#### OPERATIONS OF THE TREASURY.

The report of the Treasurer of the United States¹ shows that the total assets of the Treasury on June 30, 1895, were \$842,148,189.84, an increase of \$37,293,436.53 during the fiscal year. In this aggregate is included \$28,101,644.91 on deposit with the States under the law of 1836, together with \$1,418,822.88 of other unavailable funds. The deduction of these sums leaves \$812,627,722.05 as the available assets, against \$775,310,559.50 on June 30, 1894. The amount of gold, silver, and United States notes on deposit on account of outstanding certificates and Treasury notes decreased during the year from \$616,155,820 to \$579,247,863, and the remaining assets, being those available for the general uses of the Treasury, increased from \$150,154,739.50 to \$233,379,859.05.

According to the revised estimates the total stock of money at the close of the fiscal year was \$2,398,607,420, of which \$796,638,947 was in the Treasury and mints, and \$1,601,968,473 in circulation. The only important changes now going on in the composition of the currency is in the stock of gold, which is affected by domestic production and consumption, as well as by imports and exports, and in the Treasury notes issued under the act of 1890, which have been canceled and retired since August, 1893, when redeemed in silver dollars.

#### COINS AND COINAGE-PRECIOUS METALS.

The report of the Director of the Mint<sup>2</sup> shows the operations of the mints and assay offices during the year, together with statistics of foreign countries relative to the production, coinage, and monetary condition of each.

#### Deposits and Purchases.

The value of the gold deposited at the mints and assay offices during the fiscal year 1895 was \$87,482,089.56, of which \$65,161,067.28 were

<sup>&</sup>lt;sup>1</sup>See Appendix, p. 3. 
<sup>2</sup>See Appendix, p. 146.

original deposits, and \$22,321,022.28 were redeposits. The original deposits were classified as follows:

Domestic bullion	\$44, 371,	949.	83
Mutilated domestic coins			
Foreign material (consisting of bullion and coin)	16, 387,	049.	81
Old plate and jewelry	3, 213,	809.	<b>4</b> 3

The value of the silver deposited was \$15,714,365.86, of which \$15,234,700.35 were original deposits, and \$479,665.51 were redeposits. The original deposits were classified as follows:

Domestic bullion	\$8,804, 363. 43
Mutilated domestic coin (silver dollar valuation), including 451 trade	
dollars	3, 899, 352. 12
Foreign material (consisting of bullion and coin)	1, 780, 923. 64
Old plate, jewelry, etc	750, 061. 16

The total amount of silver bullion purchased for subsidiary coinage under the provisions of section 3526 of the Revised Statutes of the United States during the year was 287,530.64 fine ounces, costing \$190,952.21.

#### Coinage.

The coinage executed at the mints during the fiscal year, aggregated 59,611,112 pieces, of the value of \$53,715,549.62, as follows:

Description.	Pieces.	Value.
Gold	4, 035, 205 3, 956, 011 16, 532, 594 35, 087, 302	\$43, 933, 475. 00 3, 956, 011. 00 5, 113, 469, 60 712, 594. 02
Total	59,611,112	53, 715, 549. 62

In addition to the above there were coined for the Government of Ecuador, \$900,000 in silver twenty-cent pieces.

The silver dollar coinage of \$3,956,011 during the fiscal year, was from bullion purchased under the act of July 14, 1890. The seigniorage on the same was \$1,275,185.90.

The coinage of dollars from bullion purchased under this act from July 14, 1890, to July 1, 1895, has been \$40,043,954, consuming 30,971,495.70 ounces, fine, costing \$31,791,472.34, with a seigniorage of \$8,252,481.66, and from July 1, 1895, to November 1, 1895, the number of dollars coined from bullion purchased under this act was ninety (90), consuming 69.60 ounces, fine, costing \$63, with a seigniorage of \$27.

The total coinage of dollars from bullion purchased under this act to November 1, 1895, has been \$40,044,044, consuming 30,971,565.30 ounces, fine, costing \$31,791,535.34, with a total seigniorage of \$8,252,508.66.

The net profit or seigniorage on the coinage of silver during the seventeen years ended June 30, 1895, including the balance in the coinage mints on July 1, 1878, aggregates \$75,643,893.41.

#### Bars.

Gold bars were manufactured by the mints and assay offices during the fiscal year to the value of \$43,153,370.81, and silver bars to the value of \$10,341,545.28.

#### Course of Silver.

The average London price of silver bullion during the fiscal year 1895 was 29.01 pence, equivalent to \$0.63798; the New York price was \$0.64213. The highest price reached was \$0.68077, on April 17, 1895, and the lowest, \$0.59824, on December 29, 1894.

At the average price of silver bullion during the fiscal year the ratio of gold to silver was 1 to 32.5, and the bullion value of a United States silver dollar was \$0.49168. The number of grains of pure silver purchasable with a United States silver dollar was 754.65, equivalent to 1.572 ounces, fine.

Earnings and Expenditures.

The amount expended for the support of the mint service during the fiscal year 1895 was \$992,066.15, as against \$1,068,612.19 for the previous year. The total earnings of the mints and assay offices during the year were \$2,088,363.73, and the total expenditures \$1,185,435.94, showing a net amount of earnings from all sources of \$902,927.79.

## Imports and Exports.

The net gold exports for the fiscal year were \$30,117,376, as against \$4,172,665 for the previous year.

The net silver exports were \$27,631,789, as against \$31,041,359 for the previous year.

#### Industrial Arts.

The value of gold and silver used in the industrial arts in the United States during the calendar year 1894 was, approximately, \$21,541,652, of which \$10,658,604 was gold, and \$10,883,048 silver.

The amount of new bullion thus consumed was, gold, \$6,430,073; silver, \$8,579,472.

### Metallic Stock in the United States.

The total estimated metallic stock in the United States on July 1, 1895, was, gold, \$636,256,023; silver, \$624,731,483; a total of \$1,260, 987,506.

## Product of Gold and Silver.

The estimated production of gold and silver in the United States during the calendar year 1894 was as follows:

Metal.	Fine ounces.	Commercial value.	Coining value.
Gold	1,910,813	\$39,500,000	\$39,500,000
	49,500,000	31,422,000	64,000,000

The estimated production of gold and silver in the world was, gold, \$180,626,100; silver, \$216,892,200; a total of \$397,518,300.

### World's Coinage.

The coinage of gold and silver by the various countries of the world, so far as the information has been received for the calendar year 1894, was, gold, \$227,921,032, and silver, \$113,095,788; a total coinage of \$341,016,820.

Stock of Metallic and Uncovered Paper Money in the World.

The total estimated metallic stock in the world on January 1, 1895, was: Gold, \$4,086,800,000; full legal tender silver, \$3,439,300,000; limited tender silver, \$631,200,000; a total silver stock of \$4,070,500,000; and uncovered paper, \$2,469,900,000; a grand total of \$10,627,200,000.

#### PUBLIC MONEYS.

The monetary transactions of the Government have been conducted through the Treasurer of the United States, 9 subtreasury officers, and 165 national bank depositaries. The number of such depositaries on November 1, 1895, was 160, and the amount of public moneys held by them on that date, including those to the credit of the Treasurer's general account and United States disbursing officers, was \$14,256,694.80—an increase since November 1, 1894, in number of depositaries of five, and a decrease in amount of holdings of \$659,010.50.

#### LOANS AND CURRENCY.

The interest-bearing debt of the United States, exclusive of the bonds issued in aid of Pacific railroads, was increased \$112,318,700 during the twelve months ended November 1, 1895. There were issued and sold under the public notice of November 13, 1894, \$50,000,000 of 5 per cent bonds, dated February 1, 1894, redeemable in coin at the pleasure of the Government after ten years from that date. There were also issued and delivered to the parties to a contract executed February 8, 1895, in payment for 3,500,000 ounces of gold coin, 4 per cent bonds of the United States dated February 1, 1895, and redeemable in coin at the pleasure of the United States after thirty years from that date, amounting to \$62,315,400. The particulars of these transactions have been reported to Congress. The 4 per cent loan of 1907 was increased in the sum of \$3,300, issued in settlement of interest on refunding certificates of the act of February 26, 1879.

During the same period \$2,362,000 of the 6 per cent bonds issued in aid of Pacific railroads, known as currency sixes, have matured and ceased to bear interest. Of this amount. \$2,360,000 have been presented for payment and redeemed.

The following table shows the changes in the amounts of the several kinds of money in the United States, outside the Treasury, during the twelve months ended November 1, 1895. It is estimated that the population of the United States on that date was 70,378,000, and upon this basis the per capita supply of money outside the Treasury was \$22.72. The estimated population and per capita supply November 1, 1894, were 68,887,000 and \$24.27, respectively.

Money Outside the Treasury.

#### NATIONAL BANKS.

The report of the Comptroller of the Currency<sup>1</sup> shows in detail the operations of the Bureau during the year ended October 31, 1895, with respect to the organization, condition, and management of all active and failed national banks, and banks, banking companies, and savings institutions organized under the laws of the several States and Territories.

Since the granting of the first certificate of authority on June 20, 1863, the total number of national banks organized has been 5,023, making an average for each year of 152. Of this number, there were in active operation on October 31, 1895, 3,715, having an authorized capital stock of \$664,136,915, represented by 285,190 shareholders, or an average capital for each bank of \$178,772, the number of shares to each 2,136, and the number of shareholders 77.

During the year there were 43 banks organized, located in 20 different States, with an aggregate capital stock of \$4,890,000. Of these 28, with a capital stock of \$2,530,000, are located in the northern and northwestern section of the country, and 15, with a capital stock of \$2,360,000, in the south and southwest.

The total amount of circulating notes outstanding October 31, 1895, was \$213,887,630, of which amount \$190,180,961 was secured by United States bonds, and \$23,706,669 by lawful money deposited with the Treasurer of the United States.

The net increase in the amount of circulation secured by bonds during the year was \$10,779,597, and the gross increase in the total circulation was \$6,322,540.

<sup>&</sup>lt;sup>1</sup> See Appendix, p. 358.

The total resources of the national banks on the date of their last report of condition, September 28, 1895, was \$3,423,629,343.63, of which \$2,059,408,402.27 represented loans and discounts, and \$356,577,580.61 money of all kinds in bank. Of their liabilities, \$1,701,653,521.28 represented individual deposits, \$336,888,350.86 surplus and net undivided profits, and \$182,481,610.50 outstanding circulation secured by bonds.

The corporate existence of 71 banks, with a capital stock of \$10,662,000 and total circulation of \$3,226,275, has been extended during the year.

The number of banks leaving the system by reason of the expiration of their corporate existence was 4, with a capital stock of \$300,000 and circulation amounting to \$123,700.

The number of banks which went into voluntary liquidation during the year was 51, with a capital stock of \$6,093,100 and circulation amounting to \$1,152,000.

Receivers were appointed for 36 banks during the year, of which number 2 were reported last year as being in voluntary liquidation and 9 closed their doors in 1893 and subsequently resumed business, but were finally compelled to go into insolvency because of continued business depression and the slow character of their assets.

During the year 1894 there were paid \$5,124,577.94 to creditors of failed banks, and during the year just closed \$3,380,552.65.

The number of active banks, as compared with the number in operation during the year 1894, decreased 41 in 1895, with a corresponding decrease in capital stock of \$6,438,120. The number organized during the year is 7 less than in 1894, and the number going into voluntary liquidation 28 less. There has been an increase of 15 in the number of receivers appointed, and an increase of 30 in the extensions of corporate existence granted. The loss through expiration of charters decreased 2, and the number organized to succeed expiring associations decreased 4.

Abstracts of the reports of condition made by the banks during the years 1893, 1894, and 1895 are given for the purpose of comparison. Those of 1893 are given as showing the extreme conditions of the year of greatest financial depression and banking loss.

The number of banks incorporated under the laws of the various States for the year ended June 30, 1895, was 5,066, and the number from which reports were received is 5,033. Abstracts of these reports, properly tabulated and classified, are given in the appendix to the report of the Comptroller. In addition to the above, reports were received from 1,070 private banks and bankers, and from 5,033 State and savings banks and loan and trust companies, being an increase of 365 over 1894.

The report also shows, as far as the information was obtainable, the number of banks other than national which failed during the year, with the amount of their assets and liabilities.

With a view to affording a knowledge of the different methods employed to facilitate commercial exchanges and sustain a bank-note circulation, the report shows briefly the various systems of banking in operation in foreign countries and in the States and Territories comprising the Union.

The Comptroller makes the following recommendations:

First. That the Comptroller, with the approval of the Secretary of the Treasury, be empowered in proper cases to remove officers and directors of national banks for violations of law and mismanagement, first according them a hearing on charges preferred.

Second. That the loans of any bank to its executive officers and employees be restricted and made only upon the approval of the board of directors, a record thereof being properly kept.

Third. That the assistant cashier, in the absence of the cashier, be authorized to sign the circulating notes of the bank and reports of condition.

Fourth. That some class of public officers be empowered to administer the general oaths required by the national bank act.

Fifth. That bank examiners be required to take an oath of office and execute a bond before entering upon the discharge of their duties.

Sixth. That upon a day in each year, to be designated by the Comptroller, the directors of national banks shall be required to make an examination of the affairs of such banks and submit to the Comptroller a report thereon, upon blanks to be furnished for such purpose.

Seventh. That the Comptroller be authorized to issue to national banking associations circulating notes to the par value of the bonds deposited by them to secure such notes.

Eighth. That the semi-annual duty on the circulating notes of national banks be reduced so as to equal one-fourth of 1 per cent per annum.

In support of these recommendations the Comptroller states his reasons why they should be enacted into law.

#### FOREIGN COMMERCE.

The essential features of the trade returns of the United States for the fiscal year 1895 are given in the following table, prepared in the Bureau of Statistics, of this Department:

	1894.	1895.	+, increase; -, decrease.
Imports: Merchandise: Dutiable Free	\$275, 199, 086 379, 795, 536	\$368, 736, 170 363, 233, 795	+\$93,537,084 -16,561,741

<sup>\*</sup>Includes immigrants arriving in both cabin and steerage.

A comparison of these figures shows that the value of the foreign trade of the United States in 1895 was nearly equal to the value of the trade in 1894, the difference on a billion and a half being only \$7,627,024. The details of the two years differed widely. The year 1894 was one of large exports and diminished imports; 1895 was a year of large imports and diminished exports. The uncertainty of tariff legislation reduced imports in 1894; while the improved crop conditions in other countries account largely for the diminished exports of domestic prod-The exports of 1895 in domestic merchandise were \$75,812,338 less than in 1894; and the imports were \$76,975,343 greater in 1895 than in 1894. The value of domestic manufactures exported showed a slight increase on the exports of 1894, which was especially gratifying as giving promise of a heavier export in the current fiscal The exports of silver continue to be large and on the increase. The export for 1895 was nearly double that of 1888 in value, and in quantity was very much larger. In our trade returns silver ranks in importance with the export of mineral oils. The movement of gold is given in detail in the tables of the Bureau of Statistics.1

#### CUSTOMS ADMINISTRATION.

By the provisions of paragraph 165 of the tariff act of August 28, 1894, a duty of three-fourths of 1 cent per pound is assessed on the lead contained in silver and all other ores "according to sample and assay at port of entry, the method of sampling and assaying to be that usually adopted for commercial purposes by public sampling works in the United States." A strict compliance with these provisions of law is impracticable for the reason that the ores are imported at places where there are no facilities for sampling and assaying. Proposals for the performance of this work were invited by public advertisement and only two responses were received, both being for importations into but one district. The proposals referred to were rejected because the charges

See Tables I and J, with diagrams, pp. CXIX and CXXIII.

demanded for the work were regarded as excessive. It is suggested that provision be made for the establishment of suitable sampling works at the places on the northern, northwestern, and Mexican frontiers where such ores are imported into this country. In my opinion such sampling works will not be required at more than six places, and buildings may be erected and suitable machinery may be provided at an expenditure not to exceed in the aggregate \$150,000. If it is not deemed advisable to comply with the suggestion herein made, the existing law requiring the sampling and assaying of ores at the place of importation should be amended in such manner as to provide for such sampling and assaying at bonded smelters to which the ores may be consigned in bond.

I desire to call attention to the necessity for the reorganization of the Since the present boundaries were existing customs collection districts. created the methods of transportation and the establishment of business enterprises of varying character demand facilities which are not available under the present laws, which require the entry of goods at ports far distant, in many instances, from the places of business where the goods imported are required. As an illustration, attention is called to section 2568, Revised Statutes, which defines the limits of the customs collection district of New Orleans, the ports of delivery of which district are located in many of the Middle, Southern, and Western States. Under the present law, custom-house establishments are maintained at considerable expense at places where there is but little customs business and at places on the frontier where goods are imported, the transactions appear upon the records as occurring at the ports of entry for the respective districts, although far distant from the places of actual importation. The Supervising Special Agent, in his annual report,1 calls attention to the difficulties encountered by reason of the present condition of affairs. I am of opinion that an economical and better administration of the Customs Service would be secured if measures were taken in the direction indicated.

It has been reported to me by the officers charged with the enforcement of the Chinese-exclusion laws that during the past year 3,900 Chinese applied for admission, of which number 2,075 were admitted. Whenever practicable, Chinese persons found unlawfully in the United States have been arrested, tried, and when convicted, deported to China. The practice of admitting Chinese to participate in expositions has resulted in the admission of several hundreds of persons of that race who would otherwise be excluded, and while by the terms of the laws granting them admission they are required to depart from the country one year after the close of the expositions in which they were nominally participants it is doubtful if any of them have left the country. Efforts have been made to locate and arrest such persons with varying success and at a considerable expenditure. The question

See Appendix, p. 712.

is submitted for the consideration of Congress whether or not it is a wise policy to waive the provisions of the Chinese exclusion or the alien contract labor laws in such cases as those referred to.

It is the opinion of the General Board of General Appraisers, as will be seen from its report, that undervaluations of imported merchandise are not so numerous now as formerly, and it is stated that they do not extend to entire lines of goods, as they did at one time. The new system of reappraisement is a great improvement upon the old one, and with careful and efficient administration promises to make fraudulent undervaluations so hazardous and expensive that the practice will be substantially suppressed.

A table is appended<sup>2</sup> giving a detailed statement of the penal duties remitted by the Department from January, 1891, to December 31, 1895, under the provisions of sections 5292 and 5293, Revised Statutes, as amended by sections 17, 18, and 19 of the act of June 22, 1874. These remissions amounted in the aggregate to \$287,052,13.

#### INTERNAL REVENUE.

The receipts from the several objects of taxation under the internalrevenue laws for the fiscal years ended June 30, 1894 and 1895, were as follows:

	Fiscal year en	ded June 30—	-		
Objects of taxation.	1894.	1895.	Increase.	Decrease.	
Distilled spirits	\$85, 259, 252, 25 28, 617, 898, 62	\$79. 862, 627. 41 29, 704, 907. 63	\$1,087,009.01	\$5, 396, 624. 8	
Fermented liquors Oleomargarine	31, 414, 788. 04 1, 723, 479. 90	31,640,617.54 1,409,211.18	225, 829. 50	314, 268. 7	
Incomes	153, 030, 89	77, 130. 90 551, 583. 09	77, 130. 90 398, 552. 20		
Total	147, 168, 449. 70	143, 246, 077. 75		3, 922, 371. 9	

10081	3, 922, 371. 93
The receipts from all sources of internal revenue for the fiscal year ended June 30, 1895, were	• • • • • •
The decrease for the fiscal year just ended being	3, 922, 371. 95
The total cost of collection for the fiscal year ended June 30, 1895, was The total cost of collection for the fiscal year ended June 30, 1894, was	4, 127, 601. 16 3, 975, 904. 00
Increased cost of collection for the fiscal year ended June 30, 1895, was	151, 697. 16

The increased cost of collection for the fiscal year just ended is largely due to the expenses incident to the preparations for carrying into effect the income-tax law, the expenditure for this purpose aggregating.

91,621.38

The amounts above stated are the receipts actually collected during the fiscal years mentioned, but in many cases the money collected on the last day of June is not deposited until the first day of July, thus causing a discrepancy between the collections and deposits for that year.

See Appendix, p. 734.

<sup>8</sup> See Table V, p. CLVII.

A detailed statement of the receipts and expenditures will be found in the report of the Commissioner of Internal Revenue.<sup>1</sup>

The cost of collection for the fiscal year ended June 30, 1895, was 2.88 per cent, as against 2.70 per cent for the fiscal year ended June 30, 1894. Deducting both the receipts and expenditures involved in the incometax law, the percentage of cost of collection for the fiscal year just ended would be reduced to 2.81.

The total production of distilled spirits, exclusive of fruit brandies, for the fiscal year ended June 30, 1895, was 79,949,595 taxable gallons; the total production for the fiscal year ended June 30, 1894, was 89,205,492 taxable gallons, showing a decrease in production for the fiscal year just ended of 9,255,897 gallons.

There were also produced during the fiscal year ended June 30, 1895, 232,244 gallons of apple brandy, 4,658 gallons of peach brandy, and 1,723,274 gallons of grape brandy, making a total production of 1,960,176 gallons from fruits during the year.

A further comparison of the two fiscal years shows a decrease of 318,451 gallons in the production of apple brandy, a decrease of 72,331 gallons in the production of peach brandy, and a decrease of 597,200 gallons of grape brandy for the fiscal year ended June 30, 1895, an aggregate decrease of 987,982 gallons produced from fruits as compared with the previous fiscal year.

The quantity of distilled spirits gauged for the fiscal year ended June 30, 1895, was 265,688,906 gallons; the quantity gauged for the fiscal year ended June 30, 1894, was 242,626,324 gallons, making an increase in the quantity of spirts gauged for the fiscal year just ended of 23,062,582 gallons.

During the fiscal year ended June 30, 1895, 2,429 distilleries of all kinds were operated; for the preceding fiscal year 5,148 distilleries of all kinds were operated, a comparison showing a decrease of 2,719 in the number of distilleries operated for the fiscal year just ended.

During the fiscal year ended June 30, 1895, there were produced 33,589,784 barrels of beer; the number of barrels produced during the fiscal year ended June 30, 1894, was 33,362,373, making an increased production for the fiscal year just ended of 227,411 barrels.

For the fiscal year ended June 30, 1895, the total receipts from the taxes on tobacco, cigars, cigarettes, snuff, etc., were \$29,704,907.63. The receipts from the same sources for the fiscal year ended June 30, 1894, were \$28,617,898.62, showing an increase of \$1,087,009.01 for the fiscal year ended June 30, 1895.

#### ENGRAVING AND PRINTING.

The work of engraving and printing the securities and obligations of the United States is now upon a very satisfactory basis. The Bureau

<sup>&</sup>lt;sup>1</sup> See Appendix, p. 416.

<sup>\*</sup>Including 28,373 barrels removed from breweries for export free of tax.

having charge of this work has promptly and satisfactorily met all the demands upon it by the Department during the fiscal year, although these demands were often very heavy, and the time in which much of the work was required to be done was necessarily very short.

The Bureau has met all its obligations in the matter of the manufacture of adhesive postage stamps for the Post-Office Department, and all the stamps now furnished are satisfactory to that Department and to the people.

The work of engraving the new designs for silver certificates is progressing satisfactorily, and it is expected that an issue of these certificates will be made before the close of the present calendar year.

The most pressing need of this Bureau at present is an outbuilding which will accommodate certain branches of its work now performed in temporary wooden sheds, as well as certain processes now carried on in the main building, which could be transferred thereto, without lessening the guarantee of security in the preparation of the notes, etc. Estimates of the cost of such a building have been submitted from time to time to Congress, and will be again submitted at the present session. I earnestly urge upon Congress the appropriation of the necessary money for this work.

#### IMMIGRATION.

The report of the Commissioner-General of Immigration contains the usual statistical information relating to the operation of his Service. During the fiscal year ended June 30, 1895, 258,5362 immigrants arrived in the United States, 27,095 less than the preceding year, being the smallest immigration since 1879. Of these, 256,117 were, upon examination, permitted to land, and 2,419 were debarred and deported at the expense of the various steamship lines transporting them. Of those deported, 694 attempted to enter in violation of the alien contract labor laws and 1,725 were deported as coming within the prohibitions of the immigration act of March 3, 1891. There were also returned 177, who, having been permitted to land, became public charges within one year If the causes of falling into distress existed prior to landafter arrival. ing, these latter were returned at the expense of the steamship companies bringing them; otherwise at the expense of the immigrant fund. Temporary cases of distress to the number of 2,449 were, after proper identification, relieved at the expense of the fund. The Bureau is not advised of any immigrants landed within a year who are now a burden upon any public or private institution. The classes of immigrants who came were of a hardy character, able to earn a livelihood, and many were possessed of sufficient means to purchase some land and build homes or engage in small business enterprises.

The restrictive legislation of 1891 and 1893 has caused a careful

<sup>10</sup>mitted from this volume for want of space.

<sup>&</sup>lt;sup>2</sup>Includes only immigrants arriving in steerage.

examination of passengers by steamship lines prior to embarkation. Several European countries have found it necessary to protect their seaports by law against emigrants of the classes which are refused a landing in the United States. These laws are now well understood and adherred to, both here and abroad, and they have practically inaugurated three careful inspections, one at the home of the emigrant prior to the purchase of a ticket, one at the port of embarkation, and one upon arrival in this country. Many are returned, but greater numbers of the undesirable classes are deterred from leaving their homes in the old countries.

The Commissioner-General estimates that, owing to the revival of business and consequent demand for labor, immigration next year will exceed 300,000.

Japanese immigration during the last fiscal year reached 1,150, a decrease of 781 from preceding year. Of these, 462 landed at San Francisco, and 672 came by way of Victoria; the remainder, 16, came by various other routes. Recent arrivals are small, and it is doubtful whether the number now in the United States much exceeds the number here in 1890, when by the census it was shown to be 2,039. Many have since returned to their native country.

The number of European and Asiatic immigrants passing through the ports of Canada and British Columbia to the United States were 5,988.

The Alien Contract Labor Laws appear to have been strictly enforced for the protection of skilled and unskilled labor, and many immigrants who came in violation of its provisions have been deported and suits have been commenced against the employers. Complaints have been investigated and proper steps taken to secure an efficient administration of the law. Attention is invited to that portion of his report which relates to amendments to these laws, "that they be made more certain, explicit, and comprehensive; give additional remedies, and at the same time remove many features which render their enforcement oppressive in many cases without aiding the purposes for which theywere intended."

This report states that of 206,801 European immigrants over fourteen years of age 43,142 were illiterate or 20.37 per cent. Illiteracy in the United States by the census of 1890 was 13.34 per cent of its population over ten years of age.

Notwithstanding a decrease in immigration, this branch of the public service continues to be more than self-sustaining. The general balance to the credit of the immigrant fund on July 1 was \$115,114.39, an increase over the previous year of \$37,052.20. The receipts on account of the fund amounted to \$315,113.16, an increase over last year of \$89,784.90. This increase is attributable, however, to the act of August 18, 1894, increasing the per capita tax from 50 cents to \$1 from October 1, 1894.

#### MARINE-HOSPITAL SERVICE.

The Surgeon-General of the Marine-Hospital Service reports that, although the year has passed without any notable invasion of epidemic disease from foreign lands, the quarantine season just closed has been one of considerable anxiety, necessitating, by reason of the dangers threatened, close watchfulness on the part of the Bureau and certain special measures involving much labor. Cuba, by reason of its proximity to the United States and the constant infection of its principal port, Habana, with yellow fever, is a source of continued apprehension on the part of health officers of the South Atlantic and Gulf coasts between May and November, and this year the feeling of concern was greater because of the insurrection and consequent increase of vellow fever throughout the island, and its probable extension to neighboring islands having direct communication with the United States. tion to three sanitary inspectors regularly stationed during the quarantine season at Habana and at Santiago, special inspectors were appointed to visit all the ports of Cuba and report as to the prevalence of vellow fever and any special danger of its being transmitted to the United States. In view of the fact that surreptitious communication between the island and the neighboring coast of Florida would undoubtedly be attempted, and the danger of the introduction of yellow fever thereby increased, a sanitary inspector of the Marine-Hospital Service was placed on each of the four revenue cutters ordered to patrol the whole of the Florida coast, and it is believed that this measure had a deterring effect upon illicit communication, particularly on the part of the small vessels which annually approach the Florida coast with the declared object of fishing, but which engage in smuggling and are liable to convey yellow fever.

In July a suspicious fever was reported in Tampa, in which city there was a large number of Cuban refugees and patriots. Great discretion was necessary to make an inspection and determine the nature of the fever without exciting alarm and inflicting consequent damage upon the commerce of the port. An expert inspector was appointed to make an investigation, and his first reports were not reassuring. sibility confronting the Bureau of receiving information at any time that the disease at Tampa was yellow fever, it became necessary to make necessary preparations to prevent its spread. A portable sulphur fumigator and steam disinfecting chamber was shipped from Washington, where they had been stored, to an available point in the South, and a movable detention camp for the accommodation of 1,000 persons was prepared at Waynesville, Ga., the site of the camp used during the yellow fever epidemic of 1893. This camp, which is now ready to be moved at any time, requires 36 cars for its transportation. of tents, tent frames, flies and floors, cots, mattresses, ranges, cooking

<sup>1</sup> Omitted from this volume for want of space.

utensils, and other accessories, including a steam boiler for supplying hot water for cooking and laundry purposes. Though, fortunately, this fever at Tampa was determined to be malarial, these preparations were not only necessary at the time, but were considered advisable in order that in succeeding years the Bureau might have a camp of this character ready to be established at any point on short notice.

On account of the prevalence of smallpox in a large number of localites in the western and southern cities, the Bureau was called upon to aid in its suppression, notably in Staunton, Va., and New Orleans, La., and it instituted a systematic vaccination of the crews of all vessels on the Mississippi and Ohio rivers. In September information was received of the return from Mexico of some 400 negro colonists, a large number of whom were afflicted with smallpox. These colonists were collected at the Texas border—Eagle Pass—by the State quarantine officers, and an officer of the Marine-Hospital Service was immediately detailed to see that the regulations of the Treasury Department were duly enforced. It soon became evident that the State health authorities were unable to meet the demands of the situation, and the Marine-Hospital Service assumed charge.

A camp was formed near Eagle Pass, and suitable sanitary measures taken to prevent the further spread of the disease among the colonists, and to prevent its extension beyond the cordon lines. One hundred and seventy-eight cases of smallpox were treated, but the disease was confined entirely within the established limits, and the camp was closed October 21.

In August public alarm was manifested on account of the widespread prevalence of cholera throughout China and Japan, and the appearance of the disease at Honolulu. Special regulations were issued to the officers of the Marine-Hospital Service upon the Pacific coast, sanitary inspectors were appointed to assist the United States consuls at Yokohama, Japan, and Honolulu, Hawaiian Islands, and the quarantine force was increased at the national quarantine station, Angel Island, San Francisco Bay. Previous inspections had been made during the summer, in accordance with the Treasury regulations, of all quarantine ports on the Pacific coast, and all deficiencies rectified, so that when the reports concerning cholera were published they were promptly met by a statement from the Surgeon-General that all necessary precautions had been taken. No case of cholera has appeared in the United States.

## National Quarantine Stations.

The twelve national quarantine stations have successfully performed their usual important functions of inspection, cleansing, and disinfecting infected vessels, and removing therefrom cases of contagious and infectious disease.

The Surgeon General calls attention to the necessity of increased wharf facilities at the South Atlantic quarantine station, which is the

station of refuge for the cities of North Carolina, South Carolina, and Georgia. An estimate for an additional pier at this station was transmitted to the last Congress, but was not favorably acted upon. In consequence, during the past season, some delay has been caused to vessels required to be disinfected under State and national quarantine regulations. An estimate for an additional pier has been included in the regular estimates of the Department for the ensuing fiscal year.

In accordance with the act of Congress approved August 18, 1894, the site for the new United States quarantine station near Southport, N. C., was selected by a board of officers appointed for that purpose. Plans were made and contracts let, and the station is in course of construction at the present time. Pending the completion of the plant, the Marine-Hospital Service on July 18, 1895, assumed control of the quarantine by detailing a regular medical officer to take charge. At other ports in North Carolina it was found that there was no inspection provided for by the State or local authorities, and sanitary inspectors of the Marine-Hospital Service were appointed to guard them.

The Surgeon-General in his report invites attention to the three naval vessels which have been loaned by the Navy Department to the Marine-Hospital Bureau, and which form a valuable addition to the quarantine stations. These vessels are the Jamestown, belonging to the Cape Charles-quarantine, the Omaha, at the San Francisco quarantine, and Iroquois attached to the Port Townsend quarantine. I concur in the recommendation that an act be passed formally transferring these vessels to the Treasury Department, with the concurrence of the Secretary of the Navy.

## Sanitary Inspection Service.

The sanitary inspection service has included during the year at least three inspections, by Marine-Hospital officers, of every quarantine station on the coast of the United States. At the opening of the quarantine season the Surgeon-General inspected personally the office of the sanitary inspector of the Service, stationed in Habana, and also the United States and local quarantine stations on the South Atlantic and Gulf coasts. Arrangements were made by the quarantine authorities of New Orleans and Mobile, by which reports of their special inspectors placed in the fruit ports of Central and South America and the West Indies, should be transmitted to the Bureau, and they were published in the Abstract of Sanitary Reports.

As previously stated sanitary inspectors were maintained in Habana and in Santiago de Cuba. The report of the sanitary inspector at Habana shows that there were 877 vessels examined by himself and assistant, from June 30, 1894, to October 15 of the present year. The crews of these vessels numbered more than 30,000, and the passengers about 13,000. The duties of the sanitary inspector at Habana are to assist the consul in giving requisite bills of health and in certify-

ing to the immunity from yellow fever, smallpox, and leprosy of all persons bound for the United States.

Sanitary inspectors were also maintained at Rio de Janeiro, Yokohama, and Honolulu.

## Division of Sanitary Reports and Statistics.

This division, under the charge of a medical officer of the Service, is chiefly concerned in the collection of sanitary information and statistics, domestic and foreign, and in the compilation of such matter for publication in the Abstract of Sanitary Reports, published weekly under authority of the law of February 15, 1893. The Abstracts have contained weekly mortality reports from 120 cities and towns of the United States, monthly reports of cities, and monthly reports of the Tables showing the prevalence of smallpox in the several States. United States and of yellow fever and cholera throughout the world have been published from week to week for the information of sanitary A statistical table showing the yearly mortality in 199 cities and towns in the United States and the death rate computed on both the population of the United States census of 1890, and on the estimated population for the calendar year 1894 was prepared in this division and published in the Abstract. The Abstracts also contain reports from the commissioners of immigration at the several ports of entry, showing the arrival of immigrants, and weekly and monthly mortality reports of foreign cities received from the United States consuls, as well as general reports of sanitary importance from the same officers abroad. The Surgeon-General, with the approval of the Secretary, has taken measures to obtain information relative to the water supply and the disposal of the sewage and garbage of the cities and towns of the United As the matter of pollution of streams and the purity of water supply of cities is one of growing importance, and is now engaging the attention of sanitarians of the United States, it is hoped that the inquiry referred to will be of value in furnishing, in condensed form, a statement showing the source, storage, purification, and distribution of water supply, and the manner of sewage and garbage disposal as at present existing in our cities.

# Hygienic Laboratory.

During the first part of the year the laboratory work was continued on the same lines as in the previous year. On the return of the officer in charge from Europe, the plans for a broader field of investigation were immediately instituted.

Preparation was made, as early as November 1, 1894, for commencing the immunization of horses for the diphtheria antitoxin. This was successfully accomplished by the end of January, when a considerable quantity of antitoxin of fair strength was furnished to the several marine hospitals. At the same time, at the request of the District health officer, several horses were placed under the process of immunization for diphtheria antitoxin for use of the District of Columbia, and since April 1 the antitoxin has been supplied.

Owing to the importance of the blood serum therapy, steps were taken early in December to institute an inquiry into the cause, nature, and treatment of pneumonia. This has been continued to the present time, with results which, while not final, are highly satisfactory. It is hoped that soon an antitoxin of sufficient strength may be produced for the treatment of this malady.

Early in January an inquiry was undertaken concerning the nature of vaccinia and variola, and, taking advantage of the prevalence of variola in the District, the serum therapy was put to test, six cases being treated by this method with apparently favorable results. At the same time experiments were made upon susceptible animals, which were confirmatory. This treatment was tried on a much larger scale in the smallpox camp at Eagle Pass, Tex., with negative results. The subject is still under investigation in accordance with the act of Congress approved March 2, 1895, appropriating \$900 for this specific work of the laboratory.

Considerable work has been done for the health officer for the District—the preparation of diphtheria antitoxin, the examination of cultures in cases of suspected diphtheria, and the preparation and distribution of culture media. The water supply of Washington has also been the subject of careful bacteriological study.

Disinfection as applied to the mails, books, etc., is another subject under investigation.

Early in January a school of instruction for State and local health officers was established, with a view to familiarizing the officials who might present themselves with the most important measures for controlling infectious diseases, particularly diphtheria. Seven representatives of State and local boards of health availed themselves of this course. A similar but more extended course was given to officers of the Service.

#### Epidemic Diseases.

The report of the Surgeon-General contains also a succinct account of the prevalence of each of the three great epidemic diseases—cholera, smallpox, and yellow fever—and a review of the latest sanitary measures and scientific investigations for their prevention and suppression. Special attention is called to tables prepared, showing the years in which yellow fever has visited seaboard cities of the United States and the excessive number of years in which this infection was traceable to the Island of Cuba and the port of Habana. The table shows that since 1862 our shores have been infected with yellow fever in each of twenty-six years. The source of infection is positively known with regard to sixteen of these twenty-six years, and of the sixteen visitations of yel-

low fever fourteen have been traced definitely to Habana. He shows also that many of the wharves on the Habana side of the harbor of Habana are constantly infected with yellow fever, and imperil the lives of the crews of American vessels that are obliged to make fast to them for loading and unloading. It is shown that the conditions favoring the development of yellow fever in this neighboring port have not been improved, but, for reasons stated, have become yearly more pronounced, and that they are of such a nature that they could be greatly ameliorated, if not removed altogether.

# National Quarantine Law.

During the year, as a result of the inspection of local quarantines under the law of February 15, 1893, the right of disinfection and granting free pratique to infected vessels was taken from one southern quarantine because of faulty administration and the danger resulting therefrom. Acquiescence in the assumption of Federal control was readily granted in two other States, namely, in Texas, on the border (Eagle Pass), previously noted, and in the State of North Carolina. The Marine-Hospital Bureau now exercises absolute quarantine control over the Pacific coast, the Gulf coast east of Louisiana to Mobile Bay, in Georgia, North Carolina, Virginia, Delaware, and Pennsylvania. It materially assists, by the operation of its stations, the quarantine service of the States of Florida and South Carolina, and, as previously stated, exercises a general supervision over all State and local quarantines.

The Surgeon General states that there is a growing sentiment in the several sections of the United States for the undivided control of all the quarantine service by the National Government, and urges that the General Government should establish a strictly national quarantine, and he recommends that appropriation be made for the establishment of such quarantines as may be deemed to be necessary by the Secretary of the Treasury, and for the purpose of carrying into effect section 8 of the quarantine act of February 15, 1893.

He calls attention to the necessity of an amendment to the present quarantine law providing for the quarantine inspection and sanitation of small vessels sailing from Cuba without a bill of health, and coming within the waters of the collection districts of the United States. These vessels do not enter or seek to enter any port of the United States, and therefore are not amenable to the quarantine law. They are, however, a source of danger, inasmuch as they are known to communicate with the shore, and while ostensibly engaged in the pursuit of fishing, engage also in smuggling. The crews of these small vessels are frequently recruited in Habana from recently arrived immigrants from Spain, and, being unacclimated, are liable themselves to be attacked with yellow fever and to convey the same through illegal traffic to the Florida coast. An amendment to section 2 of the act of February 15, 1893, covering this subject will be submitted.

## Marine Hospitals and Relief Furnished.

During the fiscal year ended June 30, 1895, the total number of patients treated by the Marine-Hospital Service was 52,643, of which number 12,962 were treated in hospital and 39,681 at the hospital dispensaries. One thousand two hundred and three keepers and surfmen of the Life-Saving Service were examined as to their physical qualifications, of which number 70 were rejected. Claims for pensions and other benefits provided by the act of May 4, 1882, made by keepers and crews of the Life-Saving Service, have been reviewed and passed upon in the office of the Surgeon-General. One thousand two hundred and fifty-five pilots were examined with regard to their ability to distinguish color, and 51 were rejected on account of color blindness. Three hundred and ninety seamen were examined physically prior to enlistment in the Revenue-Cutter Service, of which number 67 were rejected. Forty-three candidates for position of cadet, assistant engineer, and third lieutenant were examined physically and 6 rejected. Eighty-eight officers were examined for promotion and 5 for special reasons. Under the retiring act of March 2, 1895, 42 officers were examined, and 39 reported for retire-Seventeen boards have been convened for the physical examinations above referred to.

- <sup>1</sup> An officer of the Service was detailed for duty on the Revenue Cutter Rush during her cruise in Alaskan waters and Bering Sea.
- \* Medical officers of the Marine-Hospital Service have been regularly detailed for the inspection of immigrants at Boston, New York, Philadelphia, and Baltimore. At other ports the officers on duty at the marine hospitals are available for this purpose.

In the purveying division of the Bureau, 434 requisitions for medical and other supplies to meet the needs of 20 marine hospitals and 42 additional relief stations have been filled. Eleven national quarantine stations, two revenue cutters, and the immigrant hospital at Ellis Island, New York Harbor, have also received their supplies through this division. The number of all packages shipped was 2,970, with a total weight of 222,802 pounds. One hundred and fourteen different forms of elixirs, fluid extracts, liniments, sirups, tinctures, etc., have been manufactured in the laboratory of this division for the use of the Service.

The total available amount of the Marine-Hospital fund during the fiscal year was \$605,099.10; the expenditures, \$575,569.87, leaving a balance, June 30, 1895, of \$29,529.23. The balance of the appropriation for the prevention of epidemic diseases, available June 30, 1895, is \$562,742.61.

In addition to the foregoing, the report of the Surgeon-General contains the usual statistical tables of the Service, and contributed articles by its officers upon medical, surgical, and sanitary subjects pertaining to their field of operations.

#### REVENUE-CUTTER SERVICE.

The work performed by the Revenue-Cutter Service during the past year has been, as usual, varied and important. The several revenue vessels have been maintained in constant active service, and have cruised in the patrol of the coast line rivers and harbors of the United States upon the Atlantic, Gulf, and Great Lakes, for the enforcement of the customs and navigation laws, 310,661 miles. In the performance of these duties 23,726 merchant vessels were boarded and examined, 451 of which were reported to the proper authorities for violations, involving penalties amounting to \$176,433.45. There were 122 vessels in actual distress assisted, the value of which, with their cargoes, amounted to \$1,081,592, or \$156,592 more than the entire appropriation by Congress for the maintenance of the Service. In aid of the Life-Saving Service revenue vessels have cruised nearly 10,000 miles, while the lives of 43 persons have been saved, all of whom were actually taken from the water and rescued from drowning. The Grant, Capt. D. F. Tozier commanding, and the Corwin, Capt. F. M. Munger, were dispatched from Port Townsend, Wash., and San Francisco, respectively, on October 20, 1894, to cruise in search of the missing American ship Ivanhoe, reported October 19, as having probably foundered off Cape Flattery. Both ships made extended cruises in search of the missing vessel, but returned without tidings. In the meantime the Rush, Capt. C. L. Hooper, was ordered upon the same errand from San Francisco and cruised along the coast of Washington and Vancouver Island. In her cruise there was found an identified wreckage, which made it certain that the Ivanhoe had gone down, and in all probability with all on board. search for this ship and her people, the Rush, Grant, and Corwin cruised an aggregate of 5,416 nautical miles.

On the 20th of December, 1894, the *Grant* sailed from Port Townsend, Wash., in search of the missing steamers *Montserrat* and *Keweenaw*, and after a cruise of 1,500 miles, returned without tidings of the missing vessels.

Upon the request of the Department of State, the *Fessenden*, Capt. D. B. Hodgsdon commanding, was ordered to the fishing ground off Kelleys Island, Lake Erie, to inquire into complaints made by American fishermen that the Canadian cruiser *Petrel* had interfered with them in their fishing operations. Captain Hodgsdon reported, upon his return from this mission, that the fishermen referred to were in Canadian waters when the *Petrel* interfered, and therefore had no ground for complaint, nor the right of protection from this Government.

Cruising in the winter months to afford aid to distressed navigators, under the provisions of section 1536, Rev. Stat., was performed by six vessels of the Revenue Cutter Service designated by the President. During the four months these vessels were thus engaged they steamed 23,774 miles, boarded 2,172 vessels, and rendered effective assistance to

86 distressed vessels, whose value was estimated at \$740,881, and on board of which were 495 persons whose lives were imperiled.

The patrol of the North Pacific Ocean and Bering Sea, for the enforcement of the provisions of the acts of Congress approved April 6 and 24, 1894, and a supplementary act approved June 5, 1894, and the proclamation of the President issued February 18, 1895, heretofore performed by naval vessels and vessels of the Revenue Cutter Service in cooperation under command of an officer of the Navy, was this year, by direction of the President, committed wholly to the charge of the Revenue Cutter Service. A fleet of five cutters, the Rush, Bear, Grant, Corwin, and Perry, under the command, as senior officer, of Capt. C. L. Hooper, Revenue Cutter Service, sailed upon this duty at the opening of the season, and an effective and thoroughly efficient patrol has been The small number of vessels composing the fleet gave reason for apprehension at the outset that the area of the award could not be effectively covered, but it is gratifying to be able to state that the Revenue Cutter Service has efficiently met every emergency. able commander of the fleet and the no less able captains and officers and faithful crews of the several ships composing the Bering Sea fleet of 1895 are deserving of the highest commendation and praise. little fleet of revenue cruisers was called upon to cover in its operations, approximately, 60 degrees of longitude and 25 degrees of latitude. fleet cruised 77,461 miles, boarded and examined 116 vessels, of which 56 were engaged in fur sealing, said vessels were boarded and examined by the several vessels of the fleet, in the aggregate 339 times, while the boarding officers actually counted and carefully scrutinized 31,216 seal skins.1

There were four vessels seized for violation of the fur sealing regulations, three British and one American, which were disposed of by the commander of the fleet in accordance with the terms proclamation.

The revenue steamer *Bear*, besides performing service with the Bering Sea fleet, has made her usual cruise to the Arctic Ocean, and to the Siberian coast, the latter in the interest of the Department of the Interior, transporting reindeer from Siberia to Alaska.

During the year there have been on duty in the Life-Saving Service twelve officers of all grades. The whole time and attention of these officers has been devoted to the work of the Life-Saving Establishment, under the direction of the General Superintendent.

Owing to the disturbed condition of affairs in Cuba, it was considered necessary to assign a number of vessels to duty on the coast of Florida for the purpose, in addition to other duties, of enforcing the neutrality and, incidentally, the quarantine laws. Accordingly the Winona, Morrill, and Forward were ordered, and with the McLane, already stationed at Key West, were assigned cruising grounds, covering the coast from

<sup>&#</sup>x27;For detailed statements of the operations of the Bearing Sea patrol fleet, see Tables W, X, Y, Z, AA, BB, and CC, pp. clx11 to cci.

Cape Florida to Pensacola. These vessels have been actively cruising between the points named during the past five months, and have rendered excellent service.

#### New Vessels.

The two new vessels authorized by the Fifty-third Congress, one for service on the Great Lakes and one for the New England coast, are in course of construction. Plans and specifications for the cruiser for service on the Pacific, as well as the vessel for harbor work at San Francisco, are completed, and proposals for the construction of these vessels have been invited. The three new vessels authorized by Congress will be of modern type, and will constitute valuable additions to the Service.

But many of the vessels now in service are very old. Some of them have been constantly employed for more than thirty years, and four of them, the McLane, Crawford, Chandler, and Washington, were in active service in the Navy during the late war. Of course, a great deal of money has been spent upon these old vessels to keep them in condition, and they have now reached an age and a point where other than very slight repairs would not be justified. It will be seen, therefore, that a number of new vessels are urgently needed. At least four should be provided for at once, one to replace the McLane, one to replace the Crawford, another to take the place of the Seward, and a fourth for the port of New York. It was found necessary to send the Grant from the New York station and the Perry from the Lakes to reenforce the fleet on the Pacific for the work in Bering Sea, and those stations have therefore been practically abandoned to the serious detriment of the interests of the Government service and of the commercial interests of the country. It is earnestly recommended that an able vessel of suitable proportions, fitted to take and keep the sea, be authorized for the New York station. The great commercial metropolis of the country should be provided with a vessel of the Revenue Cutter Service commensurate with her vast and constantly growing commerce.

In view of the limited number of suitable vessels of the Revenue Cutter Service available, there being but thirty-six all told (which includes the small vessels on harbor duty, and on duty in connection with the Life-Saving Service) to cover the entire sea and lake coast, I urgently recommend that the President be authorized to transfer such suitable vessels of the United States as in his judgment may be necessary to the Treasury Department for temporary use in the Revenue Cutter Service, the same to be officered and manned by that Service for duty in the North Pacific, Bering Sea, or elsewhere, as in his judgment occasion may demand.

#### Personnel.

The personnel of the Revenue Cutter Service is composed, when all grades are full, of 222 commissioned officers upon the active list, 38 upon

the permanent waiting orders list, and \$15 enlisted men. Under the operation of the law of Congress approved March 2, 1895, 39 officers were examined and found disqualified for active service and were placed upon "permanent waiting orders" with one-half duty pay. One of these has since died. This enactment has proved of great advantage to the Revenue Cutter Service, having taken off the active list the aged and infirm. and provided for promotion to the vacancies thus created a class of young and able men physically and mentally qualified to perform service wherever assigned. But only those who were physically disqualified by reason of the infirmities of age or broken health at the date of the passage of the law were included in its provisions, and this has left upon the active list a number of officers who, if not now disqualified for service, must soon, in the course of nature, become so. Under the law as it now stands, should an officer become disabled his place can not be filled by promotion, but he must be continued on the active list, no matter what the necessities of the Service may be. In the interest of this Service, which is one of the most meritorious and important connected with the enforcement of the customs and other laws of the United States, I earnestly recommend the enactment of a statute providing for the compulsory retirement from active service of all officers at the age of sixty-four years and placing them on "permanent waiting orders" with three-fourths of the full duty pay now allowed by law; but no officer should be thus placed unless he shall have served at least ten years. In order to maintain the highest degree of efficiency in the service, it should also be provided that officers who have not reached the age of sixty-four years, but who have been thirty years in active service, and who may be found by a board of medical officials to be mentally or physically disqualified on account of injuries or loss of health incurred in the line of duty, may be placed on "permanent waiting orders" on their own application or by order of the President, with three-quarters full duty pay; and the provision in regard to amount of pay should apply to those already placed on that list under the act of March 2, 1895. There is no branch of the public service which, in a time of peace, requires such continuous, laborious, and hazardous service as this, nor is there any other branch in which the compensation is so inadequate in comparison with the character and extent of the work The duties imposed upon the officers engaged in this service often subject them to great exposure and hardship and require the exercise of a high order of skill and discretion, and it is therefore of the first importance that the mental and physical qualifications of the force should not be impaired by the retention of old, infirm or otherwise disabled members. The simple power, which now exists, to place an officer on "waiting orders," but with no authority to fill his place on the active list by promotion, is not sufficient to preserve the efficiency of the service, and unless further legislation is granted the injurious effects of the present system will soon be severely felt.

#### NAVIGATION.

The annual report of the Commissioner of Navigation<sup>1</sup> shows the tonnage, geographical distribution, material, and motive power and employment of the documented merchant marine of the United States for June 30, 1895, compared with June 30, 1894, as follows:

	1894.		1895.

<sup>&#</sup>x27;Omitted from this volume for want of space.

The navigation laws of the United States are in a condition highly discreditable to the intelligence of the nation. In many instances they consist of statutes copied in the last century from current British laws at a time when the recently achieved independence of this country made it necessary to hastily adopt large schemes of legislation for the government of the United States. While all other nations long ago abandoned these laws, we have tenaciously clung to them at the expense of our maritime rank, and without benefiting our shipbuilders. This is notably true of the law denying American registry in the foreign trade to any but home built vessels. I renew last year's recommendation for the repeal of The Commissioner of Navigation recommends the repeal or modification of many of these laws in order to bring them into accord with modern requirements, and I concur in these recommendations. initial voyages of the St. Louis and the St. Paul, the largest ships ever constructed in the New World, and excelled in size by only two anywhere afloat, are a promise of the restoration of our maritime rank, which can be made good only by the repeal of restrictive legislation. I concur in the recommendation for the abandonment of the policy of reciprocal exemptions from tonnage tax by which the United States surrenders annually to foreign vessels an income of \$100,000 in return for a benefit worth less than \$10,000 annually to American vessels. the nine years of its operation it has cost the United States much over half a million of dollars beyond any benefits American vessels have received from it.. The laws defining the Government's guardianship over American seamen need improvement, and will have more thorough enforcement.

I renew the recommendation of my last report that the several marine bureaus of the Treasury Department be assembled under the direct supervision of one Assistant Secretary of the Treasury, and to carry out the recommendation I request that Congress provide for an additional Assistant Secretary of the Treasury. It is believed that such reforms in the administration of the Department will result from favorable action upon this recommendation that the creation of the new office will very considerably reduce expenditures. The proposed concentration of marine bureaus would secure substantially all the advantages which have been suggested as reasons for the creation of a new Department of Commerce or a National Marine Board, and is open to none of the manifest and conclusive objections to those two projects.

#### THE LIGHT-HOUSE SERVICE.

The Light-House Board has submitted estimates for the building of three new steam tenders to take the place of vessels about worn out, and which will be unseaworthy by the time the new ones can be made ready to take their places. These little steamers are of very great value to the Board, enabling it to quickly replace buoys or light-ships when.

FI 95----IV

they go adrift, to promptly furnish light-houses with supplies needed to meet an emergency, and, above all, to make frequent inspections of light-houses and light-ships, and to keep in constant force the discipline of the Service. The vessels it is proposed to replace are now so frail from age and severe service that they can not keep the sea in heavy weather, but are forced to seek refuge in harbor at the very times when they are most required.

Estimates are submitted for building six light-vessels, which appear to be much needed. One is to take the place of regular vessels brought in for repair. The Light-House Establishment is singularly lacking in relief light-vessels. This is because it has had to draw so heavily upon its reserved forces. The plans for the new light-vessel to be stationed in the Pacific Ocean off Umatilla Reef, near the entrance to the Straits of San Juan de Fuca, have been prepared, and it is now under contract

The estimates submitted for light-houses and fog signals are much fewer in number and less in amount than were submitted last year; but they are for works urgently needed in the interests of commerce and navigation.

Attention is invited to the urgent necessity for more liberal appropriations to maintain the Light-House Establishment. Congress makes appropriations at each session for increasing the number of light-stations, but it does not increase, in like ratio, the appropriations for supplying these stations with oil, wicks, chimneys, cleaning material, and the like; for paying the wages of the additional keepers required; for keeping the light-stations in proper repair, and for keeping up the buoyage of the coasts. The estimates made for these purposes are based on the actual present needs of the Service, as set forth in itemized requisitions made by the light-house district officers, and the appropriations asked for will, if provided, make it possible to keep the Service up to a high standard of efficiency.

The Light-House Board has made an exhibit at the Atlanta Exposition, which, while it indicates something of the present status of the Light-House Establishment, is not what it would have been had sufficient funds and space been provided.

#### LIFE-SAVING SERVICE.

The record of the operations of the Life-Saving Service during the past year, as shown by the report of the General Superintendent, is one of the best the Service has produced. The number of disasters within the province of the Service was considerably larger than ever before, but in only one previous year has the loss of life been smaller in proportion to the number of persons exposed, while in that year the loss of property was greater in proportion to the amount imperiled. So also in one year only has the loss of property been relatively smaller, while in the same year the loss of life was relatively greater.

The average annual loss of life since the general extension of the Service on the sea and lake coasts in 1877 has been 1 out of every 107 persons on board the vessels involved in disaster, and the average loss of property 22 per cent of the amount involved. During the last year the loss of life was only 1 out of every 224 persons exposed, and the loss of property but 14 per cent of the amount involved.

The number of disasters to documented vessels within the field of the operations of the Service during the year was 483. There were on board these vessels 5,402 persons, of whom 5,382 were saved and 20 lost. The estimated value of the vessels involved was \$8,001,275, and that of their cargoes \$2,645,960, making a total of property imperiled \$10,647,235. Of this amount \$9,145,085 was saved and \$1,502,150 lost.

The number of vessels totally lost was 73.

In addition to the foregoing there were during the year 192 casualties to small craft, such as small yachts, sailboats, rowboats, etc., on board of which there were 421 persons, 415 of whom were saved and 6 lost. The property involved in these instances is estimated at \$77,940, of which \$75,180 was saved and \$2,760 lost. The result of all the disasters within the scope of the Service aggregate, therefore, as follows:

Total number of disasters	675
Total value of property involved	\$10,725,175
Total value of property saved	\$9, 220, 265
Total value of property lost	\$1,504,910
Total number of persons involved	
Total number of persons lost	26
Total number of shipwrecked persons succored at stations	803
Total number of days' succor afforded	2, 232
Number of vessels totally lost	73

Besides the number of persons saved from vessels of all kinds, there were 110 others rescued who had fallen from wharves, piers, etc., the most of whom would have perished without the aid of the life-saving crew

The crews saved and assisted to save, during the year, 379 vessels, valued with their cargoes at \$3,561,665, and rendered assistance of minor importance to 181 other vessels in distress, besides warning from danger by the signals of the patrolmen 249 vessels. How many disasters, with necessarily attendant loss of lives and property, were averted by these warnings, of course can not be definitely determined, but from the detailed accounts received of the circumstances in each instance it is evident that they must have been numerous.

The establishment embraced at the close of the year 251 stations, 184 being on the Atlantic, 53 on the Lakes, 13 on the Pacific, and 1 at the Falls of the Ohio, at Louisville, Ky.

The cost of the maintenance of the Service during the year was \$1,345,324.40.

In the last annual report two new stations were mentioned as receiv-

ing their equipments, one on Lake Superior, at Duluth, Minn., and one on the Atlantic, at Portsmouth, N.C. These have since been manned and put in operation. A new station which was in course of construction at Seven-Mile Beach, near Avalon on the coast of New Jersey, has been completed and put in commission.

Under authority of Congress the old station located at the mouth of the Chicago River, Chicago, Ill., which, after the completion of the new station at Jackson Park, was used as an annex or auxiliary of the latter, has been converted into a fully equipped station manned by a crew commensurate with the importance of the post, consisting of a keeper and eight men.

On account of the diversion of the main ship channel at Charleston, S. C., a new station to take the place of the old one on Morris Island has been erected, in pursuance of the authority of Congress, at Moultrieville, on Sullivans Island, and is designated as the Sullivans Island Station. A station authorized to be established at Gay Head, Massachusetts, has been erected and put in operation, and new stations are approaching completion at Core Bank, North Carolina, Baileys Harbor and Plum Island, Wisconsin, on Lake Michigan, and at Yaquina Bay, coast of Oregon.

Careful inquiry has been made into the nature and localities of the numerous fatal accidents that have occurred in the neighborhood of City Point, Boston Harbor, for which vicinity a station was authorized by Congress at its last session, and the determination has been reached to construct a floating station building to be anchored at a point selected in Dorchester Bay, as best calculated to afford the protection contemplated, and plans and specifications for the station are now in course of preparation. When they are completed proposals will be invited for its construction.

On the earliest practicable dates proposals will also be invited for the building of new stations authorized at Rocky Point, on Long Island, near East Marion, New York, and at Petersons Point, on the coast of the State of Washington.

New stations have been built at Monmouth Beach, Spring Lake, and Tathams, coast of New Jersey, to replace old buildings erected many years ago, which are inadequate to meet the necessities of the Service at the present time, and extensive repairs and improvements have been made to several stations in the second district, coast of Massachusetts; third district, coast of Long Island; and sixth district, coasts of Virginia and North Carolina.

The uniform rate of \$1,600 per annum, appropriated by the act making appropriations for sundry civil expenses of the Government for the current fiscal year, as compensation for the superintendents of life-saving districts, is not deemed adequate to the service performed in any of the districts, except one. These officers are charged with duties of great importance and responsibility, and are required to furnish bonds rang-

ing from \$10,000 to \$50,000. A salary of \$1,800 per annum, which was paid to the superintendents of eight of the twelve districts prior to the present fiscal year, would be no more than fair compensation to any of them, except in the seventh district, where all but two of the stations are houses of refuge, without crews, and the duties are consequently less important than in the other districts, and it is recommended that with this exception the salaries be fixed at that rate.

By the act of July 22, 1892, the compensation of all surfmen was fixed at \$65 per month. This sum, although regarded by many as insufficient, was gratefully accepted, and enabled the Service to secure the best qualified men for its crews, but the act of August 3, 1894, extending the period of active service upon the Atlantic and Gulf coasts to embrace the months of May and August, contained a provision by which all surfmen serving more than eight months were to receive but \$60 per month, while those who served for a period of eight months or less were to receive \$65 per month. Subsequently, by the act of March 2, 1895, the rate of \$65 was extended to men serving eight and a half months. The effect is that the surfmen employed on the Great Lakes, whose term of active service is from the opening to the close of navigation (which rarely, if ever, exceeds eight and a half months), and one man in each of 154 crews on the Atlantic coast. employed as an extra man from December 1 to May 1, receive \$65 per month, while all the surfmen upon the Atlantic coast, with the exception of the extra man mentioned, and all on the Pacific coast receive but \$60 per month, thus making a discrimination in favor of the lakes as against the ocean coasts, and also a discrimination in each of the 154 stations on the ocean coast in favor of one man against all the rest of the crew.

A keen sense of the injustice of these inequalities is felt by the main body of the surfmen upon both the ocean coasts, and this feeling is intensified on the larger portion of the Atlantic coast, where the extra man is employed, by the fact that he is at liberty to accept employment and engage in business during the very season of the year when the services of men expert in surfing, boating, and fishing are in greatest demand and command much better wages than have ever been paid in the Life-Saving Service, and yet he receives a higher rate of pay in the Service during the season in which there is little or no opportunity for employment elsewhere.

The rate of \$65 established by the act of July 22, 1892, appears to be no more than just and reasonable, considering the dangers and hardships of the duties performed and the further facts that the surfmen have to subsist themselves and provide themselves with uniforms. The removal of the present inequalities by the restoration of a uniform rate would dispel the prevalent discontent, put an end to the efforts now frequently made by the best surfmen to secure the shorter period of service, promote harmony among the men, and result in substantial advantage to the Service.

## STEAMBOAT INSPECTION SERVICE.

The Supervising Inspector-General reports that the personnel of the Service at the close of the fiscal year consisted of 163 officers, clerks and messengers.

The expenses of the service were, for the fiscal year, for salaries, \$261,997.27; contingent expenses, \$62,150.45.

There were inspected during the year 7,931 domestic steam vessels, with a net tonnage of 1,639,036.39. The officers licensed numbered 39,176.

The number of foreign passenger steamers inspected was 281; net tonnage, 557,262.23.

The Supervising Inspector General recommends that the laws be amended so as to give the Secretary of the Treasury power to divide local inspection districts into two or more such districts, with a board of local inspectors in each, when the work in any district requires the appointment of assistant inspectors, as being more economical than by the appointment of assistants, besides benefiting the public by having two or more bases of operations instead of one, and that one often at the extreme end of the geographic limits of the district.

The Supervising Inspector-General also renews his recommendations of 1892, in behalf of legislation that will secure a nonpartisan service, no removals to be made of local or assistant inspectors, except for incompetency, misconduct, or permanent physical disability, and for these reasons only after due investigation.

During the year the Department has instituted and put in practice a system of written examinations for all applicants for position as local or assistant inspectors, which will prevent the employment of any person in the Steamboat-Inspection Service who is not thoroughly qualified educationally and practically for these offices. This reform was much needed, and must prove of great benefit to the Service, and at the same time save the Department the constant annoyance to which it has heretofore been subjected by being required to consider the applications of the numerous candidates for positions in the Service, a large majority of whom were without the necessary experience and qualifications. will be difficult, however, to obtain persons of the very highest qualifications, such as are required by the regulations referred to, unless they can have some assurance of a reasonable tenure of office, which can be obtained only by such legislation as is recommended by the Supervising Inspector-General for a nonpartisan service.

The Supervising Inspector-General also recommends the creation, by statute, of an Assistant Supervising Inspector-General, to be appointed by the President by and with the consent of the Senate, the work of the office having increased over 150 per cent since 1876, making such appointment, in his opinion, an absolute necessity for the proper personal supervision necessary to carry out the objects for which the office of Supervising Inspector-General was created.

#### COAST AND GEODETIC SURVEY.

The Superintendent of the Coast and Geodetic Survey presents in his annual report<sup>1</sup> full details of the operations of that Bureau during the fiscal year, and also gives in concise tabulated form the statistics relating to the distribution of field parties and the results accomplished by each. Full particulars concerning the work of the various divisions of the office are also given, and the usual sketches showing graphically the progress of the Survey accompany the report.

Upwards of seventy-five parties were actively engaged on the various

<sup>1</sup> Omitted from this volume for want of space.

branches of the work, and these were widely distributed, their fields of operations embracing the Atlantic, Gulf, and Pacific coasts, Alaska, and the interior of the country. Work was carried on within the limits, or on the coasts, of sixteen States and Territories along the seaboards, and in nine interior States and Territories. It included reconnaissance, base measures, triangulation, topography, hydrography, physical hydrography, time, latitude, longitude and azimuth determinations, boundary line surveys, geodetic leveling, magnetic declination, dip and intensity observations, laying out of true meridian lines, gravity determinations, tidal and current observations, oyster bed surveys, etc.

Among the principal operations of importance begun, continued, or completed during the year may be mentioned the following: Completion of the topographic and hydrographic resurvey of Boston Harbor and vicinity; beginning of the topographic and hydrographic resurvey of Buzzards Bay; continuation of the Hudson River Survey; continuation of the hydrographic surveys in Nantucket Sound, and hydrographic examinations in Long Island Sound, Chesapeake and Delaware bays; continuation of lines of precise leveling in various parts of the country: continuation of telegraphic longitude determinations, principally in the Southwest; the completion of the resurvey of Pensacola Bay and its tributaries; the continuation of the transcontinental triangulation in Colorado and the oblique arc in Alabama; the continuation of the determination of points in aid of State surveys, in Tennessee, Kentucky, New Jersey, and Minnesota; the completion of the surveys of the Cooper and Ashley rivers and vicinity of Charleston, S. C.; the completion of the reconnaissance of the Rio Grande, from its mouth to El Paso, Tex.; fair progress made in the regular hydrographic surveys in Alaskan waters, and in the preliminary surveys for the location of the boundary line between Alaska and British Columbia; the continuation of the survey of the oblique boundary line between the States of California and Nevada; continuation of the topographic and hydrographic resurvey of San Francisco Bay and Harbor, with incidental triangulation; continuation of magnetic determinations at various points on the Atlantic, Gulf, and Pacific coasts, and in the interior; and the continuation of the triangulation, topography, and hydrography of interior waters of Washington.

For the United States Commissioner of Fish and Fisheries, a further examination was made relative to the natural oyster beds of Mobile Bay and vicinity, and the similar work carried on in the waters of Virginia at the request of the State authorities was brought to a completion.

The assignments of two of the assistants of the Survey to special duty by appointment of the President are still in force; one is serving as a member of the Mississippi River Commission, and the other as member of the International Boundary Commission, organized for the location of that part of the United States and Mexican boundary line extending from El Paso to the Pacific Ocean. The latter officer, however, during

http://fraser.stlouisfed.org/ Federal Reserve Bank of St. Louis a portion of the fiscal year, was temporarily relieved from duty on the Commission, and reported to the Superintendent for regular service in the Coast and Geodetic Survey.

At the request of the Secretary of the Navy, two assistants were temporarily detailed, one for special triangulation in connection with the laying out of a speed-trial course in Long Island Sound, and the other for a survey on a large scale of the vicinity of the dry dock at Port Orchard, Puget Sound. The detail of an assistant for the Massachusetts Triangulation and Town Boundary Survey was continued during the greater part of the year, and another was temporarily detailed, at the request of the governor of Virginia, to make a special survey of the Fox Islands, Chesapeake Bay.

Strenuous efforts have, as heretofore, been made to secure the earliest practicable publication of all important information affecting the interests of navigation and commerce, and the continued large demand for the Charts, Tide Tables, Coast Pilots, Notices to Mariners, and other publications of the Survey shows the public appreciation of this service. Fifty-one thousand four hundred and fifty-six Charts, 5,691 Tide Tables, and 594 Coast Pilots were issued during the year, and 123,500 Notices to Mariners were published for free distribution.

## Office of Standard Weights and Measures.

During the year the usual amount of work was done for other Departments of the Government, and for States, colleges, surveyors, manufacturers, and others. The final comparisons of the weights and measures for the States of North and South Dakota were completed during the year, and the sets were forwarded to their respective destinations in June.

The new Rueprecht balance of precision purchased for the office has been mounted on a suitable pier, and a careful test has been made of its accuracy with very satisfactory results. By means of ingenious auxiliary devices the oscillations of the beam are noted from a distance, and the interchange of weights upon the scale pans is accomplished without approaching the balance.

#### PUBLIC BUILDINGS.

During the past year, work has been prosecuted on 70 buildings, including extensions and repairs specifically appropriated for, of which number 24 buildings have been completed for occupation, thus placing under the control of the construction branch of this Department 382 buildings, classified as follows:

Completed and occupied	306
In course of construction during year	
Of which number there were completed and included in the above	
	46
Active operations not yet commenced	30

The following statement shows the amount expended upon public buildings during the year ending September 30, 1895:

For sites and construction of new public buildings	\$3, 459, 210. 03
For repairs and preservation of public buildings	172, 454. 11
For heating apparatus for public buildings	93, 012. 46
For vaults, safes, and locks for public buildings	39, 666. 03
For plans for public buildings	3, 191. 51

3, 767, 534. 14

The aggregate limit of cost fixed by Congress for the 46 public buildings now in the course of construction was \$19,415,566.23, of which all except \$3,849,000 has already been appropriated. Of the amount appropriated on account of these buildings, \$2,290,760.30 is still unexpended, which, with the \$3,849,000 yet to be appropriated, makes \$6,139,760.30 yet to be expended upon them. There are 30 buildings upon which work has not yet been commenced, and their aggregate cost, as limited by law, is \$12,340,000. It will thus be seen that the expenditure on account of public buildings now authorized by Congress amounts to \$18,479,760.30. Whether it would be wise in view of these facts to authorize the construction of additional public buildings at this time, except in cases where they are imperatively needed, is a question which deserves the serious consideration of Congress.

'With the limited force provided for in the office of the Supervising Architect, it is impossible to carry on work upon a great number of buildings at the same time, and much delay, and consequent loss, is incurred on this account. If the preparation of designs, plans, specifications, and working drawings, and the supervision of construction is to remain exclusively in the office of the Supervising Architect, it is scarcely necessary to say that adequate provision should be made for the performance of the work, and I hope the increased appropriation asked for this purpose will be made.

#### DISTRICT OF COLUMBIA.

The net expenditures on account of the District of Columbia for the fiscal year 1895 were \$6,176,891.19. The net revenues deposited in the Treasury on this account for the same period were \$3,673,641.76.

There have been issued and sold during the fiscal year \$110,000 of the 3.65 per cent bonds to provide funds to pay additional interest on Board of Audit certificates redeemed under the act of Congress approved June 16, 1880, and to pay outstanding bonds known as "Greenback eight per centum bonds" as provided in the act approved August 13, 1894 (28 Stat., 271). There have also been issued and sold \$46,000 3.65 per cent bonds to satisfy the award of the arbitrators in the cause of Samuel Strong v. The District of Columbia.

The issue of 3.65 per cent bonds is limited by law to \$15,000,000. The total amount issued to the close of the fiscal year was \$14,932,300,

ttp://fraser.stlouisfed.org/ ederal Reserve Bank of St. Louis leaving but \$67,700 to be issued in satisfaction of judgments of the Court of Claims, as provided in the act approved February 13, 1895.

Under the operations of the sinking funds the net reduction of the bonded debt was \$411,500, and of the annual interest charge \$14,419.50.

The eight per centum greenback bonds authorized to be paid from the proceeds of the sale of 3.65 per cent bonds, under the provisions of the act of August 13, 1894, were issued under authority of an act of the Legislative Assembly, approved May 29, 1873, to the amount of \$2,000,000, to the payment of which it pledged all assessments for special improvement thereafter made, and required that the ten per cent taxlien certificates, representing the amount of said assessments, should be deposited with the Commissioners of the Sinking Fund, and that the proceeds thereof should be applied by them to the payment of said But \$17,300 of these bonds were outstanding at the date of the approval of the act of August 13, 1894. A large amount of tax-lien certificates still remain in the custody of the Treasurer of the United States, ex officio Commissioner of the Sinking Fund of the District of Columbia, and he therefore recommends that having otherwise provided for the redemption of the balance of the eight per cent bonds, that Congress be asked to authorize him to deliver to the Commissioners of the District of Columbia the tax-lien certificates held by him as a security for the payment of special taxes, in order that they may apply all money derived therefrom to the payment of the outstanding drawback certificates as contemplated by the act of Congress approved June 19, 1878, providing for their issue.

The District of Columbia has paid to the United States for account of increasing the water supply, under the provisions of the acts of July 15, 1882, and June 5, 1884, \$1,016,241.92 of the principal of the sums advanced, and \$247,640.45 for interest thereon, and has paid for account of the 48-inch and Fourteenth street water mains \$47,346.04 of the principal of the amount due the United States, and \$33,378.95 for interest thereon.

Detailed information in regard to the affairs of the District of Columbia will be found in the report to be submitted by the District Commissioners and by the Treasurer of the United States, ex-officio Commissioner of the Sinking Fund of the District.

#### SEAL AND SALMON FISHERIES.1

The work of patrolling the award area in the North Pacific Ocean and Bering Sea was undertaken this year by the Treasury Department through the Revenue Cutter Service. The fleet consisted of five vessels, the Rush, Bear, Corwin, Perry, and Grant; and they were assisted incidentally by the United States Fish Commission steamer Albatross. This fleet was commanded by Capt. C. L. Hooper, of the Rush, and the work,

which was most efficiently performed, reflects great credit upon that officer and the officers and men of the vessels under his command.

Between the months of May and September, the five revenue cutters boarded and carefully searched 116 sealing and other vessels, in all 339 times in the award area, as compared with a total of 83 similar vessels boarded, in all 138 times in the season of 1894 by eleven vessels comprising the patrolling fleet for that season. The total expense of maintaining the fleet this season, including necessary repairs, but excluding compensation of officers, pay of crews, and rations, was \$65,158.86, as compared with \$198,554.49 for 1894.

Three British sealing vessels were seized during the season—the Shelby, in the North Pacific Ocean, on May 11, and the Beatrice and E. B. Marvin, on August 20 and September 2, respectively, in Bering Sea. Libels were duly instituted by the British Government in the court at Victoria and the Shelby was condemned, but the Beatrice and E. B. Marvin were released by the court, the latter without costs.

One American sealing vessel, the Louis Olsen, was seized September 3 in Bering Sea for killing seals inside the sixty-mile zone. She was duly libeled at Astoria, Oreg., and the Department is in receipt of information that she has been condemned by the court. Four other American vessels, the Winchester, Bowhead, Sofie Sutherland, and Kate and Anne were seized on arrival in port by the collector of customs at San Francisco, their log entries having disclosed that they had taken seals within the award area during the open season without the special license required by law. These vessels cleared for the Japan seal-fishing grounds, outside of the award area, and did not take out a license. Libels have been instituted and the cases are still pending in the courts.

The searches conducted by the United States officers were most thorough; every seal skin was examined carefully, and the whole vessel searched in the most careful manner, and some of the sealing vessels were examined and searched as many as six or seven times. For list of vessels boarded and seized by Bering Sea patrol fleet during the seasons of 1894 and 1895, see Tables W, X, Y, Z, AA, BB, and CC, pp. 74 to 79.

### The Pelagic Sealing Fleet.

The total number of sealing vessels engaged in fur seal fishing during the season was 97, of which 62 were British Canadian and 35 American. Of these vessels, 81 were employed in the award area, of which 49 were British and 32 American. Last season only 62 were employed in the award area, an increase for this season of 30 per cent.

### British Patrolling Fleet.

Notwithstanding the preponderance of British Canadian vessels in the sealing fleet, the British Government furnished only one patrolling vessel, H. M. S. *Pheasant*, to assist in the patrol. This vessel was

stationed for the greater part of the time at Sitka and Unalaska, and took little or no part in the patrol other than to receive British vessels seized by our fleet.

## Sealing Regulations.

I regret to state that the Government of Great Britain refused to renew the regulations agreed upon for the season of 1894, providing for the sealing up of implements and firearms on board of vessels lawfully in or traversing the award area during the prohibited season. regulations furnished a conclusive mode of proof that the sealing vessel had not violated the law. For example, a vessel may have been engaged in sealing off the Japan coast, far outside of the Paris award area. her homeward voyage to the United States, or British Columbia, she may have to pass through the award area at a time when fur-seal fishing is there prohibited (May, June, and July). Under the regulations of 1894 the consular officer in Japan, or a naval or customs officer, could seal up the implements of the vessel, noting the fact and the catch of seals on her A cruising vessel, finding her implements sealed up log at the time. and her catch agreeing with the consul's certificate, in the absence of other evidence of guilt, would not molest the vessel further than to examine carefully to ascertain the truth of the statements in the log.

The use of firearms in fur-seal fishing in Bering Sea is prohibited by the Paris award regulations, and the legislation of the respective governments, passed to enforce the award. As the award regulations merely prohibit the use of firearms, and do not make their possession illegal, it was agreed by the respective governments in 1894, that all sealing vessels before entering Bering Sea should have their firearms secured under seal. This provision had worked satisfactorily, as the Department supposed, during the season of 1894, but, as above stated, the British Government refused to agree to such an arrangement for the season of 1895, alleging that, "It has not in practice worked for the protection of British sealers from interference as Her Majesty's Government had hoped would have been the case."

This refusal leaves the question of the possession and use of firearms by British vessels, at least, to be determined wholly by the Paris award and the legislation enacted by the British Government for making it effective. It is to be regretted that the legislation of the respective governments is not harmonious, that of our Government being much more stringent than that of the British Government.

The act of Congress of April 6, 1894, provides in section 10 that any vessel found in the award area with any sealing apparatus or implements forbidden then and there to be used shall be presumed to have used the same in violation of the act until it is otherwise sufficiently proved.

The act of Parliament, known as the Bering Sea Award Act, 1894,

contains no such provision, although the earlier acts known as the Bering Sea Act, 1891, in force during the modus vivendi prior to the award of the Tribunal, and the Seal Fishery North Pacific Act, 1893, each contained a clause similar to section 10 of our act. thus places the burden of proof, in case of an American vessel found with sealing implements during the prohibited season, upon the owner of the vessel, under the British law, which applies to British Canadian vessels, the burden of proof remains upon the Government. The regulations as to sealing up of implements and arms, which were agreed upon for the season of 1894, furnished to both American and British Canadian vessels a mode of satisfying the searching officer that the law had not been violated. It is to be regretted, therefore, that the British Government declined to renew this agreement for the season of 1895. As a justification of this refusal, our Government was notified that the provisions of the Paris award merely prohibited the use of firearms in fur-seal fishing (except shotguns in the North Pacific during the open season), and that nowhere is the mere possession of such firearms made an offense, and that a vessel may lawfully carry and use firearms for other than the prohibited purposes.

# Catch of the Sealing Fleet for 1895.

The total catch of seals killed and recovered at sea in the award area during the season of 1895 was 56,291 as compared with 61,838, the corrected figures for 1894, a decrease of 5,547. This decrease is caused by the falling off in the spring catch along the United States and British Columbia coasts. The catch in Bering Sea was 44,169, an increase over that of 1894 of 12,584, or about 40 per cent, the vessels employed in that sea being 59, an increase over 1894 of 22, or 59 per cent. This large increase in the catch in Bering Sea, while the spring catch notably declined, reveals the great defect in the Paris award regulations in not absolutely prohibiting all sealing in Bering Sea.

## Land Catch on the Pribylof Islands.

The catch on the Pribylof Islands for this season was 15,000 seals, all males. A serious decrease in the number of seals on the island was manifest as compared with last year. A careful count of all the seals on St. George and St. Paul islands was made during the season, resulting in the enumeration of a little over 200,000 seals. The decrease for last year, as above stated, was very considerable, and since 1891 the seals have decreased over one-half. In 1881 over 100,000 seals were taken on the Pribylof Islands, while not over 10,000 were killed at sea in the whole North Pacific Ocean and Bering Sea, from the shores of Asia to America. In 1895 the catch on the Pribylof Islands had fallen to 15,000, while 44,169 seals were taken around the islands, outside the prohibited zone, by pelagic sealers, and a total of 56,291 were taken at sea by said pelagic sealers in the award area.

http://fraser.stlouisfed.org/ Federal Reserve Bank of St. Louis The most conclusive evidence of the fatal results on the seal herd of pelagic sealing in Bering Sea, where, according to official returns, over 73 per cent of the American and 56 per cent of the British Canadian catch consisted of females, was the finding by our agents on the islands this season of over 28,000 seal pups which had died of starvation, their mothers having been killed at sea by pelagic sealers whilst in search of food beyond the sixty mile zone.

Adding these dead pups to the number of seals killed and recovered at sea, and adding to last year's catch the number of pups found on the islands, dead under similar circumstances (20,000 by careful estimate), we have a total of over \$1,000 seals killed by pelagic sealers in 1894 and over \$4,000 in 1895, the largest number in the history of fur-sealing operations. When it is considered that a moderate estimate of seals killed in the water, but not recovered, would be two or three times the number recovered, some comprehension may be had of the effect of pelagic sealing on the fur-seal herd.

## Inefficacy of the Paris Award Regulations.

The experience of the last two seasons, during which fur-seal fishing was conducted under the Paris award regulations, must satisfy the most skeptical that these regulations will not result in protecting the seal herd from undue destruction. While it is undoubtedly true that these regulations, by establishing a closed season during May, June, and July, have somewhat retarded the destruction, yet the official figures of the catch justify the conclusion that under their operation the fur seals of the American herd will be exterminated commercially within a very few years. The failure of these regulations adequately to protect the seal herd is in accordance with the predictions made during the argument before the Paris Tribunal by the eminent counsel representing the United States, and by the distinguished arbitrators, Mr. Justice Harlan and Senator Morgan, in their able dissenting opinions, in which they insisted strenuously that the only practical regulation would be one prohibiting pelagic sealing north of the thirty-fifth degree north latitude. objected to the change suggested, and finally adopted by the Tribunal, making the closed season begin May 1 instead of April 15, as contained in the original draft, stating that such a change would put in peril the existence of this race of animals. Finally, Mr. Justice Harlan, commenting on the draft of the regulations prepared by three members of the Tribunal, which were finally adopted, including the amendment above referred to, providing that the closed season should begin May 1 instead of April 15, stated:

"Notwithstanding these defects in the scheme, there is a hope, though not a certainty, that this race may, under the regulations so proposed, escape destruction at the hands of pelagic sealers. For that reason, and in the interest of peace between the two nations, Senator Morgan and myself have determined to give our votes in support of this scheme as the best solution likely to be obtained from the Tribunal of the question of regulations."

### Asiatic Catch.

It should be noted that the figures cited above do not embrace seals taken without the Paris award area, off the Japanese and Russian coasts. The catch off these coasts this season was 39,093 as compared with 79,305 taken during the season of 1894. Reports received indicate that this falling off is due to the effect of excessive catches of previous seasons, and that the Asiatic herd is in danger of extermination to the same, or a greater degree, than our own herd.

## Total American and Asiatic Catch.

The total of all the seals taken at sea in the North Pacific Ocean and Bering Sea, from the Asiatic to the American shores during the season of 1895, was 93,326, as compared with 141,143 for the season of 1894.

A table showing the pelagic catch of seals from 1868 to date, prepared by Assistant Secretary Hamlin and Mr. J. Stanley Brown, formerly special agent of this Department to the Seal Islands is hereto annexed.<sup>1</sup>

### Salmon Fisheries.

I renew my recommendation of last year, that legislation should be enacted by Congress making more stringent the laws for the protection of the salmon fisheries, and providing for certain closed days during which the fishing shall be prohibited. Unless effective legislation is adopted, there is great danger of the extermination of this valuable fishery. The Department has carefully investigated this matter, and I reserve for a future report to Congress a more complete statement of the necessity for new legislation.

#### Customs Service.

I also renew my recommendation of last year that the Secretary be empowered to establish additional subports of entry and delivery throughout the Territory of Alaska, whenever and wherever, in his judgment, such ports are necessary, and to appoint such additional officers as such increase in ports may demand.

Reports from the collector of customs at Sitka indicate that much gold is being taken out by miners in the Birch Creek and Yukon Valley regions. The deputy collector at Circle City, which is on the Yukon, about 170 miles from Forty-Mile Creek, estimates that the amount of gold dust and nuggets taken out of the Birch Creek district last summer will reach \$400,000.

The growth of Circle City has been surprising. There are reported to be 125 dwelling houses, 3 stores, 2 restaurants, a bakery, barber shop,

and an opera house already erected in the town. The town and the surrounding country are reported to be filled with aliens, the land is said to be demoralized by intoxicating liquors and infested with smugglers, and yet there are no proper facilities for enforcing the laws of the United States. During the past season a force of Canadian mounted police has been stationed along the Canadian frontier and was invested with plenary powers of enforcing the Canadian laws. I earnestly recommend that Congress enact legislation authorizing a force of United States troops to be stationed in this region, with full power, when called upon, to assist the civil authorities in maintaining law and order.

#### PACIFIC RAILROADS.

In my annual report for the fiscal year 1893 the attention of Congress was called to the condition of the indebtedness of the United States incurred by the issue of subsidy bonds to the Pacific railway companies, and it was recommended that early consideration be given to the subject with a view to secure the ultimate payment of these bonds by the companies. Nothing has yet been accomplished in this direction, and the affairs of the companies now appear to be approaching a condition which will seriously embarrass the executive officials charged with the general supervision of the matter, and almost certainly result in great loss to the Government unless averted by prompt action on the part of Congress. Since the report referred to was made, bonds for \$2,362,000, issued to the Central Pacific, and for \$640,000, issued to the Kansas Pacific, have matured and been paid by the United States; and on the 1st day of January, 1896, more bonds will mature, viz: \$1,600,000, issued to the Central Pacific, \$1,440,000, issued to the Kansas Pacific, and \$640,000, issued On the 1st day of February, 1896, other bonds to the Union Pacific. issued to the Union Pacific, for \$4,320,000, will become due. The sinking fund of the Central Pacific, consisting of cash and bonds, amounts to \$6,254,556.61, and the sinking fund of the Union Pacific, consisting also of cash and bonds amounts to \$15,346,037.61.

The total amount due and to become due on or before the 1st day of January, 1899, is \$64,623,512, exclusive of interest, and it is evident that unless some adjustment is made under the authority of an act of Congress, the payment of this large sum with accruing interest must be provided for within the time named. If the property of the companies should unfortunately be forced to sale under foreclosure proceedings before further provision is made by Congress to protect the interests of the Government by increasing its security or otherwise, no public official, with the limited authority now conferred by law, will be able to save any considerable part of this large claim. Congress alone has the power to determine the manner in which this important subject shall be disposed of, and it is hoped that such legislation as it may deem necessary and proper will be enacted at an early day.

FI 95-----V

#### CONDITION OF THE TREASURY AND THE CURRENCY.

At the beginning of the last fiscal year, July 1, 1894, the cash balance in the Treasury, excluding all current liabilities, but including a gold reserve of \$64,873,024.06, was \$117,584,436.13, and at the close of the year, June 30, 1895, the cash balance, excluding all current liabilities, but including a gold reserve of \$100,000,000, was \$195,240,153.87, showing au increase of \$77,657,717.74. The excess of expenditures over receipts during the year was \$42,805,223.18, as against a deficiency of \$69,803,260.58 during the fiscal year 1894. The total receipts during the fiscal year 1895 were \$15,668,055.86 greater than the receipts during the fiscal year 1894, and the expenditures were \$11,329,981.54 less than during the year 1894. The revenue derived from customs during the fiscal year 1895 exceeded the revenue derived from the same source in 1894 by the sum of \$20,340,086.83, but the receipts under the internalrevenue laws, and from some other sources, were less than during the previous year; so that the net increase of revenue was \$15,668,055.86, as above stated.

If the income-tax provision contained in the act of August 28, 1894, had been sustained by the courts, it is believed that the deficiency for the year would not have exceeded the amount estimated in my last annual report. In that report the opinion was expressed that the laws then in force would not only yield an ample revenue during the fiscal year 1896, but that there would be a surplus of nearly \$29,000,000. This opinion was based upon the supposition, which then seemed to be well founded, that all the sources of revenue provided in the act of August 28, 1894, would be available, and that, owing to the higher rate of taxation imposed upon distilled spirits and some other articles, the receipts under the internal-revenue laws would be very considerably increased; but the decision of the Supreme Court, holding the incometax provisions of the act to be unconstitutional, and the fact that the receipts from internal revenue did not increase as anticipated, but actually fell off \$3,689,560.79 during the fiscal year 1895, as compared with the previous year, notwithstanding the higher rate imposed on spirits and other articles, have greatly altered the situation, and I am now of the opinion that there will be a deficiency of about \$17,000,000 during the current fiscal year.

The total excess of expenditures over receipts from July 1, 1893, to December 1, 1895, was \$130,221,023; and of this sum \$22,462,290.38 was paid out of the balance on hand at this date in excess of \$100,000,000, and the remainder has been supplied by the use of United States notes and Treasury notes presented for redemption, and thus received into the Treasury in exchange for gold coin. The act of May 31, 1878, provided that when any United States note "may be redeemed or be received into the Treasury under any law, from any source whatever, and shall belong

to the United States, they shall not be retired, canceled or destroyed, but they shall be reissued and paid out again and kept in circulation," and the act of July 14, 1890, provided that the Treasury notes, when redeemed, may be reissued, but that "no greater or less amount of such notes shall be outstanding at any time than the cost of the silver bullion and the standard silver dollars coined therefrom then held in the Treasury purchased by such notes."

It is clear that when any of these notes have been redeemed they do not constitute a part of the reserve fund, but become a part of the general cash assets of the Treasury, to be used in the same manner as other money belonging to the Government. Whenever they could, by exchanges, be used to procure gold for the replenishment of the reserve, they have been so applied, but, when this could not be done, they have been treated as available funds in the Treasury and reissued in payment of public expenses. None of my predecessors in office have ever made any distinction between the notes received in payment of the ordinary revenue and notes presented by the holders and redeemed in coin, but such notes have been used indiscriminately as the exigencies of the public service required.

Secretary Sherman discussed this question in his annual report for 1877, before the passage of the act of May 31, 1878, and, among other things, he said: "A note redeemed with coin is in the Treasury and subject to the same law as if received for taxes, or as a bank note redeemed by the corporation issuing it. The authority to reissue it does not depend upon the mode in which it is returned to the He was discussing the question whether the notes which might be redeemed after the 1st day of January, 1879, under the Resumption Act, could be lawfully reissued, and he held that they could; but he stated that this construction of the law was controverted, and insisted that the question should be settled by a distinct provision of law. The result was that Congress passed the act of May 31, 1878, making it mandatory upon the Secretary of the Treasury to reissue the notes. Since the passage of that act, the right and duty of the Secretary of the Treasury to reissue the old legal tender notes, no matter how received into the Treasury, provided they belong to the United States, has never been questioned in any quarter, and, as to the Treasury notes issued under the silver-purchasing act, they must be reissued when redeemed in gold, or, if canceled, standard silver dollars must be issued in their place; for if this were not done, there would be a smaller amount of such notes outstanding than the cost of the silver bullion and the standard silver dollars coined therefrom and held in the Treasury, and this condition is expressly prohibited by the statute under which the notes were issued. Whether these notes are reissued, or destroyed and standard silver dollars substituted for them, the practical result is the same, for in both cases the Secretary would be using notes redeemed in gold for the payment of the ordinary expenses

of the Government; in one case, by paying out the notes themselves, and in the other by drawing silver from a reserve fund on account of their cancellation, and then paying out the silver.

The cash balance in the Treasury on the 1st day of December, 1895. was \$177,406,386.62, being \$98,072,420.30 in excess of the actual gold reserve on that day, and \$77,406,386.62 in excess of any sum that it would be necessary to use for replenishing that fund in case the Secretary should at any time be able to exchange currency for gold. therefore, no reason to doubt the ability of the Government to discharge all its current obligations during the present fiscal year, and have a large cash balance at its close, without imposing additional taxation in any form upon the people; but I adhere to the opinion, heretofore expressed, that the Secretary of the Treasury ought always to have authority to issue and sell, or use in the payment of expenses, shorttime bonds, bearing a low rate of interest, to supply casual deficiences Although former recommendations upon this subject in the revenue. can not be strengthened by repetition, the subject is of such importance that I consider it my duty to present it again to the attention of Congress and to express the hope that it will receive favorable consideration.

While the situation does not require any legislation for raising additional revenue by taxation at this time, it is such as to require the strictest economy in appropriations and public expenditures. At a time when the people, upon whom the expense of sustaining the Government is imposed, are compelled to practice the closest economy in their business and domestic affairs in order to meet their obligations and reestablish their trade and industries, it is more than ever the duty of the public authorities to avoid waste and extravagance in the appropriation and Nearly every appropriation is in disbursement of the revenues. terms, or by necessary implication, a direction to the executive authorities to expend the money, and, therefore, the responsibility for an increase or reduction of expenditures rests primarily and mainly upon It is certain that if appropriations are not made the money will not be expended, and, for the reason just stated, it is almost equally certain that if appropriations are made the money must be expended. The power of the executive officials to reduce expenditures is limited to the comparatively few cases in which the disbursement is left to their discretion, and, however judiciously this discretion may be exercised, the effect upon the total outlay is scarcely appreciable.

While all the essential agencies for an efficient administration of the public service should be adequately provided for, I am sure that a careful examination of the subject will disclose many sources of expenditure which might be greatly reduced or entirely abolished, and legislation in this direction, together with a refusal to make appropriations for new objects of doubtful necessity or propriety, would tend very materially to equalize the public receipts and disbursements. With a com-

plete return to the normal business conditions of the country, and a proper legislative and executive supervision over expenditures, the revenue laws now in force will, in my opinion, yield ample means for the support of the public service upon the basis now established; and upon the assumption, which seems to be justified, that the progress now being made toward the restoration of our usual state of prosperity will continue without serious interruption, it is estimated that there will be a surplus of nearly \$7,000,000 during the fiscal year 1897. During the fiscal years 1894 and 1895 the ordinary expenditures of the Government have been decreased \$27,282,656.20 as compared with the fiscal year 1893, and it is believed that, with the cooperation of Congress, further reductions can be made in the future without impairing the efficiency of the public service.

Between the 1st day of February, 1894, and the 15th day of March, 1895, three issues of bonds were made, amounting in the aggregate to The conditions existing at the dates of the first two of these issues, and the results of their negotiation, were fully detailed in my last annual report and need not be further noticed at this time. payments into the Treasury on account of the second bond sale were not entirely completed until after the 1st day of December, 1894, and it soon became evident that the transaction had not been effectual to stop the drain of gold. In that month the withdrawals amounted to \$31,907,221, and during the next, January, 1895, they amounted to \$45,117,738, and they continued without diminution during the early days of February, so that, on the 8th of that month, the reserve had been reduced to \$41,340,181 and several million more had been demanded, a part of which was taken out and afterwards returned to the Treasury on account of the temporary restoration of confidence resulting from the fact that it became generally known that measures were about to be taken for the replenishment of the reserve.

The large withdrawals in December, 1894, and in January and the early part of February, 1895, were due almost entirely to a feeling of apprehension in the public mind, which increased in intensity from day to day until it nearly reached the proportions of a panic, and it was evident to all who were familiar with the situation that, unless effectual steps were promptly taken to check the growing distrust, the Government would be compelled within a few days to suspend gold payments and drop to a depreciated silver and paper standard. than \$43,000,000 of the amount withdrawn during the brief period last mentioned was not demanded for export, but was taken out by people who had become alarmed on account of the critical condition of the Treasury in its relations to the currency of the country. although earnestly appealed to for relief, having failed to make any other provision for meeting the emergency, a contract, the particulars of which were immediately communicated to that body; was entered into on the 8th day of February, 1895, for the purchase of 3,500,000

ounces of standard gold coin, at the price of \$17.80441 per ounce, to be paid for by the delivery of United States bonds, having thirty years to run, and bearing 4 per cent interest, and the gold to be deposited at the United States subtreasuries. By the terms of the contract, not less than one-half of the gold was to be procured abroad, and the parties with whom it was made stipulated that they would "as far as lies in their power exert all financial influence and will make all legitimate efforts to protect the Treasury of the United States against the withdrawals of gold pending the complete performance of this contract."

This undertaking was faithfully and efficiently carried out, and no gold was taken from the Treasury to be used in paying for the bonds, as had been done in the two former cases, nor was any withdrawn for shipment until after the delivery had been completed under the contract.

After a large part of the gold had been furnished from abroad, the Secretary, in order to prevent disturbance in the rates of foreign exchange at a critical period and avoid a condition which would force gold exports and consequent withdrawals from the Treasury, acquiesced in a departure from the literal terms of the contract, that one-half of the coin should be procured abroad, and accepted deposits of gold then held in this country to complete the delivery. Ordinary prudence demanded that the success of the plan to protect the Treasury against withdrawals should not be endangered by insisting upon a strict compliance with all the details of the contract, especially as the Government could sustain no loss, and the whole amount of gold stipulated for was secured.

The amount of bonds issued under this contract was \$62,315,400, and the amount of gold received was \$65,116,244.62. The last deposit of gold to complete the delivery under the contract was made June 24, 1895, but the syndicate continued to make deposits until September 11, 1895, in exchange for United States notes and Treasury notes, the total amount so deposited being \$16,127,432.94. The beneficial effects of this transaction were felt immediately, not only in this country, but in every other having commercial or financial relations with our people. Confidence in our securities as safe and profitable investments was at once restored to such an extent that they ceased to be returned to our market for sale, and a very considerable demand for them was created abroad; but the most gratifying evidences of improvement in our condition were afforded by the prompt revival of business among our own people, the increased activity and extension of our domestic industrial and commercial operations, the rise in the prices of our principal agricultural products, and the general feeling of relief and security which became apparent in every part of the country. These encouraging indications of increasing prosperity still continue, and it is reasonably certain that, if our progress is not checked by a repetition of large demands upon our resources, or by a failure to meet the just expectations of the people in respect to the reformation of our fiscal system, we are entering

upon an era of material growth and development not surpassed in our The safety of the existing situation is, however, constantly menaced, and our further progress toward a complete restoration of confidence and prosperity is seriously impeded, by the defects in our currency laws and the doubt and uncertainty still prevailing in the public mind, especially abroad, concerning the future monetary policy of the Govern-Until these defects in our laws are remedied and these doubts are removed, there can be no satisfactory assurance of immunity from periodical disturbances growing out of the obligations which the Government has been compelled to assume in relation to the currency. past experience with the United States notes and the Treasury notes has clearly shown that the policy of attempting to retain these obligations of the Government permanently as a part of our circulating medium, and to redeem them in coin on presentation and reissue them after redemption, must be abandoned, or that such means must be at once provided as will have a tendency to facilitate the efforts of the Secretary to accumulate and maintain a coin reserve sufficient in amount to keep the public constantly assured of the stability of our entire volume of currency and of our ability at all times to preserve equality in the exchangeable value of its various parts. The latter alternative, which, in my opinion, if adopted, would not afford the relief demanded by the existing situation, necessarily involves such large increases of the interest-bearing public debt from time to time, and would impose permanently upon the Government such onerous and inappropriate duties in relation to the paper currency of the country, that it ought not to be favorably entertained, except as a last resort in the struggle for the maintenance of the public faith and the preservation of the inviolability of private contracts.

The issue of bonds to procure coin for the reserve, which is the only effectual method now available under the law, will, unless the conditions which have already been developed by the present policy are radically changed, ultimately result in the creation of a public debt much larger than would be required to retire and cancel all the notes; and the annual interest charge will be much greater than it would be necessary to incur on a new class of bonds adapted to the present circumstances of the Government and the well-known preferences of investors. an attempt is to be made to keep the United States notes and Treasury notes permanently in circulation by reissues after redemption, and the Government is to be permanently charged with the duty of sustaining the value of all our currency, paper and coin alike, the conclusion can not be avoided that the policy of issuing bonds for the accomplishment of these purposes must also become permanent, and such additional powers must be conferred upon the Secretary as will enable him to execute the laws relating to these subjects with the least possible disturbance of the business affairs of the people, and the least possible charge upon the Treasury. I am thoroughly convinced that this policy

ought not to be continued, but that the United States notes and Treasury notes should be retired from circulation at the earliest practicable day, and that the Government should be wholly relieved from the responsibility of providing a credit currency for the people.

It would be difficult, if not impossible, to devise a more inconvenient, expensive, or dangerous system than the one now in operation under the laws providing for the issue, redemption, and reissue of legal tender notes by the Government. Although bonds to the amount of more than \$257,000,000 have been sold to provide for the redemption of these notes, upon which the interest already paid exceeds \$75,000,000, and more than \$407,000,000 have been actually redeemed in gold, all the notes, except about \$17,000,000 of the Treasury notes exchanged for standard silver dollars and canceled, are still outstanding and still threatening the credit of the Government and severely taxing the resources of the Originally issued as a temporary expedient to meet a pressing emergency in a time of war, and even then denounced by many of the ablest financiers and statesmen in the country as a dangerous and unconstitutional departure from sound economic principles, the people had a right to expect that these obligations would be extinguished as soon as possible after the restoration of peace and the reestablishment of the usual and proper relations between the Government and the business affairs of its citizens. In compliance with the assurances given when they were first authorized, and in obedience to the demands of all our substantial business interests, Congress, within less than a year after the cessation of hostilities, passed an act authorizing the Secretary of the Treasury to sell bonds and use the proceeds in retiring the United States notes, but providing that not more than \$10,000,000 should be retired and canceled during the first six months after the passage of the act, and thereafter not more than \$4,000,000 in any one month. Under this act, which was approved April 12, 1866, notes amounting to \$59,164.318 were retired and canceled, but in January, 1868, another act was passed by Congress, which became a law without the approval of the President, suspending the authority conferred upon the Secretary, and the retirement and cancellation ceased. Afterwards, the well-known Resumption Act of January 14, 1875, was passed, which provided that all United States notes in excess of \$300,000,000 should be retired and canceled, with certain limitations as to the method of retirement, and that, after January 1, 1879, the Secretary of the Treasury should redeem in coin all such notes as might be "then outstanding," on their presentation for redemption in sums of not less than fifty dollars. Under this act notes to the amount of \$35,318,984 were retired and canceled, when the process was again arrested by the act of May 31, 1878, heretofore quoted. thus seen that two ineffectual efforts have been made since the close of the war to eliminate this legal-tender paper from our currency, and, without now attempting to discuss the causes of their failure, it is pertinent to suggest that the injurious effects of its continued circulation had not then been felt as they have been since, and could not then be certainly foreseen. It was not then lawfully redeemable in coin, but was a mere promise to pay at some indefinite time in the future, and, consequently, had not been, and could not then be, used to force gold out of the Treasury, and thus compel repeated issues of bonds to maintain a reserve; but it had then, as it has now, all the vices that belong inherently to legal-tender paper, whether issued by the Government or by individuals or corporations, and it also had then, as it still has, the additional vice of having been in its origin a forced loan without interest.

There has never been a time since the close of the war when the gradual retirement and cancellation of the United States notes would not have been beneficial to the country, nor has there ever been a time when the issue of additional notes of the same character would not have been injurious to the country. The amount of money in circulation will always be determined, if the laws of trade and finance are left to their natural operation, by the degree of necessity for its use, or, in other words, by the demand for it in effecting exchanges of commodities and as a basis of credit; and if bad money is suppressed, good money to the extent required will invariably take its place. Money will go where it can be most profitably employed, and it will retire whenever the opportunity for profitable use no longer exists. If our legal-tender notes were retired there is abundant reason to believe that a very large amount of gold which has been excluded from the country by the excessive use of silver and paper in our circulation, would promptly return to take its place in our currency and constitute a permanent part of our medium of exchange. country having such extensive trade relations with other nations as we now enjoy can not be deprived of its proper share of the world's stock of money, and, if it adopts and adheres to a sound and stable currency system at home, it will get the best money the world has, because no other kind is ever used in international transactions. As long as the Government leaves our people reasonably free to trade abroad, and does not make any kind of paper legal tender in the payment of debts, it can not materially or injuriously contract the currency by the withdrawal of its own notes. The retirement and cancellation of the legaltender notes would not necessarily produce any contraction of the circulation; and if such a result should follow, and continue for any considerable period, it would be a demonstration of the fact that the volume of currency previously existing was not needed in the business of the people, for whenever the volume is reduced below the actual requirements of trade, the deficiency will be supplied either from abroad in exchange for our products and securities, or by the banks at home, or by both.

The policy of maintaining a legal-tender paper currency and attempting arbitrarily to increase the volume of circulation by continuing the purchase and coinage of legal-tender silver after it had been demonstrated

that it could not be raised to a parity with gold at the established ratio, could not fail ultimately to disarrange our currency and greatly impair its value in the estimation of the world, without conferring any compensatory advantage upon any part of our people. On the 1st day of July, 1878, our total circulation, outside of the Treasury, was \$729,132,634, while on the 1st day of December, 1895, it was \$1,594,195,479, being an increase of more than 118 per cent, although the population of the country has increased only about 27 per cent; and at the same time, the use of credit instruments in place of cash has been very greatly increased in all large financial transactions. Since the date first mentioned, full legal-tender silver has been coined to the amount of \$423, 289, 309, of which, however, the sum of \$15,013,608 is still held in the Treasury under the act of July 14, 1890, and \$155,931,002 in legaltender paper have been arbitrarily added to the currency by the issue of notes for the purchase of silver bullion, thus making the obligation of the Government to redeem all its notes in coin and maintain the parity of the two metals so burdensome that, for several years, a constantly increasing doubt of its ability to accomplish the task has seriously disturbed the public mind and injuriously affected our industries and trade at home and our credit abroad.

Whatever other minor causes may have incidentally contributed to the result, it must now be evident to all that the large withdrawals of gold from the Treasury during the last three years, and the complete cessation of gold payments to the Government on account of customs and other taxes, are attributable, mainly, to a want of confidence in the stability and safety of our currency. This loss of confidence was the result of an unwise attempt to force into the circulation a constantly increasing amount of legal-tender paper, and, at the same time, forcibly to retain as part of our currency about four hundred million legal tender silver dollars, worth intrinsically much less than the gold dollar, which constituted the legal standard of value; and the doubt and distrust were greatly intensified by the fear, especially among those with whom our people trade abroad, that the character of our currency might be further impaired by the free and unlimited coinage of silver. It is not probable that either of these legislative experiments could have failed to produce more or less disturbance in the end, but both together precipitated a financial crisis and business depression, the effects of which must continue to be felt by our people for a long time to come. From January 1, 1879, the date of the resumption of specie payments, to July 14, 1890, a period of eleven and a half years, the total withdrawals of gold from the Treasury, by the presentation of United States notes for redemption, amounted to less than \$28,250,000, but from the date of the passage of the act providing for the purchase of silver bullion and the issue of Treasury notes to pay for it, until December 1, 1895, a period of five years and four and a half months, the withdrawals of gold, by the presentation of

the two classes of notes for redemption, have amounted to more than \$375,000,000. Within two years after the passage of that act, the withdrawals became very large, and, during the last seven months of the calendar year 1892 they amounted to \$33,420,727, or more than \$5,000,000 in excess of the amount withdrawn during a period of eleven and a half years prior to the enactment of that law; and during the nine months next preceding the 1st of March, 1893, the withdrawals amounted to \$58,746,008, or more than twice as much as was taken out during the whole period prior to July 14, 1890. These heavy withdrawals of gold were accompanied by a falling off in the revenue, and during the four months next preceding the 1st day of March, 1893, the expenditures exceeded the receipts by \$4,094,021.38, but during the four months next succeeding the 1st day of March, 1893, the receipts slightly exceeded the expenditures, and the surplus for the whole fiscal. year 1893 was \$2,341,674.29. At the close of that year, however, the receipts again began to fall below the expenditures, and there has been a deficiency every month since that date, except in June and September, 1895.

For many years after resumption, much the larger part of the gold demanded for export was furnished by the banks and other financial institutions, and this continued to be the case until July 1, 1892, but since that date the withdrawals from the Treasury have considerably exceeded the amount exported. The banks and other institutions, having thus reduced their gold as much as a proper regard for the preservation of their own credit would permit, ceased to supply the export demand, thus throwing the entire burden on the Treasury, and our own people have withdrawn large sums for hoarding or for the settlement of gold contracts at home. The withdrawals from the Treasury between July 1, 1879, and July 1, 1892, amounted to \$43,310,896, while the gross exports during the same time amounted to \$389,354,757, showing that \$346,043,861 was supplied from sources outside of the Treasury; but the withdrawals from July 1, 1892, to December 1, 1895, have amounted to \$360,266,512 and the gross exports have amounted to \$305,617,419, from which it appears that the Government has furnished a sum equal to the whole export and \$54,649,093 in addition. While the Government has thus been compelled, during the last three and a half years, not only to furnish gold from the Treasury for export to other countries, but also a large amount for the use of our people at home, its receipts of gold on account of customs and other taxes have been constantly diminishing since July, 1890, and have now entirely ceased. Prior to the passage of the silver-purchasing act, nearly the whole amount received from customs at the port of New York consisted of gold certificates, and from this source the Government was enabled to procure a supply of gold coin sufficient to meet all demands upon it and maintain its reserve intact. During the month of July, 1890, gold certificates constituted more than 95 per cent of the receipts at the port mentioned, and the free gold in

the Treasury amounted to \$184,092,074, but the first Treasury notes were issued and put into circulation in August of that year, and, in September, the receipts in gold certificates fell to 85½ per cent, and the free gold was reduced to \$147,981,732. Payments in certificates continued to decrease until they amounted, in July, 1892, to less than 14 per cent, and in May, 1893, they ceased altogether; and the free gold in the Treasury also continued to diminish, though not without some fluctuations, until April, 1893, when, for the first time, it fell below \$100,000,000.

It thus appears that within a little less than two years after the passage of the silver-purchasing act our whole currency and revenue systems had been thrown into a most perplexing and dangerous state of disorder and confusion, and we had reached a point where the public revenues were beginning to fall below the expenditures, where the withdrawals of gold from the Treasury were beginning to exceed the demands for export, and where gold payments to the Government had substantially ceased. view of these facts there can be no great difficulty in determining the principal cause of our troubles. During the three fiscal years 1891, 1892, and 1893, beginning July 1, 1890, and ending June 30, 1893, the receipts of the Government exceeded its expenditures more than \$39,000,000, and yet the withdrawals of gold by the holders of United States notes and Treasury notes amounted to \$117,212,258, and the reserve was reduced below the sum of \$100,000,000. In each of these years there was a surplus revenue, but confidence in the ability of the Government to maintain gold payments under a policy of constantly increasing the legal-tender paper circulation had been seriously impaired, and the consequence was that large amounts of our securities held abroad were returned for sale in the home market, foreign capital invested in our industrial and commercial enterprises was rapidly withdrawn, and our own people, alarmed by the threatening aspect of the situation, curtailed their business operations, thus diminishing the opportunities for the employment of labor, and at the same time a process of liquidation was necessarily inaugurated, which in many parts of the country overtaxed the resources of debtors. No one then questioned, nor does anyone now question, the ability of the Government promptly to meet all its ordinary obligations incurred in the maintenance of the public service, and, consequently, the financial disturbance and general business depression can not properly be attributed to a deficiency in the revenue. On the contrary, the deficiency in the revenue, which began to appear in the latter part of 1892, and has continued ever since, is mainly attributable to the same causes which produced the financial disturbance and business depression. The great loss of revenue, instead of being the cause of our financial difficulties, is one of the effects produced by a defective currency system, and a failure to recognize this important fact will lead us far astray in our search for an adequate remedy. It is true that the tariff act of 1890, which remained in force until after the close of the fiscal year

1894, had greatly reduced the revenue derived from customs, and that the expenditures of the Government were increased from \$318,040,710.66 during the fiscal year 1890, to \$383,477,954.49 during the fiscal year 1893; still it is not probable that there would have been any considerable excess of expenditures over receipts if the business of the people had not been interrupted by the disturbances growing out of the unsatisfactory condition of our currency.

The United States notes, and the Treasury notes issued in payment for silver bullion, together amounting at the beginning to \$502,612,018, have been used, and are still being used, to withdraw gold from the Government whenever our own people or the governments or peoples of other countries see proper to demand it for any purpose, and, under the laws now existing, the Secretary of the Treasury has no means of complying with these demands except by the issue and sale of interestbearing bonds under the act of January 14, 1875, or by the purchase of gold coin with bonds or notes of the United States under section 3700 of the Revised Statutes. Against these demands the Treasury has no available means of defense except at the sacrifice of the public credit and the immediate depreciation of the entire volume of our currency. A refusal to pay gold on either class of our notes, when demanded by the holders, would instantly destroy the parity of the two metals, reduce the currency to a silver basis, unsettle all values, impair the obligations of all existing contracts, and precipitate a financial, industrial, and commercial revolution more disastrous in its consequences to the labor and business interests of the country than any panic or depression that has yet occurred in our history. The magnitude of the interests involved and the permanent character of the injury that would be inflicted by such an experiment forbids its favorable consideration, even for a moment, in the present condition of our affairs. This condition is unlike that existing in any other country, or that ever before existed in this country, and, as already shown, is the result of a long-continued policy at variance not only with the teachings of experience but with the financial law of the world. Remedies which might have been more or less effective under other circumstances can not be in the least degree effective now, and it would be futile and dangerous at this time to attempt a correction of our financial disorders otherwise than by a total removal of Long adherence to a false system has to a great extent their causes. undermined our national credit, so far as it is related to the maintenance of a sound currency, and it must be reconstructed, not merely propped up by frail and temporary supports. It required many years to produce this result, but after it has been produced it would be idle to expect a return to a sound condition with all the causes of our financial distress still in existence and in more active operation than ever before.

No surplus revenue, however large, could extricate us from our present difficulties, or give assurance of safety in the future, unless it should be required to be paid in gold under a system which would exempt the Govern-

ment from the obligation to furnish the gold when demanded to be used in making the payments; and it is scarcely necessary to suggest that such a system is impossible as long as the United States notes and Treasury notes are kept in circulation and are redeemable in gold by the Government itself on presentation. To pay out gold with one hand and receive it back with the other would be a useless expenditure of time and labor, and yet this is just what would be done if gold should be exacted in payment of customs or other public dues, while the legal tender notes are outstanding; but, if it shall be said that even with these notes outstanding more gold would be paid in than would be taken out, which is not at all probable under existing conditions, and that, consequently, redeemed paper might be permanently hoarded in the Treasury, the answer is that, for obvious reasons, it would be impossible to keep more than a limited amount of that currency in the Treasury and at the same time defray the expenses of the Government.

At the New York subtreasury alone, during the fiscal year 1895, the total receipts amounted to \$991,304,725, and the payments on various accounts, including transfers of funds, redemptions, etc., amounted to \$954,853,700. Of the receipts, \$503,471,021 consisted of United States notes, \$80,939,493 of Treasury notes of 1890, and \$174,214,440 of silver certificates, from which it will be seen that the whole amount of the United States notes outstanding, and more than one-half of the Treasury notes and silver certificates passed through that office in a single year. Of the \$503,471,021 received in United States notes. the sum of \$165,194,851 was on account of customs and special customs deposits, and of the \$80,939,493 received in Treasury notes, the sum of \$24,690,522 was on the same accounts, while the silver certificates received on these accounts amounted to \$85,279,856. Owing to their great bulk and weight silver dollars can not be used to any considerable extent in large transactions, and, consequently, only \$238,159 were received in those coins on both accounts during the entire year, and these were received in small transactions, or in making change. Silver certificates are not legal tender except in payments to the United States, or, in other words, the Government is compelled to receive them when offered in payment of public dues, but can not compel any of its creditors to receive them; and national-bank notes are not receivable at all for customs under the law. As gold coin and gold certificates are no longer being paid to the Government, all our customs must be collected in United States notes, Treasury notes, silver certificates, or silver dollars, and the latter can not be used for the reason that the expense of transferring them in large amounts from place to place would exceed the profits ordinarily made The conclusions to be drawn from these facts in business transactions. must be apparent at a glance. Owing to the peculiar character of our currency the ability of the Treasury to hoard United States and Treasury notes is limited to a certain amount—which can not be definitely determined in advance—and if it should, after that amount has been. reached, refuse to pay out these notes in making disbursements at the places where our customs are collected, the immediate result would be that nearly all payments to the Government would be made in silver certificates, which it is bound to take, but can compel no one else to take. There would be a stream of these nonlegal-tender certificates constantly flowing into the Treasury, and it would receive scarcely any more United States notes or Treasury notes as parts of the surplus revenue, but would soon be compelled to pay out those already accumulated, or pay gold, or break down in its operations at the subtreasuries. This result has been avoided heretofore only by paying out these notes from the Treasury, from time to time, whenever the character of currency coming in indicated that the point of danger was about to be reached, and it will be necessary to pursue the same policy hereafter as long as the legal-tender notes are in existence. Notwithstanding all the efforts of the Department to protect the Treasury against excessive receipts of these certificates, it has frequently happened that they constituted more than 80 per cent of all the payments of customs dues at New York, where more than two-thirds of the total collections are made; but if the United States legal-tender paper should be retired and a proper currency system adopted, gold, and gold certificates, and bank notes redeemable in gold, will take their place in the circulation, and the Government will have no further trouble in regard to the kind of money used in either its receipts or payments.

But even if this difficulty could be obviated, an attempt to impose taxation upon our people sufficient in amount to enable the Treasury to take up and permanently hoard all the legal-tender paper, now amounting to about \$485,000,000, would be the most remarkable financial experiment of modern times, while an attempt to secure by taxation within any reasonable period, a sum sufficient for their redemption and cancellation as they may be received into the Treasury, although not quite so impracticable as the other, would just as certainly fail to accomplish the object intended. It would be impossible for the Treasury to hold for any considerable time a surplus of \$485,000,000, or anything near that sum, in opposition to the popular demand that would be persistently made for its distribution by appropriations for pretended public purposes, or by deposits in the banks to be used by them in making loans to the people. Our own experience upon this subject ought to convince us of the futility of such a scheme. ment has never been permitted to hold a large surplus without continuous agitation for its reduction, and it is not reasonable to suppose that it will ever be allowed to do so. The existence of a large sum in the public Treasury, not needed for the public service, at once develops two powerful opposition forces in the country, one demanding an immediate reduction of taxation, and the other demanding an immediate distribution of the money on hand. One, and perhaps both, will certainly succeed, and the surplus will vanish long before the purpose for which

it was collected has been accomplished. The distribution of public money among the States more than half a century ago, and the large deposits in banks and purchase of unmatured bonds within the last decade, are familiar examples of the almost inevitable effects of attempts to hold a surplus in the Treasury.

Nor will the people be much, if any, less restless under a policy of high taxation to raise money for the retirement and cancellation of the notes as received, even if such a policy could be successfully inaugurated. It is scarcely possible that a surplus exceeding \$100,000,000 could be collected during any one year, in excess of the amount already required to defray public expenses, under any practicable system of taxation that could be devised, and even that sum could not be raised without severe injury to our industries, nor without unjust discriminations among them which would at once engender a strong spirit of opposition in all parts of the country. At this rate it would take nearly five years to retire the notes, and it may be safely asserted that no such system of taxation as this plan of retirement would require could be maintained for even half that time; it would be swept away by the first popular assault made upon it, and the attempt to retire and cancel the legal-tender notes would fail again, as it has twice heretofore.

The opinion seems to prevail to some extent that the mere possession of a surplus in the Treasury would prevent withdrawals of gold, and thus render the issue of bonds for the protection of the reserve unnecessary, but this view of the subject is founded, in my judgment, upon an entire misconception of the causes that have produced the withdrawals. What those causes were, I have already undertaken to show, and, unless I am wholly mistaken, they have very little, if any, relation to the amount of money held by the Government, or to the amount of money the Government has the ability to raise by taxation or otherwise, but they relate primarily and almost exclusively to the character of money that it might be able to supply and keep in circulation. other words, it was apprehension as to the kind of money to be used, and not as to the amount of money on hand, that brought our securities back from abroad for sale, caused foreign investors to withdraw their capital, and foreign creditors to collect their debts, and compelled our own people to suspend or contract their business operations, and thus diminish the incomes of employers and greatly reduce, or entirely stop, the wages of labor.

Large withdrawals have been made during the last three years simply because gold was wanted, and the desire to secure gold was due to a growing distrust of the other kinds of currency in circulation, and not at all to any apprehension that the Government would not be able to discharge all its obligations in some kind of paper or coin. When the receipts for customs consisted very largely of gold, as was the case prior to July 1, 1892, before the results of our defective currency system had been fully developed, a surplus revenue enabled the Treasury to pay

out gold without disturbing the reserve; and, besides, there was at that time no great demand for gold by the presentation of notes for redemption, and there would, therefore, have been no difficulty in maintaining the reserve, even if there had been no surplus in the Treasury; but the conditions have entirely changed, and an entirely different policy is demanded to meet the situation now existing. With or without a surplus revenue, the Government can now procure gold only by negotiating loans or by making purchases under the statute, and this state of affairs, which is the natural result of causes still operative, is almost certain to continue until the causes themselves are removed.

It may be that a surplus in the Treasury would have a tendency with some of our own people to strengthen confidence in the general situation, but it would afford the Government no additional means of procuring gold, nor would it have any beneficial effect upon our credit in other countries, because the attention of their people is directed solely to the character of our currency system, and whether we have much or little money in the vaults of the Treasury is a matter of no possible concern to them. Reluctant as we may be to recognize the fact, our own persistence in an unwise policy has at last forced us into a situation which enables the holders of our securities, and other creditors abroad, to demand and ... take our gold whenever they choose, and the unsatisfactory state of our currency makes their demands more numerous and much larger in amount than they would otherwise be. There is but one safe and effectual way to protect our Treasury against these demands, and that is to retire and cancel the notes which constitute the only means through which the withdrawals can be made. Many partial and temporary remedies may be suggested and urged, with more or less plausibility, but this is the only one that will certainly remove the real cause of our troubles and give assurance of permanent protection against their recurrence in the future.

This can be most successfully and economically accomplished by authorizing the Secretary of the Treasury to issue from time to time bonds payable in gold, bearing interest at a rate not exceeding three per centum per annum and having a long time to run, and to exchange the bonds for United States notes and Treasury notes upon such terms as may be most advantageous to the Government, or to sell them abroad for gold whenever, in his judgment, it is advisable to do so, and use the gold thus obtained in redeeming the outstanding notes. Under the operation of such a plan, if judiciously executed, there could be no improper contraction of the circulation, because if it should at any time be found that other forms of currency were not being supplied to the extent required, exchanges of bonds for notes would be suspended, and gold would be procured by selling the securities abroad. In order to further facilitate the substitution of other currency for the retirement of legal-tender notes, the national banks should be authorized to issue

FI 95----VI

notes equal in amount to the face value of bonds deposited to secure them, and the tax on their circulation should be reduced to one-fourth of one per centum per annum. When the national banking system was established the bonds of the United States were selling below par in the market, and there was, consequently, a sufficient reason for limiting the amount of the circulating notes authorized to be issued to ninety per centum of the face value of the securities deposited, but this reason has long since ceased to exist, and the limitation should be removed. The only object to be accomplished by requiring a deposit of bonds is the certain security of the notes issued by the banks, and under existing conditions that is just as completely assured when the amount of the issue equals the face value of the bonds as when it is limited to a percentage.

Until 1883 there was a tax upon the capital and deposits of national banks, as well as a tax on their circulation, and from all these sources the Government has received the sum of \$146,902,962. From the tax on circulation alone the receipts have amounted to \$78,107,006, while the total estimated expenses of supervision, including salaries of officials, have been \$15,636,976. The average annual cost of supervision has been \$473,848, while a tax of one-fourth of one per cent on the average annual circulation would have yielded \$680,294. The gain to the Government on account of national bank notes lost or destroyed, and which are, consequently, never presented for redemption, is estimated to be two fifths of one per cent upon the total amount issued, and has, according to this estimate, amounted to the sum of \$2,805.718. From this statement it appears that we can well afford to relieve the people of this tax, which, although advanced in the first instance by the banks, must, like all other charges upon the means of production or upon consumption, be paid in the end by the masses who use the taxed article. the tax is returned to the banks in the form of a higher rate of interest on loans than would otherwise be exacted and is then shifted from one to another through the successive stages of trade and production until it falls at last upon the consumers of products.

As a part of the plan for the retirement and cancellation of the legal-tender notes, the Treasury should be relieved from responsibility for the redemption of national bank notes, except worn, mutilated, and defaced notes and the notes of failed banks, and each association should be required to redeem its circulation at its own office and at agencies to be designated by the Comptroller of the Currency, as was the case prior to the passage of the act of June 20, 1874; or, if this is not considered expedient, and the present system of current redemption by the Treasury is continued, the Secretary should have the power, after a future date, to be fixed in the law, to require the banks to keep their five per cent redemption fund in gold coin and to deposit gold coin for the withdrawal of bonds whenever circulation is to be permanently surrendered or reduced. Without the adoption of one or the other of

these provisions, the holders of bank notes, after the retirement of United States notes and Treasury notes, might demand the redemption of such notes in gold, even though the banks had not deposited that coin in the five per cent redemption fund, and, although the Government would be under no legal obligation to redeem with a different kind of currency from that deposited, there might be circumstances under which its refusal to do so would create financial disturbance by impairing confidence in the value of the notes.

Whatever objections to a national banking system may have heretofore existed, or may still exist, among our people, upon economic or other grounds, the fact must be recognized that it has been so long established, and, notwithstanding its admitted defects, has served such a useful purpose in furnishing a convenient form of currency of uniform value throughout the country, that an attempt at this time to abolish it, or materially abridge the franchises of the institutions organized under it, would not only be unsuccessful, but would provoke injurious agitation when the precarious condition of our fiscal affairs demands repose and such a restoration of confidence as will enable the people to avail themselves of all the facilities that can be afforded for the transaction of their business. The national banking associations now in operation have been established under charters grauted by the Government, and so long as they are obedient to the laws and useful to the community, it would be an act of bad faith to deprive them of the privileges thus secured; but if, without detriment to any interest, the scope of their operations can be so extended as to bring them closer to the people in parts of the country remote from the large towns and cities, their capacity for useful service in affording accommodations to our farmers, merchants, and others engaged in business will be greatly increased, and we should not hesitate to make such amendments to the laws as would most certainly accomplish this purpose. One of the most serious objections heretofore urged against the system as it now exists has been that, while it is well adapted to large commercial communities, where capital is easily concentrated, it has not furnished the necessary banking facilities to the small centers of local trade where, especially at certain seasons of the year, such facilities are greatly needed to assist in cultivating, gathering, and removing our surplus agricul-All our trade in these products, which constitute such a large and important part of our domestic and foreign commerce, begins in the localities where they are grown, and it is there that the means for their first movement must be provided. It must be evident, therefore, that any system which will promote such a distribution of the loanable capital of the country as will make it easily accessible, upon reasonable terms, to the producers and purchasers of these products, must be highly beneficial to both, and I am satisfied that, under present conditions, the only successful attempt that can be made to secure these benefits is so to amend the law as to permit national banking associations to establish

branches for the transaction of all kinds of business now authorized, except the issue of circulating notes. By receiving local deposits and discounting local bills and notes, these branches would not only make the capital and resources of the parent institution available when needed in the localities where the branches are established, but they would collect and utilize in the business transactions of the people all the surplus accumulations of their respective communities. These accumulations, although small in detail, are quite large in the aggregate in every industrious and thrifty community, and if they could be actively employed, when needed in the circulation, they would materially aid in relieving the stringency, which, notwithstanding the abundance of currency in the financial centers, is sometimes severely felt in particular localities.

The failure of the national banking system as it now exists to meet these local requirements is unavoidable under the law now in force, which prohibits the organization of any banking association with a capital less than \$50,000, and permits their organization with this minimum amount only in places having a population of six thousand and less. Places having a population exceeding six thousand, no matter how small the excess may be, are compelled to raise a capital of \$100,000 in order to secure banking facilities under the statute, and if the population exceeds fifty thousand the capital must not be less than \$200,000. The result of these provisions is that the people in the smaller classes of towns and cities, being unable to raise the amount of capital required by the law, are deprived of the advantages enjoyed by the citizens of the larger places, and are consequently compelled to rely for accommodations upon banks at a distance, or borrow from commission houses, brokers, and others nearer home, at high and frequently exorbitant rates of interest. The authority to establish branches, which will be legally and in fact simply adjuncts of the main association, and subject to the same limitations, restrictions, and supervision as the other business of the corporation, will, without in the least impairing the strength or credit of the system, extend its benefits to a great number of our people who are now subjected, for the reasons stated, to great inconvenience and more or less loss on account of their inability to secure means for use in the conduct of their business. As the national banking law is now construed, branches can not be maintained except by converted State banks, which are permitted to continue such branches as they had in operation at the time of their organization under the national system, and these are so few in number as to be of no great importance.

During the past year official information has been collected through the office of the Comptroller of the Currency in relation to the banks and banking systems of twenty-five countries, from which it appears that, though their systems differ widely in many other respects, they all permit the establishment and operation of branch banks, and one of them, France, makes their establishment compulsory. In nearly all the old State banking systems in this country, branches for the transaction of commercial business, and, in some cases, for the issue of notes, were provided for; and they are now authorized and in operation under the laws of twenty States. So far as known, the policy of permitting the establishment of branches has been entirely successful, and the fact that it has been adopted and adhered to by so many countries in different parts of the world affords good reason for the belief that it would not fail to produce satisfactory results here as a feature of our national banking system.

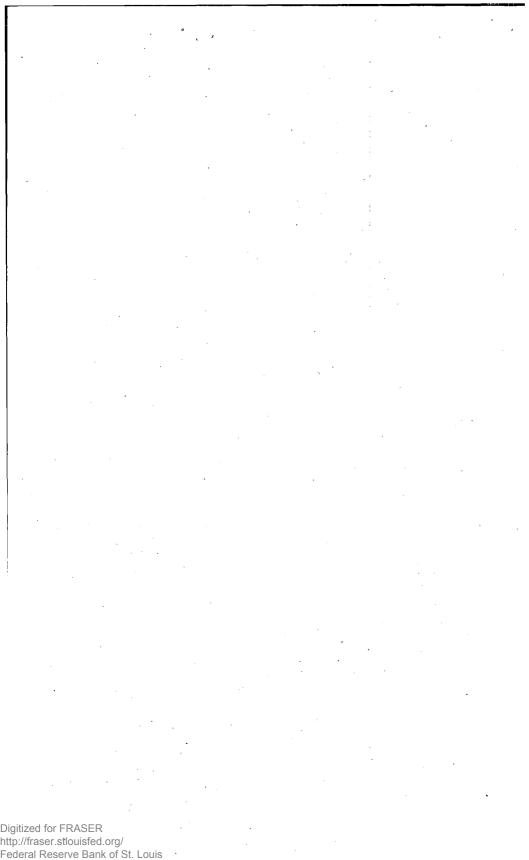

It is not probable that any plan for the permanent retirement of the United States notes and Treasury notes will be adopted that will not require considerable time for its complete execution, and I therefore respectfully urge upon Congress the propriety of prohibiting any future issues of such notes, or of national bank notes of less denominations than The reasons for this recommendation have been fully stated in former reports and need not be repeated here. Such a policy would make room in the circulation for silver coins and silver certificates of small denominations, thus increasing their use among the people in the transaction of their daily business and preventing their frequent return to, and accumulation in, the Treasury. The large silver certificates now outstanding could be retired and canceled when received and smaller ones substituted for them, so that there would be no diminution of the amount of small currency in circulation, and the ultimate result would be an increased use of our present stock of silver in the form of subsidiary coin, or standard dollars and certificates.

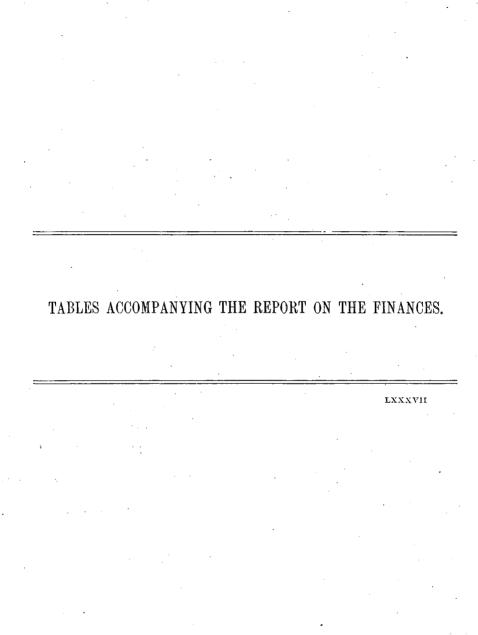

J. G. CARLISLE, Secretary.

To the

Hon. THOMAS B. REED,

Speaker of the House of Representatives.

of at not less than par, in coin, either of the descriptions of bonds
of the United States described in the act of July 14, 1870 (16 Statutes,
272), for the purpose of redeeming, on and after January 1, 1879, in
coin, at the office of the Assistant Treasurer of the United States
in New York, the outstanding United States legal-tender notes,
when presented in sums of not less than fifty dollars.

## TREASURY NOTES OF 1890.

The act of July 14, 1890 (26 Statutes, 289), directs the Secretary of the Treasury to purchase, from time to time, silver bullion to the aggregate amount of four million five hundred thousand ounces, or so much thereof as may be offered in each month, at the market price thereof, not exceeding one dollar for three hundred and seventyone and twenty-five hundredths grains of pure silver, and to issue in payment for such purchases of silver bullion Treasury notes of the United States, to be prepared by the Secretary of the Treasury, in such form and of such denominations, not less than one tollar nor more than one thousand dollars, as he may prescribe. That said notes shall be redeemable on demand, in coin, at the Treasury of the United States, or at the office of any assistant treasurer of the United States, and when so redeemed may be reissued; but no greater or less amount of such notes shall be outstanding at any time than the cost of the silver bullion and the standard silver dollars coined therefrom then held in the Treasury, purchased by such notes, and such Treasury notes shall be a legal tender in payment of all debts, public and private, except where otherwise expressly stipulated in the contract, and shall be receivable for customs, taxes, and all public dues, and when so received may be reissued; and such notes, when held by any national banking association, may be counted as a part of its lawful reserve. That upon demand of the bolder of any of the Treasury notes provided for, the Secretary of the Treasury shall redeem the same in gold or silver coin, at his discretion, it being the established policy of the United States to maintain the two metals on a parity with each other upon the present legal ratio, or such ratio as may be provided by law.

## NATIONAL BANK NOTES (REDEMPTION ACCOUNT).

The act of July 14, 1890 (26 Statutes, 289), provides that balances standing with the Treasurer of the United States to the respective credits of national banks for deposits made to redeem the circulating notes of such banks, and all deposits thereafter received for like purpose, shall be covered into the Treasury as a miscellaneous receipt, and the Treasurer of the United States shall redeem from the general cash in the Treasury the circulating notes of said banks which may come into his possession subject to redemption, \* \* \* and the balance remaining of the deposits so covered shall, at the close of each month, be reported on the monthly public debt statement as debt of the United States bearing no interest.

\*Exclusive of \$64,623,512 bonds issued to Pacific railroads.

<sup>\*</sup>In the amount here stated as the outstanding principal of the public debt are included the certificates of deposit outstanding on the 30th of June, issued under act of June 8, 1872, for which a like amount in United States notes was on special deposit in the Treasury for their redemption, and added to the cash balance in the Treasury. These certificates, as a matter of accounts, are treated as a part of the public debt, but being offset by notes held on deposit for their redemption, should properly be deducted from the principal of the public debt in making comparison with former years. † Exclusive of gold, silver, currency certificates, and Treasury notes of 1890, held in the Treasurer's cash, and including \$64,623,512 bonds issued to the several Pacific railroads.

Note 1.—Annual interest charge computed on amount of outstanding principal at close of fiscal year, and is exclusive of interest charge on Pacific Railway bonds.

Note 2.—The figures for July 1, 1879, were made up assuming pending funding operations to have been completed.

Note 3.—The temporary loan peractof July 11, 1862, is included in the 4 percents from 1862 to 1868, inclusive, with the exception of the amount outstanding August 31, 1865, this being the date at which the public debt reached its highest point. This loan bore interest from 4 per cent to 6 per cent, and was redeemable on ten days' notice after thirty days; but being constantly changing, it has been considered more equitable to include the whole amount outstanding as bearing 4 per cent interest on an average for the year.

Table D.—Statement of the Issue and Redemption of Loans and Treasury Notes (by warrants) for the Fiscal Year ended June 30, 1895.

Note.—The difference between the amount of money in the country and the amount in circulation represents the money in the Treasury.

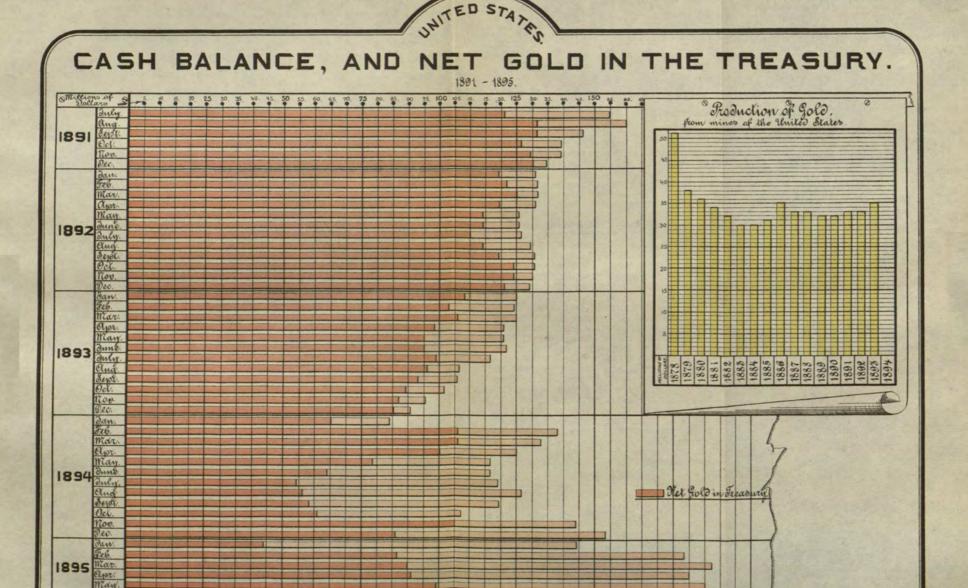

Currency certificates, act of June 8, 1872, are included in the amount of United States notes in circulation in the tables for the years 1873 to 1891, inclusive; since 1891 they are reported separately.

The foregoing tables present the revised figures for each of the years given.

I, M. White, master of the schooner J. Eppinger, do solemnly and truly swear that the foregoing account of seals taken by said vessel is correct; that the dates and numbers taken of said seals on the days specified, with the latitude and longitude as therein expressed, are true to the best of my knowledge and belief. So help me God.

MICHAEL WHITE, Master.

Subscribed and sworn to this 3d day of October, 1895, before me.

N. S. FARLEY, Deputy Collector of Customs. Table FF.—Log Entries of American Vessels Engaged in Pelagic Sealing during the Season of 1895, made under Section 4 of the Act of April 6, 1894—Continued.

a No observation.

b No longitude.

I, C. E. Mockler, master of the schooner Mattie T. Dyer, do solemnly and truly swear that the foregoing account of seals taken by said vessel is correct; that the dates and numbers taken of said seals on the days specified, with the latitude and longitude as therein expressed, are true to the best of my knowledge and belief.

I further swear that said vessel cleared from the port of San Francisco on December 30, 1893, and the hunting and fishing and fur-scaling operations were carried on in the vicinity of the coast of Japan, and that all the catch of the outward voyage was landed at Yokohama and the vessel laid up there and the crew was discharged before the United States consul; that I have not now in my possession the log books or other ship records from which to make a statement of my operation further than to solemnly swear that no fur-sealing operations have been carried on at any time since my departure from San Francisco within the area covered by article 2 of the Paris award, and that I consider my present voyage to commence from the date of shipment of the present crew before the United States consul-general at Kanagawa and his clearance granted on July 20, 1895, from which date all fur-sealing operations are truly stated in the foregoing statement of seals taken. So help me God. C. E. Mockler, Master.

Extract from official log of schooner Emma and Louisa of fur seal skins taken in Bering Sea.

I, George Wester, master of the schooner Bonanza, do solemnly and truly swear that the foregoing account of seals taken by said vessel is correct; that the dates

TABLE FF.-LOG ENTRIES OF AMERICAN VESSELS ENGAGED IN PELAGIC SEALING DURING THE SEASON OF 1895, MADE UNDER SECTION 4 OF THE ACT OF APRIL 6, 1894—Continued.

VESSELS LANDING THEIR CATCHES AT SAN FRANCISCO-Continued.

Copy of entries contained in the log book of the schooner Bonanza—Continued.

and numbers taken of said seals on the days specified, with the latitude and longitude as therein expressed, are true to the best of my knowledge and belief.

GEORGE WESTER, Master.

Subscribed to and sworn before me this 10th day of October, 1895.

N. S. FARLEY, Deputy Collector.

SAN FRANCISCO, CAL., August 9, 1895.

W. P. Noyes, being duly sworn, deposes and says:

That he is master of the American schooner Bowhead, which vessel arrived at this port on the 7th instant from a sealing voyage off the coast of Japan.

That said vessel sailed from San Francisco on December 11, 1894, on a sealing

voyage in Japan waters only.

That at the time of clearing he applied for and asked of the collector at this port for such regulations governing a voyage of this character and was informed that this custom-house was without instructions at that time.

He kept a true and careful log showing location of vessel at all times, and also number of skins taken each day; further that the following is a true and faithful extract from said log showing location of vessel on days in which seals were killed and taken on board:

CORRECTIONS.—Log book shows 19 seals taken on May 25 instead of 20, and on July 3, 1 seal taken in latitude 51 16 north, longitude 160 41 east (omitted in statement above). Total 923 is correct.

N. S. FARLEY, Deputy Collector.

Table FF.—Log Entries of American Vessels Engaged in Pelagic Sealing during the Season of 1895, made under Section 4 of the Act of April 6, 1894—Continued.

VESSELS LANDING THEIR CATCHES AT SAN FRANCISCO-Continued.

Copy of the entries contained in the log book of the American schooner Winchester-Continued.

I, Frank Johnson, master of the schooner Winchester, do solemnly and truly swear that the foregoing account of seals taken by said vessel is correct; that the dates and number taken of said seals on those dates, with the latitude and longitude as therein expressed, are true to the best of my knowledge and belief.

FRANK JOHNSON, Master Schooner Winchester.

Subscribed and sworn to this 3d day of September, 1895, before me.

N. S. FARLEY, Deputy Collector.

SAN FRANCISCO, June 26, 1895.

#### A. C. SUTHERLAND, being duly sworn, deposes and says:

That he is master of the American schooner Sophia Sutherland, which vessel arrived at this port on the 24th instant from a scaling voyage off the coast of Japan. That said vessel sailed from San Francisco on January 14, 1895, on a scaling voyage in Japan waters only. That at the time of clearing he applied for and asked of the collector at this port for such regulations governing a voyage of this character and was informed that this custom-house was without instructions at that time. He kept a true and careful log showing location of vessel at all times and also number of skins taken each day; further, that the following is a true and faithful extract from said log showing location of vessel on days in which seals were killed and taken on board:

a June 19, one skin taken in trade, making 1,112 skins in all landed at Yokohama, Japan.

I, S. H. Burtis, master of the schooner Jane Gray, do solemnly and truly swear that the foregoing account of seals taken by said vessel is correct; that the dates and numbers taken of said seals on the days specified, with the latitude and longitude as

therein expressed, are true to the best of my knowledge and belief.

I further swear that said vessel cleared from the port of San Francisco on January 2, 1895, and that hunting and fishing and fnr-sealing operations were carried on in the vicinity of the coast of Japan, and that all the catch of the outward voyage was landed at Yokohama. I solemnly and truly swear that no fur-sealing operations have been carried on at any time since my departure from San Francisco within the area covered by article 2 of Paris Award.

S. H. Burtis, Master.

Subscribed and sworn to before me this October 5, 1895.

N. S. FARLEY, Deputy Collector

a Shot.

I, Chas. Lutzens, on oath, solemnly swear that the foregoing writing is a full, true, and correct record of the voyage of the schooner *Kate and Anna*, commencing January 9, 1895, at San Francisco, Cal., and ending at Astoria, Oreg., April 30, 1895, and that every statement contained therein concerning the catching of seals during said voyage is true of my own knowledge.

CHAS. LUTZENS, Master.

Subscribed and sworn to before me this 1st day of May, 1895.

CHAS. PAGE, Collector of Customs.

<sup>†</sup> The sum of the totals of Northwest coast and Bering Sea.

#### AUTHORITIES FOR FIGURES USED.

(In quoting from Fur-Seal Arbitration Papers the first edition is always referred to.)

<sup>1</sup> Fur-seal Arbitration. App. to U.S. Case, vol. 1, p. 591.

<sup>2</sup> Catches for years 1868 to 1879, inclusive, is made up of Northwest coast catches (Fur-Seal Arbitration; British Commissioners' Report, p. 207 et seq.); Indian canoe catches (British Commissioners' Report, pp. 207, 208), and skins obtained through the Hudson Bay Company's trading stations (British Commissioners' Report, p. 213).

<sup>3</sup> Catches of pelagic sealers and Indian canoes (British Commissioners' Report, pp. 207, 208), and returns from Hudson Bay Company's posts (British Commissioners' Report, p. 213).

<sup>4</sup> San Francisco custom-house records: Deputy Collector Jerome's letters of February 26 et seq., 1892, on file in Treasury Department.

San Francisco custom-house records: Deputy Collector Jerome's letters of February 26 et seq., 1892, on file in Treasury Department.
 Catch of schooner City of San Diego (British Commissioners' Report, p. 208).
 Catches of pelagic sealers in North Pacific and Bering Sea (British Commissioners' Report, p. 219), and returns from Hudson Bay Company's posts (British Commissioners' Report, p. 219).
 Catches in North Pacific from all sources (British Commissioners' Report, p. 210, 213).
 Marketed catches from Bering Sea (British Commissioners' Report, p. 210) plus 2,000 skins seized on schooners Onward, Thornton, Carolena, and San Diego (H. H. McIntyre's manuscript report to Alaska Commercial Company, a copy of which is in possession of Department).
 British commissioner's estimated catch of American vessels in all localities (British Commissioners' Report, p. 212).
 North Pacific catches (British Commissioners' Report, pp. 210, 213).
 Marketed catches from Bering Sea (British Commissioners; Report, p. 210) plus 8,910 skins seized in Bering Sea and unaccounted for by British commissioners; 11,901 skins were seized that year (United States Counter Case, p. 337), and the British commissioners, on page 210 of their report, account for 2,991 of them.
 North Pacific catches (British Commissioners' Report, pp. 211, 213).

or 2,991 of them.

1º North Pacific catches (British Commissioners' Report, pp. 211, 213).

1º Bering Sea catches (British Commissioners' Report, pp. 211, 212).

1º North Pacific catches (British Commissioners' Report, pp. 211, 213).

1º This figure, 27, 450, is the sum of the figures 22,530 and 4,920, the origin of which will be found after note 16.

1. The British commissioners, on page 18 of their report, give the approximate total ander note 16.

catch as 68,000.

under note 16. The British commissioners, on page 18 of their report, give the approximate total catch as 68,000.

16 In a letter from the British toreign office to the Secretary of State, dated May 17, 1895, the Bering Sea catch of British vessels for 1891 is quoted at 29,146. It has been found by this Department that these figures represent the total catch in Bering Sea—that is, including seals kille do if the western side, in Russian waters, as well as off the eastern side, which afterwards became the award area. This is borne out by the fact that it appears by the British case before the tribunal at Paris that 41 vessels were warned out of the American side of Bering Sea between June 29 and August 15, 1891, under the modus vivendi of June 15 of that year. It is certain that many of these vessels crossed over to the Russian side of Bering Sea and continued sealing until the close of the season.

Statistics made by Mr. Alfred Fraser, now in possession of the Treasury Department, show that 8,432 skins were thus taken on the western side of Bering Sea in Russian waters. Of these, 6,616 were taken by British vessels and 1,816 by American vessels. We should, therefore, deduct from the British figures (29,146) the sum of 6,616, leaving 22,530 as the British catch in the award area—that is, the eastern side of Bering Sea.—for the year 1891.

It further appears from Mr. Fraser's figures that the American catch in Bering Sea in 1891 was 6,736, of which 1,816 were taken in Russian waters and 4,920 in the award area. Adding to the corrected British catch, 22,530, the catch of the American vessels, 4,920, we have 27,450 as the total catch of British and American vessels in that part of Bering Sea known as the award area for the year 1891.

In the report of the Committee on Ways and Means to accompany H. R. 8909, Fifty-third Congress, third session, Report No. 1849, the catch in Bering Sea for the year 1891 was given as 23,041, on the authority of the Treasury Department. These figures included only the returns of Britis

claimed to have been taken off the Russian coast.

That the British returns (above cited) 29.146, include seals taken on the western side of Bering Sea, from the Russian herd, will appear, as above stated, from the fact of the warning of said vessels, under the modus vivendi, and their subsequent crossing to the Russian coast.

The report of the minister of marine and fisheries of Canada for 1891 credits none of the catch to Russian waters. In 1892, however, said report credits 14,805 skins out of a total of 53,912 from said Asiatic shores. The fact that this large catch was made in 1892 points strongly to similar catches in the year 1891, which are confirmed by the above-mentioned evidence.

10 Obtained by subtracting the total of 27,450 and 8,432 from 68,000.

12 See United States counter case, page 408.

13 Taken from Alfred Fraser's estimates for American sealing fleet in Asiatic waters. Skins entered in United States ports.

20 The smallness of the number 2,199 suggests that either many of the vessels after clearing sailed

<sup>20</sup> The smallness of the number 2,199 suggests that either many of the vessels after clearing sailed directly for the Japan coast, or else the catches off the Northwest coast were transshipped at Japan

directly for the Japan coast, or else the catches off the Northwest coast were transshipped at Japan ports.

21 The American catch for 1893 is based upon statistics compiled by A. Fraser and on file in the Treasury Department. The United States consulat Victoria states (Consular Reports No. 161, p. 279) that American schooners in 1893 transshipped at Yokohama and Hakodate between 17,000 and 18,000 skins. This is further confirmed by the report of the Canadian department of marine and fisheries for 1893, page clxviii, which gives the catch of American vessels landed at Hakodate as 18,587.

22 The figures for the catches of Canadian vessels are taken from the report of the Canadian department of marine and fisheries for 1893, page clxvii.

23 The London trade sales for 1893 account for the disposition of 109,669 pelagic skins.

24 Compiled from the reports of collectors at ports of entry on the Pacific Coast. These reports are on file in the Treasury Department.

25 The figure 23,710 is obtained by taking the 6,836 skins noted under the caption "Locality undetermined" in the letter of the Secretary of the Treasury to Congress dated January 21, 1895 (Fifty-third Congress, third session, Ex. Doc. 243), and dividing them between the Asiatic and American herds in similar proportions as the other skins landed at United States ports in United States sealing vessels

during 1894. The result would be: American herd, 6,152; Asiatic, 684. Adding 6,152 to the catch on the Northwest coast (12,398) already given and the Bering Sea catch (5,160) already given, we have the total 23,710.

the Northwest coast (12,388) already given and the Bering Sea catch (5,180) already given, we have the total 23,710.

\*\*Made up of skins as per records of collectors of customs on the Pacific Coast, which credit 1,500 to Asiatic waters; 684 skins, previously referred to in note 25, and the 20,000 skins which it is estimated were transshipped in Japan (Ex. Doc. 243, Fifty-third Congress, third session. "Notes concerning catch for 1894," p. 4).

\*\*Taken from report of Canadian department of marine and fisherics for 1894, page 9.

The figures 26,425 include one American vessel, whose catch was 84 skins.

The facts in the two foregoing paragraphs are given in a report of Tisheries Commissioner Costigan to the Governor-General of Canada, under date of January 9, 1895, page 9.

\*\*Reports of collectors of customs at American ports of entry on the Pacific Coast.

\*\*20 Official statement sent by United States Consul Roberts at Victoria, under date of November 15, 1895, and on file in the Treasury Department.

\*\*30 \*\*Decad \*\*Pups.\*\*—The grand totals for 1894 and 1895 do not include dead pups the death of which are directly attributable to pelagic scaling. In 1894, by careful estimate based upon partial count, 20,000 perished from this cause, and in 1895, by actual count, 28,000. This would swell the known deaths from pelagic scaling in 1894 to 161, 143, and in 1895 to 121,326.

\*\*From returns of United States inspectors who examined skins landed in United States ports.

\*\*From official returns of collector of customs, Victoria, British Columbia.

#### COMPARISON OF CATCHES OF PELAGIC SEALERS IN 1894 AND 1895.

#### 1894.

## NORTHWEST COAST.

Forty-four vessels took 24,101 seals, being an average of 547 skins per vessel.

#### BERING SEA.

Thirty seven vessels took 31,585 seals, being an average of 853 skins per vessel.

#### 1895.

#### NORTHWEST COAST.

Fifty-two vessels took 12,122 seals, being an average of 233 skins per vessel, or a decrease of 57 per cent as compared with 1894.

#### BERING SEA.

Fifty-nine vessels took 44,169 seals, being an average of 748 skius per vessel, or a decrease of 12 per cent as compared with 1894.

PERCENTAGE OF FEMALES IN PELAGIC CATCHES IN 1894 AND 1895.

NORTHWEST COAST.

1894.

American vessels, 88 per cent. British give no figures. See notes 31 and 32.

1895.

American vessels, 74 per cent. British give no figures. See notes 31 and 32.

BERING SEA.

1894.

American vessels, 69 per cent. British vessels, 55 per cent. See notes 31 and 32.

1895.

American vessels, 73 per cent. British vessels, 55 per cent. See notes 31 and 32.

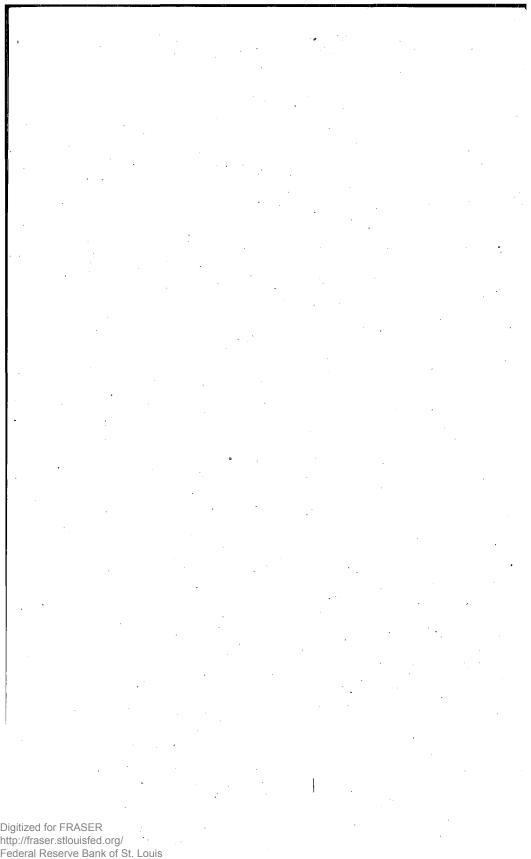

<sup>24</sup> The following statement of the pelagic catch from American and Asiatic herds for 1895 is given by Mr. Alfred Fraser, based upon trade returns:

	B. C. coast.	Japan and Siberian coasts.	Bering Sea.	Total.
68 British vessels. 44 American vessels. 5 Japanese vessels	6, 296 2, 087	25, 556 12, 687 2, 960	36, 431 8, 400	68, 283 23, 174

## APPENDIX TO THE REPORT ON THE FINANCES.

FI 95----1

1

## APPENDIX.

## REPORTS OF HEADS OF BUREAUS AND OTHER OFFICERS.

(No. 1.)

## REPORT OF THE TREASURER.

TREASURY OF THE UNITED STATES, Washington, December 1, 1895.

Sin: I have the honor to submit my annual report of the condition of the Treasury and of its operations during the fiscal year ending June 30, 1895.

## REVENUES AND EXPENDITURES.

The net ordinary revenues and expenditures for the fiscal years ending June 30, 1894 and 1895, were as follows:

•	1894.	1895.	Increase.	Decrease.
REVENUES.				
Customs Internal revenue Sale of public lands Miscellaneous sources	\$131, 818, 530, 62 147, 111, 232, 81 1, 673, 637, 30 17, 118, 618, 52	\$152, 158, 617. 45 143, 421, 672. 02 1, 103, 347. 16 16, 706, 438. 48	\$20, 340, 086, 83	\$3,689,560.79 570,290.14 412,180.04
Total	297, 722, 019. 25	313, 390, 075. 11	20, 340, 080, 83 15, 668, 055, 86	4, 672, 030. 97
EXPENDITURES.				
Civil and miscellaneous: Customs, light houses, pub- lic buildings, etc	20, 316, 268, 90	18, 434, 414, 54		1, 881, 854. 36
Internal revenue Interior civil (lands, patents, etc.)	16, 308, 849, 71 8, 911, 054, 85	5, 091, 947.77 8, 667, 759. 63		11, 216, 901, 94 243, 295, 22

Interior Department (Indians and pensions). Interest on public debt	151, 470, 766, 48 27, 841, 405, 64	151, 334, 983, 08 30, 978, 030, 21	3, 136, 624. 57	135, 783.40
Total	367, 525, 279. 83	356, 195, 298. 29	7, 814, 522.16	19, 144, 503, 70 11, 329, 981, 54
Deficiency	.69, 803, 260, 58	42, 805, 223. 18		26, 998, 037.:40

The receipts and payments on account of the public debt may be summarized thus:

	1894.	1895.	Increase.	Decrease.
RECEIPTS.		, .		
Certificates of deposit	. \$208, 248, 000. 00 90, 960, 000. 00 51, 791, 190. 00 16, 637, 783. 50 58, 647, 545. 71	\$183, 630, 000. 00 74, 720, 000. 00 44, 215, 983, 00 12, 056, 172. 50 92, 504, 394. 62	\$33, 856, 848. 91	\$24, 618, 009. 00 16, 240, 000. 00 7, 575, 207. 00 4, 581, 611. 00
Total	426, 284, 519. 21	407, 126, 550. 12	33, 856, 848. 91	53, 014, 818. 00 19, 157, 969. 09
Cortificates of deposit	182, 840, 290, 00 90, 960, 000, 00 46, 397, 000, 00 10, 929, 535, 75 256, 447, 20	213, 281, 940, 00 74, 720, 000, 00 50, 712, 000, 00 13, 068, 369, 00 2, 494, 519, 93	30, 441, 650, 00 4, 315, 000, 00 2, 138, 833, 25 2, 238, 102, 73	16, 240, 000. 00
Total	331, 383, 272. 95	354, 276, 858. 93	39, 133, 585, 98 22, 893, 585, 98	16, 240, 000. 00
Receipts over payments∴	94, 901, 246. 26	52, 849, 691. 19		42, 051, 555. 07

## The aggregates on all accounts were therefore as follows:

	1894.	1895.	Increase.	Decrease.
RECEIPTS. Ordinary	\$297, 722, 019. 25 426, 284, 519. 21	\$313, 390, 075. 11 407, 126, 550. 12	\$15, 668, 055. 86	\$19, 157, 969, 09
TotalNet decrease	724, 006, 538. 46	720, 516, 625. 23	15, 668, 055. 86	19, 157, 969. 09 3, 489, 913. 23
PAYMENTS. Ordinary	367, 525, 279. 83 331, 383, 272. 95	356, 195, 298. 29 354, 276, 858. 93	22, 893, 585. 98	11, 329, 981. 54
Total Net increase	698, 908, 552. 78	710, 472, 157. 22	22, 893, 585, 98 11, 563, 604, 44	11, 329, 981. 54
Receipts over payments	25, 097, 985. 68	10, 044, 468. 01		15, 053, 517. 67

The foregoing figures, which are based on the warrants, do not, so far as they relate to the last year, exhibit the total actual receipts from loans by \$31,157,700, this sum having been paid into the Treasury prior to the end of June on account of the purchase of gold coin under section 3700 of the Revised Statutes, but not formally covered in.

#### STATE OF THE TREASURY.

At the close of business on June 30, 1894, there stood charged to the Treasurer on the books of the Department a balance of \$763,565,540.75. To this must be added \$720,516,625.23, the receipts for the year from all sources, as above stated, which gives a total of \$1,484,082,165.98 to be accounted for, and deducting therefrom \$710,472,157.22, the aggregate expenditures for the year, leaves \$773,610,008.76 as the balance on June 30, 1895.

Besides the accountability to the Department, the Treasurer had liabilities on his agency account, that is, liabilities arising from the postal revenues, disbursing officers' balances, the 5 per cent fund for the redemption of national bank notes, and from other sources, which amounted to \$40,268,751.34 at the former date and to \$37,031,665.88 at the latter. There were also liabilities on account of moneys received but not yet covered by warrant, amounting to \$1,020,461.22 and \$31,506,515.20 at the two dates respectively. The Treasurer's total liabilities were therefore as follows:

	Account.	June 30, 1894.	June 30, 1895.
General Agency Uncovered moneys			\$773, 610, 008. 76 37, 031, 665. 88 31, 506, 515. 20
·	· 	 	842, 148, 189.84

## In summary form the corresponding assets may be stated thus:

Description.	June 30, 1894.	June 30, 1895.
Gold coin and bullion. Silver coin and bullion. Notes and certificates. Minor coin and fractional currency. Deposits in national banks. Bonds and interest paid. Deposits with States. Unavailable funds. Unpaid loss on recoinage.	513, 174, 338, 37 115, 135, 264, 24 1, 356, 950, 93 14, 314, 529, 53 13, 005, 73 28, 101, 644, 91 1, 393, 822, 88	1, 125, 546, 72 14, 847, 562, 75 15, 665, 02 28, 101, 644, 91
Total	804, 854, 753. 31	842, 148, 189. 84

In the statements of condition given elsewhere in this report, the last three items of assets are omitted and the liabilities diminished by like amounts. This leaves the true assets and liabilities as follows:

	June 30, 1894.	June 30, 1895.
Assets.	\$775, 310, 559. 50	\$812, 627, 722. 05
Liabilities: General account	735, 041, 808. 16 40, 268, 751. 34	775, 596, 056. 1 <b>7</b> 37, 031, 665. 88
Total	775, 310, 559, 50	812, 627, 722. 05

To arrive at the condition of the general fund it is necessary to set apart the amounts of gold, silver, and United States notes held against outstanding certificates and Treasury notes. The assets of this class, together with the corresponding liabilities, were as shown below:

	June 30, 1894.	June 30, 1895.
Assets: Gold coin and bullion Silver dollars and bullion United States notes	\$66, 387, 899. 00 489, 732, 921. 00 60, 035, 000. 00	\$48, 469, 959, 00 474, 982, 904, 00 55, 795, 000, 00
Total	616, 155, 820, 00	579, 247, 863. 00
Liabilities: Gold certificates Silver certificates Currency certificates. Treasury notes of 1890.	66, 387, 899, 00 337, 148, 504, 00 60, 035, 000, 00 152, 584, 417, 00	48, 469, 959. 00 328, 894, 504. 00 55, 795, 000. 00 146, 088, 400. 00
Total	616, 155, 820. 00	579, 247, 863. 00

The remaining assets and liabilities, being those on account of the general fund, were therefore as follows:

	June 30, 1894.	June 30, 1895.
Assets:		
Gold coin and bullion	\$64, 928, 571, 70 23, 441, 417, 37	\$108, 148, 103, 04 37, 412, 522, 17
Notes and certificates.	55, 100, 264, 24	71, 830, 459. 35
Minor coin and fractional currency	1, 356, 950, 93 14, 314, 529, 53	1, 125, 546, 72 14, 847, 562, 75
Bonds and interest paid	13, 005. 73	15, 665. 02
Total	159, 154, 739, 50	233, 379, 859. 05
Liabilities:		07 001 007 00
Agency account Balanco, general account	40, 268, 751. 34 118, 885, 988. 16	37, 031, 665, 88 196, 348, 193, 17
Total	159, 154, 739. 50	233, 379, 859. 05

The following table shows the amounts of United States notes and Treasury notes redeemed in gold during each month, from October, 1891, when the first redemption of Treasury notes occurred, to September, 1895, and also the exports of gold:

Month.	United States- notes.	Treasury rotes of 1890.	Total.	Exports of gold.

## THE PUBLIC DEBT.

There was an increase of \$31,160,170 during the year in the principal of the public debt, of which \$50,000,000 was represented by 5 per cent bonds and \$31,157,700 by 4 per cent bonds issued to replenish the gold reserve. The additional \$2,470 of increase was due to the conversion of that amount of interest on \$4,880 of refunding certificates into 4 per cent bonds. The remainder of the bonds of 1925, issued under the contract of February 8, 1895, were not delivered until July.

The amount and character of the public debt on June 30, 1894 and 1895, are shown in the following table:

Class.	June 30, 1894.	June 30, 1895.
Interest-bearing loans.  Matured loans. Old demand notes. United States notes. Fractional currency, estimated National-bank notes, redemption account. Treasury notes of 1890. Certificates of deposit.	1,851,240.20 54,847.50 346,681,016.00 6,897,137.42 26,371,685.50 152,584,417.00 462,771,403.00	

With regard to the conditions of payment the debt may be classified under five general heads, as follows, the Treasury notes being included with the certificates of deposit:

Condition of payment.	June 30, 1894.	June 30, 1895.
At maturity, future dates. At option of the United States. On demand, without reissue. On demand, for reissue. On demand, out of deposits.  Total	25, 364, 500, 00 35, 174, 910, 68 499, 265, 433, 00 462, 771, 403, 00	492, 769, 416, 00 433, 119, 463, 00

#### THE MONETARY STOCK.

According to the revised estimates of the Department, the stock of gold, silver, and paper money on June 30, 1894 and 1895, was as follows:

Kind.	June 30, 1894.	June 30, 1895.
Gold coin Gold bullion Silver dollars Fractional silver coin Silver bullion	\$582, 512, 083 44, 781, 118 419, 333, 208 76, 249, 925 128, 764, 624	\$579, 400, 907 56, 828, 918 423, 289, 219 76, 954, 434 125, 611, 296

If the effective stock be considered as being composed of the gold, silver, United States notes, and national bank notes, and if the virtual distribution of these, so far as they are represented by certificates of

deposit and Treasury notes, be determined by the ownership of such representatives, the actual and virtual division of the effective stock of money is found to have been as follows:

	I	In Treasury and mints.	In circulation	Total stock.
June 30, 1894: Gold		\$64, 896, 466 52, 893, 800 26, 991, 458	\$562, 396, 735 571, 453, 957 527, 042, 802	\$627, 293, 201 624, 347, 757 554, 034, 260

Total	······	218, 274, 100	1, 602, 182, 725	1, 820, 456, 825

Aside from the variations in the stock of gold, which are governed by the domestic production and consumption, together with the imports and exports of the metal, the most important change now going on in the composition of the money supply arises from the gradual retirement of the Treasury notes of 1890, through their redemption in silver dollars. By this process, which began in August, 1893, and has continued since, the total issue of \$155,931,002 of these notes was reduced by September 30, 1895, to \$143,666,280. As the process of reduction began before the original issues in the purchase of silver bullion were discontinued, the amount of the total cost of such purchases was never outstanding at any one time, the highest point ever reached being \$153,550,280, on November 14, 1893.

The following table shows, for each month from August, 1890, to September, 1895, the amounts of Treasury notes originally issued, the amounts redeemed in silver dollars and retired, and the amounts outstanding, together with the cost of the bullion and the coined dollars held in the Treasury under the requirements of the authorizing act:

Month.	Issued.	Redeemed and retired.	Outstanding.	Bullion in Treasury.	Dollars in Treasury.

## THE COINAGE.

The following table shows the amounts of uncurrent gold and silver coins that were transferred during the year from the Treasury to the mint to be recoined, together with the loss thereon:

Denomination.	Amount.	Loss.
Double eagles	\$98,800,00	
Eagles	48 460.00	
Half cagles	68, 730, 00	
Quarter eagles	895.00	}
One-dollar pieces	1.00	] - <b></b>
Total gold	216, 886. 00	\$1, 210. 47
Standard dollars	17, 500. 00	
50-cent pieces	2, 115, 670. 00	
25 cent pieces.		
20-cent pieces	561, 985, 00	
5-cent nieces	6, 446. 80	
5-cent pieces	298. 51	
	!	
Total silver	4, 361, 761. 36	199, 940, 63
Aggregate	4, 578, 647. 36	201, 157. 05

There was also transferred to the mint the sum of \$373,833 in minor coin to be cleaned and reissued.

Up to the end of September last the total sum of \$826,730.50 in Columbian half-dollars had been exchanged for gold coin.

#### SPURIOUS AND FRAUDULENT ISSUES.

Counterfeit coins and paper currency of the following kinds and amounts were detected during the year at the offices of the Treasury:

Denomination.	Gold coins.	Silver coins.	United States notes.	National- bank notes.	Silver certifi- cates.	Fractional currency.	Total.
Ten conts Twenty-five cents Fifty cents One dollar Two dollars Five dollars Ten dollars Ten dollars Twonty dollars Fifty dollars One hundred dollars	\$10.00	\$707. 25 640. 50 1, 873. 00	\$18: 00 16: 00 110: 00 530: 00 780: 00 1, 150: 00	\$34.00 \$80.00 590.00 400.00 200.00 100.00	\$24. 90 584. 00 360. 00 10. 00	\$0. 20 30. 75 233. 00	\$0. 20 738. 00 873. 50 1, 915. 00 634. 00 850. 00 1, 140. 00 1, 180. 00 1, 350. 00 500. 00
Total	10.00	3, 220. 75	3,004.00	1,704.00	978. 00	263. 95	9, 180. 70

In addition to the above there were canceled six counterfeit compound interest notes, of which four were of the denomination of \$50, and one each of the denominations of \$100 and \$1,000.

#### TRUST FUNDS.

United States bonds of the following descriptions and amounts were held on June 30, 1895, in trust for national banks to secure circulating notes and public deposits:

Kind of bonds.	Rate of interest.	To secure circulation.	To secure public de- posits.	Total.
Funded loan of 1891, continued	4 4 5 6	\$22, 558, 350 140, 382, 100 10, 465, 500 12, 896, 850 12, 378, 000	\$1,033,000 11,993,000 575,000 525,000 1,152,000	\$23, 591, 350 161, 375, 100 11, 040, 500 13, 421, 850 13, 530, 000 222, 958, 800

During the year \$28,251,650 of bonds were deposited and \$22,262,600 withdrawn as security for circulation, and \$1,780,000 deposited and \$1,238,000 withdrawn as security for public deposits.

The following described bonds were held on June 30, 1895, for the sinking funds of the Pacific railroads:

Kind of bonds.	Rate of interest.	Union Pacific.	Central Pacific.	Total.
United States bonds issued to Pacific railroads. Union Pacific first mortgage. Central Pacific:first mortgago. Central Branch, Union Pacific. Eastern Division, Union Pacific. Sioux City and Pacific. Western Pacific. United States loan of 1904.	6 6 6 6 6	\$74, 000 6, 367, 000 3, 409, 000 1, 025, 000 716, 500 350, 000 915, 750	\$2, 175, 000 939, 000 1, 710, 000 163, 000 300, 000 32, 000 117, 000 125, 000	\$2, 249, 000 7, 306; 000 5, 119; 000 1, 188, 000 1, 778, 000 748, 500 467, 000 1, 040, 750
Total		14, 335, 250	5, 561, 000	19, 896, 250

The \$1,188,000 of the bonds of the Central Branch of the Union Pacific became due on the 1st of May, 1895, and were presented for payment, but payment was refused. Interest amounting to \$798,300, which became due from May 1, 1894, to August 1, 1895, on the first-mortgage bonds of the Union Pacific Railroad and its branches, held for the sinking fund of that road, remains unpaid, together with \$126,180 due within the same dates on the like bonds held for the sinking fund of the Central Pacific.

Under the provisions of the act of August 15, 1894, the face value of the State bonds and stocks formerly held in trust for the Secretary of the Interior, as trustee of various Indian tribes, has been placed upon the books of the Treasury to the credit of the several tribes, to draw interest at the rate of 5 per cent per annum, and the bonds and stocks have become the property of the United States. There remain on deposit on account of this fund \$231,000 of registered United States Pacific railroad bonds.

Including the amounts so transferred from the Indian trust fund, the following bonds and stocks belonging to the United States are held for the Secretary of the Treasury:

Kind.	Amount.
Arkansas State bonds. Louisiana State bonds. North Carolina State bonds Tenressee State bonds Virginia State bonds Chesapeake and Ohio Canal bonds, guaranteed by Virginia South Carolina State stocks Florida State stocks	581, 800, 00
Total	2, 075, 466. 663

United States bonds are held in the following amounts, under various provisions of law, for private institutions:

Institution.	Rate of interest.	Amount.
American Printing House for the Blind Manhattan Savings Institution North American Commercial Company.	Per cent.	\$250, 000 75, 000 50, 000
Total		375, 000

A special deposit of \$70,000 of United States 4 per cent bonds is held in the name of the Comptroller of the Currency for the benefit of the Fidelity National Bank of Cincinnati.

Captured bonds of the State of Louisiana of the face value of \$545,480 are held for the Secretary of War.

#### REDEMPTION OF NATIONAL-BANK NOTES.

The amount of national bank notes received for redemption during the year, according to the claims of the senders, was \$86,709,132.54, of which the net proceeds, together with those of \$231,616 in unbroken remittances carried over from the previous year, were \$86,355,723.22. The amount of redeemed notes assorted and delivered from the agency was \$88,218,529. Of these, \$35,055,620 fit for circulation were returned to the banks of issue, \$40,094,540 unfit for circulation were delivered to the Comptroller of the Currency for destruction and reissue, and \$13,068,369, the notes of banks whose circulation was being wholly or

partly withdrawn, were delivered to him for destruction and retirement. Inclusive of charges for transportation, salaries, stationery, and contingent expenses, the total costs for the year were \$100,352.79, which have been assessed upon the banks at the rate of \$1.15 per \$1,000 of notes redeemed. The deposits on account of the reduction or retirement of circulation amounted to \$12,056,172.50, and the redemptions on the same account to \$13,068,369.

In the appendix, in addition to the usual tables, will be found one, now given for the first time, which shows the assets and liabilities of the 5 per cent redemption fund of national banks at the end of each month

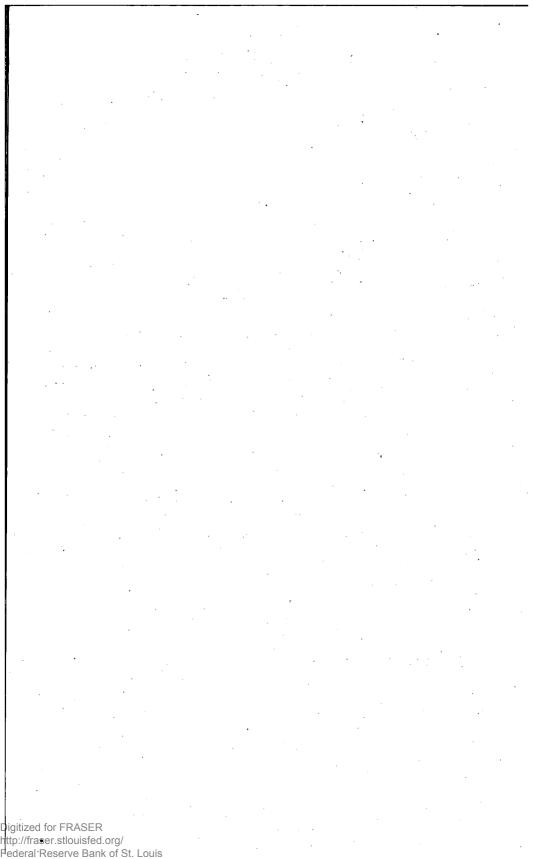

from the establishment of the agency, in June, 1874.

Before closing this report I desire to renew my acknowledgment of the faithfulness and ability with which those associated with me have performed their official duties.

I have the honor to be, very respectfully, your obedient servant,

DANIEL N. MORGAN, Treasurer of the United States.

Hon. John G. Carlisle, Secretary of the Treasury.

### REPORT OF THE DIRECTOR OF THE MINT.

TREASURY DEPARTMENT,
BUREAU OF THE MINT,
Washington, D. C., November 25, 1895.

SIR: In compliance with the provisions of section 345, Revised Statutes of the United States, the following report covering the operations of the mints and assay offices of the United States for the fiscal year ended June 30, 1895, being the twenty-third annual report of the Director of the Mint, is respectfully submitted:

### DEPOSITS OF GOLD.

The original deposits during the year of gold at the mints and assay offices of the United States, including gold contained in silver deposits and purchases, aggregated 3,502,407.368 standard ounces, of the value of \$65,161,067.28, being a decrease as compared with the fiscal year 1894 of 362,728.974 standard ounces, of the value of \$6,748,446.03.

The redeposits of gold during the fiscal year ended June 30, 1895, amounted to \$22,321,022.28, a decrease as compared with the previous fiscal year of \$46,712,009.89, making an aggregate of \$87,482,089.56 in

the total amount deposited during the year.

The classification and weight in standard ounces of the deposits and redeposits of gold bullion at the mints and assay offices of the United States during the fiscal years 1894 and 1895, and the increase or decrease of each class in the last-named year, is exhibited in the table which follows.

WEIGHT OF THE DEPOSITS AND REDEPOSITS OF GOLD BULLION AT THE MINTS AND ASSAY OFFICES OF THE UNITED STATES DURING THE FISCAL YEARS 1894 AND 1895, AND THE INCREASE OF DECREASE OF THE SAME DURING THE LATTER YEAR.

Standard bars	58, 074. 66			58, 074. <b>6</b> 6
Unparted bars	7, 841, 452. 63	9, 724, 139. 39	1, 882, 686. 76	
/ Total	140, 942, 545. 48	87, 482, 089. 56	7, 653, 073. 18	61, 113, 529. 18

Of the redeposits of fine gold bars, \$10,020,597.94 worth were from the stock that had accumulated in the assay office at New York since 1881 and were transferred to the mint at Philadelphia for coinage; \$664,182.12 worth were from the mint at Carson where they had been refined, but as coinage has been suspended there since May, 1893, they were sent to San Francisco for coinage. The balance, \$1,912,102.83 worth, were large bars redeposited at the assay office at New York to be converted into small bars for use in the industrial arts.

#### DEPOSITS AND PURCHASES OF SILVER.

During the fiscal year ended June 30, 1895, the original deposits and purchases of silver, including silver contained in gold deposits aggregated 13,092,320.67 standard ounces of the coining value of \$15,234,700.35 in standard silver dollars, against 24,661,510.89 standard ounces, of the coining value of \$28,697,030.81 for the previous fiscal year, a decrease in value of \$13,462,330.46.

The redeposits of silver bullion at the mints and assay offices during the fiscal year 1895 aggregated 412,212.56 standard ounces of the coining value in silver dollars of \$479,665.51 as compared with 612,557.24 standard ounces of the coining value of \$712,793.87 during the prior

fiscal year, showing a decrease of \$233,128.36.

The classification and weight in standard ounces of the deposits of silver bullion, including redeposits at the mints and assay offices of the

United States during the fiscal years 1894 and 1895, and the increase or decrease in the last named year, is shown in the following table:

WEIGHT OF THE DEPOSITS AND REDEPOSITS OF SILVER BULLION AT THE MINTS AND ASSAY OFFICES OF THE UNITED STATES DURING THE FISCAL YEARS 1894 AND 1895, AND THE INCREASE OR DECREASE OF THE SAME DURING THE LATTER YEAR.

Unparted bars	390, 056. 93	308, 885. 50		81, 171. 43	
Total	29, 409, 824. 68	15, 714, 365. 86	619, 976. 29	14, 315, 435, 11	

The face value of the uncurrent domestic gold coin melted at the mints and assay offices during the year was \$1,200,685, of which the sum of \$216,886 were received from the Treasury for recoinage, and the remainder, \$983,799, were mutilated and uncurrent coins melted and paid for as bullion.

The refined bullion, classed as original deposits, was the product of

private refineries in the United States.

Tables will be found in the Appendix (III and IV<sup>1</sup>) showing the distribution of the unrefined gold bullion received by the mints and assay offices of the United States during the year among the States and Territories that produce the same.

Owing to the fact that silver bars the product of private refineries in the United States deposited at the mints and assay offices are without exception classified as of domestic production, although frequently composed to a large extent of silver obtained from ore and bullion imported from Mexico and smelted ore refined in the United States, the classification of silver bullion deposited as of domestic production at the mints and assay offices is not exact.

The face value of the worn, uncurrent, and mutilated domestic silver coin received and melted at the mints during the year was \$4,369,284.36; of this sum \$4,361,761.36 were uncurrent subsidiary silver coin transferred from the Treasury for recoinage, and the balance, \$7,523, uncurrent and mutilated silver coin, purchased as bullion at the mar-

ket price.

The value in new subsidiary silver was \$4,161,213.94.

In the Appendix (V and VI<sup>1</sup>) tables will be found showing the distribution of the amount of unrefined silver bullion deposited at the mints and assay offices of the United States during the fiscal year 1895 among the States and Territories producing the same, also tables (XXVII, XXXII, and XXXIII, pp. 317 and 318) of deposits and purchases of gold and silver since 1792.

The coining value of gold and silver (exclusive of redeposits) received at the mints and assay offices of the United States each fiscal

year from 1880 is shown in the following table:

Value of the Gold and Silver (not including Redeposits) Received at the Mints and Assay Offices, 1880-1895.

Fiscal year.	Gold.	Silver (coining value).	Total value.
1880	\$98, 835, 096	\$34, 640, 522	\$133, 475, 618

#### COINAGE.

The gold coinage executed by the mints at Philadelphia, San Francisco, and New Orleans during the fiscal year ended June 30, 1895,

<sup>&</sup>lt;sup>1</sup> Most of the tables contained in the Appendix to the Director's Report, referred to in the text, are omitted in this volume for want of space.

consisted of 4,035,205 pieces of the value of \$43,933,475, and the silver coinage of 20,488,605 pieces of the nominal or face value of \$9,069,480.60, while the minor coinage, the execution of which is confined by law to the mint at Philadelphia, aggregated 35,087,302 pieces of the nominal value of \$712,594.02.

The denominations, number of pieces and value of the domestic coinage executed was as follows:

COINAGE OF THE UNITED STATES, 1895.

Denomination.	Pieces.	Value.
Gold:		
Double eagles	1. 260, 589	\$25, 211, 780.00
Eagles	971, 782	9, 717, 820. 00

Total minor	35, 087, 302	712, 594. 02
Total coinage	59, 611, 112	53, 715, 549. 62

The mint at Philadelphia executed for the Government of Ecuador, in addition to the above, 4,500,000 twenty-cent silver pieces of the value of \$900,000.

The 3,956,011 silver dollars coined during the year were made from bullion purchased under the act of July 14, 1890, and on this coinage there were consumed 3,059,727.26 ounces of pure silver, costing \$2,680,825.10, giving a seigniorage or profit of \$1,275,185.90, which has been paid into the Treasury.

Of the amount of subsidiary silver coinage executed during the year \$4,905,610.25 were from bullion derived from the melting of worn and uncurrent silver coin received from the Treasury for recoinage, and \$207,859.35 from silver bullion purchased under the provisions of section 3526 of the Revised Statutes of the United States.

During the year worn and uncurrent silver coins of the face value of \$4,361,761.36, principally subsidiary pieces, were transferred by the Treasury to the mints for recoinage, and were found to contain 3,010,557.09 ounces of fine silver of the coining value in new subsidiary silver coin of \$4,161,820.73, showing a loss by abrasion of \$199,940.63, which sum was reimbursed the Treasury from the appropriation for "loss on recoinage of worn and uncurrent silver coin."

The amount and cost of silver bullion on hand July 1, 1894, available for the subsidiary silver coinage, the amount acquired by purchase and transfer, the amount used in coinage and sold in sweeps during

the year, and the balance on hand July 1, 1895, are shown in the following table:

In addition to the above the mint of the United States at Philadelphia coined during the fiscal year 1895 for the Government of Ecuador \$900,000 in 20-cent silver pieces.

The coinage of silver dollars from bullion purchased under the provisions of the act of July 14, 1890, from August 13, 1890, to June 30, 1895, was 40,043,954 pieces, consuming 30,971,495.67 ounces of fine silver, costing \$31,791,472.34, showing a profit or seigniorage of \$8,252,481.66.

From July to November 1, 1895, 90 standard silver dollars, containing 69.61 ounces of fine silver, costing \$63, were coined from bullion purchased under the same act, giving a profit of \$27.

The total number of silver dollars coined under the acts of February 28, 1878, July 14, 1890, and March 3, 1891, is set forth in the following statement:

Coinage of Silver Dollars from February 28, 1878, to November 1, 1895.

Coinage under the act of—	Amount.
February 28, 1878	ī
March 3, 1891 (recoinage of trade dollars)	1 '
Total	423, 289, 309

There will be found in the Appendix (XII and XIII, pp. 306 and 308) to this report a table showing the denominations and values of coins made by each mint during the fiscal year ended June 30, 1895, and during the calendar year 1894, and also tables (XLII, XLIII, and XLIV, pp. 328 and 239) showing the coinage for each calendar year since the establishment of the Mint of the United States to June 30, 1895.

### MANUFACTURE OF BARS OF GOLD AND SILVER.

In addition to the coinage executed during the fiscal year 1895 there were manufactured gold and silver bars, containing 11,206,759.212

ounces standard of the value of \$53,494,916.09, as shown by the following table:

BARS OF GOLD AND SILVER MANUFACTURED, 1895.

Description.	Standard, ounces.	Value.
Gold	_,,	\$43, 153, 370. 81 10, 341, 545. 28
Total	11, 206, 759. 212	53, 494, 916. 09

In the Appendix (VII and VIII<sup>1</sup>) will be found a table showing in detail the manufacture of bars by institutions.

### EXCHANGE OF GOLD BARS FOR GOLD COIN.

The value of gold bars manufactured by the United States for use in the industrial arts and exchanged for gold coin of full legal weight, during the fiscal year 1895, at the mint at Philadelphia and the assay office at New York, was \$7,786,746.55, an increase over the previous fiscal year of \$4,277,847.45, as shown by the following table:

FINE GOLD BARS EXCHANGED FOR GOLD COIN, 1895.

Months.	Philadelphia.	New York.	Total.
July	\$45, 308, 03	\$218, 549. 10	\$263, 857. 13

### PURCHASE OF SILVER.

Since November 1, 1893, the date of the repeal of the purchasing clause of the act of July 14, 1890, the purchase of silver bullion by the Government has been restricted to the silver contained in gold deposits, small fractions of silver for return in fine bars, the amount retained in payment for charges, surplus silver bullion returned by the operative officers of the mints on the annual settlement of their accounts at the close of the fiscal year, and uncurrent and mutilated domestic silver coin, under the provisions of section 3526 of the Revised Statutes for the subsidary silver coinage.

The following tables exhibits the amount of silver purchased for the

subsidary silver coinage during the fiscal year 1895:

SILVER PURCHASED FOR SUBSIDIARY COINAGE DURING THE FISCAL YEAR 1895.

BALANCE OF SILVER BULLION PURCHASED UNDER THE ACT OF JULY 14, 1890, ON HAND AT EACH MINT JUNE 30, 1895.

Mint.	Fine ounces.	Cost.	
Philadelphia	10, 856, 842. 06	\$107, 616, 600. 82 9, 722, 867. 19 6, 271, 930. 00	
Carson	-	465, 596. 26 124, 076, 994. 27	

In the Appendix (X and XI, pp. 304 and 305) tables will be found showing the amount of silver bullion purchased under the various acts.

THE COURSE OF SILVER FROM JULY 1, 1894, TO JUNE 30, 1895.

The London quotation July 1, 1894, for silver 925 fine (British standard) was 28\frac{3}{4} pence, equivalent in United States money to \$0.6323 per ounce 1,000 fine. The market was steady between 28 and 29 pence until the middle of August, when the breaking out of hostilities between Japan and China induced speculative buying and caused an advance in the price to 30\frac{1}{2} pence in anticipation of money being wanted by both of these powers, when recourse would be had to loans, and that a large part of such loans would necessarily be remitted in silver.

These anticipations were not realized, as only a small loan was procured by China, Japan borrowing no money in Europe, but, on the contrary, remitting large sums in payment for supplies purchased.

The effect of this was to depress China exchanges and lower the price of silver. As there was comparatively little buying on Indian account, the price declined, closing December 31, 1894, at  $27\frac{3}{16}$  pence, equal to \$0.59824 in United States money.

In the latter part of January, 1895, owing to the introduction of a loan by China and the purchase of silver for sale in the Indian bazaars, the price advanced from  $27\frac{1}{4}$  pence until February 4, when it reached  $29\frac{9}{16}$  pence. After this the price steadily declined to  $27\frac{1}{4}$  pence and fluctuated between that rate and  $27\frac{5}{8}$  pence until March 11. It rose, on account of Eastern buying, to  $29\frac{5}{8}$  pence March 29, 1895. On the announcement on the 30th of March of an armistice between China and Japan, the price commenced, and continued, to advance until April 17, when it reached  $30\frac{7}{8}$  pence, equal to \$0.68077 in United States money. From this point the price declined to  $30\frac{7}{4}$  pence, April 30.

During the month of May the price ranged from  $30\frac{1}{4}$  to  $30\frac{7}{8}$  pence, closing on the end of the month of June at from  $30\frac{3}{16}$  to  $30\frac{5}{8}$  pence. The closing quotation for the month was  $30\frac{7}{16}$  pence.

The lowest quotation for the fiscal year was  $27\frac{3}{16}$  pence, equivalent to \$0.59824 in United States money. The highest quotation was  $30\frac{7}{8}$ 

pence, equivalent to \$0.68077.

The average price of silver for the twelve months ended June 30, 1895, was 29.01 pence, equal to \$0.63798 in United States money. At the lowest price the bullion value of the silver dollar was \$0.46270, and at the highest \$0.52653; at the average, \$0.49168.

The ratio of gold to silver for the fiscal year was as 1 to 32.50. The number of grains of silver purchasable with a dollar in United States

money at this rate was 754.65, equivalent to 1.572 ounces Troy.

In the Appendix (XXIX, p. 314) will be found a table showing the ratio of silver to gold since 1687, and (XXXI, p. 316) a table showing the gold value of an ounce of fine silver and the ratio between gold and silver since 1879.

The following table exhibits the value of the pure silver in a silver dollar at prices of silver per ounce fine from \$0.50 to \$1.2929, or parity:

Price of silver per fine ounce.	Value of pure silver in a silver dollar.	Price of silver per fine ounce.	Value of pure silver in a silver dollar.	Price of silver per fine ounce.	Value of pure silver in a silver dollar.

#### DISTRIBUTION OF SILVER DOLLARS.

The amount of silver dollars distributed from the mints during the fiscal year 1895 was 723,447, against 728,549 during the preceding fiscal year, showing a decrease of 5,102.

In the following table the number of silver dollars on hand, the coinage, and the distribution from each mint during the fiscal year 1895 is given:

Dates.	Philadelphia.	San Fran- cisco.	New Orleans.	Carson.	Total.
In mints July 1, 1894	50, 255, 370	35, 392, 000	7, 524, 000	5, 345, 227	98, 516, 597
Coinage fiscal year 1895	123, 011	1, 660, 000	2, 173, 000		3, 956, 011
Total	50, 378, 381	37, 052, 000	9,697,000	5, 345, 227	102, 472, 608
In mints July 1, 1895	50, 221, 267	36, 749, 500	9, 610, 000	5, 168, 394	101, 749, 161
Distributed from mints	157, 114	302, 500	87, 000	176, 833	723, 447

#### CIRCULATION OF SILVER DOLLARS.

The following table exhibits the total number of silver dollars coined, the number held by the Treasury for the redemption of certificates, the number held in excess of outstanding certificates, and the number in circulation on November 1 of each of the last ten years:

Coinage, Ownership, and Circulation of Silver Dollars.

		In the T

#### SEIGNIORAGE ON SILVER COINAGE.

At the commencement of the fiscal year, July 1, 1894, the balance of profits on the coinage of silver on hand at the mints was \$2,294.84. The seigniorage on the coinage of silver dollars during the fiscal year 1895 was \$1,275,185.90, and on subsidiary coinage \$106,737.80; a total of \$1,381,923.70.

The expense of distributing silver coin paid from this seigniorage during the year was \$90.11, and for reimbursements on account of silver wastage and loss on sale of sweeps \$555.19, leaving the net profits on the coinage of silver for the year \$1,381,278.40.

There was deposited in the Treasury during the year the sum of \$1,212,362.95, leaving \$171,210.29 as the balance of profits on the

coinage of silver on hand at the mints June 30, 1895.

Including the balance on hand at the mints July 1, 1878, the net profits on the coinage of silver from that date to June 30, 1895, aggre-

gated \$75,643,893.41.

The total seigniorage on the coinage of silver dollars under the act of July 14, 1890, from August 13, 1890 (the date the act went into effect), to June 30, 1895, was \$8,252,481.66, and from July 1 to November 1, 1895, \$27—a total seigniorage under this act of \$8,252,508.66.

A table showing the seigniorage on the silver coinage during the fiscal year at each mint, and the disposition of the same, will be found in the Appendix  $(XV^1)$ .

#### APPROPRIATIONS AND EXPENDITURES.

The act making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1895, contained specific appropriations for the support of the several mints and assay offices amounting in the aggregate to \$990,200.

It became necessary to obtain appropriations to supply deficiencies in the appropriations for the support of the following institutions:

Of the mint at Denver, Colo.: for wages of workmen, \$800, and for contingent expenses, \$2,000.

For contingent expenses of the assay office at Boise City, Idaho, \$1,000. Mints and assay offices: for freight on bullion between the mints

and assay offices, \$18,000.

The necessity for the additional appropriations at the mint at Denver and the assay office at Boise City was owing to the large increase in the deposits of gold bullion at these institutions. The deficiency in the appropriation for freight on bullion and coin between the mints and assay offices was due to the increased deposits of gold bullion at the mint at Denver and the assay offices at Boise City, Idaho, and Helena, Mont., and to the transportation of gold bullion which had accumulated at the mint at Carson City to the mint at San Francisco for conversion into coin.

The appropriations, including deficiencies for the support of the mint

service for the fiscal year 1895, aggregated \$994,000.

The expenditures from the appropriations during the year amounted to \$992,066.15, leaving an unexpended balance of the several appropriations for salaries, wages of workmen, and contingent expenses, of \$51,336.28, which includes \$41.30 reimbursed, the appropriation for wages of workmen and contingent expenses of the mint at Philadelphia for counting boards furnished the assistant treasurer of the United States at St. Louis, Mo.

In addition to the expenditures from the specific appropriations there was expended from the general appropriations contained in the act of July 14, 1890, \$49,361.13. Of this sum \$14,321 was expended at the mint at San Francisco and \$12,998.72 at the mint at New Orleans on account of the coinage of silver dollars purchased from bullion under act of July 14, 1890. The expenditure of the balance, \$22,041.41, became necessary by the change in superintendency at the mint at Philadelphia April 1, 1894, necessitating the weighing of 111,150 bars, containing 118,992,256 ounces of silver, and the weighing and counting of 50,000,000 silver dollars, which was commenced in March, 1894. The weighing of the bullion was completed in October, 1894. Owing to the fact that the roof of the vault in which the dollars were stored leaked, the bags had rotted. The count was, on this account, rendered very tedious, and was not completed until January, 1895.

The following table exhibits the appropriations and expenditures of

the several mints and assay offices for the fiscal year 1895:

# APPROPRIATIONS AND EXPENDITURES, 1895.

#### APPROPRIATIONS.

Institutions.	Salaries.	Wages.	Contingent.	Storage of silver bullion, act of July 14, 1890.	Total.
MINTS.	•				
Philadelphia	\$41, 550.00	\$293, 000. 00	\$75,000.00		\$409, 550. 00

# APPROPRIATIONS AND EXPENDITURES OF THE BUREAU OF THE MINT FOR THE FISCAL YEAR 1895.

The expenditures on account of the Bureau of the Mint, including salaries, expenses incurred in collecting and compiling the statistics of the production of gold and silver, expenses for examination of mints and assay offices, supervising the annual settlements, incidental and contingent expenses, and for the support of the assay laboratory connected with the Bureau of the Mint, aggregated for the year \$34,392.24, leaving an unexpended balance of \$1,917.76 to the credit of the several appropriations for the Bureau of the Mint, as shown by the following table:

Purpose for which appropriated.	Appropriated.	Expended.	Unexpended.
Salaries	\$29, 160. 00	\$28, 457. 97	\$702.03
Examination of mints	2, 500. 00	2, 213. 16	286.84
Mining statistics	3, 500. 00	2,709.40	- 790.60
Laboratory	750.00	723.88	26. 12
Books, pamphlets, and incidental	. ]		
expenses	400.00	287, 83	112. 17
Total	36, 310. 00	34, 392. 24	1, 917. 76

The appropriations made by Congress for the support of the mints and assay offices during the fiscal year 1896 is shown in the following table:

APPROPRIATIONS FOR MINTS AND ASSAY OFFICES, 1896.

Institutions.	Salaries.	Wages of workmen.	Contingent expenses.	Total.
MINTS.				
Philadelphia	\$41,550	\$275,000	\$75,000	\$391, 550

.Total	200, 500	594, 500	183, 900	978, 900

#### ESTIMATES OF APPROPRIATIONS FOR THE FISCAL YEAR 1897.

The estimates of the appropriations that will be required for the support of the mint service, including the transportation of bullion between the mints and assay offices and the Bureau of the Mint for the fiscal year 1897, submitted October 19, 1895, aggregated \$1,028,462, being \$6,750 less than the amount appropriated for the fiscal year 1896.

# EARNINGS AND EXPENDITURES OF THE REFINERIES OF THE COINAGE MINTS AND OF THE ASSAY OFFICE AT NEW YORK.

The amount of charges collected for parting and refining bullion during the fiscal year 1895 amounted to \$157,442.53, exclusive of the amounts received from the sales of by-products, \$9,731.13, which sum is deposited in the Treasury as a miscellaneous receipt.

The total amount of expenditures during the year on account of parting and refining was \$152,556.48, showing an excess of charges collected over expenditures of \$4,856.05. Adding the amount, \$9,731.13, received from sale of by products, gives an excess of receipts over expenditures of \$14,587.18 for the year.

The amount of charges collected for and the amount disbursed on account of the expenses incident to parting and refining bullion at the coinage mints and assay office at New York, during the fiscal year 1895, are shown by the following table:

CHARGES COLLECTED AND EXPENDITURES FOR PARTING AND REFINING BULLION, 1895.

Institutions.	Charges collected.	Gross expendi- tures.	Net expendi- tures.
Mint at Philadelphia	\$27, 765. 05	\$24, 233. 82	\$24, 233. 82
Mint at San Francisco	24, 124. 91	24, 120. 18	22, 989. 37
Mint at Carson	13, 910. 25	13, 795. 59	13, 170. 79
Mint at New Orleans	1, 105. 35	2, 621. 86	2, 621. 86
Assay office at New York	90, 506. 97	87, 785. 03	79, 809. 51
Total	157, 412. 53	152, 556. 48	142, 825. 35

### EARNINGS AND EXPENDITURES OF THE MINTS AND ASSAY OFFICES.

The earnings of the mints and assay offices during the fiscal year 1895, including the amount received for parting and refining bullion, aggregated \$2,088,363.73.

The seigniorage on the coinage of silver during the year was \$1,381,923.70, against \$2,956.11 for the fiscal year 1894.

The profits on minor coinage and recoinage during the year amounted

to \$447,076.26, against \$649,425.60 for the fiscal year 1894.

The entire cost of the mint service during the year, including wastages by the several operative officers, loss on the sale of sweeps, and expense of distributing minor coins, amounted to \$1,185,435.94, or \$902,927.79 less than the aggregate earnings of the year.

In the Appendix (XIV1) will be found a table showing in detail the

earnings and expenditures of the mint service during the year.

#### CLASSIFIED STATEMENT OF EXPENDITURES.

The expenditures of the mints and assay offices and of the refineries, for supplies, salaries, and wages of workmen during the fiscal year ended June 30, 1895, are shown in the following table:

CONSOLIDATED TABULATED STATEMENT OF EXPENDITURES FOR SUPPLIES OF THE MINTS AND ASSAY OFFICES OF THE UNITED STATES FOR THE FISCAL YEAR ENDED JUNE 30, 1895.

#### IMPORTS AND EXPORTS OF THE PRECIOUS METALS.

Gold.—The imports of foreign gold bullion into the United States during the fiscal year 1895 were valued at \$11,927,933; of this amount \$6,709,409 came from England, \$1,696,042 from France, \$1,635,852 from Mexico, \$987,939 from Germany, \$337,639 from British Columbia, \$321,599 from Colombia, \$131,536 from Nicaragua, \$52,621 from Honduras, and the remainder from various countries.

Foreign gold coins were imported to the value of \$12,466,128; of which amount \$6,149,541 came from France, \$3,558,611 from the West Indies, \$974,070 from Australasia, \$951,950 from England, \$388,763 from Germany, \$327,232 from the Dominion of Canada, and the remainder from Mexico and South and Central American States.

Foreign gold ores of the invoiced value of \$1,238,026 were imported for reduction. Two-thirds of this amount came from Mexico and one-third from British Columbia.

Our own gold coins of the value of \$10,752,673 were imported during the fiscal year. Of this amount \$6,435,010 came from England, \$2,842,222 from the Dominion of Canada, \$608,660 from South American States, \$468,152 from the West Indies, \$169,204 from Mexico,

<sup>&</sup>lt;sup>1</sup>See footnote, page 149.

\$80,873 from Central American States, \$50,000 from the Hawaiian Islands, and the remainder, in small amounts, from various countries.

The total gold imports into the United States during the fiscal year 1895 is shown in the following table:

GOLD IMPORTS, 1895.

Items.	Amount.
Foreign bullion	\$11, 927, 933 12, 466, 128 1, 238, 026
Total foreign gold	25, 632, 087 10, 752, 673
Total gold imports	36, 384, 760

The value of the domestic gold bullion exported during the fiscal year was \$793,656. Of this amount \$694,400 went to France, \$85,149

to Quebec, Ontario, etc., and \$12,268 to England.

Our own gold coins of the value of \$55,096,639 were exported, of which France received \$26,059,000; Germany, \$14,850,000; England, \$8,200,000; Dominion of Canada, \$3,242,389; South American States, \$921,876; the West Indies, \$740,489; Hawaiian Islands, \$575,000; Belgium, \$250,000; Newfoundland, \$100,000; Hongkong, \$90,000, and the Central American States, \$40,900.

Domestic gold ores of the invoiced value of \$328,012 were exported, of which Germany received \$289,883, and England the remainder.

Gold contained in copper matte of the value of \$33,655 was exported

from the ports of New York and Baltimore.

The value of the foreign gold coin reexported during the year was \$10,240,888, of which \$8,192,436 were shipped to the West Indies, \$1,872,000 to France, \$133,800 to Eugland, \$7,754 to Germany, and \$34,898 to Venezuela and Brazil.

Foreign gold ores of the invoiced value of \$9,286 were reexported

to England.

The total gold exports from the United States for the fiscal year 1895 is shown in the following table:

GOLD EXPORTS, 1895.

Items.	Amount.
Domestic bullion	\$793, 656
Domestic coin	<b>5</b> 5, 096, 639
Gold contained in copper matte	33, 655
Domestic ores	328, 012
Total domestic	56, 251, 962
Foreign coin reexported	
Foreign ores reexported	
Total foreign	10, 250, 174
Total gold exports	66, 502, 136

The net gold exports for the fiscal year 1895 amounted to \$30,117,376, as against \$4,172,665 for the previous fiscal year.

The following table shows the imports and exports of United States gold coin from January 1, 1870, to November 1, 1895:

IMPORTS AND EXPORTS OF UNITED STATES GOLD COIN.

Period.	Imports.	Exports.	Period.	Imports.	Exports.

1886		5, 400, 976	]	*	

SILVER.—The imports of foreign silver bullion into the United States during the fiscal year 1895 amounted to 6,050,053 ounces, of the commercial value of \$3,480,885, of which \$3,089,340 came from Mexico; \$259,302 from South American States; \$86,626 from Central American States, and \$45,292 from British Columbia, Quebec, and Ontario.

The invoiced value of silver contained in foreign ores imported into the United States for reduction was \$10,658,659. Of this amount \$9,871,204 came from Mexico; \$719,124 from British Columbia, and \$65,795 from Peru and Colombia.

Foreign silver coins of the value of \$5,970,703 were imported, of which \$4,712,538 came from Mexico; \$495,949 from the West Indies; \$283,703 from British Honduras; \$186,473 from the Dominion of Canada; \$181,974 from South American States; \$52,248 from England; \$36,756 from Central American States, and the remainder from various countries.

Our own silver coins (subsidiary pieces) of the value of \$100,932 were imported; of this amount \$29,319 came from the Central American States; \$24,009 from the West Indies; \$9,269 from the Dominion of Canada, and the remainder from England, Germany, France, etc.

The total silver imports into the United States for the fiscal year 1895 is shown in the following table:

IMPORTS OF SILVER, 1895.

	Items.	Amount.

	ver coin	
Total silve	r imports	20, 211, 179

The value of the exports of domestic silver bullion, containing 62,783,792 ounces, was \$40,032,613; of this amount \$30,817,090 went to England, \$3,841,700 to China, \$3,734,563 to Japan, \$848,700 to Hongkong, \$389,420 to Guatemala, \$195,559 to Colombia, \$85,000 to Belgium, \$76,196 to Germany, and \$44,385 to the Dominion of Canada.

Our own subsidiary silver coins of the value of \$40,609 were exported, of which \$35,133 went to the Dominion of Canada, \$3,000 to the

Hawaiian Islands, and the remainder to the West Indies.

Silver in domestic ores of the invoiced value of \$46,206 was exported

to England and Germany.

During the fiscal year the export of copper matte was 21,885,700 pounds, containing 852,914 ounces of fine silver, the commercial value

of which was \$547,682.

The following letters relative to this subject have been received from the collectors of customs at Baltimore and New York and the superintendent of the United States assay office at New York:

> OFFICE OF THE COLLECTOR OF CUSTOMS, Port of Baltimore, Md., September 26, 1895.

SIR: Replying to your letter of the 24th instant, I have the honor to inclose herewith a statement showing the amount of gold and silver contained in "copper matte" exported from this port during the fiscal year ending June 30, 1895.

Respectfully, yours,

JAMES A. DIFFENBAUGH,

Special Deputy Collector.

Hon. R. E. Preston, Director of the Mint, Washington, D. C.

ABSTRACT OF SILVER COPPER MATTE EXPORTED FROM THE PORT OF BALTIMORE, MD., DURING THE FISCAL YEAR ENDING JUNE 30, 1895.

[Calculated on a basis of 60.5 per cent pure copper, 35 ounces pure silver, and 0.14 ounce pure gold per ton.]

_	Matte.		Pure copper.	Pure silver.	Pure gold.
Juue, 1895	Pounds.	Tons.	Pounds.	Ounces.	Ounces.
	3, 360, 905	1,500	2. 033, 348	52, 514	210.06

Office of the Collector of Customs, Port of New York, September 30, 1895.

SIR: In reply to your letter of the 24th instant, relative to the amount of gold and silver contained in copper matte exported from this port during the fiscal year ending June 30, 1895, I would state that no record has been kept at this office of the quantity of gold and silver thus exported, for the reason that no assay of domestic copper matte exported is made by the customs authorities, and the only record of exportation is the shipper's manifest, which does not show the quantity of gold and silver, if any, contained therein.

Respectfully, yours, DIRECTOR OF THE MINT,

JAMES T. KILBRETH, Collector.

Washington, D. C.

Upon receipt of the above communication a letter was addressed to the superintendent of the United States assay office, New York, requesting the amount of copper matte exported from the port of New York during the year.

The following answers were received:

UNITED STATES ASSAY OFFICE AT NEW YORK, Superintendent's Office, November 26, 1895.

Sin: In response to your letter of the 23d instant (relating to the export of copper matte from the port of New York, and the amount of gold and silver contained) I would say that the apparent delay has been caused by my inability, as yet, to get a statement from all the firms who have shipped matte during the last fiscal year.

igitized for FRASER tp://fraser.stlouisfed.org/ ederal Reserve Bank of St. Louis The amount as far as received is as follows, viz: Seven thousand six hundred and seventy long tons, containing about 1,019 ounces of pure gold and 370,400 ounces pure silver.

Respectfully, yours,

JAS. W. CORSA, Acting Superintendent.

Hon. R. E. Preston,

Director of the Mint, Washington, D. C.

United States Assay Office at New York, Superintendent's Office, November 29, 1895.

Sir: I have to report, in addition to my statement of the 26th instant, as to the copper matte exported, the following, viz: Six hundred long tons, containing about 399 ounces of pure gold and 430,000 ounces of pure silver.

As the total number of tons reported by the shippers agree very closely with the customs figures, it is fair to presume that the gold and silver contained is approximately correct.

Respectfully, yours,

JAS. W. CORSA, Acting Superintendent.

Hon. R. E. PRESTON, Director of the Mint, Washington, D. C.

Foreign silver coin of the value of \$6,951,495 was reexported, of which \$3,651,879 went to Hongkong, \$1,156,265 to England, \$706,200 to Japan, \$343,065 to Mexico, \$457,448 to South American States, \$275,933 to the West Indies, \$131,399 to Central American States, \$108,000 to China, \$103,245 to Quebec and Ontario, and the remainder to various countries.

Foreign silver bullion containing 343,897 ounces, of the value of

\$202,600, was reexported to Mexico.

Silver, in foreign ore, of the value of \$21,763 was reexported to England for reduction.

The total silver exports from the United States for the fiscal year 1895 is shown in the following table:

#### EXPORTS OF SILVER, 1895.

Items.	Amount.
Domestic bullion	\$40, 032, 613
United States subsidiary coin	40, 609
Silver contained in copper matte.	547, 682
Domestic ores	46, 206
Total domestic	40, 667, 110
Foreign silver coin reexported	
Foreign silver bullion reexported 202, 600	
Silver in foreign ores reexported	
Total foreign	. 7, 175, 858
Total silver exports.	47, 842; 968

The net silver exports for the fiscal year 1895 amounted to \$27,631,789,

as against \$31,041,359 for the previous fiscal year.

The Chief of the Bureau of Statistics has kindly furnished this Bureau tables showing the imports and exports of the precious metals, by customs districts and by months, for the fiscal year 1895, which will be found in the Appendix (XXI-XXV<sup>1</sup>), where there are also tables of the imports and exports of gold and silver for a series of years from and into the principal countries of the world. Appendix (XLV, p. 338).

<sup>&</sup>lt;sup>1</sup> See footnote, page 149.

#### MOVEMENT OF GOLD FROM THE UNITED STATES.

The superintendent of the United States assay office at New York has kindly prepared the following tables giving the exports and imports of gold at the port of New York during the fiscal year 1895:

STATEMENT OF UNITED STATES GOLD COIN EXPORTED FROM THE PORT OF NEW YORK TO EUROPE DURING THE FISCAL YEAR ENDED JUNE 30, 1895.

Date.	Destination	Value.	Rate of exchange.	Date.	Destination.	Value.	Rate of exchange.

#### RECAPITULATION OF GOLD EXPORTS TO EUROPE.

. •	Exports.	Vα	lue.
			9, 000 7, 196
	s to Europe		5, 021 1, 217

During the same period there were shipped to the West Indies and to Central and South America the following amounts:

Exports.	Value.
United States coin	
Foreign coin	
Total	9, 495, 314
Grand total of exports	62, 036, 531

The imports of gold during the same period were as follows:

Imports.	Value.
From Europe:	
United States coin	\$5, 462, 071
Foreign coin	7, 210, 404
Bullion	9, 393, 390
Total	22, 065, 865
From Mexico, Central and South America, and the West Indies:	
United States coin	2, 130, 484
Foreign coin	3,660,426
Bullion	
Total	6, 250, 784
Grand total of imports	28, 316, 649

#### STOCK OF MONEY IN THE UNITED STATES.

The stock of gold and silver coin in the United States on July 1, 1895, is given in the following table:

OFFICIAL TABLE OF STOCK OF COIN IN THE UNITED STATES JULY 1, 1895.

Items.	Gold.	Silver.	Total.
Estimated stock of coin July 1, 1894	\$582, 512, 083	\$495, 583, 133	\$1, 078, 095, 216
Coinage, fiscal year 1895	43, 933, 475	9, 069, 481	53, 002, 956
Net imports of United States coin, fiscal year 1895.		60, 323	. 60, 323
Total	626, 445, 558	504, 712, 937	1, 131, 158, 495
Loss:			<del> </del>
Net exports of United States coin for fiscal	.		
year 1895	44, 343, 966		44, 343, 966
United States coin melted for recoinage,	,		
fiscal year 1895	1, 200, 685	4, 369, 284	5, 569, 969
United States coin used in the arts, fiscal			•
year 1895	1, 500, 000	100, 000	1, 600, 000
Total	47, 044, 651	4, 469, 284	51, 513, 935
Estimated stock of coin July 1, 1895	579, 400, 907	500, 243, 653	1, 079, 644, 560

The above table shows that the total estimated stock of gold and silver coin in the United States on July 1, 1895, was \$1,079,644,560; of this amount \$579,400,907 was in gold and \$500,243,653 in silver.

Of the silver coin \$423,289,219 was in dollars and \$76,954,434 in subsidiary pieces.

The amounts of gold and silver coin melted for recoinage represent their nominal values.

In the Appendix  $(IX^1)$  a table is given, showing from what source these amounts are derived.

The gold and silver bullion belonging to the Government in the mints and assay offices on July 1, 1895, was valued as follows:

<sup>&</sup>lt;sup>1</sup>See footnote, page 149.

BULLION IN MINTS AND ASSAY OFFICES JULY 1, 1895.

Metals.	Value.
Gold	1 ' '
Total	

The stock of silver bullion on deposit with the Mercantile Safe Deposit Company on June 30, 1895, was 320,976.87 ounces fine, the commercial value of which at that date would be \$214,252, the price of silver then being \$0.6675 per ounce fine.

The following table shows the total metallic stock of the United States on July 1, 1895, being the stock of coin in the United States, the gold and silver bullion belonging to the Government, and the silver bullion held by the Mercantile Safe Deposit Company:

METALLIC STOCK OF THE UNITED STATES JULY 1, 1895.

Coin and bullion.	Value.
Gold	\$636, 229, 825
Co)	625, 854, 949
Total	1, 262, 084, 774

On July 1, 1894, the estimated metallic stock of the United States was as follows:

METALLIC STOCK OF THE UNITED STATES JULY 1, 1894.

Coin and bullion.	Value.
Gold	\$627, 293, 201
Co)	
Total	1, 251, 640, 958

A comparison of the amounts in the above tables shows that the stock of gold increased \$8,936,624 and silver \$1,507,192, a total increase of \$10,443,816 during the fiscal year.

The ownership of the gold and silver bullion and the stock of coin in the United States on July 1, 1895, was as follows:

OWNERSHIP OF GOLD AND SILVER IN THE UNITED STATES JULY 1, 1895.

		Total gold				
Ownership.	and bullion.	Silver dol- lars.	Subsidiary silver coin.		Total silver.	and silver coin and bul- lion.
United States

Gold coin	81, 416, 461	500, 181, 380	581, 597, 841
Silver dollars	365, 332, 738	56, 443, 670	421, 776, 408
Subsidiary silver coin	15, 424, 113	60, 242, 999	75, 667, 112
Total	634, 987, 537	616, 980, 092	1, 251, 967, 629
PAPER.			
Legal-tender notes (old issue)	66, 206, 311	280, 474, 705	346, 681, 016
Legal tender notes (act July 14, 1890)	28, 425, 172	122, 715, 396	151, 140, 568
Gold certificates	56, 280	64, 252, 069	64, 308, 349
Silver certificates	6, 569, 203	331, 143, 301	337, 712, 504
National bank notes	4, 970, 188	202, 594, 902	207, 565, 090
Currency certificates	280,000	54, 045, 000	54, 325, 000
Total	106, 507, 154	1, 055, 225, 373	1, 161, 732, 527

By comparing the above tables it will be seen that there was an increase on November 1, 1895, as against November 1, 1894, in the Treasury of \$11,192,190 in the amount of coin and bullion; \$39,628,864 in legal-tender notes; \$111,950 in gold certificates; \$2,384,065 in silver certificates, and \$1,553,414 in national-bank notes, showing a total net increase in the Treasury of \$54,865,483.

The amount of coin and bullion in circulation at the same date had decreased \$19,454,540, legal tender notes \$49,677,152, and gold certificates \$13,834,410; while there was an increase in the silver certificates in circulation of \$2,312,935, national-bank notes \$4,769,126, and in currency certificates \$2,695,000, showing a total net decrease in the actual amount of money in circulation of \$73,189,041.

MONETARY SYSTEMS AND APPROXIMATE STOCKS OF MONEY IN THE PRINCIPAL COUNTRIES OF THE WORLD.

The following table showing the monetary systems and the approximate stock of gold, silver, and uncovered paper money in the principal countries of the world has been compiled from the latest information obtainable, and, while necessarily but an estimate, is believed to exhibit approximately the stock of money in the world.

FI 95——12

# MONETARY SYSTEMS AND APPROXIMATE STOCKS OF MONEY IN THE AGGRE

•	Countries.	Monetary system.	Ratio be- tween gold and full legal-tender silver.	Ratio be- tween gold and limited- tender silver.	Population.	Stock of gold.

#### GOLD AND SILVER USED IN THE INDUSTRIAL ARTS.

For the purpose of ascertaining the amount of gold and silver used in the industrial arts and manufactures in the United States during the calendar year 1894 inquiries were made of Government institutions and private refineries, as has been the custom in former years.

In answer to these inquiries statements were received showing the amount and value of gold and silver in bars sold to manufacturers and jewelers for industrial use, and as nearly as possible the class of mate-

rial used in the manufacture of such bars.

The following table shows the quantity and value of gold and silver in bars furnished to manufacturers and jewelers by the United States assay office at New York during the calendar year 1894:

BARS MANUFACTURED FOR USE IN THE INDUSTRIAL ARTS BY THE UNITED STATES ASSAY OFFICE AT NEW YORK DURING THE CALENDAR YEAR 1894.

	Go	old.	Silver.		
Material used.	Ounces, fine.	Value.	Ounces, fine.	Coining value.	
Domestic bullion	230, 471, 902 26, 295, 924 64, 088, 335	\$4, 764, 277. 04 543, 584. 99 1, 324, 823, 48	4, 779, 374, 48 759, 824, 14 434, 237, 68	\$6, 179, 393, 25 982, 398, 90 561, 438, 62	
Total	320, 856, 161	6, 632, 685. 51	5, 973, 436, 30	7,723,230.77	

The following table shows the amount and value of gold and silver in bars furnished manufacturers and jewelers by the United States mint at Philadelphia during the calendar year 1894:

VALUE AND WEIGHT OF GOLD AND SILVER BARS MANUFACTURED FOR USE IN THE INDUSTRIAL ARTS BY THE UNITED STATES MINT AT PHILADELPHIA DURING THE CALENDAR YEAR 1894.

	Bars manufactured.				
Material used.	Go	ld.	Silver.		
	Ounces, fine.	Value.	Ounces, fine.	Coining value.	
Domestic bullion	38, 162, 627 2, 137, 549	\$788, 891. 50 44, 187. 06	8, 512. 60	\$11, 006. 19	
Jewelry, etc	3, 534. 858	73, 072. 01	34, 083. 83	44, 067. 98	
Total	43, 835. 034	906, 150, 57	42, 596. 43	55, 074. 17	

To determine as nearly as possible the amounts of gold and silver furnished by private refineries for use in the industrial arts during the calendar year 1894, a circular letter of inquiry was addressed to 49 firms, believed to comprise all engaged in such manufacture. Replies were received from 46 of the firms addressed, 15 reporting that no such bars were manufactured by them during the year.

In the following table will be found the amounts and value of gold and silver furnished for industrial purposes by the 31 firms manufacturing:

Bars for Industrial Use furnished Goldsmiths and Others by Private Refineries during the Calendar Year 1894.

	Gold bars mai	anfactured.	Silver bars manufactured.		
Material used.	Ounces, fine.	Value.	Ounces, fine.	Coining value.	
Domestic bullion (exclusive of					
United States bars)	42, 420	\$876, 904	1, 847, 799	\$2, 389, 073	
United States bars	24, 903	514, 792	998, 223	1, 290, 632	
United States coin	17,027	351, 980			
Old plate, jewelry, and other old					
material	38, 073	787, 051	476, 182	615, 670	
Total	122, 423	2,530 727	3, 322, 204	4, 295, 375	

It will be seen that the value of United States bars—bars bearing the stamp of a United States mint or assay office—was, gold, \$514,792; silver, \$1,290,632.

These bars are manufactured by Government institutions and are included in the tables giving the amounts furnished by the Philadelphia mint and New York assay office, and must, in order to avoid duplication, be eliminated from the amounts reported by private refineries.

The following table exhibits the weight and value of gold and silver bars, exclusive of United States bars, furnished by private refineries for industrial purposes during the year:

Bars for Industrial Use (exclusive of Government Bars) furnished Goldsmiths and Others by Private Refineries during the Calendar Year 1894.

·	Gold bars mai	nufactured.	Silver bars manufactured.	
Material used.	Ounces, fine.	Value.	Ounces, fine.	Coining value.
Domestic bullion	42, 420 17, 027	\$876, 904 351, 980	1, 847, 799	\$2,389,073
material	38, 073 97, 520	787, 051 2, 015, 935	476, 182 2, 323, 981	615, 670 3, 004, 743

The following summary shows the value of the gold and silver bars for industrial purposes furnished by Government and private refineries during the calendar year 1894:

GOLD AND SILVER BARS FURNISHED FOR USE IN MANUFACTURES AND THE ARTS DURING THE CALENDAR YEAR 1894, AND CLASSIFICATION OF THE MATERIAL USED.

Material used.	Gold.	Silver (coin- ing value).	Total.
Domestic bullion	\$6, 430, 073	\$8, 579, 472	\$15, 009, 545
United States coin	396, 167	<i>.</i>	396, 167
Foreign bullion and coin	543, 585	982, 399	1,525,984
Old material	2, 184, 946	1, 221, 177	3, 406, 123
Total	9, 554, 771	10, 783, 048	20, 337, 819

For the purpose of comparison, the following table, exhibiting the value of gold and silver furnished for industrial uses by Government institutions and private refineries during the calendar year 1893, is given:

GOLD AND SILVER BARS FURNISHED FOR USE IN MANUFACTURES AND THE ARTS DURING THE CALENDAR YEAR 1893, AND CLASSIFICATION OF THE MATERIAL USED.

Material used.	Gold.	Silver (coining value).	Total.
Domestic bullion	\$8, 354, 482	\$6,570,737	\$14, 925, 219
United States coin	587, 622		587, 622
Foreign bullion and coin	804, 254	1, 740, 704	2,544,958
Old material	2, 777, 165	1, 222, 836	. 4,090,001
Total	12, 523, 523	9, 534, 277	22, 057, 800

A comparison of the values of the precious metals used in the industrial arts in the United States during the calendar years 1893 and 1894 shows a decrease during the latter year in gold of \$2,968,752, while the value of silver thus employed increased \$1,248,771.

Government institutions and private refineries report that during the calendar year 1894 there were \$396,167 in United States gold coin

consumed in the manufacture of bars for industrial purposes.

There are no returns showing the actual amount of United States gold and silver coins melted down by goldsmiths and jewelers, as the amount thus consumed would not appear in the reports of institutions manufacturing bars.

On pages 45 and 46 of the Report on the Production of Precious Metals for the year 1893 are set forth the reasons for the reduction of former estimates of this Bureau of the amount of domestic coin used

annually by this class of manufacturers.

Assuming the total amount of United States gold coin used in the arts to be \$1,500,000 and silver coin \$100,000, the industrial consumption of the precious metals in the United States during the calendar year 1894 would be as follows:

Industrial Consumption of the Precious Metals during the Calendar Year 1894.

Material used.	Gold.	Silver (coin ing value).	Total.
Domestic bullion	\$6,430,073	\$8, 579, 472	\$15, 009, 545
United States coin	1, 500, 000	100, 000	1,600,000
Foreign bullion and coin	543, 585	982, 399	1, 525, 984
Old material	2, 184, 946	1, 221, 177	3, 406, 123
Total	10, 658, 604	10, 883, 048	21, 541, 652

In the above summary of gold and silver bars furnished for use in manufactures and the arts during the calendar year 1894 are included the gold bars exchanged for gold coin at Government institutions, the value of which is shown in the following table:

GOLD BARS EXCHANGED FOR GOLD COIN, 1894.

The value of the gold bars manufactured by Government institutions during the fiscal year 1895 was \$8,990,562, an increase of \$2,939,710 as compared with the amount manufactured during the previous fiscal year.

The coinage value of the silver bars manufactured was \$8,828,019, an increase of \$2,226,674 as compared with the previous fiscal year.

A table giving the value and description of the gold and silver used in the industrial arts in the United States for the calendar years 1880 to 1894 will be found in the Appendix (XL, p. 326).

The following table exhibits the amount of gold and silver, in fine ounces and value, employed in the industrial arts in certain countries during the calendar year 1894:

GOLD AND SILVER USED IN THE INDUSTRIAL ARTS BY DIFFERENT COUNTRIES DURING THE CALENDAR YEAR 1894.

Countries	Gold.		Silver.	
Countries	Finc ounces.	Value.	Fine ounces.	Value.
United States	515, 610	\$10, 658, 604	8, 417, 357	\$10, 883, 048

#### PRODUCT OF GOLD AND SILVER IN THE UNITED STATES.

The statistics of the production of gold and silver in the United States for the calendar year 1894 were given in a special report made to the Secretary of the Treasury upon the production of the precious metals for 1894.

The following table shows the product as distributed among producing States and Territories:

Approximate Distribution, by Producing States and Territories, of the Product of Gold and Silver in the United States, for the Calendar Year 1894, as Estimated by the Director of the Mint.

g	Go	ld.	Sil		
State or Territory.	Fine ounces.	Válue.	Fine ounces.	Coining value.	Total value

In the Appendix (XLIV, p. 330) a table will be found showing the value of the coinage executed by each mint from 1792 to 1895.

WORLD'S PRODUCTION, 1892, 1893, AND 1894.

The production of gold and silver in the world for the calendar years 1892, 1893, and 1894 was as follows:

PRODUCT OF GOLD AND SILVER IN THE WORLD.

Calendar year.	Gold.	Silver.
1892	\$146, 815, 100	\$198, 014, 400 214, 745, 300
1894.		214, 745, 800

Tables compiled from information furnished by foreign governments through our diplomatic representatives and revised from the latest data, exhibiting the weight and value of the gold and silver product of the principal countries of the world for the calendar years 1892, 1893, and 1894, will be found in the Appendix (XXXV and XXXVI, pp. 320 and 322).

For the sake of uniformity, the value of silver has, as heretofore, been calculated at its coining rate, viz, \$1.2929+ per fine ounce.

The following table shows the production of the precious metals in the world for the calendar years 1873-1894:

Production of Gold and Silver in the World for the Calendar Years 1873-1894.

·	Go	ld.		Silver.	
Year.	Fine ounces.	Value.	Fine ounces.	Commercial value.	Coining value.
1873	4, 653, 675	\$96, 200, 000	63, 267, 187	\$82, 120, 800	\$81, 800, 000

1892	7, 102, 180	146, 815, 100	153, 151, 762	133, 404, 400	198, 014, 400
1893	7, 608, 787	157, 287, 600	166, 692, 047	129, 551, 800	214, 745, 300
1894	8, 737, 788	180, 626, 100	167, 752, 561	106, 522, 900	216, 892, 200
Total	122, 235, 638	2, 526, 834, 900	2, 130, 397, 137	2, 151, 474, 700	2, 754, 452, 900

The silver product is given at its commercial value, reckoned at the average market price of silver each year, as well as its coining value in United States dollars.

A table showing the product of gold and silver in the world for the calendar years 1493-1894 will be found in the Appendix (XXXVII, p. 324).

WORLD'S COINAGE, 1892, 1893, AND 1894.

In the Appendix (XXXIV, p. 319) will be found a table, revised from the latest information received, exhibiting the coinages of the various countries of the world during the calendar years 1892, 1893, and 1894. The following is a summary of the same:

COINAGE OF NATIONS.

Calendar year.	Gold.	Silver.
1892	\$172,473,124	\$155, 517, 347
1893	232,420,517	137, 952, 690
1894	227,921,032	113, 095, 788

The above figures represent, as nearly as this Bureau has been able to ascertain, the total value of the gold and silver coinages executed

in the world during the years therein named.

It must be borne in mind, however, that the total of these coinages does not correctly represent the amount of new gold and new silver made into coins during the year, for the reason that the coinages as reported include the value of domestic and foreign coins melted for recoinage, as well as old material, plate, etc., used in coinage.

In the circular letter of inquiry prepared at this Bureau and sent to foreign governments through the Department of State, asking for information on these subjects it was especially requested that each country report the amount of such recoinages. This has been done in many instances, but not in all.

The following table exhibits the number of fine ounces and value of gold and silver coinage of the world, by calendar years, from 1873 to

1894:

Coinage of Gold and Silver of the Mints of the World for the Calendar Years 1873-1894.

	Go	old.	Silver.

#### VALUE OF FOREIGN COINS.

### The law requires:

That the value of the foreign coins as expressed in the money of account of the United States shall be that of the pure metal of such coin of standard value; and the values of the standard coins in circulation of the various nations of the world shall be estimated quarterly by the Director of the Mint and be proclaimed by the Secretary of the Treasury immediately after the passage of this act and thereafter quarterly on the 1st day of January, April, July, and October in each year.

In accordance with the above requirement, the values of foreign coins have been estimated and proclaimed as follows:

# ASSAY LABORATORY OF THE BUREAU OF THE MINT.

During the calendar year 1894 there were tested by the assayer of the Bureau 396 gold coins and 538 silver coins, all of which were found to

be within the legal requirements as to weight and fineness.

With the exception of a number of silver coins struck at the mint at San Francisco during the months of March, April, and May, the work of the mints for the year 1894 was highly satisfactory. While these pieces were within the limit of tolerance, such wide variations from the standard as was found in them are almost unknown, two pieces falling as low as 0.897. A further examination of these deliveries seemed desirable, but unfortunately the coins could not be identified.

After much care and consultation with the assayers of the various mints a uniform method of assaying gold and silver bullion has been adopted, and will be put into effect as soon as a new set of regulations

can be issued.

During the past year about 50 ounces of proof gold were prepared under the direction of the Bureau and such gold is now supplied to the various institutions upon requisition.

The following tables show the number of pieces assayed at the Bureau each month and their average fineness; also the total number assayed from each mint, with the average fineness for the year:

## PROCEEDINGS OF THE ASSAY COMMISSION OF 1895.

The following Commissioners were appointed by the President, under the provisions of section 3547 of the Revised Statutes, to test the weight and fineness of the gold and silver coins of the coinage of the calendar year 1894 reserved for that purpose by the coinage mints, viz: Hon. Charles Tracey, Committee on Coinage, Weights, and Measures, House of Representatives; Hon. William J. Stone, House of Representatives; Dr. James P. Kimball, New York; Hon. Isaac M. Weston, Massachusetts; Prof. Edgar F. Smith, Pennsylvania; Prof. Charles E. Munroe, District of Columbia; Robert Barnett, esq., California; William J. Puckett, esq., Colorado; J. Howard Wainwright, esq., New York; Cabell Whitehead, esq., District of Columbia; B. K. Jamison, esq., Pennsylvania; Hon. D. R. Francis, Missouri; Samuel Bancroft, jr., esq., Delaware; Lamar C. Quintero, esq., Louisiana; John T. Bailey,

esq., Pennsylvania; Prof. J. W. Langley, Ohio.

The Commission met at Philadelphia on February 13, 1895. With the exception of Messrs. Tracey, Stone, and Weston, all of the Commissioners were present, together with the following ex officio Commissioners: James H. Eckels, esq., Comptroller of the Currency, and Herbert G. Torrey, assayer of the United States assay office, New York.

The committee on counting reported:

The packages containing the pieces reserved by the several mints for the trial of coins, in accordance with section 3539, Revised Statutes, were delivered to us by the superintendent of the mint at Philadelphia.

The number of coins corresponded with the record kept by the Director of the

Mint of all transcripts sent him by the several superintendents.

The quantities of coin reserved at the several mints for the purposes of the Commission were as follows:

Mints.	Pieces.	Value.
GOLD.		
Philadelphia	4,870	\$57, 820. 00
San Francisco. New Orleans.	1, 131	21, 530, 00

Philadelphia	3, 026	844.90
San Francisco	3,981	·1, 973. 85
New Orleans	3, 723	1, 795. 00
Total	10, 730	4, 613. 75
Total pieces and value	16, 857	85, 138. 75

# The committee on assaying reported:

In compniance with section 3547 of the Revised Statutes we have taken samples of the coins reserved from time to time at the United States mints at Philadelphia, San Francisco, and New Orleans for assay.

These samples represent the various deliveries made by the coiners to the superintendents of the several mints during the calendar year 1894.

The results of the assays made of the individual coins, and of the same in mass, are

given in the following schedules.

From these it will be seen that the greatest excess in the assay value of the gold coinage, as tested, above standard at the different mints (the limit of tolerance being one-thousandth) is at-

Philad	lelphi	a.		 	 	 	 	 	 	 	 	 	 	 	 	 900.	1

New C																	
																• • •	

The greatest deficiency below standard (the limit of tolerance being onethousandth) is at-New Orleans 899.7

The greatest excess in silver coins above standard (the limit of tolerance being three-thousandths) is at—

The greatest deficiency below standard (the limit of tolerance being three-

thousandths) is at-

The assay committee also tested the quartation of silver and the lead used in the assay of gold bullion and found them free from gold.

The acid used in the humid assay of silver was found to be free from silver and also from chlorine.

The balances were also tested and found to be correct.

The committee therefore deem the assays exhibited in the accompanying schedules to be trustworthy.

# The committee on counting reported:

The packages containing the pieces reserved by the several mints for the trial of coins, in accordance with section 3539, Revised Statutes, were delivered to us by the superintendent of the mint at Philadelphia.

The number of coins corresponded with the record kept by the Director of the

Miut of all transcripts sent him by the several superintendents.

· The quantities of coin reserved at the several mints for the purposes of the Commission were as follows:

(1) Gold coins from the mint at Philadelphia, 4,870 in number, of the value of \$57,820.

(2) Silver coins from the mint at Philadelphia, 3,026 in number, of the value of

(3) Gold coins from the mint at San Francisco, 1,131 in number, of the value of \$21,530.

(4) Silver coins from the mint at San Francisco, 3,981 in number, of the value of \$1,973.85.

(5) Gold coins from the mint at New Orleans, 126 in number, of the value of \$1,175.
(6) Silver coins from the mint at New Orleans, 3,723 in number, of the value of \$1,795.

In all, 16,857 coins, of the aggregate value of \$85,138.75, as set forth in detail on a subsequent page.

The verification of the number of coins being completed, the committees on

weighing and assaying each selected such coins as were required.

In the report of those committees will be found an account of the disposition of these coins.

The committee on weighing reported:

That they have examined sample coins, selected at random from those reserved by the several mints, as follows:

# MINT AT PHILADELPHIA.

119 gold coins, of which 105 were weighed in mass. 149 silver coins, of which 124 were weighed in mass.

#### MINT AT SAN FRANCISCO.

50 gold coins, of which 38 were weighed in mass. 123 silver coins, of which 111 were weighed in mass.

#### MINT AT NEW ORLEANS.

14 gold coins, of which 7 were weighed in mass. 137 silver coins, of which 113 were weighed in mass.

The weighing of the single pieces was made with a balance by Troemner, of Philadelphia, and the weights employed were provided by the Director of the Mint, certified to the committee that the same were of the true standard of value as fixed by law, and that they had been carefully examined by the United States superintendent of weights and measures, and were correctly related to the troy pound of 1827.

The mass weighings were made upon the large Saxton balance of the mint.

The committee examined the weights ordinarily employed in the mint and found them to be in accordance with the usual interpretation of the standard prescribed by law.

The details of the weighings, as shown in the following tables, indicate but slight deviation from the statutory standard weight, and the coins were all within the level to the statutory standard weight, and the coins were all within the

The result of the mass weighing was especially gratifying to the committee, as the deviation from standard weight was exceedingly small, as will be seen by the tables.

The committee on weighing pronounces the examination of the weights of the coinage of the several mints during the year 1894 to be satisfactory.

The result of the annual test is contained in the following resolution adopted by the Commission:

Resolved, That the assay commission having compared the Mint copy of the standard pound in use in the Mint with the standard troy pound on the Saxton-Snyder balance, and having found that under the conditions of the trial the Mint copy is not heavier than the standard troy pound by more than two one-hundredths of a grain, it is hereby reported, in explanation of the above limit of the difference of weight, that the balance is now unfavorably situated, one arm pointing toward an outside wall of the building, while the other arm points toward the interior of the room, and this, together with the unusual cold weather now prevailing, makes a practically uniform temperature within the balance case unattainable under existing conditions, and therefore it is the sense of this commission that the two one-hundredths of a grain difference, named above, is largely due to these temperature inequalities, and

furthermore the very small difference is within the reasonable limit of error for such observations as described above.

Resolved further, That the assay commission having examined and tested the reserved coins of the several mints of the United States for the year 1894, and it appearing that these coins do not differ from the standard fineness and weight by a greater quantity than is allowed by law, the trial is considered and hereby reported satisfactory.

COINS OF THE UNITED STATES, AUTHORITY FOR COINING, AND CHANGES IN WEIGHT AND FINENESS AND AMOUNT COINED.

Weight changed, act of February 21, 1853, to 192 grains.
Weight changed, act of February 12, 1873, to 12‡ grams, or 192.9 grains.
Total amount coined to June 30, 1895, \$130,857,276.50.

#### COLUMBIAN HALF DOLLAR.

Authorized to be coined, act of August 5, 1892. Weight, 192.9 grains; fineness, .900. Total amount coined, \$2,501,052.50.

#### QUARTER DOLLAR.

Authorized to be coined, act of April 2, 1792.
Weight, 104 grains; fineness, .892,4.
Weight changed, act of January 18, 1837, to 103\(\frac{1}{2}\) grains.
Fineness changed, act of January 18, 1837, to 900.
Weight changed, act of February 21, 1853, to 96 grains.
Weight changed, act of I'ebruary 12, 1873, to 6\(\frac{1}{2}\) grams, or 96.45 grains.
Total amount coined to June 30, 1895, \(\frac{1}{2}\)49,160,461.25.

#### COLUMBIAN QUARTER DOLLAR.

Authorized to be coined, act of March 3, 1893. Weight, 96.45 grains; fineness, .900. Total amount coined, \$10,005.75.

#### TWENTY-CENT PIECE.

Authorized to be coined, act of March 3, 1875. Weight, 5 grams, or 77.16 grains; fineness, .900. Coinage discontinued, act of May 2, 1878. Total amount coined, \$271,000.

## DIME.

Authorized to be coined, act of April 2, 1792. Weight, 41.6 grains; fineness, .892,4. Weight changed, act of January 18, 1837, to 41½ grains. Fineness changed, act of January 18, 1837, to .900. Weight changed, act of February 21, 1853, to 38.4 grains. Weight changed, act of February 12, 1873, to 2½ grams, or 38.58 grains. Total amount coined to June 30, 1895, \$28,775,218.30.

## HALF DIME.

Authorized to be coined, act of April 2, 1792. Weight, 20.8 grains; fineness, .892,4. Weight changed, act of January 18, 1837, to 20\frac{5}{5} grains. Fineness changed, act of January 18, 1837, to .900. Weight changed, act of February 21, 1853, to 19.2 grains. Coinage discontinued, act of February 12, 1873. Total amount coined, \\$4,880,219.40.

# THREE-CENT PIECE.

Anthorized to be coined, act of March 3, 1851. Weight, 12\frac{1}{2}\text{ grains; fineness, .750.} Weight changed, act of March 3, 1853, to 11.52 grains. Fineness changed, act of March 3, 1853, to 900. Coinage discontinued, act of February 12, 1873. Total amount coined, \\$1,282,087.20.

## MINOR COINS.

#### FIVE CENT (NICKEL).

Authorized to be coined, act of May 16, 1866. Weight, 77.16 grains; composed of 75 per cent copper and 25 per cent nickel. Total amount coined to June 30, 1895, \$13,884,582.20.

#### THREE CENT (NICKEL).

Authorized to be coined, act of March 3, 1865. Weight, 30 grains; composed of 75 per cent copper and 25 per cent nickel. Coinage discontinued, act of September 26, 1890. Total amount coined, \$941,349.48.

#### TWO CENT (BRONZE). .

Authorized to be coined, act of April 22, 1864. Weight, 96 grains; composed of 95 per cent copper and 5 per cent tin and zinc. Coiuage discontinued, act of February 12, 1873. Total amount coined, \$912,020.

# CENT (COPPER).

Authorized to be coined, act of April 2, 1792.

Authorized to be coined, act of April 2, 1132.
Weight, 264 grains.
Weight changed, act of January 14, 1793, to 208 grains.
Weight changed by proclamation of the President, January 26, 1796, in conformity with act of March 3, 1795, to 168 grains.
Coinage discontinued, act of February 21, 1857.
Total amount coined, \$1,562,887.44.

# CENT (NICKEL).

Authorized to be coined, act of February 21, 1857. Weight, 72 grains; composed of 88 per cent copper and 12 per cent nickel. Coinage discontinued, act of April 22, 1864. Total amount coined, \$2,007,720.

#### CENT (BRONZE).

Coinage authorized, act of April 22, 1864. Weight, 48 grains; composed of 95 per cent copper and 5 per cent tin and zinc. Total amount coined to June 30, 1895, \$7,612,226.12.

#### HALF CENT (COPPER).

Authorized to be coined, act of April 2, 1792. Weight, 132 grains.

Weight changed, act of January 14, 1793, to 104 grains.
Weight changed by proclamation of the President, January 26, 1796, in conformity with the act of March 3, 1795, to 84 grains.
Coinage discontinued, act of February 21, 1857
Total amount coined, \$39,926.11.

Tables will be found in the Appendix (XLIV, p. 330) showing the

2, 467, 798, 176. 25

# amount of coinage executed by each mint since 1792. MINT OF THE UNITED STATES AT PHILADELPHIA.

The weight and value of gold and silver deposited during the fiscal year ended June 30, 1895, at the Mint at Philadelphia are exhibited by the following table:

Metal.	Standard ounces.	Coining value.
Gold	1, 147, 400. 170 2, 807, 423. 39	\$21, 346, 979. 91 3, 266, 819. 94
Total value	··	24, 613, 799. 85

The original deposits of gold included 18,212.301 standard ounces of unrefined and 33,510.410 standard ounces of refined domestic gold bullion, of the value of \$962,282.99, and uncurrent domestic gold coin transferred from the Treasury for recoinage, containing 11,592.240 ounces of standard metal, of the face value of \$216,886 and of the value in new coin of \$215,669.58; also uncurrent mutilated United States gold coin of the face value of \$249,420.50, containing 13,314.425 ounces of standard gold, equal to \$247,710.24, purchased as bullion.

The value of foreign gold coin and bullion contained in the deposits

was \$45,569.85, and of the old jewelry and plate \$897,712.57.

Shipments of gold bullion from the mint at Denver and from the minor assay offices aggregated \$8,957,437.04. Fine gold bars of the value of \$10,020,597.94 were received from the New York assay office.

Included in the deposits of silver were 1,966.58 standard ounces of unrefined and 811,423.41 standard ounces of refined silver bullion, of the coining value in silver dollars of \$946,490.17, and worn and uncurrent domestic subsidiary silver coin of the nominal value of \$2,237,628.36, containing 1,700,180.11 ounces of standard silver, of the value of \$2,115,309.62 in new subsidiary silver coin; also mutilated domestic coin, including 270 trade and 599 standard dollars, of the nominal value of \$1,984.48, purchased as bullion, containing 1,612.74 ounces of standard silver, of the value of \$2,006.51 in new subsidiary coin.

The deposits of unrefined foreign silver bullion aggregated 3,702.91 ounces of standard metal, and that of plate, jewelry, etc., 57,941.76

standard ounces, of the value in silver dollars of \$71,731.97.

The value of the silver contained in unparted bars shipped from the mint at Denver and the minor assay offices aggregated \$105,387.72. Fine bars of the value of \$162,942.03 were shipped from the New York assay office.

The value of the gold bars for use in the industrial arts exchanged

for gold coin in sums of \$5,000 aggregated \$869,362.35.

The number of assays made during the fiscal year 1895 were as follows:

character.	Number.
Gold	29, 300
Silver	5, 400
Analysis of bronze and nicket blanks	200
Miscellaneous assays of mint sweeps and special bullion assays, etc.	350
Total	35, 250

The quantity of gold and silver operated on in the metallurgical department was as follows:

	Metals operated on.	Standard ounces.
Gold		 2, 586, 261, 123
Silver		 5, 796, 128, 970

The melts made in the same department and condemned during the year were as follows:

Metals.	For bars	For ingots.				
Metais.	made.	Made.	Condemned:			
Gold	408	459	30			
Silver	346	1, 455	30			
Total	754	1, 914	60			

The value of gold and silver bars prepared for use in the industrial arts during the year is shown in the following table:

BARS FOR USE IN THE INDUSTRIAL ARTS.

Metals.	Standard ounces.	Value.
Gold		\$998, 337. 41 57, 321. 13
Total value		1, 055, 658. 44

The operations of the refinery of the mint during the year were as follows:

REFINERY OPERATIONS, 1895.

Bullion.	Gold.	Silver.
Gross weight, 1,471,025.865 ounces. Refined standard ounces by assay	461, 153. 675	Standard ozs. 1, 116, 700, 77 1, 117, 928, 68

Upon the annual settlement of the accounts of the melter and refiner, June 30, 1895, it was found that in operating on 2,586,261.123 standard ounces of gold bullion he returned a surplus of 5.440 ounces, and in operating on 5,796,128.97 standard ounces of silver he returned in settlement a surplus of 2,034.67 ounces of standard silver.

#### MECHANICAL DEPARTMENT.

The quantity of gold, silver, and minor coinage metal operated on in the coining department is exhibited in the following table:

Metals operated on.		Ounces.
Gold		2,491,779.250
Silver		4, 603, 208. 40
Minor coinage		4, 008, 655. 52

The percentage of good coin produced from ingots operated upon was as follows:

	C	Coin.	Percentage.
Gold			 46.4
			 1
l			1

Digitized for FRASER

The number of medals struck in the same department during the year was as follows:

Character.		Number.
Silver Bronze		152

Mr. William S. Steel having resigned as coiner, it appeared that there had been delivered to him from July 1, 1894, to May 31, 1895, 2,491,779.250 standard ounces of gold and 4,603,208.40 standard ounces of silver, and that he returned during the year and on settlement of his accounts 2,491,750.692 ounces of standard gold and 4,602,415.16 standard ounces of silver, showing a wastage in gold of 28.558 ounces and in silver of 793.24 standard ounces. Considering the amount of gold and silver operated upon, the wastage is small in both gold and silver, and reflects credit upon the coiner.

The coinage executed at the mint at Philadelphia during the fiscal year 1895, was as follows:

Coinage Executed at the Mint at Philadelphia during the Fiscal Year 1895.

Denominations.	Pieces.	Value.
GOLD.		
Double eagles	. 224, 789	\$4, 495, 780.00
Eagles	847, 032	8, 470, 320, 00
Half eagles	1,711,316	8, 556, 580. 00
Quarter eagles	4, 118	10, 295. 00
Total gold	2, 787, 255	21, 532, 975, 00
SILVER.		
Standard dollars	123, 011	123, 011. 00
SUBSIDIARY SILVER.		
Half dollars	1, 299, 011	649, 505. 50
Quarter dollars		925, 252. 75
Dimes	961, 011	96, 101. 10
Total subsidiary	5, 961, 033	1, 670, 859. 35
Total silver	6. 084, 044	1, 793, 870. 35
MINOR.		
Five cent (nickel)	9, 043, 025	452, 151. 25
Que cent (bronze)	26, 044, 277	260, 442. 77
Total minor	35, 087, 302	712, 594. 02
Total coinage	43, 958, 601	24, 039, 439, 37

In addition to the above there were manufactured 4,500,000 20 cent silver pieces, of the value of \$900,000, for the Government of Ecuador. Mr. William E. Morgan was appointed coiner by the President, vice William S. Steel, resigned, and entered upon duty June 1, 1895, but as no gold coinage was executed during the month of June it was not deemed necessary to have a settlement of his accounts at the close of the fiscal year.

The denominations and face value of uncurrent domestic gold and silver coin melted at the mint at Philadelphia during the fiscal year ended June 30, 1895, are shown in the following table:

Denominations.	Pieces.	Face value.	
GOLD.			
Double eagles	10, 100	\$202,000.00	
Eagles	10, 853	108, 530. 00	
Half eagles	30, 475	152, 375.00	
Three dollar pieces	27	81.00	
Quarter eagles	1, 197	2, 992. 50	
Dollars	328	328.00	
Total gold	52, 980	466, 306. 50	
SILVER.			
Trade dollars	270	270.00	
Standard dollars		18, 099. 00	
Half dollars	1, 292, 627	646, 313. 50	
Quarter dollars	4, 365, 142	1, 091, 285. 50	
Twenty-cent pieces	2,800	560.00	
Dimes	4, 768, 556	476, 855. 60	
Half-dimes	11, 888, 700	5, 944, 35	
Three-cent pieces	9, 496	284.88	
Total silver	22, 345, 690	2, 239, 612. 83	
Total gold and silver	22, 398, 670	2, 705, 919. 33	

Dr. Eugene Townsend having resigned as superintendent of the mint at Philadelphia, the President appointed in his place Herman Kretz, of Pennsylvania, who entered upon duty June 1, 1895.

The following amounts of gold and silver bullion, coin, and currency were transferred by Dr. Townsend:

Character.	Value.
Gold bullion	\$15, 678, 091. 11
Gold coin	
Silver bullion	108, 969, 163. 1
Silver coin	50, 630, 384. 1
Currency	
Minor coins	147, 150. 0
Minor coinage metal	
Total	179, 812, 830. 3

Mr. M. H. Cobb, register of deposits at the mint at Philadelphia, was designated to superintend the settlement of the retiring coiner's accounts, and to weigh- and count the bullion, coin, and other moneys transferred by Dr. Townsend to his successor, and also to superintend the annual settlement of the melter and refiner's accounts at the close of the fiscal year.

Messrs. A. A. Hassan and F. W. Braddock, of the Bureau of the Mint, were detailed to assist him at the annual settlement of the melter and refiner's accounts.

#### MINOR COINAGE BY THE MINT AT PHILADELPHIA:

During the fiscal year ended June 30, 1895, the nominal value of the minor coinage executed by the mint at Philadelphia amounted in the aggregate to \$712,594.02, against \$719,619.26 for the previous fiscal year.

The quantity and cost of minor coin blanks purchased during the fiscal year 1895 are shown in the following table:

Metal.	Number of pounds av- oirdupois.	Price per pound.	Cost.
Bronze 1 cent blanks	155, 000	\$0.1994	\$30, 907. 00
Five-cent nickel blanks	55, 500	. 3194	17, 726. 70
Total	210, 500		48, 633, 70

Note.—An avoirdupois pound of 1-cent blanks will coin \$1.46; an avoirdupois pound of 5-cent nickel blanks will coin \$4.43.

#### MINOR COINS TRANSFERRED FOR REISSUE.

The following statement exhibits the balance of minor coins on hand July 1, 1894, the amount of current minor coins transferred from the Treasury to the mint at Philadelphia for cleaning and reissue, and the amount reissued during the fiscal year 1895 in exchange for lawful money:

Balance on hand July 1, 1894: Bronze 1-cent pieces		\$9, 480
Received on transfer order, viz:  Bronze 1-cent pieces Nickel 5-cent pieces		*-*-
Bronze 1-cent pieces	\$89,275	
Nickei 5-cent pieces	70, 400	164, 710
Total	-	171 100
Reissued during the year, viz: Bronze 1-cent pieces	98, 755	
Nickel 5-cent pieces	75, 435	157 100
TRANSPER AND RECOINAGE OF INCURRENT MINOR COIN		174, 190

TRANSFER AND RECOINAGE OF UNCURRENT MINOR COIN.

The following table exhibits the amount of uncurrent copper, nickel, and bronze coins on hand July 1, 1894, and the amount transferred from the Treasury to the mint at Philadelphia during the fiscal year 1895 for conversion into current minor coins, its cost, and seigniorage; also the amount recoined, the loss by recoinage, and the balance on hand June 30, 1895:

## MINOR COIN FOR RECOINAGE, FISCAL YEAR 1895.

Balance on hand July 1, 1894.	\$64,391.87
Uncurrent coin transferred from United States Treasury, viz:	
Old copper cents	
Nickel 1-cent coin

<sup>&</sup>lt;sup>1</sup> This balance has been deposited in the Treasury.

#### TYPES OF MINOR COINS ISSUED.

The following table exhibits the several types and denominations of minor coins issued by the mint at Philadelphia since its establishment, the amount remelted, and the amount outstanding June 30, 1895:

Minor Coins Issued, Remelted, and Outstanding to the End of the Fiscal Year June 30, 1895.

Denomination.	Coined.	Remelted.	Outstanding June 30, 1895.
Copper cents	\$1, 562, 887. 44	\$377, 913. 53	\$1, 184, 973. 91
Copper half-cents <sup>1</sup>	39, 926. 11		39, 926, 11
Copper-nickel cents	2, 007, 720. 00	779, 616. 29	1, 228, 103. 71
Bronze cents	7, 611, 876. 12	57, 655, 83	7, 554, 220. 29
Bronze 2-cent pieces	912, 020. 00	330, 31 <b>6</b> . 58	581, 703. 42
Nickel 3-cent pieces	905, 768. 52	254, 704. 12	651, 064. 40
Nickel 5-cent pieces	13, 908, 572. 20	314, 020. 60	13, 594, 551. 60
Total	26, 948, 770. 39	2, 114, 226. 95	24, 834, 543. 44

<sup>&</sup>lt;sup>1</sup>There is no record of the melting of any old copper half-cents, but it is believed that few, if any, are now in circulation.

# MANUFACTURE AND SALE OF MEDALS AND PROOF COINS.

The number of medals sold during the fiscal year 1895 was 822, of the value of \$1,859.56, and the number of proof sets of coinage was 2,979, of the value of \$4,402.36. In addition thereto 104 single gold pieces were sold, for which \$458.50 were realized, as shown by the following tables:

MEDALS MANUFACTURED AND SOLD, 1895.

Medals.	Number sold.	Value.
Gold	56	\$1, 207. 03
Silver	391	463.39

#### MEDALS MANUFACTURED.

The same institution manufactured 588 medals during the fiscal year 1895, as shown in the following table:

# MEDALS MANUFACTURED, 1895.

Description.	Number.
Gold Silver Bronzo Total	151

In the Appendix (XVII¹) will be found a detailed list of medals struck during the fiscal year 1895.

# MINT OF THE UNITED STATES AT SAN FRANCISCO.

The value of the deposits of gold at the mint at San Francisco during the fiscal year 1895 amounted in the aggregate to \$21,806,864.42, against \$21,325,019.21 for the fiscal year 1894, showing an increase of \$481,845.21. The value of silver bullion and uncurrent subsidiary silver coin deposited during the year was \$1,187,919.16, against \$4,360,382.30 for the previous fiscal year, a decrease of \$3,172,463.14.

The weight and value of the precious metals deposited at the mint at San Francisco during the fiscal year 1895 were as follows:

Metals.	Standard ounces.	Value.
Gold	1, 172, 118, 963 1, 020, 868, 03	\$21, 806, 864, 42 1, 187, 919, 16
Total	2, 192, 986. 993	22, 994, 783. 58

See footnote, page 149.

The deposits of gold bullion at the mint at San Francisco included worn and uncurrent domestic gold coin of the nominal value of \$21,396, containing 1,032,589 standard ounces, of the coining value of \$19,210.96.

The deposits of silver bullion included worn and mutilated domestic silver coins of the nominal value of \$1,016,429.40, which upon melting were found to contain 797,596.92 ounces of standard metal, of the coining value in subsidiary silver coin of \$992,344.50.

Foreign gold coin containing 58,978.711 ounces of standard metal, of

the coining value of \$1,097,278.34, was received and melted.

The quantity of gold and silver bullion operated upon in the metallurgical department was as follows:

Metals.	Standard ounces.
Gold	2, 087, 071. 893
Silver	5, 576, 396. 44
Total	7, 663, 468. 333

The quantity and value of gold and silver bullion operated upon in the refinery of the mint at San Francisco during the fiscal year 1895 were as follows:

# REFINERY OPERATIONS, 1895.

Bullion.	Standard ounces.	Value.
Gold	300, 886. 944	\$5,597,896.63
Silver	306, 879. 66	357, 096. 33
Total	607, 766, 604	5, 954, 992, 96

There was melted during the year for coinage purposes 2,062,474.950 ounces of standard gold and 5,131,778.25 ounces of standard silver, and the number of ingot melts made and condemned was as follows:

•		Melts of ingots.	
Metals.	Made.	Con- demned.	
Gold	717	1	
Silver	3,099	15	
Total	3, 816	16	

One fine silver bar was manufactured during the fiscal year 1895. Upon the annual settlement, June 30, 1895, of the melter and refiner's accounts, he returned a surplus of 1,156.271 ounces of standard gold, of the value of \$21,512.02, and 2,905.70 ounces of standard silver, valued at \$1,606.75, and which has been properly accounted for by the disposal of both sums in the Treasury of the United States.

# OPERATIONS OF THE MECHANICAL DEPARTMENT.

Mr. Charles M. Gorham retired from the coinership of the mint at San Francisco August 31,1894, and upon the settlement of his accounts it was found that from July 1, 1895, to the date of his retirement, in operating upon 223,620.070 ounces of standard gold, there was a wastage of 16.226 ounces, of the value of \$301.88, and in operating upon 1,569,496.16 ounces of standard silver there was a wastage of 319.08 ounces, of the value of \$176.75.

Upon settlement of the accounts, June 30,1895, of A.T. Spotts, esq., who entered upon duty as coiner September 1, 1894, it appeared that in operating upon 1,864,806.590 standard ounces of gold bullion there had been a wastage of 100.742 ounces of standard metal, of the value of \$1,874.27, and in operating upon 4,896,909.76 ounces of standard silver there had been a wastage of 963.62 ounces of standard silver, valued at \$532.85, making a total wastage for the fiscal year of 116.968 ounces of standard gold, of the value of \$2,176.15, and 1,282.70 ounces of standard silver, valued at \$709.60, being in the case of gold 11.50 and of silver 22.88 per cent of the legal allowance.

The following table exhibits, by denominations and value, the coinage executed by the mint at San Francisco during the fiscal year 1895:

COINAGE EXECUTED AT THE MINT AT SAN FRANCISCO, FISCAL YEAR 1895.

Denomination.	Pieces.	Value.
GOLD.  Double eagles  Eagles  Half eagles  Total gold	1, 035, 800 24, 250 87, 400 1, 147, 450	\$20, 716, 000. 00 242, 500. 00 437, 000. 00 21, 395, 500. 00

The annual settlement and examination of the mint at San Francisco at the close of the fiscal year was made by Messrs. Henry W. Van Senden, of the Treasury Department, and J. Farley Wilder, of the United States assay office at New York, who reported that they found by weighing and counting the balance of bullion and coin on hand with which the superintendent was chargeable.

# MINT OF THE UNITED STATES AT NEW ORLEANS.

The weight and value of the precious metals deposited at the mint of the United States at New Orleans during the fiscal year 1895 were as follows:

Metal.	Standard ounces.	Value.
Gold	12, 770. 124 851, 848, 70	\$237, 583. 70 991, 242. 12
Total		1, 228, 825. 82

During the year there were deposited on transfer orders from the Treasury Department for recoinage \$47,391.90 ounces standard of uncurrent and worn silver coins of the United States of the face value of \$1,107,847.95, representing in value \$1,054,297.86 in new subsidiary coin. There were purchased over the counter 844.421 ounces standard of uncurrent and worn gold coins of the United States of the face value of \$15,937.50, representing \$15,710.16 in current coin, and 701.80 ounces standard of uncurrent and mutilated silver coin of the face value of \$912.07, resprenting \$837.16 in new subsidiary coin.

There were also deposited 7,818.338 ounces of unrefined foreign gold bullion and 304.118 ounces standard of foreign gold coin, representing the value of foreign deposits to be \$151,115.46.

Gold bullion to the amount of 3,562.961 standard ounces and the value of \$66,287.65 was obtained from old gold plate and jewelry.

There were received 1,196.54 ounces standard of foreign unrefined silver bullion, representing the coining value of \$1,028.28, while the old silver plate and bars from old jewelry melted contained 2,688.98 ounces standard, of the coining value of \$3,128.99.

During the year there was placed in the mint building a dynamo and a 52-cell electric storage battery, affording ample electric lighting, which has greatly reduced the expenses of illumination.

#### METALLURGICAL OPERATIONS.

The amount of the precious metals operated upon in the metallurgical department was as follows:

Metals.	Standard ounces.	Value.
Gold		\$2, 176, 344. 89
Silver	6, 169, 300. 93	7, 178, 822. 89
Total	6, 286, 279. 468	9, 355, 167. 78

The melter and refiner, in operating on the 116,978.538 ounces of standard gold with which he was charged found at the end of the fiscal year an excess of 9.371 ounces standard. In operating on 6,169,300.93 ounces of standard silver during the same period his wastage was 1,673.62 ounces standard, or 18 per cent of the actual legal allowance.

# MECHANICAL OPERATIONS.

During the fiscal year 1895 the coiner operated upon 113,331,550 ounces of standard gold and upon 5,770,495.60 ounces of standard silver, resulting in the manufacture of coins as shown by the following table:

# COINAGE EXECUTED, 1895.

Denomination.	Pieces.	Value.
GOLD.	100, 500	\$1,005,000
SILVER. Dollars	2, 173, 000	2, 173, 000
Half-dollarsQuarter-dollars	1,856,000 2,252,000	928, 000 563, 000
Dimes.	870,000	87, 000
Total silver	7, 151, 000	3, 751, 000 4, 756, 000

His gold wastage during the year was 1.428 ounces of standard gold, or 0.0252 per cent of the legal allowance, and the percentage of finished coin produced from amount operated upon was 47.664. His silver wastage during the same period was 770.72 ounces of standard silver, or 0.1335 per cent of the legal allowance, and the percentage of finished coin produced from the amount operated upon was 53.67. The number of melts made in the same department and the number condemned during the fiscal year were as follows:

# MELTS MADE AND CONDEMNED.

		Melts for ingots.		
	Metals.		Made.	Con: demned.
*			36 688	6
Total	***************************************		724	9

# The operations of the refinery were as follows:

# REFINERY OPERATIONS.

Metals.	Standard ounces.	Value.
Gold	,	\$433, 954. 50 76, 012. 44
Total	88, 648. 244	509, 966. 94

During the fiscal year the assaying department operated upon 520 gold deposits, 36 melts of gold ingots, and 95 assays of gold of a miscellaneous nature. There were assays made of 20 lots of silver purchased and 688 assays of melts of silver ingots, making in all 1,359 assays.

Mr. H. Clay Stier, of the office of the Auditor of the Treasury

Mr. H. Clay Stier, of the office of the Auditor of the Treasury Department, superintended the annual settlement, June 30, 1895, and reported that he found on hand all the coin and bullion with which the superintendent was charged.

# MINT OF THE UNITED STATES AT CARSON.

The value of the gold and silver deposited at the mint at Carson, Nev., during the fiscal year 1895 aggregated \$1,660,353.89, against \$1,247,147.14 for the previous fiscal year—an increase of \$413,206.75.

The weight and value of the deposits were as follows:

Metals.	Standard ounces.	Value.
Gold		\$1, 057, 608. 97 602, 744. 92
Total		1,660,353.89

During the year fine gold bars of the value of \$664,182.49 and fine silver bars of the coining value of \$600,577.51 were manufactured.

The quantity of bullion operated upon in the melter and refiner's department was:

	Metals.		Standard ounces.
Gold			63, 924. 213
Silver		· · · · · · · · · · · · · · · · · · ·	1, 246, 209. 05

The operations of the refinery were as follows:

Bullion.	Gold.	Silver.
Gross weight, 548,031.05 ounces. Sent to refinery.	<b>{</b>	Standard ozs. 542, 831. 61
Received from refinery	1 ' '	544, 045. 97

On February 13, 1895, the superintendent received an official communication from Mr. Hirsch Harris, the melter and refiner, stating that a clean up of the refinery had revealed an apparent shortage in the gold bullion of approximately 3,000 standard ounces. The superintendent immediately caused all the bullion in the hands of the melter and refiner to be reweighed and his accounts checked, with the result above stated.

On February 15 the Bureau of the Mint was advised by letter (inclosing letter of the melter and refiner) of the apparent loss, with the request that some competent person be sent from the Department to investigate the matter. In answer the following letter was forwarded the superintendent of the mint:

[Confidential.]

TREASURY DEPARTMENT, BUREAU OF THE MINT, Washington, D. C., February 23, 1895.

Sir: Your letter of the 15th instant, inclosing a copy of a letter from the melter and refiner, has been received, and I regret to hear such bad reports. As soon as a suitable person can be found who is competent to make this investigation, he will be sent to Carson without delay.

be sent to Carson without delay.

In the meantime I think the matter should be kept very quiet, and both the melter and refiner and yourself should use every effort to recover the bullion.

Should I be able to induce one of two persons whom I have asked to go to Carson the investigation will be probably commenced within the next ten days. I shall very likely visit Carson myself, but would wish that my visit be kept perfectly quiet and that no publication whatever shall be given the matter until after I have made the investigation. I will communicate with you further in the matter early in the coming week.

Respectfully yours,

R. E. PRESTON, Director of the Mint.

J. W. Adams, Esq., Superintendent United States Mint, Carson, Nev.

The Bureau immediately requested Mr. Andrew Mason, superintendent United States assay office, New York, to make the investigation, and the following letter of instructions was given him:

TREASURY DEPARTMENT, BUREAU OF THE MINT,

Washington, D. C., March 5, 1895.

Sir: The superintendent of the United States mint at Carson City, Nev., reports under date of February 15 that a shortage has been discovered by the melter and refiner of that institution in his accounts of 3,000 ounces of standard gold and 3,000 ounces of standard silver bullion. It would appear from the letter of the melter and refiner to the superintendent, a copy of which is inclosed herewith, that the melter and refiner on January 18 ordered a "clean up" in the refinery on all bullion delivered to him from June 1, 1894, to December 31, 1894, inclusive, when the shortage was discovered.

The melter and refiner states that he can only account for the shortage in one of two ways—either through the dishonesty of some of the employees, or that the bullion received by the superintendent from his predecessor and turned over to him did not contain the amount of gold and silver called for by the assay of the same.

did not contain the amount of gold and silver called for by the assay of the same.

I have to request that you will proceed to Carson City as early as practicable and make an investigation as to the cause or causes of this loss, and you are fully empowered to call upon all the officers and employees of the Carson mint for any information you may wish in the matter.

In our conversation of a few days since it was agreed as you suggested, that the investigation to be made by you should be confined to the technical operations of the refinery only, and that the habits, etc., of the employees should be investigated by a person detailed by the United States Secret Service. This has been done, and Mr. A. L. Gallaher has been sent to Carson City and instructed to communicate and confer freely with you upon your arrival there.

I leave the course to be pursued by you in this investigation to be governed entirely by your own judgment, feeling sure that if it is possible to trace the loss

through the technical operations of the mint it will be done.

The superintendent of the mint at Carson City has been instructed in a letter

The superintendent of the mint at Carson City has been instructed in a letter herewith to afford you every facility for making this investigation.

Upon your return you will please submit a report to this Bureau, giving the result of your investigations and making such recommendations as you may think advisable.

of your investigations and making such recommendations as you may think advisable. Your traveling and other expenses will be paid upon your rendering an account of the same to this Bureau. I inclose herewith transportation orders from Council Bluffs to Cheyenne and from Cheyenne to San Francisco

Respectfully yours,

R. E. PRESTON, Director of the Mint.

Andrew Mason, Esq., Superintendent United States Assay Office, New York, N. Y. Upon the arrival of Mr. Mason at Carson March 15, he immediately took charge of the melter and refiner's department, ordering a general clean up and the reweighing of all the gold and silver bullion in that

department.

During the investigation Mr. Mason, while reassaying certain melts, discovered a melt weighing 2,133.30 ounces, stamped .482½ fineness gold, and .500 silver, and supposed to contain 1,143.685 standard ounces of gold, and 1,185.16 standard ounces of silver. The reassay of this melt showed it contained but .019½ gold and .946 silver, and the melt to contain but 46.221 standard ounces of gold and 2,242.33 standard ounces of silver, a difference or shortage in gold of 1,097.464 standard ounces and a gain or surplus in silver of 1,057.17 standard ounces.

After discovering this spurious melt Mr. Mason had all the gold bullion in the possession of the melter and refiner reassayed, but no

additional fraudulent melts were discovered.

Upon the settlement of the melter and refiner's accounts April 12, 1895, it was found that he had received from the superintendent from June 1, 1894, to January 31, 1895, the following: Gold bullion, 63,924.213

standard ounces; silver, 1,246,209.05 standard ounces.

During the same period he delivered to the superintendent in fine gold and silver bars, settlement bullion, and sweeps, as follows: Gold, 59,863.414 standard ounces; silver, 1,249,228.53 standard ounces, showing a shortage of 4,060.799 standard ounces of gold, of the value of \$75,549.75, and a surplus of 3,019.48 standard ounces of silver.

The records of the refinery operations show that during the month of December, 1894, there were sent to the refinery for treatment by the nitric acid process 57,132.40 gross ounces of bullion, containing 10,432.629 standard ounces of gold, and that the amount received from the refinery after treatment was 8,918.352 standard ounces of gold, showing a loss on this one operation of 1,514.277 standard ounces of gold.

In contrast with the above workings by the nitric-acid process, the last work in the refinery during February, 1895, was on bullion received during the year, and was treated by the sulphuric-acid process. The

result was as follows:

The amount of bullion sent to the refinery was 63,318.10 gross ounces, containing 3,692.023 standard ounces of gold; and the amount received from the refinery was 3,714.216 standard ounces of gold,

showing a surplus or gain of 22.193 standard ounces.

The investigation developed the fact that between August, 1893, and November, 1894, James H. Heney, occupying the position of silver dissolver in the refinery from December 1, 1891, to June 30, 1893, had melted at the Reno Reduction Works and subsequently sold to the Selby Smelting and Lead Company of San Francisco, Cal., fine gold of the value of \$23,000.

After a thorough investigation by Mr. Mason, the evidence collected was deemed sufficient to justify the arrest of John T. Jones, assistant melter and refiner, and James H. Heney, formerly silver dissolver in the refinery, who, after examination before the United States commissioner, were held for the action of the grand jury, the bond of Jones being fixed at \$25,000 and that of Heney at \$15,000.

Valuable assistance was rendered Mr. Mason by Messrs. A. L. Gallaher and N. R. Harris, operatives of the United States Secret Service.

The grand jury convened on August 19 and found a true bill against

both parties, and their trial was set for November 11, 1895.

On June 4, 1895, 10½ pounds of crude silver amalgam were found secreted on the premises of W. J. Pickler, deposit melter of the mint.

The amalgam was brought to the mint and assayed and found to be worth about \$150. Mr. Pickler, failing to satisfactorily account for it, was arrested and held by the United States commissioner in \$1,000 bonds. Pickler's examination developed the fact that if this amalgam was taken from the mint it was done before melting, a loss to the depositor and not the Government, and never entered into the bullion accounts of the mint, and in consequence could have no connection whatever with the present shortage. Pickler died on the 31st of July, 1895.

Since the closing down of the refinery, bullion containing 27,766.115 ounces standard gold, valued at \$516,578.88, and 170,915.02 standard ounces of silver, valued at \$123,147.04, has been shipped on transfer orders to the United States mint at San Francisco, Cal., the loss on which, arising from difference in assay, was \$331.33 gold and \$265.34 silver.

As the settlement of April 12, 1895, only embraced the accounts of the melter and refiner from June 1, 1894, to January 31, 1895, the superintendent had reweighed and checked all the bullion in his possession at the close of the fiscal year ended June 30, 1895, and found a surplus of 3.406 ounces standard gold, valued at \$63.37, and 155.25 ounces standard silver, valued at \$85.83.

The thanks of the Bureau are due to Mr. Andrew Mason, superintendent of the United States assay office, New York, for the patience, zeal, and fidelity with which he performed the duties devolving upon him. It is solely due to his skill and efficiency that the causes of the shortage of gold bullion in the accounts of the melter and refiner of the mint at Carson have been brought to light.

# THE ASSAY OFFICE OF THE UNITED STATES AT NEW YORK.

The value of the gold and silver received at the United States assay office at New York during the fiscal year ended June 30, 1895, aggregated \$43,232,996.34, against \$48,224,012.04 for the previous fiscal year, or a decrease of \$4,991,015.70.

Uncurrent and mutilated domestic gold coin of the nominal value of \$664,591.50 was melted and found to contain 35,358.265 ounces of standard gold of the value of \$657,828.19.

Uncurrent and mutilated domestic silver coin of the face value of \$4,476.85 was received and melted, producing 3,518.32 ounces of standard silver of the coining value in subsidiary coin of \$4,377.39.

Foreign gold coins of the value of \$1,174,289.13 in United States money were melted during the year, and foreign silver coins of the value of \$19,769.33.

The weight and value of the deposits of gold and silver were as follows:

Metal.	Weight.	Value.
Gold	Standard ozs. 1,810,333.380 8,209,072.55	
Total value		43, 232, 996. 34

The value of gold bars exchanged for gold coin during the fiscal year 1895, under the provisions of the act of May 26, 1892, was \$6,917,384.20.

#### OPERATIONS OF THE METALLURGICAL DEPARTMENT.

The quantity of gold and silver bullion operated upon by the melter and refiner's department during the year was:

Bullion.	Weight.
Gold	-,,

The operations of the refinery of the assay office at New York were as follows:

REFINERY OPERATIONS, FISCAL YEAR 1895.

Bullion.	Weight.
Gross weight, 3,771,372.26 ounces.	Standard ozs. 489, 172, 04
Silver	3, 351, 073. 72

During the year the number of fine, mint, and standard bars made and delivered to the superintendent was 61,387, containing 1,727,417.399 ounces of standard gold, and 8,222,607.36 ounces of standard silver.

The number of gold deposits melted was 6,881; of silver, 3,941; total, 10,822. The quantity of sulphuric acid used in parting operations during the year was 1,528,020 pounds. The products of the sale of spent acid and blue vitriol amounted to \$9,161.03, and of old materials, \$498.09, a total of \$9,659.12.

On the annual settlement, June 30, 1895, of the melter and refiner's accounts, it was found that in operating upon 1,728,707.516 ounces of standard gold he returned an excess of 728.337 ounces standard, of the value of \$13,350.45, and in his operations on 8,289,455.94 ounces of standard silver he returned an excess of 1,793.45 ounces standard.

# ASSAY DEPARTMENT.

The number of assays made of gold and silver deposits and of gold and silver bars assayed and stamped during the year were as follows:

Character.	Number.
Gold deposits	· '
Gold bars	16, 083
Silver bars	45, 304
Total	72, 209

In addition to the assays of gold and silver deposits and bars made, 788 special assays of bullion were also made, including a large number for manufacturers of silverware who desired an assay made by the Government as a guarantee of the fineness of their ware, as well as to protect themselves and the public against wares manufactured, advertised, and placed on the market as "standard" and "sterling," only a very few of which were found to agree with their stamp in fineness, and

some of which were found to contain no silver at all. It is more than probable that if a similar test were made of gold ware much of it would be found equally deficient in fineness, which suggests the propriety of the passage of a law to protect the public from imposition by unprincipled manufacturers of and dealers in gold and silver ware.

Messrs. F. P. Gross and W. F. Bowen, of the Bureau of the Mint, superintended the annual settlement, June 30, 1895, and reported that they found on hand all the coin and bullion with which the superin-

tendent was charged.

# MINT OF THE UNITED STATES AT DENVER, COLO.

The value of bullion reported as having been operated upon by the assayer in charge of this institution, during the fiscal year 1895, amounted to \$5,637,459.51, an increase of \$2,378,181.73 over the deposits reported during the fiscal year 1894, and \$4,219,664.63 over those of 1893, the deposits being principally domestic bullion from the mines of Arizona, New Mexico, Colorado, and Utah. Mutilated and uncurrent gold coins of the United States amounting to \$100.50 were also deposited.

There was a notable increase also in bars deposited by mills employing

the cyanide and chlorination processes of treatment.

Additions in the chemical laboratory and plant of the melting department were made during the year, necessitated by the increased work of the office.

The deposits, earnings, and expenditures for the fiscal year are shown in the following table:

Items.	Amount.
Deposits: Gold\$5,594,196.43 Silver43,263.08	\$5,637,459.51
Earnings  Expenditures  Percentage of net expenses to deposits, 0.38035.	\$5, 637, 459. 51 13, 292. 52 34, 735. 19

#### ASSAY OFFICE OF THE UNITED STATES AT BOISE, IDAHO.

The deposits of bullion, principally from the mines of Idaho and Oregon, at the assay office at Boise during the fiscal year 1895 amounted to \$1,198,149.91, an increase of \$397,011.54 over the deposits reported for the previous year. There were no deposits of mutilated or uncurrent coins of the United States during the year.

The deposits, earnings, and expenditures for the fiscal year are as follows:

	Items.		Amount.
Deposits:		A1 150 515 54	
Silver	***********	. 18,632.37	\$1, 198, 149. 91
Earnings			4, 860. 68
Expenses			12, 200. 00
Percentage of net	expenses to deposits, 0. 61	255.	

# ASSAY OFFICE OF THE UNITED STATES AT HELENA, MONT.

The deposits of bullion at the assay office at Helena amounted during the fiscal year 1895 to \$2,233,884.40, an increase of \$213,151.35 over the deposits reported for the previous year, the principal deposits of domestic bullion being from the mines of Idaho and Montana. were no deposits of mutilated or uncurrent coins of the United States.

The number of deposits in 1895 was 2,252, which included 718 special deposits of bullion, each of the latter being less than \$100 in value.

The melting department made over 3,000 melts of bullion during the

The deposits, earnings, and expenditures for the fiscal year are as follows:

Items.	Amount.
Deposits: Gold	\$2, 233, 884. 40
Earnings Expenditures Percentage of net expenses to deposits, 0.83654.	5, 724, 45 24, 412, 95

# ASSAY OFFICE OF THE UNITED STATES AT CHARLOTTE, N. C.

The deposits of bullion, principally from the mines of Georgia and South Carolina, at the assay office at Charlotte during the fiscal year 1895 amounted to \$236,041, against \$249,513.64, the amount of deposits reported in the previous year. There were no deposits of mutilated or uncurrent coins of the United States during the year.

The deposits, earnings, and expenditures for the fiscal year are as follows:

	Items.		Amount.
Deposits:			
Gold		\$234, 738.	84
			16
	*		\$236, 041. 00
Earnings			1, 010. 29
Expenditures			4, 749. 49
Percentage of net	expenses to deposits	, 1. 58158.	

# ASSAY OFFICE OF THE UNITED STATES AT ST. LOUIS, MO.

The deposits of bullion at the assay office at St. Louis amounted during the fiscal year 1895 to \$160,161.12, an increase of \$2,247.28 over the deposits reported in the previous year. The principal deposits of domestic gold ballion were from the mines of New Mexico.

The deposits of worn and mutilated gold coin amounted to \$32,028.58

and that of silver to \$4.58.

The deposits, earnings, and expenditures for the fiscal year are as follows:

Items.		Amount.
Deposits:	\$158, 470. 17	
Silver	1, 690. 95	\$160, 161. 12
Earnings		822, 72
Expenditures		4, 478. 02

## SUMMARY OF THE WORK OF THE MINOR ASSAY OFFICES.

The following statement of deposits, earnings and expenditures, and percentage of net expenses to deposits summarizes the work of the minor assay offices, including the mint at Denver, for the fiscal year 1895:

DEPOSITS, EARNINGS, AND EXPENDITURES OF THE MINOR ASSAY OFFICES, 1895.

. Institution.	Deposits.	Deposits. Earnings. E		Percentage of net expenses to deposits.
Denver	\$5, 637, 459. 51	\$13, 292. 52	\$34, 735. 19	0. 38036
Boise	1, 198, 149. 91	4, 860. 68	12, 200. 00	.61255
Helena	2, 233, 884. 40	5, 724. 45	24, 412. 95	. 83654
Charlotte	236, 041.00	1,010.29	4, 749. 49	1. 58158

# SUMMARY OF OPERATIONS OF MINTS AND ASSAY OFFICES.

The precious metals received at all the mints and assay offices during the fiscal year 1895 were valued at \$103,196,455, against \$170,352,370 the previous fiscal year.

# METALLURGICAL OPERATIONS, 1894 AND 1895.

The operations of the melting and refining departments of the coinage mints and of the assay office at New York for 1894 and 1895, as far as the value of the metals treated is concerned, are exhibited in the following table:

BULLION OPERATIONS OF THE MELTING DEPARTMENTS, 1894 AND 1895.

9	Fiscal y	year 1894.	Fiscal year 1895.			
Metals.	Standard ounces.	Coining value.	Standard ounces.	Coining value.		
Gold	13, 918, 586	\$258, 950, 446	6, 588, 943	\$122, 584, 988		
Silver	20, 546, 684	23, 908, 867	27, 019, 984	31, 441, 435		
Total	34, 465, 270	282, 859, 313	33, 608, 927	154, 026, 423		

# MECHANICAL OPERATIONS, 1894 AND 1895.

The operations of the coining branches of the mints during the fiscal years 1894 and 1895 in the manufacture of finished coin from ingots pre-

pared by the melting departments were, in value of the metals operated upon, were as follows:

BULLION OPERATIONS OF THE COINING DEPARTMENTS, 1894 AND 1895.

	Fiscal y	ear 1894.	Fiscal year 1895.			
Metals.	Standard ounces.	Coining value.	Standard ounces.	Coining value.

Total	21, 430, 265	213, 671, 816	21, 533, 647	106, 917, 382		

# WORK OF THE MINOR ASSAY OFFICES, 1894 AND 1895.

The work of the minor assay offices at Helena, Mont., Boise, Idaho, Charlotte, N. C., and St. Louis, Mo., and of the mint at Denver, Colo., which consists in the receipt and assaying of deposits and the manufacture of unparted bars of gold and silver, during the fiscal years 1894 and 1895, was as follows:

OPERATIONS OF MINOR ASSAY OFFICES, 1894 AND 1895.

			ear 1894.	Fiscal year 1895.		
Metals.	-	Standard ounces.	Coining value.	Standard ounces.	Coining value	
Gold		342, 484	\$6, 371, 794	502, 693	\$9, 352, 431	
Silver		100, 355	116, 776	97, 336	113, 264	
Total		442, 839	6, 488, 570	600, 029	9, 465, 695	

# OPERATIONS OF THE MINT SERVICE, 1894 AND 1895.

The following table is a summary of the three preceding tables, showing the value of the precious metals operated on at the mints and minor assay offices during the fiscal years 1894 and 1895:

Bullion Operated upon in the Melting and Coining Departments of all the Mints and Assay Offices, 1894 and 1895.

	Fiscal y	ear 1894.	Fiscal year 1895.		
Metals.	Standard ounces.	Coining value.	Standard ounces.	Coining value	
Gold Silver	25, 082, 322 31, 256, 052	\$466, 647, 850 36, 370, 677	11, 785, 173 43, 957, 430	\$219, 259, 038 51, 150, 462	
Total	, 56, 338, 374	503, 018, 527	55, 742, 603	270, 409, 500	

QUANTITY OF METALS OPERATED UPON, WASTAGE, AND LOSS, 1895.

In quantity the precious metals operated upon in the different departments of the mints and assay offices during the fiscal year ended June 30, 1895, exceeded 404 tons of gold and 1,507 tons of silver, and in addition thereto over 77 tons of bronze 1-cent pieces and nearly 28 tons of nickel 5-cent pieces were handled.

FI 95----15

The value of the precious metals wasted in the metallurgical and mechanical departments was \$5,245.91. A loss of \$12,614.61 occurred from the difference between the assay value of bullion contained in sweeps and leady melts sold and the amount received for the same.

The wastages and losses aggregated \$17,860.52. Against these losses there were gains arising from the operations on bullion as follows:

GAINS ARISING	TROM	BULLION	OPERATIONS.	1894	AND	1895

	Fiscal year-		
Character of gains.	1894.	1895.	
Surplus bullion returned by the operative officers	\$23, 125. 86	\$41, 792. 96	
Precious metals recovered in grains and sweeps  Gain on bullion shipped from the minor assay offices	8, 177. 96	13, 513. 48	
to the mint for coinage	6, 362. 85	6, 203. 15	
Total gains	37, 666, 67	61, 509. 59	

Deducting the value of the total operative, wastage, and loss on sale of sweeps from the incidental gains on bullion, there was a net gain in the operations of the mints during the fiscal year of \$43,649.07.

#### COST OF COINAGE 1894 AND 1895.

The following table exhibits the cost per piece of the coins executed at the mints of the United States during the fiscal years 1894 and 1895.

COST OF COINAGE EXECUTED AT THE COINAGE MINTS OF THE UNITED STATES
DURING THE FISCAL YEARS 1894 AND 1895.

# RECOINAGE OF STANDARD SILVER DOLLARS.

During the fiscal year 1895 there were transferred from the Treasury to the mints 17,500 mutilated and uncurrent silver dollars, and there were purchased at the mints and assay office at New York, 1,080 silver dollars, making the number of uncurrent silver dollars received by the mints for recoinage during the year 18,580, which were used in the manufacture of subsiduary silver coins.

<sup>&</sup>lt;sup>2</sup> Shortage of 4,060.799 standard ounces reported on account of embezzlement.

The total number of mutilated and uncurrent silver dollars received and melted at the mints from 1883 to the close of the fiscal year 1895 is shown in the following statement:

Fiscal year.	Amount	Fiscal year.	Amount.

#### MONETARY STATISTICS OF FOREIGN COUNTRIES.

The statistics of the production and coinage of the precious metals, imports and exports of gold and silver, amount of bank and Government notes, both covered and uncovered, of the different foreign countries, published annually in the reports of this Bureau, are obtained directly from the governments of such countries by the representatives of the United States accredited to them.

A list of the interrogatories, covering the points on which information is sought from the governments of foreign countries, is sent yearly to the United States ambassadors and ministers through the Department of State, and the replies in the form of reports are forwarded

directly to the Bureau of the Mint.

The questions for the calendar year 1894 were as follows:

(1) What was the amount of gold coined during the calendar year 1894, by denominations and values? What amount was recoined (withdrawn from circulation) during the year, domestic and foreign coins separately? (2) Same questions as to silver.(3) What was the weight and value of the gold used in the industrial arts during

- the year?
- (4) Same question as to silver.
  (5) What was the import and export of gold during the calendar year 1894? Coin, bullion, and ore, as well as their weight and value, should be given separately, if possible.

(6) Same question as to silver.

- (7) What was the total import of the United States gold coin during the year?
  (8) What was the amount of United States gold coin deposited at the mints and
- (9) What was the weight, expressed in kilograms fine, and the value of the gold produced from the mines of the country during the calendar year 1894?
- (10) Same question as to silver. In answering this interrogatory state whether the value given is commercial or coining value.
- (11) What were the weight and value of the output of gold from the refineries of the country during the year?

(12) Same question as to silver.
(13) What, approximately, was the stock of gold coin and bullion in the country at the close of the calendar year 1894?

- (14) Same question as to silver.(15) What was the amount of Government notes outstanding at the end of the year 1894?
- (16) What was the amount of bank notes outstanding at the end of the year 1894? (17) What was the amount of uncovered Government notes at the end of the year 1894?
- (18) What was the amount of uncovered bank notes at the end of the year 1894? (19) What is the actual currency of the country—gold and silver, or inconvertible paper?
- (20) Is gold at a premium as compared with the actual currency of the country; and if it is, what was the average premium during the year 1894\*

(21) Were any laws passed during the year 1894 affecting the coinage, issue, or legal-tender character of the metallic or paper currency? If so, please transmit copies of the same.

(22) Is there a report published of the operations of the mint? If so, please for

ward a copy of the same.

It is usual for this Bureau to supplement the information received through our foreign representatives by other statistical data obtained

from printed documents, both official and nonofficial.

The Director hereby expresses his acknowledgments to the senders of the following publications: The Twenty-fifth Annual Report of the Deputy Master of the Royal Mint, 1894, London, 1895; London Bankers Magazine, 1895; Journal of the Statistical Society, London, 1895; Jour nal of the Institute of Bankers, London, 1895; Board of Trade Journal, London, 1895; Government of India, Financial Statement, 1894-95, Calcutta, 1895; Financial and Commercial Statistics of British India, Calcutta, 1895; Report of the Head Commissioner of Paper Currency, Calcutta, to the Secretary of the Government of India, for the year 1894-95, Calcutta, 1895; Accounts relating to the Trade and Navigation of British India for the fiscal year 1894-95, Calcutta, 1895; Report of the Administration of Mints at Bombay and Calcutta for the year 1894-95, Simla, 1895; Annual Report of the Secretary of Mines of Victoria during the year 1894, Melbourne, 1894; the Australian Insurance and Banking Record, 1895; Broken Hill Proprietary Company, Limited, New South Wales, reports, etc., for half year ending May 31, 1895; Report of the Imperial Mint of Japan for the year ending March 31, 1895, Hyogo, 1895; República Mexicana, Noticias del Movimiento Maratimo en el Año Fiscal de 1893 á 1894, Mexico, 1895; República Mexicaua, Exportaciones en el Año Fiscal de 1893 à 1894, Mexico, 1895; Amonedaciones é Introducciones de Metales Preciosos á la Casa de Moneda, Año Fiscal de 1893 á 1894, Mexico, 1894; Zeitschrift für Berg-Hütten und Salinen-Wesen im Preussischen Staate, Jahrgang 1895, Berlin, 1895; Glückauf, Berg-und-Hüttenmännische Wochenschrift, Essen, 1895; Bulletin de Statistique et de Législation Comparée, Paris, 1894; Revue des Banques, Paris, 1894; Bulletin Russe de Statistiqué Financière et de Legislation, St. Petersburg, 1895; Annales des Mines, Paris, 1895; Algemeen Verslag van het Münt College, over 1894, Amsterdam, 1895.

For special information kindly furnished the Bureau, the Director desires to express his personal obligations to the following gentlemen: Hon. Horace Seymour, deputy master of the royal mint, London; Hon. George Anderson, deputy master of the mint, Melbourne, Australia; Hon. J. H. W. Hart, assistant secretary of the government of India; Mr. J. Stavoli, chief of the bureau of statistics, Mexico; to the chancellor of the exchequer, Russia; the directors of the mints of Japan, the Netherlands, Paris, Berlin, Madrid, Vienna, and Kremnitz; Mr. Augustus Sauerbeck, London; Mr. Ottomar Haupt, Paris, and Mr.

Fourier de Flaix, Paris.

The replies to the interrogatories, which are given in full in the Appendix (XLVI¹) to this report, are indicated by the numbers of the questions.

In the list of questions propounded to foreign Governments for the calendar year 1894 were the following:

What was the total import of United States gold coin during the year, and What was the amount of United States gold coin deposited at the mints and melted?

The following table shows the countries from which answers to these two interrogatories were received, the amount of United States gold coin imported by them, and the value of the United States gold coin melted at their mints.

Countries.	Amount imported.	Amount melted.
Austria-Hungary	\$29, 092, 890	1 \$29, 092, 890
Costa Rica	10, 000	
Denmark	250, 000	
Germany	21, 717, 799	3, 667, 662
Japan	20	
Total	51, 070, 709	32, 760, 552

<sup>1\$23,373,821</sup> deposited at Vienna mint in 1893, and \$5,719,069 at Kremnitz mint in 1894.

The imports and exports of the precious metals of the principal countries of the world during the calendar year 1894 is exhibited in the following table. The information relating to the United States was compiled by the Bureau of Statistics, and that to the remaining countries was received through representatives of the United States in them.

Imports and Exports of the Precious Metals of the Principal Countries of the World, 1894.

# THE MONETARY LEGISLATION AND CURRENCY SYSTEM OF THE UNITED STATES.

#### FROM THE COLONIAL PERIOD TO 1792.

Anterior to the adoption of the Constitution the thirteen American Colonies had, like England, the silver standard, and their metallic circulating medium consisted of foreign coins. The unit of account was the Spanish "milled dollar" or piece of eight (pieza de ocho). about 1775, however, accounts were kept in pounds, shillings, and pence—a pound consisting then, as now, of 20 shillings, and a shilling of 12 pence "Colonial" or "pound currency," 1331 pounds of which were equal to 100 pounds sterling. Four pounds "Colonial currency" were, therefore, equal to 3 pounds sterling. This par of the Colonial and the sterling pound was established by the fact that the Spanish piaster, or milled dollar, was worth, in the Colonies, 6 shillings, while in England it was valued at only 43 shillings. Calculated in accordance with the legal weight and fineness of the Spanish silver piaster (up to 1772, 84) pieces from the gross Castilian marco 0.909722 fine), the "pound currency" was a quantity of 82.0699660 grams, or 1,296.503715 grains of fine silver.

Besides the Spanish milled dollar there was a variety of other foreign coins in circulation, but in keeping accounts the pound and the shilling come next in order of common usage to the dollar. The method by which the Colonial composite system of current coins was regulated consisted in coinage tariffs, so much in vogue in early European monetary history. Such a tariff, issued in 1750, valued the ounce of silver at 6 shillings 8 pence and the Spanish milled dollar at 6 shillings, the guinea at 28 shillings, and the English crown at 6 shillings 8 pence. In this tariff all foreign coins were valued in proportion to the Spanish piece of eight, it being considered that many and great inconveniences would arise in case any coined silver or gold, or English half pence and farthings, should pass current at any higher rate than in just proportion to that piece. The shilling was stamped by some of the colonies and constituted a large part of the money in circulation. It, however, varied greatly in value in the different Colonies. Thus, the Spanish dollar equaled 5 shillings in Georgia; 8 shillings in North Carolina and New York (12½ cents); 6 shillings in Virginia, Connecticut, New Hampshire, Massachusetts, and Rhode Island (163 cents); 7 shillings 6 pence in Maryland, Delaware, Pennsylvania, and New Jersey; 32 shillings 6 pence in South Carolina. This accounts for the present reckoning of

12½ cents to a "shilling" in New York, Ohio, etc., and of  $16\frac{2}{3}$  cents in New England and Virginia.

The following coinage tariff was published in 1776 in the report of

a special committee, appointed in April of that year:

Description.		tht.	Valué.	
English guinea French guinea		Grs. 6 5	\$4. 66 4. 62	
Johannes		0	16. 00	
Haif johannes	1	0	8. 00 3. 66	
French pistole	. 4	4	3, 50	
MoidoreEnglish crown		18	6. 00 1. 11	
French crown			1.11,	

This same tariff rated gold bullion at \$17 per ounce, troy weight, and sterling silver at \$1.11½ per ounce.

The Spanish dollar, with which this comparison was made, was itself not unfrequently below the legal weight, and therefore varied in value.

If the prices mentioned in the coinage tariff of 1776 were of full weight, the ratio there established was the English ratio of 1 to 15.21. The ratio for bullion was not materially different.

The tariff of 1776 had been in operation six years when the Colonies began to feel keenly the difficulties caused by the variety of coins constituting their metallic circulating medium, as well as its injurious

effects on business and on the methods of keeping accounts.

The need of a special American coinage was frequently expressed, and in 1782 (15th of January) Robert Morris, the Superintendent of Finance, at the request of a committee of the Congress of the Confederation, submitted a scheme for a national coinage and for the establishment of an American mint, which met with its approval. Morris's report is here given in full:

COINAGE SCHEME PROPOSED BY ROBERT MORRIS, SUPERINTENDENT OF FINANCE.

[From MS. letters and reports of the Superintendent of Finance, No. 137, volume 1, pages 289-300.]

Office of Finance, January 15, 1782.

SIR: Finding by the act of the United States in Congress, of the seventh instant, that I am instructed to prepare and report a table of rates at which the different species of foreign coins most likely to circulate within the United States shall be received at the Treasury, I have been induced again to turn my attention to an object which has employed my thoughts very frequently, and which would have long since been submitted to Congress, had I not been prevented by other business, and much delayed by the things, relating to this business, which depended upon others. I shall now pray leave to deliver my sentiments somewhat at large on this subject.

The United States labor under many inconveniences, and even disadvantages, which may

The United States labor under many inconveniences, and even disadvantages, which may at present be remedied; but which, if suffered to continue, would become incurable, and lead to pernicious consequences. It is very fortunate for us, that the weights and measures used throughout America are the same; experience has shown in other Countries, that the efforts of the Legislator to change Weights and Measures, altho fully seconded by the more enlightened part of the community, have been so strongly opposed by the popular habits and prejudices, that ages have elapsed without producing the desired effect. I repeat therefore that, it is happy for us to have throughout the Union, the same ideas of a mile and an inch, a Hogshead and a quart, a pound and an ounce. So far our commercial dealings are simplified, and brought down to the level of every capacity.

With respect to our money the case is very widely different. The ideas annexed to a pound, shilling, and a penny, are almost as various as the States themselves. Calculations are therefore as necessary for our inland commerce, as upon foreign exchanges; and the commonest things become intricate where money has anything to do with them. A Farmer in New Hampshire, for instance can readily form an idea of a bushel of wheat in South Carolina, weighing sixty pounds, and placed at one hundred miles from Charleston; but if he were told that in such situation it is worth twenty-one shillings and eight pence, he would be obliged to make many inquiries, and form some calculations before he could know that this sum meant, in general, what he would call four shillings; and, even then he would have to enquire what kind of coin that four shillings was paid in, before he could estimate it in his own mind according to the ideas of money which he had imbibed.

Difficulties of this sort do not occur to farmers alone, they are perplexing to most

Difficulties of this sort do not occur to farmers alone, they are perplexing to most men, and troublesome to all, it is however, a fortunate circumstance, that money is so much in the power of the Sovereign, as that he can easily lead the people into new ideas of it; and even if that were not the case, yet the loose state in which our currency has been for some years past, has opened the way for receiving any impressions on that subject. As we are now shaking off the inconveniences of a depreciating medium, the present moment seems to be that, in which a general currency can best be established, so as that in a few months the same names of money will mean the

same things, in the several parts of the United States.

Another inconvenience, which admits of the same easy remedy, and which could, indeed, be cured by the very same act, is the want of a legal tender. This is as necessary for the purposes of jurisprudence, as a general currency is for those of commerce. For although, there is a great impropriety not to say injustice, in compelling a man to receive a part of his debt in discharge of the whole; yet it is both just and proper that the law should protect the honest debtor who is willing to pay, against the vexatious suits of an oppressive creditor, who refuses to receive the full value.

The nature, value and use of money have always occasioned strong temptations to the commission of Fraud; and of consequence the practice of counterfeiting is

coeval with that of coining.

No Government can guard its subjects entirely against the wicked Ingenuity which has been exercised in this respect; But it has always been the object of every wise government to take all the precautions against it which are within the compass of human ability. These precautions will be most effectual where the coins are few and simple; because they, by that means, become familiar to all ranks and degrees of men; but where the coins are so numerous that the knowledge of them is a kind of science, the lower order of citizens are constantly injured by those, who carry on the business of debasing, sweating, clipping, counterfeiting and the like. It is therefore to be lamented that we have so many different coins in the United States. It is not necessary to mention what is in every bodies mouth, that the precious metals were first used as Bullion, and that the inconvenience of weighing and the

It is not necessary to mention what is in every bodies mouth, that the precious metals were first used as Bullion, and that the inconvenience of weighing and the difficulty of assaying, introducing the practice of coining, in order that the weight and fineness might be known at the first view, and of consequence the value be instantly ascertained. It is equally unnecessary to observe, that the great privilege of declaring this value, by particular marks, has among all nations been vested, exclusively in the sovereign. A trust so important could not indeed be vested any where else, because the danger of abusing it was too great; and history informs us, that Sovereigns themselves have not on this occasion behaved with that integrity, which was alike due to their subjects and to themselves, to the interests of the people, and to their own personal glory.

Experience has already told us, that the advantage of Gold as a coin, is in this country very considerably diminished; for every distinct piece must be weighed

before it can be safely received.

Both Gold and silver coins are indeed preferable in one respect to common Bullion, that the standard is presumed to be just, and consequently they are received without the delays and expenses of assaying. It must however be remembered, that they are foreign Coins, and of course we are not only exposed to the tricks of individuals but should it suit the Interest or convenience of any sovereign to make base money for us, there is nothing to prevent it. If for instance, the king of England, or any of his Birmingham artists, should coin Guineas worth but sixteen shillings sterling our citizens would readily and freely receive them at twenty-one shillings sterling. It is my duty to mention to Congress information I have received, that Guineas of base metal are coined at Birmingham so well, as to escape any common attention. Now there can be no doubt that every such Guinea received here, would be a national loss to us, of an English crown. How much we suffer in this way at present, it is impossible to estimate. What I have already had the honor to observe contains some of the reasons, why it appears to me highly necessary that an American coin should be adopted without delay, and to these reasons it may be added that there is

a want of small money for the common occasions of trade and that it is more felt by our Soldiery, than any other persons. For the little pay which they do receive, being either in gold or at best in dollars, the sutlers and others with whom they have dealings, continually take the advantage of their want of change, and rate the prices of their goods accordingly.

Shortly after my appointment, finding that there was a considerable quantity of public Copper at Boston, I ordered it round to this place. It has safely arrived, and will when coined amount to a considerable sum. The necessary machinery of a mint can be easily made, and there are persons who can perform the whole business. I must pray leave, therefore, to submit to Congress, some few more particular

remarks on this subject, as introductory to a plan for an American coin.

Although most nations have coined Copper, yet that metal is so impure that it has never been considered as constituting the Money Standard. This is affixed to the two precious metals, because they alone will admit of having their intrinsic value precisely ascertained; but nations differ very much in the relation they have established between Gold and Silver. In some European countries an ounce of pure Gold passes for fifteen ounces of pure Silver; in others for fourteen. In China it passes for much less. The standard therefore, which is affixed to both metals is in reality affixed to neither. In England Gold is to Silver nearly in the proportion of one to fifteen, and in France nearly of one to fourteen. If a man carries fourteen ounces of Gold from France to England, he receives two hundred and ten ounces of Silver which in France purchases fifteen ounces of Gold, so that he gains on that exchange one ounce of Gold. In like manner he who carries from England fourteen ounces of

Silver to France, receives one ounce of Gold, which in England purchases fifteen ounces of Silver, wherefore he gains on that exchange one ounce of Silver. If it be then supposed that the coins of these two countries were alike pure, it must follow that in a short time all the Gold coin of full weight would be in England; and all the Silver coin of full weight in France, But the light Silver circulating in England and the light Gold in France, the real standard of coin in each would be different from the legal, and seek a medium of fourteen and an half of Silver for one of Gold, altho' the legal standard might still be in the one place fifteen, and in the

other fourteen.

The demand which commerce might make for any one of the precious metals in preference of the other, would vary this real standard from time to time, and in every payment a man would get more or less of real value for his debt, according as he was paid in the coin of greater or lesser value, in relation to the real standard. If, for instance, the debt were contracted when the Silver was to Gold, as one to fifteen, and paid when as one to fourteen; If the debt were paid in Silver he would gain one thirtieth, and if in Gold he would lose one thirtieth. In England the money standard is rather affixed to Gold than to silver, because all payments are made in the former, and in France it is rather affixed to Silver than to Gold.

Arguments are unnecessary to shew that the scale by which everything is to be measured ought to be as fixed as the nature of things will permit of. Since therefore, a money standard affixed to both the precious metals will not give the certain scale, it is better to make use of one only. Gold is more valuable than Silver, and so far must have the preference, but it is from that very circumstance the more exposed to fradulent practices. Its value rendering it more portable is an advantage, but it is an advantage which paper possesses in a much greater degree, and of consequence the commercial nation of England has had recourse to paper for the purposes of its Trade; although the mass of circulating Coin is Gold. It will always be in our power to carry a paper circulation to every proper extent. There can be no doubt therefore, that our money standard ought to be affixed to Silver. But Silver is liable like everything else, to a change of value, if there is a demand for it, to export, the value will rise, if the contrary it will fall, and so far it cannot be considered as a fixed measure of value. Before this objection be considered it will be proper to make a few reflections on another part of the present subject, but in this place I remark, that if the objection cannot be removed we must not suffer it to preponderate, because it weighs alike against every other metal.

To coin money is a certain expense, and of course it is an expense which must be borne by the people. In England the coin when melted, will sell as Bullion for just as much as its weiligt inother coin. The expense of coinage is paid by the Crown, and of course it is raised by taxes from the people. In France the Coinage instead

of being expensive, yields a profit.

The price given for metal at the mint is about eight per cent. less than the same quantity will yield when coined at the French Standard; both of these methods are liable to objections. When commerce demands an exportation of Bullion from Eugland, the Coin of the kingdom goes out in common with others; this increases of course the national expense of coinage. Laws to prevent the exportation or importation of anything so valuable as money, are always nugatory, because they always can be eluded, and, therefore, when private interests requires, they always will be eluded. That the Guineas of England, therefore, are not continually going away, is to be attributed to the extraordinary value affixed to Gold, which has just been

mentioned, and which banishes Silver continually.

In France the people are not liable to this inconvenience, because their Money passing for more than its value in Bullion, Bullion will always be exported in prefthe their coin, and send it for the purchase of their commodities. It would be both impossible and unnecessary to distinguish the true from the false, because both would be of equal intrinsic value; the place at which they were struck would be indifferent to the receiver, of consequence the foreigner who made French coin

would gain by his trade, and the French nation would lose proportionately.

The money paid for coining, or the coinage, of France has, however this advantage, that the Money is a standard which does not fluctuate with the price of Bullion. This coining is as has been said, about 8 per cent. When Bullion is below ninety two, it is carried to the Mint, when above ninety-two to the Broker or Silversmith. The Coin still continues fixed, nor will it bear exportation until Bullion rises to an hundred, when the French Coin would be as liable to exportation as the English. In that case it would be exported on one hand, while on the other no more would have been coined for a considerable period, because to make the 8 per cent coinage it is necessary that the Mint price should be ninety-two. The Coin therefore could not long be exported, if at all, but would soon resume its value. The price of Bullion must float between ninety-two and an hundred, while the Coin would preserve its fixed quality as Money.

Hence then it appears proper, that the price of coining should be defrayed by the coinage, because, first it is natural and proper, that the price should be paid when the benefit is received, and that the citizen in return for the advantage of being ascertained in the value of the medium of commerce by the sovereign, should pay for ascertaining it, just as that he should pay for the fashion of the plate he uses, or the construction of the cart he employs.

Secondly, It is right that money should acquire a value as money, distinct from that which it possesses as a commodity, in order that it should be a fixed rule whereby to measure the value of all other things; and thirdly it is wise to prevent the exportation of the coin, which would involve an unnecessary national expense, and also to prevent the imitation of it abroad, so as to create a national loss; for both which purposes it is proper that the coinage should only defray the expence, without making any considerable profit. The Laws usual in all countries with respect to the money will then fully operate the effect intended.

In order that a coin may be perfectly intelligible to the whole people, it must have

some affinity to the former currency.

This therefore, will be requisite in the present case. The purposes of commerce require that the lowest divisible point of money or what is more properly called the money unit, should be very small; because by that means price can be brought in the smallest things to bear a proportion to the value, and altho' it is not absolutely necessary, yet it is very desirable that money should be increased in a decimal Ratio, because by that means all calculations of Interest, exchange, insurance and the like are rendered much more simple and accurate, and of course more within the power of the great mass of people. Whenever such things require much labor, time and reflection, the greater number who do not know, are made the dupes of the lesser number who do.

The various coins which have circulated in America have undergone different changes in their value, so that there is hardly any which can be considered as a general Standard, unless it be Spanish dollars; these pass in Georgia at five shillings, in North Carolina and New York, at eight shillings, in Virginia and the four Eastern States, at six shillings, in all the other States except South Carolina at seven shillings and as its shiftings, in at the other states except south Carolina at seven sainings and sixpence, and in South Carolina at thirty-two shillings and sixpence. The money unit of a new coin to agree without a fraction with all these different values of a dollar except the last, will be the fourteen hundred and fortieth part of a dollar, equal to the sixteenth hundredth part of a crown; of these units twenty-four will be a penny of Georgia; fifteen will be a penny of North Carolina or New York; twenty will be a penny of Virginia and the four Eastern States; sixteen will be a penny of all the other States except South Carolina, and forty-eight will be thirteen pence of Sonth Carolina. It has been already observed, that to have the money unit very small is advantageous to commerce; but there is no necessity that this money on the present occasion, two copper coins will be proper; the one of eight units, and the other of five. These may be called an eight and a five; two of the former will make a penny proclamation or Pennsylvania money; and three a penny Georgia money; of the latter three will make a penny York money; and four a penny lawful or Virginia money. The money unit will be equal to a quarter of a grain of fine Silver in coined, money: Proceeding therein in coined world world. Silver in coined money: Proceeding thence in a decimal ratio, one hundred would

be the lowest Silver coin and might be called a cent. It would contain twenty-five grains of fine Silver, to which may be added two grains of copper, and the whole would weigh one pennyweight three grains: Five of these would make a quint or five hundred units, weighing five pennyweight fifteen grains; and ten would make a mark or one thousand units weighing eleven pennyweight six grains.

If the mint price of fine Silver be established at 22.237 units per pound; this, being

If the mint price of fine Silver be established at 22.237 units per pound; this, being coined, would be four times 5.760 grains or 23.040 units; the difference is 803 units, and, therefore, the coinage is 803 on 23.040, or somewhat more, than 3.48 per cent., which would be about the experse attending it. A Dollar contains by the best assays which I have been able to get, about 373 grains of fine Silver, and that at the mint price would be 1,440 units. In like manner, if Crowns contain from 414 to 415 grains of fine Silver, they would at the mint price be worth 1,600 units.

When such a Coin shall have been established, the value of all others would be easily ascertained, because nothing more would be necessary than to have them assayed at the mint. The advantage of possessing legal money in preference of any other; would induce people to carry foreign Coin to the mint, until a sufficiency were struck for the circulating medium. The remainder of the foreign Silver, together with the Gold, should be left, entirely to the operations of Commerce as Bullion.

with the Gold, should be left, entirely to the operations of Commerce as Bullion. In the present moment it is by no means of such consequence to establish the relative value of different Coins, as to provide a standard of our own by which in future to estimate them. If the value were now sought they must all be estimated in dollars, because dollars are called for in the several requisitions of Congress. Without noticing the preference, thus given to one foreign Coin over another, it is sufficient to observe, that if a greater alloy should be introduced by the Spanish Government into their dollars our interior Regulations as to money would be overturned, and certainly we have no security that this will not happen. There is not any great inconvenience from leaving matters on their present footing until they can be remedied by the operations of a mint; for it is not to be supposed that all the money raised by Taxes in a State is to be brought out of it. I expect that there will be very little occasion to transport money from place to place. It is much easier to negotiate than to carry it; and if any species of Money is generally received within a State at the same rate in which it is paid in Taxes, there will be no difficulty in expending it at its value. Whenever Money shall be struck by Authority of the United States, then indeed it will be proper to receive in Taxes no other Coin.

If Congress are of opinion with me, that it will be proper to coin Money, I will

If Congress are of opinion with me, that it will be proper to coin Money, I will immediately obey their orders and establish a mint; and I think I can say with safety that no better moment could be chosen for the purpose than the present; neither will anything have a greater tendency to restore public credits, for although it is possible that the new money will at first be received with diffidence by some, yet when it has been fairly assayed it will gain full confidence from all, and the advantage of holding the only Money which can pay debts or discharge Taxes, will soon give it the preference over all, and indeed banish all other from Circulation; whereas, fixing a Relation of value now, on whatever principles attempted, might give offence to the Power whose Coin should in any instance be reduced from its present numerary value among us. These sentiments are submitted with all possible deference to the United States in Congress Assembled in expectation of their further instructions on the subject.

With great Respect I have the honor to be, sir your most obedient and humble servant, 1

ROB. MORRIS.

¹The financial condition of the United States in its early days scarcely comes within the scope of an article on the monetary legislation and currency system of the United States, and yet is a subject so closely related to it and to the life and labors of Robert Morris, Superintendent of Finance, that an account of our general financial situation at that period is but a complement to the history of our monetary legislation at the same time. The following extract from the eulogy by the Hon. John G. Carlisle, Secretary of the Treasury, delivered on the occasion of the dedication of the Old Holland Land Office Building, in Batavia, N. Y., October 13, 1894, finds a very appropriate place here:

finds a very appropriate place here:

"At that time there was no Treasury Department, nor any national executive organization of any kind. Early in 1779 the Continental Congress had appointed a standing committee, of which James Duane was chairman, to superintend the finances, but its functions were not well defined, and its duties, so far as it had any, were loosely and negligently discharged. By September, 1778, financial affairs had fallen into such a condition of confusion and disorder that Congress established five separate bureaus to assist in the management of the Treasury; but these bureaus quarreled with each other, and in 1779 an ordinance was passed establishing what was designated as a Board of Treasury, consisting of three commissioners, not Members of Congress, and two members of Congress, any two of whom had power

Jefferson, like Morris, recommended the decimal system, but advocated the dollar as the unit. It is probable that Mr. Jefferson's Notes on the Establishment of a Money Unit and of a Coinage for the United States were communicated to Congress at the same time as Mr. Morris's letter reproduced above. The document containing them is not dated, but it was presumably written in 1782 or 1783, and is as follows:

MR. JEFFERSON'S NOTES ON THE ESTABLISHMENT OF A MONEY UNIT AND OF A COINAGE FOR THE UNITED STATES.

In fixing the unit of money these circumstances are of a principal importance. 1. That it be of a convenient size to be applied as a measure to the common money

2. That its parts and multiples be in an easy proportion to each other so as to facilitate the Money Arithmetic.

3. That the Unit and its parts or divisions be so nearly of the value of some of the known coins as that they may be of easy adoption for the people.

The Spanish Dollar seems to fulfill all these conditions.

1. Taking into our view all money transactions great and small, I question if a common measure of more convenient size than the dollar could be proposed. The value of 100, 1,000, 10,000 dollars is well estimated by the mind; so is that of the 10th or the hundredth of a dollar. Few transactions are above or below these limits. The expediency of attending to the size of the money Unit will be evident to any one who will consider how inconvenient it would be to a manufacturer or merchant, if instead of the yard for measuring cloth, either the inch or the mill had been made the unit of measure.

2. The most easy ratio of multiplication and division is that by ten. Every one knows the facility of decimal arithmetic. Every one remembers that when learning money arithmetic, he used to be puzzled with adding the farthings, taking out the fours and carrying them on, adding the pence, taking out the twelves and carrying them on; but when he came to the pounds, when he had only tens to carry forward, it was easy

& free from error.

The bulk of mankind are school-boys thro' life. These little perplexities are always great to them. And even mathematical heads feel the relief of an easier substituted for a more difficult process. Foreigners, too who have trade or who travel among us will find a great facility in understanding our coins and accounts from this ratio of subdivision. Those who have had occasion to convert the livres, sols and deniers of the French, the Gilders Stivers and penings of the Dutch, the pounds, shillings, pence and farthings of these several states into each other can judge how much they would have been aided had their several subdivisions been in a decimal ratio. Cartainly in all cases where we are free to chuse between easy and a decimal ratio. Certainly in all cases where we are free to chuse between easy and difficult modes of operation, it is most rational to chuse the easy. The financier therefore in his report well proposes that our coins should be in decimal proportions to one another. If we adopt the dollar for our unit, we should strike four coins, one of gold, two of silver, and one of copper viz

1. A Golden piece equal in value to 10 dollars.

2. The unit or dollar itself, of silver.

to transact business. By the spring of 1780, however, it became evident that the entire financial system must be reorganized upon a more substantial basis, and that there must be such practical management as would secure order in the public accounts and some degree of economy in the public service, or the war would prove a disastrous failure and the Colonies relapse into a more hopeless condition of depend-

ency than ever existed before.

"Almost every financial expedient that the ingenuity of man could devise, except regular and effective taxation, had been resorted to for nearly six years to raise money or procure credit for the prosecution of war, and at last the very verge of national bankruptcy had been reached and it was evidently impossible to proceed a step further in the same direction without a total collapse of the entire financial system, involving, of course, an abandonment of the struggle. The country was smothered to death under a mass of worthless paper currency far more disastrous to the commercial and industrial interests of the people than all the spoilations and devastations committed by the invading enemy. The most discreditable chapters of our history are those which record the repeated and ineffectual efforts of the Continental Congress and the Superintendent of Finance, after he was chosen, to induce the States to raise their respective quotas of money necessary to carry on a war for the establishment of their own independence. The prevailing idea among 3. The tenth of a dollar, of silver also.

4. The hundredth of a dollar of copper.

Compare the arithmetical operations on the same sum of money expressed in this form, & expressed in the pound sterling and its divisions:

		· · · · · · · · · · · · · · · · · · ·
AI	DDITION.	SUBTRACTION.
£ s. 8 13 4 12	d. [Dollars.] $11\frac{1}{2} = 38.65$ $8\frac{3}{4} = 20.61$	$\begin{array}{cccccccccccccccccccccccccccccccccccc$
13 6	$8\frac{1}{2} = 59.26$	$4  1  2\frac{3}{4} = 18.04$
MULTIPI	LICATION BY 8.	Division by 8.
$ \begin{array}{c ccccccccccccccccccccccccccccccccccc$	d. qrs. Dollars.] $11\frac{1}{2} = 38.65$ $8$ $309.2 D$ $8                                    $	[\$\varepsilon\$ s. d. qrs. Dollars.]  \[ \begin{align*} 8 & 13 & 11\frac{1}{2} = 38.65 \\ 20 & & & & & & & & & & & & & & & & & & &
$\frac{1}{20}$ [£]69 11 8		[∞] 1.1.0 <del>1</del>

the people seemed to be that, inasmuch as the war was being prosecuted in opposition to the claim of Great Britain to impose taxes upon them, it would be illogical and inconsistent to impose taxes upon themselves. They preferred to rely upon Continental notes, issued in anticipation of receipts which never came in, and upon bills of credit emitted by the States, which persistently refused to provide funds for their redemption. The several Colonies had been in the habit, long before the Revolution, of issuing their own notes to circulate as money, and therefore the Continental Congress very naturally resorted to the same expedient, and the first notes, amounting to about \$3,000,000, were issued as early as 1775. These notes began to depreciate almost immediately, and before the close of the year 1776 many men were subjected to mob violence, to social and political ostracism, and to imprisonment by the civil and military authorities for refusing to receive them in payment of debts or in exchange for commodities.

"By 1779 depreciation had gone to such an extent that it was no longer safe to buy and sell in the ordinary way, while transactions conducted upon credit were ruinous to the party who rendered services or parted with his property. Barter was the only safe trade, and it is recorded that at one time it was substantially the only kind of trade carried on in the city of Boston. Prices went up so that a pair of shoes cost \$100, and flour sold at prices ranging from \$400 to \$500 per hundredweight. The price of sugar reached \$600 per hundredweight, coffee was \$4 per pound, and wheat \$75 per bushel, and the cost of most articles of necessity rose in the same proportion. General Washington said that a wagon load of money would scarcely buy a wagon load of provisions. But the currency in which payments were made was depreciating with such rapidity that the merchant who sold even at these exorbitant prices was constantly losing money. The injurious effect of a depreciating currency upon the trade of the country is illustrated in the case of a writer of that period, who says that he purchased a hogshead of sugar and sold it at a large profit, but the currency in which he was paid would buy only a tierce. He then sold the tierce at a large profit, but when he used the proceeds of this sale in making another purchase he got only a barrel. R. H. Lee wrote to Thomas Jefferson that the depreciation of money had nearly transferred his whole estate to his tenants, and that the rent of 4,000 acres of land would not pay for 20 bushels of corn, the rent, of course, being payable in money and having been fixed before the depreciation begun.

"Couventions were held in many parts of the country to establish scales of prices at which commodities should be bought and sold, and several States enacted penal

Digitized for FRASER

A bare inspection of the above operation will evince the labour which is occasioned by subdividing the unit into  $20^{\rm ths}$   $240^{\rm ths}$  and  $960^{\rm ths}$  as the English do and as we have done; and the case of subdivisions in a decimal ratio. The same difference arises in making payment. An Englishman to pay £8, 13.11½ must find by calculation what combination of the coins of His country will pay this sum. But an American having the same sum to pay thus expressed 38.65 will know by inspection only that three golden pieces 8 units or dollars 6 tenths and 5 coppers pay it precisely.

3. The third condition required is that the unit, its multiples and subdivisions 5. The third condition required is that the unit, its multiples and supdivisions coincide in value with some of the known coin so nearly, that the people may by a quick reference in the mind estimate their value. If this be not attended to, they will be very long in adopting the innovation, if ever they adopt it. Let us examine in this point of view each of the four coins proposed. I. The golden piece will be  $\frac{1}{3}$  more than a half Joe and  $\frac{1}{3}$  more than a double guinea. It will be readily estimated then by reference to either of them but more readily and accurately as equal to 10 dollars.

2. The unit or dollar is a known coin and the most familiar of all to the mind, of the people. It is already adopted from South to North, has identified our currency and therefore happily offers itself as a Unit already introduced. Our public debt, our requisitions and their apportionments have given it actual and long possession of the place of Unit. The course of our commerce too will bring us more of this than of any other foreign coin, and therefore renders it more worthy of attention. I know of no Unit which can be proposed in competition with the dollar, but the pound: But what is the pound? 1547 grains of fine silver in Georgia; 1289 grains in Virginia, Connecticut, Rhode Island, Massachusetts and New Hampshire; 10314 grains in Maryland, Delaware, Pennsylvania and New Jersey; 9664 grains in North Carolina and New York.

Which of these shall we adopt? To which State give that pre eminence of which all are so jealous? And on which impose the difficulties of a new estimate for their coiu, their cattle and other commodities? Or shall we hang the pound sterling as a common badge about all their necks? This contains 1718% grains of pure silver. It is difficult to familiarise a new coin to a people. It is more difficult to familiarise them to a new coin with an old name. Happily the Dollar is familiar to them all, and is already as much referred to for a measure of value as their respective State

[provincial] pounds.

laws upon the subject. Many merchants and others were punished by imprisonment and by exposure in the pillory for violations of these statutes, and necessarily much ill-feeling was engendered among the people. The whole commercial fabric was in imminent danger of destruction on account of the superabundance of so-called money, and the Government itself, which possessed unlimited power to issue it, was compelled to retrace its steps or be crushed under the weight or its own paper.

"At this time Continental notes had been issued to the amount of \$160,000,000, or about \$53 per capita, and the depreciation was 30 to 1; that is, \$1 in specie was equal to \$30 in paper currency. By July, 1780, it was 64.12 to 1, and early in the next year the whole miserable system broke completely down, and Congress, with only one dissenting vote, resolved that all debts then due from the United States which had been liquidated according to their value, and all debts which had been, or should thereafter be, made payable in specie should be actually paid in specie or its equivalent at the current rate of exchange between specie and other currency. The total issue of Continental notes up to that date, as nearly as can be ascertained, was about

\$242,000,000 or \$80 per capita.

"But, besides this, the various States had issued large amounts in bills of credit, and there were outstanding large amounts of loan-office certificates and quartermasters' and commissaries' certificates, which greatly aggravated the financial situation. It is said that in 1788 a single Spanish dollar would legally discharge a debt of \$2,400 in the State of Virginia. The resolution of Congress was absolutely necessary in order to save even the semblance of public credit, and although the Continental notes continued for a short time to circulate in some parts of the country, especially in the South, they passed for merely a fraction of their nominal value. It was evident to every one at all acquainted with public affairs that the finances of the country must at once be placed in more competent hands and conducted with more vigor and economy than had heretofore characterized their management or that the war for independence would be brought to a speedy termination by the complete subjugation of the Colonies. The opinion was quite prevalent, both in America and Europe, that the struggle could be maintained but a little while longer, and even General Washington had almost abandoned all hope of success.

"George III and his ministers relied for success more upon the depressed financial condition of the United States than upon the aggressive operations of their army

<sup>\*</sup> The "Half-Joe," or piece of 6400 rees was a Portuguese coin 22 carats fine weighing one half ounce of Portugal equal to about 221 grains Troy.

3. The tenth will be precisely the Spanish bit or half pistreen in some of the States, and in others will differ from it but a very small fraction. This is a coin perfectly familiar to us all. When we shall make a new coin then equal in value to this, it

will be of ready estimate with the people.

4. The hundredth or copper will be very nearly the penny or copper of New York and North Carolina, this being  $\frac{1}{2^{10}}$  of a dollar, and will not be very different from the penny or copper of New Jersey, Pennsylvania, Delaware and Maryland, which is  $\frac{1}{2^{10}}$  of a dollar. It will be about the medium between the old and the new coppers of these States and therefore will soon be substituted for them both. ginia coppers have never been in use. It will be as easy therefore to introduce them there of one value as of another. The copper coin proposed will be nearly equal to three-fourths of their penny which is the same with the penny lawful of the Eastern States. A great deal of small change is useful in a State, and tends to reduce the prices of small articles. Perhaps it would not be amiss, to coin three [two] more pieces of silver, one of the value of five-tenths or half a dollar, one of the value of two tenths which would be equal to the Spanish pistreen, and one of the value of 5 coppers, which would be equal to the Spanish half bit. We should then have four silver coin viz:

The Unit or Dollar
 The half dollar or five tenths [omitted in the printed copy]
 The double tenth, equal to 2 or \( \frac{1}{2} \) of a dollar to a pistreen
 The tenth, equal to a Spanish bit

5. The five copper piece equal to 05 or  $\frac{1}{20}$  of a dollar or to the half bit.

The plan reported by the financier is worthy of his sound judgment. however of objection in the size of the unit. He proposes that this shall be the 1440th part of a dollar; so that it will require 1440 of his units to make them the one before proposed. He was led to adopt this by a mathematical attention to our old currencies, all of which this unit will measure without leaving a fraction. But as our object is to get rid of those currencies, the advantage derived from this coincidence will soon be past. Whereas the inconveniences of this unit will forever remain, if they do not altogether prevent its introduction. It is defective in two of the three requisites of a money Unit.

. It is inconvenient in its application to the ordinary money transactions. dollars will require 8. figures to express them, to wit. 14.400.000. A horse or bullock of 80 dollars value will require a notation of six figures to wit 115.200 units. As a money of account this will be laborious even when facilitated by the aid of decimal arithmetic. As a money As a common measure of the value of property it will be too minute to be comprehended by the people. The French are subjected to very laborious calculations, the livre being their ordinary money of account, and this but between the 1 & 1 of a dollar. But what will be our labours should our money of account be 1440 of a dollar only?

and navy. This was the condition of affairs when Congress, on the 20th of February, 1781, unanimously chose Robert Morris to be Superintendent of Finance. His great ability and credit as a merchant, his intimate acquaintance with public matters generally, and especially his familiarity with the financial operations which had reduced the Government to such a deplorable state of poverty and helplessness constituted qualifications for this laborious and responsible position possessed by no other man in the country. The selection at once revived the hopes of the despondent, stimulated the courage of the wavering, and confirmed the faith of the friends of liberty in every part of the world. But he did not accept at once. He knew the magnitude of the task he was expected to perform, and he knew it could not be accomplished unless he was afforded opportunities and invested with powers commensurate with the nature of the duties imposed upon him. He therefore wrote a letter to the President of Congress in which he made the acceptance of the office dependent upon two conditions: First, that he should not be required to abandon his commercial pursuits or dissolve his existing connections with certain mercantile establishments; and secondly, that he should have the absolute power to appoint Upon this point he was very emphatic. and remove all officials serving under him.

"Congress having, after some hesitation, conformed to the wishes of Morris in respect to these two matters, he accepted the office on the 14th day of May, 1781, but he did not enter fully upon the discharge of his duties until October following. In June, 1781, before he had taken charge of his office, he secured the repeal of the embargo law, believing, to use his own language, that 'commerce should be perfectly free and property sacredly secure to the owner.' He applied himself with zeal and determination to the difficult task imposed upon him, and the result of his labors soon began to be felt in all the affairs of the Government at home and abroad, and in all the business transactions of the people. The extent and variety of the powers vested in him and the number and character of the various kinds of business

2. It is neither equal nor near to any of the known coins in value. If we determine that a dollar shall be our Unit, we must then say with precision what a dollar is. This coin as struck at different times, of different weights and fineness is of different values. Sir Isaac Newton's Assay and representation to the lords of the treasury in 1717 of those which he examined make their values, as follows:

	Penny- weights.	Grains.	Containing grains of pure silver,
The Seville piece of eight	17	12	387
The Mexico piece of eight	17	105	385 <u>‡</u>
The Pillar piece of eight	17	9	385≩
The new Seville piece of eight	14		308 <sub>70</sub>

The financier states the old dollar as containing 376 grains of fine silver and the new 365 grains. If the dollars circulating among us be of every date equally, we should examine the quantity of pure metal in each and from them form an average for our Unit. This is a work proper to be committed to Mathematicians as well as merchants and which should be decided on actual and accurate experiment

The quantum of alloy is also to be decided. Some is necessary to prevent the coin om wearing too fast. Too much fills our pockets with coppers instead of silver. from wearing too fast. The silver coins assayed by Sir Isaac Newton varied from 1½ to 76 pennyweight alloy in the pound troy of mixed metal. The British standard has 18 dwt. The Spanish coins assayed by Sir Isaac Newton have from 18 to 19½ dwt. The new French crown has in fact 191, though by edict it should have 20 dwt, that is 12. The taste of our countrymen will require that the [their] furniture plate should be as good as the British standard. Taste cannot be controlled by law. Let it then give the law in a point, which is indifferent to a certain degree. Let the Legislatures fix the alloy of furniture plate at 18 dwt. the British standard, and Congress that of their coin at one ounce in the pound, the French standard. This proportion has been found convenient for the alloy of gold coin and it will simplify the system of our mint to alloy both metals in the same degree. [The coin too being the least pure will be less easily melted into plate.] These reasons are light indeed and of course will only weigh, if no heavier ones can be opposed to them.

The proportion between the values of gold and silver is a mercantile problem altogether. It would be inaccurate to fix it by the popular exchanges of a half Joe for eight dollars, a Louis for 4-French crowns or five Louis for 23 dollars. The first of eight dollars, a Louis for 4-French crowns or five Louis for 23 dollars. The first of these would be to adopt the Spanish proportion between gold and silver; the second the French, the third a mere popular barter, wherein convenience is consulted more

transacted by him on the public account have no parallel in the history of any other financial officer in the world. He was, in fact, the autocrat of finances. He engaged in a great number of mercantile enterprises on account of the Government, buying and selling goods here and in other countries, and using the proceeds in the public service. Congress had declared that the obligations of the Government should be paid in specie, or its equivalent, but the Government had no specie and no visible means of procuring it. It is true that considerable specie, or hard money, as it was then called, had been brought into the country and disbursed by the British and French armies, but it had not reached the Treasury. The worthless paper currency was now rapidly disappearing from circulation, and Morris took measures to obtain a supply of specie from Havana and other places, which he accomplished to a very considerable extent by buying and selling goods. In a short time the people began to realize the benefits of that inflexible law of trade and finance under which sound money in sufficient quantities to transact all the business of the country will always make its appearance to take the place of unsound money if the latter can be got out of circulation.

"It was not long until specie was circulating in all the channels of trade, and from that time to the close of the Revolutionary war all the business of the Government was conducted upon a specie basis. There was then no American dollar nor American coin of any denomination. The principal coin in use was the Spanish dollar, the Seville piece of eight, and the Mexican piece of eight, each of which was rated at 4 shillings 6 pence sterling, and the pillar piece, which was rated at 4 shillings 6 pence 3 farthings. But the actual unit of account in America was an imaginary dollar, supposed to contain 24% grains of fine gold. There was, in fact, no such coin, and never had been, but this quantity of fine gold was apparently, by common consent, recognized as the standard by which the value of the various kiuds of currency in circulation was measured and by which exchange was regulated."

than accuracy. The legal proportion in Spain is 16 for 1. in England  $15\frac{1}{3}$  for 1. in France [uncertain in the U.S. in the printed copy,] 15 for 1. The Spaniards and English are found in experience to retain an over proportion of gold coins and to lose their silver. The French have a greater proportion of silver. The difference at market has been on the decrease. The financier states it at present at 14½ for 1.

Just principles will lead us to disregard legal proportions altogether; to enquire into the market price of gold in the several countries with which we shall principally be connected in commerce, and to take an average from them. Perhaps we might with safety lean to a proportion somewhat above par for gold, considering our neighbourhood and commerce with the sources of the coins and the tendency which the high price of gold in Spain has to draw thither all that of their mines, leaving silver principally for our and other markets. It is not impossible that 15 for 1 may be found an eligible proportion. I state it however as conjectural only

As to the alloy for gold coin, the British is an ounce in the pound; the French, Spanish and Portuguese differ from that only from 1 of a gram [to a grain] and a half. I should therefore prefer the British, merely because its fraction stands in a more simple form and facilitates the calculations into which it enters.

Should the unit be fixed at 365 grains of pure silver gold at 15 for 1, and the alloy of both be one-twelfth the weight of the coins will be as follows:

	Grains.		Grains.			Dwt.	
The gold piece cont'g	243\frac{1}{2} pure	metal	22.12 of	alloy will wei	igh	11:	145
The unit or dollar	365	"	33. 18			16:	14.18
<sup>1</sup> The half doll. or 5-tenths.	1824	"	16.59	"		8:	7.09
The fifth or pistreen	73	"	o. 63	46		3:	7.63
The tenth or bit	$36\frac{1}{2}$	"	3.318	"		1:	15.818
The twentieth or half-bit.	$18\frac{1}{4}$	"	1.659	"			19.9

The quantity of fine silver, which shall constitute the unit being settled and the proportion of the value of gold to that of silver; a table should be formed from the assay before suggested, classing the several foreign coins according to their fineness, declaring the worth of a penny weight or grain in each class and that they shall be lawful tender at those rates if not clipped or otherwise diminished, and where diminished offering their value for them at the mint, deducting the expence of recoinage. Here the legislatures should co-operate with Congress in providing that no money be received or paid at their treasuries or by any of their officers or any bank but on actual weight; in making it criminal in a high degree to diminish their own coins and in some smaller degree to offer them in payment when diminished.

That this subject may be properly prepared and in readiness for Congress to take up at their meeting in November, something must now be done. The present session drawing to a close they probably would not choose to enter far into this undertaking themselves. The Committee of the States however, during the recess, will have time to digest it thoroughly, if Congress will fix some general principles for their government.

Suppose then they be instructed—

To appoint proper persons to assay and examine with the utmost accuracy practicable the Spanish milled dollars of different dates in circulation with us.

To assay and examine in like manner the fineness of all the other coins which may be found in circulation within these states.

To receive and lay before Congress the reports on the result of these assays.

To appoint also proper persons to enquire what are the proportions between the values of fine gold and fine silver at the markets, of the several countries with which we are or probably may be connected in commerce and what would be the proper proportion here, having regard to the average of their values at those markets and to other circumstances and to report the same to the Committee to be by them laid before Congress.

To prepare an Ordinance for establishing the Unit of money within these states; for subdividing it and for striking coins of gold, silver and copper on the following

principles

That the money unit of these States shall be equal in value to a Spanish milled. dollar containing so much fine silver as the assay before directed shall show to be contained, on an average in dollars of the several dates circulating with us.

That this Unit shall be divided into tenths and hundredths,

That there shall be a coin of silver of the value of an Unit Oue other of the same metal of the value of one tenth of an unit One other of copper of the value of the hundredth of an unit That there shall be a coin of gold of the value of ten Units, according to the report before directed and the judgment of the Committee thereon.

That the alloy of the said coins of gold and silver shall be equal in weight to one eleventh part of the fine metal

<sup>&</sup>lt;sup>1</sup> This is omitted in the printed copy.

That there be proper devices for these coins

That measures be proposed for preventing their diminution and also their currency

and that of any others when diminished

That the several foreign coins be described and classed in the said ordinance, the fineness of each class stated and its value by weight estimated in Units and decimal parts of an Unit, and that the said draught of an Ordinance be reported to Congress at their next meeting for their consideration and determination

The proposals of Morris and Jefferson were, however, not carried into effect, and the matter remained in this unsettled state until May 13, 1785, when the Grand Committee on the Money Unit made its report. That report is couched in the following terms:

REPORT OF A GRAND COMMITTEE ON THE MONEY UNIT.

1785.

[From MS. Reports of the Committee on Finance of Continental Congress, volume 26, pages 537-560.

PROPOSITIONS RESPECTING THE COINAGE OF GOLD, SILVER AND COPPER.

1st. The value of Silver compared with Gold.

2d The weight or size of the several pieces of money that are to be made,

3d The Money Arithmetic or the mode in which it is to be counted and

4th The Charges of Coinage are to be considered.

1. In France I grain of pure Gold is counted worth 15 grains of silver. In Spain 16 grains of Silver are exchanged for 1 of Gold and in England 15th. In both of the Kingdoms last mentioned Gold is the prevailing Money, because Silver is under valued. In France Silver prevails. Sundry advantages would arise to us from a system by which silver might become the prevailing money. This would operate as a bounty to draw it from our neighbours by whom it is not sufficiently esteemed. Silver is not exported so easily as gold and it is a more useful metal.

Certainly our Exchange should not be more than 15 gr of silver for 1 of Gold. It has been alledged by the late Financier that we should not give more than 14½. Perhaps 14¾ would be a better medium considering the quantity of Gold that may

be expected from Portugal.

2 The weight, size or value of the several pieces of money that shall be made or rather the most convenient value of the meney unit is a question not easily determined considering that most of the citizens of the U.S. are accustomed to count in Pounds Shillings and Pence and that those sums are of different values in the different states, hence they convey no distinct ideas. The money of the U.S. should be equally fitted to all. The late Financier has proposed to make gold and silver Pieces of particular weight, and there is a very simple process by which the imaginary money of the several States may be translated into such pieces or vice versa. He proposes that the Money Unit be one quarter of a grain of pure silver; that the smallest coin be of Copper which shall be worth 5 of those Units. The smaller silver coin to be worth 100 units, another to be worth 500, and another of 1000 and thus increasing decimally.

The objections to this plan are that it introduces a coin unlike in value to anything now in use; It departs from the national mode of keeping accounts, and tends to preserve inconvenient prejudices whence it must prevent national uniformity in

accounts; a thing greatly to be desired.

Another plan has been offered, which proposes, that the money unit be one dollar; and the smallest coin is to be of copper, of which 200 shall pass for one dollar. This plan also proposes, that the several pieces shall increase in a decimal ratio; and that all accounts be kept in decimals, which is certainly by much the most short and simple mode.

In favour of this plan it is urged, that a dollar, the proposed unit, has long been in general use; its value is familiar. This accords with the national mode of keeping accounts, and may in time produce the happy effect of uniformity in counting money

through out the Union.

3. The money Arithmetic, though an important question, is one that can admit of

little dispute. All accomptants must prefer decimals.

4. What is the best mode of defraying the expense of coinage? Different nations have adopted different systems. The British value their Silver when coined, no higher than Bullion; Hence it follows that the expense of the mint, increasing the civil list, must be paid by a general tax; and tradesmen are disposed to work up the current coin, by which the tax is increased and continued. In some other countries Silver or Gold when coined, are valued above the price of Bullion; whence trades men are discouraged from melting or working up the current coin, and the mint

is rather profitable than burdensome. Certainly there are good and conclusive reasons, why we should value the national coin above the price of Bullion; but there is a certain point beyond which we may not proceed, lest we encourage counterfeits or private imitations of our coin. It has been proposed to make a difference of  $2\frac{1}{2}$  P. C<sup>t</sup> nearly as an allowance for the Coinage of Gold and of 3.013 P. C<sup>t</sup> for the coinage of silver. It is probable that 3 P. C<sup>t</sup> would more than defray the expense of coining silver, in which case it would be a temptation to private imitation and would operate against the free circulation of the money as being valued too high. It is to be remembered that silver coin ought to be encouraged and probably 2 P. C<sup>t</sup> or  $2\frac{1}{4}$  P. C<sup>t</sup> would be a proper difference between silver coined and Bullion; The same difference to be made in the price of Gold. If this does not fully pay the expences of the mint there will be a much larger gain on the coinage of copper, and if there should remain a small balance against the mint its operation will not be unfavourable

The Coinage of Copper is a subject that claims our immediate attention. From the small value of the several pieces of copper coin this medium of exchange has been too much neglected. The more valuable metals are daily giving place to base British half-pence and no means are used to prevent the fraud. This disease which is neglected in the beginning because it appears trifling may finally prove very destructive to commerce. It is admitted that Copper may at this instant be purchased in America at \(\frac{1}{2}\) of a Dlr. the pound. British half-pence made at the Tower are 48 to the pound. Those manufactured at Birmingham and shipped in thousands for our use are much lighter and they are of base metal, it can hardly be said that 72 of them are worth a pound of copper. Hence it will follow that we give for British half-pence about six times their value. There are no materials from which we can estimate the weight of half-pence that have been imported from Britain since the late war, but we have heard of sundry shipments being ordered, to the nominal amount of 1,000 guineas, and we are told that no Packet arrives from England by which we are not accommodated with some hundred weight of base half-pence. It is a very moderate computation which states our loss on the last twelve months at 30 thousand dollars by the commerce of vile coin. The whole expense of domestic coinage would remain in the country.

The following forms of money are submitted:

·	Dirs.
1 Piece of Gold of	5.
1 Do of silver of	11
1 Do	$\frac{1}{2}$ or . 5
1 Do	$ ilde{1}$ or $.25$
1 Do	$\frac{1}{10}$ or . 1
1 Do	or . 05
1 Piece of copper of	τ <sup>5</sup> π or . 01
1 Do	$\frac{1}{200}$ or . 005

The quantity of pure silver being fixed that is to be in the Unit or Dlr and the relation between Silver and Gold being fixed, all the other weights must follow. When it is considered that the Spaniards have been reducing the weight of their Dlrs and that instead of 385, the grains of pure silver in the old Mexico dollar the new dollars have not more than 365 grains it will hardly be thought that 362 grains of pure silver is too little for the federal coin which is to be current in all payments for one dollar.

Some of the old Dirs will admit of a second coinage, but the new ones will not. If the value of Gold compared to that of Silver be fixed at 15 to one, and the alloy in each be \( \frac{1}{12} \) th the weight of the several denominations will be readily determined. The price of bullion is immediately determined by the percentage that is charged towards the expenses of the mint. If the United States shall determine to adhere to the dollar as their money of account, and to simplify accounts by the use of decimals, there is nothing to prevent the immediate commencement of a coinage of copper.

Let the copper pieces, of which 100 are to pass for a Dlr, contain each 131 grains of pure copper, or 44 of them weigh 1 Pound. In this case our copper coin, when compared with the money of accot., will be 6 p. ct. better than that of Great Britain. There will remain a sufficient profit on the coinage.

Copper of the best quality in plates, may be purchased in Europe at 10d. ½ stg. In cutting blanks there will be a waste of 22 p. ct. Those clippings are worth 7d. ½ p. lb. Thence the blanks will cost 11d. ½ nearly; it may be stated at 1s. 9d., New York money p. pound, exclusive of the expense of cutting them, which is not great, as one man can readily cut 100 weight in a day.

man can readily cut 100 weight in a day.

The operation, improperly called milling, by which the sharp edges are worn off from the coppers, is not more expensive than cutting the blanks. In the process of

<sup>&</sup>lt;sup>1</sup>Containing 362 gr. pure silver. This the Unit or money of account.

coining Copper, eight artists or labourers may be required. One Engraver, 1 Labourer for the blank press One Smith, 5 Labourers for the Coining Press.

By those people 100 weight of copper may readily be coined every day, or the value of 44 Dlrs. Deducting the necessary expenses, there may be saved 30 p. ct.

It will be noticed that the report of the Grand Committee on the Money Unit contends that exchange in the United States should not be more than 15 grains of silver for 1 of gold; that the charge for coinage should be  $2\frac{1}{2}$  per cent for gold and a little over 3 per cent for silver; that the unit should be a dollar of 362 grains of pure silver with a multiple gold piece of 5 dollars and decimal aliquot parts.

On July 6, 1785, the Congress adopted the silver dollar as the currency basis on a decimal system, but no mint was established, although the country was suffering great loss in consequence of the circulation

of base copper coins made in Birmingham.

#### REPORT OF THE BOARD OF TREASURY.

On April 8, 1786, the Board of Treasury made a report in triplicate to the President of Congress, and although they mentioned the fact that the ratio then prevailing in the country was 1:15.60, their report shows the following adjustment of the coins:

	Weight of-		Ratio between silver and
	Silver dollar.	Gold dollar.	gold coins.
Report, form No. 1 Report, form No. 2 Report, form No. 3	Grains fine. 375. 64 350. 09 521. 73	Grains fine. 24. 6268 23. 79 34. 782	1:15.253 1:14.749 1:15

The first form of the report was followed in accordance with a resolution passed on the 8th of August, 1786, and on the 16th of October following the ordinance for the establishment of the mint of the United States of America and for regulating the value of coin passed Congress.

The resolution of August 8, 1786, fixed the mint price of the pound, troy, of gold at 209 dollars, 7 dimes, 7 cents, and 7 mills; and of silver at 13 dollars, 7 dimes, 7 cents, and 7 mills. The mint charge was about 2 per cent on silver and gold, "bringing the ratio on bullion at the mint to 15.22, a little below the ratio in the coin."

#### THE SILVER PERIOD, 1792-1834—ACT OF APRIL 2, 1792.

None of the regulations of Congress were put in force for a number of years and the matter was not again brought before Congress until the report of Alexander Hamilton, Secretary of the Treasury, dated January 28, 1791, was laid before the House of Representatives. This very remarkable and statesmanlike paper is here given in full:

REPORT OF ALEXANDER HAMILTON ON THE ESTABLISHMENT OF A MINT.

[In the House of Representatives of the United States, Saturday, February 5, 1791.]

[Extract from the Journal.]

Ordered, That the report of the Secretary of the Treasury, relatively to the establishment of a mint, which was made to this House on Friday, the 28th ultimo, be sent to the Senate for their information.

JOHN BECKLEY, Clerk.

The Secretary of the Treasury having attentively considered the subject referred to him by the order of the House of Representatives, of the fifteenth day of April last, relative to the establishment of a Mint, most respectfully submits the result of his inquiries and reflections.

A plan for an establishment of this nature, involves a great variety of considerations, intricate, nice, and important. The general state of debtor and creditor; all the relations and consequences of price; the essential interests of trade and industry; the value of all property; the whole income, both of the State and of individuals, are liable to be sensibly influenced, beneficially or otherwise, by the judicious or injudicious regulation of this interesting object.

It is one, likewise, not more necessary than difficult to be rightly adjusted; one which has frequently occupied the reflections and researches of politicians, without having harmonized their opinions on some of the most important of the principles which enter into its discussion. Accordingly, different systems continue to be advocated, and the systems of different nations, after much investigation, continue to

differ from each other.

But if a right adjustment of the matter be truly of such nicety and difficulty, a question naturally arises, whether it may not be most adviseable to leave things in this respect, in the state in which they are? Why, might it be asked, since they have so long proceeded in a train which has caused no general sensation of inconvenience, should alterations be attempted, the precise effect of which cannot with

certainty be calculated?

The answer to this question is not perplexing. The immense disorder which actually reigns in so delicate and important a concern, and the still greater disorder which is every moment possible, call loudly for a reform. The dollar originally contemplated in the money transactions of this country, by successive dimunitions of its weight and flueness, has sustained a depreciation of five per cent.; and yet the new dollar has a currency in all payments in place of the old, with scarcely any attention to the difference between them. The operation of this in depreciating the value of property depending upon past contracts, and (as far as inattention to the alteration in the coin may be supposed to leave prices stationary) of all other property, is apparent. Nor can it require argument to prove that a nation ought not to suffer the value of the property of its citizens to fluctuate with the fluctuations of a foreign mint, and to change with the changes in the regulations of a foreign This, nevertheless, is the condition of one which, having no coins of its own, adopts with implicit confidence those of other countries.

The unequal values allowed, in different parts of the Union, to coins of the same intrinsic worth; the defective species of them which embarrass the circulation of some of the States; and the dissimilarity in their several moneys of account, are inconveniences which, if not to be ascribed to the want of a national coinage, will at least be most effectually remedied by the establishment of one: a measure that will, at the same time, give additional security against impositions by counterfeit as well as by

base currencies.

It was with great reason, therefore, that the attention of Congress, under the late Confederation, was repeatedly drawn to the establishment of a mint; and it is with equal reason that the subject has been resumed, now that the favorable change which has taken place in the situation of public affairs admits of its being carried into execution.

But, though the difficulty of devising a proper establishment ought not to deter from undertaking so necessary a work, yet it cannot but inspire diffidence in one, whose duty it is made to propose a plan for the purpose, and may perhaps be permitted to be relied upon as some excuse for any errors which may be chargeable upon it, or for any deviations from sounder principles which may have been suggested by others, or even in part acted upon by the former Government of the United States.

In order to a right judgment of what ought to be done, the following particulars

require to be discussed:

1st. What ought to be the nature of the money unit of the United States?
2d. What the proportion between gold and silver, if coins of both metals are to be established?

3d. What the proportion and composition of alloy in each kind?

4th. Whether the expense of coinage shall be defrayed by the Government, or out of the material itself?

5th. What shall be the number, denominations, sizes, and devices of the coins? 6th. Whether foreign coins shall be permitted to be current or not; if the former,

at what rate, and for what period?

A prerequisite to determining with propriety what ought to be tho money unit of the United States, is to endeavor to form as accurate an idea as the nature of the case will admit of what it actually is. The pound, though of various value, is the unit in the money of account of all the States. But it is not equally easy to pronounce what is to be considered as the unit in the coins. There being no formal regulation on the point, (the resolutions of Congress of the 6th July, 1785, and 8th of August, 1786, having never yet been carried into operation,) it can only be inferred from usage or practice. The manner of adjusting foreign exchanges, would seem to indicato the dollar as best entitled to that character. In these, the old piaster of Spain;. or old Seville piece of eight rials; of the value of four shillings and six-pence sterling; is evidently contemplated. The computed par between Great Britain and Pennsylvania; will serve as an example. According to that, one hundred pounds sterling is equal to one hundred and sixty-six pounds and two thirds of a pound. Pennsylvania currency; which corresponds with the proportion between 4s: 6d. sterling, and 7s: 6d: the current value of the dollar in that State; by invariable usage: And, as far as the information of the Secretary goes, the same comparison holds in: the other States.

But this circumstance in favor of the dollar, loses much of its weight from two: considerations. That species of coin has never had any settled or standard value, according to weight or fineness; but has been permitted to circulate by tale, without regard to either, very much as mere money of convenience, while gold has had a fixed price by weight, and with an eye to its fineness. This greater stability of value of the gold coins, is an argument of force for regarding the money unit as having been hitlier to virtually attached to gold, rather than to silver.

Twenty-four grains and six-eighths of a grain of fine gold; have corresponded with the nominal value of the dollar in the several States, without regard to the successive

diminutions of its intrinsic worth.

But, if the dollar should, notwithstanding, be supposed to have the best title to being considered as the present unit in the coins, it would remain to determine what kind of a dollar ought to be understood; or, in other words, what precises quantity of fine silver;

The old piaster of Spain, which appears to have regulated our foreign exchanges; weighed 17 dwt. 12 grains, and contained 386 grains and 15 mites of fine silver. But this piece has been long, since out of circulation. The dollars now in common curroncy, are of recent date, and much inferior to that, both in weight and fineness: The average weight of them, upon different trials, in large masses, has been found to be 17 dwt. 8 grains. Their fineness is less precisely ascertained, the results of various assays made by different persons, under the direction of the late Superintendent of the Finances, and of the Secretary, being as various as the assays them-selves. The difference between their extremes is not less than 24 grains in a dollar of the same weight and age; which is too much for any probable differences in the pieces. It is rather to be presumed, that a degree of inaccuracy has been occasioned by the want of proper apparatus, and, in general, of practice. The experiment which appears to have the best pretensions to exactness, would make the new dollar to contain 370 grains and 933 thousandth parts of a grain of pure silver.

According to an authority on which the Secretary places reliance, the standard of Spain for its silver coin, in the year 1761, was 261 parts fine and 27 parts alloy; at which proportion, a dollar of 17 dwt. 8 grains, would consist of 377 grains of tine silver, and 39 grains of alloy. But there is no question that this standard has been since altered considerably for the worse: to what precise point, is not as well ascertained as could be wished; but, from a computation of the value of dollars in the markets both of Amsterdam and London (a criterion which cannot materially mislead,) the new dollar appears to contain about 368 grains of fine silver and that

which immediately preceded it about 374 grains.

In this state of things, there is some difficulty in defining the dollar, which is to be understood as constituting the present money unit, on the supposition of its being most applicable to that species of coin. The old Seville piece of 386 grains and 15. mites fine, comports best with the computations of foreign exchanges, and with the more ancient contracts respecting landed property; but far the greater number of contracts still in operation concerning that kind of property, and all those of a merely personal nature, now in force, must be referred to a dollar of a different kind. The actual dollar at the time of contracting, is the only one which can be supposed to have been intended; and it has been seen that, as long ago as the year 1761, therehad been a material degradation of the standard. And even in regard to the more ancient contracts, no person has ever had any idea of a scruple about receiving the dollar of the day as a full equivalent for the nominal sum which the dollar originally

A recurrence, therefore, to the ancient dollar, would be in the greatest number of: cases an innovation in fact; and, in all, an innovation in respect to opinion. The actual dollar in common circulation lias evidently a much better claim to be regarded?

as the actual money unit.

The mean intrinsic value of the different kinds of known dollars has been intimated as affording the proper criterion. But, when it is recollected that the more ancient and more valuable ones are not now to be met with at all in circulation, and that the mass of those generally current is composed of the newest and most inferior kinds, it will be perceived that even an equation of that nature would be a considerable innovation upon the real present state of things; which it will certainly be prudent to approach, as far as may be consistent with the permanent order designed to be introduced.

An additional reason for considering the prevailing dollar as the standard of the present money unit, rather than the ancient one, is, that it will not only be conformable to the true existing proportion between the two metals in this country, but will be more conformable to that which obtains in the commercial world generally.

The difference established by custom in the United States between coined gold and coined silver has been stated, upon another occasion, to be nearly as 1 to 15.6. This, if truly the case, would imply that gold was extremely overvalued in the United States; for the highest actual proportion, in any part of Europe, very little, if at all, exceeds 1 to 15; and the average proportion throughout Europe is probably not more than about 1 to 14.8. But that statement has proceeded upon the idea of the ancient dollar. One pennyweight of gold of twenty-two carats fine, at 6s. 8d., and the old Seville piece of 386 grains and 15 mites of pure silver, at 7s. 6d., furnish the exact ratio of 1 to 15.6262. But this does not coincide with the real difference between the metals in our market, or, which is with us the same thing, in our currency. To determine this, the quantity of fine silver in the general mass of the dollars now in circulation must afford the rule. Taking the rate of the late dollar of 374 grains, the proportion would be as 1 to 15.11. Taking the rate of the newest dollar, the proportion would then be as 1 to 14.87. The mean of the two would give the proportion of 1 to 15, very nearly; less than the legal proportion in the coins of Great Britain, which is as 1 to 15.2; but somewhat more than the actual or market proportion, which is not quite 1 to 15.

The preceding view of the subject does not indeed afford a precise or certain definition of the present unit in the coins, but it furnishes data which will serve as guides in the progress of the investigation. It ascertains, at least, that the sum in the money of account of each State, corresponding with the nominal value of the dollar in such State, corresponds also with 24 grains and  $\frac{\pi}{2}$  of a grain of fine gold; and with something between 368 and 374 grains of fine silver.

The next inquiry towards a right determination of what ought to be the future money unit of the United States, turns upon these questions: Whether it ought to be peculiarly attached to either of the metals, in preference to the other or not? and, if

to either, to which of them?

The suggestions and proceedings hitherto have had for their object the annexing of it emphatically to the silver dollar. A resolution of Congress of the 6th of July, 1785, declares that the money unit of the United States shall be a dollar; and another resolution of the 8th of August, 1786, fixes that dollar at 375 grains and 64 hundredths of a grain of fine silver. The same resolution, however, determines that there shall also be two gold coins: one of 246 grains and 268 parts of a grain of pure gold, equal to ten dollars; and the other, of half that quantity of pure gold, equal to five dollars, and it is not explained whether either of the two species of coins, of gold or silver, shall have any greater legality in payments than the other. Yet it would seem that a preference in this particular is necessary to execute the idea of attaching the unit exclusively to one kind. If each of them be as valid as the other, in payments to any amount, it is not obvious in what effectual sense either of them can be deemed the money unit, rather than the other.

If the general declaration, that the dollar shall be the money unit of the United States, could be understood to give it a superior legality in payments, the institution of coins of gold, and the declaration that each of them shall be equal to a certain number of dollars, would appear to destroy that inference. And the circumstance of making the dollar the unit in the money of account, seems to be rather matter of

form than of substance.

Contrary to the ideas which have heretofore prevailed, in the suggestions concerning a coinage for the United States, though not without much hesitation, arising from a deference for those ideas, the Secretary is, upon the whole, strongly inclined to the opinion, that a preference ought to be given to neither of the metals for the money unit. Perhaps, if either were to be preferred, it ought to be gold rather than silver.

The reasons are these:

The inducement to such a preference is, to render the unit as little variable as possible; because on this depends the steady value of all contracts, and, in a certain sense, of all other property. And it is truly observed, that if the unit belong indiscriminately to both the metals, it is subject to all the fluctuations that happen in the relative value which they bear to each other. But the same reason would lead to annexing it to that particular one, which is itself the least liable to variation; if there be, in this respect, any discernible difference between the two.

Gold may, perhaps, in certain senses, be said to have greater stability than silver; as, being of superior value, less liberties have been taken with it, in the regulations

of different countries. Its standard has remained more uniform, and it has, in other respects, undergone fewer changes; as, being not so much an article of merchandise, owing to the use made of silver in the trade with the East Indies and China, it is less liable to be influenced by circumstances of commercial demand. And if, reasoning by analogy, it could be affirmed, that there is a physical probability of greater proportional increase in the quantity of silver than in that of gold, it would afford an additional reason for calculating on greater steadiness in the value

As long as gold, either from its intrinsic superiority as a metal, from its greater rarity, or from the prejudices of mankind, retains so considerable a pre-eminence in value over silver, as it has hitherto had, a natural consequence of this seems to be that its condition will be more stationary. The revolutions, therefore, which may take place in the comparative value of gold and silver, will be changes in the state

of the latter, rather than in that of the former.

If there should be an appearance of too much abstraction in any of these ideas, it may be remarked, that the first and most simple impressions do not naturally incline to giving a preference to the inferior or least valuable of the two metals.

It is sometimes observed, that silver ought to be encouraged rather than gold, as being more conducive to the extension of bank circulation, from the greater difficulty and inconvenience which its greater bulk, compared with its value, occasions in the transportation of it. But bank circulation is desirable, rather as an auxiliary to, than as a substitute for that of the precious metals, and ought to be left to its natural course. Artificial expedients to extend it, by opposing obstacles to the other, are at least not recommended by any very obvious advantages. And, in general, it is the safest rule to regulate every particular institution or object, according to the principles which, in relation to itself, appear the most sound. In addition to this, it may be observed, that the inconvenience of transporting either of the metals, is sufficiently great to induce a preference of bank paper, whenever it can be made to answer the purpose equally well.

But, upon the whole, it seems to be most adviscable, as has been observed, not to attach the unit exclusively to either of the metals; because this cannot be done effectually, without destroying the office and character of oue of them as money, and reducing it to the situation of a mere merchandise; which, accordingly, at different times, has been proposed from different and very respectable quarters; but which would probably be a greater evil than occasional variations in the unit, from the fluctuations in the relative value of the metals; especially if care be taken to regulate the proportion between them, with an eye to their average commercial

value.

To annul the use of either of the metals, as money, is to abridge the quantity of circulating medium; and is liable to all the objectious which arise from a comparison of the benefits of a full, with the evils of a scanty circulation.

It is not a satisfactory answer to say, that none but the favored metal would in this case find its way into the country, as in that all balances must be paid. The practicability of this would, in some measure, depend on the abundance or scarcity of it in the country paying. Where there was but little, it either would not be procurable at all, or it would cost a premium to obtain it; which, in every case of a competition with others, in a branch of trade, would constitute a deduction from the profits of the party receiving. Perhaps, too, the embarrassments which such a circumstance might sometimes create, in the pecuniary liquidation of balances, might lead to additional efforts to find a substitute in commodities, and might so far impede the introduction of the metals. Neither could the exclusion of either of them be deemed, in other respects, favorable to commerce. It is often, in the course of trade, as desirable to possess the kind of money, as the kind of commodities best adapted to a foreign market.

It seems, however, most probable, that the chief, if not the sole, effect of such a regulation, would be to diminish the utility of one of the metals. It could hardly prove an obstacle to the introduction of that which was excluded in the natural course of trade, because it would always command a ready sale for the purpose of exportation to foreign markets. But such an effect, if the only one, is not to be

regarded as a trivial inconvenience.

If, then, the unit ought not to be attached exclusively to either of the metals, the proportion which ought to subsist between them, in the coins, becomes a preliminary inquiry, in order to its proper adjustment. This proportion appears to be, in

several views, of no inconsiderable moment.

One consequence of overvaluing either metal, in respect to the other, is the ban-ishment of that which is undervalued. If two countries are supposed, in one of which the proportion of gold to silver is as 1 to 16, in the other as 1 to 15, gold being worth more, silver less, in one than in the other, it is manifest that, in their reciprocal payments, each will select that species which it values least, to pay to the other where it is valued most. Besides this, the dealers in money will, from the same cause,

often find a profitable traffic in an exchange of the metals between the two countries: And hence it would come to pass, if other things were equal, that the greatest part of the gold would be collected in one, and the greatest part of the silver in the other. The course of trade might in some degree counteract the tendency of the difference in:the legal proportions by the market value; but this is so far and so often influenced by the legal rates, that it does not prevent their producing the effect which is inferred. Facts, too, verify the inference: In Spain and England, where gold is rated higher than in other parts of Europe, there is a scarcity of silver; while it is found to abound in France and Holland, where it is rated higher in proportion to gold than in the neighboring nations. And it is continually flowing from Europe to China and the East Indies, owing to the comparative cheapness of it in the former, and dearness of it in the latter.

This consequence is deemed by some not very material; and there are even persons who, from a functful predilection to gold; are willing to invite it, even by a higher price. But general utility will best be promoted by a due proportion of both metals. If gold be most convenient in large payments, silver is best adapted to the

more minute and ordinary circulation.

But it is to be suspected that there is another consequence, more serious than the one which has been mentioned. This is the diminution of the total quantity of specie which a country would naturally possess.

It is evident that as often as a country, which overrates either of the metals, receives a payment in that metal, it gets a less actual quantity than it ought to do,

or than it would do, if the rate were a just one:

It is also equally evident, that there will be a continual effort to make payment to it in that species to which it has annexed an exaggerated estimation, wherever it is current at a less proportional value. And it would seem to be a very natural effect: of these two causes; not only that the mass of the precious metals in the country in question would consist chiefly of that kind to which it had given an extraordinary value, but that it would be absolutely less than if they had been duly proportioned to each other.

A conclusion of this sort, however, is to be drawn with great caution. In such matters; there are always some local and many other particular circumstances; which qualify and vary the operation of general principles, even where they are just; and there are endless combinations, very difficult to be analyzed, which often render

principles, that have the most plausible pretensions, unsound and delusive:

There ought, for instance, according to those which have been stated to have been formerly a greater quantity of gold in proportion to silver in the United States, than there has been; because the actual value of gold in the country, compared with silver, was perhaps higher than in any other. But our situation with regard to the West India islands, into some of which there is a large influx of silver directly from the mines of South America, occasions an extraordinary supply of that metal, and consequently a greater proportion of it in our circulation than might liave been expected from its relative value.

What influence the proportion under consideration may have upon the state of: prices; and how far this may counteract its tendency to increase or lessen the quantity of the metals, are points not easy to be developed; and yet they are very

necessary to an accurate judgment of the true operation of the thing.

But however impossible it may be to pronounce with certainty, that the possession: of a less quantity of specie is a consequence of overvaluing either of the metals, there is enough of probability in the considerations which seem to indicate it, to

form an argument of weight against such overvaluation.

A third ill consequence resulting from it is, a greater and more frequent disturbance of the state of the money unit, by a greater and more frequent diversity between the legal and marked proportions of the metals. This has not hitherto been experienced in the United States; but it has been experienced elsewhere; and from its not having been felt by us hitherto, it does not follow that this will not be the case hereafter, when our commerce shall have attained a maturity which will place it under the influence of more fixed principles.

In establishing a proportion between the metals, there seems to be an option of

one of two things-

To approach, as nearly as can be ascertained, the mean or average proportion, in what may be called the commercial world; or,

To retain that which now exists in the United States. As far as these happen to coincide, they will render the course to be pursued more plain and more certain.

To ascertain the first, with precision, would require better materials than are possessed, or than could be obtained, without an inconvenient delay.

Sir Isaac Newton, in a representation to the Treasury of Great Britain, in the year-1717, after stating the particular proportions in the different countries of Europe, concludes thus:—"By the course of trade and exchange between nation and nation, in all Europe; fine gold is to fine silver as 145; or 15 to 1."

But however accurate and decisive this authority may be deemed, in relation to the period to which it applies, it cannot be taken, at the distance of more than seventy years, as a rule for determining the existing proportion. Alterations have been since made, in the regulations of their coins by several nations; which, as well as the course of trade, have an influence upon the market values. Nevertheless, there is reason to believe, that the state of the matter, as represented by Sir Isaac Newton, is not very remote from its actual state.

In Holland, the greatest money market of Europe, gold was to silver, in December, 1789, as 1 to 14.88; and in that of London it has been, for some time past, but little

different, approaching perhaps something nearer 1 to 15.

It has been seen that the existing proportion between the two metals in this

country is about as 1 to 15.

It is fortunate, in this respect, that the innevations of the Spanish mint have imperceptibly introduced a proportion so analogous as this is to that which prevails among the principal commercial nations, as it greatly facilitates a proper regu-

lation of the matter.

This proportion of I to 15 is recommended by the particular situation of our trade, as being very nearly that which obtains in the market of Great Britain; to which nation our specie is principally exported. A lower rate for either of the metals, in our market, than in hers, might not only afford a motive the more, in certain cases, to remit in specie rather than in commodities; but it might, in some others, cause us to pay a greater quantity of it for a given sum than we should otherwise do. If the effect should rather be to occasion a premium to be given for the metal which was underrated, this would obviate those disadvantages; but it would involve another, a customary difference between the market and legal proportions, which would amount to a species of disorder in the national coinage.

Looking forward to the payments of interest hereafter to be made to Holland, the same proportion does not appear incligible. The present legal proportion in the coins of Holland is stated at 1 to  $14-\frac{3}{10}$ . That of the market varies somewhat at

different times, but seldom very widely from this point.

There can hardly be a better rule in any country, for the legal, than the market proportion, if this can be supposed to have been produced by the free and steady course of commercial principles. The presumption in such case is, that each metal finds its true level, according to its intrinsic utility, in the general system of money

operations.

But it must be admitted that this argument in favor of continuing the existing proportion is not applicable to the state of the coins with us. There have been too many artificial and heterogeneous ingredients—too much want of order in the pecuniary transactions of this country—to authorize the attributing the effects which have appeared to the regular operations of commerce. A proof of this is to be drawn from the alterations which have happened in the proportion between the metals merely by the successive degradations of the dollar, in consequence of the mutability of a foreign mint. The value of gold to silver appears to have declined, wholly from this cause, from 15<sub>16</sub> to about 15 to 1; yet, as this last proportion, however produced, coincides so nearly with what may be deemed the commercial average, it may be supposed to furnish as good a rule as can be pursued.

The only question seems to be, whether the value of gold ought not to be a little lowered, to bring it to a more exact level with the two markets which have been mentioned; but, as the ratio of 1 to 15 is so nearly conformable to the state of those markets, and best agrees with that of our own, it will probably be found the most eligible. If the market of Spain continues to give a higher value to gold (as it has done in time past) than that which is recommended, there may be some advantage

in a middle station.

A further preliminary to the adjustment of the future money unit is, to determine what shall be the proportion and composition of alloy in each species of the coins.

The first, by the resolution of the 8th of August, 1786, before referred to, is regulated at one-twelfth, or in other words, at 1 part alloy to 11 parts fine, whether gold or silver; which appears to be a convenient rule; unless there should be some collateral consideration which may dictate a departure from it. Its correspondency, in regard to both metals, is a recommendation of it, because a difference could answer no purpose of pecuniary or commercial utility, and uniformity is favorable to order.

This ratio, as it regards gold, coincides with the proportion, real or professed, in the coins of Portugal, England, France and Spain. In those of the two former, it is real; in those of the two latter, there is a deduction for what is ealled remedy of weight and alloy, which is in the nature of an allowance to the master of the mint for errors and imperfections in the process; rendering the coin either lighter or baser than it ought to be. The same thing is known in the theory of the English mint, where \( \frac{1}{3} \) of a carat is allowed. But the difference seems to be, that there, it is merely an occasional indemnity within a certain limit, for real and unavoidable errors and

imperfections; whereas, in the practice of the mints of France and Spain, it appears to amount to a stated and regular deviation from the nominal standard. Accordingly, the real standards of France and Spain are something worse than 22 carats, or 11 parts in 12 fine.

The principal gold coins in Germany, Holland, Sweden, Denmark, Poland, and Italy, are finer than those of England and Portugal, in different degrees, from 1 carat and \(\frac{1}{4}\) to 1 carat and \(\frac{1}{4}\), which last is within \(\frac{1}{4}\) of a carat of pure gold.

There are similar diversities in the standards of the silver coins of the different countries of Europe. That of Great Britain is 222 parts fine, to 18 alloy; those of the other European nations vary from that of Great Britain as widely as from about 17 of the same parts better, to 75 worse.

The principal reasons assigned for the use of alloy, are the saving of expense in

the refining of the metals, (which in their natural state are usually mixed with a portion of the coarser kinds,) and the rendering of them harder as a security against too great waste by friction or wearing. The first reason, drawn from the original composition of the metals, is strengthened at present by the practice of alloying their coins, which has obtained among so many nations. The reality of the effect to which the last reason is applicable, has been denied, and experience has been appealed to as proving that the more alloyed coins wear faster than the purer. The true state of this matter may be worthy of future investigation, though first appearances are in favor of alloy. In the mean time, the saving of trouble and expense are sufficient inducements to following those examples which suppose its expediency. And the same considerations lead to taking as our models those nations with whom we have most intercourse, and whose coins are most preventent in our circulation. These are most intercourse, and whose coins are most prevalent in our circulation. These are Spain, Portugal, England, and France. The relation which the proposed proportion bears to their gold coins, has been explained. In respect to their silver coins, it will not be very remote from the mean of their several standards.

The component ingredients of the alloy in each metal, will also require to be regulated. In silver, copper is the only kind in use, and it is doubtless the only proper one. In gold, there is a mixture of silver and copper; in the Euglish coins consisting of equal parts, in the coins of some other countries, varying from \(\frac{1}{3}\) to \(\frac{2}{3}\) silver. The reason of this union of silver with copper is this: The silver counteracts the

tendency of the copper to injure the color or beauty of the coin, by giving it too much redness, or rather a coppery hue, which a small quantity will produce; and the copper prevents the too great whiteness which silver alone would confer. apprehended that there are considerations which may render it prudent to establish, by law, that the proportion of silver to copper in the gold coins of the United States shall not be more than \( \frac{1}{2}, \) nor less than \( \frac{1}{2}; \) vesting a discretion in some proper place to regulate the matter within those limits, as experience in the execution may recomniend.

A third point remains to be discussed, as a prerequisite to the determination of the money unit, which is, whether the expense of coining shall be defrayed by the public, or out of the material itself; or, as it is sometimes stated, whether coinage shall be free, or shall be subject to a duty or imposition? This forms, perhaps, one

of the nicest questions in the doctrine of money.

The practice of different nations is dissimilar in this particular. In England, coinage is said to be entirely free; the mint price of the metals in bullion being the same with the value of them in coin. In France, there is a duty, which has been, if it is not now, eight per cent. In Holland, there is a difference between the mint price and the value in the coins, which has been computed at .96, or something less than one per cent. upon gold; at 1.48, or something less than one and a half per cent. upon silver. The resolution of the 8th of August, 1786, proceeds upon the idea of a deduction of a half per cent. from gold, and of two per cent. from silver, as an indemnifica-tion for the expense of coining. This is inferred from a report of the late board of treasury, upon which that resolution appears to have been founded.

Upon the supposition that the expense of coinage ought to be defrayed out of the metals, there are two ways in which it may be effected: one, by a reduction of the quantity of fine gold and silver in the coins; the other, by establishing a difference

between the value of those metals in the coins, and the mint price of them in bullion.

The first method appears to the Secretary inadmissible. He is unable to distinguish an operation of this sort from that of raising the denomination of the coin; a measure which has been disapproved by the wisest men of the nations in which it has been practised, and condemned by the rest of the world. To declare that a less has been practised, and condemned by the rest of the world. To declare that a less weight of gold or silver shall pass for the same sum, which before represented a greater weight; or to ordain that the same weight shall pass for a greater sum, are things substantially of one nature. The consequence of either of them, if the change can be realized is to degrade the moves unit additional standards the moves unit additional standards. change can be realized, is to degrade the mouey unit; obliging creditors to receive less than their just dues, and depreciating property of every kind; for it is manifest that every thing would, in this case, be represented by a less quantity of gold and silver than before.

It is sometimes observed, on this head, that though any article of property might, in fact, be represented by a less actual quantity of pure metal, it would nevertheless be represented by something of the same intrinsic value. Every fabric, it is remarked, is worth intrinsically the price of the raw material and the expense of fabrication; a truth not less applicable to a piece of coin than to a yard of cloth.

This position, well founded in itself, is here misapplied. It supposes that the

It supposes that the coins now in circulation are to be considered as bullion, or, in other words, as a raw material. But the fact is, that the adoption of them as money, has caused them to become the fabric; it has invested them with the character and office of coins, and has given them a sanction and efficacy, equivalent to that of the stamp of the sovereign. The prices of all our commodities, at home and abroad, and of all foreign commodities in our markets, have found their level in conformity to this principle. The foreign coins may be divested of the privilege they have hitherto been permitted to enjoy, and may of course be left to find their value in the market as a raw material. But the quantity of gold and silver in the national coins, corresponding with a given sum, cannot be made less than heretofore, without disturbing the balance of intrinsic value, and making every acre of land, as well as every bushel of wheat, of less actual worth than in time past. If the United States were isolated, and cut off from all intercourse with the rest of mankind, this reasoning would not be equally conclusive. But it appears decisive, when considered with a view to the relations which commerce has created between us and other countries.

It is, however, not improbable, that the effect meditated would be defeated by a rise of prices proportioned to the diminution of the intrinsic value of the coins. This might be looked for in every enlightened commercial country; but perhaps in none with greater certainty than in this, because in none are men less liable to be the dupes of sounds; in none has authority so little resource for substituting names

for things.

A general revolution in prices, though only nominally, and in appearance, could not fail to distract the ideas of the community; and would be apt to breed discontents as well among those who live on the income of their money, as among the poorer classes of the people, to whom the necessaries of life would seem to have become dearer. In the confusion of such a state of things, ideas of value would not improbably adhere to the old coins, which, from that circumstance, instead of feeling the effect of the loss of their privilege as money, would perhaps bear a price in the market relatively to the new ones, in exact proportion to weight. The frequency of the demand for the metals to pay foreign balances, would contribute to

Among the evils attendant on such an operation, are these: creditors, both of the public and of individuals, would lose a part of their property; public and private credit would receive a wound; the effective revenues of the Government would be diminished. There is scarcely any point in the economy of national affairs, of greater moment than the uniform preservation of the intrinsic value of the money

unit. On this the security and steady value of property essentially depend.

The second method, therefore, of defraying the expense of the coinage out of the metals, is greatly to be preferred to the other. This is to let the same sum of money continue to represent in the new coins exactly the same quantity of gold and silver as it does in those now current; to allow at the mint such a price only for those metals as will admit of profit just sufficient to satisfy the expense of coinage; to abolish the legal currency of the foreign coins, both in public and private payments; and of course to leave the superior utility of the national coins for domestic purposes, to operate the difference of market value, which is necessary to induce the bringing of bullion to the mint. In this case, all property and labor will still be represented by the same quantity of gold and silver as formerly; and the only change which will be wrought, will consist in annexing the office of money exclusively to the national coins; consequently, withdrawing it from those of foreign countries, and suffering them to become, as they ought to be, mere articles of merchandise.

The arguments in favor of a regulation of this kind are: First. That the want of it is a cause of extra expense: there being then no motive of individual interest to distinguish between the national coins and bullion, they are it is alleged, indiscriminately melted down for domestic manufactures, and exported for the purposes of foreign trade; and it is added, that when the coins become light by wearing, the same quantity of fine gold or silver bears a higher price in bullion than in the coins; in which state of things, the melting down of the coins to be sold as bullion is attended with profit; and from both causes, the expense of the mint, or, in other words, the expense of maintaining the specie capital of the nation, is materially

Secondly. That the existence of such a regulation promotes a favorable course of exchange, and benefits trade; not only by that circumstance but by obliging foreigners, in certain cases, to pay dearer for domestic commodities, and to sell their

own cheaper.

As far as relates to the tendency of a free coinage to produce an increase of expense in different ways that have been stated, the argument must be allowed to have foundation, both in reason and in experience. It describes what has been exempli-

fied in Great Britain.

The effect of giving an artificial value to bullion, is not at first sight obvious; but it actually happened at the period immediately preceding the late reformation in the gold coin of the country just named. A pound troy in gold bullion, of standard fineness, was then from 19s. 6d. to 25s sterling dearer than an equal weight of guineas, as delivered at the mint. The phenomenon is thus accounted for—the old guineas were more than two per cent. lighter than their standard weight. This weight, therefore, in bullion, was truly worth two per cent. more than those guineas. It consequently had, in respect to them, a correspondent rise in the market.

And as guineas were then current by tale, the new ones, as they issued from the mint, were confounded in circulation with the old ones; and, by the association, were depreciated below their intrinsic value, in comparison with bullion. It became, of course, a profitable traffic to sell bullion for coin, to select the light pieces and re-issue them in currency, and to melt down the heavy ones, and sell them again as bullion. This practice, besides other inconveniences, cost the Government large sums in the

renewal of the coins.

But the remainder of the argument stands upon ground far more questionable. It depends upon very numerous and very complex combinations, in which there is

infinite latitude for fallacy and error.

The most plausible part of it is that which relates to the course of exchange. Experience in France has shown that the market price of bullion has been influenced by the mint difference between that and coin—sometimes to the full extent of the difference; and it would seem to be a clear inference, that whenever that difference materially exceeded the charges of remitting bullion from the country where it existed, to another in which coinage is free, exchange would be in favor of the

If, for instance, the balance of trade between France and England were at any time equal, their inerchants would naturally have reciprocal payments to make to an equal amount, which, as usual, would be liquidated by means of bills of exchange. If, in this situation, the difference between coin and bullion should be in the market, as at the mint of France, eight per cent.; if, also, the charges of transporting money from France to England should not be above two per cent.; and if exchange should be at par, it is evident that a profit of six per cent. might bo made, by sending bullion from France to England, and drawing bills for the amount. hundred louis d'ors in coin, would purchase the weight of one hundred aud eight in bullion; one hundred of which, romitted to England, would suffice to pay a debt of an equal amount; and two being paid for the charges of insurance and transportation there would remain six for the benefit of the person who should manage the negotiation. But as so large a profit could not fail to produce competition, the bills, in consequence of this, would decrease in price, till the profit was reduced to the minimum of an adequate recompense for the trouble and risk. And, as the amount of one hundred louis d'ors in England, might be afforded for ninety-six in France, with a profit of more than one and a half per cent., bills upon England, might fall in France to four per cent. below par; one per cent. being a sufficient profit to the exchanger or broker for the management of the business.

But it is admitted that this advantage is lost, when the balance of trade is against the nation which imposes the duty in question; because, by increasing the demand

for bullion, it brings this to a par with the coins; and it is to be suspected, that where commercial principles have their free scope, and are well understood, the market difference between the metals in coin and bullion, will seldom approximate to that of the mint, if the latter be considerable. It must be not a little difficult to keep the money of the world, which can be employed to an equal purpose in the commerce of the world, in a state of degradation, in comparison with the money of a particular

This alone would seem sufficient to prevent it: whenever the price of coin to bullion, in the market, materially exceeded the par of the metals, it would become an object to send the bullion abroad, if not to pay a foreign balance, to be invested in some other way in foreign countries, where it bore a superior value; an operation by which immense fortunes might be amassed, if it were not that the exportation of the bullion would of itself restore the intrinsic par. But, as it would naturally have this effect, the advantage supposed would contain in itself the principle of its own destruction. As long, however, as the exportation of bullion could be made with profit, which is as long as exchange could remain below par, there would be a drain of the gold and silver of the country.

If anything can maintain, for a length of time, a material difference between the value of the metals in coin and in bullion, it must be a constant and considerable balance of trade in favor of the country in which it is maintained. In one situated like the United States, it would in all probability be a liopeless attempt. The frequent demand for gold and silver, to pay balances to foreigners, would tend powerfully to preserve the equilibrium of intrinsic value.

The prospectis, that it would occasion foreign coins to circulate by common con-

sent, nearly at par with the national.

To say, that as far as the effect of lowering exchange is produced, though it be only occasional and momentary, there is a benefit the more thrown into the scale of public prosperity, is not satisfactory. It has been seen, that it may be productive of one evil, the investment of a part of the national capital in foreign countries; which can hardly be beneficial but in a situation like that of the United Netherlands, where an immense capital, and a decrease of internal demand, render it necessary to find employment for movey in the wants of other nations; and, perhaps on a sclose examination, other evils may be descried.

One allied to that which has been mentioned is this—taking France, for the sakes of more concise illustration; as the scene. Whenever it happens that French louisedors: are sent abroad, from whatever cause, if there be a considerable difference between coin and bullion in the market of France, it will constitute an advantageous traffic to send back these louisedors; and bring away bullion in lieu of them; upon all which exchanges, France must sustain an actual loss of a part of its gold and silver.

Again: such addifference between coin and bullion may tend to counteract a favorable balance of trade. Whenever a foreign merchant is the carrier of his own commodities to France for sale, he has a strong inducement to bring back specie, instead of French commodities; because a return in the latter may afford no profit; may even be attended with loss; in the former, it will afford a certain profit. The same principle must be supposed to operate in the general course of remittances from France to other countries. The principal question with a merchant naturally is; in what manner can I realize a given sum, with most advantage, where I wish to place it? And, in cases in which other commodities are not likely to produce equal profit with bullion, it may be expected that this will be preferred; to which, the greater certainty attending the operation must be an additional incitement. There can hardly be imagined a circumstance less friendly to trade, than the existence of an extra inducement arising from the possibility of a profitable speculation upon the articles themselves, to export from a country its gold and silver, rather than the products of its land and labor.

The other advantages supposed, of obliging foreigners to pay dearer for domestic commodities; and to sell their own cheaper, are applied to a situation which includes as avorable balance of trade. It is understood in this sense: the prices of domestic, commodities (such, at least, as are peculiar to the country) remain attached; to the denominations of the coins. When a favorable balance of trade realizes in the market the mint difference between coins and bullion, foreigners; who must pay in the latter; are obliged to give more of it for such commodities than they otherwise would do. Again: the bullion, which is now obtained at a cheaper rate in the home market, will procure the same quantity of goods in the foreign market as before, which is said to render foreign commodities cheaper. In this reasoning, much fallacy is to be suspected. If it be true that foreigners pay more for domestic commodities, it must be equally true that they get more for their own when they bring them themselves to market. If peculiar or other domestic commodities of a like character should not do the same thing; and in this case, the foreigner, though he receive only the same value in coin for his merchandise as formerly, can convert it into a greater quantity of bullion. Whence the nation is liable to lose more of its gold and silver than if their intrinsic value in relation to the coins were preserved. And whether the gain or the loss will, on the whole, preponderate, would appear to depend on the comparative proportion of active commerce of the one country with the other.

It is evident, also, that the nation must pay as much gold and silver as before; for the commodities which it procures abroas; and whether it obtains this gold and silver cheaper, or not; turns upon the solution of the question just intimated, respecting the

relative proportion of active commerce between the two countries.

Besides these considerations, it is admitted in the reasoning, that the advantages supposed, which depend on a favorable balance of trade, have a tendency to affect that balance disadvantageously. Foreigners, it is allowed, will in this case seek some other vent for their commodities, and some other market where they can supply their wants at an easier rate. A tendency of this kind, if real; would be a sufficient objection to the regulation. Nothing which contributes to change a beneficial current of trade; can well compensate, by particular advantages; for so injurious an effect. It is far more easy to transfer trade from a less to a more favorable channel, than, when once transferred, to bring it back to its old one. Every source of artificial interruption to an advantageous current, is, therefore, cautiously to be avoided.

It merits attention, that the able minister, who lately and so long presided over the finances of France, does not attribute to the duty of coinage in that country, any particular advantages in relation to exchange and trade. Though he rather appears an advocate for it, it is on the sole ground of the revenue it affords, which he represents as in the nature of a very moderate duty on the general mass of exportation.

And it is not improbable that, to the singular felicity of situation of that kingdom, is to be attributed its not having been sensible of the evils which seem incident to the regulation. There is, perhaps, no part of Europe which has so little need of other countries as France. Comprehending a variety of soils and climates, an immense population, its agriculture in a state of mature improvement, it possesses within its own bosom, most, if not all, the productions of the earth, which any of its most favored neighbors can boast. The variety, abundance, and excellence of its wines, constitute a peculiar advantage in its favor. Arts and manufactures are there also in a very advanced state; some of them, of considerable importance, in higher perfection than elsewhere. Its contiguity to Spain; the intimate nature of its connexion with that country; a country with few fabrics of its own, consequently numerous wants, and the principal receptacle of the treasures of the New World: These circumstances concur, in securing to France so uniform and so considerable a balance of trade, as in a great measure to counteract the natural tendency of any errors which may exist in the system of her mint; and to render inferences from the operation of that system there, in reference to this country, more liable to mislead than to instruct. Nor ought it to pass unnoticed, that, with all these advantages, the government of France has found it necessary, on some occasions, to employ very violent methods to compel the bringing of bullion to the mint; a circumstance which affords a strong presumption of the inexpediency of the regulation, and of the impracticability of executing it in the United States.

This point has been the longer dwelt upon, not only because there is a diversity of opinion among speculative men concerning it, and a diversity in the practice of the most considerable commercial nations, but because the acts of our own government, under the confederation, have not only admitted the expediency of defraying the expense of coinage out of the metals themselves, but upon this idea have both made a deduction from the weight of the coins, and established a difference between their regulated value and the mint price of bullion, greater than would result from that deduction. This double operation in favor of a principle so questionable in itself, has made a more particular investigation of it a duty.

The intention, however, of the preceding remarks, is rather to show that the expectation of commercial advantages ought not to decide in favor of a duty on coinage, and that, if it should be adopted, it ought not to be in the form of a deduction from the intrinsic value of the coins, than absolutely to exclude the idea of any difference whatever between the value of the metals in coin and in bullion. It is not clearly discerned that a small difference between the mint price of bullion, and the regulated value of the coins, would be pernicious, or that it might not even be advisable, in the first instance, by way of experiment, merely as a preventive to the melting down and exportation of the coins. This will now be somewhat more the melting down and exportation of the coins. particularly considered.

The arguments for a coinage entirely free, are, that it preserves the intrinsic value of the metals; that it makes the expense of fabrication a general instead of a partial tax; and that it tends to promote the abundance of gold and silver, which, it is alleged, will flow to that place where they find the best price, and from that place

where they are in any degree undervalued.

The first consideration has not much weight, as an objection to a plan which, without diminishing the quantity of metals in the coins, merely allows a less price for them in bullion at the national factory or mint. No rule of intrinsic value is violated, by considering the raw material as worth less than the fabric, in proportion to the expense of fabrication. And by divesting foreign coins of the privilege

of circulating as money, they become the raw material.

The second consideration has perhaps greater weight. But it may not amount to an objection, if it be the best method of preventing disorders in the coins, which it is in a particular manner the interest of those on whom the tax would fall to prevent. The practice of taking gold by weight, which has of late years obtained in Great Britain, has been found, in some degree, a remedy; but this is inconvenient, and may a that account follows dispersion. and may on that account fall into disuse. Another circumstance has had a remedial operation. This is the delays of the mint. It appears to be the practice there, not to make payment for the bullion which is brought to be exchanged for coin, till it either has in fact, or is pretended to have, undergone the process of recoining.

The necessity of fulfilling prior engagements is a cause or pretext for postponing the delivery of the coin in lieu of the bullion. And this delay creates a difference in the market price of the two things. Accordingly, for some years past, an ounce of standard gold, which is worth in coin £ 3 17s.  $10\frac{1}{2}d$ . sterling, has been in the market of London, in bullion, only £3 17s. 6d., which is within a small fraction of one-half per cent. less. Whether this be management in the mint, to accommodate the bank in the purchase of bullion, or to effect indirectly something equivalent to a formal difference of price, or whether it be the natural course of the business, is

open to conjecture.

It at the same time indicates that if the mint were to make prompt payment, at about half per cent. less than it does at present, the state of bullion in respect to coin would be precisely the same as it now is. And it would be then certain that the Government would save expense in the coinage of gold; since it is not probable that the time actually lost in the course of the year, in converting bullion into coin, can be an equivalent to half per cent. on the advance, and there will generally be at the command of the Treasury a considerable sum of money waiting for some period-

ical disbursement, which, without hazard, might be applied to that advance.

In what sense a free coinage can be said to promote the abundance of gold and silver, may be inferred from the instances which have been given of the tendency of a contrary system to promote their exportation. It is, however, not probable, that a very small difference of value between coin and bullion can have any effect which ought to enter into calculation. There can be no inducement of positive profit, to export the bullion, as long as the difference of price is exceeded by the expense of transportation. And the prospect of smaller loss upon the metals than upon commodities, when the difference is very minute, will be frequently overbalanced by the possibility of doing better with the latter, from a rise of markets. It is, at any rate, certain, that it can be of no consequence in this view, whether the superiority of coin to bullion in the market, be produced, as in England, by the delay of

the mint, or by a formal discrimination in the regulated values.

Under an impression that a small difference between the value of the coin and the mint price of bullion, is the least exceptionable expedient for restraining the melting down, or exportation of the former, and not perceiving that, if it be a very moderate one, it can be hurtful in other respects—the Secretary is inclined to an experiment of one half per cent on each of the metals. The fact which has been mentioned, with regard to the price of gold bullion in the English market, seems to demonstrate that such a difference may safely be made. In this case, there must be immediate payment for the gold and silver offered to the mint. How far one half per cent. will go towards defraying the expense of coinage, cannot be determined beforehand with It is presumed that, on an economical plan, it will suffice in relation to gold. But it is not expected that the same rate on silver will be sufficient to defray the expense attending that metal. Some additional provision may therefore be found necessary, if this limit be adopted. Some additional provision may therefore be

It does not seem to be advisable to make any greater difference in regard to silver than to gold; because it is desirable that the proportion between the two metals in the market, should correspond with that in the coins, which would not be the case if the mint price of one was comparatively lower than that of the other; and because, also, silver being proposed to be rated in respect to gold, somewhat below its general commercial value, if there should be a disparity to its disadvantage in the mint prices of the two metals, it would obstruct too much the bringing of it to be coined, and would add an inducement to export it. Nor does it appear to the Secretary safe to make a greater difference between the value of coin and bullion, than has been mentioned. It will be better to have to increase it hereafter, if this shall be found expedient, than to have to recede from too considerable a difference,

in consequence of evils which shall have been experienced.

It is sometimes mentioned, as an expedient which, consistently with a free coinage, may serve to prevent the evils desired to be avoided, to incorporate in the coins a greater proportion of alloy than is usual; regulating their value, nevertheless, according to the quantity of pure metal they contain. This, it is supposed, by adding to the difficulty of refining them, would cause bullion to be preferred both for manufacture and exportation.

But strong objections lie against this scheme:—an augmentation of expense; an actual depreciation of the coin; a danger of still greater depreciation in the public opinion; the facilitating of counterfeits; while it is questionable whether it would

have the effect expected from it.

The alloy being esteemed of no value, an increase of it is evidently an increase of expense. This, in relation to the gold coins, particularly, is a matter of moment. It has been noted, that the alloy in them consists partly of silver. If, to avoid expense, the addition should be of copper only, this would spoil the appearance of the coin, and give it a base countenance. Its beauty would, indeed, be injured, though in a less degree, even if the usual proportions of silver and copper should be maintained in the increased quantity of alloy.

And however inconsiderable an additional expenditure of copper in the coinage of

a year may be deemed, in a series of years it would become of consequence. In regulations which contemplate the lapse and operation of ages, a very small item of

expense acquires importance.

The actual depreciation of the coin by an increase of alloy, results from the very circumstance which is the motive to it—the greater difficulty of refining. In England, it is customary for those concerned in manufactures of gold, to make a deduction in the price of four pence sterling per ounce, of fine gold, for every carat which the mass containing it is below the legal standard. Taking this as a rule, an inferiority of a single-carat, or one twenty-fourth part in the gold coins of the United States, compared with the English standard, would cause the same quantity of purogold in them to be worth nearly four tenths per cent, less than in the coins of Great Britain. This circumstance would be likely, in process of time, to be felt in the market of the United States.

A still greater depreciation, in the public opinion, would be to be appreliended from the apparent debasement of the coin. The effects of imagination and prejudice cannot be safely disregarded in anything that relates to money. If the beauty of the coin be impaired, it may be found difficult to satisfy the generality of the community that what appears worso is not really less valuable; and it is not altogether certain that an impression of its being so may not occasion an unnatural

augmentation of prices.

Greater danger of imposition, by counterfeits; is also to be apprehended from the injury which will be done to the appearance of the coin. It is a just observation, that "the perfection of the coins is a great-safeguard against counterfeits." And it is evident that the color; as well as the excellence of the workmanship, is an ingredient in that perfection. The intermixture of too much alloy, particularly of copper, in the gold coins at least, must materially lessen the facility of distinguishing, by the eye, the purer from the baser kind, the genuine from the counterfeit.

The inefficacy of the arrangement to the purpose intended to be answered by it, is rendered probable by different considerations. If the standard of plate in the United States should be regulated according to that of the national coins, it is to be expected that the goldsmith would prefer these to the foreign coins, because he would find them prepared to his hand, in the state which he desires; whereas he would have to expend an additional quantity of alloy to bring the foreign coins to that state. If the standard of plate; by law or usage, should be superior to that of the national coins, there would be a possibility of the foreign coins bearing, a higher price in the market; and this would not only obstruct their being brought to the mint, but might occasion the expertation of the national coin in preference. It is not understood that the practice of making an abatement of price for the inferiority of standard is applicable to the English mint; and if it be not; this would also contribute to frustating the expected effect from the increase of alloy. For, in this case, a given quantity of pure metal, in our standard, would be worth as much there as in bullion of the English or any other standard.

Considering, therefore, the uncertainty of the success of the expedient, and the inconveniences which seem incident to it, it would appear preferable to submit to those of a free coinage. It is observable, that additional expense, which is one of

the principal of these, is also applicable to the proposed remedy.

It is now proper to resume and finish the answer to the first question, in order to which the three succeeding ones have necessarily been anticipated. The conclusion to be drawn from the observations which have been made on the subject, is this. That the unit, in the coins of the United States, ought to correspond with 24 grains and  $\frac{1}{4}$  of a grain of pure gold; and with 37t grains and  $\frac{1}{4}$  of a grain of pure silvor, each answering to a dollar in the money of account. The former is exactly agreeable to the present value of gold, and the latter is within a small fraction of the mean of the two last emissions of dollars—the only ones which are now found in common circulation, and of which the newest is in the greatest abundance. The alloy in each case to be one-twelfth of the total weight, which will make the unit 27 grains of standard gold, and 405 grains of standard silver.

Each of these, it has been remarked, will answer to a dollar in the money of account. It is conceived that nothing better can be done in relation to this, than to pursue the track marked out by the resolution of the 8th of August, 1786. This has been approved abroad, as well as at home, and it is certain that nothing can be more simple and convenient than the decimal subdivisions: There is every reason to expect that the method will speedily grow into general use, when it shall be seconded by corresponding coins. On this plan, the unit in the money of account will continue to be, as established by that resolution, a dollar; and its multiples, dimes,

cents; and mills, or tenths; hundredths, and thousandths.

With regard to the number of different pieces which shall compose the coins of the United States, two things are to be consulted—convenience of circulation, and cheapness of the coinage. The first ought not to be sacrificed to the last; but as far as they can be reconciled to each other, it is desirable to do it. Numerous and small (if not too minute) subdivisions assist circulation; but the multiplication of the smaller kinds increases expense; the same process being necessary to a small as to a large piece.

As it is easy to add, it will be most adviseable to begin with a small number; till experience shall decide whether any other kinds are necessary. The following, it is conceived, will be sufficient in the commencement:

One gold piece, equal in weight and value to ten units or dollars.

One gold piece, equal to a tenth part of the former, and which shall be a unit or

One silver piece, which shall also be a unit or dollar.

One silver piece, which shall be, in weight and value, a tenth part of the silver unit or dollar.

One copper piece, which shall be of the value of a hundredth part of a dollar.

One other copper piece, which shall be half the value of the former. It is not proposed that the lightest of the two gold coins should be numerous, as, in large payments, the larger the pieces the shorter the process of counting, the less risk of mistake, and, consequently, the greater the safety and the convenience; and, in small payments, it is not perceived that any inconvenience can accrue from an entire dependence on the silver and copper coins. The chief inducement to the establishment of the small gold piece, is to have a sensible object in that metal, as: well as in silver, to express the unit. Fifty thousand at a time in circulation may suffice for this purpose.

The tenth part of a dollar is but a small piece, and, with the aid of the copper coms, will probably suffice for all the more minute uses of circulation. It is less:

than the least of the silver coins now in general currency in England.

The largest copper piece will nearly answer to the half-penny sterling; and the smallest, of course, to the farthing. Pieces of very small value are a great accommodation, and the means of a beneficial economy to the peer, by enabling them to purchase, in small portions, and at a more reasonable rate, the necessaries of which they stand in need. If there are only cents, the lowest price for any portion of a vendable commodity, however inconsiderable in quantity, will be a cent; if there are half cents, it will be a half-cent; and, in a great number of cases, exactly the same things will be sold for a half-cent, which, if there were none, would cost a cent. But a half-cent is low enough for the minimum of price. Excessive minuteness would defeat its object. To enable the poorer classes to procure necessaries cheap, is to enable them, with more comfort to themselves, to labor for less; the advantages of which need no comment.

The denominations of the silver coins contained in the resolution of the 8th of August, 1786, are conceived to be significant and proper. The dollar is recommended by its correspondency with the present coin of that name for which it is designed to be a substitute, which will facilitate its ready adoption as such in the minds of the citizens. The dime, or tenth, the cent, or hundredth, the mill, or thousandth, are proper, because they express the proportions which they are intended to designate. It is only to be regretted that the meaning of these terms will not be familian to those who are not acquainted with the language from which they are borrowed. were to be wished that the length, and, in some degree, the chunsiness of some of the corresponding terms in English did not discourage from preferring them. It is useful to have names which signify the things to which they belong; and, in respect to objects of general use, in a manner intelligible to all. Perhaps it might be an improvement to let the dellar have the appellation either of dellar or unit, (which last will be the more significant,) and to substitute "tenth" for dime. In time, the unit may succeed to the dollar. The word "cent," being in use in various transactions and instruments, will, without much difficulty, be understood as the hundredth; and the half-cent, of course, as the two hundredth part.

The eagle is not a very expressive or apt appellation for the larger gold piece; but nothing better occurs. The smallest of the two gold coins may be called the dollar

or unit, in common with the silver piece, with which it coincides.

The volume or size of each piece is a matter of more consequence than its denomination. It is evident that the more superficies or surface, the more the piece will be liable to be injured by friction; or, in other words, the faster it will wear. For this reason, it is desirable to render the thickness as great, in proportion to the breadth, as may consist with neatness and good appearance. Hence, the form of the double guinea, or double louis-d'or, is preferable to that of the lialf johannes for the large gold piece. The small one cannot well be of any other size than the Portuguese piece of eight, of the same metal.

As it is of consequence to fortify the idea of the identity of the dollar, it may be best to let the form and size of the new one, as far as the quantity of matter (the alloybeing less) permits, agree with the form and size of the present. The diameter may

The tenths may be in a mean between the Spanish  $\frac{1}{5}$  and  $\frac{1}{16}$  of a dollar.

The copper coins may be formed merely with a view to good appearance, as any difference in the wearing that can result from difference of form, can be of little consequence in reference to that metal.

It is conceived that the weight of the cent may be eleven pennyweight; which will about correspond with the value of the copper and the expense of coinage. This will be to conform to the rule of intrinsic value, as far as regard to the convenient size of the coins will permit; and the deduction of the expense of coinage in this case will be the more proper, as the copper coins, which have been current hitherto, have passed till lately for much more than their intrinsic value. Taking the weight as has been suggested, the size of the cent may be nearly that of the piece herewith transmitted, which weighs 10dwt 11grs. 10m. Two-thirds of Two-thirds of the diameter of the cent will suffice for the diameter of the half cent.

It may, perhaps, be thought expedient, according to general practice, to make the copper coinage an object of profit; but where this is done to any considerable extent, it is hardly possible to have effectual security against counterfeits. This consideration, concurring with the soundness of the principle of preserving the intrinsic

value of the money of a country, seems to outweigh the consideration of profit.

The foregoing suggestions, respecting the sizes of the several coins, are made on
the supposition that the legislature may think fit to regulate this matter. Perhaps, however, it may be judged not unadviseable to leave it to executive discretion.

With regard to the proposed size of the cent, it is to be confessed, that it is rather greater than might be wished, if it could with propriety and safety be made less; and should the value of copper continue to decline, as it has done for some time past, it is very questionable whether it will long remain alone a fit metal for money. This has led to a consideration of the expediency of uniting a small proportion of silver with the copper, in order to be able to lessen the bulk of the inferior coins. For this, there are precedents in several parts of Europe. In France, the composition which is called billion, has consisted of one part silver and four parts copper; according to which proportion, a cent might contain seventeen grains, defraying out of the material the expense of coinage. The conveniency of size is a recommendation of such a species of coin; but the Secretary is deterred from proposing it, by the apprehension of counterfeits. The effect of so small a quantity of silver, in comparatively so large a quantity of copper, could easily be imitated, by a mixture of other metals of little value, and the temptation to doing it would not be inconsiderable.

The devices of the coins are far from being matters of indifference, as they may be made the vehicles of useful impressions. They ought, therefore, to be emblematical, but without losing sight of simplicity. The fewer sharp points and angles there are, the less will be the loss by wearing. The Secretary thinks it best, on this head, to confine himself to these concise and general remarks.

The last point to be discussed, respects the currency of foreign coins.

The abolition of this, in proper season, is a necessary part of the system contemplated for the national coinage. But this it will be expedient to defer, till some considerable progress has been made in preparing substitutes for them. A gradation may, therefore, be found most convenient.

The foreign coins may be suffered to circulate, precisely upon their present foota for one year after the mint shall have commenced its operations. The privilege ing, for one year after the mint shall have commenced its operations. may then be continued for another year, to the gold coins of Pertugal, England, and France, and to the silver coins of Spain. And these may still be permitted to be current for one year many at the rate of the silver coins of Spain. rent for one year more, at the rates allowed to be given for them at the mint; after

the expiration of which the circulation of all foreign coins to cease.

The moneys which will be paid into the Treasury during the first year, being re-coined before they are issued anew, will afford a partial substitute, before any interruption is given to the pre-existing supplies of circulation. The revenues of the succeeding year, and the coins which will be brought to the mint, in consequence of the discontinuance of their currency, will materially extend the substitute in the course of that year; and its extension will be so far increased, during the third year by the facility of securing the remaining species to be re-coined, which will arise from the diminution of their current values, as probably to enable the dispensing which the currency of bank bills will be likely to have made, during the same time, will also afford a substitute of another kind.

This arrangement, besides avoiding a sudden stagnation of circulation, will cause a considerable proportion of whatever loss may be incident to the establishment, in the first instance, to fall, as it ought to do, upon the Government, and will probably

tend to distribute the remainder of it more equally among the community.

It may, nevertheless, be advisable, in addition to the precautions here suggested, to repose a discretionary authority in the President of the United States, to continue the currency of the Spanish dollar, at a value corresponding with the quantity of fine silver contained in it, beyond the period above mentioned, for the cessation of the circulation of the foreign coins. It is possible that an exception in favor of this particular species of coin may be found expedient; and it may tend to obviate inconveniences, if there be a power to make the exception, in a capacity to be exerted when the period shall arrive.

The Secretary for the Department of State, in his report to the House of Representatives, on the subject of establishing a uniformity in the weights, measures, and coins of the United States, has proposed that the weight of the dollar should correspond with the unit of weight. This was done on the supposition that it would require but a very small addition to the quantity of metal which the dollar, independently of the object he had in view, ought to contain; in which he was guided by the resolution of the 8th of August, 1786, fixing the dollar at 375 grains and 64

hundredths of a grain.

Taking this as the proper standard of the dollar, a small alteration, for the sake of incorporating so systematic an idea, would appear desirable. But, if the principles which have been reasoned from, in this report, are just, the execution of that idea becomes more difficult. It would certainly not be advisable to make, on that account, so considerable a change in the money unit, as would be produced by the addition of five grains of silver to the proper weight of the dollar, without a proportional augmentation of its relative value; and to make such an augmentation, would be to abandon the advantage of preserving the identity of the dollar, or to speak more accurately, of having the proposed one received and considered as a

The end may, however, be obtained, without either of these inconveniences, by increasing the proportion of alloy in the silver coins. But this would destroy the uniformity, in that respect, between the gold and silver coins. It remains, therefore, to elect which of the two systematic ideas shall be pursued or relinquished; and it may be remarked, that it will be more easy to convert the present silver coins into the proposed ones if these last have the same or nearly the same proportion into the proposed ones, if these last have the same, or nearly the same proportion

of alloy, than if they have less.

The organization of the Mint, yet remains to be considered. This relates to the persons to be employed, and to the services which they are respectively to perform. It is conceived that there ought to be—
A Director of the Mint; to have the general superintendence of the business.

An Assay Master, or Assayer; to receive the metals brought to the Mint, ascertain their fineness, and deliver them to be coined.

A Master Coiner; to conduct the making of the coins.

A Cashier; to receive and pay them out.

An Auditor; to keep and adjust the accounts of the Mint.

Clerks; as many as the Directors of the Mint shall deem necessary, to assist the different officers.

Workmen; as many as may be found requisite.

In several of the European Mints, there are various other officers, but the foregoing are those only who appear to be indispensable.

Persons in the capacity of clerks will suffice instead of the others, with the advan-

tage of greater economy.

The number of workmen is left indefinite, because, at certain times, it is requisite to have more than at others. They will, however, never be numerous. The expense of the establishment, in an ordinary year, will probably be from fifteen to twenty thousand dollars.

The remedy for errors in the weight and alloy of the coins, must necessarily form a part, in the system of a mint; and the manner of applying it will require to be regulated. The following account is given of the practice in England, in this

A certain number of pieces are taken promiscuously out of every fifteen pounds of gold, coined at the Mint, which are deposited, for safe keeping, in a strong box, called the pix. This box, from time to time, is opened in the presence of the Lord Chancellor, the officers of the Treasury, and others, and portions are selected from the pieces of each coinage, which are melted together, and the mass assayed by a jury of the Company of Goldsmiths. If the imperfection and deficiency, both in fineness and weight, fall short of a sixth of a carat, or 40 grains of pure gold, upon a pound of standard, the master of the Mint is held excusable; because it is supposed, that no workman can reasonably be answerable for greater exactness. The expediency of some similar regulation seems to be manifest.

All which is humbly submitted.

ALEXANDER HAMILTON, Secretary of the Treasury.

The establishment of the double standard in the United States was due to Alexander Hamilton; and the act of April 2, 1792 (I Stat. L., p. 246), is the first law that established that standard in any country. Indeed, the double standard, properly so called, was something unknown

FI 95----18

in monetary legislation until introduced in the United States by the act above named. The principal provisions of that act are as follows:

#### STATUTE I.

#### [April 2, 1792.]

Sec. 9. And be it further enacted, That there shall be from time to time struck and coined at the said mint, coins of gold, silver, and copper, of the following denominations, viz: Eagles, each to be of the value of ten dollars or units, and to contain two hundred and forty-seven grains and four eighths of a grain of pure, or two hundred and seventy grains of standard gold. Half eagles, each to be of the value of five dollars, and to contain one hundred and twenty-three grains and six-eighths of a grain of pure, or one hundred and thirty-five grains of standard gold. Quarter eagles, each to be of the value of two dollars and a half dollar, and to contain sixty-one grains and seven eighths of a grain of pure, or sixty-seven grains and four-eighths of a grain of standard gold. Dollars or units, each to be of the value of a Spanish milled dollar as the same is now current, and to contain three hundred and seventyone grains and four-sixteenth parts of a grain of pure, or four hundred and sixteen grains of standard silver. Half dollars, each to be of half the value of the dollar or unit, and to contain one hundred and eighty-five grains and ten sixteenth parts of a grain of pure, or two hundred and eight grains of standard silver. Quarter dollars, each to be of one-fourth the value of the dollar or unit, and to contain ninety-two grains and thirteen sixteenth parts of a grain of pure, or one hundred and four grains of standard silver. Dismes, each to be of the value of one tenth of a dollar or unit, and to contain thirty-seven grains and two sixteenth parts of a grain of pure, or forty-one grains and three-fifth parts of a grain of standard silver. Half dismes, each to be of the value of one-twentieth of a dollar, and to contain eighteen grains and nine sixteenth parts of a grain of pure, or twenty grains and four-fifth parts of a grain of standard silver. Cents, each to be of the value of the one-hundredth part of a dollar, and to contain cleven penny-weights of copper. Half cents, each to be of the value of half a cent, and to contain five penny-weights and half a penny-weight of copper.

Sec. 11. And be it further enacted, That the proportional value of gold to silver in all coins which shall by law be current as money within the United States, shall be as fifteen to one, according to quantity in weight, of pure gold or pure silver; that is to say, every fifteen pounds weight of pure silver shall be of equal value in all payments, with one pound weight of pure gold, and so on in proportion as to any

greater or less quantities of the respective metals.

SEC. 12. And beit further enacted, That the standard for all gold coins of the United States shall be eleven parts fine to one alloy; and accordingly, that eleven parts in twelve of the entire weight of each of the said coins shall consist of pure gold, and the remaining one-twelfth part of alloy; and the said alloy shall be composed of silver and copper, in such proportions not exceeding one-half silver as shall be found convenient; to be regulated by the Director of the Mint, for the time being, with the approbation of the President of the United States, until further provision shall be made by law. And to the end that the necessary information may be had in order to the making of such further provision, it shall be the duty of the Director of the Mint, at the expiration of a year after commencing the operations of the said Mint, to report to Congress the practice thereof during the said year, touching the composition of the alloy of the said gold coins, the reasons for such practice, and the experiments and observations which shall have been made concerning the effects of different proportions of silver and copper in the said alloy.

SEC. 13. And be it further enacted, That the standard for all silver coins of the United States, shall be one thousand four hundred and eighty-five parts fine to one hundred and seventy-nine parts alloy, and accordingly that one thousand four hundred and eighty-five parts in one thousand six hundred and sixty-four parts of the entire weight of each of the said coins shall consist of pure silver, and the remaining one

hundred and seventy-nine parts of alloy; which alloy shall be wholly of copper.

SEC. 16. And be it further enacted, That all the gold and silver coins which shall have been struck at, and issued from the said Mint, shall be a lawful tender in all payments whatsoever, those of full weight acording to the respective values herein-before declared, and those of less than full weight at values proportional to their

respective weights.

SEC. 20. And be it further enacted, That the money of account of the United States shall be expressed in dollars or units, dismes or tenths, cents or hundredths, and milles or thousandths, a disme being the tenth part of a dollar, a cent the hundredth part of a dollar, a mille the thousandth part of a dollar, and that all accounts in the public offices and all proceedings in the courts of the United States, shall be kept and had in conformity to this regulation.

Approved, April 2, 1792.

#### ANALYSIS OF HAMILTON'S REPORT.

An analysis of Hamilton's report on the establishment of a mint shows that while his convictions inclined him to the gold standard, if only one metal was to constitute our full legal-tender currency, expediency and the necessity of providing the country with a sufficient amount of currency, which he believed could not be furnished at the time by the use of gold alone, induced him to recommend the double standard with a fixed ratio in coinage between the two metals. His reason for preferring gold, if only one metal were employed, was that gold was less liable to variations of value than silver; for Hamilton had a clear conception of the truth that the metal of which the monetary medium consists, in order to constitute a just measure of the value of all other things, should itself be subject to as few and as slight fluctuations of value as is in the nature of things possible, and that a metal subject to great and sudden changes of value was utterly unfit for such a purpose.

"As long," he says, "as gold, either from its intrinsic superiority as a metal, from its rarity, or from the prejudices of mankind, retains so considerable a preeminence in value over silver as it has hitherto had, a natural consequence of this seems to be that its condition will be more stationary. The revolutions, therefore, which may take place in the comparative value of gold and silver will be changes in the state of

the latter rather than in that of the former."

The language here used leads to the conclusion that the relative increase or decrease of the production of gold or silver was a cause of change in their relative stability of value with which Hamilton did not concern himself. Nor was there any reason why he should, since the relative production of gold and silver in the world from 1780 to 1820 was probably more uniform as to value than it ever was before or ever has been since for an equal period of time, the value of the gold averaging very nearly 24 per pent and that of the silver 76 per cent of the total value of the production of the precious metals from 1781 to 1821. Still less had he to take into consideration the production of the money metals in the United States, for the country had in his time produced little or none of them, and there were no indications that it would at any near date produce them in any large quantities.

The causes of change in the comparative value of gold and silver which he had in view were confined to those mentioned in the above

and in the following extract:

Gold may, perhaps, in certain senses, be said to have a greater stability than silver, as being of superior value; less liberties have been taken with it in the regulations of different countries. Its standard has remained more uniform, and it has in other respects undergene fewer changes, as, being not so much an article of merchandise, owing to the use made of silver in the trade with the East Indies and China, it is less liable to be influenced by circumstances of commercial demand. And it, reasoning by analogy, it could be affirmed that there is a physical probability of greater proportional increase in the quantity of silver than in that of gold, it would afford an additional reason for calculating on greater steadiness in the walne of the latter.

This prediction that the revolutions which might take place in the relative value of the two metals would be changes in the state of silver

rather than in that of gold was soon fulfilled.

Hamilton's reasons for the recommendation of the double standard, with a gold unit as well as a silver unit of value, are very plainly stated by him in his report. He did not deem it advisable to attach the unit exclusively to either of the metals—a wiew in which Jefferson fully

agreed with him, writing to Hamilton, who had sent him his report: "I concur with you in thinking that the unit must stand on both metals,"—and hence one of his recommendations was that there should be stamped a gold piece of the denomination of one dollar in order to have "a sensible object in that metal as well as in silver to express the unit."

The coinage of the gold dollar, however, was not provided for by the act of April 2, 1792. The eagle having been made by that act the basis of the gold coins, it became the sensible representative of the goldmoney unit, containing, as the law declared it should, ten gold dollars

or units

Hamilton did not recommend attaching the unit exclusively to either metal, because that could not be done without destroying the office and character of one of them as money, without abridging the quantity of the circulating medium, and without diminishing the utility of one of the metals. The country at that time was in no condition to bear a lessening of the amount of the circulating medium, for it was still suffering grievously from the widespread commercial ruin produced by the worthless Continental paper, which had driven metallic money out of use.

When Hamilton wrote, the single gold standard had not yet been adopted by monetary legislation in any country. Not until a quarter of a century later was it made the basis of the monetary system of England; and its adoption by the United States in 1792 would have encountered almost insuperable obstacles. An abundant specie currency was needed. The use of silver was rooted in the commercial habits of the people. There was little or no gold in general circulation. Hence, silver had to be retained and gold added to it if a sufficiency of currency for the needs of commerce was to be procured. The object, to which Hamilton was disposed to make all else subservient in his scheme in so far as it could be done without sacrificing correct monetary principles, was the securing of metallic money in abundance. He said "that by attaching the unit to both metals, silver might be retained as the money of the country, and that gold money might be added to it." Hence his recommendation of the double standard.

This point having been settled, Hamilton approaches the next, that

relating to the ratio:

"If then," he says, "the unit ought to be attached exclusively to neither of the metals, the proportion which ought to subsist between them in the coins becomes a preliminary inquiry, in order to a proper adjustment. \* \* \* In establishing a proportion between the metals there seems to be an option of one of two things:

"To approach as nearly as it can be ascertained the mean or average proportion in what may be called the commercial world, or to retain

that which now exists in the United States."

Unfortunately, Hamilton thought that to ascertain the first with precision would require better information than was then possessed or than could be procured without inconvenient delay, but fortunately the ratio he finally concluded to recommend was, although he was not aware of it, the exact ratio, within an almost negligible fraction, in the commercial world. In his report he adopted this ratio by adopting the ratio in this country at the time. At present the commercial ratio of value between gold and silver is, owing to the facility of intercourse between nations due to steam and electricity, the same the world over, allowance being made for the cost of transportation, insurance, etc., from one place to another. It was not so completely so in Hamilton's time,

nor was the collection of information as to the ratio between the two precious metals in the various countries of the world as easy then as it would be now. It is therefore not a matter of surprise that he chose to retain the ratio which at the time existed in the United States. Yet, in deciding to adopt this latter proportion, he took pains to show that it did not depart very widely from the one that obtained simultaneously in England, Holland, and Spain. It is significant that he repudiated the inference which might possibly be implied that he favored the ratio of 1 to 15 because Sir Isaac Newton, in a representation to the treasury of Great Britain in the year 1717, after stating the particular proportions in the different countries of Europe, concluded:

By the course of trade and exchange between nation and nation in all Europe fine gold is to fine silver as  $14\frac{1}{3}$  or 15 to 1.

"However accurate and decisive this authority may be deemed," says Hamilton, "in relation to the period to which it applies, it can not be taken at the distance of more than seventy years as a ratio for determining the existing proportion;"—words which they will do well to ponder who think that the ratio in coinage of gold and silver can be determined for a later by an earlier generation. Hamilton's view was that the ratio in coinage of the two metals should be their commercial ratio; in other words, that the value of the fine metal in a coin, whether gold or silver, should be, so far as practicable, the same as its value in the form of bullion. "There can," he says, "hardly be a better rule in any country for the legal than the market proportion, if this can be supposed to have been produced by the free and steady course of commercial principles. The presumption in such case is that each metal finds its true level, according to its intrinsic utility, in the general system of money operations." In this he was in entire accord with Jefferson, who wrote:

Just principles will lead us to inquire into the market price of gold in the several countries with which we shall be principally connected in commerce and to take an average from them.

In carrying out the plan suggested by Hamilton, Congress, in the act of April 2, 1792, departed only slightly from his recommendations.

The standard weight of the dollar was fixed at 416 grains, and, as it was to contain 371½ grains of fine silver, the alloy was about one-ninth. As already noted above, the coinage of the gold one-dollar piece was not authorized, the gold-money unit finding its sensible representative

in the eagle, which contained ten.

Divisional silver coins of a weight and fineness corresponding to that of the dollar piece were provided for; that is, 2 half dollars or 4 quarter dollars or 10 dimes contained 371½ grains of pure silver, the same as the silver dollar. Any cause, therefore, that influenced the circulation of the silver dollar necessarily influenced that of the fractional pieces. Since "free coinage," in the sense above explained, was provided for by the act, there was no "seigniorage" or charge exacted from depositors of bullion at the mint for manufacture into coins. All gold coins and all silver coins, even divisional ones, were made legal tender to an unlimited extent.

There has never been a more perfect example of the double-standard system than that recommended by Hamilton in his report on the establishment of a mint and embodied in the law of April 2, 1792. Its author has been criticised for not having made every endeavor possible to ascertain the commercial ratio of gold to silver in foreign countries at the time he wrote. From the view-point of abstract monetary

principles this criticism is warranted; for no bimetallic system can long continue to exist in a country having an extensive foreign commerce where the ratio of the precious metals in coinage does not agree with their market ratio in foreign lands, particularly in those with which it trades. Had Hamilton, however, made the endeavor to ascertain the market proportional value of gold and silver in foreign lands, and had he been successful in his effort to discover it, he would not, as was remarked above, have been led to a conclusion different from that which he reached by adopting solely the market ratio of the precious metals in the United States.

Thus, though wrong in principle, if even that can be said, since be was contending with a practical difficulty, while he recognized the principle which he did not follow and tells why he did not follow it, he was right in fact, and the bimetallic system of which he was the author did not suffer in the beginning from the adoption of a wrong ratio between

the metals.

It soon, however, began to totter under the defect inherent in every bimetallic system, viz, the impossibility of keeping the mint ratio of the two metals in permanent agreement with their market ratio, a defect which in a bimetallic system calls for repeated remedies, consisting in the changes of the legal ratio to correspond with the ever shifting market ratio, under penalty of the disappearance from the country of the coins manufactured from the metal undervalued in the mint ratio. This defect was enhanced by a second one in the system recommended by Hamilton by the fact that in it the divisional silver coins were full legal tender and of the same weight and fineness proportionately as the full legal tender silver dollars, two 50 cent pieces, four quarters, or ten dimes containing exactly the same amount of fine silver as the dollar pieces, the consequence of which was, that when silver came to be undervalued in the mint ratio not only the silver dollars were exported, but almost the entire fractional currency, leaving the country with scarcely any small change for ordinary retail transactions. a result of the undervaluation of silver in the ratio, the silver dollar pieces were exported, the gold full legal-tender coins still remained; but when the fractional silver pieces were exported from the same cause, there remained no divisional coins save copper pieces.

Our monetary legislation subsequent to 1792 was intended, mainly to correct these two defects. They were the moving causes of the passage

of the acts of 1834, 1837, 1853, and 1873.

As the monetary system recommended by Hamilton in his report on the establishment of a mint and enacted into a law on April 2, 1792, was the first instance in history of the bimetallic system proper, so, too, it was the first to illustrate the operations of that system and to demonstrate that what is called the double standard system of gold and silver, however well poised and adjusted it may be in the beginning, necessarily in time evolves into a single-standard system of either gold or silver—of gold, if silver be undervalued in the ratio, and of silver if gold be the undervalued metal—one of these standards ever alternating with the other, in obedience to Gresham's law, that "if debased coin is attempted to be circulated with full-valued coin, all of the latter will disappear from circulation and the overvalued and debased coin will alone remain, to the ruin of commerce and business."

The United States monetary system established in 1792 is, indeed, as striking a demonstration as can be found in the entire history of monetary arrangements of the impossibility of maintaining a fixed legal ratio between silver coin and gold coin; and here it may be well

to note that this fixed legal ratio of silver to gold has always been the chief impediment in the way of the various attempts at international bimetallism made during the last thirty years, and will probably continue to prevent it in the future.

Who would not revolt at the idea of decreeing the obligatory equivalence of two constant quantities of wheat and oats, of cotton and wool, or iron and lead? Under such conditions, no honest transaction would be possible, each of these several products being affected, respectively, by dissimilar and variable rises and falls. The forced solidarity of the products would cause inevitable injustice in exchanges. Why should an obligatory equivalence between two determinate weights of gold and silver be more practical or more legitimate?

It was remarked above that the law of April 2, 1792, was the first to introduce the double standard, properly so called, into the monetary legislation of any country. It is not intended thereby to convey the erroneous impression that gold and silver were not simultaneously coined and put in circulation as monetary instruments previous to the passage of that act. Even before the invention of coinage, gold and silver in bars and rings of a determinate weight were employed as media of payment. The ancients, from the very beginning, considered gold and silver equally entitled to a place in their coinage systems.

This simultaneous employment of gold and silver as money has been maintained up to the present time, and has not been discontinued even in countries with the single gold standard. But this simultaneous employment of gold and silver in a country's monetary system may exist in various forms, and can not be, by any means, considered as establishing the double standard in such country. As a rule, the one metal or the other always asserted its supremacy in trade. The coins of the country were manufactured from the metal that did, and the other metal, as well as billon, or copper, was associated with the principal coins by the States endowing it with a payment power to a nominal value superior to its market value. Overvaluations of this kind sometimes occurred in the case of gold coins, but, as a rule, silver served as the representative of credit money, and was issued sometimes as divisional coins of limited legal tender power, and sometimes as full legal tender. When issued, however, as full legal tender, the legal ratio of value always proved ineffectual if the manufacture of the under-value money was very large, because the under-value money became, in ordinary trade, the universally accepted medium of exchange and measure of value, and the gold coins, as well as the large silver coins, whose value had not been debased, acquired an increased current value; in other words, they were at a premium.

After the end of the seventeenth century, gold began to obtain supremacy in England and France commenced to accumulate a large amount of that metal. The system existing in countries with a mixed currency of gold and silver from the sixteenth to the end of the eighteenth century was not the double-standard system as understood in our day, but a system of the parallel standard; that is, a system in which gold and silver coins circulated on an equality but with no fixed legal ratio between the two metals as in the double-standard system. Contracts were concluded partly in gold and partly in silver money, or the use of the one kind of money or the other in certain transactions had been fixed by long continued custom. As at that time, in consequence of the debasement of the coins, in payments which were not required to be immediately made, agreements on the coins to be received by the creditor were usual, the parallel system of valuation was no great

impediment to trade. Even when the value of coins of the one metal was regulated legally in terms of the other, the rise of the rate of exchange of the better metal could not be prevented. Still, legislative attempts were frequently made after the beginning of the sixteenth century to arrest the rise of the value of gold coins.

The principles of the double standard, says Professor Lexis, first found legal expression and the real double standard was first adopted in the United States by the act of the 2d of April, 1792.

remarked, that act expressly provides that—

1. The proportional value of gold and silver in all coins which shall by law be current as money within the United States shall be as fifteen to one, according to quantity and weight of pure gold and silver; that is to say, every fifteen pounds weight of pure silver shall be of equal value in all payments with one pound weight of pure

2. That all the gold and silver coins which shall have been struck at and issued from the mint shall be lawful tender in all payments whatsoever.

3. That it shall be lawful for any person or persons to bring to the said mint gold and silver bullion, and that the bullion so brought shall be there assayed and coined, as speedily as may be, and that free of expense to the person or persons by whom the same shall have been brought: Provided, nevertheless, That it shall be at the mutual option of the party or parties bringing such bullion and of the Director of the Mint to make an immediate exchange of coins for standard bullion with a deduction of one-half per cent from the weight of the pure gold or pure silver contained in the said bullion as an indemnification to the mint for the time which will be necessarily required for coining the said bullion and for the advance which shall have been made in coins.

These three characteristics, a legal ratio of value between the two metals, unlimited legal-tender power of the coins of both, and unlimited coinage of them either gratis or with a mint charge to cover the actual cost of manufacture, must be considered necessary to the existence of the double standard, properly so called. If the coins of the one metal are made unlimited legal tender at a fixed legal ratio, while the coinage of those of the other is limited, or can not be effected on individual account, the double standard does not exist, but rather the "limping standard," or better, the "limping double standard."

Now, the United States act of April 2, 1792, was the first that introduced these three distinguishing marks into the monetary system of any country. Hence the contention that the double standard proper

was first adopted by the United States by virtue of law.

The system established by the act of April 2, 1792, worked well for a time, although the ratio adopted soon become unfavorable to gold, which began and continued to be exported or hoarded until there was

little or no gold in circulation in the United States.

The ratio of value between gold and silver recommended by Hamilton, viz, 1 to 15, corresponded very closely with the price of silver in London at the time, but shortly after the first coinages at the United States mint gold began slowly to rise. Up to 1806, however, the coinage of the country was mainly gold. This was doubtless partly due to the fact that the trade on the Lower Mississippi caused a continual influx of doubloons. The largest silver coinage during this period (1792-1806) was in 1799 (\$423,515), and the gold coinage reached its maximum in 1802, when it amounted to \$423,310. From 1806 to 1834 the coinage of silver preponderated. It could not be otherwise, because in Europe the ratio in coinage of gold and silver was between 15% and Still there was, in 1820, a coinage of \$1,319,030 in gold against \$501,680 in silver.

An ounce of gold purchasing only 15 ounces of silver in the United States, while in Europe it was worth 15½ or 16, gold was undervalued in the United States and naturally flowed to those countries in which

it could command 15½ or 16 ounces of silver instead of 15. The greater part of the gold coinages for the United States after 1820 went to England, where, owing to the English resumption act passed in 1819, there was then a great demand for that metal, but not simply in exchange for silver at the nominal par value in the United States, for in the twenties the gold dollar reached a premium of about 5 per cent as compared with the silver dollar, and the comparatively large coinage of gold in the years just preceding the amendment of the law of April 2, 1792, can be accounted for only by this premium. The coinages were:

•	Year.	Gold.	Silver.
			\$2, 495, 400
			3, 175, 600
1833	······································	978, 550	2, 759, 000

The prevalence of the ratio of 1:153 in Europe and the exportation of gold from the United States was promoted by the monetary legislation of France in the early part of this century. The ratio of gold to silver in France, about the time that Hamilton wrote his report on the establishment of a mint, was 1 to  $14\frac{7}{9}$ , or, according to M. Gauden, Minister of Finances, 1 to 15. A message addressed to the Council of Five Hundred, in 1796, favored the ratio of 1 to 16, with the power to subsequently modify that proportion according to the variations of the market value of gold, but the proposition was rejected. Gauden finally succeeded in 1803 in having the future monetary system of France based on the mintage of both metals, with a ratio of 1 to 15½ and the free coinage of both gold and silver. The adoption by France of the ratio of 1 to 15½ was in flat contradiction with the monetary legislation of the United States, whose ratio corresponded to a price of silver of 62% pence per ounce standard, while that of France corresponded to one of  $60\frac{7}{8}$  pence. Although at this time it was not as easy as it would be now to turn this difference of 2 pence, equivalent to about 3 per cent, to account by way of arbitrage, and although such operations were not then as frequent as at present, this divergence occasionally caused serious disturbances in our monetary system, and was pointed out as an element of danger in the aggregate monetary operations between the two countries. As trade developed and commercial intercourse between France and the United States assumed larger proportions, the United States began to feel the consequences of this divergent ratio by a loss of a large portion of the gold coins which were exported to France. profitable difference between the mint and the market ratios in the United States began to appear as early as 1810, and the money brokers were not slow to take advantage of it. Benton claimed that there was no gold in the United States in 1812. This was not the case, but it is certain that there was very little in the twenties.

The causes of the loss of its gold and the means to be adopted to prevent it in the future were the cause of much discussion in the United

States.

John Quincy Adams, Secretary of State, in his report on weights and measures, prepared in conformity with a resolution of the Senate of March 3, 1817, and submitted to that body February 22, 1821, questioned the correctness of the data on which Hamilton had based his reckoning in 1791.

Two years after the passage of the Senate resolution of March 3, 1817, i. e., on March 1, 1819, the Secretary of the Treasury was asked by the House of Representatives to report such measures as might be expedient to procure and retain a sufficient quantity of gold and silver coin in circulation in the United States. In his report, Secretary Crawford stated that from the beginning of the war of 1812 until the suspension of specie payment in the United States in 1814 a large amount of specie was taken out of the United States by the sale of Government bills at a discount. Respecting the ratio of value between gold and silver, Secretary Crawford's report says:

The relative value of gold and silver has been differently established in different nations: It has been different in the same nation at different periods. In England, an ounce of gold is equal in value to about 15.2 ounces of silver. In France, it is equal to 15.5, and, in Spain and Portugal, to 16 ounces. In the United States, an ounce of gold is equal to 15 ounces of silver. But the relative value of these metals in the markets, frequently differs from that assigned to them by the laws of the different civilized States. It is believed that gold, when compared with silver, has been for many years appreciating in value; and now, everywhere, commands in the money markets, a higher value than that which has been assigned to it in States where its relative value is greatest. If this is correct no injustice will result from a change in the relative legal value of gold and silver, so as to make it correspond with their relative marketable value. If gold, in relation to silver, should be raised 5 per cent one ounce of it would be equal to 15.75 or 15% ounces of pure silver. This augmentation in its value would cause it to be imported in quantities sufficient to perform all the functions of currency. As it is not used to any considerable extent as a primary article of commerce, the fluctuations to which the silver currency is subject from that cause; would not affect it. It would be experted only when the rate of exchange against the country should exceed the expense of exportation. In ordinary circumstances, such a state of exchange would not be of long continuance. If the currency of the United States must, of necessity, continue to be paper, convertible into specie, an increase of the gold coinage, upon principles which shall afford the least inducement to exportation, is probably the most wholesome corrective that can be applied, after the rigid enforcement of that convertibility.

In the report made to the House of Representatives under date of March 17, 1832, by Mr. C. P. White, from the Select Committee of the House of Representatives on Coins, it was claimed "that there was no export of gold from the United States of consequence from 1792 to 1821, and that there was no indication that gold was rated too low in the United States standard of 1 to 15 earlier than 1821," when the English demand commenced.

The report of the Committee on the Currency transmitted to the House of Representatives on the 2d of February, 1821, stated in opposition to this:

That they are of opinion that the value of American Gold compared with silver, ought to be somewhat higher than by law at present established.

On inquiry they find that Gold coins, both foreign and of the United States, have, in a great measure, disappeared; and from the best calculation that can be made there is reason to apprehend they will be wholly banished from circulation, and it ought not to be a matter of surprise, under our present regulations, that this should be the case.

There have been coined at the Mint of the United States nearly six millions of dollars in Gold.

It is doubtful whether any considerable portion of it can at this time be found within the United States.

It is ascertained \* \* \* that the Gold coin, in an office of discount and deposit of the Bank of the United States \* \* \* in November 1819, amounted to \$165,000 and the silver coin \* \* \* to \$118,000. That since that time, the silver coin has increased to \$700,000, while the Gold coin has diminished to \* \* \* \$1,200, one handred only of which is American. \* \* \*

There is proof positive that, although the ratio between gold and silver provided for by the act of April 2, 1792, was very nearly the actual commercial ratio at the time and the exact commercial ratio one year after its passage, it soon departed from the market ratio, and in some years, as in 1808 and 1812, exceeded 1 to 16.

The commercial ratio of gold to silver from 1791 to 1834, as calculated

by Dr. Soetbeer, was:

Xem	. Ratio.	Year.	Ratio.	Year.	Ratio.	Year.	Ratio.	Year.	Ratio.
1791	15.:05	1800	15.68	.1809	15.96	1818	15.35	1827	15, 74
1792	- 1	1801	15.46	1810	15.77	1819	15. 33	1828	15. 78
:1793	15.00	1802.	1526	1811	15. 53	1820	15. 62	1829 .	15.78
1794		1803	.15.41	1812	16. 11	1821	15.95	1830	15.82
1,795 31796		1804	15.41 15.79	1813 1814.	16. 25 :15. 04	1822 1823	15.80 15.84	1831 1832	15.72 15.73
1797		1806	15.75	1815.	15. 26	1824	15.82	1833	15. 93
1798	15.59	1807	15.43	1816	15. 28	1825	15.70	1834	15. 73
1799	115.74	1808	16.08	1817.	45.11	1826	15. 76		1

But the disappearance of gold from the United States, under the operations of the act of 1792, was not the only monetary evil from which the country suffered at this time. The silver coins stamped at the Mint of the United States were also rapidly leaving the country, being expelled by foreign silver coins. The act of 1792 provided that each dollar should be of the value of a Spanish milled dollar, the same as then cur-There were more Spanish milled dollars than dollars coined in the United States in circulation, and as they were heavier than the latter they commanded a premium. The natural result of this was an inducement to hoard the foreign pieces and coin United States dollars. The lighter United States dollars were exported to the West Indies and other places where they were received at their nominal value, on an equality with Spanish dollars. These were imported into the United States, recoined, and a profit realized on the operation. Whenever the banks were called upon for silver for exportation they paid out United "This process," says Professor Laughlin, "kept the Mint busy, without the effect of filling the circulation with our own coins. The Mint, therefore, was a useless expense to the nation, but a source of profit to the money brokers."

On this account, and to prevent the exchange of United States silver dollars for foreign silver pieces, President Jefferson ordered the suspension of the coinage of silver-dollar pieces in the following note, addressed by Madison, then Secretary of State, to the Director of the Mint, at

Philade'phia:

DEPARTMENT OF STATE, May 1, 1806.

JAMES MADISON.

SIR: In consequence of a representation from the director of the Bank of the United States that considerable purchases have been made of dollars coined at the Mint for the purpose of experting them, and as it is probable further purchases and expertations will be made, the President directs that all the silver to be coined at the Mint shall be of small denominations, so that the value of the largest pieces shall not exceed half a dollar.

I am, etc., Robert Patterson, Esq., Director of the Mint.

After the issuance of this order no silver dollar pieces were stamped for thirty years. But notwithstanding the discontinuance of the coinage of silver dollars, half dollars, two of which contained as much fine

metal as a dollar piece, continued to be coined and exported. Spanish dollars were imported, being exchanged against American half dollars, which went out. Up to 1830 \$34,000,000 of silver coins of all denominations had been coined by the Unitéd States Mint, only \$14,000,000 of which, it was estimated, remained in the country. The Spanish pieces which, it was estimated, remained in the country. which had been substituted for United States pieces suffered greatly from abrasion. They had lost much in weight, and this, too, contributed to the expulsion from circulation of American coins. The evil had grown to such dimensions that a memorial of the New York bankers, led by Mr. Gallatin, in 1834, represented:

That the dollar of Spain and the gold and silver coins of the United States constitute at present the only legal currency of the country; and that, from the commercial value of the Spanish dollar and the intrinsic value of the gold coins of the United States, they have become mere articles of merchandise and are no longer to be considered as forming any portion of the metallic currency.

From the discussions on the coinage previous to the passage of the act supplementary to the "act establishing a mint and regulating the coins of the United States," of April 2, 1792, extracts from two reports (he made three altogether) of Mr. Campbell P. White, of New York, are here given, because they contain some of the most significant utterances in the currency controversy of the times, containing as they do a confirmation from experience of recognized principles of monetary science. In the first report of 1831 Mr. White says:

That there are inheren, and incurable defects in the system which regulates the standard of value in both gold and silver; its instability as a measure of contracts and mutability as the practical currency of a particular nation are serious imperfections, while the impossibility of maintaining both metals in concurrent, simultaneous, or promiscuous circulation appears to be as clearly ascertained.

That the standard being fixed in one metal is the nearest approach to invariableness, and precludes the necessity of further legislative interference.

# In the report of 1832 he says:

If both metals are preferred, the like relative proportion of the aggregate amount of metallic currency will be possessed, subject to frequent changes from gold to silver, and vice versa, according to the variations in the relative value of these metals. The committee think that the desideratum in the monetary system is the standard of uniform value; they can not ascertain that both metals have ever circulated simultaneously, concurrently, and indiscriminately in any country where there are banks or money dealers, and they entertain the conviction that the nearest approach to an invariable standard is its establishment in one metal, which metal shall compose exclusively the currency for large payments.

THE GOLD PERIOD, 1834-1853—ACTS OF JUNE 28, 1834, AND JANUARY 18,

The final result of the protracted discussion of the changes which time and experience had shown must be made in the monetary system of the United States, established by the act of April 2, 1792, was the passage of the act of June 28, 1834. (4 Stat. L., p. 699.)

The text of that act is as follows:

AN ACT concerning the gold coins of the United States, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America, in Congress assembled, That the gold coins of the United States shall contain the following quantities of metal, that is to say: each eagle shall contain two hundred and thirty-two grains of pure gold, and two hundred and fifty-eight grains of standard gold; each half-eagle one hundred and sixteen grains of pure gold, and one hundred and twenty-nine grains of standard gold; each quarter-eagle shall contain fifty-eight grains of pure gold, and sixty-four and a half grains of standard gold; every such eagle shall be of the value of ten dollars; every such half eagle shall be of the value of two dollars; and every such quarter eagle shall be of the value of two dollars and fifty cents; and the said gold coins shall be receivable in

all payments, when of full weight, according to their respective values; and when of less than full weight, at less values, proportioned to their respective actual weights. SEC. 2. And be it further enacted, That all standard gold or silver deposited for coinage after the thirty-first of July next, shall be paid for in coin, under the direction of the Secretary of the Treasury, within five days from the making of such deposit, deducting from the amount of said deposit of gold or silver one-half per centum: Provided, That no deduction shall be made unless said advance be required by such depositor within forty days.

SEC. 3. And be it further enacted, That all gold coins of the United States, minted anterior to the thirty-first day of July next, shall be receivable in all payments at the

rate of ninety-four and eight-tenths of a cent per pennyweight.

SEC. 4. And be it further enacted, That the better to secure a conformity of the said gold coins to their respective standards as aforesaid, from every separate mass of standard gold which shall made into coins at the said Mint, there shall be taken, set apart by the Treasurer and reserved in his custody, a certain number of pieces, not less than three, and that once in every year the pieces so set apart and reserved shall be assayed under the iuspection of the officers, and at the time, and in the manner now provided by law, and, if it shall be found that the gold so assayed, shall not be inferior to the said standard hereinbefore declared, more than one part in three hundred and eighty-four in fineness, and one part in five hundred in weight, the officer or officers of the said Mint whom it may concern, shall be held excusable; but if any greater inferiority shall appear, it shall be certified to the President of the United States, and if he shall so decide, the said officer or officers shall be thereafter disqualified to hold their respective offices: Provided, That if, in making any delivery of coin at the Mint in payment of a deposit, the weight thereof shall be found defective, the officer concerned shall be responsible to the owner for the full weight,

Sec. 5. And be it further enacted. That this act shall be in force from and after the thirty-first day of July, in the year one thousand eight hundred and thirty-four.

Approved, June 28, 1834.

The act of June 28, 1834, it will be noticed, changed the ratio of gold to silver from 1:15 to 1:16 (15.988) by reducing the weight of the fine

gold in the gold coins to 23.20 grains Troy.

An act approved January 18, 1837, changed the weight of the fine gold in the gold coins to 23.22 grains, and the fineness from 0.899,225 to 0.900. Both the acts of 1834 and that of 1837 left the fine weight of the silver dollar unaltered. Its standard weight, however, was lowered from 416 to  $412\frac{1}{2}$  grains.

The act of 1834 provided for a mint ratio, 1:16, in which silver was undervalued as gold had been undervalued in that of 1792. The result was that thereafter silver was expelled from circulation as gold had

been before.

.Up to 1847, however, the variation of the legal ratio established in 1834, from the commercial, was not great enough to allow the coinages of gold in the United States to preponderate to any very marked extent over the silver coinages, although gold flowed to the mint to an amount four times as large as in 1833. It is noteworthy that after the year 1801 our silver coinage consisted almost exclusively of half dollars, and that comparatively few dollar pieces were stamped. The silver half dollars were full legal tender and this fact assimilated them to the dollar pieces two of them containing exactly the same amount of fine silver as the 1-dollar piece. While the fractional dollar pieces were thus coined, the United States possessed the double standard proper, in the full sense of the term. But the existence of the double standard in the United States could exercise no great influence outside of it because the amounts of both metals coined were rather small.

Not until 1847 did the coinage of gold assume any very great dimensions. In that year and before the Californian discoveries it amounted

to \$20,202,325, but fell in 1848 to \$3,775,513.

The effect of the Californian discoveries on the ratio of value of the two metals was first felt in 1850, and the coinages of silver began to decrease. The turning point was reached in 1853; the coinages of

silver rose rapidly, but simply because, by the act of February 21 of that year, half dollars, quarter dollars, dimes, and half dimes (in the ratio of value of 1:14.88 as compared with gold) were made legal tender to the amount of only \$5, and a larger amount of them had to be coined. It has been already remarked that it was an error to provide, as the act of 1792 had done, that the subsidiary silver coins—that is, those of a denomination below one dollar-should have a weight and fineness corresponding to that of the dollar piece, and that they should have the same legal tender power as the latter, for it subsequently led to the disappearance of all silver coins used for small change. When 3711 grains of fine silver came to be worth more than one dollar in gold, 2 half dollars or 4 quarter dollars or 10 dimes or 20 half dimes came to be worth the same sum, and there was as large a profit in exchanging subsidiary silver coins as dollar pieces for gold, so that the former were expelled from circulation, the business of the country was much hampered by the lack of fractional coins, and the United States began to lose not only its silver dollar pieces but its silver fractional currency.

GOLD PERIOD, 1853-1873—DEMONETIZATION OF SILVER BY THE ACT OF FEBRUARY 21, 1853.

In 1850 the United States had practically the single gold standard, and not enough of fractional silver for the requirements of retail trade.

The act of February 21, 1853, remedied this last evil as was said above by providing that from and after the 1st day of June, 1853, the weight of the half dollar should be 192 grains, and the quarter dollar, dime, and half dime, should be, respectively, one half, one-fifth, and one-tenth of the weight of the half dollar, and that the subsidiary silver coins issued in conformity with the above provisions should be legal tender in payment of debts for all sums not exceeding \$5.

The passage of the act of 1853 was, to say the least, an impairment of the double standard in the United States. Taken in connection with the changing of the legal ratio from 1:15 to about 1:16, in 1834, it was intended to place the country, de facto, on the single-gold standard, and there were those who openly avowed that such was its aim. Hon. Cyrus L. Dunham, of Indiana, a member of the Committee on Ways and

Means of the House of Representatives, said:

In answer to another plan the same speaker said:—

We would thereby still continue the double standard of gold and silver, a thing the committee desire to obviate. They desire to have the standard currency to consist of gold only, and that these silver coins shall be entirely subservient to it and that they shall be used rather as tokens than as standard currency. (See Congressional Globe, Appendix, second session Thirty-second Congress, p. 190.)

The act of 1834, establishing the legal ratio of 1:16, had, as already remarked, undervalued silver. The average commercial ratio of the two metals did not approach very closely to this legal ratio until 1873, when it was 1:15.92, and 1874, when it reached 1:16.17. In 1833 the commer-

cial ratio very nearly coincided with the United States legal ratio, having been 1:15.93, a figure to which it did not again approximate until 1845, when it was 1:15.92. After this the ratio rapidly changed to the disadvantage of gold. It was in 1846, 1:15.90; 1847, 1:15.80; in 1848, 1:15.85; in 1849, 1:15.78; in 1850, 1:15.70; in 1851, 1:15.46; in 1852, 1:15.33. The depreciation of gold evidenced by these figures was, especially after 1849, due to the discoveries of gold in California and Australia. From an aunual average production in 1840 to 1850 of about \$38,000,000 the gold supply increased to over \$150,000,000 after 1850. The natural effect of this increase was to lower the value of gold. If the gold and silver coins of the United States were both to be kept in circulation, a new adjustment of the legal ratio to the market ratio was necessary; but as no effort was made to effect such a new adjustment in the legislation of 1853, it must be inferred that the framers of the act of February 21, of that year, had no desire to keep silver any longer in circulation, and that they drafted it in such a manner that gold alone would be retained, with silver as subsidiary coin. The exportation of silver was heaviest between 1848 and 1851, for the value of silver was then greatest as compared with gold.

The act of February 21 was a step in the direction of the gold standard. No reference was made in it whatever to the silver dollar. The reason is that it had not been in circulation for years. Up to 1853 less than four million standard silver dollars had been coined in the United States, and of these scarcely any were still in circulation. There was, on the other hand, an abundance of gold, consequent on the discoveries in California and the overvaluation of the metal in the mint ratio. The change in the standard implied in the act was regarded by the

people with indifference, if indeed they noticed it at all.

The framers of the law, on the other hand, knew full well what they were doing, as is shown by this utterance of the chairman of the House Committee on Ways and Means:

We intend to do what the best writers on political economy have approved; what experience, where the experiment has been tried, has demonstrated to be necessary and proper—to make but one standard of currency and to make all others subservient to it. We mean to make gold the standard coin, and to make these new coins applicable and convenient, not for large, but for small transactions.

It thus happens that the real demonetization of silver in the United States took place in 1853. Its demonetization in 1873 was only nominal. Nor was its demonetization in 1853, as has just been shown, the result of accident or an oversight. It was deliberate and intentional. The act of 1873 only conformed the law to the actual monetary condition, so far as the metallic currency of the United States was concerned, that had existed here for nearly a quarter of a century anterior to its passage.

The experience of the country since 1792 had demonstrated that under a bimetallic system, with a fixed legal ratio between the two metals, the one undervalued in the coinage disappeared from circulation and was thus practically demonetized, and it was logically inferred by the advocates of a gold standard in 1853 that by undervaluing silver in the ratio of 1:16 silver would disappear and leave the country with a legal tender currency composed of gold only. In this connection Professor Laughlin says:

It was in 1853 that Congress, judging from our past experience and that of other countries, came to the conclusion that a double standard was an impossibility for any length of time.

It can not be said, however, that this conclusion was reached wholly through

unselfish reasons. The underlying prejudice in favor of gold, if gold can be had, which we are sure to find deeply seated in the desires of our business community whenever occasion gives it an opportunity for display, was here manifesting itself. The country found itself with a single metal in circulation. Had that metal been silver, wo should have had to chronicle again the grumbling dissertations on the disappearance of gold which characterized the period preceding 1834. But in 1853 the single standard was gold. This was a situation which no one rebelled against. Indeed, no one seemed to regard it as anything else than good fortune (except so far as the subsidiary coins had disappeared). It was very much as if a ranchman, starting with 100 good cattle and 100 inferior ones, had found, when branding time came, that, by virtue of exchange with his neighbors, the 200 cattle assigned to him were, in his jndgment, all good ones and none inferior. From a selfish point of view he had no reason to complain. It would have been a very different story had the 200

cattle all been inferior.

In the debate it was proposed that, as the cause of the change in the relative values of gold and silver was the increased product of gold, the proper remedy should be to increase the quantity of gold in the gold coins. This was exactly the kind of treatment which should have been adopted in regard to silver in 1834, and it seems quite reasonable that this should have been the only true and just policy in 1853. Certainly it was, if it was intended to bring the mint ratio into accord with the market ratio and try again the experiment of a double standard. But this was exactly what Congress chose to abandon. There was no discussion as to how a readjustment of the ratio between the two metals might be reached, for it was already decided that only one metal was to be retained. This decision, consequently, carried us to a point where a ratio between the two metals was not of the slightest concern. And so it remained. The United States had no thought about the ratios between gold and silver thereafter until the extraordinary fall in the value of silver in 1876. The policy of the United States in retaining gold, once that it was in circulation, was only doing a little earlier what France did in later years. When the cheapened gold, after 1850, had filled the channels of circulation in France and had driven out silver, France made no objections; but when a subsequent change in silver tended to drive out the gold France quietly held on to her gold. The United States, as well as France, again showed the unconscious preference for gold of which Hamilton spoke in 1792.

In the provisions of the act of 1853 nothing whatever was said as to the silverdollar piece. It had entirely disappeared from circulation years before, and acquiescence in its absence was everywhere found. No attempt whatever was thereafter made to change the legal ratio in order that both metals might again be brought into concurrent circulation. Having enough gold, the country did not care for silver. At the existing and only nominal mint ratio of 1:16 the silver dollar could not circulate, and no attempt was made in the act to bring it into circulation. therefore, to be kept distinctly in mind that in 1853 the actual use of silver as an unlimited legal tender equally with gold was decisively abandoned. Under any conditions then existing a double standard was publicly admitted to be hopeless. The main animus of the act, therefore, is to be found in what is not included in the thing in the emission to incorrect any provision which would be in the conficient to incorrect any provision which would be in the conficient to incorrect any provision which would be in the conficient to incorrect any provision which would be in the conficient to incorrect any provision which would be in the conficient to the con it—that is, in the omission to insert any provision which would bring the silver

dollar again into circulation.

As the act stands on the statute books it is practically nothing more than a regulation of the subsidiary silver coinage, and its study is but a lesson in the proper principles which should regulate that part of a metallic currency.

#### THE LEGAL-TENDER NOTES.

Before dwelling on the act of February 12, 1873, it is necessary to call attention to the issue of the legal-tender notes, commonly called "greenbacks," and to the national-bank notes issued during and since the civil war, as they constitute no small portion of the circulating medium of the United States.

First, as to the United States legal-tender notes. The first noninterest bearing legal-tender notes were authorized by an act of February 12, 1862, and were dated March 10, 1862. There was printed on their backs: "This note is a legal tender for all debts, public and private, except duties or imposts, and interest on the public debt, and is exchangeable for United States 6 per cent bonds, redeemable at the pleasure of the United States after five years." On June 7, 1862, the Secretary of the Treasury recommended a further issue of \$150,000,000

of legal-tender notes. A bill authorizing this issue was signed by the President on June 11, 1862. The act of March 3, 1863, authorized the issue of an additional \$150,000,000 of legal-tender notes. The aggregate issue was \$450,000,000. The highest amount of legal-tender notes outstanding at any one time was on January 3, 1864, when it reached

\$449,338,902.

In his report for 1865, Secretary McCulloch expressed the opinion that the legal-tender acts were war measures, and ought not to remain in force one day longer than should be necessary to enable the people to prepare for a return to the gold standard. During the same month Congress passed a resolution, by a vote of 144 against 6, "cordially concurring in the views of the Secretary of the Treasury in relation to the contraction of the currency with a view to as early a resumption of specie payments as the business interests of the country will permit." An act approved March 12, 1866, authorized the retirement and cancellation of not more than ten millions of legal-tender notes within six months from the passage of the act. Under this act the amount outstanding was so far reduced that on December 31, 1867, the amount was \$356,000,000. Between that date and January 15, 1874, the amount was increased to \$382,979,815, and on June 20, 1874, the maximum amount was fixed at \$382,000,000. Section 3 of the act of January 14, 1875, authorized the increase of the circulation of national banks, but required the Secretary of the Treasury to retire legal tender notes to an amount equal to 80 per cent of the national-bank notes thereafter issued, until the amount of the legal tender notes outstanding should be \$300,000,000 and no more. Under this act \$35,318,984 of legaltender notes were retired, leaving the amount in circulation on May 31, 1878, when the act was repealed, \$346,681,016, at which figure the amount outstanding has since remained, that act providing that from and after its passage it should not be lawful for the Secretary of the Treasury, or other officers under him, to cancel or retire any more of the United States legal-tender notes, and that when any of said notes might be redeemed or received into the Treasury from any source whatever, and should belong to the United States, they should not be cancelled or retired, but should be reissued and paid out again and kept in circulation.

The act of February 14, 1875, had authorized the Secretary of the Treasury, on and after January 1, 1879, to redeem in coin the legaltender notes on their presentation at the office of the assistant treasurer in the city of New York, in sums of not less than \$50, and empowered him, for that purpose, "to use any surplus revenue from time to time, in the Treasury, not otherwise appropriated, and to issue, sell, and dispose of, at not less than par in coin, the 5 and 4 per cent bonds authorized by the act of July 14, 1870." On January 1, 1879, the Secretary held \$135,000,000 in gold coin and bullion, and over \$32,000,000 in silver coin and bullion, the gold coin alone being equal to 40 per cent of the United States notes then outstanding. of the country, at the date of resumption, held more than one third of the outstanding Treasury notes, but they had so much confidence in the ability of the Secretary to maintain resumption that they presented none for redemption. As, therefore, there was no demand for payment of the notes of the Government, the gold coin in the Treasury, which amounted to \$135,000,000 on the day of resumption, increased more

than \$36,000,000 in the next ten months.

The following table shows the amount of the gold reserve for the redemption of legal tender notes at the end of the fiscal years named.

STATEMENT SHOWING THE AMOUNT OF GOLD IN THE TREASURY, GOLD CERTIFICATES IN CIRCULATION, AND NET GOLD IN THE TREASURY AT THE CLOSE OF EACH FISCAL YEAR FROM JUNE 30, 1879, TO JUNE 30, 1895.

Year.	Total gold in Treasury.	Gold certifi- cates in cir- culation.	Net gold in Treasury.
1879	\$135, 236, 475	\$15, 279, 820	\$119, 956, C55
1880	126, 145, 427	7, 693, 900	118, 181, 527
1881	163, 171, 061	5, 759, 520	157, 411, 541
1882	148, 506, 390	5, 020, 020	143, 486, 370
1883	198, 078, 568	59, 807, 370	138, 271, 198
1884	204, 876, 594	71, 146, 640	133, 729, 954
1885	247, 028, 625	126, 729, 730	120, 298, 895
1886	232, 554, \$86	76, 044, 375	156, 510, 511
1887	277, 979, 654	91, 225, 437	186, 754, 217
1888	314, 704, 822	121, 094, 650	193, 610, 172
1.889	303, 504, 319	116, 792, 759	186, 711, 560
1890	321, 612, 423	131, 380, 019	190, 232, 404
1891	238, 518, 122	120, 850, 399	117, 667, 723
1892	255, 577, 705	141, 235, 339	114, 342, 366
1803	188, 455, 433	92, 970, 019	95, 485, 414
1894	131, 217, 434	66, 344, 409	64, 873, 025
1895	155, 893, 931	48, 381, 569	107, 512, 362

#### THE NATIONAL BANK NOTES.

Next in importance, as well as in the order of time of their issuance, to the legal-tender notes of the United States, in the papermoney currency of the country, come the national-bank notes. first national bank act was approved February 25, 1863, which act was repealed and superseded by the act of similar title approved June 3, 1864, with little change in its leading features. The latter act, section 21, provided that upon the transfer and delivery of United States. bonds to the Treasurer of the United States, as required by section 20 of the act, a national bank association should receive from the Comptroller of the Currency circulating notes of different denominations equal in amount to 90 per cent of the amount of said bonds at the par value thereof. By section 22 it was enacted that the entire amount of notes for circulation to be issued under the act should not exceed \$300,000,000. This amount was subsequently increased by law. The largest amount of national bank notes outstanding was in January, 1883, when it rose to \$362,651,169, and the lowest in July, 1891, when it had declined to \$167,927,574. In December, 1894, it was \$207,472,603, and on November 1, 1895, \$207,364,028.

GOLD PERIOD, 1873-1878-DEMONETIZATION OF SILVER IN 1873.

On the 25th of April, 1870, the Secretary of the Treasury transmitted a bill to Congress providing for the revision of the coinage laws of the United States. It was considered for five sessions of Congress and was finally passed and became a law February 12, 1873.

It provided that the gold coins of the United States should be a 1-dollar piece, which at the standard weight of 25.8 grains should be the unit of value; a 3-dollar piece, a 5-dollar piece, a 10-dollar piece, and a 20-dollar piece of a standard weight, proportional to the 1-dollar piece, and that such coins should be a legal tender in all payments at their nominal value when not below the standard weight and limit of

tolerance. It also provided that the silver coins of the United States should be a trade dollar, a half dollar, a quarter dollar, and a dime; that the weight of the half dollar should be 12½ grams, and that of the quarter dollar and dime proportional thereto. The weight of the trade dollar was fixed at 420 grains Troy. All these coins were made legal tender to the amount of \$5. Section 21 of the act provided that any owner of silver bullion might deposit the same at any mint, to be formed into bars, or into dollars of the weight of 420 grains Troy, designated in the act as trade dollars, and that no deposit of silver for other coinage should be received. The bill met with little opposition either in the Senate or in the House of Representatives. The silver dollars previously coined, of which there were but few in existence-maintained their quality as legal tender, but the coinage of new full legal-tender dollars, whether on Government or private account, was discontinued. This act was the logical complement of the legislation of 1853.

There was at first complete acquiescence in the result of the legislation of 1873, as there had been in that of 1853, and not until the decline of silver in 1875 and 1876 were any suggestions made for the coinage anew of silver dollars, although in both those years the currency of the country was inconvertible paper, and no gold or silver coins were in circulation. A large number of silver bills were introduced in the House of Representatives in the summer of 1876. The agitation in and out of Congress in favor of the coinage of silver dollars continued through 1877. Hon. John Sherman, then Secretary of the Treasury, refers to it in his report for 1877 in the following words, in which will be found a concise history of our monetary experience from 1792 until

The question of the issue of a silver dollar for circulation as money has been much discussed and carefully examined by a commission organized by Congress, which has recommended the coinage of the old silver dollar. With such legislative provision as will maintain its current value at par with gold, its issue is respectfully recommended. A gold coin of the denomination of one dellar is too small for convenient circulation, while such a coin in silver would be convenient for a multitude of daily transactions, and is in a form to satisfy the natural instinct of hearding.

Of the metals, silver is of most general use for coinage. It is a part of every system of coinage even in countries where gold is the sole legal standard. It best measures the common wants of life, but, from its weight and bulk, is not a convenient medium in the larger exchanges of commerce. Its production is reasonably steady in amount. The relative market value of silver and gold is far more stable than that of any other two commodities, still it does vary. It is not in the power of human law to prevent the variation. This inherent difficulty has compelled all nations to adopt one or the other as the sole standard of value, or to authorize an alternative standard of either, or to coin both metals at an arbitrary standard and to maintain one at par with the other by limiting its amount and legal-tender quality and receiv-

ing or redeeming it at par with the other.

It has been the careful study of statesmen for many years to secure a bimetallic currency not subject to the changes of market value and so adjusted that both kinds can be kept in circulation together, not alternating with each other. The growing tendency has been to adopt for coins the principle of "redeemability" applied to different forms of paper money. By limiting tokens, silver, and paper money to the amount needed for business, and promptly receiving or redeeming all that may at any time be in excess, all these forms of money can be kept in circulation, in large amounts, at par with gold. In this way tokens of inferior intrinsic value are readily circulated, but do not depreciate below the paper money into which they are convertible. The fractional silver coin now in circulation, though the silver of which it is composed is of less market value than the paper money, passes readily among all classes of people and answers all the purposes for which it was designed. And so the silver dollar, if restored to our coinage, would greatly add to the convenience of the people. But this coin should be subject to the same rule, as to issue and convertibility, as other forms of money. If the market value of the silver in it were less than that of gold coin of the same denomination and it were issued in unlimited quantities, and made a legal tender for all debts, it would demonstize gold and depreciate our

paper money.

The importance of gold as the standard of value is conceded by all. Since 1834 it has been practically the sole coin standard of the United States and since 1815 has been the sole standard of Great Britain. Germany has recently adopted the same standard. France and other Latin nations have suspended the coinage of silver, and, it is supposed, will gradually either adopt the sole standard of gold or provide for the convertibility of silver coin, on the demand of the holder, into gold coin.

In the United States several experiments have been made with the view of retaining both gold and silver in circulation. The Second Congress undertook to establish the ratio of 15 of silver to 1 of gold, with free coinage of both metals. By this ratio gold was undervalued, as 1 ounce of gold was worth more in the markets of the world than 15 ounces of silver, and gold, therefore, was exported. To correct this, in 1837, the ratio was fixed at 16 to 1; but 16 ounces of silver were worth more than

1 ounce of gold, so that silver was demonetized.

These difficulties in the adjustment of gold and silver coinage were fully considered by Congress prior to the passage of the act approved February 21, 1853. By that act a new, and, it was believed, a permanent, policy was adopted to secure the simultaneous circulation of both silver and gold coins in the United States. Silver fractional coins were provided for at a ratio of 14.88 in silver to 1 in gold, and were only issued in exchange for gold coin. The right of private parties to deposit silver bullion for such coinage was repealed, and these coins were issued from bullion purchased by the Treasurer of the Mint, and only upon the account and for the profit of the United States. The coin was a legal tender only in payment of debts for all sums not exceeding \$5. Though the silver in this coin was worth in the market 3.13 cents on the dollar less than gold coin, yet its convenience for use as change, its issue by the Government only in exchange for, and its practical convertibility into, gold coin maintained it in circulation at par with gold coin. If the slight error in the ratio of 1792 prevented gold from entering into circulation for forty-five years, and the slight error in 1837 brought gold into circulation and banished silver until 1853, how much more certainly will an error now of 9 per cent cause gold to be exported and silver to become the sole standard of value? Is it worth while to travel again the round of errors, when experience has demonstrated that both metals can only be maintained in circulation together by adhering to the policy of 1853?

The silver dollar was not mentioned in the act of 1853, but from 1792 until 1874 it was worth more in the market than the gold dollar provided for in the act of 1837. It was not a current coin contemplated as being in circulation at the passage of the act of February 12, 1873. The whole amount of such dollars issued prior to 1853 was \$2,553,000. Subsequent to 1853, and until it was dropped from our coinage in 1873, the total amount issued was \$5,492,838, or an aggregate of \$8,045,838, and this

was almost exclusively for exportation.

By the coinage act approved February 12, 1873, fractional silver coins were authorized, similar in general character to the coins of 1853, but with a slight increase of silver in them to make them conform exactly to the French coinage, and the old

dollar was replaced by the trade dollar of 420 grains of standard silver.

Much complaint has been made that this was done with the design of depriving the people of the privilege of paying their debts in a cheaper money than gold, but it is manifest that this is an error. No one then did or could foresee the subsequent fall in the market value of silver. The silver dollar was an unknown coin to the people, and was not in circulation even on the Pacific Slope, where coin was in common use. The trade dollar of 420 grains was substituted for the silver dollar of 412½ grains because it was believed that it was better adapted to supersede the Mexican dollar in the Chinese trade, and experiment proved this to be true. Since the trade dollar was authorized \$30,710,400 have been issued, or nearly four times the entire issue of old silver dollars since the foundation of the Government. Had not the coinage act of 1873 passed, the United States would now be compelled to suspend the free coinage of silver dollars, as the Latin nations did, or to have silver as the sole coin standard of value.

Since February, 1873, great changes have occurred in the market value of silver. Prior to that time the silver in the old dollar was worth more than a gold dollar, while at present it is worth about 92 cents. If by law any holder of silver bullion might deposit it in the mint and demand a full legal-tender dollar for every 412½ grains of standard silver deposited, the result would be inevitable that as soon as the mints could supply the demand the silver dollar would, by a financial law as fixed and invariable as the law of gravitation, become the only standard of value. All forms of paper money would fall to that standard or below it, and gold would be demonstized and quoted at a premium equal to its value in the markets of the world. For a time the run to deposit bullion at the mint would give to silver an artificial value, of which the holders and producers of silver bullion would have the sole benefit.

The utmost capacity of the mints would be employed for years to supply this demand at the cost of and without profit to the people. The silver dollar would take the place of gold as rapidly as coined, and be used in the payment of customs duties, causing an accumulation of such coins in the Treasury. If used in paying the inter-

est on the public debt, the grave questions already presented would arise with public creditors, seriously affecting the public credit.

It is urged that the free coinage of silver in the United States will restore its market value to that of gold. Market value is fixed by the world, and not by the United States alone, and is affected by the whole mass of silver in the world. As the enormous and continuous demand for silver in Asia has not prevented the fall of silver, it is not likely that the limited demand for silver coin in this country, where paper money is now and will be the chief medium of exchange, will cause any considerable advance in its value. This advance, if any, will be secured by the demand for silver bullion for coin to be issued by and for the United States, as well as if it were issued for the benefit of the holder of the bullion. If the financial condition of our country is so grievous that we must at every hazard have a cheaper dollar in order to lessen the burden of debts already contracted, it is far better, rather than to adopt the single standard of silver, to boldly reduce the number of grains in the gold dollar or to abandon and

retrace all efforts to make United States notes equal to coin. Either expedient will do greater harm to the public at large than any possible benefit to debtors.

The free coinage of silver will also impair the pledge made of the customs duties, by the act of February, 1862, for the payment of the interest of the public debt. The policy thus far adhered to of collecting these duties in gold coin has been the chief cause of upholding and advancing the public credit and making it possible to lessen the burden of interest by the process of refunding.

In view of these considerations the Sccretary has felt it to be his duty to earnestly urge upon Congress the serious objections to the free coinage of silver on such conditions as will demonetize gold, greatly disturb all the financial operations of the Government, suddenly revolutionize the basis of our currency, throw upon the Government the increased cost of coinage, arrest the refunding of the public debt, and impair the public credit, with no apparent advantage to the people at large.

The Secretary believes that all the beneficial results hoped for from a liberal issue of silver coin can be secured by issuing this coin, in pursuance of the general policy of the act of 1853, in exchange for United States notes, coined from bullion purchased in the open market by the United States, and maintaining it by redemption, or otherwise, at par with gold coin. It could be made a legal tender for such sums and on such contracts as would secure to it the most general circulation. It could be easily redeemed in United States notes and gold coin, and only reissued when demanded for public convenience. If the essential quality of redeemability given to United States notes, bank bills, tokens, fractional coins, and currency maintains them at par, how much easier it would be to maintain the silver dollar of intrinsic market value, nearly equal to gold, at par with gold coin by giving to it the like quality of redeemability. To still further secure a fixed relative value of silver and gold, the United States might invite an international convention of commercial nations. Even such a convention, while it might check the fall of silver, could not prevent the operation of that higher law which places the market value of silver above human control. Issued upon the conditions here stated, the Secretary is of opinion that the silver dollar will be a great public advantage, but that if issued without limit, upon the demand of the owners of silver bullion, it will be a great public injury. (Annual Report of the Secretary of the Treasury on the State of the Finances, 1877.)

THE PERIOD OF THE LIMPING STANDARD, 1878 TO THE PRESENT ACTS OF 1878 AND 1890. TIME.

Notwithstanding the recommendations of the Secretary and the veto of the President, an act for the coinage of silver dollars to a limited amount was passed by Congress February 28, 1878. The material provisions of that act are as follows:

That there shall be coined, at the several mints of the United States, silver dollars of the weight of four hundred and twelve and a half grains troy of standard silver, as provided in the act of January eighteenth, eighteen hundred thirty-seven, on which shall be the devices and superscriptions provided by said act; which coins together with all silver dollars heretofore coined by the United States, of like weight and fineness, shall be a legal tender at their nominal value, for all debts and dues public and private, except where otherwise expressly stipulated in the contract. And the Secretary of the Treasury is authorized and directed to purchase, from time to time, silver bullion, at the market price thereof, not less than two million dollars

worth per month, nor more than four million dollars worth per month, and cause the same to be coined monthly, as fast as so purchased, into such dollars; and a sum sufficient to carry out the foregoing provision of this act is hereby appropriated out of any money in the Treasury not otherwise appropriated. And any gain or seignforage arising from this coinage shall be accounted for and paid into the Treasury, as provided under existing laws relative to the subsidiary coinage: Provided, That the amount of money at any one time invested in such silver bullion, exclusive of such resulting coin, shall not exceed five million dollars: And provided further, That nothing in this act shall be construed to authorize the payment in silver of certificates of deposit issued under the provisions of section two hundred and fifty-four of the Revised Statutes.

SEC. 3. That any holder of the coin authorized by this act may deposit the same with the Treasurer or any assistant treasurer of the United States, in sums not less than ten dollars, and receive therefor certificates of not less than ten dollars each, corresponding with the denominations of the United States notes. The coin deposited for or representing the certificates shall be retained in the Treasury for the payment of the same on demand. Said certificates shall be receivable for customs, taxes, and all public dues, and, when so received, may be reissued.

Under the act of 1878 the United States Government purchased a total of 291,018,018.56 ounces, fine, of silver, at a cost of \$308,279,261.71, the average price per ounce being \$1.0583. The coining value of the silver thus purchased was \$376,265,722.

The act of 1878 was not entirely satisfactory to the advocates of It had not conceded enough in favor of that metal. For nearly ten years the repeal of its purchasing clause was recommended by the Presidents in their messages and by the Secretaries of the Treasury in their reports. But while the Presidents and the Secretaries were pointing out the danger of the act to the monetary condition of the country strong endeavors were being put forth in both Houses of Congress to find means to still further increase the coinage of silver. Efforts were made for a series of years to procure the passage of a bill providing for the free coinage of silver, but were unsuccessful. After much agitation and discussion, extending from the time of the passage of the act of 1878 until the middle of 1890, the act of July 14 of the latter year was approved by the President. It was a compromise measure between the adherents of the unlimited coinage of full legal-tender silver and their opponents.

The act of July 14, 1890, is here given:

AN ACT directing the purchase of silver bullion and the issue of Treasury notes thereon, and for other purposes.

By it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is hereby directed to purchase, from time to time, silver bullion to the aggregate amount of four million five hundred thousand ounces, or so much thereof as may be offered in each month, at the market price thereof, not exceeding one dollar for three hundred and seventyone and twenty-five hundredths grains of pure silver, and to issue in payment for such purchases of silver bullion Treasury notes of the United States to be prepared by the Secretary of the Treasury, in such form and of such denominations, not less than one dollar nor more than one thousand dollars, as he may prescribe, and a sum sufficient to carry into effect the provisions of this act is hereby appropriated out of any money in the Treasury not otherwise appropriated.

SEC. 2. That the Treasury notes issued in accordance with the provisions of this act shall be redeemable on demand, in coin, at the Treasury of the United States, or at the office of any assistant treasurer of the United States, and when so redeemed may be reissued; but no greater or less amount of such notes shall be outstanding at any time than the cost of the silver bulliou and the standard silver dollars coined therefrom, then held in the Treasury purchased by such notes; and such Treasury notes shall be a legal tender in payment of all debts, public and private, except where otherwise expressly stipulated in the contract, and shall be receivable for customs, taxes, and all public dues, and when so received may be reissued; and such notes, when held by any national banking association, may be counted as a part of its lawful reserve. That upon demand of the holder of any of the Treasury notes herein provided for the Secretary of the Treasury shall, under such regulations as he

may prescribe, redeem such notes in gold or silver coin, at his discretion, it being the established policy of the United States to maintain the two metals on a parity with each other upon the present legal ratio, or such ratio as may be provided by

SEC. 3. That the Secretary of the Treasury shall each month coin two million ounces of the silver bullion purchased under the provisions of this act into standard silver dollars until the first day of July, eighteen hundred and ninety-one, and after that time he shall coin of the silver bullion purchased under the provisions of this act as much as may be necessary to provide for the redemption of the Treasury notes herein provided for, and any gain or seigniorage arising from such coinage shall be accounted for and paid into the Treasury.

SEC. 4. That the silver bullion purchased under the provisions of this act shall be subject to the requirements of existing law and the regulations of the mint service governing the methods of determining the amount of pure silver contained, and the

amount of charges or deductions, if any, to be made.

SEC. 5. That so much of the act of February twenty-eighth, eighteen hundred and seventy-eight, entitled "An act to authorize the coinage of the standard silver dollar and to restore its legal-tender character," as requires the monthly purchase and coinage of the same into silver dollars of not less than two million dollars, nor

more than four million dollars' worth of silver bullion, is hereby repealed.

SEC. 6. That upon the passage of this act the balances standing with the Treasurer of the United States to the respective credits of national banks for deposits made to redeem the circulating notes of such banks, and all deposits thereafter received for like purpose, shall be covered into the Treasury as a miscellaneous receipt, and the Treasurer of the United States shall redeem from the general cash in the Treasury the circulating notes of said banks which may come into his possession subject to redemption; and upon the certificate of the Comptroller of the Currency that such notes have been received by him and that they have been destroyed and that no new notes will be issued in their place, reimbursement of their amount shall be made to the Treasurer, under such regulations as the Sceretary of the Treasury may prescribe, from an appropriation hereby, created, to be known, as National bank notes Redemption account: but the provisions of this act shall not apply to the deposits received under section three of the act of June twentieth, eighteen hundred and seventy-four, requiring every national bank to keep in lawful money with the Treasurer of the United States a sum equal to five percentum of its circulation, to be held and used for the redemption of its circulating notes; and the balance remaining of the deposits so covered shall, at the close of each month be reported on the monthly public debt statement as debt of the United States bearing no interest.
"Sec. 7. That this act shall take effect thirty days from and after its passage."

Approved, July 14, 1890.

Another effort was made in 1891 and two in 1892 to pass a bill for

the free coinage of silver, but to no purpose.

The monetary policy of the United States since 1878 was now productive of its fatal results—the monetary crisis of 1892 and 1893, and from which the country is only now recovering. Early in 1893 it was clearly seen that the monthly purchase of 4,500,000 ounces of silver bullion had not and could not result in the maintenance of the price of that metal. There was a feeling of distrust abroad as to the stability of the currency of the United States, which not only discouraged investments in American securities, but encouraged their return.

From July 1, 1890, to June 30, 1893, the loss in gold by export was \$188,000,000. On the 27th of June, 1893, India closed her mints to the free coinage of silver, which intensified the monetary crisis. Congress met in extraordinary session August 7, 1893, on the call of the President, to consider the monetary condition of the country, and on November 1, 1893, an act was passed repealing the purchasing clause of the act of 1890, after there had been bought under that act 168,764,682.53 ounces of fine silver, at a cost of \$155,931,002.25. The act repealing the purchasing clause of the act of July 14, 1890, is as follows:

That so much of the act approved July fourteenth, eighteen hundred and nivety, entitled "An act directing the purchase of silver bullion and issue of Treasury notes thereon, and for other purposes," as directs the Secretary of the Treasury to purchase from time to time silver bullion to the aggregate amount of four million five hundred thousand ounces, or so much thereof as may be offered in each month at the market price thereof, not exceeding one dollar for three hundred and seventy-one and twenty-five one-hundredths grains of pure silver, and to issue in payment for such purchases Treasury notes of the United States, be, and the same is hereby, repealed. And it is hereby declared to be the policy of the United States to continue the use of both gold and silver as standard money, and to coin both gold and silver into money of equal intrinsic and exchangeable value, such equality to be secured through international agreement, or by such safeguards of legislation as will insure the maintenance of the parity in value of the coins of the two metals, and the equal power of every dollar at all times in the markets and in the payment of debts. And it is hereby further declared that the efforts of the Government should be steadily directed to the establishment of such a safe system of bimetallism as will maintain at all times the equal power of every dollar coined or issued by the United States, in the markets and in the payment of debts.

Approved, November 1, 1893.

The total amount of silver purchased under the acts of 1878 and 1890 was 459,946,701.09 fine ounces, at a cost of \$464,210,262.92.

#### REFORM OF OUR CURRENCY SYSTEM.

From all that has been written above, it is clear that the result of the currency legislation of the United States, especially after 1873, has been to leave it a monetary system, as inconsistent, illogical, dangerous, and expensive as can well be imagined—one which inspires little confidence at home, and is certainly not conducive to our credit abroad. Its reform is one of the most important and most urgent political and financial questions of the hour, as well as one of the most difficult—fully as difficult as the task that confronted Hamilton toward the close of the last century—on account of the magnitude, the diversity, and the conflict of interests, real or imaginary, involved in its solution. But for this conflict of interests, sectional and other, and the erroneous ideas of the real principles of currency, to which a great portion of American voters have, for about thirty-three years, become habituated, the reform of our monetary system would not be so arduous, for the principles which should guide us in it are easily acquiesced in by an unbiased mind.

When laying the foundation of our monetary system embodied in the act of April 2, 1792, Hamilton said that such a system involved a great variety of considerations—intricate, nice, and important. What he then wrote of the proposed system may be profitably repeated to day of the changes necessary in our present system in order to make it an agency of justice in the transactions of man with man, and a safeguard of the nation's credit in other lands. "The general state of debtor and creditor," says Hamilton, "all the relations and consequences of price, the essential interests of trade and industry, the value of all property, the whole income, both of the State and individuals, are liable to be sensibly influenced, beneficially or otherwise, by the judicious or injudicious regulation of this subject." And it is just as true now as it was in the days of Alexander Hamilton, that the "immense disorder which actually reigns in so delicate and important a concern, and the still greater disorder which is every moment possible, call loudly for a reform."

When the experience of the United States from 1792 had shown that the maintenance of the double standard was an impossibility, Congress, hearkening to the teachings of history, adopted the gold standard by express provision. But after the adoption of the gold standard in 1873, the effect of all our subsequent currency legislation was a tendency to destroy that standard. This is especially true of the acts of February 28, 1878, and July 14, 1890. Our currency legislation, since 1873,

is but the reflection of the conflict of interests above referred to between the debtor and creditor classes, and between geographical sections of the country, resulting in an indefensible compromise between them. Considered as a whole, the laws relating to the currency since that year are lacking both in unity and continuity of purpose. They are not only inconsistent, contradictory, and obstructive of each other's operation, but are mutually destructive. Thus the act of February 12, 1873, provides that the one-dollar gold piece at the standard weight of 25.8 grains should be the unit of value, in other words, that the standard of the country should be the gold monometallic. It dropped the standard silver dollar from the list of United States coins and provided that silver shall be legal tender only to the amount of \$5. This act was plainly intended to make gold the sole metallic full legal-tender currency of the country as soon as specie payments could be resumed. But before that event the anticipated effect of the act of February 12, 1873, was in great part neutralized in 1878 by the passage, on February 28, of the act to authorize the coinage of the standard silver dollar and to restore its legal-tender character. True, this act did not authorize the free coinage of silver, but the obligation which it imposed on the Secretary of the Treasury to purchase, at the market price, silver bullion of not less than two million dollars' worth per month, and to cause the same to be coined as fast as purchased into standard silver dollars, had the same practical effect as free coinage, to this extent, that its tendency was to keep gold out of circulation; for, under that act, there was a total silver coinage of \$378,168,793.

Another instance of the contradictory nature of our currency legislation is afforded by the act of January 14, 1875, authorizing the redemption of the legal-tender notes of the Government until the amount outstanding should be no more \$300,000,000, and the act of May 31, 1878, requiring that, when such notes had been redeemed, they should not be canceled or retired, but should be again paid out and put in circulation—thus creating an endless chain of redemptions and reissues. To insure the redemption on presentation of the legal-tender notes, a gold reserve, which at the close of the fiscal year 1888 amounted

to over \$193,000,000, has had to be kept in the Treasury.

Since then, however, the gold reserve has shown a continual tendency to decline, and one of the principal financial difficulties which the Secretary of the Treasury has of late had to contend with has been its maintenance at a safe level. But before dwelling on the difficulty under our present currency legislation of maintaining a sufficient gold reserve it is necessary to refer briefly to the act of July 14, 1890, which intensified the evils produced by the act of February 12, 1878.

The act of July 14, 1890, directed the Secretary of the Treasury to purchase, from time to time, silver bullion to the aggregate amount of 4,500,000 ounces, or so much thereof as might be offered each month at the market price thereof not exceeding \$1 for 371.25 grains of fine silver, and to issue, in payment of such purchases of silver bullion, Treasury notes of the United States. The act provided that these Treasury notes should be legal tender in payment of all debts, public and private, except where otherwise expressly stipulated in the contract, and should be receivable for customs, taxes, and all public dues; that when so received they might be reissued, and that upon demand of the holder, the Secretary of the Treasury should redeem them in gold or silver coin at his discretion, "it being the established policy of the United States to maintain the two metals at a parity with each other, upon the present legal ratio, or such ratio as may be provided

by law." Under this act, the paper currency of the United States was increased \$155,930,040. While, by its terms, it was left discretionary with the Secretary of the Treasury to redeem the notes issued under the act in gold or silver, the necessity of carrying out the policy of the United States to maintain gold and silver at par left him no option, when they were presented for redemption, except to give gold in exchange for them when demanded.

Not the least inconsistent and illogical feature of our inconsistent and illogical currency system is that, whereas the act of July 14, 1890, declares it to be the policy of the United States to keep gold and silver at par with each other, and the legal tender notes issued under the act therefore at par with gold, it provided the Secretary of the Treasury

with no means adequate to that end.

On January 1, 1879, the date of the resumption of specie payments, the only currency except coin certificates which the Secretary of the Treasury was required to redeem in coin on presentation was the legaltender notes, which then, as now, amounted to \$346,681,016. The then Secretary was of the opinion that a gold reserve of \$100,000,000 would be sufficient to maintain these \$346.681,016 at par, and so long as there was no material increase in the amount of paper redeemable by the Government on presentation the reserve remained intact, and no serious disturbance occurred in the monetary system of the country. But an additional amount of Treasury notes of \$155,930,940 were issued under the act of July 14, 1890, \$141,092,280 of which are now (November 1, 1895) outstanding, making the direct Government obligations in use as money, \$487,773,296. It is plain that \$100,000,000 is not a sufficient sum in gold to insure the convertibility at all times of notes amounting to \$487,773,296, and to maintain them at par with gold.

But that heavy task is not the only one imposed on our gold reserve of \$100,000,000. As under the laws of February 12, 1878, July 14, 1890, and March 3, 1891, \$423,289,309 in full legal-tender silver have been coined, against which \$333,456,236 in certificates were outstanding November 1, 1895, and as the act of July 14, 1890, has declared it to be the established policy of the United States to maintain the two metals on a parity with each other, upon the present legal ratio or upon such ratio as may be provided by law, we have a total superstructure of \$821,229,532 resting on the frail basis of a gold reserve of \$100,000,000. Nothing is here said of the national-bank notes in circulation, now amounting to about \$200,000,000, because they are redeemable on presentation at the banks themselves or at the Treasury in "lawful money" of the United States, and further because their ultimate redemption in gold coin is wholly satisfactory, the entire circulation of all the national banks being most amply secured by bonds of the United States. No worse commentary can be made on the expensive nature of our monetary system than that, to keep in repair this fragile foundation of \$100,000,000, which is ever tending to disappear, it has. been necessary within the past two years to borrow gold to the amount of \$162,000,000, and this without adding to its firmness. Yet resort to the issue of bonds for this purpose, or repudiation, a silver basis for our circulating media, depreciation of the currency, and an impairment of all contracts, with all the evils attendant on silver monometallism were, under existing legal conditions, the only alternatives left to the Government.

The inconsistency of our currency legislation referred to above is faithfully described by the Secretary of the Treasury in his annual report of 1893.

The unsatisfactory condition of our currency legislation has been for many years the cause of much discussion and disquietude among the people, and although one great disturbing element has been removed (by the repeal of the purchasing clause of the act of July 14, 1890), there still remain such inconsistencies in the laws and such differences between the forms and qualities of the various kinds of currency in use that private business is sometimes obstructed and the Treasury Department is constantly embarrassed in conducting the fiscal operations of the Government. There are now in circulation nine different kinds of currency, all except two being dependent directly or indirectly upon the credit of the United States. One statute requires the Secretary of the Treasury to redeem the old legal-tender notes in coin on presentation, and another compels him to reissue them, so that, no matter how often they are redeemed, they are nover actually paid and extinguished. The act of July 14, 1890, provides that the Treasury notes issued in payment for silver bullion shall be redeemed in gold or silver coin at the discretion of the Secretary, and when so redeemed may be reissued; but the same act also provides that no greater or less amount of such notes shall be outstanding at any time than the cost of the silver bullion and the standard silver dollars coined therefrom then held in the Treasury, purchased by such notes, and consequently when these notes are redeemed with silver coined from bullion purchased under the act, they can not be reissued, but must be retired and cancelled, for otherwise there would be a greater amount of notes outstanding than the cost of the bullion and coined dollars "then held in the Treasury."

And in his report for 1894 the Secretary points out the radical defects in our currency system in the following words:

I. The circulation of United States notes as currency, and their current redemption in coin on demand.

II. The compulsory reissue of such notes after redemption.

III. The excessive accumulation and coinage of silver, and the issue of notes and certificates against it upon a ratio which greatly overvalues that metal as compared with the standard unit of value in this and other principal commercial countries.

It is plain that before the United States can have a reasonably safe currency these three radical defects must be remedied by appropriate

legislation carried into practical effect.

The legal-tender notes definitively redeemed, and the Treasury notes issued under the act of July 14, 1890, out of the way, both having been exchanged dollar for dollar in gold, the currency of the United States would consist of gold and silver, of certificates of gold and silver which are merely certificates of deposit payable in gold or silver, as the case may be, on presentation, of national bank notes, and currency certifi-The national-bank notes, although the guaranty of their ultimate redemption in gold coin is entirely satisfactory, are lacking in two of the essential elements of a bank note currency. They are not redeemable in coin on presentation and can not be increased immediately in an emergency, no matter how large the metallic stock of the national banks—thus depriving the latter's circulation of elasticity. But, apart from these, after all the notes which the Government is pledged to maintain at par with gold had been cancelled, and when only gold and silver or their representatives remained in circulation, the United States would have the option of adopting the single gold standard and limiting the legal-tender power of silver, as recommended by the Hon. John Sherman, Secretary of the Treasury, in his annual report for 1877, or of continuing the present system of the free coinage of gold with the suspension of the coinage of silver, and the limitation of the total amount of full legaltender silver currency in such a way as not to expel gold from circulation or menace the country with the single silver standard.

The former alternative would be by far the most costly, and although doubtless in the end the most satisfactory, no absolute necessity of resorting to it is as yet apparent. It would give the United States a monetary system akin to that of England. The latter alternative would leave it what is designated the "limping standard," and could be chosen

at incomparably less cost than the former. It might, perhaps, be recommended as a suitable transition to the former, if the former should ever become imperative or easy of adoption. The experience of a great commercial country like France, and to some extent our own, has shown that where the coinage of full legal tender silver is suspended, a very large amount of such silver can be maintained in circulation concurrently with gold and at par with it. France has a gold currency estimated at \$850,000,000 and a silver full legal tender currency of \$430,000,000, and the silver exchangeable at par with gold. Whether the United States would be able to maintain the two metals at par under the second alternative without greatly reducing the amount of full legal-tender silver in circulation, either in the form of coin or of silver certificates, is a question which, in any serious endeavor to reform our currency, would have to receive careful consideration. In order that prices may, as in France, be expressed in terms of gold, there must be an abundance of gold, as compared with silver, in circulation. France has enough gold to meet all its engagements in that metal, and its large reserve of gold is the pledge of the full value of its silver coins.

The 5-franc silver pieces of France circulate at par at home with gold, and lose abroad only a few milles per piece, corresponding to the In France they can always be cost of returning them to France. exchanged at par with gold. But even in France the French people keep no more 5 franc silver pieces in circulation than are necessary for the wants of trade. The remainder goes to the bank, and all endeavors made to lessen the silver reserve of that establishment and to increase the number of 5 franc silver pieces used in trade and by individuals have proved futile. The value of its silver full legaltender coins has remained intact; but at the same time it has, like the value of paper not convertible on presentation, become a fiduciary value, and a part of the gold reserve is permanently withdrawn from circulation to guarantee it. The mass of silver which is not capable of being utilized in exchange is not an element of wealth, or of strength, but an inconvenience and a drawback. So it would be in the United States even on the supposition that we were otherwise as favorably situated as France for the maintenance, under our "limping standard," of the parity of gold and silver, by having relatively as large an amount of gold as that country, and no greater demands upon it.

The increase of the amount of our gold currency, the continued suspension of the coinage of full legal-tender silver, and even the lessening of the amount of such silver already in circulation, if that be necessary to keep it at par with gold, the final retirement of United States legal-tender notes and of the notes issued under the act of July 14, 1890, and the issuance, in lieu thereof, of gold coin, or of gold and silver coin, under proper limitation of the amount of the latter, seem to be the first steps requisite to endowing the United States with a currency which will inspire confidence at home and preserve the full credit of the nation abroad. Short of the single gold standard in the full meaning of the term, this is the least that a due regard for all interests and for the interests of all demands.

But, above all, it is certain that any scheme for the reform of our currency which does not contemplate the continued suspension of the coinage of full legal tender silver, except by virtue of an international agreement, and, perhaps, at an altered ratio, would prove abortive. The free coinage of silver by the United States alone, especially at the legal rate of 1:16, while the commercial ratio is about 1:32, means for this country the single silver standard and depreciation of its currency,

for at the legal ratio of 1:16 silver is not the equal of gold in coinage or out of it. This will become evident if, for the sake of argument, it be supposed that both metals are freely coined but both deprived of their

legal-tender power.

If, in the battle of the standards, the legislative power did not interfere in favor of the depreciated metal, by making the coins stamped out of it full legal tender, either alone or concurrently with the more valuable metal, the struggle for silver and the monetary question would soon be settled; and, in the struggle for existence between the gold standard, the double standard, and the silver standard, the fittest for all purposes of trade and in all forms of commercial intercourse would alone survive. It is safe to say that if in the United States at this moment the free and unlimited coinage of both gold and silver were guaranteed by law, but both gold and silver coins deprived of their legal-tender power, it being left to the creditor, whether a capitalist demanding the payment of interest on his loaned money or a daylaborer his week's wages, whether the millionaire receiving his dividends or collecting the value of his coupons, the planter the price of his cotton or tobacco, the farmer of his wheat, or the humble shopkeeper that of the few yards of cloth, or the few pounds of beef or butter he has sold, all would demand the coin least liable to fluctuation of value and farthest removed from the reach of unforseen contingencies—that is, the millionaire and laborer, the rich and the poor man alike would insist on payment in gold, and would refuse it in silver.

During the last generation—that is, ever since the 25th of February, 1862, when the Government of the United States made its paper evidences of indebtedness legal tender—many have naturally grown up with all sorts of misconceptions and delusions on the important subject Hence it is that their fundamental notion of money of the currency. is a false one, and although they know full well that the silver coins of the United States at present owe nearly half their value to the stamp of the mint which they bear and the pledge of the Government to maintain them at par with gold, and that, to that extent, the value of these silver coins is fictitious and not real, they persist in preferring shadow to substance in the currency of the country, or at least to consider shadow quite as good as substance. Although aware that 1,000 silver dollars bearing the stamp of a United States mint, thrown into the melting pot and reduced to the form of bullion, will produce a quantity of metal that will yield the holder little more than \$500 in any market of the world, while 1,000 gold dollars also bearing the stamp of the United States, subjected to the same process, will come out of the crucible still worth \$1,000 in any country of the world, they insist that the silver and the gold are equally good currency.

They have apparently never asked themselves what becomes of nearly 50 per cent of the value of the silver dollar after the stamp of the United States mint has been obliterated from it and it has been changed in shape; in what the departed value consisted while the stamp remained intact and the form of the coin unaltered; whether the lost value was real or imaginary; whether the stamp was the expression of a truth or the contrary; and whether, without the whole power of the courts and of the executive back of it, the silver dollar would pass on its own intrinsic merits, or otherwise than by the compulsory circulation given it by the strong hand of the law. If, indeed, the law favored neither a gold currency above a silver currency, nor a silver currency above a gold, but left it to the free and unconstrained action of the citizens to choose between them, they would invariably choose that which was

always and everywhere least subject to deterioration, whose value, depended upon itself and not upon Congress, nor upon legal tender acts, but upon free and not compulsory acceptance; that is, under the circumstances of the present time, they would choose gold and not silver.

One infallible test and measure of the soundness of a metallic or other currency is to be found in the answer to the question, whether deprived of the legal tender power guaranteed it by the State it would still be sought after and voluntarily received in payment at its full nominal value. If it would, then it is plain that it is received because of some quality inherent in itself, something which the law does not endow it with and can not take from it. If it would not, then it is just as plain that it is accepted under compulsion, and that but for the coercive power of the State forcing the creditor to receive it, it would not circulate at its full nominal value. Tested in this way, it would not be long before even the owners of silver would cease advocating its use as money equally with gold and bringing it to the mints to be coined into a currency which no one was willing to receive and which would therefore remain on their hands as useless, except for employment in the arts, as if it had never been extracted from the mines. In short, in obedience to the natural law of the survival of the fittest, in the struggle of the standards for existence, the gold standard would prevail and the better money drive out the worse, for Gresham's law does not operate where the State does not make the worse money legal tender, and compel the creditor to receive it even when his selfinterest would induce him to choose the better. All highly civilized countries and all great commercial nations, with the exception of the United States, have, for reasons of this nature, pronounced in favor of the gold standard for the Latin Union may be said to have the gold standard de facto. The monetary history of the world, especially since 1871, may be cited as evidence of this fact.

#### MONETARY SYSTEMS OF THE PRINCIPAL COUNTRIES OF THE WORLD.

In the Appendix (XLVII¹) will be found brief abstracts of the monetary systems of the principal countries of the world, the same being compilations from the latest and most reliable sources, free and full use of which was made in their preparation.

Acknowledgments are due to the officers and clerical staff for the zeal and fidelity with which the work of this Bureau has been performed in the preparation of the two annual reports, viz, the one which is herewith submitted, and the report of the production of precious metals made by calendar years, requiring much extra labor and diligence on the part of all.

Respectfully, yours,

R. E. PRESTON,

Director of the Mint.

Hon. J. G. CARLISLE, Secretary of the Treasury.

# REPORT OF THE COMPTROLLER OF THE CURRENCY.

TREASURY DEPARTMENT,
OFFICE OF THE COMPTROLLER OF THE CURRENCY,
Washington, December 2, 1895.

SIR: I have the honor, pursuant to law, to herewith submit for the consideration of Congress the report of the Comptroller of the Currency for the year ended October 31, 1895, constituting the thirty-third made since the creation of the Bureau. In accordance with the provisions of the act prescribing the duties of the Comptroller it exhibits:

First. A summary of the state and condition of every association from which reports have been received during the preceding year, with an abstract of the whole amount of banking capital returned by them, the amount of their debts and liabilities, the amount of their circulating notes outstanding, their total resources, and the amount of lawful money held by them at the time of the several calls made upon them during the year, together with such other information as is deemed necessary and useful to be given.

Second. A statement exhibiting, under appropriate heads, the resources, liabilities, and condition of the banks, banking companies, and savings banks organized under the laws of the several States and Tarritories

Third. A statement of the associations whose business has been closed during the year, with the amount of their circulation redeemed and outstanding.

Fourth. Suggested amendments to the law by which it is believed

the system may be improved.

In addition thereto it has been deemed advisable to incorporate the result of inquiries undertaken under the auspices of this office, showing briefly the various systems of banking in operation in foreign countries and in the States and Territories comprising the Union. The information thus obtained, though, in a number of instances, incomplete and imperfect, will be of benefit in a measure, at least, in giving a better knowledge of the different methods employed to facilitate commercial exchanges and sustain a bank note circulation.

The records of this office show that from the date of the granting of the first certificate of authority on June 20, 1863, to the close of the year embraced in this report the total number of national banks organized has been 5,023, making an average for each year of 152. Of this total number there were in active operation on October 31 last 3,715,

**3**08

having an authorized capital stock of \$664,136,915, represented by 285,190 shareholders, making for each bank in the system an average capital stock of \$178,772, the number of shares to each 2,136, and share-The total amount of their circulating notes outstanding was \$213,887,630. Of this amount \$190,180,961 was secured by United States bonds and \$23,706,669 by lawful money deposited with the Treasurer of the United States.

The net increase in the amount of circulation secured by bonds during the year was \$10,779,597, and the gross increase in the total circula-

tion \$6,322,540.

On September 28, 1895, the date of their last report of condition, the total resources of the 3,712 banks then reporting was \$3,423,629,343.63, of which \$2,059,408,402.27 represented their loans and discounts and \$356,577,580.61 money of all kinds in bank.

Of their liabilities, \$1,701,653,521.28 represented individual deposits, \$336,888,350.86 surplus and net undivided profits, and \$182,481,610.50

outstanding circulating notes secured by bonds.

In geographical divisions the 3,715 banks in active operation are divided as follows: Two thousand nine hundred and one, with a capital stock of \$536,725,832, in the northern and northwestern half of the country, and \$14, with a capital stock of \$126,848,950, in the South and Southwest.

East of the Mississippi River 2,611 national banks are located, with a capital stock of \$527,612,792, while 1,104, with a capital stock of

\$135,961,990, are west of it.

In point of number of active banks Pennsylvania, New York, Massachusetts, Ohio, Illinois, and Texas lead, with 412, 334, 268, 248, 220, and 214 respectively. Arranged according to capital stock, Massachusetts is first, with \$97,017,500; New York second, with \$87,136,060; Pennsylvania third, with \$74,233,129; followed by Ohio, with \$45,645,338;

Illinois, \$38,696,000, and Texas, \$22,523,090.

There were organized during the report year 43 banks, located in 20 different States, with an aggregate capital stock of \$4,890,000. Of this number 8 were in Pennsylvania, 5 each in New York and Texas, and 3 each in Illinois and Iowa. The number located east of the Mississippi River was 24, aggregating in capital stock \$2,310,000, and west of it 19, whose combined capital stock was \$2,580,000. The State of Missouri is first in amount of capital stock represented by new banks, having \$1,400,000; Pennsylvania has \$800,000, Ohio \$550,000, New York \$400,000, and Texas \$350,000.

There are 28 of these banks, with a capital stock of \$2,530,000, in the northern and northwestern section of the country, and 15, with a capi-

tal stock of \$2,360,000, in the South and Southwest.

The number of banks organized was less than 30 per cent of the

yearly average.

The corporate existence of 71 national banks in 16 States, with a capital stock of \$10,662,000 and a total circulation of \$3,226,275, has been extended during the year. Pennsylvania has 21; Massachusetts, 14; Maine and Vermont, 5 each; with 4 each in New York and New Jersey. Of the total capital of such banks, that in Massachusetts aggregates \$3,280,000; in Pennsylvania, \$2,882,000; Maine, \$875,000; Vermont, \$725,000.

Under the act of July 12, 1882, providing for the extension of national banks, the corporate existence of 1,607 banks, representing an aggregate capital stock of \$400,193,315, has been extended. Of these, New York has 232, with a capital stock of \$73,497,460; Massachusetts 227,

with a capital stock of \$92,492,200; Pennsylvania 199, with a capital stock of \$53,086,000, followed by Ohio, with 111 and aggregated capital

of \$17,879,000.

The number of banks leaving the system by reason of the expiration of their corporate existence was 4, having a capital stock of \$300,000 and a circulation of \$123,700. Two of these were located in New York, 1 in Maine, and 1 in Pennsylvania. A new association, with a capital stock of \$50,000 and circulation of \$22,500, succeeded to 1 of the 2 in New York.

During the year ending October 31, 1896, the corporate existence of 28 banks, with a capital stock aggregating \$3,453,800 and circulation of \$1,310,400, will expire. They are located in 17 States, 5 of them being in Pennsylvania and 3 each in Illinois, New Jersey, and North Carolina. In the succeeding ten years, from 1896 to 1905, the corporate existence of 889 banks, having a capital stock of \$129,694,950 and a circulation of \$34,011,887, will expire.

The number of banks leaving the system during the year through voluntary liquidation was 51, having a capital stock of \$6,093,100 and

circulation of \$1,152,000.

It has been found necessary to appoint receivers for 36 banks during the year. Their aggregate capital stock was \$5,235,020 and circulation \$1,003,402. Of this number 2, with a capital stock of \$450,000, were reported last year as being in voluntary liquidation, and 9, with a capital stock of \$2,750,000, were of the number of banks which closed their doors in 1893 and subsequently resumed business, but through continued business depression and the slow character of their assets were unable to meet their obligations, and were thus compelled to go into insolvency.

A comparison of the data of this year with that set forth in the report of this Bureau for the year 1894 shows the number of active banks to have decreased 41, with a corresponding decrease in capital stock of \$6,438,120. The number of banks organized is 7 less and the number going into voluntary liquidation 28 less. There has been an increase of 15 in the number of receivers appointed and an increase of 30 in the number of extensions of corporate existence granted. The loss through expiration of charters decreased 2 and the number of banks organized

to succeed expiring associations decreased 4.

The following abstracts of the reports made by the banks in response to the five calls required by law indicate the changes which have characterized the status of the banks at different periods covered by this report. In addition thereto are given abstracts of the reports of 1894 and 1893 for purposes of comparison. Those of 1893 are given as showing the extreme conditions of the year of greatest financial depression and serious banking loss.

## ANALYSIS OF REPORTS OF 1895.

An analysis of the reports of condition submitted during the year shows at each date a greater or less change from the preceding one in

each item constituting the same.

Individual deposits declined from \$1,728,418,819 on October 2, 1894, to \$1,667,843,286 on March 5, 1895; rose to \$1,736,022,006 on July 11, and declined on September 28 to \$1,701,653,521. The number of banks holding these deposits on October 2, 1894, was 3,755, with a capital stock of \$668,861,847, and on September 28, 1895, 3,712, with a capital stock of \$657,135,498.

On October 2, 1894, the surplus fund was \$245,197,517 and net undivided profits \$88,923,564, which items had on September 28, 1895, increased to \$246,448,426 surplus fund and \$90,439,924 net undivided

profits.

National-bank notes outstanding, secured by bonds deposited, on October 2, 1894, were \$172,331,978, which decreased to \$169,337,071 on December 19, 1894, and afterward gradually increased until September 28, 1895, when the amount was \$182,481,610.

The amount due to other national banks on October 2, 1894, was \$343,692,316, and gradually decreased to \$313,314,314 on May 7, 1895; increased to \$336,225,956 on July 11, 1895, and again decreased to

\$320,228,677 on September 28, 1895.

The amount due to State banks and bankers, which on October 2, 1894, was \$183,167,779, decreased to \$180,360,713 on May 7, 1895, then increased to \$190,447,130 on July 11, 1895, and on September 28, 1895, decreased to \$174,708,672.

Liabilities for money borrowed in different forms, which on October 2, 1894, aggregated \$26,944,248, declined on December 19, 1894, to \$21,374,583; afterward increased to \$27,553,232 on May 7, 1895, decreased on July 11, 1895, to \$25,550,257, and again increased on September 28, 1895, to \$35,254,611.

The total liabilities, which on October 2, 1894, were \$3,473,922,055, decreased on March 5, 1895, to \$3,378,520,536; afterward increased to \$3,470,553,307 on July 11, and on September 28 had again decreased to

\$3,423,629,343.

On the side of resources, the loans and discounts, which on October 2, 1894, amounted to \$2,007,122,191, decreased to \$1,965,375,368 on March 5, 1895, and afterward steadily increased to \$2,059,408,402 on September 28, 1895, an amount about \$52,000,000 greater than the aggregate of loans and discounts on October 2, 1894.

United States bonds to secure circulation on October 2, 1894, were \$199,642,500; decreased on December 19, 1894, to \$195,735,950, after which the amount gradually increased to \$208,682,765 on September

28, 1895.

United States bonds other than those securing circulation held by the banks amounted on October 2, 1894, to \$25,888,200; increased to \$51,520,890 on March 5, 1895, after which date the amount gradually decreased to \$26,118,350 on September 28, 1895.

The amount invested in stocks, securities, etc., which on October 2, 1894, was \$193,300,072, increased on December 19, 1894, to \$197,328,354; decreased by May 7, 1895, to \$193,841,727, and afterward slightly

increased again to \$195,028,085 on September 28, 1895.

The amount invested in banking house, furniture, and fixtures, which on October 2, 1894, was \$75,183,745, gradually increased to \$78,244,849 on September 28, 1895.

The amount of other real estate and mortgages owned on October 2, 1894, was \$22,708,391, and gradually increased until on September 28,

1895, it was \$25,527,027.

The amount due from other national banks (not reserve agents) on October 2, 1894, was \$122,479,067; increased on December 19, 1894, to \$124,798,322; decreased on March 5, 1895, to \$114,702,531; then increased on July 11, 1895, to \$127,329,742, and afterward decreased to \$123,521,087 on September 28, 1895.

The amount due from State banks and bankers on October 2, 1894, was \$27,973,911, after which it slightly increased and, with slight varia-

tions during 1895, stood at \$30,830,482 on September 28, 1895.

The amount due from approved reserve agents, which on October 2, 1894, was \$248,849,607, gradually decreased on May 7, 1895, to \$218,799,491; increased on July 11 to \$235,308,761, and afterward decreased on September 28, 1895, to \$222,287,251.

Exchanges for clearing house, which on October 2, 1894, amounted to \$88,524,052, decreased to \$77,343,972 on March 5, 1895, then increased to \$83,833,118 on May 7, stood at \$82,868,297 on July 11, and decreased

on September 28, to \$57,506,787.

The specie held by the banks on October 2, 1894, was \$237,250,654. On December 19, 1894, it decreased to \$218,041,222. It then increased on March 5, 1895, to \$220,931,641, but gradually decreased to \$214,427,194 on July 11, and by September 28 had further decreased to \$196,237,311, the smallest amount held at any report date since July 12, 1893, when

the amount was \$186,761,173.

The amount of legal-tender notes and United States certificates of deposit for such notes on October 2, 1894, aggregated \$165,644,028, gradually decreased to \$144,936,622 on March 5, 1895, then gradually increased to \$168,515,172 on July 11, 1895, but by September 28 had again decreased to \$143,866,685. In other words, the lawful-money reserve held by the banks, composed of specie, legal-tender notes, and United States certificates of deposit for legal-tender notes, which on October 2, 1894, was \$402,894,682, decreased on May 7, 1895, to \$364,105,757, then increased on July 11 to \$382,942,366, but by September 28 had sharply decreased to \$340,103,996, the smallest amount of lawful-money reserve held since July 12, 1893, when it amounted to \$289,254,850.

REPORTS FOR 1895 AND 1894 COMPARED.

Summarizing the changes disclosed by a comparison of the resources and liabilities of the national banks on September 28, 1895, with those on October 2, 1894, about a year previous, the material increase in loans and discounts, and the decrease in lawful-money reserve and the amount due from reserve agents, indicate clearly the larger demand for loanable funds, further evidence of which is found on the side of liabilities in the increase in the volume of circulating notes outstanding, and in the amount of money borrowed by the banks. This further appears by the decrease in the amount due to other banks and bankers and the amount due to individual depositors, which amounts have been withdrawn from the banks where they remained idle during the period of financial depression, for investment in more profitable forms.

### REPORTS OF 1893 AND 1895 COMPARED.

By comparing the figures showing the aggregate resources and liabilities of the national banks on October 3, 1893, with those of September 28, 1895, the following changes are to be noted:

On the side of resources, loans and discounts at the latter date had

increased \$216,000,000, United States bonds held to secure circulation \$3,000,000, United States bonds held for other purposes \$9,000,000, stocks, securities, etc., \$47,000,000, amounts due from reserve agents \$64,000,000, amounts due from other banks and bankers \$35,000,000, legal tender notes and United States certificates for these notes \$22,000,000, while checks and other cash items had decreased \$2,000,000, exchanges for clearing house \$49,000,000, bills of other national banks \$7,000,000, and specie \$29,000,000.

On the side of liabilities capital stock decreased \$21,000,000, undivided profits \$2,000,000, national bank circulation outstanding \$1,000,000, and money borrowed in different forms \$45,000,000, while amounts due to other banks and bankers increased \$146,000,000, and indi-

vidual deposits \$250,000,000.

## EARNINGS AND DIVIDENDS.

The law requiring dividend reports from national banks went into effect in March, 1869, and since that date the abstracts for semiannual periods have been incorporated in the annual reports issued by this Bureau. The number, capital, surplus, dividends, net earnings, and ratios of dividends to capital, dividends to capital and surplus, and net earnings to capital and surplus semiannually from September, 1886, to September, 1895, are shown by such abstracts. To these abstracts has been appended a table exhibiting similar information for each year ended on March 1 from 1870 to 1895.

The average annual capital and surplus for the twenty-six years were \$528,256,187 and \$153,611,141, respectively; the average annual dividends paid amount to \$44,428,765 and the net earnings to \$54,865,257. The rate per cent of dividends paid varies from 10.5 in the year ended on March 1, 1870, to 6.8 in 1894, the average for the twenty-six years being 8.4. The total amount of dividends paid and the net earnings for the period referred to are shown to amount to \$1,155,147,903 and \$1,426,496,670, respectively.

By means of a special circular addressed to national banks an effort has been made to ascertain what percentage of current expenses paid by the banks during the year ended September 1, 1895, was represented by taxes paid, and the result of such information as has been obtained will be found in the table appearing on the next page, showing ratios of net earnings, losses, expenses, taxes, and gross earnings, respectively, to capital and surplus for the year ended September 1, 1895.

It will be observed from this table that great variations in the figures showing these ratios appear. These variations are accounted for as follows: In the matter of taxes paid the ratio in some cases represents the tax on circulating notes only, in others to this is added taxes on real estate held, and in others again the tax on shares is paid by the banks for their shareholders, while in other cases this tax is paid by

each shareholder individually and not by the bank.

While, necessarily, the rate of taxation on shares of national-bank stock varies in the different States and Territories, the explanation suggested will account for the extreme variations shown in the table. It was found impossible with the means at hand to obviate the difficulties, and to that extent the investigation was unsatisfactory. It, however, is of value in other directions, and the results are therefore given.

The variations in the ratios showing gross earnings are accounted for by the fact that in the West and Southwest rates of interest are very much higher than they are in the Eastern and Middle States, while another important feature in determining the ratio is the holding of

deposits large in proportion to the capital and surplus.

The difference in ratios representing expenses are in some measure accounted for by the difference in rates of salaries paid and other expenses prevailing in different sections of the country, and also by the fact that where interest is paid upon deposits or for money borrowed by the banks the amount of this interest paid is included with the current operating expenses.

The ratios in the column of losses represent the measure of losses developed and charged off during the year, which, like the years of 1893 and 1894, has been one of severe liquidation in some sections of

the country.

In referring to the ratios of net earnings, while the figures undoubtedly show that investments in shares of national banks are more profitable in some sections than in others, still it must be borne in mind that the ratios in some cases represent net earnings after taxes on shares have been paid by the banks, while in others these taxes are paid by shareholders individually, and to this extent the percentage of profit on investments in these shares is reduced.

The table herewith given sets forth the results as they were collected by this office. The statist who desires to analyze in their completeness the different items of percentage of net earnings, losses, expenses, taxes, and gross earnings of the various States and cities can supplement the information thus given by that which he can gather upon these subjects from the particular locality which he may have under consideration.

Percentages of Net Earnings, Losses, Expenses, Taxes, and Gross Earnings, respectively, to Capital and Surplus for the Year ended September 1, 1895.

#### STATE BANKS AND BANKING ASSOCIATIONS.

Such information as the Comptroller has been able to obtain with respect to the resources, liabilities, and condition of banks, banking companies, and savings institutions organized under laws of the several States and Territories is herewith presented, and is substantially complete, except as to the following States: Delaware, Maryland, South Carolina, Georgia, Alabama, Louisiana, Texas, Arkansas, Tennessee, Nevada, Oregon, Idaho, Utah, New Mexico, Arizona, Oklahoma, and Indian Territory.

The information furnished by State officials is supplemented by the returns courteously made to this office by the bank officials doing busi-

ness in the States and Territories above mentioned.

The number of banks incorporated under State authority and in active operation on or about the close of the fiscal year ended June 30, 1895, was 5,066; and the number from which reports of condition have been received is 5,033. Abstracts of these reports, tabulated by classes and States, with the sources of information indicated, will be found in the appendix.

Reports of condition have been received from 1,070 private banks and bankers and 5,033 State and savings banks and loan and trust companies, an increase of 365 over 1894.

A comparison of the returns in 1894 with those of 1893 shows a

decrease in the following items: Loans, nearly \$207,000,000; capital, \$7,000,000; deposits, \$97,000,000, and total resources, over \$110,000,000.

The returns for this year show not only an increase in every item, except cash on hand, over 1894, but also an increase in corresponding items reported in 1893, prior to the monetary stringency of that year. The following statement shows the principal items of resources and liabilities of these banks in 1893, 1894, and 1895:

Items.	1893.	1894.	1895.
Loans Bonds Cash Capital Surplus and undivided profits Deposits Resources	1, 009, 604, 350 205, 645, 203 406, 007, 240 346, 206, 287 3, 070, 462, 680	\$2, 133, 628, 978 1, 010, 248, 230 229, 373, 004 398, 735, 390 352, 424, 784 2, 973, 414, 101 3, 868, 474, 997	\$2, 417, 468, 494 1, 375, 026, 025 227, 743, 303 422, 052, 618 370, 397, 003 3, 185, 245, 810 4, 138, 990, 529

From the foregoing statement it will be observed that there has been an increase in 1895 over 1894 in the following items: Loans, \$283,839,516; bonds and stocks, \$364,777,795; capital, \$23,317,228; surplus and undivided profits, \$17,972,219; deposits, \$211,831,709; total resources, \$270,515,532; the only decrease noted being in cash items, and is only \$1,629,701. The increase in 1895 over 1893 is as follows: Loans and discounts, \$69,275,417; bonds and stocks, \$365,421,675; cash and cash items, \$22,098,100; capital, \$16,045,378; surplus and net undivided profits, \$24,190,716; deposits, \$114,783,130; and total resources, \$159,981,996.

State banks to the number of 3,774 reported, being an increase in number and capital of 188 and \$5,905,722, respectively. The capital of these banks aggregates \$250,341,295; deposits, \$712,410,423; loans, \$697,688,068; bonds and stocks, \$91,988,696, and total resources, \$1,147,545,818. The increase in deposits over 1894 is about \$54,000,000; in loans, \$26,000,000; in bonds and stocks, \$7,000,000, and in total resources, \$70,000,000.

Reports of dividends paid by this class of banks have been received from 928 associations, located in 24 States. The total capital of the reporting banks is \$56,596,382, and the amount and average rate per

cent of dividends paid, \$4,088,752 and 7.2, respectively.

Savings banks to the number of 1,017, of which 664 are mutual, that is, associations conducted for the sole benefit of the depositors, and 353 stock savings banks, operated for the benefit of both shareholders and depositors, have submitted reports of condition. The resources of the stock savings banks are less than 15 per cent of those of all savings associations.

With the exception of 10 banks in Ohio, Indiana, and Wisconsin, mutual savings banks are confined to the Eastern and Middle States. Loans of this class of banks amount to \$823,036,954; bonds and stocks, \$801,044,935; deposits, \$1,597,343,160, and total resources, \$1,756,740,953. The total loans of all savings banks are \$1,035,597,142; bonds and stocks, \$841,807,699; deposits subject to check, \$33,760,775; savings deposits, \$1,810,597,023, and aggregate resources, \$2,053,764,328. Comparing these items with those reported in 1894, an increase is noted in each as follows: Loans, \$8,659,334; bonds and stocks, \$63,219,833; deposits, \$66,424,556; total resources, \$73,020,139.

The number of depositors has increased 97,832, and the average amount due each depositor from \$365.86 to \$371.36. Interest paid to depositors varies from 3 to 4.5 per cent, the average being apparently a

trifle less than 4 per cent.

The number of loan and trust companies submitting reports of condition was 242. Their loans aggregate \$433,508,516; bonds and stocks, \$177,086,555; capital, \$108,963,905; deposits, \$546,652,657, and total resources, \$807,063,041.

Returns have been received from 1,070 private banks, with capital aggregating \$33,281,845; deposits, \$81,824,932; loans, \$85,489,066; bonds and stocks, \$7,276,159, and total resources, \$130,617,342.

A condensed statement is herewith given for the purpose of comparison, exhibiting the principal items of resources and liabilities of each class of banks referred to:

Items.	State banks.	Loan and trust companies.	Savings banks.	Private banks.
Loans United States bonds Other bonds Capital Surplus and profits Deposits Total resources	91, 104, 811 250, 341, 295 101, 042, 346 712, 410, 423	\$433, 508, 516 39, 607, 593 137, 478, 962 108, 963, 905 84, 801, 698 546, 652, 657 807, 063, 041	\$1, 035, 597, 142 123, 196, 914 718, 610, 785 29, 465, 573 174, 109, 899 1, 844, 357, 798 2, 053, 764, 328	\$85, 489, 066 1, 497, 310 5, 778, 849 33, 281, 845 10, 443, 060 81, 824, 932 130, 617, 342

Similar information relative to national banks, banks other than national, and the total of all banks appears in the following table:

Items.	3,712 national banks.	6,103 all other banks.	9,815 total.
Loans United States bonds Other bonds, etc. Capital Surplus and profits Deposits Total resources	234, 801, 115 211, 497, 195 657, 135, 499 336, 888, 351 1, 715, 194, 860	\$2, 252, 282, 792 165, 185, 702 952, 973, 407 422, 052, 618 370, 397, 003 3, 185, 245, 810 4, 138, 990, 529	\$4, 311, 691, 194 399, 986, 817 1, 164, 470, 602 1, 079, 188, 117 707, 285, 354 4, 900, 440, 670 7, 562, 619, 873

The capital stock of national banks on July 11, 1895, and of all other banks at the date of the latest returns to this Bureau amounts to \$1,080,276,798, an increase during the year of \$10,450,243. The average per capita is \$15.44.

The population of the United States on June 1, 1895, as estimated by the Government actuary, was 69,954,000 and the total banking funds, namely, capital, surplus, undivided profits, and deposits of national and all other banks, \$6,703,544,084, making the average per capita \$95.83. These funds in 1894 amounted to \$6,407,003,338, being \$296,540,746 less than this year.

The cash held by national banks on July 11, and by other banks at about that date, amounted to \$631,111,290, classified as follows: Gold coin, \$127,621,099; silver coin, \$15,594,037; specie, not classified, \$19,298,363; paper currency, \$342,739,129; fractional currency, \$1,023,442, and cash, not classified, \$124,835,220.

In the appendix will be found abstracts of the reports of each class of banks, by States and geographical divisions, for the past and prior years and statistics in detail covering the subjects hereinbefore referred to. To this has also been added a summary of the condition of the Canadian banks on August 31, 1895, and the latest reports of the loan and trust companies in the District of Columbia.

### INSOLVENT BANKS OTHER THAN NATIONAL.

Mr. Albert C. Stevens, editor of Bradstreet's, has courteously placed this Bureau in possession of a statement showing the number of banks other than national, and the amount of their assets and liabilities, which failed during the year ended August 31, 1895, which appears in detail in the appendix. An abstract of this information, with similar returns for 1894, is herewith given.

	1894.			1895.			
Class.	No.	Assets.	Liabilities.	No.	Assets.	Liabilities.

<sup>&</sup>lt;sup>1</sup>Includes 6 trust and mortgage companies.

### STATE AND NATIONAL BANKS IN THE STATE OF NEW YORK.

A question arising during the year which made it desirable to obtain information showing the relations existing between the various State banking institutions and the national banks of the State of New York, a special call was made on August 6 on the national banks for statements of balances with State, private, and savings banks and with loan and trust companies. While the information was obtained for a special purpose, the results of it are of sufficient interest to warrant the publishing of them in this report.

The returns from the 50 national banks of the city of New York showed average daily credits for the month of June of \$61,380,569, due to State banking institutions, and an amount on July 11 of \$54,485,412, while the daily balances due the national banks averaged for June

\$1,526,842, and on July 11 amounted to \$1,586,258.

The 5 national banks in Brooklyn, the 6 in Albany, and the 273 located in the State outside of the cities named reported the average daily credits for June at \$10,658,493, and the amount on July 11 as \$11,544,328. The same banks reported daily balances due them averaging for June \$1,036,998, and the amount on July 11, \$1,156,401.

The total for the 334 national banks in the State averaged daily balances for these banks during June, \$72,039,062; amount on July 11, \$66,029,740. Average daily balances due from the State institutions

for June, \$2,563,840; on July 11, \$2,742,659.

Included in the special call was a request for data concerning the receipts and withdrawals of every kind in which these banks participated.

For the 50 national banks in the city of New York the average daily receipts for June were \$124,503,693; receipts on July 11 were \$121,061,669. For the remaining 284 banks the average daily receipts for June were \$11,988,577, and on July 11, \$11,980,788.

Withdrawals from the 50 national banks of the city of New York for June averaged \$119,308,833 a day, and on July 11, \$122,769,213. Withdrawals from the 284 banks outside of New York City averaged for

June \$13,914,367 per day, and for July 11 were \$12,006,343.

Combining all the reports for both items makes the average daily receipts of the 334 banks for June \$136,492,270; withdrawals, \$133,223,200; a daily balance in favor of the banks of \$3,269,070, or \$98,072,100 for the month. On July 11 receipts aggregated \$133,042,452 and withdrawals had risen to \$134,775,556, reversing the balance to \$1,733,104 of withdrawals over receipts.

From these results it may be effectually argued that the interests of State and national banks are not antagonistic. No better ground for investigation could be found than in the financial center where the strongest banks of each class are competitors for business. The exhibit made not only shows how baseless is the claim of friction between them, but renders the refutation more emphatic by the very close relations which are seen to exist by the returns made.

## INSOLVENT NATIONAL BANKS.

The number of banks placed in the hands of receivers during the year was 36, located in 15 States, having an aggregate capital stock of \$5,235,020 and circulation of \$1,003,402, of which amount \$205,146 has been destroyed and \$798,256 is yet outstanding. The increase thus shown over the number of receivers appointed in 1894 is due to the fact that 9 banks which closed temporarily during the stress of 1893 were unable to reduce their assets to an extent sufficient to meet their maturing obligations, and therefore passed under the administration of this office. The banks of this character, with the amount of their capital stock, are shown in the following table:

Name of bank.	Location.	Capital.
Citizen's National Bank Tacoma National Bank First National Bank Puget Sound National Bank Union National Bank National Bank National Bank of Kansas City Buffalo County National Bank First National Bank Kearney National Bank	Tacoma, Wash Port Angeles, Wash Everett, Wash Denver, Colo Kansas City, Mo Kearney, Nebr San Bernardino, Cal	200, 000 50, 000 50, 000 1, 000, 000 100, 000 100, 000
Total		2, 750, 000

In addition to the number thus added were 2, the First National Bank of Ida Grove; Iowa, with a capital stock of \$150,000, and the State National Bank of Denver, Colo., with a capital stock of \$300,000, which had, prior to October 31, gone into voluntary liquidation, but through failure to comply with the statute were placed in the hands of receivers.

By deducting the number of the banks and the amount of the capital stock represented by them coming into the hands of receivers, under the circumstances named, the total number of receiverships for the year is reduced to 25 and the amount of capital stock involved to \$2,035,020.

The following table sets forth in detail the names, location, capital stock, and condition of the assets of the failed banks of the year at the time of the appointment of receivers therefor:

THE NATIONAL BANKS IN EACH STATE AND GEOGRAPHICAL DIVISION, WHICH WERE PLACED IN THE HANDS OF RECEIVERS DURING THE YEAR ENDED OCTOBER 31, 1895, WITH THEIR CAPITAL, NOMINAL ASSETS, AND LIABILITIES AT DATE OF SUSPENSION.

#### RECEIVERSHIPS.

The difficulties attendant upon the liquidation of banks now in the hands of receivers have been largely augmented during the year by the character of the assets to be reduced and the complications arising from the business depression of the past two years. In the majority of instances no bank closes its doors while it is possessed of quickly convertible paper, and therefore there comes into the possession of the Comptroller only that which is slow, doubtful, bad, or absolutely worthless. It thus follows that with little or no cash received, but debts which are slow of payment and much involved in or necessitating litigation, the closing of trusts is prolonged and the expense attendant thereon increased. The records of the office, however, show that such expense, as compared with any other class of receiverships, is greatly less and the results attained far more substantial. Notwithstanding the conditions which have followed the year 1893 there were paid in dividends to creditors of failed banks in 1894 the sum of \$5,124,577.94, and during the year just closed \$3,380,552.65, represented by 101 dividends.

On October 31, 1894, there were 125 banks in the hands of receivers. Since then 36 receivers have been appointed, making 161 trusts open during the year; 11 trusts have been closed and 1 bank has been restored to solvency and has resumed business. This leaves 149 banks in charge of receivers on October 31, 1895.

A total of 303 banks have been under the charge of receivers. Of these, 13 have resumed business, leaving the assets of 290 to be collected and distributed under the supervision of this office.

The following data relate to 289 insolvent banks, as the report of 1 bank, for which a receiver was appointed on October 30, was not received in time to include it in this summary:

The nominal value of the assets coming into the hands of receivers was \$155,825,372; scheduled as "good," \$60,751,706; "doubtful," \$55,888,525; "worthless," \$39,185,141. In addition, receivers have recovered assets of the nominal value of \$16,294,040 after taking charge

of their trusts, thus increasing the assets of the insolvent banks to **\$172,119,412.** Assessments have been ordered against the shareholders of these banks amounting to \$26,770,070, making the total nominal resources of the 289 receiverships \$198,889,482. The total liabilities of these banks were \$107,538,151.

There have been cash collections from the assets amounting to \$69,686,616, and from shareholders \$10,990,861; total, \$80,677,477. Offset settlements, etc., amounting to \$12,904,089 have been adjusted. Assets have been sold and doubtful or worthless claims compromised, under order of court, at a loss from nominal value of \$35,362,748.

Receivers of banks which have paid all claims in full have, in addition thereto, returned to shareholders \$1,116,438 cash and assets of the nominal value of \$4,720,995. The number of receiverships acting under the Comptroller's supervision at the close of the report year was 149, with assets of the nominal value of \$50,005,200.

### BANK RECEIVERSHIPS OTHER THAN NATIONAL.

During the past year an effort has been made to obtain information relative to insolvent State banks and receiverships. A large amount of correspondence was had with State officers, bank officers, bank examiners and others in order to obtain some data bearing upon the subject. While the returns have to a large degree been fragmentary, and to such extent of doubtful utility, yet it is believed that something of value

may be gathered from them.

Reports, more or less defective, have been received concerning 471 banks, located in 38 States and Territories, the dates of failure going back to 1843. A large number of others were reported, but no data given that would be available in this connection. Nothing has been received from the States of Delaware, Kansas, Mississippi, Nevada, New Jersey, Oregon, Pennsylvania, Vermont, Virginia, West Virginia, Indian Territory, or the District of Columbia. The reports from New York (furnished by the New York State banking department) and from Ohio (furnished by Mr. W. A. Graham, of the Citizens Bank, Sidney, Ohio) are remarkably complete.

The amount of capital reported was \$25,053,638; nominal assets, \$96,154,382, and liabilities, \$124,481,807. Dividends on claims already paid amount to \$55,018,121, or 44 per cent. Additional dividends are estimated at \$4,659,678, or 3 per cent.

It is but just to say, in this connection, that the returns from the different banks are so exceedingly meager that if correct data could be obtained from each of the banks reported the amount of dividends paid would be considerably increased. In a large number of cases no estimates were given as to future dividends, but if an estimate should be obtained based on correct data the percentage of further dividends would, it is safe to say, also be increased. A further investigation will be pursued.

. The number, capital, assets, liabilities, dividends paid, etc., of banks reported are shown in the following table:

Otata an Manuttan	No. of	Q!4-1			Dividends	paid.	Estimated dends

#### AMENDMENTS RECOMMENDED.

In the reports of this Bureau heretofore submitted have been suggested amendments to the laws governing national banks which, if made, it is believed would tend to the betterment of the system. All of the suggestions of this character for several years last past yet remain unacted upon. It is respectfully suggested that, as the General Government is in complete control of this system of banks, its legislative branch should give to the system the benefit of all proper enactments. In this view of the case the attention of Congress is again called to the following suggested amendments and action looking toward their incorporation into the banking laws strenuously urged:

First. That the Comptroller, with the approval of the Secretary of the Treasury, be empowered in all proper cases to remove officers and directors of national banks for violations of law and mismanagement, first according them a hearing on charges preferred.

Second. That the loans of any bank to its executive officers and employés be restricted and made only upon the approval of the board

of directors, a separate written record thereof being kept.

Third. That the assistant cashier in the absence of the cashier be authorized to sign the circulating notes of the bank and reports of condition.

Fourth. That some class of public officers be empowered to administer the general oaths required by the national bank act.

Fifth. That bank examiners be required to take an oath of office and execute a bond before entering upon the discharge of their duties.

Sixth. That upon a day in each year, to be designated by the Comptroller, the directors of national banks shall be required to make an examination of the affairs of the banks and submit to the Comptroller a report thereon upon blanks to be furnished for such purpose.

Seventh. That the Comptroller be authorized to issue to national banking associations circulating notes to the par value of the bonds deposited by them with the Treasurer of the United States to secure

such notes.

Eighth. That the semiannual tax levied on account of the circulating notes of national banks be reduced so as to equal but one-fourth of

1 per cent per annum.

In support of all of the foregoing suggestions, excepting the sixth one, reasons have in previous reports been given. Amendment six s deemed advisable that directors of national banks may be compelled to know from an examination required at their hands of the condition of the banks in whose management they participate and for which they should bear a full share of responsibility. Such a law would lead to better banking methods, less carelessuess in extending loans, and make less liable the long continuance of any dishonesty which might be under taken by any executive officer or employé of banks. It would also enable the Comptroller, in case of the failure of any national bank, to fix the responsibility more clearly for negligence of duty on the part of directors.

The issuing of circulating notes to the par value of bonds deposited to secure the same and the reducing of the per cent of semiannual tax levied upon such notes has been urged by all the Secretaries of the Treasury who have touched upon the subject at all and by every Comptroller from the time of and including Comptroller Knox. The provision of the law prohibiting the former and the provision of the law governing the amount of the latter, however, are still unchanged upon the statute book.

At a time when the desire is so frequently expressed that there be a larger issue of bank notes and complaint is made that national banks are indifferent to the note-issuing function vested in them, it may well be considered by Congress whether it would not be wise to do that which will make it of sufficient interest to the national banks to pay greater attention to note issues. The profit of banking in the United States is now largely in the deposit feature of it and thus it is of greater concern under existing circumstances to the banks to secure deposits than it is to issue notes upon a return so small as to scarcely justify the expense and trouble entailed thereby.

Banks are not eleemosynary institutions, and therefore engage only in that which promises a margin of profit. While on the one hand entitled to no more favors than are granted to other corporations or enterprises carried on by associated individuals, on the other they should not be denied any privileges which they may justly claim, and for the denial of which no possible excuse can be given. It is unquestionably true that national banks would largely increase their note circulation if the embarrassment arising from the needless locking up of a large part of their capital, available for other purposes, and the lessened profit through excessive taxation now imposed did not confront them. They certainly would do so if the legal-tender issues of the Government

were paid and canceled and the channel now clogged by them freed for bank-note circulation.

The experience of this and other countries conclusively demonstrates that the best and most rational note issues are those put forth by banks properly and safely conducted. It likewise demonstrates that issues made direct by governments are always expensive, and under every circumstance a source of danger to such governments and loss to their people's business interests. No clearer proof of this could be had than that furnished by the difficulties which we have witnessed on the part of this Government in its efforts to maintain the full credit of its

practically limitless amount of demand obligations.

The granting of even the small measure of relief as indicated would undoubtedly aid in bringing about a solution of this, the gravest question now demanding legislative attention. It would at least point the way out and tend to avoid any real or imaginary danger which might exist through fear of a contraction of the volume of the circulating medium by the cancellation of the legal-tender issues. Under such provisions of law, unhampered by unwise restraints and rid of unwhole-some competition, the banks now in the national system alone could and undoubtedly would put in circulation a sufficient amount of bank notes to prevent any approach to sudden contraction by the payment and permanent cancellation of this part of the Government's debts.

The advantage accruing to the Government by the substitution of a bank-note for a Treasury-note currency would be immeasurably great. The need of maintaining a gold reserve to meet the recurring demand obligations, now never retired, would, within a reasonable time, be obviated and delivered from this vexatious and expensive difficulty, the Treasury Department could return to its legitimate function of collecting the revenues of the Government needful to meet govern-

mental expenses and disbursing the same.

With the relief gained to it through the removal of this burden would come a greater one to the business interests of the individual citizen, whose every operation would no longer be harassed by the uncertainty springing from a fear that either in the present or the future the currency obligations now forced by his Government through the provisions of an inflexible law into the avenues of trade and commerce may be discredited and dishonored. The relegating of note issuing entirely to the banks would give a better guarantee of meeting the varying wants of trade, which is impossible with a legal mandate decreeing an amount of Treasury issues of no greater and no less volume at one season of the year than another, whether or no there be a corresponding increase or lessening of the demand for currency to transact the business in hand.

It is respectfully suggested that, as a necessary element to the securing of proper elasticity of issue in our bank note currency, section 9 of the act of July 12, 1882, regulating the retirement and issuing of circulation to banks within a fixed period of time, should be repealed, and also that such amendment should be made to the law as will necessitate the banks keeping in the office of the Comptroller of the Currency a sufficient amount of blank notes as will enable them to secure circulation at once, instead of after a period of delay, frequently of sufficient duration as to make the issue unavailable to relieve the pressure existing at the time of ordering.

It is in view of these and other reasons which will unquestionably suggest themselves to those to whom this report is submitted that action is recommended looking toward the enlargement of the country's bank note simple time.

try's bank-note circulation.

# FOREIGN BANKING SYSTEMS.

The attention throughout the year attracted to all matters pertaining to banks and the varied opinions which the discussion of them has called forth warranted the attempt to secure such information as could be had both at home and abroad bearing upon the general subject. It has been done under the belief that a comparative study of such of the foreign and State banking systems as could be readily investigated would be of considerable value, and the effort has been made to collect information bearing upon the salient points of the different systems now in actual existence. Through the courtesy of the State Department each of the ambassadors, ministers, and consuls of the United States was asked to aid in this work by forwarding statements concerning the countries to which they were accredited. The following questions, calling for the desired information, were forwarded to each:

1. Give the different classes or kinds of banks.

2. What requirements must be met in order to enable each class of banks to trans. act business?

3. Who determines when these conditions have been satisfied?

4. Give regulations, if any, governing each class of banks as to (a) capital stock, (b) management of the bank, (c) liability of shareholders for claims against the bank, (d) reports of condition of the bank, (e) examination by Government official, (f) restrict tions on the amount of leans, (g) restrictions of any other character on leans by the bank, (h) security for leans, (i) cash reserve required, (j) accumulation of surplus.

5. Give the regulations, if any, governing the receipt of deposits, and state if it is the custom of the banks to allow interest on deposits.

6. To what extent is the Government interested as a shareholder in the banks?

7. Are any of the banks permitted to conduct branch banks or offices?

8. To what extent and by what medium is information as to the condition of the banks given to the public?

9. What taxes or burdens are imposed upon the banks in return for the privileges

10. Give as full information as possible as to the closing up of the business of

insolvent banks. 11. To what extent and under what conditions are the banks allowed to issue bank

12. What provision is made for the redemption of such notes?

13. Please give any additional information which you think will be of interest concerning the banks.

Replies have been received thus far from twenty three countries, viz: Belgium, Canada, Chile, China, Denmark, Ecuador, France, Germany, Guatemala, Haiti, Hawaii, Italy, Korea, Liberia, Netherlands, Paraguay, Peru, Portugal, Russia, Switzerland, Turkey, Uruguay, and Venezuela. Of the countries reporting, Liberia is stated to be entirely destitute of banking privileges. Korea has no banks except those of the Japanese, which are conducted according to the legal provisions of Japan.

An abstract, as correct as the information obtained will permit, has been prepared from the replies received from the remaining twenty-one. Ten of them have banks which perform functions so closely related to the government as to justify the designation of "government banks." Most of them have the ordinary banks of discount and deposit; several have savings or "cooperative" banks, while two have postal savings banks in successful operation. Twenty have banks privileged to issue bank notes for circulation. Some of these are limited to this particular business, and others are privileged to conduct a general banking business in addition to the note issuing powers. Several countries are reported to have corporations similar to trust and mortgage companies here. One country has a class of banks which makes loans only on chattel security.

Since the first edition of this report was issued replies have been received from Greece, Salvador, and Siam, which will be found in full in the appendix.

Special charters are required in most of the countries, which are obtained from the legislative bodies or by proclamation of the ruling prince. The banks are generally authorized to begin business as soon as they have filed the necessary papers with the proper official in proof of their organization. A few governments seem to have no officer charged with the duty of passing upon the organization proceedings. In some cases the capital stock is required to be paid up in part or in full, but in most cases it is left, both as to amount and as to payment, to be regulated by the "statutes" or by laws and rules under which the bank is to be conducted or by the conditions specified in the charter.

The management is sometimes left to representatives, and again is confided to a board composed of government officials, or a mixed board of officials and directors chosen by the stockholders. In nearly all the countries heard from the liability of the shareholders is limited to the amount they have invested in the banks. Two countries report exceptions, one of which attaches special liability only to those holding the stock of savings banks. Special mention should be made of the excellent requirements of the seventeen countries reporting as to furnishing public information of the condition of the banks. In addition to the monthly, quarterly, semiannual, or annual reports, four countries require weekly statements from some or all classes of banks. These are published either in local newspapers, in the official journal, or in reports, so that the public is amply provided with information. This feature is in very marked contrast to the lax requirements of several of our States.

The subject of loans does not appear to have received as careful attention as it merits. Very many of the bank failures in the United States have been caused by the abuse of the loaning powers of the banks, yet only five countries are reported as having restrictions of any special value upon the loaning ability of the banks. The matter seems to have been left almost entirely to the judgment and discretion of the managing officers.

The majority of the countries reporting have no special provisions regarding cash reserve; and the accumulation of a surplus fund, except for banks allowed to issue circulation, seems to be practically subject to the wisdom of the directors or managers. Some slight limitations have been placed upon the receipt of deposits. Usually the banks pay interest on time deposits, although three reports show that interest is not allowed.

In but four countries reported is the government interested as a shareholder in banks.

It is notable that every country reporting allows the banks to maintain branch offices or banks. This is worthy of much consideration, as it appears that branches are thought to be necessary adjuncts to the banks to enable them to exercise their function to the greatest benefit of their governments and patrons. One country even goes so far as to absolutely require that branch banks must be established and operated for the convenience of the public. Our national banking act has been construed as prohibiting all branches, except for converted State banks having them in operation at the time of entering the national system. It is worthy of serious consideration whether many communities here would not be better served with banking facilities if branch banks, limited to a deposit and commercial business, under the national banking act, were to be allowed.

License fees must be paid in six of the countries for the privilege of engaging in banking. Capital, net profits, and circulation are taxed

by most, and a few require the expenses of the bureau of banking to

be borne by the banks.

Insolvent banks are treated the same as other insolvents in five countries. In three others government officials are appointed to close the bank's business. In one country preferred claims in order of preference are: (1) Government claims; (2) claims of employés, bills of exchange, brokerage, and commission, and (3) depositors. One government bank reported as being insolvent and in the hands of a committee of three; one representing the directors, another the shareholders, and the third the government. No information on this branch of the subject came from many of the countries. In several countries the banks provide the entire supply of currency. Provisions apparently adequate have been made by law in fourteen countries to redeem the bank notes as they are presented.

Herewith is given a brief summary of the reports received. The full

reports will be found in the appendix.1

## BELGIUM.

Kinds of banks: The Banque Nationale, commercial and cooperative banks, and mortgage companies. No public officer passes upon organization; there are no legal provisions governing deposits; interest may be allowed by all banks except Banque Nationale; the State is not interested as a shareholder; branch banks are permitted; annual statements are required to be published by some banks and monthly statements by others; a license fee is required to be paid, based on earnings, by all except the Banque Nationale, which pays special taxes on account of issuing circulation; circulation is not permitted in excess of three times the amount of coin reserve of Banque Nationale, unless approved by the minister of finance; bank notes are guaranteed by available assets of Banque Nationale.

### CANADA.

Government and postal savings banks, commercial banks, mortgage companies, and private bankers. A special act of Parliament and proof of contribution of capital is required before commencing business; the treasury board pass upon organization proceedings; the system advocates a large capital—part must be paid in; an act of Parliament regulates the payment and fixes the amount of capital; the bank is managed by directors; except in two cases double liability is imposed upon shareholders for claims against the bank; monthly reports of condition are required, and other reports when called for; there are no examinations by Government officials; loans can not be made on the stock of Canadian banks, real estate, or completed ships; no reserve is required; a surplus of 30 per cent of the paid-up capital may be acquired, which is called a "rest" fund; interest is usually paid on time deposits; the Government is not interested as a shareholder in the banks; branch banks or offices are allowed; monthly reports of condition are published; in case of insolvency bank notes are a first lien upon the assets, claims of dominion and provincial governments the second, and depositors the third; banks, with two exceptions, may issue circulating notes to the amount of their paid up capital; the circulation notes have the first lien on assets, and a redemption fund is provided by all the banks to redeem any notes beyond the value of the assets. No notes less than \$5 are issued.

<sup>&#</sup>x27;See footnote, page 415.

### CHILE.

Hypothecary or mortgage banks and banks of issue in operation. Both classes of banks, in order to begin business, must satisfy provisions of civil and commercial code applying to joint stock companies; articles of association must be filed with the proper officers and also published in newspaper; President of the Republic determines when conditions as to organization have been satisfied; capital stock must be paid in part prior to beginning business; banks are managed by directors; hypothecary banks also have a manager appointed by the President of the Republic; shareholders are not liable for more than stock investment; directors are responsible for obligations contracted while serving in that capacity; reports of condition are made by banks of issue to the minister of finance monthly, in addition to filing annual inventory, etc.; reports of other banks are filed annually with the Government; banks of issue subject to examination at any time by the President of Republic through agents for that purpose; it is customary to allow interest; Government is not interested as a shareholder in any bank; branch banks permitted; information given to the public by reports published in the official journal; no taxes or burdens are imposed in return for banking privileges; the general insolvency laws apply to insolvent banks; circulating notes can be issued not to exceed 150 per cent of capital stock and are guaranteed by an ample deposit of securities in the mint.

#### CHINA.

No incorporated banks; private banks are in existence, also foreign banks, chiefly the Hongkong and Shanghai banking corporation; a bank can be opened upon reporting its organization to local officials, who pass upon the matter; no limitation with respect to deposits; interest is allowed on deposits; the Government is not interested as a shareholder in any bank; branch banks are allowed; no provision is made for reporting the condition of banks to the public; no taxes or burdens are imposed; banks are expected to aid the Government in emergencies by loans and subsidies; a special officer is appointed to wind up insolvent banks; there are no restrictions as to issuing of circulation, and no legal provisions governing redemption of bank notes; a private bank in each province performs the functions of the treasury of the Government and receives taxes, payment of which is required in silver purer than the coin circulating in the locality, the bank thereby making 2 per cent as compensation for its services; banks guarantee paper of their customers; Government moneys are deposited in banks; letters of credit are issued by banks.

### DENMARK.

The National Bank of Copenhagen, and private and savings banks. The national bank was established by a special act, its capital being provided from taxes levied upon real estate; shareholders own stock to the extent of taxes; private banks are required to notify the proper officer of their formation and file by-laws; if by-laws are not filed the Government takes no cognizance of the corporation; savings banks are organized under special act, and their by-laws must be sanctioned by the King; the minister of the interior passes upon the organization papers of the other banks; banks are managed by directors; the national bank is managed by fifteen representatives and four directors, one of the latter being appointed by the King; shareholders of banks except savings banks, are only liable for their stock investment;

reports of condition are made monthly and annually by savings banks to the savings banks' inspector, and by other banks to the bank commissioner; banks are examined by Government officers; loans are restricted as to time and securities; the national bank is required to keep a cash reserve of 25 per cent in legal coin of the amount of bank notes in circulation; the accumulation of surplus is left to the management of the banks; deposits are received by all banks and interest is usually paid; the Government is not interested as a shareholder in any bank; all banks are permitted to operate branch offices; copies of the monthly and annual reports may be had by the public upon application to the proper officer; the affairs of insolvent banks are closed the same as those of other insolvent corporations; the National Bank of Copenhagen is alone permitted to issue national bank notes, which are secured by metal reserve or other securities and must be redeemed upon presentation or demand in gold coin; savings banks have a few special provisions.

### ECUADOR.

Commercial banks and mortgage companies. Forty per cent of the capital is required to be paid in to enable each class of banks to begin business; the Government officials determine when requirements have been complied with; a board of directors is required to manage banks; shareholders are not liable beyond their investment; reports of condition are required whenever called for by the Government; examinations are made by Government officials whenever deemed advisable; restrictions on amount of loans are left to judgment of directors and also with respect to security for loans, cash reserve, and surplus fund; there is no special provision as to receipt of deposits; interest is allowed on time deposits; the Government is not interested in the banks as a shareholder; branch banks are allowed; reports of condition are occasionally published in newspapers; a tax of 4 sucres per 1,000 is imposed on circulation issued; Government officers wind up insolvent banks; bank notes may be issued to three times the amount of silver held; no provision is made for the redemption of bank notes beyond the assets of the bank; note holders do not appear to be preferred creditors.

## FRANCE.

The Bank of France, commercial, provincial, and colonial banks. The Bank of France is chartered by a vote of the Chambers; the capital stock is fixed by statute at 182,500,000 francs (market value nearly four times that amount); the management of the bank consists of a governor, two deputy governors, a general council of fifteen councilors and three injectors; shareholders are not liable beyond their investment; weekly, semiannual, and annual reports of condition are required; constant supervision is required by the governor, his deputies, and the minister of finance may also examine by inspectors of finance; loans are restricted to 80 per cent on Government securities, 75 per cent on other securities, no loans are made on foreign securities; loans are limited to ninety days and are renewable; advances on accounts current are made for five days; all securities must be registered in the name of the bank; a reserve fund is fixed by law at 10,000,000 francs in addition to real estate for banking purposes; surplus fund is provided for; accounts are opened by deposit of 500 francs; all deposits are payable at sight at the bank or any branch; no interest is paid; the Government is not interested as a shareholder; branch banks are compulsory; the condition of the bank is made public by a weekly balance sheet published

and posted in Bourse and by an annual public statement; a tax of 4 per cent on dividends and special services and privileges are received from the banks; no special provisions are made for closing up insolvent banks; circulation is authorized to the extent of 4,000,000,000 francs; all circulation is guaranteed by a deposit of coin or securities at the bank; notes are payable in coin on demand and are redeemed in gold.

### GERMANY.

The Imperial Bank, commercial and circulation banks, and mortgage companies. Banks are required to comply with the statute before transacting business; there is a special statute for the Imperial Bank and circulation banks, a grant from the States for mortgage banks, and an entry in the commercial register for commercial banks; the imperial chancellor or federal council determines when the conditions for beginning business have been complied with by banks of issue, the state governments for mortgage companies, and the commercial court for commercial banks; the imperial law regulates the capital of banks of issue and bank statutes fix the capital for other banks; the Imperial Bank is governed by Imperial bank directors with the president under the chancellor, the other banks by statutes of the bank and by the business law book; shareholders are not liable beyond the stock fully paid in; banks of issue are required to make weekly reports and annual statements; other banks yearly reports; the Imperial Bank is supervised by bank curators, consisting of the chancellor and four members; other circulation banks by the chancellor and state officers; mortgage banks by state officers; there are no restrictions on the amount of loans; circulation banks are restricted as to loans; mortgage banks are required to have real estate security for loans; there are special provisions for loans of circulation banks; a cash reserve of one-third of circulation issued is required; circulation banks are required to have a surplus of one fourth of their capital; other banks have special provisions; the Imperial Bank must not pay interest on more than its capital and reserve; interest is allowed in some cases; the Government shares the profits of the Imperial Bank; Bavaria is interested as a shareholder in one bank; branch banks are permitted; reports of condition are published when made; there is no tax or fee for granting a bank charter; the states share in the profits of banks of issue; the general bankruptcy law applies to the winding up of insolvent banks; circulation banks may issue notes in various amounts; no new circulating banks can be organized; the redemption of notes is secured by onethird cash or bullion and the remainder by discounts payable in three months, with at least two solvent sureties.

## GUATEMALA.

Commercial banks and banks of circulation. The rules and regulations for the transaction of business must be filed and approved by the Government; the capital stock and management are governed by the statutes of the banks; reports of condition and balance statements required to be made semiannually; examinations are made by Government experts; restrictions on loans are left to the judgment of the directors; in some banks no cash reserve is required, in others, two-thirds of the circulation must be held; the accumulation of a surplus fund is left to the judgment of the board of directors; no legal provision is made governing receipt of deposits; interest is usually allowed on time deposits; the Government is not interested as a shareholder in banks; branch banks are permitted; semiannual reports of

condition are required to be published; no taxes or burdens are imposed on the banks for the privilege of banking; banks are allowed to issue bank notes to an unlimited amount; sufficient funds must be held by the banks for redemption of their notes.

### HAITI.

The National Bank of Haiti and private banks. Requirements for organization and management of the national bank are covered by special statutes; deposits of Haiti currency and American gold are received; no interest is allowed on deposits; the Government is not interested as a shareholder in the bank; branch banks are permitted; reports of condition are published once a month in an official journal; the bank pays no taxes for the privilege of banking, but is the fiscal agent of the Government; private banking firms pay a foreigner's license; method of winding up insolvent banks provided for by statute; national bank only may issue currency; redemption of currency in American gold is provided for.

### HAWAII.

Requirements as to banking provided for by law; no officer appears to be charged with duty of determining when requirements have been complied with; the capital of banks of issue must be currency or gold ingots held in bank; members of Parliament are prohibited from participating in the management of banks; banks are under the supervision of the ministry of agriculture, industry, and commerce, and the treasury department; every two years extraordinary examinations are made; loans are restricted as to time and value of security, real estate mortgages are taken only for doubtful debts and must be disposed of within three years; the Bank of Italy can not take its own shares as security; interest is allowed at a restricted rate; the Government is not interested as a shareholder in banks; branch banks are permitted; a tax of one half of 1 per cent semiannually on all circulation in excess of capital is required; three banks may issue notes for twenty-five years to the amount of three times their capital; banks are required to redeem their The security for circulation is currency or gold notes in currency. ingots to the amount of their capital.

# NETHERLANDS.

The Bank of Netherlands and private banks. A deed of foundation is required to be filed and the royal sanction obtained to enable banks to begin business; no special provision as to the liability of shareholders; the Government is not interested in banks as a shareholder but shares in the profits of the Bank of the Netherlands which only is

FI 95---25

allowed to issue circulation; branch banks are permitted; annual reports required to be made, and weekly balances to be stated.

## PARAGUAY.

Government, commercial, and private banks in operation. Articles of association required to be filed upon making application to Government for permission to do banking business: Government determines when conditions as to organization have been satisfied; no provisions with respect to capital, except when bank enjoys Government privileges its stock is subject to special arrangement with the Government; all banks managed by directors, excepting private institutions; in certain cases the Government selects the directors; shareholders are liable only to extent of stock held; reports of condition are required to be printed, published, and distributed annually among shareholders, depositors, etc; circulation banks are subject to official examination; the directors of the different banks regulate amount of loans; no restrictions as to receipt of deposits; interest allowed in most cases; Government interested largely in some banks and also as stockholder, in consideration of which certain taxes are imposed; branch banks are permitted; information as to condition of banks furnished to the public through the press and printed reports; one bank pays 5 per cent of its profits annually to the Government; private banks are required to pay a yearly license of about \$170 in gold; the court appoints receivers to liquidate the affairs of insolvent banks; issuance of circulation allowed in some cases to the extent of three times the amount of the silver in bank; circulating notes redeemed through the custom-house, 5 per cent of the custom-house receipts being set aside monthly for that purpose.

### PERU.

Commercial banks and loan companies. Banks are required to file a copy of their statutes for inspection and the municipality, through its proper officer, determines when the requirements have been complied with; the stockholders are not liable beyond their stock investment; the security for loans is left to the discretion of the bank officers; interest is allowed; the Government is not interested as a shareholder; branch banks are permitted; reports of condition are published monthly and semiannual reports are made to local shareholders; a tax of 5 per cent is imposed on the net profits.

### PORTUGAL.

Bank of Portugal and commercial banks. They must obtain the consent of the Government to commence business; the commercial section of the department of public works determines when conditions have been satisfied; capital must be fully paid in before a bank is authorized to do business; the management of the Bank of Portugal is vested in the governor, board of directors of ten, and a fiscal board of seven, and other banks by a board of directors; shareholders are liable only for stock investment; the Bank of Portugal reports its condition each week, other banks once a month; the Bank of Portugal is examined by the governor of the bank, and the other banks are examined by the commercial section of the department of public works; there are no restrictions as to loans so long as the reserve is sufficient, except loans secured by shares of bank stock are restricted to an amount not exceeding 15 per cent of the capital; the security for loans is left to the judgment of the management; the Bank of Portugal is required to have 20

per cent of its capital paid in and 10 per cent to make good losses; other banks are required to reserve 20 per cent of deposits; interest is allowed at a restricted rate; the Government is not interested as a shareholder; banks are permitted to conduct branch offices; reports of condition are published in the official journal; no taxes are imposed on the banks; the Government commissioner and directors administer the affairs of insolvent banks; the Bank of Portugal, which is the fiscal agent of the Government, issues all currency in circulation; there is no provision for redemption, but issue is supposed to be protected by metal money in the bank vaults.

### DITECTA

The Imperial Bank, commercial and discount banks, savings and cooperative banks, loan and mortgage companies. The general rules or by-laws prescribed in the charter of each bank must be met before the bank can transact business; the Emperor, through the ministry of finance, determines when these conditions have been satisfied; there are special requirements as to capital stock for each bank; they are managed by a council of administration elected by the shareholders; shareholders are liable only to the extent of their stock investment; report of condition is made monthly to the ministry of finance; a public officer examines the bank at the discretion of the ministry of finance; various restrictions as to the amount and security of loans are imposed; there is no uniform requirement as to accumulation of surplus—it is subject to the discretion of the ministry of finance; the amount of deposits is limited by the bank's charter; interest may be allowed; the Government is interested in no bank except the Imperial Bank, which is a part of the treasury department; banks are permitted to conduct branch offices; they are required to publish monthly statements of condition; the net profits of the bank are taxed from 3 to 5 per cent; insolvent banks are governed by general insolvency laws; claims against insolvent banks are preferred as follows: (1) Government, (2) employés, bills of exchange, brokerage, and commission, (3) depositors; no bank except the Imperial Bank is allowed to issue circulating notes; they are redeemable in gold or silver, but this provision is not carried out; Finland is excepted from the foregoing provisions.

## SWITZERLAND.

State and private banks. Banks of issue must have paid-up capital of at least 500,000 francs and may receive deposits and pay interest; the Confederation is not interested as a shareholder—some Cantons are; banks are permitted to conduct branch offices or banks, and are required to publish weekly, monthly, and annual reports; 1 per cent tax is imposed on average circulation, and Cantons may levy a tax of not more than 6 per cent; there is a general law for insolvents; the banks may issue notes equal to double the amount of endowment capital; the consent to issue must be obtained from the Federal Council; the Federal treasury redeems the circulation of banks which have retired from business.

### TURKEY.

Imperial Ottoman Bank, private banks, and limited liability companies are in operation. An imperial firman is required for limited liability companies; the Turkish Government passes upon organization proceedings; the capital stock, management, and liability of shareholders are fixed by the statutes of the bank; no reports of condition

are required; the Imperial Ottoman Bank is under the nominal supervision of the imperial commissioner; no provisions for examination of the other banks; there are no restrictions on loans except those contained in the bank statutes; reserve and surplus are determined by the statutes of each bank or company; interest is allowed on deposits, the receipt of which is governed by each bank's statutes; the Government is in no way interested as a stockholder; branch banks are allowed; information is given to the public usually by semiannual or annual reports; the Imperial Ottoman Bank is obliged to pay a certain special tax for the privilege of issuing bank notes; provisions vary for insolvent banks; the Imperial Ottoman Bank alone has power to issue circulating notes to a limit fixed by its statutes; a cash reserve to the amount of 33 per cent of the face value of the notes must be held in the bank.

### URUGUAY.

Private banks and a national bank (now insolvent). Banks must file statutes in order to begin business; the Government, after consulting with the attorney-general, determines when conditions have been complied with; the statutes must declare the amount of capital stock of the bank and must provide for its management; shareholders are liable only for the amount of their shares; only banks of issue publish balance sheets; a Government inspector certifies the balance sheets; there are no restrictions as to the amount or character of loans, nor as to security therefor; no provisions for a cash reserve or the accumulation of surplus; there are no legal provisions governing the receipt of deposits; it is the custom to allow interest on time deposits; the Government was interested as a shareholder in the insolvent national bank; banks are permitted to conduct branch banks or offices; monthly balance sheets of banks of issue are published; banks of issue are taxed \$2,000, others \$1,000 per annum, and \$6.50 per annum for all banks on each \$1,000 of declared capital; the insolvent bank is being liquidated by a committee of three, one appointed by the directors, one by the shareholders, and the third by the Government; the right to issue circulation, restricted to double the amount of capital stock, is now limited to two banks; circulating notes are redeemable in gold; circulating notes of insolvent banks are preferred claims.

## VENEZUELA.

Commercial banks, circulation banks, and mortgage companies. Banks must pay a license fee and file a deed and rules before beginning business; the minister of progress determines when conditions have been complied with; the capital stock must be paid in full before beginning business; banks are managed by boards of directors; banks are examined by inspector; loans by banks of issue can not be extended to tie up the capital beyond six months; a cash reserve of 25 per cent of the capital of circulation banks and mortgage companies is required; accumulation of surplus of 50 per cent of capital, including reserve, is required; interest is customarily allowed on deposits; the Government is not interested as a shareholder in the banks; banks are permitted to conduct branches or offices, and are required to make and publish quarterly reports of condition; the banks are taxed for the salary of the inspector and a fee for permit is required; insolvent banks are liquidated by the ministry of progress; banks may issue notes to an amount not exceeding 50 per cent of their capital; such notes must be redeemed in currency by the banks.

# INFORMATION FROM SOURCE OTHER THAN OFFICIAL.

The information sought at the hands of American representatives abroad not having been received as to all countries at the date of the writing of the text of this report, other sources have been relied upon relative to the banking systems of the countries following. In some instances such information was courteously given by the representative of the country in question at Washington, and in others it has been obtained from published works, documents, and reports. In not a few the facts have been gleaned from Monetary Systems of the World, a publication recently issued by Maurice L. Muhleman, deputy assistant treasurer of the United States at New York.

All reports received too late to be briefed so as to appear in the text will be found in full in the appendix.

### THE UNITED KINGDOM.

In addition to the Bank of England, joint stock and private banks are permitted, the regulations for organization being contained in special statutes. The Bank of England is the chief depository of the Government, which maintains no public treasury; it keeps the registry of the public debt and pays the interest thereon; it is a private corporation, managed by its own officers, in whose selection the Government has no share, and whose responsibility is to the stockholders alone, the Government's interest being limited to the loans secured from the bank; the circulating notes issued by this bank are the only legal-tender notes in circulation in the United Kingdom; it is managed by 24 directors, a governor, and deputy governor; its circulation is secured by a mixture of securities and specie; the bank is at all times obliged to carry a reserve sufficient to meet all its demand liabilities, including circulation; there is no limit upon the liability of shareholders except the amount of claims against the banks; branch banks are permitted. The Bank of England is rapidly acquiring all of the note issuing powers in the United Kingdom, for which its issues department holds specie or securities to the full amount; its notes must be redeemed in gold; no note is issued for less than £5, although the Scotch banks' circulation is nearly all of £1 notes. The Bank of England was founded in 1694, and with various renewals of charter, until 1844, given for an indefinite period; the ordinary banking business and the issues department are entirely separate, although being under the same management; there is no limit to the amount of notes which may be issued, except as it is limited in acquiring precious metals. On January 2, 1895, the circulation rested upon the following security: Gold and bullion, £30,849,895; debt, £11,015,100; other securities, £5,784,900; total Government issues, £47,649,895. At the same date the banking department reported capital, £14,553,000; surplus, £3,192,427; deposits, £44,797,537; other liabilities, £143,967; total liabilities, £62,686,931. Government securities, £14,689,099; other securities, £24,025,528; notes, £21,731,120; coin, £2,241,184; total assets, £62,686,931. The metallic reserve and securities of the issues department are not subject to the other liabilities of the Notes may be issued upon silver bullion to the extent of onefifth of its metallic reserve. On the same date, January 2 last, there were 104 joint stock banks in England and Wales, with a capital of These banks had 2,468 branches or agencies. Ten Scotch banks, 9 Irish banks, and 41 private banks reported, the 10 Scotch banks having 995 branches and the 9 Irish banks 484 branches.

total capital and reserve of these banks in the United Kingdom amounts to £123,910,000; deposits, £647,391,000. The Colonial banks are 32 in number, there being 1,733 branches. Of these 17 are in Australia and New Zealand, 3 in Canada, 4 in Africa, and 8 elsewhere, with capital and reserve amounting to £34,810,252, and deposits aggregating £161,589,685. Twenty-four banks incorporated in England are doing business in foreign countries, with capital and reserve of £26,458,576 and deposits of £58,250,057.

### GREECE.

Greece has 3 banks which issue notes, apparently without security.

### SWEDEN.

The Bank of Sweden issues circulation and is managed by officers appointed by the legislative body of the Kingdom; circulation is also issued by private and joint stock banks.

## NORWAY.

The Bank of Norway has exclusive note issuing power; the State is the principal shareholder and controls its management.

## AUSTRIA-HUNGARY.

The Austro-Hungarian Bank has exclusive note issuing powers. The Government is not a shareholder, but is interested in the way of loans from the bank; its notes are secured by metallic reserve or commercial paper or security.

## SPAIN.

The Bank of Spain is the only one authorized to issue notes; the Government is not interested as a stockholder but the bank is used for Treasury purposes; business is transacted through branches; a metallic reserve of one-fourth of the circulation must be maintained.

## ROUMANIA.

The National Bank of Roumania is vested with note issuing powers; its notes outstanding approximate 116,000,000 leis; circulation is permitted to two and a half times the amount of coin reserve.

# SERVIA.

The National Bank of Servia is authorized to issue circulating notes to the amount of three times its metallic reserve.

# BULGARIA.

The National Bank of Bulgaria has power to issue circulation; a statement in 1894 shows the capital, in lews, 10,000,000; reserve, 750,000; circulation, 1,600,000, and deposits, 35,000,000.

### INDIA.

Bank circulation has been prohibited in India since 1861; there are 10 large banks, with branches, doing a general banking business; the aggregate capital of 5 of these banks is £2,331,926.

## JAPAN.

A system of national banks in Japan is in existence, closely resembling the national banks in this country; they are authorized to issue circulation secured by a deposit of bonds, but it is intended that the Bank of Japan shall soon be vested with the exclusive power to issue circulation; the last available report from this bank shows circulation to the extent of 134,595,140 yen; it may issue circulation equal to its actual deposits of specie or bullion and also upon certain securities. Its total reserve of precious metals and securities at last report was 145,572,739 yen; it is compelled to redeem its notes in silver yen; there are many incorporated private banks doing business in Japan; the combined capital of 166 of these is 62,916,100 yen, with surplus and profits exceeding 42,000,000 yen; 604 private banks report capital and surplus exceeding 31,000,000 yen.

### PERSIA.

The Imperial Bank of Persia and its branches have power to issue circulation; a recent report shows its capital to be £1,000,000; reserve, £100,000; circulation, £59,107, and deposits, etc., of £964,570.

### EGYPT.

A large number of banks are in existence in Egypt, but none have power to issue circulation.

### ALGERIA.

The Bank of Algeria and its branches is conducted in a manuer similar to that of the Bank of France, and has authority to issue circulation.

## RÉUNION.

The National Bank of Réunion issues bank circulation estimated at 12,000,000 francs.

## CAPE COLONY.

In Cape Colony there are 3 banks which issue circulation; branch banks are permitted; the last available report shows capital and surplus amounting to £2,352,645, circulation, £840,340, and deposits, £11,699,015.

## NATAL.

The Natal Bank issues circulation; its capital and surplus at last report aggregated £834,000; its circulation was £190,599, covered by reserve in specie.

# TRANSVAAL

The National Bank of the South African Republic issues bank circulation which, from last available report, amounts to £130,183; the capital and surplus of the bank amount to £510,000.

## AUSTRALASIA.

Seventeen banks and their branches, chartered by the home Government in England, are authorized to issue circulation; several banks with local charters are authorized to issue circulation to the extent of their capital. These banks have assets amounting to £164,000,000, holding a coin reserve of £19,000,000, and have issued notes to the

amount of £4,671,000. In New Zealand the existing banks are required to furnish frequent reports, in some cases as often as weekly.

## EAST INDIA.

The Bank of Java, having a capital of 6,000,000 guilders, is authorized to issue circulation; it now has outstanding notes to the amount of 45,500,000 guilders, two fifths of which is covered by specie reserve. A local bank in the Philippine Islands issues notes which are fully protected by reserve.

WEST INDIES.

The West Indies are supplied with bank circulation by the Nassau Bank of the Bahamas and the Colonial Bank of Jamaica.

# SANTO DOMINGO.

The National Bank of Santo Domingo issues circulation in a small amount.

## GUADELOUPE,

One bank in Guadeloupe has issued circulation to the amount of 5,500,000 francs, holding a two fifths specie reserve therefor.

### MEXICO.

National and State banks. The Federal Government issues grants and each State has a right to issue charters to banks established within its own limits; the National Bank of Mexico has the exclusive right to issue notes to the amount of three times its capital and general deposits; public officials supervise the issue of bank notes; branch banks or agencies are permitted; the bank is the fiscal agent of the Government.

# COSTA RICA.

Costa Rica has 2 banks, with a capital of 1,000,000 and 1,500,000 pesos, respectively.

# SALVADOR.

Salvador has 3 incorporated banks and 1 private bank, with a combined capital of 5,300,000 pesos.

# BRAZIL.

The Bank of the Republic of Brazil, with a capital of 190,000,000 milreis, is authorized to issue circulation; most of the banking business is carried on by branches of the foreign banks.

## ARGENTINA.

Argentina has 14 incorporated banks, 38 private banks, and a number of mortgage banks. The Banco Nacional has a number of branches and a capital of 50,000,000 pesos. The 52 incorporated and private banks have a combined capital of 102,800,000 pesos and deposits of 87,400,000 pesos and circulation to the amount of 90,000,000 pesos.

# BOLIVIA.

The Bank of Bolivia and the Bank of Potosi are vested with noteissuing powers, the notes being partially protected by silver.

# UNITED STATES OF COLUMBIA.

The banks of the United States of Columbia have issued circulation to the amount of about 16,000,000 pesos; a coin reserve of about 3,000,000 pesos is held.

### BRITISH GUIANA.

The Colonial Bank and the British Guiana Bank have issued circulation amounting, respectively, to \$300,000 and \$380,000.

## STATE BANKING SYSTEMS.

In furtherance of the attempt to collect information on banking systems now in vogue a personal letter was addressed to the State officer having the banks in charge, or to the governor of each State and Territory of the Union, requesting from such officer that this Bureau be furnished with as complete data as possible. While many of the replies were promptly received and the answers given very satisfactory, yet it has been almost impossible to secure the information from several, even with the assistance of the corps of national bank examiners. abstract has been prepared similar to the one relating to the foreign systems. While it is imperfect in many ways it may serve to show the strength and weakness of our State systems when considered in the The reports were based upon the following questions which were inclosed in the letter to the State officers:

1. Give the different classes or kinds of banks permitted by law to do business in your State.

2. What legal requirements must be met in order to enable each class of banks to

begin the actual business of banking?

3. What officer determines when these conditions have been satisfied?

4. Give the legal provisions governing each class of banks as to the following, viz: (a) Amount and payment of capital stock; (b) the management of the bank; (c) liability of shareholders for claims against the bank; (d) making reports of condition; (e) examination or supervision by State officials; (f) restrictions of any character on loans by the bank; (g) amount of cash reserve required; (h) accumulation of surplus required.

5. Give the legal provisions, if any, governing the receipt of deposits by each class of banks, and state if it is generally the custom of the banks to allow interest on

6. To what extent, if any, is the State interested as a shareholder in any of the banks?

7. Are any of the banks permitted to conduct brauch offices or banks?
8. To what extent and by what medium is information furnished to the public as to the condition of any of the banks?

9. What taxes or burdens are imposed upon the banks in return for the banking privilege granted them?

10. Give as full information as possible as to the legal provisions for closing up the business of insolvent banks.

11. Give the legal provisions covering or referring to the issue of bank circulation.
12. Give a brief sketch showing the principal points in the law of your State relating to savings banks.

In addition to the national banks the States have made use of the privileges arising from incorporated State banks, savings banks, private banks, and, in most cases, trust companies. While a small num. ber of them have made no special provision for savings banks, such institutions have obtained a strong foothold in all of the older States and many of the newer.

Thirty-three States require a part or all of the capital stock to be paid in and certificates filed with the proper officers as preliminaries to the chartering of the banks. Seven States require special acts to authorize new banks. Six States make no special provision for banks, but they are organized under the general incorporation laws of the States. The law in seven States designates no officer to determine when a bank is entitled to begin business. The secretary of state is named in fifteen States. The auditor, comptroller, treasurer, bank commissioners, and superintendent are also empowered in several States to charter new banks. The amount of capital required varies from no provisions at all, and elsewhere from \$5,000 to \$100,000 minimum, to a maximum in some States as high as \$10,000,000. While in a few States the law is very loose in this particular, yet the great majority of them require a fair amount of capital, half or all paid in, the balance, if any, to be paid within two years at the most. A few States require savings banks to have a definite capital on which dividends are paid, if the earnings justify it. The management of the various kinds of banks under State laws is vested in a board of directors, or trustees, who elect the executive officers and are expected to have general supervision over all the affairs of the banks.

In eighteen States no additional liability is undertaken by the purchaser of bank stock. Twenty States add a double liability, or an amount equal to the par value of the stock, upon shareholders in banks. Two States provide for the pro rata liability for all debts incurred while the party was a stockholder. While most of the banks are required to make reports as often as quarterly, four of the States and one Territory do not require any report whatever. Six others require but one report a year. The remainder range from two to five a year, and special reports upon call being made for them. Six States make no provision for giving information to the public. The older States, in most instances, require reports to be published in local papers. There is no provision in twelve States for examination by State officials. The other States appear to authorize examinations as often as once a year, and additional examinations as deemed advisable.

Seven States have no restrictions at all upon the loaning privileges of the banks. Several restrict savings banks in amount, security, and time. Nine States restrict or utterly prohibit loans to officers or employés. Most of them prohibit loans on security of the bank's own stock. Twenty-four States do not require any cash reserve at all. The banking departments of a few others require a reserve of a greater or smaller amount, although the law is entirely silent on the point. Twenty-one States require a reserve varying from 10 to 33\frac{1}{3} per cent for banks of discount and deposit and from 5 to 50 per cent for banks of issue.

Twenty of the States have no legal provision relating to the accumulation of a surplus fund. Twenty-three States have such provision varying from 5 to 25 per cent for commercial banks and most savings banks. One State has enacted that savings banks shall retain as surplus not less than 3 per cent and not more than 10 per cent of deposits.

The amount of single or total deposits is limited for savings banks by the laws of thirteen States. The amounts vary from \$1,000 to \$5,000 for single depositors, and from ten to twenty times the amount of capital in the aggregate. Interest is allowed on deposits in forty of the States, restricted to savings banks and trust companies in one State, while one State reports that it is not customary to allow any interest.

Forty-one States report no interest in the stock of the banks, while three States have invested larger or smaller amounts of the public funds in bank stocks.

Thirteen States do not allow branch banks. Ten States report no law

prohibiting them nor providing for their establishment. In twenty States branches are permitted, and to some extent encouraged by

favorable legislation.

Thirty States require the reports of the banks to be published in local newspapers. Twenty States give information concerning the banks in annual or biennial reports. Six States leave it entirely voluntary with the banks.

Seven States exact a license or privilege tax for engaging in banking. Eighteen States have no special provision relating to taxation of banks. Eight States require the banks to pay the expenses of examination, and some of these add the expense of the State banking departments. A few States have special tax provisions which apply only to banks.

In nearly all of the States insolvent banks are managed in the same manner as other insolvent concerns. In 1 State the officers of the bank bring its affairs to a close under the supervision of the bank commissioners. Two States provide that claims against savings banks on insolvency may be scaled down or a receiver appointed. One State prohibits preferences, while 2 States prefer depositors under certain conditions.

Fourteen States allow banks to issue circulation. Nineteen States prohibit banks from issuing circulation, and several have no legal provi-

sions touching the question.

The greater number of the States allow savings banks to be incorporated either under a savings bank law or under the general incorporation acts. A few States require capital stock. One State requires dividends to be paid of not less than 5 per cent. Another State requires the incorporators to give bonds in amount of \$5,000 each. There are many other special provisions which can not be here enumerated. In the appendix will be found the reports as submitted. Herewith is given in brief a synopsis of them, together with a bare outline of the main provisions of the national-bank act.

# NATIONAL BANKS.

Upon executing and filing with the Comptroller of the Currency articles of association and organization certificate in accordance with the requirements of the law, and satisfying him that 50 per cent of the capital has been paid in in cash, and upon the deposit of the necessary amount of United States bonds for securing circulation, his certificate issues authorizing the bank to begin business. Where the population of the place of location is less than 6,000 inhabitants, minimum capital \$50,000; less than 50,000 population, minimum capital \$100,000; over 50,000 population, minimum capital \$200,000; 50 per cent to be paid in before bank begins business and remainder 10 per cent a month. Directors (not less than five) manage bank. Shareholders are subjected to double stock liability.

Five reports of condition are required each year, to be made on call of the Comptroller of the Currency. Every national bank is subject to examination by a national bank examiner whenever the Comptroller deems it necessary or advisable. Loans to one person or firm in excess of 10 per cent of capital are prohibited. Real estate and stock of the bank are not to be taken as security, unless for the protection of pre-existing debts. Twenty-five per cent cash reserve is required in reserve cities and 15 per cent elsewhere. A surplus of 20 per cent must be accumulated. There are no special provisions concerning the receipt of deposits, and many of the banks allow interest. United States not

interested as a shareholder in any of the banks. Branch banks not permitted except for converted State banks. Reports of condition must be published in local newspapers, and summaries are distributed by the Comptroller and included in his annual report to Congress. Banks are taxed one half of 1 per cent semiannually upon the outstanding circulation, are assessed for expense of preparing and redeeming circulation, and for examinations, in addition to such taxes as may be placed upon them under the laws of the various States in which they operate.

Insolvent banks are liquidated by receivers appointed by the Comptroller of the Currency. Any national bank may receive in circulating notes 90 per cent of the par value of its bond deposit, which deposit must not exceed the amount of capital stock. Some national banks operate a savings' department, which is conducted in accordance with the judgment of the bank directors, so long as the law is not violated.

### ALABAMA.

State and private banks. Capital required, \$50,000, one-half of which must be paid in before authority is given to commence business; the Secretary of State passes upon all organization papers; the minimum capital allowed is \$50,000; the maximum capital of State banks, \$500,000; not less than three directors are required to manage a bank; no information furnished as to the liability of shareholders, reports of condition, examinations, or supervision by State officials, restrictions to loans, whether any reserve or surplus fund is required, nor as to the provisions governing the receipt of deposits and payment of interest; the State is not interested as a shareholder in any of the banks; no information furnished on the subject of branch banks, nor as to the publication of reports of condition; banks are taxed the same as other corporations; no information given on the subject of insolvent banks; circulation redeemable in gold or silver may be issued; no information furnished on the subject of savings banks.

### ARIZONA.

Territorial commercial, savings, and private banks. Banks are organized under general corporation law; the Territorial auditor, who is ex officio bank comptroller, examines organization papers; the capital of banks is determined by provisions of the articles of association; banks are managed as provided in the articles of association; shareholders are liable for double the amount of stock held, unless exempted by the articles of association; banks make three reports of condition a year; they are examined once a year by the comptroller or an expert examiner; savings banks are restricted as to kind and value of security and time of loan; Territorial commercial banks are required to have a reserve of 15 per cent of deposits and borrowed money; savings banks must have 5 per cent of net profits as a surplus fund; there are no provisions governing deposits; the Territory is not a shareholder in any of the banks; branch offices or banks are not provided for; banks publish reports of condition in newspapers; banks pay as taxes a license of \$5 and costs of examination; receivers are appointed by the court for insolvent banks, and proceedings are brought by the attorney-general; no provision is made for circulation; the time, value, and security of loans of savings banks are fixed by statute, and three reports a year are required.

### ARKANSAS.

State, savings, and private banks. Banks are organized under general corporation law; organization papers are filed with the Secretary of State; the capital stock is determined by the certificate of organization; directors manage the affairs of the bank; shareholders are liable only for the amount of their stock investment; an annual statement is required from each bank; they are not subject to examination; there are no provisions for reserve or surplus; no restrictions as to deposits; interest is allowed; the State is not a shareholder in any of the banks; branch banks are permitted if directors desire to conduct them; the publication as to the condition of the banks is entirely voluntary; they are taxed the same as other corporations; insolvent banks are closed by the chancery court and preferences are forbidden; the issue of bank circulation is prohibited by the State constitution; there are no special provisions regarding savings banks.

### CALIFORNIA.

State, savings, and private banks. One-half of the capital stock must be paid in at the organization of a bank; the secretary of state and board of bank commissioners pass upon organization papers; the minimum capital allowed is from \$5,000 to \$200,000, according to population, payable within two years; directors manage the banks, a majority of whom is a quorum; stockholders are liable pro rata for debts; banks make reports of condition three times a year upon call of the bank commissioners; the bank commissioners examine each bank at least once a year; savings banks are restricted as to time and security of loans; there is no provision for cash reserve; 25 per cent of the capital is required as a surplus fund; there is no provision as to deposits; interest is allowed; the State is not a shareholder in any of the banks; branch offices or banks are allowed; an annual report of condition of all the banks is published by the bank commissioners; insolvent banks are required to be closed by the bank commissioners within four years unless the time is extended by the proper authorities; bank circulation is prohibited; savings banks are subject to special provisions.

## COLORADO.

State, savings, and private banks. One half of the capital stock must be paid in at organization; there is no officer designated to decide when the requirements as to organization have been met; the minimum capital of State banks is \$30,000, 50 per cent of which must be paid in, and the balance within one year; the minimum capital for savings banks is \$25,000, all of which must be paid in; directors manage the banks; there is a double liability for shareholders; State banks report as to condition when making dividends; savings banks report their condition four times a year; banks are not subject to examination; loans of banks are restricted as to security and amount; 20 per cent of savings deposits are required as a reserve; there is no provision for a surplus fund and no restrictions as to the receipt of deposits; interest is allowed; the State is not a shareholder in any of the banks; branch offices or banks are prohibited; all reports of condition of banks are published in the newspapers; banks are taxed the same as other corporations; depositors are preferred creditors in insolvent savings banks; employés are preferred creditors to the amount of \$50; bank circulation is not permitted; the capital, loans, etc., of savings banks are covered by special statutes.

## CONNECTICUT.

State, savings, and private banks and trust companies. Banks are organized under special act of the general assembly; the bank commissioners determine when the conditions have been satisfied; the amount and payment of capital is provided for in the petition for incorporation; State banks are managed by directors and savings banks by trustees; stockholders are liable only to the amount of the stock investment; reports of condition are made by State banks and trust companies quarterly and by savings banks annually; they are examined by bank commissioners at least twice a year; banks are restricted as to security for loans to employés and as to amounts to directors and others; 10 per cent of the liabilities, except capital, is required as a reserve; savings banks must carry at least 3 per cent and not more than 10 per cent of deposits as a surplus; savings banks are restricted to receiving not more than \$1,000 deposit a year from any one person; interest is allowed; the State is not a shareholder of any of the banks; branch offices or banks are not allowed; statements of condition are published quarterly, and are contained in the annual report of the bank commissioners; banks are taxed 1 per cent on capital stock and must pay the commissioners' salaries by pro rata assessment on deposits; the court appoints receivers for insolvent banks; there are no provisions concerning circulation; the organization and conduct of savings banks is provided for by special statute.

## DELAWARE.

State, savings, and private banks and trust companies. Special charter must be obtained from the legislature; no officer is designated to pass upon organization papers; the amount and manner of payment of capital is provided for by special charter; directors manage the affairs of banks; shareholders are liable only for the amount of their stock investment; banks make semiannual and annual reports of condition; they are not subject to examination; they are not restricted as to loans; no requirements as to the amount of cash reserve; no provisions as to accumulation of surplus, and none as to the receipt of deposits; interest is allowed on deposits; the State may be a shareholder; banks are permitted to conduct branch offices; occasional publication of statements of condition; annual reports of savings banks and one other bank are required; a tax of  $1\frac{1}{2}$  per cent is imposed on the market value of shares, except trust companies; receivers are appointed by the chancery court for insolvent banks; one bank can issue circulation not exceeding twice its capital stock; there are no special provisions of law relating to savings banks.

## DISTRICT OF COLUMBIA.

Trust companies, savings and private banks. Trust companies must file for record, with the recorder of deeds, organization certificate, the District Commissioners' certificate of approval, and the certificate of the Comptroller of the Currency that the capital has been paid and securities equal in amount to one fourth of the capital stock deposited with him, as required by law; authority to begin business is issued by the Comptroller; capital stock of at least \$1,000,000 is required; directors, not less than nine nor more than thirty, manage; shareholders, in addition to their stock, are liable to an amount equal to their investment in stock; reports of condition are made to the Comptroller when called for from national banks and are published in the newspapers

and Comptroller's annual report; examinations are made by direction of the Comptroller when deemed necessary; the companies allow interest on deposits; taxes are paid to the amount of 1½ per cent of gross earnings during the preceding year; in case of insolvency, the Comptroller liquidates the trust; preferences in cases of insolvency are given to claims of a fiduciary character; the other banks are either operated under special act of Congress or are not subject to any of the provisions of the Federal statutes.

### FLORIDA.

State, private, and savings banks and trust companies. Five incorporators are required to organize a bank; the State bank comptroller passes upon organization; \$20,000 capital is required for savings banks, and from \$15,000 to \$50,000 for State banks, one-half of which must be paid up and the balance in 10 per cent monthly installments; not less than five directors are required to manage the affairs of the bank; shareholders are liable for double the amount of their stock; banks are required to make at least two reports annually, and as many more as may be called for; no information given relative to examination by State official; savings banks only are restricted as to loans; a 20 per cent cash reserve and a 20 per cent surplus fund is required; savings banks are not allowed to receive deposits in excess of \$1,000 and with accrued interest in excess of \$1,600; no information is given as to whether the State is interested as a shareholder in any of the banks; banks are permitted to conduct branch offices or banks; no report was made as to whether banks are required to make a public statement of condition or whether any tax is imposed on them; the court appoints receivers for insolvent banks; no report was made as to issue of circulation, and none as to the provisions of law relating to savings banks.

## GEORGIA.

State and savings banks. Three incorporators are required and \$25,000 of capital must be paid in before banks can commence business; the secretary of state passes upon the organization papers; in the case of a bank with \$50,000 capital stock one-half is required to be paid up, but banks with a capital of \$25,000 are required to pay up the full amount before commencing business; not less than five nor more than twelve directors are required; banks of issue are required to make reports quarterly, or more frequently if called for; the bank inspector examines banks of issue; in banks of issue loans to officers are limited to 25 per cent, and not more than 10 per cent to any one officer; indorsement of officers is prohibited; banks of issue are required to have a reserve of 50 per cent in capital and 25 per cent of deposits; other banks must have a reserve of 25 per cent and a surplus fund of 5 per cent of the net earnings; no information furnished relative to the provisions governing deposits or interest on the same, or whether the State is a shareholder in the banks, and none as to whether banks are permitted to conduct branch offices; reports of condition are published; receivers are appointed for insolvent banks; the issue of bank circulation is limited to one and one half times its capital, and is a first lien on assets redeemable in United States legal coin or currency; there is no special provision of law relating to savings banks.

### IDAHO.

State and private banks. They must file articles of incorporation; the recorder of the county or secretary of state determines when the conditions have been satisfied; the amount and payment of capital stock

is provided for in the articles of incorporation; not less than five nor more than eleven directors are required to manage the affairs of the bank; shareholders are liable only for the amount of their stock investments; no reports of condition are required; the governor may order an examination or inquiry into the affairs of any corporation; no restrictions of any character are imposed on loans by the bank; no cash reserve and no accumulation of surplus are required; there are no provisions governing the receipt of deposits, and interest is usually allowed; the State is not interested as a shareholder in any of the banks; there are no legal provisions as to branch banks or offices; no published reports of condition are made; a tax is imposed on banks based on their capital and credit; the court appoints receivers to close up the affairs of insolvent banks; banks are not permitted to issue circulation; there is no special provision of law relating to savings banks.

## ILLINOIS.

State, savings, and private banks and trust companies. Application for authority to organize banks must be filed and capital stock paid in in full; the auditor of public accounts determines when the necessary provisions have been complied with in order to begin business; the capital stock required for all banks, except private (for which there is no provision), varies from \$25,000 to \$200,000, depending upon the population of the place in which located; the management of the banks is delegated to the directors; the stockholders of incorporated banks are liable for all claims against associations, in addition to their capital stock, in amount equal to their investment in stock; incorporated banks are required to make reports of their condition at least quarterly, and oftener if called for; private banks make no report; incorporated banks are examined at least once a year; private banks are not examined; loans to one person or firm, by incorporated banks are limited to 10 per cent of their capital stock; there are no legal provisions with respect to cash reserve, but the banking department requires the banks to maintain a reserve of 15 per cent on time and 20 per cent on demand deposits; there are no provisions of law for the accumulation of surplus funds; interest is allowed on deposits, but there are no legal provisions relative to deposits; the State is not a shareholder in the banks; branch banks or offices are not provided for by law, and the banking department does not permit their operation; reports of condition of incorporated banks are published in the newspapers and in the auditor's periodical statements; private banks make no reports; there are no special taxes levied on banks, except for examinations and reports; receivers for insolvent banks are appointed by the court; the issue of circulating notes is not permitted; there are no special laws governing savings banks.

## INDIANA.

State, savings, and private banks and trust companies. Trust companies are required to have a paid-up capital stock of at least \$100,000 and other incorporated banks at least 50 per cent paid in of their capital prior to beginning business; the judge of court determines when the requirements of law with respect to savings banks have been complied with and the auditor of State of trust companies; the minimum amount of capital stock required of banks is \$25,000, of which one half must be paid in in cash and the balance within six months thereafter; trust companies before beginning business must pay in \$100,000 of their capital stock and the remainder as ordered; the management of State

banks and trust companies is delegated to directors and of savings banks to trustees; shareholders are liable on claims against the bank in addition to their stock to an amount equal to their investment in stock; State banks are required to make five reports and savings and trust companies one report annually to the State auditor; examinations of banks are made at the order of the State auditor; loans by savings banks are restricted as to security, time, and amount; there are no legal requirements with respect to keeping a cash reserve; State banks are required to accumulate a surplus amounting to 25 per cent of their capital and savings banks an amount equal to 10 per cent of their deposits; there are special provisions of law relative to deposits, and interest is allowed by the banks; the State is not a shareholder in the banks; branch banks or offices are not permitted; State bank reports are required to be published and, including those of savings banks and trust companies, are also published in the auditor's annual report; no special tax is imposed on banks; receivers for insolvent banks are appointed by the court; the issue of circulating notes is not permitted; a special law governs savings banks.

#### IOWA.

State, savings, and private banks. Each bank must publish a notice and pay up capital before beginning business; the auditor of the State passes upon organization; capital from \$25,000 to \$50,000 for State banks and from \$10,000 to \$50,000 for savings banks is required; directors manage the banks; there is a double liability of shareholders; banks make reports when called for by the State; an examination of State and savings banks once a year is required; loans to officers are limited to 20 per cent to one person; there is no legal requirement as to cash reserve, but the auditor requires 15 per cent of deposits for State banks; there are no legal provisions for surplus; savings banks are limited in deposits to ten times the amount of their capital; interest is allowed; the State is not interested as a shareholder in any of the banks; none of the banks are permitted to conduct branch offices or banks; quarterly reports are published and an annual report by the auditor; the expense of examination is borne by the banks, and they are taxed as other corporations; the court appoints receivers for insolvent banks; deposits of insolvent banks are preferred; bank circulation is not permitted; a special law exists in reference to savings banks.

## KANSAS.

State, private, and savings banks. All banks must be examined by the bank commissioner or his agents and receive a certificate from him before beginning business; the bank commissioner determines when requirements as to organization have been met; the minimum amount of capital is \$5,000, one half of which must be paid in and the balance in monthly installments of 10 per cent; the management of banks is vested in a board of directors of not less than 5 nor more than 13; shareholders are liable in double the amount of their stock; reports of condition must be made four times a year or oftener, at the discretion of the bank commissioner; examinations must be made at least once a year by the commissioner or his deputy; not more than 15 per cent of the capital and surplus may be loaned to one person, firm, or corporation; there is no restriction as to character of security taken for loans; a reserve of 20 per cent of the deposits must be kept on hand, one-half of which may be on deposit with other solvent banks; 10 per cent of

FI 95——26

the profits of the six months preceding the dividend period must be carried to surplus until this fund equals 50 per cent of the capital; there are no regular provisions governing the receipt of deposits; interest is generally allowed on time deposits, the rates varying in different parts of the State; the constitution prohibits the State from holding stock in any banking institution; there is no provision in regard to branch banks; reports of condition are required to be published at least four times a year; there are no special taxes imposed except for expense of examinations; the court appoints a receiver for insolvent banks on application of the attorney general; the constitution provides that all banking laws shall require as collateral security for the redemption of circulating notes a deposit with the auditor of the State of interest-bearing bonds of the United States or of the several States at the market prices of the New York Stock Exchange in an amount equal to the circulation which the bank is authorized to issue, and shall keep on hand in its vault at all times in cash 10 per cent of the total amount of its circulating notes; the general banking law governs savings banks.

KENTUCKY.

State, savings, and private banks and trust companies. They must obtain a special charter and file a certificate of payment of capital before commencing business; the Secretary of State passes upon organization; the amount of capital is regulated by charter; the directors manage the banks; the shareholders are liable only on stock investments; double liability goes into effect September, 1897; reports are required quarterly and may be called for oftener; there is no supervision by State officers, and no examination required; loans are limited to 20 per cent of the capital; no cash reserve is required; a surplus of 20 per cent of capital must be maintained; there are no provisions relating to deposits; interest is allowed; the State is a shareholder in banks; several banks have branches; reports of State banks are published; semiannual reports of private banks are published and are open to inspection at all times; no special taxes are imposed upon banks; the assignees distribute the assets of insolvent banks; the banks are not permitted now to issue circulation; there is no special law relating to savings banks.

LOUISIANA.

State, savings, and private banks. The banks must comply with the provisions of the general corporation law in order to begin business; no officer is designated to determine when the conditions have been complied with; capital for State banks to the amount of \$100,000 (with certain exceptions) is required to be paid in within twelve months, and capital of savings banks \$50,000, of which 20 per cent must be paid in; the directors manage the banks; shareholders are liable only to the amount of their stock investment, in private banks they are personally liable for all debts; quarterly reports are required; supervision of banks is delegated to State Treasurer and Secretary of State; no loans are allowed on the security of a bank's own stock; a reserve of one-third of their cash liabilities is required to be held in specie, and the balance in specie or receivables; there are no legal provisions regarding surplus or deposits; interest is allowed by savings banks; the State is not interested as a shareholder in any of the banks; there is no law prohibiting branch banks; quarterly statements of condition are published; a license tax on capital and surplus is imposed; the court appoints commissioners to close up insolvent banks; the statutes provide for circulation.

### MAINE.

Savings banks and trust companies. Savings banks are organized under general laws and trust companies by special act; the bank examiner passes upon organization papers; the amount and payment of capital stock is regulated by charter; savings banks have no capital; trust companies are managed by directors, savings banks by trustees; stockholders in trust companies are doubly liable to the amount of their stock; reports of condition are made by savings banks once a year, trust companies twice a year, and savings banks and trust companies when called for; examinations are made by State officials once a year; savings banks are restricted in various ways; trust companies must maintain 15 per cent on certain deposits as a cash reserve, and savings banks a surplus of one-fourth of 1 per cent of their average deposits; deposits in savings banks are limited to \$2,000 by certain depositors; interest is allowed; the State is not a shareholder in any of the banks; savings banks are not permitted to conduct branches; trust companies may do so; the examiner's report is published in local newspapers and in annual report; savings banks pay a tax of three-fourths of 1 per cent on average deposits, surplus, and undivided profits; insolvent banks and trust companies are closed by receivers, savings banks by receivers or scaling down deposits; there is no issue of bank circulation; a special law governs savings banks.

# . MARYLAND.

State, savings, and private banks and trust companies. The capital stock is required to be paid in full, except for savings banks, and organization papers must be filed; the court grants charters for savings banks; the amount of capital required for banks other than savings banks in Baltimore is \$300,000; elsewhere, \$50,000; the management of banks is vested in a board of not less than five nor more than seven directors; shareholders are liable for claims against the bank only to the amount of their stock investment; annual reports of condition are required; no provision is made for examination of banks; loans to the State or the United States are limited to \$50,000, to other States prohibited; there are no legal provisions for a cash reserve or surplus fund, and none governing the receipt of deposits to each class of banks; interest is allowed; the State is not interested as a shareholder in any of the banks; no legal provisions exist for the conduct of branch offices or banks; reports of condition are published in newspapers; no special taxes are imposed; assets of insolvent banks are distributed to creditors; the issue of circulation is permitted to the amount of capital stock; not less than five incorporators are required for savings banks.

## MASSACHUSETTS.

Savings and trust companies and State and private banks. An act of incorporation is obtained from the general court; trust companies must pay in their capital in full; the general court and board of commissioners of savings banks pass upon organization papers; savings banks have no capital; the amount of capital of trust companies is fixed by charter and all required to be paid in; directors are required for trust companies and trustees for savings banks; no liability exists for shareholders of savings banks; shareholders of trust companies are liable only for the amount of their stock investment; annual reports are required from savings banks and trust companies, and examination of banks once a year by the savings bank commissioners; loans of savings banks are limited to amount, character, and value of security,

loans of trust companies limited to amount and character of security; 15 per cent cash reserve is required for trust companies, no reserve required for savings banks; savings banks must maintain a surplus fund of 5 per cent of their deposits; savings bank deposits are limited to \$1,000 for a single depositor; interest is allowed; the State is not a shareholder in any of the banks; branch offices are not permitted; semiannual reports of trust companies and annual reports of all banks are published in the bank commissioners' report; a tax is imposed on savings banks to the amount of one-half of 1 per cent on average deposits, less exemptions; the court appoints receivers for insolvent banks; no existing bank can issue circulation; savings banks must pay 5 per cent in dividends per annum.

### MICHIGAN.

State, savings, and private banks. any bank; branch banks are not allowed; bank reports must be published in newspapers; there is no special provision for taxing banks; insolvent banks are placed in the hands of receivers; savings bank depositors are preferred creditors; circulation is not permitted; a special act governs savings banks.

#### CONCLUSION.

In concluding this report the Comptroller desires to again bear testimony to the character and general efficiency of the employés in the Bureau, the examiners in the field, and the work accomplished by the receivers in the management of the trusts in their charge. The record of the Bureau throughout the past year justifies these expressions of praise.

In the appendix will be found in detail the usual tables, together with a digest of legal decisions rendered by the various courts of the country involving questions affecting national banks, and also a carefully revised edition of the national bank act, which is believed to contain all the Federal statutes now in force relating to national banks.

In the second volume of this report will be found a detailed statement of the condition of all the national banks, as shown by the report of condition of September 28, 1895, alphabetically arranged by States and properly indexed.

Sames HEKels
Comptroller of the Currency.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

¹The Appendix and tables here referred to, which are omitted for want of space, will be found in the separate volume of the Comptroller's report.

# REPORT OF THE COMMISSIONER OF INTERNAL REVENUE.

TREASURY DEPARTMENT,
OFFICE OF THE COMMISSIONER OF INTERNAL REVENUE,
Washington, D. C., November 1, 1895.

SIR: In compliance with the instructions contained in your letter of September 10, 1895, I have the honor to submit the following report of the operations of the Bureau of Internal Revenue for the fiscal year ended June 30, 1895, with certain additional information relating to the work performed and receipts from the various sources of internal revenue during the months of July, August, and September of the current fiscal year.

The titles of the tables found at the close of the bound volume of

this report are as follows:

Table A, showing the receipts from each specific source of internal revenue and the amounts refunded in each collection district, State, and Territory of the United States for the fiscal year ended June 30, 1895.

Table B, showing the number and value of stamps for special taxes, manufactured tobacco, snuff, eigars, eigarettes, distilled spirits, fortified sweet wine, fortified wine for export, fermented liquors, oleomargarine, and opium manufactured for smoking purposes; also the number of the different kinds of certificates of registry, with the number and value of documentary stamps used for validating unstamped instruments, issued to collectors of internal revenue during the fiscal year ended June 30, 1895.

Table C, showing the percentages of receipts from the several general sources of internal revenue now taxable in each State and Territory of the United States to the aggregate receipts from the same sources, by

fiscal years, from July 1, 1863, to June 30, 1895.

Table D, showing the aggregate receipts of internal revenue in each collection district, State, and Territory of the United States, by fiscal

years, from September 1, 1862, to June 30, 1895.

Table E, showing the receipts from specific and general sources of internal revenue, by fiscal years, from September 1, 1862, to June 30, 1895.

Table F, showing the ratio of receipts from specific sources of internal revenue to the aggregate receipts of the same, by fiscal years, from

July 1, 1863, to June 30, 1895.

Table G, showing the returns of distilled spirits, fermented liquors, manufactured tobacco, snuff, cigars, and cigarettes, under the several acts of legislation and by fiscal years, from September 1, 1862, to June 30, 1895; also statement of the production of distilled spirits and fermented liquors in the several States and Territories, by fiscal years, from July 1, 1877, to June 30, 1895.

<sup>&</sup>lt;sup>1</sup> The tables here referred to are omitted from this volume.

Table H, showing the receipts from special taxes in the seveal States and Territories for the twelve months ended June 30, 1895.

Table I. Abstract of reports of district attorneys concerning suits and prosecutions under the internal-revenue laws during the fiscal year ended June 30, 1895.

Table K. Abstract of seizures of property for violation of internal-

revenue laws during the fiscal year ended June 30, 1895.

Table L, showing the collections, expenses, and percentage cost of collection in the several collection districts during the fiscal years ended June 30, 1894 and 1895.

## COLLECTIONS FOR THE FISCAL YEAR ENDED JUNE 30, 1895.

In my last annual report I estimated that the receipts from all sources of internal revenue for the fiscal year ended June 30, 1895, would aggregate \$171,000,000. This estimate was predicated upon large receipts expected to be derived from the tax upon incomes of over \$4,000 per annum levied by the act of August 28, 1894. The decision of the Supreme Court of the United States, declaring the income tax unconstitutional, cut off all revenue from this source after only \$77,130.90 had been collected, and as a result, the collections were \$27,753,922.25 less than the sum estimated by me, the actual receipts for the fiscal year ended June 30, 1895, being \$143,246,077.75.

#### RECEIPTS FOR THE PAST TEN FISCAL YEARS.

Fiscal year ended—	
June 30, 1895	\$143, 246, 077. 75
June 30, 1894	147, 168, 449, 70
June 30, 1893	161, 004, 989, 67
June 30, 1892	153, 857, 544, 35
June 30, 1891	146, 035, 415, 97
June 30, 1890	
June 30, 1889	130, 894, 434, 20
June 30, 1888	124, 326, 475, 32
June 30, 1888 June 30, 1887	118, 837, 301, 06
June 30, 1886.	

## COLLECTIONS FOR THE CURRENT FISCAL YEAR.

After a careful comparison of the receipts from all sources of internal revenue for the months of July, August, and September, 1895, with the collections for the same months in previous fiscal years, and giving due weight to the improved business conditions manifested throughout the country in the peculiar lines touched by internal taxation, I estimate that the receipts from all sources of internal revenue for the current fiscal year will aggregate \$165,000,000.

FI 95---27

# INTERNAL-REVENUE RECEIPTS DURING THE LAST TWO FISCAL YEARS.

COMPARATIVE STATEMENT SHOWING THE RECEIPTS FROM THE SEVERAL OBJECTS OF INTERNAL TAXATION IN THE UNITED STATES DURING THE FISCAL YEARS ENDED JUNE 30, 1894 AND 1895.

# COST OF COLLECTION.

The cost of collection for the past fiscal year, distributed among the different items of appropriation, was approximately as follows:

For salaries and expenses of collectors, including pay of deputy collectors, clerks, etc., and including expenses incident to enforcing the provisions of law taxing oleomargarine, and the provisions of the act of October 1, 1891, relating to the payment of bounty on sugar  For salaries and expenses of revenue agents, surveyors of distilleries, gaugers, storekeepers, and miscellaneous expenses.  For salaries and expenses of sugar inspectors.  For paper for internal-revenue stamps.  For expenses of detecting and punishing violations of internal-revenue laws.  For salaries of officers, clerks, and employees in the office of Commissioner of Internal Revenue.  For enforcing the provisions of the act of August 28, 1394, imposing a tax upon incomes. Amount allowed for salaries of deputy collectors, clerks, and expenses in offices of collectors.  \$86, 366, 64	1, 890, 014. 60 1, 512. 03 40, 945. 90 50, 000. 00 262, 646. 33
For salaries of additional clerks and employees in the office	•
of 'ommissioner of Internal Revenue	91, 621. 38
Total amount expended  Deduct expenses relating exclusively to the pyment of bounty on sugar, as follows:	4, 133, 721. 12
For additional deputies and clerks \$551.08	
Salary and expenses of sugar inspectors	•
	6, 119.96
Leaving the net cost of collection	4, 127, 601, 16

## PERCENTAGE OF COST OF COLLECTION.

The percentage of cost of collection is 2.88 per cent. The expenses for the previous fiscal year were \$3,975,904, or 2.70 per cent of the collections for that year, the figures indicating a slight increase in the percentage of cost for the fiscal year just ended. Deducting both the receipts and the expenditures involved in the enforcement of that portion of the act of August 28, 1894, relating to the tax upon incomes, the percentage of cost of collection for the fiscal year ended June 30, 1895, would be reduced to 2.81.

## FOR DETECTING AND PUNISHING VIOLATIONS OF LAW.

The amount appropriated for the purpose of detecting and bringing to punishment persons guilty of violating the internal revenue laws, for the fiscal year ended June 30, 1895, was \$50,000. This sum has already been exhausted by the expenses incurred in this direction, and an additional sum of \$700 will be required for the payment of pending claims.

# AMOUNT EXPENDED UNDER "CHINESE EXCLUSION ACT."

By the act approved November 3, 1893, to prohibit the coming of Chinese persons into the United States, the duty of registering Chinese laborers was imposed upon this Bureau. While this work was practically completed May 3, 1894, there still remained some clerical work to be performed in several of the larger districts, and the amount paid for such services up to the close of the fiscal year ended June 30, 1895, was \$505.50, leaving unexpended on the 1st day of July, 1895, the sum of \$16,595.14 of the \$60,000 originally appropriated for this purpose.

#### MISCELLANEOUS EXPENSES.

The act of Congress approved August 7, 1882, making provision for sundry civil expenses for the year ended June 30, 1883, required the Commissioner of Internal Revenue to make a detailed statement of all miscellaneous expenditures in the Bureau of Internal Revenue for which appropriation was made in that act. In accordance with this requirement, I submit the following detailed statement of miscellaneous expenses incurred:

Telegraphing on public business	\$1, 158, 81
Telegraphing on public business	2, 892, 14
Hydrometers used in gauging spirits	6, 453, 95
Weighing beams for use in weighing spirits	1, 786, 85
Expenses of testing spirits weighed, labor, etc	150. 20
Steel canceling dies	.500, 00
Saccharometers and chemicals for testing sweet-wine samples and oleo-	
margarine	216.52
Stationery for internal-revenue officers	428.21
The Internal Revenue Record supplied to internal-revenue officers	2, 200.00
The Federal Reporter for the office of the Commissioner of Internal Rev-	
enue	14.00
Compensation of United States attorneys in internal-revenue cases	
allowed under sections 827 and 838, Revised Statutes	310.00
Traveling expenses of clerks and chemist under special orders of the	
Department	291. 13
Expenses of seizures and sales by collectors	824.26

## ESTIMATED EXPENSES FOR NEXT FISCAL YEAR.

I estimate the expenses of the Internal-Revenue Service for the fiscal year ending June 30, 1897, as follows:

year chung out oo, 100, as follows.	
For salaries and expenses of collectors, including pay of deputy collectors	
and clerks, and expense of enforcing the act of August 2, 1886, taxing	
oleomargarine, and the act of August 4, 1886, imposing on the Govern-	A
ment the expense of the inspection of tobacco exported	\$1,850,000
For salaries and expenses of 20 revenue agents, for surveyors, for fees	:
and expenses of gaugers, for salaries of storekeepers, and for miscel-	
laneous expenses	2, 150, 000
For paper for internal-revenue stamps	60,000
For detecting and bringing to trial and punishment persons guilty of	· · ·
violating the internal-revenue laws, including payment for information	
and detection.	60,000
For salaries of officers, clerks, and employes in the office of the Commis-	
sioner of Internal Revenue	259, 090
Total	4, 379, 090
	-, 0.0, 000

#### SALARIES.

I have the honor to recommend that Congress appropriate for the fiscal year ending June 30, 1897, the sum of \$259,090 as salaries for the following officers, clerks, and employés in this Bureau:

One Commissioner, at	
One Deputy Commissioner, at	
One chemist, at 2,500	
Two heads of division, at	
Five heads of division, at	
One superintendent of stamp vault, at	
One stenographer	
Twenty-four clerks, at	
Twenty-four clerks, at	
Thirty-four clerks, at

Twenty-four clerks, at 1, 200 Thirteen clerks, at 1,000	
Forty clerks, at 900	
Two messengers, at	
Fourteen assistant messengers, at	
Thirteen laborers, at	

An aggregate of 200 persons.

I also recommend the appropriation of the sum of \$2,500 as salaries for one stamp agent at \$1,600 and one counter at \$900, the same to be reimbursed by the stamp manufacturers, as provided by the act of August 5, 1882.

## SCALE OF SALARIES OF COLLECTORS.

The recommendations made for the salaries of collectors are based upon an estimate of their probable collections according to the following scale, with the qualification that if the actual collections should vary from the amounts estimated, the salaries will be readjusted at the end of the fiscal year:

For collection of—	Salary.	For collection of—	Salary.
\$25,000 or less. 25,001 to \$37,500 37,501 to 50,000 50,001 to 75,000 75,001 to 100,000 100,001 to 125,000 125,001 to 175,000 175,001 to 225,000 225,001 to 275,000 225,001 to 275,000 325,001 to 325,000 325,001 to 375,000	2, 125 2, 250 2, 375 2, 500 2, 625 2, 750 2, 875 3, 000 3, 125	475,001 to 550,000	3, 500 3, 625 3, 750 3, 875 4, 000 4, 125 4, 250 4, 375

#### OFFICIAL FORCE.

The force connected with this Bureau during the fiscal year which ended June 30, 1895, in the various districts throughout the United States, as reorganized under the Executive order of May 21, 1887, was 63 collectors, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
33	\$4,500 4,375 4,250 4,000 3,875	2	\$3, 625 3, 500 3, 375 3, 250 3, 125	4	\$2,875 2,750 2,500

There were also employed 963 deputy collectors, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
22	\$2,000 1,900 1,800 1,750 1,700 1,600 1,550 1,500 1,450 1,450 1,350	34 169 127 136 2 64 4 23 1 5 5	\$1,300 1,200 1,100 1,000 950 950 850 800 750 600	9	\$500 480 425 400 360 250 240 200 150

There were also employed in the offices of the different collectors 185 clerks, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
1 2 3 9 4 1 1 38	\$1,800 1,600 1,500 1,400 1,300 1,250 1,200	8	\$1,150 1,100 1,000 900 890 750 720	9	\$700 650 600 500 400

Also 27 porters, messengers, or janitors, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
6		3 2 1	\$300 <b>24</b> 0 200 180	1	\$120 100

In addition to the foregoing, there were also employed for limited periods, 8 persons, in duties solely connected with the execution of the provisions of the act of October 1, 1890, relating to the payment of bounty on sugar produced, as shown more in detail in that part of this report relating to that subject.

At the close of the year ended June 30, 1895, 221 officers, clerks, messengers, and laborers were employed in this Bureau, and the aggregate amount paid during the year for their salaries was \$267,901.07.

## STOREKEEPERS, GAUGERS, ETC.

There were also employed 630 gaugers, who received fees not to exceed \$5 per day; 400 storekeepers, and 1,602 storekeepers and gaugers, whose pay did not exceed \$4 per diem, and 5 distillery surveyors. All the foregoing officers are paid only when actually employed.

Storekeepers are assigned to those distilleries only which have a surveyed daily capacity exceeding 100 bushels, and are paid such compensation as may be prescribed by the Commissioner of Internal Revenue,

not to exceed \$4 per day.

Storekeepers and gaugers are assigned to distilleries having a capacity of 100 bushels or less, which are in operation, and to distilleries of a capacity not exceeding 500 bushels, when under suspension.

Under the act of August 28, 1894, storekeepers and gaugers may now be assigned to perform the separate duties of a storekeeper at any distillery, or at any general or special bonded warehouse, or to perform any of the duties of a gauger, under the internal revenue laws.

The very material increase in the number of storekeepers and gaugers results from the change made in the law providing for the asignment of these officers to the separate duties of the combined office. This has resulted in a material saving in the expense for that service.

The pay of storekeepers and gaugers assigned to distilleries whose registered daily capacity is 20 bushels or less, is fixed by law at \$2 per diem. The pay of those assigned to larger distilleries has been graded

according to the following scale:

Compensation of storekeepers and gaugers assigned to distilleries in operation having a surveyed daily capacity exceeding 20 bushels, and not exceeding 40 bushels, \$3 per day; compensation of those assigned to distilleries having a surveyed daily capacity exceeding 40 bushels, and not exceeding 60 bushels, \$3.50 per day; compensation of those assigned to distilleries having a surveyed daily capacity exceeding 60

bushels, \$4 per day.

The compensation of such officers assigned to distilleries under suspension having a surveyed daily capacity not exceeding 20 bushels, and having not exceeding 5,000 gallons of spirits in the distillery warehouse, is \$2, for such days only as the officer is required to be in attendance to make withdrawals of spirits, or for other necessary purposes; when the quantity of spirits in warehouse of a suspended distillery having a daily capacity not exceeding 500 bushels, exceeds 5,000 gallons, and does not exceed 25,000 gallons, the compensation is \$2 per day of constant attendance; when the quantity exceeds 25,000 and does not exceed 100,000 gallons, \$3 per day; and when the quantity exceeds 100,000 gallons, \$4 per day.

## GENERAL CONDITION OF THE OFFICE AND THE SERVICE.

The work of the Bureau, both in the office and in the field, is in good condition, and it affords me very great pleasure to commend the efficiency, industry, and competency of the officers, clerks, and employés in the several branches of the service, which has resulted in the prompt and accurate disposal of all the business of the Bureau up to date.

# REVENUE AGENTS' DIVISION.

During the past fiscal year 20 agents have been employed, 1 as chief of division in this office, 16 in charge of territorial divisions, and 3 in the examination of the offices and accounts of collectors. Under the provisions of the income tax law 5 agents were employed.

#### EXPENSES OF REVENUE AGENTS.

There have been expended from the appropriation for salaries and expenses of revenue agents during the year the following amounts:

Aggregate salary of agents	33, 092, 45 428, 21
(Toda)	00.010.01

#### WORK OF REVENUE AGENTS.

Three thousand three hundred and nine violations of internal revenue law have been reported by revenue agents during the year; 789 persons have been arrested on their information; property to the value of \$340,905.26 has been reported by them for seizure, and \$139,650.03 for assessment for unpaid taxes and penalties.

For the preceding fiscal year 2,729 violations of internal-revenue law were reported by revenue agents; 632 persons were arrested on their information; property to the value of \$246,197.96 was reported by them for seizure, and \$40,271.01 for assessment for unpaid taxes and penalties.

### RECAPITULATION.

Amount expended by revenue agents	 5. 90 125. 98
	 <del></del>
Total	 50, 000, 00

The accounts for expenditures under this appropriation are rendered monthly, with an itemized statement, and in all cases supported by proper subvouchers duly sworn to. These accounts pass through all the accounting offices in the Treasury Department and are filed in the Register's office.

#### INTERNAL REVENUE INSPECTORS.

Under the authority conferred by the provisions of the legislative act of March 3, 1891, eleven inspectors were employed on work incident to the payment of the bounty on sugar, at a compensation of \$5 per day while actually employed, and their necessary expenses. The services of eight of these inspectors were dispensed with after August 4, 1894, and three inspectors were retained until the close of the calendar year 1894, their services being required to complete the unfinished business pertaining to sugar bounty work.

## STAMP DIVISION.

The statements under the above heading relate to the receipt, custody, and issue of all of the internal revenue stamps of the Government and the transactions growing out of the manufacture of the paper, the production of the stamps, and the receipt and issue of the same by this office.

## MANUFACTURE OF STAMP PAPER.

After due advertisement for proposals to furnish stamp paper for the fiscal year ending June 30, 1896, four sealed bids were presented, which were opened on the 20th day of April, 1895, in the office of the Commissioner of Internal Revenue, by a committee appointed by the honorable Secretary of the Treasury to open and consider such bids as might be presented. Samples of the paper to be furnished were submitted with each of the bids, and after the same were scheduled and classified, and the samples submitted to the usual mechanical tests, an award of contract was recommended by the committee to the lowest bidder whose sample stood a satisfactory test as compared with the others.

After some correspondence and a personal interview between this office and the lowest bidder above referred to, it was found that the paper proposed could not be furnished satisfactorily to the Government, and the contract was therefore duly awarded, on the 10th day of May, 1895, to the New York and Pennsylvania Company, of New York, at 4.6 cents per pound, including cost of transportation and delivery at the Treasury Department, this being a reduction of four-tenths of 1 cent per pound from the former contract price, which was 5 cents per pound.

PRODUCTION OF STAMPS.

All stamps used by this Bureau are printed and engraved by the Bureau of Engraving and Printing, with the exception of stamps for tobacco imprinted on foil wrappers, which have been printed and furnished by the John J. Crooke Company, of New York, under a contract which provides that the imprinting of such stamps shall be without cost to the Government, the contractors receiving such remuneration from the manufacturers of tobacco as may be agreed upon between them, and reimbursing the Government for the salaries of one stamp agent for the United States and one counter, amounting to \$2,500 per annum.

INCREASE OF STAMP VALUES RESULTING UNDER TARIFF ACT OF AUGUST 28, 1894.

Under the provisions of the act of Congress approved August 28, 1894, the tax rate per gallon on distilled spirits was increased from 90 cents to \$1.10 per gallon, and nine one-tenth gallon coupons were added to the tax-paid stamps for distilled spirits. Immediately after the passage of the act, in order to provide against any interruption of current business, and to supply owners of spirits with tax-paid stamps without delay, the entire stock of such stamps in the vault was imprinted as rapidly as possible by the use of hand stamps, under the supervision of a special committee appointed for that purpose by the Secretary of the Treasury.

Collectors were also instructed to imprint, by the use of hand stamps, all of the tax-paid stamps issued by them on and after August 28, 1894, and to make assessments for the fractional parts of gallons, so as to

conform to the increased rate of taxation.

This increase of 20 cents per gallon in the tax on spirits and the addition of the fractional coupons to the stamps necessitated the return to this office by collectors of all the stamps of Series R, 1878, in their hands, for the purpose of imprinting the gallon and fractional gallon coupons and their reissue at the new rate. To accomplish this all these stamps were received into the vault, and, together with those of same class and denomination in stock, were forwarded to the Bureau of Engraving and Printing and were there properly imprinted.

The increased labor imposed upon the stamp division by this increase in the tax rate and alteration of the stamps was accomplished successfully and without a moment's delay in the current work or any inaccu-

racies in the accounts of the division.

#### NEW CLASSES OF STAMPS ADDED UNDER TARIFF ACT.

There have been added to the stock of stamps regularly kept in the vault the following new classes and denominations, viz: (a) General bonded-warehouse transfer; (b) general bonded-warehouse retransfer; also the two classes of 2-cent stamps representing the tax on playing cards as embodied in the internal-revenue schedule of the act of August 28, 1894, one class denominated as "Stock on hand," to be affixed by dealers to all cards in stock and on hand when the law imposing the tax first took effect, and the other as "Manufacturer's," to be affixed by manufacturers to each pack of cards manufactured and sold by them.

## STOCK OF STAMPS IN VAULT.

The stock of stamps on hand in the vault October 1,1895, of the various classes and denominations, is 126,722,664, and the value of the same is \$57,266,359.29.

This is very much below the estimated three months' supply which the statute requires to be kept in the vault; but the inability to maintain the stock at statutory requirement is due entirely to the failure of the Bureau of Engraving and Printing to deliver the stamps ordered by this Bureau, and not to any official neglect on the part of this office. The statement of the Bureau of Engraving and Printing of October 1, 1895, shows a balance due on past orders of 154,690,100 stamps, and the orders for October delivery amount to 102,462,000.

## REDEMPTION OF CHECK AND PROPRIETARY STAMPS.

Since July 1, 1894, and prior to June 30, 1895, 80 applications for redemption of check and proprietary stamps have been received for consideration, the aggregate value of amounts claimed being \$147.57 and the various sums stated ranging from 4 cents to \$20. The time allowed by law for the redemption of these classes of stamps having expired June 30, 1886, under the limitation imposed by section 17 of the act of March 1, 1879, the claims were rejected and the stamps forwarded therewith were returned to the applicants.

# TOBACCO DIVISION.

The aggregate amount of taxes collected from tobacco during the last fiscal year was \$29,704,907.63. This amount includes internal revenue taxes paid by stamps on imported and manufactured tobacco, snuff, cigars, and cigarettes.

The net increase of collections for the last fiscal year, as compared with those for the previous fiscal year, was \$1,087,009.01. The increase

from the following named articles was:

Cigars and cheroots	 \$291, 165, 02
Cigarettes	 74, 511. 09
Tobacco, chewing and smoking	 769, 070, 00
Total	
Deduct decrease, snuff	 47, 737, 10

pared with those taxed for the previous fiscal year, was:

Cigars and cherootsnumber Cigarettesdo	
Total	241, 749, 554
Tobacco, chewing and smoking pounds  Decrease, snuff do	12, 817, 833 795, 618
Net increase, tobacco and snuff	12, 022, 215

The export account shows a decrease in manufactured tobacco and snuff of 812,669 pounds, a decrease in the number of cigars exported of 793,015, and an increase in the number of cigarettes exported of 60,253,800.

## COMPARATIVE STATEMENT.

The following exhibit shows in detail the receipts for the fiscal year ended June 30, 1895, from each particular source of the tobacco tax, as compared with those for the previous fiscal year:

#### THE TABULAR STATEMENTS.

In the tables annexed will be found statements showing the manner in which the manufacturing is distributed among the different States and districts, the number of persons and firms engaged in each of the two branches of manufacturing, the quantity of different kinds of materials used, and the quantity and kinds of product manufactured. These tables are compiled from the reports received from the collectors of internal revenue of the transactions of manufacturers in their several districts for the calendar year ended December 31, 1894, a period of time differing from the fiscal year ended June 30, 1895, which will account for any apparent discrepancies between them and the previous part of the report relating to tobacco.

#### ABATEMÈNT CLAIMS.

On the 1st of July, 1894, there were pending 615 claims for abatement of assessed taxes, amounting to \$181,493.34, and during the year 4,645 claims, amounting to \$1,594,168.97, were presented.

Of these, 3,771 claims, amounting to \$1,515,372.25, have been allowed by this office, and 1,023 claims, amounting to \$176,403.03, have been

rejected or returned for amendment.

This left 466 claims for abatement still pending on the 30th of June,

1895, amounting to \$83,887.03.

Since that date and up to October 1, 1895, 1,309 other claims have been filed, amounting to \$127,950.43, and 1,119 claims have been allowed, amounting to \$44,422.45, and 477 rejected or returned for amendment, amounting to \$68,784.23, and on the 1st of October, 1895, 179 claims for abatement were pending, amounting to \$98,630.78.

## REFUNDING CLAIMS.

On the 1st of July, 1894, there were pending 179 claims for the refunding of taxes collected, amounting to \$133,394.11, and during the year

274 other claims, amounting to \$64,333.57, were presented.

Of these, 80 claims, amounting to \$14,715.75, have been allowed, and 74 claims, amounting to \$20,138.39, have been rejected or returned for amendment. This left 299 claims for refunding still pending on the 30th of June, amounting to \$162,873.54.

Since that date and up to the 1st of October, 1895, 844 other claims, amounting to \$48,192.50, have been received, and 716 claims, amounting to \$48,771.35. have been allowed, and 32 claims, amounting to \$3,386.20, have been rejected or returned for amendment. On the 1st of October, 1895, 395 claims for refunding, amounting to \$158,908.49, were pending.

## COMPARATIVE STATEMENT OF DISTILLERIES REGISTERED AND OPERATED.

The whole number of grain distilleries registered during the fiscal year ended June 30, 1895, was 1,949, of which number 1,621 were operated.

The numbers registered and operated during the fiscal year ended June 30, 1894, were 1,964 and 1,541, respectively, showing a decrease during the last fiscal year of 15 in the number registered, and an increase

of 80 in the number operated.

The larger portion of the decrease in the number registered occurred in the class of distilleries having the smaller capacities for the production of spirits, there having been a decrease of 10 in the number of distilleries of this class registered, although there was an increase of 51 in the number operated.

In the class of larger distilleries there was a decrease of 5 in the number registered, but an increase of 29 in the number operated.

During the fiscal year ended June 30, 1894, there were registered 1,693 distilleries of the smaller class, varying in daily grain capacity from not over 5 to not over 60 bushels each, and of this number 1,334, or 78+ per cent, were operated.

Of the larger distilleries, having daily grain capacities varying from over 60 bushels to several thousand bushels each, 271 were registered,

and 207, or 76+ per cent, were operated.

During the fiscal year ended June 30, 1895, of the smaller distilleries 1,683 were registered, and 1,385, or 82+ per cent, were operated.

Of the larger distilleries 266 were registered, and 236, or nearly 89

per cent, were operated.

There were 12 molasses distilleries registered and 11 operated, a decrease of 1 in the number reported operated for the previous fiscal year.

There were only 920 fruit distilleries registered and but 797 operated, a decrease from the previous year of 2,713 in the number registered

and of 2,798 in the number operated during the fiscal year.

The total number of grain, molasses, and fruit distilleries registered

and operated during the year is 2,881 and 2,429, respectively.

There was a decrease of 2,728 in the number of all kinds of distilleries registered and of 2,719 in the number of all kinds operated during the fiscal year ended June 30, 1895, as compared with the fiscal year ended June 30, 1894.

The average yield per bushel of grain was  $\frac{78,172,512}{18,057,107} = 4.32 + \text{gallons of spirits}$ . The average yield per gallon of molasses was  $\frac{1,777,083}{2,219,547} = 0.800 + \text{ of a gallon of rum}$ . Three million five hundred and eighty-three thousand two hundred and sixty-four gallons of molasses were used for the production of spirits instead of rum; and their equivalent, estimated in bushels of grain, is added to the total grain in determining the yield per bushel of grain.

COMPARATIVE STATEMENT OF MATERIALS USED AND SPIRITS PRODUCED DURING THE LAST TEN FISCAL YEARS.

The quantity of grain used for the production of spirits during the fiscal year ended June 30, 1895 (18,057,107 bushels, including 557,396 bushels, which is the equivalent of 3,583,264 gallons of molasses, used for the production of spirits), shows a decrease of 1,659,711 bushels from the amount used in the preceding fiscal year (19,716,818 bushels), and is 3,854,196 bushels less than the average (21,911,303 bushels), for the last ten years. The number of gallons of spirits produced from grain during the year (78,172,512 gallons) shows a decrease of 9,168,385 gallons from the product (87,340,897 gallons) for the year ended June 30, 1894, and is 15,573,664 gallons less than the average product (93,746,176 gallons) for the last ten years.

The yield of spirits from each bushel of grain is 4.32+ gallons.

The yield for the two preceding years was 4.35+ gallons for 1893,

and 4.42+ gallons for 1894.

The quantity of molasses used for the production of rum during the fiscal year (2,219,547 gallons) shows a decrease of 378,862 gallons from the quantity used in the previous year (2,598,409 gallons), and is 172,321 gallons less than the average (2,391,868 gallons) for the last ten years.

The quantity of rum distilled from molasses during the fiscal year (1,777,083 gallons), shows a decrease of 87,512 gallons from the product of the previous year (1,864,595 gallons), and is 39,552 gallons less than the average product (1,816,635 gallons) for the last ten years.

## DIVISION OF ASSESSMENTS.

The following statements relative to assessments, to spirits deposited in and withdrawn from distillery warehouses, general bonded warehouses, and special bonded warehouses, the number and location of each of such warehouses, and the names of the proprietors thereof; to the stock of spirits in the United States October 1, 1895; to the exportation of spirits, fermented liquors, tobacco, snuff, cigars, and cigarettes, and playing cards in bond; to the exportation of tobacco, cigars, fermented liquors, and stills, with benefit of drawback; to the use of grape brandy, tax free, in fortifying wines, are prepared from reports in the division of assessments.

The statements relative to assessments are to be found on this page and the page following; statements relative to operations in distillery warehouses commence on page 72 (see also special index on page 71); to operations in general bounded warehouses, on page 144, and in special bonded warehouses on page 167; to exportations in bond free of tax from special bonded warehouses, on page 171; as to tobacco, snuff, cigars, and cigarettes, on page 175; to exportations with benefit of drawback, on page 176, and to the use of brandy in fortifying wines, on page 174.

It will be observed that in the following table this stamp tax on playing cards and the tax ou incomes assessed in 1895 are in excess of such assessments in 1894. This is due to the fact that these taxes were imposed by the revenue act of August 28, 1894.

The tax on playing cards was imposed by sections 38 to 47 of said act, is payable by stamp, and is only assessable when not paid by stamp as required by law.

The income tax was imposed by sections 27 to 37 of said act, and, under the terms of the act, was to be assessed. The Supreme Court having decided the act to be unconstitutional, no assessments were made except in cases where the tax had been paid prior to May 20, 1895, the date on which the decision was rendered. This is the amount reported in the subjoined table.

#### ASSESSMENTS.

#### 1. By States and Territories, 1895.

The following statement shows the amount of assessments in each of the several States and Territories of the United States, except where two or more are comprised in one district, during the fiscal year ended June 30, 1895:

States and Territories.	Amount.	States and Territories.	Amount.
Alabama Arkansas California and Nevada Colorado and Wyoming Connecticut and Rhode Island Florida Georgia Himois Indiana Kansas, Indian Territory, and Oklahoma Kentucky Louisiana and Mississippi Maryland, Delaware, and District of Columbia Massachusetts Michigan Mimosota Missori	10, 436. 79 20, 281. 38 4, 107. 26 13, 097. 90 3, 892. 50 15, 426. 69 45, 160. 30 16, 199. 61 39, 404. 71 3, 124. 24 204, 929. 80 24, 054. 87 40, 266. 80 19, 609. 75 9, 123. 77 10, 131. 57	Montana, Idaho, and Utah  Nebraska, Northand South Dakota. Total			·			<u> </u>		15,865,308.8		winsky, wheat and corn.
Deposited during year ended June 30, 1894.	15,518,349	10,026,544	10,570,070	1,864,595	1,287,977	126,506	35,877,115	14,434,336	89,205,492	

In the preceding table the quantities produced after August 27, 1894, include the whole gallons and tenths of gallons in each cask. As to the spirits produced prior to August 28, 1894, the whole gallons are included, and as to each cask the fractions are dropped if less than five tenths and are called whole gallons if five tenths or more.

## DECREASED PRODUCTION OF SPIRITS.

The quantity of spirits (79,949,595.3 gallons) produced and deposited in distillery warehouses during the fiscal year ended June 30, 1895, is less than the production (89,205,492 gallons) of the year 1894 by 9,255,896.7 gallons. The difference is distributed among the different kinds as known to the trade as follows:

Decrease in the production of— Alcohol	Gallons. 1, 750, 146.4 2, 87, 511.5 111, 308 14, 314, 899.4
Total decrease	. 16, 263, 865. 3
Increase in the production of—       Gallons.         Bourbon whisky       3, 198, 803.         Rye whisky       2, 294, 998.         High wines       83, 193.         Miscellaneous       1, 430, 972.	. <b>8</b> 
Total increase	- 7, 007, 968. 6
Net decrease	9, 255, 896.7

#### DECREASED WITHDRAWAL OF TAX-PAID SPIRITS.

The quantity of tax-paid spirits (74,176,239.5 gallons) withdrawn from distillery warehouses during the fiscal year ended June 30, 1895, is less than the quantity (87,087,618 gallons) withdrawn from distillery warehouses during the fiscal year ended June 30, 1894, by 12,911,378.5 gallons, the decrease being distributed among the different kinds known to the trade as follows:

Decrease in withdrawals of—	Gallons.
Bourbon whisky	4, 684, 045
Rye whisky	3, 031, 726
Alcohol	586, 945. 2
Gin	80, 595, 7
Pure, neutral, or cologne spirits	6, 128, 804.4
Total decrease	14, 512, 116. 3
Increase in withdrawals of—	
Rum	·
High wines	
High wines       165, 331.2         Miscellaneous       1, 380, 712.5	
Total increase	1, 600, 737. 8
Net decrease	12, 911, 378. 5

If the quantity, 1,602,401 gallons (as stated by the Chief of the Bureau of Statistics), of exported domestic spirits reimported during the year upon payment of a customs duty equal to the internal revenue tax be added, the quantity virtually withdrawn from distillery warehouses during the year ended June 30, 1895, is found to be 75,778,640.5 gallons, or 12,008,914.5 gallons less than during the year 1894, including the 699,937 gallons reimported and tax-paid during that year.

There were also tax-paid withdrawals of spirits from general bonded warehouses amounting to 364,329.5 gallons which should be added to the above, making the total domestic spirits, exclusive of fruit brandy, withdrawn from bond on payment of the tax, or of a duty equal to the tax, 76,102,970 gallons, or 11,644,585 gallons less than the quantity so withdrawn during the fiscal year ended June 30, 1894.

The tax actually paid on spirits withdrawn from distillery warehouses and general bonded warehouses and on reimported domestic spirits was as follows:

Year ended June 30, 1894 Year ended June 30, 1895	
Decrease in 1895	3 044 624 05

The relatively favorable showing as to receipts as compared with withdrawals is due to the increased rate of tax under the act of August 28, 1894, from 90 cents per gallon to \$1.10 per gallon.

## DISTILLED SPIRITS ALLOWED FOR LOSS BY LEAKAGE OR EVAPORATION IN WAREHOUSE.

The quantity of spirits (3,533,171.1 gallons) reported in the preceding table as lost by leakage or evaporation in warehouse is that portion of actual leakage in warehouse from packages withdrawn during the year which has been allowed in accordance with the provisions of section 17 of the act of May 28, 1880.

The following statement shows the quantity of spirits, as per original gauge, withdrawn from warehouse for all purposes during the stated period, and the amount and percentage of leakage allowed thereon under the provisions of the act named:

Year.	Total quantity withdrawn.	Leakage allowed.	Percentage of withdrawals.
1880		Gallons. 75, 834 811, 466 1, 231, 336 2, 291, 013 3, 858, 494 4, 424, 314 1, 806, 868 1, 833, 681 2, 299, 327 3, 145, 111 2, 932, 249 2, 420, 256 3, 532, 810 5, 072, 164 5, 626, 803 5, 533, 171, 1	. 096 . 962 1. 533 2. 756 4. 193 4. 866 2. 299 2. 591 2. 905 3. 849 2. 609 3. 529 4. 681 5. 677 4. 277

a Includes 7,750,696 gallons stamped for export not actually withdrawn. b Includes 2,494,091 gallons stamped for export not actually withdrawn.

The decrease of leakage allowed as compared with the year 1894 is 2,093,631.9 gallons, and is distributed among the different kinds of spirits known to the trade as follows:

Dec	crease of leakage allowed for—		
			Gallons.
	Bourbon whisky		1, 333, 666, 2
	Rye whisky Pure, neutral, or cologne spirits		738, 340. <b>7</b> 31, 206. 5

#### SPIRITS REMOVED IN BOND FOR EXPORT.

The following statement shows the quantity and percentage of production of distilled spirits removed in bond for export during each fiscal year since the passage of the act of June 6, 1872:

Year.	Taxable (proof) gallons exported.	Percentage of production.	Year.	Taxable (proof) gallons caported.	Percent- age of pro- duction.
1873 1874 1875 1876 1877 1878 1877 1878 1880 1881 1882 1883 1884	4, 060, 160 587, 413 1, 308, 900 •, 529, 528 5, 499, 252 14, 837, 581 16, 765, 666 15, 921, 482 8, 092, 725	3. 45+ 5. 90+ . 96+ 2. 25+ 4. 22+ 9. 80+ 20. 63+ 18. 55+ 13. 52+ 7. 64+ 7. 19+ 12. 70+	1885 1886 1887 1888 1889 1890 1891 1892 1893 1894 1895	10, 671, 118 5, 646, 656 2, 223, 913 1, 514, 205 2, 590, 235 1, 307, 726 1, 676, 395 3, 218, 787 3, 762, 231 6, 114, 417 1, 310, 825, 3	14. 24 + 7. 02 + 2. 85 + 2. 15 + 2. 89 + 1. 25 + 1. 44 + 2. 80 + 2. 14 + 6. 85 + 1. 63 +

The quantity of spirits (1,310,825.3 gallons) withdrawn for exportation during the fiscal year ended June 30, 1895, is less than the quantity (6,114,417 gallons) so withdrawn during the fiscal year ended June 30, 1894, by 4,803,591.7 gallons, the decrease being distributed among the different kinds known to the trade as follows:

Decrease in the withdrawals of— Bourbon whisky. Rye whisky.	Gallons.
Bourbon whisky	3, 656, 440
Rye whisky	1, 157, 255, 8
Rum	240.2
Miscellaneous	41, 632. 4
	<del> </del>
Total decrease (carried forward)	4, 855, 568.4
Total decrease (brought forward)	4, 855, 568.4
Increase in the withdrawals of—	llons.
Alcohol	647.7
Gin	
Pure, neutral, or cologne spirits	
Total increase	51, 976. 7
•	
Net decrease	4, 803, 591.7

## THE EXPORTATION OF DISTILLED SPIRITS IN BOND IN SMALL PACKAGES.

It is noted that a large proportion of all liquors imported into the United States is in bottles or other small packages; also that nearly all the fermented liquors exported from the United States in bond is in bottles; whereas all distilled spirits exported must, in accordance with law, be in the distillers' easks, each of not less than 10 gallons capacity. The attention of this office has repeatedly been called to this discrimination against the products of American distillers, and it has been urged that if spirits were allowed to be bottled in bond, each bottle to have affixed thereto an engraved stamp bearing the signature of the collector, a large export trade would be secured.

The cost of preparing and affixing stamps to be borne by the Government has heretofore been an insuperable objection to the adoption of

the proposition.

This office, however, recommends the passage of an act authorizing the bottling of spirits in bond if the expense of preparing and affixing the stamps is otherwise provided for.

# INCREASED WITHDRAWALS OF SPIRITS FOR SCIENTIFIC PURPOSES AND USE OF THE UNITED STATES.

The preceding table shows an increase of spirits withdrawn for scientific purposes and for the use of the United States of 5,222.1 gallons over the quantity so withdrawn in the fiscal year ended June 30, 1894, as follows:

Increase in— Alcohol		Gallons. 7. 146. 8
Decrease in—	- A - A	•
Bourbon	506.4	
Rve	. 579	
Pure, neutral, or cologne spirits	. 839.3

## DECREASED TRANSFERS OF SPIRITS FROM DISTILLERY WAREHOUSES TO MANUFACTURING WAREHOUSES.

As compared with transfers in 1894, the above table shows a decrease of 11,584.2 gallons in the quantity of spirits transferred to manufacturing warehouses, distributed as follows:

Decrease in— Bourbon Alcohol Pure, meutral, or cologne spirits. Miscelfaneous	12, 116, 9
Total decrease Increase in tye whisky.	13, 661. 2 2, 077
Net decrease	11,584.2

## SPIRITS LOST BY FIRE IN WAREHOUSES FOR THE LAST TWENTY-THREE YEARS.

The following statement shows the quantity of spirits lost in distillery warehouses by fire during each of the last twenty-three calendar years. As it shows also the stock of spirits in warehouse at the close of each of the fiscal years 1872 to 1894, both inclusive, the percentage of loss on stock held may be readily computed:

#### [Quantities in taxable gallons.]

$\begin{array}{c ccccccccccccccccccccccccccccccccccc$	Year.	In bond June 30.	Total loss.	Year.	In bond June 30.	Total loss.
1884 63,502,551 416,609	1873 1874 1875 1876 1877 1878 1879 1880 1881 1882	12, 917, 462 15, 817, 709 13, 367, 253 12, 984, 896 13, 258, 794 14, 088, 773 19, 212, 470 31, 363, 869 64, 648, 111 89, 862, 645 80, 499, 993	9, 901 124, 602 81, 493 99, 102 7, 487 29, 913 2, 465 14, 620 198, 251 175, 216 396, 299	1886   1887   1888   1889   1890   1891   1892   1893   1894	58, 096, 620, 63, 145, 269, 61, 030, 236, 68, 509, 288, 89, 718, 271, 112, 921, 457, 127, 596, 839, 147, 894, 694	1112,722 18,925 32,252 1,160,769 50,431 48,944 1,975,766 58,728.5

[Average loss, 100 of 1 per cent.]

The loss during the six months ended June 30, 1895, was 8,358.9 gallons, the stock on hand June 30, 1895, being 136,402,552.1 gallons.

There has not yet been any loss of distilled spirits by fire in any special bonded warehouse established under act of March 3, 1877, nor in any general bonded warehouse established under act of August 28, 1894.

ALCOHOL USED IN THE ARTS AND IN MEDICINAL AND OTHER COM-POUNDS.

Informal claims for refund of tax on 317,890 proof gallons of alcohol used or to be used in the arts and in medicinal or other similar compounds have been so far received from 193 claimants. The amount claimed has not always been stated, but in the absence of regulations in the matter no inquiry has been made in such cases, but it is believed that the tax on this quantity is, on the average, not less than \$1 per gallon.

A large proportion of these claimants are manufacturers of patent medicines. Quite a considerable number, however, of persons using alcohol in other manufactures, including the manufacture of minee

meat, candy, and glue, are among the claimants.

In the absence of regulations of this Department and of any specific provision of the act to the effect that the Commissioner of Internal Revenue is the proper officer with whom such claims should be filed, and in the absence of claims from the principal manufacturing chemists of the United States, the above figures can not be regarded as signifying the amount by which the United States Treasury would be depleted in case section 61 of the act of August 28, 1894, should be so amended as to be practically operative. I see no reason as yet for reducing my estimate of this amount below that already given, namely, \$10,000,000 annually.

## SUMMARY OF OPERATIONS AT DISTILLERY AND GENERAL BONDED WAREHOUSES DURING THE YEAR ENDED JUNE 30, 1895.

The following table shows the quantity of distilled spirits, in taxable gallons, at \$1.10 and \$0.90 tax, placed in distillery and general bonded warehouses during the fiscal year ended June 30, 1895, the quantity withdrawn therefrom during the year, and the quantity remaining therein or remaining unaccounted for at the beginning and close of the year:

Distilled spirits.	Gallons.	Gallons.
Actually remaining in distillery warehouses July 1, 1894  Not actually in distillery warehouses, claimed to have been lest by casualty, etc.  Withdrawn from-distillery warehouses, claimed to have been lest by casualty, not heretofore reported. Withdrawn, tax-paid, during fiscal year Withdrawn for exportation during fis- cal year Withdrawn for scientific purposes, for use of United States, for transfer to manufacturing warehouse, de- stroyed by fire, allowed for loss by	87, 176, 226 1, 676, 395	92, 985, 265 3, 218, 787	97, 424, 825 3, 762, 231	87, 087, 618 6, 114, 417	b 74, 540, 569 c 1, 312, 006. 5
leakage in warehouses, etc	3, 909, 364	3, 890, 107	7, 166, 371	5, 905, 073	d 4, 982, 700. 2
Total	92, 761, 985	100, 094, 159	108, 353, 427	99, 107, 108	80, 835, 275. 7
Remaining in warehouse at end of fis- cal year	112, 921, 457	127, 596, 339	147, 894, 694	137, 993, 078	e138, 248, 796. 2

aThis includes 1,141,324 gallons added under act of August 28, 1894, and 74.6 gallons excess found on regauge at general bonded warchouses.

bThis includes 364,329.5 gallons tax-paid upon withdrawal from general bonded warchouses.

cThis includes 1,181.2 gallons withdrawn from general bonded warchouses for export.

dThis includes 1,192,514 gallons deducted under act of August 28, 1894, 4,591.5 gallons leakago in general bonded warchouses, and 180.5 gallons withdrawn for use of the United States from such warchouses.

eThis includes 1,426,700.9 gallons in general bonded warehouses and 419,543.2 gallons in transit June 30,1895, between distillery warehouses and general bonded warehouses.

## DISTILLED SPIRITS IN THE UNITED STATES OCTOBER 1, 1895.

The quantity of distilled spirits in the United States (except what may be in customs bonded warehouses and in fruit brandy distilleries) on the 1st day of October, 1895, was 182,497,117.8 gallons, this quantity being distributed as follows:

	Gallons.
In distillery warehouses	129, 555, 485, 8
In special bonded warehouses	
In general bonded warehouses	1, 727, 185.9
In transit between distillery warehouses and general bonded warehouses	166, 133. 9
In hands of wholesale liquor dealers:	17, 781, 134
In hands of retail liquor dealers	31, 258, 200

In making the above computation the average stock of each retail liquor dealer in the United States is estimated at 150 gallons.

#### FORTIFICATION OF WINES WITH GRAPE BRANDY FREE OF TAX.

The quantity of grape brandy used in fortifying wines under the act of October 1, 1890, during the year ended June 30, 1894, was 1,114,515 tax gallons.

The quantity of brandy used and of each kind of wine fortified during the year ended June 30, 1895, in each district is shown in the following table:

· ·	First Ca	lifornia.	Fourth C	alifornia.	Fourth No.	rth Carolina

### EXPORTATION OF MANUFACTURED TOBACCO AND SNUFF IN BOND.

The quantity of manufactured tobacco removed from the place of manufacture in bond free of tax, now at the rate of 6 cents per pound during the year, also the quantity actually exported during the year and the quantity unaccounted for at the beginning and at the end of the year are shown in the subjoined statement:

	Pourds.
Quantity unaccounted for July 1, 1894	916, 996 to 13, 856, 026 to
Total	14, 773, 022}
Quantity exported during the year ended June 30, 1895	.14, 169, 124§ 3, 385 600, 512§
Total	14, 773, 022±

#### EXPORTATION OF CIGARS AND CIGARETTES IN BOND.

	Cigars, \$3 per M.	Cigarettes, 50 cents per M.
Removed and unaccounted for July 1, 1894, as per last report	126, 200 1, 101, 725	12, <del>00</del> 2, 600 461, 859, 100
Total	1, 227, 925	473, 861, 700
Exported and accounted for during the year ended June 30, 1895 Remaining unaccounted for at close of fiscal year ended June 30, 1895	1, 109, 375 . 58, 550	450, 185, 700 23, 676, 000
Total	1, 227, 925	473, 861, 700

Upon comparing the foregoing statements as to manufactured tobacco, cigars, and cigarettes with those for the fiscal year ended June 30, 1894, the increase in 1895 as to cigarettes and the decrease as to tobacco and cigars is found to be as follows:

		Increase.	Decrease.
Tebacce Cigars Cigarettes	pounds number do	60, 253, 800	812, 669½ 793, 015

The increase as to cigarettes continues to be the prominent feature of this class of exportations. The business of exporting cigarettes has grown during the past fourteen years as follows:

#### NUMBER DURING FISCAL YEAR ENDED JUNE 30.

EXPORTATION OF PLAYING CARDS IN BOND DURING THE FISCAL YEAR ENDED JUNE 30, 1895.

Under the provisions of section 38 of the revenue act of August 28, 1894, a tax of 2 cents upon every pack of playing cards containing not more than 54 cards was imposed. Provision was also made however, in section 43 of the act for the exportation of such cards in bond free of tax. The subjoined table shows the number of packs removed from factories for export during the fiscal year 1895, the quantity actually exported, and the quantity remaining unaccounted for at the end of the year.

EXPORTATION OF PLAYING CARDS IN BOND DURING THE FISCAL YEAR ENDED JUNE 30, 1895.

#### OLEOMARGARINE.

The following statements, showing operations under the act of August 2, 1886, defining butter and imposing a tax upon and regulating the manufacture, sale, importation, and exportation of oleomargarine, comprise—

First. A summary of operations at oleomargarine manufactories during the fiscal year ended June 30, 1895; also a summary of operations during the past two fiscal years, and by months covering the period from November 1, 1886, to June 30, 1895.

Second. A statement of the receipts from all classes of taxes imposed

by the eleomargarine law, for the year ended June 30, 1895.

Third. A statement by States and Territories showing the number of establishments for which special tax was paid to carry on during the fiscal year ended June 30, 1895, the business of manufacturing and dealing in oleomargarine; also, in aggregate, of all persons who paid oleomargarine special taxes for the twelve months ended June 30, 1894.

Fourth. A statement of the total production and of total receipts from all oleomargarine sources for each fiscal year since the oleomarga-

rine law took effect.

It appears from the subjoined table that the average monthly production of oleomargarine under the operations of the law has been as follows:

	EO:UHIUS.
During the eight months ended June 30, 4887.	2,711,828
During the fiscal year ended June 30— 1888	
1888	2,860,460
1889	2,972,002
1890	. 2, 693, 669
1891	3. 699, 367
1892	4,030,346
1893	
1894	. 5, 801, 853
1895	4,746,508

It also appears that the average	monthly quantity withdrawn from
factories on payment of the tax was	s as follows:

	Pounds.
During the eight months ended June 30, 1887	2, 592, 946
During the eight months ended June 30, 1887	, ,
1888	2, 707, 430
1889	
1890	2, 566, 494
1891	3, 601, 292
1892	3, 909, 625
1893	5, 371, 989
1894	5, 508, 004
1894 1895	4, 469, 686
	-,,

The average quantity withdrawn monthly for exportation during the same time is shown to have been as follows:

	Poun
uring the eight months ended June 30, 1887	. 90.
uring the fiscal year ended June 30—	,-,
uring the eight months ended June 30, 1887uring the fiscal year ended June 30—  1888	140.
1889	145.
1890	134,
1891	102,
1892	,
1893	
1894	
1895	

In the fiscal years 1887 and 1888 the largest production month was March; in the fiscal year 1889, December; in the fiscal year 1890, October; in the fiscal year 1891, March; in the fiscal year 1892, March; in the fiscal year 1893, January; in the fiscal year 1894, October; while the greatest production during the fiscal year ended June 30, 1895, occurred in October. The quantity produced during these months was as follows:

	Pounas.
In March, 1887	3, 568, 254
In March, 1888	
In December, 1888	4, 181, 317
In October, 1889	4, 072, 333
In March, 1891	6, 723, 224
In March, 1892	5, 916, 871
In January, 1893	7, 824, 657
In October, 1893	9, 318, 006
In October, 1894	7, 046, 429
The months in which the production fell below 2 000 000 non	nde wara

The months in which the production fell below 2,000,000 pounds were as follows:

During the fiscal year ended June 30, 1887:	Pounds.
May, 1887, produced	1,885,027
June, 1887, produced	1, 375, 423
During the fiscal year ended June 30, 1888:	
July, 1887, produced	1, 208, 638
During the fiscal year ended June 30, 1889:	, ,
June, 1889, produced	1,575,362
During the fiscal year ended June 30, 1890:	
July, 1889, produced	1, 404, 749
August, 1889, produced	1, 975, 773
May, 1890, produced	1,864,746
May, 1890, produced	1, 364, 826
During the fiscal year ended June 30, 1891:	, ,
July, 1890, produced	1, 723, 966
June, 1891, produced	1, 988, 633
There was a decrease in the number of persons engaged in the	

There was a decrease in the number of persons engaged in the sale of oleomargarine during the fiscal year ended June 30, 1895, as well as a decrease in the production of the article.

The following table shows the quantity of oleomargarine, in pounds, at 2 cents tax, produced at manufactories during the fiscal year ended June 30, 1895, the quantity withdrawn therefrom during the year, and the stock of oleomargarine remaining in factories June 30, 1895:

## SUGAR BOUNTY.

During the fiscal year ended June 30, 1895, there were received at this office 567 applications and bonds of cane, beet, and sorghum sugar producers. These applications and bonds were approved by the Commissioner, and 154 licenses were issued previous to the repeal of the bounty law August 28, 1894.

During this fiscal year, prior to August 28, \$966,185.84 were paid upon domestic sugars produced previous to July 1, 1894, as follows:

Cane sugar	 		 \$957, 644, 41
Beet sugar	 		 8, 056, 99
Sorghum sugar			129.50
Maple sugar	 · · · · · · · · · · · · · · ·		 
mapro sugar	 	*** ***** * * ****	 .004.04

At the date of the repeal of the bounty law, August 28, 1894, certain sugar producers had completed the production of their sugar and presented claims for bounty, and these claims at that date remained unpaid.

These claims were classified as follows:

	Claim.		Number of claims.	Amount.
Maple Beet Cane Sorghum		 	4,540 8 24 1	\$121,783.09 86,780.72 29,286.47 436.00
Total			4, 573	238, 286, 28

The above claims are distributed throughout the United States in the sugar producing districts as follows:

#### MAPLE SUGAR CLAIMS.

District.	Number of claims.	
Now Hampshire. Third Massachusetts Fourteenth New York Twenty-first New York Twenty-eighth New York Twenty-third Pennsylvania Twenty-third Pennsylvania Maryland West Virginia Tenth Ohio Eighteenth Ohio Fourth Michigan Minnesota		
Total	4,510	121, 783. 09

#### CANE, BEET, AND SORGHUM SUGAR CLAIMS.

	District.	Nuberm of claims	Amount involved.
Louisiana Nebraska Third Texas Florida		22 2 2 1	
Total		33	116,503.19

The act of Congress approved March 2, 1895, entitled "An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1896, and for other purposes," appropriates \$238,289.08 to cover the amount of these claims.

These claims have been approved by the Commissioner of Internal Revenue and referred to the Auditor for the Treasury Department.

BOUNTY ON SUGAR PRODUCED IN THE FISCAL XEAR ENDED JUNE 30, 1895.

The act of March 2, 1895, also provides—

That there shall be paid to those producers who complied with the provisions of the bounty law as contained in Schedule 2 of the tariff act of October first, eighteen hundred and ninety, by filing the notice, application for license, and bond therein required, prior to July first, eighteen hundred and ninety-four, and who would have been entitled to receive a license as provided for in said act, a bounty of eight-tenths of a cent per pound on the sugars actually manufactured and produced in the United States testing not less than eighty degrees by the polariscope, from beets, sorghum, or sugar cane grown or produced within the United States during that part of the fiscal year ending June thirtieth, eighteen hundred and ninety-five, comprised in the period commencing August twenty-eightly, eighteen hundred and ninety-four, and ending June thirtieth, eighteen hundred and ninety-five, both days inclusive; and for this purpose the sum of five million dellars, or so much thereof as may be necessary, is hereby appropriated: Provided, That no bounty shall be paid to any person engaged in refining sugars which have been imported into the United States, or produced in the United States upon which the bounty herein provided has already been paid or applied for.

The bounty herein authorized to be paid shall be paid upon the presentation of such proof of manufacture and production as shall be required in each case by the Commissioner of Internal Revenue, with the approval of the Secretary of the

Treasury, and under such rules and regulations as shall be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury. And for the payment of such bounty the Secretary of the Treasury is authorized to draw warrants on the Treasurer of the United States for such sums as shall be necessary, which sums shall be certified to him by the Commissioner of Internal Revenue, by whom the bounty shall be disbursed, and no bounty shall be allowed or paid to any person as aforesaid upon any quantity of sugar less than five hundred pounds. \* \*

That any person not entitled to the bounty herein provided for, who shall with intent to defraud apply for or receive the same, shall be guilty of a misdemeanor, and, upon conviction thereof, shall pay a fine not exceeding five thousand dollars, or be imprisoned for a period not exceeding five years, or both, in the discretion of the

· court.

Regulations concerning the presentation of claims and payment of bounty under this act were prepared by this office and approved by the Secretary of the Treasury on the 18th day of June, 1895.

These regulations were published and transmitted to the several col-

lectors of internal revenue in the sugar producing districts.

The office blanks and forms relative to claims and accounts of manufacture and production were also prepared and forwarded to the collectors for the use of sugar producers.

In addition to the foregoing work the names of persons who had complied with the act of October 1, 1890, were collected, and their

accounts were opened.

In the district of Louisiana 534 producers of sugar from cane (including companies and corporations) complied with the provisions of that act, and of this number 473 have filed their several claims for bounty, which amount in the aggregate to \$5,591,617.94. Sixty-one sugar producers from this district have not made any claims for bounty for the reason that they sold their cane or sirup to other licensed producers, and did not retain any interest in the sugar produced from such cane or sirup, or for other causes.

In the State of Texas 13 cane sugar producers complied with the bounty law, and each has presented a claim for bounty. These claims

amount in the aggregate to \$123,812.64.

In the State of Florida 12 producers of cane sugar complied with the law. Nine of these producers have presented claims for bounty amount-

ing in the aggregate to \$5,655.72.

In the first district of California 3 companies—the Western Beet Sugar Company, Alameda Sugar Company, and Chino Valley Beet Sugar Company, all producers of sugar from beets—have presented their several claims for bounty, which amount in the aggregate to \$293,208.97.

In the State of Nebraska the Norfolk Beet Sugar Company and the Oxnard Beet Sugar Company each complied with the law. The Oxnard Company did not produce any sugar subsequent to August 27, 1894. The Norfolk Company has filed a claim for bounty amounting to

\$45,087.80.

In the State of Kansas the Medicine Lodge Sugar Company and the Parkinson Sugar Company, manufacturers of sugar from sorghum, complied with the law and have filed their several claims for bounty, which amount in the aggregate to \$6,259.72.

In the district of Montana the Utah Sugar Company, of Utah Territory, manufacturers of beet sugar, complied with the law and pre-

sented a claim for \$45,862.65.

The foregoing statements show the whole number of sugar producers who have presented claims for bounty and the total amounts claimed in each district.

The regulations prescribed that all claims should be filed on or before the 1st day of September, 1895, and afterwards this limitation was extended to October 1, 1895, and so far as this office has any knowledge no other claims will be presented under this act.

These claims amount to \$6,111,505.44, and are classified as follows:

District.	Kind of sugar.	Number of claims.	Amount of production.	Bounty claimed.		
Louisiana. Third Texas Third Texas Florida California. Nebraska. Kansas Utah	do do Beet do Sorghum Beet	13 9 3 1 2	Pounds. 698, 952, 432 15, 476, 585 706, 965 36, 651, 121 5, 635, 975 782, 465 5, 732, 832	\$5, 591, 617, 94 123, 812, 64 5, 655, 72 293, 208, 97 45, 087, 80 6, 259, 72 45, 862, 65 6, 111, 505, 44		

In the course of the examination of these claims in this office it may be necessary to make additions or deductions in the amount claimed on account of errors, and the foregoing amounts are subject to slight

The work of the sugar bounty division, as first organized, related to the payment of claims under the act of October 1, 1890. This work was completed on the 31st day of January, 1895, and the division was abolished. The extra administrative expenses of executing the bounty law for the period from July 1 to August 27, 1894, were \$6,178.65.

## INCOME TAX.

The act of Congress entitled "An act to reduce taxation, to provide revenue for the Government, and for other purposes," in effect August 28, 1894, provided:

SEC. 27. That from and after the first day of January, eighteen hundred and ninety-five, and until the first day of January, nineteen hundred, there shall be assessed, levied, collected, and paid annually upon the gains, profits, and income received in the preceding calendar year by every citizen of the United States, whether residing at home or abroad, and every person residing therein, whether said gains, profits or income be derived from any kind of property, rents, interest dividends or salaries, or from any profession, trade, employment or vocation, carried on in the United States or elsewhere, or from any other source whatever, a tax of two per centum on the amount so derived over and above four thousand dollars, and a like tax shall be levied, collected, and paid annually upon the gains, profits, and income from all property owned and of every business, trade or profession carried on in the United States by persons residing without the United States. \* \* \*

the amount so derived over and above four thousand dollars, and a like tax shall be levied, collected, and paid annually upon the gains, profits, and income from all property owned and of every business, trade or profession carried on in the United States by persons residing without the United States. \* \* \* \* Sec. 32. That there shall be assessed, levied and collected except as herein otherwise provided, a tax of two per centum annually on the net profits or income above actual operating and business expenses, including expenses for materials purchased for manufacture or bought for resale, losses, and interest on bonded and other indebtedness of all banks, banking institutions, trust companies, saving institutions, fire, marine, life, and other insurance companies, railroad, canal, turnpike, canal navigation, slack water, telephone, telegraph, express, electric light, gas, water, street railway companies, and all other corporations, companies or associations doing business for profit in the United States, no matter how created and organized, but not including partnerships. \* \*

but not including partnerships. \* \* \*
SEC. 33. That there shall be levied, collected, and paid on all salaries of officers, or payments for services to persons in the civil, military, or naval, or other employment or service of the United States, including Senators and Representatives and Delegates in Congress, when exceeding the rate of four thousand dollars per annum, a tax of two per centum on the excess above the said four thousand dollars; \* \* \*

FI 95-31

The Act further provided that this tax should be assessed by the Commissioner of Internal Revenue, and collected and paid upon the gains, profits, and income for the year ending the 31st day of December next

preceding the time for levying, collecting and paying the same.

In the Urgent Deficiency Bill approved January 25, 1895, the sum of \$245,095 was appropriated to defray the expenses incident to the collection of the tax, and soon thereafter, the Income-Tax Division of this office was organized. The necessary blank forms, regulations, and circulars of instruction were prepared, printed and transmitted to the several collectors of internal revenue for their guidance.

By the provisions of the Joint Resolution of February 21, 1895, the time for the taxpayer to make return was extended from March 1 to

April 15, following.

The returns as received by the collectors were included in a monthly

list, and forwarded to this office for examination and assessment.

On April 8, 1895, the work of the Income Tax-Division was interrupted by a decision of the Supreme Court of the United States which decided in a case before it, that the provisions of the law taxing incomes derived from rents from real estate, and from state and municipal bonds were null, void, and inoperative. After this decision of the Court, all returns which had been received at this office were sent back to the collectors, with additional instructions relative thereto.

This decision would have occasioned a reduction of, at least, 35 per

cent in the amount of revenue anticipated from this source.

The work of the Income-Tax Division was practically terminated May 20, 1895, when upon a rehearing of the above case before a full bench of the Supreme Court, it was finally decided that the whole income tax law was null and void.

Following the decision, instructions were immediately sent to the collectors to suspend all income tax work, and to forward to this office, under seal, all books, returns and papers relating to income tax, in their possession, which was done; and, after a further examination and classification, the same were filed, secure from public inspection.

In this connection, I recommend that, as these returns and records contain much information of a private nature relative to the business of persons and corporations, Congress take such action as will authorize the early and complete destruction of all income tax returns, statements and records relative thereto, now in the custody of this office.

The number of taxable persons making returns was 48,672, and the amount of tax from that source was \$6,128,051.45; the number of taxable corporations making returns was 29,653, and the tax from these corporations amounted to \$9,815,697.24; the aggregate number of taxable persons and corporations was 78,325, and the aggregate amount of tax from both sources was \$15,943,748.69. Returns were made by 70,152 persons and 20,248 corporations who claimed they were not subject to the tax, making an aggregate of 90,400 persons and corporations claiming exemption from the tax. The decision of the Supreme Court of the United States, of April 8, 1895, which declared that incomes from rents from real estate, and from State and municipal bonds were not taxable, undoubtedly had the effect to largely increase the number of nontaxable returns.

It is also known that many persons and corporations required by the

Act to make returns, failed to do so.

From the reports of collectors and agents, and from other reliable sources, it is estimated by this office that the collections under the income-tax law, if the same could have been enforced without interruption, would have reached, for the fiscal year ended June 30, 1895, above \$30,000,000.

#### COST OF INCOME-TAX WORK.

There were employed in the examination and classification of returns in this office, 16 persons, at an expense of \$5,254.74; 243 deputy collectors were employed in the field at a cost of \$86,366.64, making the total cost of work performed in connection with the enforcement of the income-tax law \$91,621.38. As both the office and field forces were increased from time to time as required by the interest of the public service, many of the persons included in the above figures were in the service but a short time. The expense for the collection of the tax for the entire fiscal year would not have exceeded twenty per cent additional to the amount expended.

The following tabular statements exhibit by districts, the number of taxpayers, the amount of tax returned, the occupation of the persons, and the character of the business of the corporations making the returns.

STATEMENT A.—THE NUMBER OF TAXABLE PERSONS MAKING RETURNS AND THE AMOUNT OF TAX, BY COLLECTION DISTRICTS AND BY OCCUPATIONS.

## DIVISION OF CHEMISTRY.

The following table shows the number and character of the samples examined in the laboratory at San Francisco, Cal., during the fiscal year ended June 30, 1895:

Fortified sweet									
Sugar Butter	• • • • • • • • • • • • • • • • • • • •	:	 	 	 	 • • • • •	• • • •	·	 . ]
Miscellaneous									
			 		 	 		,	 
Total			 	 	 	 			1.2

The following table shows the number and character of samples examined in the work of the laboratory at Washington, D. C., during the past fiscal year:

Oleomargarine	81
Butter	
Malt liquors	18 -
Fermented liquors other than malt	6
Distilled liquors	3
Fortified (and sweetened) wines	18
Smoking opium	5
Stamp paper	1
Ink	27
Ink	11
Typewriter ribbons	15
Carbon paper	
Miscellaneous	5
Silvings	<del></del> 243
Increase over last fiscal year	10

Expert testimony in regard to samples was rendered in court in three cases during the year.

The number of samples of material suspected of being oleomargarine

was 128, an increase of 34 over last year.

The provisions of section 67 of the act of August 28, 1894, which extend the privilege of fortification with grape brandy free of tax to wines deficient in sugar, have resulted in an increase of the work of the laboratory at Washington, samples of all such wines produced east of the Rocky Mountains being examined here.

In pursuance of the provisions of paragraph 244 of the same act, the portable stills and apparatus used by this office for work in the field on fortified sweet wines have been furnished the customs officers of the principal Ports of Entry under the terms of Department Circular No. 47, prescribing this apparatus for determining the percentage of alcohol in imported wines, fruit juices, etc.

The act approved March 2, 1895, entitled, "An Act to regulate the sale of milk in the District of Columbia," etc., has relieved this laboratory as it transfers to the Health Officer of the District the duties heretofore imposed upon this office by the Act of October 12, 1888, in so far as

relates to the sale of milk.

The office of microscopist having been abolished during the past fiscal year, the entire work of the laboratory now devolves upon the Chemist.

## AMENDMENT OF EXISTING LAWS.

I recommend that Congress be asked to amend existing internalrevenue laws in accordance with the following suggestions.

In every instance the change desired will promote the efficiency of the service, afford better facilities for the protection of the interests of the Government, and enable this Bureau to meet the new business conditions which have arisen since the passage of the laws now in force.

Amend Sections 52 and 55 of the Act of August 28, 1894, by providing for an allowance for losses in transportation of spirits to a general

bonded warehouse.

Under existing statutes enacted prior to August 28, 1894, provision is made for the abatement of the tax on distilled spirits lost in transportation from bonded warehouses for export or for transfer to manufacturing warehouses, provided that such losses are without fraud, collusion or negligence of the distillers, owners and transportation companies and their agents and employes. Sections 52 and 55 of the Act of August 28, 1894, while authorizing the transportation of distilled spirits to general bonded warehouses, do not authorize allowances for losses in transportation as in the other cases named. I can not see why there should be any discrimination against transportations of this class, and therefore recommend that the provisions of existing law as to allowances for loss in transportation to manufacturing warehouses, or for export, be made to apply to transportations to general bonded warehouses.

Amend Section 52 of the Act of August 28, 1894, so that general bonded warehouses shall be used only as places of storage of spirits removed from distillery warehouses, or from other general bonded warehouses in the same district, and so as to provide for a charge of 25 cents for each package, or such sum as may be necessary to cover the expense

of gauging.

This action is desired for the reason that the establishment of general bonded warehouses was recommended by this Office, on the ground that it would encourage and facilitate the business of a large number of small distillers throughout the country, who by this means would be able to handle their products to advantage. The law was not intended to make the Government bear the loss on account of the shrinkage between the places of production and the markets. Under the practice which now prevails the general bonded warehouse is used by some producers of spirits simply as a place from which their goods may be distributed to their consumers in that locality.

Amend Section 3449 by inserting before the word "ships" the words

"sells or offers to sell."

This amendment is desired for the reason that under the present law it is not unlawful to sell or offer for sale spirits under any other than their proper name, but it is unlawful to so ship them. For the protection of all classes, consumers as well as shippers, it is necessary that the restriction should be made to include the act of selling or offering for sale.

I recommend such legislation as may be necessary to enable distillers or owners of spirits in distillery warehouses to bottle the same for export in bond or for domestic use, under Government supervision, after payment of the tax thereon.

It is believed that permitting the bottling in bond, under certain restrictions, of goods of the same kind, age and proof for domestic use,

by giving the Government guaranty as to their purity and age, will greatly improve their commercial character and value, and will at the same time afford additional protection against fraud.

The change as to goods for export is desirable for many reasons. It is believed that a law providing for this change could under proper regulations be carried into effect with entire safety to the revenues.

I recommend that Collectors of Internal Revenue be authorized by law to keep records of the ownership of distilled spirits in internal revenue bonded warehouses, in all cases in which there are controversies as to

such ownership.

Also that such a law be passed as will enable the owners of distilled spirits in a distillery warehouse, general bonded warehouse, or special bonded warehouse to withdraw the same upon payment of the tax or for any purpose authorized by law, and, in case of dispute as to ownership, upon the giving of an indemnity bond by the party to whom the

spirits are delivered.

This action is desirable for several reasons, chief among which is the fact that it will have a beneficial effect on commercial transactions in the sale of spirits in bond. As the law now stands, dealers are unwilling to buy spirits in bond, because should difficulties or misunderstandings arise between them and the distillers, it is impossible for them to remove the goods which they have purchased to a general bonded warehouse, or for payment of tax, without the consent of the distiller, who must under the law execute the papers.

A further reason for this change is that litigation in local courts has frequently made it plain to this Office that the rightful owner of the spirits is some one other than the distiller, and the drastic character of the law at this time with reference to the rights of distillers is such that this Office is precluded from placing the rightful owner of the spirits in possession thereof, without the consent of the distiller, although

so decreed by the highest courts of the State.

Amend Section 3255 so as to allow the use of fruits other than apples,

peaches and grapes for distillation.

This is desired in order to afford brandy distillers the privilege of distilling pears, prunes, apricots, oranges and other fruits fit for making brandy when they desire to do so. Great complaint reached this office during last season, when the early frost destroyed the orange crop in the State of Florida, and it was made clear that if the people had had the privilege of distilling this fruit, they would have realized a considerable amount upon the crop, which was rendered entirely useless for any other purpose. There seems to be no good reason why the law should not be modified so as to meet this most reasonable demand.

Amend Section 3311, so that fermenters not in use at distilleries may be closed and fastened in such manner as may be prescribed by the Commissioner of Internal Revenue and approved by the Secretary of the Treasury.

This amendment is made necessary by reason of the impracticability of enforcing the statute as it now exists. It requires that tubs shall be closed with close-fitting covers, fastened by nails, seals, and otherwise.

In some of the larger distilleries the fermenting tubs are from 20 to

30 feet in diameter, and hold many thousand gallons of mash.

It is impossible to practically apply the methods for closing prescribed by the statute, and detrimental to the property interests of the distiller, as the closing of tubs in a wet condition causes them to rot, and renders them unfit for use. It should be permissible to close the

tubs by simply locking the outlets in a safe manner. No danger to the revenues would result from such a modification of the law.

A further amendment to the provisions of this section should be made, so that fermenters at distilleries may be opened and closed by such officer as may be designated by the Commissioner of Internal Revenue, or the collector of the district for that purpose.

This amendment is necessary in order that distillers may operate their plants with the smallest number of fermenters, and in the most economical manner possible, not only for themselves, but for the Gov-

ernment.

As the law now stands, at many of the larger distilleries it is necessary for a deputy collector to visit the plant twice a day for the purpose of opening and closing tubs, so that the distiller may accomplish the object above referred to. The safety of the revenues would be amply protected by allowing one of the officers constantly on duty at the distillery to perform this duty under proper restrictions, and, therefore, the amendment is earnestly recommended.

Amend Section 3153c so as to provide that storekeepers and storekeepers and gaugers who are assigned to distilleries whose registered capacity is 20 bushels, or less, shall receive such compensation as may be prescribed by the Commissioner of Internal Revenue, not to exceed

\$4 per day.

It is believed that an amendment of this character will prove beneficial to the service, as it will place within the discretion of the Commissioner the payment of a greater sum than \$2 per day at the smaller distilleries, where, by reason of their location and the small pay allowed, the Government officer, in many cases, is compelled to live in the family of the distiller, and becomes his "hand" or assistant, serving him in that capacity, and is thus made a mere tool in the hands of the distiller to assist him in violating the law. It is believed that if this discretion is lodged in the hands of the Commissioner, he will be able to prevent fraudulent practices, in many cases, by transferring to another distillery an officer assigned to a distillery which suspends operations because the distiller is prevented by the presence of such officer from perpetrating fraud.

Amend Section 3163b by striking out the words "when transferred from one distillery to another," and inserting in their place the words "when traveling to a warehouse to which assigned, or when transferred from one warehouse to another;" and, also, by striking out the words "from one distillery to another," in the last line but one of the Section. This change is necessary to enable the Commissioner to utilize unassigned officers by placing them on duty at points remote from their

As the law now stands, it is impracticable to send an unassigned officer from his home to the place where his services are desired, unless the new assignment is of a permanent character, because the expenses of the officer can only be paid when he goes from one assignment to another. The services required of an officer at a point remote from his home are frequently so temporary in their character, that the traveling expenses required to reach his destination are greater than his total per diem during the assignment. Under existing law, it is impossible to make the most advantageous disposition of the force of officers in commission.

Amend Section 3282 so that bakers and manufacturers of yeast may make and have on hand mash, wort, or wash fit for distillation, in the conduct of these industries, the quantity of such mash, wort, or wash to

Dus La 29 (198) Aland de. alteerig bar

be fixed and the purpose for which it is to be used to be strictly limited and defined.

This amendment will enable makers of yeast and bakers to carry on their legitimate business without interference from this office. As the law now stands, makers of yeast who are engaged in the business of distilling, or in manufacturing vinegar, are disposed to make complaints against those persons engaged in the making of yeast alone, and bakers who make yeast for use in their business.

I also recommend that Section 61 of the Act of August 28, 1894, allowing the use of alcohol free of tax by manufacturers under certain conditions, be repealed.

itions, be repeated.
I have the honor to be, very respectfully,
Jos. S. MILLER,

Commissioner.

Hon. J. G. CARLISLE, Secretary of the Treasury.

Federal Reserve Bank of St. Louis

# REPORT OF THE CHIEF OF THE BUREAU OF ENGRAVING AND PRINTING.

TREASURY DEPARTMENT,
BUREAU OF ENGRAVING AND PRINTING,
Washington, D. C., October 28, 1895.

SIR: I have the honor to submit the following report of the opera-

tions of this Bureau during the fiscal year 1895:

The additional work of printing adhesive postage stamps, the diploma for the World's Columbian Exposition, and the hurried filling of orders for bonds, together with the engraving of a number of new designs, have made it one of the most trying periods on the management of the Bureau since its foundation. I can, however, report that the year's work closed in a most satisfactory manner.

The tables herewith submitted show that there were completed and delivered during the year 16,211,308 sheets of United States notes, Treasury notes, gold and silver certificates, bonds, and national bank notes; 31,545,838 sheets of internal revenue stamps; 199,000 sheets of customs stamps; 21,873,682 sheets of adhesive postage stamps, and

1,056,205 checks, certificates, drafts, etc.

The aggregate number of sheets delivered during the year was 70,886,033, exceeding the deliveries in any previous year by 15,369,072 sheets. The cost per thousand sheets during the year was \$20.30, which is the lowest cost ever reached, the next being during the fiscal year 1894, when it was \$23.73.

While it is apparent that the difference is greatly in favor of the year just closed, still it is not as great, as will be shown when a comparison is made with the work of the present fiscal year. In fact, the question of supplying the country with postage stamps and the prompt delivery of the last issue of bonds was of much greater consequence to the welfare of the country than the economical manufacture of the securities.

When it is remembered that the Bureau commenced during the fiscal year the manufacture of adhesive postage stamps with entirely new—and in some instances newly invented—machinery, operated, for the most part, by unskilled employees; that the value of the machinery added for that purpose was \$56,243; that it accumulated in its finished vaults a stock of finished stamps of the value of \$27,752; that of the \$163,000 appropriated for the manufacture of these stamps the appropriation for this Bureau received only \$107,700, and that during the year overtime was made to the extent of about \$78,967, the result of the year's work may be regarded as most satisfactory, both as to production and as to cost.

I desire to call your attention to the fact that, notwithstanding the difficulties above referred to, the year was closed without a deficiency. It is true the appropriations were made in two separate acts, but the

gross amount appropriated by these acts was the exact amount esti-

mated to be required for the service.

It was hardly to be expected that the first output of adhesive postage stamps, with entirely new machinery and unskilled operatives, would be perfect in every respect; but the Post-Office Department pronounced the work of this Bureau, at the close of the fiscal year, satisfactory in every particular. The gumming and perforating are as good as, and the printing is better than before. We are now producing postage stamps superior to those of any other nation, at a saving over former years of from \$50,000 to \$75,000.

It is with regret that I report a theft of postage stamps from the Bureau, resulting from the employment of dishonest men. The history of this occurrence is now familiar to everyone, as it was fully noticed in the public press. The theft was discovered and the criminals promptly apprehended, prosecuted, and convicted, with a loss of but a

few hundred dollars to the Government.

During the year the engraved plates for the Columbian Exposition diploma were completed and over 11,000 impressions printed. gratifying to report that this work is pronounced by all who have seen it one of the most beautiful and most skillfully executed works of the kind ever issued. It is especially pleasing that this result has been attained, as the diploma will go to all the nations of the world and be

subject to the severest criticism.

With your approval, it has been my policy to employ the best talent and furnish the best materials in all the branches of the service, having at all times a due regard for judicious economy. This policy has been productive of the best results, and it is asserted by those who are familiar with the service that more engraved dies have been added to the stock of the Bureau during the year than in twenty preceding This fact will be made perceptible to the public by future issues of the Government, and especially so when the diploma and new silver certificates are issued. It is expected that two of the new silver certificates will be ready for issue about the end of the present calendar year and the diploma on February 1, 1896. These issues demonstrate the fact that this Bureau now ranks first in the execution of the finest bank-note engraving and printing.

I think it would be in the interest of good government to furnish the country with new currency more frequently than has been the custom. Notes issued under the present system are kept in circulation so long that when returned for destruction they are, in the main, not only so blurred as to render errors possible in the process of redemption, but they are unclean and exceedingly objectionable to handle. In fact, it is quite possible that disease might emanate from contact with such filthy currency as is now used especially in parts of the country remote from points of redemption.

This condition of our currency encourages counterfeiting, as it necessarily increases the danger of successfully passing counterfeit notes. The counterfeiter always attempts to imitate old notes. We never see a counterfeit that is new and clean. A more frequent renewal of the currency would, therefore, decrease the possibility of successful coun-

terfeiting to a very great extent.

The cause of this condition is due to the fact that the cost of transportation is imposed upon the sender, and because of great values and consequent risk express charges are excessively high. The holders therefore delay the shipment of notes to and from points of redemption until they are actually worn out.

The remedy seems to lie in the transportation of currency through the mails either free or at a nominal postal charge. I am of the opinion that this can be done with substantially no risk either to the Government or to the holders. The notes can be cut by the officers of banks in such a way as to constitute a complete cancellation in accordance with law. One portion so cut could be mailed, and the other portion held by the bank until notice of the reception by the Department of the first portion, when the second portion could be mailed.

In case of loss of the first shipment, possibilities of which would be very remote, the remaining portion could be shipped by express, and both the Government and the sender relieved from any greater risk than now exists in shipping the whole notes. Either portion properly canceled would furnish a perfect record to the Department of the redemption and destruction of the notes. I would, therefore, recommend the adoption by departmental regulations of a form for the cancellation of notes by the banks of the country that would render their

shipment through the mail safe.

By the act "making appropriations for sundry civil expenses of the Government for the year ending June 30, 1896," Congress authorized and directed the Secretary of the Treasury to furnish Gen. James D. McBride with impressions of certain engravings from the plates of the Bureau, to be reproduced and used in a publication of his own, which is to be sold for personal profit and has no connection whatever with the issues of the Government. While I do not anticipate any danger to the public securities from the use to which General McBride has put the impressions of plates received, the precedent is a dangerous one, and should not be followed in the future. The plates of this Bureau should be held absolutely for exclusive use in printing Government issues, and any invasion of this departmental rule by Congress tends to weaken the barrier of protection with which they have been surrounded at a great cost to the Government.

It is with some pride that I refer to the discipline which prevails in the Bureau. All orders are promptly executed, with but few errors or imperfections in the work, and no questions are pending which will tend to disturb the perfect harmony now prevailing among the

employees.

The following is the finaucial statement of the year:

#### APPROPRIATIONS FOR THE YEAR.

Logislative act, July 31, 1894:		
Salaries	\$17, 450, 00

### REPORT OF THE REGISTER.

TREASURY DEPARTMENT,
OFFICE OF THE REGISTER,
Washington, D. C., October 8, 1895.

Sir: I have the honor to submit the annual report of the business of this Office for the fiscal year ending June 30, 1895. The work is distributed between two divisions, with a chief at the head of each. The following is a report in detail of the work of each division.

#### LOAN DIVISION.

The work performed in this division includes all matters in connection with bonds of the United States and District of Columbia, and an indebtedness of the Government of Spain to certain American citizens, known as the "Spanish indemnity."

These duties include—

(a) The receipt of new bonds after their preparation by the Bureau of Engraving and Printing and the care of same until required for issue.

(b) The issue of bonds upon warrant of the Secretary of the Treasury, or upon certificates showing the payment of accepted subscriptions for

loan, and recording the same.

(c) The issue and recording of new registered bonds in place of those assigned by the parties or corporations in whose name they stood and making a record of the cancellation of the original bonds.

(d) The recording of coupon and registered bonds redeemed.

(e) The examination of all assignments of registered bonds as to

their sufficiency and regularity.

(f) The examination of all papers submitted by the representatives of corporations, of the estates of decedents, and of persons under legal disability; also proof of succession where bonds are held in a fiduciary capacity. These papers may refer to parties or corporations in the United States or in foreign countries.

(g) The keeping of ledger accounts with every individual, corporation,

or other holder of registered bonds.

- (h). The keeping of general accounts showing all charges in the amounts and summary statements of transactions in connection with each loan.
- (i) The preparation of quarterly, semiannual, and annual schedules on various loans for the payment of interest by the Treasurer of the United States, including the preparation of copy of the same for the printer, examination of proof, and footing of the schedules.

(j) The filing, arrangement, and custody of the various books, records,

bonds, and papers connected with the business of the division.

- (k) The correspondence and reports involved in the proper conduct of the office.
- (l) Preparing a consolidated index to all registered bonds issued since 1836.
- (m) The completion of the work assigned by the Department order constituting a commission "to prepare a history of interest, discounts, premiums, and expenses of the public loans."

#### BONDS ISSUED AND CANCELED.

In addition to the ordinary and current work of the office the year has been marked by two issues of bonds for the purpose of maintaining the "gold reserve." From November 28, 1894, to February 27, 1895, a second \$50,000,000 of the 5 per cent loan of 1904 was issued, involving a large amount of extra work. From March 11 to May 18, 1895, \$31,157,700 of the 4 per cent loan of 1925 was issued in exchange for coin and forwarded to purchasers. On May 28 an equal amount of coupon 4 per cent bonds of the same loan were delivered to a committee appointed by the Secretary of the Treasury for shipment to London, England, there to be delivered to the representatives of a syndicate. As the returns from these last-mentioned bonds did not reach this office until after the close of the fiscal year they are not included in the transactions reported herewith, but will appear as in the year beginning July 1, 1895.

On November 19, 1894, certificates showing the indebtedness of the Government on account of Cherokee lands were issued under the act of

August 15, 1894, to the amount of \$6,640,000.

The first of the various issues of bonds in aid of the construction of the Pacific railroads matured during the last year, being thirty years from the date of the original issue of said bonds. The amount of this installment was \$2,362,000, falling due January 16, 1895. The larger part of this sum has been redeemed. Other installments, amounting in the aggregate to \$62,261,512, will mature at various dates on and before January 1, 1899.

The following tabular statements show the total amounts of United States bonds issued and canceled during the year ending June 30, 1895, as recorded upon the books of this division, together with the number

of impressions of bonds so issued and canceled:

The following table shows the number and amount of bonds issued and canceled and the total handled during the last ten years:

Year.	Average number	Bonds issued.		Bonds	canceled.	Total handled.		
Toar.	of em- ployees.	Number.	Amount	Number.	Amount.	Number.	Amount.	
1885-86 1886-87 1887-88 1888-89 1889-90 1890-91 1891-92 1892-93 1893-94 1894-95	16. 89 15. 90 15. 87 14. 76 15. 21 14. 88 11. 63	39, 173 34, 620 26, 598 21, 500 17, 669 16, 592 26, 253 15, 796 64, 799 80, 362	\$180, 927, 250 171, 119, 600 114, 831, 900 103, 894, 350 67, 181, 500 69, 151, 600 107, 738, 200 59, 396, 050 163, 551, 900 195, 445, 950	70, 753 106, 173 72, 135 85, 149 66, 830 75, 606 54, 288 24, 943 36, 195 43, 072	\$191, 667, 950 325, 019, 750 189, 656, 950 231, 811, 450 171, 575, 200 172, 256, 450 129, 009, 825 60, 271, 850 114, 277, 200 108, 165, 200	109, 926 140, 793 98, 733 106, 649 84, 499 92, 198 80, 541 40, 739 100, 994 123, 434	\$372, 655, 200 496, 139, 350 304, 488, 850 335, 705, 800 238, 756, 700 241, 408, 050 236, 748, 025 119, 667, 900 277, 829, 100 303, 611, 150	

As will appear from inspection of this table, the number of bonds issued last year was larger and the amount issued is greater than during any year included in the table. The number of bonds issued in 1894-95 is 15,563 larger than during the preceding year and the excess in value last year was \$31,894,050 as compared with 1893-94. There was also a gain in the number of bonds canceled of 6,877, making a total increase in the number of bonds handled of 22,440. The preceding year, with which comparison is made, was one involving the largest amount of work for several years.

As classified upon the loan account the foregoing amounts were divided as follows:

#### BONDS ISSUED.

Year.	Direct is- sues.	Exchanges.	Transfers.	Total issued.
1885-86 1886-87 1887-88 1888-89 1889-90 1890-91 1891-92 1891-92 1892-93 1893-94 1893-94	44,050 101,550 48,350 50,100 64.500 27,854,550 432,150	\$9, 623, 150 19, 139, 700 5, 915, 700 3, 493, 900 1, 888, 100 1, 738, 650 1, 940, 650 7, 520, 750 15, 609, 750	\$171, 301, 550 151, 935, 850 108, 814, 650 100, 352, 100 65, 243, 300 67, 348, 450 77, 943, 000 57, 013, 950 106, 016, 900 91, 785, 150	\$180, 987, 250 171, 119, 600 114, 831, 900 103, 894, 350 67, 181, 500 69, 151, 600 107, 738, 206 59, 396, 050 163, 551, 900 195, 445, 950

### SPANISH INDEMNITY CERTIFICATES.

The number and amount of certificates issued and canceled is shown below for the period beginning July 1, 1888:

TRANSACTIONS IN SPANISH INDEMNITY BONDS (ACT OF CONGRESS JUNE 7, 1836).

	Issued or	transfers.	Canceled on transfers.		
Year.	Number of bonds.	Amounts.	Number of bonds.	Amounts.	
1888-89 1889-90 1890-91 1891-92 1892-93 1893-94 1894-95	4 3 7 128 9	\$59, 891, 48 36, 813, 86 10, 189, 70 61, 565, 77 595, 972, 51 44, 523, 95 12, 306, 53	23 4 3 6 136 8	\$59, 891. 48 36, 813. 86 10, 189. 70 61, 565. 77 595, 972. 51 44, 523. 95 12, 306. 53	

Each year there is received from the Government of Spain, through the Department of State, the sum of \$28,500, which is paid to the FI 95—33

owners of this stock as a dividend of interest. Schedules prepared in this division are forwarded to the Treasurer of the United States showing the names and addresses of holders, the amount held by them, and the pro rata amount of the sum received due each. The dividend is at the rate of  $4\frac{75}{1000000}$  per cent. The fifty-fifth installment was paid September 6,1895.

During the year 171,976 new bonds, prepared by the Bureau of Engraving and Printing, amounting to \$279,107,550, were received, as follows:

Loans.	Number of bonds.	Amounts.
1904, 5 per cent, coupon 1904, 5 per cent, registered. 1925, 4-per cent, coupon. 1925, 4 per cent, registered. 1925, 4 per cent, registered. Cherokee certificates of indebtedness, registered. The following table gives a classification under three principal heads of the outstanding interest-bearing United States registered bonds as shown in connection with the dividends due at the dates specified. The ledgers used in connection with the various loans are allotted to different classes of holders, under the three principal titles of foreign, domestic, and Treasurer of the United States in trust for national banks. The table gives a summary of the amounts outstanding under each class at the dates when the books were balanced for the purpose of declaring a dividend. It should be noted that dates given are not the same as those given in the earlier part of this report; and further, that the preceding reports include both coupon and registered bonds, while the table which follows refers only to registered bonds:

1891, 2 per cent     Sept. 1, 1895     \$23,770, 650     \$1,593,850     \$25,364,56       1904, 5 per cent     Aug. 1, 1895     13, 601,850     29,104,559     52,706,46       1907 consols, 4 per cent     July 1, 1895     \$4, 373,650     161,846,300     323,679,100     489,899,00       1925, 4 per cent     Aug. 1, 1895     11,080,500     12, 168,900     23, 249,40       Pacific railroads     July 1, 1895     13,915,000     48, 346,512     62,261,51       Cherokee certificates of indebtedness     6,640,000     6,640,000     6,640,000			and the second second			
1891, 2 per cent     Sept. 1, 1895     \$23,770, 650     \$1,593,850     \$25,364,56       1904, 5 per cent     Aug. 1, 1895     13,601,850     29,104,559     52,706,46       1907 consols, 4 per cent     July 1, 1895     \$4,373,650     161,846,300     323,679,100     489,899,00       1925, 4 per cent     Aug. 1, 1895     11,080,500     12, 168,900     23,249,40       Pacific railroads     July 1, 1895     13,915,000     48, 346,512     62,261,51       Cherokee certificates of indebtedness     6,640,000     6,640,000     6,640,000	Loans. 10131 4, 373, 930   224, 214, 300   431, 532, 912   600, 120, 80			4, 373, 650	224, 214, 300	6, 640, 000	6, 640, 000 660, 120, 862

The changes during the twelve months preceding each date have been as follows:

[Increase +; decrease -.]

Loans.	Foreigu.	Treasurer of the United States in trust for national banks.	Domestic.	Total.
1891, 2 per cont. 1904, 5 per cont 1907 consols, 4 per cent 1907 epr cent 1925, 4 per cent Pacific railroads Cherokee certificates of indebtedness Total	+\$2,900	-10,554,350 +11,080,500 -2,922,000	+ \$106,600 +20,034,600 +11,021,350 +12,168,900 + 560,000 + 6,640,000 +50,531,450	+\$27, 333, 850 + 469, 960 + 23, 249, 400 - 2, 362, 000 + 6, 640, 000 +55, 331, 150

This table indicates that the amount of registered bonds held by parties desiring their interest sent to them in foreign countries has hardly changed in twelve months. The bonds held by the Treasurer of the United States for national banks have increased since the prior report about \$5,000,000, but the changes of the loans in which the amounts are invested involve amounts several times as great. The total amounts have been considerably increased by the issues upon the new loans. The amounts held by individuals and corporations have increased upon each loan.

The total number of ledgers in use upon the registered portion of the current or interest-bearing loans of the United States, the District of Columbia, and the Spanish indemnity is 83. Upon the loans of 1891, 2 per cent; 1904, 5 per cent; 1907, 4 per cent, and 1925, 4 per cent, the amount of the balance standing to the credit of each holder is taken off every three months and the interest thereon calculated. A schedule is prepared showing the name and address of each holder of registered bonds, the amount of principal to his credit, and the amount of interest due him, which schedule is delivered to the Treasurer of the United States, who issues checks for the interest due. Upon the Pacific railroads and the District of Columbia loans dividends are declared semiannually. Upon the Cherokee and Spanish loans they are declared once a year.

The following statement will show the principal facts in regard to the dividends prepared by this office during the last fiscal year for payment:

Dividend due.	Loans.	Amount of principal.	Amount of interest.	Number of open accounts.
Aug. 1		\$25, 372, 550. 00 12, 306, 000. 00	\$317, 156. 87 224, 584. 50	5(·3 289

The consolidated index of all holders of United States registered bonds has been carried forward more rapidly than during any year since the work began. It is intended to give when completed an instantaneous reference to the name of any individual or corporation whose name has ever appeared upon any registered United States bond, whether as principal, agent, or beneficiary. The record at present includes loans beginning with 1836, when the public debt was practically nonexistent, and has been brought down to include loans issued prior to 1871. The number of index cards prepared during the year was 78,442; examined, 76,534; arranged, 57,251; consolidated, 44,479. The number of references to accounts on ledgers amounted on July 1, 1895, to nearly a quarter of a million, viz, 249,153. The further the work is advanced the more useful the index becomes.

The following tables give the principal items of work performed in connection with loans:

 In the Register's report for 1894 there was submitted the following-named exhibits, prepared in the Division of Interest, Expense, and Warrants, "in part fulfillment of the Department order constituting a

expenses of the public loans, to wit: "1. A detailed tabular statement, by titles and years, of all appropriations made for the payment of interest from 1835 to 1885, inclusive.

commission to prepare a history of interest, discounts, premiums, and

"2. A similar statement of interest paid, covering the same time, amounting to \$2,273,102,282.09.

"3. A balance sheet, or complete statement of the account for the entire period of fifty one years aforesaid.

"4. A detail of balances brought in to 1835, as contained in the preceding sheet.

"5. A detail of amounts paid and repaid out of same.

"6. A detail of repayments out of advances in 1885, credited in personal and appropriation accounts in 1886.

"7. A detail of amounts carried to the surplus fund, arising from

excess of repayment.

"8. A detail of balances due to or by the United States at the end of 1885, wherein certain errors exist and corrections are indicated, to which attention is respectfully and specially invited.

"9. A review of balances arising since 1859, remaining due, not

counterbalancing.

"10. Itemized statements of 'Expenses of the national loan' and

'Refunding the national debt' from 1862 to 1882, inclusive."
The aforesaid division having been abolished by law, the work was continued in the Loan Division; and the following additional exhibits are now respectfully submitted in completion of the same, viz:

1. A detailed tabular statement, by years, of premium and premium on accrued interest received (the latter being the difference on gold interest paid in currency) during the period from 1835 to 1885, inclusive, from the sale of the various loans, amounting to \$35,434,677.99.

2. A similar statement of discounts realized on the purchase or redemption of the several loans, amounting to \$718,362.43.

3. A similar statement of profits, arising from "Rebate of Interest"

on coupon and registered bonds, amounting to \$39,978.

4. A like statement of profits through "Forfeitures on account of proposals for subscriptions to loans" amounting to \$30,129.96.

5. A further statement of profits, from interest on premium, and

premium on same, \$614.55.

6. A final statement of profits, from "Profit and Loss account," Treasurer's Office, \$10,747.78,—making the total receipts, as adduced from the sources named, \$36,234,510.70.

7. A corresponding statement of discounts sustained on the issue or sale of loans, amounting, less \$1,134,328.77 accrued interest deducted,

to \$6,266,715.42.

8. A detailed tabular statement, by loans, of all appropriations made for the payment of premium, embraced in the period from 1835 to 1885, inclusive (including \$17,371,028.65 on account of the "Sinking and Special Funds," afterwards carried to the "Surplus Fund"), amounting to \$85,087,032.93.

9. The same, by years.

10. A detailed tabular statement, by loans, of all payments of premium made during the same period, as determined through the accounts and their included vouchers actually entered on the books of the Register's Office in the several years indicated, amounting to \$67,409,734.71.

11. The same, by years.

12. A balance sheet or complete statement of the premium account for the entire period dealt with.

13. A balance sheet or statement of appropriations for premium on account of the sinking and special funds, and payments, etc., out of the same.

14. A detail of appropriations for the payment of commissions,

amounting to \$5,094.42.

15. A detail of payments of commissions out of the foregoing, etc., amounting to \$14,919.97, being additional to those made out of the appropriations for expenses of the national loan and refunding the national debt, heretofore given.

16. A balanced statement of the same.

The total discounts sustained and payments of premium and commissions contained in the papers now submitted amount to \$73,691,370.10. Adding \$12,329,840.39 commissions from "Expenses of the national loan," etc., and interest paid, previously reported, the aggregate, not including incidentals such as paper, printing, expressage, etc., is \$2,359,123,492.58.

The abundant explanatory notes to the various tables, to which attention is particularly invited, will of themselves give something of an idea of the numerons inaccuracies encountered and the intricate nature of the work accomplished. The research has been thorough and the

effort to reconcile discrepancies exhaustive.

# GENERAL NOTE.

There seems to exist no records that present thoroughly or accurately the information which it is the purpose of these statements to furnish. For instance, Bayley's History of the National Loans (as prepared for the Tenth Census of the United States), published as authentic by the Department, purports to give the premium realized on the several loans. It will be seen that in many instances, owing to irregularities in the covering warrants, where it was not ascertained or intended, premium on interest was included as premium, or the latter, which should have been included, was omitted. In the instance of the five-twenties of

1865, however, the entire premium on accrued interest covered in as such was apparently knowingly included. Of \$1,826,868.75 given as premium on five twenties of 1862, \$1,573,993.75 was found to belong to the five twenties of June, 1864, the premium on which loan was of course increased by just that amount. On the five twenties of March, 1864 (stated to have been sold at par), no premium was given, whereas \$26,374.60 was realized thereon. Corrections in the certificates of indebtedness of 1862 and the seven-thirties of 1864 and 1865 leave nothing as received on account of those loans. Of \$316,876.14 appearing as premium on the latter loan, \$24,639.09 appertained to the fivetwenties of 1865 and \$292,273.05 was really a repayment on account of funds that had been advanced to pay premium on the purchase of the These are only a few of the many inaccuracies encountered which have been corrected herein. The ten-forties of 1864 present a marked instance, and a further forcible illustration of this is furnished in the case of the five twenties of 1865, a comparative statement as to which will be found on pages 21 and 22. There it will be seen how the printed Receipts and Expenditures, the records from which they are compiled, Bayley, and the covering warrants, even between themselves, are completely at variance.

Loan of 1860.—Warrant 599, of June 30, 1864, covered in \$29,900 as forfeited on proposals for subscriptions to this loan. Taken up in printed Receipts and Expenditures under head of "Fines, penalties,

and forfeitures." Not here included.

Five-twenties of 1862.—Warrant 408, of September 30, 1865, covered in \$1,826,868.75 as premium on this loan. The lists attached to the warrant show that \$1,573,993.75 belonged to the five-twenties of June, 1864.

Certificates of indebtedness of 1862.—By warrant 743, of June 30, 1866, \$3,183.75 (deposited December 23, 1862) was covered to the principal of this loan. It was really a part of \$23,608.75 discount on \$20,000,000 certificates purchased before maturity. The other portion, \$20,425 (deposited August 5, 1862), was by warrant 95, of August 7, 1862, covered in as a "profit." Subsequently, by warrant 276 and counter warrant 511, of December 28, 1870, the \$3,183.75 was charged back to principal and erroneously covered as "premium." (See discounts.)

Compound-interest notes.—Warrant 619, of December 31, 1866, covered in \$1.25 as excess of premium paid to (and refunded by) Winslow, Lanier & Co., on the purchase of these notes, and it ought to have been, as it now is, carried as a repayment to the account of premium paid on this loan.

Loan of 1863.—Warrant 537, of December 31, 1864, covered \$407.68 as premium on this loan; \$7.68 found by the Treasurer's books and transcript of August 27, 1864, to be "Accrued interest on 7-30s of 1864," is here deducted. Warrant 767, of December 31, 1864, covered in \$17.44 as "Premium on 1881 bonds, act of July 17, 1861," evidently an error. That loan sold part at a discount and part at par. Certificate of deposit No. 60, of October 22, 1864, reads simply "Premium on sale of 1881 bonds." The amount is here included. Warrant 650, of September 30, 1868, covered in \$150.22, erroneously as principal. By warrant 270 aud counter warrant 446, of December 23, 1870, it was charged back to principal account and covered as premium. As this amount was really the difference between \$464.33 accrued interest paid in currency (covered by warrant 653, of September 30, 1868) on \$2,000 premium (covered by warrant 651, of even date), from June 11, 1864, and the gold value, it, as well as the interest, should have been covered in as a "profit." It is not here included.

Ten-forties of 1864.—Warrants 252, of June 13, and 518, 519, 530, 636, and 637, of June 30, 1864, covered in \$151,071.49 as premium on this loan. The lists attached to the warrants and the records of the Treasurer's office show the whole amount to be premium on accrued interest. This sum added to \$508,351.29, found to be premium, makes \$659,422.78, the total amount given as such in the printed Receipts and Expenditures. Therein the total premium on accrued interest is given as \$11,606.69. To this has been added the item above, \$829,637.65, erroneously printed in 1865 as interest, and \$61.44, part of warrant 316 of December 14, 1864. In said warrant \$95.60 premium on interest had been covered as the latter. In warrant 295, of March 22, 1865, covering accrued interest, \$34.16 was deducted and covered by warrant 296; of even date, as premium on interest. The balance, as above, was not found to have been corrected by warrant.

Five-twenties of March, 1864.—Warrant 360, of June 9, 1866, covered in \$68,819.33 as interest, of which amount that above was found to be

as here shown.

Five-twenties of June, 1864.—Warrant 768, of December 31, 1864, covered in \$80, as forfeited on bids for this loan; amount not here included. There is included \$1,573,993.75, part of warrant 408, of September 30, 1865, erroneously covered as premium on five-twenties of 1862. Of warrant 775, of March 30, 1867, \$4,903.18 was found to be premium on five-twenties (consols) of 1865. The item of \$155 in 1871 (warrant December 31, 1870) is on "Peter's donation of \$1,000 to the sinking fund."

Seven-thirties of 1864 and 1865.—Warrant 663, of March 31, 1866, covered in \$24,639.09, per Receipts and Expenditures as "premium on the purchase of 7-3-10 bonds, act June 30, 1864." The same was found to be premium on the sale of five-twenties of 1865. Warrant 586, of December 31, 1870, covered in \$292,237.05 as premium received from sales, while it was really a repayment of funds advanced to pay

premium on the purchase of this loan.

Five-twenties of 1865.—There is here included \$995,247, erroneously covered by warrant 459, of December 20, 1865, as principal; also \$24,639.09, under warrant 663, of March 31, 1866, as per note to seventhirties of 1864 and 1865. Warrant 557, of June 28, 1866, covered \$2,077.35 as premium. Per list attached \$1,175.79 was found to be premium on interest. Warrant 295, of September 20, 1866, covered \$21,217.10. This amount was taken up in the printed Receipts and Expenditures as premium on accrued interest. Being a sale of gold received for accrued interest, it is not here included. Warrant 451, of September 29, 1866, covered in \$479,263.87 as premium on accrued interest. The printed Receipts and Expenditures takes this up as interest. The lists attached to the warrant, the transcripts and books of the Treasurer's office show that \$381,641.97 was premium and \$97,621,90 premium on interest on this loan. Warrant 650, of September 29, 1866, covered in \$687,668.69 as premium. The list attached, for week ending August 11, 1866, shows \$181,364.34 as premium on accrued interest. Warrant 687, of September 29, 1866, covered in \$77,527.20 as premium. The list and certificate of deposit No. 10101, of August 11, 1866, show \$12,466.95 to be premium on accrued interest. Warrant 364, of December 6, 1866, covered \$25,176.69 as interest. this amount \$7,666.81 was found to be premium on accrued interest.

Consols of 1865.—Warrant 516, of December 31, 1866, covered in

Consols of 1865.—Warrant 516, of December 31, 1866, covered in \$76,407.42 as premium on accrued interest. Certificate of deposit No.

14268, of November 22, 1866, shows that of \$14,468.48, borne on list of even date, attached to the warrant, \$5,000 was premium on sales. Warrant 775, of March 30, 1867, covered in \$202,077.28 as premium on five twenties of June, 1864. List of March 21, 1867, and certificate of deposit No. 15706, of same date, show that \$4,903.18 belong to this loan. Warrant 661, of June 29, 1867, covered in as principal, in part, per list of May 31, 1867, attached, \$889,700. Certificate of deposit No. 16879, of that date, shows the amount of principal to be \$862,700; difference, \$27,000. Warrant 666, of June 29, 1867, covered in as premium, in part, per list of May 31, 1867, attached, \$58,576.35, while certificate of deposit, of even date, shows \$85,576.35; difference as above, here included, \$27,000.

Funded loan of 1881.—Of the \$435, in 1875, warrants 1091 and 1092, of September 30, 1874, covered in \$30 and \$375, and warrant 468, of December 15, \$30, all as "Miscellaneous revenue;" \$57, "Forfeiture on subscriptions" per warrant 634, of September 21, 1874, for \$30, and warrants 513 and 514, of September 8, 1876, for \$3 and \$24, not here

included.

Funded loan of 1891.—In the printed Receipts and Expenditures the premium shown, as received in 1879, includes \$746,943.25 on the "Funded loan of 1907." The ledger and warrants show it as given above.

Funded loan of 1907.—In the printed Receipts and Expenditures no receipts of premium are given in 1879 on account of this loan. (See note to preceding loan.) A forfeiture of \$2.96 on account of subscription is not here given.

Total		116, 731. 35	<u> </u>			·

Loan of 1843.—The above discount of \$1,725 on the purchase of \$136,000 of this loan was improperly deducted (together with \$2,899.63 "short interest;" total, \$4,624.63) from \$27,046.63; the sum of \$5,169.50 premium on \$80,700, loan of 1842, \$21,281.25 on \$260,000 loan of 1848, and \$170, \$100.88, and \$325; total, \$595.88; commissions on the three loans paid on the purchase of the respective amounts at the same time; the remainder, \$22,422, being by warrant 6143½, of November 24,1848, charged in the appropriation account as "Premium and commissions" on loans of 1842, 1843, and 1848. (Report 100449.)

Texan indemnity.—Of the \$17,110.62 above, \$17,080, being a discount of 4 per cent on a redemption of \$427,000 in the fiscal year of 1865, was first covered in as such by warrant 467, of December 23, 1870, and by counter warrant 271 of even date was charged to principal, from which it had been deducted. (See Report 15395, pay warrant 1335, of November 26, 1864.) The balance of \$30.62, being a discount of \$14.73 and \$15.89 on the redemption of \$5,000 and \$8,000, respectively (Report 16973, warrant 2993, of May 22, 1865), was at first erroneously charged to "Interest, public debt." Subsequently, by Report 24785, warrant 269, of December 23, 1870, and counter warrant 763 of same date, it was charged to principal and credited as a repayment to account of "Unclaimed interest." It has not been found to have been afterwards covered in, as it should have been, as a profit in the miscellaneous

receipts or otherwise.

Certificates of indebtedness of 1862.—By warrant 95, of August 7, 1862, the \$20,425 above (deposited August 5) was covered in as a profit on the purchase of this loan. It was really a part of \$23,608.75 discount on \$20,000,000 certificates purchased before maturity. The other portion, viz, \$3,183.75 (deposited December 23, 1862, entered above in 1871); was by warrant 743, of June 30, 1866, erroneously covered as principal. Subsequently, by warrant 276 and counter warrant 511, of December 28, 1870, the same was charged back to principal, and erroneously covered as premium. (See note in statement of premiums received.) \$3,452.50, appearing above in 1868, arose as a gain on \$500,000 purchased through Jay Cooke & Co., March 6, 1866. By Report 19043, warrant 5222, of March 16, 1866, the entire amount of principal and interest having been allowed, as if paid in full, on June 28, 1866, the aforesaid item was carried to the credit of "Premium and discount account," in Ledger 1, Treasurer's office, page 204. After \$116,731.35, similarly arising from the purchase of compound interest notes, and \$4,076.47 interest on balances due the United States by the First National Bank of Newton, had been likewise credited, and \$9,638.97, entirely appertaining to compound interest notes, had been contradebited in the aforenamed amount, the balance, to wit, \$114,621.35, containing evidently the item under consideration, was by warrant 738, of December 31, 1867, covered into the Treasury.

Compound-interest notes.—Of the \$116,731.35 entered in 1868 above, the following amounts, as determined by the lists of purchases recorded in the Treasurer's office, arose as follows: \$54,556.59 was a gain on \$2,367,000; \$39,922.79 on \$1,945,000, and \$22,161.97 on \$5,268,970; total principal, \$9,580,970; purchased before maturity, through Jay Cooke & Co., in February, March, and April, 1866. By Reports 19078, 19072, 19088, 19155, 19296, and 19581, warrants 5268, of March 22, 5304, and 5305, of March 27, 5347, of April 2, 5566, of April 30, and 6032, of June 19, 1866, the whole amount of "interest," and by Reports 19852, 20024, 20180, 19733, 20508, 20636, and 20783, the entire amounts of principal, of these transactions were allowed, as if paid in full; \$11,226.21 appear-

ing in the Treasurer's lists as "Commissions," being included in the amount allowed as "Interest." On June 28, 1866, the discounts, as herein shown, were respectively placed to the credit of "Premium and discount account" in Ledger 1, Treasurer's office, page 204, \$90, going to make up the \$116,731.35, arose as a gain, per Report 20385, warrant 6672, of August 28, 1866, on \$1,333,610, of purchases in July, 1866; the same being, on September 6, likewise entered to the credit of the aforesaid account. On June 28, there had been also placed to the credit of this account \$3,452.50, similarly arising from the purchase of "Certificates of indebtedness of 1862," as to which see note to that loan. December 9, 1867, there was further credited to said account \$4,076.47; being, as per receiving teller's slips, Treasurer's office of same date, interest on balances due by the First National Bank of Newton, to wit, \$156,497.98, as shown in the last transcript of said bank, of February 28, 1867. The total of these credits was \$124,260.32.

Against this were entered the following debits, all on account of

compound-interest notes:

```
      July 23, 1866.
      "Excess of cost over actual interest paid Jay Cooke & Co."
      $2,011.84

      July 23, 1866.
      "Paid premium on notes purchased by Assistant Treasurer at New York"
      3,553.82

      Aug. 29, 1866.
      "Commissions on purchase of 6 per cent notes"
      4,073.31

      Dec. 30, 1867.
      "Amount deposited in Treasury" covered in as part of warrant 783 of December 31
      114,621.35
```

The first item was really on account of difference nonallowed, per Reports 19769, 19783, 19808, and 19814, claimed, as determined through the lists recorded in the Treasurer's office, to have been paid—\$92.88 as "Interest" and \$1,918.96 as "Commissions"—on the total purchases of \$4,665,040, in the month of May, 1866.

The second item, appearing also in the list for May, under the head of "Commissions" (\$3.82 as paid by the Western Insurance Company, and of \$3,550 by the Assistant Treasurer at New York), was actually allowed in Report 19808, above, and paid, as premium, by warrant 6164, of July 2, 1866, and draft 5070, cashed July 12; being anterior to the

date of the debit in that case.

The third item was an account of differences nonallowed, per Reports 20082, 20092, 20096, 20103, 20106, 20115, 20130, 20138, 20142, 20151, 20152, 20157, 20161, 20164, 20170, 20174, 20176, 20179, claimed, as per Treasurer's lists, to have been paid, \$2,760.81 as "Interest," and \$1,312.50 as "Commissions" on the total purchases of \$2,596,940, during the month of June, 1866. Afterwards, by Report 22211, warrant 720, of July 2, 1867, draft 7255, date changed from June 29 (the date of the report) to July 5—cashed July 31, 1867—\$4,073.31 of said item was allowed and paid as interest, leaving \$48.20, as interest, not found to have been allowed, the same being difference of \$1 in Report 20106, and \$47.20 in Reports 20151 and 20196.

Finally.—By Report 22492, Treasury warrant 1035 of September 30, 1867, and draft 8110 of even date, cashed October 31, 1867, there was further allowed on account of the May, 1866, purchases, and paid as "Commissious," out of the appropriation for paying—

And here it may be said exhaustive research has totally failed to disclose any entries reconciling these discrepancies. Thus it will be seen that not only should the entire amount really realized, viz, \$124,260.32, including the \$116,731.35 derived from compound interest notes, have been deposited, but had the requisite counter entries been made in the aforesaid "Premium and discount account," the \$114,621.35 actually covered in, as a part of warrant 783, of December 31, 1867, should have been increased, by \$13,585.05, to \$128,206.40.

Warrant 783, in addition to the foregoing amount, covered in \$10,846.01 from "Profit and loss account;" total, \$125,467.36.

PROFIT ARISING FROM REBATE OF INTEREST ON COUPON AND REGISTERED BONDS, FROM 1835 TO 1885, INCLUSIVE.

# PROFIT, FROM INTEREST ON PREMIUM, AND PREMIUM ON SAME.

•	Year.	Loan of 1863, act Mar. 3, 1863.	Warrant and date of covering amount.	Total.
1871			653, Sept. 30, 1868 446, Dec. 23, 1870	

Warrant 650, of September 30, 1868, covered in \$150.22 erroneously as principal. By warrant and counter warrant, 270 and 446, of December 23, 1870, it was charged back to principal account and covered as premium. As this amount was really the difference between \$464.33 interest, paid in currency (covered by warrant 653, of September 30,

1868), on \$2,000 premium (covered in as part of warrant 651, of even date) from June 11, 1864, and the gold value, it, as well as the interest, should have been covered in as a profit, as given above.

# PROFITS-Continued.

In 1849 the gross premium was \$21,281.25, but \$2,899.63 "short interest" was deducted. (Report 100449; see notes to loans of 1842 and 1843; see separate tables for \$325 commissions.)

In 1853 the appropriation for premium, loan of 1848, was \$43,683.24, and for the same in appropriation for loans of 1842, 1846, 1847, and 1848, \$6,755.77. In the account of premium is included \$58.68, and in the account of premium and interest \$3.64; total, \$62.32, interest allowed on funds used by parties in making purchases. The \$2,203.64 above really pertains to the loan of 1847, but the error was corrected in 1854, when there was paid \$6,410.61, and repaid \$2,203.64.

Out of the appropriation in 1866 was paid, per various reports, \$3,521.87, commissions; out of the appropriation in 1867 was paid, per Report 157686, \$4,927.43, commissions; total, \$8,449.30. (See tables of Commissions, to which these amounts have been carried.) The total payments on account of premium were \$17,673,306.29. A balance of \$292,237.05 remaining in the hands of F. E. Spinner at the end of 1869, per warrant 586, of December 31, 1870, was erroneously covered into the Treasury as premium received. This forms a part of the \$316,876.14 shown as received in Bayley's book. There was really no premium realized on this loan. The balance, \$24,639.09, was derived from the sale of five-twenties of 1865.

a Includes \$716.47 out of appropriation for loans 1842, 1846, 1847, and 1848.

b In 1849 the appropriation per the books reads "For premium and commissions of loans, 1842, 1843, and 1848, \$22,422. The actual payments, per Report 100449, were as follows, viz:

Loans.	Premium.	Commissions.	Total
1842		\$100, 88 170, 00	\$5, 270. 38 170. 00
1848	18, 381. 62	325. 00	18, 706. 62
Total	23, 551. 12	595.88	24, 147. 00

From the total amount was improperly deducted \$1,725 discount on the purchase of the loan of 1843,

From the total amount was improperly deducted \$1,725 discount on the purchase of the loan of 1843, which determined the appropriation above. In these tables the correct entries have been made. c\$1,000 commissions paid, per Reports 90619 and 90968, in 1845, is included by Bayley as premium. dSoc note to payments in 1853, relative to \$17,332.67 interest added. eIncludes \$204.89 out of appropriation for loans of 1842, 1846, 1847, and 1848. fIncludes \$9,066.86 out of appropriation for loans of 1842, 1846, 1847, and 1848. gIn 1849 the gross premium was \$21,281.25, but \$2.896.6° coupons short." was deducted. (See note above to loan of 1842.) Includes \$6,755.77 out of appropriation for loans of 1842, 1846, 1847, and 1848. hIn 1871, repaid \$5,377,026.63. Paid, per vonchers, as carried to the various loans, \$5,377,021.81. Of repayments, \$4.82 charged back, and by counter warrant 576 of December 31. 1870, covered as "Miscellaneous revenue from sale of coin derived from interest." Iu 1872 \$4,969,420.35 carried to the surplus found. plus fund.

iIn 1871 repaid \$13,324,141.62. Paid, per vouchers, as carried to the several loans, \$13,324.110.31. Of repayment \$31.31 charged back, and by counter warrant above, similarly covered in. In 1872

\$12.401,608.30 carried to the surplus fund.

JFor \$1,376.25 payment carried to commissions see payments by loans in 1867, \$1.25, erroneously covered by warrant 619 of December 31, 1866, as premium received, being really an excess of payment retunded by Winslow, Lanier & Co., is here deducted.

k For \$3,521.87 and \$4,927.43; total, \$8,449.39; payments carried to commissions see payments by loans in 1866 and 1867. The total payments, per vouchers, on account of premium was \$17,673,306.29. A. balance of \$292,237.05, remaining in the hands of F. E. Spinner at the end of 1869, was, by warrant 586 of December 31, 1870, incorrectly covered into the Treasury as a receipt of premium. This forms a part of the \$316,876.14 given in Bayley's book as received. There was really no premium realized on the sale of this loan. The balance of \$24,639.09 was derived from five-twenties of 1865. Balance covered in, as per preceding note, \$292,237.05. Carried to the surplus fund, sinking, and special funds, \$17,71,028.65.

m Paid, per vouchers, as premium \$28,428.82. Carried to the surplus fund, sinking, and special funds, \$17,371,028.65.

m Paid, per youchers, as premium, \$28,426.82. Carried to the surplus fund, excess of repay, loau 1847, \$4,206.97.

n Paid, per vouchers, as premium, \$67,409,734.71. Paid as commissions, \$9,825.55. Balance covered in, seven-thirties, 1864 and 1865, \$292,237.05. Carried to the surplus fund, excess of repay, loan 1847, \$4,206.97. Sinking and special funds, \$17,371,028.65.

Bayley gives the total premium paid for the loan of 1843 as \$23,332.05. Deduct \$1,000, commissions paid in 1845, and add \$17,832.05, of account "Premium and interest," in 1853, and \$5, same account, in 1855, not included by him, and the result is as above, viz, \$40,169.72. His totals for the loans of 1842, 1846, and 1847 are in excess, respectively, \$1,821.92, \$353.88, and \$12,834.29; equals \$15,010; and his total for the loan of 1848 is less than given in these tables by \$16,243.49. He is therefore less, net, for these three last-named loans, \$1,233.40. It is certain that he took up in the loan of 1848, in 1849, \$2,899.63 "short interest," deducted, in Report 100499, from premium paid. Assuming that he did not include a counter payment of \$4,206.97 from the loan of 1847, the difference would be \$1,307.34, making the discrepancy \$73.94 in excess of these sheets; but there is no way now of determining how his figures were obtained.

same.)

b \$5,169.50, loan of 1842, and \$18,381.62 loan of 1848 above, equals \$23,551.12. In this instance the appropriation, per the books in 1849 reads, for premium and commission on loans, 1842, 1843, and 1848, \$22,422. Add \$1,725 discount loan of 1843, improperly deducted, and deduct \$100.88, \$170, and \$325; total, \$595.83; commissions loans of 1842, 1843, and 1848.

c Bayley's total for this loan, less \$1,000 commissions, is \$22,332.05. He does not include \$17,837.67 of appropriation on account of "Premium and interest." (See note to detailed payments by loans in 1850.)

d See note on total sheet of appropriations by loans.

a Of the appropriations in 1866, per various reports, and in 1867, per Report 157686, there was paid \$3,521.87 and \$4,927.43, commissions, total, \$8,449.30. (See tables of same; also payments by loans.) The total payments of premium, per vouchers, on account of this loan was \$17,673,306.29. A. balanco of \$202,237.05 remaining in the hands of F. E. Spinner at the end of 1869 was, by warrant 586, of December 31, 1870, incorrectly covered in as premium received. This forms a part of the \$316,876.14 given in Bayley's book as received. There was really no premium realized from the sale of this loan. The balance of \$24,639.09 was derived from five-twenties of 1865.

b Out of this appropriation, per Reports 20385 and 157686, \$1,376.25 commissions were paid; \$1.25, covered in by warrant 619, of December 31, 1868, as premium received, being really an excess of premium paid to and refunded by Winslow, Lanier & Co., has been here deducted.

a Bayley makes this \$1,000 more. Reports 90619 and 90698 show it to be commissions. (See tables of same.)

b Includes \$1,725 discount on loan of 1843, in the accounts improperly deducted from premium, etc., loans of 1842 and 1848. (See tables of discounts.)

c While the appropriation in this instance reads for "Premium and commissions," there were no payments of the latter, as such.

d Out of this appropriation, per various reports (for which see tables of commissions), there was paid on account of seven-thirties of 1864-1865, \$3,521.87, commissions.

c Of this appropriation, per Reports 20385 and 157686, there was paid on account of compoundinterest notes, \$1,376.25; and per Report 157686, on account of seven-thirties of 1864-65, \$4,927,43; total, \$6,303.68, commissions (see tables of same). The last report says, payable out of the appropriation for "Expenses of the national loan;" but the warrant 6979, of October 8, 1866, does not so indicate, and it was not so paid.

was not so paid:
fOf this amount, \$1,374,680.05, appropriation on account of the sinking fund, carried to the surplus fund in 1872.

g of this amount \$3,594,740.30 appropriation for the sinking fund, and \$12,401,608.30 on account of the special fund; total, \$15,996,348.60; carried to the surplus fund in 1872. Total for the sinking fund, 1870-71, \$4,969,420.35. Aggregate, \$17,371,028.65. For payments by leans on this account, see detailed and total statements of the same.

h Of this appropriation, there was paid \$8,449.30, and \$1,376.25, commissions, on the seven-thirties of 1864-1865, and on compound-interest notes; total, \$9,825.55, as per foregoing.

Note.—In not taking up the \$17,332.67, "Interest added," loan of 1843, in 1853 (note c above), and similar items, in the Statement of Interest published in the Register's Report for 1894, Mr. John Morris, under whose auspices the work was performed, made this note: "Premium and interest are treated in this work as all premium. The bonds having been bought flat, it was simply the result of a Department calculation intended to represent the interest accrued on the bonds at the date of purchase." And further along he adds: "In all of these transactions of 'Premium less interest' the settlements were made on a basis of premium at a certain designated figure, plus interest accrued and unpaid to the date of payment of the bonds. In cases where the current coupon was detached from the bond the interest for the unexpired time was deducted from the premium, and the coupon paid in full upon maturity and charged to interest account, as of course. The effect of this method of treatment was to make the apparent premium less than the real premium paid, and to load the interest account with the payments for time subsequent to the redemption of the bonds, the one account offsetting the other. When the current coupon was not detached from the bond, the premium plus interest to the date of payment was the basis of settlement, as will be seen by reference to the accounts appearing under the title of 'Interest on the public debt.'"

The last report says, "Payable out of expenses of national loan," but the warrant 6979 of October 8, 1866, does not so indicate and it was not so paid.

# Note, Coupon, and Currency Division.

The duties of this branch of the office are now confined to the care of all redeemed detached coupons, redeemed, exchanged, and transferred coupon bonds, redeemed interest checks, with other miscellaneous. redeemed securities to be placed on file for reference, together with the charge of the final count and examination of all United States notes, gold and silver certificates, and statistical matter before their destruction.

The tabulated statements 1 to 21 cover all branches of the regular work performed during the year and give in a condensed form the exact condition of the records of the division.

Following the order of the arrangement of the statements a brief summary of their contents is submitted, to which is added a statement of the work done on the files prior to their transfer, October 1, 1894, with an account of certain old work performed at intervals during the year which can not be given in tabulated form.

There were 1,545 gold certificates of deposit, act of July 12, 1882, series 1888, amounting to \$11,330,000, received and registered, increasing this class of redeemed vouchers on file in this division to 19,883 in number

and \$151,565,000 in amount.

Currency certificates, act of June 8, 1872, received and registered, 7,567, amounting to \$75,650,000, aggregating on hand at the end of the year, 124,648 certificates, representing \$1,144,225,000.

Interest checks of Spanish indemnity certificates received and regis-

tered, 85, amounting to \$28,387.61.

Interest checks on certificates of indebtedness for Cherokee lands,

19, amounting to \$265,600.

Checks for the payment of interest on the registered bonds of the United States, the Pacific Railroads, and the District of Columbia received and registered, 134,739, amounting to \$29,357,017.36, increasing the whole number now on file to 3,597,277 checks, representing **\$**671,038,820.55.

The total number of redeemed coupons received during the year was 756,801; counted and arranged numerically, 404,851; entered in numerical registers, 752,730; compared with numerical registers, 732,076, and

scheduled, 751,791.

At the close of the year there were on file in the division 99,902,862

coupons, amounting to the sum of  $$1,213,279,922.49\frac{1}{2}$ .

There were received, registered, and scheduled 15,901 coupon bonds, with 633,275 coupons attached, amounting to \$12,891,650, which, added to the coupon bonds on file at the beginning of the year, makes an aggregate of 4,293,910 bonds, amounting to \$2,536,072,250.

During the year there were counted and destroyed 7,313,628 United States notes, amounting to \$74,720,000; 15,281,414 Treasury notes of 1890, amounting to \$50,712,000; 30,203,652 United States silver certificates, amounting to \$123,424,000; 81,370 gold certificates, amounting to \$6,951,540; 478 4 per cent refunding certificates, amounting to \$4,780; 13 one year 5 per cent Treasury notes, amounting to \$160; 77 three year 6 per cent compound interest notes, amounting to \$1,360, and 13,875 pieces of United States fractional currency, amounting to \$3,019.93; in the aggregate, number of notes and pieces, 52,894,507, and in aggregate amount, \$255,816,859.93.

Statistical matter counted and prepared for destruction in committee, as shown, gives 1,543,447 sheets, containing 581,993,573 postage stamps of various denominations; 874,129 sheets containing 38,265,103 internal revenue stamps; 10,043 sheets of customs stamps, and 569,276 sheets of United States notes, Treasury notes of 1890, silver certificates, miscellaneous matter, and United States and District of Columbia bonds as having been counted and destroyed within the past fiscal year.

A recapitulation of the statement of issues and redemptions in numbers, denominations, and amounts of United States interest-bearing notes and certificates redeemed and outstanding to June 30, 1895, shows that according to the records there are still outstanding the following amounts of each class of securities given: Seven-thirty notes, issued under various acts, \$137,750; one-year 5 per cent Treasury notes, act of March 3, 1863, \$32,275; two-year 5 per cent Treasury notes, act of March 3, 1863, \$27,650; three-year 6 per cent compound-interest notes, acts of March 3, 1863, and June 30, 1864, \$172,210; gold certificates, act of March 3, 1863, various issues, \$236,120; certificates of indebtedness, acts of March 1 and 17, 1862, and March 3, 1863, \$3,000; 3 per cent certificates, acts of March 2, 1867, and July 25, 1868, \$5,000, and 4 per cent refunding certificates, act of February 26, 1879, \$54,300.

Prior to the transfer of the files, October 1, 1894, the following work, covering a period of three months, was performed in the division:

Current accounts received and registered, 9,199; pages of transcript made for suits in court, 592; pages certified for suits, 1,283; number of cases of transcript matter, 29; accounts withdrawn from the files, 5,824; accounts filed, 16,226; revenue stamp books received, cut, and filed, 8,117; old accounts rearranged, 85,946; accounts and vouchers numbered, 203,700, and accounts charged and credited, 4,002.

During the year and in the line of old work performed at intervals, 2,273,905 coupons were restrapped with copper wire, and 3,633,671

reboxed and relabeled.

Certificates of deposit, act of June 8, 1872, recounted and scheduled, 117,596; certificates of indebtedness recounted and scheduled, 258,517; gold certificates, act of March 3, 1863, recounted and scheduled, 194,686; certificates of deposit of temporary loan, February 25, 1862, recounted and compared, 63,500; scheduled and reports placed on certificates, 3,638. Examining records for outstanding numbers and denominations of United States bonds—pages examined, 35,858, containing an aggregate number of 1,792,900 entries; also, a final recount and comparison with schedules of 932,902 coupon bonds having 32,150,972 coupons attached.

Respectfully yours,

J. FOUNT. TILLMAN, Register.

The Secretary of the Treasury.

Note.—Until February, 1867, no comptroller's schedules were received with these coupons, and recent references to those received prior to that date indicate that they were not accurately classified under their respective loans, but it is believed that in aggregate number and face value this statement is in the main correct.

XI.—Number and Amount of Exchanged, Redeemed, and Transferred Coupon Bonds of the United States and the District of Columbia Examined, Counted, Entered in Blotters, Transferred to Numerical Registers, and Scheduled in Duplicate during the Fiscal Year ending June 30, 1895.

[E.—Exchanges; i. e., conversions into registered bonds. R.—Redemptions; i. e., paid at maturity or under "calls," T.—Transfers; i. e., exchange of a perfect for a mutilated bond, or of large denominations for smaller ones, or vice versa.]

### REPORT OF THE COMPTROLLER OF THE TREASURY.

TREASURY DEPARTMENT,
OFFICE OF COMPTROLLER OF THE TREASURY,
Washington, October 25, 1895.

SIR: In compliance with the request contained in your letter of September 10, 1895, I have the honor to submit the following report of the business transacted in this office since October 1, 1894, and in the office of the First Comptroller from July 1 to September 30, 1894, being the entire work for the fiscal year ending June 30, 1895.

#### WARRANTS.

On account of the radical change made in the duties of this office by the provisions of the act of July 31, 1894, which went into effect October 1, 1894, the statements of the work performed in this office as above given have in part been divided into two periods: the first, from July 1 to September 30, covering the period during which accounts settled by the First and Fifth Auditors of the Treasury and the Commissioner of the General Land Office were subject to a detailed revision by the Comptroller under the laws existing before the change made by the so-called "Dockery" act of July 31, 1894, went into effect; the second period, from October 1, 1894, to June 30, 1895, the end of the fiscal year, represents the work performed by this office under the new law, but also contains a statement of the accounts remaining on hand unsettled on September 30, 1894, in the offices of the First Comptroller, the Second Comptroller, and the Commissioner of Customs, and which, by the provisions of section 21 of the act of July 31, 1894, were required to be revised by the Comptroller of the Treasury in the manner in which such accounts were revised in those offices.

As a necessary result, the detailed statement of the work above given does not indicate the work of this office under normal conditions. Of the old accounts remaining on hand June 30, 1895, unadjusted, some have since been settled, and all remained unadjusted for special reasons which rendered their settlement then impossible. Settlement of some was withheld waiting for the decisions of the Court of Claims in cases referred to that court for the establishment of precedents which

would govern in the settlement of the withheld accounts.

Experience of the operation of the new system of accounting during the past year confirms, in my opinion, the wisdom of its adoption. Greater expedition in the settlement of the public accounts has been accomplished, and at the same time nothing indicates that any accuracy

in the settlement has been lost.

In many cases, disputed points between claimants and the accounting officers, having been brought to the personal attention of the Comptroller or the Assistant Comptroller, have been settled by the delivery of opinions giving fully the reasons for the action of the accounting officers. This is rendered possible under the present system, because the time of the Comptroller and the Assistant Comptroller is not taken

up with the mass of detail work formerly required.

The provision authorizing disbursing officers or the head of an executive department or other establishment not under one of the executive departments to apply to the Comptroller for a decision upon any question involving a payment to be made by or under them before such payment has been actually made has proved very satisfactory in practice. Disbursing officers, as they become more familiar with the operation of this clause of the act, are likely to avail themselves of it more frequently, and consequently difficulties in the subsequent settlement of their accounts will be prevented, the doubtful points having been settled before the rendition of the accounts. It also follows that the number of appeals in consequence thereof will be lessened.

Another decided benefit accomplished by the new system of accounting is the uniformity brought about by the change which made the office of the Comptroller of the Treasury the sole chief accounting office, instead of the three offices of the First Comptroller, Second

Comptroller, and Commissioner of Customs previously existing.

I can unhesitatingly confirm the conclusions reached in my special report to you of February 19, 1895, as follows:

I have every reason to believe, therefore, that time will show the merit and practicability of the new system of transacting the official business assigned to the office of the Comptroller of the Treasury, and justify fully the changes made in the accounting system of the Government.

As a detailed revision of accounts is no longer made by this office, no particular recommendations are made, such recommendations coming more properly from the various auditors upon difficulties experienced by them. Previous recommendations in regard to the accounts of the officers of the United States courts are, however, renewed, viz: That a system of salaries with fixed allowance for expenses in lieu of the present fee system be established, and that in case such change is not made, provision be made for the payment of the fees of these officers earned in civil suits on account of the postal service from the regular appropriation for the payment of their fees, and not from the revenues of the postal service, as has heretofore been the case, and that the jurisdiction of the district and circuit courts of the United States, concurrent with that of the Court of Claims, upon suits brought by these officers, be taken away, and that the jurisdiction of the Court of Claims in such cases be made exclusive; or, at least, that an appeal to the Supreme Court from the circuit courts of appeals be granted to the Government in all cases, as is now the law in regard to appeals from the Court of Claims.

For the reasons stated in my last annual report, it is extremely desirable to obtain from Congress a definition of the words "permanent specific appropriations."

Respectfully, yours,

R. B. Bowler, Comptroller.

The SECRETARY OF THE TREASURY.

## REPORT OF THE AUDITOR FOR THE TREASURY DEPARTMENT.

TREASURY DEPARTMENT,

OFFICE OF THE AUDITOR FOR THE TREASURY DEPARTMENT, November 16, 1895.

SIR: I have the honor to submit my report of the transaction of business in the office of the First Auditor of the Treasury for the three months of the fiscal year 1895 ending September 30, 1894, and in the office of the Auditor for the Treasury Department for the nine months of the fiscal year 1895, beginning October 1, 1894, and ending June 30, 1895.

By the act of Congress approved July 31, 1894, the title of the First Auditor of the Treasury was changed to that of Auditor for the Treasury Department, and all business pertaining to the Executive Departments, other than the Treasury, and to offices and bureaus not under any Executive Department, theretofore settled in the office of the First Auditor, was transferred October 1, 1894, to the respective auditors designated by said act, and all business relating to the accounts of collectors of internal revenue, theretofore settled by the Eifth Auditor, was on said date transferred to this office. The Auditor for the Treasury Department is now charged only with the settlement of accounts pertaining to the Treasury Department.

The office of First Auditor existed from September 2, 1789, to September 30, 1894, it being designated as Auditor of the Treasury until March 3, 1817, when the offices of the Second, Third, Fourth, and Fifth Auditors were created, and the title of this office changed to that of First Auditor. The following persons have held the office of First Auditor from 1789 to 1894, when the title was changed:

Name.	Whence appointed.	When appointed.
William Smith. Richard Harrison. Jesse Miller Tully R. Wise	Connecticut Maryland Virginia Pennsylvania Virginia	July 16, 1791 Nov. 29, 1791 Nov. 1, 1830 June 17, 1842
John C. Clark. Thomas L. Smith. David W. Mahon R. M. Reynolds James Q. Chenoweth.		Aug. 2, 1849 Oct. 31, 1849 Dec. 19, 1871 Apr. 16, 1878 May 1, 1889
George P. Fisher. Ernest P. Baldwin	Delaware Maryland	June 2, 1889 Mar. 27, 1899

The act of September 11, 1789, made appropriation for an Auditor, chief clerk, and such additional clerks as might be necessary. In 1820 the total force of the office was 15; in 1830, 13; in 1841, 15; in 1851, 20; 586

in 1861, 30; in 1871, 41; in 1881, 60, and in 1891, 63, which was the number on September 30, 1894, when the designation of the office was

changed.

The present force of the office consists of 1 Auditor, 1 deputy auditor, 1 law clerk, 4 chiefs of division, 90 clerks, and 7 assistant messengers and laborers; total, 104.

#### CONDITION OF BUSINESS.

The condition of public business in this office at the close of the fiscal year 1895 was highly satisfactory. Of the 774 accounts remaining on hand, as shown on page 23 of this report, only three were received prior to the quarter then ended, and it was not possible for this office to adjust these in the condition in which they then were. All of the other accounts on hand were of the class that are received monthly and are stated quarterly, or were awaiting warrants or information required for their adjustment.

To state the case briefly, at the close of the fiscal year 1895 there was not then pending in this office an account that could have been settled, and there was not an item of business that could have been transacted.

#### COMPARISON OF OLD AND NEW SYSTEMS OF AUDITING.

From a practical knowledge of the system of accounting in practice prior to October 1, 1894, and of that substituted on that date and now in force, I am satisfied that the new system is a great improvement, as it is fully as accurate, much safer, and certainly more expeditious in the dispatch of business.

Under the old system, at the close of the fiscal year 1894 there were pending in this office, and in the revising offices of the First Comptroller and Commissioner of Customs, not fewer than 2,000 unsettled accounts,

some of which were not adjusted for months thereafter.

Under the new system, at the close of the fiscal year 1895 no officer or claimant had pending an account or claim which could have been audited and settled.

#### PROMPT RENDITION OF ACCOUNTS.

The requirement that no requisition of a disbursing officer for the allowance of money shall be honored by the Auditor if the officer has failed to render his accounts within the time fixed for their rendition has had the effect of making officers prompt in presenting their accounts for settlement. Prior to the passage of the present law the Auditor had no power to compel prompt settlements.

There have been under the new law few failures to render accounts within the time fixed by law, and these few delays were caused by the fact that it was a physical impossibility to render them in the time required, and the Secretary of the Treasury has waived the delinquencies.

# ACCOUNTABILITY OF COLLECTORS FOR MERCHANDISE.

Prior to July 1, 1895, the Treasury Department was not informed of the arrival of a vessel, car, or vehicle with dutiable merchandise from a foreign country, and (except at the ports of Boston, New York, Philadelphia, Baltimore, New Orleans, and San Francisco, at which there are naval officers) had no means of determining that the collectors accounted for and collected the duty on all merchandise received into their custody. From the year 1789 to 1895 there was no check on collectors of customs

and officers acting as such, except such examination of their offices as could be given by special agents of the Treasury Department.

From and after July 1, 1895, each master of a vessel and conductor of a car or other vehicle bringing into this country merchandise, whether free or dutiable, is required to forward to this office a copy of the manifest of his vessel, car, or vehicle, showing all merchandise therein, and when he makes entry of the vessel, car, or vehicle at the custom house he must make affidavit that he has mailed such copy, and that the same is true and correct. The collectors of customs are required to forward to the Auditor a copy of each manifest filed with them and to note thereon the disposition of each item of cargo. These two copies of the manifest are compared in this office and the reported disposition is verified by comparison with the accounts of the collector. By this system, it is believed, it will be impossible for a collector to receive into his possession a package of merchandise that is shown on a manifest and fail to collect and account for the duties thereon without being detected and held accountable by this office.

#### VERIFICATION OF ENTRIES.

Not since the foundation of the Government has the Treasury Department known that all collectors of customs have collected the correct rate and amount of duty on merchandise coming into their possession. At the six ports at which there are naval officers who examine the entries, invoices, and certificates of the gaugers, weighers, and measurers, this fact is ascertained; but at the 156 ports at which such officers are not stationed there has been no check. Heretofore the Auditor and Commissioner of Customs have been compelled to rely upon the reports made by the collectors, and were without any evidence to verify or disprove the accounts as rendered.

The invoice of the merchandise, showing the articles and the declared value, and the action of the appraiser fixing the value thereof, and of the collector as to the classification, were not furnished. Even the certificates of the officers who ascertained the quantity were retained by the collectors. There was absolutely no possibility of the accounting officer detecting error or fraud, unless the same appeared on the face of

the accounts of the collectors as rendered for settlement.

This has all been changed, and, beginning with the present fiscal year, collectors of customs and officers acting as such, except at the six ports at which there are naval officers, will be required to send to the appraiser the original invoice filed by the consignee when making entry of merchandise and the triplicate of the same received from the American consul, and the appraiser is required to make his appraisement and suggested classification on each and return them to the collector.

The officer who ascertains the quantity of merchandise entered will make his return in duplicate. The liquidating clerk in the office of the collector will note his liquidation of the entries on the face thereof, and, after attaching the original invoice and the certificate of the gauger, weigher, or measurer to the entry, will forward them to this office for verification.

This must be done at the close of business each day, so that the auditing of collector's accounts will be facilitated. When this office is in possession of these papers it can ascertain with accuracy that the correct rate and amount of duty has been collected and deposited by the collector. None but the most experienced clerks in this office will be allowed to verify these entries.

I am clearly of the opinion that by the new system of requiring the manifests, invoices, and findings of appraisers, gaugers, weighers, and measurers to be sent to this office the absolute accountability of collectors of customs for property coming into their possession and the collection of the correct duty thereon will be established.

No letters of transmittal or of acknowledgment are required or sent, and no record of the receipt of these papers is kept; yet by the system of boxes or pigeonholes devised for this purpose they are separated and placed in order and the absence of any paper is quickly detected. This system saves many clerks and much labor.

#### MERCHANDISE UNDER CONSULAR SEAL.

A new system has been devised for accounting for all merchandise arriving under consular seal. The American consuls in contiguous foreign territory have been instructed by the Secretary of State, at the request of the Secretary of the Treasury, to make all manifests of cars sealed by them and destined for this country in five parts instead of four, as heretofore, and the fifth part is now forwarded by the consulto this office. By its receipt this office is informed of the sealing and departure of the car. When the car arrives at the port of first arrival and is entered, an additional copy of the entry is made by the collector and forwarded to this office with the information as to port of destina-On arrival of the car at the port of destination the collector is required to acknowledge its receipt and report the disposition of the merchandise contained therein. If there is any discrepancy in the reports of the contents of the car, or if there is a failure to report the arrival, the matter is promptly investigated by this office. It is now considered impossible for a car to arrive in this country and the contents not be duly entered and accounted for. Heretofore there has existed no method of detecting error and fraud in this class of importations, except the uncertain and doubtful one of having examinations made by special agents of the Treasury.

I take pleasure in expressing to you my appreciation of the intelligence and diligence of the deputy auditor, Hon. Robert M. Cousar; the law clerk, Mr. J. C. L. Gudger; the chiefs of division. Messrs. J. G. Dill, Chester E. Rees, T. O. W. Roberts, and C. E. Fitzsimons, and the clerks and other employees, who have so zealously worked for the advancement

of the office and the correct dispatch of public business.

Appended hereto are the following exhibits:

EXHIBIT A.—Work performed in the office of the First Auditor for

the three months ending September 30, 1894.

EXHIBIT B.—Work performed in the office of the Auditor for the Treasury Department for the nine months from October 1, 1894, to June 30, 1895.

EXHIBIT C.—Merchandise transported without appraisement during

the fiscal year 1895.

Respectfully, yours,

E. P. BALDWIN, Auditor for the Treasury Department.

# APPENDIX.

# REPORT OF THE AUDITOR FOR THE WAR DEPARTMENT.

TREASURY DEPARTMENT;
OFFICE: OF AUDITOR FOR WAR DEPARTMENT;
Washington, D. C., September 30, 1895.

Sir: I have the honor to submit the following annual report, showing the details of the work performed in this office during the fiscal year

ending June 30, 1895.

An Act of Cougress making appropriations for the legislative, executive, and judicial expenses of the Government approved July 31, 1894, made certain changes in the methods of accounting in the Treasury, to take effect October 1, 1894, and the duties of the Second Auditor, designated therein as the "Auditor for the War Department," were changed to some extent, as shown in the provisions of the following extract from section 7 of said act:

"Second. The Auditor for the War Department shall receive and examine all accounts of salaries and incidental expenses of the office of the Secretary of War and all bureaus and offices under his direction; all accounts relating to the military establishment, atmories and arsenals, national cemeteries, fortifications, public buildings and grounds under the Chief of Engineers, rivers and larrbors, the Military Academy, and to all other business within the jurisdiction of the Department of War, and certify the balances arising thereon to the division of bookkeeping and warrants, and send forth with a copy of each certificate to the Secretary of War."

On October 1, 1894, this Bureau was reorganized to comply with the provisions of said act, and with some modifications since made the divisions of the office were constituted as follows: Pay and bounty division, mail and miscellaneous division, archives division, paymasters and claims division, military division, and review division. changes necessarily changed the work in some of the divisions. The work in the bookkeepers division in this office was transferred to the bookkeeping and warrants division in the office of the Secretary of the Treasury; the work in the Indian division in this office was transferred to the office of the Third Auditor, designated as the "Auditor for the Interior Department;" the work in the military division and the claims division in the Third Auditor's office was transferred to this office; the work of auditing all other accounts relating to or coming within the jurisdiction of the War Department previously done in the office of either of the other auditors was transferred to this office, and the seveeral classes of work transferred to this office by the above changes were assigned to the appropriate divisions in this office.

# DIVISIONS TRANSFERRED TO OTHER BUREAUS.

The work in the bookkeepers' division and the Indian division having been transferred to other bureaus on October 1, 1894, the following account given of the work done in said divisions only embraces the work

done in this office during the first three months of the fiscal year from July 1 to September 30, 1894, previous to their being transferred:

## BOOKKEEPER'S DIVISION.

The application of moneys appropriated for the Indian service, the Medical Department, Pay Department, Ordnance Department, expenses of the Commanding General's Office, contingencies of the Adjutant-General's Office, the Soldiers' Home, the National Home for Disabled Volunteer Soldiers, the Artillery School at Fortress Monroe, publication of Official Records of the War of the Rebellion, contingencies of the Military Establishment, etc., is indicated by the subjoined tabular statements of amounts drawn from the Treasury on requisitions of the Secretary of War and Secretary of the Interior, repayments of unexpended balances, and aggregate balances remaining in the Treasury on September 30, 1894.

pared by the clerks in this division during the three months of July, August, and September, 1894, previous to being transferred to the office of Auditor for the Interior Department.

## PRESENT DIVISIONS IN THIS BUREAU.

A brief statement of the duties performed by each of the several divisions in this Bureau as at present constituted is given, with a detailed report of the work performed by each division during the fiscal year, except the work in the military division and the claims section of the paymasters and claims division, the work in which is reported only from October 1, 1894, the date of transfer to this office from the Third Auditor's office.

## PAY AND BOUNTY DIVISION.

This division receives and examines all claims for arrears of pay and bounty, due soldiers or their heirs for services in the Army. These claims are entered in registers according to regiments or other organizations, and are then filed in the same order to await their turn for examination. After a claim has been reached, the soldier's military record having been obtained from the War Department, a transcript of all payments made to the soldier is procured from the archives division of this office. If nothing is found to be due, a disallowance is recommended and the case is sent to the review division, where it receives a

second audit, and after an agreement is reached between the two divisions, the disallowance is submitted to the Auditor for certification to the Secretary of the Treasury (division of bookkeeping and warrants).

When anything appears to be due from the United States, all necessary evidence as to identity, heirship, title, etc., is collected by this division, an itemized statement of the soldier's account is made, and all papers sent to the review division for reexamination. After the balance has been found it is certified to the division of bookkeeping, and warrants, and a copy of each certificate is sent to the Secretary of War. When the certificates have been issued the claims and accompanying papers are placed in the files of settled claims according to the number of the settlement. This division also investigates all cases of fraud, forgery, false personation of claimants, etc., and necessary steps are taken through the officers of the Department of Justice and otherwise to recover any moneys that may have been improperly drawn from the Treasury; and to punish the offenders.

The following tables show the work performed by this division during

the fiscal year ending June 30, 1895:

# EXAMINING BRANCH

Classes: of claims	Claims ponding July 1, 1894:	Claims: received:	Sent to settling branch.	Dis.	Referred claims pending. Une 30, 1895.
WHITE: SOLDIERS:		į.		,	
Commissioned officers and enlisted men, subsequent to April 13, 1861, arrears of pay and all bounties. Claims prior to April 14, 1861. Claims of laundresses, sutlers; tailors; etc.	23, 466 162 67	13, 165 61 23	5, 621 11 17	6, 849 48	4,796 11 19,365 11 153 20 44

#### SETTLING BRANCH.

Classes of claims.	Claims pending July 1, 1894:	Received from ex- amining branch	Settled L and allowed:		Referred else- where.	Claims- pending Jane 30, 1895.
WHITE SOLDIERS.	;				ì	i i
Commissioned officers and enlisted menusubsequent to April 13, 1801, arrears of pay and all bounties.  Claims prior to April 14, 1801.	481	5, 621: 11	5, 2677 111	1990	1	635
Claims of laundresses, sutlers, tailors, etc.		17:	17:			
COLORED SOLDIERS.	1:	f	ι.,			- A
Arrears of pay and bounty:	67	852:	854	24.	.†	41
Tötal	548	6,501	6, 149	223	1.	676

Number of claims settled and allowed during the year ending June 30,	
1895	
Amount involved in claims settled and allowed.	\$496, 473, 66
Whole number of claims disallowed and referred	16, 808
Total number of claims disposed of	22, 957
Number of claims pending June 30, 1895	25,173
Number of letters written and mailed during the year	167, 821

In addition to the 22,957 claims disposed of during the year ending June 30, 1895, there were 6,574 claims perfected by the examiners and transmitted to the additing branch for settlement. There were also 30,821 claims examined and suspended for material evidence.

The following table gives a comparative statement of the number of claims pending in the pay and bounty division at the end of each of the last four fiscal years, showing a gradual gain each year:

Number of claims pending.	Examining branch.	Settling branch.	Total.
June 30, 1892. June 30, 1893. June 30, 1894. June 30, 1895.	39, 146 32, 497	799 649 548 676	45, 511 39, 795 33, 045 25, 173

The work of the pay and bounty division is still about eighteen months behind, although the above tabulated statement shows that a gradual gain has been made on the back work during the last three years, the number of claims on hand having been reduced by 5,716 during the fiscal year ending June 30, 1893, and by 6,750 during the fiscal year ending June 30, 1894, and still further reduced by 7,872 during the last fiscal year, which has brought the work up to claims filed in 1894. At the same rate of gain on this back work it will require the present force at least four years to bring the work up to date, if as many new claims continue to be filed; but an increase of twenty-five clerks would enable this work to be brought up to date within two years, and I therefore respectfully recommend, as I recommended in my last annual report, that this increase of force be made, in order that all just claims for pay and bounty due to soldiers and to the families of deceased soldiers may be paid more promptly.

# MAIL AND MISCELLANEOUS DIVISION.

The duties of the mail and correspondence section of this division are to examine, stamp, and distribute all the incoming official mail matter and all papers received, including claims and accounts; to brief, jacket, and register all claims and important papers, additional evidence, etc.; to answer all letters which do not pertain to claims on file. All mail is promptly disposed of the same day as received. The work of briefing, jacketing, and registering claims and other matters has been promptly and satisfactorily done, although there has been a marked increase in the number of claims filed by soldiers, officers, and their legal heirs or representatives during the last fiscal year, so that the number received was more than five times as great on June 30, 1895, as it was at the beginning of the fiscal year 1894–95, and for some time previous thereto.

The duties of the property section of this division are to examine and settle clothing and camp and garrison equipage accounts of army officers and to keep proper files of such accounts, both settled and unsettled. Under the provisions of the act of Congress approved March 29, 1894, the War Department, on May 19, 1894, ceased sending such accounts to this office for reexamination and settlement, but subsequently it was deemed best by that Department to continue the practice of sending such returns to this office up to and including the end of the third quarter of the fiscal year 1893–94; consequently such practice was resumed July 19, 1894, and the examination of these returns has been made by this section, and is completed.

Under the provisions of an act of Congress approved July 31, 1894, this office was designated as the proper one in which all bonds and contracts pertaining to the business of the War Department should be filed; consequently this section was designated to receive, record, and file all official bonds of officers of the United States Army who disburse

सिरोप जेल

.91530

moneys, and also to record and file all contracts made under the supervision of the War Department pertaining to the Medical, Hospital, and Ordnance bureaus of said Department. It also answers calls made by the pay and bounty division of this office or by the officer concerned or his representative, and issues certificates as to the indebtedness or the nonindebtedness of regular and volunteer officers who served in the United States Army since March 3, 1817.

The duties of the inquiries and replies section of this division are to answer calls for information in regard to officers and enlisted men who served in the United States armies since July 1, 1815, from the Adjutant General of the Army, Record and Pension Office, Quartermaster General, Commissary-General of Subsistence, War Department, and the

Commissioner of Pensions.

The duties of the ordnance, medical, and miscellaneous section of this division are to settle the accounts of disbursing officers of the Army sent to this office by the War Department, pertaining to ordnance, medical, and hospital appropriations, contingencies of the Army, and salaries of officers and employees of the War Department; also to settle the accounts of the National Home for Disabled Volunteer Soldiers and all the accounts of the disbursing clerk of the War Department; also claims of a miscellaneous character, such as claims under special acts of Congress, claims for material furnished the Ordnance Department, for refundment of bounty money taken from soldiers under General Order 305 of 1864, for refundment of money erroneously paid to secure exemption from draft, etc. Accounts and claims pertaining to Ordnance and Medical bureaus, contingencies of the Army, expenses of the Commanding General's office, contingencies Headquarters Military Department, War Department, regular and volunteer recruiting, local bounty, National Home for Disabled Volunteer Soldiers, special acts of relief by Congress, etc., were adjusted in this section, and represented an expenditure of \$9,450,437.05. There were eighty separate appropriations involved in the settlement of these accounts and claims.

The work of the division is nearly up to date, and the current work

is promptly disposed of.

The following is a summary of the work performed in the division during the fiscal year:

Classes of work.	On hand July 1, 1894.	Received.	Total.	Disposed of.	On hand June 30, 1895

## ARCHIVES DIVISION:

This division has charge of the files of all accounts of Army paymasters; which have ever been settled by the Second Auditor and Second Comptroller; book, records of payments to regiments, batteries, and other independent organizations, detachments, hospitals, paroled prisoners of war, recruiting parties, and all other separate commands; also book records of payments to officers of the volunteer service and to volunteer enlisted men who were discharged before the expiration of their terms of service, and the card indexes of payments to enlisted men absent from their regular commands.

The principal duties assigned to this division are to withdraw from the files such vouchers as are required by other divisions and return them to their proper places when no longer required; to furnish the pay and bounty division with abstracts from the book records of payments to volunteer officers and with transcripts of the paymasters' accounts for use in the settlement of claims for arrears of pay and bounty; to furnish information from the card indexes relative to payments made to enlisted men who were not paid on the regular pay rolls of their commands, and to copy or repair worn and defaced muster and pay rolls.

The following is a record of work performed during the fiscal year:

## PAYMASTERS AND CLAIMS DIVISION.

The duties of this division are to audit and adjust the accounts of Army paymasters; to state accounts in favor of the Soldiers' Home for the mouthly contributions of 12½ cents by enlisted men of the Army, court-martial fines, forfeitures by desertion, etc.; to keep a record of deposits by and repayments to enlisted men; to determine the longevity status of officers of the Army; to raise charges against officers for overpayments, erroneous musters, etc., and to make such settlements of a miscellaneous character as are incidental to the general work of the division. The book records of payments to officers of the Regular Army are kept in this division, and transcripts from said records are furnished when required by other divisions.

In the claims section of this division the following classes of claims are audited: Claim's growing out of contracts made by the officers of the Quartermaster's, Commissary, and Engineer Departments; claims for vessels lost in the military service under act of March 3, 1849, and not barred by subsequent legislation; claims for the value of horses under the act of March 3, 1849, not barred, and for the value of horses taken from soldiers or turned over under orders; claims growing out of the Oregon and Washington Indian wars of 1855 and 1856; State war claims; claims for transporting troops and supplies for the Army and supplies for homes of disabled volunteers on the lines of the bondaided railroads and for services on other railroads where the evidence is not sufficient to warrant payment by disbursing officers of the Army; claims which can not be paid by disbursing officers for want of funds; claims for occupation of real estate by the Army; claims of officers and men of the Army for destruction of private property under the act of March 3, 1885; claims for commutation of rations to soldiers on furlough and while prisoners of war, for pay for extra-duty service, commutation of firel and quarters and for travel pay while under orders.

#### ACCOUNTS.

Number on hand July 1, 1894.  Number received during the year.	
Number to be accounted for.  Number examined during the year	
Number on hand June 30, 1895	9

On the 30th of June, 1895, the accounts of Army paymasters were rendered to this office to include May, 1895. Said accounts have been settled to include March, 1895, and the balances certified to the Secretary of the Treasury. All of the April accounts and two-thirds of those for May have been examined.

The amount disbursed in accounts examined was \$18,559,188.73.

#### MILITARY DIVISION.

The duties of this division are to examine and adjust all accounts of army engineers, army quartermasters, and officers of subsistence.

Engineer officers' accounts embrace all expenditures for sites and materials for fortifications and for seacoast defenses, together with their maintenance and repair, all river and harbor improvements, and surveys of streams and lakes throughout the United States.

Quartermasters' accounts cover payments on account of barracks, hospitals, storehouses, clothing for troops and for their transportation, and for all supplies that may be necessary for the Army in camp or in the field.

Subsistence accounts represent expenditures for supplying the Army with provisions.

In addition to the accounts above enumerated the division settles the accounts of the Signal Service, accounts of the Military Academy at West Point, accounts for the maintenance and repair of military telegraphs and the military prison at Fort Leavenworth, Kans., the accounts for improvement of buildings and grounds in the District of Columbia, and those of the Yellowstone Park.

These settlements aggregate above \$40,000,000 annually. More than 10,000 accounts have to be stated to represent them and more than 500,000 you chers are examined in connection with them each year.

## REVIEW DIVISION

This division was created on October 1, 1894. Its organization was made necessary on account of the changes in the methods of accounting in the Treasury by the act of July 31, 1894. By that act the office of the Second Comptroller, which had previously revised all work of this office, was abolished, the second examination of disbursing officers'

accounts which receive administrative action being considered unnecessary; but to guard against the possibility of collusion or carelessness in the settlement of claims which have not had a previous examination and approval by an administrative department, section 14 provided that "the auditor shall cause them to be examined by two of his subordinates, independently of each other."

In Report No. 637, H. R., Fifty-third Congress, second session, page 14, in this connection it was recommended that, in the case of claims not passed upon by an administrative officer; the auditor for the Government's protection should have such claims passed through two divisions of his office, making the joint action of both divisions necessary to complete the audit. The greater portion of the work of this office consists in the examination and settlement of these original claims, filed here in the first instance by the claimants, and the review division was established for the purpose of making the second audit required by law in these cases:

The same amount of clerical labor and scrutiny is given to these original claims which do not receive administrative action that they received under the former system; and the Government has as much protection, while the work is facilitated by reason of being under the jurisdiction of one office; where the records are more readily accessible for reference, and for the further reason that we are now enabled to dispense with a great deal of official correspondence that was necessary under the old regime.

The following is a record of the work performed by this division from the date of its organization to the end of the fiscal year:

, its., is	Character of claims audited and passed.	For allow- ance.	For dist
Söldiers: pay an Miscellaneous (i	d bonnty neluding horse claims; etc.)	4,094 551	5, 368 569
Total		4, 645	5,937

Reference is made to the report of work in the pay and bounty division and the paymasters' and claims division, who audited these claims in the first instance, for fuller information in reference thereto.

A record is also kept of the data contained in the annual report of the Auditor, annual and other estimates, and such reports or information as this office may be required to furnish to Congress or any of the Departments.

The following statement shows the amounts disbursed, per requisition of the War Department, for the nine months ending June 30, 1895:

1894.	
October	\$6, 284, 382, 77
November	3: 850, 736, 51
December	
1895. January	3, 939, 013, 62
February	3, 729, 195, 65
March	4, 082, 382, 28
April	4, 641, 237, 54
May	4, 536, 821, 26
June	2, 670, 222, 40
· · · · · · · · · · · · · · · · · · ·	

The total number of requisitions for the same period was 1,690.

There were 35 requisitions suspended for delinquency in failing to forward accounts within the time prescribed by law, until such delinquencies were waived, as follows:

		· · · · ·	
1894.	,	•	
October		· • • • • • • • • • • • • • • • • • • •	0
1894. October November			
December	• • • • • • • • • • • • • • • • • • • •	•	9
1895.			
January			5
February			5
March			8
April			
May			1
June			

Of these 35 suspended requisitions there were 27 on account of delinquencies on the part of disbursing officers, 7 on the part of the administrative department, and 1 on the part of both the disbursing officer and the administrative department. The former 27 delinquencies were waived by the Secretary of the Treasury and the remaining 8 were waived by the President.

It affords me pleasure to state that the clerical force and other employees of this Bureau have discharged their duties faithfully and efficiently, and, notwithstanding the increase of work caused by the reorganization of the Bureau in consequence of the charge in the method of accounting in the Treasury required by recent legislation, the business of the office is being satisfactorily conducted under the new system of accounting, and the work is nearer up to date than it has been for many years.

Very respectfully.

T. STOBO FARROW,
Auditor för the War Department.

The Secretary of the Treasury.

# REPORT OF THE AUDITOR FOR THE INTERIOR DEPARTMENT.

TREASURY DEPARTMENT, OFFICE OF THE AUDITOR FOR THE INTERIOR DEPARTMENT, September 19, 1895.

SIR: I have the honor to submit herewith the annual report of this Bureau for the fiscal year ending June 30, 1895. The following statement shows, in tabular form, the number of accounts and claims and amounts involved on hand July 1, 1894; received and settled during the fiscal year; transferred to the Auditor for the War Department October 1, 1894, and remaining unsettled in this office June 30, 1895. The total number of accounts and claims settled during the year was 20,877, involving \$165,130,364.30.

#### MILITARY DIVISION, THIRD AUDITOR'S OFFICE.

This division examined and adjusted the money accounts and property returns pertaining to the Quartermaster's Department, Subsistence Department, Corps of Engineers, Military Academy, Military Prison, Mackinac National Park, Chickamauga and Chattanooga National Park, surveys of battlefields, and such other accounts of the War Department as were required by law to be settled in the office of the Third Auditor.

Remaining on hand	4, 722	17, 028, 587. 67

#### RECAPITULATION-Continued.

On hand	Letters written         7, 242           Vonchers-examined         159, 873           Pages MSS, written         7, 130           Clerks, employed         26           Calls, answered         395           Letters registered         699           Accounts-examined         8, 118           Names indexed         520
---------	---

It will be observed from the above table that there were on hand July 1, 1894, 3,645 accounts involving \$14,459,529.23, and 2,243 accounts involving \$7,685,944.50 were received during the quarter, making a total of 5,888 accounts involving \$22,145,473.73. There were settled during the quarter 1,166 accounts involving \$5,116,886.06. There remained on hand 4,722 accounts involving \$17,028,587.67, and 45 supplemental settlements in which were involved \$3,520.60.

As the act of July 31, 1894, transferred the business of adjusting Army accounts to the office of the Auditor for the War Department, efforts were made to get the business in as good shape as possible for the transfer. With that end in view, and knowing there were a much larger number of settlements made by this division awaiting the action of the Second Comptroller than could possibly be revised prior to the 1st of October, no settlements were completed subsequent to September 15. However, a very large number of accounts were thoroughly examined, and were ready for statement by the Auditor for the War Department; also in many other accounts computations were made testing the arithmetical correctness of the vouchers—148,714 vouchers, aggregating \$3,941,471.22 in 711 accounts, were thus examined. In the accounts settled there were 159,873 vouchers.

The act of March 29, 1894, having provided that army property returns rendered subsequent thereto should be settled by the War Department instead of the Treasury Department, strenuous efforts were made to settle all property returns in this office prior to the transfer of the business. At the same time the War Department put an extra force on the examination of property returns in that Department for the period prior to March 31, 1894, so as to have all such returns pending in this office before the end of the quarter. All property returns on hand July 31 were settled, and where discrepancies were found the interested officers were duly notified.

To fully appreciate the magnitude of what was accomplished in the settlement of these property returns alone, reference should be made to the following table:

Property returns on hand July 31, 1894	1,480
Property returns received during quarter ending September 30	4,,358
Property returns settled during quarter ending September 30	5,,838
Froperty returns settled during the fiscal year 1894	6,040

#### CLAIMS DIVISION, THIRD AUDITOR'S OFFICE.

To this division was assigned the examination of all claims within the jurisdiction of the Third Auditor's Office, except claims payable from pension funds. They included claims for supplies purchased or appropriated for the Army; for the transportation and telegraphic service of the Army; for the purchase, hire, or appropriation of boats, cars, engines, horses, mules, wagons, or other means of army transportation; for the value of property of citizens, or officers and soldiers, lost in the military service; for mileage, traveling expenses, commuta-

tions, and other allowances to officers or soldiers of the Army; claims of States for reimbursement, under various acts, of the expenses incurred in raising and furnishing volunteers or militia for United States service; claims growing out of various Indian wars; claims under special acts of Congress; also, the preparation of evidence called for in cases in the Court of Claims or before Congress.

The foregoing table represents the number of claims actually disposed of in the division for the time specified, but does not represent the amount of work done in it. Only such claims as were current business were sent to the Second Comptroller after August 15, 1894. This was done in order that he might be as near up with the work of his office as possible on October 1, 1894, at which time the office was abolished. A great many claims were examined and prepared for statement during the time from August 15, 1894, to October 1, 1894. As the entire division and its files were removed to the office of the Auditor for the War Department (Winder Building) October 1, 1894, some little time was necessarily consumed in making preparation and removing the files.

# INDIAN DIVISION, OFFICE OF THE AUDITOR FOR THE INTERIOR DEPARTMENT.

This division was formerly in the office of the Second Auditor of the Treasury, and was transferred to this office October 1, 1894, by the act of July 31, 1894.

The general duties of the division are to examine and state the cash accounts of Indian agents and other disbursing officers of the Indian service, and to keep records of contracts for supplies, so that any article can be traced from its place of purchase to its destination, and the fulfillment of the contract can be ascertained. It also audits the claims of contractors for supplies, and claims of contractors for the transportation of the same, claims of employees of the Indian service, and others, for services rendered and supplies furnished by open-market purchase. The property accounts of Indian agents to and including the quarter ended March 31, 1894, were finally settled in this division. The act of March 29, 1894, requires these property accounts to receive final settlement in the Interior Department, so that hereafter they will not come to this office.

Such information and documentary evidence as is found in the files bearing upon suits against the United States is furnished to the Attorney-General and the proper courts by this division, and transcripts of the accounts of disbursing officers are also furnished in cases where it is necessary to bring suit for the recovery of balances found due to the Government.

The total number of disbursing officers in the Indian service whose accounts were examined and settled in this division in the last fiscal year is as follows:

Agents	56
Agents, special	5
Inspectors	5
General superintendent of schools	
School superintendents	
Supervisors of Indian schools	
Allotting agents	
Disbursing officers, special commissions	<b>7</b>
Land examiners	<b>2</b>
Governor of Alaska	1
Examiner of surveys	
Secretary of board of Indian commissions	
Superintendents of warehouses	
Receiving and shipping clerks	2
Others of a miscellaneous nature	8
Othors of a miscorranoous manuformation and a miscorrange and a mi	
m-4-1	100

The following tables exhibit the volume of work done from October 1, 1894, to June 30, 1895, compared with the same period of the previous year:

	Accounts.					
	Cash		Claims.			
	1893-94.	1894-95.	1893-94-	1894-95.		
On hand October 1	612 809	644 1, 261	337 3, 972	228 4, 880

Remaining on hand June 30	646	290	180	327		

	1893-94.	1894-95.
Disbursements allowed in agents accounts, Oct. 1 to June 30 Disbursements on account of claims, Oct. 1 to June 30	\$4, 366, 303, 96 3, 880, 834, 63:	\$7, 396, 491. 12 3, 683, 574. 43
Total	8, 247, 138. 59	11, 080, 065.55

The number of cash accounts received was 55 per cent more than last year, and the cash settlements increased 108 per cent. Also, the number of claims received increased 23 per cent, while said settlements increased 15 per cent. The total disbursements in both accounts and claims settled increased 34 per cent over the last fiscal year.

Under the head of "accounts" are included both the regular quarterly returns of officers and the "explanations" filed by them to remove suspensions, so that the actual status July I, 1895, may be exhibited thus:

	Cash.		Prop		
	Original accounts.		Original accounts.	Explana-	Total.

When the work of this division was transferred to the Auditor for the Interior Department there were many accounts that had been in the files for two years, due undoubtedly to a great extent to a constant annual increase in the Indian service during the last five years, without any increase in the clerical force of the division. It will be seen above that all the accounts in the division when transferred, and all received in the past nine months, were either examined and settled or in the hands of clerks under examination, excepting only 14 cash ac-In fact, the work of this division is so well in hand that the new work may quite truly be said to be current work, four weeks sufficing to settle every account now in the office.

The Dockery Act passed in the last Congress increased the work devolving on this division very materially. This increased work may be epitomized as follows:

There were 497 advance requisitions approved, amounting to \$4,608,055.78, 3,697 certificates copied, and the appropriations designated on 31 certificates of deposit. Other work accomplished is thus summarized:

	1893-94.	1894-95.
Number of letters written Oct. 1 to June 30. Number of pages copied Oct. 1 to June 30:	10, 190	5, 751 4, 807
Number of certificates copied! Number of transcripts furnished:		3, 697 6

The average number of clerks employed October 1, 1894, to June 30, 1895, was  $34\frac{4}{9}$ , against  $25\frac{8}{9}$  for the same period of previous year.

LAND, FILES, AND MISCELLANEOUS DIVISION, OFFICE OF THE AUDITOR FOR THE INTERIOR DEPARTMENT.

The following is a summary of the work performed in this division from October 1, 1894, the date of its creation under the act of July 31, 1894, reorganizing the accounting system of the Department, to June 30, 1895, inclusive. The division is charged with the settlement of the accounts of receivers of public moneys for receipts from sales of public and Indian lands and from other sources, their accounts as disbursing agents, the accounts of registers, United States surveyors-general, special disbursing agents. United States deputy surveyors and other officers of the public lands service, and all accounts for the receipts and expendithres on account of that service; the accounts of the disbursing clerk of the Interior Department, and of the disbursing officers of the Geological Survey, Patent Office, Census Office, Architect of the Capitol, Howard University, Government Hospital for the Insane, Columbia Institution for the Deaf and Dumb, and other general and special receiving and disbursing officers of the Interior Department, exclusive of pension agents and officers of the Indian Bureau.

The accounts above designated were, previous to October 1, 1894, adjusted in the offices of the First Comptroller, the First and Fifth Auditors, and it is therefore not practicable to show by comparison of any figures at my command the cost to the Government of the work done in this division and the progress therewith relatively to its per-

formance under the former system.

The work on hand July 1 could have been completed within the next succeeding ten days, a condition, especially with respect to the accounts of several of the disbursing officers of the Interior Department, without precedent in recent years. The division is also charged with the custody and handling of the files of the Bureau, in which work there are an average of two clerks and five laborers engaged. Much of the work done by the employees in the files section of the division in the arrangement and care of the immense number and variety of records in their custody can not be classified or very satisfactorily described in a report of this character.

In addition to the work performed in this section, as indicated in the table hereunder, there were segregated and delivered to the Auditor for the War Department 25,866 settled accounts of quartermasters, commissaries of subsistence, and engineers of the United States Army, miscellaneous papers relating to the military organizations of the State of Missouri in the late war, and certain California Indian war claims. There were also segregated and delivered to the Secretary of War, under the act of August 18, 1894, all of the military records of the War of the Revolution and of the war of 1812. In this work there were two clerks and two laborers engaged for eleven weeks.

#### BENEFICIARIES.

Their establishment or provisions for expenditures thereof under existing law is as follows:

THE GOVERNMENT HOSPITAL FOR THE INSANE,

This institution was established by act of Congress of March 3, 1855 (Stat. L., vol. 10, p. 682; Rev. Stat., secs. 4838 to 4858, inclusive). Some idea of the magnitude to which this institution has grown may be gathered from the following data:

The appropriations made therefor for the fiscal year ended June 30, 1895, aggregated \$388,240. There were \$25,486.10 received from private patients, making the total amount of funds available for the said

fiscal year, \$413,726.10.

The average number of persons employed during the fiscal year and their classification are as follows:

Classification of Employees of the Government Hospital for the Insane for the Fiscal Year ending June 30, 1895.

Class.	Num- ber.	Class.	Num- ber.

#### THE COLUMBIA INSTITUTION FOR THE DEAF AND DUMB.

This institution is not wholly supported by the Government, but is an independent corporation, chartered by Congress under act approved February 16, 1857 (Stat. L., vol. 11, p. 161), and aided by annual appropriations made by Congress.

Sections 4859 to 4869, inclusive, of the United States Revised Statutes relate to the establishment and general government of this institution. There was \$64,000 appropriated by Congress in aid of its

maintenance for the fiscal year ended June 30, 1895.

The average number of persons employed and paid from said appropriation is as follows:

Classification of Employees of the Columbia Institution for the Deaf and Dumb for the Fiscal Year ending June 30, 1895.

#### HOWARD UNIVERSITY.

This institution was established by act of Congress approved March 3, 1867 (Stat. L., vol. 14, p. 438), being an act of incorporation. Unlike the other beneficiaries, it renders no equivalent to the United States or District of Columbia for the moneys appropriated for its use. The annual appropriations therefor are pure gratuities.

The first appropriation made in aid of the university was by act of Congress approved March 3, 1879 (Stat. L., vol. 20, p. 404), \$10,000, one-half of which was to be charged to the District of Columbia. All subsequent appropriations were contained in sundry civil appropriations for the general expenses of the Government.

The appropriations for the fiscal year ended June 30, 1895, are as

follows:

Howard University, 1895: For maintenance of the Howard University, to be used in payment of part of the salaries of the officers, professors, teachers, and other regular employees of the university, the balance of which will be paid from donations and other sources, twenty-three thousand five hundred dollars. For tools, materials, wages of instructors, and other necessary expenses of the industrial department, three thousand dollars. For books for library, bookcases, shelving and fixtures, three hundred dollars. For books for the library of the law department, one thousand dollars. For material and apparatus for chemical, physical, and natural history and laboratory, two hundred dollars. For improvement of grounds, five hundred dollars. For repairs of buildings, one thousand dollars. In all, twenty-nine thousand five hundred dollars. (Sundry civil act of August 18, 1894)

\$29,500

MARYLAND INSTITUTION FOR THE INSTRUCTION OF THE BLIND.

The quarter yearly payments made to this institution are provided for by permanent appropriation under the provisions of law as exhibited by section 4869 of the Revised Statutes of the United States, as follows:

SEC. 4869. Whenever the Secretary of the Interior is satisfied, by evidence produced by the president of the Columbia Institution for the Instruction of the Deaf and Dumb, that any blind person of teachable age can not command the means to secure an education, he may cause such person to be instructed in some institution for the education of the blind, in Maryland, or some other State, at a cost not greater for each pupil then is, or may be for the time being, paid by such State, and to cause the same to be paid out of the Treasury of the United States.

COLLEGES FOR AGRICULTURE AND THE MECHANIC ARTS.

Under this head of appropriation payments are made annually to each State and Territory in accordance with the provisions of the act of Congress approved August 30, 1890, making permanent appropriation therefor. (Stat. L., vol. 26, p. 417.)

The last payments made on this account being for the fiscal year ending June 30, 1896, and the seventh annual payment, the sum paid to each of the 48 agricultural colleges was \$21,000, making a grand aggregate of \$1,008,000.

ARMY PENSION DIVISION, THIRD AUDITOR'S OFFICE AND ARMY AND NAVY PENSION DIVISION, OFFICE OF THE AUDITOR FOR THE INTERIOR DEPARTMENT.

The act of July 31, 1894, added largely to the duties and responsibilities of this division. The settlement of the Navy pension accounts, with all matters connected therewith, were under that act transferred from the office of the Fourth Auditor to this office, and became part of the duties of this division.

Claims payable from pension funds, such as reimbursements, reclamations, unindersed checks, etc., have no administrative examination, and, under section 14 of the act referred to, are required to undergo a second examination or revision in this office, which revision has required the services of three clerks. The act of March 2, 1895, "to

FI 95----41

provide for the payment of accrued pensions," opened up for consideration thousands of claims for reimbursement which had lain dormant since the promulgation of the decision of the Assistant Secretary of the Interior, dated September 28,1892, that such claims were payable in cases of soldier pensioners only, and has added largely to the number of new claims presented under that act, requiring the services in that branch of the work of four additional clerks.

These duties, together with the additional work necessary for keeping proper records under the new system and intelligently controlling the immense disbursements for pensions, have taxed to the fullest

extent the abilities of the clerical force of the division.

Notwithstanding these conditions, the work of examining and settling the accounts of the United States pension agents is in a very satisfactory condition.

At the close of the fiscal year the accounts of 6 of the 18 agencies had been settled to the latest date possible—the close of the quarter ended March 31, 1895; those of the remaining 12 were settled up to December 31, 1894, and the accounts of these for the succeeding quarter (to March 31, 1895) were under examination and nearly ready for settlement. Of the 610,622 vouchers which they contain 450,094 had been examined; leaving unexamined at the close of the year 160,528 vouchers of the March quarter (representing less than three weeks' work of the division), and 501,278 vouchers belonging in accounts for April and May, which accounts could not be settled until the accounts for June, completing the quarter, should be received.

Accounts of Pension Agents, including Supplemental Settlements; also Special Settlements, Accounts for Lost Checks, Reclaimed Checks, Examining Surgeons' Fees, Attorneys' Fees, etc., on hand July 1, 1894, Received and Audited during the Fiscal Year, and Remaining on Hand June 30, 1895.

#### REIMBURSEMENT SECTION (PENSION DIVISION).

Claims on hand July 1, 1894	$\frac{247}{3,630}$
Claims reported and passed during the fiscal year (amount involved,	3, 877
Claims reported and passed during the fiscal year (amount involved, \$56,914.15)	1, 650
Claims on hand June 30, 1895.	
Letters received	14, 487 6, 675
Reimbursement vouchers examined	12, 331 10, 177
Transcripts sent out.	7. 359

Thirteen claims were referred to the secret service division of this Department for investigation, which have all been returned with reports, the amount involved in the settlement of same being \$6,289.33 and the amount allowed \$3,292.40, resulting in a saving of \$2,996.93 at a total cost of investigation of \$1,691.82.

Of the 3,630 claims received during the fiscal year, nearly 3,000 were received from the Bureau of Pensions subsequent to the approval of the act of March 2, 1895, in which office they had been lying dormant from September 28, 1892, the Secretary of the Interior having on that date decided that section 4718 of the Revised Statutes did not apply to the cases of any pensioners excepting those who had been soldiers.

CONSOLIDATED STATEMENT, SHOWING WORK ON HAND AT DATE OF CONSOLIDATION OF AGENCIES, JULY 1, 1877, AMOUNT RECEIVED AND DISPOSED OF EACH FISCAL YEAR SINCE THAT DATE, AND AMOUNT REMAINING ON HAND AT CLOSE OF EACH FISCAL YEAR; ALSO, AVERAGE NUMBER OF CLERKS EMPLOYED EACH YEAR.

The transaction of the public business in this Bureau under the present accounting system of the Department (known as the Dockery law) as compared with the methods obtaining prior to October 1, 1894, is

respectfully submitted.

The results that evidence and emphasize in one important respect at least the superiority of the present over the former system of auditing the accounts now assigned to this Bureau are to be found in the unprecedented expedition with which these accounts are adjusted and certificates of settlements furnished.

Many and frequent inquiries made under the old system by disbursing officers anxious for information with respect to the settlement of their accounts and embarrassed for want of such advice occasioned a heavy correspondence, the uncertainty subjecting the honest disbursing officer and his sureties to more or less anxiety and apprehension, not to speak of the maximum risk to the Government involved, were some of the correspondences of such delays

the consequences of such delays.

The responsibility now imposed upon the Auditors with regard to advances of public moneys to disbursing officers whose accounts are being adjusted in the offices of such Auditors, and the conditions with respect to the rendition of accounts precedent to the Auditors' approval of requisitions for advances, are features of the existing system of procedure manifestly meritorious and conservative of the public interest.

The prompt transmission of accounts by disbursing officers and the prompt action by the administrative office which is required under the new system render it much easier to settle accounts than under the old

system.

From my standpoint, the new system possesses the merit of promptness, economy, and safety; is less cumbersome and more easily understood. It is modern and in harmony with the spirit of the age.

I am glad to be able to say that the work of the entire Bureau is

practically up to date.

The exhibit of the year's work is very gratifying. I am glad to testify that I have had the hearty cooperation of the Deputy Auditor, chiefs of division, and clerks in discharge of the very responsible duties of the office.

Respectfully,

SAMUEL BLACKWELL,
Auditor.

The SECRETARY OF THE TREASURY.

# REPORT OF THE AUDITOR FOR THE NAVY DEPARTMENT.

TREASURY DEPARTMENT,

OFFICE OF THE AUDITOR FOR THE NAVY DEPARTMENT, September 26, 1895.

SIR: I have the honor to submit the annual report of this Bureau for the fiscal year ended June 30, 1895.

The balances, liabilities, and payments under "Pay" and other appropriations are shown by the following statements:

STATEMENT OF APPROPRIATIONS, PAY OF NAVY AND PAY OF MARINE CORPS, 1895.

#### Pay of the Navy, 1895.

Balance in Treasury, as shown by ledger, June 30, 1895	\$1, 240, 543. 93 87, 541. 09
Total balance. The ascertained liabilities June 30, 1895, were as follows: Due and unpaid officers and men. 1\$680, 983. Due naval hospital fund 23, 603. Due clothing and small stores fund 137, 689. Due provisions, Navy 7, 026. Due on account of unpaid allotments 21, 690. Due general account of advances 500, 562.	22 56 72 39
Total liabilities	1, 371, 555. 51
Apparent deficiency.	56, 529. 51
Pay of the Marine Corps, 1895.	
Balance in Treasury, as shown by ledger, June 30, 1895	
Total balance. The ascertained liabilities June 30, 1895, were as follows: Due and unpaid officers and men. \$36, 461. Due naval hospital fund. 2, 316. Due clothing and small stores fund. 3, 861. Due general account of advances. 25, 003.	73 76 60
Total liabilities	67, 643. 95
Apparent available balance	5, 008. 51

<sup>1</sup>Partially estimated.

#### SPECIAL FISCAL AGENTS AT LONDON.

The contract with Messrs. August Belmont & Co., fiscal agents at London, provides as follows: A commission of one-half of 1 per cent to be paid on disbursements made by them on account of the Navy Department.

On daily balances in their hands they paid to the United States the rate of interest paid by the London joint stock banks, and on advances they received the rate charged by the Bank of England.

They have received the amount of \$7,215.56 as commissions under the above contract and \$553.17 as interest on advances. They have paid the United States \$327.04 as interest on daily credit balances. There has been a loss of \$2,371.18 in the transfer of funds from New York to London during the year.

## WORK OF THE OFFICE.

The following tables show a summary of the work performed in the different divisions of the office for the fiscal year:

#### RECAPITULATION.

Accounts and claims settled.	Number.	Vouchers examined.	Amounts allowed.
Disbursing officers' accounts settled. Transfer accounts settled. Railroad claims settled. Telegraph claims settled. General claims settled. Prize money claims settled. Grand total.	716 50 1,350 72	77, 830 1, 998 1, 413 50 7, 705 414 89, 410	\$31, 612, 608. 06 253, 636. 30 104, 835. 44 1, 954. 94 136, 934. 02 2, 172. 37 32, 112, 141. 13

So brief a period has elapsed since I entered upon the duties of the office that I shall not submit any recommendations.

I find that the work of the different divisons, so far as is practicable,

appears to be well up to date.

On June 30, 1895, 316 claims were on hand, which claims are awaiting additional evidence and decisions of the courts in similar cases.

This is a reduction of 312 as against the number remaining unsettled June 30, 1894.

June 30, 1894.

The settlements of the accounts of the disbursing officers are well up to date.

Wм. H. Pugh, Auditor.

The SECRETARY OF THE TREASURY.

## REPORT OF THE AUDITOR FOR THE STATE AND OTHER DEPART-MENTS.

TREASURY DEPARTMENT, OFFICE OF THE AUDITOR FOR THE STATE AND OTHER DEPARTMENTS, October 22, 1895.

SIR: In obedience to the request of Hon. C. S. Hamlin, Acting Secretary, under date of 11th ultimo, I herewith submit a report of the transactions of this office during the fiscal year 1895 and of the present

condition of the public business committed to my charge.

This office, which before October 1, 1894, was designated Office of the Fifth Auditor, was, by the act of July 31, 1894, reorganizing the accounting system, very materially changed as to its functions, and its work and personnel largely increased. The accounts of the Department of State are the only accounts formerly audited here which have been retained, while there have been added all accounts of the Departments of Justice and Agriculture and those of all the various boards, commissions, and other establishments of the Government, including the District of Columbia, not connected with any of the great Executive Departments; so that the settlements involve a remarkable variety of accounts, and some of much intricacy in adjustment, requiring very skillful accountants. I am pleased to report that the clerical force assigned to the office is thoroughly efficient and has been able to dispose of the work, so that, that upon which the force is now engaged is current work. This has been accomplished notwithstanding the fact that nearly half the clerks were employed during the first quarter after the reorganization upon the settlement of accounts awaiting adjustment in the office of the First Comptroller. The new system has generally worked satisfactorily, and the objects which it was designed to accomplish have been, in the main, attained.

#### CIVIL POST-OFFICE CASES.

While one aim of the framers of the law was to secure the settlement of homogeneous accounts in the same accounting office, yet in the matter of civil post office cases it seems to have been lost sight of, and no change in the law, as interpreted by Attorney-General Nelson (4 Op. A. G., 301), was made, and those cases are still settled by the Auditor for the Post-Office Department. To carry out the object referred to, and, more particularly, for the more convenient settlement of the emolument and fee and expense accounts of United States attorneys, marshals, and clerks of United States courts, these accounts should be adjusted in this office in connection with the other accounts of the same officers

I therefore recommend that a law be passed making the expenses of civil post-office cases payable from the appropriation "Expenses of the United States courts," which will accomplish the desired object.

#### RELIEF OF SHIPWRECKED SEAMEN IN ALASKA.

Among the appropriations for the Department of State is one for the relief and protection of American seamen in foreign countries. I respectfully recommend that this appropriation be made in the future to apply to American seamen who may be shipwrecked on the coast of Alaska. Most of that Territory is remote from other parts of the United States, and it has a very extensive and sparsely settled coast line, with few ports, but little local shipping, and only rare opportunities are offered seamen to reship. Claims have frequently been presented from Alaska for the relief and transportation of seamen, wherein it was a peculiar hardship to the claimants not to be reimbursed the expenses, but there has been no appropriation available for that purpose.

### BONDS OF DISBURSING OFFICERS.

Since requisitions for advances of money to disbursing officers whose accounts are settled in this office have been acted on by me, as required by the law establishing the new system of accounting, I have noted the unsatisfactory condition of the law applying to the bonds of such The bond usually given by a disbursing officer of a department or other establishment of the Government is for \$20,000 or \$30,000, and in a very few cases for \$50,000. In many cases the bonds are sufficient to secure the necessary advances, but in others they are for far less than the amounts which seem absolutely necessary for the prompt payment of salaries and other lawful expenses. In the case of the disbursing officer of the Department of Justice, for instance, the large amount of salaries payable by that officer and distributed in all parts of the country necessitates advances from \$50,000 to \$125,000, while the bond given is for \$30,000. The conditions as to the disbursing officer of the Department of Agriculture are very nearly the same. The large advances necessarily made to the Commissioners of the District of Columbia for the payment of expenses involved in the administration of a large city cause an average balance against the Commissioners of more than a half million dollars. The bond of each of two of the Commissioners is in the comparatively small sum of \$50,000, while the third Commissioner, being an army officer, is not required to give any bond. can be said, however, of the Commissioners that the system of disbursing their funds reduces to a minimum the danger of any loss. In the cases of the three disbursing officers of Congress it is claimed that very large advances are necessary, and the indebtedness of these officers varies from \$50,000 to \$400,000, while the bonds in the cases of two are for \$20,000, and of the other for \$50,000.

A recent act of Congress has made it lawful for officers charged with the custody and disbursement of the public money to furnish the security of trust and surety corporations. The indications are, in view of the rapid increase in this class of suretyship, that in the near future it will be used to a very large extent. It is right and proper for the protection of the public funds that disbursing officers should furnish ample security for the public money intrusted to them, but under the present law such requirement works an injustice to many. The law applying to the appointment of departmental disbursing clerks provides that the clerk selected shall receive \$200 additional to his regular salary. This sum is presumably given in view of the responsibility assumed, but it is the same in all cases, whether the bond be for \$10,000 or any larger sum, while the cost of procuring corporate security in a proper amount in some cases would be largely in excess of the \$200, so that the effect of the present law is that the officer having the larger disbursements and consequently the greater responsibility and labor receives the smaller salary, when corporate security is given.

In view of these facts I respectfully suggest that Congress be recommended to provide by law (1) that every disbursing officer shall give bond in an amount which shall exceed, say by 25 per cent, as in the case of the Public Printer, all advances that may be deemed necessary, and to prohibit the advance, in any case, of any sum which will create an indebtedness in excess of the limit fixed; and (2) that there shall be added to the salary of the officer appointed a certain amount for every thousand dollars of security required, so that the inequality and injustice above referred to shall not continue.

#### ACCOUNTS FOR COPYRIGHT FEES.

Section 4948 of the Revised Statutes prescribes that the Librarian of Congress shall, under the supervision of the Joint Committee of Congress on the Library, perform all acts and duties required by law touching copyrights, and shall have the immediate care and supervision of all records and other things relating thereto. Copyrights are granted for books, maps, charts, dramatic or musical compositions, engravings, cuts, photographs or negatives thereof, paintings, drawings, chromos, statues, stationery, etc. The act of March 3, 1891, greatly increased the duties of the office, while the steady growth of the great library has added daily to the duties of the Librarian, apart from the copyright business. This involves a large amount of work, if the prescribed duties are properly performed.

Among the duties of the Librarian of Congress is that of rendering to this office his accounts for receipts of copyright fees, which average considerably over \$100 daily. The rendering of these accounts has been greatly delayed, and an examination into the matter made during the year has made it plain that the present system does not secure the

best results either for the Government or the general public.

The Librarian claims that the multitude of his duties and an inadequate clerical force are responsible for the trouble. Whatever be the cause, a remedy should be found, and I would respectfully suggest, as a solution of the difficulty, that Congress be recommended to separate the duties of register of copyrights from those of Librarian of Congress, enacting such laws as would promote the interests of the public in securing prompt action in copyright matters, and would at the same time protect the interests of the Government in securing prompt returns of moneys received from copyright fees.

#### INCREASE IN CONSULAR FEES.

The settlements of consular accounts for the fiscal year show a large increase over the preceding year of official fees received, to wit, \$180,353.85, and the excess of expenditures in the consular service over receipts was during the year only \$100,567.92, as against \$297,066.62 for the fiscal year 1894. The indications are now that the receipts during the current year will exceed the expenditures and thus make the consular establishment self-supporting.

The following is a summary of the monthly work reports of the office:

	•
Accounts examined and stated, July 1 to September 30, 1894	3,075
Reports on accounts, July 1 to September 30, 1894	1,504
Settlements made and certified, October 1, 1894, to June 30, 1895	12, 928
Accounts in settlements, October 1, 1894, to June 30, 1895	15, 655

Estate of Martin Man	

#### DIVISION OF JUDICIAL ACCOUNTS.

This division settles all accounts pertaining to the Department of Justice, viz, marshals' fee and expenses, pay of bailiffs, support of prisoners, pay of jurors, pay of witnesses, miscellaneous expenses and protecting property, district attorneys, clerks of all United States courts, and United States circuit court commissioners; also the disbursing clerk's accounts for salaries of Department of Justice, furniture and repairs, books for Department library, books for office of Solicitor, stationery, transportation, miscellaneous items, pay of regular assistant attorneys, prosecution of crimes, defending suits in claims against the United States, defense in Indian depredation claims, punishing violations of intercourse acts and frauds, salaries and expenses of United States courts, Indian Territory, 1895-96; repairs to court-house, Washington, D. C.; miscellaneous expenses United States courts; salary of warden of jail, District of Columbia; salaries Court of Private Land Claims, salaries of district judges, salaries and expenses court of appeals, salaries of retired judges, salaries of circuit judges, salaries of supreme court, District of Columbia; salaries of judges, etc., Court of Claims; salaries justices, etc., Supreme Court; salary commissioner Yellowstone National Park, salaries of circuit court of appeals, salaries governors of the Territories of Arizona, New Mexico, Utah, Oklahoma, and Alaska, salaries of district attorneys, salaries of marshals, salary and expenses of the reporter of the Supreme Court.

In addition to the above accounts, all suits for or against the United States respecting any accounts adjusted by this office are prepared by this division, and all judgments against the Government are settled upon certificates prepared by this division. The work performed by this division during the fiscal year 1895 is included in the table published on a previous page, showing the entire work of this office.

Exhibit I in the appendix shows the work more in detail.

#### MISCELLANEOUS DIVISION.

In this division are settled all accounts of the Department of Agriculture, the Executive Office, Civil Service Commission, Interstate Commerce Commission, Department of Labor, District of Columbia, Fish Commission, Smithsonian Institution, Territorial governments, the Senate, the House of Representatives, the Public Printer, Library of Congress, Botanic Garden, and of various boards, commissions, and establishments of the Government not within the jurisdiction of any of the Executive Departments.

The accounts for the fourth quarter of the fiscal year 1895, having not been rendered until after the close of the year, are not included in the amounts given below, which in general represent the disbursements of only three quarters of the year, except in a few cases in which the accounts are rendered monthly, when they represent the disburse-

ments of eleven months of the year.

From October 1, 1894, the date of the reorganization of this office under the terms of the act of July 31, 1894, to June 30, 1895, the close of the fiscal year, settlements were made on the accounts of the disbursing officers of the foregoing Departments and offices as follows:

In addition to the foregoing, direct settlements are made on accounts with individuals and corporations for sums due from the United States which are not advanced to disbursing officers or agents and paid by them. These include payments made to various railroad and other companies for transportation of Government agents and property over land-grant or bond-aided lines; payments to the various States and Territories in aid of the agricultural experiment stations established under the terms of the act of March 2, 1887; payments of amounts appropriated by Congress for expenses of contested election cases, and for extra compensation to Congressional officers and employees, etc. The amounts paid on these settlements during the period covered by this report are as follows:

Transportation	\$13, 616, 86
Agricultural experiment stations	540, 000, 00
Miscellaneous	

I have the honor to be, very respectfully,

THOMAS HOLCOMB, Auditor.

Hon. John G. Carlisle, Secretary of the Treasury.

Notes.—1. The amounts stated in the several districts under some of the appropriations given include expenditures estimated for the last quarter of the fiscal year 1895. The exact figures were not attainable, the accounts not having been finally adjusted in this office. There have been, subsequent to July 1,1895, additional advances made to marshals to pay expenses of the courts incurred during the fiscal year 1895. The amounts of these expenditures are not included in this statement, it not being possible to even make a satisfactory estimate of the amount thereof.

2. Under "Fees of district attorneys," southern district of New York, is stated the amount of money that was paid to the district attorney for the expenses of his office. This amount includes not only the fees earned in the office, which amount to very little, but also amounts paid to said district attorney from the appropriation "Miscellaneous expenses United States courts."

3. Under the appropriation "Pav of regular assistant attorneys," the amounts apportioned by the Attorney-General to the several districts are stated.

4. Under the appropriation "Fees of clerks," the salary of the clerk for the Territory of Alaska (\$2,500) is given. It will be also noted that in three instances, to wit, District of Columbia, southern district of New York, and eastern district of Pennsylvania, no amounts are given under this heading. This is because of the fact that no payments have been made out of the appropriation for "Fees of clerks, United States courts," the clerks in these cases earning their maximum compensation from fees earned from individuals and corporations.

5. Under heading of "Salaries," the amount of salary appropriated for the different officers is given, from whatever appropriation they may have been paid. In the District of Columbia salaries paid to the judges of the supreme court only are given.

6. Under "Miscellaneous items" will be found the traveling expenses of the Territory of Alaska, payments from the appropriation for "Protecting pr

# REPORT OF THE AUDITOR FOR THE POST-OFFICE DEPARTMENT.

TREASURY DEPARTMENT, OFFICE OF THE AUDITOR FOR THE POST-OFFICE DEPARTMENT, Washington, D. C., October 11, 1895.

SIR: The following reports present an account of the transactions of this office, and of the financial operations of the Post-Office Department, during the fiscal year ended June 30, 1895:

# MONEY-ORDER BUSINESS.

The two years' accumulation in this office of unassorted money orders is something of the past. All of the money orders received have been assorted, and the demands of late postmasters for the adjudication of their money-order accounts have been silenced by their settlement.

From the end of the fiscal year, June 30, 1895, the accounts of postmasters, postal and money order, have been simultaneously settled, and there is no reason why all of the business of this office in the future may not be carried on currently, settlements made, suits brought, and investigations of accounts of recalcitrant postmasters had to the current date.

The improvement in the condition of this office has been greatly facilitated by your orders reorganizing its methods, based upon the plan devised by the Joint Commission of Congress, known as the Dockery Commission.

# CHECKING BY THE COUPON.

The last one of the features of this new system to be put into effect, viz, checking money-order accounts by the coupon, proves itself to be the most serviceable. It facilitates settlements and insures accuracy in auditing the money-order statements of postmasters.

### NEW FORM OF MONEY ORDER.

In the last annual report from this office the following statement appeared:

If the size of the order were reduced, and the quality of the paper on which it is printed improved, it would facilitate handling in this office and avoid some of the errors caused by portions of the margin becoming detached.

The Honorable First Assistant Postmaster-General coincided in this view, and for this and other reasons his office has issued a new form of money order which in all respects is an improvement upon the coupon order first issued. The new order is being gradually introduced and when once in general use will facilitate the business of this office. Attention is called to a new feature of the coupon of this order. It is that of printing on the reverse side of the coupon the same figures that are upon its face, so that the last figures upon it when detached are identical with those on the margin of the order. The credit of this

FI 95——45

invention is due to Mr. H. J. Bibb, an efficient clerk in this office. His plan was readily approved in this office and promptly adopted by the Post-Office Department.

The current business of the money-order branch has not only been reached, but it is also dispatched with more system and accuracy than

formerly characterized the work.

A system of review with a record kept of every error discovered is doing much to insure correctness and at the same time develop the merit of the clerks.

# MONEY-ORDER STATEMENTS AND PAID MONEY ORDERS.

Under the system in practice prior to the passage of the act of Congress approved January 27, 1894, the money order statements of post-masters, with paid money orders pertaining to them, were forwarded to the Money-Order Division of the Post-Office Department, where a preliminary examination of the statements was had, with the view of discovering cases of failure to make prompt deposits. Correspondence was then had relative to the unauthorized retention by postmasters of money-order funds, and the statements and paid orders were then forwarded to this office for audit.

Since the passage of the act above referred to, money-order statements, and the paid orders therewith, are mailed by postmasters directly to this office, and do not pass through the money-order branch of the Post-Office Department. The preliminary examination of statements and correspondence relative thereto for the purpose of securing prompt deposits and preventing the accumulation of money-order funds in the hands of postmasters, formerly conducted in the Post-Office Department, is now carried on by this office with very satisfactory results. The advantages of the change are manifest. Circumlocution in the handling of a vast number of papers, and divided responsibility for their custody, is avoided, and perfect continuity in auditing as well as marked gain in time is secured. The number of money-order statements received during the year was 354,327. The number of paid money-orders accompanying such statements was 22,940,398. The amount of money received by postmasters and paid out by them on these money orders during the year aggregated the sum of \$331,931,766.41.

# INVALID MONEY ORDERS.

During the fiscal year there were 2,136 certifications made for payment by warrant of invalid money orders, being those remaining unpaid for more than one year. Of these certifications 1,880 were approved and paid. The remaining 256 were rejected for the reason that inspection of the files of this office developed the fact that the original orders had been paid. Had the system formerly in use, of issuing duplicate orders in such cases, been continued, there is reason to believe that in each of the 256 cases named duplicate orders would have been issued, which would have necessitated an effort on the part of this office to recover in each case the amount of the double payment. The possibility of double payment of invalid orders is, under the present system, reduced to the minimum.

# POSTAL ACCOUNTS.

The work of auditing postmasters' postal accounts is in excellent condition and fully up to date.

Under the act of Congress approved January 27, 1894, the depositaries of postal funds send directly to this office the original certificate

of deposit. Formerly the certificates, both original and duplicate, were sent to the postmaster. The original was then remitted by him to the Third Assistant Postmaster-General and thence forwarded to this office.

The change of method has facilitated the business of this office. It has obviated frequent delays and much correspondence on account of the failure of postmasters to forward the original certificate of deposit. Now the transcript of deposit received in this office from a depositary of postal funds is accompanied by a certificate for each deposit named, a duplicate of which certificate is sent by the depositary to the postmaster, to be retained by him in his office as a voucher.

The number of postmasters delinquent in rendering their quarterly postal accounts shows a marked decrease as compared with former years. By direct correspondence with the postmasters, and, when that failed, by promptly reporting the delinquent to the Postmaster-General, they have been impressed with the necessity of promptly ren-

dering their postal accounts.

By reason of the fact that the settlement of money-order accounts has been brought up to date, balances on postal accounts in favor of late postmasters are now paid within three months after the final audit of the account.

Heretofore payments of balances have rarely been made in less than from nine to twelve months after the settlement of the final account; in many cases suspension of payment on postal accounts for longer periods has been caused by the necessity of awaiting the final audit of the

money-order account.

Balances due the United States by late postmasters on their postal accounts are being successfully collected. Collection drafts are promptly issued against late postmasters and demands made on them and their sureties. When necessary, requests are made for the detail of post-office inspectors to cooperate in the collection of balances. If collection can not be made through the medium of drafts and inspectors, the cases are at once entered for suit.

### POSTAL AGENCY AT SHANGHAI.

The only foreign postal agency of the United States is located at Shanghai, China. The accounts of this agency seem to have been overlooked in this office for some years past, as no settlement appears to have been made since March 31, 1879. During the year collections have been made from the present postal agent amounting to \$5,157.28. No previous deposit has been received from this agency since April 3, 1884.

The attention of the Honorable Postmaster General was called to the condition of this account, and under his order of April 1, 1895, there has been a revision of the methods of accounting with this agency in the Post-Office Department. Its accounts are now settled in this office quarterly, in the same manner as those of a postmaster, and the bal-

ances collected which are found due the United States.

# COLLECTIONS BY POST-OFFICE INSPECTORS.

The collection of balances due the United States on the accounts of postmasters, late and present, and those of failing bidders and mail contractors, is in many cases greatly facilitated by direct personal communication on the part of agents of the Post-Office Department with the debtors and their sureties. It has been the practice of this office, after making the usual efforts to collect through the medium of

correspondence, to refer such cases to the office of the Fourth Assistant Postmaster General for the action of post-office inspectors, whose services have been kindly placed by the Post-Office Department at the disposal of this office for the purpose named. The efficient and valuable aid derived from this source is shown by the following statement of moneys collected from 1891 to 1895, inclusive, through post-office inspectors, and credited to postal, money-order, and miscellaneous accounts, viz:

1891	\$88, 094, 93	1894:	\$165, 169, 04
1892			
1893			

# COLLECTION BY SUIT.

On July 1, 1894, the sum of \$776,349.42 was the aggregate amount for which suits had been instituted against late postmasters, failing contractors, failing bidders, and late contractors, and the sureties on their bonds, in the courts of the United States. During the past fiscal year this sum was increased to \$1,045,394.88.

Efforts are being made to ascertain in each of the old cases whether or not there is a possibility of realizing the amounts due. In some old cases collections have been made notwithstanding their age, and inothers steps have been taken to recover. Many of the principals and sureties in such cases have been traced from one State to another and their residences and pecuniary circumstances definitely determined.

When it is reliably ascertained that judgment debtors are insolvent or dead and their estates worthless, the accounts are closed on the books of this office by "Bad debts." But this action is only taken after a thorough investigation and when all doubt as to their insolvency is removed.

The work of the fiscal year is shown in the following tables:

# Accounts submitted for suit.

	No.	Amount.
Postal. Money-order Mail-service (actual damage, \$138,590.91).	78 36 146	\$27, 568. 52 24, 918. 93 344, 931. 79

Mail-service			<i></i>						70, 320, 74
								_	
Total .							<i></i> .		128, 373, 78

The number of cases submitted for suit during the year, 260, and the amount of money involved, \$397,419.24, is the largest in number and amount in the history of the office. This resulted from an effort to clear the records of the office and dispose of the accumulated accounts, dating back to the year 1882. At present the work is practically up to date. The last three items in the above table represent transactions of 1879, 1880, 1881, 1885, 1886, and 1888, which for some unknown reason were not noted at the proper time.

Upon assuming charge of this office in 1894 the work of collecting from failing contractors, failing bidders, and late contractors was found very much in arrears, cases having accumulated for several years. The following figures show what has been done in this particular:

	Number.	Amount.
0 . ! .		
Accounts submitted, year 1894	58 146	\$259, 772. 45 344, 931. 79
Total	204	604, 704, 24

Under the statutes (Rev. Stats., sec. 3945, as amended by the act of June 23, 1874, sec. 12, 18 Stats., 235) this office is required to submit accounts relating to the mail service for collection of the amount of the bonds, as it is provided that the principals and sureties shall be liable for the amounts of the bonds as liquidated damages, to be recovered in an action of debt. Collections, however, are only made of the amount of the actual damages resulting to the United States by reason of the failures, and the difference between the amount of the bond and the actual damage is a fictitious sum entered upon the records of this office, which can only be closed by "Bad debts." I respectfully solicit your recommendation to Congress to obtain the necessary legislation authorizing this office to submit these accounts for the collection of the actual damages. Heretofore no calculation has been made at the close of the fiscal year of the total amount of the actual damage involved in the suits.

For the purpose of showing the operations of this branch of the office a table is appended giving detailed information from the fiscal year ended June 30, 1889, to the fiscal year ended June 30, 1895, inclusive:

Year ended June 30—	Num- ber of suits.	Amount involved.	Principal collected.	Costs and interest collected.	1 10251	Closed by bad debts.	Closed by compromise debts.

GEO. A. HOWARD, Auditor.

Hon. J. G. CABLISLE, Secretary of the Treasury.

# REPORT OF THE SUPERVISING SPECIAL AGENT.

# TREASURY DEPARTMENT, OFFICE OF THE SECRETARY, Washington, D. C., October 19, 1895.

SIR: The results achieved during the fiscal year ended June 30, 1895, by the special agents have been gratifying, and attest the character and efficiency of the force. The following is a condensed report of the work performed:

Reports made and letters written	
Suits commenced.	84
Amount involved in suits	\$279, 748. 81
Arrests for violation of customs-revenue laws	- 98
Arrests for violation of Chinese laws	180
Arrests for violation of anti-lottery laws	4
Arrests for conspiracy to defraud	· <b>1</b>
Arrests for impersonating customs officers	1
Arrests for intimidating United States witnesses.	<b>2</b>
Number of seizures	939
Appraised value of seizures	\$50, 781. 74
Amount recovered on account of seizures, fines, penalties, and increased	·
duties because of undervaluation or erroneous classification discovered.	\$431, 860. 37
Amount recovered from suits on evidence furnished by officers of this	
division	\$52, 131. 38
Reduction in expenses recommended	\$61, 114, 88
Customs districts examined.	115
Salaries and expenses of special agents	\$93, 664. 77

Appended hereto will be found also a comparative statement of aggregate receipts and expenses of collection for the fiscal years 1885 to 1895, inclusive. It will be seen from this statement that the receipts for the last fiscal year from all sources exceeded those of the preceding fiscal year by \$21,559,413, while the cost to collect one dollar was reduced from \$0.0509 to \$0.0423.

# UNDERVALUATION OF IMPORTED MERCHANDISE.

The subject of undervaluation of imported merchandise, which has attracted considerable attention in commercial circles during the past year, has been given very careful consideration, and the results attained, though not entirely satisfactory, have been of such character as to lead to the hope that this bane of the honest importer will be removed ultimately. While it has been urged that undervaluation thrives under an ad valorem system of duties, the strict enforcement of the laws provided for the punishment of those who practice it must have the desired effect of its suppression.

The amount of money actually turned into the Treasury, as noted above in the statement of the results of the agents' work, does not do entire justice to them, for their untiring efforts, both here and abroad, have had a deterrent effect, which has resulted in advances upon entries which would not otherwise have been made. The special agents

have endeavored on all occasions to coöperate with the chief officers of customs, the local appraisers, and the Board of General Appraisers, and their assistance has received in many instances the commendation of the officers mentioned.

There are many obstacles in the way of a proper appraisement of imported merchandise, notable among which is the extreme difficulty to obtain accurate, precise, and what is deemed to be entirely reliable information as to actual foreign market values. This difficulty is emphasized more particularly in the matter of foreign-manufactured goods consigned to agents in this country.

# SPECIAL AGENTS IN EUROPE.

The special agents abroad have labored indefatigably to establish confidential commercial relations with reputable dealers in the different countries to which they are assigned and to cooperate with United States consuls and commercial agents in obtaining correct information as to values. The reports from these agents cover a wide field and embrace a variety of subjects, among which may be mentioned linen threads, wall paper, silks, hosiery, underwear, cotton and other laces, metal-worked muslin, cambric frillings, worsted and woolen goods, nettings, Irish point and Bruges laces, India tapes, lace curtains, horn combs, elastic webbings, saddlery and harness, statuary, bric a brac, sugars, and textiles of every description. Whenever practicable, samples of the merchandise have been forwarded with these reports. subject of convict labor employed abroad in the manufacture of goods destined for export has also been reported on and the information obtained filed with the proper customs officers.

# UNAUTHORIZED DISCLOSURE OF INFORMATION.

While the special agents have succeeded in obtaining from trustworthy sources information which has proved of value to appraising officers, it is found that many persons withhold important information through fear of disclosure of their names during the progress of investigation and resultant injury to their business. I respectfully suggest that severe punishment should be meted out to any officer found guilty of divulging to anyone outside the customs service information obtained confidentially. Many honest importers and even foreign dealers, actuated by a desire to protect themselves against the wily machinations of the unscrupulous, stand ready to assist the Government in this matter if they are satisfied their names will not be mentioned in connection therewith. The present methods of procedure, which involve the disclosure of information to various officers, should be modified, and the danger of annoyance and publicity thereby greatly lessened.

# PENALTY LIMIT IN CUSTOMS ADMINISTRATIVE ACT.

Section 7 of the customs administrative act provides that in cases where the appraised value of any article of imported merchandise shall exceed by more than 10 per cent the value declared in the entry "there shall be levied, collected, and paid, in addition to the duties imposed by law on such merchandise, a further sum equal to 2 per cent of the total appraised value for each 1 per cent that such appraised value exceeds the value declared in the entry." It is doubtful if the effect contemplated by the framers of the law has been attained. The fact that goods are undervalued less than 10 per cent involves no penalty

and encourages dishonest importers to attempt evasions of the tariff laws. It is respectfully suggested for your consideration that an amendment to the law cited providing for the abolition of the 10 per cent limit and the imposition of a penalty for each 1 per cent of undervaluation above the entered value would check effectually a practice persistently followed by firms who systematically undervalue their goods with the full knowledge that if the invoices are advanced not more than 10 per cent by the appraising officers the advance will not be sufficient to involve the imposition of the penalty now provided for by law as a punishment for undervaluation.

# IMPORTATION OF CATTLE FROM MEXICO.

Through the efforts of officers of this division improved methods governing the importation of cattle on the Mexican frontier have been adopted, and good results have followed. Under the old system of appraisement before entry of cattle imported from Mexico, opportunities were afforded for fraud by undervaluation, of which the importers in many instances were not slow to take advantage. The ascertainment of correct values by officers assigned to Mexico, and the prompt imposition of penalties for undervaluation wherever discovered, have led importers to increase the entered valuation of cattle to a figure more nearly representing the correct market price, and have resulted in largely increased collections. The actual amount of money recovered represents but a small portion of the results accomplished. I have no doubt that the moral effect following from the presence of officers keenly alert to any attempt at fraud, and perfectly familiar with current prices and the habits and usages of cattle men, has deterred many who have no conscientious scruples from attempting to evade the law.

# CONSOLIDATION OF CUSTOMS DISTRICTS.

The subject of the consolidation of customs districts has heretofore been called to your attention, and the necessity for action in the direction indicated becomes more urgent each year. Since the creation of the existing districts the conditions of business have changed greatly, and places which were formerly of importance and at which customhouse establishments are maintained have now no business to transact, and the retention in official position of the persons employed involves unnecessary expense. As is well known, importations have been concentrated at comparatively few ports, and the importation by sailing vessels is trifling. Deputy collectors or other subordinate officers may perform readily such official duties as the issuance of vessels' papers, and action in that direction should be taken in the interests of an economical administration. The boundaries of customs districts, as defined by the statute, also need revision. Business enterprises have developed at places which had no existence at the time the boundaries of the districts within which they are now located were established.

Recently an application was made through the office of the collector of customs at Chicago for the establishment of a manufacturing warehouse in a town closely connected by business interests with Chicago and within an hour's travel from that port. The desired authority could not, however, be given, for the reason that the town referred to is outside the limits of the customs collection district of which Chicago is the port of entry. By a law passed many years ago defining the district of New Orleans, it is provided that said district shall embrace "\* \* and all the waters and shores of the Mississippi River, and

of the rivers which empty into it, or any of its branches, except the waters and shores within the State of Mississippi, and except the west bank of the Mississippi River between the towns of Plaquemine, in the parish of Iberville, and Donaldsonville, in the parish of Ascension, in

which New Orleans shall be the port of entry," etc.

The ports of delivery named in said law and laws subsequently passed, and which have been re-enacted as section 2568, Revised Statutes, are located in Pennsylvania, West Virginia, Ohio, Kentucky, Tennessee, Indiana, Iowa, Illinois, and Wisconsin. To transact business in a warehouse established in a town within an hour's ride of the city of Chicago, through which port all importations are made direct, or through which they are received from New York or Boston, under the supervision of an officer assigned to the duty by the collector of customs at a port as distant as New Orleans, La., is a condition of affairs which needs but to be cited to show its absurdity. In other sections of the country are enterprises which are retarded by a similar condition of affairs, and in view of these facts, I have the honor to suggest that the subject be called specially to the attention of Congress, with a view to the adoption of a remedy which appears to be required by the demands of business

### EXAMINATION OF BUSINESS AT CUSTOMS PORTS.

A careful examination of the business transactions of the principal customs districts and ports in the United States, including the District of Alaska, was made by the officers of this division during the last year. Wherever careless or indifferent methods or violations of the Treasury regulations were discovered the same were called to the attention of the Department and prompt measures taken for their correction. Efforts were made to adjust and equalize salaries, and to make them conform generally to the compensation paid by commercial concerns for services of a similar character. The frequent examinations of the books, papers, and accounts of collectors and other officers of customs, as wisely provided by law, have a salutary effect upon the service, the efficiency of which is promoted greatly thereby. Collectors receive no notice of the time set for these examinations, and they are obliged to keep their records in such a manner as to be prepared always for the visits of the agents. It is gratifying to note in this connection that the Government has been free from loss in the collection of its revenues.

# EXCLUSION OF CHINESE.

The Chinese inspectors acting under the direction of this division have rendered constant and laborious service to the several collectors of customs whose duty it is to enforce the laws relating to the exclusion of Chinese. During the past year 3,900 Chinese applied for admission, of which number 2,075 were admitted; 1,168 were allowed to pass in transit through our country, and 657 were rejected. In these cases investigations were made of the applicants' statements where admission was claimed on the ground that the Chinese were returning merchants who formerly resided and transacted business in this country as merchants. There were 152 Chinese arrested for being unlawfully in the United States, and 82 were found guilty and deported to China. Many of the Chinese admitted as participants at the Midwinter Fair in San Francisco failed to leave the United States within a year after the close of said exposition, and the work of locating and arresting them was laborious.

I am of opinion that special legislation, waiving the provisions of the Chinese exclusion laws, as well as those of the alien contract labor law, to enable persons who are otherwise excluded to enter the United States as participants in the interstate or other expositions is pernicious, and I would recommend strongly its discontinuance. The experience of officers of the special agents' force with the large number of Chinese who were admitted to attend the World's Columbian Exposition at Chicago, and the more recent experience in connection with the Cotton States and International Exposition at Atlanta, where more than 200 Chinese were admitted as actors, musicians, etc., emphasizes

the views which are respectfully submitted.

Under the treaty with China proclaimed December 8 last, Chinese laborers residing in this country are allowed under certain conditions to visit China and return. From the date of the proclamation of said treaty to June 30 last 110 Chinese laborers departed from the United States and were furnished with certificates which will enable them to return. Care has been taken in the preparation of these certificates to guard against the substitution of other persons than those to whom the certificates were issued. By the provisions of an act approved May 5, 1882, State courts or courts of the United States are prohibited from admitting Chinese to citizenship. In a number of instances, however, naturalization papers have been given to Chinese persons who subsequently demanded the right to enter this country. In several instances the holders of such certificates were denied landing on the suggestion of officers of the special agents' force, and their action was confirmed subsequently by the Department. Of the appropriation made for the enforcement of the Chinese exclusion laws, \$84,223.34 were expended during the last fiscal year. This amount includes all costs of arrest and the traveling expenses of the prisoners and the marshals from the time of conviction until the prisoners were landed in China. It also includes the compensation and traveling expenses of the Chinese inspectors who were engaged in the enforcement of the laws.

While, as hereinbefore stated, 82 Chinese were deported, this number represents but a portion of those arrested and who were discharged subsequently by order of the court. If the object of the exclusion laws is to exclude Chinese from this country, the laws should be made more rigid and provide for fewer exceptions from its provisions. The facility with which the certificates may be obtained from Chinese consuls residing in foreign countries, and upon which persons of the Chinese race may claim admission to the United States as merchants or persons other than laborers, has the effect to nullify practically the Much of the criticism of the actions of officials of intent of the law. this department who have to deal with questions relating to Chinese immigration could be directed more properly to the law. So far as it is possible to accomplish that end the officers who come under the immediate direction of this division have been charged to enforce the law to the letter, leaving all subsequent proceedings, which in many instances have rendered the services of our officers valueless, to the

courts or other sources of authority.

# OPIUM SMUGGLING.

The prevention of opium smuggling has long been a source of anxiety to the officers of this division. In past years, with the duty on smoking opium at \$10 and \$12 per pound, the profit to be derived from this illicit business was so great that shrewd and unscrupulous men were only too eager to undertake the risk of detection. In addition to the

opium prepared in China it has long been known that thousands of pounds of the drug were manufactured each year in British Columbia for consumption in this country, while until very recently not one pound of the British Columbia product was entered regularly at our custom houses. Seizures and arrests have been frequent, and in certain instances, through the vigilance of officers of this division, powerful smuggling rings have been unearthed and the offenders punished by long terms of imprisonment, but owing to the great stretch of practically unprotected frontier thousands of pounds of the drug clandestinely entered this country, thereby depriving the Government of its just revenues and in some cases offering a menace to the integrity of the service by the corruption of custom house officials.

The provision in the tariff act of 1894 reducing the duty on smoking opium from \$12 to \$6 per pound has, it is believed, caused a marked decrease in the amount of the Chinese drug smuggled into this country and a corresponding increase in the amount brought through the custom-house and upon which duties were paid. As nearly nine tenths of all Chinese opium imported into this country is brought through the custom-house at San Francisco, a comparative statement of the amounts imported at that port, with the duty paid thereon, during the fiscal

years 1893, 1894, and 1895 is interesting:

Year.	Opium im- ported.	Duty paid.
1893. 1894. 1895.	Pounds. 55, 222 49, 856 138, 950	\$662, 664 598, 272 913, 404

I submit that the above figures show with reasonable certainty that the increase in the amount brought through the custom-house represents opium which under the old tariff would have found an entrance into this country in violation of law, but which, owing to the lower rate of duty, was entered regularly and duties paid thereon. in revenue was more than 65 per cent over the previous year, while the rate of duty was decreased one half. Smuggling will be carried on only when the profit to be derived from the illicit introduction of an article into this country is large enough by reason of the high rate of duty to justify the attendant risk. I have no doubt that were the duty on opium reduced to \$4 per pound the demand for the British Columbia article, which is of an inferior quality to the Chinese product, will be lessened to such an extent that its manufacture for illegal importation into the United States would be discontinued practically. gling of the Chinese drug would be centralized then at ports on the Pacific seaboard, where it would be met more successfully by the customs officers, while the customs revenues would be increased largely by the additional duties paid upon the increased amount brought through the custom-houses. I believe it has been demonstrated satisfactorily that the use of this noxious drug can not be eradicated by a prohibitive tariff.

# MEXICAN FREE ZONE.

The privilege heretofore accorded of transportation in bond through the United States of goods destined for places within the so-called "Free Zone" of Mexico has given cause for much complaint on the part both of our merchants on that frontier and of customs officers; the former because they are subjected to unfair competition with merchants doing business in the Free Zone upon whose goods no duty has been paid, and the customs officials because they have had abundant reason to believe that a great portion of this merchandise was taken into the Zone for the express purpose of being smuggled back into this country.

To remedy the evils complained of, Congress, by a joint resolution approved March 1, 1895, suspended the privilege of transportation in bond of merchandise consigned to ports in the Free Zone. This resolution, however, did not preclude the practice which was adopted by importers immediately after of entry and appraisement of such merchandise at the port of original importation to be forwarded under warehouse and transportation bond to a frontier port where entry for exportation into the Free Zone could be made in the usual manner. From statistics obtained of transactions of this character in the district of Paso del Norte it appears that the value of the merchandise withdrawn from warehouse for export to the Free Zone has increased from practically nothing before the passage of the resolution to nearly \$4,000 per month since that time. While the value of the merchandise so treated does not equal that of the goods shipped in bond under the old system, yet it shows that a way is open whereby merchants in the Free Zone may still have their goods brought through the United States with no added trouble or expense save an additional entry.

While I am aware that this subject is a matter properly within the cognizance of the Department of State, I can not but express the belief that it would be of the greatest advantage both to the Government and to the residents of that particular section of the United States if the Free Zone were abolished. I respectfully renew the suggestion made in my last annual report that the subject be called to the attention of the Honorable Secretary of State with a view to the submission of the question of its unfriendly effect upon American interests for the consideration of the representative at this capital of the Republic of Mexico.

## BONDED WAREHOUSES AND COMMON CARRIERS.

It is gratifying to state that during the past year in the conduct of the bonded warehousing business no serious losses were reported, and the same remark applies to goods in bond while being transported between the several ports. All applications for the bonding of warehouses and of lines of railway and water transportation are passed upon in the division of special agents, where the letters of approval of such bonds are also prepared. Much correspondence is involved in this connection and in the investigation of suspected irregularities in the conduct of the warehousing and transportation business.

While little or no loss has occurred to the Government during the past year through the operation of the business above referred to, in view of the great number of buildings used for storage purposes throughout the country and of the vast quantity of merchandise handled by the bonded-railroad and vessel companies this fact is evidence of thorough supervision on the part of the special officers whose duty it is to see that the laws and regulations are observed closely by customs officials and the business public alike.

Domestic merchandise in large quantities and goods in bond or upon which the duties have been paid are forwarded between the ports in the United States by routes passing through Canadian territory. Special attention has been given to this business by the special agents stationed at places on the northern, northeastern, and northwestern frontiers, and they are required to investigate thoroughly and report upon all instances where irregular methods or practices are found to

exist. The manner of lading and unlading the vehicles employed in this transportation and the comparison of the contents of such vehicles with the manifests thereof, as well as the sealing of the cars, are subjects requiring constant supervision. The officers stationed at ports where cars depart from the United States for transit through Canada and at the ports where such cars enter this country after the transit are required to inspect closely such cars and the papers accompanying the same and to attach in each instance their signatures to certificates of inspection. These important duties, through neglect of which the revenues would suffer serious loss, as a rule have been observed faithfully, and all merchandise in transit, as a result, has been accounted for duly. It is estimated roughly that during the past year about 400,000 cars were employed in this business and that the weight of the contents approximated 3,500,000 tons.

Respectfully, yours,

J. J. CROWLEY, Supervising Special Agent.

Hon. John G. Carlisle, Secretary of the Treasury.

APPENDIX.

Note.—The accounts of receipts and expenditures published by the Register will vary in some cases from the figures above given, for the reason that his statement is made up from warrants issued during the fiscal year, regardless of balances in the hands of officers at the beginning and end of the year. If the accounts of each collector were closed and balances settled at the end of the fiscal year the two statements would agree.

# REPORT OF THE CHIEF OF THE SECRET SERVICE DIVISION.

TREASURY DEPARTMENT, SECRET SERVICE DIVISION, Washington, D. C., November 1, 1895.

SIR: I have the honor to submit herewith the thirtieth annual report, containing a summary of results of the work accomplished by the Secret Service Division of the United States Treasury Department during the fiscal year ended June 30, 1895.

The arrests by agents of this division and other duly qualified officers (the latter receiving gratuities of money from the funds of the

division for meritorious service) number 803.

The offenses alleged were as follows:

Manufacturing counterfeit paper money.

Manufacturing and having in possession counterfeit paper money..... Having in possession and passing counterfeit paper money..... Having in possession and passing counterfeit paper money and attempting to sell counterfeit plates

Having in possession counterfeit paper money.

Passing counterfeit paper money

Passing counterfeit paper money and coin

Attempting to pass counterfeit paper money.

Dealing in and passing counterfeit paper money.

Dealing in and having in possession counterfeit paper money.

Passing pieced United States notes.

Having in possession and issuing State warrants in similitude of United States currency.

Eneraving plates for and printing State warrants in similitude of United States Engraving plates for and printing State warrants in similitude of United States currency.

Passing State warrants as United States notes. Altering obligations of the United States.

Altering and passing altered obligations of the United States.

Fifty-three cases of back pay and bounty were investigated by this

service for the Auditor for the War Department.

\$6,289.33, made by various persons for reimbursement of expenses incurred in the last sickness and burial of deceased pensioners have been investigated. The amount of these allowed by the Auditor was \$3,292.40, being a gross saving to the Government of \$2,996.93.

In addition to the foregoing, miscellaneous work has been performed

by this service for other Departments of the Government.

The past fiscal year has been remarkable for the great increase in the counterfeiting of paper money, as evidenced by the following list of

new counterfeit notes which appeared:

In July, 1894, a \$2 United States silver certificate, check letter C, plate number 13, W. S. Rosecrans, Register, E. H. Nebeker, Treasurer, portrait of Windom, was placed in circulation, but the poor character of the work made detection easy, and the source of supply was soon shut off by a number of arrests.

In July, 1894, a pen-made counterfeit \$20 national bank note on the "National Bank of Barre, Vt.," check letter A, charter number 2109, bank number 1980, John Allison, Register, F. E. Spinner, Treasurer,

also made its appearance, but only one has been found.

In August, 1894, a counterfeit \$10 United States legal-tender note, series of 1880, check letter B, plate number 2250, W. S. Rosecrans, Register, James W. Hyatt, Treasurer, portrait of Webster, was discovered, but none of these notes were placed in circulation, owing to the efficient work of agents of this service in arresting the guilty persons and capturing, in addition to all the notes printed, the plates, presses, and other paraphernalia used in printing them.

In September, 1894, appeared a photographic counterfeit \$5 "Commercial National Bank of Providence, R. I." note, series of 1882, check letter A, charter number 1319, bank number 20650, W. S. Rosecrans,

Register, C. N. Jordan, Treasurer, portrait of Garfield. Few have been found.

In September, 1894, a photographic counterfeit of the \$5 "Fifth National Bank of Cincinnati, Ohio," note, series of 1882, check letter A, charter number 2798, bank number 2269, W. S. Rosecrans, Register, James W. Hyatt, Treasurer, made its appearance. Only two of these have been seen.

In September, 1894, appeared a counterfeit \$10 United States silver certificate, series of 1886, check letter A, W. S. Rosecrans, Register, James W. Hyatt, Treasurer, portrait of Hendricks. The makers of this counterfeit were arrested in Rochester, N. Y. (the plates and outfit

captured), and subsequently convicted.

In September, 1894, a counterfeit \$5 United States silver certificate, series of 1891, check letter B, plate number 7, W. S. Rosecrans, Register, E. H. Nebeker, Treasurer, portrait of Grant, and a \$20 United States silver certificate, series of 1891, check letter C, plate number 5, J. Fount Tillman, Register, D. N. Morgan, Treasurer, portrait of Manning, simultaneously appeared. Only a few were circulated, as the maker and his confederates were soon arrested, and a large amount of the money, together with the plates, presses, etc., captured.

In September, 1894, a counterfeit \$20 "Fourth National Bank of the

In September, 1894, a counterfeit \$20 "Fourth National Bank of the City of New York" note, check letter A, L. E. Chittenden, Register, F. E. Spinner, Treasurer, dated March 1, 1864, made its appearance. The plates for this note were captured in Philadelphia, Pa., September 26, 1867, and it was not known until the appearance of this note that

any were ever printed.

In October, 1894, was discovered a photographic counterfeit \$5 "Citizen's National Bank of Niles, Mich.," note, check letter B, series of 1882, W. S. Rosecraus, Register, E. H. Nebeker, Treasurer, portrait of Garfield. Few have been found.

In October, 1894, also appeared a counterfeit \$5 United States note, series of 1880, check letter B, W. S. Rosecrans, Register, J. N. Huston, Treasurer, portrait of Jackson. This was a very poor attempt, and its circulation was limited.

In October, 1894, a counterfeit \$5 Treasury note, series of 1891, check letter A, plate No. 12, J. Fount Tillman, Register, D. N. Morgan, Treasurer, portrait of Thomas, appeared. The makers were arrested and plates and outfit captured.

In November, 1894, appeared a photographic counterfeit \$10 Treasury note, series of 1891, check letter B, J. Fount Tillman, Register, D. N. Morgan, Treasurer, portrait of Sheridan. Only one has been seen.

A very dangerous counterfeit made its appearance in November, 1894. This was a \$2 United States silver certificate, series of 1891, check letter B, plate No. 14, W. S. Rosecrans, Register, E. H. Nebeker, Treasurer, portrait of Windom. This note practically defies detection except by an expert. Warning was sent throughout the United States and precautions taken to suppress this dangerous note.

In January, 1895, appeared a pen-made \$100 Treasury note, series of 1890, check letter C, plate No. 2, W. S. Rosecrans, Register, J. N. Huston, Treasurer, portrait of Farragut. Only two of these notes have been seen. The other made its appearance in December, 1893, and bore

check letter B.

In January, 1895, a counterfeit \$10 United States legal-tender note, series of 1880, check letter B, W. S. Rosecrans, Register, E. H. Nebeker, Treasurer, was discovered. The makers were arrested in San Francisco, Cal., and imprisoned and plates, etc., captured.

In January, 1895, a photographic counterfeit \$10 United States silver certificate, series of 1891, check letter B, J. Fount Tillman, Register, D. N. Morgan, Treasurer, portrait of Hendricks, appeared. Only two have been found.

In March, 1895, a counterfeit \$2 Treasury note, series of 1890, check letter A, plate number 22, W. S. Rosecrans, Register, E. H. Nebeker, Treasurer, portrait of McPherson, was discovered. Only the one note

has been seen.

In March, 1895, appeared a counterfeit \$5 United States silver certificate, series of 1891, no check letter, W. S. Rosecrans, Register, E. H.

Nebeker, Treasurer, portrait of Grant. Few were circulated.

In April, 1895, a photographic counterfeit \$5 Treasury note, series of 1891, check letter D, J. Fount Tillman, Register, D. N. Morgan, Treasurer, portrait of Thomas, made its appearance. But one has been found.

In April, 1895, was discovered a photographic counterfeit \$5 "American Exchange National Bank of New York City" note, series of 1882, check letter F, W. S. Rosecrans, Register, J. N. Huston, Treasurer, charter number 1394, bank number 101793. This is the only one seen.

In April, 1895, appeared a counterfeit \$5" Blackstone Canal National Bank of Providence, R. I." note, series of 1882, check letter B, B. K. Bruce, Register, A. U. Wyman, Treasurer, charter number 1131, bank number 182. This note was peculiar, in that it bore the charter number and signatures of the president and cashier of the Merchants' National Bank of Providence, R. I.

In May, 1895, a pen made counterfeit \$20 Treasury note, series of 1890, check letter A, plate number o, W. S. Rosecrans, Register, E. H. Nebeker, Treasurer, portrait of Marshall, was discovered. But the

one has been found.

In June, 1895, appeared a counterfeit \$10 United States silver certificate, series of 1891, check letter A, W. S. Rosecrans, Register, E. H. Nebeker, Treasurer, portrait of Hendricks. Two men are now under arrest in St. Louis, Mo., for circulating these notes.

The numerous counterfeits produced by the photolithographic and similar processes during the past year confirm the statement made in my report for the preceding year, namely, that this art has made it comparatively easy to imitate the most skillfully engraved designs, and

that the danger from this source was grave and increasing.

I must now call attention to the fact that several of the most dangerous counterfeits of late were printed on paper containing distributed silk threads, so closely imitating the distinctive paper used by the Government as to render it impossible for the public to detect the counterfeit by this means. This suggests that in the use of peculiar tints and combinations of tints, and by having designs prepared and engraved in the highest degree of the art, lies the greatest safety against counterfeiting.

The number of arrests made of persons engaged in manufacturing and handling counterfeit coins shows a great increase in this branch of counterfeiting, which so seriously affects the community. A number of very dangerous counterfeits of the silver coins appeared; none, however, sufficiently deceptive but that detection readily followed at the

hands of experts.

As no complaints were received of the circulation of light-weight gold coins, I am of the opinion that the arrests made by this service of persons engaged in impairing and scaling these coins—mention of which was made in my last report—practically suppressed this practice.

One of the most notable events of the year was the arrest of C. W. Hill, alias J. W. Murphy, a notorious engraver of counterfeit plates (previously convicted in 1862 and 1867 for similar offenses), and his confederates, Russel B. and Lorenzo M. Hoyt, and Samuel Massey, by agents of this service, and the capture of a most complete outfit for counterfeiting United States and national bank notes, including about \$13,000 in counterfeit \$10 legal tender notes and a set of steel plates for printing same; also plates for \$20 United States gold certificates and \$10 national bank notes which had not as yet been used. This capture was all the more important in that it was effected before a single counterfeit had been placed in circulation.

Another case deserving mention was the arrest at Ashley, Ill., on September 20, 1894, of A. H. Hafley and the capture of twenty-one copper plates for printing counterfeit \$5 and \$20 United States silver certificates, about \$3,000 of these counterfeits, as well as presses, inks, paper, and other paraphernalia. H. S. and J. C. Wilson and Lucien Hubbard, confederates of Hafley, were arrested in Arkansas after having passed several of the counterfeit \$20 notes, and all of these men are now serving terms of imprisonment. In this, as in the Hill-Hoyt case above referred to, the community is to be congratulated that the efficient work of agents of this service made possible the arrest and incarceration of these most dangerous criminals and nipped their nefarious business in the bud.

On November 5, 1894, Jacob Evarhardt, alias Samuel Wells, alias "Marsh Market Jake," a noted bank thief, was arrested on Wall street, New York, N. Y., by city detectives, for having in his possession and endeavoring to sell 126,713 United States postage stamps of different denominations (value, \$3,701.43). This division investigated the matter, and the result was Everhardt was taken to Indianapolis, Ind., on an indictment charging him with complicity in the robbery of the New Albany, Ind., post-office. He was tried December 4, 1894, convicted, and received a sentence of two and a half years and fined \$1,000.

On April 8, 1895, a very dangerous counterfeit United States 2-cent postage stamp made its appearance in Chicago, Ill. The agent of this service there who first detected and reported the matter had for some years been cognizant of the intention on the part of certain persons to engage in counterfeiting. Some of the circumstances connected with the appearance of this bogus stamp suggested that these persons were responsible therefor. Efforts were immediately directed toward locating them, with the flattering result that these suspicions were verified, and the entire gang, consisting of Mrs. Tinza McMillan, alias Mrs. M. T. Mack, Warren T. Thomson, and C. O. Jones, alias George Morrison, were arrested, and 70,750 counterfeit 2-cent stamps, 130 counterfeit plates, and other paraphernalia used in their manufacture captured. Having secured the arrest of Mrs. M. T. Mack at Hamilton, Ontario, it was ascertained that under the name of the Canadian Novelty Supply Co., Hamilton, Ontario, shipments of the spurious stamps were made from Buffalo, N. Y. Extradition proceedings were immediately commenced, and on May 14, 1895, I was appointed by the President the agent of the United States, with authority to proceed to Canada and receive the said fugitives from the authorities there for removal to the United States for trial. After successfully outwitting the defendant's attorneys, who had proceeded to Toronto and secured a writ of habeas corpus, I delivered Mrs. Mack into the custody of the United States marshal at Buffalo, N. Y., where she was remanded for trial in the United States court.

At the request of the British authorities, with your approval, I sailed for London, England, June 8, 1895, as a witness from the United States of America in the case against one Mendel Howard, described as a "scientific investigator or experimentalist," for "having in his possession, without lawful excuse, certain plates, stones, paper, and materials for the production of foreign undertakings for the payment of money." On June 21, 1895, the case was before Mr. Justice Wright. Mathews and Mr. Horace Avery prosecuted on behalf of the treasury (England). The prisoner was undefended. There were printing and lithographic presses, photographic cameras and plates and enlarging apparatus, photographic negatives of various sizes, stones for the production of the watermarks, paper closely corresponding to that used in the production of foreign notes, also French, Belgian, German, and American counterfeit bank notes, railway bonds and coupons, \$1 United States notes (Martha Washington vignette), and 30 cent United States postage stamps in various stages of completion. The prisoner said, in reply to the charge, that his sole motive was to discover means by which foreign countries could protect themselves against forgeries. The prisoner did not deny having possession of the notes in evidence. Representatives from France, Belgium, and Germany testified. It was shown that Howard was a member of a band of forgers. The trial lasted two The jury found the prisoner guilty, and Mr. Justice Wright sentenced Mendel Howard to ten years' penal servitude.

In connection with the Mendel Howard case the following letter of

thanks was received:

JULY 19, 1895.

Gough.

SIR: I have the honor to inform you that I am instructed by the Marquis of Salisbury to request, at the instance of the home office, that the thanks of the public prosecutor may be conveyed to Mr. W. P. Hazen, Chief of the United States Secret Service Division, Washington, who was good enough to attend the recent trial of Mendel Howard, and rendered great services to the department of public prosecution.

I should be much obliged if you would kindly have this communication conveyed

to Mr. Hazen.

I have the honor to be, with the highest consideration, sir, your most obedient humble servant.

Hon. RICHARD OLNEY.

The activity and unceasing diligence displayed by the field force of this service (whose duties are hazardous) during the past fiscal year, as demonstrated by the results attained, deserves my earnest commendation. This force, however, should be strengthened, being inadequate to meet the demands made upon it or to successfully cope with the ingenuity and cunning displayed by the largely increased number of persons engaged in the crime of counterfeiting. I must therefore renew and urge that my recommendation for an appropriation of \$100,000 receive favorable consideration and indorsement at your hands, in order that the operations of this service may be carried on with renewed vigor, and thus more effectually stamp out the counterfeiting of United States securities and coins.

The office force has shown ability and faithfulness to duty, but is too heavily taxed, necessitating a detail from the field force; therefore, in my estimate of expenses for the fiscal year 1897. I have asked for an additional clerk at \$1,600 per annum.

Respectfully submitted.

WM. P. HAZEN, Chief.

Hon. John G. Carlisle, Secretary of the Treasury.

# (No. 16.)

# REPORT OF THE BOARD OF UNITED STATES GENERAL APPRAISERS

NEW YORK, November 15, 1895.

SIR: We have the honor to submit the following report of the work of the Board for the eleven months ended October 1, 1895, with an analysis of its statistical parts and such recommendations as would, in our judgment, if adopted, tend to render its administration more efficient.

### REAPPRAISEMENTS.

The following tabulated statement shows the number of reappraisements held by general appraisers and by boards of general appraisers from November 1, 1894, to September 30, 1895, a period of eleven months:

· Reappraisements from November 1, 1894, to September 30, 1895.

# ANALYSIS AND COMPARISON.

For the purpose of analysis and comparison, we present the following tabulated statement of yearly reappraisements since the organization of the Board, embracing a period of four years and eleven months:

Reappraisements	for	four	years	and	eleven	months.
-----------------	-----	------	-------	-----	--------	---------

Year.	Appeals to general ap- praisers.	Appeals to boards of general ap- praisers.
1891	2, 051 1, 918	509 514
1893 1894	2,052 1,403	528 330
1895 (eleven months)	3, 249	783
Total	10, 673	. 2,664

It is to be observed in considering these figures that about four times as many cases are heard by individual general appraisers as are heard by boards, showing that in three fourths of the cases there are no appeals from decisions of general appraisers by either party, or, in other words, that they are satisfactory both to the Government and to the importer. The sharp decline in the number of reappraisements held in 1894 is worthy of note, there having been, in round numbers, only 1,400 cases, or barely two-thirds of the number heard in 1893, showing the intimate relation between the general commercial and industrial distress, which reached its climax during that year, and the business of importing merchandise. But the most significant feature of the table is the increase in reappraisements during the eleven months embraced in this report.

If the current month's cases be estimated and added to those heard in the eleven months ended September 30 the total would be 3,540, but to this must also be added the unusual number of cases "pending action," received and not disposed of, numbering 518, which makes a grand total of 4,058. From this total, however, the sugar cases (unknown to former reports of this character), numbering 887, are to be deducted, leaving 3,171 cases involving general merchandise, or about 50 per cent above the average of cases heard per annum during the four years and eleven months now under consideration.

### SUGAR.

The ad valorem duty on sugar, which has been in operation a little over a year, has increased our work by about 1,000 appeals to reappraisement during that time, a large percentage of which were received the first half of the year. They are at present diminishing rapidly in number, and many of those now received are taken merely for the purpose of correcting values on account of differences in test between the return of the appraiser and that upon which the sugar is actually bought and sold. It is possible that these differences in test may be properly adjusted on original appraisement in future, at least to a considerable extent.

In determining values of sugar we have had access to reliable quotations of actual transactions in the principal markets of the world—New York, London, Hamburg, Cuba, etc.,—as well as the actual con-

tracts upon which purchases for the United States were made, and we are of the opinion that the actual market value of this commodity can

be fairly and accurately ascertained.

There are a great many actual purchases made by United States buyers, and many of these transactions are based upon "out-turn" weight and test, ascertained upon importation to the United States, and appraisements are accordingly so made. Invoices in such cases are, as a natural consequence, made "conditionally," and many importers have incurred additional duties thereon. A protest bearing upon this point has been decided by a Board of General Appraisers, which is now pending on appeal in the United States circuit court. Should the court decide that a conditional invoice is valid, and that no penalty is collectible under such an entry, invoices of sugar from South American ports—sugar which shrinks 8 to 16 per cent on the voyage of importation—could probably be made "conditional" as to shrinkage and importers relieved of a great hardship.

# INCREASE IN NUMBER OF REAPPRAISEMENTS.

Many causes, in addition to the obvious one of the revival and increase of business, have doubtless operated to produce an increase in the number of reappraisements during the last eleven months.

(1) The enlargement of the scope of ad valorem rates of duty must be reckoned as an influence to that end. The ad valorem theory is ideal, but it is not to be denied that ad valorem rates are more easy of evasion than specific rates.

(2) The publication of the results of reappraisements gives important information to customs officials, and so makes them more vigilant, induc-

ing advances, which lead to reappraisements.

(3) Enlarged sources of information afforded by the system of reports of appraisers to the Board, and the analysis and criticism of such reports by the Board has, we believe, increased the efficiency of apprais-

ing officers, and so contributed to the same end.

(4) The intimate relations established with appraisers through reports, correspondence, and the official visits of general appraisers to the different ports has rendered the service more united and harmonious, and hence more efficient in detecting undervaluations. Uniformity is the chief end to be sought in reappraisements; it is even more essential than perfect accuracy in values. Besides, uniformity is attainable, while perfect accuracy is manifestly impossible. In the old system of merchant appraisements there was an entire lack of uniformity, the appraiser of each port acting independently of all the others; whereas the existing system is based on a full knowledge by the appraiser of each port of the results of reappraisements at every other port in the country, rendering uniformity easy of attainment.

(5) Five-sixths of the reappraisements arise at the port of New York. More rigid administration, greater vigilance here, would naturally result in more advances for alleged undervaluation, which in turn would add to the number of reappraisements. The appraiser of this port is an officer of very high merit, and as his term of service continues from year to year, his efficiency increases. It would be strange if an official of so much vigor and so strong a personality should not so impress himself upon his assistants and subordinates as to improve the morale of the force, and thus greatly add to its efficiency. It follows, possibly, that the large increase in the number of reappraisements during the last eleven months is attributable, not so much to more

undervaluations as to more vigilance, and hence greater success in

detecting, and so preventing, their accomplishment.

Still another point is to be noted. There has been, during the period we are considering, a great revival of business. Trade generally has largely increased, and with the increase in the volume of business there has been an advance in values in many lines of merchandise. And as the law requires that imported merchandise shall pay duty on its market value, not on the day of purchase but at the time of exportation, and large quantities of merchandise are contracted for to be shipped at a future time, and importers of purchased goods often neglect to advance them on entry, numerous cases of technical undervaluation have doubtless occurred which may be presumed to have been almost entirely free from the element of fraudulent intent. Finally, the remission of additional or penal duties, however just in certain instances, encourages the undervaluer to hope that he may escape, since guilty intent is hard to prove, and he is hence tempted to continue his transgressions, which swell the volume of reappraisements.

# UNDERVALUATIONS.

Undervaluation is not only an offense against the Government, but an offense against mercantile honor. It not only depletes the revenue, but filches away the business of the honest importer and transfers it to the undervaluer. Nor are small undervaluations less disastrous to honest competing importers than large ones. An advantage of 5 per cent in price is sufficient to control the trade of an empire. It follows that undervaluation is a graver offense than the common one of the evasion of State, county, and city taxation, because in the latter case no question of the destruction of the business of a competitor is involved.

### APPELLATE JURISDICTION OF THE BOARD.

The jurisdiction of the Board in these cases is, however, only appellate. We are not charged with the duty of original investigation, with a view to the discovery of frauds on the revenue, but with the task of patient and laborious inquiry, inspired by a judicial spirit, into the question of alleged undervaluation in each case coming before us on appeal, from the decision of an appraiser.

We venture to express the opinion that undervaluations are not so numerous as they were in former years, and that they do not, as formerly, embrace entire lines of merchandise; and, in support of this

view, we beg to quote from a late Secretary of the Treasury.

# UNDERVALUATIONS TEN YEARS AGO.

In a letter to the Hon. William R. Morrison, chairman of the Committee on Ways and Means of the House of Representatives, dated June 14, 1886, the Hon. Charles S. Fairchild, Secretary of the Treasury, discussed at some length the subject of undervaluations, and in the course of his remarks said:

About 98 per cent of all the silks imported into the country during the past year were entered at New York, and the average of such importations at that port for the past six years has been above 96 per cent. Fully 90 per cent of these importations represented consignments on foreign account and were as a rule undervalued. Additions to the invoice values have been quite generally made by the consignees upon entry and by the officers upon appraisement. Although the percentage of the additions by the appraising officers within the past year have about doubled those of the five preceding years, the values so reached have scarcely equaled the actual cost of production of the merchandise, as shown by the reports of the consul.

FI 95——47

# SECRETARY FAIRCHILD'S VIEWS.

This excerpt is reproduced to show how grave and extensive were the evils of undervaluation less than ten years ago. Mr. Fairchild was so impressed with the fact that he declared that "it is manifest that a satisfactory administration of the present law (relating to silks) is impracticable," and he recommended the substitution of specific for ad valorem duties. Another excerpt from the same letter will throw light on the subject of the reappraisement system then in operation, and afford an explanation of the universality of undervaluation at that time in certain lines of merchandise. Mr. Fairchild said, alluding to the undervaluation of silks:

The results of these reappraisements usually depend upon whether the merchant appraiser selected is identified with the consignment, regular importing or domestic manufacturing interest, so that the proceedings have come to be more or less partisan in character, and do not afford a just or equitable settlement of any disputed question of market value. In fact, they are often a travesty upon fair appraisals and a reproach to the Government.

We do not share the distinguished Secretary's opinion that the administration of a law imposing ad valorem duties on silks, or any other merchandise, is "impracticable," but we admit that it might have been so under the conditions existing at the time he made his famous recommendation.

These excerpts are presented to call attention to and emphasize the fact that since the correspondence referred to the entire method of dealing with the subject of undervaluations has been radically changed. Much must still depend upon administration. But the new system has certainly shown far greater adaptability to the end designed than the old. This may be asserted as beyond controversy among those familiar with both systems.

# AN IMPORTANT INNOVATION.

The right of double appeal, to reappraisement and re-reappraisement, is a great innovation, a revolution which safeguards both parties, the Government and the importer. But the most important feature of the new system, and the one which contrasts it most sharply with the old, is the guaranty of impartiality in the tribunal created to administer it.

There is also ample assurance, we think, of its ultimate complete success, in the multiplicity of its sources of evidence; in the constantly widening experience of its administrators, and in the flexibility of their methods of procedure, which, while disregarding nonessential legal forms, according to the letter and spirit of the statute, are still in harmony with the general principles on which investigations are conducted by courts.

### CLASSIFICATION.

The subject of classification embraces the jurisdiction of the Board, under the provisions of section 14 of the customs administrative act, to review the decision of the collector of customs as to "the rate and amount of duties chargeable upon imported merchandise, including all dutiable costs and charges, and as to all fees and exactions of whatever character (except duties on tonnage)."

The number of protests covering cases of this kind which have been received by the Board for the period intervening between August 1, 1800, and October 1, 1805, peoples 160,877

1890, and October 1, 1895, reaches 169,877.

Of these 125,764 have been decided by the two boards organized by the Secretary of the Treasury pursuant to the authority conferred upon him by law. About 4,000 protests are now on the fall docket which is undergoing consideration at the present time and will be concluded by the 5th day of December, 1895; about 4,000 covered by decisions already made are in the hands of the boards awaiting disposition, and about 36,000 have been placed on the suspended files awaiting judicial determination by the courts of the issues involved.

# SUSPENDED CASES.

As heretofore stated in previous reports made by the Board to the Secretary of the Treasury, it is the practice of the Board, within its discretion and where justice will be promoted, to suspend the consideration of certain cases strictly analogous to any one previously decided by it, from which an appeal has been taken from its decision, either by the importer or the Government, and they are commonly retained on the suspended lists until the questions involved are ultimately settled This saves a vast amount of litigation as well as annoyby the courts. ance to the importers, many of whose cases involve but small amounts in controversy. It also prevents the dockets of the courts from being unduly overcrowded with unnecessary appeals. Of the 36,000 cases now on the suspended lists it should be noted that more than 10,000 of them are embraced in four subjects and can be speedily disposed of when the question involved shall have been judicially determined by the courts.

The following statistics tend to show increasing willingness to acqui esce in the decisions of the Board on classification, and a corresponding decline of the court business arising from appeals, and the comparison would be stronger if made with years previous to the last.

## APPEALS TO COURT FROM THE BOARD'S DECISIONS.

(1) In the southern district of New York the whole number of appeals taken from decisions of the Board since November 1, 1894, is 153, as against 648 appeals for the corresponding period covered by the report of last year. Many of these appeals are upon like claims and contentions, having been thus taken to save the rights of the appellants.

The number of cases tried in the circuit court during the same time

is 71.

The number of cases in which the decisions of the Board of General Appraisers have been affirmed after trial or in which the appeals from the decisions of the Board have been dismissed is 144, as against 98

for the corresponding period last year.

The number of cases in which the decisions of the Board have been reversed is 58. Of these 28 were reversed without argument or by consent, some being so reversed in accordance with decisions rendered in other cases by the circuit court of appeals, and 16 of said number having been decided under the authority of the decision in the Jahn Case, involving the single question of weighers' and gaugers' fees.

The number of cases in which the decisions of the Board have been

affirmed in part and reversed in part is 3.

The number of cases in which appeals have been taken from decisions of the circuit court to the circuit court of appeals during the same time is 37, only two of which have been heard, and in these the Board has been affirmed.

The number of cases heard and decided by the circuit court of appeals during same time is 24, all of these, with two exceptions, being cases appealed prior to last report. Of these 24 cases the circuit court of appeals sustained the decisions of the Board in 13, reversed the decisions of the Board in 10, and in 1 case the decision of the Board was sustained in part and reversed in part.

The number of cases in which orders for further evidence has been

obtained since last report is 98.

The number of cases in which further evidence has been taken since

last report is 45.

The number of returns made by the Board to the circuit court since last report is 120, as against 133 for the corresponding period last year.

(2) In the following districts the data are given since our last annual

report:

# DISTRICT OF MASSACHUSETTS.

Four appeals, all of which are pending. Of the cases pending prior to last report, and which have since been disposed of, 11 in number, 8 have been discontinued by the petitioners; 1 has been dismissed for want of prosecution; in 1 the circuit court reversed the decision of the Board and affirmed the collector's decision, and in 1 the circuit court of appeals reversed the decision of the circuit court and sustained the decision of the Board.

# EASTERN DISTRICT OF PENNSYLVANIA.

Seven appeals, all of which are pending. Of the cases pending prior to that time and since disposed of, 9 in number, the decisions of the Board have been affirmed in 7 and reversed in 2.

# EASTERN DISTRICT OF MICHIGAN.

No appeals. Appeals have been dismissed in 5 cases, which were taken prior thereto. Four cases remain undisposed of.

# NORTHERN DISTRICT OF NEW YORK.

Three appeals, in 1 of which the Board was reversed, in 1 an order of discontinuance was filed, and the remaining case is pending.

# EASTERN DIVISION OF THE EASTERN DISTRICT OF MISSOURI.

Two appeals, both of which are pending. In 1 case, which was brought prior to the last report, the appeal was dismissed by the circuit court of appeals for the eighth circuit.

# NORTHERN DISTRICT OF OHIO.

No appeals. In 1 case, brought prior to last report and subsequently appealed to the circuit court of appeals, the latter court reversed the decision of the circuit court and the Board of Appraisers.

# EASTERN DISTRICT OF LOUISIANA.

No appeals. Three cases have been tried in the circuit court, which were brought prior to last report, in 1 of which the decision of the Board was affirmed; the other 2 have been argued and not decided by the court.

# WESTERN DISTRICT OF MICHIGAN.

No appeals. One case, brought prior to last report, on appeal to the circuit court of appeals was heard and decided, in which the decision of the circuit court was reversed, thus sustaining the decision of the Board.

# SOUTHERN DISTRICT OF OHIO.

No appeals. Thirteen appeals prior to last report are undisposed of. In 1 case on appeal to the circuit court of appeals the decision of the Board was reversed.

# NORTHERN DISTRICT OF ILLINOIS.

Eight appeals, in 1 of which the decision of the Board was affirmed, in 1 reversed, and the other 6 remain undisposed of. Of 8 cases brought prior to the last report the decision of the Board has been reversed in 1, and the remaining 7 are pending.

# NORTHERN DISTRICT OF CALIFORNIA.

Forty-four appeals, all of which are pending, and 38 of which are covered by two issues.

### DISTRICT OF MARYLAND.

We have been unable to procure any information concerning the condition of the public business in this district relating to our duties.

SUGGESTED AMENDMENTS AND MODIFICATIONS OF THE CUSTOMS ADMINISTRATIVE ACT OF JUNE 10, 1890.

Note.—References are to 26 United States Statutes at Large, chap-

ter 407, pages 131-142, inclusive.

1. Consular authentication of invoices.—In view of the inconvenience which has resulted from the enforcement of section 3 of said act, it is suggested that this section be amended by inserting after the words "consular district," in line 3 (p. 131), the following: "Or adjoining district, provided the United States consular officer in such adjoining district is nearer or more accessible."

2. Additional duties and penalties for undervaluation.—The provision in section 7 imposing an additional duty equal to 2 per cent of the total appraised value for each 1 per cent that such appraised value exceeds the value declared on entry has not operated satisfactorily and justly as a rule. In instances it has largely exceeded the value of the merchandise, where, too, there was no evidence of willful neglect or intentional fraud. In other cases the undervaluation was clearly the result of mistake or ignorance, and its imposition is a manifest hard-These circumstances induced the Department, under the advice of the Attorney-General, to adopt the practice of remitting additional duties in many cases, and while we doubt not the utmost care has been exercised by the Department with a view to limiting such remissions to cases where there was no willful negligence or fraudulent intent on the part of the importers, we are nevertheless satisfied that the system is open to abuse and is calculated to encourage rather than deter undervaluation or to prevent recklessness or carelessness in the invoicing and entering of merchandise in many cases. With a view

to avoiding such abuse, and at the same time providing a necessary and sufficient exemplary duty for undervaluation for lack of diligence or care in invoicing or entering merchandise, or undervaluation without willful negligence or fraudulent intent, and also to insure a just punishment for excessive or fraudulent undervaluation, we recommend—

(1) That section 7 be amended as follows: Commencing at line 16, (p. 134) by striking out all of the section after the words "to be appraised" and substituting the following: "And if the appraised value of any article of imported merchandise shall exceed by more than 10 per centum the value declared in the entry, there shall be levied, collected, and paid, in addition to the duties imposed by law on such merchandise, an additional duty of 1 per centum of the total appraised value for each 1 per centum that such appraised value exceeds the value declared in the entry, but the additional duties shall only apply to the article or articles in each invoice that are undervalued, and shall not exceed 50 per centum of the appraised value of such article or articles. Such additional duties shall not be construed to be penal, and shall not be remitted, nor shall they be refunded in the case of the exportation of the merchandise, and shall not be subject to the benefit of drawback: Provided, That nothing in this section shall restrict the powers of the general appraisers to review, according to law, the valuations made by the local appraisers, and if such appraised value of any merchandise shall exceed the value declared in the entry by more than 50 per centum such entry shall be held to be presumptively fraudulent, and the collector of customs shall seize such merchandise and proceed as in cases of forfeiture for violations of the customs laws," etc.

(2) Or in the event the last-named amendment should not meet with the approval of the lawmaking power, that said section be amended so as to limit the additional duties imposed by it to 100 per cent; that is to say, by inserting in line 4 of said section (p. 135), after the words "declared in the entry," the following: "Provided, however, That such additional duty shall in no case exceed 100 per centum of the

appraised value."

3. Statement of cost of production.—Experience has shown that section 8 of the act has not fulfilled the purpose for which it was intended. On the contrary, the required statements of cost of production of goods consigned for sale on foreign account have been generally defective, insufficient, and consequently misleading, affording but little, if any, light upon the question of market or dutiable value of the merchandise, and have indeed been a source of annoyance rather than assistance in practical administration. In this view, we recommend that the section be repealed.

4. Additional duty on unusual coverings.—The provision in section 19 of the act imposing additional duty on "any unusual article or form designed for use otherwise than in the bona fide transportation of such merchandise to the United States" has proved burdensome and vexatious in administration, with no apparent compensating benefits to any interest. We therefore recommend that said section be modified so that such coverings shall pay single duty at the rate to which they shall be subject if imported separately, and not less than that imposed upon

their contents.

5. The relation of United States consular officers to the Treasury Department.—The present circuitous method of communication between the Treasury Department and United States consular officers through the Department of State in matters relating to the customs is often attended with such delay as to render it practically useless as a means

of information. The duties of our consular officers are connected chiefly with our foreign commerce, and in many cases relate principally to our customs revenue in the authentication of invoices, etc., and if it were so arranged that they could be communicated with directly and speedily their usefulness would be largely promoted in obtaining and furnishing much-needed and valuable information respecting the market value, method of production, and proper classification of imported merchandise. In this view, we earnestly recommend that the law be so amended as to establish closer relations between the Treasury Department and all our consular officers, to the extent at least of empowering the Secretary of the Treasury to correspond directly and instruct such officers in reference to matters relating to the administration of the tariff and customs laws.

Some of the above amendments (with others) have heretofore been suggested in the Board's annual reports, and most of them have been approved by the Secretary of the Treasury in his annual reports. The enlarged experience of members of the Board in these matters of customs administration confirms them in the soundness of their own and the Secretary's views in the premises.

Yours, respectfully,

GEO. C. TICHENOR,
HENDERSON M. SOMERVILLE,
CHARLES H. HAM,
J. A. JEWELL,
J. B. WILKINSON, Jr.,
F. N. SHURTLEFF,
THAD. S. SHARRETTS,
GEORGE H. SHARPE,
WILBUR F. LUNT,

General Appraisers.

The SECRETARY OF THE TREASURY, Washington, D. C.
