoever shall have sums of money of the above-mentioned denominations are required to bring or send them to the mint within a delay of thirty days from the date of these presents, in order to have them struck with a die which shall indicate their modified value, after which they shall be returned to the depositor. As to the difference which shall result from this modification, the depositor will be given a document in which it will be stated, and he will be reimbursed the amount in four equal payments at intervals of six months each.

The first payment shall be made in six months from the date of the document.

Whoever shall not present himself within the time above stated shall forfeit his claim to an indemnity, but the coin not stamped at the mint shall have currency at the rates above mentioned.

We communicate these presents to you that you may bring them to the knowledge of the persons under your jurisdiction.

(Countersigned) MOHAMMED,

First Minister.

Written the 28th of Junad-el arrel 1295 (30th May, 1878).

XVIII.—DOMESTIC BULLION PRODUCTION.

STATE OF CALIFORNIA, EXECUTIVE DEPARTMENT, Sacramento, Cal., July 27, 1878.

Sir: In response to your inquiry about the gold and silver product of this State, I have the honor to state that we have no means, as State officers, of determining the amount. Wells, Fargo & Co. do all the carrying of bullion in this State. I wrote to the agent in respect thereto, and received from him the inclosed letter, from which you will see that the product for the year ending June 30, 1878, was \$17,634,068. Respectfully,

E. W. MASLIN,

Private Secretary to the Governor.

Hon. H. R. LINDERMAN,

Director United States Mint.

Wells, Fargo & Co., San Francisco, July 19, 1878.

Sir: The following is the amount of the product of gold and silver for this State from July 1, 1877, to June 30, 1878, as appears from the records in our auditor's department:

Gold-dust and bullion..... Silver and base bullion 2, 373, 389

17,634,068

Yours, truly,

J. J. VALENTINE, General Superintendent.

Mr. E. W. Maslin, Private Secretary to the Governor, Sacramento, Cal.

MINT OF THE UNITED STATES, Carson, Nev., August 28, 1878.

SIR: Agreeable to request expressed in your letter under date of 9th ultimo, I hereith transmit the Nevada State comptroller's report, showing the bullion product of this tate during the fiscal year ending June 30, 1878.

In your letter of above date, you express a desire to have a report of the total gold

nd silver product of Nevada, and state that you do not understand the comptroller's eport to include the value of base bars and concentrated ores shipped east. Respecting this impression, permit me to say that the accompanying report is intended to over every value of gold and silver produced in Nevada, as the returns are made under oath to the respective assessors of the several counties in this State by the uperintendents and managers of mines and mills, and these returns embrace all lasses of bullion.

Very respectfully,

JAMES CRAWFORD, Superintendent.

Hon, H. R. LINDERMAN. Director of the Mint.

Production of gold and silver from the mines of the State of Nevada during the fiscal year ended June 30, 1878.

STATE CONTROLLER'S OFFICE Carson, Nev., August 26, 1878.

I hereby certify that the foregoing is a true and correct statement of the yield of the mines of this State for the year commencing July 1, 1877, and ending June 30, 1878, as compiled from the quarterly reports of the several county auditors, filed in this

department.
Witness my hand and seal of office this 26th day of August, A. D. 1878.
W. W. HOBART,

State Controller.

UNITED STATES INTERNAL REVENUE COLLECTOR'S OFFICE, DISTRICT OF UTAH, September 6, 1878.

Sir: In reply to your letter of July 22, 1878, inquiring as to the gold and silver yield of the Utah mines, I inclose statement of same for calendar year 1877, prepared by J. E. Dooly, agent of Wells, Fargo & Co. at this point. It takes exact account of everything save a small amount of gold dust, the product of placer-mining in Bingham Canon, and gives a total of \$5,588,538.60. The gold-dust spoken of would make it at least an even \$5,600,000. About 7 per cent. of this is gold, the rest silver.

It will be noticed that about three-sevenths of the total yield was from milling or silver neck proper: four-sevenths from smelting or lead even

silver rock proper; four-sevenths from smelting or lead ores.

For the first six months of 1878 the product of gold and silver from the latter source fell off as compared with the first half of 1877 about \$360,000, owing to a drop of 50 to 60 per cent. in the price of lead, but the loss was more than made up by the increased product of the mills, particularly in the Leeds district, and the product from leaching-ores, so that the yield of gold and silver for 1878 is not likely to vary much from that of 1877.

Increased attention is being given to purely gold and silver bearing mines, and the prospect is that the yield for 1879 will materially exceed that for either 1877 or 1878.

Very respectfully,

O. J. HOLLISTER.

Hon. H. R. LINDERMAN, Director of the Mint.

Wells, Fargo & Co., Salt Lake City, Utah, January 1, 1878.

DEAR SIR: We take pleasure in presenting to you a detailed statement, showing the production of gold, silver, and lead in this Territory for the year ending December 31, 1877, which we have carefully prepared and compiled:

Very respectfully, your obedient servant, CHARLES RUM	LEV

Hon. H. R. LINDERMAN,
Director of the Mint.

Assayer in Charge.

United States Assay Office, Helena, Mont., September 30, 1878.

SIR: I have the honor to forward herewith statement of the amount of the probable product of gold and silver of Montana Territory for the next twelve months, compiled rom statistics gathered from various camps throughout the Territory by Mr. John W. Eddy, clerk of this office.

I am satisfied the statement will prove nearly correct.

I am, sir, your obedient servant,

CHARLES RUMLEY,
Assayer in Charge.

Hon. H. R. LINDERMAN, Director of the Mint.

Silver and gold mines of Montana.

Silver.—During the last twelve months more rapid and substantial progress has been nade in the development of mines and treatment of the ores than ever before in Monana. In many localities the character of the ores was for a long time imperfectly unlerstood. The surface-products gave little indication of what elements might be found n combination where the vein-matter was found solidified as depth was attained, and many of the metallurgical methods adapted to the treatment of the friable surface-ores were found altogether inadequate to reduce the refractory products reached in many places only a few feet below.

In some localities, notably Butte, the ores are sufficiently free to be milled without previous roasting at present; but even there they are more rebellious below water, and the mills are being supplemented by furnaces that will complete the process necessary

to extract the precious metals.

Development has progressed sufficiently to determine the probable permanency of the lodes, although deep mining is yet unknown, 500 feet being the exceptionally deep working in the Territory. The most prominent and productive silver-mining camp in the Territory at present is Butte, about fifty miles south of this point. On the 1st of November next about eighty stamps will be operating there, besides four arastras, on res generally good in grade, and in quantity abundant far above the present capacity for treatment. A furnace is now in process of erection for matting the heavy ores as an above the Alma, Colo.

It would not be an unsafe estimate to expect from Butte, in round numbers, one and a half million dollars during the next twelve months succeeding September 1 instant. The mines in the vicinity of Jefferson City have developed recently far beyond expectation, a single one producing at least 2,000 tons of excellent ore, while the reductionworks established there by the Montana Company are already beginning to show profitable results. At Glendale a leaching process is added to their works, and an increased amount of bullion may be expected from that locality.

Probable silver product from Butte	\$1,500	000
Probable silver product from Glendale	1,250	000
Probable silver product from Philipsburg	350	000
Probable silver product from Jefferson		000
Probable silver product from other places	200	000

reasonably expected for the year ending September 1, 1879.

Gold.—In former times the enormously rich placers of this region were its chief attraction, and are still a source of large income. In localities where mines of this character have been exhausted, or nearly so, the development of the various quartz-lodes is beginning to supply the deficit. Requisite machinery for the proper reduction.

of the ores is rapidly supplying the camps wherever sufficient work has been done to

render permanency probable.

The Silver Creek District, recently made famous by the "Penobscot Bonanza," will add probably not less than one million dollars to the gold product of next year. The ranking mines there are the Penobscot and Snowdrift, Belmont, Whippoorwill, Mount Pleasant, Bluebird, Leopard, &c.

Forty stamps and two arastras, besides apparatus for concentrating the mineral out of the tailings, are now in operation on rock, some of which, from the first-named mine, still averages nearly one hundred dollars per ton.

Silver Star district, about seventy-five miles south from here, is also producing well with moderate facilities, and will add about a quarter million dollars to the gross product of gold during the coming year.

The renewed activity in mining has reached the Cable district, and work which, owing to legal complications, has been suspended for a long time is now revived, and

about a quarter million dollars ought to be realized from that locality.

Other smaller camps are organizing in many directions and, with advent of suitable facilities for the extraction of the metals from the ore, promise to yield generous returns for the outlay. From the placers not less than one and a half million dollars ought to be expected with an average supply of water for the season's work.

Probable gold product from Silver Creek district. Probable gold product from Silver Star district Probable gold product from Cable district Probable gold product from other quartz districts. Probable gold product from placers	250, 000 250, 000 500, 000
Or a total gold product of	3, 500, 000
reasonably expected for the year ending September 1, 1879.

JNO. W. EDDY, Chief Clerk United States Assay Office, Helena, Mont.

> MINT OF THE UNITED STATES, Denver, Colo., October 1, 1878.

7, 000, 000

\$2.266 ADA

Sir: In compliance with your request, I have the honor to report that from the best information at my command I find the bullion product in this State for the fiscal year ended June 30, 1878, to be as follows, viz:

With	фэ, эоо, 4 04
.Silver	
(M) (11) (12)	
Silver in ores	
	5, 394, 940
·	, ,

\$8,761,344

The silver product has largely increased since July 1, 1878.

I have further to report that I was unable to obtain any reliable information as to the general character of the mines in this State and their probable production in the future, but the continual discoveries of exceedingly rich mines and their present yield would indicate that the bullion resources of this State are inexhaustible.

Very respectfully, your obedient servant,

H. SILVER, Assayer in charge.

Hon. H. R. LINDERMAN, Director of the Mint.

> TERRITORY OF ARIZONA, EXECUTIVE OFFICE, Prescott, July 27, 1878.

SIR: In reply to your letter of inquiry of the 8th instant, this day received, I have the honor to report that we have no statistics in this Territory as to the production of either silver or gold as will enable any one to arrive at any very certain figures as to

Cala

the amount of either; but from the best estimate that I can form from such facts as have come to my knowledge, I place the production of each of said metals as given below

I have the honor to be, very respectfully,

JOHN P. HOYT. Governor.

Hon. H. R. LINDERMAN, Director United States Mint.

Gold bullion for year ending June 30, 1878.....

5, 000, 000

[Telegram.]

SAN FRANCISCO, October 28, 1878.

To DIRECTOR MINT:

Annual production of silver from Arizona mines estimated at three million dollars at

H. L. DODGE, Superintendent Mint.

BUREAU OF AGRICULTURE, STATISTICS, AND MINES Nashville, Tenn., July 9, 1878.

Sir: Your letter of yesterday, directed to Governor Porter, has been referred to me. The gold mines of Tennessee are worked only to a limited extent, and only when nothing better presents itself. The average yield per man per day does not exceed fifty cents' worth of gold-dust. All the richest gravel has been washed over, and the amount of gold now taken out does not exceed \$2,000. Very small quantities of this are sent to the mint, being used by local jewelry establishments. No silver-mines have yet been discovered in the State.

Respectfully,

J. B. KILLEBREW. Commissioner.

Hon. H. R. LINDERMAN, Director of the Mint.

United States Assay Office, Charlotte, N. C., September 28, 1878.

SIR: In compliance with your request of July 20, 1878, I have the honor to report as follows concerning the character, the present rate of production, and the prospective yield of the mines in North Carolina:

The gold-producing area of the State of North Carolina is not far from 25,000 square miles, but the portion productive on a working scale is considerably less, being about 12,000 square miles, and embraces the western half of the State. Gold is produced at intervals over this entire area.

This stretch of country contains at least three different geological formations.

The middle area is best described as granite or syenite, though neither of these terms give a precise description of the formation.

The eastern belt is made up generally of slates, mostly argillaceous, while the western is gneissoid in its structure, verging into hornblendic and mica schist and some minor mineralogical forms.

Each of these areas has furnished veins, placers, and true gravel deposits. About 140 mines of the precious metals are known to us in this State on which some work has been done.

The middle formation has been longest known, and, though the smallest in extent, has been worked the most largely and productive; its placers and gravel deposits were, for the most part, exhausted a generation ago; only a few patches now remain, and these chiefly because not convenient to water.

With some exceptions the veins of this belt vary in width from 6 inches to 4 feet, and as there is generally a "front" and a "back" vein—i. e. two parallel seams of orematter a few feet apart—with intermediate seams of ore-matter, the whole deposit is of good width. The intermediate "country" is usually slaty, and the ore in the upper part of the mines is also slaty, but in depth loses this peculiarity to a great extent and

shows a tendency to become more compact.

Above the permanent water-line, which is rarely more than 40 feet from the top the ore is the highly altered, soft, hydrated peroxide of iron (brown ore as it is locally termed), with little of the sulphuret of iron or copper present which it originally con tained.

This ore is easily mined, readily treated with cheap apparatus, and the precious con-

to its extracted to a high percentage.

Most of the known mines have been stripped of ore down to the permanent water line, only a few pillars being left for support. Accordingly, the resources of this nature are not worthy of large dependence except many new mines should be discovered.

The occurrence of sulphurets in large proportion at or near the water-line, together with heavy bodies of water requiring expensive machinery, presented a difficult problem to our miners of twenty years ago, under the then conditions of mining work. and most of the mines were abandoned and still remain so.

All the belts enumerated exhibit these general characteristics, but with some pecu-

liarities.

In the eastern or slate belt the water line is frequently at a lower level, the seams of ore are somewhat larger and more slaty in their structure, and generally not so readily distinguished from the bedded masses in which they occur; moreover the gold is more finely laminated, resembling gold-leaf, and from this peculiarity, floating off more easily on the water during treatment.

In the western gneissoid area, immediately bordering the central belt, the veins are mostly of great width, thirty feet not being uncommon, and yield abundantly low-grade ores; in their structure they partake of the bedded condition of the country to such a degree as to suggest the idea that they are beds, and not true veins, differing from their associates only in being more highly charged with mineral matter. mountainous region of the State, the mineral resources have never yet received much attention by reason of difficulty of access; of the character of the auriferous veins little can be said, but they are generally reputed to be narrow.

Iron pyrites, and its altered terms, form the chief mineral constituents of all the

auriferous ores in this section. Galena is occasionally found, but rarely in any considerable quantity; as an ore it is found in working proportion only in the Silver Hill Mine, Davidson County. Zine blende, in still smaller proportion, is an almost invari-

able accompaniment of Galena.

Nickel and Cobalt ores are not known to exist in working quantity, but they are frequently found in traces in many sulphurets. Copper is found in every mine; the black sulphuret (Chalcocite) occurs to our knowledge in quantity only in the Chick mine in Moore County, and Peacock copper ore (Bornite) only at the Gillis mine in Person County, and at the Copper Knob (Gap Creek) mine in Ashe County; both carry considerable gold and silver.

The chief ore of copper is the yellow sulphuret (chalcopyrite) with iron pyrites; at several mines it is found in such percentage as to constitute a true copper ore and valuable for that metal independently of other constituents, for example, Gold Hill, Phonix, Pioneer Mills, Crosby, Kerns, and Cathey. None of these are now worked, the

first excepted.

Arsenic and antimony are very rarely present to a noticeable per cent.

the ores of this section are refractory, chiefly as the sulphurets make them so.

Both the eastern and the western belts have large areas of gravel, but in neither is the extent of the deposits known accurately; the want of water has hitherto prevented extensive work upon them. The eastern gravel deposits are larger and deeper; the best known examples are the Portis mine in Franklin County, and the Christian mine in Montgomery County, both have been extensively worked in the past and are still worked in a desultory way, as water can be commanded. In these deposits the gold is largely contained in strings of rich quartz permeating the looser mass in every direction; a thorough extraction of the gold from these strings and bowlders involves their pulverization. The Christian mine has yielded many fine nuggets weighing from a few dwts, each to a pound or more.

The gravel of the central area of which little now remains is spread in a thin layer over the undisturbed soil or bed-rock, and itself covered over with the debris of sub-

sequent washes.

The gravel of the western area occurs similarly, but lies more deeply and here and there by secondary diluvial action brought again to the surface. The best-known localities are Brindletown and Brackettown in Burke County, both of which have been worked for forty or fifty years.

Within a few years, improved methods have been introduced, especially by J. C. Mills, esq., of Brindletown, which has given a new impulse to the business and con-

siderably increased the amount of gold produced.

I am conscious that the above general statement of the nature of our mines and their

GEOLOGICAL ROOMS, Raleigh, N. C., August 19, 1878.

SIR: Your letter to the governor, making inquiries about the product of gold and silver in North Carolina for the past year, has been referred to me for answer. From the best observation and estimates I can get, I put the aggregate product of our gold mines at \$160,000. The silver mined in the State is too trifling in amount to be worth mention.

Respectfully, yours,

W. C. KERR. State Geologist.

Hon. H. R. LINDERMAN. Director of the Mint.

> OMAHA SMELTING AND REFINING COMPANY, Omaha, Nebr., August 3, 1878.

SIR: Replying to yours of the 12th ultimo., our silver output during the time mentioned, at \$1.29.29 per ounce, was \$2,715,624; gold, at \$20.67.18 per ounce was \$427,701. We cannot say exactly where above came from; should estimate about as follows:

	* . *	10 miles		Silver.	Gold.

LILDOLIU UNU CUILLO					

Yours, respectfully,

E. W. NASH, Secretary and Treasurer.

Hon. H. R. LINDERMAN, Director of the Mint.

> PITTSBURG LANDING Rancho Los Medanas, Contra Costa County, California, September 9, 1878.

DEAR SIR: Mr. Hamilton Smith has handed me your letter of July 20, sent to him through Mr. Glenny, of Nevada Bank, requesting some general information with reference to "the present condition of hydraulic gravel mining in the State of California,

As Mr. Smith's time is almost entirely occupied in connection with our works, of

which he is general manager, he has requested me to write you in answer.

Hydraulic mining in this State has approximated its maximum. The yield of gold

from this source for 1878 will reach about \$12,000,000.

At an important and long-continued trial which took place during July and August last at Marysville, between the owners of land (plaintiffs) claiming to be damaged by débris from the mines and some of the hydraulic miners (defendants), much information as to the yield of gold from this class of mines was elicited in the testimony from mine owners in various portions of the State. The result of this testimony varied from \$11,000,000 to \$13,000,000, and it will be safe to assume \$12,000,000 as the yield for 1878, from hydraulic, drift, placer, and river mining, not, of course, including any yield from

It is in my opinion highly probable that this yield will slowly increase during the next five years until it will reach \$15,000,000, beyond which it will not increase; but

this yield, when reached, will continue as an average for fifty years or more thereafter.

The gravel channels are now pretty well known and their limits well established; the principal mines on these channels are mostly owned and held by corporations with large capital. Nearly, if not quite all of the outlets or points from which these channels can be reached and worked by deep and long tunnels are held by these corpora-tions, and the same may be said of the water supply and reservoir sites, without which these gravel channels are valueless, as they cannot be worked.

To open properly a gravel or hydraulic mine, so that it can be worked profitably, is a work of many years, requiring a large outlay of capital, as in connection with the ownership of the mine, if it is to be worked, arises the necessity of bringing water, if water can be had, as well as the construction of reservoirs, if a proper site for the same

can be found in the high mountains, to hold water during the long dry season when the streams are dry, or nearly so, as also the construction of long, deep tunnels through which to reach the bottom of the gravel channels and get rid of the water and gravel after the gold is extracted.

The * * * Company were over ten years from date of organization engaged in buying mining claims and in constructing their works, and the * * * Company have been some seven years engaged in the same work. During this time the two companies have constructed two enormous reservoirs, one requiring a dam of 100 feet height, and which has a storage capacity of 1,000,000,000 cubic feet of water, the other requiring a dam 145 feet high, with a storage capacity of 800,000,000 cubic feet. Both

of these reservoirs will be completed during the coming month of October.

These companies have also constructed, the one 45 miles of canals, the other 75 miles, in all about 120 miles of canals over a very rough mountain country on the western slope of the Sierra Nevada Mountains, to carry the water from these reservoirs

to the mines.

These canals have cost from \$8,500 to \$10,000 per mile, and, coupled under the reservoirs, furnish an average supply of water to the mines of these companies of about 90,000,000 gallons of water per day during the year.

These companies have also constructed four long, deep tunnels, varying from 3,000

to 8,000 feet in length, costing from \$40 to \$60 per foot, and the total amount expended by both companies is about \$4,000,000 in gold coin, exclusive of interest. Work has progressed steadily since 1866. By the close of October of this year the construction account will be closed, as the work will be finished.

It must be evident that only permanency in the mines will justify such a large outlay, and it must also be evident that so large an expenditure, extending over such a length of time before returns are received, is beyond individual means, and can be

procured only through corporate organizations.

It will be safe to assume the annual gross yield from these mines at \$1,000,000 a year for the next fifty to seventy-five years. The * * * Company's yield this year will reach \$325,000. The mining operations of these three companies are the largest in the State, and I merely give you these statements (because I can vouch for their approximate correctness) as a memorandum showing how many mines must be in active operation to produce the \$12,000,000 or \$15,000,000 yearly, at which we estimate the

gold yield from this class of mines.

The scarcity of reservoir sites in the high Sierras, coupled with the large amount of capital and length of time required to aggregate in a proper locality sufficient mining ground, and construct the works required to store and bring water to the mines, and to open long, deep tunnels to reach the bottom of the gravel channel, and to open up a hydraulic mine on a paying basis, will forbid any very important increase

in this class of mining.

It is quite likely, and indeed quite probable, that drift mining upon these gravel channels (where they cannot be reached for hydraulic operations) will increase much more rapidly in the future than has been the case in the past, owing to the decreased costof labor and supplies. This d ift mining consists in sinking shafts upon the gravel channels (or in rare instances in reaching them with tunnels) from surface to bed-rock. varying from 300 to 500 feet in depth, and then drifting out the gravel where it will pay, hoisting it to the surface through the shaft, and washing it in a sluice.

The amount of material which can be hauled, and amount of gold extracted therefrom, as compared with hydraulic operations, is so small that the gross results cannot

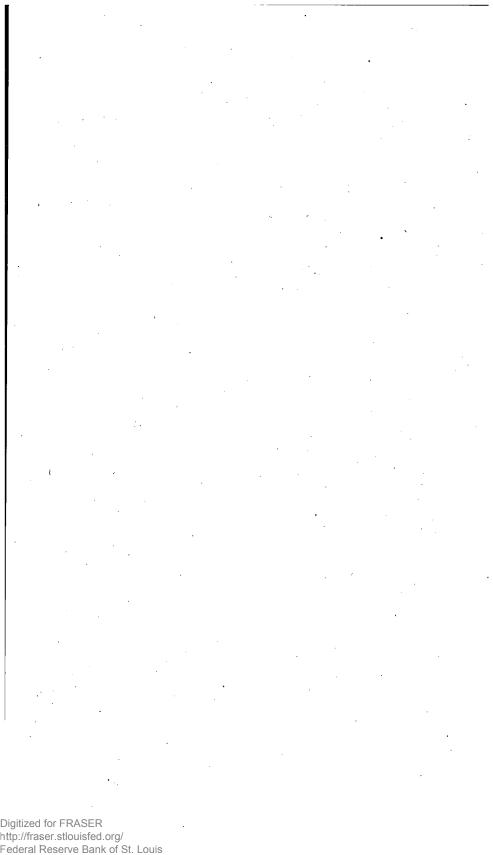

materially increase the gross yield of gold from gravel mining yearly.

My conclusion, based upon an experience of nearly fifteen years in connection with hydraulic as well as all other kinds of mining upon this coast, is, that the gross yield from gravel mines of all kinds in California will never exceed \$15,000,000 a year, and that this amount will, with certainty, be realized yearly for the next three or four generations.

Trusting you will pardon the length of this epistle, Very respectfully, your obedient servant,

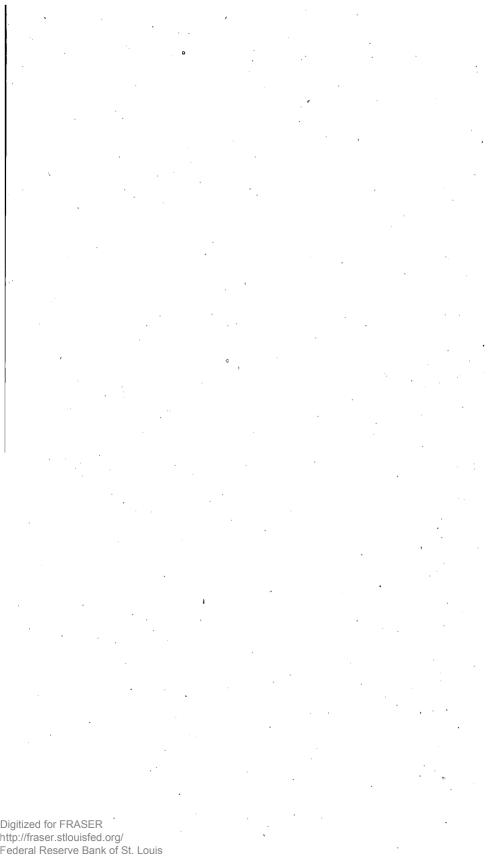

L. L. ROBINSON.

, Hon. H. R. LINDERMAN, Director United States Mint, Washington, D. C.

The above detailed statement omits a variety of duties requiring in their performance much careful labor and attention. Among these may be mentioned the examination and decision of applications for the issuing of bonds and other securities in place of securities lost or destroyed; the examination of powers-of-attorney for the collection of money due to creditors of the United States and the filing and registering of the same; the examination of official bonds and the filing and registering of the same; the preparation of papers for the commencement of suits and as evidence therein; the recording and briefing of letters received and copying of letters forwarded; and a considerable amount of other business of a miscellaneous character which need not be more particularly specified.

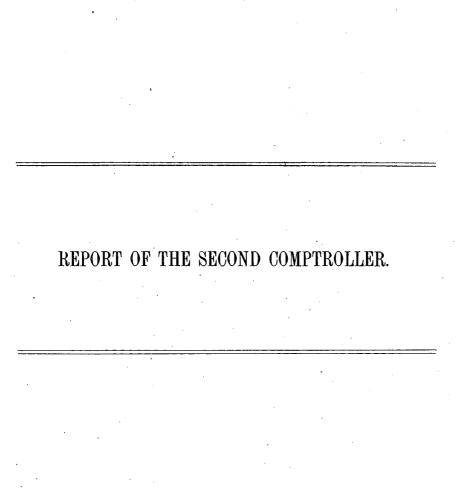

I beg to commend the persons employed in this office for their faithful and efficient service.

Respectfully submitted.

A. G. PORTER, Comptroller.

REPORT

THE SECOND COMPTROLLER OF THE TREASURY.

TREASURY DEPARTMENT, SECOND COMPTROLLER'S OFFICE, October 7, 1878.

SIR: In compliance with your request by letter of the 10th ultimo, I submit herewith a summary statement of the business done in this office during the fiscal year which ended on the 30th day of June, 1878.

The following table shows the total number of accounts and claims revised and adjusted, with amounts allowed thereon; also referred and other cases, settled and cases otherwise acted on, that do not involve a present expenditure.

From—	Number revised.	Amounts.
Second Auditor Third Auditor Fourth Auditor	8, 883 5, 308 4, 221	\$19, 793, 953 63, 454, 833 16, 201, 349
Various sources, not involving present expenditure	18, 412 3, 064	99, 450, 135 3, 129, 742
Total number and amounts involved.	21, 476	102, 597, 877

These have been duly revised and entered, and the balances due thereon certified for allowance and payment.

The following tables furnish a more detailed statement of the same accounts and claims, showing the number revised, the character of the same, the amounts allowed, and the source from which they were received:

Accounts revised during the year.

Character of accounts.	Number re- vised.	Amounts.
From the Second Auditor:	54	\$115,003
 Of Army recruiting officers, for the regular recruiting service. Of Army paymasters, for pay of the Army, including mileage to officers and general expenses. Special accounts settled by the paymasters' division. 	487 1, 404	10, 130, 724 1, 723, 682
 Of disbursing officers of the Ordnance Department, for the expenses of the ordnance service, and for ordnance, ordnance stores and sup- plies, armories, and arsenals 	214	957, 232
 5. Of disbursing-officers of the Medical Department, for medical and hospital supplies and medical services. 6. Of disbursements for contingent expenses of the War Department. 7. Of agents of Indian affairs, for the current and contingent expenses 	· 118 95	255, 545 16, 285
of the Indian service, including annuities and installments under treaties Of disbursing-officers of the Freedman's Bureau Of money received and disbursed for the Soldiers' Home	2, 517 2 4	6, 148, 376 8, 088 5, 130
Total	4, 895	19, 360, 065

Accounts revised during the year—Continued.

Character of accounts.	Number revised.	Amounts.
From the Third Auditor: 1. Of dishursing-officers of the Quartermaster's Department, for the regular supplies and incidental expenses. 2. Of disbursing-officers of the Subsistence Department of military surveys, the construction of fortifications, river and harbor surveys and improvements. 4. Of pension agents, for the payment of pensions, &c.	1, 024 692 91 561	\$10, 432, 084 3, 583, 184 4, 446, 065 41, 284, 017
Total	2, 368	59, 745, 350
From the Fourth Auditor: 1. Of the disbursing-officers of the Marine Corps 2. Of the paymasters of the Navy proper 3. Of paymasters of the Navy Department at the navy-yards 4. Of paymasters of the Navy acting as navy-agents and disbursing-officers 5. Of Navy pension-agents, for the payment of pensions to the invalids of the Navy and Marine Corps.	10 162 93 19 65	707, 895 3, 598, 205 4, 670, 848 5, 843, 180 402, 432
Total	349	15, 222, 560

Claims examined and allowed during the year.

Character of claims.	Number revised.	Amonnts.
From the Second Auditor: 1. Soldiers' pay and bounty	3, 988	\$433, 888
From the Third Auditor: 1. Lost property, under act of March 3, 1849. 2. Quarternaster and commissary stores and supplies, including transportation claims 3. Miscellancous claims 4. Oregon and Washington Territory Indian war-claims 5. State war-claims	2, 379 50 51	59, 828 2, 940, 236 477, 684 19, 888 211, 847
Total	2, 940	3, 709, 483
From the Fourth Auditor: 1. Sailors' pay and bounty 2. Prize-money	3, 667 205	954, 848 23, 941
Total	3, 872	978, 789
Cases not involving present expenditure: 1. Duplicate checks 2. Financial agents (Navy) 3. Referred cases	278 4 2, 782	14, 045 3, 115, 697
Total	3, 064	3, 129, 742
Settlements recorded during the fiscal year. Requisitions recorded during the fiscal year Differences recorded (pages) Letters written on official business (pages) Bonds filed Contracts filed Accounts on hand at the beginning of the fiscal year Accounts on hand at the close of the fiscal year Clerks at beginning of the fiscal year Clerks at end of the fiscal year		

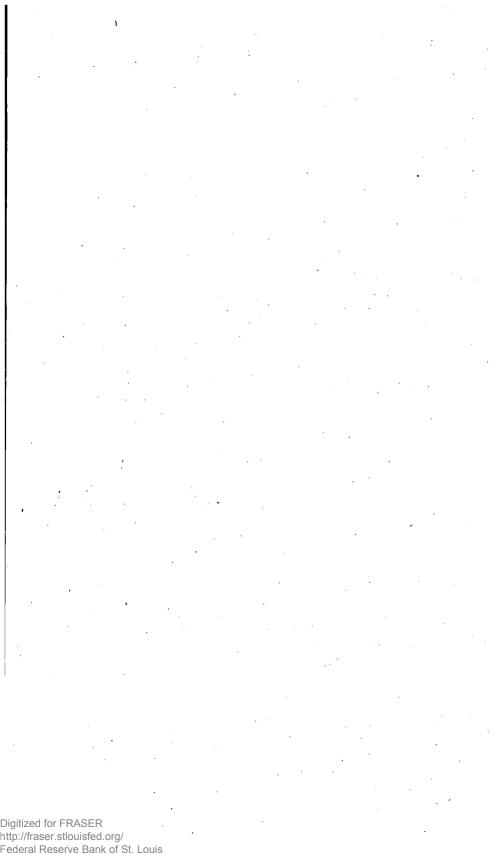

The total amount of accounts and claims passed for payment during this fiscal year is somewhat less than during the previous year, while the total number of accounts and claims revised is considerably greater; showing that the labor of the office has been much increased. Simple

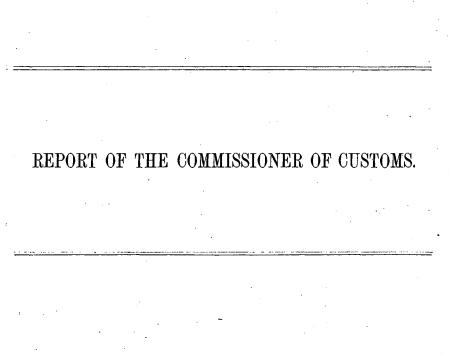

justice requires that I should bear testimony to the fidelity and ability with which the chiefs of division and clerks have performed their official duties.

Very respectfully,

W. W. UPTON, Comptroller.

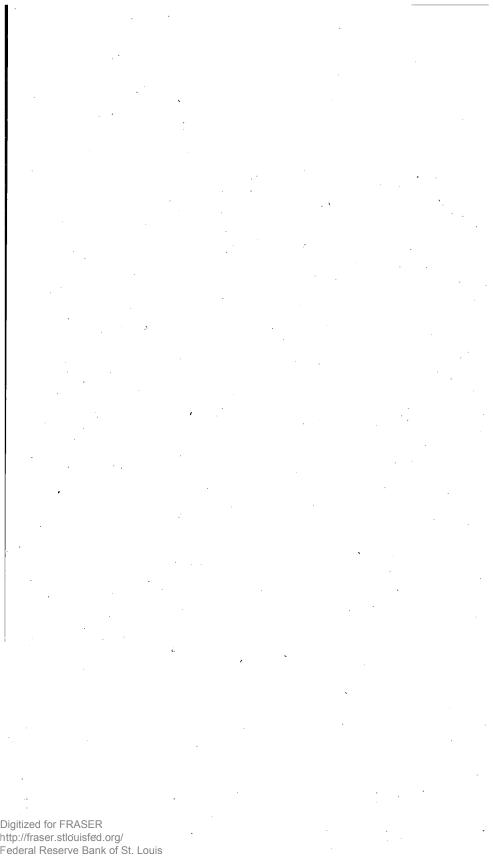

Hon. SECRETARY OF THE TREASURY.

In submitting the foregoing report in a condensed form, which gives a complete summary of accounts adjusted during the fiscal year ending June 30, 1878, I wish to say that the exhibit presented gives a very inadequate idea of the amount of labor and care required in their examination and adjustment.

The number and variety of accounts adjusted in this office are increasing annually, growing out of the fact that all accounts of whatever character not specially assigned by statutes to other accounting offices of the

Treasury, are properly referred to this office for settlement.

The magnitude of the work will be better understood when it is remembered that the accounts of the United States Treasurer, embracing all receipts and disbursements, amounting last year to over thirteen hundred millions (\$1,359,139,537.95) of dollars, together with the vouchers attesting their correctness, and showing their exact condition, are rendered to this office for adjustment. All accounts also of receipts from customs, for duties on merchandise imported, steamboat fees collected, marine-hospital tax, and receipts from fines, penalties, and forfeitures, &c., with expenses of their collections, which embrace the following more prominent accounts technically known as disbursements for expenses of collecting the revenue from customs, revenue marine service, marinehospital service, light-house establishment, debentures and drawbacks, excess of deposits refunded, and construction and repair of public buildings, &c., and other accounts of disbursements of government funds, to amount of over six hundred millions of dollars (\$644,552,751.67), in addition to the amounts stated in the Treasurer's reports, embracing a great variety of accounts, among which may be mentioned disbursements for redemption of the public debt and payment of interest upon the same. reimbursement of the United States Treasurer for legal-tender notes and fractional currency destroyed, United States Mints, salaries United States Senate and House of Representatives, and also for the several departments at Washington, and contingent expenses of the same, &c., &c., a full list of which will be found under the designation of "disbursements," are severally examined and stated in this office. These embrace no less than one hundred and thirty-eight separate and distinct classes of accounts, requiring over twenty-three thousand accounts (23,419) to be examined and stated during the year.

The operations growing out of the several acts authorizing the refunding of the public debt have greatly increased the work in the public debt division during the last two years, and especially so during the last four months. The cancellation of bonds redeemed, and the examination and filing of new powers of attorney, require much additional labor, and this will, doubtless, continue until the whole amount required by law shall be redeemed and refunded. This division has suffered a reduction of force in the face of increased labor required, and the work has been dispatched promptly by securing additional clerical force drawn, by your direction, from other offices of the department. This became absolutely necessary, as it was found to be impossible to transact the business of

that division without such additional clerical force.

In the customs division it is found that in four years three desks have been broken up, which is full 20 per cent. reduction of the force, while the work has gradually increased rather than diminished, and the result is that there is an inadequate clerical force in that division. This compels the chief of the division to examine and state many original accounts which press for settlement, instead of giving his time to the careful examination of the entire work of the clerical force under his supervision.

The same is true of the warehouse and bond division, where the force has been reduced, to the detriment of the public service, as there has been no corresponding decrease of the work required of that division.

While the judiciary division has not suffered a reduction of force, the work increases annually. This arises from several causes, but chiefly from the increase of districts made necessary in the West and Southwest, where population and wealth are rapidly increasing, with a consequent

growth of business for the courts.

What has been said of the several divisions of this bureau is equally true when we examine the miscellaneous or separate desks not embraced in the divisions above mentioned. Accounts embracing the largest part of the annual disbursements from the United States Treasury are examined and stated by the clerical force assigned to this class of work. The magnitude of the disbursements and the responsibility involved in their preparation and examination strongly suggests the propriety of organizing a new division, to be known as a division of miscellaneous accounts, which should have the careful supervision of a capable chief, who should be in the best sense of the term an "expert" and accurate accountant.

From this hasty review of the condition of work performed in the First Auditor's Office it will be seen that while the labor required in the examination and statement of accounts properly referred to it for settlement has gradually from year to year increased, the legislation of Congress has actually reduced the force in the several appropriations made, which has compelled the Auditor to petition for additional clerical force

so as to dispatch the current work pressing for adjustment.

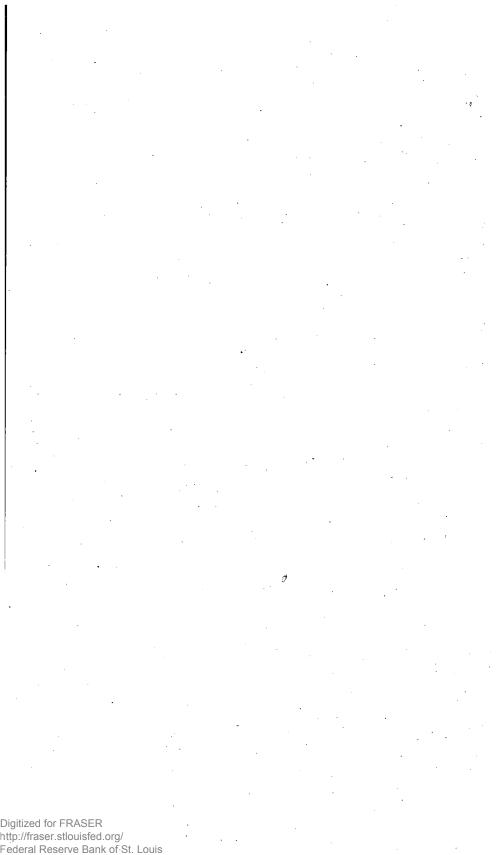

I therefore respectfully ask that the additional force as suggested in the "estimate" forwarded to you for this office be recommended to the favorable consideration of Congress; and I now repeat what was then stated, "this estimate does not increase the actual working force of the office." For many years it has been found necessary to ask for additional force by a transfer of employés from other offices to accomplish the work required of this office. The additional force estimated for is now actually employed in the office, and is necessary for the proper performance of the work in this bureau. The public service would be greatly benefited by having these employés upon the regular roll of this office, and for many reasons. A transferred clerk is ever liable to be returned to the office where he is enrolled, and this often happens when he has become acquainted with the duties of his desk, and then he is of the greatest value.

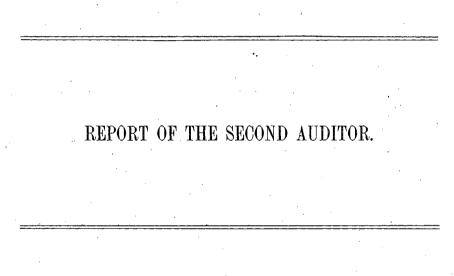

In conclusion I deem it a pleasure as well as a duty to acknowledge the great assistance I have received from the deputy auditor and the several chiefs of divisions in discharging the duties devolving upon me, and I would commend them and the clerks and employés of the office for their diligence, promptness, and fidelity to the public interests in the discharge of their several duties, which in many cases have been both onerous and exacting.

Respectfully,

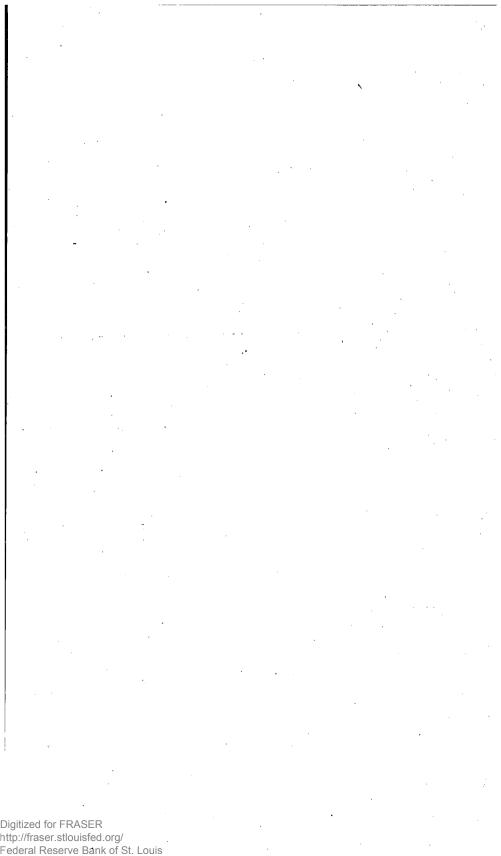

R. M. REYNOLDS, Auditor.

Hon. John Sherman, Secretary of the Treasury.

REPORT

OF THE

SECOND AUDITOR OF THE TREASURY.

TREASURY DEPARTMENT, SECOND AUDITOR'S OFFICE, August 14, 1878.

SIR: I have the honor to submit the following report of the operations of this bureau during the fiscal year ending June 30, 1878:

RÉSUMÉ.

Accounts and settlements.	On hand July 1, 1877.	Received during the year.	Adjusted during the year.	On hand, unsettled, June 30, 1878.	Letters written.	Amount in-
Paymasters' accounts Arrears of pay and bounty Ordnance accounts Modical accounts Recruiting accounts Freedmen's branch, Adjutant-General's Office National Home for Disabled Volunteer Soldiers Miscellaneous accounts and claims Payments to Soldiers' Home	155 15, 446 448	451 16, 080 1, 581	15, 774 1, 828	46 15, 752 201	1, 753 62, 771 1, 927	\$12, 773, 194 28 442, 601 59 {1, 476, 333 54 498, 254 95 418, 773 31 266, 727 98 68, 732 15 246, 830 37 132, 901 87
Indian disbursing account Indian claims. Indian property accounts. War property accounts Miscellaneous settlements	28 822	446 2, 938 433 4, 486	584 2, 966 773 3, 939 802	120 482 8, 191	3, 471 3, 157	1, 702, 495 06 3, 398, 813 00 157, 957 41
Total	25, 101	26, 415	27, 245	24, 792	73, 079	21, 583, 615 51

In addition to the number of letters written, as stated above, 32,417 were written in the various divisions of the office, making a total of 105,496.

The average number of clerks employed during the year was 127.

The usual monthly and annual reports and statements have been pre-

pared.

The following figures exhibit, as well as figures may do, what has been the work of this office since its organization in 1817, and furnish interesting statistical information. The first table shows the number of settlements of money accounts and claims during the forty-four years from 1817 to 1861, divided into two periods, prior and subsequent to the Mexican war. The second table is a condensed statement of the money accounts and claims settled by the different divisions of the office from June 30, 1861, to June 30, 1878; and the third table shows the number

of property accounts adjusted, claims rejected, certificates furnished the Paymaster-General and Commissioner of Pensions during the same period.

Number of accounts settled from March 4, 1817, to June 30, 1861.

Accounts.	From March 4, 1817, to June 30, 1847.	From June 30, 1847, to June 30, 1861.	Total,

During the fiscal year ending June 30, 1878, 4,983 more claims and accounts were presented to this office for examination and settlement, and 3,963 more settlements were made, than in the year ending June 30, 1877. In the seven months ending July, 1877, there were presented 13,754, and in the corresponding months of the present year, 18,157 have been received, showing an increase of 4,403 claims and accounts in the last seven months.

As there has been no recent legislation calculated to materially increase the business of the office, this result is believed to be mainly due to the pressure of the hard times and to erroneous statements in the public press regarding bounties to soldiers and their heirs, which stimulate them to apply for what, in many cases, has already been paid, or for what they were never entitled to under any law. Such claims, which constitute a large portion of those now presented, are disallowed, to the cost and disappointment of claimants, and at the expense to the government of the necessary investigation.

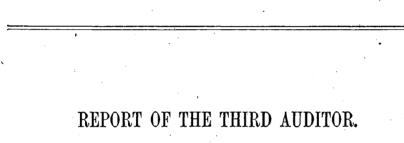

There has been a reasonable expectation that the business of the office relating to claims growing out of the late war would be so materially diminished as to allow of a further reduction of the clerical force, but at the present time the services of all the clerks assigned to the office are needed for the transaction of its business, and it is not possible to indicate the time when any portion can be dispensed with.

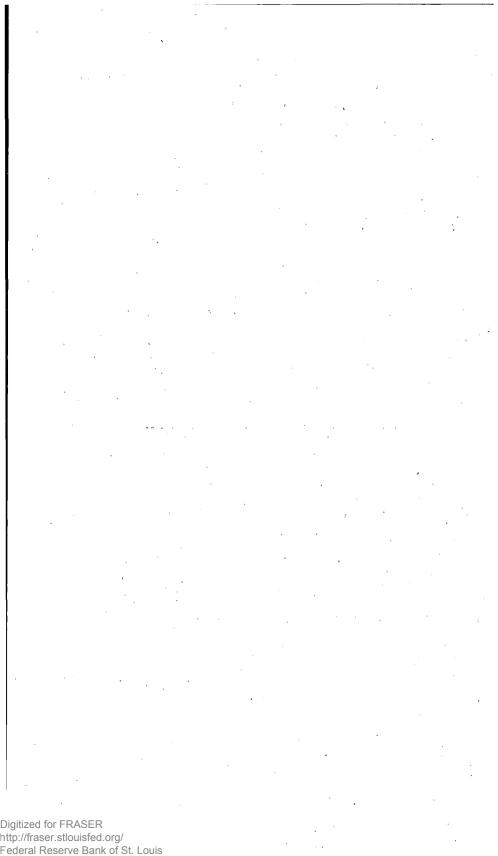

The industry, capacity, and fidelity of the gentlemen constituting the clerical force are worthy of special commendation.

I am, sir, very respectfully,

E. B. FRENCH, Auditor

Hon. John Sherman, Secretary of the Treasury.

REPORT

OF

THE THIRD AUDITOR OF THE TREASURY.

TREASURY DEPARTMENT, THIRD AUDITOR'S OFFICE, October 21, 1878.

SIR: I have the honor to submit herewith report of the operations of this office for the fiscal year ended June 30, 1878.

The following statement shows in tabular form the number and amount of accounts and claims received and adjusted, and the number and amount of accounts and claims on hand unsettled at that date, viz:

BOOKKEEPER'S DIVISION.—(J. F. Jones, chief.)

The duty devolving upon this division is to keep the appropriation and money accounts of disbursing-officers, which are settled in this office.

The annexed statement shows the amount drawn out of certain of its appropriation accounts, and also the repayments made through this office into the Treasury, and is a full exhibit of its financial operations during the fiscal year:

Statement showing the financial operations of the Third Auditor's Office during the fiscal year ended June 30, 1878.

THE QUARTERMASTER'S DIVISION.—(I. S. Tichenor, chief.)

The accounts of quartermasters cover a wide range of money and property responsibility. The former embraces disbursements for barracks and quarters, hospitals, storehouses, offices, stables, and transportation of Army supplies, the purchase of Army clothing, camp and garrison equipage, cavalry and artillery horses, fuel, forage, straw, material for bedding, and stationery; payments of hired men and of "per diem" to extra-duty men; expenses incurred in the pursuit and apprehension of deserters, for the burial of officers and soldiers, for hired escorts, expresses, interpreters, spies, and guides, for veterinary surgeons and medicines for horses, for supplying posts with water, and for all other proper and authorized outlays connected with the movements and operations of the Army not expressly assigned to any other department.

Property purchased with the funds of the Quartermaster's Department is accounted for upon "returns" transmitted through the Quartermaster-General to this office (with the exception of "returns of clothing, camp and garrison equipage," which come under the supervision of the Second Auditor), showing that the disposition made of it is in accordance with law and Army regulations.

Statement showing the operations of the quartermasters' division for the fiscal year ending June 30, 1878.

Subsistence Division.—(Andrew Cauldwell, chief.)

The subsistence division examines the accounts of all commissaries and acting commissaries in the Army whose duties are to purchase the provisions and stores necessary for its subsistence, and to see to their proper distribution. These commissaries render monthly money accounts, with proper vouchers for disbursements of the funds intrusted to them, together with a provision return, showing the disposition of provisions and stores purchased or derived from other sources. These accounts are received through the Commissary General of Subsistence, and are examined and audited in this division.

The money accounts and vouchers, together with a certified statement of the result of said examinations, are then referred to the Second Comptroller of the Treasury for revision. Upon their return from the Comptroller, with the settlement approved, the officers are notified of the result and called upon to adjust or explain any omissions or errors that may have been discovered. The money and provision accounts, together

with the vouchers and papers belonging thereto, are then placed in the settled files for future reference, and remain permanently in the custody of this office.

Engineer accounts.

The engineer branch is engaged in the examination of the accounts of officers and agents of the Engineer Department, who, under direction of the Chief of Engineers of the Army (except the Superintendent of the Military Academy at West Point, whose disbursements are directed by the Inspector General), disburse moneys out of the various appropriations, now 248 in number, made from time to time by Congress for works of a public nature, which may be classed under the following heads, viz: The purchase of sites and materials for and construction and repairs of the various fortifications throughout the United States. Construction and repairs of roads, bridges, bridge-trains, &c., for armies in the field. Surveys on the Atlantic and Pacific coasts. Examination and surveys of the northern and western lakes and rivers. Construction and repairs of breakwaters. Repairs and improvement of harbors, both on sea and lake coasts. Improvement of rivers and purchase of snag and dredge boats for the same; and the expenses of the Military Academy at West Point.

The transactions of the engineer branch for the fiscal year are shown by the following statement, viz:

The work of checking property purchased and paid for on Abstracts A, Aa, and B, upon the accountability abstracts of the purchasing-officer, has not been prosecuted during the past fiscal year because of the The importance of insufficiency of the clerical force of this division. continuing this work and pressing it to completion, in order to protect the government from fraudulent and erroneous claims, has been set forth in preceding annual reports. The work of abstracting the names and service of the soldiers of the war of 1812 for the purpose of arrangement in registers, so that the service of any soldier of that war may be traced without reference to the name of the commanding officer of his company or regiment, was commenced in October and continued to the end of the year with such of the clerical force of this office as could be temporarily detached from other business and the help of a few temporary clerks. The increase of seven clerks allowed under the appropriation for the fiscal year ending June 30, 1879, has not enabled me to increase the force employed upon this work, as the employment of that number of additional clerks has become necessary to answer the inquiries of the Pen sion office relative to the service of soldiers of the war of 1812, under the act of March 9, 1878. In order to properly forward the abstracting of these rolls, that they may be completed within a reasonable time, and for the purpose of again resuming the checking of property on the accountability abstracts, I have to ask an increase of not less than five clerks for this division.

ARMY PENSION DIVISION .-- (W. H. Whitney, chief.)

The duties of this division embrace the settlement of all accounts which pertain to the payment of Army pensions throughout the United The Commissioner of Pensions is charged with the allowance and issue of all certificates for pensions under existing laws. The certificate, when issued, is forwarded directly to the agent for paying pensions, and at the same time a transcript thereof sent to this office for This certificate is recorded in a roll-book prepared for each agency, on which is given the name in full, rate, date of commencement, ending, or other data, to assist in the proper adjustment of payments when made by the several agents. An account is kept with each pension-agent, charging him with all moneys advanced for payment to pensioners, under his proper bond and fiscal year. At the end of each month the agent forwards his vouchers, abstract of payments, and money statement direct to this office, where a preliminary examination is made to see if the money advanced is properly accounted for; the receipt of the account is then acknowledged and the account filed for audit. Each voucher is subsequently examined and the payment entered on the rollbook opposite the pensioner's name. Care has to be exercised to see that the rate, whether increased or reduced, to which the pensioner is entitled, is properly paid.

Every odd year each invalid pensioner whose disability does not exempt him is subject to examination by duly-appointed surgeons, and if the rate named in his certificate is less than the rate heretofore paid, the agent can pay only at the reduced rate. The agent's account, when audited, is reported to the Second Comptroller for his revision, and a copy of the statement of errors, if any, sent to the agent for his information and explanation. The account, when revised, is returned by the Second Comptroller to this office and placed in the settled files, where it perma-

nently remains.

The numerous changes in the laws, the restoration, increasing, and

transferring of pensioners from one agency to another, increase the amount of labor to be performed, and require constant watchfulness to prevent erroneous payments. At the end of each fiscal year all unexpended balances are deposited to the credit of the Treasurer of the United States, and the certificates are forwarded to the Secretary of the Treasury, who refers the same to this office for proper credits to be given, which is done, and the amounts are designated for credit under the appropriations to which they belong. Each pension-agent, at the end of each year, is directed to forward a complete list of all outstanding unpaid checks issued by him, and the funds represented by all checks which remain unpaid over three years are covered into the Treasury to the credit of outstanding liabilities, as provided for by law.

By executive order, dated May 7, 1877, the number of pension-agencies was reduced from 58 to 18, from and after July 1, 1877. This consolidation saved the government this fiscal year \$142,749.72 in compensation, and the expenses of consolidation, ordered by the Commissioner and approved by the Secretary of the Interior, thus far amount to \$8,798.17. Under act March 9, 1878, Congress amended the act February 14, 1871, authorizing pensions to be granted to the survivors of the war of 1812 who served for a period of fourteen days, and to the widows of such

soldiers without regard to date of marriage.

Balance on hand June 30, 1878	114	11, 917, 862 37		

The appropriations for the fiscal years 1877 and 1878 were divided under four different heads, instead of the one head of "Army pensions," as in prior years. In the present fiscal year, for 1879, there are eight dif-

ferent heads of appropriation.

As Congress intends each year to appropriate a specific amount for the payment of pensions, if the appropriation could be made under one head, "Army pensions," it would facilitate the settlement of accounts, and the amount disbursed for any specified purpose could at any time be shown, as the records are so kept in this office. The increase of the number and amount of accounts on hand is owing to the work of consolidating the agencies, transferring names, &c., which was done by the clerks of the division, without any additional number. The work in this division has been increased, as it requires more labor to audit the accounts under the consolidation than it did prior thereto.

The force employed the past year numbered 37 clerks and 2 copyists,

which is 3 clerks less than the previous year.

The following tabular statements exhibit the amount disbursed by the several agents and the unexpended balance in hand to be covered into the Treasury:

Amounts disbursed by pension-agents during the fiscal year ended June 30, 1878, as shown by their accounts-current

THE FILES.

The number of money settlements made during the year is 4,862, and the total from March, 1817, is 172,625. Number of property settlements since 1860, 37,843, of which 3,708 were made during the year. Since my last report was made a large portion of the files have been removed and rearranged, and they are now in rooms which communicate with each other.

All vouchers of Army pensioners from 1818 to the present time are kept here, and are in very good condition. A few of the abstracts of said vouchers are considerably mutilated. The other settlements, which include quartermaster and commissary returns and miscellaneous claims, are in a good state of preservation, and there is room for accounts to be received for three or four months, when additional room will be required. Four clerks are employed in the files rooms, which force is deemed sufficient at present.

There were five lady copyists usefully employed during the year. The number of miscellaneous papers registered was 21,146; difference sheets registered, 651; total, 21,797. The number of pages copied and compared was: Miscellaneous papers, 20,144; difference sheets, 7,588; letters, 30,532; total, 58,264. Names indexed, 82,774.

NEEDED LEGISLATION.

The necessity for a fund for special investigation of claims and authority to cause the production of witnesses and papers before the accounting-officers in doubtful cases is becoming more and more pressing. At present, the only provision of that character respecting claims which are presented is in section 3488 of the Revised Statutes. It is limited to claims for compensation for boats and railroad engines and

cars lost in the military service, a class now becoming almost extinct, only four new claims having been presented within two years past.

In the great mass of claims arising in the Quartermaster's, Commissary, or Engineer Departments, the accounting-officers are, so far as any special investigations are concerned, dependent entirely upon such as may be made by officers or agents of those departments. In many cases I have been convinced that a slight expenditure would probably protect the government from unjust demands. But unless fraud is so apparent as to justify placing a case in the hands of the law officers for criminal prosecution, the investigation must be limited to such as can be made, without expense, by aid of the files, records, and accounts, and such investigation often entirely fails either to establish the fact of the non-liability of the government or to so corroborate the ex-parte evidence produced by the claimant as to free the case from doubt or make the payment of the claim safe for the government. As it now is, in doubtful or suspicious cases, the government must pay when its liability is not satisfactorily established, or perhaps wrong its citizens in refusing to pay demands which upon fuller investigation might be shown to be justly and wholly due. The government requires the accounting-officers to act as judges between it and its creditors, and yet fails to confer upon such officers those powers which all other judicial officers find indispensable to the efficient and safe administration of their judicial functions. This defect in the powers of the accounting-officers, which constantly threatens the interests of both the government and its creditors and is a perpetual embarrassment to those officers, should be supplied by adequate legislation.

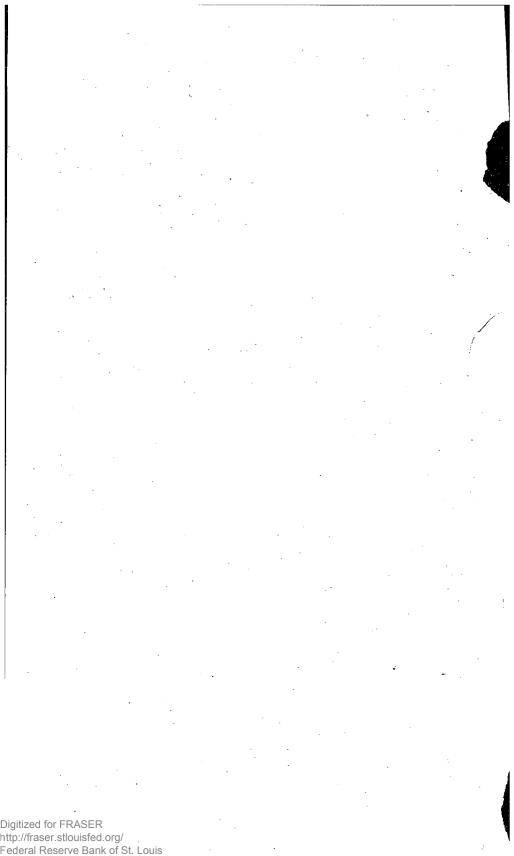

The necessities for a more comprehensive and better-defined statute of limitations, and for more room for the files and records of the office, in conditions rendering them far safer from destruction by fire, were so specifically and urgently presented in my last annual report, that I forbear to again urge them at length, though the necessities have not in any degree diminished.

Respectfully submitted.

HORACE AUSTIN,

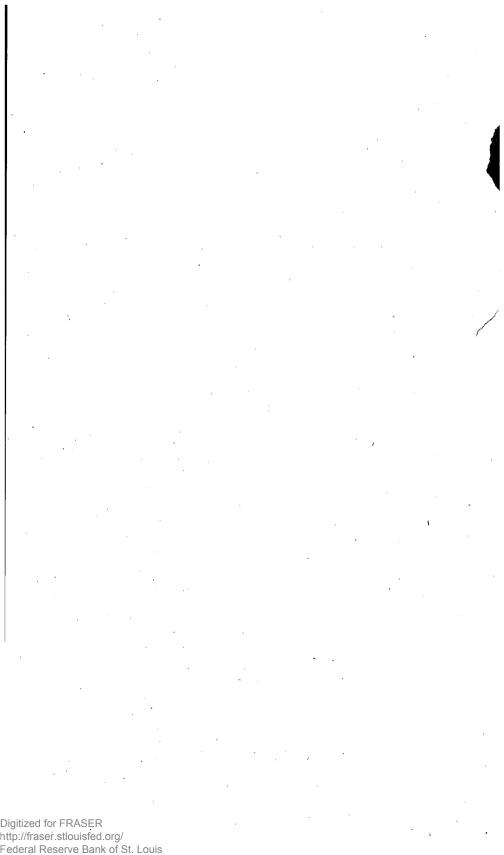

Auditor.

Hon. John Sherman, Secretary of the Treasury.

REPORT

OB

THE FOURTH AUDITOR OF THE TREASURY.

TREASURY DEPARTMENT, FOURTH AUDITOR'S OFFICE, October 15, 1878.

SIR: In pursuance of your request that I should furnish a statement of the transactions and work of this office during the fiscal year ending June 30, 1878, I annex the following tables, which give the information in a compact and methodical manner.

Statement of accounts, including marine, received and settled in the paymasters' section from July 1, 1877, to June 30, 1878, with the amount of cash disbursed in those settled, and the number of letters, received and written, in relation to the same. George L. Clark in charge.

January February March April May June	300 187 121 131 '96 111 3,719	787 279 153 148 99 121 3, 631	192, 544 46 53, 921 86 45, 001 35 21, 435 66 13, 817 56 14, 759 37	1, 427 768 566 524 456 431 9, 491	12. 3-54 73 45. 35.		5

From the accompanying statements it will be seen that during the year there were settled in the paymasters' section 397 accounts, involving \$8,914,118.36; in the Navy pay and allotment section 185 accounts, involving \$9,226,842.88; in the prize-money section 221 accounts, involving \$23,912; in the Navy-pension section 171 accounts, involving \$424,394.86; in the general claims section 3,631 accounts, involving \$941,415.

In addition to the settlement of the above-mentioned accounts, there were entered 2,275 pay requisitions, amounting to \$20,592,625.26; and 426 refunding requisitions, amounting to \$2,679,795.88; and that 1,410 allotments were registered, and 1,155 discontinued; that reports were made in 531 pension cases, and in 5 applications for admission into the United States Naval Asylum; and that 18,459 letters were received, and 90,212 written.

I beg leave to call attention to the statement of the work done in the fice from 1863 to 1878. The statement shows that during that period 165,494 accounts were settled, involving \$723,847,339.29; and that 428,070 letters were received, and 497,451 written; that 38,973 allot-

ments were registered, and 21,887 discontinued.

It gratifies me that I can continue the commendations I have given, during previous years, to the chiefs of sections of this office for their ability and efficiency, and to Mr. William B. Moore, the Deputy Fourth Auditor, for the constant aid, assistance and co-operation I have received from him. The clerks, as a whole, merit praise for the amount of work they have achieved and for the correctness and promptitude with which they have transacted it. Applications for pensions, under the act of March 2, 1867, bounty-land claims, and applications for admission into the United States Naval Asylum (the latter requiring a service of twenty years in the Navy on the part of the applicant), are necessarily somewhat in arrears in consequence of insufficient clerical force, but every effort in the power of the office is exerted to be as prompt as possible.

A schedule of some of the principal items of work transacted in this

Statement of work done from 1863 to 1878.

office from 1863 to 1878, inclusive, is here appended:

During the past year a number of improved methods of doing business have been introduced, and the office constantly illustrates the advantages which arise from the employment of experienced, capable, and thoroughly trained clerks. The files are in good order and so well arranged for consultation that information is easily and accurately available.

I have the honor to be, sir, very respectfully, your obdient servant,

• STEPHEN J. W. TABOR,

Auditor.

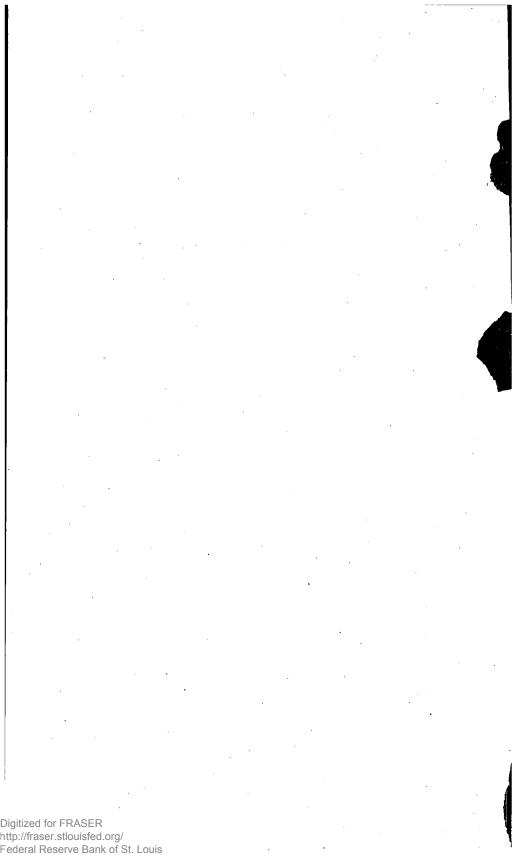

Hon. John Sherman, Secretary of the Treasury.

REPORT

OF

THE FIFTH AUDITOR OF THE TREASURY.

TREASURY DEPARTMENT, FIFTH AUDITOR'S OFFICE, Washington, October 30, 1878.

Sir: I have the honor to transmit herewith tabular statements* showing the operations of this office for the fiscal year ended June 30, 1878. There were received during the year ten thousand three hundred and

eleven accounts, and nine thousand eight hundred and ninety-six were adjusted. Nine thousand seven hundred and forty-nine reports were recorded, and three thousand six hundred letters were written.

The adjustments involved the examination of one hundred eighty-four thousand seventy-three vouchers, amounting to \$687,351,843.16, and were made with commendable promptness and care by the clerks employed in the office, to whom my thanks are due for their attention to duty and strict regard for the interests of the government.

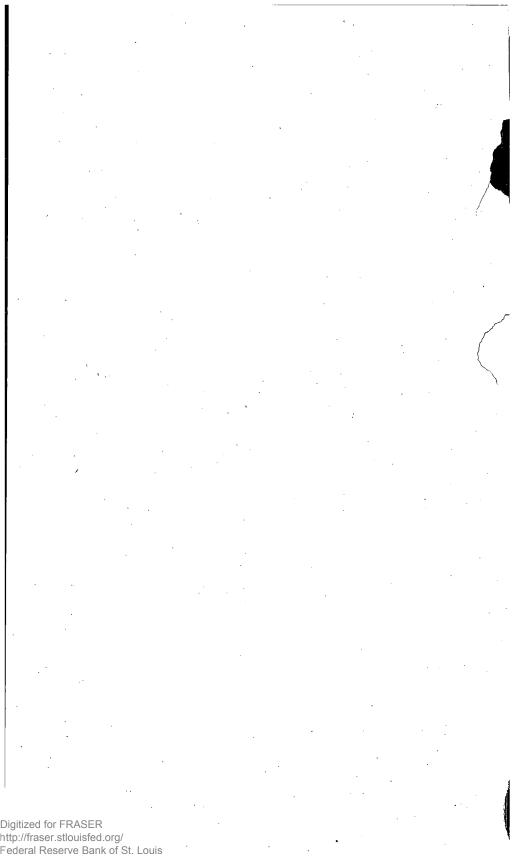

Very respectfully,

J. B. MANN, Acting Auditor.

Hon. John Sherman, Secretary of the Treasury.

REPORT

OF THE

AUDITOR OF THE TREASURY FOR THE POST-OFFICE DEPARTMENT.

OFFICE OF THE AUDITOR OF THE TREASURY
FOR THE POST-OFFICE DEPARTMENT,
Washington, October 18, 1878.

SIR: I have the honor to submit the following report of the business operations of this office for the fiscal year ended June 30, 1878. My annual report to the Postmaster-General, now in course of preparation, will exhibit in detail the financial transactions of the Post-Office Department during the past fiscal year. The following is a summary of the principal labors performed by the several divisions during the year, viz:

EXAMINING DIVISION.—(Benjamin Lippincott, Chief.)

The business of the Examining Division for the last fiscal year has been fully completed, and the following tables exhibit, as far as may be, the work performed:

Number of quarterly accounts current received during the fiscal year: Quarter ending September 30, 1877	37, 729 37, 756 38, 576 39, 075
Total	153, 136
Increase	5, 553
Number of accounts settled by stamp-clerks during the fiscal year: Quarter ending September 30, 1877. Quarter ending December 31, 1877. Quarter ending March 31, 1878. Quarter ending June 30, 1878.	37, 427 37, 838 38, 205 38, 741
Total	152, 211
Increase	5,747
Number of accounts current examined and passed to the Registering Division during the fiscal year:	
Quarter ending September 30, 1877	37, 427
Quarter ending December 31, 1877	37, 838
Quarter ending March 31, 1878	38, 205
Quarter ending June 30, 1878	38,741
Total	152, 211
Increase	5,747

In conclusion, it affords me great pleasure to state that the work of this bureau in all its branches is in a very satisfactory condition. The accounts of the Post-Office Department for the fiscal year, numbering over four hundred thousand, and involving more than two hundred million dollars of receipts and expenditures, have been promptly audited and settled, and the general accounts of the department closed to the 30th day of June, 1878.

I cannot too highly commend to your favor and confidence the deputy auditor, the chiefs of divisions, and the clerks and employés of this office, to whose fidelity, promptness, and efficiency in the discharge of their

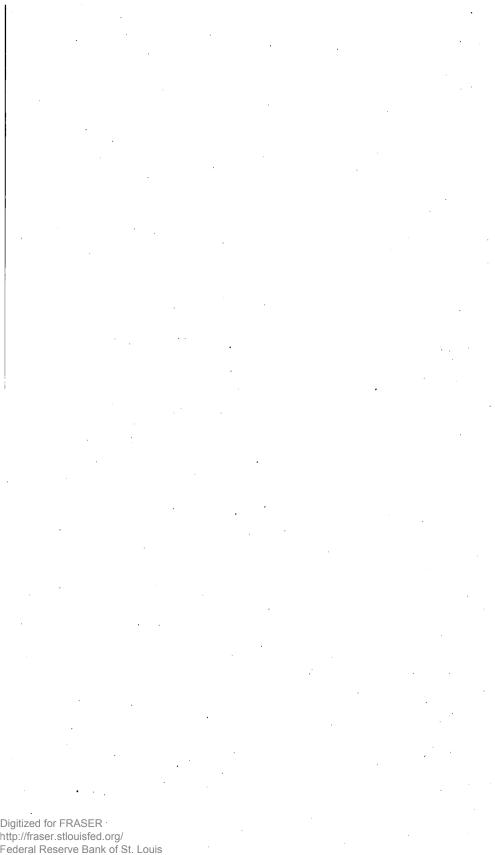

duties I am indebted for the gratifying results of the past year.

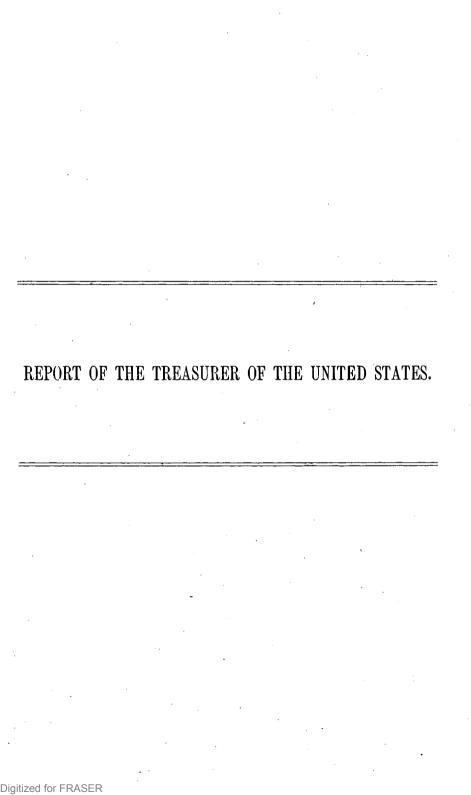

I am, sir, very respectfully,

J. M. McGREW,

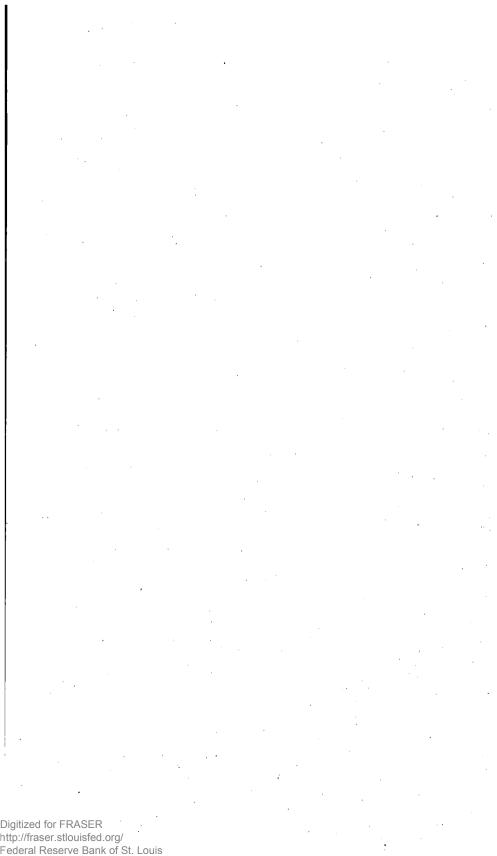

Auditor.

Hon. John Sherman, Secretary of the Treasury.

REPORT

OF

THE TREASURER OF THE UNITED STATES.

TREASURY OF THE UNITED STATES, Washington, November 1, 1878.

SIR: In compliance with departmental regulations, I have the honor to submit the following statements pertaining to the business of this office and the condition of the Treasury for the fiscal year ended June 30, 1878.

CONDITION OF THE TREASURY.

The following statement is given to show the resources of the Treasury and its demand liabilities on the 30th day of September, in 1876, 1877, and 1878:

Statement of liabilities and assets of the Treasury of the United States on September 30, 1876, 1877, and 1878.

•	September 30, 1876.	September 30, 1877.	September 30, 1878.

A STATE OF THE STA		Treat waters a fire	1 - 1 - 1 - 1 - 1 - 1 - 1 - 1 - 1

From the above statement it appears that the total resources—coin and currency—were, on September 30, in 1876, \$168,024,472.39; in 1877, \$243,681,111.25; in 1878, \$337,424,964.74.

The coin resources have steadily increased, under the prosecution of your policy of specie resumption, from \$67,586,705.95 on the above date in 1876, to \$433.585,072.24 in 1877, and to \$238,007.574.59 in 1878

in 1876, to \$133,585,072.24 in 1877, and to \$238,007,574.59 in 1878. There has been little change in the currency assets, except that they were larger in amount on the above date in 1877, on account of the failure of the appropriation for the military establishment in the second session of the Forty fourth Congress, which necessitated the withholding of payments to that branch of the service until the assembling of the Forty-fifth Congress in special session in October, 1877.

UNAVAILABLE FUNDS.

The total amount of unavailable moneys carried in the balances of the accounts kept in this office was as follows, viz:

June 30, 1877		\$29,625,883 88 29,622,241 27
The difference	 	3,642 61

arises as follows, viz: \$4,198.46 received from the First National Bank of Selma, Ala, which failed in 1867, less \$555.85, the deficiency resulting from the Winslow embezzlement. An account of the latter deficiency appeared in the report for the fiscal year 1877, although the amount had not at that time been carried to the statement of unavailable funds.

RETIREMENT OF LEGAL-TENDER NOTES.

At the date of the passage of the resumption act of January 14, 1875 (18 Stat., 296), which provided for the retirement of legal-tender notes equal to eighty per centum of national-bank notes issued, the outstanding legal-tenders amounted to \$382,000,000, and under the operation of that act there have been redeemed and destroyed notes to the following amounts:

For the year ended June 30, 1875		\$6, 228, 420
For the fiscal year 1876		5,999,296
For the fiscal year 1877		10,007,952
In July, 1877	\$670, 112	
August, 1877	1, 118, 056	
September, 1877	1,061,232	
October, 1877		
November, 1877	3, 150, 604	
December, 1877	1, 396, 512	
January, 1878	833, 352	
February, 1878	492, 400	¥
March, 1878	769, 312	
April, 1878	1, 167, 696	
		* *
Total for ten months ended April 30, 1878		13,083,316
Total retired from January 14, 1875, to April 30, 1878	-	35, 318, 984

By the act of Congress of May 31, 1878, forbidding the further retirement of legal-tender notes, action under the former act ceased. The amount of legal-tenders outstanding at that time amounted to \$346,681,016, at which volume they remain.

LEGAL-TENDER NOTES OUTSTANDING.

The following table shows the denominations of legal-tender notes in circulation June 30, 1877 and 1878. The odd cents therein arise from the redemption and partial payment of mutilated notes under the rules of the department:

Denomination.	1877.	1878.
One dollar Two dollars Two dollars Ten dollars Ten dollars Twenty dollars Titty dollars One hundred dollars Five hundred dollars Five hundred dollars Total Destroyed in sub-treasury in Chicago fire, denominations unknown	49, 338, 224 00. 64, 495, 717 00 62, 607, 197 00 35, 912, 910 00, 29, 410, 170 00 33, 884, 500 00 34, 585, 500 00 360, 764, 332 00	\$21, 169, 864 30 21, 190, 948 20 54, 589, 556 50 65, 113, 654 00 62, 560, 643 50 27, 345, 380 00 31, 817, 970 00 30, 880, 590 00 33, 012, 500 00 347, 681, 016 00 1, 000, 000 00

The retirement of legal-tender notes during the fiscal year 1878 under the resumption act was \$13,083,316. Of this amount, \$3,990,423 was in one dollar notes, and \$4,178,878 in two-dollar notes. No attempt was made, in carrying out the above act, to retire any particular denomination of notes. The destructions were made monthly from notes sent in for redemption by the public, which were held until they equaled 80 per cent. of the national currency issued during the month, and then destroyed.

As will be seen by the provisions of the legal-tender acts cited below, there was originally an attempt to regulate the issue of ones and twos to thirty-five millions of dollars in 1862, but in later acts and in the Revised Statutes it seems fully left in the discretion of the Secretary of

the Treasury.

The act of February 25, 1862 (12 Stat., 345), authorized the issue of \$150,000,000 in United States notes of denominations not less than five dollars each.

The act of July 11, 1862 (12 Stat., 532), authorized the issue of \$150,000,000 in United States notes, not more than \$35,000,000 of which

should be of lower denominations than five dollars.

The joint resolution of January 17, 1863 (12 Stat., 822), authorized the issue of \$100,000,000 in United States notes of denominations not less than one dollar.

The act of March 3, 1863 (12 Stat., 709), authorized the issue of \$150,000,000 in United States notes, including the \$100,000,000 authorized by the joint resolution of January 17, 1863, of denominations not less than one dollar.

Section 3571 of the Revised Statutes declares that "United States notes shall be of such denominations, not less than one dollar, as the Secretary of the Treasury may prescribe."

RESERVE FUND.

To maintain the outstanding legal-tender note circulation at its present volume, \$346,681,016, while there are daily redemptions, a reserve of United States notes is kept on hand at all times. All the notes delivered to this office daily by the Bureau of Engraving and Printing are deposited in this fund and charged to it at the time of delivery, and an amount equal to each day's redemptions of United States notes is each day taken from the reserve fund and issued, thus keeping the volume

outstanding at the amount required by law.

This fund is kept separate from all other money in a vault by itself. To this vault are an inner and an outer door, each with a combination lock and a time lock upon the outer door. The vault is usually opened once on each business day, for the purpose of replacing the amount of notes redeemed and destroyed on that day. It is in the custody of two officers, each having a combination unknown to the other, one of the outer door and the other of the inner door. On the 31st of October it contained, in United States notes of all denominations, \$63,455,605, complete and awaiting issue. They are put up in packages of 4,000 notes, and are taken out, when issued, in numerical order, in unbroken packages, as far as possible.

In the early years of the issue of paper currency, the reserve was not kept as a separate fund, except on the books of the office, but of late years no interchange of notes with the cash of the office is permitted. No notes now enter the reserve except as they come new from the Bureau

of Engraving and Printing.

STANDARD SILVER DOLLARS.

The act of Congress of February 28, 1878, required the coinage of silver dollars of the weight of four hundred and twelve and a half grains

troy of standard silver. The first coins under this act were received at this office from the mint in March, 1878, and were exchanged with the public for gold coin; the amount so exchanged at the mints and at this and other offices was \$1,042,027.

The total amount of standard silver dollars coined under the above act to date is \$18,282,500, of which amount there is in the mints and offices

\$13,359,877, and in circulation \$4,922,623.

Whenever it is permissible to exchange these coins for United States notes under the provision of law which authorizes the payment of transportation charges thereon from the silver-profit fund, they can be distributed very rapidly. There is a demand for them in many portions of the country where, from the locality, it is not possible that they are desired for any other purpose than for circulation in exchange for paper currency. At present, however, they are sent only to depositary banks and the offices of the Treasury, and are used in payment for silver bullion aud in payment to express companies on account of their charges for transportation of the coin. The largest payments of silver dollars have been made at New York and San Francisco, but the coins issued at these points immediately find their way back to the Treasury vaults, either as receipts from customs, or as deposits on account of silver certificates, or in payment of subscriptions to the 4 per cent. Ioan.

The following table shows the amount coined, on hand and outstand-

ing at the close of each month since the coinage commenced:

Date.	Coined.	On hand.	Outstanding.
March 31. April 30 May 31 June 30. July 31 August 31. September 30. SILVER CERTIFICATES.

The third section of the act above mentioned authorized the issue of silver certificates, which were, upon the passage of the act, prepared for issue at this office and at the offices of the assistant treasurers in New York and San Francisco in denominations of from ten dollars to one

The total amount issued to date is \$8,575,780: at Washing-

ton, \$461,380; at New York, \$346,000; and at San Francisco, \$7,768,400. There is, however, in circulation but \$1,577,380; the remainder having been paid into the Treasury through the custom-houses and not reissued. The certificates issued at San Francisco find their way at once to the New York custom-house. There is no demand for silver certificates in exchange for silver except at points where silver bullion is purchased by the department to be paid for in standard silver dollars.

The offices at Boston, Philadelphia, Chicago, and Cincinnati have been supplied with certificates from this office for issue at those points.

FRACTIONAL CURRENCY AND FRACTIONAL SILVER COIN.

The substitution of fractional silver coin for fractional currency has progressed during the year, though not with the rapidity of the former year. The amount of fractional currency redeemed since June 30, 1877, is \$4,191,934.15. Of this amount, however, \$1,118,526.19, during the present calendar year, was redeemed in United States notes.

The following table shows the retirement of fractional notes under the operation of the act of Congress approved April 17, 1876 (19 Stat.,

33), amounting to \$25,297,539.29:

Redemption of fractional currency.

Since April 18, 1876, there has been issued of fractional silver coin 39,728,166, and though the coinage has been suspended temporarily there is still a demand which is supplied from the stock on hand in this office and in the mints, which, together with that in other offices, amounts at this time to \$6,067,960.18. The amount paid out since June 30, 1877, to date is \$6,542,893. Estimating the loss of fractional currency at \$8,083,513.50, the figures reported by the commission appointed by you, there may still be issued, before the limit of fifty millions of dollars is reached, \$8,127,684.69 in exchange for fractional currency and \$2,144,-149.31 for currency obligations.

149.31 for currency obligations.

The amount of fractional silver paid out at the several offices of the Treasury from April 18, 1876, to the dates mentioned, is shown by the

following table:

MINOR COIN.

The following table shows the amount of minor coin of copper, nickel, and bronze in the various offices. The accumulation, which seemed excessive last year, has still further increased from \$157,000 on September 30, 1876, to \$870,000 in 1877, and now to \$1,410,898.50 in 1878, representing at least 150 tons of metal. There is a demand at this time for the bronze one-cent piece, which probably cannot be supplied without coinage. Of all other denominations there is an increasing supply in the vaults.

				denominations.

Office at—	Five - cent nickel.	Three-cent nickel.	Two - cent bronze.	One - cent bronze.	One - cent nickel.	One - cent nickel and bronze.	One - cent copper.	[Totals. 북한왕품

DEPOSITARY BANKS.

But little is said of the service rendered by the national banks in facilitating the collection of the public revenue and safely and economically transferring it to the vaults of the Treasury. The receipts of public money by the depositary banks during the fifteen fiscal years from 1863 to 1878 amounted to \$3,308,750,346.80, or over \$220,000,000 a year, of which only \$255,000 stands on the books of the department as unavailable by reason of the failure of any depository bank, and the government has security for a large portion of the latter sum. The banks deposit in the Treasury, without expense to the department, all sums drawn by the Treasurer, and upon all balances to the credit of public disbursing officers therein the banks pay a duty of one-half of one per cent. per annum to this office. The following is given to show the receipts, payments, and transfers of moneys in the transaction of public business through the depositary banks:

Fiscal years.	Receipts.	Funds transfer- red to deposi- tary banks.	Funds transfer- red to the Treas- ury by deposi- tary banks.	Drafts drawn on depositary banks.	Balances at close of years.

DUTY PAID BY NATIONAL BANKS.

Under section 5214 of the Revised Statutes, there has been assessed and collected by the Treasurer from national banks, since 1864, at an expense of not more than one tenth of one per cent., \$86,045,771.11, as

follows: on circulation, \$39,777,879.14; on deposits, \$40,332,341.43, and on capital, \$5,935,550.54.

By reference to Table XIII., appendix, it appears that from the beginning of the national banking system the amount realized from duty on circulation increased yearly with one exception up to 1874, since which time it has diminished about \$150,000 a year. The amount realized from duty on deposits increased yearly with two exceptions until 1875, since which time it has decreased about \$100,000 per annum, the decrease in the two items of circulation and deposits having been \$523,678.39 since the close of the fiscal year 1875. The revenue from duty on capital increased steadily every year until the calendar year 1877, during which there was a decrease of \$57,113.01.

The highest amount of duty on circulation was received for the six months ended December 31, 1873, being \$1,704,902.76. In the last six months it was \$1,492,224.57. The highest amount of duty on deposits was received for the six months ended December 31, 1875, being \$1,782,161.52. In the last six months it was \$1,622,862.24. The highest amount of duty on capital was received for the six months ended December 31, 1876, being \$341,986.96. In the last six months it was \$266,023.34. The total amount collected on the three items for the six months ended June 30, 1878, was \$3,379,252.07.

REDEMPTION OF NATIONAL-BANK NOTES.

The operations of the national bank redemption agency for the fiscal year again show an increased amount of work performed at a reduced expense. The number of national-bank notes redeemed, assorted, and charged to the banks of issue was 22,927,842, an increase of 182,294 over the number assorted in the preceding fiscal year. The expenses of assortment, under which head are included all of the expenses of redemption, with the exception of the charges for transportation, on the other hand decreased from \$167,704.05 to \$144,521.88, a diminution of \$23,182.17, or nearly 14 per cent. A saving was effected in every item of expense as compared with the preceding year. The reduction in salaries was \$14,115.05; in printing and binding, \$3,943.98; in stationery, \$728.10; in postage, \$3,716.66, and in contingent expenses \$678.38. The amount appropriated for salaries for the force employed in the Treasurer's office was \$117,736, of which \$114,282.75 was expended, and for the force employed in the office of the Comptroller of the Currency \$22,340, of which \$22,297.88 was expended, making a saving of \$3,453.25 in the former and of \$42.12 in the latter office. The expenses of assortment, in accordance with the rule adopted at the outset, were assessed upon the several national banks in proportion to the number of the notes redeemed for each. When computed in this manner the expense of assortment was \$6.303 for each thousand notes, as compared with \$11.37 for the fiscal year 1875, \$10.78 for the fiscal year 1876, and \$7.37 $\frac{3}{10}$ for the fiscal year 1877. It will be seen that there has been a steady decrease in the expense of assortment year by year since the first, and that the rate for the last year is but a little more than 55 per cent. of that for the first year. The gradual reduction of expense is represented by the series 20, 19, 13, 11.

This result has been achieved only by maintaining a careful oversight over the expenses; by the adoption from time to time of more economical methods, whenever they could be introduced without lessening the checks against errors and dishonesty; by curtailing the force whenever, through the increased efficiency of the employés, the work could be performed with a decreased number, and, above all, by retaining the services of tried and expert employés. Of the 97 persons now employed, 72 were appointed in the redemption agency during the first fifteen months after its organization, and nearly all of them had had experience on similar work, either in the department or in banks. Of the 25 since appointed, 20 had been employed for greater or less periods upon like duties in other branches, and all of the persons appointed during the incumbency of the present Treasurer, with a single exception, were transferred from other offices of the department, where they had proved their competency by faithful service.

In considering the rate for the expenses of assortment, it should be remembered that the assortment of national bank notes is peculiarly difficult by reason of the great number of banks (now 2,400) and of the similarity of the notes, and that the rate includes not only the bare cost of assorting the notes, but the salaries of all the clerks, book-keepers, counters, provers, messengers, and laborers employed in that branch of the Treasurer's office, and of a portion of the force employed in the office of the Comptroller of the Currency, as well as the cost of printing, binding, stationery, and other supplies.

While the number of notes handled shows an increase over the preceding fiscal year, the amount of money represented by them decreased from \$214,361,300 to \$203,416,400, in consequence of an increase in the proportion of notes of the smaller denominations redeemed and assorted. Of the amount assorted, \$151,786,600 was returned to the banks of issue as fit for circulation, and \$51,629,800 was unfit for circulation, and was delivered to the Comptroller of the Currency for destruction and replacement with new notes. The former was \$56,100, and the latter \$10,888,800,

less than during the preceding year.

The amount expended for charges for transportation was \$173,420.60, and was assessed upon the several national banks as heretofore, in proportion to the amount of their notes redeemed and assorted. When thus computed on the amount assorted, the average rate for express charges was 85½ cents for each \$1,000. The charges assessed include those for the transportation of \$210,490,437.56 in national-bank notes received for redemption, \$23,046,418.44 in United States notes returned therefor, and \$152,437,300 in notes fit for circulation forwarded to the banks of issue.

When computed on the amount transported, the average cost for transportation was 45 cents for each thousand dollars. The charges on United States notes forwarded to the Treasurer's office for credit of the five per cent fund and on incomplete currency forwarded to the banks by the Comptroller of the Currency are not embraced in the assessment. rates paid under the agreement with the express company, which has been in force since July 1, 1875, were, for national bank notes forwarded for redemption, 37½ cents for each \$1,000, or fraction thereof, to each express company over whose lines the remittances pass, and for each \$1,000 or fraction thereof in United States notes returned for bank-notes redeemed and in notes fit for circulation forwarded to the banks of issue, 25 cents to Adams Express Company and 35 cents to each other express company by which the remittances are transported. The aggregate assessment is \$317,942.48, or $\frac{14}{90}$ of 1 per cent. of the amount assorted, as against $\frac{20}{90}$ for the first year, $\frac{18}{90}$ for the second year, and $\frac{15}{90}$ for the third year.

The outstanding circulation of the national banks at the close of the

fiscal year was \$324,514,284. The cost of redemption, when computed upon this amount, was considerably less than one-tenth of one per cent. or less than \$90 per annum for a bank of \$90,000 circulation. weighed against the advantages flowing from a prompt and effectual system of redemption, this expense is scarcely worthy of consideration. These advantages consist not only in keeping the circulating notes of the banks clean and whole, but in providing a ready means of checking any tendency to redundancy in their issues—an advantage which will appear still more conspicuous when specie payments shall have been established—and of relieving the plethora of bank-notes in the money centers, which formerly existed during certain seasons of the year. discussing the present redemption system, it should not be forgotten that the law establishing it, in consideration of the burden imposed, relieved the banks from the obligation to maintain any reserve upon their circulation. The actual legal-tender reserve required to be maintained on circulation ranged from six per cent. for country banks to twenty-five per cent. for banks in the city of New York. With interest at six per cent. per annum, the expense of maintaining these reserves was from .36 to 1.5 per cent. upon the bank circulation, a burden from three and one-half to fifteen times greater than the expense of the redemption system. The act of June 20, 1874, seems, therefore, as a whole, to have reduced the burdens of the banks, while it has conferred a positive benefit upon them, in common with the rest of the community, in furnishing a prompt and inexpensive means of redeeming the bank-notes.

In addition to the amounts assorted and charged to the banks of issue, there were sorted out \$11,852,100 in notes of failed, liquidating, and reducing banks, as against \$24,439,700 during the preceding year.

A large share of the business of the redemption of national bank notes is effected through the offices of the assistant treasurers without any actual movement of money. Of \$212,780,335.81 bank-notes redeemed, \$75,361,427.23 was paid for by checks on the assistant treasurers in New York, Boston, and Philadelphia. Only \$23,046,418.44 in United States notes was forwarded by express in redemption of bank-notes, the entire remainder, amounting to \$189,733,917.37, being settled for by checks, credits in account, payments over the counter, or subsidiary silver coin forwarded at the expense of the mint. Of \$205,308,371.37 credited to the national banks in their five per cent. accounts, \$100,819,824.50 consisted of deposits with assistant treasurers, the proper entries being made on the Treasurer's books on receipt of the certificates of deposit.

Under the circular issued on the first of October last, requiring the parties making the remittances to defray the express-charges on all national-bank notes forwarded for redemption, redemptions have been considerably reduced; but the order has not been in force long enough to

warrant a conclusion concerning its permanent operation.

Of \$210,490,437.56 in bank notes received for redemption, \$80,527,000, or 38.26 per cent., was received from the city of Boston, and \$66,273,000, or 31.48 per cent., from the city of New York, nearly 70 per cent. of the entire redemptions having been received from these two cities. The monthly redemptions varied from \$12,025,805.15 in the month of March, to \$24,076,684.12 in the month of May. The receipts from New York were largest (\$10,805,000) in May and smallest (\$3,316,000) in December, while the receipts from Boston were largest (\$9,152,000) in December and smallest (\$2,992,000) in April.

The following table presents an interesting exhibit of the geographical distribution of the banks which issued the notes redeemed during

each of the four years since the establishment of the redemption system, and of the percentage of redemptions to the outstanding circulation of the banks in each State and section:

	1874–'7	5.	1875–'7	6.	1876-'7	7.	1877-'78	3.

Attention is invited to the remarkable increase between the fiscal years 1875 and 1878 in the redemption of notes issued by banks situated in the New England States. While the redemptions for banks situated in the Western States decreased in that period from \$23,537,960 to \$16,452,700, and for those in the Southern and Southwestern States from \$9,335,170 to \$7,707,500, and while the redemptions for the banks situated

in the Middle States increased only from \$48,208,905 to \$53,920,100, the redemptions of the notes issued by the New England banks increased from \$48,790,810 to \$124,922,400. The redemptions for Massachusetts banks increased in the four years from \$26,641,170 to \$80,470,900, or more than threefold, while those for the banks of New York State increased only from \$22,675,035 to \$26,939,100. The redemptions for the New England States have shown a steady annual increase from the beginning. During the last fiscal year the redemptions for the New England banks constituted more than 61 per cent., and those for the Massachusetts banks nearly 40 per cent., of the aggregate redemptions. The redemptions for the New England banks were 110 $\frac{1}{5}$ per cent. of their circulation; for the Massachusetts banks, 131 per cent.; for those in the Middle States, 48½ per cent.; for those in New York State, 5½ per cent.; for those in the Western States, 263 per cent.; for those in the Southern and Southwestern States, 284 per cent.; and for those in the Pacific States and Territories, $24\frac{4}{3}$ per cent. The cost of the redemption system is consequently much greater for the New England banks than for those in the West and South. For banks of \$90,000 circulation in Massachusetts, the average redemptions during the last year were \$117,900, and the average expense of redemption \$184.27; while for banks of like circulation in the West, the average redemptions were \$23,700, and the average cost \$37.04, or about one fifth as much. The above facts indicate that the circulation of the New England banks is largely local, and that it flows into the money centers much more rapidly than the circulation of banks situated in other sections.

The following statement shows the amount and percentage of notes received for redemption from the principal cities during each of the last four fiscal years. It will be observed that the receipts from Boston have increased between the years 1875 and 1878 from \$17,598,000 to \$80,527,000, and that those from New York City have fallen off from \$80,925,000 to \$66,273,000.

MUTILATED, STOLEN, AND COUNTERFEIT CURRENCY.

The deductions, on account of mutilations, from the face value of currency redeemed, to the close of the fiscal year were as follows: from legal-tender notes \$133,904.25; from fractional currency, \$139,842.79, and from interest notes \$872, in all \$274,619.04, of which \$14,869.09 was obtained by deductions during the year. The deductions from mutilated notes of national banks winding up or reducing circulation, on \$82,953,216, the total redemptions to the end of the year, amounted to \$1,098.25, of which \$137.50 accrued on \$12,010,013, the amount redeemed during the year. There were thrown out of stolen, pieced, and rejected bank-notes pre-

sented for redemption during the year \$3,997.13. Of counterfeits, there were branded and rejected \$8,538 on legal-tender notes, \$3,923.85 on fractional currency, and \$4,008 on national bank notes.

TRANSFERS OF GOLD COIN.

During the months of June, July, and August last, the amount of coin in the sub-treasury at San Francisco increased from \$5,194,500 on the 1st of June to \$12,409,400 on the 10th of August, and as there was lack of vault-room in that office it became necessary to transport a portion of the coin to New York. There being no contract with any express company under which the transfer could be made, under your direction, by virtue of the authority vested in you by section 3640 Revised Statutes, one million dollars was taken to the sub-treasury at New York during the month of August, at an expense of sixty cents per \$1,000 for postage, it being brought over as third-class postal matter for one cent per ounce, or less than one-sixteenth of one per cent. There was also transferred by telegraphic transfer to New York \$1,550,000; of this amount \$1,300,000 was transferred without expense, and \$250,000 at one-tenth of one per cent. It is hoped that all the surplus coin in the sub-treasury at San Francisco may be transferred by wire, which does not take the gold from that city, but simply involves the exchange of gold there for gold held by parties in New York who desire to have it transferred to San Francisco.

SALE OF EXCHANGE.

Exchange was sold at par during the year to the amount of \$1,655,000: at New Orleans, \$1,000,000; at San Francisco, \$320,000, and at Tucson, Ariz., \$335,000. The office of the depositary at the latter place is entirely supplied with funds by the sale of exchange, and the difficulties in the way of getting currency to the San Francisco office are partially obviated in like manner.

PAYMENT OF REGISTERED INTEREST BY CHECK.

The number of interest checks, funded loans of 1881 and 1891, the consols of 1907, and the three-sixty-five loan of the District of Columbia, drawn during the year was greatly in excess of past years, numbering this year 72,560 as against 21,853 last year. The increase in the business of the office and in the number of signatures required is very marked. The number of drafts and checks issued during the year, including interest checks, was 160,795.

EXAMINATION OF INDORSEMENTS.

With the great number of drafts and checks annually issued by the Treasurer and returned to him after payment, but little difficulty by reason of irregular indorsements occurs, except with drafts issued upon warrants, many of which are in settlement of claims, passing through the hands of agents and attorneys before payment, and payable by the one hundred and thirty assistant treasurers and depositaries. Early in the year a system of strict examination was instituted to ascertain the genuineness of indorsements of drafts before payment at this office, and as soon as received from other offices after payment, the means used being a comparison with genuine signatures of payees on file in the department.

In many instances it happens that paid drafts are found not to bear the genuine indorsement of the payees, which arises in some instances from a popular delusion that if, by the request of the payee, or with his knowledge, his name is signed by another it has the same validity as his autograph; in others, from disagreement between clients and attorneys; and in others still, from downright fraud.

In the past, such cases have usually slumbered so long that when demand has been made by the rightful claimant no criminal prosecution could be had, and the last indorser, usually a bank, has been obliged to refund, though by lapse of time not able to fall back upon prior indorsers.

For instance, a certain claim-agent in 1865 took for collection, among others, the claim of a person for services as a scout for the Union Army during the war; the claimant could not write; after receiving notice from the Quartermaster General of the allowance of \$1,600, the agent, by misrepresentation, induced the claimant to take about \$300 for the claim, and by means of a forged indorsement collected the larger amount through a Baltimore bank. After the lapse of more than ten years the fraud was discovered, the payee demanded his money, the bank was sued, and the amount recovered with interest.

In another case a bank officer from a distant point received the custody of certain warrants for large amounts payable to various parties who were not in the city, and in a few minutes presented the warrants for payment with the ink yet damp upon the indorsements; payment

was of course refused.

Another case, showing what exertions are made to avoid punishment, came up recently. A fraudulent power of attorney was presented, the forged signature to which was the joint act and in the handwriting of two persons, one writing the proper name and the other the surname, for the purpose, if detected, of escaping the penalty for forgery by that device.

Over three hundred irregular indorsements were returned for amendment after payment, besides those in which the irregularities were discovered before payment. Of the above number very few, however, were fraudulent.

SINKING FUND OF THE DISTRICT OF COLUMBIA.

By the seventh section of the act of Congress of June 11, 1878, it was enacted—

That the offices of sinking-fund commissioners are hereby abolished, and all duties and powers possessed by said commissioners are transferred to and shall be exercised by the Treasurer of the United States, who shall perform the same in accordance with the provisions of existing law.

The books, files, and funds in the possession of the commissioners were transferred to this office, and the sinking-fund office was removed and made a part of this office. This adds many duties heretofore performed by four prominent citizens of the District, to those already devolved upon the Treasurer. A full statement of the debt of the District and of the provisions of law pertaining thereto, accompanied by such suggestions as to the requirements of law as occur to me, will be submitted to you hereafter.

CONCLUSION.

Whatever you may find satisfactory in the transaction of the business of the office is due in a great degree to the fidelity of the Treasurer's subordinate officers and the faithfulness with which, with very few exceptions, those who labor at the desks, counters, and tills of the

office have performed their duties.

Recent accessions of business to this office, notably the payment of registered interest by check, the redemption of the notes of national banks, the payment of called bonds, the accounts of the Freedman's Bank and of the District of Columbia, while affecting the interests of many individuals, have been attended to, I believe, with the least possible inconvenience to the public, and all the transactions of the office without loss to the government.

In the tables of the appendix will be found statements of the condition of the public accounts and of the current business of the year, and statistical information concerning the currency and kindred matters,

which are submitted for your consideration.

Very respectfully,

JAS. GILFILLAN, Treasurer United States.

Hon. John Sherman, Secretary of the Treasury.

The foregoing, Statement II. shows the balances and movement of moneys of the United States for the Post-Office Department, as does Statement I. for the General Treasury.

All Receipts and Pay-Warrants issued by the Postmaster-General are received and registered in the Office of the Treasurer of the United States, on account of the Post-Office Department, which is credited with the amount covered in by the former; the latter, after having been signed by the Treasurer or Assistant Treasurer, are returned to the Post-Office Department, whence they are mailed to the payees as drafts upon which payment is to be made. When paid, they are returned as vonchors by the officers paying, and, after verification of indorsements, are charged to the United States, on account of the Post-Office Department, in the Treasurer's Quarterly Account, rendered to the Auditor of the Treasury for the Post-Office Department.

Copies of the Treasurer's Quarterly Account with the United States on account of the Post-Office Department are rendered annually to the Senate and House of Representatives.

The following is a summary of the Treasurer's Quarterly Account with the United States on account of the Post-Office Department for the fiscal year 1937.

III.-DOCUMENTS ISSUED, RECEIVED, AND EXAMINED.

The documents enumerated below, necessary to the proper keeping of the accounts, were received or issued by this office during the fiscal year, viz:

10,455 Transcripts of Accounts received, examined, and ontered in detail.

28,964 Pay-Warrants received, journalized, registered, and entered in Quarterly Account.

29,638 Drafts issued, examined, registered, and delivered or mailed.

7,080 Notices of Drafts issued, examined, and mailed to Depositaries.

23,710 Letters issued in transmittal of Drafts.

29,425 Paid Drafts received, and indorsements examined and verified.

313 Drafts returned for perfection of indorsements.

500 Transfer Orders issued, navable by express at government expense.

313 Drafts returned for perfection of indorsements.

500 Transfer Orders issued, payable by express at government expense.

2,008 Transfer Letters issued, payable without expense to the government.

2,048 Transfer Letters issued, payable at government expense.

15,296 Certificates of Deposit of transfer of funds and vonchers received and verified.

2,870 Daily Statements of Liabilities and Assets of Sub-Treasuries and Depositories.

664 Statements and Reports to the Secretary of the Treasury.

1,065 Manuscript Letters.

154,036 total number of documents, &c., manipulated in connection with the accounts.

Transcripts of Account with the Treasurer of the United States are received from the Treasury of the United States (Cash Division), Washington, D. C.; the several Sub-Treasuries, Depositories, Mints, and Assay-Offices of the United States, and from National Banks, designated by the Secretary of the Treasury as depositaries of the United States, daily from some and at stated periods from others. For the payment of all moneys out of the Treasury, directions are issued by the Treasurer of the United States on the Pay-Warrants of the Secretary of the Treasury.

Treasury Drafts that have been paid are forwarded to the Treasurer as vouchers to accompany the transcript of the account in which he is charged with the payment of the same.

Transfer Orders are issued under the authorization of the Secretary of the Treasury, and, for the most part, used in transferring funds from one efficer of the Treasury of the United States to another. The funds are generally delivered by express.

Transfer Letters are issued by the Treasurer on National Bank depositaries, and are used for the purpose of transferring funds to the several Sub-Treasuries, the expense of attending such transfers being borne by the banks.

The Daily Statements enable the Treasurer to transfer moneys, as they may be needed, from one office to another, and give him such other information as is needed for intelligent control over the accounts of the General Treasury, Post-Office Department, Transfer Accounts, Redemptions, &c.

A. Daily Cash Statement is rendered to the Secretary of the Treasury, showing the available coin and currency balances.

and currency balances.

REPORT

of

THE REGISTER OF THE TREASURY.

TREASURY DEPARTMENT, REGISTER'S OFFICE, November 1, 1878.

1,041,391,550 00

SIR: I have the honor to submit herewith a report in detail of the work performed in the several divisions of this bureau during the year ended June 30, 1878.

LOAN DIVISION.

The total number of United States coupon and registered bonds issued during the year was	318, 942 287, 953
Amount issued: Original issue (coupons and registered)	\$156, 153, 700 00 64, 054, 100 00 241, 910, 113 15
Total	462, 117, 913 15
Amount canceled: Coupon bonds converted into registered Registered bonds transferred Actual redemptions, coupon and registered (per record of this office).	64, 054, 100 00 241, 910, 113 15 116, 484, 900 00
Total	422, 449, 113 15
Amount of canceled coupon bonds turned over to committee for destruction	107, 366, 050 00
A synopsis of the vault account shows that there was on hand July 1, 1877, including bonds in hands of European agent	544, 239, 950 00
Coupon bonds Registered bonds Registered 3.65 bonds	107, 195, 000 00 388, 506, 600 00 1, 450, 000 00
Total	
Amount disposed of during the year: Coupon bonds issued Registered bonds issued Registered 3.65 bonds issued Bonds delivered for destruction:	67, 858, 700 00 392, 812, 650 00 1, 365, 000 00
Coupon bonds	26, 862, 800 00 3, 562, 150 00 133, 000 00
Coupon bonds	75, 908, 150 00 458, 718, 350 00 771, 750 00 13, 399, 000 00

The daily average of issue for the year has been about 1,000 bonds and one and a half millions in amount.

During the first quarter of the present fiscal year the total issue of 4-per-cent registered bonds amounted to \$46,298,700, against \$15,316,950 for previous quarter. Number of bonds used, 25,400, against 19,264 for preceding quarter.

The proportion of the three smaller denominations in the issue of this

loan thus far has been nearly double that of the larger ones.

The \$1,075,000,000 of registered stock now outstanding is represented by 68,000 accounts, requiring 150 ledgers in actual use, beside journals and auxiliary books. The quarterly dividends on the three funded loans falling due at different dates, together with the 10-40 and 6 per cents, now require the preparation of a schedule of interest each consecutive month of the year. The consolidated abstracts for January and July comprise about 1,500 printed pages, and those of the funded loans some 1,600 pages. Without the co-operation of the Treasury printing-office t would be quite impossible to prepare the schedules in the limited time allowed for that purpose.

Federal Reserve Bank of St. Louis

NOTE AND COUPON DIVISION.

At the close of the fiscal year ending June 30, 1878, the employés of this division consisted of twenty-eight clerks, eight males and twenty females, and two messengers.

The whole number of clerks employed during the year is forty one,

ten males and thirty-one females.

The average number per month during the year is twenty-eight, eight

males and twenty females.

The following consolidated statement exhibits the character and amount of work accomplished during the fiscal year ending June 30, 1878:

Redeemed, exchanged, and transferred United States bonds, with coupons attached, examined, registered, and scheduled for destruction.

Authorizing act.		Amount.	Number of coupons.	
June 30, 1864 March 3, 1865 July 17 and August 5, 1861 March 3, 1863 February 25, 1862 March 3, 1865, consols March 3, 1865, consols 1867 Funded loan, 4½ per cent., July 14, 1870, and January 20, 1871 June 20, 1874, District of Columbia	71, 003 1, 890 418 3, 368 22, 835 23, 885 19, 437	\$22, 821, 500 49, 365, 050 756, 550 259, 900 1, 046, 600 9, 370, 900 7, 837, 200 17, 434, 450 5, 031, 000	638, 152 1, 222, 827 29, 777 5, 870 52, 832 374, 665 495, 035 1, 078, 522 1, 449, 144

Total	38, 348, 545	82, 370, 525

TONNAGE DIVISION.

The total tonnage of the country exhibits a decrease of 29,835 tons, the registered tonnage having increased 17,854 tons, the licensed tonnage (under 20 tons) 817 tons, while the enrolled tonnage has decreased 48,506 tons.

The actual decrease is believed to be about 29,660 tons; this amount being the excess of the losses over the gains during the year.

The aggregate has been reduced by vessels laid up and not redocumented, rebuilt, readmeasured, used for inland trade and other purposes and sold to the United States Government.

Below are given the totals for the last two years:

		877.	1878.	
	Vessels.	Tons.	Vessels.	Tons.
Registered. Enrolled and liceused.	2, 988 22, 398	1, 611, 193 2, 631, 407	3, 037 22, 227	1, 629, 047 2, 583, 717
Total	25, 386	4, 242, 600	25, 264	4, 212, 764

The comparison of the different classes of vessels is as follows:

;	18	377.	1878.		
	Vessels.	Tons.	Vessels.	Tons.	
Salling vossels Steam vessels Canal boats	18, 081 4, 395 996	2, 580, 389 1, 171, 196 81, 395	17, 523 4, 472 1, 071	2, 521, 319 1, 167, 678 88, 691	
Barges. Total	1, 914 25, 386	4, 242, 600	25, 264	435, 076	

It may be seen from the foregoing that the canal-boat tonnage has increased 7,296 tons, and the barge-tonnage 25,456 tons, while the sailing-tonnage has decreased 59,070 tons, and the steam-tonnage 3,518 tons.

The proportion of the sailing tonnage registered is 58 per centum, and the steam-tonnage 15 per centum.

SHIP BUILDING.

The following table exhibits the class, number, and tonnage of the vessels built during the last two fiscal years:

	1877.		1878.	
	Vessels.	Tons.	Vessels.	Tons.
Sailing-vessels Steam-vessels Canal-boats Barges	581 265 29 154	106, 331 47, 514 3, 022 19, 725	532 334 19 373	106, 06 7 81, 86 0 1, 90 8 45, 669
Total	1, 029	176, 592	1, 258	235, 504

From the foregoing it appears that the amount built during the past year was more by 58,912 tons than that of the preceding year.

The tonnage built during the last two years in the several grand divi-

sions of the country is shown below:

	18	1877.		1878.	
	Vessels.	Tons.	Vessels.	Tons.	
Atlantic and Gulf coasts. Pacific coast Northern lakes Western rivers	. 88	120, 278 12, 718 8, 903 34, 693	634 63 301 460	143, £05 11, 333 11, 438 68, 928	
Total	1, 029	176, 592	1, 258	235, 504	

The following table exhibits the iron tonnage built in the country since 1868:

	1868.	1869.	1870.	1871.	1872.	1873.	1874.	1875.	1876.	1877.	1878.
Sailing-vessels Steam-vessels	2, 801	1, 039 3, 545	679 7, 602	2, 067 13, 412	12, 766	26, 548	33, 097	21, 632	21, 346	5, 927	26, 960
Total	2, 801	4, 584	8, 281	15, 479	12, 766	26, 548	33, 097	2!, 632	21, 346	5, 927	26, 960

Tables showing the amount of iron tonnage outstanding may be found in the appendix to the Report on Commerce and Navigation.

THE FISHERIES.

The tonnage engaged in the fisheries during the last two years is as llows:

Fisheries.	187	7	1878.	
Fisheries.	Vessels.	Tons.	Vessels.	Tons.
Cod and mackerel fisheries. Whale fisheries	2, 288 179	91, 085 40, 593	. 2, 435 182	86, 546 39, 700

Below is shown the amount of tonnage employed in the cod and mackerel fisheries, with the per centum of each State:

States.	Tonnage.	Per cent.
Maine		24. 9
New Hampshire Massachnsetts	1, 218 49, 272	1. 4 56. 9
Rbode Island Jounecticut	2, 996 4, 665 5, 677	3. 4 5. 4 6. 0
New York New Jersey Pennsylvania	25	0.1
Feliorida Alifornia	61 1, 690	2: (
Total	86. 546	100

This shows a decrease of about 5 per cent. during the year. The tonnage employed in the whale fisheries is given below:

		7.	187	8.
Customs districts	Vessels.	Tons.	Vessels.	Tons.
Boston, Mass. Barnstable, Mass. Edgartown, Mass New Bodford, Mass. New London, Conn San Francisco, Cal	3 140 13	2, 036 634 36, 121 1, 670 132	4 23 3 141 11	423 2, 209 634 34, 882 1, 552
Total	179	40, 593	162	39, 700

Of the above, nearly 88 per cent. belongs at New Bedford. Complete tables showing the various classes of tonnage may be found in the appendix to this report.

DIVISION OF RECEIPTS AND EXPENDITURES.

The following statement exhibits the work of this division for the year ending June 30, 1878:

9		
The number of warrants registered during the year for civil, diplomatic, miscellaneous, internal-revenue, and public-debt expenditures and re-		•
payments was	22,145	
payments was	23,832	
Decrease		1,687
The number of warrants registered for receipts from customs, lands, internal revenue, direct tax, and miscellaneous sources was	10, 924	•
In the preceding year	10,829	
Increase		95
The number of warrants registered for payments and repayments in the		
War, Navy, and Interior (pension and Indian) Departments was	11,332	
In the preceding year	13, 453	
Decrease		2,121
The number of drafts registered was	30, 112	,
In the preceding year	35, 878	
Decrease		5.766
The number of journal pages required for the entry of accounts relating to the civil, diplomatic, internal-revenue, miscellaneous, and public-		000
debt moving and other differences, the phone-	F 007	
debt receipts and expenditures was:	5,087	
In the preceding year	5,188	101
Decrease	10.000	101
The number of certificates furnished for settlement of accounts was		
In the preceding year		
Decrease		252
The number of accounts received from the First and Fifth Auditors and		
Commissioner of General Land Office was		•
In the preceding year		
Decrease		1,260
•		

In the appendix will be found a statement of the receipts and expenditures of the government, as required by the standing order of the House of Representatives of December 30, 1791, and section 237 of the Revised Statutes; also, statements of the amount of money expended and number of persons employed, and the occupation and salary of each person at each custom-house, as required by section 258 of the Revised Statutes.

Very respectfully, your obedient servant,

G. W. SCOFIELD, Register.

Hon. John Sherman, Secretary of the Treasury.

APPENDIX.

Statement of the receipts of the United States for the fiscal year ending June 30, 1878.

LIABILITIES OF THE UNITED STATES TO INDIAN TRIBES, UNDER TREATY STIPULATIONS.

DEPARTMENT OF THE INTERIOR, Washington, September 18, 1878.

SIR: I have the honor to transmit herewith a statement showing the present liabilities of the United States to Indian tribes under treaty stipulations, as per request of your letter of the 11th instant.

A copy of the communication of the Commissioner of Indian Affairs, dated 17th instant, forwarding statement to the department, is also

inclosed.

Very respectfully,

C. SCHURZ, Secretary.

The Honorable the SECRETARY OF THE TREASURY.

DEPARTMENT OF THE INTERIOR,
OFFICE OF INDIAN AFFAIRS,
Washington, September 17, 1878.

SIR: I have the honor to inclose herewith statement showing the present liabilities of the United States to Indian tribes, under treaty stipulations, to be forwarded to the Hon. Secretary of the Treasury, as per his letter of request dated the 11th instant, referred by the department same date.

Very respectfully,

E. A. HAYT, Commissioner.

The Honorable the Secretary of the Interior.

ABSTRACT REPORT

OF THE

SUPERINTENDENT UNITED STATES COAST SURVEY.

UNITED STATES COAST SURVEY OFFICE, Washington, October 21, 1878.

SIR: I have the honor to transmit a brief statement of the progress made in the survey of the Atlantic coast, Gulf of Mexico, and Pacific coast of the United States, during the fiscal year ending June 30, 1878. My annual report will contain, as usual, the details pertaining to the

several classes of work herein recapitulated.

The geodetic and other operations of the fiscal year include soundings in the seaward approaches of Mount Desert Island, off the coast of Maine, and, in that vicinity, topographical surveys at the head of Frenchman's Bay and Blue Hill Bay; hydrography of the vicinity of Deer Isle and Isle au Haut, and tidal observations in Penobscot entrance; geodetic work at Gunstock Mountain and at Guilford, for determining geographical points in New Hampshire; triangulation for the harbor commissioners' survey of Boston upper harbor; determination of the positions of lighthouses on the coast of Massachusetts; development of the action of seacurrents as affecting navigation across the Gulf of Maine; tidal observations at Providence, R. I.; shore-line survey and soundings in Duck Island Harbor, Connecticut; detailed topographical survey of the north and west approaches to New Haven, Conn., and of the western shore of Jamaica Bay, including Rockaway Inlet; survey of Coney Island and of the shores of Sheepshead Bay and Gravesend Bay, Long Island, N. Y.; hydrography of Rockaway Inlet and of the adjacent parts of Jamaica Bay; pendulum observations at New York City; tidal observations at Governor's Island and at Sandy Hook; topography of the shores of Hudson River near Peekskill, N. Y.; tidal bench-marks at Stuyvesant and Albany, established by lines of level; primary triangulation connected with geodetic stations in New Hampshire, Vermont, and Massachusetts; latitudes and longitudes for the State commissioners in adjustment of the boundary-line between New York and Pennsylvania; geodetic points determined in the northern part of New Jersey and in Eastern Pennsylvania; latitude, longitude, and the magnetic elements at Harrisburg; points determined and special observations of tides and currents in the Delaware River at and near Philadelphia; triangulation for light-house positions in Delaware Bay; topographical survey continued eastward of Norfolk, Va.; tidal observations at Fort Monroe; special observations in the waters of Chesapeake Bay in regard to salinity and density; benchmarks along the Potomac near Washington, D. C., for comparing floodlevels; magnetic declination, dip, and intensity determined at Washington; lines with spirit-level run between Hagerstown and Cumberland, Md.; primary triangulation at stations on the Blue Ridge, Va.; marine notes derived from examinations between Cape Henry and Cape Fear, for the Atlantic Coast Pilot; positions of life-saving stations between

Cape Henry and Cape Hatteras, determined and marked on sheets of the survey; topography of the shores of Cape Fear River below Wilmington, N. C.; primary triangulation between Kent Island base line, Md., and the base near Atlanta, Ga., closed at stations in North Carolina; hydrography of the coast of South Carolina, above Murrell's Inlet, including Little River; coast examinations between Fernandina, Fla., and the Dry Tortugas, and marine notes compiled for publication; tidal observations at Fernandina; hydrography of the eastern coast of Florida, from Mosquito Inlet southward to Cape Cañaveral; survey of the Saint John's River, Florida, extended southward to the vicinity of Tocoi, and of Indian River to the neighborhood of Cape Malabar; hydrography of Charlotte Harbor and triangulation of Sarasota Bay on the gulf coast of Florida; survey of Crooked River adjacent to Saint George's Sound, and supplementary soundings in Duer's Channel and off Light-House Point; deep-sea soundings, with observations for temperature and density, in the waters of the Gulf of Mexico; triangulation, topography, and hydrography of Barataria Bay, Louisiana, nearly completed; continuous record of the water-level of the Mississippi at New Orleans; survey of the river continued at Donaldsonville, Natchez, Vicksburg, Greenville, and Helena; latitude and longitude determined at the same places; triangulation continued in Northern Alabama, and stations selected in Northern Mississippi; reconnaissance along the coast of Louisiana and Texas, for triangulation between Vermilion Bay and Galveston Bay; triangulation of Laguna Madre, Texas, extended southward of Baffin's Bay; magnetic declination, dip, and intensity determined at Dollar Point, San Antonio, Hempstead, and Groesbeck, Tex., and at Vinita, in Indian Territory.

On the Pacific coast of the United States, and at points intermediate between the eastern coast and western coast, the operations of the fiscal year include hydrography of the bar and of parts of the harbor of San Diego, Cal.; triangulation for determining the geographical positions of San Clemente Island and Santa Barbara Island; soundings in approaches to the Pacific coast from Point Dume westward to Santa Cruz Island; topographical survey continued on Catalina Island; soundings in its western approaches and between Santa Rosa Island and Point Conception; topography of the coast in the vicinity of Point Arguello, and from Ynez River northward toward Point Sal; and of the coast north and south of Point Sur; tidal observations at Sancelito in San Francisco Bay; supplementary observations on the horizontal angles recorded at the primary stations on Mount Helena and Mount Diablo, California; selection of points for primary triangulation along the coast between Point Arenas and Cape Blanco; hydrography of the approaches to Columbia River, Oregon, and detailed survey of the shores and channel between Mount Coffin and Kalama; selection of points for primary triangulation in Washington Sound and across the Strait of Fuca; sites for base lines examined in the Willamette Valley, Oregon, and on Whidbey Island, Washington Territory; hydrography of Admiralty Inlet; survey of the shores of Puget Sound from Commencement Bay to Budd's Inlet, and of the northern part of Hood's Canal; inspection of topography in the field in this section; compilation of the titles of charts, &c., illustrating the coast features and hydrography of Alaska.

At stations of the geodetic connection between the Atlantic coast triangulation and that of the Pacific coast, and at others occupied for determinations of latitude, longitude, and the magnetic declination or variation of the compass, the operations include observations for latitude and longitude at Memphis and Nashville, Tenn.; at Cairo, Ill.; at Hick-

Digitized for FRASER

man and Paducah, Ky.; and telegraphic exchanges by signals at Nashville for the longitude of places along the Mississippi River, as already recited; determination of the magnetic elements at Nashville, and of latitude and azimuth near Lebanon, Tenn.; stations selected in Kentucky for the triangulation between Cumberland Gap and the Ohio River; and in Ohio, for geographical positions between Athens and Columbus; also in Southern Illinois and near Madison, in Wisconsin; the magnetic elements determined at the last-named place, and also at La Crosse; at Minneapolis, in Minnesota; at Sibley, Des Moines, Davenport, and Keokuk, in Iowa; at Omaha, in Nebraska; and at Lawrence, in Kansas; latitude and longitude determinations at Summit Station in Nevada.

Progress commensurate with the field-work has been made in the Coast Survey Office, in which the work comprises the reduction and discussion of all observations; the preparation for publication of the records and results; the drawing of hydrographic charts from the original notebooks, and of topographical and hydrographic sheets for publication; the engraving, electrotyping, printing, and issue of the same, and the

repairs of instruments used in the survey.

Tide-tables for the principal ports of the United States for the year 1879 have been published; the drawing of seventy-eight charts has been in progress, forty-two have been completed, and of that number twenty-

one have been issued by photolithography.

Seven copper plate engraved charts have been completed, and six others are in hand, exclusive of one hundred and thirty-five plates on which additions have been engraved. Twenty-one thousand six hundred and twenty-three copies of charts have been issued within the year, and upwards of one thousand copies of the annual reports from the office. The second volume of the Atlantic Coast Pilot is now in course of publication.

Respectfully submitted.

C. P. PATTERSON, Superintendent.

Hon. John Sherman, Secretary of the Treasury.
