## Fiscal year 1899.

## The revenues of the Government for the current fiscal year are thus estimated upon the basis of existing laws:

| From custom | \$195, 000, 000.00 |
| :---: | :---: |
| From internal revenue | 270, 000, 000.00 |
| From miscellaneous sources. | 20,000, 000.00 |
| From Postal Service. | 92, 874, 647. 37 |
| Total estimated reven | 577, 874, 647. 37 |

## The expenditures for the same period are estimated as follows:

| For the civil establishnient. | \$93, 000, 000.00 |
| :---: | :---: |
| For the military establishment | 250, 000, 000.00 |
| For the naval establishment. | 60, 000, 000.00 |
| For the Indian Service. | 12, 000, 000.00 |
| For pensions.. | 141, 000, 000.00 |
| For interest on the public debt. | 41, 000, 000.00 |
| For Postal Service. | 92, 874, 647. 37 |
| Total estimated expenditures. | 689, 874, 647. 37 |
| Or a deficit of | 112,000,000.00 |

Fiscal year 1900.
It is estimated that upon the basis of existing laws the revenues of the Government for the fiscal year 1900 will be:

The estimates of appropriations required for the same period, as submitted by the several Executive Departments and offices, are as follows:
Legislative establishment............................................................. \$4, 476, 995.86
Executive establishment-

| Executive proper | \$239, 980.00 |
| :---: | :---: |
| State Department. | 157, 820.00 |
| Treasury Dėpartment. | 9, 661, 040.00 |
| War Department | 2, 373, 866.00 |
| Navy Department | $502,280.00$ |
| Interior Departmen | 4,890, 284.00 |
| Post-Office Departmen | $950,190.00$ |
| Department of Agricul | 3,127, 722.00 |
| Department of Justice | 231, 950.00 |
| Department of Labor | 172, 980.00 |

Judicial establishment
Foreign intercourse.
$707,620.00$
Military establishment
1,833, 028. 76
Naval establishment
Indian affairs
$145,119,431.51$

Indian affairs
$39,114,652.08$
7, 069, 316. 41
Pensions.........
Legislative
$145,233,830.00$

Treasury Department..................................... 5, 844, 739.97
War Department. 42, 852, 991.20
Navy Department

## OPERATIONS OF THE TREASURY.

The aggregate receipts for the fiscal year, under warrant, as shown by the report of the Treasurer of the United States, were $\$ 738,549,255.20$, and the disbursements, $\$ 827,588,124.80$. There was consequently a 'decrease of $\$ 89,038,869.60$ in the general Treasury balance, which stood at $\$ 864,790,237.71$ at the opening of the year and at $\$ 775,751,368.11$ at the close. Besides the ordinary revenues, there were receipts on account of the public debt which swelled the total income available in the fiscal operations of the Government to $\$ 481,612,255.20$, while corresponding additions to the ordinary expenditures brought the total on this side of the account up to $\$ 543,561,104.80$, and created a deficiency of $\$ 61,948,849.60$ as the net result. These figures, however, do not include any part of the loan of $\$ 200,000,000$, the proceeds of which had begun to come in before the close of the year, though none were formally covered into the Treasury until afterwards. On the side of the receipts is included the sum of $\$ 64,751,223.75$, realized from the sale of the Union Pacific and Kansas Pacific railroads, while, on the other hand, the expenditures are increased by $\$ 29,850,952$, disbursed in the redemption of Pacific Railroad subsidy bonds.

A better view of the results of the year's fiscal operations is afforded by the changes in the assets of the Treasury. The total holdings available in this branch of the business show only the insignificant falling off from $\$ 283,295,424.23$ to $\$ 275,747,803.17$. So unusual a variance as this between the accounts of the Department and the actual condition of the Treasury is due chiefly to the receipts from the new loan, on the one hand, and to unexpended advances to disbursing officers on the other.

In the character of the assets there was such an improvement as to constitute a substantial gain in strength. The changes were an increase in gold and in deposits with national banks, while the losses were in
silver and Treasury notes. With insignificant interruptions, the free gold, which stood at $\$ 139,867,158.57$ at the beginning of the year, continued to increase until it reached $\$ 181,240,388.81$ on May 4, 1898. After this, the extraordinary expenditures caused by the war, together with the depletion of the other forms of cash, compelled the use of gold in current disbursements, and drew down the Treasury reserve, by June 18 , to $\$ 163,474,057.32$. After that date the proceeds of the loan began to afford relief, and the reserve grew rapidly, until it reached $\$ 245,063,795.51$ on October 7, 1898, the highest point this fund has ever attained. Since then the necessities of the situation have required an enlarged use of the coin in disbursements, which has had the inevitable result of diminishing the holdings, though only to an insignificant extent.

By forethought and care an ample stock of notes of suitable denominations was provided to meet the demand for the annual movement of the crops, and the difficulties presented by this task in former years have been in large part avoided. Within forty days after the 1st of September, Chicago alone was supplied with $\$ 5,150,000$ in small notes in exchange for larger denominations. In the twelve months ended September 30 last the amount of outstanding notes of the denomination of $\$ 20$ and under increased from $\$ 861,433,826$ to $\$ 903,090,863$, while the increase of the gold coin in circulation in the same period, all of course of the like denominations, amounted to $\$ 94,551,059$, making a total addition to such currency of $\$ 136,208,096$.

Although the net gold in the Treasury during the past year has exceeded the needs of the Government, having been greater, both absolutely and in proportion to other moneys, than ever before, it was found possible, up to the middle of October, to accept gold coin to the extent of over fifteen millions of dollars in exchange for notes of small denominations, which were needed to facilitate the business of the country.
The first proceeds of the popular loan of $\$ 200,000,000$ were received on the 14th of June, and from that date forward the inflow of money from this source has been rapid and constant. The total amount received up to November 1 was $\$ 195,444,187.62$.
With the object of averting the possibility of financial stringency, which might have been apprehended as the result of the drain upon the currency in circulation, the payment of the interest due October 1 on the 4 per cent loan of 1907 was anticipated, the maturing coupons being made payable on September 10, while the checks for the interest on the registered bonds were sent out September 20. Like anticipation was also made in the case of the interest falling due November 1. The total amount of the payments thus advanced was $\$ 9,815,116.85$. With like purpose, under the circular of September 3, 1898 , the Pacific Railroad bonds, which will fall due on January 1, 1899, amounting to $\$ 14,004,560$, were made payable, principal and interest, in full, with a rebate of one-half of 1 per cent. It was also directed that a large share
of the proceeds of the popular loan be deposited in national banks, so that these funds, while at all times available for use, might, until needed, remain in the channels of trade. The deposits in national banks were thus increased by $\$ 66,775,610.88$ between May 31 and October 31.
The effect of these measures has proved in all respects satisfactory.

## COINS AND COINAGE.

The Director of the Mint, in his report for the fiscal year ended June 30, 1898,* shows in detail the operations of the institutions under his charge, and also statistics of coinage, production, and monetary conditions of foreign countries.

Deposits.

The receipts and deposits of bullion at mints and assay offices, including redeposits, aggregated $\$ 215,566,261.54$, of which $\$ 198,740,492.23$ was gold and $\$ 16,825,769.31$ silver, classified as follows:

Gold:
Domestic bullion................................................................... \$69, 881, 120.57
Mutilated and uncurrent domestic coin .................................... 1, 187, 682. 99
Foreign bullion and coin.................. ...................................... 73, 687, 447. 90
Old plate and jewelry ............................................................. 2, 236, 943. 37
Total original deposits......................................................... 147, 693, 194. 83
Redeposits ..................................................................... 51, 047, 297. 40
Total deposits ................................................................ 198, 740, 492. 23

| Silver (coinage value) : |  |
| :---: | :---: |
| Domestic bullion. | $6,484,364.07$ |
| Mutilated and uucurrent | 5, 443, 436.13 |
| Foreign bullion and coin. | 717, 227. 19 |
| Old plate and jewelry.. | 616, 572. 72 |
| Total original deposits. | 13, 261, 600.11 |
| Redeposits................ | 3,564, 169. 20 |

The deposits of gold were greater than in any previous year of our history. In but one other year have the original deposits exceeded $\$ 100,000,000$, the exception being the fiscal year ended June 30, 1881, when they were $\$ 130,833,102.45$.

## Purchases.

Silver bullion purchased under the provisions of section 3526, Revised Statutes of the United States, for coinage of subsidiary silver aggregated 193,522.30 fine ounces, costing $\$ 107,741.28$.

## Coinage.

The silver dollars coined were from bullion purchased under the act of July 14, 1890.
The total coinage of silver dollars from bullion purchased under act of July 14, 1890, from August 13, 1890, to July 1, 1898, was $\$ 78,751,257$, containing $60,909,175.32$ fine ounces, costing $\$ 58,460,975.54$, giving a seigniorage of $\$ 20,290,281.46$.
In addition to the above coinage, there were manufactured at the mint at Philadelphia for the Government of Costa Rica 20,000 twenty-colone gold pieces, of the value of $\$ 186,141.02$, and for the Government of Santo Domingo the following silver pieces:

## Recoinage.

Uncurrent gold coin of the face value of $\$ 1,198,860$, and mutilated silver coin of the face value of $\$ 6,109,772.32$, were received, as follows:

| Transferred and purchased. | Face value. |  |
| :---: | :---: | :---: |
|  | Gold coin. | Silver coin. |
| Transferred from the Treasury.... | $\$ 549,351.00$ $649,509.00$ | \$6,104,140.80 |
| Total... | 1, 198, 860.00 | 6,109,772.32 |

This represents in new gold coin $\$ 1,187,683.99$, and new silver dollars $\$ 5,443,436.13$, or in new subsidiary silver coin $\$ 5,820,159.16$.

Of the subsidiary silver coinage, $\$ 5,962,141$ were eoined from worn and uncurrent silver coin transferred from the Treasury for recoinage, and $\$ 520,663$ from silver purchased under provisions of section 3526 , Revised Statutes, for the subsidiary silver coinage, on which latter the seigniorage was $\$ 286,311.22$.

## Silver balances.

The balance of silver bullion on hand at the mints for the coinage of silver dollars, subsidiary silver coins, and for payment of deposits of silver bullion in fine bars, July 1, 1898, was :

| Items. | Fine ounces. | Cost. |
| :---: | :---: | :---: |
| Purchased under act of July 14, 1890 .................................... | 107, 701, 936.56 | \$97, 407, 490.82 |
| For subsidiary silver coinage at mints ................................. | 1, 041, 122. 64 | 1, 356, 316.97 |
| For sulsidiary silver coinage at assay offices...................... | 201, 494.06 | 122,815.17 |
| At United States assay office, New York, for payment of deposits in fine bars.. | $419,951.13$ | 466, 612. 37 |
| Total............................................................................... | 109, 364, 504.39 | 99, 353, 235.33 |

## Seigniorage.

Including the balances on hand at the mints July 1, 1878, the net seigniorage on the coinage of silver from that date to June 30, 1898, was $\$ 88,182,815.37$.

## Minor coinage.

Of the minor coins manufactured during the year, $\$ 1,148,238.81$ were from new material and $\$ 341,245.30$ from old and uncurrent minor coins transferred from the Treasury for recoinage.

The amount of minor coins transferred for reissue was $\$ 198,900$.
The total amount of minor coins outstanding July 1, 1898, was $\$ 27,311,402.01$.

## Bars manufactured.

During the fiscal year there were manufactured gold bars of the value of $\$ 92,187,391.67$, and silver bars, $\$ 7,667,887.90$.

Silver quotations.
The highest quotation for silver 0.925 fine during the year in the London market was $27 \frac{3}{4}$ pence, equal to $\$ 0.60831$ per ounce fine in United States money; the lowest quotation was $23 \frac{5}{8}$ pence, equivalent to $\$ 0.51789$. The average price for the year was $26_{\frac{5}{16}}$ pence, equivalent to $\$ 0.57675$. The bullion value of the United States standard silver dollar, at the highest price for the year, was $\$ 0.47040$, and at the lowest, $\$ 0.40055$, and at the average price, $\$ 0.44607$.

The commercial ratio of gold to silver at the average price was 1 to 35.84 .

The number of grains of pure silver at the average price that could be purchased with a United States silver dollar was 832.20, equivalent to 1.73 fine ounces.

## Earnings and expenditures.

The expenditures necessary to maintain the various institutions connected with the Mint Service during the fiscal year were $\$ 1,263,133.02$.

The earnings from all sources during the same period were $\$ 4,695,797.96$, showing a surplus of earnings over expenditures of $\$ 3,432,664.94$.

## Imports and exports.

The net imports of gold during the fiscal year were $\$ 104,868,476$, as against $\$ 44,609,841$ for the fiscal year 1897.

The net silver exports were $\$ 24,822,146$, as against $\$ 32,636,835$ for the previous fiscal year.

## Industrial arts.

The value of gold and silver consumed in the industrial arts by the United States during the calendar year 1897 was: Gold, $\$ 11,870,231$; silver, coining value, $\$ 11,201,150$; a total of $\$ 23,071,381$.

There were consumed in new material, in the manufacture of these bars, gold, $\$ 7,184,822$; silver, $\$ 9,200,497$.

## Metallic stock in the United States.

The total metallic stock in the United States on July 1, 1898, was Gold, $\$ 861,514,780$; silver, $\$ 637,672,743$; a total of $\$ 1,499,187,523$.

## Production of gold and silver.

The estimated production of the precious metals in the United States during the calendar year 1897 was:

| Metals. | Fine ounces. | Commercial value. | Coining value. |
| :---: | :---: | :---: | :---: |
| Gold. | 2,774,935 | \$57,363,000 | \$57, 363, 000 |
| Silver............................. | 53,860,000 | 32,316,000 | 69, 637,000 |

The estimated production of the precious metals in the world during the calendar year 1897 was:

| Metals. | Fine ounces | Commercial value. | Coining value. |
| :---: | :---: | :---: | :---: |
| Gold | $11,489,291$ | $\$ 237,504,800$ | $\$ 237,504,800$ |

World's coinage.
The total coinage of gold and silver by the various countries of the world during the calendar year 1897 was as follows:

Gold.
\$437, 719, 345
Silver 167, 760, 297

Total
605, 479, 642
The total metallic stock and uncovered paper in the world, as estimated on January 1, 1898, was:

## Legislation recommended.

Wastage.-Section 3542 of the Revised Statutes limits the amount allowed for wastage by the operative officers in the Mint Service in the case of the melter and refiner to one-thousandth part of the gold and two-thousandths part of the silver, and in the case of the coiner to one-
half thousandth part of the gold and one-thousandth part of the silver, delivered to each. Experience has demonstrated that one-half of this allowance would be ample to cover the necessary loss involved in their operations upon these metals. It has previously been suggested that the legal allowance be reduced accordingly, and the recommendation is repeated.

Foreign coin.-The amount of foreign gold coin deposited at the mints and assay offices during the year was $\$ 47,210,078$. Onder the law these coins can not be paid out again, but must be melted. If the Secretary of the Treasury were permitted, in his discretion, to hold these deposits, he could frequently use them to supply the demand for gold for exportation, instead of delivering domestic coins or bars. Our own coin frequently goes abroad and remains for years in foreign treasuries. There is no reason why every foreign coin received at our Treasury should be imperatively required to be melted.

Silver coinage. -The only provision of law now existing by which any increase in the stock of fractional coin in the country can be made is that (sec. 3545, Rev. Stat.) authorizing the purchase of the small amount of silver contained in and separated from gold deposits.

The amount of silver thus obtained last year from gold deposits was 184,595.39 fine ounces, which would be sufficient to coin about $\$ 255,000$ of our fractional coin. This is wholly inadequate to meet the actual demand. There has been in the past a large stock of fractional coin in the Treasury, accumulated after the resumption of specie payments. During the period of paper money our stock of silver coin was exported principally to Central and South American countries, where it passed at its face value; but upon resumption of specie payments and the passage of the act of June 9, 1879, providing for the redemption of fractional silver at its face value, these coins returned in such quantities that, with the new coinage executed, the fractional silver becarne redundant and accumulated in the Treasury. For the last ten years the country has been absorbing that stock at the rate of from $\$ 1,500,000$ to $\$ 2,000,000$ per year, and this year the demand has been exceptionally strong. The amount of fractional silver coin held by the Treasury July 1, 1897, was $\$ 16,201,960$; on July $1,1898, \$ 12,070,690$. This stock has, at present, November 18, been reduced to $\$ 7,122,506$, much of which is so worn as to be unfit for circulation.

The amount available, distributed among the several subtreasuries, gives but small stock to each, and some denominations are exhausted. The Secretary of the Treasury should be authorized to recoin this uncurrent stock, and any such coin which may hereafter accumulate in the Treasury, the difference between its face value and the new coin it will make to be paid out of any moneys in the Treasury not otherwise appropriated. Further provision should be made to add to the stock of fractional coin, and to that end it is suggested that the Secretary of the Treasury be authorized to use any silver bullion now in
the Treasury for the coinage of such denominations as may be required from time to time to meet the demand from the different sections of the country. With an ever-increasing population, which will be added to in the near future by the acquisition of additional territory, the demand for fractional silver coin will be such as to make it essentially necessary that the stock should be increased.

Discontinuance of Carson mint and St. Louis assay office.-The total deposits of gold at the Carson mint during the last fiscal year were of the value of only $\$ 530,438.87$. The expense of conducting the iustitution was $\$ 37,578.41$, in addition to which the Government paid the express charges on the bullion to the San Francisco mint in preference to conducting coinage operations at Carson with so small a supply. The cost of maintaining the institution was therefore above 7 per cent of the value of the gold handled there. The total gold product of Nevada in the calendar year 1897 was $\$ 2,976,400$, from which it appears that four-fifths of the product of that State are more conveniently deposited elsewhere than at Carson, and it may be inferred that the remainder might go to other places without serious inconvenience to the producer. The deposits now made at Carson could be received and treated at the San Francisco mint without increasing the expense of the latter institution to exceed $\$ 1,000$ per year. It is, therefore, recommended that the mint at Carson be discontinued. If it is considered desirable to continue an assay office there, and the institution can be relieved of the care of the silver dollars now on storage in it, the annual outlay can be reduced to about $\$ 12,000$.
The assay office at St . Louis received during the last fiscal year gold deposits amounting to $\$ 105,960.98$, and in the previous year $\$ 97,938.26$. In each case old jewelry furnished one-half of the sum. The office is scarcely of sufficient importance to the mining industry or to the general public to warrant the expense of maintaining it, which last year was about $\$ 4,700$. The saving which might be made by abolishing this office and the mint at Carson would assist in meeting the new outlay incurred by establishing an office at Seattle.
Building for Seattle assay office.-The assay office at Seattle, during the first four months after opening for deposits, has received $\$ 5,478,550$ worth of gold. It is probable that it will be one of the most important offices of the Mint Service. It is now located in a rented building, without such provisions for the safe-keeping of treasure as ought to be provided. It is, therefore, recommended that Congress provide for the erection of a suitable building there for the assay office. An appropriate building can be provided at a cost of not over $\$ 50,000$.

Deficiencies in the bullion accounts of the mints.-Attention is respectfully called to the deficits in the bullion accounts of the mints at San Francisco, Philadelphia, New Orleans, and Carson, amounting in the aggregate to $\$ 530,681.67$.

The deficits in the accounts of the mint at San Francisco amounted FI 98-
to $\$ 416,587.90$. Of this sum, $\$ 152,327.03$ occurred in 1856 , and the remainder, $\$ 264,260.87$, between 1864 and 1871 , all arising from excessive wastage of the operative officers, loss on sale of sweeps, annual assay coins being used in the purchase of supplies, and embezzlement of employees.

The amount of the deficit in the accounts of the mint at New Orleans is $\$ 25,000$, and is alleged to be due to the destruction of that sum in currency by fire in the cashier's vault in June, 1893.

The deficit in the accounts of the mint at Philadelphia is $\$ 13,543.82$. Of this sum, $\$ 12,810.82$ is a balance of gold bullion embezzled by the weigh clerk in 1893 , not recovered, and $\$ 733$, a shortage found in the account of silver dollars on storage.

The deficit in the bullion accounts of the mint at Carson is $\$ 75,549.75$, and is due to the embezzlement of that sum by former employees in the melter and refiner's office, and was effected by the abstraction and substitution of metal of low fineness in gold for metal of a higher fineness.

The weigh clerk of the mint at Philadelphia, guilty of embezzling gold bullion, and the assistant melter and refiner and the silver dissolver at the Carson mint are now undergoing terms of imprisonment for their crimes.

These deficiencies are classed as unavailable assets. Their designation, year after year, as assets of any kind is objectionable. The amounts they represent are gone beyond reasonable possibility of recovery. It does not comport with the accuracy which should characterize good bookkeeping and well-ordered accounts and the example of precision which the Government should at all times maintain that these so-called assets, which are not such in any sense of the word, should be kept on the books for periods varying from five to more than forty years. It is recommended that Congress relieve the Treasurer of the United States and the respective mints from carrying the amount of these deficits in their accounts.

## BUREAU OF ENGRAVING AND PRINTING.

If any justification were needed for the maintenance of an establishment of this kind in connection with the Treasury Department, it was fully supplied by the prompt manner in which the Bureau furnished the stamps and securities required under the war-revenue act. This act was approved June 13, 1898, and took effect immediately upon its passage as to the change of tax on beer, tobacco, cigars, cigarettes, and snuff, thus practically destroying the three-months' stock of stamps in the hands of collectors of internal revenue and the Commissioner of Internal Revenue, besides completed and incompleted work in the Bureau. Stamps for issue under the new act were delivered to the Commissioner of Internal Revenue by the Bureaiu on the morning of the 14 th of June, 1898. As to the stamps for special taxes, for documents, for
medicines, and for mixed flour, the law allowed but seventeen days for the engraving and printing and distribution thereof. Within this time the Bureau had furnished a sufficient number of stamps to supply the immediate demands of the public, and by August 1, 1898, had furnished all that were required by law as a reserve stock in the hands of collectors and the Commissioner of Internal Revenue. By July 1, 1898, the Bureau was delivering $20,000,000$ documentary and proprietary stamps alone daily, and by September 17, 1898, the Commissioner of Internal Revenue had ordered their delivery stopped.
The Bureau was equally as prompt in the delivery of the bonds required under this act, supplying the several denominations in quantities required by the Department and upon the dates set for the delivery of the same.
The amount of work required by the exigencies existing could only have been executed within the time allotted by extraordinary exertions. It was fortunate that the Government had an establishment for the execution of this work so thoroughly equipped as the Bureau, under the supervision of its own officers, who were responsible to the Secretary of the Treasury for the prompt and efficient performance of duty. Had the Department been required to procure the stamps and securities from private parties, it would not have been able to control the work to the extent it did, and it is believed would not so promptly have received the needed stamps and securities.

The officers and employees of the Bureau are entitled to the thanks of the Department for the exertions made in this emergency. Many of the expert employees of the Bureau, whose services could not be duplicated, cheerfully worked from sixteen to eighteen hours a day.

In addition to the special service rendered, as above described, the Bureau furnished, in an economical manner, the securities and stamps required in the transaction of the regular business of the Department.

The recommendation made in my last annual report, that Congress make provision for the entire expense of the work of the Bureau by direct appropriations, instead of, as at present, requiring a part of them to be paid by transfer of funds from other appropriations on bills rendered, is renewed.
It is desired to emphasize the necessity for an appropriation for a substantial brick outbuilding for the Bureau, to take the place of the temporary wooden sheds now used. This matter has heretofore been called to the attention of Congress, and full explanation of the necessity for the appropriation has been made in the annual reports of the Secretary for a number of years.

PUBLIC MONEYS.
The monetary transactions of the Government have been conducted through the Treasurer of the United States, 9 subtreasury officers, and

194 national-bank depositaries. The amount of public moneys held by them on June 30, 1898, including those to the credit of the Treasurer's general account and United States disbursing officers, was $\$ 38,743,017.17$, an increase since June 30,1897 , in amount of holdings of $\$ 22,784,283.35$.

Since the beginning of the present fiscal year deposits on account of the new 3 per cent war loan have been received to the amount of $\$ 200,000,000$, and in order to avoid a dangerous stringency which might be created by a too-rapid absorption of funds into the Treasury, a large number of national banks were designated, under section 5153, Revised Statutes, as depositaries of public moneys, and public funds deposited therewith temporarily, thereby increasing the holdings of such depositaries to an amount exceeding $\$ 90,000,000$.

## NATIONAL BANKS.

During the existence of the national banking system up to the close of the year ended October 31, 1898, 5,151 national banks were organized. The number in operation is 3,598 . Of the closed associations, 1,194 were placed in voluntary liquidation by the shareholders, and 359, insolvent, in charge of receivers. On October 31, 1897, there were in active operation 3,617 associations. During the past year 56 were organized, 69 placed in voluntary liquidation, and 7 failed, including one of the banks in liquidation, above referred to, making a net reduction during that period of 19 banks.

The authorized capital stock of the banks on October 31, 1898, was $\$ 624,552,195$; the circulation outstanding, $\$ 239,546,281$, of which $\$ 210,045,456$ is secured by bonds and $\$ 29,500,825$ by lawful money deposited with the Treasurer of the United States on account of liquidating and insolvent associations, and those reducing circulation. A comparison of the circulation account on October 31, 1898, with October 31, 1897, shows an increase of $\$ 9,582,771$ in the total amount of circulation outstanding, and of $\$ 6,119,776$ in circulation secured by bonds.

The capital of the 56 banks organized during the past year aggregates $\$ 9,665,000$. Geographically, the Middle States lead both in the number of banks and the aggregate capital, viz, 22 and $\$ 3,960,000$, respectively. Seven were organized in Ohio, 6 in Iowa, 5 in Illinois, 2 in Missouri, and 1 each in Indiana and Wisconsin. In the aggregate amount of capital the Pacific States are second. Two banks in California were capitalized in the aggregate for $\$ 3,500,000$, and the new and first bank in Alaska for $\$ 50,000$. Sixteen associations were formed in the Eastern States, with an aggregate capital of $\$ 1,185,000$; Pennsylvania leading with 8, followed by New York, 4; New Jersey, 2; Delaware and Maryland, 1 each. In the Southern division, 8 banks, with capital of $\$ 620,000$, were organized ; Texas leads with 4, and 1 bank was organized in each of the States of Virginia, North Carolina, South Carolina, and

Kentucky. The banks created in the Western States number 6, and are capitalized for $\$ 300,000$. Three of these banks are in the Indian Territory, 2 in Kansas, and 1 in Oklahoma. The only bank organized in the New England States is located in New Hampshire, and has a capital of $\$ 50,000$.

Since July 12,1882 , the date of the passage of the act providing for the extension of the corporate existence of national banks, the charters: of $1 ; 670$ have been extended, their capital aggregating $\$ 407,531,115$. In the past year the corporate existence of 20 associations, with capital aggregating $\$ 2,145,000$, was extended. Three associations, the corporate existence of which expired, liquidated, although two of them reorganized under different titles. During the coming year 22 banks, with capital amounting to $\$ 3,155,000$, will reach the close of their corporate existence. The capital and circulation of the 1,134 banks, the charters of which will expire during the ten years ending with 1908 , amount, respectively, to $\$ 162,418,150$ and $\$ 44,293,753$.

The capital of the 69 banks placed in voluntary liquidation during the year, exclusive of that of the one subsequently declared insolvent, amounted to $\$ 12,509,000$, and the capital of the 7 insolvent associations $\$ 1,200,000$.

The last reports of condition of the 3,585 national banks, made September 20,1898 , show that the aggregate resources were $\$ 4,003,511,044.87$, an increase since October 5, 1897, of $\$ 298,377,337.16$. Loans and discounts, including overdrafts, have increased $\$ 105,743,496.64$, and they now aggregate $\$ 2,172,519,610.54$. Government securities on hand and deposited with the Treasurer of the United States to secure circulation and public deposits amount to $\$ 358,140,277$, an increase of $\$ 80,904,357$. Gold holdings have increased $\$ 54,775,318.33$, but, owing to the reduction of the amount of currency certificates, the net increase in amount of specie and other lawful money is but $\$ 31,839,827.34$, the total currency held amounting to $\$ 420,722,458.39$. The banks' individual deposits have risen to $\$ 2,031,454,540.29$, an increase during the year of $\$ 178,105,411.79$. The surplus and profit accounts have increased $\$ 5,818,205.60$. The reduction of 25 in the number of reporting banks is accompanied by a reduction of $\$ 9,970,200$ in capital and $\$ 4,436,904.50$ in circulation.

The number of banks and capital stock in each geographical division, as shown by the reports on September 20, are as follows:

The aggregate resources of the 5,145 banks and banking institutions incorporated under State authority, including those of 758 private
banks and bankers, amount to $\$ 4,631,328,357$; loans and discounts, $\$ 2,480,874,360$; and deposits, $\$ 3,664,797,296$. Combining these amonnts with similar items in the national bank statements, July 14, 1898, the following results are shown : Aggregate resources, $\$ 8,609,003,802$; loans and discounts, $\$ 4,632,632,015$; and deposits, $\$ 5,741,023,872$.

## LOANS AND OURRENOY.

The interest-bearing debt July 1, 1897, included unmatured United States bonds outstanding in the amount of $\$ 847,320,000$. No material change appeared in the debt statements in the fiscal year ended June 30, 1898, but on June 13 a circular was published inviting public subscriptions for $\$ 200,000,0003$. per cent bonds authorized by the act of June 13, 1898.

The public response to this invitation was not confined to any section. of the country, and daring the thirty days prescribed in the circular as the period for subscriptions there were received 232,224 , of $\$ 500$ and less, accompanied by full payment for the bonds, and over 88,000 , in sums greater than $\$ 500$, accompanied in each instance by a deposit of 2 per cent of the amount subscribed. The total of subscriptions of $\$ 500$ and less was $\$ 100,444,560$, and the total in greater amounts than $\$ 500$, including certain proposals guarantying the loan, amounted in the aggregate to more than $\$ 1,400,000,000$.

As provided by the circular, the allotment of bonds to subscribers of amounts greater than $\$ 500$ began immediately upon the close of the books July 14, the smallest subscriptions being first allotted until those of $\$ 4,400$ and less had been reached. There was a residue, ascertained to be about two million and a half dollars, which was allotted pro rata among the subscribers of $\$ 4,500$, each subscriber for that amount being awarded the sum of $\$ 1,300$. On page Lxxx will be found a statement showing the number of subscribers, by groups, for amounts over $\$ 500$, and $\$ 500$ and less.

The bonds'were dated August 1, 1898, and their preparation was carried on as rapidly as possible. Soon after that date the Department began their delivery, subscribers for $\$ 500$ and less being the first to receive their bonds substantially in the order of the receipt and acceptance of their subscriptions. The delivery of the bonds to subscribers of this class was practically completed about the 1st of September, though there are still some undelivered, owing to incomplete address or some other irregularity not yet adjusted.

Before the delivery of the bonds to subscribers of $\$ 500$ and less had been completed, the Department began the delivery on account of greater subscriptions. This has continued to the present time, and is still in progress, as subscriptions amounting to about $\$ 2,000,000$ are still in part unpaid under that provision of the circular of June 13 which provided for payments in installments of 20 per cent at intervals of forty days.

The changes in the amounts of the several kinds of money in the United States, outside the Treasury, between November 1, 1897, and November 1, 1898, are shown in the following table. The estimated population of the United States November 1, 1897, was $73,461,000$, and the per capita supply of money outside the Treasury was $\$ 23.23$. The estimated population and per capita supply of money November 1, 1898 , were $75,059,000$ and $\$ 24.87$, respectively.

Comparative statement showing the changes in circulation.

|  | In circulation Nov. 1, 1897. | In circulation Nov. 1, 1898. | Decrease. | Increage. |

| Net increage. |  |  |  | 159, 842, 878 |

FOREIGN COMMERCE.
The foreign commerce of the fiscal year 1898 in many respects has been phenomenal. The exportations of the products of both field and factory exceeded in value those of any preceding year, and the grand total of exports was the largest ever recorded. For the first time in the history of our foreign commerce, the year's exportations averaged more than $\$ 100,000,000$ per month, the total being $\$ 1,231,482,330$, against $\$ 1,050,993,556$ in 1897 and $\$ 1,030,278,148$ in 1892 , no other years having reached the billion-dollar line.

Of our domestic exports, the value of agricultural products was $\$ 853,683,570$, surpassing by $\$ 54,355,338$ the highest record ever before made, that of 1892. Our manufacturers also made their highest record of exports, those for the year being $\$ 290,697,354$, against $\$ 277,285,391$ in the preceding year. For the first time also in the history of our foreign commerce, the exports of domestic manufactures were greater than the imports of foreign manufactures, while the total exports of the year were twice as great as the total imports-a condition heretofore unknown, the trade balance in our favor being more than twice as great as that of any former year. Nearly all branches of the great manufacturing industries shared in this increase of the export trade, particularly manufactures of iron and steel, leather, boots and shoes, and mineral oils, the principal exception being cotton goods, the demand for which was somewhat reduced by the fact that certain countries formerly buying our manufactured goods are now buying our raw cotton for use in their own factories. Nearly all classes of the great agricultural products made their highest record of exports in the past year. The value of the wheat and flour exported was greater than in any preceding year,
except 1892 ; the quantity of cotton, corn, and oats surpassed in each case that of any preceding year, and the exports of meat and dairy products, grouped under the general head of provisions, exceeded in value those of any former year.

The prices realized on nearly all important articles of export were higher than in the preceding year, the notable exceptions being cotton and mineral oils, in each of which the production in the United States, the world's chief producer of these articles, has been in the past few years phenomenally large, thus affecting the prices abroad as well as at home.

In importations, the year has shown an equally remarkable record, the value of foreign imports being less than in any previous year, with a single exception, 1880, though the population has increased 50 per cent since that time. The total imports were but $\$ 616,049,654$ in value, against $\$ 764,730,412$ in the preceding year, and $\$ 779,724,674$ a year earlier. The falling off was almost entirely in manufactures and articles of food. The importation of woolen manufactures was $\$ 14,823,771$, against $\$ 49,162,992$ in the preceding year ; of cotton goods, $\$ 27,267,300$, against $\$ 34,429,363$ in 1897; of manufactures of iron and steel, $\$ 12,626,431$, against $\$ 16,094,557$ in the preceding year ; of earthenware and china, $\$ 6,687,360$, against $\$ 9,977,297$ a year earlier; of glass and glassware, $\$ 3,782,617$, against $\$ 5,603,868$ in 1897 ; and of tin plate, $\$ 3,809,148$, against $\$ 5,344,638$ in the preceding year.

The year's record of the imports and exports of the precious metals was also an unusual one. The importations of gold were greater than in any preceding year in the history of the country, and the exports smaller than in any year in the present decade, making the net importations the largest ever known. The total imports of gold were $\$ 120,391,674$ and the exports $\$ 15,406,391$, the net imports being $\$ 104,985,283$, the largest in any preceding year being $\$ 97,466,127$ in 1881 , while on only twelve previous occasions since 1850 have the year's imports of gold equaled the exports. The importation of silver, most of which comes into the country in lead ore and base bullion, amounted to $\$ 30,927,781$ in value, against $\$ 30,533,227$ in 1897 and $\$ 28,777,186$ in 1896, while the exportation of the year amounted to $\$ 55,105,239$ in value, against $\$ 61,946,638$ in the preceding year.

This satisfactory condition of our foreign trade extended to our commerce with practically every nation and all the great geographical divisions. Our sales to Europe alone increased $\$ 160,420,601$, while our purchases from that section of the globe decreased $\$ 124,258,514$; and to all the great divisions, except Oceanica, there was an increased sale, and from all, except Asia and Oceanica, decreased imports. Our exports to Asia show a gratifying gain, those of 1898 having been $\$ 44,707,791$, against $\$ 25,630,029$ in 1896 and $\$ 11,645,703$ in 1880 , thus having quadrupled since 1880, and nearly doubled within two years.

The following table shows the domestic exports of the fiscal year by classes, compared with those of 1896 and 1897:

Domestic exports, according to sources of production.

| Classeg. | Year ended June 30-m |  |  |
| :---: | :---: | :---: | :---: |
|  | 1896. | 1897. | 1898. |
| Agriculture... | \$569, 879, 297 | \$683, 471, 139 | \$853, 683,570 |
| Manufactures | 228,571,178 | 277, 285, 391 | 290, 697, 354 |

CUSTOMS.
Reorganization of districts.
Attention is invited to the recommendation contained in my last annual report for the reorganization of customs districts and the discontinuance of useless ports. Every businèss consideration demands that a reorganization of these districts should be effected, and the recommendation is renewed.

## Special agents.

During the last fiscal year the special agents have examined the conduct of customs business and the personnel of the Gustoms Service, as prescribed in section 2649 , Revised Statutes, in 86 customs districts and independent ports. They have recommended many reductions in the expense of maintaining the Customs Service, some of which have already been approved by the Department, while others are still under consideration. The special agents are usually called upon to report on proposed increases in the expenses of the Service, and their reports aid greatly in economical administration. Attention is invited to the report of the Supervising Special Agent, where a detailed statement of the work accomplished by the special agents will be found.

## Operations of the tariff

Domestic industrial enterprises are unquestionably benefited by the tariff act of 1897, designed as well to encourage home industriestas to increase the revenues of the Government. By reason of the fact that importers, anticipating the passage of the act referred to, provided themselves with large stocks of merchandise of every description, the tariff of 1897 can not be regarded as fairly tested by the receipts immediately following its passage. As an illustration of the correctness of this view, it may be stated that during the first four months of the fiscal year 1899 the receipts from customs (exclusive of the duty on tea provided by the
war-revenue law) amounted to $\$ 62,776,080$, which is $\$ 4,633,026$ in excess of the receipts for a similar period in any year since 1892 .

A reciprocal commercial agreement has been entered into ${ }_{8}$ between the United States and France, under the provisions of section 3 of the tariff act of 1897, and negotiations with a similar object in view are in progress with other countries.

## Ondervaluations.

Special efforts have been made during the past year to detect and prevent undervaluations, and it is believed that much has been accomplished in that direction. The practice which many foreign manufacturers and wholesale dealers have resorted to of consigning their goods to branch houses or agencies in this country at prices, in many instances, far below the actual market value, has proven so profitable that in certain lines of goods sales have been refused to our American merchants in the foreign market, and they have been compelled to buy of the consignee of the foreign house in this country. During the past year a special officer of the Department was sent to Europe for the purpose of thoroughly investigating the methods of manufacture, cost of production, and the manner of invoicing a certain line of goods sent to this country almost exclusively on consignment, and which, there was reason to believe, was largely undervalued on importation, but concerning which accurate data could not be obtained here. As a result of his inquiries, it was ascertained that the practice of invoicing the goods at prices far below the actual foreign market value was general among manufacturers and shippers, and in a number of instances the goods were invoiced below the cost of production. Efforts are being vigorously made to prevent the abuses resulting from the system above referred to, which not only entails loss to the revenue, but results in injury to honest importers.

Board of General Appraisers.
The Board of General Appraisers reports that during the past year its office received 16,969 protests on classification, 3,464 appeals to reappraisement by one general appraiser, 1,053 appeals to reappraisement by a board of three general appraisers, and 284 protests against rejection of teas, and has decided 19,213 protests on classification, 4,337 appeals to reappraisement, and 278 tea protests. The Board adds, in its report, that-

The habit of undervaluation is still persistent, especially in consigned merchandise. In our report for the eleven months ended October 1,1895 , we considered the subject of undervaluation exhaustively, quoting Secretary of the Treasury Fairchild in support of the proposition that the abuse was more prevalent fifteen years ago than at the date of the report cited. This may have been too sanguine a view, though we are still of the opinion that the evil is in process of ultimate
extinction, notwithstanding the fact that there are now pending consignment cases involving very large, if not entire, lines of merchandise, as in 1895, about which such wide differences of opinion regarding values exist as to render conflicting opinions inevitable. It follows that the question of the adjustment of values in reappraisement cases is the most difficult one in which the Board is called upon to act.

The Department divided the work of the General Board into two separate divisions or departments on October 22, 1897. These are known as the classification and reappraisement divisions.

The division of classification has decided over 19,000 protests in the past year, as against about 8,800 in 1897, and about 21,000 in 1896 , when two Boards were in charge of this branch of the work.

The whole number of appeals taken from decisions of the Board to the United States circuit court for the southern district of New York since October 1, 1897, is 184, as against 122 for the period covered by the report of last year." Many of these appeals, however, are said to be upon like claims and contentions, having been thus taken to save the right of the appellants.

Where appeals are taken to the United States circuit court from a Board decision, under the provisions of section 15 of the act of June 10 , 1890, other protests involving the same issues are, on the request of either party, placed on the file of "suspended cases," and kept there until these issues are finally settled by judicial determination. The number of suspended cases now pending is something over 35,000, as against about 40,000 in the year 1897. As many as about 4,000, however, involve but a single subject, and eight subjects cover as many as 12,000 or 13,000 of these protests.

The Board calls attention to the number of protests received during the first twelve months after the enactment of each of the tariff acts of 1890,1894 , and 1897, respectively. Leaving out the very large number involved in the constitutionality of the McKinley Act of 1890 (over 32,000 ), the date on which the Wilson Act of 1894 went into effect (over 3,600), and the time the Dingley Act of $1897^{\circ}$ became operative (over 900), the Board summarizes as follows: Under act of 1890, 13,800 protests were filed; under act of 1894, 20,130; and under act of 1897, 12,149.

It will thus appear that customs litigation has apparently lessened under the operations of the tariff act of 1897.

## AIJASKA.

## Sale of liquor.

The enforcement of the law governing the importation, manufacture, and sale of intoxicating liquors in the Territory of Alaska is so difficult, and the subject of so much importance to that rapidly developing country and to the Government, that it is treated of here at greater length than otherwise would be justified,

The law which regulates the introduction and sale of liquor in Alaska is found in section 1955 of the Revised Statutes, which authorizes the President to restrict and regulate, or to prohibit, its importation and use in the Territory, and in section 14 of the act of May 17, 1884, which continues in force the previous law, except as thereby modified, prohibits the importation, manufacture, and sale of intoxicating liquors in Alaska, except for medicinal, mechanical, and scientific purposes, and authorizes the President to provide for the enforcement of this act by regulations. The regulations at present in force are those dated, respectively, February 26, 1885, March 12, 1892, and June 24, 1898. The first provides that the manufacture of liquor within the district of Alaska shall be only for medicinal, mechanical, and scientific purposes, and upon a license from the governor. The second forbids the sale of liquor within the district except for the purposes above indicated, and only upon a license to be issued by the governor. The third forbids the shipment of liquor from the United States or its introduction into Alaska except upon a permit from the collector of customs at Sitka, and then only when the liquor is intended for medicinal, mechanical, scientific, or sacramental purposes. The authority of the collector to enforce all the liquor laws and regulations is derived from section 1957 of the Revised Statutes, as amended by section 14 of the act of May 17, 1884.

To prevent the shipment of liquors to Alaska in violation of law, officers of the Department at ports on the Pacific Coast carefully examine the cargoes and manifests of all vessels bound for Alaska and seize all liquors found intended for illegal introduction into the Territory. The collector of customs for Alaska has been active in seizing liquors illegally landed, which are exposed for sale in the Territory. He sent to Portland, Oreg., recently, in one shipment, for sale, over eighty tons of seized liquors. Because of the almost universal demand for liquor in that locality and the large profits to be derived from its sale, great quantities find their way into the district and are to be obtained in saloons.

Shipments of liquor are made from the United States under all manner of subterfuge-disguised as medicinal compounds, catchup, etc., inclosed in shipments of merchandise, hidden in the coal in steamers' bunkers, and even placed on board the ships, after they have cleared, by small boats which put out from shore at night. It is impossible to effectually prevent these practices without the use of swift seagoing vessels and a large additional force of employees.

The collector is virtually powerless to enforce the law restricting the introduction and sale of liquor within the Territory, by reason of the cooperation and sympathy of almost the entire population of Alaska with those who violate the law, and of the failure of juries in Alaska to indict and convict after discovery and arrests have been made. It has been reported to the Department that for a number of years nọt one copvic-
tion for violation of the liquor law was had in the courts in that district, and that a former district judge had stated openly, and while he was occupying that high office, that no jury in Alaska would convict any person who violated the law. Information has also been received that where customs officers have seized liquors in saloons and reported the facts to the United States attorney, the grand jury either failed to find true bills or the cases were compromised by the payment of small fines, and the liquor dealers resumed their business with fresh supplies. In view of the constant liability to seizure, but a small quantity of liquor is reported to be kept in the respective saloons, the main supply being carefully hidden and drawn from as occasion requires, so that a seizure by a customs officer means little to the saloon keeper.
The remedy for the situation, it is believed, may be found in the repeal of the present laws and the provision by Congress of a highlicense system for the Territory. It has been demonstrated that the sale of liquor in Alaska can not be effectually prohibited under present regulations, by reason of the almost universal adverse public sentiment, and it would seem, therefore, the wiser course to confine it within such bounds as would insure its regulation by the Government.

## Salmon fisheries.

Owing to the use of the vessels of the Revenue Cutter Service in the recent war with Spain, it was not possible to assign a revenue cutter to the work of inspecting the various salmon canneries of Alaska and of transporting from place to place the two agents authorized by law for that purpose. Notwithstanding this fact, these agents were enabled to visit, by use of the ordinary means of transportation, all the canneries, with the exception of six, to observe the methods used by the canners in taking fish, and to ascertain whether or not the supply of salmon was diminishing.

While it is too early at this time to furnish accurate statistics with regard to the salmon pack of last season, it is stated, in a preliminary report, by the agent for the fisheries that the output of the canneries will approximate one million cases, and will at least equal that of last year, and that, with the exception of Karluk River, the run of salmon has not diminished.

During the past year, acting under the authority contained in the act of June 9, 1896, fishing for salmon for commercial purposes was prohibited in Karluk River, it appearing that the supply of fish in that river was being rapidly exhausted.
In accordance with the suggestion in my last report that additional legislation was necessary for the proper protection of the salmon streams, a draft of a new law embodying such changes as were thought requisite to that end was prepared and submitted to Congress. The attention of Congress is again invited to this subject,

## XLVIII REPORT OF THE SECRETARY OF THE TREASURY.

## Seal herd.

Since the passage of the act of December 29, 1897, prohibiting the taking of fur seals by citizens or subjects of the United States, or the fitting out in the United States of any vessel for the purpose of taking seals in the waters of the Pacific Ocean north of the thirty-fifth degree of north latitude, there has been no pelagic sealing in the prohibited area by any vessels sailing under the flag of the United States. Since the passage of the above act only one A merican vessel has taken pelagic skins from the so-called Alaska herd, and as the vessel had cleared from this country prior to the passage of the act, and her log showed all skins taken south of the thirty-fifth degree, her catch of 1 male and 335 female skins was allowed entry at San Francisco.

The British sealing fleet, however, has continued its operations during the past year, both on the northwest coast and in Bering Sea. From the copy of the approved minutes of the Canadian privy council, transmitted to this Government in accordance with the provisions of the Paris award, it appears that 30 British sealing vessels operated on the northwest coast during the past spring, as compared with 32 British vessels sealing during the spring previous. The total catch during the spring of 1898 was 10,581 , including a canoe catch by Indians of 526, as against 6,100 skins taken by the same fleet during the season of 1897 , which number included a canoe catch of 1,018 . This would give an average catch per schooner for the spring of 1898 of 335 skins, as against an average catch of 159 for each vessel during the spring of 1897 , or an increased catch per vessel of over 100 per cent. The number of British vessels sealing in Bering Sea, or their catch there, during the past summer, is not known, the reports from the British Government upon that subject not having been received.

The reason for this greatly increased spring catch as compared with last year can not be found in an increase in the numbers of the Alaska herd of seals, but in the fact that, the former American fleet no longer operating, fewer vessels took seals within a given area. Indeed, the advance reports which have been received by the Department from Special Agent Murray, late in charge of the seal islands, and from Mr. C. H. Townsend, an assistant to the Commissioner of Fish and Fisheries, detailed to the seal islands during the past summer to note the condition of the rookeries, show a most apparent decrease in the number of seals frequenting the islands. From the report of Mr. Murray it appears that, owing to a scarcity of seals, only 18,047 young male seals could be killed out of the quota of 30,000 allowed, and that the number taken was secured only after every effort had been made to obtain the full quota. In 1897, 21,013 seals were killed on the islands and their skins accepted.

The only hope for the preservation of the Pribilof Islands herd of seals, it is believed, lies in the complete cessation of pelagic sealing.

With this accomplished, and the breeding females allowed to bring forth their young without molestation from deep-sea hunting, natural causes will operate to bring about a rehabilitation of the rookeries and restore a valuable industry to its former importance.

Certain questions having arisen as to the amount of the taxes, rental, and bonus due on the seal skins taken from the Pribilof Islands by the present lessee, the North American Commercial Company, suit was brought in the circuit court for the southern district of New York to recover the amount due for the year ended April 1, 1894. The claim of the Government was:

| Annual rental. | \$60, 000.00 |
| :---: | :---: |
| Revenue tax on 7,500 skins, at $\$ 2$. | 15, 000.00 |
| Per capita, at $\$ 7.62 \frac{1}{2}$, on 7,500 skins. | 57, 187. 50 |
| Total | 132, 187.50 |

The company claimed that it was entitled, under section 1962, Revised Statutes, to a reduction in the rent and per capita in proportion that the number of skins taken bears to 100,000. The case having been carried to the Supreme Court of the United States on appeal, that court sustained the contention of the lessee with regard to the reduction of the rental of $\$ 60,000$, but their claim that the bonus or per capita should be proportionately abated was rejected, and judgment in favor of the Government was rendered for $\$ 76,687.50$, representing the amount which the lessee should pay for the year ended April 1, 1894, with interest and costs.

Pending the decision in this case, the company offered each year as payment became due a sum equal to what it considered to be due under the lease. These offers were rejected. Since the decision the lessee has paid, in addition to the amount of the above judgment, the deferred payments for the years ended April 1, 1895-1898, both inclusive, based on the terms of the decision, amounting to $\$ 836,374.32$.

A demand has been made upon the company for the payment of $\$ 78,860.05$, representing interest on the deferred payments stated above, exclusive of the amount covered by the judgment of the Supreme Court. Payment of this interest is still under consideration by the lessee.

## INTERNAL REVENUE.

The receipts from the several objects of taxation under the internal revenue laws for the fiscal years ended June 30, 1897 and 1898, were as follows:

Receipts from internal revenue, 1897 and 1898.

| Objects of taxation. | Fiscal years ended June 30- |  | Increase. | Decrease. |
| :---: | :---: | :---: | :---: | :---: |
|  | 1897. | 1898. |  |  |
| Distilled sptrits ............................... | \$82, 008, 542.92 | \$92, 546, 999.77 | \$10, 538, 456.85 |  |
| Manufactured tobacco...................... | 30, 710, 297. 42 | 36, 230, 522.37 | 5, 520, 22, ${ }^{\text {a }}$. 95 | ................... |
| Fermented liquors.......................... | 32,472, 162.07 | 39, 515, 421.14 | 7, 043, 259.07 |  |
| Oleomargarine................................ | 1,034, 129.60 | 1, 315, 780.54 | 281, 650.94 |  |
| Filled cheese................................... | 18,992.38 | 16,518.55 | 866 107..... | \$2, 473.83 |
| Miscellaneous collections................. | 375, 469.08 | 1,241, 576.99 | 866,107.91 | , |
| Total ...................................... | 146, 619, 593.47 | 170,866, 819. 36 | 24, 247, 225.89 | ................... |

The total cost of collection for the fiscal year ended June 30, 1898, was $\$ 3,907,010.50$; the total cost of collection for the fiscal year ended June 30 , 1897, was $\$ 3,848,469.49$, showing an increase for the fiscal year ended June 30, 1898, of $\$ 58,541.01$.

The amounts given as receipts are those actually collected during the fiscal years mentioned, but in many cases the money collected on the last day of June is not deposited until the 1st day of July, thus causing a discrepancy between the collections and deposits for the year.

A detailed statement of the receipts and expenditures will be found in the report of the Commissioner of Internal Revenue.

The percentage cost of collection for the fiscal year ended June 30, 1898, was 2.29 per cent, as against 2.62 per cent for the fiscal year ended June 30, 1897.

The total production of distilled spirits, exclusive of fruit brandies, for the fiscal year ended June 30, 1898, was $80,762,213$ taxable gallons; the total production for the fiscal year ended June 30, 1897, was $62,465,648$ taxable gallons, showing an increase in production for the fiscal year just ended of $18,296,565$ gallons. There were also produced 427,342 gallons of apple brandy, 33,680 gallons of peach brandy, $2,443,363$ gallons of grape brandy, 181 gallons of pear brandy, 190 gallons of apricot brandy, 161 gallons of berry brandy, and 1,281 gallons of prune brandy, making a total production of $2,906,198$ gallons from fruits during the year.

A further comparison of the two fiscal years shows an increase of 128,421 gallous in the production of apple brandy, an increase of 16,429 gallons in the production of peach brandy, an increase of $947,677 \mathrm{gal}$ lons in the production of grape brandy, a decrease of 409 gallons in the production of pear brandy, a decrease of 93 gallons in the production of orange brandy, an increase of 190 gallons in the production of apricot brandy, an increase of 48 gallons in the production of berry brandy, and an increase of 508 gallons in the production of prune brandy, for the fiscal year ended June 30, 1898, an aggregate increase of $1,092,771$ gallons produced from fruits as compared with the previous fiscal year.

The quantity of distilled spirits gauged during the fiscal year ended June 30, 1898, was $287,522,075$ gallons; the quantity gauged during the fiscal year ended June 30 , 1897, was $246,096,921$ gallons, making an increase for the year just ended of $41,425,154$ gallons.

During the fiscal year ended June 30, 1898, 4,720 distilleries of all kinds were operated; for the preceding fiscal year 3,158 distilleries of all kinds were operated, a comparison showing an increase of 1,562 for the year just ended.

During the fiscal year ended June 30, 1898, there were produced $37,529,339$ barrels of beer; the number of barrels produced during the fiscal year ended June 30 , 1897, was $34,462,822$, maiking an increased production for the year just ended of $3,066,517$ barrels.

For the fiscal year ended June 30, 1898, the total receipts from the taxes on tobacco, cigars, cigarettes, snuff, etc., were $\$ 36,230,522.37$.

The receipts from the same sources for the fiscal year ended June 30, 1897, were $\$ 30,710,297.42$, showing an increase of $\$ 5,520,224.95$ for the year ended June 30, 1898.

## PUBLIO BUILIDINGS.

During the past year work has been prosecuted on 43 buildings, including extensions to buildings, etc., marine hospitals, and quarantine stations, of which 15 have been completed. No new buildings have been authorized since the last report, legislation enacted simply embracing extensions to the temporary post-office at Chicago, the improvement of the old custom-house, etc., at Detroit, Mich., and the extension of limit of cost of the United States post-office, court-house, and customhouse at St. Paul, Minn. The number of buildings, therefore, under the construction branch of this department is 384, classified as follows:

Completed and occupied buildings at date of last report ................................. 337
Completed and occupied since last report...................................................... 15
In course of construction at date of last report......................................... 33
Commenced since last report.................................................................................. 10
Completed and occupied since last report, as above $\quad 13$
Buidie - $\quad 28$
Buildings on which work has not yet been commenced.................................... 11
Extension to buildings at Bridrerort, Comn Tittle Roct Ark, and Los 391
on to buildiogs at Bridge Angeles, Cal., as per last report, to be deducted, and buildings already included in prior reports, New York court-honse and post-office, law library, and approaches for Helena, Ark., Columbus, Ga., and Charleston, S. C. 7

Total buildings under construction branch........................................... 384
The following statement shows the amount expended upon public buildings during the year ended September 30, 1898:
For sites and construction of new public buildings.............................. \$3, 407, 603. 86
For repairs and preservation of public buildings. 261, 738.07
For heating apparatus for public buildings.
100, 975.59
For vaults, safes, and locks for public buildings. 25, 496.83
For plans for public buildings
2, 894. 80
Total.................................................................................. 3, 798, 709.15

Since the date of the last report effect has been given to the requirement of the act approved February 20, 1893, in relation to securing competitive designs for public buildings, by inviting competition in designs for court-house and post-office, Norfolk, Va.; post-office, customhouse, etc., Camden, N. J.; immigrant station, Ellis Island, New York Harbor; and contracts have been entered into for the preparation of drawings, specifications, etc., forming the basis for the invitation of proposals for the erection of the buildings named.

Active building operations have as yet, however, been commenced on only one, that being the immigrant building at Ellis Island. It is
too early, therefore, to form any just opinion as to the probable results as to cost or successful administration. The accepted drawings for this building, however, were highly creditable, and displayed careful thought and study on the part of the successful architects.

## Hall of records.

The necessity for a hall of records in this city, in which may be safely stored, against accident from fire, the large accumulation of valuable documents which now encumber the files of this and coordinate Departments, is again called to the attention of Congress. The Secretary of War, in 1878, called attention to the dangerous situation of records of great value in the Quartermaster-General's office.

At various times Congress has recognized the sitnation and has enacted legislation, the earliest being in the sundry civil bill, approved August 7,1882 , in which the Supervising Architect of this Department was directed to make a report to the following session of Congress in regard to the matter. The Supervising Architect, on January 17, 1883, reported in favor of a site known as "Armory Square," between Sixth and Seventh streets SW. Plans and specifications were prepared for the building on this square, and it was estimated that the probable cost would be $\$ 1,036,054$.

Under date of December 19, 1883, the President transmitted to Congress a communication from the Secretary of War, setting forth the necessity for a fireproof building, and renewed the recommendations of former years. An interval of nearly ten years then elapsed without any further action being taken, either by Congress or by the Executive Departments.

In April, 1896, the Secretary of the Treasury addressed letters to the Committees on Public Buildings and Grounds, referring to House Bill No. 7614, then under consideration in the House Committee, reiterating the necessity for the construction of such a building.

The act of Congress approved June 11, 1896, directed the Secretary of the Treasury to submit to Congress a plan giving the size and general characteristics of a structure to be used as a hall of records in this city. He was required to confer with the heads of the various Departments, and inquire into and report upon the suitableness of a site for such a building on the public reservation at the intersection of Ohio and Louisiana avenues with Tenth and Twelfth streets, or any other grounds located in the city within a reasonable distance from the Departments.

January 7, 1897, a report from the Secretary of the Treasury was presented to the President of the Senate, intimating that the reservation mentioned was conveniently located as a site for the building. Final report could not then be made, however, by reason of the fact that ques. tions had arisen concerning the character of the soil and the practica-
bility of securing satisfactory foundations. It was also necessary, in order to pursue the inquiry, that an appropriation be made for that purpose.

January 4, 1898, the Secretary of the Treasury addressed a letter to the Secretary of the Senate Committee on Public Buildings and Grounds, reporting on the Senate bill authorizing the acquisition of a site at the corner of Ohio avenue and Fifteenth street. It was said that until it could be definitely determined by tests, borings, etc., that the site at the intersection of Ohio and Louisiana avenues with Tenth and Twelfth streets was not available for the erection of a hall of records thereon, the Department did not feel justified in recommending the purchase of a site for such building. The proposed site at Fifteenth street and Ohio avenue seemed also to be somewhat remote when considered in connection with the Capitol and Interior Department.

January 14, 1898, the Secretary of the Treasury addressed a letter to the Speaker of the House, transmitting tentative plans for a building at the intersection of Ohio and Louisiana avenues with Tenth and Twelfth streets.

Before any definite conclusion is reached as to the location of the building, careful consideration should be given to the fact that locating the building on land at the intersection of Ohio and Louisiana avenues with Tenth and Twelfth streets would entail great expense for foundations, and would be most unfortunate, for the reason that that section of the city is subject, at intervals, to inundations.

The expressions of urgency so frequently met with in aunual reports from the accounting officers justify the greatest insistency from the Treasury Department in its recommendations for a new and proper hall of records. It is a public necessity. The custody of the files of this and other Executive Departments is a matter involving most jealous care. The officials and employees are trained to look upon the preservation of records as a high duty. For many years the Treasury Department has kept its files in the Treasury building, but it finally became so engorged as to interfere materially with the working force, and it became necessary to secure another place of storage. A building at 1707 New York avenue has been leased. It is not fireproof, nor is it possible to obtain a fireproof building suitable for the purpose. In the event of the destruction of the records now stored therein, the Department would suffer irreparable loss. Even at this time, the fact that the records of 1833 and 1814 were burned is made apparent by frequent embarrassment to the public business. The Department trusts that a worse calamity may not prove more detrimental to its interests in the future.

## DISTRIOT OF OOLUMBIA.

The net expenditures on account of the District of Columbia for ${ }^{\circ}$ the fiscal year 1898 were $\$ 6,319,725.84$. The net revenues deposited in the Treasury on this account for the same period were $\$ 3,727,893.10$.

Under the operations of the sinking funds, the net reduction of the bonded debt during the year was $\$ 611,600$, and of the annual interest charge, $\$ 21,442$.

The bonds of the old funded debt retired with the sinking fund for the water-stock bonds amounted to $\$ 342,950$, leaving a balance of $\$ 50$ uninvested. If a $\$ 50$ bond can be purchased with the unexpended balance, the bonds retired will equal in amount the water-stock bonds outstanding. The interest accumulations on the bonds retired with this sinking fund are available to pay interest on the water-stock bonds, and will amount during the fiscal year to $\$ 17,985$, while the total amount required for interest is $\$ 24,010$. The difference between these sums- $\$ 6,025-$ is all that is required to be appropriated from the water fund for this account.

Under the authority contained in the District appropriation act approved March 3, 1897, the balance remaining on the 1st day of July, 1897, of the principal of the debt incurred for increasing the water supply was paid in full. - The amount advanced by the United States during the fiscal year 1898 was $\$ 300.21$, one-half and the interest thereon to be charged to the District. During the same period there was repaid to the appropriation $\$ 3,628.01$, one-half and the interest thereon to be credited to the District. This leaves $\$ 1,670.42$ as the net amount due the District of Columbia at the close of the fiscal year 1898.

The District appropriation act approved June 30, 1898, authorizes and directs the Secretary of War to resume work on the Aqueduct tunnel, and reappropriates the balance remaining of the appropriations for increasing the water supply, to be advanced out of the revenues of the United States, and not subject to the conditions of the capital account created by the act of July 15, 1882, and also appropriates an equal sum out of the surplus general revenues of the District of Columbia. These appropriations were made immediately available.

Detailed information in regard to the affairs of the District of Columbia will be found in the report to be submitted by the District Commissioners, and by the Treasurer of the United States, ex officio commissioner of the sinking fund of the District of Columbia.

## IMMIGRATION.

The report of the Commissioner-General of Immigration shows that 229,299 immigrants arrived during the year, a decrease, compared with the preceding fiscal year, of 1,533 . The number of those debarred and refused landing was 3,229 , as compared with 1,880 for the preceding year, and was composed of 417 alien-contract laborers, 2,261 paupers, 258 diseased persons, 1 idiot, 12 insane, 2 convicts, $79^{\circ}$ assisted immigrants, and 199 who were returned within one year after their arrival, having become public charges.

More particular attention has recently been given to the cases of immigrants suspected of being afflicted with disease. During the fiscal
year ended June 30, 1897, only one immigrant was debarred as being afflicted with a "loathsome or dangerous contagious disease," while during the last year 258 were denied admission on that account. These exclusions have frequently resulted in the separation of families, the debarred immigrant being returned to the country of his nativity, while his relatives are permitted to journey to their destinations in this country. Having the prevention of this in view, and to establish a more efficient guard against the admission of "loathsome or dangerous contagious diseases," the Commissioner-General of Immigration suggests the expediency of examining immigrants at various ports of embarkation, instead of after their arrival in this country.
The recommendation that legislative provision be made whereby the Burean of Immigration may be put in communication with State immigration organizations, with a view of effecting a better distribution of arriving immigrants, is approved. There is beyond question a tendency on the part of immigrants toward the cities, just as there is such a tendency among our own rural population. A social problem involving relief to unemployed labor at congested centers of population may be partially solved by efforts directing immigrants to fields where their services may be in demand. This course will also lessen the likelihood of their becoming public charges.
The report also calls attention to the fact that some aliens have, for the purpose of obtaining naturalization papers, made false statements, and the Commissioner-General recommends that a suitable record be kept at the ports of arrival concerning each immigrant, a copy of which, in the form of a certificate, may be furnished, setting forth in detail particulars regarding the time of his arrival and personal characteristics by which he can be fully identified; such certificate to be used to establish his right to naturalization.
The same record would prove useful for the purpose of identifying aliens both in this country and when residing abroad and claiming the rights of American citizenship.
For extending the usefulness of the Immigration Service, it is recommended that the limitation be repealed that no greater sum shall be expended for the enforcement of the laws at any port than shall have been collected at said port from the head tax. This provision was justified by the old organization of the Immigration Service, when local affairs were carried on mainly through the instrumentality of State boards under contract with the Secretary of the Treasury. The Service has become so general now and is so firmly established under Federal jurisdiction that there seems to be no necessity for limiting the use of the immigration fund as now prescribed.
The attention of Congress is invited to the several recommendations of the Commissioner that the head tax be increased from $\$ 1$ to $\$ 2$, that the present system of examination at Canadian ports of immigrants destined to the United States be abandoned, and that certain
points on the Canadian border shall be designated as ports of entry, at which corps of inspectors shall be stationed and where alone immigrants through Canada may be admitted into this country. The consideration which Congress may be able to give to these recommendations may serve to determine fully the advisability of making the changes suggested.

That portion of the Commissioner-General's report which is devoted to receipts and expenditures shows that during the year the total receipts have amounted to $\$ 326,644.47$, while disbursements for the same period were $\$ 275,809.32$, leaving a surplus of $\$ 50,835.15$. There was expended on account of the enforcement of the alien-contract labor law $\$ 78,766.65$.

## CHINESE EXCLUSION.

The total number of Chinese persons admitted to the United States in the last fiscal year was 7,195 . Of this number, 5,273 were of the exempt class, principally merchants, students, etc.; 425 were so-called artists, actors, artisans, and laborers, admitted for the Transmississippi and International Exposition at Omaha, and 1,497 were returning registered laborers. There were also 865 who passed through the United States under bond in transit to other countries. Two hundred and eighty Chinese were refused admission.

The number of Chinese persons arrested for deportation because unlawfully in the United States was 756. Of this number, 220 were deported, by due process of law, at a total expense of $\$ 24,132.94$. The aggregate expense incurred in the enforcement of the Chinese-exclusion laws was $\$ 84,453.74$.

It is believed that many Chinese laborers have gained unlawful admission by representing themselves to have been born in the United States. In such cases they present themselves to the customs officers at the frontier and seek arrest. On being taken before the United States commissioner for deportation proceedings, they are frequently discharged on their own testimony and that of their alleged fathers. In many cases such testimony is believed to have been untrue, and in a number of instances the applicants or the alleged fathers, or both, have been successfully prosecuted for perjury.

In the case of Quock Fing $v$. United States (140 U. S., 417) it was held that the testimony of the applicant, corroborated by his alleged father, to the effect that he was of American birth, where the circumstances in evidence tended to lessen the probability that such testimony was. true, was not sufficient to warrant the discharge of the applicant. Notwithstanding this ruling, United States commissioners in Vermont, New. York, and elsewhere, having original jurisdiction in such cases, have disclaarged Chinese who enter the United States claiming to have been; born therein, although circumstances in evidence tend to lessen the prob: ability that the testimony is true.

In the act approved November 3,1893 , relating to the registration of Chinese residing in this country, it was provided that where a Chinese person applied for admission into the United States, on the ground that he was formerly engaged here as a merchant, he should establish, by the testimony of two credible witnesses other than Chinese, the fact that he conducted business as a merchant for at least one year before his departure from this country. The enactment of a law requiring Chinese claiming to have been born in the United States to establish that fact by evidence other than that of Chinese is, in my opinion, advisable in order to prevent evasion of the exclusion laws by persons claiming. to have been born here of Chinese parents.

The joint resolution approved June 30,1897 , authorized and directed the admission to the United States of such number of mechanics, artisans, agents, or other employees, natives of China, as the Secretary of the Treasury might deem necessary for the purpose of preparing and conducting any privileges or concessions which might be granted by the Transmississippi and International Exposition Company of Omaha, Nebraska, in connection with such Exposition. The Department was duly advised of the granting of two concessions for Chinese exhibits at the Exposition, and the concessionaires, with the approval of the president of the Exposition Company, made application for the admission of 835 Chinese. Regarding the number excessive, the landing of 650 Chinese persons under the concessions referred to was authorized, and of this number 425 were admitted during the last fiscal year.

The Department is now advised that many of the Chinese admitted are no longer at the Omaha Exposition, and that a considerable number of women so admitted have since been the subject of barter for immoral purposes.

Although provision is made for the departure from this country of Chinese admitted as participants at expositions, the law is not observed, and great expense is incurred in apprehending and deporting such persons after the close of the exposition. In view of the abuses which have been practiced in these cases, it is submitted that the provisions of the Chinese-exclusion laws should not be suspended or waived in connection with expositions.

In view of the frequent arrival in the United States of vessels having Chinese laborers on board as stewards, cooks, and seamen, and in the absence of any authority to exact from the masters of such vessels bonds providing for the deportation of such Chinese laborers, it has been necessary to authorize the temporary employment of guards at several ports to prevent their illegal landing, at an expense of more than $\$ 20,000$ per annum, payable out of the appropriation for the enforcement of the Chinese-exclusion laws.

If bill H. R: 10829, now pending in Congress, which authorizes the execution of bonds by masters of vessels, conditioned for the deportation of Chinese laborers employed thereon, should become a law, this
expense would be avoided. The bill should, however, be amended so as to provide that where such bonds are not given, collectors of customs shall assign officers to duty as guards on the vessels at the expense of the masters thereof. With this amendment, the passage of the bill is recommended.

MARINE-HOSPITAL SERVICE.
With the close of the fiscal year 1898, the United States MarineHospital Service completed the one hundredth year of its existence, the original act for the relief of sick and disabled seamen having been passed by Congress on July 16, 1798.

The growth and development of this brauch of the Government service during this time-and more especially during the last decadeare set forth in detail in its annual reports.

At this time the personnel of the Service is as follows: Commissioned medical officers, 75, including the Surgeon-General, 21 surgeons, 27 passed assistant surgeons, and 26 assistant surgeons.

There are, in addition, 136 noncommissioned officers, viz : Acting assistant surgeons, 98 ; sanitary inspectors, 4 ; and hospital stewar̃ds, 34. When all the stations of the Service have their full complement of attendants aud quarantine employees, there are, in addition, about 400 men employed under this branch of the Government. This number is, of necessity, much increased during epidemics. There are 21 hospitals owned and operated by the Service, and 11 quarantine stations, but, in addition to these, there are 88 localities in the United States where patients of the Service receive dispensary and hospital treatment.

During the fiscal year 1898, the total number of beneficiaries treated at dispensaries and hospitals was 52,709, and of this number 11,914 were hospital patients.

Professional aid was also given to other branches of the Government service, viz: To the Revenue Cutter Service, in the physical examination of applicants for positions as cadets and engineers, and treatment of its members when ill ; to the Life-Saving Service, in a similar manner; to the Steamboat-Inspection Service, in examination of applicants for pilots' licenses for color blindness; to the Immigration Service by medical inspection of immigrants; to the Civil Service, in making physical examinations; and, since the inception of hostilities with Spain, to the United States Army and Navy.

The aid rendered to the Army and Navy was not altogether limited to the care of sick or injured soldiers and sailors, although many were treated at the various hospitals of the Service. In accordance with the arrangements agreed upon between this Department and the War Department, officers of the Marine-Hospital Service were ordered to duty on board vessels used by the Army as transports, in order that these ships might be kept in good sauitary condition and free from infection, although voyaging between this country and infected ports.

The detention camp at Egmont Key, Florida, received laborers and soldiers coming from Cuba and held them until proved to be free from infection. One commissioned officer was granted leave of absence to permit his enlistment in the Army and one served as surgeon of the revenue cutter McOulloch during the naval operations at the Philippines. A number of acting assistant surgeons were also granted temporary leave for service with the Army.

The expenditures from the Marine-Hospital fund during the fiscal year 1898 were $\$ 600,131.45$. The balance on hand at the close of the fiscal year was $\$ 514,997.83$.

At the beginning of the fiscal year there was on hand a balance of $\$ 474,720.86$ from the appropriation for the prevention of the spread of epidemic diseases, but the operations of the Service during the summer of 1897 for the suppression and limitation of the spread of yellow fever reduced this amount materially, so that of this appropriation only $\$ 256,424.44$ remained available at the close of the fiscal year. This amount, however, was increased by the deficiency appropriation of $\$ 200,000$ (act of July 7, 1898) for quarantine measures, making the available balance $\$ 456,424.44$.

## Marine hospitals.

The Surgeon-General reports that the marine hospitals are in good condition, and that during the past year special attention has been paid to their equipment in the matter of furniture and appliances for patients, medical libraries, and operating rooms, the latter being supplied with the most recent appurtenances connected with modern surgery.

An exhibit, illustrating the functions of the Service, was made in the Government building at the Omaha Exposition.

## Contagious diseases.

The report of the Surgeon-General contains, under separate chapters, full reports upon the prevalence of cholera, yellow fever, smallpox, plague, and leprosy, together with scientific information concerning the nature of these diseases and the sanitary measures adopted for their suppression.

Smallpox has appeared during the year in 24 States and the District of Columbia. The Marine-Hospital Service, by special request, took complete charge of the epidemic at Birmingham, Ala., and at Middlesboro, Ky., causing the disease to disappear in those localities, and giving advisory aid, through competent officers, to a number of other infected points. The disease has been of a remarkably mild character, and, inasmuch as it is one that is easily prevented by vaccination, the Surgeon-General expresses the belief that its suppression should be left to State and local authorities, except under grave conditions and where
its spread to several States is especially threatening. The action of the Department in rendering aid in this instance has been in accordance with this position.

With regard to leprosy, as recommended in my last annual report to Congress, a bill was introduced authorizing an investigation by the Marine-Hospital Service as to its prevalence and necessary sanitary measures to prevent its spread. This bill (S. 2904) has passed the Senate, has been reported favorably by the House committee, and it is hoped that it will become a law during the coming session of Congress.

Foreign sanitary inspection.
To assist in the prevention of the introduction of contagious diseases into the United States, sanitary inspectors have been stationed at Habana, Santiago de Cuba, Rio de Janeiro, and Yokohama, the detailed information furnished by them being published in the annual report of the Service.

The Surgeon-General reports that, owing to the new conditionsin Cuba and Puerto Rico, and on account of the growing proportions of the fruit trade with certain Central and South American ports, it will be necessary during the coming season to have special inspectors stationed at a number of ports with a view of certifying to the freedom from infection of each vessel clearing therefrom. This is necessary both for safety and to prevent undue detention of these vessels at quarantine, which would ruin this trade. The expenses of these inspectors will be paid out of the epidemic fund.

## National quarantine stations.

The eleven national quarantine stations have been operated successfully during the year, and many repairs and additions to their equipment have been made under special appropriations from Congress.

It is recommended that ample appropriations be made for national quarantine stations in order that their equipment may be made complete for the rapid transaction of business and the safety and comfort of vessels and persons undergoing detention.

The board appointed to select a site for the new quarantine station at the mouth of the Columbia River, in Oregon, appropriated for at the last session of Congress, has made its report, and negotiatious are in progress for securing a desirable site.

## Sanitary reports and statistics.

In this division of the Bureau a table of mortality for more than 1,000 cities and villages of the United States has been published, giving the total number of deaths, the number of deaths from infectious diseases, and the estimated death raté.

The Public Health Reports of the Marine-Hospital Service, containing statistical information concerning the health of various localities
throughout the world, quarantine reports, immigration reports, and such information of a sanitary nature as is of interest to those engaged in the preservation of public health, are prepared in this division and published every week. This publication is now in the thirteenth year of its existence, and constitutes a volume of over 1,000 pages yearly. It is distributed to sanitarians, State and local boards of health, health officials in this and foreign countries, quarantine officers, and consuls, and forms a valuable repository of current sanitary reports.

## Hygienic laboratory.

The Surgeon-General reports that during the past fiscal year original investigation has been continued in the hygienic laboratory of the Service; an examination-bacteriological and chemical-of the water of the Potomac River, as it flows from the pipes in the District of Columbia, has been made, and the result submitted to Congress in response to special request.

Work in connection with car sanitation has been continued, and experiments in immunization for pneumonia and enteric fever have been carried on, together with investigations into the purity and various methods of preparation of vaccine.
In addition to these investigations, experiments were carried on to test the efficiency of formaldehyd as a disinfecting agent, and a comparative study of the pseudo-diphtheria and true diphtheria bacillus, previously undertaken, was completed. Work is in progress whereby the laboratory will be able to furnish the material for the treatment of hydrophobia according to the method of Pasteur.

Instruction of officers of the Service in bacteriological work has been continued.
Attention is again called to the necessity-increasing every yearfor the enlargement of the laboratory of the Service and for providing therefor a separate building, and it is recommended that an appropriation of $\$ 50,000$ be made for this purpose.
It is also recommended that a commission of medical officers of the Marine-Hospital Service be authorized by act of Congress to investigate the source of pollution of streams and other water supplies of towns and cities where it affects the people of more than one State.

## Scientific investigation of yellow fever.

As stated in my previous annual report, by direction of the President two skilled bacteriologists of the Marine-Hospital Service were specially detailed to investigate in Habana the cause of yellow fever. A laboratory was established, and they continued their labors until obliged to withdraw on account of the war. They have now returned, and are continuing the investigation, and their preliminary report, published in the annual report of the Service, indicates that the true cause of the
disease has been found by Professor Sanarelli in the bacillus icteroides. Further work is necessary for definite demonstration, but if the present indications are borne out by future laboratory experiments, a great advance will have been made toward both the prevention and cure of yellow fever.

## Origin of yellow fever epidemic of 1897.

The question of how the yellow fever gained admission to the United States last year (1897) is discussed and brought to a conclusion in the report of the Surgeon-General for 1898.

The attempt to fasten the responsibility upon the national quarantine station at Ship Island, Mississippi, is shown by the report of the Senate committee appointed to investigate the subject, and the report of the committee of the legislature of the State of Mississippi, to have failed. The management of the station and the wisdom and legality of its return to Ship Island, after the destruction of Chandeleur Island, had been viciously assailed, but, after the most searching investigation, exoneration followed.

As shown in the report of a medical officer of the Service specially detailed to make the investigation, the fever was introduced in Ocean Springs in April, 1897, through a traveler from Guatemala, who came to Ocean Springs through the New Orleans quarantine on April 12, before the beginning of the close quarantine season, and arrived at Ocean Springs April 13, sick.

## Post-epidemic disinfection.

After the fever of 1897 the Marine-Hospital Service, with the aid of the local authorities, entered upon a complete disinfection of all places in Mississippi, Alabama, and Louisiana where yellow fever had been reported. This work occupied the entire winter, with great expense and labor, and is considered to have been valuable in at least limiting the disease during the summer just ended, the recrudescence this year being confined, so far as known, to McHenry, Miss., and Franklin and New Orleans, La., none of the numerous infected localities in Alabama suffering from a return of the disease.

Fellow fever precautions, 1898.
The unsettled conditions in Cuba, and, later, the outbreak of hostilities with Spain, excited grave concern lest in the turmoil of war the yellow fever should gain admission to the United States. The greatest care and vigilance were, therefore, exercised by the MarineHospital Service to prevent it, and the efforts made were successful, the appearance of yellow fever in Mississippi and Louisiana in
the late summer and fall being considered a recrudescence of the fever of the previous year.

Competent officers of the Marine-Hospital Service were located in different portions of the south Atlantic and Gulf seaboard for the purpose of maintaining vigilant watch with regard to the observance on the part of naval vessels and army transports of the quarantine regulations.

Letters were addressed to the Secretary of War and to the Secretary of the Navy, inviting their attention to the grave dangers involved through military operations, with request that their officers be directed to observe strictly the national quarantine regulations. Prompt and satisfactory replies were received, and orders were issued in accordance therewith.

The Surgeon-General of the Marine-Hospital Service, through frequent communication with the Navy and War Departments, kept himself informed regarding the anticipated return of troops and vessels, and secured the cooperation of both Departments in the selection, as ports of arrival from Cuba, of points where the danger of yellow fever infection is materially diminished and where they could comply more readily with the quarantine regulations.

Meantime, on Egmont Key, at the entrance of Tampa Bay, a detention camp was established for holding under observation those who might be brought from Cuba through urgent necessity or ignorance of the quarantine regulations or by mistake. About 700 refugees were cared for in this camp.

Learning of the contemplated transfer of the Army from Santiago to Montauk Point, this Department addressed a letter to the Secretary of War, outlining the measures which should be taken to prevent the movement becoming dangerous. The substance of these letters was embraced in the official order of the War Department relating to the precautions to be taken both at Santiago and on arrival at Montauk. At the latter place a complete maritime quarantine was established by the Marine-Hospital Service, embracing a corps of inspecting officers, with expert diagnosticians, and a floating disinfecting plant, the barge Protector, which had just been completed for service at Tortugas quarantine. The quarantine anchorages were buoyed by the Light-House Establishment, and the auxiliary navy and the Revenue Cutter Service furnished patrol vessels to prevent communication with the incoming transports.

The troops on landing were taken to provisional camps under control of the Army, where they were held under observation before entering the regular camp. Three cases of yellow fever were found upon two of transports and the latter and their contents were thoroughly disinfected.

In addition to the above, there was prepared by the Marine-Hospital Bureau a treatise on yellow fever, giving in plain terms the quarantine
regulations against this disease and the method of dealing with it when found on board ship or on land. This book was issued to naval vessels, army transports, quarantine officers, and others. Its value has been widely acknowledged.

## Recrudescence of yellow fever in Louisiana and Mississippi in 1898.

Anticipating a possible recrudescence of the fever in the South, a number of physicians were employed in various localities to report promptly suspicious cases to the medical officers of the Marine-Hospital Service.

Through one of these officers the presence of the disease at McHenry, Miss., was made known to the Bureau July 9. It was found to have existed in mild form for three weeks previous to that date. The cause of the recrudescence at McFienry is fully set forth in the report of the Surgeon-General. There were in all 22 cases, but no deaths and no spread. Most active measures were immediately taken, and for the first time, so far as known, in the history of this disease, an epidemic was suppressed in its incipiency.

August 11 there was a reported death from yellow fever at Franklin, La., and, despite strenuous efforts, it prevailed in Franklin until the latter part of October, with a total of 607 cases and 9 deaths. Earnest efforts were made, and with success, to prevent its spreading from Franklin to other localities. These measures consisted of a cordon and detention camp and a careful watch of surrounding localities.

August 31 yellow fever was reported at Orwood, Miss., and investigation showed that it had existed in mild form for some weeks, and there had been a total of 35 cases to the 4 th of September. The infection was traced to Taylors, Miss., where cases had developed as early as July 20. Subsequently the fever was found in various other localities in Louisiana and Mississippi, the date of its announcement, however, not indicating the date of the infection of the locality. The (apparent) spread from one locality to another was apparent only, the probability being that a number of places were infected at about the same time from one or more centers of infection.

September 17 the disease was first officially announced in New Orleans, though doubtless it had been existing there an indefinite time prior to that date. As officially reported, there were in all 74 cases and 19 deaths, but there is little doubt these figures do not correctly express the true prevalence and mortality of the disease.

The outbreak was practically brought to an end in the latter part of October with the presence of frost. November 10, there had been reported officially in both Louisiana and Mississippi 2,455 cases, with 114 deaths, a mortality of 4.64 per cent. Of this number, 1,470 cases and 51 deaths occurred in Louisiana and 985 cases and 63 deaths in Mississippi.

That the disease was mild is shown by a comparison with the statistics
for Louisiana and Mississippi of the epidemic of 1897, itself a very mild one, when there were in Louisiana 1,916 cases with 293 deaths, and in Mississippi 1,668 cases and 96 deaths, the total for these two States being 3,584 cases and 392 deaths, a mortality of 10.9 per cent.

The disease this year was confined to Louisiana and Mississippi, while in 1897 it was reported in Alabama, Tennessee, and. Texas, as well as Louisiana and Mississippi. While there was panic caused by the presence of yellow fever, interruption of train service on railroads was inconsiderable when compared with the season of 1897.

Experienced surgeons of the Marine-Hospital Service were sent to all infected and suspected points, and the work of the Service consisted in the establishment of detention camps, train-inspection, disinfection of baggage from the infected localities, surveillance over travel, disinfection of freight, and other measures intended to prevent the spread of the disease and at the same time prevent panic and other unnecessary interruptions to traffic. The Department has received many expressions of appreciation of services rendered.

During the summer and fall, reports of the existence of yellow fever in certain seaboard cities of the South were received, making necessary careful investigation. While these investigations were negative in their results, they caused for the time as much solicitude and labor as though the results had been affirmative.

## National quarantine.

With regard to protection from yellow fever in the future, the Sur-geon-General calls attention to the necessity for perfecting the national maritime quarantine, as has been consistently advocated by him in previous reports. Arrangements have been perfected providing for the disinfection of vessels before their departure from Habana and Santiago.

The deficiencies in the present national quarantine laws were duly presented to Congress at its last session, and bills were introduced (H. R. 4363 and S. 2680) amending the present laws and providing for more strictly national quarantine, both maritime and interstate. These bills, making practically the same provisions, received the indorsement of this Department and were favorably reported upon by the respective committees of the Senate and House, are now pending, and should be enacted into law.

## REVENUE OUTTER SERVIOE.

Following is a summary of the work performed by the vessels of the Revenue Cutter Service during the year, being exclusive of services rendered in cooperation with the Army and Navy during the war:
Persons rescued and succored with provisions, fuel, etc., in the Aretic regions.. ..... 265
Patients treated by the medical officer of the Bear, in Alaska, from Una- laska to Point Barrow and return. ..... 1, 557
Vessels boarded and papers examined ..... 23, 172
Vessels seized and reported for violations of law. ..... 548
Fines and penalties incurred by vessels reported ..... \$242, 695
Vessels in distress assisted. ..... 92
Value of vessels assisted and their cargoes. ..... $\$ 1,640,280$
Persons on board vessels assisted. ..... 679

## Vessels.

In my last annual report the following was submitted :
The following vessels should be condemned and sold just as soon as it is possible to replace them :

The Seward: This vessel was constructed in 1873 ; is a wooden sidewheeler; now, after twenty-four years' service, is practically worn out, unseaworthy, and not worth extensive repairs; cost originally $\$ 34,600$, and since for repairs $\$ 26,588$.

The McLane: This vessel was acquired from the Navy in 1865, after serving as a gunboat during the war. It is an iron side-wheel vessel, of obsolete type, has been thirty-two years in the Revenue Cutter Servvice; cost originally $\$ 36,000$, and for repairs since $\$ 113,275$. The vessel is not worth extensive repairs.

The Colfax: This vessel was constructed in 1871, is of iron sheathed with wood, twenty-six years old and a side wheeler ; cost originally $\$ 65,500$, and since for repairs $\$ 87,000$. The hull is very tender and can not be properly repaired without practically rebuilding, and it is not worth any considerable outlay.

The Boutwell: This vessel was built in 1873, and owing to bad design is not now, and never was, a seaworthy vessel. It is a twin-screw boat, $v . y$ slow, and unfit for the work of a revenue cutter ; cost originally $\$ 70,000$, and since for repairs $\$ 49,840$.

The Washington and Chandler are both small tugs, acquired from the Navy in 1865, in which they did service during the war. Both are wooden vessels, have been in the Revenue Cutter Service thirty-two years. They cost originally, the Washington $\$ 7,000$ and the Chandler $\$ 6,500$, and for repairs since $\$ 35,732$ and $\$ 34,537$, respectively.

The Hamlin: This vessel was constructed in 1866, is a small wooden tug, and has been actively in service for thirty-one years. It is past repairing ; cost originally $\$ 15,500$, and for repairs since $\$ 13,046$.

There should be provided a vessel for service on the Columbia River, Washington, and nearby waters. The Columbia River Bar is widely known to be dangerous, and a vessel should be constructed with special reference to service in those waters.

I recommend that five cruising vessels and at least three vessels for harbor service be provided. These vessels should take the place of those worn out in service and no longer worth extensive repairs.

As conditions have not changed since the foregoing was written, except that expenditures for repairs upon the old vessels named, aggregating $\$ 3,972.04$, have been added, the recommendations are renewed.

## The Service in the war with Spain.

The Revenue Catter Service has taken an active and conspicuous part in the war with Spain. There were with the Navy 13 revenue
cutters, carrying 61 guns, 98 officers, and 562 enlisted men. Of these, 8 cutters ( 43 guns), 58 offcers, and 339 men were in Admiral Sampson's fleet and on the Habana blockade; 1 cutter ( 6 guns), 10 officers, and 95 men were in Admiral Dewey's fleet at Manila, and 4 cutters (12 guns), 30 officers, and 128 men cooperated with the Navy on the Pacific Coast.

At the battle of Manila, the McCulloch, Capt. D. B. Hodgsdon, R. C. S., efficiently performed the duties assigned by Admiral Dewey. It was the $M c$ Culloch that carried to Hongkong the dispatches announcing to the Government and to the world that glorious and signal victory. Admiral Dewey has officially commended the commander of the McOul loch for the value and efficiency of his command.

At the battle of Cardenas, May 12, the revenue cutter Hudson, Lieut. Frank H. Newcomb, R. C. S., commanding, sustained the fight against the gunboats and shore batteries of the enemy, side by side with the naval torpedo boat Winslow, and when Ensign Bagley and half the crew of the latter-named vessel had been killed and her commander wounded, rescued from certain destruction the vessel and the balance of the crew, under the furious fire of the enemy's guns. On the same day (May 12) the Windom, Captain Maguire, R. C. S., engaged the enemy's shore batteries at Cienfuegos, demolished the light-house, and destroyed the rendezvous of the Spanish troops there. During this engagement the senior naval officer present, in appreciation of the fine work of the Windom, signaled from his flagship: "Well done, Windom."

The Manning, Capt. F. M. Munger, R. C. S., commanding, was in many engagements with shore batteries of the enemy, and Captain Todd, U. S. N., has officially bestowed upon her commander generous praise for the efficiency of his command and for effective and meritorious services. Rear-Admiral Howell and Commodore Remey have officially commended the efficiency of the Service in cooperation.

In addition to services rendered by vessels with the naval forces, there were 7 others, carrying 10 guns, 33 officers, and 163 men, with the Army, engaged in patrolling and guarding mine fields in various harbors, from Boston to Mobile and New Orleans.

The Revenue Cutter Service had, in active cooperation with the Army and Navy throughout the war, 20 vessels, carrying 71 guns, 131 officers, and 725 men. There were 3 other vessels- 25 officers and 210 menordered to be transferred to the Navy, but, because of unavoidable delays by contractors in finishing their work, the vessels could not be sent to the front.

## Personnel.

Attention is again invited to the necessity of adequate legislation for the further promotion of the efficiency of the Revenue Cutter Service. The usefulness of this branch (in common with that of other similar organizations) depends for the most part, if not wholly, upon the fitness
of those composing its commissioned ranks. It is the aim and purpose of the Department to raise the Revenue Cutter Service to the highest standard of excellence. While much has been done in this regard by the Department, in the formulation of proper orders and regulations, certain essential results can not be accomplished without legislation by Congress, the need of which is seriously felt. Something must be done immediately, whereby the active lists of commissioned officers can be filled with men mentally and physically qualified to perform the arduous, hazardous, and exacting labors which the laws impose. Prior to the year 1895, the Service, due to the absence of remedial legislation, had reached such a state that Congress finally recognized its almost helpless condition, and passed the act of March 2, 1895, under the provisions of which 39 officers were placed upon a permanent waiting-orders (or retired) list. In the enactment referred to, Congress recognized two essential features: First, the absolute necessity of extending this relief in the form of a retired list; and, secondly, the justice and fairness of the principle of the relief extended.

But the act did not go far enough. While it relieved an emergency and retired from active service all officers who were then (March 2, 1895) disqualified, it ended there. Some officers who were left on the active list, after the law had been carried into effect, as physically sound, have since become unfit for duty afloat, because of age and disabilities incident thereto, as well as to those contracted in the line of duty. As a consequence, there are at this time 11 officers who are, by reason of age alone, incapacitated for active duty afloat. These are as follows: One of 72 years, one of 67 years, three of 66 years, one of 65 years, three of 63 years, and two of 62 years. The length of service of these officers ranges from twenty-eight to thirty-seven years in individual cases, while some of them are veterans of the Navy in the war for the Union. It will thus be seen that the Service is seriously crippled at this time, and relief is recommended.

It will be readily conceded by all who are conversant with the facts that no branch of the public service in time of peace requires as continuous, laborious, and hazardous service as this, while in time of war, as was practically demonstrated in the war with Spain, it stands upon the same ground with the Navy in everything, except in the matter of compensation and the benefits bestowed by the Government upon the commissioned ranks of the sister service, in connection with which, under the law, the Revenue Cutter Service bore so conspicuous and meritorious a part.

There is pending in Congress a satisfactory bill (\$. 620), which has been favorably reported by the Committee on Commerce of the Senate. This bill makes just and fair provision for a "permanent waitingorders" (or retired) list for the Service, and its passage is recommended.

There is also pending in Congress Senate bill 3903, for the promotion of the efficiency of the Revenue Catter Service, which has my cordial
indorsement and approval. This bill was passed by the Senate April 29, 1898, and has been favorably reported by the Committee on Interstate and Foreign Commerce of the House of Representatives and now awaits the action of that body. Its most important features provide for the enforcement of discipline, giving the force of law to that which can not be compassed by regulations. The bill as a whole is essential to the welfare and advancement of the Service, is a meritorious measure, and it is hoped will become a law as soon as practicable.

## Pensions.

In the matter of pensions for the enlisted men of the Revenue Cutter Service, the recommendation on the subject contained in my last annual report is repeated, as follows:

Under the provisions of section 4714, Revised Statutes, the officers and seamen of the Revenue Cutter Service who may be wounded or disabled in the discharge of their duty, "while cooperating with the Navy by order of the President," may be placed upon the Navy pension list.

- The ordinary duties devolved upon the Revenue Cutter Service are fraught with greater risk of life and limb than that incurred by the Army, Navy, and Marine Corps in time of peace, while in time of war they are at least equal, and every argument that applies as a justification for extending this bounty to those services has equal force on behalf of the enlisted men of the Revenue Cutter Service. I therefore recommend that the law, section 4714, Revised Statutes (act of April 18, 1814), be amended to read as follows :
"The enlisted men of the Revenue Cutter Service of the United States, who have been or may be wounded or disabled while in the actual discharge of their duties, shall be entitled to be placed upon a pension list under the same regulations and restrictions as are now provided by law for enlisted men of the Navy."

## Arctic relief expedition.

November 6, 1897, shortly before the arrival of the revenue cutter Bear from her usual annual cruise in the Arctic Ocean, news came that several whaling vessels were ice-bound at or near Point Barrow, in arctic Alaska. Their officers and crews numbered 265 men. Unless succor could be given them early in the spring of 1898 they would be in danger of starvation. Steps were at once taken to render aid. The Bear, upon her arrival in port, was made ready for the undertaking. An abundant supply of provisions for the whalemen was put on board, and preparations were also made for the expedition which traveled overland.

The personnel of the overland expedition included Lieut. D. H. Jarvis, R. C.S., commanding ; Lieut. E. P. Bertholf, R. C. S., and Surg. S. J.Call, R.C.S. The Bear was commanded by Capt. Francis Tuttle.

Nineteen days from the inception of the movement the expedition sailed from Seattle. Unalaska was reached without special inciḍent.

- December 11 the Bear sailed thence north through Bering Sea in quest of a landing place for the overland party. When within 90 miles of the north shore of Norton Sound the ship was driven back by ice and gales to the southward of Nunivak Island. Finally Lieutenant Jarvis and his party were landed on Cape Vancouver. Then began a perilous journey of 1,500 miles. These brave men struggled onward four months in the midst of an arctic winter and an arctic night, over a route never even traveled before by dog sleds.

The expedition was highly successful, and resulted in the relief of 265 men, 128 of whom were brought back to Seattle. The achievement will take high rank because of its success, and for the exhibition of fortitude and courage by the members of the overland expedition and the officers and crew of the Bear.

While the expedition was on its way the Bear wintered at Dutch Harbor, Unalaska, being detained there by ice and weather conditions until June 14, 1898, when a start was made for the Arctic. July 16, after encountering fogs, gales of wind, and ice packs, Point Hope, in the Arctic Sea, was reached, and Lieutenant Bertholf joined the ship. The Bear then proceeded, beset by heavy ice, to Point Barrow, which was reached July 29. Here Lieutenant Jarvis and Dr. Call, of the overland party, were taken on board. After provisioning the ships found at Point Barrow and vicinity, succoring the people who were to remain, and receiving on board all who desired passage, the Bear sailed for Seattle, where she arrived September 13, after an absence in the desolate regions of arctic Alaska of nearly seventeen months.

The§highest commendation is due to Capt. Francis Tuttle for ability displayed in bringing his part of the relief expedition to a successful termination, and to the officers and crew of the Bear for their devotion to duty. High praise and generous reward are due to Mr. W. T. Lopp, of the American Missionary Society at Cape Prince of Wales, and to the intelligent native Artisarlook, who left their homes and families to aid the overland expedition, provid'ng reindeer and helping to drive them to Point Barrow.

## NAVIGATION.

War with Spain and the annexation of the Hawaiian archipelago, which have changed the political and commercial relations of the United States not only with Cuba, Puerto Rico, Hawaii, and the Philippines, but also with the continents between which and North America those islands are stepping stones, require the prompt adoption of an affirmative maritime policy by the United States.

For reasons sufficient in the sight of civilization, we have expelled a maritime power of no mean rank from its colonies. We must be prepared to assume, in part at least, the obligations to those islands which were but imperfectly discharged by that nation, and to secure to them and to ourselves the reasonable benefits of a relationship which Spain
pushed to the degree of extortion. It is not to be expected that the Government of Spain will long continue its support of the mail steamship lines which have connected its lost possessions with the rest of the world. Whether, then, the military occupation of former Spanish possessions by the United States shall lead to their independence or to their control by this country ultimately, at present it is clear that American vessels must be established in part in the carrying trade of the islands or we must allow Great Britain, France, and Germany to fill entirely the place as a carrier which Spain is about to vacate.
Regular and frequent communication between the United States and the islands of the Atlantic and Pacific, which have come within the splere of political influence or the absolute control of the United States, will not, however, satisfy all the obligations which new conditions have created. Our boundaries have been pushed thousands of miles nearer to the markets of Asia and Australia, and hundreds of miles nearer to the markets of South America and Africa than they were a year ago. Advantages for the increase of our carrying trade thus afforded will become ours if we stretch forth our hands to accept them. The relatively undeveloped navigation between the United States, the islands of the Pacific, and Asia, and the partially developed navigation to South America and Africa, will certainly be lost to us if indifference to present political and commercial rivalry is now left undisturbed, as was indifference to the mechanical revolution wrought in navigation by iron and steam at the end of the first half of the century.
It has not escaped the notice even of the less acute among our observing citizens that while we have laws to protect and encourage indus: tries in which, from natural conditions, we must equal or excel our competitors, the building and navigating of vessels for the international exchange of products have received but scant and desultory notice from the law-making power of late years. Yet during these years the conditions under which shipbuilding and oversea navigation are conducted by maritime nations have so changed that the statutes on our books have almost lost vitality.

A positive policy which shall create anew an American seagoing merchant fleet is not intrinsically more difficult to establish than has been the recent rehabilitation of the American Navy, or than, a third of a century ago, was the establishment of transcontinental railroad communication. It will undoubtedly require at the beginning, and for some time to come, the appropriation of appreciable sums of money, though very much less than our annual expenditures in times of peace for naval construction and maintenance; but from the nature of the situation, these expenditures, if adequate at the outset, can be decreased, and, as is usual with properly adjusted expenditures for the improvement of means of transit and communication, will bring in an early and steady return on the investment.
The political exigencies which confront us have been mentioned.

Commercial exigencies, on the Pacific at least, are equally urgent, for events in the East have precipitated a rivalry for the control of the carrying trade of that ocean, the great possibilities of which we have been prone to reckon among our national assets without the effort to secure them.

In the preparation of legislation to meet the requirements of the situation we may study with advantage the methods which are now employed by our competitors, for those methods have been evolved from experiment and experience in a branch of industrial activity to which, of late years, they have given much thought and we little.

Great Britain, Germany, and France have consistently pursued for years the policy of contributing liberally from the public funds. to establish steamship lines as a political measure, regarding such lines as national necessities rather than as commercial investments. This country is now so placed that the same motive must at least be fully considered in deciding upon our course of action. Even if the motive were absent, the fact of Government aid to the foreign lines of steamships with which American vessels must compete can not be ignored. The extent of that assistance is too often exaggerated in this country, but the margins on which the business of ocean transportation is conducted are usually so close that even moderate support for public services may suffice to render successful maritime ventures which could not be undertaken and regularly prosecuted without such support.

France, Italy, and Japan have adopted the policy of aiding from the public funds the construction and navigation of substantially all their vessels engaged in oversea navigation, on the theory that the maintenance of the merchant service is essential as a measure of national defense. By the expenditure of about $\$ 1,000,000$ annually on the training of merchant seamen as naval reserves, and by refunding light dues to British vessels furnishing naval reserves, Great Britain recognizes the same principle. The events of the summer have brought home to us the reliance which a peaceful country in time of war must place on its merchant marine and merchant seamen.

The maritime nations of the world for some years have permitted their shipowners, either unconditionally or under certain restrictions, to purchase vessels built in other countries. The policy of the United States, from the beginning of the Government, has been opposed to American ownership of vessels built abroad. The law, however, was relaxed in order to permit the establishment of the ouly American transatlantic mail line in operation, and during the year Congress, in its wisdom, and the Departments specially charged with the conduct of the war, made numerous exceptions to the general rule.

Maritime nations, notably Great Britain and Germany, require the shipping entering their ports to contribute reasonable taxes for the lighting of the coast, the improvement of barbors, and like objects of expenditure. Although three-fourths of the shipping in international trade
which enters our ports are foreign, and though our annual appropriations for lighting our coasts and improving our harbors amount to many millions of dollars, the United States, with unique generosity, has for many years given entry to our ports at relatively insignificant charges, or no charges whatever, to the vessels of foreign shipowners who are accustomed to pay considerable taxes for the corresponding privilege at home.

By selection and combination from the methods referred to, it will not be difficult to evolve a legislative project for the development of our merchant marine and of domestic shipbuilding, adjusted to our special needs and based on the prevalent conditions of competition in the oceancarrying trade.
The method recommended may be specifically set forth in the following propositions:
First. A remodeling and extension of the act of March 3, 1891, relating to the carrying of ocean mails in American steamships, so that it shall meet requirements which have arisen since the law went into operation.
Second. The establishment of a system of graded bounties upon the mileage navigated by registered American vessels while engaged in the foreign carrying trade as compensation for the training of seamen available for the national defense, the system to have regard also to the construction of vessels which may be promptly and economically converted into cruisers, troopships, colliers, and supply ships for the use of the Government. Special provision should also be made for vessels and men engaged in the dèep-sea fisheries.
Third. Extended application of the principle of the act of May 10, 1892, by virtue of which the St. Louis and St. Paul were constructed in this country upon the registry of the foreign-built steamships New York and Paris, this extension to continue for a short term of years and to be so guarded as to preserve the coasting trade to American-built vessels.

Fourth. A moderate increase in the rates of our tonnage taxes, equalizing them with the corresponding charges at present imposed at London, Liverpool, and Hamburg.
Fifth. The restriction of the trade between the United States, Puerto Rico, and Hawaii and the coasting trade of those islands to vessels of American registry.
These propositions are drawn from the current practices of our maritime competitors. They can be put into operation promptly upon their enactment. They will not raise diplomatic difficulties, delaying action and involving us in prolonged discussion or a war of commercial retaliation. They will not raise political questions upon which parties, as now constituted, may divide. They are believed to be entirely adequate to our needs. The details of these propositions are discussed in the report of the Commissioner of Navigation, in which are also to be found ${ }^{-}$ statistics upon the subject.

## LXXIV REPORT OF THE SECRETARY OF THE TREASURY.

The report of that officer shows: On June 30, 1898, the merchant marine of the United States, including all kinds of documented shipping, comprised 22,705 vessels, of $4,749,738$ gross tons. On June 30,1897 , it comprised 22,633 vessels, of $4,769,020$ gross tons. The following table shows the geographical distribution, motive power and material of construction, and trade of vessels of the United States for the fiscal year 1898, compared with the fiscal year 1897, and also the construction for the two years :

Vessels of the United States.

|  | 1897. |  | 1898. |  |
| :---: | :---: | :---: | :---: | :---: |
| GEOGRAPHICAL DISTRIBUTION. | Number. | Gross tons. | Number. | Gross tons. |

[^0]$\dagger$ Including barges.

The slight apparent decline of about 20,000 tons in our total tonnage is explained by the fact that upward of 60,000 tons were transferred during the closing months of the year from the merchant list to the War and Navy by purchase. In the main, these are still essentially merchant vessels, though temporarily in the service of the Government. During the fiscal year we thus passed through two months of a maritime war without any real decrease in our merchant shipping. This is the more significant, as British shipping during the six months of 1897 covered in our fiscal year showed a decline. The construction of vessels during the year was much less than during the preceding year; but such was the fact also in Great Britain and maritime countries generally. Our shipbuilding during the closing months of the fiscal year showed a marked gain over the corresponding period of the previous year, and the present fiscal year promises to be of exceptional activity in our shipyards.

The receipts from tonnage taxes for the year were $\$ 846,771$, compared with $\$ 731,770$ for the previous year and $\$ 544,225$ for the year ended June 30, 1896. The Commissioner of Navigation offers suggestions on the operation of the laws concerning tonnage taxes which are commended to the attention of Congress. Legislation for the benefit of American seamen now holds a place in Congress favorable to early action.

## STEAMBOAT-INSPECTION SERVICE.

The Supervising Inspector-General reports, for the fiscal year, that the personnel of the Service at its close cousisted of 177 officers, clerks, and messengers.

The expenses were : For salaries, $\$ 288,979.64$; contingent expenses, $\$ 46,340.19$; decrease in expenditures from 1897, $\$ 6,222.98$.

Total number of annual certificates of inspection issued to steam vessels, foreign and domestic, 8,448 ; number of certificates issued to foreign passenger steam vessels, 316 ; to domestic steam and other motor vessels, 8,132 ; gross tonnage of foreign steam vessels, $1,115,446$; net tonnage of domestic vessels inspected, $1,958,437$; total number of offcers holding license, estimated to be 41,000 .

Classification of inspections, tonnage, and officers liconsed, according to the several divisions of navigation, for the fiscal year ended June 30, 1898.

[^1]It is estimated that $650,000,000$ passengers were carried on steam vessels during the year.
Total number of accidents resulting in loss of life during the year......................... 31
Total number of lives lost by accidents from various causes during the year........... 283
Increase in number of lives lost over previous year................................................ 100
Of the number of lives lost as above reported, 84 were passengers and 199 belonged to the crews of the vessels.

Inspections of foreign steam vessels : British, 183 ; German, 61 ; Dutch, 16 ; Norwegian, 14 ; French, 12 ; Belgian, 12 ; Portuguese, 5 ; Danish, 4 ; Spanish, 3; Hawaiian, 2; Japanese, 2; Italian, 1; Argentine Republic, 1 ; total, 316, with a total gross tonnage of $1,115,455.45$.

Under the act of Congress approved January 22, 1894, 6,135 iron and steel marine boiler plates were tested at the mills, of which 558 were rejected for various defects. There were also 2,344 steel bars tested for brace bolts.

The Supervising Inspector-General renews his recommendations in behalf of legislation to secure a nonpartisan service and permanent tenure of office, except for incompetency, misconduct, or permanent physical or mental disability.

OOAST AND GEODEIIO SURVEY.
The progress made in this branch of the Service will be fully detailed in the annual report of the Superintendent, which is required by law to be transmitted to Congress in December.

In the prosecution of the hydrographic work during the year, especial attention has been directed to the localities where the interests of commerce are most important. It has been found most advantageous to concentrate as large a force as possible in such localities and to keep the parties in the field during the whole of the season available for work. By this plan the necessary surveys are rapidly completed with greater economy of expenditure than could be attained by employing a number of small parties season after season in widely separáted portions of the coast, and the results can also be more promptly given to the public. With this idea, the form of the appropriation for field work was modified by the substitution of a few comprehensive items for many small ones, thus permitting the exercise of some discretion in the assignment of parties.

Among the important operations of the year may be mentioned the following : The resurvey of Buzzards Bay, Massachusetts, has been com-
pleted; the resurvey of Chesapeake Bay has occupied a number of parties during the greater part of the year, and it is making satisfactory progress; the survey of Lake Pontchartrain, Louisiana, has been completed; the resurvey of San Francisco Bay is nearing completion, the more important portions having already been covered by the hydrographic and topographic work.

The recent rapid development of the Territory of Alaska, due in a great measure to the gold discoveries in the Klondike region, and the consequent large influx of population and increase in the carrying trade, were regarded of such importance as to call for special surveys along the coast, and to that end an appropriation of $\$ 100,000$ was made by Congress at its last session. At the opening of navigation in the spring three parties were fitted out and sent to Alaska. One of these parties was directed to make an exploration and survey of the delta of the Yukon River, the chief waterway to the interior, with a view to the discovery of a better and deeper channel into the river than that now used. At present, not more than five feet of water can be carried through what is known as the Aphoon mouth of the river, the ouly channel used by vessels, while a much greater depth of water is found after getting into the river. The second party was directed to survey the coast in the vicinity of the Copper River, and the third to make a topographical reconnaissance of the country adjacent to Chilkat and Chilcoot passes, this work having an important bearing on the question of the boundary line between Alaska and the British Possessions. Hydrographic surveys along the Alaska coast have made excellent progress, and charts of the localities most frequented by vessels are being perfected as rapidly as possible. A new steamer for use in Alaska and the Aleutian Islands is now in course of construction, and will greatly facilitate this important work.

Soon after the declaration of war with Spain all naval officers assigned to duty on the Coast and Geodetic Survey were detached. Owing to the fact that many of the civilian officers of the Survey were experienced in hydrography, it was possible to supply the places of most of the naval assistants without any material interruption of the work. Two of the vessels of the Survey, the Blake and the Bache, were temporarily assigned to duty under the Navy Department, and were engaged for some time in special surveys at Key West and Tortugas, and were occasionally employed as transports and dispatch boats. Upon their return north, the naval officers on board were detached. The steamers Patterson and Gedney, at San Francisco, were transferred to the Navy Department by order of the President, but, no occasion for their use by that Department arising, they were shortly afterwards retransferred to the Treasury Department. During the war the general issue of the charts and publications of the Survey was suspended, both as a precautionary measure and because the pressing demand for charts for the use of a large number of naval vessels was such as for a time to
greatly tax the resources of the office. An allotment was made from the appropriation for national defense to provide a small additional force for this work, and this was afterwards supplemented by a special deficiency appropriation.

The party sent out toward the close of the last fiscal year to survey the Pribilof Islands, Alaska, returned in November, 1897, having completed the topographical survey of St. Paul, St. George, Otter, and Walrus islands, together with detailed surveys of the seal rookeries on the islands of St. Paul and St. George. The results of this work have been published and copies furnished to the Departments interested.

One of the most important operations of the Survey, both from a practical and a scientific point of view, is the geodetic connection of the surveys of the Atlantic Coast with those of the Pacific Coast, which has been accomplished by the practical completion of the transcontinental belt of triangulation along the thirty-ninth parallel. This triangulation furnishes an accurate basis for future topographical, geological, or other State or general surveys, and will give the length of an arc of the parallel extending over 48 degrees of longitude.

The determination of the heights of some of the primary triangulation stations in Califormia and Nevada by observations of double zenith distances and lines of spirit leveling and their reference to the sea level have been completed during the year. The determination of the geographic positions of important points throughout the country by latitude observations and telegraphic exchanges of time signals for longitude has made good progress.

Reconnaissance is now being made for the extension of the primary triangulation along the ninety-eighth meridian in Kansas and Nebraska and in Texas. This triangulation, when joined with similar work to be undertaken by the Canadian and Mexican governments, will form a meridian aro of far greater extent than any heretofore measured, extending through 50 degrees of latitude. The measurement of such an arc with instruments and methods of a refinement unknown in earlier geodetic work will furnish valuable data for more accurately determining the size and figure of the earth, and at the same time will serve as an accurate framework for future local or governmental surveys. The transcontinental line of precise levels has been extended from Ellis, Kans., to Hugo, Colo., and from Hugo toward Colorado Springs. Observations of magnetic declination, dip, and intensity at various points throughout the country have been continued.

The Survey is often called upon to decide in questions relating to boundary lines, in which it is essential that the magnetic declination at some former period should be accurately known, and many requests for information on this subject are received. In connection with this work, meridian lines for the use of local surveyors have been established and permanently marked at county seats in many of the States, and magnetic
ranges for the correction of ships' compasses have been determined at several of the important seaports.

Observations of tides with automatic gauges have been continued at Fort Hamilton, New York Harbor; Reedy Island, Delaware; Washington, D. C.; Morehead City, N. C.; Fernandina, Fla.; San Francisco, Cal., and Bremerton, Wash. (at the latter place through the courteous cooperation of the Navy Department), for use in the compilation of the tide tables published annually, and automatic tidal indicators have been maintained at Fort Hamilton, New York Harbor, and at Reedy Island, Delaware River. Another will soon be erected at San Francisco Bay. The collection of data for the Coast Pilot of the coasts of the United States has been continued and new volumes are issued when necessary.
For the purpose of making surveys and examinations needed in the settlement of disputed points in the boundary line between the States of Maryland and Virginia, two officers were detailed in the autumn of 1897, one reporting to the governor of Maryland and the other to the governor of Virginia. Upon the completion of this duty, toward the close of the fiscal year, the officers detailed reported to the Superintendent for employment in the regular work of the Survey.
Cooperation with the international geodetic association has been maintained, and the usual annual contribution has been paid through the ambassador of the United States at Berlin. At the request of the association, examinations have been made, with a view fo the selection of suitable stations for observing the variation of latitude. An officer of the Survey was sent as delegate on the part of the United States to the meeting of the association held at Stuttgart in October, 1898. The association has been furnished, in compliance with its request, with statistics of the measurement of primary base lines and the determination of astronomical latitudes, longitudes, and azimuths by the Coast and Geodetic Survey for the years from 1895 to 1898.
The acquisition by the United States of Puerto Rico and the Hawaiian Islands will render necessary the extension of surveying operations to include the new territory, and information is being gathered with a view to the commencement of such surveys as soon as means are available.
The permanent force of the Survey remains essentially the same, although it has been found advantageous to make a readjustment in the salaries of some of the office employees, and to increase the number employed in the entering grade of the field force, so as to provide a class of qualified young men from which the more responsible positions in the force of field officers may be recruited when necessary. Vacancies occurring in the permanent force have been filled by requisition on the Civil Service Commission, and the employees thus obtained have proved generally efficient and satisfactory.
The work of the Coast and Geodetic Survey is closely corelated with
that of the other Departments, and its charts and publications are used by the vessels of the Nary, the Light-House Board, and the Fish Commission. Copies of surveys and data are furnished to the United States engineers, who in return supply information relating to river and harbor improvements for use in the correction of charts. Special surveys of the entrance to Brunswick Harbor, Georgia, and at Charleston, S. C., have been made during the present fiscal year by an officer of the Survey at the request of the War Department. Surveys at Key West and Tlortugas have been made for the Navy Department, and speed trial courses for naval vessels laid out in several localities.

The work of the computing division, the tidal division, and the drawing and engraving division has been satisfactorily advanced, and has kept pace with the work in the field and with the demands for information from other Departments and from private individuals. The work of the hydrographic division, the disbursing office, and the Office of Standard Weights and Measures, under the immediate direction of the Superintendent, has been efficiently conducted. The clerical work of the office has been performed in a satisfactory manner.

The publication of monthly notices to mariners, containing important information relating to charts, sailing directions, and reported dangers to navigation along the coasts, has been continued, and upward of fortyeight thousand copies have been distributed during the fiscal year.

The net proceeds of sales of charts was $\$ 13,645$, as against $\$ 9,731$ for the previous year. This great increase in the issue of charts was due, in the first place, to the mining excitement in Alaska, which created an unusually large demand for charts and maps of that Territory, and afterwards to the preparations for the war with Spain and its subsequent prosecution, which caused an immediate need for large numbers of charts for the use of the military authorities, the demand from the Navy Department being especially urgent. With a small additional emergency force, the office was able to supply without delay the charts needed for the vessels of the Navy.

Several new maps and charts of special localities in Alaska have been published to meet the popular demand. Besides a large amount of work in progress and a number of new editions of charts, 12 new copperplate charts have been completed during the year and 26 new charts have been published by photolithography. Of the latter, 52,476 copies have been printed; 78,995 copies of charts have been printed in the office from copperplates; 55 electrotype plates of charts have been completed, and a large number of photographic reductions and copies of charts made in the photographic department. For six weeks during the latter part of the fiscal year the plate-printing office was kept in operation day and night in order to keep up with the demand.

In the instrument division the inventories of property have been kept up, and a large amount of work done in the construction of instruments and apparatus, the repairs of those already in use, the packing
of instruments for transportation, the purchase of new instruments, and miscellaneous work of various kinds.

## Office of Standard Weights and Measures.

In the Office of Standard Weights and Measures important service has been rendered to the Customs Division of the Treasury Department in the matter of examining, testing, and standardizing the instruments and apparatus used for the polariscope analysis of imported sugars for the imposition of duties. Work on the standards for electrical measure has made satisfactory progress, an appropriation having been obtained from Congress for the purchase of the necessary instrumeats and apparatus. Much of the time of this office has been devoted to the comparison of weights and measures for manufacturers, surveyors, engineers, and others who require great precision in their work. Requests for such service become more frequent as the functions of this office and its facilities for accurate work become more widely known.

## LIGHT-HOUSE ESTABIISHMENT.

The usual routine of this branch of the public service was naturally much disturbed by the war with Spain, and the maintenance of the aids to navigation along our extended seacoast, under the unusual and changing conditions incident to a state of hostilities with a foreign power, called for extraordinary exertions on the part of the officers and employees charged with this duty.

In anticipation of a state of war, the Light-House Board prepared a detailed memorandum, outlining the special work and dispositions that would be necessary to put the Service in shape to meet the new conditions and to enable it to cooperate with those branches of the military and naval services charged with coast defense and to act as an auxiliary to those services as far as possible. This memorandum met with my approval, and copies were sent to all officers in charge of coast districts and to the Secretaries of War and of the Navy. In general terms, the program outlined contemplated putting all important seacoast light stations and those near the entrances to important bays and harbors in telephonic or telegraphic communication with the local offices and with the existing telegraph and telephone lines of the War Department, Life-Saving Service, Navy Department, Weather Bureau, and with the commercial lines. Signal flags were to be supplied to the keepers of coast stations and special arrangements were made for the delivery and transmission of messages. All vessels were to be put in repair, and arrangements were to be made to promptly extinguish lights and remove buoys. Arming of the tenders was to be provided for if found necessary, and all officers and employees were directed to cooperate to the fullest extent with the local military and naval authorities. Assistance was especially directed in establishing and protecting the sub-
marine mine defenses of the harbors and in adapting the system of lights to the conditions which were imposed by the mines. By letter of March 25, 1898, the Secretary of the Navy was advised that six of the vessels of the Light-House Service were available for naval service, and four of these were subsequently detailed for this duty. They were specially fitted out with rapid-fire guns and torpedoes, etc., and some of these vessels rendered conspicuous service during the war.

April 6, upon recommendation of the Light-House Board, a request was made that $\$ 75,000$ of the appropriation of $\$ 50,000,000$ for national defense be allotted to the Light-House Board for establishing communication with light stations, as outlined in the memorandum already referred to, and for general purposes connected with the public defense. This recommendation received the approval of the Secretary of War and of the President.

An allotment of $\$ 38,500$ from the same appropriation was also made to enable the Light-House Board to charter vessels to distribute supplies to light stations in place of those assigned to naval service, and for other expenses incident to this purpose.

Under the allotment for communications, etc., 92 miles of land telephone and telegraph lines were built, 43 miles of submarine cable were laid, connections were made with 78 light stations along the Atlantic and Gulf coasts, and most of these stations were fitted out with signal flags, masts, code books, and marine glasses, to enable them to exchange signals with vessels and to communicate readily with local headquarters. In several of the important harbors assistance was rendered by the tenders of the Light-House Service in planting the submarine mines. One tender that remained on light-house duty was provided with small arms for the crew.

By using two of the self-propelling steam light-ships as tenders and sending supplies by commercial lines of transportation as far as practicable, the Service was maintained without chartering additional vessels.

The personnel of the Service experienced many changes previous to and during hostilities. In March three members of the Board were relieved and assigned to command of squadrons or vessels of war. These were Commodore (now Admiral) Schley, the cbairman, who took command of the "Flying Squadron;" Captain Evans, assigned to command of the Iowa, and Commander Wilde, who took command of the Katahdin. Colonel Gillespie was appointed Brigadier-General of Volunteers, but was not relieved as member of the Board. The name of the Engineer Secretary was transmitted to the War Department as available for immediate dutypin the field, but he was not called upon for military duty during the war. A number of district inspectors were also assigned to duty at sea, and temporary arrangements were made by assigning retired officers of the Navy or the district engineers to inspection duty.

At most of the important seaports of the Atlantic, Gulf, and Pacific
coasts the harbor lights were extinguished in whole or in part, and proper notices to mariners issued upon receipt of advice from the War Department that the ports had been closed to night navigation on account of the submarine mine defenses.

Notice to mariners was also issued that all the light vessels stationed at considerable distance from shore on the Atlantic Coast might be removed from their stations without further notice, and the LightHouse Board took necessary action to provide steel structures which might be placed as day marks or unlighted beacons on the more dangerous outlying shoals in the event that it became necessary to remove the light vessels. This necessity did not, however, arise.

Notwithstanding the unusual conditions, all aids to navigation were maintained in a generally efficient condition, the usual work of supplying and repairing stations and light vessels was carried on, and a considerable amount of construction work under special appropriations was accomplished. During the year a total of 97 new lights, 13 new fog signals, 3 new light vessels, 191 new buoys, and 11 new day marks were established. Two new tenders were completed and put in commission, a large number of light and fog-signal stations, depots, and day marks were extensively renovated, and several tenders and light vessels were practically rebuilt.

Under the special appropriation for oil houses, 16 of these structures were completed during the year.

The work of a general and systematic revision of characteristics of aids to navigation and improvements in lighting and fog-signal apparatus, which was inaugurated last year, was much interfered with by the war with Spain, but considerable progress was made, and with data now available the work of improvement can be prosecuted as rapidly as the appropriations may permit. One improvement of note that has been accomplished is the substitution of a powerful electric flashing light for the two old-fashioned fixed lights at the Highlands of Navesink, entrance to New York Harbor.

The increasing demands of commerce require a continued increase in the estimates under all the general appropriations, as well as in the estimates for additional lights and fog-signal stations, light vessels, and tenders, which must be provided for by special appropriations.

The policy of providing sufficient funds under the general appropriations to enable the Light-House Board to make extensive renovations of existing stations, rather than to leave the more important, and therefore the most needed, work of this character to be done under specific appropriations, has contributed greatly to the efficiency of the Service. Considerable embarrassment has resulted from insufficiency of the appropriation for salaries of keepers, and a deficiency appropriation under this head became necessary to provide for these salaries for the fiscal year.

The estimates submitted for the increase and maintenance of the

Light-House Establishment for the fiscal year 1900 have been carefully prepared and are conservative in amounts. Their careful consideration by Congress is asked.

The recommendation of last year, that provision be made for increased clerical force in the office of the Light-House Board and for more suitable office accommodations in a separate building, is renewed.

The Board has taken the initiatory steps to obtain and compile detailed information in regard to the light-house service in the recently acquired foreign possessions of the United States, with a view of preparing estimates and formulating recommendations for the administration of this portion of the Service at the proper time. This matter will be made the subject of special recommendations at a later day.

## LIFE-SAVING SERVIOE.

The Life-Saving Establishment, at the close of the fiscal year, embraced 264 stations, of which number 192 were situated on the coasts of the Atlantic Ocean and Gulf of Mexico, 56 on the American coasts of the Great Lakes, 1 at the Falls of the Ohio River, Louisville, Ky., and 15 on the Pacific Coast.

There were within the scope of the Service 402 disasters to documented vessels, having on board 3,113 persons, of whom only 12 were lost. The estimated value of the vessels was $\$ 5,861,320$, and that of the cargoes $\$ 1,307,070$; making the aggregate value of property imperiled $\$ 7,168,390$. Of this amount, $\$ 6,410,530$ was saved and $\$ 757,860$ lost. The number of vessels totally lost was 59.

The number of disasters to undocumented craft, comprising sailboats, rowboats, scows, etc., was 365 , involving 874 persons, 10 of whom perished. The value of property involved is estimated at $\$ 199,705$, of which amount $\$ 177,825$ was saved and $\$ 21,880$ lost.

The following statement shows the aggregate number of disasters and their results:

The total number of disasters during the year was much larger than appears in the records of any former year. It is noted, however, that the loss of life was only 22 , as against 53 during the year 1897, when the total number of disasters was not nearly so great, and is considerably less in proportion to the number of disasters than in any previous year.

Besides the number of persons saved from vessels of all kinds, 56
others, who had fallen from wharves, piers, etc., were rescued under circumstances of such peril as must have proved fatal in many cases but for the prompt and skillful aid of the surfmen.

The life-saving crews saved and assisted to save during the year 471 vessels, valued with their cargoes at $\$ 2,868,655$. Of these vessels, they saved without outside assistance 349 , valued with their cargoes at $\$ 861,700$, with a loss or damage of only $\$ 8,380$. In the remaining 122 instances they united with other agencies-wrecking vessels, tugs, revenue cutters, etc.-in saving property valued at $\$ 1,980,490$, out of an amount imperiled estimated at $\$ 2,006,955$.

Assistance of minor importance was rendered to 430 other vessels in distress. The crews also warned from danger 226 vessels, 215 by night signals and 11 by day signals. The loss of life and property thus averted can not be estimated, but that many disasters were prevented is evident from the circumstances under which the warnings were given.

The net expenditure for the maintenance of the Service for the fiscal year was $\$ 1,497,676.35$. The sum of $\$ 70,000$ was appropriated for the maintenance of the stations as coast signal stations during June and July, on account of the war with Spain, of which $\$ 56,952$ was expended. This expenditure is included in the sum above stated as the cost of maintaining the Service.

Six new stations, located, respectively, at Damariscove Island, Maine; Salisbury Beach, Massachusetts; Old Harbor, near Chatham Beach, Massachusetts; Isle of Wight, north of Ocean City, Maryland; Lake View Beach, near Port Huron, Michigan ; and Petersons Point, Gray's Harbor, Washington, were completed during the year. All, with the exception of the station at Petersons Point, have been equipped and placed in commission. There has been some unavoidable delay in equipping the latter station, but it will soon be ready for selvice.

Contracts were also entered into for the construction of two other stations, one at Great Boars Head in the town of Hampton, New Hampshire, and one at Sandy Point, on the north end of Block Island, Rhode Island. These are now approaching completion.

The stations at Mantoloking, Island Beach, Ship Bottom, Little Egg, Brigantine, Pecks Beach, Corson Inlet, and Holly Beach, New Jersey, having become unserviceable by reason of age, and not being adapted to the present demands of the Service, are being replaced by new and appropriate buildings. A new station is also under construction on Hog Island (Broadwater), coast of Virginia, in place of the old one, no longer suitable.

Extensive repairs and improvements have been made to stations in the First district, coasts of Maine and New Hampshire, and in the Ninth district, coasts of Lakes Ontario and Erie.

The telephone lines of the Service have been considerably extended and much improved. The old line along a large portion of the New Jersey coast, which, from its trying location and contiguity to other
lines, including electric-light and trolley wires, was particularly liable to derangement, has been superseded by a new metallic circuit, which is working admirably, and other improvements and safeguards have been provided elsewhere as far as possible. Copper wire is being substituted for galvanized-iron wire on the coasts of Cape Cod, Long Island, Delaware, Maryland, Virginia, and North Carolina as rapidly as possible.

The facilities heretofore afforded by the telephone system to maritime exchanges and other commercial interests have been enlarged and perfected as conditions have permitted. Information of all disasters of consequence, occurring within the scope of the Service, is now promptly transmitted to the general telegraph system of the country, by which means it speedily reaches all important commercial centers. The lines now extend along the coasts a distance of about 800 miles, and nearly all the stations in the Service are thus brought within ready communication with each other, with the district offices, and with headquarters at Washington.

The possibility of hostile demonstrations along the Atlantic and Gulf seaboard, after the declaration of war between Spain and the United States, directed the attention of the Government to the necessity of a line of coast signal stations. It was necessary that these should be sufficiently numerous and near the coast to immediately discover the presence of the enemy's vessels and to receive and impart information from or to American vessels in the offing, as well as to communicate with headquarters in Washington without delay. The immediate availability of the life-saving stations was suggested. The result was that of the 233 coast signal stations established, 139 were life-saving stations, a special act of Congress, having been passed upon the recommendations of the Secretary of the Navy and the Secretary of the Treasury, authorizing such stations as might be found necessary to be kept open and manned during the months of June and July, when they would otherwise have been closed.
The special adaptation of the stations and their instant availability consisted in the fact that they were already well located, manned by men trained to the necessary duties, and familiar with the signals of the international code. The crews were required in any event to patrol the beaches adjacent to their respective stations every night, and in thick weather during the day, as well as to maintain a constant day watch in fair weather, and any information they might obtain could be immediately transmitted to the headquarters of the Army or Navy at Washington through the telegraph and telephone system above described. Fortunately they were not called upon to note the appearance of an enemy, but the value of their presence as a measure of safeguard is in no wise diminished. The Superintendent of the Coast Signal Service reports that the system would have been entirely adequate to perform any duty of the kind which might have arisen, and that it served a
valuable purpose in keeping the Navy Department advised of the movement of Government vessels, etc., thé service rendered in some instances being of great importance.

Although established as a peace organization in the interests of commerce and humanity, the facility with which the life-saving stations were utilized as military outposts forcibly calls attention to the fact that the Government, without realizing it, had equipped itself in time of peace with a practical coast guard, instructed and drilled in every essential requirement for duty in case of war, and affords the gratifying assurance that in this respect at least no emergency in the future can be so sudden as to find the country unprepared, while nothing whatever is added to the expense of the military arm when the nation is at peace.

## STATE BONDS OWNED BY THE UNITED STATES.

The attention of Congress is again invited to the nonpaying State stocks and bonds formerly in the Indian trust fund and now belonging to the United States.

It is recommended that legislation be enacted by which settlements may be effected and collections made of the amounts due. Under laws of recent date the cases of Arkansas and Tennessee are now in process of settlement.

Following is a statement of the stocks and bonds now in the Treasury :

| Arkansas | \$160, 000.00 |
| :---: | :---: |
| Florida | 132,000. 00 |
| Louisiana | 37, 000.00 |
| North Carolina | 58, 000.00 |
| South Carolina | 125,000.00 |
| Tennessee. | 335, 666.66 ${ }_{3}^{2}$ |
| Virginia | 594, 800.00 |
| Total | , 442,466.66 ${ }_{3}^{2}$ |

A settlement has already been effected with Arkansas pursuant to the authority conferred in the act of Congress of August 4, 1894 (28 Stat., p. 229), as approved by the act of April 29,1898 (30 Stat., p. 367). A compromise was made with the State in which certain deductions and credits were allowed for the claims of the State against the United States, and the debt of the State reduced thereby $\$ 633,000$, leaving a balance of $\$ 160,000$ due in bonds bearing interest at 6 per cent, to be paid by the State on or before maturity of the bonds, January 1, 1900. There was received from the State in cash and covered into the Treasury during the fiscal year 1898, as a part of the settlement, the sum of $\$ 34,172$.

In regard to the indebtedness of the State of Tennessee, the joint resolution of Congress, approved May 12, 1898 (30 Stat., pp. 742, 743), provides for the adjustment of the claims between the United States and the State, with directions that any settlement or compromise effected by virtue of said act shall be reported to Congress for its action and
approval, and the case is now being considered preparatory to a report to Congress thereon.

A history of these State stocks and bonds may be found in House Doc. No. 263, Fifty-fourth Congress,-second session.

## PUERTO RICO.

An important question, which will no doubt demand consideration in Congress at an early day, is the money situation in Puerto Rico. The existing currency of that island consists of silver coins known as pesos and centavos. The peso is of the weight and fineness of the Spanish piece of 5 pesetas and corresponds in both respects to the 5 -franc pieces of the Latin Union. Its bullion value, compared to the bullion value of the American dollar, is as 93.5 is to 100 . The centavo is onehundredth of a peso, and the smaller coins consist of pieces of 20 centavos and 40 centavos, these being the exact counterparts in weight and fineness of the Spanish pieces of 1 and 2 pesetas and the French coins of 1 and 2 francs.

The Puerto Rican coins bear no fixed relation to gold, not being anywhere redeemable in the yellow coin. They were introduced into the island by Spain in 1895, and by a forced exchange were substituted for Mexican coins, which had previously constituted the principal money medium. The best estimates obtainable place the volume of this silver money now circulating in Puerto Rico at $5,500,000$ pesos. The fact that the Spanish Goveroment put the same quantity of fine silverinto the peso as it did into the 5-peseta Spanish coin indicates a purpose to have maintained the two on a parity. If so, the purpose was not accomplished; the Puerto Rican coins quickly fell below the value of the coins of the home government, and have since had no established relation in value to them. The oscillation in value as related to gold coin has been constant, rising and falling, as affected by the state of exchanges between Puerto Rico and its foreign markets.

It is annecessary here to point out at any length the general evil resuits upon industry and commerce of a currency medium so out of harmony with the world's money as to induce a widely fluctuating rate of exchange. It may be instructive to consider them as illustrated in Puerto Rico. Situated as that island now is, with a circulating medium void of any established relation to the world's money of commerce-gold-it is exposed, to the fullest extent, to such evil results. A brief statement of facts will make this apparent. Dating back to 1894, the peso has oscillated in its power to buy sterling bills on London, or bills on New York payable in American money, as follows: In 1894 the average value of the peso, thus tested, was 65.76 cents; in 1895 it was 60.38 ; in 1896 it was 63.95 ; in 1897 it was 60.10 ; in 1898 it was 58.70 . But these averages by no means represent steady, continuous values. Each year, each day of the year, the fluctuation has been wide. The
limit of this fluctuation was, in 1894,18 per cent; in 1895,20 per cent; in 1896, 10 per cent; in 1897, 11 per cent.

Upon this wavering, uncertain, variable money medium the commercial and industrial affairs of the island have been conducted. The determining influence upon the value of Puerto Rican money seems to have been the state of the foreign exchanges. When exports of island products-sugar, tobacco, and coffee-were large, the desire to convert the value of these products, realized abroad, into the domestic money, creating as it did an extra demand for it, caused the peso to rise, or, what is equivalent, it caused exchange to fall. From whatever point viewed, the result was the same in its effect upon the producer-he was deprived of a just realization on his products. This unfortunate currency condition was a tax upon his enterprise and industry.

Contrariwise, when foreign bills were not in supply, because crops had been marketed, and when those engaged in importing wares and merchandise from abroad were under necessity of settling their accounts in London or New York, the offering of domestic money to the bankers and brokers in exchange for drafts on London or New York increased in volume, exchange rose in price, or, what is equivalent, the peso fell in its power to exchange for the world's money.

Whichever way looked at, the effect was the sume in raising to the merchant, and through him to the consumer, the cost of all products purchased abroad. The domestic and the wage-worker were the unconscious but the real victims of these financial derangements. The only beneficiaries were the speculator and the exchange dealer, for to these two it is an axiom that the wider the range of fluctuation, the greater the range for possible profits.

It is bighly important that American capital should find no obstacles in its transfer to and from Puerto Rico, if the United States and the island alike are to reap the benefits which ought to flow from their proximity, their new relations, and from the enterprising commercial spirit of our people. A wide difference in the rate of exchange, occasioned by the use of a differing and unrelated currency, is a serious obstacle to the transfer of capital, as it is to legitimate industry. The obstacle can and ought to be removed.

It is therefore suggested that, at the proper time, action be taken by Congress to assimilate the currency of Puerto Rico to that of the United States, so far and so rapidly as this can be done without unduly disturbing existing conditions and contract relations in Puerto Rico. This, it is believed, can be accomplished by making customs dues in the island payable in American money, yet receiving the silver pesos and centavos at a fixed relation to our dollar. The limited amount of Puerto Rican money would thus find an important avenue where a uniform value on the basis arranged would be realized. This avenue would probably be broad enough to give the assurance needed to keep the peso and its minor subdivisions current through the island at the
custom-house valuation. If any doubt should arise as to the sufficiency of such a provision, it could be made the duty of the Secretary of the Treasury to give American coin in direct exchange for the Puerto Rican coin at the custom-house ratio whenever in his opinion it should be necessary so to do in order to maintain the ratio established.

The rate or ratio to be adopted should be determined by the fair average of the Puerto Rican coins during the last three or five years in their power to purchase bills of exchange on London or New York. If the information necessary for fixing the fair ratio be lacking, the subject might be referred to a commission of experts, who, after hearing testimony from merchants, bankers, and wage-earners in Puerto Rico, could undoubtedly fix the ratio based upon the specific facts presented to them.

From information fairly to be relied upon, it appears that the island coins have had a value in domestic exchanges and in the purchase of sterling bills considerably above their bullion value, measured by the world's price for silver. It would seem just and wise to adopt this local value in the establishment of a fixed ratio to the United States standard. To adopt the bullion value of the currency in fixing such a ratio would seriously disturb existing conditions in the value of wages and work injustice to contract relations between debtors and creditors.

If a laborer's wages be 1 peso per day, and the average power of that coin to purchase what his needs require be equal to 60 cents gold, then to reduce the value of the coin in which he is paid to 40 cents would by so much destroy the reward of his labor, although his nominal compensation should remain the same. On the other hand, to raise the value of the peso to the value of our dollar (though the disparity in weight and fineness between our silver dollar and the peso is small) would operate to increase the labor cost to the employer to a point where the product obtained might not justify by its market price the cost of producing it. This, of course, would depress industry and throw labor out of employment.

Again, the relations between debtors and creditors call for equitable and just consideration. It is estimated that in the form of mortgages, etc., there is an indebtedness of some twenty or twenty-five millions, and that the current shorter-time credit obligations aggregate about the same in amount. The average value of the peso for some time past is the best measure of the value that was transferred when these evidences of debt were issued. To make an arbitrary change so as either to enhance or reduce its general average value would therefore work hardship and injustice. The average power of the peso, while widely fluctuating between the two limits, has ranged from 160 to 190 -that is to say, at times 160 pesos were as effective in paying a debt or buying goods in London or New York as 100 American dollars; at the other extreme, it has required 190 pesos to be as effective as 100 American dollars.

Subject to correction from a better knowledge, I think all interests would meet in giving a fixed value of $166 \frac{2}{3}$ to the peso-that is to say, the peso shall be maintained at the value of 60 cents, first by receiving it in payment for customs at that price; second, by giving for it, when required, American money at that rate of exchange. It is by a similar process that our own silver money has been kept on a parity with our gold coins.

It is not contemplated in the considerations here presented to retire the Puerto Rican coins-certainly not until the coins of the United States have become familiar and acceptable to the people. There are three things to which a simple people cling with tenacity-their language, their religion, their money of account. The peso and its fractional part, the centavo, are terms made familiar, by use, to the laborer and the tradesman. These coins, valued and fixed as above suggested, would no doubt for some time be preferred to the American coin, which to their minds would present the apparent contradiction of a coin of the same material, possessing less bulk and weight, yet carrying with it a higher exchangeable value. They would doubt at first, refuse to believe, and cling to the terms" peso" and "centavo," rather than adopt the really effective ones, "dollars" and "cents." Therefore the peso, if received through the custom house or for other taxes, or if received in exchange for American money at the Governmentagency, should be again disbursed or reexchanged asdemand from the people might require. In fact, it may be necessary, in order to give absolute steadiness to the peso, not only to receive or redeem it at a fixed price to be again disbursed at the same price, but it may also be necessary to coin at our mints an additional amount of pesos and their fractional parts for use in the island. If, as suggested, customs dues be made receivable in American money and the peso be received as equal to 60 cents, there is little or no danger that it will fall below that value anywhere in the island. Being effective at 60 cents for customs dues, it will not be exchanged elsewhere for less. But this would not prevent its rising above that value.

It is now apparent that the influx of American money is having the effect to give the peso a higher value. The peso being the domestic money, familiar to all the people of all classes, it becomes desirable to exchange American money for the domestic, and the pressure to do this raises artificially the exchangeable price of the peso. The broker and the money changer know how to make the most of the opportunity. To counteract this operation, which tends to repress the introduction of capital in the form of money, it may be necessary, as before stated, to coin on Government account an additional stock of the domestic money, which shall be freely offered in exchange at the uniform price, this new supply, together with the old stock, to be received at the custom house or otherwise redeemed at the same price.

At the risk of prolixity, which the importance of the subject might
excuse, I submit this additional thought for such consideration as it may merit. The present Puerto Rican coins carry the emblems of Spanish sovereignty. Whether or not additions to the coinage be made, new coins should be struck, of the same weight and fineness, upon which should be imprinted proper emblems of our new relations, and these should be substituted for the old. By melting up the old as they come in and by paying out the new, such a substitution can be easily and quite rapidly effected. Gradually, custom and use would establish American money, whether of silver, gold, or paper, as the medium of exchange and payment.

Then, it may be expected that the present Puerto Ricau money will not be called for, American money and American terms of account and payment having superseded those now in use. Then, upon the Govern-ment-either of the island itself or upon the United States Government, as may be determined-the loss will fall resulting from the redemption of the Puerto Rican coins at an overvaluation. If the peso be rated at 60 cents, as herein suggested, and if the bullion in the coin remains at its present value of 40 cents, and, lastly, if the amount of the silver money referred to be correctly estimated at $5,500,000$ pesos, the loss would amount to $\$ 1,100,000$ American money. This would be the ultimate cost of relieving the island from the grievous ills of a bad currency system. The benefits would be immediate, and, it may be hoped, would be continuous for all time. The cost, when it began to be experienced, would be distributed over a series of years, and might easily be covered by proper appropriations from the revenues of the island.
The necessity of securing stability to the peso is fully recognized by all parties in Puerto Rico, although opinions differ as to the ratio which ought to be observed in relating it to American money. Suggestions have also appeared in favor of an immediate and coercive exchange of the insular coins for our money upon a ratio to be determined. While this could be made operative to introduce American money and American terms of account at an earlier period than by the course above recommended, it is open to some objections. It would throw confusion into the minds of the simpler-minded people and excite suspicion as to the purity of our intention. It would create an immediate deficit for the difference between the bullion value of their coins and the price for which they were exchanged. This deficit would have to be faced and provided for at once, while by the slower process that deficit would be spread over a period of years, and could be more easily met.

I have so far spoken as if silver coin were the only medium of exchange in Puerto Rico. Such is not the fact. The Spanish Bank of Puerto Rico, holding a franchise from the Spanish Government, has been privileged to issue its notes to the extent of three times its capital, and the note issues of this bank at one time outstanding have been as high as $2,500,000$ pesos. Under the circumstances now existing the notes of
the bank are not in favor, and it is not improbable that its affairs will be liquidated. This being so, the function which it has in the past discharged should be assumed and prosecuted, within proper legal limitations, by some one bank .organized with ample capital and with the right to establish branches at convenient points, and to issue its own notes to circulate as money. Or, if this should not be favorably considered, then an act extending to the island the rights and privileges of the national banking system might merit approval.

## NEW BOND ISSUE.

Under the caption of Loans and Currency, on page XXIV of this report, will be found particulars (in the way of information) as to the issue of $\$ 200,000,0003$ per cent bonds, authorized by the act of June $13,1898$. Whei the bill was reported, which after amendment became the law, some doubt was exprëssed by those best acquainted with such matters whether bonds bearing so low a rate as 3 per cent could be sold except at a discount. There were substantial facts cited in support of such opinion. The then recent declaration of war with Spain had disturbed the always sensitive conditions of trade and finance. The morbidly timid along our eastern and northern coast were in a state of more or less alarm. The simpler-minded depositors in savings banks made withdrawals of their funds; the commercial banks in the larger cities sympathetically suffered through loss of cash reserves to savings institutions. The rate of interest rose; the price of securities declined. Even old issues of United States bonds fell to a point where they would yield to the investor from 3.1 to 3.25 per cent per annum upon an investment then made. Such was the condition of the financial market in the latter part of April and the earlier part of May last.

There was another factor, however, which operated to insure a successful negotiation of the new loan at 3 per cent, which it is well to note. That factor was the self-interest of national banks. These institutions as a whole then enjoyed an unavailed-of privilege under the law to issue nearly four hundred millions in circulating notes. True, the condition precedent to the exercise of such privilege was the deposit of United States bonds, the price of which in the public market had so advanced as to destroy the motive of profit for the exercise of the privilege. Owing to the feature of the national banking act which restricts the issue of circulating notes to 90 per cent of the face of the bonds deposited as security, a 3 per cent interest bond at par, when used for the purpose indicated, yields better returns to the banks than 4 or 5 per cent bonds at the rate of premium then or now prevailing. It is demonstrable that the 3 per cent bonds at par would afford to national banks the means of obtaining through circulating notes a profit of substantially 1.4 per cent on the amount invested. That this profit would furnish a sufficient motive for the banks as a whole to take up $\$ 200,000,000$ in bonds need not be argued; it is self-evident. These
conditions practically insured the successful negotiation at par of the loan at the rate of 3 per cent. This was quickly perceived in the money market, and, joined to easier conditions in general finances, it operated to establish a prospective premium on the anticipated issue; in fact, at the moment when the act was approved, the whole issue of $\$ 200,000,000$ could have been sold at a premium of probably $2 \frac{1}{2}$ per cent. This could hardly have been foreseen, and it was evidently the opinion of Congress also that a wide distribution of the obligations among the people, at the uniform price of par, was of more value to public interests than the realization of a possible bonus from small groups of professional dealers. The discriminating mandate of the law was thus expressed :

The bonds authorized by this section shall be first offered at par as a popular loan under such regulations, prescribed by the Secretary of the Treasury, as will give opportunity to the citizens of the United States to participate in the subscriptions to such loan, and in allotting said bonds the several subscriptions of individuals shall be first accepted, and the subscriptions for the lowest amounts shall be first allotted.

Obedient to the fair spirit of the law, the Treasury Department sought by every means to extend the opportunity for subscription to all the people. Every newspaper in the United States was supplied with interesting and instructive information relative to the issue, which, with few exceptions, was patriotically and free of charge prominently displayed. Blank forms for subscriptions, with circulars of information, were supplied to more than 22,000 money-order post-offices, every express office, and all the banks. A period of thirty-one days was allowed for the receipt of subscriptions. A summary of subscriptions received, classified as to amounts, is here given :

Subscriptions for $\$ 500$ and less.
Less than $\$ 100$ ..... 11, 483
$\$ 100$ to $\$ 180$. ..... 14, 974
$\$ 200$ to $\$ 280$ ..... 9, 902
$\$ 300$ to $\$ 380$. ..... 7, 594
$\$ 400$ to $\$ 480$. ..... 7, 698
$\$ 500$ only ..... 180, 573
Total ..... 232,224
Subseriptions for more than $\$ 500$.
$\$ 520$ to $\$ 980$. ..... 11, 862
$\$ 1,000$ to $\$ 1,980$. ..... 25, 152
$\$ 2,000$ to $\$ 2,980$. ..... 10, 349
$\$ 3,000$ to $\$ 3,980$ ..... 5, 165
$\$ 4,000$ to $\$ 4,400$ ..... 5,223
1,875
\$4, 500 . ..... 59,526
More than $\$ 4,500$. ..... 28, 376
Total ..... 88, 002

The burden of work thus suddenly thrown upon the Department it is difficult to fully comprehend. In the mere matter of names and addresses, the work of writing-by reason of necessary duplication-was
equal to a detailed schedule embodying several millions of names, with the address-town, county, and state-of each fully extended. To accomplish the work imposed, an addition for three months or more of nearly six hundred persons to the regular working force of the Department was necessary. The Bureau of Engraving and Printing was correspondingly overtaxed. The immense increase in the number of bonds of small denominations, as compared with any previous issues, is a partial explanation. The acquisition and installation of twelve highgrade power presses, made in anticipation of increased operations, alone saved that Bureau from a complete breakdown.

That the popular-loan method so successfully used on this occasion gave general satisfaction to the people is beyond dispute. Led to believe-whether justly or unjustly-that on former occasions advantage had been taken of public necessities by intermediaries who made . unfair profit between the Government and the people, they hailed with satisfaction this attempt to deal directly with the citizen. There was a great moral value in this, difficult to estimate in terms of money; yet worthy of consideration in the mind of the statesman. Was the operation advantageous, also, from an economic standpoint? As already indicated, a bonus of perhaps five millions could have been secured by offering the loan to competitive bidding. That was the sacrifice made in order to place the loan directly with the people at the uniform price of par.

The act now under consideration was no doubt influenced by the theory, if not definitely shaped on it, that the dissemination of Government securities among the people would attach the holders thereof by closer bonds of sympathy to the Government, and secure from all such a more zealous watchfulness over public affairs; for it is this kind of watchful interest which best secures the welfare and perpetuity of a free state. If this motive operated in the legislative councils, its practical value was not so permanent as could be hoped for. As before stated, allotments were made to less than 325,000 persons, aggregating $\$ 200,000,000$. From the moment the bonds were issued until the present time, a movement of concentration has been observable. At this time $\$ 77,361,000$, the original holdings of about 116,000 subscribers, have passed into the ownership of 1,001 persons, firms, and corporations. To this extent the moral value of private ownership has already disappeared.

The loan was promptly taken; in fact, it was subscribed for many times over. From this it may be assumed that similar results would follow on future occasions. It will not do to rest securely on such an assumption. In fixing the conditions of a proposed bond as to time and rate of interest, Congress is in essence formulating a proposal. The public-the investor-is`yet to determine whether or not the proposal is satisfactory. Congress can not exactly hit the mark in advance. If it determines that the proposed bond shall not be sold at
less than par, it must so fix the rate of interest and time of payment as to make the new security somewhat more attractive than outstanding issues-price now being considered. It must also make allowance for a disturbance in the previous market equilibrium. A large addition to a previous supply, other things being the same, tends to reduce the price, whether of commodities or securities. I repeat that in a legislative act it is impossible to forecast and exactly determine these ruling factors. Economically considered, the part of wisdom would seem to be to provide a sufficient margin of new advantages in interest, or otherwise, to float the loan successfully, and then allow the market, by fair competition, to reduce the margin thus provided to the narrowest limit. The new bonds were properly fixed at 3 per cent. Strict business logic dictated that they should enter into competition with the older issues; it was the only way by which their true relative value could be determined. Instead of this, the whole issue was offered to the ${ }^{\circ}$ subscribing public at the uniform price of par. Nevertheless, the experiment may be considered a justifiable one, and it worked out in a way to strengthen the national credit. From it, however, useful suggestion may be derived.

It is evident that an attempt by Congress to fix the proper rate of interest to justify an offer of the Government's obligations at par will always be subject to one of two dangers-

First, if the rate of interest be fixed too low-time and circumstances being considered-the loan may fail, with the consequence of serious derangements to the Treasury ; or,

Second, if the rate of interest be fixed too high, and the issue offered at par, while it will be eagerly taken, the result may be a great economic waste to the Treasury.

The considerations thus presented lead to the conclusion that while the features intended to make the loan a popular one should be preserved, provision should also be made to secure to the Government the highest value attainable under the fair operation of the popular-loan principle. It is but a commonplace to allege that in its relation to business affairs the Government should have strict regard to the principles which elsewhere and everywhere obtain, $i$. e., in the purchase of material and supplies required for public use, it should-as it doesseek the lowest price for the same goods; and, conversely, in the sale of what it may have to sell, whether of material or of its own interestbearing obligations, it should also seek to realize the highest attainable price. Should exigencies arise-not now observable-under which further issues under the act of June 13 should be made necessary, it would seem wise to modify in some way the mandatory provision which would now require an offer of the same to the people at par. With a market premium of 6 per cent now established, and conditions remaining the same, such a proceeding would involve an inexcusable economic waste. On the other hand, as before noted, it is not to be expected that a previous market premium can be fully realized on a large addition to the
market supply. I believe that, with some extension of discretionary power to the administrative department of the Government in this connection, the popular features of the present act can be fully preserved, while the risk of undue sacrifice in maintaining that valuable principle may be obviated.

Under the provisions of the act one-tenth of 1 per cent of the amount of the bonds authorized was allowed "to pay the expense of preparing, advertising, and shipping the same." The records show an average cost to the Government of 1 per cent as the expense of negotiating and distributing securities in the past. The experiment proves that the allowance of one-tenth for expenses in connection with the late issue was inadequate. Instead of one-tenth, or two-twentieths, of 1 per cent, the total cost rose to nearly eighteen hundredths of 1 per cent, distributed as follows:

| Compensation of temporary clerks, messengers, etc. | 166,966. 96 |
| :---: | :---: |
| Engraving and plate printing... | 88,356. 30 |
| Paper for bonds. | 16,376. 61 |
| Stationery and printing blank forms | 12,813. 37 |
| Typewriting machines, purchase and rent of. | 1,292. 45 |
| Electric fans, electric lighting, wiring, etc., in new city post-office building. | 2, 056. 43 |
| Tables and chairs bought and rented. | 1,154. 69 |
| Miscellaneous | 3,943. 08 |
| Total | 292, 959. 98 |

The express charges for carrying the bonds, it is estimated, will amount to $\$ 65,010$, bills aggregating some $\$ 22,000$ already having been audited and approved, but which do not appear in the above total.

## CURRENCY AND BANKING.

In submitting my report, I feel it my duty to impress upon Congress, as best I may, the important subject of currency and banking reform.
It is the misfortune of evil conditions to produce derangement and hinder progress, which, if long continued, so accustom the subject of them to their existence as to create in him apathetic indifference to needful and healthful reforms. Indeed, it is a familiar fact that individuals, families, and nations ignorantly suffer under the illusion that the very source of their affliction is itself an agency for good. Something like this has marked our financial history for thirty years. Making progress in spite of all obstacles and embarrassments to commerce and industry, we ascribe the advancement to the causes which have really hampered and disconcerted the forward and upward movement. With a financial system condemned by the judgment of the most experienced and wise, both at home and abroad, its evils illustrated in daily business, and emphasized in recurring panics, we fail, with an obtuse timidity, to face the questions which must be met and rightly solved before industry and commerce can be established upon enduring conditions of security.
The arguments against Government issues of paper money as a medium for commercial exchanges have been fully made and need not
be repeated in detail. Its rigidity, its failure to meet demands where demand is most urgent, the dependency of the whole industrial structure upon the state of the revenue and public expenditure-these are important links in that chain of argument. Even in a state of foreign war, the civilized demand of both contestants is for due respect to private property and individual contract relationships. How much more in a state of peace, in a free state, should private rights and contract relationships be given immunity from the incidental, though serious, effects now suffered through perturbations in Government finances. The menace to our domestic affairs, several times recurring from a threatened change in the standard under which they are carried on, and our foreign trade settled, has been a companion evil-perhaps the greater of the two.

The cure for these evils is not difficult to find. It lies within the easy range of Congressional action. Nor is the remedy one to inflict even temporary pains or penalties on the body politic. The healthful, stimulating effect of right action in these directions would be experienced with the first sense of assurance that the desired end was to be accomplished.

The proposal to substitute bank issues for Government notes is opposed with many honest prejudices and assailed by bitter denunciations. The first arise from a failure to comprehend the true philosophy of a paper currency, and must be patiently considered. The latter obscure the question by reckless statements, charging that all propositions for currency reform are bank conspiracies to exploit the people. Referring to such proposals, an eminent speaker recently warned his uninstructed hearers: "These banks will become cormorants to eat up your substance, control your politics, and warp the political views in all the communities. Send a man to Congress to help defeat this great evil." Such tirades against reason, and such appeals to prejudice and ignorance, the statesman must oppose by the simple truth. Is a system of bank credit currency, in its ability to meet the varying wants of an industrious commercial people, superior to the issues of Government paper money? If that question be answered affirmatively, it may be safely left to time to show that the nature of the banker differs not at all from the general nature of men in other callings. As every other man who gets an honest living must live by service rendered in the sphere of his activities, so the banker must perform faithfully and well his function or fail of his fair reward. The motives for his action are the same. It is not for the benefit of the banker, or any particular class, that the plea for currency reform is urged; it is urged on behalf of the whole people, who will be the recipients of the benefits thereof. And it is on this ground only that the claim is entitled to consideration.

I shall not be outside of my duty if I venture to point out, in at least one important respect, the advantages to the poorer districts of the country of a properly constituted bank currency. It may be done by fairly describing the course of the financial movement as it now
goes on, and by presenting in contrast the movement as it would go on onder the conditions advocated. It is a familiar fact that, in the period of harvesting and crop moving, the currency is strongly drawn from the centers to the country districts. When this movement is over, the currency again tends toward the centers. The currency flows to the center to pay loans occasioned by its use and other general indebtedness, and also to secure the benefit of interest to the country banker for a portion of his funds which in a dull period would otherwise lie unemployed in his hands. At present, the currency so sent consists almost entirely of legal-tender notes and Treasury notes-that is to say, in the money which the law recognizes as lawful reserve. Thus received by the banks in the money centers, it becomes a reserve for deposits in the relation of one to four. Now, deposits may be increased by loans as well as by the deposit of cash. A loan for ten thousand or a hundred thousand goes to the borrower's credit upon the bank's books, and swells the deposit account by so much. True, the borrower may check against this fund, but his check may also be deposited in the same bank, in which case it is a mere transfer to another account; or, if it be deposited in another bank and paid in money by the lending bank, it is still a transfer. The total deposits of all the banks are swelled by this original loan.

In confirmation that this expansive movement is fairly described, I quote from the New York Herald of November 13 as follows: "Comparing yesterday's [clearing house] statement with that of five weeks ago, it appears that the banks hold 13 millions more money, and have expanded their loans by the surprising amount of $51 \frac{1}{2}$ millions, the increase in 'deposits' resulting from these two items being no less than 66 millions." It can be easily perceived that this possibility of increasing loans against an inflow of reserve funds in the proportion of four to one is a temptation to which the city bank is likely to gield. It must be remembered that this inward movement of currency from the country occurs at the time of year when commercial activities are the least and the general requirements for the use of loans in the interior are the smallest. The effort of the banks at the centers to increase their loans causes interest to fall. The fall in the rate of interest causes interest and dividend-paying securities to rise. The rise in securities induces speculative buying. The speculative buyer becomes the bank's borrowing customer. The banker is thus enabled to "put out his funds," as he is apt to term it, though he really does no such thing. He keeps his funds, but, in the way described, he swells his deposit liability until his funds on hand are made answerable to the rule of one of cash to four of liabilities, or 25 per cent against his "deposits."
It is in the condition above described, with varying degrees of regularity and intensity, that the financial status is found when the crops in the West and South approach harvest-that is to say, a maximum of loans and deposits; a minimum in cash reserves.

During the season until then, the country banker has found that his drafts and checks on his Eastern correspondents, distributed to his customers, supplied their needs for instruments of exchange and payment; but he finds that for the payment of farm wages, the purchase and transfer of farm products, such instruments are not adequate; cash is required for these purposes, either in metallic money or paper currency. This forces him to make requisition in the form of money by express on his Eastern balances. Nay, more ; if crops be large and prices good, he is forced to supplement his own resources by borrowing for a period at the centers. His correspondent at the center, in meeting his requisitions for the money due his country customer, is obliged to take it from what had before constituted his legal reserve. This disturbs the equilibrium of relationships. To recover his position, he turns upon thestreet and calls in a portion of his loans. If the interior banker, after thus calling for the balances due him, asks in addition for a loan, the city banker is often obliged to inform him that "money is very close" and he can not accommodate him. It must be noted also that the effort of the city banker to restore his impaired reserve by calling money from the street does not accomplish that direct result. There is no money "in the street;" it is all in bank vaults, and the total stock can not be augmented except by inducing it to come in from without. 'What does result is a forced liquidation, a fall in prices of securities, a rise in interest sufficient to induce outside money to come in. In this process the merchant and the manufacturer find it difficult to negotiate their credits. They also are told "money is tight," and that they must withhold applications for discount favors.

I forbear to follow into further detail the unprofitable and vexatious movement. Gradually, after more or less strain and anxiety, sometimes bordering on panic, sometimes resulting in panic, a readjustment is secured. Crops from the interior-not seldom forced from the producer's hands, with little regard to price, because of his inability to borrow from his local banker-move to the seaboard. The strain on the country is relaxed. Again currency in the form of "reserve funds" moves to the center. Again one dollar thus received becomes effective as reserve for four dollars of liability. Money is quoted easy, as the prospect for summer dullness becomes assured. "The street" breathes easier, stocks and securities become "firm," and the movement toward an expansion in loans, with its attendant phenomenon of an increase in deposits, is again observed, to be again followed by restriction and probable distress as the active season in productive industry and trade again appears.

Whoever has followed this delineation of our financial movement, and those who are familiar with the facts which are thus portrayed, ought not to have trouble in perceiving that the bottom cause of the irregular and deranging effects described is to be found in a fixed volume of paper money clothed with full powers of a legal tender.

Upon this money-itself a credit obligation-other credit obligations, in the form of bank deposits through bank loans, may be built up in the proportion of four to one. With the volume of paper money thus fixed-with no natural movement toward its retirement when not needed in legitimate trade-the tendency to build the four-story structure apon it as a permanent base is irresistible. The withdrawal of the base by those who really own it causes the structure to vibrate and threatens it with a fall.

Consider now, as briefly as may be, the practical working of a banknote currency-nonlegal tender-if substituted for the paper money issued by the Government. Verification may be found by those who will look for it in systems now current in France, Germany, Scotland, and Canada; or, if our own records be preferred, the New England system of forty years ago, or those then in vogue in Indiana; Iowa, and Loujsiana, will be equally good examples. Under such a system the financial movement may thus be described:

Commencing as before with an inward movement of funds from the exterior to the centers, the money forwarded would then consist largely of bank notes. These received at the centers would not, like the legal tenders of the present, form a base for expansiou. The desire to obtain legal money in their place would cause the banks receiving them to push them home for redemption in legal money, but the general effort in this direction would neutralize, to a large degree, the effect desired. Bank $A$, sending home the notes of bank $B$, would be met, not by a payment in legal money, but as an offset by the presentation of the notes of bank A. There would be a mutual retirement of their respective bank-note liabilities. Of conrse, this precision in offsets would not be the rule, but the illustration shows the general effect to be the temporary retirement of a currency when it can not be circulated in the service of the country's trade and exchange. Observe this: The power to lend is not thas lost; it is temporarily saspended. When, with the recurring needs of the interior to handle its products of the farm, the factory, and the mine, the power to issue circulating notes may besummoned into use, then the needs of industry will coincide with the profit-moving motives of the banker, and the full value of this latent power will be experienced, not in the centers, where bank notes are not needed and will not circulate, but in the interior, where raw products are raised, and where the busy wheels of shop and factory certify that labor wages are to be paid.

The power of the bank note, so temporarily suspended, will always be restored in full upon the call of industry. The power of our present currency, on the contrary, is not suspended. It is, as pointed out, inevitably misdirected. It artificially stimulates speculative activity in securities at the centers. It periodically absorbs the credit powers at times when they should be made serviceable to the whole country. It ministers to the speculator, it prejudices the producer, the merchant, and the manufactarer, though, at last, all suffer from its deranging influences.

These are the reasons, the more important reasons, why our banking: system should be reformed and made effective to commercial and indus: trial needs; and these same reasons, with others not here set forth, call for the elimination, in a safe and proper way, of the injurious interference in our currency system by the legal-tender paper money of the Government.

If it be conceded that the legal-tender money issued by the Government does not possess the qualifications to make it a proper factor in the country's exchanges of products and manufactures ; if the fact also be admitted that it is a deranging and disturbing factor in its relation to industry and commerce, then the time has come to substitute for it a currency which will adequately, economically, and safely meet the evergrowing needs of the country, rapidly developing, as it is, in the power of production, in the number of its people, and the importance of its domestic and foreign trade.

Can a bank-note currency be established which will be adequate, economical, and safe, and thus serve, in a better way than is now served, the public needs? Limited by space in this presentation, I point to the countries before named, where these conditions are realized. Our neighbor on the north, Canada, may be cited as a nearby witness in the same direction. With power to issue notes as profitable employment for their use in productive industry can be found, the power has never been overtaxed or exhausted. The rates of interest have varied but little between the richer provinces of Ontario or Quebec and the sparsely settled districts of Manitoba. The terms of interest are substantially as favorable to the farmer of the west as to the merchant of the metropolis.

While these conditions, in contrast with our own, which stimulates the operation of credit at the centers and starves it at the circumference, are due in part to other features of its banking system, the influence of the currency is most important. Certain it is that were bank-note issues in Canada repressed by restrictive laws, as they are with us, and if the field of circulation these notes now occupy were filled with the legal-tender notes of the Dominion, the facilities of banking now enjoyed on the frontiers would not be afforded. The same tendency toward congestion at the centers and scarcity in the outlying districts would be there, as it is here, plainly observable.

It is not intended by anything here said to offer the Canadian system as a model from which we should make exact copy. In certain particulars it would not at present suit our different conditions. The right of the Canadian banks to issue their notes without any special pledge of security for their redemption; the law which gives to the note holder, in case of bank failure, priority of claim over the depositors, while not operative to perceived injury, under their system of large banks with small branches, might, if adopted here, with a multitude of small banks,
each independent of the other, result in an unjustifiable invasion of the equitable rights of the depositor. The dangers in this regard are ably discussed and fully illustrated in the annual report of the Comptroller of the Currency. ${ }^{1}$ To his argument nothing need be added. While the question of terms is important in itself, it is nevertheless a subordinate one.

The facts set forth by the Comptroller relate exclusively to the proposition that the notes of a failed bank shall be a paramount lien upon the assets for their full value before any rights accrue to other creditors.

The issue of notes upon the general assets of national banks may be made perfectly secure without the requirement that the notes be a first lien upon their assets. It would only be necessary to award to the note holder the same ratable proportion ot the assets which went to other creditors, and to provide that the amount required to pay the difference be obtained by an assessment upon all the national banks, collected ratably in proportion to their share in the circulation of this character. The vital question is, What percentage of assessment upon this circulation would be required in order to cover the losses to note holders in the case of failed banks? The experience of the national banking system demonstrates that the assessment would be insignificant.

The total circulation of failed banks outstanding at the time of failure, up to October 31, 1897, was $\$ 20,893,827$. The loss upon these notes, if the security for them had been impaired in the same degree as the security for other liabilities, would have been $\$ 5,379,165$, or an annual average of about $\$ 163,000$. This loss would have been made good by a tax of about one-twelfth of 1 per cent per year upon the circulation of the solvent banks. A tax of one-fifth of 1 per cent upon the average circulation of the national banks since the foundation of the system would have paid such losses up to October 31, 1897, amounting to $\$ 5,379,165$ and left a surplus of about $\$ 9,000,000$ in the guaranty fund.

Whether preference be given to the note holder, as in Canada, or he be made to take his share of risk with the depositor, as in Germany, France, and Scotland, or whether the note holder shall be protected by the special pledge of security as now provided in our national banking act, these considerations affect the question relatively, not absolutely. Under either of these conditions provisions may be made which will furnish to the country a paper money adequate to commercial needs, economical to the people, and safe in its general workings.

- In the nature of things, the banker is the proper agency for operating this important function. He must have motive for his action or he will not exercise it. Given this motive, he will, like the laborer, the merchant, or the professional man, be diligent in the employment of his powers. That this motive must be the motive of gain does not differentiate the banker from other working forces of society, whose actions are healthful and helpful to the social whole.

[^2]In my last report I ventured upon specific recommendations. These recommendations, if adopted and formulated into law, would, in my opinion, be curative of the evils herein pointed out. In House bills 10289 and 10333 are embodied a series of measures in some respects more meritorious. The measures therein proposed are the result of careful study by expert and experienced men. With some modifica-tions-the reasonable fruit of full discussion-they would, I believe, meet the country's needs. I commend the subject to the early and earnest attention of Congress.

## WAR TAXES.

The report of the Commissioner of Internal Revenue ${ }^{1}$ possesses peculiar interest, indicating, as it does, the operation of the war-revenue act of June 13, 1898. It shows quite clearly that the aggregate revenue to be derived therefrom will form a smaller total than was estimated by the more sanguine of its supporters.

The Commissioner's estimate of $\$ 100,000,000$ from this source seems to be fairly justified by the results to the Treasury during the period from July 1 to the present time. His report goes also to show the friction and embarrassments which have arisen from the need of interpreting obscurities in the act itself, and the application of such interpretation to specific cases coming under the same general head, yet differentiated from each other by more or less important particulars. Many complaints have arisen from those unreconciled to such interpretations or applications. and; granted a well-balanced relation between revenue and expenditures, it might be well to consider the propriety of repealing some of the more vexatious features of the act. Until more settled conditions, however, as to extraordinary expenditures for the Army and Nary are reached, even such repeal can not be recommended by this Department: Some verbal amendments, making more clear the intentions of Congress, are to be desired, and representations in this direction may be made the subject of a separate communication to Congress at an early day.

L. J. Gage,<br>Secretary.

To the Speaker of the House of Representatives.

## TABLES ACCOMPANYING THE REPORT ON THE FINANCES.

The coin deposited for or representing the certificates shall be retained in the Treasury for the payment of the same ondemand. Said certificatesshall he receivable for customs, taxes, and all public dues, and, when so received, may be reissued of silver certificates in denominations of one, two and five dollars; said certificates to he receirable redeemable, and payable in like manner and for like purposes as is provided for by the act of Febru .ary 28, 1878.

Table A.-Statement of the Outstanding Principal of the Public Debt, etc.-Contiuned.

The act of February 26, 1879 (20 Statutes, 321), authorizes the Secretary States, certificates of deposit of the denomination of ten dollars, States, certificates or deposit of the denomination of ten and and conrertible at any time, with accrued interest, in to the four per centum bonds descris to not less than five per centum, in the mode prescribed by said act.
FUNDED LOAN OF 1881, CONTINUED AT THREE AND ONEHALF PER CENT.
hese bonds were issned in exchange for fire per cent bonds of the tbe Treasury and the lioldcrs, and were made redeemable at the pleasure of the Government.
FUNDED LOAN OF 1891, CONTINUED AT TWO PER CENT These bonds were issued in exchange for the four and one-half per cent funded loan of 1891, by matual agreement between the Secrethe pleasure of the Gorernment.

LOAN OF JDLY 12, 1882.
These bonds were issued in exchange for the five and six per cent per cent by mutual agreement between the Secretary of the Treas. ury and the holders, and were made redeenable at the pleasure of LOAN OF 1904.
the act of January 14, 1875 ( 18 Statutes, 296), authorizes the secretary of the reasury to use any surplus revenues from time to time pose of at, not less than par, in coin, either of the descriptions of bonds of the United States described in the act of July 14, 1870 ( 1.6 Statutes, 272), for the purpose of redeeming, on and after January 1, 1879, in coin, at the office of the assistant treasurer of the United States in New York, the outstanding United States legal-
tender notes when presented in sums of noi less ihan fifty dollars.

$$
\text { LOAN OF } 1925 \text {. }
$$

The act of January 14,1875 ( 18 Statutes, 296 ), authorizes the Secretary the Treasury not otherwise appropriated, and to issue, sell, dispose
of at not less than par, in coin, either of the descriptions of bonds of the United States described in the act of July.14, 1870 (16 Statutes, 272), for the purpose of redecming, on and after January 1, 1879, in in when presented in sums of notlegs than fifty dollirs.

$$
\text { TREASURY NOTES OF } 1890 .
$$

The act of July 14, 1890 (26 Statutes, 289), directs the Secretary of the Treasury to purchase, from time to time, sil ver bullion to the aggremuch thereof as may be offered in each month, at the market price thereof, not exceeding one dollar for three hundred and seventy. ove and twenty-five hundredths grains of pure silver, and to issue in parment for such purchases of silver bullion Treasury notes of the United States, to be prepared by the Secretary of the Treasury, in such form and of such denominations, not less than one dollar nor more than one thousand dollars, as he may prescribe. That said notes shall be redeemable on demand, in coin, at the Treasury of the United States, or at the office of any assistant treasurer of the United States, and when so redeemed may be reissued; but no greater or less amount of such notes shall be outstanding at any lars coincd therefrom then held in the Treasury purchased brsuch notes, and such Treasury notos shall be a legral tender in payment of all debts, public and private, except where otherwise expressly tipulated in the contract, and shall bereceivable for castoms, taxes. anil all public dues, and when so received may be reissued; and such notes, when held by any national banking association, may be counted as a part of its lariful reserve. That upon demand of the bolder of any of the Treasury notes provided for, the Secretary of the Treasury shall redeem the same in gold or silver coin, at his discretion, it being the establisbed policy of the United States to maintain the two metals on a parity with each other upon the present legal ratio, or such ratio as may be provided by law.

NA'TIONAL-BANK NOTES (REDEMPTION ACCOUNT).
The act of July 14, 1870 ( 26 Statutes, 289), provides that balances stauling with the Treasurer of the United States to the respective redits of bational banks for deposits made to redeem the circuike purpose shall be covered into the Tressury as a miscellaneons receipt, and the Treasurer of the United States shall redeem from the general cash in the Tr asury the circulating notes of said banks which may come into his possession subject to redemption, ***** and the balance remaining of the deposits so covered shall, at the close of each month, be reported on the monthly public debt state. ment as debt of the United States bearing no interest

Table B.-Statement of Outstanding Principal of the Public Debt of tee United States on the 1st of January of each Year from 1791 to 1843, includive, and on the 1st of July of each Year from 1843 to 1898, inclusIve.

a In the amonnt here stated as the outstanding principal of the public debtare included the certif. cates of deposit outstanding on the 3uth of June, issued under act of June 8, 1872, for which a like amount in United States notes was on special deposit in the Treasury for their redemption and added to the cash balance in the Treasury. These certificates, as a matter of accounts, are treated as a part of the public debt, bat being offset by notes held on deposit for their redemption, should properly be dedncted from the principal of the public debt in making comparison with former years.
$b$ Exclnsive of gold, silver, currency certjficates, and Troasmry notes of 1840 held in the Treasurer's cash, and includiug $\$ 14,133,560$ bonds issued to the several Pacific railroads not yet redeemed.

$a$ The cost of collecting the internal revenue embraces the following items: Salaries and expenses of , collectors, including pay of deputy collectors, clerks, etc., and including expenses incident to enforcing the prorisions of law taxing oleomargarine; salaries and expenses of revenue agents, surveyors of distilleries, gaugers, storekeepers, and miscellaneous expenses; paper for internal-revenue stamps, and expenses of detecting and punishing violations of internal-revenue laws.
$b$ The expenses of collecting the revenue from customs includes all sums drawn from the appropriation made by Congress for that purpose. The money is expended for salaries, rents, labor in weighing, ganging, and measuring imported merchandise, revenue boatmen, repairs, and other expenses incident to rented buildings, stationery, and the traveling expenses of special agents, but does not include expenditures for revenue cutters, fuel, lights, water, furniture, janitors, otc., for buildinge owned by the Government, nor expenditures for erecting new buildings, all of which are paid for from specific appropriations made for those purposes.
The expenses of collecting internal and customs revenue do not inclade the expenditures for salaries, etc., incident to auditing these accounts in the Departments at Washington.
c No data.

## APPENDIX.

## REPORTS OF HEADS OF BUREAUS AND OTHER OFFICERS.

(No. 1.)

## REPORT OF THE TREASURER.

> Treasury Department, OfFICE of THE Treasurer, Wastington, December 1, 1898.

SIR: The transactions and condition of the Treasury for the past year present several features of interest.

## REVENUES AND EXPENDITURES.

The net ordinary revenues and expenditures for the fiscal year ending June 30,1898 , present this comparison with those of the preceding twelve months:

With a net addition of $\$ 57,599,630.04$ to the revenues, and of $\$ 77$, $594,423.23$ to the expenditures, a deficiency was created of $\$ 38,047,247.60$, which exceeds that of the preceding year by $\$ 19,994,793.19$.

In comparison with the previous year, the receipts and disbursements on account of the public debt may be stated thus:

The aggregate warranted receipts for the year, from all sources, were therefore $\$ 738,549,255.20$, as compared with $\$ 737,651,925.16$ for the previous year. In view of the extreme variations in the conditions and circumstances which affected the operations of the two periods, this practical uniformity of results is remarkable only because it must be considered as purely accidental. On the side of the disbursements, however, the influence of events is plainly seen in the increase of $\$ 108,633,087.73$. A summary comparison of aggregate transactions follows:

| Account. | 1897. | 1898. | Increase. | Decrease. |
| :---: | :---: | :---: | :---: | :---: |
| RECEIPTS. <br> Ordinary $\qquad$ <br> Debt. <br> Total $\qquad$ DISECRSEMENTE. |  |  |  |  |
|  | \$ ${ }^{\text {4 }}$ ( $77,721,705.16$ | \$405, 321, 335.20 | \$57, 599, 630.04 |  |
|  | 389, 930, 220.00 | 333, 227, 920. 00 |  | \$56.702,300. 00 |
|  | 737, 651, 925.16 | 738, 549, 255. 20 | 897, 330. 04 | .-.-.............. |
| Ordinary <br> Debt. $\qquad$ | 365, 774, 159.57 | $443,368,582.80$ | 77, 594, 423. 23 |  |
|  | 353, 180, 877.50 | 384, 219, 542.00 | 31, 038, 664. 50 |  |
| Total $\qquad$ <br> Excess of receipts $\qquad$ <br> Excess of disbursements | 718, 955, 037.07 | 827, 588, 124. 80 | 108, 633, 087. 73 | -................. |
|  | 18,696,888.09 |  |  |  |
|  | ............... | 89, 038, 869.60 | 107, 735, 757. 69 |  |

The agreement of this statement of the transactions of the two years with the accounts of the Department, in which the Treasurer figures as debtor, is shown in the following summary exhibit of operations and results, the balauces stated being those which stood charged to the Treasurer at the periods indicated:

| Account. | 1897. | 1898. | Increase. | Decrease. |
| :---: | :---: | :---: | :---: | :---: |
| Balance from previous yea | \$846, 093, 349.62 | \$864, 790, 237.71 | \$18, 690, 888.09 |  |
| Receipts for year.. | 737,651, 925.16 | $738,549,255.20$ | 897, 330.04 |  |
| Total | 1, 583, 745, 274.78 | 1, 603, 339, 492.91 | 19,594, 218. 13 |  |
| Disbursements for yêar | 718, 955, 037.07 | 827, 588, 124. 80 | 108, 633, 087.73 |  |
| Balance to next year | 864, 790, 237. 71 | 775, 751, 368.11 |  | . $\$ 89,038,869.60$ |

In the next statement are shown the results of the purely fiscal operations, which consist in the receipt and disbursement of the moneys arising from the ordinary revenues and from loans:

From this statement it appears that the total fiscal deficiency for the year was $\$ 61,948,849.60$. A more exact understanding of the causes of this result may be obtained from the following detailed explanation:
Deficiency in ordinary revenues
$\$ 38,047,247.60$
Payment of Pacific Railroad bonds 29, 850, 952.00
Redemption of matured debt and fractional currency
$85,160.00$
Total
67, 983, 359.60

Net.
$61,948,849.60$
The aggregate receipts and disbursements on account of Treasury notes of 1890 and the three classes of certificates which are used as money were as follows:

| Account. | 1897. | 1898. | Increase. | Decrease. |
| :---: | :---: | :---: | :---: | :---: |
| REGEIPTS. <br> Treasnry notes of 1800 . Certificates. |  |  |  |  |
|  | \$30,686, 000.00 | \$29, 642,000. 00 |  | \$1, 044, 000.00 |
|  | 284, 172, 000.00 | 227, 295, 000. 00 |  | 56, 877, 000.00 |
| Total | 314, 858,000.00 | 256, 937, 000. 00 |  | 57, 921, 000.00 |
| disbursements |  |  |  |  |
| Treasury notes of 1890 Certificates | 45, $502,000.00$ | 43, 302, 000.00 |  | 2, 200, 000.00 |
|  | 225, 548, 020.00 | 240, 725, 020.00 | \$15, 177, 000.00 |  |
| Total . . . . . . . . . . . | 271, 050, 020.00 | 284, 027, 020.00 | 12, 977, 000.00 |  |
| Excess of receipte ......... <br> Excess of disbursements. | 43, 807, 980.00 |  |  |  |
|  |  | 27, 090, 020.00 | 70, 898, 000. 00 |  |

As all of the accounts from which the foregoing figures are taken are based upon warrants, and as there was in the Treasury on June 30 au unusually large sum of money which had then not yet been formally covered in, the discrepancy between the results shown in the preceding statements and the actual assets of the Treasury is more than ordinarily conspicuous. The chief sonrce of the uncovered cash was the war loan, the first proceeds of which came in on the 14th of June, but were not covered by warrant until after the close of the fiscal year.

## THE PACIFIC RAILROADS.

In the miscellaueous receipts are included moneys received from the sale of the Union Pacific Railroad and the Kansas Pacific Railroad. These exceed by $\$ 7,151,593.71$ the net increase of receipts for the fiscal year. Without these moneys the deficiency would have been greater by their amount. These receipts were:
union pacific.

KANSAS PACIFIC.

| 1898-March 2 | \$1,000, 000.00 |
| :---: | :---: |
| March 19 | 1,325,750.00 |
| March 29 | 1,325, 750.00 |
| A pril 8. | 1,325, 750.00 |
| april 18. | 1,325, 750.00 |
| Total. | 6,303, 000.00 |
|  |  |
| Aggregate | 64,751,223. 75 |

The first installment on account of the Union Pacific was the amount of the sinking fund held in the Treasury for the reduction of the indebteduess of the company to the Government.

Out of these moneys, bonds issued by the Government for the construction of the Pacific railroads, were paid to the amount in principal, as follows:
Central Pacific ................................................................. $\$ 10,584,120$
Kansas Pacific............................................................................................... 1, 422, 000
Union Pacific........................................................................... 15, 895,512
Central Branch Uniou Pacific ........................................................... 326,000

Total......................................................................... 29, 850, 952
WAR EXPENDITURES.
The expenditures of both the War and Navy Departments, up to the close of the fiscal year ending June 30, 1898, were largely increased on account of the war with Spain. This increase for that period was, for the War Department, $\$ 43,041,732.40$, and for the Navy Department, $\$ 24,262,438.51$.

For the four months, July, August, September, and October, 1898, the expenditures of the War Department were $\$ 107,520,368.29$, being $\$ 81,613,131.40$ greater than for the same months in 1897. For the same
months this year the Navy Department expended ${ }^{\text {\$27,459,577.71, which }}$ was $\$ 16,014,926$ more than it spent in the like period of 1897. Up to October 31, the war with Spain added to the disbursements of these - two Departments the sum of $\$ 164,932,228.31$.

## STATE OF THE TREASURY.

Without regard to the prospect of revenue or expenditure, the condition of the Treasury was stronger at the close than at the opening of the fiscal year; for while there was an unimportant decrease in the amount of the assets, in the fiscal as well as the issue branch of the business, this shrinkage was more than compensated for by the improvement which took place in the character of the holdings. A gain of upward of $\$ 26,000,000$ in free gold, coupled with an increase of nearly $\$ 23,000,000$ in absolutely secured deposits with banks, is a very satisfactory offset to a net loss of $\$ 7,500,000$ in the total holdings available for the fiscal operations of the Government. Especially is this acceptable as true when it is noted that all of these changes were effected at no greater cost than the loss of so much in silver and Treasury notes.

In summary form, the condition of the fiscal brauch of the Treasury's business on June 30, 1897 and 1898, may be stated thus:

In the condition of the issue branch of the business the only considerable change which occurred was in the least important part of it from the point of view of statistics-the issue and redemption of currency certificates. The decrease of some $\$ 36,000,000$ in the volume of these certificates outstanding represents simply the withdrawal of this amount of United States notes from the Treasury, where they had formerly been lodged by the national banks for safe keeping.

The statement of the assets and liabilities arising out of the issue of certificates and of Treasury notes of 1890 follows:

In the two preceding statements are represented an or une available assets of the Treasury, which amounted to $\$ 874,764,377.23$ on June 30, 1897, and to $\$ 839,606,736.17$ a year later. A consolidated statement of the live assets is mext given, with the addition of certain items of assets not available. As against the aggregate assets of $\$ 869,202,941.22$ shown by all the accounts on June 30, 1898, the Treasurer's liability to the general Treasury fund was $\$ 775,751,368.11$; one of $\$ 66,465,160.04$ was sustained in his capacity as the depositary of public officers, and one of $\$ 26,986,413.07$ for moneys paid into his hands but not yet covered by warrant into the general account. The marlsed increase under the last two heads was incident to the war, and was due mostly in the case of the former to the enlarged advances made to disbursing officers for military expenditures, and in the case of the latter to the first proceeds of the 3 per cent loan of $\$ 200,000,000$.

With these explanations the comparative statement of aggregate assets and liabilities is given in summary form :

## SHIPMENTS OF CURRENCY.

In every year the currents of trade create a varying demand for different denominations of woney. During the period of the movement of the crops, grain, cotton, and sugar, the producing parts of the country need small notes for payments to farmers, planters, shippers, and merchants. Later in every season, as currency settles into the banks and the financial centers, large denominations are called for, to be used as reserves and for settlement of large transactions, becanse of facility in counting them and the smaller bulk they offer in trausportation and in vaults.

The Treasury Department, to the extent that it provides the currency for the country, seeks to furnish such denominations as will best serve the business community. In former years this task has presented serious difficulties. By forethought and care, during the past fiscal year and the autumn following it, a stock of notes of different denominations was provided, through the Bureau of Engraviug and Printing, adequate to any emergency. Although the volume of paper money of
each kind-Tnited States notes, Treasury notes, and silver certificatesis strictly limited by law, exchange of small notes for large denominations has been readily made. By this process within forty days after the 1st of September, 1898 , Chicago alone received $\$ 5,150,000$ in small notes.

While the available cash balance in the Treasury has been very large during the season now closing, the part of it in the form of gold has been greater than ever before, both absolutely and in its ratio to other currency. .In previous years the Government has sought for gold, and readily gave paper currency for it. This year, although the net gold exceeded the needs of the Treasury, gold coin has been accepted up to the middle of October to the extent of over $\$ 15,000,000$, and notes of small denominations have been granted on demand to facilitate the business of the people.

The shipments of currency from Washington against deposits of gold with the assistant treasurer in New Yoris, compare thus during the periods stated:

| Fiscal years: | Amount. |
| :---: | :---: |
| 1896 | \$851, 298 |
| 1897 | 5, 365, 000 |
| 1898 | 19, 718,000 |
| 1899 (four | 14, 371, 000 |

The volume of currency in the autumn of three successive years indicates the increased activity in transactions, and doubtless also additions to the savings of individuals. For illustration, a statement is presented of gold in circulation, all in denominations of $\$ 20$ and under, and of notes of $\$ 20$ and under, and separately of notes of the larger denominations:

| Denomination. | September 30- |  |  |
| :---: | :---: | :---: | :---: |
|  | 1896. | 1897. | 1898. |
| Gold coin. | \$478, 771, 490 | \$528, 098, 753 | \$622, 649, 812 |
| Paper carrency : |  |  |  |
| One dollar... | 46, 090, 748 | 47, 388, 215 | 51,643,535 |
| Two dollars | 30, 742, 360 | 30, 436, 596 | 32, 782, 988 |
| Five dollars. | 279, 812, 149 | 273, 393, 522 | 282, 639, 237 |
| Ten dollars. | 304, 921, 106 | 302, 791, 417 | 316, 745, 997 |
| Twenty dollars | 211, 389, 620 | 207, 524, 076 | 219, 279, 106 |
| Total twenty dollars and under | 872, 955, 983 | 861, 433, 826 | 903, 090, 863 |
| Fifty dollars | 39, 948, 215 | 43, 625, 865 | 50, 452, 390 |
| One hundred dollars | 79, 773, 270 | 80, 819, 070 | 60, 382, 470 |
| Five hindred dollars. | 10, 043, 500 | 19, 373, 500 | 19, 353, 500 |
| One thousand dollars | 89, 255,500 | 89, 678, 500 | 68, 053,500 |
| Five thousand dollars | 6, 540, 000 | 6,620, 000 | 5, 855, 000 |
| Ten thousand dollars | 46,800, 000 | 65, 450, 000 | 29, 960, 000 |
| Total fifty dollars and over | 272, 360, 485 | 805, 506, 935 | 234, 056, 860 |
| Aggregate paper | 1, 145, 316, 468 | 1, 167,000, 761 | $1,137,147,723$ $1,000,000$ |
| Unknown, destroyed | 1, 000, 000 | 1,000, 000 | 1,000, 000 |
| Net paper | 1, 144, 316, 468 | 1, 166, 000, 761 | 1, 136, 147, 723 |

Small notes decreased in volume from 1896 to 1897 by $\$ 11,522,157$, but increased from 1897 to 1898 by $\$ 41,657,037$. The gold in circulation has risen steadily by $\$ 49,327,263$ from September 30,1896 , to the same date in 1897, and during the twelve months preceding September 30, 1898, the addition has been $\$ 94,551,059$.

The total currency in circulation shows an increase from 1896 to 1897 of $\$ 96,538,249$; during the year ending with September last of $\$ 137,755,854$, and for the two years of $\$ 234,29+103$.

Inquiries are frequently addressed to the Treasurer's Office, relating to the available currency in the West and Northwest. A table has been prepared, and is below given, as the best general answer to such a question, showing the aggregate capital, surplus, and undivided profits of the national banks located in the territory north of the Ohio and west of the Mississippi, together with the deposits carried by the same institutions, in July in each of the last three years:

The data of comparison are the same for each of the years presented, and while they hardly show the resources of this sort in their completeness, the evidence is irresistible that in the instruments of trade and commerce the immense region to which the figures relate has gathered strength in these respects of surpassing use and significance.

## THE NET GOLD BALANCE.

The prosperity of the country and the solidity of the general monetary condition are shown in no feature of the Treasury records more plainly than in the net gold balance. Before September 1, 1898, the highest point which this had ever attained was on April 3, 1888, when it stood at $\$ 219,059,232$. From June, 1878 , for fifteen years, to June 6, 1893, it never fell so low as on that date, when the amount was $\$ 89,589,364$. The difference between this amount and the reserve of $\$ 100,000,000$ was restored by the surrender by the banks of New York City to the Treasury of gold coin in exchange for United States notes, so that the net gold balance was brought up to $\$ 103,863,290$ by August 10, 1893. Another minimum mark was reached February 1, 1894, at $\$ 65,438,378$. A sale of bonds was made in January of that year for which payments in February and March brought in $\$ 58,660,917.63$, and the net gold balance reached $\$ 107,446,802$ on March 6. Reaction set in, however, and this balance fell to $\$ 54,975,607$ by the end of July, 1894, and receipts from another sale of bonds in November and December of that year amounted to $\$ 058,719,710.20$, and the balance became $\$ 111,142,021$ on December $4,1894$.

This gold restoration was effectual for only a very brief period, for on February 11, 1895, the Treasury held only $\$ 41,340,181^{\circ}$ in net gold. Again bonds were sold, for which payments were received from February to June, aggregating $\$ 65,428,056.89$. Thus the net gold balance was carried up to $\$ 107,571,230$ on July 8,1895 . This relief again was only temporary, and the balance fell to $\$ 44,563,493$ on February 8, 1896. Resort was once more had to the device of selling bonds, which produced up to June, $\$ 111,355,612.07$. During this process the net gold attained a maximum of $\$ 128,713,709$, but sank for a few days as low as $\$ 89,669,975$ on July $22,1896$.

Since that month the reserve of $\$ 100,000,000$ has never been trenched upon. With some fluctuations, the tendency has been steadily upward. The products of the mines of our Northwestern States and of the Klondike, with those of Australia, and the importations from

Europe, have poured in large part in a steaay and precious stream into the vaults of the Government.
In the month of July, 1894, no gold either in coin or certificates was paid for customs duties at the New York office. The records given elsewhere on page 163 of this report will show how small were the receipts of this kind of money on this account from that date until the begiming of the calendar year 1898. Paper money was used in this interval for these duties almost exclusively. In March, 1898, payments of gold for customs in New York rose to 17.6 per cent, and in subsequent months the increase has been steady and large. Thus gold payments there were in April, 52.7 per cent; in May, 73.5; in June, 67.7; in July, 59.9; in August, 63.8; in September, 78, and in October, 79.6 per cent.

The receipts from this source have been an important factor in adding to the net gold balance of the Treasury.

Confidence in the credit of the nation and faith in the financial future have added strength to the Treasury. Assurance that the gold standard will be maintained, has led banks and the people to turn the yellow metal into the Treasury so far as practicable. They have preferred paper currency to gold coin in current transactions, even when assistant treasurers of the United States in various cities have been instructed to offer the latter in payment of warrants presented.

The tendency of the increase of gold in its ratio to paper currency in the Treasury still continues. The maximum attained was $\$ 245,063,795.51$, on October 7.

## WAR REVENUE AND POPULAR LOAN.

Under the war-revenue act of June 13, 1898, the receipts from internal revenue began to increase, and were in successive months:

At the same time also payments for the popular loan turned moneys into the Treasury at a rapid rate. They were as follows:

These payments were received at the respective offices of the Treasury in these amounts:

| Washington | \$126, 458, 760.91 |
| :---: | :---: |
| Baltimore | $3,394,551.20$ |
| New Yorls | $39,715,299.91$ |
| Philadelphia | 4,526, 214.98 |
| Boston | 5, 990, 238.07 |
| Cinciunati | 3, 461, 637.61 |
| Chicago | $7,649,149.84$ |
| St. Lonis | 2, 192, 024. 72 |
| New Orleans | 213, 767. 29 |
| San Francisco | 1,842,543.09 |
| Total | $195,444,187.62$ |

## ANTICIPATION OF PAYMENTS.

rne apprehension was natural that the drain upon the currency of the country for these two purposes might create such a stringency as would be harmful to general business. To prevent such a result, payment was anticipated of the interest on the fuuded loan of 1907 , due October 1. Notice was given that the coupons amounting to $\$ 686,175$ might be presented September 10, and checks for the interest on registered bonds, amounting to $\$ 4,910,294$, were sent out September 20.

Like notice was given that the interest due November 1 on the loans of 1904 and 1925, as also on the popular loan of 1898 , would be anticipated, the coupons on October 10, and the interest on registered bonds by check on and after October 20. These amounts were:

| Title of loau. | Coupons. | Registered. | Total. |
| :---: | :---: | :---: | :---: |
| Loan of 1904. | \$419, 856.87 | \$830, 143.13 | \$1, 250, 000.00 |
| Loan of 1925. | 496, 327. 50 | 1, 126, 826.50 | 1, 623, 154.00 |
| Loan of 1898. | 972, 501.15 | 372, 992.70 | 1,345,493.85 |
| Total. | 1,888, 685. 52 | 2,329, 962.33 | 4, 218, 647.85 |

By circular issued by the Secretary of the Treasury September 3, 1898, the option was offered to holders of the Pacific Railroad bonds, falling due January 1,1899 , to receive payinent during that month of principal and interest in full, less a rebate of one-half of 1 per cent. Although these bonds amounted to $\$ 14,004,560$, only $\$ 918,000$ were presented for payment during September. The option was extended for October on the same terms, and during that month such bonds were paid to the sum of $\$ 273,000$. November 1 , of these bouds $\$ 12,813,560$ remained to be paid. The option was again extended on identical terms for the month of November.

## DEPOSITS IN NATIONAL BANKS.

When it became obvious by the sudden close of hostilities with Spain that the demands upon the Treasury would not reach the magnitude for which prudence required provision should be made, the Secretary of the Treasury determined to deposit a large share of the proceeds from the popular loan in national banks in all parts of the country. By this process the funds, while at all times available for any possible needs of the Government, remained in the channels of trade. These deposits in successive months were:

| Month. | Increase dur. ing month. | Balance at end of month. |
| :---: | :---: | :---: |
| May. |  | \$28, 239, 358.72 |
| June | \$10, 556, 271. 80 | 28,795, 630.52 |
| July.... | 19, 470, 387. 18 | 58, 266, 017.70 |
| August.. | 7,702, 449.45 | 65, 968, 467. 15 |
| September. | 14, 920, 244. 94 | 80, 888, 712. 09 |
| October... | 14, 126, 257.51 | 95, 014, 969.60 |

## NO MONETARY STRINGENCY.

The result of these methods has proved in all respects satisfactory. At various times alarm was expressed in certain quarters that the money market would be disastrously affected by the immense pay-
ments into the Treasury. The moral effect of the anticipation of interest and of the Pacific bonds gave confidence, and the Government deposits in national banks afforded resources adequate to the country's need. The consequence was that the immense financial operations rendered necessary by the war with Spain were so conducted that the money markets were in no degree disturbed at any time. The rate of interest both on call and time loans has been held even below a normal standard. The quotations for money in New York have ruled at lower figures than have prevailed in most of the financial centers of the Old World.

## THE PUBLIC DEBT.

Although allotments of the new 3 per cent bonds began to be made on June 14, bearing interest from that date, the bonds at the close of the fiscal year were not yet ready for issue, and no part of the loan was then in such shape as to be included, under the practice of the Department, in the official statements of the public debt. For this reason the published records of the debt relating to that period exhibit a technical rather than an actually existent state of affairs. Up to November 1 these bonds had been issued to the amount of $\$ 179,399,180$.

With the exception of the outstanding contracts for the new loan, the ouly change which occurred during the year in the principal of the interest-bearing debt arose from the conversion of $\$ 3,610$ in refunding certificates, with $\$ 2,340$ of interest thereon, into 4 per cent bonds of the loan of 1907 , increasing the combined principal of the two loans affected by the amount of the interest converted. The other changes in the part of the debt which rests solely upon the public credit, exclusive of the bonds issued to Pacific railroads, were caused by the redemption of $\$ 84,200$ of matured bonds, together with $\$ 350$ of old demand notes and $\$ 2,950$ in fractional currency, and the deposit of $\$ 6,034,510$, in excess of the redemptions, for the retirement of national-bank notes.

Of the Pacific railroad bonds, $\$ 29,850,952$ were paid during the year, leaving a balance of $\$ 14,133,560$ of this loau outstanding, of which $\$ 129,000$ was past due and payable on presentation, and $\$ 14,004,560$ will mature on January 1, 1899.

In the Appendix will be found a table which shows in detail the changes which have here been summarized. The subjoined statement exhibits the outstanding principal in a somewhat more condensed form:

| Title. | Rate of interest. | When payable. | June 30, 1897. | June 30, 1898. |
| :---: | :---: | :---: | :---: | :---: |
| Funded loan of 1891. | Fer cent. | Option of United States. | \$25, 364, 500.00 | \$25, 364, 500.00 |
| Funded loan of 1907. | 4 | July 1, $1907 \ldots .$. | 559, 640, 100.00 | 559, 646, 050.00 |
| Refunding certificates | 4 | Convertible ....... | 100, 45, 130.00 | 41,520.00 |
| Loan of 1904 | 5 | Febrnary 1, 1904.. | 100, 000, 000.00 | 100, 000, 000.00 |
| Loan of 1925 | 4 | February 1, $1925 .$. | 162, 315, 400.00 | 162, 315, 400. 00 |
| Maturod loans |  | On demand | 1,346, 880.26 | 1, 262, 680. 26 |
| Old demand notes |  | ..... do | 54, 347.50 | 53,997.50 |
| United States notes |  | . . . . do ............ | 346, 681, 016.00 | 346, 681, 016.00 |
| Fractional currency |  | . do | 6, 887, 702. 14 | 6,884, 752. 14 |
| National-bank notes |  | . do | 24, 458, 637.00 | $30,493,147.00$ |
| Gold certificates |  | $\therefore$ do | 38, 782, 169.00 | 37, 420, 149.00 |
| Silver certificates. |  | .do | 375, 479, 504.00 | 398, 556, 504. 00 |
| Curreney certificates |  | .do | 61, 750, 000.00 | 26, 605, 000. 00 |
| Treasury notes of 1890 |  | do | 114, 867, 280.00 | 101, 207, 280.00 |
| Total |  |  | 1, 817, 672, 665.90 | 1,796,531,995.90 |

A still further condensation, excluding the certificates and Treasury notes, and exhibiting the debt under three general heads, may be found convenient:

With respect to the conditions under which the principal may be paid, the debt arranges itself under five heads:

| Condition of payment. | June 30, 1897. | June 30, 1898. |
| :---: | :---: | :---: |
| At option of the United States | \$25, 364, 500. 00 | \$25, 364, 500.00 |
| At maturity, future dates | 822, 000, 630.00 | 822, 002, 970.00 |
| On demand, without reissue | 32, 747, 566. 90 | 38, 694, 576.90 |
| On demand, for reissmo. | 461, 548, 296.00 | 447, 888, 296.00 |
| On demand, out of deposits | 476, 011, 673.00 | 462, 581, 653.00 |
| Total | 1,817, 672, 665.90 | 1,796,531, 995.90 |

## REFUNDING CERTIFICATES.

Of the $\$ 40,012,750$ refunding certificates issued under the act of February 26,1879 , only $\$ 41,520$ remained outstanding at the close of the fiscal year. By law they can only be refunded into 4 per cent bonds, and as the smallest denomination of those bonds is for $\$ 50$, three certificates with accrued interest must be secured to permit the transaction. As their volume diminishes the difficulty increases of gathering them. If ever compulsion were necessary to induce the acceptance of 4 per cent bonds of the United States, no such need now exists.

The convenience of holders and of the Treasury will be promoted by an enactment providing for the payment on demand with accrued interest of the small remnant of these certificates. This subject is presented to you for an urgent recommendation to Congress for action.

## THE MONETARY STOCK.

A compilation of the complete statistics relating to the monetary situation on June 30, 1898, gives the results exhibited in the subjoined table:

| Kind. | In Treasury and mints. | In circulation. | Total stock. |
| :---: | :---: | :---: | :---: |
| Gold coin and bullion. | \$203, 564, 317 | \$657, 950, 463 | \$861, 514, 780 |
| Silver dollars and bullion | 502, 867, 893 | 58, 482, 966 | 561, 350, 859 |
| Fractional silver coin. | 12, 070,690 | 64, 056,920 | 76, 127, 610 |
| Total metallic. | 718, 502, 900 | 780, 490, 349 | 1, 498, 993, 249 |
| United States notes | 62,111, 994 | 284, 569, 022 | 346, 681, 016 |
| Treasury notes of 1890 | 2,900,843 | 98, 306, 437 | 101, 207, 280 |
| National. bank notes | 4, 909, 189 | 222, 990, 988 | 227, 900, 177 |
| Gold certificates | 1, 608, 560 | 35, 811, 589 | 37, 420, 149 |
| Silver cortificates | 8, 429, 994 | 390, 126, 510 | 398,556, 504 |
| Currency certificates | 1,110,000 | 25, 565, 000 | 26, 675, 000 |
| Total paper | 81, 070, 580 | 1, 057, 369,546 | 1, 138, 440, 126 |
| Aggregata | 799, 573, 480 | 1, 837, 859,895 | 2,637, 438, 375 |

The estimated increase in the stock of gold is no less than $\$ 165,244,238$, a change without precedent in the history of the country. The nearest approach to this rate of accumulation is found in the year ending June 30, 1881, when the additions to the stock of gold in the country amounted to $\$ 126,000,000$. In both instauces is the result plainly traced to important events in legislative history; at the earlier period to the resumption of specie payments, and now to the reestablishment of faith in the permanence of the gold standard.

As there is no authority of law for the further acquisition of silver, save the insignificant amounts contained in the gold bullion deposited in the mints, the changes in the stock of this metal are due entirely to the manipulations of the material already on hand. Aside from the gold, therefore, no important change is going on in the composition or volume of the circulating medium, with the exception of the rapid growth in the bank-note circulation which has marked the appearance of the war loan on the market. During the fiscal year there were canceled and retired $\$ 13,660,000$ in Treasury notes, which had been redeemed in silver dollars. Further redemptions up to November 1 reduced the volume of these notes to $\$ 97,833,280$.

On the assumptiou of the retirement of the certificates and Treasury notes, the remaining or effective stock would be found to have been composed and distributed as indicated below:

| Kind. | In Treasury and mints. | In circulation. | Effective stock. |
| :---: | :---: | :---: | :---: |
| Gold | \$167, 752, 728 | \$693, 762, 052 | \$86L, 514, 780 |
| Silver | 26, 505,636 | 610, 972, 833 | 637, 478, 469 |
| Notes | 41, 456, 183 | 533, 125, 010 | 574, 581, 193 |
| Total. | 235, 714, 547 | 1,837, 859,895 | 2, 073, 574, 442 |

## THE COINAGE.

While the recent heavy importations of gold, mostly in the form of bullion, have largely increased the relative amount of uncoined gold in the Treasury, the holdings of coin have been sufficient to meet all demands, and there has been no inconvenience in consequence of the change. The capacity of the mints, unless they happen to be temporarily overtaxed by other coinages, is at all times ample for the handling of whatever gold bullion may be brought to them.

The gradual expansion of the circulation of fractional silver coin, which has extended, with some interruptions, through a series of years, and which, with an increasing population, must be expected to continue, has at length reduced the average holdings of the Treasury to a point where it becomes necessary to consider the provision of fresh supplies. An outline of the late statistics relating to this class of the currency may be found significant, and in this view the amount and distribution of the silver coins of denominations less than one dollar are given, as estimated for the end of September in each year, beginning with 1884:

| Year. | In Treasury. | $\operatorname{In}_{\text {circulation. }}$ | Total stock. | Year. | $\stackrel{\text { In }}{\text { Treasury. }}$ | $\begin{gathered} \text { In } \\ \text { circulation. } \end{gathered}$ | Toterl stock. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1884. | \$29, 474, 161 | \$45, 706, 940 | \$75, 181, 101 | 1892. | \$12, 551, 498 | \$64, 916, 209 | \$77, 467, 707 |
| 1885 | 23, 641, 894 | 51, 328, 200 | 74, 970, 100 | 1893 | 13, 496, 416 | 64, 100, 205 | 77, 596, 621 |
| 1886. | 26, 899, 745 | 48, 183, 654 | 75, 083, 399 | 1894 | 16, 809, 713 | 58, 244, 768 | 75, 054, 481 |
| 1887. | 24, 984, 219 | 50, 414, 706 | 75, 398, 925 | 1895 | 14, 882, 337 | 61, 409, 543 | 76, 291, 880 |
| 1888. | 24, 738, 696 | 52, 020, 975 | 76, 759, 671 | 1896 | 15, 126, 483 | 60, 228, 298 | 75, 354, 781 |
| 1889. | 23, 864, 841 | 52, 931, 352 | 76, 796, 193 | 1897 | $13,455,175$ | 61, 176, 415 | 74, 681, 590 |
| 1890. | 20,563,709 | 56,311, 886 | 76, 875, 555 | 1898 | 9, 196,708 | 66, 587, 940 | 75, 784, 648 |
| 1891. | 16, 846, 620 | 59, 664, 446 | 76,511, 066 | ט |  |  |  |

These figures, while showing the effect of temporary derangements of business in the return of the silver coins to the Treasury, indicate plainly the general tendency in their distribution. Furthermore, when it is considered that the holdings of the Treasury must be apportioned among ten offices, besides the mints, in the shares adapted to meet most readily the public demands, it will be understood that the existing supply can be but little above the minimum required for convenient handling.

The amounts of the abraded gold and silver coins transferred during the year to the mints for recoinage are exhibited in the annexed table, which shows also the amount of the ascertained depreciation from wear:

|  | Denomination. | Amount. | Loss. |
| :---: | :---: | :---: | :---: |
| Double eagles. |  | \$139, 160.00 |  |
| Eagles........ |  | 128, 830.00 |  |
| Half eagles |  | 275, 230.00 |  |
| Quarter eagles |  | 5,850.00 |  |
| Three-dollar pieces |  | 201.00 |  |
| One-dollar pieces . |  | 80.00 |  |
| Total gold |  | 549,351. 00 | \$4,750.08 |
| Haif dollars... |  | 3, 340, 215.50 |  |
| Quarter dollars.. |  | 1, 762, 827.00 |  |
| Twenty.cent pieces |  | 304. 20 |  |
| Dimes .... |  | 389, 936.00 | - |
| Half dinues |  | 1, 779.75 |  |
| Three-cent pieces |  | 104.70 |  |
| Total silver |  | 5, 495, 167. 15 | 249, 748.40 |
| Aggregate |  | 6, 044, 518. 15 | 254, 498.48 |

Uncurrent minor coins of the face value of $\$ 537,722$ were also returned to the mints to be restored to a condition of fitness for circulation.

## SPURIOUS AND FRAUDULENT ISSUES.

The improvement noted last year in the condition of the currency with respect to the number of spurious pieces of the higher denominations encountered has continued. As against a total cancellation of $\$ 8,822.45$ in subsidiary coins and paper currency of this character in the preceding twelve months, the records for the past year show $\$ 8,050.20$. On the other hand, an increase in the quantity of bad copper and nickel coins, also beginning to be apparent last year, has developed into proportions altogether without parallel in recent experience. The aggregate number of such coins detected at the offices of the Treasury during this year were no less than 69,625, as against 15,999 in the preceding year, and 10,250 in the year next before. New York, Boston, and Philadelphia continue to be the chief fields of the operators.

## A table of the denominations of counterfeit coins and paper currency presented at the Treasury offices is given below:

| Denomination. | Silver coins. | United ${ }^{2}$ States notes. | Nationalbank notes. | Silver certif. cates. | Fractional carrency. | Total. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Ten cents. | \$297. 90 |  |  |  | \$0.30 | \$298. 20 |
| Twenty-ife cents | 433.50 |  |  |  | 11.00 | 444.50 |
| Tifty cents.. | 619.00 |  |  |  | 238.50 | 857.50 |
| One dollar. | 1,133.00 | \$9.00 |  | \$10.00 |  | 1,152.00 |
| T'wo dollars. |  | 16.00 | \$46.00 | 516.00 |  | 1 578.00 |
| Five dollars |  | 55.00 | 320.00 | 245.00 |  | 620.00 |
| Ten dollars |  | 500.00 | 850.00 | 100.00 |  | 1,450.00 |
| Twenty dollars |  | 400.00 | 580.00 | 20.00 |  | 1,000.00 |
| Fifty dollars. |  | 950.00 |  |  |  | 950.00 |
| One hundred dollars |  | 300.00 | 100.00 | 300.00 |  | 700.00 |
| Total | $2,483.40$ | 2,230.00 | 1,896.00 | 1,191.00 | 249.80 | 8,050.20 |

Dangerous counterfeits of compound-interest and 7.30 notes representing the face value of $\$ 2,310$ were canceled at this office. The total redemptions of geuuine notes of these two issues in the same period were but $\$ 1,660$.

## TRUST FUNDS.

Bonds amounting to $\$ 22,886,900$ were deposited during the year to secure the circulating notes of national banks, as against $\$ 33,157,050$ withdrawn. The fresh deposits of bonds for the security of public moneys were $\$ 33,328,000$, and the withdrawals $\$ 19,417,000$. The kinds and amounts of the bonds remaining in the custody of the office on June 30, in trast for national banks, are shown below:

| Kind of bonds. | Rate of interest. | To secure circulation. | To secure deposits. | Total. |
| :---: | :---: | :---: | :---: | :---: |
|  | Per cent. |  |  |  |
| Funded loan of 1891, continued Funded loan of 1907 |  | $\begin{aligned} & \$ 22,260,500 \\ & 147.728 .600 \end{aligned}$ | \$1,459,500 | $\$ 23,720,000$ $\mathbf{1 6 5}, 947,600$ |
| Loau of 1925 | 4 | 28, 206, 1.50 | 5,732, 000 | 133, 938,150 |
| Loan of 1904. | 5 | 18, 341, 150 | 5, 080, 000 | 23, 421, 150 |
| Bonds issucd to Pacifio railroads | 6 | 3, 665, 000 | 361, 000 | 4, 026, 000 |
| Total |  | 220, 201, 400 | 30, 851,500 | .251, 052, 900 |

For convenience part of the bonds on deposit as security for public moneys have been held in the office of the assistant treasurer in New York. The amount of these on June 30 was $\$ 8,359,000$.

The bonds in the sinking fund of the Union Pacific Railroad at the beginning of the fiscal year, of the face value of $\$ 13,645,250$, were delivered, by direction of the Secretary of the Treasury, to the purchasers of the road, under the conditions of the terms of sale. Of the $\$ 437,000$ held at the opening of the year in the fund of the Central Pacific, $\$ 32,000$, issued to Sioux City and Pacific, fell due on January 1, 1898, and were paid by the United States, while $\$ 163,000$ of those issued to the Central Branch of the Union Pacific were sold under the Secretary's circular of December 15, 1896. These operations have reduced the holdings of bonds on account of the Pacific railroad sinking funds to $\$ 242,000$, of which $\$ 125,000$ are United States 5 percents and $\$ 117,0006$ percents under the first mortgage of the Western Pacific, all belonging to the find of the Central Pacific.

FI $98-2$

In accordance with the provisions of the act of Congress approved April 29, 1898, entitled "An act to approve a compromise and settlement between the United States and the State of Arkansas," $\$ 633,000$ of the bonds of Arkansas, formerly belonging to the Smithsonian fund and the Chickasaw national fund, but afterwards assumed, on default of payment, by the United States, were, on the 24th of May last, by direction of the Secretary of the Treasury, forwarded to an agent of the Department, by whom they were subsequently delivered, upon compliance with the terms of the settlement, to the authorities of the State. There now remain in the custody of the office $\$ 160,000$ of the 6 per cent bonds of Arkansas due January 1, 1900, upon which interest has been paid to July 1, 1898.
The full list of the bonds and stocks, formerly belonging to the Indian trust fund, and transferred, on default, to the Secretary of the Treasury, is now as follows:

| ', Kind. | Amount. |
| :---: | :---: |
| Arkansas State bonds. | \$160,000.00 |
| Louisiana State bonds | 37,000.00 |
| North Carolina State bonds | $58,000.00$ |
| Tennessee State bonds | 335, $666.66 \frac{1}{3}$ |
| Chesapeake and Ohio Canai bonds guaranteri | $581,800.00$ $13,000.00$ |
| South Carolina State stocks. | 125, 000.00 |
| Florida State stocks. | 132,000. 00 |
| Total. | 1, 442, 466. 669 |

The $\$ 201,000$ United States Pacific railroad bonds formerly in the Indian trust fund fell due January 1, 1898, and were paid, the proceeds being deposited in the Treasury.

United States bonds are held, under various provisions of law, for private institutions, as set out below:

| Institution. | Rate of interest. | Amount. |
| :---: | :---: | :---: |
| American Printing Honse for the Blind | Per cent. | \$250, 000 |
| Manhattan Savings Institution ........ | 4 | 75,000 |
| North American Commercial Company | 2 | 50, 000 |
| Total |  | 375, 000 |

A special deposit of $\$ 70,000$ of United States 4 per cent bonds is held in the name of the Comptroller of the Currency for the benefit of the Fidelity National Bank, of Cincinnati.
Captured bonds of the State of Lonisiana, of the face value of $\$ 545,480$, are held for the Secretary of War.

## DISTRICT OF COLUMBIA.

An unimportant increase has occurred in the fund held as a guaranty for the performance of contracts with the District of Columbia. The total of this fund, which is invested according to law in bonds of the United States and of the District, amounted at the close of the year to $\$ 253,900$. A statement of these securities, together with the others held on various accounts for the local government, is subjoined:

| Class of securities. |
| :--- | ---: | ---: | ---: | ---: | ---: |

A separate report has been submitted on the operations of the sinking fund of the District.

## REDEMPTION OF NATIONAL-BANK NOTES.

The presentations of national-bank notes for redemption amounted for the year to $\$ 97,112,000$, as compared with $\$ 113,574,000$ for the year preceding. With the increase of force provided for by Congress it has been possible to keep the work of counting and assorting from falling in arrears, and it has not been necessary, as was formerly the case, to call upon the general force of the office or upon the Department for assistance.

The total expenses for the year, including $\$ 34,337.93$ paid as charges for transportation, were $\$ 125,924.35$, an increase of $\$ 862.62$ over the year before. The annual assessment for the expenses of redemption, which has just been made, is at the rate of $\$ 1.29646$ for each $\$ 1,000$ of notes redeemed.

Deposits aggregating $\$ 22,760,920.50$ were made during the jear for the retirement of wational-bank notes, the largest amount received for that purpose in any year since 1889 . Of this total $\$ 18,800,530$ was deposited for the reduction of the circulation of banks continuing in business. These unusual operations were due chiefly to the maturity of a large block of Pacific railroad bonds, of which many were held to secure circulating notes. There was in consequence a considerable contraction of the bank-note circulation, but this was later counteracted. Since the appearance of the new 3 per cent bonds on the market, at quotations which make them uuusually attractive as a basis for the issue of bank notes, the volume of this circulation has been expanding at a rate without precedent in recent years. This increase of material, which will in due time require renovation or withdrawal, will not fail to add to the work of the branch of this office engaged in the redemption of bank notes.

## WORK OF THE TREASURER'S OFFICE.

The transactions of the Treasurer's Office are always varied and on a large scale. Since the outbreak of the war with Spain they have been greatly extended and their magnitude increased.

The extension has related to the change of denominations of curreucy from large to small, multiplying the number of pieces; to the vastly greater receipts, in the case of the popular loan in small sums; to the important payments on account of the Army and Navy, many in number and often large in amount; to the growth in the list of registered bondholders to whom interest is to be paid, from 34,890 to 74,870;
to the additions to the currency and the deposits of the national banks, involving the care of their securities and the redemption of many more worn notes. The accounting in all these cases and the verification of vouchers add in very large degree to the labor essential to accuracy and safety.

The work of the office has been kept fairly in hand, notwithstanding the abnormal pressure, by extending the hours of labor to cover in several divisions nearly every night to very late hours and by the aid of clerks on a temporary roll.

Whatever may be tolerable elsewhere, transactions and records in the Treasurer's Office can not be permitted to fall in arrears without injustice to individuals and peril to the Government. As a matter of public security and with proper regard to the service of the Treasury, an addition of not less than ten clerks is imperatively called for, as is set forth in detail in the estimates submitted in usual form.

It is a pleasure to certify to the ability, cheerfulness, and efficiency with which the unusual burdens during the past year have been met by all the officers, clerks, and employees of every grade in the office of the Treasurer.

Respectfully yours,

Ellis H. Roberts, Treasurer of the United States.

Hon. Lyman J. Gage, Secretary of the Treasury.

## APPENDIX.

## No. 1.-Revenues and Expenditures for the Fiscal Year 1898, as shown by Warrants Issued.

Notwitbstanding that the number of banks in operation on September 20, 1898, is less than at any date of report since December 19, 1890, the amount of individual deposits, loans and discounts, and total resources is greater than at any time during the existence of the national banking system. On September 20, for the first time, the aggregate resources reached and exceeded the four-billion-dollar mark, the increase since October 5,1897 , being $\$ 298,377,337.16$. A comparison of the last returns with those of October 5,1897 , indicates an increase during the year of $\$ 104,952,189.74$ in loans and discounts; $\$ 79,194,380$ in Govern . ment securities on deposit with the Treasurer of the United States to secure circulating notes and public deposits and the amount held by the banks; $\$ 57,304,827.34$ in specie and legal tenders. The reduction of $\$ 25,465,000$ in the amount of United States certificates of deposit for legal tenders results in a net increase of lawful money of \$31,839,827.34.

The reduction of 25 in the number of banks reporting is accompanied by a decrease of $\$ 9,970,200$ in capital stock and $\$ 4,436,904.50$ in circulating notes outstanding. Necessarily the principal increase in the
liability side of the statement is in individual deposits. On October 5, 1897, the deposits aggregated $\$ 1,853,349,128.50$, and on September 20, $1898, \$ 2,031,454,540.29$, the increase being $\$ 178,105,411.79$. The balance due other banks and bankers shows an increase of $\$ 52,627,388.09$ and Uuited States deposits of $\$ 59,023,019.27$.

By reference to the foregoing table; it will be seen that loans and discounts, which on October 5, 1897, amounted to $\$ 2,051,009,438.17$, show a material increase up to February 18, 1898. The returns on May 5 show a decrease since the February report of $\$ 40,984,045.20$. Compared with the amount on May 5 , the increase on July 14 was $\$ 54,663,420.37$; which was further increased on September 20 by $\$ 4,203,972.31$.

United States bonds on deposit with the Treasurer of the United States to secure circulation have fluctuated between a maximum of $\$ 227,483,950$ on October 5,1897 , and $\$ 212,425,300$ on February 18,1898 , the amount on deposit on September 20 being $\$ 224,628,840$, a reduction during the year of $\$ 2,855,110$.

Specie leld by the banks is greater at date of each report during the year than on October 5, 1897, when it stood at $\$ 239,387,702,05$. The maximum holding was reached on July 14, being $\$ 335,677,130.95$. Between that date and September 20 there was a decrease of $\$ 41,802,972.56$.

Capital stock shows a steady but slight decrease since October 5, 1897. The changes in the surplus and other undivided profit accounts have been slight, although, as compared with October 5, the increase in both items during the year aggregates $\$ 5,818,205.60$.

The circulation account was greatest at date of statement closing the last report year. The minimum amount outstanding was $\$ 184,106,322$, on February 18, 1898. From that date there was a gradual increase during the balance of the year, but, as heretofore stated, the amount outstanding on September 20, 1898, was $\$ 4,436,904.50$ less than on October $5,1897$.

Without an exception, there has been a material increase in individual deposits at date of each report during the year. Starting at $\$ 1,853,349,128.50$, the account reached on September 20 an aggregate of $\$ 2,031,454,540.29$, or, as heretofore stated, an increase during the year of over $\$ 178,000,000$.

The liabilities of the banks on account of notes and bills rediscounted and bills payable were at the maximum on October 5, 1897, being $\$ 19,755,556.64$. On February 18, 1898, these liabilities amounted to only about $\$ 8,000,000$. Thereafter there was a steady increase to the close of the year, when the amount was $\$ 17,368,147.78$.

INVESTIGATIONS AND RECOMMENDATIONS RELATIVE TO BANK-NOTE CURRENCY.

Section 333 of the Revised Statutes of the United States provides that the Comptroller of the Currency in his annual report to Congress shall suggest "any ameudment to the laws relative to banking by which the system may be improved and the security of the holders of its notes and other creditors may be increased."

In suggesting some general amendments to the national banking law at this time, it is not the purpose of the Comptroller to review in detail the plans and propositions for the modification of our currency and banking systems which are now, and for some time have been, the subject of economic and general discussion throughout the country; but a reference to them and the principles underlying them is deemed
imperative in view of the fact that in their present form they seem to ignore the interests of bank depositors, with whose protection the Comptroller is peculiarly charged.

The panic of 1893 baving directed attention toward the dangers to the general commercial system, resulting from the disproportion between demand currency liabilities of the Government, payable in gold, and the gold held in reserve by the Government for their redemption, as well as to the inelasticity of the present bank-note currency, the plans providing for a modification of the bankiug and currency systems which are now most discussed, may be considered as based upon the following propositions:

First. That the disproportion between outstanding currency liabilities of the Government payable in gold, and the gold held for their redemption, should be lessened by a contraction in the amount of these demánd-currency liabilities.

Second. That the void in circulation, caused by such contraction, should be filled by an extension of the circulation of national banks, which circulation, redeemable in gold, is ultimately to depend for its chief security upon a first lien on the commercial assets of the issuing banks.

The more prominent of these plans, which may be considered as embodying in the ablest forms the general principles necessarily involved in a system of bank-note issues secured by the general assets of banks, look to the ultimate displacement of Government-credit money with bank credit money, the latter eventually being secured by a first lien upon the assets of the issuing banks, and by a 5 per cent redemption fund created in the first instance by taxation upon solvent issuing banks and thus maintained. It is proposed that a first lien shall exist upon all the assets of any insolvent bank which may have issued currency until it has contributed to such fund, to be held by the Government as trustee, an amount sufficient to redeem its outstanding notes in full.

Upon any deficiency occurring in such contribution to the guaranty fund, due to a failure to collect from the assets of the insolvent bank a sufficient amount to redeem its notes in full, resort is to be had to additional taxation upon solvent banks issuing circulation to supply the deficiency, one plan providing, however, that such tax shall not exceed 1 per cent on the amount of their note issues per year.

The assumptions which seem to underlie these plans are:
First. That unless we are to have a currency contraction, some radical extension of bank-note issues is absolutely necessary to the securing of the proper adjustment of Government currency liabilities to its gold reserve, by which adjustment the greater safety of the gold standard is subserved; and,

Second. That through this radical extension and cbange in the present form of bank-note issues alone, is elasticity to be secured in our currency.

As opposed to these propositions, and in connection with the data given and views expressed hereinatter, relative to changes in the present banking laws, the Comptroller desires to state that his suggestious are based upon the following assumptions:

First. That there is existing no such condition of the United States finances, revenues, or credit as to justify the proposition that the shifting of the burden of gold redemption of outstanding currency from the Goverument to the banks, is so important as to necessitate of itselt radical changes and concessions in national-banking laws relative to
the issue of notes, which changes and concessions would not be considered wise if the interests of the community, irrespective of Government finances, were alone considered.

Second. That if from considerations of general public policy, irrespective of governmental finances, bank-note issues secured only by commercial assets of banks seem unwise, the resources, credit, and financial condition of the United States are such that by means of revenue laws and other amendments to law suggested by the President in his last annual message, a safer ratio between its outstanding circulation and gold reserve can be attained, the stability of the present gold standard insured, and the currency maintained upon a sound basis without contraction.

It must be remembered, in connection with the discussion of changes in the present banking laws, that by far the most important function of the national banks is that of an acting middleman between the depositors and borrowers of a community, and that its note-issuing functions are secondary in importance and usefulness under the present, or any proposed system of bank-note issues.

It is especially important, therefore, in proposing changes in the laws governing the note-issuing powers of national banks, that the effects of such changes upon the relation of the bank to its depositors and borrowers, be carefully studied.

It is the belief of the Comptroller that the proposed preference of the note holder over the depositor, which is a fundamental basis of all these plans, is not only inherently wrong, and unjustified by any grounds of public policy, but that its practical effect upon the present relation of depositors to banks in the smaller communities of the United States would be so revolutionary as to bring about the most injurious conditions in the general business of the country.

The essential similarity between the liability of a solvent bank expressed by a deposit credit and by a bank note, is generally recognized and emphasized by those advocating these plans.

In view of this recognized similarity before the insolvency of a bank, the radical dissimilarity in their respective treatment when insolvency occurs, is justified by a course of reasoning which is believed to be fallacious.

It may be as sound in principle for a bank to issue bank notes as to take deposits, when the two classes of creditors stand upon the same basis in relation to the assets of the bank to which they have each contributed, bat it is not as sound in principle when in case of insolvency, the creditor who claims under a note must be paid in full, before the creditor who claims under a deposit can receive anything.

Under these plans the dollar of the depositor, and the dollar of the note holder, side by side, would be invested by the officers in the assets of the solvent bank, since it is proposed to change the law under which at the present time the note holder's dollar from the first must be invested in Government bonds, to be held separately in trust for his protection.

Side by side, these dollars of depositors and note holders, would be redeomed on demand without question by the solvent banks under the proposed system. Why, then, should the dollar claim of the depositor be paid nothing out of the assets of an insolvent bank until and unless the dollar claim of the note holder is paid in full?

In our judgment there is no relevant answer to this proposition save one, based upon grounds of general public policy, which admits the injustice to the depositor class, but justifies it by claiming the neces-
sity for the Government and the community, of additional and different circulation than that we have at present.

The claim that a difference so radical and fundamental as this in the treatment of two classes of creditors, can be justified by the fact that the depositor generally deals directly with the bank and has the opportunity to inform himself as to the trustwortbiness of it, whereas the notes are issued for general circulation and pass into the hands of those distant from the bank, and therefore unable to form an opinion as to its strength, is not one which will commend itself generally to practical men.

Experience demonstrates that in the banking business the detection of untrustworthiness in banks is, as a matter of fact, not one of the duties with which the depositor, as a general rule, charges himself. He has come to leave that to the officials of the National and State Governments; and while it may be true that as a class he ought to exercise greater discretion in his selection of banks for his deposits, it is equally true that as a class, he has come to have that confidence in the system which has made him comparatively iudifferent under normal conditions to this duty.

Again, he is often compelled, by the very nature of his business, to be dependent upon the agency of banks at a distance in handling his funds, in which case he, like the note holder, could not investigate if he so desired.

Certainly the fundamental right to prefer in the distribution of the assets of an insolvent bank the note-holding class to the depositor class, should rest upon some broader ground than the assumed neglect of the depositor class to acquaint itself with the nature of the private business and internal management of banking institutions, whose proper supervision the National Government, as the representative of the depositors and the public, has taken upon itself.

The lien given to the note holder under the present system, first upon the Government bonds deposited expressly in trust as security for said notes, before other assets of the bank cay be reached, is far different in practical effect from the general and unqualified priority in lien upon the assets of a bank proposed in these plans.

The priority of lien of the note holders under the present system over the depositor, is first upon the United States bonds deposited in trust for his benefit, and only secondarily, in case of deficiency in bonded security, upon the general assets of the bank. In practical operation this security gives the notes the unquestioned credit necessary to enable them to circulate, and at the same time does not, as a matter of fact, interfere with the rights of the depositor in case of insolvency, since the bonds at public sale bring the amount of the notes, and return to the insolvent bank for the benefit of general creditors practically all the equity originally invested in them.

This being the practical effect of the present bank-note system, it can not rightfully be considered as justifying any assumption that in its theory the rights of note holders are considered as more sacred in themselves, than the rights of depositors.

Uuder the present system the relation of the note issues of a national bank to its geueral business, is somewhat the same as the relation of the issue and redemption department of the Bank of England, to its commercial department. They are in reality almost entirely separate, and so intended to be.

If under any new system, the note holder and the deposit holder come into similar relations to the bank, their rights against the common
assets, to which their money has alike contributed, should be equally sacred.

If, then, there is no inherent moral right to establish a preference of the note-holding creditors of an insolvent bank, as against the depositholding creditors, in the distribution of the assets of an insolvent bank, the question arises, does public policy demand, in the interest of the common good, that such a preference should be given in order to establish a bank-note system which will give banks such a profit, that to secure it they will relieve the United States Treasury of the burden of gold redemption; and afford the country a circulating medium having alleged advantages over that now in use.

In order to determine this question, actual data at command must be examined critically in order to understand the nature and extent of the wrong done the depositor class by this preference, and the consequent effects of this wrong upon the community at large and its business.

Statistics have been quoted to show that the burdens which will be imposed upon depositors by such a preference will be light; but the force of these figures, so far as their being a guide to the probable economic effect of the proposed laws is concerned, is immediately lost when it is noted that in them no distinction is made between the rate of loss of depositors in clifferent communities, and between the rate of loss of the depositor in the small banks, and that of the depositor in large banks. They err in assuming that the percentage of loss will be ratably distributed.

The Comptroller presents herewith a series of tables which indicate more exactly upon what class of depositors the real burden of this preference will fall with almost crushing weight.

These tables give approximately the loss which under the proposed plau would result to depositors from the preference of note holders over deposit holders in case of insolvency, based upon the showing made by the 195 insolvent national banks, whose affairs have been finally closed during the existence of the system.

For the purpose of these tables it is assumed in the case of each class of insolvent banks, that their officers would have made the same proportionate losses upon the commercial assets in which the notes issued were invested, that they actually did upon the assets in which the deposits and capital of the banks were invested.

To the good assets of these different classes of insolvent national banks, as shown by the records of this office, has been added the amount which would have been realized from the unsecured notes issued, if loaned or invested with the same rate of loss as was made upon the money invested in the actual assets.

From the assets thus increased, there is subtracted 95 per cent of the preferred-note issues proposed (to wit, the par of the notes less the 5 per cent redemption fund held by the Government), which leaves the amount which would then go to the depositors, and other unsecured creditors.

This amount, in terms of percentage of their total claims, is then compared with the percentage of their claims actually received, and the loss which would be caused by the preference is thus approximately disclosed in the difference.

The tables give these results bearing upon the interests of depositors in banks according to geographical sections, and according to the following classifications of capital: $\$ 50,000, \$ 100,000, \$ 200,000, \$ 300,000$, $\$ 500,000$, and banks with a capital exceeding $\$ 500,000$.

As under the proposed plans circulation, eventually secured only by
bank assets, might be taken out in different amounts, these amounts have been assumed to be 60 per cent, 80 per cent, and 100 per cent of the capital of the bank, showing what the loss to depositors would approximately be in each of these instances.

As illustrating the method of preparing the tables, we will take the case of a bank of $\$ 100,000$ capital, which has failed, and upon final liquidation has paid its depositors 50 per cent upon claims of $\$ 200,000$, to wit, the sum of $\$ 100,000$. Under the plan proposed assume this bank had issued in notes, secured by a first lien upon its assets, an amount equal to 60 per cent of its capital, to-wit, the sum of $\$ 60,000$.
Since in investing $\$ 300,000$, to wit, $\$ 100,000$ capital and $\$ 200,000$ deposits, it has lost the sum of $\$ 200,000$ and has remainiug but $\$ 100$, 000 , to wit, one-third of its origiual assets, we assume that of the $\$ 57,000$ circulation which the bank had to invest in commercial assets (to wit, the $\$ 60,000$ circulation less $\$ 3,000$ representing the 5 per ceut redemption fund held by the Government) it would have lost the same proportion, and have left of that investment but one-third in good assets, to wit, $\$ 19,000$. We add, therefore, to the $\$ 100,000$ actually paid depositors, the sum of $\$ 19,000$, giving $\$ 119,000$ for distribution between depositors and note holders. But, as under these plans, the note holders are preferred for the full amount of their $\$ 60,000$ notes, of which but $\$ 3,000$ is in the redemption fund, there must be subtracted from this $\$ 119,000$ the sum of $\$ 57,000$, leaving for the depositors only $\$ 62,000$, as against $\$ 100,000$ which they received under the present system, without any burden of note preferences upon common assets. As $\$ 62,000$ is but 31 per cent of their total claims of $\$ 200,000$, upon which under the present system they received $\$ 100,000$ dividends, or 50 per cent, it follows that their loss, directly traceable to the preference, would amount to 19 per cent of the face of their deposits.

Of necessity these tables, based as they are upon hypothesis, can be considered only as approximately indicating the losses which depositors may expect; but that they furnish a conservative estimate of these losses is believed.

They do not take into consideration the possibility of unusual losses in general bank assets, through an inflation of the currency and resultant speculation brought about by an abnormal increase in the number of national banks.

This increase might be caused by private and State banks and trust companies entering the system for the sake of the profits arising from the currency privilege. These plaus provide for a circulation secured by the commercial assets of banks up to a limit of 100 per cent of the capital of the bank, with an increasing tax as the limit is reached.

In this connection it is well to remember that an insolvent bank, as a general rule, will have made every effort before closing its doors to avail itself of the currency privilege to the full limit allowed by law in the effort to avert suspension of payments.

Of the 195 national banks which have been finally liquidated these tables show in reference to the rate of loss experienced in investments:

That 10 banks in the New England States with combined capital of $\$ 2,571,300$ have paid cash dividends of $\$ 9,626,055$ on $\$ 11,508,426$ of claims proved, or 83.64 per cent. These banks had total nominal assets of $\$ 17,195,440$, of which $\$ 10,207,324$ were collected in cash or by offsets or otherwise, making the proportion of valuable assets to nominal assets, upon final liquidation, 59.36 per cent.

That 50 banks in the Eastern States, with a combined capital of $\$ 9,155,600$, have paid cash dividends of $\$ 14,469,195$ on $\$ 18,399239$ of
claims proved, or 78.64 per cent. These banks had total nominal assets of $\$ 31,135,897$, of which $\$ 17,260,498$ were collected in cash or by offsets or otherwise, making the proportion of valuable assets to nominal assets, upon final liquidation, 55.44 per cent.

That 33 banks in the Southern States, with a combined capital of $\$ 4,775,000$, have paid cash dividends of $\$ 6,611,266 \cdot$ on $\$ 10,111,715$ of claims proved, or 65.38 per cent. These banks had total nominal assets of $\$ 15,263,365$, of which $\$ 6,808,364$ were collected in cash or by offsets or otherwise, making the proportion of valuable assets to nominal assets, upon final liquidation, 44.61 per cent.

That 44 banks in the Middle States, with a combined capital of $\$ 9,122,000$, have paid cash dividends of $\$ 7,996,983$ on $\$ 11,167,256$ of claims proved, or 71.61 per cent. These banks had total nominal assets of $\$ 24,153,212$, of which $\$ 11,796,392$ were collected in cash or by offsets or otherwise, making the proportion of valuable assets to nominal assets, upon final liquidation, 48.84 per cent.

That 44 banks in the Western States, with a combined capital of $\$ 3,382,000$, have paid cash dividends of $\$ 2,195,061$ on $\$ 3,552,511$ of claims proved, or 61.79 per cent. These banks had total nominal assets of $\$ 9,308,471$, of which $\$ 3,083,292$ were collected in cash or by oftisets or otherwise, making the proportion of valuable assets to nominal assets, upon final liquidation, 33.12 per cent.

That 14 banks in the Pacific States, with a combined capital of $\$ 1,725,000$, have paid cash dividends of $\$ 1,644,705$ on $\$ 2,628,811$ of claims proved, or 62.56 per cent. These banks had total nominal assets of $\$ 5,687,777$, of which $\$ 2,538,605$ were collected in cash or by offsets or otherwise, making the proportion of valuable assets to nominal assets upon final liquidation 44.63 per cent.

That the total of 195 banks, with a combined capital of $\$ 30,730,900$, have paid cash dividends of $\$ 42,543,265$ ori $\$ 57,367,958$ of claims proved, or 74.16 per cent. These banks had total nominal assets of $\$ 102,744,162$, of which $\$ 51,694,475$ were collected in cash or by oftsets or otherwise, making the proportion of valuable assets to nominal assets upon final liquidation 50.31 per cent.

Of the 195 national banks which have been finally liquidated, these tables further show in reference to the rate of loss experienced in investments.

That 66 banks of $\$ 50,000$ capital each, and total capital of $\$ 3,280,000,{ }^{*}$ have paid cash dividends of $\$ 2,859,618$ on $\$ 4,424,178$ of claims proved, or 64.64 per cent. These banks had total nominal assets of $\$ 8,733,255$, of which $\$ 3,465,334$ were collected in cash or by offsets or otherwise, making the proportion of valuable assets to nominal assets, upon final liquidation, 39.68 per cent.

That 61 banks of $\$ 100,000$ capital each, and total capital of $\$ 5,634,000$, have paid cash dividends of $\$ 6,262,487$ ou $\$ 9,891,367$ of claims proved, or 63.31 per cent. These banks had total nominal assets of $\$ 18,034,198$, of which $\$ 7,584,130$ were collected in cash or by offsets or otherwise, making the proportion of valuable assets to nominal assets, upon final liquidation, 42.05 per cent.

That a total of the above 127 banks, having a combined capital of $\$ 8,914,000$, have paid cash dividends of $\$ 9,122,105$ on $\$ 14,315,545$ of claims proved, or 63.72 per cent. These banks had total nominal assets of $\$ 26,767,453$; of which $\$ 11,049,464$ were collected in cash or by offsets

[^5]or otherwise, making the proportion of valuable assets to nominal assets, upon final liquidation, 41.28 per cent.

That 37 banks, of $\$ 200,000$ capital each and total capital of $\$ 6,355,600$, have paid cash dividends of $\$ 7,321,036$ on $\$ 9,211,748$ of claims proved, or 79.47 per cent. These banks had total nominal assets of $\$ 17,748,526$, of which $\$ 7,895,311$ were collected in cash or by offsets or otherwise, making the proportion of valuable assets to nominal assets upon final liquidation, 44.48 per cent.

That 16 banks of $\$ 300,000$ capital each and total capital of $\$ 4,350,000$ have paid cash dividends of $\$ 6,866,897$ on $\$ 9,042,532$ of claims proved, or 75.94 per cent. These banks had total nominal assets of $\$ 16,369,761$, of which $\$ 8,629,562$ were collected in cash or by offsets or otherwise, making the proportion of valuable assets to nominal assets, upon final liquidation, 52.72 per cent.

That 9 banks of $\$ 500,000$ capital each, and total capital of $\$ 4,300,000$ have paid cash dividends of $\$ 12,441,201$ on $\$ 16,558,203$ of claims proved, or 75.13 per cent. These banks had total nominal assets of $\$ 23,402,935$, of which $\$ 15,321,625$ were collected in cash or by offsets or otherwise, making the proportion of valuable assets to nominal assets, upon final liquidation, 65.47 per cent.

That 6 banks of $\$ 500,000$ capital or over each, and total capital of $\$ 6,811,300$, have paid cash dividends of $\$ 6,792,026$ on $\$ 8,239,930$ of claims proved, or 82.43 per cent. These banks had total nominal assets of $\$ 18,455,487$, of which $\$ 8,798,513$ were collected in cash or by offsets or otherwise, making the proportion of valuable assets to nominal assets, upon final liquidation, 47.67 per cent.

That the total of 68 banks with capital of $\$ 200,000$ or over each, and total capital of $\$ 21,816,900$, have paid cash dividends of $\$ 33,421,160$ on $\$ 43,052,413$ of claims proved, or 77.62 per cent. These banks had total nominal assets of $\$ 75,976,709$, of which $\$ 40,645,011$ were collected in cash or by offsets or otherwise, making the proportion of valuable assets to nominal assets, upon final liquidation, 53.50 per cent.

These tables further show that the depositors of the 10 insolvent national banks, having a combined capital of $\$ 2,571,300$ and nominal assets.of $\$ 17,195,440$, with cash dividends paid to depositors of $\$ 9,626,055$, or 83.64 per cent, situated in the New England States of Maine, New Hampshíre, Vermont, Massachusetts, Rhode lsland, and Connecticut, would have lost by preference of the note holders in case of an issue of uncovered notes equal to 100 per cent of their capital, 8.62 per cent of their deposits more than under the present system, or 10.30 per cent of their dividends; in case of note issues of 80 per cent of their capital, 6.90 per cent more, or 8.25 per cent of their dividends; and in case of circulation of 60 per cent of their capital, 5.17 per cent more, or 6.18 per cent of their dividends.

The depositors of 50 insolvent banks, having a combined capital of $\$ 9,155,600$, nominal assets of $\$ 31,135,897$, with cash dividends paid depositors of $\$ 14,469,195$, or 78.64 per cent, situated in the Eastern States of New York, New Jersey, Pennsylvania, Delaware; Maryland, and District of Columbia, would have lost by preference of the note holders with a 100 per cent note issue, 21.06 per cent more than under the present system, or 26.78 per cent of their dividends; with an 80 per cent note issue, 16.85 per cent more, or 21.42 per cent of their dividends, and with a 60 per cent note issue, 12.64 per cent more, or 16.07 per cent of their dividends.

The depositors of 33 insolvent banks, having a combined capital of $\$ 4,775,000$, nominal assets of $\$ 15,263,365$, and with cash dividends paid
depositors of $\$ 6,611,266$, or 65.38 per cent, situated in the Southern States of Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, Texas, Arkansas, Kentucky, and Tennessee, would have lost by preference of the note holders with 100 per cent note issue, 24.85 percent more than under the present system, or 38 per cent of their dividends; with an 80 per cent note issue, 19.88 per cent more, or 30.41 per cent of their dividends, and with a 60 per cent issue, 14.91 per cent more, or 22.80 per cent of their dividends.

The depositors of 44 insolvent banks, having a combined capital of $\$ 9,122,000$, nominal assets $\$ 24,153,212$, and with cash dividends paid depositors of $\$ 7,996,983$, or 71.61 per cent, situated in the Middle States of Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, and Missouri, would have lost by preference of the note holders, with 100 per cent issue, 39.70 per cent more than under the present system, or 55.44 per cent of their dividends; with an 80 per cent note issue 31.76 per cent more, or 44.35 per cent of their dividends; and with a 60 per cent issue 23.82 per cent more, or 33.26 per cent of their dividends.

The depositors of 44 insolvent banks, having a combined capital of $\$ 3,382,000$, nominal assets of $\$ 9,308,471$, and with cash dividends paid depositors of $\$ 2,195,061$, or 61.79 per cent, situated in the Western States of North Dakota, South Dakota, Nebraska, Kansas, Montana, Wyoming, Colorado, New Mexico, Oklahoma, and Indian Territory, would have lost by preference of note holders, with a 100 per cent issue 60.49 per cent more than under the present system, or 97.89 per cent of their dividends (being their total dividends, except 1.30 per cent of par of claim) ; with an 80 per cent issue 48.39 per cent more, or 78.31 per cent of their dividends; and with a 60 per cent issue 36.29 per cent more, or 58.73 per cent of their dividends.

The depositors of 14 insolvent banks, having a combined capital of $\$ 1,725,000$, nominal assets of $\$ 5,687,777$, with cash dividends paid depositors of $\$ 1,644,705$, or 62.56 per cent, situated in the Pacific States of Washington, Oregon, California, Idaho, Utah, Nevada, and Arizona, would have lost by preference of the note holders, with a 100 per cent issus 34.51 per cent more than under the present system, or 55.16 per cent of their dividends; with an 80 per cent issue 27.61 per cent more, or 44.13 per cent of their dividends; with a 60 per cent issue 20.71 per cent more, or 33.10 per cent of their dividends.

Thus it will be seen that, as compared with the rate of loss to the New England depositor, through the preterence of the note holders in cases of insolvency, the issues of uucovered notes being either 100 per cent, 80 per cent, or 60 per cent of the capital, the depositor in the Eastern States will lose at a rate of nearly two and one-half times as great; the depositor in the Southern States at a rate nearly three times as great; the depositor in the Pacific States at a rate four times as great; the depositor in the Middle States at a rate over four and one-half times as great, and the almost obliterated depositor in the Western States at a rate over seven times as great.

These tables also show that the depositors of the 66 insolvent banks of $\$ 50,000$ capital, having a combined capital of $\$ 3,280,000$, ${ }^{*}$ nominal assets of $\$ 8,733,255$, with cash dividends paid to depositors of $\$ 2,859,618$, or 64.64 per cent, would have lost by preference of the note holders, in case of an issue of uncovered notes equal to 100 per cent of the capital, 42.49 per cent more than under the present system, or 65.73 per cent of

[^6]their dividends; in case of a note issue of 80 per cent, 33.99 per cent more, or 52.58 per cent of their dividends; and in case of 60 per cent issues, 25.49 per cent more, or 39.43 per cent of their dividends.

The depositors of 61 insolvent banks, with a capital of over $\$ 50,000$ and not exceeding $\$ 100,000$, aggregating $\$ 5,634,000$, nominal assets of $\$ 18,034,198$, with cash dividends of $\$ 6,262,487$, or 63.31 per cent, would have lost by preference of the note holders, in case of issue of uncovered notes equal to 100 per cent of the capital, 31.35 per cent more than under the present system, or 49.52 per cent of their dividends; and in case of note issue of 80 per cent, 25.08 per cent more, or 39.61 per cent of their dividends; and iu case of 60 per cent issues, 18.81 per cent more, or 29.71 per cent of their dividends.

The depositors of 37 insolvent banks, with a capital over $\$ 100,000$ and not exceeding $\$ 200,000$, aggregating $\$ 6,355,600$, nominal assets $\$ 17,748,526$, with cash dividends paid of $\$ 7,321,036$, or 79.47 per cent, would have lost by preference of note holders in case of an issue of uncovered notes equal to 100 per cent of the capital, 36.39 per cent more than under the present system, or 45.79 per cent of their dividends; and in case of note issues of 80 per cent, 29.11 per cent more, or 36.63 per cent of their dividends; and in case of 60 per cent issues, 21.83 per cent more, or 27.47 per cent of their dividends.

The depositors of 16 insolvent banks, with a capital over $\$ 200,000$ and not exceeding $\$ 300,000$, aggregating $\$ 4,350,000$, nominal assets of $\$ 16,369,761$, with cash dividends of $\$ 6,866,897$, or 75.94 per cent, would have lost by preference of the note holders in case of an issue of uncovered notes equal to 100 per cent of the capital, 21.61 per cent more than under the present system, or 28.46 per cent of their dividends; in case of note issues of 80 per cent, 17.29 per cent more, or 22.77 per cent of their dividends; and in case of 60 per cent issues, 12.96 per cent more, or 17.06 per cent of their dividends.

The depositors of 9 insolvent banks, with a capital over $\$ 300,000$ and not exceeding $\$ 500,000$, aggregating $\$ 4,300,000$, nominal assets of $\$ 23,402,935$, with cash dividends of $\$ 12,441,201$, or 75.13 per cent, would have lost by preference of the note holders in case of an issue of uncovered notes equal to 100 per cent of the capital, 8.51 per cent more than under the present system, or 11.33 per cent of their clividends; in case of note issues of 80 per cent 6.81 per cent more, or 9.06 per cent of their dividends; and in case of 60 per cent issues 5.11 per cent more, or 6.80 per cent of their divideuds.

The depositors of 6 insolvent banks, with capital exceeding $\$ 500,000$, aggregating $\$ 6,811,300$, nominal assets of $\$ 18,455,487$, with cash dividends of $\$ 6,792,026$, or 82.43 per cent, would have lost by preference of the note holders in case of an issue of uncovered notes equal to 100 per cent of the capital 41.10 per cent more than under the present system, or 49.86 per cent of their dividends; in case of note issues of 80 per cent 32.88 per cent, or 39.89 per cent of their dividends; and in case of 60 per cent issues 24.66 per cent more, or 29.92 per cent of their dividends.

From the tables which we have given it is evident that from the depositors in smaller national banks of from $\$ 50,000$ to $\$ 100,000$ capital, and from the depositors of the newer sections of the country, the greater amount of the cost of this radical experiment in currency must be collected. Thus upon those depositors least able to endure loss, must the heaviest losses fall.

The assumption of the friends of these proposed plans, that the uncovered currency privilege will be availed of in those communities
where there is now an alleged scarcity of the circulating medium, may be correct.

But this is only another statement of the fact that those banks which will most readily issue notes, are in those communities where statistics show there now occurs the largest proportion of bank failures. In other words, in those communities in which bank depositors have already sustained the greatest percentage of losses, they are to be subjected to still greater losses by having their claims against an insolvent bank made subject to the prior lien of note holders.

In cases of insolvency the records of this office show that, as a rule, those banks pay the smallest dividends to general depositors which at the time of failure have their bills receivable largely collateraled to bills payable, which they have issued for borrowed money.

In effect, a bank which would issue these notes, collaterals its entire assets to its note issues.

Under the laws of competition, the large city banks would gradually receive a larger proportion of deposits of the country, as the effects of the increased percentage of loss to depositors of smaller banks was perceived by the general public. The tendency to huard money in smaller communities would also be stimulated. One of the purposes of the proposed laws, which is to enlarge the circulation in those districts where it is now scanty, would be thwarted by the ultimate effect of the laws in decreasing in rural communities the deposits, which, while at the command of the depositors, can still be loaned to borrowers and circulated in the form of checks and drafts under the safe and prescribed limits of ordinary banking.

The statistics given in the table showing the record of insolvent banks upon the final liquidation, indicate that the safety of the depositor from the prior lien of the note holder, generally would increase as does the ratio of deposits to capital. This is due to the nature of the assets held by the insolvent banks with large deposit lines, which have yielded larger returns proportionately upon liquidation, than the assets which have been held by the smaller insolvent banks.

The large banking institutions of the great cities have invariably the largest average ratio of deposits to capital. Those locations where deposits are smallest, and therefore where there would be the greatest incentive to the taking out of increased circulation, are those where the depositors would suffer the most severe losses, because of this unjust prior lien of note holders upon the assets of insolvent banks.

The measure will stimulate in still greater degree the tendency of the money of the country to flow to the great money centers, where to fewer institutions, as time and competition progress, would pass the management and control of the savings and capital of the country.

We can not agree to the wisdom of any measure which accelerates the centralization of capital in the great cities, and which, by separating in location those who lend money from the many who use it, will encourage the growth of commerce only in the form which has a tendency to crush out general business individualism.

The temporary effect of such plans might be different, but this ultimate effect is inevitable.

The effect of the passage of such laws would at first be a great stimulus to the business of banking, especially in the West and south. It would probably be followed by the change from the various State banking systems of a very large number of private and State banks, which would be anxious to avail themselves of the currency privilege. The right to issue such currency wonld give them an advantage over banks organized under the national banking law as it is at present, and its
effect upon the plans of those interested in the organization of new national banks would be to lessen the estimate of the amount of probable deposits to be received, which would be considered as sufficient to justify the starting of the bank.

Whether a bank which could issue 60 per cent or more of its capital in notes subject only to nominal tax, which notes it could loan at ordinary commercial rates, and not be compelled to invest in low-rate Government securities, as in effect under the present system, would or would not take out its full quota of such notes under the law, would be determined somewhat by the status of its deposit line. If its deposit line was so large as to tax the ability of its management to loan the amounts currently intrusted to it, it might not be the policy of such a bank to take out its authorized currency, although it would be profitable for a smaller bank in the same community to do so. But throughout the West and South, and in the smaller banks of the cities throughout all the country, it may safely be assumed that the profits from the exercise of the currency privilege would at first be eagerly sought.

It is urged in behalf of these plans that they follow the bank-note systems of other countries, which have proved successful; but these arguments fail to lay hold of the fundamental differences in principle and environment of the European system of note issues from those under consideration. In the older sections of this country the note issues of banks, as provided for by these plans, would perlaps be so inconsiderable as compared with their general business and deposits as not to interfere materially with the usefulness of the bank in its relation to depositors and borrowers, but, as we have endeavored to show, in the newer sections of the country this would not be the case. The United States covers a vast territory, embracing every variety of climate and natural resources. These natural resources, however, are not evenly distributed, nor is the acquired wealth and banking capital of the country thus distributed.

As compared with England, Germany, France, Russia, Austria, and the older European nations, with their few great state banks and centralized business, which are the product of the evolution of centuries of financial experience and competition, there are in this country more than 3,600 national banks, scattered throughout its vast domain, surrounded by the most differentiated business and natural environments, and dealing with most dissimilar classes of customers and collaterals.

The advantages of our distributed system of banks over the central governmental banks of Europe are such that we can well afford to recognize its disadvantages in connection with proposed currency issues.

In the bank note issues of the older 'European uations, in case of insolvency, the note holders would enjoy no preference over the deposit holders. They would share ratably in the assets. To give the credit which enables the notes of these great banks to circulate, restricted by stringent laws as they are, no injustice to depositors such as is proposed in these plans for the United States, is necessary. In one country only, Canada, are the note holders preferred over the depositors in case of insolvency. The note-issuing banks of Canada are but 38 in number, with a combined circulation of about $\$ 38,000,000$.

We can not accept as safe any deductions drawn from the bank-note system of these few central institutions of eastern Canada, which would tend to justify the application of the laws governing that system to the 3,600 national bauks of this country.

The Comptroller desires to call attention, as a summary of his views upon the proposed plans, to these propositions:

First. As a fundamental proposition, any bank-note system depend-
ing for security upon the commercial assets of banks, and sanctioned by government, should be inherently fair in its relation to the depositholding creditors and the note-holding creditors of an insolvent bank.

Second. No system is inherently fair which creates a preference of the note holder over the deposit holder, in the distribution of the assets of an insolvent bank.

Third. In none of the older countries, to the success of whose uncovered note systems we are referred as tending to justify the experiment in this country, is the note holder by the law preferred over the deposit holder, in case of insolvency of bauks of issue. Canada, with its 38 central bauks of issue, as compared with 3,600 scattered national banks in this country, furnishes the only exception to this rule.

Fourth. The necessity of the preference under any such system in this country, to give security and credit to the notes, demonstrates that it is the depositors of the country, and not the banks, upon whom the great weight of the guarantee of the note issues must fall.

Fifth. A fairer system would provide that, when a receiver took charge of an insolvent bank, he should not first pay into the general redemption fund held by the Government, an amount derived from the assets of the bank sufficient to pay the note holders in full before paying anything to depositors, but he should pay into the fund that pro rata share of the proceeds derived from the assets, which should go to the note holders, not as preferred creditors, but as-creditors in the same class as depositors.

The tax upon the solvent banks for the currency privilege should not then be limited to not exceeding 1 per cent per annum of their annual note issue, or in any other amount, but should be made sufficiently large to provide for the deficit whatever it should prove to be.

Sixth. If under such a system, owing to causes to which we have referred, the tax upon the solvent banks would be so large as to render the issue of such currency unprofitable and unattractive to the banks, it would be a demonstration of the radical difference in the environment and condition of our banking system as compared with the more centralized and older systems of Europe. It would be a demonstration of the fact that, under the proposed legislation, while the banks would take the profits upon the circulation, the depositors would take the bulk of the losses.

It would be a conclusive demonstration of what we believe to be the fact that, uoder our banking system as at present organized, the absolute safety of notes secured only by commercial assets and issued to the extent proposed in these plans, can be secured only by resort to a grave injustice upon depositors, which can not be justified upon any grounds of public policy.

Seventh. Such a system of uncovered notes as this proposed, providing for a preference of the note holders over other creditors, would interfere radically with the more important functions of national banks, to which the note-issuing function is secondary and subordinate.

This would be against public policy, and would operate against banking in the smaller communities, and in the western, southern, and central portions of our country.

Eighth. The Government of the United States is not in such straits, in connection with its present currency system, as to compel it to enter into a plan of currency changes, by which ic in effect sells extended and valuable currency privileges to the national banks of the country, in exchange for assistance from them in meeting its present governmental currency obligations payable in gold.

Ninth. If the present conditions of governmental currency demand reforms, to secure which will entail cost, it is better for the Government, as the representative of all the people, and under all the circumstances connected with our banking system, to pay an ascertained and exact cost direct, than to endeavor to evade it by granting extensive currency privileges to banks, which of necessity wust reimburse themselves from the community and the depositor class for any cost which they incur in assuming the burden of gold redemption, or maintaining the credit of their notes.

The most serious objection which is urged against our present system of bank-note currency, is its inelasticity and inability to respond to the pressing demands and necessity for an increase of circulation in times of enforced liquidation due to a commercial and banking panic.

Under normal business conditions and in normal times, the inelasticity of the present note issues of banks causes but small inconvenience, though at certain seasons of the year, when crops are to be moved, banks in certain sections of the country are compelled to rediscount their paper somewhat to supply the needed currency. The demand, however, is usually readily supplied by the banks of the East, and the growing wealth of the West and South is rapidly bringing about a more even distribution of capital and consequently of currency.

We have at present in this country an enormous volume of what may be called bank-credit currency, based upon the assets of our banks, and consisting of checks, drafts, and bills of exchange. This volume of bank-credit currency expands and contracts in accordance with the demands of trade and business under normal conditions, and is the medium through which the great bulk of the business of our country is transacted.

It is extremely elastic, and varies in amount at different seasons of the year. It is generally amply adequate to the business needs of the country, except in times of disturbed confidence and financial panic.

In France and Germany and other countries, where the check and draft system is not developed as it is here, there exists the greater need for large and elastic bank-note issues. In England, where the check and draft system is so well developed, we find more strict provisions regarding uncovered note issues. The Bank of England issues no notes unsecured either by the deposit of gold bullion or a Government debt. Since the law of 1844 , the other banks of issue of England, Scotland, and Ireland can emit no more uncovered notes than the amount in existence at that time. The right to issue uncovered notes is thus limited, and the combined issues of uncovered notes of the banks of England, Scotland, and Ireland is comparatively small.*

* Fixed issues of the Bank of England and of the other banks of issue in the Onited Kingdom in December, 1897.
[London Bankers' Magazine, January, 1898, page 119.]

|  | Number. | Circulation. |
| :---: | :---: | :---: |

| Total | 86 | 28,968, 181 |

[^7]The enormous growth of the business of England since the enactment of the law of 1844, has developed no such need of uncovered notes as to have brought about a reversal of that restrictive legislation. While in this country, with its extended system of banks and its great development of the check and draft system, some degree of elasticity in banknote issues is desirable, it is not essential that it should be an amount so large as to make necessary for its security an injustice upon the depositor, and thus, by interfering with the check and draft system, defeat one of its own prime objects.

The general principles and regulations under which such elasticity might be obtained, are not in any way inconsistent with the principles and arguments we have endeavored to set forth. As covering these general princjples, and as a conclusion from the views hereinbefore expressed, the Comptroller would make the following recommendations in regard to the present laws governing the issue of national-bank notes:

First. The existing bank-note system, based upon deposit of Government bonds as security, should not now be abandoned.

Second. For the purpose of allowing elasticity to bank-note issues to protect the banks and the community in time of panic, a small amount of uncovered notes, in addition to the secured notes, should be authorized by law under the following limitations: They should be subjected to so heavy a tax that they could not be issued in normal times for the purpose of profit, but would be available in times of emergency. The tax should be so large upon the solvent issuing banks as to provide a fund which, in connection with the pro rata share of the assets of an insolvent bauk, would be sufficient to redeem the notes in full, without necessitating any preference of note holders over depositors of any insolvent issuing bank. The tax should be so large as to force this currency into retirement as soon as the emergency passes.

Such a currency could be used only to lessen the evil effects of the too rapid liquidation of credits which are collapsing under a financial panic, but could not be profitably used as a basis of business speculation and inflation. It should be to the business community what the clearing-house certificates are to our cities in times of panic-a remedy for an emergency, not an instrument of current business.

The tables hereinbefore referred to are as follows:

The cbaracter of the work performed by the national-bank examiners, is most important in its relation to all sections of our country, and to all classes of our people.

For the proper conduct of the work of supervision of our national banks, examiners must be men of the highest personal character, and extended business experience. They should be men who possess some skill in accounting, and at the same time the business judgment to enable them to intelligently pass upon the lines of credit extended by banks under their supervision.

The appointment by the Comptroller to these important positions, of competent and able men, is one of the most sacred duties of his office. To protect by every possible safeguard their independence and disinterestedness, is equally important. With this latter object in view, the Comptroller has forbidden the practice which he found in existence in some of the larger cities, of the employment of the examiners by banks of their district in special examination work for the benefit of the bank, and not for the Comptroller's office. This practice had a tendency to interfere with the rigid impartiality which should characterize the work of a Government official.

During the year the Comptroller has extended over the cities of New York, Boston, Philadelphia, and Baltimore the system of semiannual visitations by examiuers, in force in all other sections of the country. He has utilized, with some benefit, the examiners in investigations into the credit of heavy debtors of banks, where such indebtedness constituted a menace to the safety of the banks, and where, despite the criticisms of the Comptroller aud the efforts of the bank officials, no material reductions in the amount of the indebtedness could be had.

The necessity for such investigation sometimes arises, and whenever they have been made, the result has been most beneficial.

The verification, by more extended investigation than is possible in the ordinary examination of a bank, of the ex parte statements of interested officials, as to the safety of large, permanent, and unreducible loans, sometimes becomes of vital importance in determining the course of the Comptroller in closing a bank or allowing it to remain open.

For the purposes of this work be recommends an increase in the annual fund provided for examinations of bank-note plates, and for compensation of examiners engaged in special examinations, of $\$ 2,000$, making the fuid $\$ 3,000$ instead of $\$ 1,000$, as at present.

## limitation of loans.

One of the most important reforms needed in the present national banking law, is a proper provision limiting the amount which can be loaned to any one individual or corporation, in order to insure a general distribution of loans, and to prevent an improper concentration of a bank's funds in the hands of a few borrowers. The provision of the present national banking law designed to carry into effect this important priuciple is as follows:

[^8]in. But the discount of bills of exchange drawn in good faith against actually existing valnes, and the disconnt of commercial or business paper actually owned by the person negotiating the same, shall not be considered as money borrowed.
Almost as if in admission of the fact that this provision is unscientific, and ill adapted to carry into practical effect the great priuciples of protection to depositors and shareholders, subserved by generally distributed and safe loans, the present law provides no specific penalty against individuals which the Comptroller can apply for violations of this section in the making of excessive loans, where such violations do not affect the solvency of the bank, nor justify the appointment of a receiver.
A United States court, under the general provision of the law providing for the forfeiture of the franchises of a bank for any violations of the banking act, might adjudicate the question of fact as to such violations, but could apply no other remedy than forfeiture of franchise.
Since the institution of the national banking system the violation of this provision has been common; and the Comptroller, though allowing no known violation to escape his written protest, tinds great practical difficulty in his endeavors to enforce this requirement.

On September 20,1898 , the date of the last call by the Comptroller for statements of condition of national banks, 1,124 banks, constituting nearly one-third of the entire number of banks in the system, reported loans in excess of the limit allowed by section 5200, Revised Statutes of the United States.
The principles underlying the present provision of the law, are as valuable to depositors and shareholders in their application to the banks of the larger communities, as to the banks of the smaller communities; but the observance of this provision, while not interfering with the current requirements of either the banks or the public in smaller communities, , roves an almost insurmountable obstruction to the business of our larger cities.
The present need is for an amendment to this provision, which, while compelling, under penalties, the safe and proper distribution of loans of larger banks, will enable them to loan more nearly the same per cent of their total assets which the present provision allows to small banks. In this way the officers of larger banks cau supply the proper needs of the larger communities without disregarding the law, and the Comptroller can hold them under persoual penalty to strict observance of the amended law, which when disregarded would indicate improper distribution of loans, something which infractions of the present provisions in the case of many banks do not uecessarily indicate.
The greater ratio borne by banking resources to banking capital in the larger communities, as compared with the like ratio in smaller communities, is responsible for the defective and unequal working of the present provision.
The average ratio of resources to the average capital of the 47 national banks in the city of New York is as 18 is to 1 ; of the 17 national banks in Chicago as 10.2 is to 1 ; of the 6 national banks in St. Louis as 7.3 is to 1 ; of the 257 national banks in other reserve cities as 6.6 is to 1 ; while in 3,255 country banks the ratio is but as 4.7 is to 1 .
The law limiting loans to 10 per cent of the capital, when applied to the 3,255 banks of the smaller communities of the country, as a whole would allow the loaning of 2.14 per cent of their total assets to one individual. As compared with this, the banks of the city of New York, on the average, could not loan over fifty-six one-hundredths of 1 per cent
of their total assets to any one individual; the banks of Chicago not over ninety-eight one-hundredths per cent of their total assets; the banks of St. Louis not over 1.4 per cent of their total assets; the banks of other reserve cities not over 1.51 per cent of their total assets.
In other words, the proportion of their assets which the country banks of the United States can loan, in strict compliance with section 5200 , to one individual, is sixty-three one-hundredths of 1 per cent greater than in 257 reserve cities, seventy-four one-hundredths of 1 per cent greater than in St. Louis, over twice as great as in Clicago, and nearly fourtimes as great as in the city of New York.
This provision as it stands at present constitutes an incentive to the making of loans the larger in proportion to the total assets of banks in smaller communities, where, as a rule, large loans which are safe, are the most difficult to secure; while in the larger business centers of the country, where cominercial conditions create a certain demand both from banks and borrowers for large and safe loans, its effect is the reverse to such an extent as to be injurious.

A bank with smaller loans, is not necessarily a bank with the more distributed and safe loans. A bank with $\$ 100,000$ capital and $\$ 100,000$ deposits, the latter being loaned in the maximum amounts allowed by the present provision (to wit, to 10 individuals at $\$ 10,000$ each) has not as well-distributed loans as a bank of $\$ 1,000,000$ capital and $\$ 5,000,000$ deposits, the latter loaned to 50 people at the maximum of $\$ 100,000$ each. In the former case the loans are distributed among only 10 people and in the latter case among 50 people, and yet in each case there is strict compliance with the 10 per cent restriction.

One of the objects evidently designed to be subserved by the present provision of the law, was the protection of the capital of a bank, as distinguisbed from other assets of the bank.

The framers of the section undoubtedly considered the capital of a bank as a greater safeguard for the depositors against loss, when not over one-tenth part of it was loaned to a single individual or corporation without security. They recognized the fact, however, that when outside security was had for loans, the capital did not need for its protection the 10 per cent restriction; and they provided accordingly for the exemption from the restriction of a certain class of secured loans, as follows:

[^9]In the modification of section 5200, which we will recommend, we invoke the same principle of outside security for the protection of the capital against loss upon loans exceeding the 10 per cent limit.

The size of a loan is of itself, no indication either of its strength or weakness. If the size of a loan is not such as to be an undue concentration of the assets of a banking institution in the hands of one individual or corporation, thus depriving its creditors and shareholders of the safety of the law of average, it is not wise, either upon economic grounds or upon grounds of public policy, to forbid it by law.

If, however, the size of a loan is such as to cause such undue concentration, its prevention is justifiable on both grounds.

Recognizing these truths, it is the easier to understand why in many instances a strict compliance with this provision of the law (sec. 5200 , R. S. U. S.) is consistent with all the needs of the current business of a small community and a proper protection to both banks and the
public, yet in some larger communities it seriously interferes with the business requirements of both the banks and the public, and adds in no way to the safety of the depositor.
The limit of the amount of single loans to an arbitrary percentage of either the capital, or the sum of the capital and surplus of a bank, does not insure a general or proper distribution of loans in all cases. Since, as stated before, the size of a loan is not, per se, related to its satety, the more important proportion to consider, when endeavoring to regulate the distribution of loans by law, is that of the amount of the loan to the total assets, rather than that of the loan to the amount of the capital.

Grounds of public policy suggest as advisable the largest liberty in loans, not inconsistent with the absolute safety of the depositor.

The babitual disregard of the present provision by the officers of so many banks, interferes with the proper supervision of the banks by the Comptroller, and tends to create indifference to the other restrictions of the national banking law.

The failure of the present law to provide the power to apply a personal penalty for the making of excessive loans, sometimes embarrasses the Comptroller in endeavoring to check tendencies toward recklessness in loaning, which point to the ultimate ruin of a banking institution.

As before stated the present provision, when properly altered, should allow the banks of larger communities to have more nearly the privilege of loaning a given per cent of their total assets to one individual, which now belongs, under a strict compliance with the present provision, to the banks of the smaller communities. From this privilege they are now debarred by law.

The desired results can be obtained, in our judgment, by adding, after the words, in section 5200 , "shall at no time exceed one tenth part of the amount of the capital stock of such association actually paid in" the following words:

Provided, That the restriction of this section as to the amount of total liabilities to any association, of any person, or of any company, corporation, or firm for money borrowed, shall not apply where a loan in excess of one-tenth part of the capital stock shall be less than two per cent of the total assets of said bank at the time of making said loan. Said loan shall be at all times protected by collateral security eqnal to or greater in value than the excess in the amount of said loan over one-tenth of the capital stock.

A strict and personal penalty enforceable by the Comptroller, sbould then $b \in$ provided for infractions of the amended section by the officers of banks, to enable the Comptroller to successfully enforce general and strict compliance with its terms.

The suggested amendment will make section 5200 just and equitable in its relation to all national banks, and to all communities of our country, large and small, which it is not at present.

It would not lessen the amount which the smaller banks can now loan in compliance with the section as it stands at present. At the same time it would not allow. the larger banks to loan to any one individual or corporation more than 10 per cent of their capital, unless such loan, in addition to being secured for the excess, would still amount to a less per cent of their total assets, than the per cent of total assets which the smaller banks can now loan under the section as it stands at preseut.

Section 5200 thus amended will not interfere, as at present, with the right of the bauks in the larger communities to meet the legitimate requirements of business in these commercial centers. It will enable
the Comptroller, by its onforcement, to prevent an undue concentration of loans and conserve their general distribution.

Under the section thas amended, the capital of a bank will be protected, inasmuch as no loan in excess of the 10 per cent limit can then be made, except upon proper collateral security.

The penalty clause will enable the Comptroller not only to limit the size, but to enforce the securing of excessive loans.

The following table shows the inequality of the present law in its practical effects upon the banks of larger and smaller communities, so far as the possible distribution of loans is concerned:

| Banksin- | Nunber of banks July 14, - 1898. | Average resources. | Average capital. | Maximum average loan 10 per cent of capital. | Ratio of average resonrces to average capital. | Average maximum loan to average resources now allowed by sec. 5200. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| New York City | 47 | \$18, 598, 379 | \$1, 036, 170 | \$103, 617 | 18 to l | ${ }^{5} \mathrm{f}$ \% of 1 per cent. |
| Chicago.. | 17 | 11, 632, 219 | $1,144,118$ | 114, 411 | 10.2 to 1 | ${ }^{1,808}$ of 1 per cent. |
| St. Louis | 6 | 10, 257, 586 | 1, 400, 000 | 140, 000 | 7.3 to 1 | 1. 4 per cent. |
| All central reserve cities $\qquad$ | 70 | 16, 191, 676 | 1,093, 571 | 109,357 | 14.8 to 1 | ${ }^{\frac{8}{70} 7}$ of 1 per cent. |
| Other reserve cities.. | 257 | 3, 909, 561 | - 591, 343 | 50, 134 | 6.6 to 1 | 1.51 per cent. |
| Country banks .. | 3, 255 | 565, 130 | 120,888 | 12,088 | 4.7 to 1 | 2. 14 per cent. |
| United States.. | 3,582 | 1, 110, 462 | 173,650 | 17,365 | 6.4 to 1 | 1.56 per cent. |

For the purpose of ascertaining the general result of the suggested amendment to section 5200 , U. S. R. S., an examination has been made of the reports of condition of the national bauks of date July 14, 1898, and examiners' reports for approximate dates nearest thereto. In the following table is set forth the number of banks in reserved cities named, total loans outstanding November 1, loans in excess of the legal limit, loans which would be excessive if allowed to the limit of 2 per cent of the total resources, and number of banks in which loans equaling 10 per cent of their capital would be greater than 2 per cent of total assets, the loaning power of which the proposed limit would not increase. The table also shows similar information relative to one hundred banks selected at raudom from various sections of the country.

| Citios. | Number of banks. | Total num ber of loans ontstand. ing Nov. 1, 1898. | Number of excessive loans under section 5200. | Number of loans in excess of the proposed 2 per cent limit. | Number of banks irr which loans equaling 10 per cent of their capital would be greater than 2 per cent of total assets, the loaning power of which the proposed limit would not increase. |

## INSOLVENT BANKS.

The Comptroller of the Currency is charged with general responsibility for the proper liquidation and distribution of the assets of the insolvent banks of the country, in the hands of receivers appointed by him.

At present the assets of insolvent national banks of the country under his direction, are of the nominal value of $\$ 48,000,000$.

The decision of questions which are daily submitted by different receivers as to the proper disposition of these assets, scattered as they are throughout every section of the country, and consisting of the most diversified kinds of property, constitute a most exacting and often perplexing part of the general duties of the office.

During the past year efforts have been made to cut down the expenses of receiverships, and hasten the final liquidation of the trusts. An annual saving approximating $\$ 100,000$ has been effected by the reduction of the salaries of receivers and attorneys, to correspond with the gradually lessening assets consequent upon the progress of liquidation, and by the consolidation of various receiverships in the hands of fewer receivers.

Including the receivers appointed to take charge of banks which have failed during the year, the total number of receivers now at work is 113 , a reduction of 14 since the last report of this office was issued.

The books and remaining personal assets of eleven receiverships have been removed to Washington, and are managed by one receiver and two assistants, thus dispensing with ten receivers and five clerks, and resulting in other economies. These latter receiverships were of banks in the last stages of liquidation, with slow assets, of a nature which would iuvolve serious loss at forced sale, or which were involved in unfinished litigation. Eight other receiverships are in process of removal to this office, which will result in dispensing with nineteen receivers in all.

With some marked exceptions, the experience of the office shows that the indifference of local receivers to the demands of the business of their trusts, has a tendency to grow, as the assets of the trust and their compensation diminist; and the results of the policy of consolidations of trusts has thus fur amply justified the steps taken.

RULING AS TO SEOOND ASSESSMEN'IS UPON STOCKHOLDERS AND REBATE TO STOCKHOLDERS IN CASE OF INCOKRECT ASSESSMENTS.

The practice of this office heretofore has been whell an assessment upon stockbolders is once decided upon as the proper one to cover a deficiency in the assets of an insolvent bank and to reimburse depositors, to regard such levy as irrevocable and unchangeable, notwithstanding further developments in the administration of a trust may demonstrate error in the assessment.

This practice the Comptroller has found in many cases, to be inconsistent with the exact fulfillment of the law.

If au ordinary trustee, representing two parties to a settlement, is charged with the collection of a debt for one trom the other, and after collecting the amount which he believed to be due, discovers afterwards that he has only collected half the amount really due, it is his unquestionable duty to proceed once more to collect the unpaid balance. Iu like manner, if such a trustee collects what he considers the amount of the debt, and discovers afterwards that he has collected twice the amount actually due, it is his unquestionable duty to return the half of the amount unjustly collected, to the wronged party. No trustee, upon the discovery of his mistake in either instance, would be justified in claiming that his first action was final, and that he owed no further duty to the parties involved.

The Comptroller, therefore, acting as trustee for the proper protection of the interests involved, can not rightfully refrain from making second assessments against stockholders, where the first assessment was too small, or refuse to return to stockholders a portion of their paid assessments, when they were made in the first instauce, through error, in an amount larger than that allowed by law.

An assessment is made against the stockholders of an insolvent bank to cover the difference between the claims against it, and the value of its assets.

When the assessment is made after all the assets have been disposed of, there is little likelihood of mistake by the Comptroller and the receiver in the fixing of the amount; but when the assessment is made prior to the final liquidation of the assets, as is generally the case, it is based upon the difference between the claims, and the amount which the Comptroller and the receiver estimate as the cask value of the assets, after deducting allowances for contingencies and expenses.

The diversified nature, location, and condition of the assets of insol-
vent banks is such, that some errors in tlie appraisement of the Comp.troller and receiver are inevitable aud unavoidable. These errors if they exist are of course developed by the final liquidation of the trust. If the final liquidation develops that the total deficiency is so large that it would not have been covered by a fully paid assessment of 100 per cent upon the stockholders, and a 100 per cent assessment had already been declared, a former error in the estimate of the value of the assets would of course be immaterial; but, if the former assessment had been for a less amount than the 100 per cent, it is the Comptroller's plain duty as trustee in the interest of the creditors, for the collection of the legal liabilities of tbe stockholders, to make a second assessment for an amount which, with the former assessment, would equal the full stockholders' liability, to wit, 100 per cent.

And thus, with any other error in deficient assessments, a second assessment should be made to cover the difference between the deficiency as estimated, and the deficiency as developed by final liquidation.

In like manuer, when the estimate of the deficiency upon which the assessment was based proves to be too large, it is evident that the Comptroller has collected from the stockholders a greater sum than that which the law gives him authority to collect, and it is his duty to return the excess to the contributing stockholders.

There can be no reasonable dissent from these propositions. In their practical application it will sometimes happen that a return of an illegally collected excess will be made to stockholders, and at the same time the creditors of the same bank will not have been paid in full.

This arises from the fact that the Comptroller can assess against each stockholder under the law, only that proportion of the total deficit which his stock bears to the total stock, irrespective of whether or not, through the insolvency of some of the stockholders, a portion of the total deficit for which the assessment is made is uncollectible.

There are at present in the Comptroller's hands eight insolvent banks where a revision of the former assessment is necessary. In three of these a second assessment against stockholders, in the interest of depositors, has been made, and in five cases a rebate in assessments collected will be returned to stockholders.

The Comptroller reproduces here a portion of holding of the United States Supreme Court and the original ruling made by the Comptroller thereunder, May 5, 1898, as more fully explaining the principles and methods involved:

In the case of the United States $v$. Knox (102 U. S., 425), the court uses the following language in outlining the process to be pursued in fixing the separate liability of the shareholders:
"In the process to be pursued to fix the amount of the separate liability of each of the shareholders, it is necessary to ascertain (1) the whole amount of the par value of all the stock held by all the shareholders; (2) the amount of the deficit to be paid after exhausting all the assets of the bank; (3) then to apply the rule that each shareholder shall contribute such sum as will bear the same proportion to the whole amount of the deficit as his stock bears to the whole amount of the capital stock of the bank at its par value. There is a limitation of this liability. It can not in the aggregate exceed the entire amount of the par value of all the stock.
"The insolvency of one stockholder, or his leing beyond the jurisdiction of the court, does not in any wise affect the liability of another; and if the bank itself, in such case, holds any of its stock, it is regarded in all respects as if such stock were in the hands of a natural person, and the extent of the several liability of the other stockholders is compnted accordiugly." (Crease v. Babcock, 10 Metc. (Mass.), 525.)
The court further says: "Although assessments made by the Comptroller under the circumstances of the first assessment in this case, and all other assessments, successive or otberwise, not exceeding the par value of all the stock of the bank, are coniclusive upon the stockholders, yet if he were to attempt to enforce one made clearly
and palpably contrary to the views we have expressed, it can not be doubted that a court of equity, if its aid were invoked, would probably restrain lim by injunction."
The Supreme Court of the United States haviug thus determined the basis upon which, under the law, the Comptroller fixes the amount of the assessment to be levied against the shareholders of an insolvent bank, no other course is proper than a reconsideration of the question of the amount of the deficiency when the matter is brought before him upon complaint of either depositors or stockholders, or where an error becomes manifest to him in the course of the further administration of the trust.
The position of the Comptroller in his relations to the stockbolders, is that of a trustee for the collection, in the interest of the creditors, of all the legal liabilities of the stockholders under the statute, and as further defined by the courts.
In pursuance of this duty as trustee, when upon further administration of the trust an error in a former assessment is demonstrated in estimating the deficiency in the assets of the trust at too small an amount, it will become the duty of the Comptroller to review the former action, and, if necessary, to levy an additional assessment upon the stockholders of tre insolveut bank, for the purpose of collecting from each stockholder that proportion of the difference between the estimated and the actual deficiency which the stock of the individual stockholder bears to the total stock of the bank.

If, in the endeavor to enforce such liability through an error as to the exact deficiency, there is collected a greater amount from the shareholders than that for which they are legally liable, the Comptroller then becomes trustee for the stockholders who have paid such excess, charged with the return of said excess to the contributing stockholders in the proportion in which they have paid their original assessment to him. The determination of the amount to be returned to such stockholders must necessarily be deferred until the final closing of the trust, an amount being reserved at all times in the hands of the Comptroller sufficient to afford full protection to said contributing shareholders against any contingency of change in the amount collected from the assets, over the estimated value of assets at the time of the assessment.
The following illustrations taken from the records of the office show the application of the ruling:
In the case of the El Paso National Bauk, El Paso, Tex., an assessment of $3 \bar{\jmath}$ per cent on the $\$ 150,000$ of capital stock was levied December 26, 1894. After all the assets had been liquidated it appeared that if the whole amount of the assessment, $\$ 52,500$, had been collected, a deficiency of $\$ 28,500$ still existed, for which the shareholders were liable, and on May 6,1898 , an accounting having been made by the receiver, the individual liability of the shareholders was further enforced by an assessment of 19 per cent on the capital stock.

The process of ascertaining the deficiency is exemplified in the following statement of the liabilities and resources of the bank:

## LIABILITIES.

31, 876. 62
Interest at 6 per cent from date of suspension to December 31, 1898:
$\qquad$On \$2,914. 46 liabilities not proved.......................................... 881.62

Estimated expenses to date of final closing, December 31, 1898.
2,000.00
Total liabilities
$354,015.00$

## RESOURCES.

Or by the following statement of the liabilities and resources, the same result is obtained:

## LIABILITIES.

In the case of one national bank, in which an assessment of 70 per cent had been levied upon its capital stock of $\$ 60,000$, it has been ascertained that an assessment of 32 per cent, if paid in full, would have been sufficient in connection with the collections from the assets, to pay its liabilities, and that $\$ 6,856$ of the amount collected from the shareholders in excess of the amount that would have beeu payable on the basis of an assessment at the latter rate, is returnable to them in the following proportions, numbers being used to indicate the shareholders who have paid the assessment of 70 per cent in whole or in part.

All assets of the bauk having been liquidated, the amount for which the shareholders should have been assessed to meet the deficiency was $\$ 19,200$, instead of $\$ 42,000$, as will appear from the following statement of its liabilities and assets:

## LIABILITIES.

ASSETS.

Deficiency of assets
$19,200.00$

| Assessment, 32 per cent, on \$60,000 capital stock. | \$19, 200 |  |
| :---: | :---: | :---: |
| Assessment, 70 per cent, on $\$ 60,000$ capital stock. | 42,000 |  |
| Excess over amount of actual deficiency | 22,800 |  |
| Amount collected on 70 per cent assessment |  |  |
| Proportionate amount that would have been collected on 32 per cent |  | $10,04.0 .00$ |

## DOMESTIC BRANCH BANKING.

- The Comptroller recommends, in accordance with former recommendations of his predecessor, that domestic branch banking should be legalized in communities of less than 2,000 inhabitants, many of which are now unable to support independent banks. This would afford some smaller communities banking privileges which are now without them, but would not materially interfere with the scope of the work now so well performed by the existing banks of the smaller communities.

The main arguments which are advanced in favor of the granting of more liberal privileges of branch banking than this, are based largely upon the theory that with branch banking allowed in all communities, irrespective of size, more uniform interest rates would prevail throughout the country, and the flow of capital to points of scarcity would be facilitated.

Such privileges would place the larger banks of the great cities in competition with the banks of smaller communities, and would probably result in a rapid centralization of the banking business of the country in the hands of a constantly lessening number of institutions. Theoretical advantages are claimed for such results, but in our judgment they would be injurious to the best interests of our country.

Such a system would increase the difficulties in the way of the small borrower, though lessening them for the large borrower. It wonld tend to separate the borrower from the lender, as it would of necessity remove the central lending power from the small borrowers of small. communities.

It may be claimed that the agents in charge of the branch banks would possess the same powers of loaning as the officers of the smaller banks now possess; but such arguments ignore the prevailing tendencies of modern corporate management which magnify of necessity central responsibility, and constantly tend to subordinate to rigid systems, the activities and responsibilities of agents upon detached duty.

The opportunities for individual attention and accommodations to bank customers of limited business, are now well subserved by competing smaller banks. Interest rates are not alone dependent upon local money supply; they also depend upon the risk of loss assumed in loaning. Branch banks in newer communities would not assume unusual risks, without unusual rates. The facilities now afforded by the 3,600 national banks of the country for the movement of capital toward points of scarcity are such that any new system would probably not result in great changes in the general rates of interest. But when the economic tendencies adverse to business individualism involved in unlinited domestic branch banking are considered, the question of interest rates becomes secondary.

## FOREIGN AND COLONIAL BRANCH BANKING.

In the matter of foreign and colonial branch banking, however, different considerations, arising from different conditions, present themselves.

The subject of the legistation which should be provided by Congress for the regulation of the domestic banking of the new colonies of the United States, and for the defining and regulation of the banking relations between these colonies and the United States, is one of greatest importance at this juncture of our national and commercial career. This legislation is not only nost essential to the welfare of the people of the new territories, but to the people of the United States as well.

The foundation for the greater growth of trade between the United States and her colonies must be speedily and firmly laid in proper bauking laws, which will result in enabling her merchants to do business with the people of the colonies without the disadvantages existing at present.

The lamentable lack of proper international banking facilities, under which the merchants of the United States have so long labored, has now become a serious hindrance to the speedy adjustment of our trade relations to the new advantages afforded by territorial expansion. For years before the outbreak of the war with Spain the necessity of providing proper banking facilities for our trade with South American - countries, had been recognized and widely proclaimed by the business interests of the country.

These facilities are now not only more important than formerly to our business interests, but at present governmental, as well as trade necessities, demand legislation.

In April, 1890, the International American Congress, held at Washington, discussed the needs of better banking facilities between the American republics, and made recommendations in connection therewith which received the indorsement of President Harrison and Mr. Blaine, the Secretary of State.

In furtherance of this object several bills have been favorably reported from the Committee on Banking and Currency of the House. As yet, however, these efforts, made in the interest of trade stimulation, have not resulted in the enactment of law.

Our present national banking laws do not autlorize the establishment of American international or American intercolonial banks, nor could any national bank establish a branch in a territory or colony such as Porto Rico or Hawai, even if our present laws unchanged were extended over it.

While it is questionable whether Congress should legalize the establishing of foreign or colonial branches by national banks transacting business under the present law, that it should at least pass laws authorizing, under proper restrictions, the general incorporation of banks organized to carry on interuational and intercolonial banking, as distiuguisbed from domestic bankiug, admits of no reasonable donbt.

Unless some such legislation is provided, the American exporter and importer, in his trade with America's own colonies, ©will be compelled to endure all the disadvantages under which, in all Sonth American markets, and in many otber markets of the world, he now labors in his competition with foreigners enjoying superior banking facilities.

When, by means of international banks and their branches, the proper banking facilities are afforded those engaged in foreign trade, they transact their business with these banks in much the same manner as the domestic shippers of the United States transact business with our present banks.

The American, in his South American trade, as compared with the foreigner in the same line of business, is subjected to the same relative disadvantages as are experienced by a domestic shipper without banking facilities, as compared with another who possesses them.

Domestic dealers in supplies, in good credit, may make contracts with domestic wholesale purchasers in good credit, for the sale and shipment of goods, for which the consignee gives his acceptance, payable at different intervals, sometimes months after the delivery to him of the shipment.

The consignor discounts this accepted draft given him for the goods, with his bant, thus receiving bis capital at once for reinvestment, and enabling him to transact a larger business than if the capital invested in the goods was locked up until the maturity of the acceptance. On the other hand, the consignee has the difference between the time of the arrival of the sbipment, and the maturity of the draft, to sell the goods, and to collect from the purchaser all or a portion of the amount necessary to pay the draft.

The situation of the slipper without banking facilities is in sharp contrast. He must ordinarily sell for casl, instead of on credit, to the consignee, as be needs his capital in most cases for immediate reinvestment. As a result, in his competition with his more favored rivals, he is not only compelled to accept lower prices, involving smaller margins of profit, but he must do a smaller business on the same capital invested.

Thus, as compared with the English exporter, who, when his goods are shipped, can receive advances from an English international bank upon the credit of his bills of lading and of the foreigu consiguce, concerning whose credit the home bank, through its foreign branch, is well advised, the American shipper, in the majority of instances, is denied such privileges, and must await entire, instead of partial, reimbursement until the arrival of the goods at the foreign market, and the collection of the draft for the purchase price made at the time of shipment.

In addition to this disadvantage, the Auerican exporter and inuporter in his trade with South American countries, transacts all his business of consequeuce through English banks in terms of English money, paying the rates of exchange fixed by these foreigu institutions.

The foreign branches of American international and iutercolonial banks would obviate many of these difficulties, and would become themselves valuable mediums of introduction of American enterprise into colonial and foreign fields.

The present situation of trade and finance in Porto Rico, is deplorable.
Credit in business is sparingly used, and under most primitive and exacting conditions. While some lines of credit through foreign connections are extended to those engaged in the import and export buisiness, no credits of consequence are extended to this class of trade by Porto Rican banks. The primitive conditions and disadvantages under which business has heretofore been trausacted in Porto Rico, have prevented the establishment of Porto Rican branches by foreign banks, and under the new era the American banker in entering this field, will not have the competition of a long established branch bank business, such as exists in most South American countries. That this will prove to be an advantage to A merican interests from one standpoint, admits of little doubt, provided that new banking laws are framed by Congress authorizing the establishment of internatioual and intercolonial banks, which can perform those numerous and indispensable offices in the facilitation and extension of business between the States and colonies, which domestic banks now perform in the interest of business between the citizens of the States themselves.

The present banking business in connection with American trade in Porto Rico, is done mainly through one house with a New Yoric branch.

This tirm of bankers has as agents various commercial houses ip different parts of Porto Rico.

Commission merchants are now transacting almost the entire business of this country with Porto Rico. They represent the merchants of the island, and secure or furnish them credit, receiving commissions for their services.

Thus the credits granted in connection with the export and import business of the island, are almost wholly by commission men.

With proper banking facilities, and after the final establishment of a fixed rate of exchange between the present Porto Rican coin and our own money, this country should control almost the entire trade of all kinds in the island.

Tbe determination of the relation of any new banking system, to the existing banks and domestic credits of Porto Rico, differing as they do from those of this conntry, involves many difficult questions; and legal provision for the appointment of a commission, especially charged with the examination of the conditions of domestic banking and fiuance on the islands, and with the recommendation of the proper form of laws in connection therewith, is respectfully urged upon Congress.

In Hawaii business conditions are far different. The four commercial banks of Honolulu have adopted largely American methods; and the customs of general business are now American to such an extent that the present national banking act might well be extended over the island, so far as its domestic banking is concerned.

While the present banks, with their correspondents in the United States, now provide reasonably well the exchange and other credits necessary to accommodate the business between the island and the United States, the establishment of intercolonial banks under new laws of Congress, would probably be found of advantage to existing trade relations.

In view of the conditions and necessities of our trade with our new Territories of Porto Rico and Hawaii, and with other South American

```
FI 98-15
```

countries, as well as with those other territories over which our country must exercise a more or less extended measure of control, the Comptroller earnestly recommends the passage of laws anthorizing the incorporation of banks, organized for the purpose of carrying ou international and intercolonial branch banking.

## OlfGANIZATION OF NATIONAL BANKS.

From the date of the granting of the first certificate of authority, June 20, 1863, to the end of the year covered by this report, there have been 5,151 national banking associations organized-an average for each year of 147. On October 31, 1898, there were in active operation 3,598 banks, having an aggregate anthorized capital stock of $\$ 624,552,195$. The total outstanding circulation amounted to $\$ 239,546,281$, of which $\$ 210,045,456$ was secured by United States bouds, and the remainder, $\$ 29,500,825$, by lawful money deposited with the Treasurer of the United States for account of liquidating and insolvent national banking associations and those reducing circulation. The increase during the year in the amount of circulation secured by bonds was $\$ 6,119,776$, and the increase in total circulation, including the notes of liquidating and insolvent national banking associations and those reducing circulation, $\$ 9,582,771$.

The following table shows the amount and kind of bonds on deposit as security for circulating notes on October 31, 1897, and October 31, 1898:

| Class. | 1898. | 1897. | Change. |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  | Increase. | Decrease. |
| Pacifio sixes. | \$2, 906, 000 | \$9, 030, 000 |  | \$6, 124, 000 |
| Tives. | 16, 231, 900 | 15,910, 650 | \$321, 250 |  |
| Fours (1907) | 139, 436, 050 | 150, 288, 100 |  | 10, 852, 050 |
| Fours (1895) | 23, 990, 650 | 30, 474, 150 |  | 6, 483, 500 |
| Twos....... | 22, 047, 750 | 22, 039, 650 | 8, 100 |  |
| Threes | 31, 006, 120 |  | 31, 006, 120 |  |
| Total | 235, 618,470 | 227, 742, 550 | *31, 335, 470 | 23, 459, 550 |

* Nelincrease, $\$ 7,875,920$.

The number and capital of the 3,598 banks in operation on October 31, 1898 , in each geographical division are as follows: Five hundred and eighty-two banks, with capital stock of $\$ 155,231,620$, in the New England States; 961 banks, with capital stock of $\$ 193,887,122$, in the Eastern States; 539 banks, with capital stock of $\$ 64,788,200$, in the Soutbern States; 1,045 banks, with capital stock of $\$ 158,653,100$, in the Middle States; 348 banks, with capital stock of $\$ 31,699,100$, in the Western States, and 123 banks, with capital stock of $\$ 20,065,000$, in the Pacific States.

In point of number of banks in active operation, Pennsylvania, New York, Massachnsetts, Ohio, Illinois, and Texas lead with 428, 327, 262, 254, 219, and 197, respectively, According to capital stock, Massachusetts is first, with $\$ 91,627,500$, New York second, with $\$ 82,944,940$, Pennsylvania third, with $\$ 73,359,390$, followed by Ohio, with $\$ 45,535,967$, Illinois, with $\$ 36,746,000$, and Texas, with $\$ 19,515,000$.

During the report year there were organized 56 banks located in 20 States and 2 Territories, with aggregate capital stock of $\$ 9,665,000$. Of this number, 8 were in Peunsylvania, 7 in Ohio, 6 in Iowa, 5 in Illinois, 4 each in New York and Texas, 3 in Indian Territory, 2 each in Cali:
fornia, Kansas, Missouri, and New Jersey, and 1 each in Alaska, Nelaware, Indiana, Kentucky, Maryland, New Hampshire, North Carolina, South Carolina, Virginia, Wisconsin, and Oklahoma Territory.

In geographical divisions the number of banks organized during the year was as follows: New England States, 1 , with capital stock $\$ 50,000$; Eastern States, 16, with aggregate capital, $\$ 1,185,000$; Southern States, 8, combined capital, $\$ 620,000$; MiddleStates, 22 , total capital, $\$ 3,960,000$; Western States, 6, capital aggregating $\$ 300,000$, and Pacific States, 3, capital, $\$ 3,550,000$. California is first in amount of capital stock of banks organized during the year, having $\$ 3,500,000$; lllinois has $\$ 2,250,000$; New York, $\$ 525,000$, and Indiana, $\$ 500,000$, the total capital of banks in each of the other States ranging from $\$ 460,000$ down to $\$ 50,000$.

The corporate existence of 20 national banking associations having. capital stock of $\$ 2,145,000$, total circulation $\$ 844,875$, and located im twelve States, has been extended during the year as follows: New York 5, Pennsylvania 3, Illinois and Massachusetts 2 each, and the following 1 each: Delaware, District of Columbia, Indiana, Kentucky, North Dakota, South Dakota, Vermont, and Washington. Of the total capital, New York aggregates $\$ 585,000$, Massachusetts $\$ 350,000$, Pennsylvania $\$ 210,000$, Illinois and North Dakota $\$ 150,000$ each, and Delaware, District of Columbia, Indiana, Kentucky, South Dakota, Vermont, and Washington $\$ 100,000$ each. Under the act of Congress approved July 12, 1882 , providing for the extension of national banking associations, the corporate existence of 1,670 banks, having an aggregate capital stock of $\$ 407,531,115$, has been extended. Of these, New York has 244, Massachusetts 231, Pennsylvania 208, Ohio 114. The number of banks in each of the other States ranges from 75 down.

By reason of the expiration of corporate existence, three banks, having an aggregate capital stock of $\$ 534,000$ and total circulation of $\$ 165,000$, left the system during the year. They were located in Illinois, Kentucky, and Pennsylvania. Those in the last two States were succeeded by new associations with capital stock of $\$ 250,000$ and circulation amounting to $\$ 67,500$.

During the coming report year, viz, that closing October 31, 1899, the corporate existence of 22 associations, with capital stock aggregating $\$ 3,155,000$ and circulation $\$ 1,397,250$, will expire. These banks are distributed among the States as follows: Massachusetts, New York, and Pennsylvania, 3 each; and 1 each in California, Connecticut, Illinois, Indiana, Iowa, Kentucky, Maryland, Missouri, New Mexico, North Carolina, North Dakota, Ohio, and Vermont. In the ten years from 1899 to 1908 , inclusive, the corporate existence of 1,134 banking associations, with capital stock amounting to $\$ 162,418,150$ and circulation $\$ 44,293,753$, will expire by limitation.

The number of banks leaving the system during the past year by voluntary liquidation was 69 , one of which subsequently passed into the hands of a receiver. The 68 banks which liquidated had a total capital stock of $\$ 12,509,000$, and circulation amounting to $\$ 2,184,958$.

## LIqUIDATIONS, DIVIDENDS, ETC.

In the Midsummer of 1893 the capital stock of national banks reached the maximum, $\$ 699,034,665$. Since that date 223 banks have been organized with an aggregate capital of $\$ 27,505,000$, and 100 have increased their stock in the sum of $\$ 8,612,000$. In the same period, by failures, reductions of capital stock, aud voluntary liquidations,
$\$ 110,599,490$ has been eliminated, leaving $\$ 624,552,195$ on October 31 , 1898. While 316 banks, with capital of $\$ 43,991,100$, liquidated voluntarily, 25 per cent of the number, as shown by the records of this office, were consolidated with other associations. These liquidations and reductions of stock were the inevitable results of constantly decreasing dividends. During the year ended March 1, 1893, the average rate of dividends paid to the shareholders of national banks was 7.5 per cent; in the following year, 6.8 per cent; in 1897, 6.7 per cent; and in 1898, 6.96 per cent. The competition for deposits has developed the very general custom of paying high rates of interest thereon. The prevailing low rates of interest on loans and discounts have also lessened the returns to stockholders.

For the year ended June 30, 1898, the tax on national-bank circulation was $\$ 1,901,817$, and the total amount paid to the Government as tax on the circulating notes, $\$ 83,313,202.25$.

## duration of national.bank circulation.

In 1886 the Comptroller, in his annual report to Congress, presented a series of tables indicating the average length of time national-bank notes of the various denominations remain in circulation. On the date in question the office records were not in condition to show accurate data, estimates being necessary for the six years antedating October 31, 1869. In 1889 a very careful examination of the records was made, and as a result the table appearing in the appendix shows correctly the circulation account annually from the date of first issues to October 31, 1898.

From this table was obtained the basis for the following calculations of the average lifetime of the issues of each denomination.

Number of Each Denomination of National Bank Notes Issued from the Beginning of the System to October 1, 1898; the Calculated Aggregate Nimber of Life Years Experienced when Redenmed, and the Resulting average Lifetime of the Notes of Each Denomination.

| Denominations. | Number of notes issued. | Calculated aggregate num. ber of life years experienced when redeemed. | Resulting averagelifetime of each note in jears. |
| :---: | :---: | :---: | :---: |
| One dollar.. | 23, 169, 677 | 97, 991, 508 | 4. 229 |
| Two dollars | 7,747,519 | 33, 862, 860 | 4.371 |
| Five dollars | 148, 400, 164 | 625, 113, 289 | 4.212 |
| Ten dollars | 62, 520,341 | 301, 032,014 | 4.815 |
| Twenty dollars | 19, 840, 907 | 100, 732.420 | 5. 077 |
| Fifty dollars | 2, 404, 320 | 11, 657, 443. | 4.848 |
| Ono hundred dollars. | 1,919,771 | 8, 705, 304 | 4.534 |
| Five hundred dollars | 23, 894 | 122, 827 | 5.140 |
| One thousand dollars | 7,379 | 24,423 | 3. 309 |
| Total | 266,033, 972 | 1, 179, 242, 088 | 4.433 |

Theoretically the lifetime of a note of each denomination is as shown above, but practically it can not be stated with exactness, owing to the fact that complete redemptions are not possible. This is evidenced in the following table pertaining to the issues of ones and twos, which ceased in 1879, and the five hundreds and the one thousands, the last issues having been made in 1885 and 1884, respectively. As shown, the average lifetime of these notes, calculated from the data at date of final issues, was: Ones, 3.808; twos, 4.023; five hundreds, 4.979; one thousands, 3.215 years, As indicative of the protracted continuity of
redemptions, there is also shown in this table the number of each denomination of notes outstanding at the close of the years of final issue, the number and per cent still unredeemed on October 1, 1898, and the percentage of redemptions since last issue.

The following is the table referred to:

| Denominations. | Date of last issue. | Total number of notes issued. | Calculated aggregate number of life years exporienced when redeemed. | Resulting average lifetime of each note in years. | Number of notes outstanding at close of year of last issue. | Number and per cent of notes outstanding on Oct. 1, 1898. |  | Percentage of re-demptions since last issue. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Ones. | 1879 | 23, 169, 677 | 88, 227, 998 | 3.808 | 3,569, 200 | 349, 633 | 1.51 | 90.20 |
| Twos | 1879 | 7, 747, 519 | 31, 171, 435 | 4.023 | 1,246, 249 | 84, 253 | 1.09 | 93.24 |
| Five hundreds. | 1885 | 23, 894 | 118, 977 | 4. 979 | 1,107 | 217 | . 91 | 81.40 |
| One thousands. | 1884 | 7,379 | 23, 787 | 3. 215 | 223 | 28 | . 38 | 87.44 |
| Total |  | 30, 948,469 | 119, 542, 137 | 3. 863 | 4, 816, 839 | 434, 131 | 1.40 | 90.99 |

The volume of circulation issued and redeemed annually and the amount outstanding at the close of the years indicated appear in the following table:

National-Bank Circulation Issued and Redremed Annually and tae Amount Outstanding at the Close of Each Year hrom Date of First Issue on December 21, 1863, to October 31, 1897, and to October 1, 1898.

| Year. | Issued. | Redeemed. | Ontstanding. |
| :---: | :---: | :---: | :---: |
| 1864 | \$58, 813, 980 |  | \$ $588,813,980$ |
| 1865 | 146, 285, 475 | \$464, 250 | 204, 635.205 |
| 1866 | 89, 485,759 | 1,034, 005 | 293, 086, 959 |
| 1867 | 9, 616, 927 | 3, 609,062 | 299, 094, 824 |
| 1868 | 6,165; 135 | 5, 143, 001 | 300, 116, 958 |
| 1869 | 8,376, 450 | 8,768,617 | 299, 724,791 |
| 1870 | 16, 667, 875 | 14, 533, 391 | 301, 859, 275 |
| 1871 | 48, 660, 710 | 26, 044, 778 | 324, 475, 207 |
| 1872 | 50, 888, 475 | 34, 372, 857 | 340, 990, 825 |
| 1873 | 46, 235, 375 | 38,878,526 | 348, 347, 674 |
| 1874 | 51, 760, 644 | 51,328, 412 | 348, 785, 906 |
| 1875 | 136, 425, 195 | 141, 635, 083 | 343, 176, 018 |
| 1876 | 78, 480, 410 | 101, 789, 358 | 319, 867, 070 |
| 1877 | 75, 611, 240 | 79, 607, 120 | 315, 871, 190 |
| 1878 | 63, 825, 205 | $60,055.835$ | 319, 640,560 |
| 1879 | 58, 376, 360 | 42, 896,002 | 335, 120, 918 |
| 1880 | 43, 787, 770 | 36, 860, 366 | 342, 048, 322 |
| 1881 | 73, 221, 180 | 56, 344, 600 | 358, 924, 902 |
| 1882 | 80, 076, 450 | 78, 018, 639 | 360, 882, 713 |
| 1883 | 78, 681, 070 | 88, 904, 108 | 350, 759, 675 |
| 1884 | 81, 046, 310 | 99, 353, 041 | 332, 452, 944 |
| 1885 | 83, 040,440 | 100, 620, 456 | 314, 872, 928 |
| -1886 | 62, 026, 940 | 75, 909, 362 | 300,990, 500 |
| 1887 | 36, 756, 100 | 66, 095, 019 | 271, 651,587 |
| 1888 | 49, 668, 460 | 82, 275, 225 | 239, 044, 822 |
| 1889 | 30, 611, 860 | 67, 912,593 | 201, 744, 089 |
| 1890 | 32, 886, 720 | 55, 180, 851 | 179, 449, 958 |
| 1891 | 46, 465, 820 | 53, 937, 105 | 171, 978, 673 |
| 1892 | 49, 951, 250 | 49, 893, 102 | 172, 036, 921 |
| 1893 | 86, 184, 670 | 49, 520, 402 | 208, 701; 189 |
| 1894 | 66, 586, 360 | 68, 147, 445 | 207, 140, 104 |
| 1895 | 57, 181, 040 | 50, 829, 997 | 213, 401, 147 |
| 1896 | 78, 098, 580 | 57, 152, 155 | 234, 437, 572 |
| 1897 | 82, 526, 890 | 86, 948, 237 | 230, 016. 225 |
| 1898 | 70, 126, 960 | 64, 816, 991 | 235, 326, 184 |
| Total. | 2, 134, 206, 185 | 1, 898,879, 991 | 9, 679, 657, 831 |

From the foregoing statement it is seen that on October 1,1898, there was $\$ 235,326,194$ national banls circulation outstanding. The aggregate number of life years already experienced by the $\$ 2,134,206,185$ issued is $9,444,331,637$ (that is, $9,679,657,831$ less $235,326,194$ ), and
the average number of years 4.425 -the division of $9,444,331,637$ by $2,134,206,155$. The average lifetime is necessarily greater than shown in view of the amount outstanding to be redeemed. On the reasonable assumptioin that the redemption of this amount will be effected in 4.425 equal annual installments-that is, at the rate of $\$ 53,181,061$ per annum-the aggregate full lifetime of the total issues $(\$ 2,134,206,185)$ will be $9,853,825,803$ and the average lifetime 4.617 years.

## STA'IE BANKS AND BANKING INSTITUTIONS.

Incorporated in the national-bank act is the provision that the Comptroller of the Currency shall include in his annual report to Congress information relative to the condition of banks and banking institutions chartered and operated under State authority, the necessary data to be procured from reports made by such institutions to the legislatures or State officials, and the deficiency to be supplied from other reliable sources. With the exception of Delaware, official returns are obtainable relative to the condition of State banks from all of the New England and Eastern States. Returns of an official nature from the Southern States are confined to Virginia, North Carolina, Georgia; Florida, Mississippi, and Kentucky. In all of the Middle States banking departments exist, managed by boards or elective officers from whom returns are obtainable. The same can be said of the Western States, with the exception of Montana and Oklahoma. California appears to be the ouly Pacific State which has such a department.

With a very few exceptions, it is not possible to obtain data relative to the condition of these institutions for a recent date corresponding as to time with returns received from national banks, a fact which causes an impairment of the value of the combined statistics. Efforts, were made by my predecessor to induce State officers to urge the enactment of laws which would be remediable in this respect, and it is the intention to continue like efforts in that direction until the desired end is attained. The custom of this office, begun in 1887, to supplement official returns with reports of banks made directly to this office upon request, has been continued. Through both sources it is possible to present statistics relative to practically all of the mutual savings banks and about 90 per cent of the banks of discount and deposit, classed as "State banks." The returns from private banks and loan and trust companies are not so satisfactory, nor will they be until such institutious are subjected by State laws to the same surveillance and requirements with respect to publicity as State and savings banks.

An abstract of returns for the current year shows that reports have been received from 3,965 State banks, 934 savings banks, 246 loan and trust companies, and 758 private banks. In the appendix of this report are given in detail the resources and liabilities of each class by States.

For the purpose of comparison the aggregates of the principal resources and liabilities for the years 1894 to 1898 are set forth in the following table:

With each year a steady aud substantial iucrease is shown in the total assets. Deposits also have steadily increased. Capital exhibits great fluctuations. The maximum amount was reported in 1895. There was a decrease of nearly $\$ 22,000,000$ in the following year, about $\$ 22,000,000$ in 1897, and, approximately, $\$ 10,000,000$ in 1898.

Reports from State banks to the number of 3,665 have been received. The capital of these institutions is $\$ 233,587,353$; surplus and other profits, $\$ 109,554,519$; deposits, $\$ 912,365,406$. Loaus and discounts aggregate $\$ 813,749,803$; United States bonds, $\$ 4,185,304$; otber bouds, stocks and securities, $\$ 127,500,484$; cash in bank and amounts due from other banks and baukers, $\$ 327,773,826$, and total assets, $\$ 1,356$,084,800. Compared with 1897, there is shown an increase of 108 in number of banks reporting and $\$ 217,899,398$ in aggregate assets.

It is impossible to state exactly the average rate per cent of dividends paid by these banks, owing to the fact that information on the point is confined to 1,163 banks. It is seeu, however, that on stock aggregating $\$ 69,209,285$ dividends to the amount of $\$ 4,963,240$, or 7.17 per cent, were paid.

## SAVINGS BANKS.

Reports have been received relative to the condition of 979 savings banks, including 45 commercial banks (in one State) haviug savings departments. This is but one less than reported in 1897. The principal investments, loans aud' securities-corporate and other-amount to $\$ 1,070,755,293$ and $\$ 74,700,217$, respectively. In all States the character of loans is not shown, but real estate appears as collateral to accommodations amounting to $\$ 864,968,285$. Government bonds are held to the amount of $\$ 140,029,726$; State, county and municipal bonds, $\$ 497$,416,292, and other bonds, stocks and securities, $\$ 337,254,199$. The total assets are $\$ 2,241,344,991$, the liabilities to clepositors are $\$ 2,066,601,864$, and these banks have $\$ 187,475,971$ in surplus and undivided profits. The latter amount is equivalent to nearly 8.4 of the total liabilities.

The depositors who are the exclusive participators in the profits of the mutual savings banks, but who, in stock savings institutions, are paid specific rates of interest, number $5,385,746$, and their average deposit is $\$ 383.54$. Compared with 1897 there is an increase of $\$ 83,188,300$ in deposits and 184,614 in number of depositors. Mutual savings banks are confined almost exclusively to the New England and Eastern States. Outside of the two sections named, but 11 banks of that character have made reports, as follows: 1 in West Virginia, 4 in Ohio, 5 in Indiana, and 1 iu Wiscousin. The aggregate assets of the mutual savings banks, which amount to about 90 per cent of the assets of all savings institutions, are $\$ 2,005,950,646$; loans aggregate $\$ 920,477,133$, over 81 per cent of which are secured by real estate; United States bonds, $\$ 139,561,601$; State, county and municipal bonds, $\$ 495,726,686$; other bonds, stock and securities, $\$ 294,706,936$. Deposits amount to $\$ 1,824,963,410$; number of depositors, $4,835,138$, and the average deposit, $\$ 37.7 .44$. This indicates an increase during the year of $\$ 87,864,040$ in deposits, $\$ 7.32$ in the average deposit, and 143,694 in number of depositors. The average rate of interest paid on savings accounts is practically 4 per cent in all of the States except Maine, New Hampshire, New York, New Jersey, and Maryland, in which the rate ranges from 3 to $3 \frac{3}{4}$ per ceut.

Information with respect to the classification of deposits is confined to saviugs bauks in Maine and Oonnecticat, and is as follows:

| Classification of deposits. | Depositors. |  | Deposits. |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Number. | Per cent. | Amount. | Per ceut. |
| Maine. |  |  |  |  |
| \$500 or less..................... | 129, 865 | 77.30 |  | 80.9 |
| Over $\$ 500$ and less than $\$ 2,000$ | 33,558 | 20.00 | \$48, 214, 077 | 80.9 |
| Over $\$ 2,000 . . .$. . . . . . . . . | 4,456 |  | 11, 384, 272 | 19.1 |
| Total | 167, 879 | .......... | 59, 598, 349 | ........... |
| \$1,000 or less. | 320, 149 | 87.31 |  | 40.52 |
| Over $\$ 1,000$ and less tbas $\$ 2,000$. | 32, 313 | 8.81 | 42, 505,536 | 27.25 |
| Over \$2,000 and less thau \$10,000. | 13,964 | 3.81 | 46, 869, 038 | 30.05 |
| \$10,000 or over................. | 235 | . 07 | 3, 399, 744 | 2.18 |
| Total | 366, 661 | ........... | 155, 969,798 | ........... |

The capital of the 275 reporting stock savings banks is $\$ 18,536,130$; deposits, $\$ 203,244,999$; number of savings depositors, 403,743 , and the average savings deposit, $\$ 501$; the total assets are $\$ 235,394,345$, of which $\$ 150,574,286$ represent loans, and $\$ 44,704,994$ bonds, stocks and other securities.

## loan and trust companies.

Returns relative to the condition of 246 loan and trust companies have been received. These corporations are capitalized for $\$ 101,228,555$, and have $\$ 97,643,666$ surplus and profits, and $\$ 662,138,397$ deposits. Loans aggregate $\$ 539,317,059$; United States bonds, $\$ 34,186,440$; other bonds, stocks and securities, $\$ 159,791,312$; cash on hand and due from other corporations, ete., $\$ 118,028,856$. The average rate of dividends paid by all these companies during the past year, as shown by reports relative to that point, was 11.23 per cent.

## PRIVATE BANKS.

The laws of but few of the States provide for reports from unincorporated banks and private bankers, and, in view of the disinclination of the representatives of most of such concerns to submit statements. of condition to this office as requested, statistics relative thereto are meager. The abstract of returns from 758 banks show total resources of $\$ 91,436,387$; capital, $\$ 16,721,750$; deposits, $\$ 62,085,084$, and other liabilities, $\$ 12,629,553$. Loans and discounts aggregate $\$ 58,174,248$; bonds, stocks and other securities, $\$ 4,526,565$, and credits with other banks and cash on haud, $\$ 16,161,020$ and $\$ 5,857,132$ respectively.
The principal items of resources and liabilities of each class of banks hereinbefore referred to are shown herewith:

In the following table is exhibited in the most concise form the main items of assets and liabilities of national banks on July 14, 1898, and of other banks, banking institutions, and private banks above referred to:

| Items. | \% | 3,582 national banks. | 5,903 other banks. | $\begin{aligned} & 9,485 \text { total } \\ & \text { banks. } \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: |
| Loans |  | \$2, 151, 757, 655 | \$2, 480, 874, 360 | \$4, 632, 632, 015 |
| United States bonds |  | 285, 356, 900 | 179, 328, 943 | 464, 685, 843 |
| Other bonds. |  | 250, 689, 375 | 1, 125, 561, 379 | 1, 376, 250, 754 |
| Cash |  | 492, 882, 724 | 194, 913, 450 | 687, 796, 174 |
| Capital. |  | 622,016, 745 | 370, 073, 788 | 992, 090, 533 |
| Surplus and profits |  | 332, 971, 643 | 399, 766, 497 | 732, 738, 140 |
| Deposits |  | 2, 076, 226, 576 | 3, 664, 797, 296 | 5, 741, 023, 872 |
| Total resources |  | 3, 977, 675, 445 | 4, 631, 328, 357 | 8, 609, 003, 802 |

The total banking funds-that is, capital, surplus, profits, and individual deposits-of all banks reporting amount to $\$ 7,416,355,568$, and, by comparison with returns in 1897, an increase of $\$ 594,028,698$ is shown. The per capita distribution by States and classes of banks is set forth in the Appendix.* The national bank average is $\$ 39.93$; State bank, $\$ 16.82$; loan and trust company, $\$ 11.54$; savings bank, $\$ 29.93$; private bank, $\$ 1.12$; and total, $\$ 99.34$.

The specie and other currency held by national banks on July 14 and by other banks on the date of the latest reports aggregate $\$ 687,796,173$, an increase since 1897 of $\$ 59,595,644$. Classified, the holdings are as follows: Gold, $\$ 341,108,985$; silver, $\$ 58,947,221$; specie not shown in detail, $\$ 2,131,917$; legal tenders and other paper currency, $\$ 199,915,862$; fractional currency, $\$ 1,093,90 \pm$; "cash," $\$ 84,598,284$. The latter amount undoubtedly includes a quantity of specie, but how much can not even be estimated. The reports from a number of States show merely "cash on hand." It is interesting to note the changes which have occurred since 1897 in the amount of each kind of currency. Gold has increased $\$ 98,755,983$; silver, $\$ 5,255,491$; fractional currency, $\$ 112,123$; specie not classified, $\$ 434,845$; "cash," $\$ 2,069,835$. Legal tenders and other paper currency decreased $\$ 47,032,633$.

In July, 1898, 3,590 national banks and, approximately, 9,600 other banks, banking institutions, and private banks were in operation in the United States. During the year ended October 31, 1898, 7 national bankș were found to be insolvent and placed in charge of receivers. From reports made to the Bradstreet Company and furnished to this Bureau, covering the year closed August 31, 1898, it is seen that the failures of banks other than national number 53 , the assets and liabilities at date of failure being $\$ 4,493,577$ and $\$ 7,080,190$, respectively. There were 33 private bank failures, 14 State, 4 savings bank, and 2 trust company. The number, assets, and liabilities of failed banks of each class, by States, will be seen by reference to the Appendix.*

The abstract of the reports of condition of the 38 chartered banks of the Dominion of Canada made on September 30, 1898, has been received, from which it is noted that capital stock aggregates $\$ 62,900,034$; circulation outstanding, $\$ 40,071,143$; deposits, $\$ 242,128,762$; total liabilities, $\$ 382,331,503$. The banks held, in specie, Dominion notes, bank notes, and checks, 15.5 per cent of deposits. The average rate of dividends paid during the past year was 7.6 per cent.

## POSTAL AND OTHER FOREIGN SAVINGS BANKS.

In the following table is shown the number of depositors, amount due depositors, and average deposit in postal savings banks in all of the

[^10]countries named, except Russia, on December 31, 1896. The retarns from Russia are of date January 1, 1898. This information appeared in the July edition of the Bulletin de Statistique de Paris and the Russe de Statistique de St. Petersburg.

Information of a like character to the foregoing with respect to savings institutions other than postal savings banks in France, Russia, United Kingdom, and the United States is given herewith:

| Country. | Date. | Number of banks. | Number of depositors. | Deposits. | Average deposit. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| France. | Dec. 31, 1896 | 545 | 6, 633, 447 | \$652, 794, 618 | \$98. 40 |
| Russia | Jan. 1,1898 | 861 | 1,870, 637 | 198, 423, 532 | 106:07 |
| United Kingdom | Dec. 31, 1896 | a 239 | 1,527, 217 | 235, 853, 935 | 154. 43 |
| United States. | 1897-1898 | 979 | 5, 385,746 | 2, 065, 631, 298 | 383.54 |

a November 20, 1896.

## FOREIGN BANKS OF ISSUT.

The principal items of resources and liabilities of leading banks of issue in Europe on the dates indicated, reported in the Liondon Economist, October 15, 1898, are set forth in the following table, the amounts being expressed in millions of pounds:

|  | Bank of England, Oct. 13, 1898. | National bauk of Belgitm, Oct. $6,1898$. |
| :---: | :---: | :---: |
| Circulation | £27.7 | £19.6 |

a Direct official statement.
MONETARY SYSTEMS AND APPROXIMATE STOCKS OF MONEY IN THE PRINCIPAL COUNTRIES OF THE WORLD.
Through the courtesy of the Director of the Mint the Comptroller is enabled to present data relative to the monetary standards, ratios of gold to full legal-tender and limited-tender silver, the stocks of gold, silver, and uncovered paper, and the per capita of gold, silver, and paper in the principal countries of the world in 1898. Statistics are shown relative to thirty-seven countries having an aggregate population of $1,311,400,000$. The gold held in these countries aggregates $\$ 4,619,000,000$; silver, $\$ 3,977,500,000$, and uncovered paper, $\$ 2,322,800,000$. Compared with the returns in 1897 there is an increase in gold of $\$ 259,400 ; 000$. The amount held by the United States is $\$ 925,100,000$, an increase since 1897 of $\$ 228,800,000$; Russia has increased her supply $\$ 169,700,000$; Austria-Hungary, $\$ 79,300,000$; France, $\$ 38,600,000 ;$ Germany, $\$ 14,000,000$, and the South American republics, $\$ 12,500,000$. The amount of gold held in the United King. dom decreased from $\$ 584,000,000$ in 1897 to $\$ 438,000,000$, a reduction of $\$ 146,000,000$. Egypt apparently has $\$ 99,300,000$ less than a year ago, Roumania $\$ 24,100,000$ less, and Belgium $\$ 5,000,000$ less.

The changes in the amount of silver are not material, in the aggregate, as compared with 1897. Apparently there has been a falling off, but the decrease shown is mainly due to the revised estimate of the quantity of this metal in India, which is now stated to be $\$ 592,100,000$. In 1897 the estimate submitted by a different authority was $\$ 950,000,000$. There is noticed a reduction of $\$ 33 ; 600,000$ in the amount of silver in Japan, $\$ 24,100,000$ in France, and $\$ 12,000,000$ in Belgium. The stock in the United States bas increased $\$ 3,700,000$, in Russia $\$ 54,200,000$, and in Austria-Hungary $\$ 81,800,000$.

The stock of uncovered paper has apparently been reduced $\$ 243,000,000$. In 1897 the amount of uncovered paper in Russia was $\$ 467,200,000$, and none in 1898; in Austria-Hungary the reduction has been- $\$ 91,400,000$, in the United States $\$ 70,900,000$, and in Portugal $\$ 10,800,000$. The principal increase in uncovered currency is as follows: The South American Republics, $\$ 200,600 ; 000$; India, $\$ 80,300,000$; Spain, $\$ 34,500,000$; Roumania, $\$ 21,900,000$; Sweden, $\$ 8,700,000$; Italy, $\$ 8,500,000$; Germany, $\$ 8,400,000$, and the Netberlands, $\$ 7,600,000$.

By reference to the table it will be noticed that the average per capita of gold is $\$ 3.52$, silver $\$ 3.03$; and uncovered paper $\$ 1.77$. Hawaii has the largest amount of gold per capita, namely, $\$ 40$; the South African Republic is second, with $\$ 32.44$; Australasia, $\$ 26.42$; France, $\$ 21.06$; Cape Colony, $\$ 20.83$; Germany, $\$ 12.78$; United States, $\$ 12.42$; United

Kingdom, $\$ 11.01$. The maximum per capita of silver, $\$ 62.05$, is in the Straits Settlements; the next largest per capita is $\$ 38.68$, in Siam; $\$ 11.45$ in the Netherlands, $\$ 10.90$ in France, $\$ 10$ in Hawaii, and $\$ 8.56$ in the United States.

The largest per capita of uncovered paper is $\$ 20.01$, in the South American States; Greece and Belgium follow with $\$ 12.75$ and $\$ 12.17$, respectively. The last column of the table shows the per capita of gold, silver, and uncovered paper combined in each of the countries named. The range is from a maximum of $\$ 62.05$ in the Straits Settlements to a minimum of $\$ 1.94$ in Cuba.

Monetary Systems and Approximate Stocks of Money in the aggregate and Per Capita in the Principal Countries of the World in 1898.

[^11]$c$ Estimate, Bureau of the Mint $f$ C. Cramer Frey.
g. Bulletin de Statistique, Paris, January, 1898.
$h$ Except Venezuela, Chile; and Pern.
$i$ Lucludos Aden, P'erim, Ceylon, Mongkong, Labuan, and Straits Sottlements:

In conclusion, the Comptroller desires to commend the associates of his office for their faithful, able, and efficient services, much of it rendered to the Government during extra hours of labor without compensation.

To Mr. Lawrence O. Murray, Depnty Comptroller; Messrs. A. D. Lynch and George T. May, in charge of work connected with insolvent banks; George S. Anthony, W. J. Fowler, W. W. Eldridge, E. E. Schreiner, in charge of divisions; T. O. Ebaugh; W. D. Swan; J. Y. Paige, chief clerk, and to Mr. T. P. Kane, secretary, the Comptroller desires to publicly express his appreciation of their fidelity to the best interests of the goverumental work in which they are engaged.

The Speaker of the House of Representàtives.

(No. 3.)

## REPORT OF THE COMMISSIONER OF INTERNAL REVENUE.

> Treasury Department, Office of Commissioner of. Internal Revenue, Washington, D. C., November 1, 1898.

SIR: In conformity with law, and in compliance with your instructions, I have the honor to submit the following report of the operations of the Bureau of Internal Revenue for the fiscal year ended June 30, 1898, together with certain additional information relating to the work performed, and the receipts from the various sources of internal revenue, during the months of July, August, and September of the current fiscal year.

The titles of the tables* found at the close of the bound volume of this report are as follows:

Table A, showing the receipts from each specific source of internal revenue and the amounts refunded in each collection district, State, and Territory of the United States for the fiscal year ended June 30, 1898.

Table B, showing the number and value of stamps for special taxes, manufactured tobacco, snuff, cigars, cigarettes, distilled spirits, fortified sweet wine, fortified wine for export, fermented liquors, oleomargarine, filled cheese, export stamps for distilled spirits, case stamps for distilled spirits bottled in bond, playing cards, documentary and proprietary stamps, and also the number of the differeut kinds of certificates of registry, with the number and value of documentary stamps used for validating unstamperl instruments, issued to collectors of internal revenue during the fiscal year ended June $30,1898$.

Table C, showing the percentages of receipts from the several general sources of internal revenue now taxable in each State and Territory of the United States to the aggregate receipts from the same sources, by fiscal years, trou July 1, 1863 , to June 30, 1898.

Table D, showing the aggregate receipts of internal revenue in each collection district, State and Territory of the United States, by fiscal years, from September 1, 1862, to June 30, 1898.

Table E, showing the receipts from specific and general sources of internal revenue, by fiscal years, from September 1, 1862, to June 30, 1898.

Table F , showing the ratio of receipts from specific sources of internal revenue to the aggregate receipts of the same, by fiscal.years, from July 1, 1863, to June 30, 1898.

[^12]Table G, showing the returns of distilled spirits, fermented liquors, manufactured tobacco, snuff, cigars, and cigarettes, under the several acts of legislation and by fiscal years, from September 1, 1862, to June 30,1898 ; also statement of the production of distilled spirits and fermented liquors in the several States and Territories, by fiscal years, from July 1, 1877, to June 30, 1898.
Table H, showing the receipts from special taxes in the several States and Territories for the twelve months ended June 30, 1898.
Table I. Abstract of reports of district attorneys concerning saits and prosecutions under the internal-revenue laws during the fiscal year ended June 30, 1898.
Table K. Abstract of seizures of property for violation of internalrevenue laws during the fiscal year ended June 30, 1898.
Table L, showing the collections, expenses, and percentage cost of collection in the several collection districts, during the fiscal years ended June 30, 1897 and 1898.

## COLLECTIONS FOR THE FISCAL YEAR ENDED JUNE 30, 1898.

It was estimated iu the last annual report of the Commjssioner of Internal Revenue that the receipts from all sources of internal revenue would reach the sum of $\$ 155,000,000$. It affords me pleasure to say that the actual receipts were $\$ 170,866,819.36$, exceeding the estimate by $\$ 15,866,819.36$.

## RECEIPTS FOR THE PAST TEN FISCAL YEARS.

| Fiscal year ended- |  |
| :---: | :---: |
| June 30, 1898. | \$170, 866, 819. 36 |
| June 30, 1897. | 146, 619, 593.47 |
| June 30, 1896 | 146, 830, 615.66 |
| June 30, 1895 | 143,246, 077.75 |
| June 30, 1894 | 147, 168, 449.70 |
| June 30, 1893 | 161,004, 989.67 |
| Juno 30, 1892 | 153, 857, 544.35 |
| June 30, 1891 | 146, 035, 415.97 |
| June 30, 1890 | 142,594, 696. 57 |
| June 30, 1889. | 130, 894, 434. 20 |

## ESTIMATED RECFIPTS FOR THE CURRENT FISCAL YEAR.

The aggregate receipts for the months of July, August, and September, 1898 , from all sources of internal revenue, were $\$ 71,989,457.31$. For the same montbs in 1897 the receipts were $\$ 43,792,636.62$, a comparison showing an increase of $\$ 28,196,820.69$ in favor of the first three months of the current fiscal year.

This large increase, however, is abnormal, and may be regarded as arising from the large collections incident to carrying into effect the new lines of taxation provided for in the act of June 13, 1898. Therefore I am of the opinion that any estimate based upon the above figures should be very carefully considered, and great weight should be given to such reduction in the receipts as may be reasonably anticipated during the remaining nine months of the current fiscal year. In view of these conditions, I do not deem it wise to fix the estimate for the receipts from all sources of internal revenue for the fiscal year ending June 30; 1899, higher than $\$ 270,000,000$.
Schedule of articles and ocoupations subject to tax under the internal-revenue laws of the United States in force November 1, 1898.

## SPECIAL TAXES.

Rate of tax.
Rectifiers of less than 500 barrels a year................................................. $\$ 100.00$

## COST OF COLLECTION.

The cost of collection for the past fiscal year, distributed among the different items of appropriation, was approximately as follows:

> For salaries and expenses of collectors, including pay of deputy collectors, clerks, etc., and including expenses incident to enforcing the
> provisions of law taxing oleomargarine ....................................................
> \$1, 713, 297.47
> gaucers, storekeepers, and nuiscellaneous expenses....................... gaugers, storekeepers, and nuiscellaneous expenses.
> $1,836,778.58$
> For paper for internal-revenue stamps
> 37, 148.73
> For expenses of detecting and punishing violations of internal-revenue laws.

> 53, 283.02
> For salaries of officers, clerks, and employees in the offee of Commis-\{ $253,659.11$
> sioner of Internal Revenue.
> * 564.81

> Total amount expended.
> 3, 907,010. 50

## PERCENTAGE OF COST OF COLLECTION.

The percentage of cost of collection is 2.29 per cent. The expenses for the previous fiscal year were $\$ 3,848,469.4 \overline{9}$, or 2.62 per cent of the collectious for that year. The percentage of cost indicated above is the smallest that has been reached in the history of this Burean in the administration of the internal-revenue laws.

## MISCELLANEOUS EXPENSES.

The act of Congress approved August 7, 1882, making provision for sundry civil expenses for the year ended June 30,1883 , required the Commissioner of Internal Revenue to make a detailed statement of all miscellaneous expenditures in the Bureau of Internal Revenue for

[^14]which appropriation was made in that act. In accordance with this requirement, I submit the following detailed statement of miscellaneous expenses incurred:
Telephoning on public business ........................................................... $\$ 14.92$
Telegraphing on public business ............................................... 1, 1410.33
Lochs for use at distilleries ............................................................. 2, 432.31
Hydrometers used in gauging spirits ............................................... 5, 589.55
Weighing beams for use in weighing spirits ....................................... 828.76
Steel canceling dies ........................................................................ 13.20
Stationery for internal-revenue officers ......................................... 332.33
United States Internal Revenue Journal supplied to iuternal-revenue officers
1, 100.00

Expenses of seizures and sales by collectors ......................................... 288.88
Total

## estimated expenses for next fiscal year.

I estimate the expenses of the Internal-Revenue Service for the fiscal year ending June 30, 1900, as follows:
For salaries and expenses of collectors, including pay of deputy collectors and surveyors and clerks, and expense of enforcing the act of August 2, 1886, taxing oleomargarine, and the act of August 4, 1886, imposing on the Government the expense of the inspection of tobacco exported, and the act of June 6, 1896, imposing a tax on filled cheese.
For salaries and expenses of 20 revenue agents, for fees and expenses of gaugers, for salaries of storekeepers, and for miscellaneous expenses.
$\$ 1,850,000$
*650,000
2, 000,000
For paper for internal-revenue stamps
50, 000
For detecting and bringing to trial and punishment persons guilty of violating the internal-revenue laws, including payment for information and detection.
For salaries of officers, clerks, and employees in the office of the Com-\{ $\quad 257,640$ missioner of Internal Revenue
*73, 610

## Total

4, 981, 250

## SALARIES.

I have the honor to recommend that Congress appropriate for the fiscal year ending June 30, 1900, the sum of $\$ 331,250$ as salaries for the following officers, clerks, and employees in this Bureau:
One Commissioner, at. ..... \$6, 000
One Deputy Commissioner, at ..... 4, 000
One chemist, at ..... 2,500
Two heads of division, at ..... 2,500
Seven heads of division, at ..... 2,250
One superintendent of stamp vailt, at ..... 2, 000
One stenographer, at ..... 1, 800
Thirty clerks, at ..... 1, 800
Thirty clerks, at ..... 1, 600
Forty clerks, at ..... 1,400
Thirty-five clerks, at. ..... 1,200
Thirty clerks, at ..... 1, 000
Forty clerks, at ..... 900
Four messengers, at ..... 840
Eighteen assistant messengers, at ..... 720
Eighteen laborers, at. ..... 660
An aggregate of 259 persons.

[^15]I also recommend the appropriation of the sum of $\$ 2,500$ as salaries for one stamp agent at. $\$ 1,600$ and one counter, at $\$ 900$, the same to be reimbursed by the stamp manufacturers, as provided by the act of August 5, 1882.

## SCALE OF SALARTES OF COLLECTORS.

The recommendations made for the salaries of collectors are based upon an estimate of their probable collections according to the follow. ing scale, with the qualification that if the actual collections should vary from the amounts estimated, the salaries will be readjusted at the end of the fiscal year:

| For collection of- | Salary. | For collection of- | Salary. |
| :---: | :---: | :---: | :---: |
| \$25,000 or less | \$2, 000 | \$375,001 to \$425,000 | \$3, 375 |
| 25,001 to \$37,500. | 2, 1225 | 425,001 to 475,004. | 3, 500 |
| 37,501 to 50, (:00 | 2, 250 | 475,001 to 550,000 | 3,625 |
| 50,001 to 75,000. | 2,375 | 550,001 to 055,000 | 3,750 |
| 75,001 to 100,000 | 2,500 | 625,001 to 700.001 | 3,875 |
| 100,001 to 125,000. | 2,625 | 700,001 to 775,001 | 4, 000 |
| 125,001 to 175,000. | 2, 750 | 775,001 to 850,000 | 4,125 |
| 175,001 to 225,000. | 2,875 | 850,001 to 925,00 | 4.250 |
| 225,001 to 275,000. | 3, 000 | 925,001 to 1,000,000 | 4,375 |
| 275,001 to 325,000. | 3, 125 | 1,000,001 and upward | 4,500 |
| 325,001 to 375,000. | 3, 250 |  |  |

In addition to the salary based upon the above-mentioned scale, the collector shall receive a commission of one-half of 1 per cent on tax-paid spirit stamps, and may receive additional compensation on account of territorial extent, as provided by law, provided the gross compensation does not exceed $\$ 4,500$. (See sections 3148 and 3314 , Rev. Stat.)

## OFFICIAL FORCE.

The force connected with this Bureau during the fiscal year which ended Jnne 30, 1898, in the various districts throughout the United States, as reorganized under the Executive order of May 21, 1887, was 63 collectors, who received per annum salaries as follows:

| Number. | Salary. | Number. | Salary. | Number. | Salary. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 35. | \$4, 500 | 2 | \$3, 750 |  | \$3, 000 |
| 3 | - 4, 250 | 2 | 3, 625 |  | 2, 875 |
| 1. | 4, 125 |  | 3,500 3,375 |  | 2,750 2,625 |
| 2 | - ${ }^{4,875}$ |  | 3,125 3,125 |  |  |

There were also employed 957 deputy collectors, who received per annum salaries as follows:

| Number. | Salary. | Number. | Salary. | Number. | Salary. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 22. | \$2,000 | 34 | \$1,300 |  | \$500 |
| 11. | 1,900 | 169. | 1,200 |  | 480 |
| 33. | 1,800 | 127. | 1,100 | 1. | 425 |
| 1. | 1,750 | 136 | 1,000 | 11. | 400 |
| 10. | 1,700 1,600 | 64. | 950 900 | 27. | 360 300 |
| 2. | 1,550 | 4 | 850 | ${ }^{3}$ | 250 |
| 59. | 1,500 | 23. | 800 |  | 240 |
| 9 | 1,450 |  | 750 | 7 | 200 |
| 119 | 1,400 |  | 700 |  | 120 |
| 1. | 1,350 | 25 | 600 |  |  |

There were also employed in the offices of the different collectors 185 clerks, who received per annum salaries as follows:

| Number. | Salary. |  | Number. | Salary. |  | Number. | Salary. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | \$1,800 | 8 |  | \$1, 150 | 9 |  | \$700 |
| 2 | 1,600 | 6 |  | 1,100 | 2 |  | 650 |
| 3 | 1,500 | 30 |  | 1,000 | 11 |  | 600 |
| 9 | 1,400 | 34 |  | 900 | 1 |  | 500 |
| 4 | 1, 300 | 18 |  | 800 |  | ......... | 400 |
| 1 | 1,250 | 5 |  | 750 |  |  |  |
| 38. | 1,200 | 2 |  | 720 |  |  | . |

Also 27 porters, messevgers, or janitors, who received per annum salaries as follows:

| Nunbor. | Salary. | Number. | Salary. | Number. | Salary. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 7 | \$600 | 6 | \$400 | 2 | \$200 |
| 3 | 500 | 3 | 300 | 1 | 120 |
| 3. | 480 |  | 240 | 1. | 100 |

At the close of the year ended June 30, 1898, 222 officers, clerks, messengers, and laborers were employed in this Bureau, and the aggregate amount paid during the year for their salaries was $\$ 254,223.92$.

Of the number of persons employed during the year ended June 30, 1898, 23 were employed under the act of June 13, 1898.

## RENEWAL OF OFFICIAL BONDS.

I desire to call attention to the useless labor and annoyance imposed upon this Bureau and upon the officers in the field by section 5 of the act of March 2, 1895, requiring the renewal of all official bonds once in four years. The number of. internal-revenue offcers affected by this provision of law is about 3,000 , and the execution of new bouds by them every four years, entails upon this office an amount of work in the examination, approval, double entry for reference, etc., which is utterly useless so far as the interests of the revenues are concerved, and simply imposes unnecessary trouble upon the officers themselves.

Prior to the passage of the act referred to, collectors promptly reported all matters affecting the responsibility of the boods of subordinate officers, such as death or insolvency of sureties, and new bonds were required wherever necessary. Internal-revenue agents were directed from time to time to examine into the financial condition of sureties on collectors' official and disbursing bouds, and additional security was required wherever the interests of the Government required that action. This method was in force for twenty-five years and was entirely adequate for the purpose.

## STOREKEEPERS, GAUGERS, ETC.

There were also employed 576 gaugers, who received fees not to exceed $\$ 5$ per day, 430 storekeepers, and 1,372 storekeepers and gaugers, whose pay did not exceed $\$ 4$ per day, and 5 distillery surveyors. All the foregoing officers are paid only when actually employed.

Storekeepers are assigned to those distilleries only which have a surveyed daily capacity exceeding 100 bushels, and are paid such compensation as may be prescribed by the Commissioner of Internal Revenue, not to exceed $\$ 4$ per day.

Storekeepers and gaugers are assigned to distilleries having a capacity of 100 bushels or less, which are in operation, and to distilleries of
a capacity not exceeding 500 bushels, when under suspension. When the business of bottling spirits in bond is carried on at a distillery of the latter class, if the increase of work so requires, officers performing the separate duty of storekeeper and of gauger are assigned thereto.

Under the act of August 28, 1894, storekeepers and gaugers may now be assigned to perform the separate duties of a storekeeper at any distillery, or at any general or special bonded warehouse, or to perform any of the duties of a gauger, under the internal-revenue laws.

The pay of storekeepers and gaugers assigned to distilleries whose registered daily capacity is 20 bushels or less, is fixed by law at $\$ 2$ per diem. The pay of those assigned to larger distilleries has been graded according to the following scale:

Compensation of storekeepers and gaugers assigned to distilleries in operation having a surveyed daily capacity exceeding 20 bushels, and not exceeding 40 bushels, $\$ 3$ per day; compensation of those assigned to distilleries having a surveyed daily capacity exceeding 40 bushels, and not exceeding 60 bushels, $\$ 3.50$ per day; compensation of those assigned to distilleries having a surveyed daily capacity exceeding 60 bushels, $\$ 4$ per day.

The compensation of such officers assigned to distilleries under suspension having a surveyed daily capacity not exceeding 20 bushels, and having not exceeding 5,000 gallons of spirits in the distillery warehouse, is $\$ 2$, for such days only as the officer is required to be in attendance to make withdrawals of spirits, or for other necessary purposes; when the quantity of spirits in warehouse of a suspended distillery having a daily capacity not exceeding 500 bushels, exceeds 5,000 gallons, and does not exceed 25,000 gallons, the compensation is $\$ 2$ per day of constant attendance; when the quantity exceeds 25,000 and does not exceed 100,000 gallons, $\$ 3$ per day; and when the quantity exceeds 100,000 gallons, $\$ 4$ per day.

## GENERAL CONDITION OF THE OFFICE AND THE SERVICE.

In carrying into effect the provisions of the act of June 13, 1898, a vast amount of work was suddenly thrown upon the officers and employees of this service, both in this Bureau and also in the field. In many cases it was necessary that the hours of labor should be extended from 8 o'clock, a. m., to 7 o'clock, p. m., including Sundays and holidays, and these demands were met by the official force, without exception, with unremitting zeal and promptness.

The extraordinary high temperature of the weather and the long hours of labor told severely upon the health of many of the clerks and employees, especially those employed as counters and packers in the stamp vault, where every available space was crowded with men and women who worked in an atmosphere of pearly 100 degrees in temperature, from twelve to fifteen hours each day, and not infrequently all night long.

The efficient and faithful services thus rendered enabled this office to meet the extraordinary conditions confronting it in carrying the law into effect with the least possible embarrassment to the taxpayer and to the Government.

I desire to extend my earnest thanks and congratulations to the officers and employees of the Internal-Revenue Service, both in this Bureau and throughout the country, for their unremitting industry, and for the hearty cooperation they have extended to me under the trying conditions above recited.

## REVENOE AGENTS' DIVISION.

During the last fiscal year there were employed 20 revenue agents, 1 as chief of division in this office, 15 in charge of territorial divisions, 3 in the examination of the offices and accounts of collectors, and 1 in assisting agents in charge of divisions and on special duty. Under act of June 13, 1898, 3 additional agents were appointed and assigned to assist agents in charge of divisions.

## EXPENSES OF REVENUE AGENTS.

There have been expended from the appropriation for salaries and expenses of revenue agents during the year the following amounts:

| Aggregate salary of agents | \$44, 570.00 |
| :---: | :---: |
| Aggregate amount of traveling expense | 31, 614. 26 |
| Stationery furnished agents. | 332.33 |
| Transportation over Pacific railroads. | 861.28 |
| Total | 77, 377.87 |

While this report shows the amount expended from the appropriation for the discovery of violations of internal-revenue law, it does not exhibit the correct results obtained thereby, for the reason that many cases discovered within the time named are before the courts or pending a settlement by offers in compromise under consideration in this office, the aggregate results of which would materially increase the sums reported.

In some districts the reports show violations of law discovered, and seizures of property and assessments resulting therefrom, while but little, and in some instances none, of the appropriation for the discovery of violations of law was expended. It will also be observed that these results are generally reported in districts where no illicit production of spirits is discovered. The larger portion of this appropriation is necessarily used in those parts of the country where illicit distillation is carried on to a considerable extent.

The scizure of illicit stills within the last few years bas greatly increased. In 1894, 1,016 unregistered stills were seized. Since that time seizures of this character have gradually increased, until during the last fiscal year they reached the unprecedented number of 2,391 . The cause of the increased illicit production of spirits is, no doubt, in a great degree attributable to the increased tax on that product by act of August 28,1894 , from 90 cents to $\$ 1.10$ per gallon.

The suppression of frauds of this character is very difficult. Stills are illicitly operated in many parts of the country, but they are particularly numerous in the more remote localities and in the mountain regions of several of the Southern States, and on this account extraordinary measures must be taken to discover and seize them. Collectors allege that the means at their hands are entirely inadequate for this purpose, and hence the appropriation for the discovery of violations of internal-revenue laws must be depended upon for this work.

## EXPENDITURES FOR THE DISCOVERY AND PUNISHMENT OF VIOLATORS OF LAW.

In accordance with the provisions of the act making an appropriation for such purposes, the following detailed statement of expenditures for detecting and bringing to trial and punishment persons guilty of violating interual revenue laws is submitted:

Amount Expended through Revenue Agents.

| Name. | Amount. | Name. | Amount. |
| :---: | :---: | :---: | :---: |
| Bowon, W. H. H | \$122. 70 | MeGinnis, J. W | \$536. 65 |
| Bouldin, B. B | 5,350. 95 | Pitts, W. L. | 2, 464. 36 |
| Carson, T. B | 498.83 | Sewall, F.D | 670.95 |
| Cbapman, W. H | 9, 223.25 | Spalding. D. D | 602.75 |
| Clark, G. B. | 8, 073.45 | Thrasker, L. A. | 919.15 |
| Coiquitt, W. W | 10, 902.46 | Wheolock, G. H | 415. 31 |
| Ferguson, Wayne | 268.00 | Williams, Robert, Jr | 7, 022.73 |
| Gates, D. A. |  | Total |  |
| McCoy, J. B. | ${ }^{2} 760.75$ |  | 52, 710.23 |

Amount Expendid through Collectors.

| Name. | Amount. |
| :---: | :---: |
| Rutan, W.D., Fifth New Jersey. | \$3.85 |
| White, A. B., West Virginia .. | 152.00 |
| Gill, J. D., Massachusetid. | 1.00 |
| Total. | 156. 85 |
| Amount expended for rewards. | 415.94 |

RECAPITOLATION.

| Amonntexpended by revenue agents. | \$52, 710. 23 |
| :---: | :---: |
| Amount expended by collectors. | 156.85 |
| Amount expended for rewards. | 415.94 |
| Grand total | 53, 283.02 |

The accounts for expenditures under this appropriation are rendered monthly with an itemized statement, and in all cases supported by proper subvouchers duly sworn to. These accounts pass through all the accounting offices in the Treasury Department and are filed in the Register's office.

## ILLICIT DISTILLING.

Illicit distilling is rather on the increase than decrease in certain sections of the country. Cooperation and harmony between the inter-nal-revenue officers and the officers of the courts prevail as a general thing, and it is not difficult to secure the arrest of offenders.

In the case of convictions, however, the ends of justice are frequently defeated by the failure to properly punish the offenders. Where parties plead guilty or are convicted after trial, senteuces are often suspended and the guilty parties escape punishment. In view of these conditions, I most urgently suggest that these crimes against the internal-revenue laws should be regarded as the serious offenses contemplated by the statutes and punished accordingly.

The number of illicit stills destroyed during the year ended June 30, 1894, the amount of property seized, and the number of arrests made.
as compared with statistics on the same subject in my recent report, do not give a measure of the stimulus afforded by these causes to violations of law of this character. I desire to call attention to the fact that in communities where this illicit distilling prevails it has been found that the violators of law are not confined to the unregistered illicit distillers alone, but embrace in many sections a large number of registered distillers, both grain and fruit, who are driven to this course in self-protection to meet the competition forced upon them by the illicit distillers who do not register or make any pretence of complying with the law. In many sections they have gone so far as to band together to render it impossible for collectors to collect from them by process of law taxes which have been properly and lawfully assessed. For instance, in one section where last year there was conclusive evidence that quite a number of distillers had evaded considerable sums in taxes by failing to report the full amount of material purchased, the pomace distilled, and the removal of the illicit product, when assessments were made for the purpose of collecting these taxes and seizures of the distilleries followed, it was found impossible in some cases to get any one at all to bid for plants worth from $\$ 300$ to $\$ 400$, and in other cases bids for property of that value did not exceed $\$ 25$.

This indicates clearly the measure of influence these lawbreakers are able to exercise in molding public opinion. It is unnecessary to multiply examples of this kind.

I believe that at least a partial remedy for this condition of things will be found in a material reduction of the tax on distilled spirits, in amending the law, as heretofore recommended, so that the Commissioner of Internal Revenue may employ storekeepers at a compensation not to exceed $\$ 4$ per day, and transfer them from one district to another, paying their actual and necessary expenses, and also by the revocation of the concessions made by the Secretary of the Treasury and the Commissioner of Internal Revenue, as provided in section 3255 of the Revised Statutes, allowing certain classes of distilleries to be operated without conforming to the requirements of sections $3262,3263,3269$, $3271,3273,3275,3279,3284,3294,3302,3310,3318$, and portions of other sections therein enumerated.

The withdrawal of these concessions, however, without the amendments of law before referred to would prove of little value in accomplishing the object desired.

FI 98-17

## STAMP DIVISION.

The following statements relate to the manufacture of stamp paper, engraving and printing the stamps, and the receipt, custody, and issue by this office of all internal-revenue stamps of the Government during the fiscal year ended June 30, 1898:

Statement of the Number and Value of Inthrnal-Revenue Stamps Issued to Collectors from Juey 1, 1897, to June 30, 1898.

| Class of stamps. | Number. | Value. |
| :---: | :---: | :---: |
| Spirits: |  |  |

## MANUFACTURE OF STAMP PAPER.

After due advertisement in the public prints and by Department circular for proposals to furnish stamp paper for the fiscal year ending June 30, 1899, two sealed bids were presented, which were opened on the 27th day of A pril, 1898, in the office of the Commissioner of Internal Revepue, by a committee appointed by the honorable. Secretary of the

Treasury to open and consider such bids as might be presented. The various bids submitted having been duly considered, the committee recommended an award of contract to the lowest and best bidder whose proposal conformed to the terms of the circular inviting such bids. Accordingly the contract was awarded on the 25th day of April, 1898, to the New York and Pennsylvania Company, of New York, at 4.5 cents per pound, including cost of transportation and delivery at the Treasury Department, this being at the same rate as the contract price for the previous year.

## PRODUCTION OF STAMPS.

All of the stamps used by this Bureau are engraved and printed by the Bureau of Engraving and Printing, with the exception of stamps for tobacco imprinted on foil wrappers, which have been printed and furnished by the John J. Crooke Company, of New York, and documentary stamps of the denominations of 1 and 2 cents imprinted on checks, drafts, and other instruments. All of the above-named stamps are imprinted under contracts without cost to the Government, the contractors each reimbursing the Government for the salaries of one stamp agent for the United States, and one counter, amounting to $\$ 2,500$ per annum under each contract.

NEW CLASSES OF STAMPS ADDED UNDER RECENT AOTS OF CONGRESS.
Case stamps with attached bottle stamps, to be used in the bottling of distilled spirits under the provisions of the act of March 3, 1897, have been added to the list of case stamps heretofore prepared, as follows:

Three gallons for cases containing 240 bottles of one-tenth pint each; 3 gallous for cases containing 120 bottles of one-fifth pint each; and 3 gallons for cases containing 6 bottles of one-half gallou each, with a strip stamp for each bottle attached to case stamps covering the denominations aforesaid.

Under the provisions of "An act to provide ways and means to meet war expeuditures, and for other purposes," approved June 13, 1898, increasing the rate of tax on fermented liquors, tobacco, suuff, cigars, and cigarettes the stamps heretofore issued to denote the payment of the taxes on said articles were imprinted "series 1898," to denote the new rate of tax, in compliance with the terms of said act, and to provide against any interruption of current business.

Designs are now being prepared by the Bureau of Engraving and Printing for new stamps to be issued in lieu of the imprinted stamps now furnished to brewers and manufacturers of tobacco and cigars.

Special-tax stamps representing the additional special taxes imposed by said last-named act were prepared and issued as follows:

Brokers, $\$ 50$; pannbrokers, $\$ 20$; commercial brokers, $\$ 20$; customhouse brokers, $\$ 10$; proprietors of theaters, museums, and concert halls in cities having more than 25,000 population, $\$ 100$; proprietors of circuses, $\$ 100$; proprietors or agents of all other public exhibitions or shows for money, $\$ 10$; proprietors of bowling alleys and billiard rooms, $\$ 5$ for each alley or table; dealers in leaf tobacco, annual sales not exceeding 50,000 pounds, $\$ 6$; dealers in leaf tobacco, annual sales exceeding 50,000 pounds and not exceeding 100,000 pounds, $\$ 12$; dealers in leaf tobacco, annual sales exceeding 100,000 pounds, $\$ 24$; dealers in tobacco whose annual sales exceed 50,000 pounds, $\$ 12$; manufacturers of tobacco, annual sales not exceeding 50,000 pounds, $\$ 6$; manufac-
turers of tobacco, annual sales exceeding 50,000 and not exceeding 100,000 pounds, $\$ 12$; manufacturers of tobacco, annual sales exceeding 100,000 pounds, $\$ 24$; manufacturers of cigars, annual sales not exceeding 100,000 cigars, $\$ 6$; manufacturers of cigars, annual sales exceeding 100,000 and not exceeding 200,000 cigars, $\$ 12$; manufacturers of cigars, annual sales exceeding 200,000 cigars, $\$ 24$; manufacturers of mixed flour, \$12.

Under the provisions of the said act of June 13, 1898, imposing a tax upou documents, instruments, and things mentioned and described in Schedule A, and medicines, preparations, and proprietary articles described in Schedule B of said act, documentary and proprietary stamps denoting the payment of the taxes therein imposed were prepared and issued of the following denominations:

Documentary, $\frac{1}{2}$ cent, 1 cent, 2 cents, 3 cents, 4 cents, 5 cents, 10 cents, 25 cents, 40 cents, 50 cents, 80 cents, $\$ 1, \$ 3, \$ 5, \$ 10, \$ 30$, and $\$ 50$.

Proprietary, $\frac{1}{8}$ cent, $\frac{1}{4}$ cent, $\frac{3}{8}$ cent, $\frac{5}{8}$ ceut, 1 cènt, $1 \frac{1}{4}$ cents, $1 \frac{7}{8}$ cents, 2 cents, $2 \frac{1}{2}$ cents, $3 \frac{3}{4}$ ceuts, 4 cents, 5 cents.

Provision has also been made for the printing of proprietary stamps from private dies, prepared from desigus furnished by proprietors of proprietary articles, uuder the provisions of section 9 of said act.

In compliance with the terms of said act coupon stamps, representing the payment of the tax therein imposed on mixed flour, with coupons, representing the tax on one-eighth, one-fourth, one-half, and 1 barrel, have been prepared and issued.

## distribution and sale of adhesive s'ramps.

Referring to the matter of the distribution and sale of adhesive iuternal-revenue stamps, I beg to call attention to the fact that the discount of 1 per cent on cash purchases amounting to $\$ 100$ or more has not had the effect of inducing a sufficiently large number of persons to take the stamps for sale to meet the public dumand, and I respectfully recommend that the law be amended so as to allow a discount of 3 per cent on such purchases.

Unless such action is taken, a very large increase in the number of stamp deputies will be necessary-an increase entirely beyond the capacity of this office to handle by direct accounts with each deputy. The collector in each district will necessarily be beld responsible on his bond for the accounts of each stamp deputy in his district; and it will be readily seen that the revenue agent in making examinations of the accounts of collectors every ninety or one hundred and twenty days will not be able to visit and count a hundred or more branch offices in each district. He will therefore be obliged to accept explanations for apparent discrepancies in the collectors' accounts based on alleged amounts of stamps or cash in the hands of staup deputies without verification of the facts. This would open the door to fraud, and would entirely do away with the effectiveness of the present system of quarterly examination of these collectors' accounts. This objection applies also to the sale of stamps by postmasters under bond without compensation. It would require at least 100 agents to keep such offices properly examined and verified.

The expense of stamp offices required to meet the reasonable demands of taxpayers is another argument in favor of a 3 per cent discount to actual purchasers. Since the passage of the law the number of offices has increased only from 136 to 162 . The additional expeuse involved is from $\$ 103,797$ to $\$ 118,213$. For the proper accommodation of the
public, stamps should be sold at 10 per cent, at least, of the 70,000 post-offices in the United States. Allowing only an average of $\$ 100$ each for the salary of the stamp depaties, there would be involved an expenditure of $\$ 700,000$ per annum.

## STOCK OF STAMPS IN VADLT.

The stock of stamps in the vaults of this office October 1, 1898, of the various classes and denominations, was $491,963,555$, and the value of same $\$ 94,996,529.30$.

## TOBACCO DIVISION.

The act of July $\mathbf{1 , 1 8 6 2}$, which created the office of Commissioner of Internal Revenue, levied taxes upon manufactured tobacco, snuff, and cigars. This act, so far as it related to these articles, went into practical operation on the 1st day of September, 1862.

Specific rates of taxes were levied on cigars and on manufactured tobacco of all descriptions. The rates of tax were graduated according to the values of the tobacco and cigars.

Smoking tobacco prepared with all the stems in was taxed at one rate, while smoking tobacco made exclusively from stems was taxed at a different rate. Snuff manufactured of tobacco, ground dry or damp, was taxed at a specific rate per pound.
From the date this act went into operation to the present time manufacturers have been required to make returns and pay taxes on their products, the same as other manufacturers whose products are taxed.

Section 3368, Revised Statutes, levied taxes on tobacco and snuff as follows:

SEC. 3368. Upon tobacco and enuff manufactured and sold, or removed for consumption or use, there shall be levied and collected the following taxes:
On snuff, ieanufactured of tobacco or any substitute for tobacco, ground, dry, damp, pickled, scented, or otherwise, of all descriptions, when prepared for use, a tax of thirty-two cents per pound. And snuff flour, when sold, or removed for use or consumption, shall be taxed as snuff, and shall be put up in packages and stamped in the same manner as snuff.
On all chewing and smoking tobacco, fine-cut, cavendish, plug, or twist, cut or grannlated, of every description; on tobacco twisted by hand or reduced into a condition to be consumed, or in any manner other than the ordinary mode of drying and curing, prepared for sale or consumption, even if prepared without the use of any machine or instrument, and withont being pressed or sweetened; and on all fine-cut shorts and refuse scraps, clippings, cuttings, and sweepings of tobacco, a tax of twenty-four cents per pound.

Section 30 of the act of October 1,1890 , levied a tax of 6 cents per pound on smoking and manufactured tobacco, and 6 cents per pound on snuff.

During the fiscal year ended June 30, 1898, two separate acts of Congress were passed which affected the tobacco industry. (Reference is made to the act of July 24, 1897, and the act of June 13, 1898.)

Section 3 of the act of June 13, 1898, levies a tax of 12 cents per pound upon all tobacco and snuff, however prepared, manufactured, and sold, or removed for consumption or sale; and in lieu of the 2, 3, and 4 ounce packages of tobacco and snuff, packages containing $1 \frac{2}{3}$ ounces, $2 \frac{1}{2}$ ounces, and $3 \frac{1}{3}$ ounces, respectively, have been substituted, and this statute provides that smoking tobacco may be put up in packages containing 1 ounce.

Section 69 of the act of August 28, 1894, provides:
That every person whose business it is to manufacture tobacco or snuff for himself, or who employs others to manufacture tobacco or snuff, whether such manufacture be by cutting, pressing, grinding, crushing, or rubbing of any raw or leaf tobacco, or otherwise preparing raw or leaf tobacco, or manufactured or partially manufactured tobacco or snuff, or the putting up for use or consumption of scraps,
waste, clippings, stems, or deposits of tobacco resulting from any process of handling tobacco, or by the working or preparation of leaf tobacco, tobacco stems, scraps, clippings, or waste, by sifting, twisting, screening, or any other process, shall be regarded as a mannfacturer of tobacco.
Every person shall also be regarded as a manufacturer of tobacco whose business it is to sell leaf tobacco in quantities less than a hogshead, case, or bale, or who sells directly to consumers, or to persons other than duly registered dealeis in leaf tobacco, or duly registered manufacturers of tobacco, snuff, or cigars, or to persons who purchase in packages for export, and all tobacco so sold by such persous shall be regarded as mannfactured tobacco, and such manufactured tobacco shall be put up and prepared by such manufacturer in such packages only as the Commissionor of Internal Revenne with the approval of the Secretary of the Treasury shall prescribe: Provided, That farmers aud growers of tobacco who scll leaf tobacco of their own growth and raising shall not be regarded as manufacturers of tobacco.

A number of persons have qualified as manufacturers of tobacco solely for the purpose of lawfully handling and dealing in refuse scraps, cuttings, clippings, and waste made by mauufacturers of cigars. These persons clean, assort, sieve, and pack this material and export large quantities of the same; the remainder they sell in bulk, under special permits issued by collectors, to other manafacturers as material to be used by them in the manufacture of smoking tobacco.

These purchases and sales are not included in the tabular statement for the reason that these persons did not pack, stamp, or sell their tobacco for immediate consumption.

A large number of cigar manufacturers, who have qualified as manufacturers of tobacco, manufacture, prepare, put up, and stamp their cuttings, clippings, and waste, produced at their cigar factories, into a merchantable smoking tobacco and pack, label, and stamp the tobacco before the same is put upon the market.

Six persons have qualified as tobacco manufacturers solely for the purpose of making fertilizers, insecticide, and sheep wash from tobacco stems. These persons qualify as manufacturers of tobacco so that other manufacturers may lawfully sell tobacco stems to them and that they may lawfully buy the stems in their natural condition, and they are permitted by regulations to reclaim scrap tobacco from these stems and to sell the same, under special permit, in bulk packages of not less than 500 pounds each, directly to other qualified manufacturers to be used by them as material in the manufacture of smoking tobacco.

The number of tobacco manufacturers who buy the natural leaf tobacco and use the same in the manufacture of fine-cut chewing, smoking, twist, plug, and other kinds of manufactured tobacco is not more than one thousand.

## CIGARS AND CIGARETTES.

The act of July 20, 1868, levied a tax of $\$ 5$ per thousand on cigars of all descriptions, made of tobacco or any substitute therefor, and $\$ 1.50$ on cigarettes weighing not more than 3 pounds per thousand, and $\$ 5$ on cigarettes weighing more than 3 pounds per thousand.

The act of March 3,1875 , increased the rate of tax on cigars to $\$ 6$ per thousand, and on cigarettes weighing not more than 3 pounds per thousand to $\$ 1.75$ per thousand, and on cigarettes weighing over 3 pounds per thousand to $\$ 6$ per thousand.

The act of March 3, 1883, reduced the rate of tax on cigars to $\$ 3$ per thousand, and the rate on cigarettes weighing not over 3 pounds per thousand to 50 cents per thousand, and the rate on cigarettes weighing over 3 pounds per thousand to $\$ 3$ per thousand.

Section 3387 of the Revised Statutes provides, in the last paragraph of the section, "that cigarettes and cheroots shall be held to be cigars,"
and this interpretation of the statute has been recognized, so far as cheroots are concerned, but a rate of tax has been levied on cigarettes different from that on cigars, where the cigarettes do not weigh more than 3 pounds per thousand.

Section 10 of the act of July 24, 1897, provides as follows:
Snc. 10. That section thirty-three hundred and ninety-four of the Revised Statntes of the United States, as amended, be, and the same is hereby, further amended, so as to read as follows:

Upon cigars which shall be mannfactured and sold, or removed for consumption or sale, there shall be assessed and collected the following taxes, to be paid by the manufacturer thereof: On cigars of all descriptions made of tobacco, or any substitute therefor, and weighing more than three pounds per thousand, three dollars per thousand; on cigars, made of tobacco, or any substitute therefor, and weighing not more than three pounds per thousand, one dollar per thousand; on cigarettes, made of tobacco, or any substitute therefor, and weighing more than three ponuds per thousand, three dollars per thousand; on cigarettes, made of tobacco, or any substitute therefor, and weighing not more than three pounds per thousand, oue dollar per thousand: Provided, That all rolls of tobacco, or any substitute therefor, wrapped with tobacco, shall be classed as cigars, and all rolls of tobacco, or any substitute therefor, wrapped in paper or any substance other than tobacco, shall be classed as cigarettes.

And the Commissiouer of Internal Revenue, with the approval of the Secretary of the Treasury, shall provide dies and adhesive stamps for cigars weighing not more than three pounds per thousand: Provided, That such stamps shall be in denominatious of ten, twenty, fifty, and one bundred, and the laws and regulations governing the packing and removal for sale of cigarettes, and the affixing and canceling of the stamps on the packages thereof, shall apply to cigars weighing not more than three pounds per thousand.

None of the packages of smoking tobaceo and fine-cut chewing tobaeco and cigarettes prescribed by law shall be permitted to have packed in, or attached to, or connected with, them, any article or thing whatsoever, other than the manufacturers' wrappers, and labels, the internal-revenue stamp and the tobacco or cigarettes, respectively, put up therein, on which tax is required to be paid under the internalrevenue laws; nor shall there be affixed to, or branded, stamped, marked, written, or printed upon, said packages, or their contents, any promise or offer of, or any order or eertificate for, any gift, prize, prewium, payment, or reward.

This act went into effect at midnight July 23 , or the first moment of July 24, 1897, and makes a distinction between small cigars and cigarettes.

Cigarettes wrapped with tobacco, which had before been called "all tobacco cigarettes," are now designated as cigars.

Immediately upon the passage of the act collectors were instructed to require manufacturers to inventory all cigarettes weighing not more than 3 pounds per thousand which they had on hand stamped at the old rate, 50 cents per thousaud; and in cases where cigarettes had been removed from the factory after July 23 , stamped at the old rate, assessments were made for the additional tax of 50 cents per thousand which this act imposed upon cigarettes.

Increasing the rate of tax on cigarettes under this act increased the receipts of tax, from that source alone, for the fiscal year ended June $30,1898, \$ 1,517,176.81$; and in this case the receipts increased in the same ratio that the rate of tax was increased. The receipts for 1897 from this source was $\$ 2,075,834.88$, while receipts for the fiscal year ended June 30, 1898, from this source amounted to $\$ 3,593,011.69$.

The act of June 13, 1898, increased the rate of tax on cigarettes weighing not more than 3 pounds per thousand to $\$ 1.50$ per thousand.

If cigarettes continue to be consumed as largely as ever, the collections from this source during the present fiscal year should amount to at least $\$ 5,000,000$.
the present rate of tax on cigars and cigarettes.
Section 3 of the act approved June 13, 1898, levies a tax of $\$ 3.60$ per thousand on cigars of all descriptions made of tobacco, or of any substitute therefor, and weighing more than 3 pounds per thousand; and $\$ 1$ per thousaud on cigars made of tobacco, or any substitute therefor, weighing not more than 3 pounds per thousaud; and a tax of $\$ 3.60$ per thousand on cigarettes made of tobacco, or any substitute therefor, weighing more than 3 pounds per thousand; and $\$ 1.50$ per thousand on cigarettes, made of tobacco or any substitute therefor, aud weighing not more than 3 pounds per thousand.

It will be seen that during the present fiscal year a tax equal to 20 per cent additional has been levied upon cigars and large cigarettes.

The receipts for the fiscal year 1897 from cigars were $\$ 12,189,507.29$, while the receipts for the fiscal year ended June 30, 1898, were $\$ 13,626,049.71$; showing an actual increase in production and consumption; the tax remaining the same, $\$ 3$ per thousand.

The increase in receipts for 1898 over the year 1897 amounted to $\$ 1,436,542.42$. With the increased rate of tax of 60 cents per thousand, the receipts from this source for the current fiscal year should, with a normal condition in the trade and manufacture, amount to $\$ 16,350,000$.

The receipts of the office show that during the fiscal year ended June $30,1898, \$ 405,676.88$ tax was collected under the act of July 24,1897 , on small cigars.

The receipts from tax levied on cigarettes weighing more than 3 pounds per thousand for 1897 was $\$ 4,748.13$, while the receipts for 1898 from the same source was $\$ 6,693.47$.

The only advantage of levying tax on cigarettes weighing more than 3 pounds per thousand equal to the tax levied on large cigars is that it confines the manufacture of cigarettes to legitimate channels.

Regulatious governing the packing and removal for sale of small cigars weighing not more than 3 pounds per thousand have been made since the approval of the act of July 24,1897 . As provided in that act, these cigars are required to be put up in packages containing 10, 20, 50 , or 100 cigars, respectively, and properly stamped and the stamps canceled before the cigars are removed from the place of manufacture.

The regulation relating to affixing and canceling stamps on packages of cigarettes applies to small cigars. Stamps are issued in denomina. tions of $10,20,50$, and 100 , the same as for cigarettes.

Increasing the rate of taxes had the effect of forcing upon the market a large quantity of tobacco which would, in the absence of new legislation, have found its way to the consumer in the usual course of trade.

The trade is largely governed by the demands of the consumers of tobacco, and while it is a fact that manufacturers of late years sell small packages rather than large, and make more frequent sales of tobacco and do not in consequence keep large quantities of old tobacco on their floors, yet it is understood that dealers generally ordered larger quantities of tobacco than formerly, in anticipation of increased taxes. And by reason of these circumstances the market has been to some extent overstocked and the receipts for the present fiscal year from tobacco must not be expected to reach in amount equal in ratio to the amount of the increased tar imposed by the act of June 13, 1898.

It is estimated, however, that the receipts from manufactured tobacco and snuff will be increased over those of last year at least 50 per cent,
and that $\$ 27,500,000$ will be collected from this source alone, and that $\$ 16,350,000$ will be collected from cigars, and that $\$ 5,000,000$ will be collected from cigarettes. The total collections on mauufactured tobacco, snuff, cigars, and cigarettes will amount to at least $\$ 43,850,000$.

## SPECIAL TAXES.

Section 26 of the act of October 1, 1890, repealed all special taxes then in force imposed upon dealers in leaf tobacco, dealers in tobacco, manufacturers of tobacco, manufacturers of cigars, and peddlers of tobacco.
Section 4 of the act of June 13, 1898, reimposes special taxes on dealers in leaf tobacco, dealers in tobacco (manufactured tobacco and cigars), manufacturers of tobacco, and manufacturers of cigars, from and after July 1, 1898.

The special taxes imposed on dealers in leaf tobacco and manufacturers of tobacco and manufacturers of cigars in each instance is a graduated tax, the amount of tax to be determined by the quantum of business done during the preceding fiscal year. The minimum rate of tax in each case being $\$ 6$; the intermediate rate $\$ 12$; while the last, or maximum rate, is $\$ 24$.
The rate of tax imposed on dealers in manufactured tobacco, snuff, or cigars, is $\$ 12$. This tax is imposed only on persons whose annual sales exceed 50,000 pounds.
There were no special taxes collected during the fiscal year ended June 30, 1898, from these sources.

The following is a statement of the receipts from special taxes imposed by section 4 of the act of June 13, 1898, on tobacco dealers and manufacturers for the first quarter of present fiscal year, ended September 30, 1898:

| Occupation. | Amount of taxes paid during- |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | July. | August. | September. | Total. |
| Dealers in leaf tobacco | \$25, 781.00 | \$13,862. 50 | \$3, 443. 50 | \$43, 087.00 |
| Dealers in tobacco. | 9,072.00 | 4,401. 00 | 567.00 | 14,040.00 |
| Manufacturers of tobacco | 9,204. 00 | 7,024.00 | 845.00 | 17, 073.00 |
| Manufacturers of cigars | 131, 933. 50 | 68, 734. 33 | 8,305.96 | 208, 973. 79 |
| Total | 175, 990.50 | 94, 021.83 | 13, 161. 46 | 283, 173.79 |

The receipts from tobacco, snuff, cigars, and cigarettes, and from special taxes impósed on tobacco dealers and manufacturers, for the quarter ended September 30 of the present fiscal year, should not be taken alone as the basis from which the yearly receipts from these sources may be determined or closely approximated.

Dealers, anticipating the increased taxes levied by the act of June 13, 1898, on tobacco, snuff, and cigars, purchased in May and June large quantities of these articles in excess of the usual demand, and the withdrawals of tobacco in the months of July, August, and September following, tax paid, during these months, were reduced below the general average, and at least one-fifth of the number of persons and firms who had previously registered as dealers in leaf tobacco, or as manufacturers, anticipating the special taxes imposed on these occupations, closed their business before the taxes accrued.

Six hundred and two tobacco manufacturers have closed since June 1,1898 , nearly all of whom were also cigar manufacturers.

While some persons have retired from business during the present tax year other persons have commenced business under the new conditions, and it is anticipated that there will be an increased supply of manufactured products before the close of the year which will compensate for the reduction in the supply at the beginning of the year.

The second paragraph of section 3 of the act of June 13, 1898, levied an additional tax of 3 cents per pound upon manufactured tobacco and snuff, 30 cents per thousand on cigars, and 25 cents per thousand on cigarettes which were manufactured, imported, and removed from factory or custom-house before the passage of the act, bearing tax stamps affixed to such articles for the payment of taxes thereon, and canceled subsequent to April 14, 1898, and which were held for sale by any person on June 14, 1898, the day succeeding the date of the passage of the act.

This act allowed the dealer having such taxable goods on hand an exemption of one thousand pounds of tobacco or snuff and twenty thousand cigars or cigarettes.

By the provisions of this act the tax was required to be collected by way of assessment against the persons having such goods on hand, and they were required to make returns under oath, in duplicate, as to the quantity of tobacco and snuff and cigars and cigarettes so beld on that day.

This office, in proceeding to collect the taxes so levied, prepared a form of return which was required to be made by every person who held such taxable articles for sale on June 14, 1898, in excess of the exemptions stated.

The following is a statement of the amount of taxes so returned and subsequently assessed by the Commissioner, as provided by said act:

ADDITIONAL TAXES ASSESSED.
[Number of dealers making returns, 4,120.]

| Kind of article. | Pounds. | Number. | Rate of tax. | $\begin{aligned} & \text { Amount } \\ & \text { of tax. } \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: |
| Manafactured tobacco | 23,671, 988 |  | 3 cents. | \$710, 159.66 |
| Snuft.: | 1,267, 539 |  | 3 cents. | 38, 026. 18 |
| Cigars |  | 167, 465, 566 | 30c. per M. | 50, 239.67 |
| Cigarettes |  | 217, 149, 360 | 25c. per M. | 54, 287. 34 |
| Total tar assessed | - | ------------ | -............ | 852,712.85 |

[Returns made by 277 manufacturers of goods stamped at old rate removed from factory after June 13,1898.]

| Kind of article. | Pounds. | Namber. | Rate of tax. | Amount of tax. |
| :---: | :---: | :---: | :---: | :---: |
| Mapufactured tobacco | 554, 917 |  | 6 cents. | \$33, 295.05 |
| Snuff...... | 460 | -- | 6 cents. | 27.60 |
| Cigars |  | 7, 004, 016 | 60c. per M. | 4,202. 41 |
| Cigarettes. |  | 960 | 50c. perM. | . 48 |
| Total tax assessed |  |  |  | 37, 525. 54 |

Note.-The above tables do not include assessments in third district of New York.
A large number of persons who were dealers in tobacco and cigars on the 14th day of June, 1898 , were exempt from payment of any tax so levied for the reason that the quantity of tobacco and cigars subject to tax held by them for sale on that day was not in excess of the exemptions allowed by law.

## TOBACCO TAX COLLEGTED.

The aggregate amount of taxes collected from tobacco during the fiscal year ended June 30, 1898, was $\$ 36,220,577.24$.
The collections were as follows:
Mannfactured tobacco, smoking and chewing......................... \$17, 657, 276.45
Snuff .............................................................................................. 931, 869.04
Cigars.................................................................................. 14, 031, 726.59
Cigarettes
3, 599, 705.16
Total collections
36, 220, 577. 24
This amount includes internal-revenue taxes paid by stamps on imported and domestic manufactured tobacco, but does not include $\$ 9,945.13$ miscellaneous collections on tobacco and cigars.

The internal-revenue taxes on imported manufactured tobacco, snuff, cigars, and cigarettes, are the same as on domestic, in addition to import duties levied upon these articles.

There was an increase of collections last fiscal year over the collections of the previous fiscal year amounting to $\$ 5,510,279.82$.

## INCREASED RECEIPTS.

The increased collections from each item stated were as follows:

| Manufactured tobacco |  | \$2, 013, 187.70 |
| :---: | :---: | :---: |
| Snuff.... |  | 135,750.67 |
| Cigars |  | 1, 84.2, 219.30 |
| Cigarettes |  | 1,519, 122.15 |
| Total increased receipts |  | $5,510,279.82$ |
| The following is a statement of tobacco for the past ten years: | he | eceipts from |
| 1889...................... \$31, 866, 860.42 | 1894 | \$28, 617, 898.62 |
| 1890...................... $33,958,991.06$ | 1895 | 29, 704, 907.63 |
| 1891....................... 32, 796, 270.97 | 1896 | 30, 711, 629.11 |
| 1892...................... 31, 000, 493.07 | 1897 | 30, 710, 297.42 |
| 1893....................... 31, $884,711.74$ | 1898 | 36, 220, 577.24 |

The amount received from special taxes relating to tobacco is included in the above up to the time such taxes were repealed May 1, 1891 (act of October 1, 1890).

Table E , in the Appendix at the close of the bound volume of this report, will show the receipts from this source by fiscal years from September 1, 1862.

COMPARATIVE STATEMENT.
The following exhibits show in detail the receipts for the fiscal year ended June 30, 1898, from tobacco tax as compared with the receipts for the previous fiscal year:

## Receipts from Cigars and Cigarettes.

| From cigars ....... <br> From cigarettes ... | $\begin{array}{r} \$ 14,031,726.59 \\ 3,599,705.10 \end{array}$ |
| :---: | :---: |
| Total | 17, 631,431.75 |
| Total for year ended June 30, 1897 | 14, 270,090.30 |
| Increase in collections | 3, 361, 341.45 |

Of this increase $\$ 1,842,219.30$ was from cigars, and $\$ 1,519,122.15$ was from cigarettes.

The following is a statement of the production. of tobacco, snuff, cigars, and cigarettes in the United States for the fiscal year ended June 30, 1898, and is computed from the receipts from taxes collected on all such goods as were put upon the home market for sale and consumption and to which is added the quantity removed in bond for export, without payment of tax. The quantity of such goods imported and upon which the internal-revenue taxes and custom doties were paid is deducted.

> Tobacco and Snuff Produced.

Pounde.
Tobaceo upon which tax was paid.......................................... 294, 287, 941
Snuff upon which tax was paid................................................. 15, 531, 150
Total tobacco and snuff taxed .......................................... 309, 819, 091

Total......................................................................... 323, 329, 259
Deduct tobacco and snuff imported ............................................... 278, 854
Net total domestic production for 1898............................... 323, 050, 405
Total productiou $1897 \ldots \ldots .$. ..................................... 290, 883, 195
Less imports.
333, 423
290, 549, 772
Increase over 1897.................................................................... $32,500,633$
The increase of taxed tobacco and snuff over fiscal year 1897 was $35,815,639$ pounds; the decrease in tobacco and suuff exported was 3,369,575 pounds, and the decrease in tobacco and snuff imported and withdrawn for cousumption was 54,569 pounds.

## Cigars.

Increase over fiscal year 1897
$488,878,525$
Note.-Cigars weighing not more than 3 pounds per 1,000 included with cigarette statement.

The increase of taxed cigars over fiscal year 1897 was $478,847,473$, the decrease in the number of cigars exported was 317,060 , and the decrease in the number of cigars imported and withdrawn for consump. tion was 10,348,112.

## CIGARETTES AND SMALL CIGARS.

The increase over the fiscal year 1897 in the number of cigarettes taxed was $6,123,316$ and of cigarettes exported $141,026,946$, and an increase of 921,640 in the number of cigarettes imported.

The statistics in regard to importations were obtained from the Bureau of Statistics, Ireasury Department, with the information that the "returns from collectors of customs do not distinguish between articles withdrawn from warehouse and those entered for immediate consumption on arrival."

These statistics gave the weight in pounds, rather than the number of cigars and cigarettes imported.

In preparing the foregoing tables it was assumed that the cigars imported would weigh 12 pounds and that the cigarettes would weigh 3 pounds per 1,000.

## RECEIPTS FROM TOBACCO PRODUCTS FOR FIRST THREE MONTHS OF PRESENT FISCAL YEAR ENDING JUNE 30, 1899.

The following is a statement of the taxes paid on tobacco, snuff, cigars, and cigarettes during the months of July, August, and September, 1898:

| Objects of taxation. | Amonnt of tax collected during- |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | July. | August. | September. | Total. |
| Manufactured tobacco, chewing and smoking, at 6 conts. | \$979.41 | \$92.40 |  | \$1,071.81 |
| Manufactured tobacco, chewing and smoking, at 12 conts. | 1, 505, 373.19 | $1,937,162.01$ | \$2, 189, 199.86 | 5,631, 735.06 |
| Snuff of all descriptions, at 6 cents ........... | 3, 139.73 |  |  | 3, 3, 439.73 |
| Snuff of all descriptions, at 12 cents .......... | 86, 191. 45 | 69,722. 35 | 91, 184.87 | 247, 098.67 |
| Cigars, weighing more than 3 pounds per 1,000 , at $\$ 3$ per 1,000 | 237.07 | 970.61 | 249.97 | 1,457.65 |
| Cigars, weighing more than 3 pounds per 1,000 , at $\$ 3.60$ per 1,000 | 1, 168, 681.64 | 1,285,218.90 | 1,352, 855. 19 | 3,806, 755.73 |
| Cigars, weighing not more than 3 pounds per 1,000, at $\$ 1$ per 1,000 | 41,298.74 | 40,174.99 | 41,322.27 | 122,796.00 |
| Cigarettes, weighing not more than 3 pounds per 1,000, at $\$ 1.50$ per 1,000 | 257,308.97 | 396,537.59 | 399,696.21 | 1,053,542.77 |
| Cigarettes, weighing more than 3 pounds per | 805.86 | 504.46 | 513.40 | 1,823. 72 |
| Total | 3, 064, 316.06 | 3,730,383. 31 | 4, 075, 021. 77 | 10, 869, 721.14 |

[^16]
## MANUFACTURERS OF TOBACCO.

The number of registered manufacturers of tobacco in the United States during the calendar year 1897 was 3,312. Of this number 1,252 did not manufacture, but qualified as manufacturers for the purpose of disposing of tobacco on hand or for the purpose of lawfully dealing and handling refuse scraps, clippings, cuttings, and waste, the by-products of cigar factories.

Sixty-two persons in Louisiana who grow and produce the variety of tobacco known as perique qualified as manufacturers so as to avail themselves of the privilege authorized by section 3362, as amended by act of January 9, 1883, of selling their tobacco, in the form of carrottes and without payment of tax, directly to other qualified manufacturers, to be used by them as material in the manufacture of cigarettes or smoking tobacco.

The sale of perique by the producer to the manufacturer is required by the regulations to be made under special permit issued by the collector.

The annual production of perique tobacco is about 180,000 pounds, principally raised in St. James Parish, La., and owing to the method adopted by planters in preparing and curing this class of tobacco the producers of the same are required to qualify as manufacturers, as it is in fact a manufactured tobacco, prepared and put up in the form of carrottes weighing from 3 to 5 pounds each.

One hundred and sixteen persons who qualified as manufacturers of tobacco confined their operations to the manufacture of snuff from tobacco, and only 8 of these persons manufactured over 100,000 pounds each. Eight large tobacco manufacturers also manufactured snuff, making the total number of snuff manufacturers 124.

About 870 persons who qualified as manufacturers of tobacco were alsso qualified manufacturers of cigars, and they qualified as manufacturers of tobacco for the purpose of preparing their scraps, cuttings, and clippings as merchantable smoking tobacco.

Deducting the number of persons, 1,252 , who qualified as manufacturers for the purpose of rehandling tobacco material, and the number of perique producers, 62 , and the number of cigar manufacturers, 874 , from the total number of qualified manufacturers of tobacco, it leaves only about 1,000 persons who qualified for the express purpose of manufacturing plug, cavendish, twist, fine-cut chewing, or smoking tobacco.

STATEMENTS SHOWING THE PRODUCTION OF MANUFACTURED TOBACCO, SNUFF, CIGARS, AND CIGARETTES DURING THE PAST TEN CALENDAR YEARS.

The following tables, showing the quantity of tobacco, snuff, cigars, and cigarettes manufactured in the United States during the past ten calendar years, are compiled from the reports received from collectors of internal revenue of the transactions of manufacturers in their several districts for each calendar year, a period of time differing from the fiscal year, and they relate exclusively to tobacco, snuff, cigars, and cigarettes of domestic manufacture. The statement of the annual production of these articles as ascertained from the tables is thought to be more nearly correct than the former statement of production computed upon the receipts from the sale of internal-revenue stamps.

It will be noted that the tables following are for the calendar year while the former tables related to the production for each fiscal year:

Manufactured Tobacco and Snuff Reported Produced in the United States during the Past Ten Calendar Years.

| Years. | Manufactured tobacco. | Snaff. | Years. | Manufactured tobacco. | Snuff. |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Pounds. | Pounds. |  | Pounds. | Pounds. |
| 1888 | 203, 906, 158 | ¢, 446, 858 | 1893 | 238, 587, 702 | 11, 952,736 |
| 1889 | 237, 119, 240 | 8, 040, 345 | 1894 | 257, 059, 333 | 11, 582, 838 |
| 1890 | 243, 427, 008 | 9, 434, 746 | 1895 | 263, 404, 840 | 10, 887, 709 |
| 1891 | $259,855,085$ | 10, 674, 241 | 1896 | 248, 708, 581 | 12,708, 919 |
| 1892 | 262, 412, 767 | 11, 426, 927 | 1897 | 283, 320, 857 | 13,768,455 |

There will be found in Table G, Appendix, at the close of the bound volume of this report, a statement showing "the amount of internal revenue derived from each kind of manufactured tobacco, including snuff, at each rate of tax under the several enactments, the quantities of the same on which the tax was paid, the date when each rate of tax was imposed and repealed, and the length of time the several rates were in force;" also a statement showing " the total internal revenue receipts from snuff, chewing and smoking tobacco, at the several different rates of tax, together with the different quantities of the same on which tax was paid, and the average rate of tax per pound on the aggregate quantities taxed each year, by fiscal years."

Statement Showing the Number of Cigars and Cigarettes Reported. Manufactured in the United States during the Past Ten Years.

| Calendar year. | Cigars. | Cigarettes. | Calendar year. | Cigars. | Cigarettes. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1888 | 3, 668,162, 486 | 2,211, 000,645 | 1893 | 4, 341, 240, 981 | 3,660,755,959 |

| 1892 | 4, 674, 708, 260 | 3, 282, 001, 283 | 1897 | 4,431,050,509 | 4,631, 820,620 |

Note.-Small cigars, 295,456,384, included in above statement under head "cigars for 1897."
There will be found in Table G, Appendix, at the end of the bound volume of this report, a statement showing "the amount of internal revenue derived from cigars, cheroots, and cigarettes at each rate of tax under the several enactments, the number of the same returned for taxation (exclusive of cigarettes on which an ad valorem tax was paid, the number of which can not be ascertained), the date when each FI 98-18
rate of tax was imposed and repeaied, and the length of time the several rates were in force;" also a statement showing "the total internal revenue receipts from cigars, cheroots, and cigarettes at the several different rates of tax, together with the number of the same on which the tax was paid during each fiscal year."

## DEALERS IN LEAF TOBACCO.

The sixth subdivision of section 3,244 of the Revised Statutes provides that "Every person shall be regarded as a dealer in leaf tobacco whose business it is, for himself or on commission, to sell, or offer for sale, or consign for sale on commission, leaf tobacco."

Section 4 of the act of June 13, 1898, imposes special taxes annually, from the first day of July in each year, on dealers in leaf tobacco, according to their classification; the amount of such annual taxes to be computed on the basis of the annual sales for the preceding fiscal year.

## RATES OF SPECIAL TAX.

Dealers in leaf tobacco whose anoual sales do not exceed 50,000 pounds are each required to pay $\$ 6$.

Dealers whose annual sales exceed 50,000 pounds but do not exceed 100,000 pounds are each required to pay $\$ 12$.

Dealers whose annual sales exceed 100,000 pounds are each required to pay $\$ 24$.

Dealers in leaf tobacco are required to confine their sales to three classes of purchasers, viz:

1. To other duly registered dealers in leaf tobacco.
2. To manufacturers of tobacco, snuff, or cigars.
3. To persons who purchase leaf tobacco in packages for export.

Dealers in leaf tobacco are required to make return and register and keep books, and may, under the law, be required to furnish sworn statements as to sales of tobacco made by them. They are required to enter daily in their books the number of hogsheads, cases, or pounds of leaf tobacco produced or received by them on consignment, assignment, transfer, or otherwise, and the nawes of the persons of whom they received the tobacco; and also a record of the number of hogsheads, cases, or pounds of tobacco sold by them, with the name and residence, in each instance, of the persons to whom the tobacco was sold.

The leaf dealer is required to keep two books; the entries in the same are to be, in every respect, iclentical and original entries, and they are required to transfer the Government's book, properly balanced, to the collectors of their respective districts at the close of each quarter, and to carry the balance of tobacco on hand at the close of the quarter to a new book for the ensuing quarter.

In pursuance of the provisions of section 3360 of the Revised Statutes, the Commissioner of Internal Revenue, by circular No. 505, dated July 23,1898 , adopted certain regulations prescribing the manner in which dealers in leaf tobacco should be required to keep books and the mode of making abstracts of their sales of leaf tobacco.

## SALE OF LEAF TOBACCO FROM BROKEN PACKAGES AND TO CONSUMERS PROHIBITED.

The second paragraph of section 69 of the act of August 28, 1894, entitled "An act to reduce taxation, to provide revenue for the Government, and for other purposes".provides that, "Every person shall also
be regarded as a manufacturer of tobacco whose business it is to sell leaf tobacco in quantities less than a hogshead, case, or bale; or who sells directly to consamers or to persons other than duly registered dealers in leaf tobacco or duly manufacturers of tobacco, snuff, or cigars, or to persons who purchase in packages for export; and all tobacco so sold by such persons shall be regarded as manufactured tobacco, and such manufactured tobacco shall be put up and prepared by such manufacturer in such packages only as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall.prescribe: Provided, That-farmers and growers of tobaceco who sell tobacco of their own growth and raising shall not be considered as manufacturers of tobacco."
In pursuance of the provisions of the act aforesaid, the Commissioner has established regulations relating to the manner in which leaf tobacco shall be prepared, labeled, branded, and stamped before the same is put upon the market for consumption or sale as manufactured tobacco.

## MANUFACTURERS SELLING LEAF TOBACCO.

The regulations provide that special permits will be given by the Commissioner of Internal Revenue authorizing tobacco or cigar manufacturers to sell leaf tobacco to another qualified manufacturer, or to a dealer in leaf tobacco, when it is ascertained that the material to be sold is not suitable for the special use of the manufacturer who desires to sell the same, or where the same is to be sold for the parpose of closing the factory; but no permit will be granted a manufacturer closing business unless it is ascertained, in advance, that there are no deficiencies in his material, production, or stamp accounts.

Manufacturers confining their business within the limits of the regulations are not required to register and pay special tax as dealers in leaf tobacco.
Dealers in leaf tobacco are privileged, by the regulations, to sell their scraps, waste, and broken leaf which accumulate at their warehouses; but such fragmentary or broken tobacco can only be sold by the dealer in bulk packages, as material, to a qualified manufacturer of tobacco or cigars, or to some person who is known to purchase tobacco in original packages for export.
Leaf tobacco, unless tax paid and properly packed, labeled, and stamped, can not be sold by a peddler of tobacco.
Manufacturers of tobacco have the right to prepare, put up, label, and stamp leaf tobacco the same as they would smoking tobacco-that is, in packages of denominations authorized by law for smoking tobacco or fine-cut chewing tobacco.

While the farmer is not restricted as to the sale of his leaf tobacco in its natural condition any mavipulation of it by him renders it liable to tax.
All tobacco is held to be manufactured that is in any manner changed after being dried and cured upon the farm where it is produced (except resweated leaf), such as being sweetened, pressed, doubled, rolled, plaited, twisted by hand, or otherwise reduced to a condition to be consumed. (Section 3368, R. S., as amended.)

## STATEMENT OF THE QUANTITY OF LEAF TOBACCO USED BY MANUFACTURERS DURING THE PAST TEN YEARS.

The quantity of leaf tobacco used in the production of tobacco, snuff; cigars, and cigarettes for the past ten years has been as follows:

| Year. | Pounds. | Product. | Total. |
| :---: | :---: | :---: | :---: |

## TABULAR STATEMENTS

SHOWING DETAILS RESPECTING THE MANUFAOTURE OF TOBACCO, SNUFF, CIGARS, AND. CIGARETTES FOR THE CALENDAR YEAR 1897:

The tables following show the manner in which the manufacture of cigars, cigarettes, tobacco, and snuff is distributed among the different Stafes and districts, the number of persous and firms engaged in each branch of manufacturing, the quantity of different kinds of material used, and the quantity and kinds of products manufactured. These tables are compiled from reports received from collectors of internal revenue of the transactions of manufacturers in their several districts for the calendar year ended December 31, 1897, a period of time differing from the fiscal year.ended June 30, 1898, which will account for any apparent discrepancies between them and the previous part of the report relating to tobacco production.

Tables Nos. 1 and 2 relate to the manufacture of cigars and cigarettes.

The total number of cigar manufacturers for which accounts were rendered for the calendar year 1897 was 31,435 .

The total number of cigars made weighing more than 3 pounds per thousand was $4,135,594,125$; an increase of $87,130,819$ over the previous year.

The total number of cigars made, weighing not more than 3 pounds per thousand, was $295,456,384$.

The total number of cigarettes made was $4,631,820,620$, showing a decrease of $335,623,612$ from the previous year. (Cigars weighing not more than 3 pounds per thousand have heretofore been included in the cigarette account.)

It is found from the manufacturers' reports that the average quantity of leaf tobacco used in making one thousand cigars weighing more than 3 pounds per thousand is 18.72 pounds. Some manufacturers use as much as 25 pounds, while others use not more than 10 pounds.

The quantity used in making small cigars weighing not more than 3 pounds per thousand varies from 1.75 pounds to 5 pounds per thousand.

The average quantity used in 1897 was 4.34 pounds.
${ }^{\circ}$ The quantity used in making cigarettes varies from 1.30 pounds per thousand to 5 pounds per thousand. The average quantity used was 3.77 pounds per thousand cigarettes.

The total quantity of leaf tobacco used in making cigars weighing more than 3 pounds per thousand was $77,452,711$ pounds.

The total quantity used in making cigars weighing not more than 3 pounds per thousand was $1,283,360$ pounds.

The total quantity used in making cigarettes was $17,477,402$ pounds.
The States in which the largest number of cigars were made were Pennsylvania and New York.

Cigarettes were made mostly in New York, Virginia, and North Carolina.

Tables Nos. 3, 4, 5, and 6 relate to tobacco and snuff.
There was an increase of 10 in the number of tobacco factories operating over the previous calendar year.

There was an increase in the quantity of leaf and scrap tobacco used of $47,612,033$ pounds, and an increase in all other materials used.

There was an increase of $1,059,536$ pounds in the quantity of snuff manufactured and of $1,914,210$ pounds of smoking tobacco, and an increase in the quantity of plug and fine cut manufactured, as follows:

Pounds.
Plug tobacco 32, 332, 488
Fine-cut tobacco.
365, 578
The States in which the largest quantities of chewing and smoking tobacco were manufactured are Missouri, Kentucky, Virginia, North Carolina, Michigan, and Ohio, as follows:

Pounds.
Missouri 63,016,016
Kentucky $43,178,425$
Virginia 35, 781, 394
North CaroIina 29, 960, 928
Michigan 19, 116, 680
Ohio 18, 062, 177
The district in which the largest quantity of tobacco was manufactured was the first Missouri, in which the returns show the manufacture of $62,502,175$ pounds.
New Jersey and Pennsylvania were the largest snuff-manufacturing States.
Snuff was manufactured more or less in 24 districts.
The largest snuff-producing district was the Fifth New Jersey, in which $4,954,409$. pounds were produced, and the next largest was the First Pennsylvania district, producing $3,422,121$ pounds.
The third largest was the Fifich district of Tennessee, producing 2,524,834 pounds.

## Table No. 2.-CIGARS and CIGarettes.

| Total leaf tobacco used | 357, 171, 033 |
| Average quantity of leaf tobacco used per 1,000 large cigars. | 18.72 |
| Average quantity of leaf tobacco used per 1,000 small cigars | 4.34 |
| Average quantity of leaf tobacco used per 1,000 cigarettes | 3.77 |

## CHEWING GUM.

The act of June 13, 1898, under Schedule B, levies a tax on chewing gum, or substitutes therefor, as follows:

For and upon each box, carton, jar, or other package containing chewing gum of not more than $\$ 1$ of actual retail value, 4 cents; if exceeding $\$ 1$ of retail value, for each additional dollar or fractional part thereof, 4 cents; under such regulations as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may prescribe.

This office on the 27 th day of June, 1898, with the approval of the Secretary of the Treasury, prescribed regulations relating to the tax on chewing gum, or substitutes therefor, as set forth in Department Cir-
cular 120, Internal Revenue No. 498 , in which it was provided: "That the maker and manufacturer of chewing gum, or substitutes therefor, should on or after the 1st day of July, 1898, be required to affix to each and every box, carton, jar, or other package containing chewing gum, before its removal from the factory, proprietary stamp or stamps denoting the payment of tax, and to properly cancel the same.".

It is also provided that the manufacturer should affix a label on each box, jar, or package containing chewing gum, upon which should be printed the retail value of the chewing gum contained in each such package; and also a label upon which should be printed, in plain and legible letters, the manufacturer's name, with town or city address, and the number of district and State in which the factory is located. Samples for salesmen, or for mailing, or for free distribution are required to be taken only from packages which have been duly stamped.

Chewing guin intended to be sold from automatic vending or selling machines is required to be, kept in the regularly stamped boxes, packages, or containers until placed in the machine.

This office has not required the manufacturers to make any returns which would show the quantity of chewing gum manufactured, or the amount of tax paid thereon. Manufacturers at the end of each and every month are required to file with the collectors of internal revenue for the districts in which they reside, a declaration as provided in section 23 of said act, but this declaration does not show the quantity of chewing gum produced.

The office has no records which would show the amount of revenue derived from tax on chewing gum.

OPIUM.
Section 36 of the act of October 1, 1890, provides that an internalrevenue tax of $\$ 10$ per pound shall be levied and collected upon opium manufactured in the United States for smoking purposes.

No person can engage in such manufacture who is not a citizen of the United States.

There are no legal manufacturers of opium in the United States, and practically no revenue has been derived from this source.

The internal-revenue receipts for the last fiscal year from tax on opium amounted to $\$ 114.90$.

## DIVISION OF LAW.

The following is an abstract of reports of district attorneys for the fiscal year 1897-98 of internal-revenue suits and prosecutions pending, commenced, and disposed of:

RECAPITULATION.

## ABSTRACT OF SEIZURES.

Seizures of property for violation of internal-revenue laws were made during the year ended June 30, 1898, as follows:

Under the head of "Miscellaneousproperty seized" the following articles are included, viz: Oleomargarine, cigarettes, breweries, tobacco factories, fruit and grain distilleries, illicit stills, realty, empty packages, teams and wagons, playing cards, etc.

The value of property seized during the previous fiscal year was $\$ 342,761.43$, making an increase during the past year of $\$ 71,654.23$.

There will be found in Table K, Appendix, at the close of the bound volume of this report, a statement showing the quantity of property seized in the different States.

Abstract of Seizures of Property for Violation of Internal-Reyenue Laws for the Months of Júly, August, and September, 1898.

## RECAPITULATION.

## ABATEMENT OLAIMS.

On the 1st of July, 1897, there were pending 602 claims for abatement of assessed taxes, amounting to $\$ 55,883.88$, and during the year 3,668 claims, amounting to $\$ 2,618,081.14$, were presented. Of these, 2,770 claims, amounting to $\$ 1,995,393.50$, were allowed during the fiscal year, and 778 claims, amounting to $\$ 206,112.33$, were rejected or returued for amendment.

This left 722 claims for abatement pending on the 30th of June, 1898, amounting to $\$ 472,459.19$.

Since that date and up to October 1,1898, 619 other claims have been filed, amounting to $\$ 59,934.77$, and 181 claims have been allowed, amounting to $\$ 9,811.48$, and 64 rejected or returned for amendment, amounting to $\$ 8,982.53$, and on the 1st of October, $1898,1,096$ claims for abatement were pending, amounting to $\$ 513,599.95$.

The decrease in the number of abatement claims allowed during the last fiscal year below the number allowed during the previous year is 970 , while the amount abated is $\$ 1,720,121.27$ larger. This discrepancy results from the abatement of one very large assessment, exceediug $\$ 1,000,000$, on account of spirits destroyed by fire.

## REFUNDING CLATMS.

On the 1st of July, 1897, there were pending 187 claims for the refunding of taxes collected, amounting to $\$ 111,342.16$, and during the year 271 other claims, amounting to $\$ 62,544.79$, were presented. Of these, 110 claims, amounting to $\$ 9,503.93$, were allowed during the fiscal year, and 134 claims, amounting to $\$ 49,758.47$, were rejected or returned for amendment.

This left 214 claims for refunding still pending on the 30th of June, 1898, amounting to $\$ 114,624.55$. Since that date and up to the 1st of October, 1898, 130 other claims, amounting to $\$ 13,320.52$, have been received, and 32 claims, amounting to $\$ 2,016.30$, have been allowed, and 38 claims, amounting to $\$ 9,692.14$, have been rejected or returned for amendment. On the 1st of October, 1898, 274 claims for refunding, amounting to $\$ 116,191.03$, were pending.

There were 11 more claims allowed during the past fiscal year than during the previous year, and $\$ 1,105.21$ more refunded.

## VIOLATIONS OF INTERNAL-RIVENUE LAWS.

Violations of the Internal-Revenue Laws Charged and for which Prosmcutions. were Instituted during the Fiscal Yfar ended June 30, 1898, and also tee Prosecutions Pending on July 1, 1898.

SALES UNDER SECTLON 3460, REVISED ETATUTES.
The property which is seized for violations of the internal-revenue laws, where it is not over $\$ 500$ in value, is sold by the collector, unless the claimants furnish a bond, as provided by section 3460, Revised Statutes, and take the case into court.

The following amount was realized from sales under section 3460 during the past fiscal year:
Gross sum
$\$ 23,867.10$
Expenses
20, 469.45

Net amount deposited
3,397. 65

Statement showing, by States and Territories, the Actual Number of the Difficrent Kinds of Sphclal-Tax Payers for tee Fiscal Year ended June 30, 1898.

' costs.
Under section 3216, Revised Statutes, all moneys coming into the hands of clerks of courts in cases arising under the internal-revenue laws, including the costs, are required to be paid to collectors of internal revenue.

There has been some contention whether costs in such cases should be paid to collectors by clerks of courts, but upon the matter being referred to the Attorney-General the view of this office was sustained, and a circular letter was issued by the Attorney-General April 20, 1898, to clerks of courts, as follows:
[Circular.]

## Io Clerlss of United States Courts:

You are instructed in all cases in your several courts arising under the internalrevenue laws of the United States, where moneys are recovered and paid in for the United States, to pay over such moneys to the collectors of internal revenue under the provisions of section 3216 of the Revised Statutes of the United States. The bills of costs in such cases include the fees taxed by law for the marshals and United States attorneys, and, by virtue of section 983 of the Revised Statutes, the bill of costs in each case is a part of the judgment, and will be paid by you to the collector as above indicated.
Moneys coming into the hauds of clerks of the courts belonging to the United States otherwise than in cases and proceedings under the internal-revenue laws will be promptly covered into the Treasury as required by law.

Respectfully,
Washington, D. C., April 20, 1898.
John W. Griggs, Attorney-General.

## rebate of tax on alcohol used in the arts, erc.

A large number of suits were brought in the United States Court of Claims under section 61 of the act of August 28,1894 , providing that manufacturers using alcohol in the arts or in any medicinal or like compound, under regulations to be prescribed by the Secretary of the Treasury, should, on furnishing certain proof, receive a rebate or repayment of the internal-revenue tax paid on such alcohol. Of this class of cases there are now pending 1,154 , the amount involved in which is about $\$ 4,100,000$.

The act authorizing the rebate was repealed June 3, 1896. The second section of the repealing act authorized the appointment of a joint committee to "consider all questions relating to the use of alcohol in the manufactures and arts free of tax and to report their conclusion to Congress." (29 Stats., 195.)

The case of Dunlap $v$. The United States, a test case to determine the question of the liability of the Government under section 61 of the act aforesaid, was decided by the Court of Claims December 6, 1897. The court rendered judgment in favor of the United States, and the case has been appealed to the United States Supreme Court, being No. 547 of the October term, 1897.

The gist of the decision is in the following words: "The right of the manufacturer to a rebate being dependent on the regulations of the Secretary, such regulations are conditions precedent to his right of repayment, and therefore no right of repayment can vest until in pursuance of regulations the manufacturer uses alcohol as contemplated by the statute."

The Secretary of the Treasury, in his annual report, 1894, furnished for the information of Congress the correspondence between the Secretary and the Commissioner of Internal Revenue upon this subject; also, a dratt of the proposed regulations for carrying out section 61.

The case of Robert Dunlap $v$. The United States was advanced on the docket of the Supreme Court to be heard in November.

## EXtracting spirits from distillers' empty packages.

A decision was rendered in the United States circuit court of appeals, for the seventh circuit, at the January session, 1898, in the case of James W. Hunter, collector of internal revenue for the fifth collection district of Illinois, v. E. S. Corning \& Co., to this effect:

The soakage of spirits into distillers' packages, not being included in the basis of computation, is not a part of the quantity upon which the tax is levied, and consequently, when extracted from the empty barrels, it is spirits on which the lawful tax has not been paid, and is subject to taxation.

## The facts in this case were:

That the defendant in error prior to March 31, 1898, had been engaged at Peoria, Ill., in compounding and in selling at wholesale and retail, whereunto it was duly licensed, whiskies, gins, spirits, and other alcoholic and vinous liquors, and that prior to that date it had purchased at one time 25 and at another time 15 barrels of spirits of the American Spirits Manufacturing Company, which was engaged in the production of spirits, alcohol, and high wines at the Monarch Distillery at Peoria, IIl.; that on the barrels so purchased were the proper warehouse numbers and taxpaid stamp numbers, and that the proper tax thereon had been in fact paid by the manufacturer and received by the Government; that under and by virtue of the internal-revenue laws of the United States, and the rules and regulations of the Commissioner of Internal Revenue a certain allowance was made to the manufacturer of distilled spirits for soakage, and that the packages aforesaid had received the benefit of such allowance to the manufacturer of said spirits, and that said manufacturer had in all respects fully complied with the internal-revenue laws of the United States and all rules and regulations thereunder pertaining to the manufacturing tax upon the spirits aforesaid; that after emptying and using the contents of the 25 barrels first named, under and by a process in use by the plaintiff, it extracted from the wood of the barrels a portion of the soakage therein, amounting to 42.20 gallons of 15 per cent proof; that the proof gallons thereof were 6.33 and the taxable gallons 6.3, if liable to tax; and that in like manner it extracted from the 15 barrels, after emptying and disposing of the contents thereof, as soakage, 34.73 net wine gallons of 13 per cent proof, making 4.51 proof gallons and 4.5 taxable gallons, if the same were subject to tax; and that on the spirits so produced the defendant, as collector, exacted of the plaintiff the sum of $\$ 11.88$, of which repayment had been duly demanded and refused.

The decision was published in Treasury Decisions, volume 1, page 522.

## oleomargarine cases in west virginia.

The case of Hubbard \& Paull $v$. E. M. Gilkeson, collector of internal revenue, being one of seventeen cases against Gilkeson as collector of internal revenue, and known as the "oleomargarine cases," was tried in the United States circuit court for the district of West Virginia in April, 1898. -It was a suit to recover from the collector money paid as special tax as retail dealer in cleomargarine and the 50 per cent penalty. The plaintiffs offered testimony to the effect that they bought the substance as creamery butter, thought it was creamery butter at the time, paid creamery butter prices, and sold it as creamery butter.

Judge Jackson held that parties selling oleomargarine were liable to special tax although they were ignorant that the substance was oleomargarine, and charged the jury, in part, as follows (see Treasury Decisions, No. 15, p. 595):

Ordinary caution, ordiuary prudence, should have suggested to these partics the importance and uecessity, for self-protection, of au investigation of the character of the goods they were buying and which these parties were selling. All of us do that when we buy anything. We ask about it and we look at it. When we go to our grocers or to our provision people to buy butter, or anything of the sort, what do we do 9 We look at it; we examine it and satisfy ourselves about it. We do not take our chances on it, but if it is not what we want, or in good order when delivered to us, we send it back. But here was a business concern-one of the largest firms in the city-shipping these goods. If the plaintiffs did not know the character of those goods they ought to have known it. It was their duty to know it. Ignorauce did not excuse them of the fact that the Government required a tax upon this character of butter, or oleomargarine, or whatever it was. Prudence and caution should have suggested to them that they satisfy themselves about it. They did not do it. There was negligence and a failure to perform a necessary duty upon their part in dealing with goods that the Government required a stamp to be fixed upon before it could be sold. But it is said that these plaintiffs were innocent and ignorant. That may be, and I hope they were (I do not say they were not). But is ignorance of the law any excuse or any protection to an individual for a violation of the law Unquestionably not. If ignormace is to be pleaded in defense of violations of statutes
of this character in order to discharge its liabilities, where will the Government ever succeed in obtaining any revenue from internal revenue-sources?

What, then, is the legal status of the plaintiffs in this caseq It is simply this: That they neglected to perform the ordinary duties and to take the ordinary care that cantious business men shonld take. They trusted these men when they should have trusted themselves a little. Ignorance is no excuse. This matter led to an investigation upon the part of the Goverument, through its various officers, as to these transactions. The Commissioner of Internal Revenue directed an investigation through various deputy officers in that department. That investigation was had, and afterwards reports were made to the Commissioner of Internal Revenue, and he directed tbat these people be assessed with the taxes as well as the penalty. Then an application was made by these parties to the Commissiouer at Waslington to have not only the tax but the penalty refunded. The Commissioner heard the case aud refused to do it. Here is a prima facie case made out by the officers of the Government, whose duty it was to enforce these laws, after a careful examination not only by one special agent of the Department, but by half a dozen or more. Chemical analysis was also had, which established the fact that this was oleomargarine.
Now, then, the presumption of law in this case is that when these special agents investigated this matter and reached their conclusions in reference to it, and decided that the acts of these parties wore violations of the law, they honestly and faithfully discharged their duties. When that presumption arose upon the facts of the case, it became iucumbent upon the plaintiffs in the action to overthrow that presumption and to satisfy the minds of the jury that these special agents of the Department had made a mistake. Upon the weight of the evidence in this case that presumption has not been overthrown, in my judgment.

## SPECIAL TAXES.

Judd. O. Hartzell filed his petition in the United States district court ${ }^{\circ}$ for the southern district of Illinois, November 16, 189ㄱ, asking for judg. ment against the United States for the sum of $\$ 960$ special taxes and 50 per cent penalty assessed against him and collected from him as a wholesale dealer in oleomargarine. The facts on which Hartzell was held liable, under the internal-revenue law, as a wholesale dealer in oleomargarine were that he ordered at various times original packages of oleomargarine, which were entered as sold to him by Armour and the Arpour Packing Company, and were so shipped to him, and on their arrival were delivered to Owen, a hotel keeper. It was shown that, at the suggestion of traveling salesmen for Armour \& Co., and for a wholesale house in Chicago, who turned the orders received over to that company, Owen had requested Hartzell to order these packages of oleomargarine for him, and that Hartzell did so as a matter of accommodation. On the general doctrine that the knowledge of an agent is the knowledge of the principal the court gave its decision in favor of Hartzell, although it had not been shown that the salesmen of Armour \& Co. and the Armour Packing Company were authorized to commit their principals on this uuderstanding between $O$ wen and Hartzell. It appears that these companies actually knew nobody but Hartzell in their sale and delivery of the stamped packages of oleomargarine in question and believed that they were selling to him. The decision was published in 83 Federal Reports, page 1002.

This office did not feel warranted in accepting this decision as a correct construction of the law to apply it as a rule to the oleomargarine cases throughout the United States, and the case was appealed. No decision has yet been rendered.

## CASE OF CORNING \& CO. V. THE UNITED STATES.

Prior to the passage of the act of August 28, 1894, the tax on distilled spirits was 90 cents per gallon and the bonded period three jears.

Corning \& Co. were the owners of a large quantity of spirits stored in bonded warehouses in the fifth district of Illinois and the eighth dis. trict of Kentucky. After the spirits had been sometime in warehouse and before the expiration of the bonded period, requests for a regauge were made and granted. The regauge showed the contents of the packages to be as follows: Stored in Fifth Illinois, 71,032 gallons; stored in Eighth Kentucky, 65,047 gallons. After the regauge had been made the owners decided not to withdraw the spirits and they remained in the warehouses until near the expiration of the bonded period, when other requests were made for a second regauge, which were denied upon the ground that section 17, act of May 28, 1880, provided for one regauge and by implication for only one. The spirits were thereupon with. drawn, and the spirits regauged at the expense of the owners. This second regauge showed the contents of the packages to be as follows: In Fifth Illinois, 67,107 gallons, and in Eighth Keutucky, 61,753 gallons.

The parties were required to pay and did pay the tax of 90 cents per gallon on the quantity of spirits as shown by the first regauge, but contended that they should have paid only on the spirits according to the second regauge. The tax on the difference ( 7,219 gallons) amounted to $\$ 6,497.10$. Suit was brought in April, 1896 , in the Court of Claims for the recovery of this amount, which suit is still pending, No. 19963.

## DISCOUNT ON BEER STAMPS.

Prior to the act of July 24, 1897, brewers duly qualified under the $\circ$ interual-revenue laws were entitled to purchase beer stamps for use in their business, and were allowed upon all sales of such stamps used in their business a deduction of $7 \frac{1}{2}$ per cent, under the provisions of section 3341, Revised Statutes. The act of July 24, 1897, which went into effect upon its passage (section 9), amended section 3341 by omitting the provision allowing such discount, consequently on and after the date on which this act went into effect no discount was allowable upon such purchase of beer stamps. There was a large demand upon collectors for stamps prior to the passage of the act, in anticipation of its passage. More than were needed by brewers in their business and more than could be supplied were called for, exhausting the supply on hand.

A circular letter was sent to collectors of internal revenue on the 30th of July, 1897, of which the following is an extract:

You are hereby instructed to collcet from all brewers in your district the discount of $7 \frac{1}{2}$ per cent which was allowed on beer stamps delivered by you on or after the $24 t h$ instant, without regard to date of order for such stamps.

In case of neglect or refusal of brewers to pay the same after demand you will report them for assessment on your July list.

Where assessments were made in accordance with these instructions and the amounts paid, and applications made for refund, this office rejected the claims. It was held:

[^18]tion of $7 \frac{1}{2}$ per centum." It was not alleged that the stamps purchased July 24, 1897, were used by the brewers prior to the repeal of the provision above referred to. In fact, it is understood that said stamps were not so used until after the approval of the repealing act. (Treasury Decisions, No. 10, p. 405.)

## the cincinnati brewing company v. united states.

May 11, 1898, The Cincinnati Brewing Company, a corporation organized and existing under the laws of the State of Ohio, and engaged in the business of brewing fermented liquors in Hamilton, Ohio, first collection district, instituted a suit in the Court of Claims to recover $\$ 1,695$, being $7 \frac{1}{2}$ per cent discount oń beer stamps purchased July 24, 1897. It was claimed that the President signed the act of July 24, 1897, at six minutes after 4 p. m. on that day, and that the law became effective at that moment, and not at the beginning of the day.

The claimant had previously made a claim for the refund of this sum, which claim was disallowed on the grounds above stated. The case is still pending.

TIME WHEN THE ACT OF JULT 24,1897 , TOOK EFFECT.
The question as to what time the act of July 24,1897 , took effect was involved in the case of the United States v. William Iselin et al., which was tried in the United States circuit court for the southern district of New York. The decision affirmed the decision of the Board of General Appraisers that the act became effective at the precise time of the day at which it was signed by the President, and not at the beginning of the day. ( 87 Fed Rep., 194.) The case was appealed to the circuit court of appeals, where it is still pending.

The same question was involved in the case of the United States $v$. Stoddard, Hazerick, Richards \& Co., tried in the United States circuit court, district of Massachusetts, on April 18, 1898. . The decision of that court was to the same effect, and affirmed the decision of the Board of General Appraisers.

## AMERICAN BREWING COMPANY V. UNITED STATES.

In some cases brewers ordered beer stamps prior to the passage of the act aforesaid, but the stamps were not furnished until after the passage of the act, when they were delivered to them on their face value. A suit was instituted in the Court of Claims against the United States by the American Brewing Company (No. 20928), in which the claim was made for the discount of $7 \frac{1}{2}$ per cent allowed by law on the date when the stamps were ordered.

The case was decided, April 11, 1898, adversely to the claimants (Treasury Decisions, Vol. 1, No. 15, p. 599). The following are the main points of the decision:

Under the act of July 24,1897 ,* a brewer was compelled to pay the full face value of the stamps purchased, without deduction of $7 \frac{1}{2}$ per cent previously allowed by section 3341 Revised Statutes.

The purchase of stamps by a brewer does not technically pay the tax on his production. The tax is paid when he attaches his stamp to the barrel for the purpose of putting the product on the market.

[^19]The right to the 7it per cent discount is not consummated by the mere act of purchase, but is dependent upon the further condition of the stamp being used by the brewer.

Although the law uses the word sale as applicable to the delivery and transfer of stamps, they do not thereby become a commodity of merchandise in the market.

The collector in accepting drafts in payment of tax acts without authority of law and does not bind the United States.

The collector's agency in the sale of stamps is limited to the sale of stock on hand, but does not confer the right to sell for a future delivery.

OASE OF CERTAIN BREWERS WHO CLAIM THAT MONEY FURNISHED BY THEM TO THE OOLLECTOR OF THE FOURTEENTH DISTRICT OF NEW YORK FOR STAMPS HAS BEEN MISAPPLIED.

Prior to July 24, 1897, when the bill was pending in Congress to repeal the provision above referred to, allowing this discount, certain brewers in New York applied to L. W. Pratt, then collector of the fourteenth district of New York, for large quantities of beer stamps, and deposited money or checks in payment.

The collector not having sufficient stamps on hand to fill the orders in full filled them in part and retained money or checks for other stamps for future delivery. In certain cases he failed either to deliver the stamps, return the money or checks, or account for the money to this office.

The matter was at once fully investigated, and it was ascertained that the collector did receive amounts from brewers which he did not account for, The amount involved was $\$ 19,585.30$.

The brewers made claims for the refunding of such amounts, but the claims were rejected on the ground that the collector had no right to receive money from the brewers for stamps when he had no stamps to sell, and that the brewers had no right to leave their money with the collector in payment for stamps to be delivered in the future, except at their own risk, and that the Government was in no way liable for the failure of Collector Pratt to account for the money so received.

The position taken by this office that the Government was not liable was in accordance with decisions of the United States Supreme Court and of the Court of Claims in the case above referred to.

CASES AGAINST COLLECTORS INVOLVING THE GIVIL-SERVICE LAW AND REGULATIONS.

The following cases were taken to the Supreme Court of the United States on appeal from the United States circuit court for the district of West Virginia, viz: A. B. White, collector of internal revenue for the district of West Virginia, et al., appellants, against H. C. Berry, William Butler, and J. C. Ruckman, appellees. The appellees were gaugers and storekeepers at the Hannis distillery in West Virginia.

The cases were based upon orders of the Commissioner of Internal Revenue relieving the storekeepers and gaugers from duty and assigning other storekeepers and gaugers to duty in their places. The storekeepers and gaugers resisted on the ground that they were protected under the civil-service law, and the judge, sitting in the United States circuit court of West Virginia, issued an injunction enjoining the operation of said orders.

The cases involved the construction of sections 3154 and 3163 of the Revised Statutes, and the powers and duties of the Commissioner of Internal Revenue with respect to the transfer and assignment of inter-nal-revenue storekeepers and gaugers; and further, the effect of the act of 1883, known as the civil-service act, and the Executive orders from time to time made and issued thereunder, and whether the courts of the United States can by injunction restrain the collectors of internal revenue in the various districts, or the Commissioner of Internal Revenue acting through the collectors, from relieving from duty storekeepers and gaugers, or from assigning these officers to duty, or transferring them from one place of duty to another.

The decision of the United States Supreme Court was rendered May 31,1898 , reversing the decision of the circuit court, and holding that the circuit court sitting in equity was without jurisdiction to entertain the suit.

Mr. Justice Harlan, in delivering the opinion of the court in the case of White $v$. Berry, said:

If the assignment of some one to duty as gauger at the Hannis distillery, in the place of the plaintiff, did not work his removal from office, a court of equity ought not to assume to control the discretion which under existing statutes the executive department has in all such matters. Interference by the judicial department in such cases would lead to the utmost confusion in the management of executive affairs.

But the plaintiff contends that the assignment of some one to duty in his place at the Hannis distillery is, in effect, a removal of him from his office in violation of law, and that the object of the proceedings against him was to bring about that result. But, under the authorities cited, such proceedings can not be restrained by a court of the United States, sitting in equity, and therefore the court below erred in passing the final decree which has been brought here for review.

A decision was rendered by Judge Lurton in the United States circuit court for the middle district of Tennessee in the case of William C. Morgan v. D. A. Nunn, collector, refusing a motion to restrain the collector from removing a general clerk in his office, holding that a court of equity will not, by injunction, restrain an executive ofticer from making a removal of a subordinate appointee; and that, in the absence of constitutional or statutory regulation, the power of appointment carries with it the power of removal.

A decision was rendered by Judge Kirkpatrick in the United States circuit court of New Jersey, in the case of R. Harry Page et al. v. Isaac Moffett, collector, denying a motion to restrain the collector from removing a deputy collector.

It was held that deputy collectors of internal revenue are appointed under section 3148 , Revised Statutes, and that the power of removal rests with the appointing power, the collector, subject to such requirements as to notice as the Commissioner of Internal Revenue may prescribe, and that such action can not be reviewed by an appeal to the courts.
*These decisions explain the civil-service law and regulations in regard to removals. (Treasury Decisions, vol. 1, No. 8, p. 336.)

[^20]SUBPGENAS UPON COLLECTORS OF INTERNAL REVENUE TO PRODUCE RECORDS.

The United States circuit court of appeals affirmed the decision rendered by the United States circuit court for the district of Conuecticut in the case in re Hirsch adversely to the contention of the Government that the collector or deputy collector of internal revenue could not properly be compelled to produce the records of his office by subpena duces tecum issued out of the State courts. It was not deemed advisable to take a further appeal in this case, in view of the special weight given by the circuit court to the fact that the note on pages 41 and 42 , Regulations, Series 7, No. 12, Revised, does not amount to a regulation prohibiting collectors, in-expressed terms, from giving out special-tax records, or copies thereof, for any purpose not contemplated by the internal-revenue law.

The decision rendered by the United States circuit court for the district of Vermont in the case in re Weeks (82 Fed. Rep., 730) fully sustains the position of this office on the question in dispute. This office has formulated a clear and definite regulation on the subject, and inserted it in the existing code of regulations, with the approval of the Secretary of the Treasury, in order to prevent the question being raised hereafter, since the opinion of the court in the Hirsch Case implied that if such regulation had existed, the decision would have been otherwise. This regulation is known as Supplement No. 1 to Series 7, No. 12, Revised, and is dated April 15, 1898, and is published in Treasury Decisions, No. 15, page 593.

## TEST CASE IN REGARD TO COUPONS IN PACKAGES OF TOBACCO.

The Commissioner in his last annual report referred to the provision respecting articles of a foreign nature inside statutory packages. The last paragraph of section 10 of the act of July 24, 1897, prohibits packages of smoking tobacco, fine-cut chewing tobacco, and cigarettes from having packed in, or attached to, or connected with them, "any article or thing whatsoever" of a foreign nature, and provides that there shall not be affixed to, or branded, stamped, marked, written, or printed upon said packages, or their contents, any promise or offer of, or any order or certificate for, any gift, prize, premium, payment, or reward.

A test case is being made to determine the question whether there is any penalty provided for violations of this provision, and also to determine the question as to its constitutionality.

I regard the matter as one of importance, and desire to have the questionsinvolved settled before an effort is made to put this provision into general execution and direct seizures of tobacco where this provision is not observed. The test case will be made in West Virginia, and steps have been taken to have the matter properly brought before the court.

## SUII'S ON COLLECTORS' BONDS.

Two suits are pending in the United States circuit court, northern district of California, on the bonds of O. M. Welburn, late collector of internal revenue, First district of California.

Az suit on the bond of Welburn as collector, dated December 26, 1893, was begun February 11, 1898, to recover $\$ 40,870.47$ embezzled, and another on his bond as disbursing officer, dated February 20, 1894, was begun July 15, 1898, to recover $\$ 15,463.89$ embezzled.

A suit has been instituted against Ambrose W. Lyman et al., action on Lyman's bond as collector of internal revenue for the district of Montana. Amount claimed, $\$ 8,232.93$, on account of the defalcation of R. H. Cabell, deputy collector. The cause is on the general calendar of the United States circuit court for the southern district of New York, and will probably be reached in the October term. These cases are under the charge of the Solicitor of the Treasury.

## WAR-REVENUE ACT.

The act of June 13, 1898, known as the war-revenue act, has increased the work in this division.
The new special taxes imposed upon bankers, brokers, pawnbrokers, commercial brokers, custom-house brokers, proprietors of theaters, museums, concert halls, circuses, and proprietors of other public exhibitions or shows for money, also proprietors of bowling alleys and billiard rooms, which went into effect July 1, necessitated a large correspondence with officers and individuals.

## oircular letter to collectors of internal revenve RELATIVE to THE 50-PER-CENT PENALTy.

Letters addressed to this office from all parts of the United States by persons who had become liable for special taxes under the provisions of the second section of the act of June 13, 1898, and who, having failed to make the prescribed return (Form 11) under oath within the calendar month in which their liability began, had been calied upon by collectors to pay 50 per cent in addition to the tax, showed that these persons, while aware of their special-tax liability under the new (warrevenue) act, had no knowledge or notice that it was their duty, under section 3237, Revised Statutes, amended, to make sworn return regarding their business to the collector not later than the last day of the calendar month in which their liability began.

The war-revenue act gave them full notice as to their special-tax liability, but gaye them no information of the requirement that they should make formal sworn return to the collector within the time prescribed by section 3237, Revised Statutes, as amended by section 53 of the act of October 1, 1890.

There being nothing in the new law specially calling the attention of the public to the provisions of section 3237, Revised Statutes, amended, as applicable to these new classes of special-tax payers, it was considered unjust to regard the provisions of section 3176, Revised Statutes, as requiring imperatively the addition of 50 per cent to the taxes due in these cases, as if they were on the same footing with special-tax payers under the old law, who had for many years complete information as to what is required of them, not only through published official notices but also through the express terms of the law itself and the regulations and instructions issued thereunder.

A circular letter was issued September 3,1898 , and published in Treasury Decisions, No. 10, page 489 (No. 20001), authorizing collectors for this time, in all cases of persons who had neither notice nor information that they were required to make sworn return within the calendar month when their liability began, and who, consequently, failed to make such return, to report the facts for assessment of the special tax without the 50 -per-cent penalty. This was not to be extended to cases thereafter arising, and applies only to the new class of specialtax payers created by the war-revenue act.

## MEDICINAL PREPARATIONS.

A circular (No. 509) ẃas issued August 29, 1898, addressed to collectors and revenue agents, calling special attention to the fact that the tax on medicinal preparations was not being thoroughly enforced and directing an examination of the stock of dealers. As a result a number of seizures was reported and the law was thereafter more thoroughly enforced.

## test case in regard to medicinal preparations.

The question has arisen as to the liability to stamp tax of the following products of the Farbenfabriken (of Elberfeld) Company: A ristol, europhen, iodothyrine, piperazine, losophan, lycetol, phenacetine, protargol, salophen, sulfonal, tannigen, tannopine, trional.

It has been the contention of the manufacturer that these products were uncompounded drugs or chemicals. A seizure was made in New York September 13, 1898, to determine judicially whether or not these articles are subject to stamp tax under the war-revenue law, Schedule B. All these articles are being stamped under the ruling of this office, pending the final determination of the question.

## DECISION UNDER SCHEDULE ${ }^{\circ}$ A.

|Case of James Nicol, decided in the United States circuit court, northern district of Illinois. Petition for writ of habeas corpus.]

The petitioner, James Nicol, was a member of the Board of Trade of the city of Chicago.

In the course of his business on said board of trade Mr. Nicol, by oral contract, sold for immediate delivery to one James H. Milue, also a member of said board of trade, two carloads of oats, being 2,289 bushels of oats then in Chicago, for the sum of $\$ 474.98$. The sale of the oats was oral, and there was no memorandum given. An information was filed in the United States district court reciting said sale, and also that the petitioner had made the sale without making and delivering to the buyer any bill, memorandum, agreement, or other evidence of said sale, showing the date thereof, the name of the seller, the amount of the sale, etc., as required by the second paragraph of Schedule A, act of June 13, 1898. Proceedings were afterwards had in said court, resulting in the conviction of said Nicol and tlie imposition upon him of a fine of $\$ 500$. He refused to pay the fine, and, being in custody, filed a petition in the United States circuit court for a writ of habeas corpus, insisting that the statute upon which he was convicted was in violation of the National Constitution, and that his detention was therefore unlawful.
The decision of Judge Showalter sustained the constitutionality of the law and the validity of the tax. The case is now pending in the United States Supreme Court.

## RULINGS UNDER WAR-REVENUE ACT.

As this act went into effect so soon after its passage and was so widespread in its scope, touching the business interests of the country at so many points, this office was required to make decisions on a variety of subjects on a short notice. Many questions involved intri-
cate points of law and acquaintance with commercial usage. An additional clerical force competent for the work could not be immediately secured. Many decisions had to be rendered almost impromptu, and, under the circumstances, it is possible that the interpretations given to some points of the law are not in accord with what Congress intended. The idea has been to carry out the law according to its import.

The following is the list of some of the rulings that were made, to which attention is called, with a view that, if incorrect, Congress may be requested to enact such additional legislation as may be necessary to remove ambiguities or more fully express the intention. At a later period I shall present to you for transmission to Congress such amendments to the law as may appear to be desirable, based upon the experience of the past few months.

## RULINGS.

Administration, letters of.-Letters testamentary or of guardianship do not require stamps. Petitions for appointment of administrators, executors, or guardians require no stamp.

Affidavits.-No stamp is required on affidavits.
Bills of lading.-Bills of lading for the export of goods, if made out in sets of two, each having equal value and each being considered an original bill, both should be stamped.

Where a tax of 10 cents is paid on the bill of lading for goods exported it is held that no stamp tax is required to be paid on copies of such bills of lading if the copies have indorsed thereon the fact that they are copies and that one of the set has been stamped.

On inland bills of lading "each duplicate" requires "a stamp of the value of 1 cent."

Bills of lading for exportations by railroad to British North America require a 10 -cent stamp.

A wharf receipt given to a shipper in exchange for which a bill of lading is issued does not require a stamp.

It is the duty of carriers to issue a bill of lading or receipt for goods accepted by them for shipment and to affix the stamp, and a penalty is prescribed for failure to do so.

Bill of sale of a vessel.--There is no tax npon the bill of sale of a vessel. A mortgage of a vessel requires a stamp as a mortgage of personal property.

Bonds.-Bonds of brewers, manufacturers of oleomargarine, manufacturers of tobacco, manufacturers of cigars, distiller's annual, distiller's warehousing, transportation, and export bonds are required to be stamped. Where these bonds are required by law to be made in duplicate or triplicate, each must be stamped. Copies of distiller's bonds forwarded to this office for office use need not be stamped.

Where a surety company is surety on these bonds the tax is one-half of 1 cent on each dollar of premium in addition to the 50 -cent tax on the bond. The stamp representing this amount should be placed on the original bond, and on the duplicates and triplicates a memorandum can be made stating that this tax has been paid by stamp attached to the original bond.

A bond tiled by order of court to obtain a decree or order for the sale of real estate is a bond given in a legal proceeding, and is exempt from tax.

Bonds given by public officers, such as sheriffs, clerks, registers or pecorders of deeds, treasurers of counties, cities, or towns, or other pablic officers of like character, are required to be stamped.

Mere agreements to build houses are not taxable, but if bonds are included for the faithful performance of work or contracts, they are held to be subject to tax as bonds.

Bouds issued by guaranty companies in Canada, guaranteeing the fidelity of employees, of individuals, or corporations in the United States, executed and delivered in Canada, are not taxable; but if they are not valid until countersigned or delivered by the agent in the United States they should be stamped.

Marriage bond requires a stamp of 50 cents.
Where a bond is given with a guaranty company as surety, the bond should have, in addition to a 50 -cent stamp, as required under the head of "Bond;" in Schedule A, a stamp denoting one-half of 1 cent on each dollar or fractional part thereof paid by the principal obligor on the bond as a premium, under that paragraph of Schedule A relating to guaranty companies. (United States officers required to give bond will take notice.)

Bonds "required in legal proceedings" are exempt from stamp tax.
Broker's note. -"Broker's note, or memorandum of sale of any goods or merchandise, stocks, bonds, exchange, notes of hand, real estate, or property of any kind or description issued by brokers or persons acting as such, for each note or memorandum of sale, not otherwise provided for in this act, 10 cents."

The original note or memorandum of sale is alone subject to the tax of 10 cents when made by a broker or one acting as such, and the tax is payable by said broker or one acting as such; the duplicate or the copy of the original memorandum of sale is not taxed.
A mere memorandum accompanying an offer to purchase is subject to the tax only provided the offer is accepted, and should be stamped by the broker on the acceptance of the offer.

A statement of account showing the receipts and disbursements in connection with a sale, and not being the contract of sale, does not require a stamp.

A broker's memorandum of sale of promissory notes ('notes of hand") requires the 10 -cent stamp.
Building and loan associations.-The exemption granted to cooperative building and loan associations, etc., loaning money only to their own shareholders extends to auy papers or instruments (otherwise taxable) executed by such associations, or any such papers and instruments made or executed by the shareholders to the associations in dealing with the associations and within the limits of their legitimate operations are exempt from stamp tax, except that checks or drafts given by such associations or by the shareholders are subject to the tax.

Certificates.--Certificates required by law issued by any department or officer of the Government at the request of private persons, solely for private use, should be stamped. The stamp should be'furnished by the person applying for the instrument and for whose use and benefit the same is issued, and shonld be affixed before the document is delivered.
Certificates of ofticers of the United States, given in the discharge of official functions necessary in carrying on the machinery of the Government, are exempt.

Certificates issued by an officer of the State, in the interest of the State, are not liable to tax.
Any documents the stamping of which would make it necessary that the State should furnish and affix the stamp are held to be oxempt from the stamp tax.

Return of birth, certificate of death, and certificates of the registrar as to the facts declared concerning birth, marriage, and death are none of them held to be subject to the stamp tax imposed upon certificates, in view of the fact that these certificates are given in pursuance of State laws for public purposes.

Certificates issued by the health officer of New York, under State statute, relative to the employment of children, are exempt, being issued in the discharge of a duty connected with the operations of the Government.
A marriage certificate to be returned to any officer of a State, county, city, ortown, to constitute part of a public record, requires no stamp. A marriage certificate issued by the officiating clergyman or magistrate and given to the parties, if required by law, must be stamped at the rate of 10 cents.

A teacherss certificate issued by a county superintendent of public instruction or other officer of State, county, or municipality comes within the exemption provided by section 17 of the act, and does not require a stamp. These certificates, given under regulations adopted in connection with public schools, ars held to be for goverumental purposes rather than for private use.

A mercantile license or liquor dealer's license, being a certificate required by the laws of a State or ordinance of a city, in the exercise of the functions governmental, taxing, or municipal of the State or corporations, comes withiu the exemption.
Inspectors and weighers of grain who give certificates under State laws are not required to stamp such certificates. They are exempt under section 17.
No stamp is required upon certificates of the sufficiency of sureties upon bonds.
A stamp is required on a certificate of incorporation.
The certificate of a clerk of court to the qualifications of a notary public or justice of the peace is held to be a certificate requiring a stamp.
Au architect's certificate requires no stamp, unless, by an indorsement, it becomes an order for the payment of money.

Certificates issued at a tax sale or certificates of redemption from tax sale do not require stamps.
Certificate of "proof of loss" for use of an insurance company, being a statement made as to the facts and circumstances attending a fire, is not a certificate requiring a stamp.

Certificates required by law, which are made by court o icers under the direction and authority of the court, and which are necessary to give proper effect to the court proceedings, are exempt.

Cour processes, such as summonses, writs of attachment, subpœenas, warrants, orders of court, etc., are not required to be stamped.

Certificates of protest of every note, bill of exchange, etc., whether protested by a notary public or by any other officer duly authorized by law, must be stamped.
"Certificates of any description required by law not otherwise specified in this act, 10 cents." The first requirement necessary to subject any given certificate thus generally described to tax is that it shall be one which is required to be given by law, national, State, or municipal. All such are taxable, except those coming within the exemption of section 17, that is to say, those which are given strictly in the exercise of the functions-governmental, taxing, or municipal-of the State or corporation.
Certificates given by an officer, not for a public or governmental purpose, but for private interests and use, are liable to the tax if they are given in obedience to any law which requires them to be given when called for.
A certificate of search showing that the dockets or records of a court have been searched, and show either that liens exist or do not exist as to property, or that judgments are recorded or are not recorded, and also certificates of search to ascortain whether or not titles are good, whether taxes have been paid, and other certificates of this character are not such as are required in the general discharge of governmental functions on the part of the officers giving them, but are such as are needed for private use and private interests, and are therefore subject to the tax, as being required by law to be given when called for.
If the act performed or the certificate issued by the officer is in the discharge of an official function necessary in operating the general machinery of the Government, it is exempt.
Certificates of acknowledgment of deeds and mortgages are not required to be stamped. The memorandum on the back of a deed or mortgage, made by the register or recorder, that the instrument has been placed upon record, is not subject to taxation. It is not a certificate such as is contemplated by the law. It is a brief note on the back of the deed or mortgage citing date of filing and date and place of record.
Certificates of birth, marriage, and death, given in pursuance of the laws of the State requiring the collection and registration of vital statistics as a basis for the administration of public health laws, come within the exemption of section 17. Such certificates, however, when issued to private persons for private use, are subject to the 10 -cent stamp tax.
Certificates of deposit drawing interest, if left a certain time, are taxable, first, at the rate of 2 cents, but if left until interest accrues, stamps at the rate of 2 cents per $\$ 100$ must be added.
Checks, drafts, orders for the payment of money, eto.-Sight drafts drâwn upon or issued by any bank, trust company, or any person or persons, companies or corporations, require a stamp, and, if the acceptance of the draft is accompanied by an order to the bank to pay the same and charge to the account of the drawee, this accompanying order requires, in addition, a 2 -cent stamp as "an order for the payment of money," and if a time draft, the accompanying order must be stamped at the rate of 2 cents per $\$ 100$.
Where a draft duly stamped is drawn by one bank on another bank, the bank receiving and paying it is not required to affix any stamp thereto.
When a bank charges a customer's account with the amount of a note, at its maturity, which he has given and which is made payable at that bank, no liability to stamp occurs therely, unless some written direction is given by the maker of the note to the bank which is, in effect, an order to the bank to pay the amount of the note to the holder out of the funds of the maker of the note. Such an order would require a 2 -cent stamp.
Checks drawn by the manager of the clearing house, to settle balances between banks, are subject to stamp as checks.
Orders for the payment of money on sight or on demand are subject to the stamp tax imposed on checks by the third paragraph of Schedule A; but; on orders for the payment of mouey "otherwise than at sight or on demand," the stamp tax must be paid as on promissory notes.
An order payable or redeemable in merchandise only (and not in money) does not require the 2 -cent stamp.
Tickets received at a bank and paid the same as checks are regarded as in effect orders for the payment of money.
Orders for the payment of money, drawn by the seeretary of an order or beneficiary society on its treasurer, in favor of a third party, require a 2 -cent stamp.
A check drawn by the cashier, or some other officer of a bank, upon the bank of which he is such officer, made payable to some person not connected with the bank, requires a stamp.
If a check used is simply in the nature of a memorandum, and not an order for the payment of money, but used within the bank exclusively, as a method of keeping the accounts, it is not necessary to stamp the same as a check.
A check drawn in this country upon a bank is subject to the same tax, whether the bank upon which it is drawn is a domestic bank or a bank located in a foreign
country. The distinction between a check and a bill of exchange, either inland or foreign, is well defined.
The conveyance by express companies or other common carriers of bank bills, coin, currency, or money of any kind, imposes an obligation on such common carriers to issue and stamp a bill of lading or receipt for the same, it being held that suchproperty is included within the terms " any goods accepted for transportation."
Money orders issued by express companies must be stamped at the rate of 2 cents for each order.
Orders by telegraph or otherwise for the payment or transfer of money abroad issued by express or other companies, or any person or persons, require a stamp at the rate of 4 cents for each $\$ 100$. Orders for the same purpose within the United States require a stamp of 2 cents on each order, irrespective of the amount.

The withdrawal of funds by a depositor on the presentation of his bank book to the savings bank, does not require a stamp, if there is nothing accompanying it in the form of an order for the payment of money.
Checks drawn by United States disbursing officers against public funds standing to their official credit in performance of duties required by law do not require a 2 -cent internal-revenue stamp placed thereon. And all checks drawn by officers of States, counties, and municipalities for the discharge of the obligations of States, counties, and municipalities are exempt under section 17 of the act. These checks should have an indorsement on their face showing that they are drawn against "Public funds."
Any order for payment of money drawn in, but payable out of the United States, if drawn singly, is subject to tax of 4 cents for $\$ 100$ or less, and for each additional hundred dollars or fraction, 4 cents.

A 2-cent stamp is required on an order for cash drawn on a merchant by one of his customers.

If papers in the nature of receipts are given in lieu of checks, and are used as commercial negotiable instruments, they are checks and not receipts, and are subject to tax.

The person who signs and issues a bank check, without affixing the proper stamp, becomes involved in liability to penalties under seetion 10 of the act, unless it is shown that he had no design to evade the payment of the stamp tax, and that the requisite stamp was affixed and canceled by the bank or person upon whom it was drawn before payment.
Where a check is presented at a bank without having the requisite stamp affixed, the bank, if it pays such unstamped check, becomes liable to the penalty provided by section 10 of the act. Bank may cure defect by affixing proper stamp.

Tickets, which are on the face merely memoranda of money due ( $\theta$. g.: John Doe, June 25, 1898, \$15), and do not contain any language making them checks or orders for the payment of money or promissory notes, are not subject to tax, unless received and paid at bank the same as checks.

Charter party.-Barges are not inoluded in the term "vessel" in the paragraph relating to charter party.

Deeds and mortgages.-Deeds and mortgagos executed by a sheriff, in compliance with an order of the court, are subject to tax.

If a deed does not grant, assign, transfer, or convey to the purchaser any lands, tenements, or other realty, but only right of burial, to erect monuments, etc., it does not require a stamp.

A tax is not imposed upon an instrument whereby the title to personal property is conveyed, except where expressly provided in Schedule A of the act.

There is no difference in the rate of taxation between that on a chattel mortgage and on a mortgage of realty.

Where a railroad mortgage is issued for the parpose of securing bonds, which are reserved to be issued only on a mileage basis of road afterwards constructed, whenever the mortgage goes into operation, it should have the stamp affixed. The mortgage can not go to registration without such stamp, and no recorder or register should receive it for registration without the stamp.

The stamp fax is required to be paid on the assignment of a mortgage at the same rate as on the origual instrument when there has been no reduction of the mortgage prior to the assignment. Where an assignment is made of a mortgage by a separate written instrument, and the mortgage and instrument are deposited with a trustee as security for obligations, the stamp tax must be paid on the memorandum of the pledge of these instruments at the rate fixed by the paragraph relating to mortgage or pledge.

Where a mortgage is deposited with a trastee as security for obligations without any assignment, but accompanied by a power of attorney, authorizing an assignment in the event of a default upon the obligations, the stamp tax is required to be paid on the pledge of the mortgage and also on the power of attorney, but not on the transfer authorized until this transfer is completed.

Mortgages received by a State from persons to whom State lands may be sold are subject to the stamp tax.
Abstracts of title do not require to be stamped.
Deeds of release of mortgages and trust deeds require to be stamped. If the releases are simply certiticates that a lien has been removed from the property, only a 10 -cent stanp is necessary; but if they are instruments which reconvey the title to the mortgagor, they must be stamped like other deeds, the consideration being the amount released.
Where local laws authorize entry of satisfaction upon the record, and the mortgage is thus canceled, such entry does not require a stamp. If the mortgagee, as he has a right to do in some States, makes a power of attorney to the register, or recorder, or other person for the entry of satisfaction of the mortgage, stamp tax must be paid on this power of attorney.

Deeds signed, acknowledged, and fully executed in June do not require stamps, thongh delivered in July, unless by State law registration is necessary to pass title.
A mortgage, no matter what the date, should not be admitted to registration when presented on or after July 1, 1898, unless there is attached and canceled the proper revenue stamp.
In cases where the consideration in a deed is nominal, the actual value of the property conveyed should govern the amount of the stamp required.
Express, local delivery.-Mere local operators for the delivery of packages, baggage, and such like, within the limits of the same town or city are not required to give bills of lading. Although such operators may give a receipt for articles to be delivered, such receipt is not required to be stamped. A mere carrier, as, for instance, a person with a horse and wagon, who does a local delivery business in a city or town, is not included within the above requirement. The carriers which were intended to be included within the terms of Schedule A, under the head of "Express and freight," are such as are engaged in the transportation of express matter and freight from one place to another in the ordinary course of commerce and trade.
Express receipt8.-The shipnent of bundles or packayes of newspapers inclosed in one general bundle under a single bill of lading is permitted, and there will be no objection to the distribution of the contents of such a general bundle at the different stations along the line of the railroad.
A shipment bears but one tax, although in completing it transit by rail, boat, or other method of conveyance is required.
The stamp should be affixed to the evidence of receipt and forwarding for each shipment, whether the evidence is in the form of a bill of lading, manifest, receipt, or book, and the common carrier is compelled by law to issue this evidence of receipt and forwarding.
Insurance policies.-A policy of insurance is not valid unless it bears the proper canceled revenue stamp.
A stanp is required upon every assignment of a policy of life insurance at the same rate ${ }_{2}$ as that on the original instrument.
Neither the so-called mortgage clause attached to a fire insurance policy nor its cancellation or release requires additional stamp.
Where a policy of life insurance is assigned as collateral security for a loan, it should be stamped as a pledge according to the amount of debt secured and not according to face of policy.
Concerning the payment of internal-revenue tax on premiums charged on marine, inland, or fire insurance under open policies, see Internal Revenne Circular No. 504.
When policies of reinsurance are issued they are subject to taxation. No stamp is required where reinsurance is done in accordance with a preceding contract between the companies by book entry (aud no new policy issues), this entry being accepted as an assumption of responsibility therefor to the insuring company; where, however, the risk becomes extra hazardous, and there is reinsurance effected, the extra premium paid is taxable.
Only purely cooperative or mutual fire insurance companies carried on by the members thereof solely for the protection of their own property, and not for profit; are exempted from taxation.
Assessment beneficiary life insurance associations insuring their own members, and not for profit, come within the exempting provision.
The exemption given to fraterual beneficiary life insurance associations applies also to fraternal beneficiary accident insurance associations.
A policy does not require a stamp until it is issued, or is offered as an insurance policy, and an insurance company can stamp a policy through its local agents as well as through its general agent.
Any agent of the company who is charged with the daty of delivering the policy to the policy holder and receiving the premium would be authorized to affix and caucel the stamp in behalf of the company.
A stamp must be attached to premium notes as well as to policies.
FI 98-- 20

The second proviso in the paragraph relating to life insurance in Schedule A, "that the provisions of this section shall not apply to any fraternal, benoficiary society, or order," relates only to policies of insurance referred to in that paragraph.
Inland bill of excluange.-An inland bill of exchange, within the meaning of this act, is a bill of exchange drawn and made payable anywhere in the United States.
Jurat.-The ordinary notary's jurat is not required to be stamped.
Leases.-Where leases are executed in duplicate, so that both are originals, both are required to be stamped; but if there be but one original, copies thereof are not required to be stamped.
This office holds that where a receipt is given for money received as rent for certain premises and for a certain term, and there are no other recitals in the receipt, it does not require a stamp. If the receipt contains any phrase or clause that can be construed as a contract for the hire, use, or rent, ae aforesaid, in such cases the receipt becomes something more than a bare receipt, and should be stamped according to its tenor and effect. A mere reference in a rent receipt to an existing lease, duly executed, will not be construed as a new lease.
Manifest.-The manifest for custom-house entry or clearance of the cargo of any ship, or vessel, or steamer for a foreign port does not include ship's supplies for its voyage. It only ineludes those things which the ship bas taken aboard for transportation.
Stamp duties imposed on manifests, bills of lading, and passage tickets do not apply to steamboats or other vessels plying between the ports of the United States and ports in British North America.
National bank report, list of shareholders, and returns.-Revenue stamps are not required on the reports of earnings and dividends and reports of condition made to the Comptroller of the Currency by national lanks.
The list of shareholders required by section 5210, Revised Statutes, to be forwarded to the Comptroller of the Currency requires no stamp tax. The paper is not a certificate, but a list.
A stamp is not required on returns of national-banks of notes in circulation made semiannually to the United States Treasurer.
Notes. -Where notes or bonds with interest-coupon notes are given, said coupons being in the form of promissory notes, each coupon note requires a stamp in addition to the stamp placed on the principal note.
Interest coupons attached to bonds or notes and surrendered as receipts for interest paid do not require a stamp.
No stamp is required upon the transfer by indorsement of promissory notes.
Where notes secured by a deed of trust are used as collateral, the deed of trust and the notes are required to be stamped, not on the basis of their face value but on the amount for which they are pledged (that is to say, the memorandum of their pledge must be so stamped). This pledge of notes and deed of trust does not require to be stamped again because of renewals of the notes held as collateral if the pledge itself is not renewed

Promissory notes which have matured and have been allowed to run without suit are held not to be renewed by the payment of interest. This is looked upon as a "forbearance" and not a renewal, the holder not relinquishing his right of action for any stated period.

A bond secured by mortgage given by a private person in lieu of a promissory. note is taxable as a promissory note and not as a bond.

Real-estate mortgage notes require to be stamped, in addition to the stamps placed on the mortgage.

In cases of loans on real estate, where promissory notes are given which are not paid at maturity but on which an extension of time of payment is granted without the taking of a new note, it is held that every such extension is a renewal of the note within the meaning of the statute, and that the requisite stamp must be affixed for every such renewal or extension. This also applies to notes discounted before July 1 falling due on or after that date.

Powers of attorney executed abroad and used in this country require a stamp.
Where judgment notes, so called, contain a clause authorizing any attorney at law to confess judgment in favor of the holder of the note, such authorization is held to be a power of attorney, and taxable as such in addition to the tax required on the judgment note as a promissory note.

Powers of attorney executed in this country for use abroad do not require a stamp.
Power of attorney contained in a pledge of collateral securities requires no stamp.
Powers of attorney executed on the back of stock certificates used in connection with transfer of shares require to be stamped in addition to the tax on transfer of stock.

Powers of attorney to sell or transfer Government bonds are taxable.
Pledge.-A paper or instrument stipulating that certain securities or other property shall be held as indemnity or as a basis of credit, or a guarantee generally, without
specifying particular property as security for the payment of a definite and certain sum, is not liable to tax under the war-revenue act relating to pledges.

Where certificates of stock are delivered as collateral, the stock, to be forfeited only upon condition of failure to pay the debt for which it is pledged, a stamp is required as a pledge and not as a sale.
Where there is a pledge of property accompanying any promissory note, which pledge is subject to stamp tax under Schedule A, this stamp tax must be paid, notwithstanding the fact that a stamp is also required on the note connected with it.

Proxy.-A 10-cent stamp is sufficient upon a proxy for use in voting at an election of officers of an incorporated company, without regard to the number of signatures.
Power's of attorney and proxies for the purpose of voting the stock of building and loan associations which make loans only to their shareholders do not require to be stamped. Where, upon one power of attorney or proxy, a number of shareholders join in appointing a certain person to vote their stock one stamp is sufficient.

Receipts.-Receipts given by a safe-deposit company in renting boxes in the company's vault are not subject to tax, nor are receipts given by such companies merely for the safe-keeping of money and valuables.

Receipts given by the patrons of post-office for box rent are not taxable.
No stamp is required on ordinary receipts.
Dray receipt given at export-steamer's wharf does not require a stamp in addition to bills of lading which are stamped. Shipping receipts given by common carriers of freight for goods to be transported to port of export require stamp.

Sales or transfers of stock. -In reckoning the stamp tax on transfer of certificates of stock the tax is reckoned on the face value. In reckoning this tax, the fact that only part of the face value of shares subscribed for and issued has been paid by the shareholders is not to be taken into consideration.

Where stock is sold at the par value of $\$ 100$, and upon which it appears that only $\$ 25$ have been paid, the tax is to be reckoned upon the face value of $\$ 100$ and not upon the $\$ 25$.
Where one certificate represents several shares, the tax of 2 cents on each $\$ 100$ or fraction thereof is to be reckoned on the face value of the certificate and not on the face value of each separate share.

On transfer of one certificate representing 500 shares, $\$ 5$ par value, the stamp tax required is 50 cents.
When certificates of stock or other securities are pledged for a loan, the stamp tax is to be reckoned not on the face value of the certificates or securities, but on the amount of money loaned above $\$ 1,000$.

When stock is transferred, for which no certificate has been issued and the evidence of transfer is shown only by books of the company, the stamps should be placed upon such books. Where the change of ownership is by the transfer of a certificate and the certificate contains a blank form of assignment on the back which is filled in by the iusertion of the name of the person to whom the stock is transferred, the stamp should be placed upon the certificate.

In case of an agreement to sell, or where the transfer is by the delivery of the certificate, signed in blank, the name of the transferee or vendee to be filled in afterwards, there should be made and delivered by the seller to the buyer a bill or memorandum of sale, to which the stamp should be affixed.

Where certificates of shares were sold and delivered before July 1, 1898, entry oi transfer on corporate books after June 30 does not require stamp.
New certificates of stock issued to holder in lisu of original certificate, and remaining in his ownership, do not require stamps.
When certificate of stock is sold and stamp tax is paid on memorandum thereof, upon transfer of this certificate to purchaser's name, no additional tax for such transfer is required. Where one certificate represents several shares of stock (however large the number of shares), on transfer of this certificate the stamp tax is to be reckoned on its face value, and not on the face value of each separate share of stock which it represents.

Sales of live stock.-When a sale is made of live stock at a live-stock exchange or any similar place, or an agreement of sale, or an agreement to sell entered into, the seller must give to the buyer a bill, or memorandum, or other evidence of such sale, agreement of sale, or agreement to sell, to which must be affixed the stamp required, viz, 1 cent for each $\$ 100$ in value of such sale, agreement of sale, or agreement to sell, and 1 cent for each additional $\$ 100$ or fractional part thereof.
If live stock is sold at an exchange or board of trade, or other similar place, either for present or future delivery, the sale, agreement of sale, or agreement to sell must be evidenced by a bill, memorandum, or agreement, to be delivered by the seller to the buyer, and this evidence shonld bave the stamp aftixed as required in the act, viz, 1 cent on each $\$ 100$, and on each $\$ 100$ or fraction thereof an additional 1 ceut.
Stamps.-In regard to who shall pay for stamps required on documents, this office can not dictate. It is the duty of the person, firm, or corporation issuing the instru-
ment to see that it is duly stamped, and a penalty is provided for neglect in so doing, and the inference is drawn that the person, firm, or corporation issuing the instrument shall pay for the stamp required.

Proprietary stamps can not be used on documents.
In regard to the cancellation of internal-revenue adhesive stamps, which the law requires to be loy writing or stamping the initials of the persons using the same and the date upon which the stamp shall be attached or used, it is held that the initials and the year alone will be sufficient. This cancellation may be by writing or imprinting with a hand stamp.

Old stamps issued under repealed acts can not be used in lieu of stamps required by the present law.

Tickets (passage on a vessel). -Tickets issued in the United States for passage on a vessel not sailing from any port of the United States, but from a Canadian port (or other foreign port); are not subject to stamp tax.

The only passage ticket for which stamp tax is required to be paid by this statute is a ticket issued for transportation of the passenger "by any vessel from a port.in the United States to a foreign port." When, therefore, to such passenger ticket there is attached another ticket entitling the passenger, after his arrival at the foreign port, to transportation to various points in Europe or elsewhere, such additional ticket is not subject to stamp tax.

The stamp tax for a passenger ticket may be affixed thereto and canceled at the time and place where it is issued, or it may be affixed and canceled at the pier before the passenger boards the vessel.

Where one passenger ticket is issued, even though it.contains several names, but one stamp tax is required to be paid thereon.

There is no exemption from the stamp tax on charity tickets issued at low rates.
Telegraphic messages sent by the Associated Press over their own private lines to different newspapers are not required to be stamped.

When one uses a leased Western Union Telegraph wire, for which he pays a stipulated annual rental and has the exclnsive use, and for which he employs his own operator, stamp tax is not required to lee paid by him on messages sent by him over this wire relating to his own private business.

If the sender of a dispatch is a Government or State officer in the discharge of a duty in carrying out governmental functions required by law in operating the machinery of the Government, the dispatch is exempt; but if the act is simply that which the officer does individually in the interest of a private person or outside party, to serve such private person or outside party individually, then the dispatch must be stamped.

The payment of tax on messages transmitted by a telegraph company, and subsequently received and transmitted by a telephone company, does not exempt the last-naned company from the payment of tax on the message so transmitted.

A telegraphic dispatch or message is required to be stamped by the person who makes, signs, or issues it.

Telephone companies.-Where telephone companies have lines extending into more than one collection district, the return may be made to the collector of that district in which the principal business office of the company is located.

Contracts and agreements between subscribers and telephone companies for the placing of a telephone, and payment therefor, are not subject to stamp tax.

Warehouse receipts.-Stamps should be affixed to warehouse receipts for goods, merchandise, or property held on storage in public or private warehouses, by the warohousemen.

If the actual grower of tobacco, which is an agricultural product, deposits the same in a warehouse in the regular course of trade for sale and takes a warehouse receipt, this receipt is exempt from the stamp tax when it is issued, and it is not required to be stamped at any time after its issuance (if the tobacco which it represents remains in warehouse as it was originally deposited by the grower), although the same may be transferred as a negotiable instrument and presented to the warehouseman by other than the original holder.

Where tobacco, or the warehouse receipt therefor, is sold "at any exchange or board of trade, or other similar place," a memorandum of such sale must be made by the seller and the stamp affixed thereto and canceled.

Where a warehouse receipt is sold by a broler at his own office or elsewhere than at a place of exchange, or other place of public sale, the 10 -cent stamp mast be affixed to the memorandum of this transaction, under the paragraph relating to broleer's contract.

Any receipt or memorandum given by a warehouseman, or any signing by a warehouseman of any express company's book or other receipt evidencing the fact that goods have been placed on storage, is such a receipt requiring a stamp tax of 25 cents, whether the same is negotiable or nonnegotiable.

A warehouse receipt which includes also an insurance against fire should be stamped also as an insurance policy according to the premium charged.

Compress receipts for cotton are not taxable as warehouse receipts if they do not embrace any contract, express or implied, for storage, and for which a storage charge is made as such.

The receipt for cotton received for compression, handling, and shipment is exempt from taxation.

The exemption from tax on warehouse receipts for agricultural products is restricted to receipts for products of this kind which are deposited by the actual grower thereof in the regular course of trade for sale. This does not exempt warehouse receipts for such products in case the property deposited has already passed from the ownership of the actual grower.

## special tax rulings.

Private banks having no capital stock are subject to tax as bankers.
In computing special tax of banks whose capital exceeds $\$ 25,000$, if excess is less than $\$ 1,000$, it is not to be considered.

In estimating the amount of special tax to be paid by a banls, based upon capital and surplus, the amount invested in United States bonds is not to be deducted.

The amount invested by a bank in the bank building is not to be deducted from capital and surplus.
A bank in liquidation, doing no business except collecting and dividing assets in closing, is not required to pay special tax.

A bank engaged in business in the month of Jnly must pay special tax for the entire year beginning July 1, 1898.

A trust company is liable as a banker if it comes within any one of the three clauses of definition in paragraph 1 , section 2 of the act, viz:
"Every person, firm, or company, and every incorpurated or other bank, having a place of business where credits are opened by the deposit or collection of money or currency, subject to be paid or remitted upon draft, check, or order, or where money is advanced or loaned on stocks, bonds, bullion, bills of exchange, or promissory notes, or where stocks, bonds, bullion, bills of exchange, or promissory notes are received for discount or sale."

Borrowed capital must be taken into account when estimating amount of special tax required from bankers.

It is not the subscribed capital, but the capital actually employed during the preceding fiscal year, that is to be taken as the basis for estimating the special tax required to be paid.

Brokers.-The loaning of money for oneself or for others, on commission, does not subject the lender to special tax as a broker; but if a person makes it a business to negotiate purchases or sales of stocks, bonds, exchange, bullion, coined money, banls notes, promissory notes, or other securities, for himself or others, he is required to pay the special tax as a broker. "It is only when making sales and purchases is his business, his trade, his profession, his means of getting his living, or making his fortune, that he becomes a broker within the meaning of the statute." (Warren et al. v. Shook, 91 U. S., 704.)

Persons or firms acting as agents for resident or nonresident parties, loaning money upon promissory notes, secured by mortgages, are not brokers within the meaning of the act, and are not liable to the special tax provided for brokers.

A lawyer can make investments for clients without being liable, unless he does it to stuch an extent that it can be called a "busivess."

Loan and mortgage companies are not liable as brokers for loaning money on notes or bonds secured by mortgage or trust deed on real estate. If they purchase notes, bonds, or other securities; they become liable as brokers.

Persons whose practice it is to buy fee bills of witnesses are not brokers. Such paper is not properly described by any of the terms used in the law, to wit, "stocks, bonds, exchange, bullion, coined money, bank notes, promissory notes, or other securities."

A person engaged in the business of placing loans which are secured by notes and mortgages upon real estate, acting simply as agent for the party furnishing the money, receiving a commission for his services in obtaining the application for the loan and attending to the execution of the papers, is not a broker.

A person engaged in the business of selling real estate, acting as the agent of the owner in finding purchasers and receiving a commission for his services, is not a broker.

When persons "shave notes" or negotiate purchases or sales of promissory notes, if these are only occasional acts and do not constitute their regular business, they are not brokers within the meaning of the act.

Bucket shop proprietors giving memorandum of transactions are required to pay special tax as brokers.

If an agent transacts the general business of a broker for the principal, paying over moneys to the customers, etc., the special tax of $\$ 50$ must be paid for the place where this business is done, and the requisite stamp posted up therein.

This tax may be paid by the principal himself, and the stamp taken out in his name (which is preferable), or it may be paid by the agent and the stamp taken out in his name.

The principal's special-tax stamp for his place of business in another city covers the transactions only at that place of business, and can not cover the business done clsewhere at a branch office.

Broker's tax is not required to be paid at branch offices where a clerk is employed, whose sole duty is to receive orders and trausmit them by wire to the head of the office. The mere receipt and transmission by clerks of orders is not regarded as the carrying on the business of a broker.

Commercial brokers.-Commercial brokers, within the meaning of the act, are those persons only who, without having in their possession goods, wares, or merchandise, negotiate sales or purchases thereof on commission.

Commission merchants who receive goods in possession to sell for others are not commercial brokers within the meaning of the statute.

Cattle brokers, who receive and sell cattle on commission, are not required to pay special tax as coinmercial brokers.

A person whó is employed by a firm to solicit and receive orders on commission for its goods, and is bound by his agreement with it to give his entire services to it to the exclusion of other firms or persons, is not regarded as a commercial broker within the ineaning and intent of the law.

Warehousemen who receive tobacco, cotton, or any other produce or goods on consignment, for sale on commission, are not liable as commercial brokers.

Auctioneers who receive and sell goods at their auction rooms or on the premises of the owners, on commission, are not subject to special tax as commercial brokers.

Drug brokers are properly included under the head of commercial brokers, and are subject to the special tax of $\$ 20$.

If cotton buyers have possession of cotton which they sell, they are not liable as commercial brokers. If they have not, and sell on commission, they are liable.

Pawnbrokers.-A person is not required to pay a special tax as a pawnbroker for rare or occasional acts, which can not be regarded as his business or occupation.

Custom-house brokers.-If the complete business of custom-house brokers is transacted by parties at offices at different ports of one district, a separate and distinct special tax must be paid for each of their offices, under the provisions of section 3235, Revised Statutes, which apply as well to special taxes under the war-revenue act as to all other special taxes.

Billiardb. -Social clubs open only to members are not required to pay special tax on billiard tables, but if liquor is sold to members they are liable to special tax as retail liquor dealers.

Theaters, museums, etc.-Persons are not required to pay special tax for the mere occasional renting of their hall for public performances to dramatic companies or other persons charging entrance money therefor, but the special tax of $\$ 10$ is required to be paid by such persons or companies if they give dramatic performances or the other exhibitions specifically mentioned in paragraph 8 , section 2 , of the act.

Where theaters are entirely closed to performances during the months of July and August, and only open in the month of September, the special tax is to be reckoned from the 1st day of September to the 1st day of July following, at the rate of $\$ 100$ for the year beginning July 1.

Circuses and theatrical performances.-Mere tests of speed of horses in racing are not regarded as "feats of horsemanship" within the meaning of paragraph 7 of section 2, act of June 13, 1898.

When a circus is exhibiting in any State in the month of July, the special tax of $\$ 100$ is required to be paid for the year beginning July 1. If in the following month the circus goes into another State, the special tax at the rate of $\$ 100$ for the year is to be reckoned from the lst day of Augnst to the lst day of July following, and a separate special-tax stamp must be taken out accordingly for that State, and so on.
The "theatrical performances" and "acrobatic sports" contemplated by paragraph 7, section 2, of the act of June 13, 1898, are only those which are given in connection with a circus. A theatrical company, therefore, merely playing dramas in towns of 25,000 inhabitants (as shown by the last census), or less, or in buildings whose proprietors do not hold the $\$ 100$ special-tax stamp, is required to pay special tax under paragraph 8, viz, $\$ 10$ for each State for the special tax year, if the liability begins in the month of July, and at that rate when the liability begins in any other month than July.
Agricultural associations are required to pay a special tax at rate of $\$ 10$ for exhibitions, including horse racing.
Exhibitions of speed of horses on race track do not constitute circus.
Exhibitions and shows given on fair grounds, but not under management and control of the fair association holding special-tax stamp, are required to pay separate special tax.

Public exhibitions or shows.-A lecturer using a stereopticon to illustrate his lectures, and charging an admission fee, is liable to the special tax of $\$ 10$ on a public exhibition or show for money.

If an exhibition is given in more than one State, the law requires payment of special tax for every such State, and that a separate stamp shall be taken out for each State.

The ordinary church or Sunday school entertainment, without any hired performers, does not come ander the head of public exhibitions or shows for money contemplated by the law.

Amateur theatrical exhibitions, either in private houses or licensed public halls, for church or charitable benefits, are not such performances as are subject to tax.

Concert gardens where no admission is charged, but where beer and other drinks are sold and concerts are given, are within the meaning of paragraph 8 of sectiou 2 of the act, and the special tax of $\$ 10$ must be paid therefor. (This is intended to refer only to places where regular stage performances are exhibited.)

Exhibitions of Edison's kinetoscopes require payment of a special tax of $\$ 10^{\circ}$ in each State where such exhibitions are had.

## OPINIONS OF THE ATTORNEY-GENERAL UNDER THE WAR-REVENUE AOT.

This office has had the benefit of a number of opinions rendered by the honorable Attorney-General on questions arising under the warrevenue act. Among the more important are the following:

## tax on charter parties.

The opinion of the Attorney-General in this matter, dated August 2, 1898, was given in response to an inquiry made by the Lake Carriers' Association, in which it was claimed that vessels engaged in domestic commerce were exempt from the stamp tax on charter parties, as the law does not require that their tonnage should be registered. The language of the act is as follows:

Charter party: Contract or agreement for the charter of any ship or vessel or steamer, or any letter, memorandum, or other writing between the captain, master, or owner, or person acting as agent of any ship or vessel or steamer, and any other person or persons, for or relating to the charter of such ship or vessel or steamer, or any renewal or transfer thereof, if the registered tonnage of such ship or vessel or steamer does not exceed three hundred tons, three dollars.

Exceeding three hundred tons and not exceeding six hundred tons, five dollars.
Exceeding six hundred tons, ten dollars.
The Attorney-General ruled as follows:
Registered tonnage, under the United States Revised Statutes, Title XLVIII, comprises the tonnage of vessels of the United'States employed in foreign trade or the whale fisheries; and enrolled tonnage, under Title L, comprises the tonnage of vessels employed in domestic trade and in the trade on the Great Lakes with Canada, over 20 tons; those under 20 tons of this class being termed licensed vessels. It is held that the clause of the war-revenue act above referred to applies only to vessels registered under title XLVIII of the Revised Statutes, and does not apply to vessels enrolled or licensed under Title L; and that when the term "registered tonnage" was used in the war-revenue act it meant nothing more than to apply the law to such vessels as are required to be registered, and that it is a technical term and applies to the particular class of vessels known as registered, in distinction from encolled vessels and licensed vessels.
opinion on the question whether the word "Goods" includes money.

## The opinion on this question is in the following language:

The question arises under the following paragraph contained in Schedule a of said act:
"Express and freight: It shall be the duty of every railroad or steamboat company, carrier, express company, or corporation, or person whose occupation is to act as such, to issue to the shipper or consignor, or his agent, or person from whom any goods are accepted for transportation, a bill of lading, manifest, or other evidence of receipt and forwarding for each shipment received for carriage and transporta-
tion, whether in bulk or in boxes, bales, packages, bundles, or not so inclosed or included; and thereshall be duly attached and canceled, as is in this act provided, to each of said bills of lading, manifests, or other memorandum, and to each daplicate thereof, a stamp of the value of one cent."
The word "goods," and the terms "goods and chattels," and "goods, wares, and merchandise," have no invariable fixed meaning in legal construction. Their interpretation varies according to the circumstances in which they are used. The word "goods" sometimes has a very broad meaning, comprehending everything that would be included in the term personal property. In some senses it is very restricted, describing merely, for instance, a stock of merchandise in a store. When used in the latter sense, it would not include movable fixtures, nor the safe, nor the scales, nor the horses and wagons and other paraphernalia used for carrying on the business. The use of the term varies in comprehensiveness between these two extremes. Undoubtedly, in many constructions, the word "goods" includes money. Under a common-law execution directing the sheriff to make of the goods and chattels of the defendant a certain sum, the sheriff can properly levy upon and take money of the defendant. (Turner v. Fendall, 1 Cranch, 117.)
In Sewall $v$. Allen ( 6 Wendell, 335,355 ), it is said "there can be no doubt that bank bills, under certain circumstances, and for certain purposes, are considered and treated as goods. They are subject to execntion, and also pass as goods to executors and administrators and to the assignees of bankrupts." In the same case it was said by Chancellor Walworth:
"For all civil purposes, and especially in the United States, where they constitute (1830) nearly the whole circnlating medium of the country, bank bills are considered and treated as money; and, therefore, come within the general term 'goods.'"

The rule of construction to be followed in these cases is nowhere better stated thau in the same opinion of Chancellor Walworth above referred to. He says:
"Where words are sometimes used in different senses their meaning in a statute must always be construed in reference to the sabject-matter of the enactment." (Sewall v. Allen, 6 Wendell, 335.)
Applying this rule of construction to the language of the war-revenue act above quoted, it is not difficult to determine the sulbject-matter of the enactment. The subject-matter is comprised in the heading of the paragraph quoted, namely, "Express and freight."
It was the manifest purpose of Congress to impose a stamp tax upon the shipment and transportation of such material substances as, under commercial usage at the present time, are the subjects of transportation by railroad and steamboat companies, express companies, and corporations or persons whose occupation is to act as such. There is, in practice and principle, no difference whatever, commercially and legally, between the transportation by a common carrier of money and the transportation of ordinary merchandise. It is the general custom at this time for express companies to accept and transport for pay, as common carriers, packages containing "goods" in the more liberal acceptation of the term, including coin, bank bills, stock certificates, commercial paper and other choses in action. No reason is perceived why Congress should have intended to apply a stamp tax to the transportation of merchandise in the ordinary acceptation of the term, and to have allowed the express companies to transport money or evidences of indebtedness, or other papers or documents not falling within the restricted meaning of the term "goods" without the payment of the tax. The principle on which the tax is levied applies equally and generally to all packages, no matter what they contain, accepted by the companies for transportation. It seems clear that Congress meant to impose the tax upon all things received and transported as express or freight matter, and the word "goods" was used to comprehend and include everything of that description. When money is sent by express it is carried in bulk, in bags or packages. Its transportation does not differ from the method followed in transporting other valuable packages.

In the case of the schooner Elizabeth and Jane (2 Mason, C. C., 407), it was held by Mr. Justice Story that silver dollars were "goods, wares, and nuerchandise" within the meaning of the revenue act of March 3, 1799, chapter 128, for the landing of which a permit from the custom-house was necessary. In that case it is said:
"It can not be doubted that money, and of course foreign coin, falls within the description of 'goods' at common law; and coin, dollars, and bullion are considered in commercial transactions as 'goods and merchandise,' and may be insured as sach in a policy of insurance. In point of fact, too, dollars are often imported as 'wares and merchandise,' that is to say, as property, not to pass inerely as currency, but to be bought and sold as a marketable commodity at varying prices. Unless, therefore, there is something in the context of the statute from which it can be inferred that the legislature did not use the words in their ordinary import, I think I am bound to interpret them in that sense."

Both upon principle and the authority of the decided cases, I am of the opinion, therefore, that the term "goods" used in the act above quoted includes money.

Respectfully,
John W. Griggs, Attorney-General.

The question was submitted to the Attorney-General whether, under the war-revenue act, the United States Express Company is required, when receiving money and securities for transportation for the Government under its contract, to issue to the consignor a bill of lading, manifest, or other receipt, with a 1 -cent stamp duly attached and canceled.

It was contended by counsel for the express company that money and securities transported by it under contract were exempt from the provisions of the act in question, for two reasons:

First. Because the act applies in terms to "goods," and moneys and public securities such as are described in the contract are not "goods" within the meaning of the act. In his opinion above referred to of August 17, 1898, it was decided that the word "goods" used in this connection includes money, securities, and other choses in action.

Second. It was claimed in behalf of the express company that in view of the fact that the amount of its compensation for carrying each shipment had been determined and agreed upon in advance, the imposition by the Government through this act of Congress of a stamp tax upon each shipment was in effect a reduction of the compensation reserved to the company and an impairment to that extent of the obligation of the contract, amounting to a violation of the contractual obligation of the Government, and in fact an arbitrary and oppressive act under the guise of taxation.

The opinion was to the effect that the United States Express Company was not by reason of its contract exempt from the requirement of the act in the transportation of money, securities, etc., for the Government.

IN REGARD TO EXCESS BAGGAGE.
The law provides that it is the duty of every carrier to issue a bill of lading or receipt to the person from whom any goods are accepted for transportation for each shipment received for carriage or transportation.

The Attorney-General has decided that baggage subject to extra charges forwarded by railroad companies, upon the same train with the passenger, does not come within the law requiring a stamp on the bill of lading.or other evidence of receipt and forwarding. (See Treasury Decisions, vol. 2, p. 677.)

## IN REGARD TO REBATE CHECKS.

The ruling by this office that rebate checks issued by conductors, being the excess on fare collected on trains, which are redeemable by the company's agent on presentation, are liable to stamp tax, has been revoked, in view of the opinion of the Attorney-General, dated October 10, 1898. (See Treasury Decisions, vol. 2, p. 678.)

AID FROM THE DEPARTMENT OF JUSTICE.
Immediately following the passage of the war revenue act inquiries, almost without number, began to pour into this office as to the construction of the said act, and many questions were presented as to its application and administration. In this situation application was made to the Attorney-General for legal aid in the matter, and at the request of the latter Hon. James E. Boyd, Assistant Attorney-General, took up these questions covering a wide range of subjects, and has furnished
this office, for its guidance, his views thereon, both verbal and written. The opinions given by the Assistant Attorney-General, from the very nature of the cases, frequently arising suddenly and requiring immediate action, were rendered hastily and were understood to be more of the character of advisory assistance than of legal opinions. They were, however, of great practical aid and benefit to this office in applying and administering the provisions of the new law.

This office has taken occasion to express its thanks to the honorable Attorney-General and to Assistant Attorney-General Boyd for the assistance thus rendered.

The opinions given in writing are hereto appended.

## OPINIONS OF ASSISTANT ATTORNEY-GENERAL BOYD.

Deeds and mortgages.-Under this I advise that in States where the delivery of the deed is sufficient to pass title and is good inter partes by the delivery, a deed executed anterior to July 1,1898 , is not required by law to be stamped. But there are some States, I believe, in which registration is required before the deed becomes operative to pass title, and in such instances the deed should not be admitted to registration without the proper stamp attached.

As to mortgages, it is the general principle that a mortgage is not valid as such until it is admitted to registration, and I therefore advise that any mortgage, no matter what the date, should not be admitted to registration when presented on or after the 1 st of Jnly, 1898, unless there is attached and canceled the revenue stamp provided for the amount of the mortgage.

Insurance policies.-As to fire policies issned before, but conditioned to take effect on the 1st of July, 1898, my opinion is that they should have the stamp affixed and canceled, for the reason that, to hold otherwise, would open the way to many possible frauds on the revenue act; and then, it is really not a policy of insurance until it goes into effect. It would probably be only construed, in case of litigation, as a contract or agreement upon which a policy of insurance could be enforced pntil, by its terms, it goes into effect. I therefore think that the date on which the instrument becomes operative is the date on which the stamp act should apply.

Telegraphic and telephonic messages.-In answer to telegram as to whether stamps are required upon telegraphic or telephone messages sent by State officials relative to official business, in my opinion such messages are exempt under the first proviso of section 17 of the act, which exempts from stamp taxes imposed by the act State, county, town, and municipal corporations in the exercise only of functions strictly belonging to them in their ordinary governmental, taxing, or municipal capacity. I think that this language is sufficiently broad to cover the official acts of officers of States, counties, towns, or other municipal corporations, becanse the governmental authority in such instances is exercised by officers in the discharge of official duty.

Certificates of acknowledgment.-In regard to the inquiry as to whether certificates of acknowledgment of deeds and mortgages are required to be stomped, I will say that they are. They are no part of the execution of the deed or mortgage and are not covered in the stamp required upon such deed or mortgage.

I am of the opinion also that the memorandum on the back of a deed or mort gage, made by the register or recorder, that the instrument has been placed upon record, is not a subject of taxation. It is not a certificate such as is contemplated by the law. It is a brief note on the back of the deed or mortgage citing date of filing and date and place of record. (This opinion is modified hereafter under the head of "Acknowledgments upon deeds.")

Bonds or notes secured by mortgage.-The war-revenue act of July 1, 1862, in respect to the tax on promissory ncites and mortgages, imposed a separate rate upon each, but this was amended by the act of March 3, 1863, so that "whenever any bond or note shall be secured by a mortg.age but one stamp duty shall be required to be placed upon such papers." I think that the present law must be treated as it is framed and will not bear the construction that but one stamp duty is required to cover both the mortgage and the note or bond secured thereby. I think that any promissory note given is subject to the stamp tax provided in Schedule A, and if a mortgage or pledge of lands, estate, or property, real or personal, be given as security for the payment of any dennite and certain sum of money, the same is liable to stamp also provided in Schedule A. In other words, I hold that the note and mortgage are each required to be stamped.

In this connection it should be held that a paper given for the payment of money lent at the time, or previously due and owing, in the ordinary business transactions, although the same may be attested with the seal of the payee or obligee, should be
treated as a promissory note, although technically it may come under the head of a bond by reason of the fact that it has the word "seal" written after the name of the signer. In some of the States, it is the usual form when mortgages are executed to secure the payment of money, for the maker of the mortgage to give also what is called a "bond," but which in ordinary commercial transactions is nothing more nor less than a promise to pay se much money.
Denomination of stamp required upon deeds.- In regard to the amount of the stamp required upon a deed, the consideration named in the deed will primarily govern. But there are classes of deeds in which this rule should not be applied. For instance, deeds in which a nominal consideration only is named. In such cases the actual value of the property conveyed should govern the amount of the stamp and not the consideration meutioned in the decd. I call attention to deeds containing both a good and what is called a "valuable" consideration, such as deeds in which the consideration is natural "love and affection" for instance, with the addition of a nominal money consideration, such as $\$ 1$ or some other small sum. In such case and in like cases the actual value of the property should govern the parties in affixing the stamp to such deeds.
Telegraphic market reports.-As to market reports, when sent by telcgraphic dispatches, to which the attention of the Commissioner is called by Collector Wright at Detroit, Mich., I know of no reason and of no provision in the law by which they are excepted from the general rule that there shall be paid on each separate message a stamp tax of 1 cent.

Exemption, in general, of papers executed by United States officers and offcers of State, county, town, or municipal corporations in the discharge of official functions.-In reference to section 17, the first clause of the section refers exclusively to three classes of paper, namely, bonds, debentures, and certificatcs of indebtedness. Such of these as are issued by officers of the United States or by officers of any State, county, town, municipal corporation, or other corporation exercising the taxing power are exempt from stamp duty; but I think the first proviso in this section is sufficient to cover and to exempt from stamp duty such instruments and other papers as are executed, made, or issued by the officers of States, counties, towns, and other municipal corporations described in the act strictly within the discharge of official governmeutal functions. Further on I have construed the law in reference to official certificates.
Manifests, bills of lading, and passage tickets to ports in British North America.-At the conclusion of Schedule A is a provision excepting from the operation of the act relative to stamp duties imposed on manifests, bills of lading, and passare tickets steamboats or other vessels plying between the ports of the United States and ports in British North America. The only matter for consideration in comection with this exemption is as to what ports can be included in the description "British North America." In other words, what is meant by "British North America?"
I do not think that this term is broad enough to include all British possessions within what may be termed North America, but should be applied only to ports in British possessions in America lying north of the United States, as this is comnonly called "British America."

Certificates of search.-William Reicher, clerk of the sapreme court of New Jersey, asks this question: "Do certificates of search require revenue stamps 9 "

If these certificates are issued by the clerk of the court or any other State or county officer, or officer of a municipal corporation, in his official capacity and in the discbarge of pnblic governmental functions, according to the opinion I have heretofore given such certificates would not require a stamp; otherwise they are subject to tax in case they are required by law.

Duplicate bills of lading. -The question is asked, "Where a tax of 10 cents is paid on the bill of lading for goods exported does the duplicate require a stamp ?"

In contemplation of law there is but one bill of lading for a shipment of merchandise, which is the original bill given by the carrier and delivered to the shipper to be held as evidence of the receipt by the carrier of the goods and the terms of the contract upon which they are to le shipped. This bill requires the 10 -cent stamp provided by law. If, in the course of business, the carrier, for his own convenience or otherwise, makes a duplicate of this bill of lading, such duplicate does not, in my opinion, require a stamp.

This does not apply, however, to inland bills of lading, manifests, or other evidences of reccipt given by domestic carriers, because the law in that case specially provides that each of said bills of lading, manitests, or other memoranda, and each duplicate thereof, shall bear a stamp of the value of 1 cent.

Mutual marine, inland, and fire insurance companies.-John G. Ward, collector of internal revenue at Albany, N. Y., submits a question as to the construction of the proviso in relation to marine, inland, and fire insurance companies. This provision is:
"That purely cooperative or mutual fire-insurance companies, carried on by the members thereof solely for the protection of their own property and not for profit, shall be exempted from the tax herein provided."

There is no doubt but that any mutual fire-insurauce company which comes strictly within the language of this provision would be exempt from the tax, but whether any particular company is exempt or not depends wholly upon the facts. The company at whose instance the collector makes the inquiry is the Mutual Fire Insurance Company of Albany. The statement made by this company is that it has been a purely mutual company since the date of its incorporation, May 13, 1886; that it is managed by a board of directors (trustees) elected annually by the members (policy holders). The premiums received from the members on policies issued for their benefit are placed in a common fund along with the income from investment of surplus funds. Provisions are made under certain policies whereby the policy holders (members) will contribute to meet excess of losses in proportion to the liability assumed by them under their policies. They have no capital stock, and therefore no stockholders. The company is operated, and always has been, for the benefit of members (policy holders).

I understand from this provision that the intention was to exempt from the tax simply those companies where a number of persons associated themselves as companies or cooperative associations in business to be carried on by the nembers solely for the protection of their own property and for nothing more. Whenever the business of the association or company goes beyond the point of protection for their own property, then such association or company is taken out of the exemption provided by the act.

It is, then, purely a question of fact. Do the members of this company do more than mutually protect each other in case of loss by fire 8 Do profits arise from the business of this company $i$. Has the company a surplus which it invests and from which it realizes profit to the members of the company 8 If it does, it can not be included within the exemption, no matter what the company may be called and no matter what the company may say is the purpose for which it is organized and operated. If in fact it carries on its business for profit or benefit to the company or its members save that of mutual protection to the property of the members, then it is not exempt.

It appears from the facts in connection with this company that nothing is required to become a member of the company except to become a policy holder. In other words, every person who insures in this company and procures a policy of insurance is ipso facto a member of the company. Any insurance company might call itself mutual and declare every policy holder a member and still conduct a general insurance business for profit and for purposes other than solely for the protection of property insured by it. It was certainly not the intention of the lawmakers to permit companies of this character to avoid the payment of the tax prescribed.

I answer the inquiry in regard to the Peunsylvania Lumbermen's Mutual Fire Insurance Company, of Philadelphia, by applying to this company the rules above indicated.

Entries of issuance-Indorsements on policy permitting removal of property.-Thomas S. Cord, general manager, Chicago, asks these questions:
(1) "Do entries of issuance made under general contract require revenue stamps, the original policy having paid the one-half cent on the dollar rate of premium paid by property ownerq"
(2) "Where indorsement subsequently made on policy permits property to be removed to another location, does the indorsement require another stamp ${ }^{\prime \prime}$

In answer to the first question, every policy of insurance or other instrument, by whatever name called, whereby any insurance shall be made upon a life or lives, has to be stamped as required by the law, and each policy of insurance or other instrument, by whatever name the same shall be called, by which insurance shall be made or renewed upon property of any description, requires the stamp.

The language used in regard to fire insurance, it will be observed, is different from that used in regard to life insurance, in the fire insurance paragraph the provision being expressed for the stamp upon a renewal. The word "renewed" is not used in regard to life insurance, and yet I hold that the language used in regard to both is sufficiently broad to require the stamp upon every original policy of insurance issued and every instrument, by whatever name the same shall be called, whereby any insurance is made. In other words, it is the purpose of the law, when a policy or other written evidence of iusurance is issued by an insurance company to denote that either lives or property have been insured by the company, that such policy or writing must be stamped. If one policy expires and is recertified in order to renew, it is the same, in my opinion, as if a new policy were issued.

As to the second question, an iadorsement upon a policy in existence, permitting the property insured therein to be removed to another location than that in which it was insured, does not, in my opinion, require a stamp, the stamp tax being required upon the policy and not upon the property.

Certificates and transfers of stock.-A question propounded by Davies, Stone \& Auerbach, of New York, relative to stamps on certificates and transfers of stock is based
upon a state of facts given by them in their letter, which, if I understand fully, is as follows:
The transfer of the stock referred to had not been completed prior to the 1 st of July. The stock had been purchased and the certificate had been indorsed in blank and delivered before the 1st of July, 1898, but the stock had not been transferred upon the corporate books. After the 1st of July, upon request of the holder of the certificate to enter the transfer on the books of the company, this certificate is surrendered and the blank power of attorney on the back of the certificate filled in with the name of its transfer clerk in the usual way, and thereupon the stock is transferred upon the books of the company to the purchaser.

My opinion is that this purchase and transfer of stock is not complete until the latter transaction, and that the stamp tax applies to such paper as is issued after the 1st of July to the purchaser of the stock to denote that he is holder and owner of it .
As to the second proposition, it is my opinion that where the certificate of stock is stamped, as required by law, the entering of the transfer on the books of the company does not require a stamp; but the filling in of the power of attorney on the back of the certificate requires an additional stamp as a power of attorney to sell or transfer stock.

Tax on telegrams, payable by sender or transmitter.-The question is asked "Who must pay revenue tax on telegrams, sender or transmitterq"
Section 7 of the act makes it a misdemeauor for auy person to make, sign, or issue, or cause to ${ }^{\circ}$ be made, signed, or issued, any instrument, document, or paper of any kind or description whatever without the same being tax paid and without having thereupon the stamp to denote the tax thereon. This undoubtedly puts upon the persou making, signing, or issuing an instrument, document, or paper requiring a stamp the duty of having the stamp affixed when signed and issued. The sender of a telegram sigus the same and issues or causes it to be issued. The duty, therefore, devolves upon the sender to see that the tax-paid stamp is affixed.

Corporation certificates-Notary's certificates and affdacits to such certificates.-John Palmer, secretary of state, Albany, N. Y., asks:
(1) "Should corporation certificates executed prior to July 1 presented on July 1 for filing be stamped $q \overline{ } /$
(2) "Does each notary's certificate and affidavits to such certificates require stamps 8 "

The stamp tax is due upon the certificates and there is no tax upon the act of filing. If, therefore, the certificates were issued and were operative auterior to the 1st day of July they do not require the stamp. If, however, the filing is a proceeding necessary to make the certificates valid or operative, then, if this takes place on or after the 1st of July, the stamp should be attached.

Mr. Palmer's telegram is so general that it is difficult to give an opinion which can be relied on as definite or final.

As to the question concerning the certificates of notaries, these certificates would follow the corporation certificates, and if they were completed before the lst day of July with a completed certificate, then neither would be subject to the tax; but if these notaries' certificates are upon the certificate on or after the 1st of July, then I think the notary's certificate should be stamped in case the same are required by law.

And while I am on this subject I will advise that on and after the 1st of July the certificates of notaries public should be stamped as other certificates.

Bankers also engaged in brokerage business.-John W. Breidenthal, of Topeka, Kans., bank commissioner, asks this question:
"Whether a bank that is engaged in the selling of real estate and real-estate mortgages, as a broker, and is also engaged in the insurance business, as agent, will be required to pay license on each business?"
1 answer this question as follows: In section 2 of the war-revenue law, in the second clause, it is provided,
"That any person having paid the special tax as a banker shall not be required to pay the special tax as a broker."
Therefore, if parties engaged, as Mr. Breidenthal states, pay a tax as bankers, they would be exempt from the tax, as brokers. Insurance agents, are not taxed as such under this law.

Promissory note and pledge of bonds to secure payment combined in one instrument.F. A. Stoddard, manager of clearing house, St. Louis, Mo., forwards copy of a paper and asks in regard to the stamp tax required upon it. The paper is a promissory note, payable ninety days after date to the State Bank of St. Louis, or order, at its banking house, for the sum of $\$ 10,000$. On the face of the same paper $\$ 10,000$ in United States 4 per cent honds of 1905 are deposited and pledged by the terms of the paper as security for the payment of the note. My opinion is that this paper is taxable both as a promissory note, and, in addition thereto, as a pledge of property
as security for the payment of the note. In other words, the note should be stamped for the amount required for promissory notes for $\$ 10,000$ and the paper should, in addition, have the stamp required by a pledge of property to secure payment of the sum of $\$ 10,0 \hat{0} \hat{0}$.

Promissory notes witn mortgages as security-Coupon bonds.-Referring to the question asked by Richard Yates, collector at Springfield, Ill., in regard to the stamping of promissory notes and mortgages given in connection therewith as security therefor, and also as to notes with coupons and additional notes for interest, I agree with the conclusions set forth in the letter of the Commissioner of Internal Revenue to the said collector, bearing date of June 29, 1898. I have already held that, in case of a bond or note for money and mortgage for the security thereof, both instruments are liable for the tax. When a note or bond is given for the payment of money, and separate notes or bonds given for accruing interest, I hold that both the bond or note for the principal sum and the separate bonds or notes given for the interest require a stamp.
However, a bond for a principal sum with coupons attached denoting the accruing interest-the purpose being to detach the coupons as the interest becomes due and surrender them simply to denote that that interest has been paid-I hold that the only stamp required in such case is the stamp upon the bond for the principal money; that the interest coupons attached do not require separate stamps.

Government bills of lading-Tickets procured on Government transportation requests.Maj. C. R. Barnett, quartermaster, United States Army, writes from Jacksonville, June 28 , that the question has been raised whether or not it will be required under the revenue act to place a stamp on Government bills of lading and tickets procured on Government transportation requests for use by his department.

Under the head of "Express and freight," every railroad or steamboat company, carrier, express company, or corporation or person whose occupation is to act as such, is required to issue to the shipper or consignor, or his agent, or the person from whom any goods are accepted for transportation, a bill of lading, manifest, or some other evidence of the receipt of goods, wares, or merchandise received for carriage and transportation, and such bills of lading, manifest, or other memoranda, and each duplicate thereof, is required to be stamped with a stamp of the value of 1 cent. The failure to issue such bill of lading, manifest, or other memorandum subjects the railroad, steamboat company, carrier, express company, or other corporation or person to a penalty of $\$ 50$ for each offense. I hold that the carrier is required to give this bill of lading, manifest, or memorandum for articles, goods, wares, merchandise, or supplies belonging to the United States which are received for shipment, the same as if the shipper were an individual or a private party, and such bill of lading, etc., given to the United States or its officers for property delivered for shipment, together with the duplicate, should be stamped as in other cases. It is suggested that this is making the Government pay a tax to itself. This position is untenable, because the bill of lading, manifest, or memorandum is a paper issued by the carrier and it is the duty of the carrier under the law to stamp it, whether it be issued to a Government officer or to a private party.
As to the requests for transportation, they are issued by Government officers and directed to the transportation companies or lines and are exempt. There is no stamp tax required upon railroad or other passenger tickets upon public conveyances in the United States and, therefore, although a railroad ticket or a ticket authorizing the transportation of a number of persons be issued in response to the request of the United States, it stands upon the same footing as if the ticket or order for transportation were purchased for cash or at the instance of, or by, a private party. Such ticket or order for transportation does not require a stamp.

In this connection, I may as well call attention to the fact that, under the law, section 28 of the act, every seat sold in a palace or parlor car and every berth sold in a sleeping car is taxed 1 cent, and the company issuing the ticket for the seat or berth is required to pay for and affix the stamp to the ticket.

Bill of sale of vessel.-Collector Brady, of Richmond, Va., under date of June 28, asks if there is a tax under the war-revenue bill upon the bill of sale of a vessel I I find no provision in the act which levies a tax upon such sale or a bill of sale given in pursuance thereof.

Conveyance of real estate and promissory notes as part of purchase money-Does certain business constitute a brokerage business"-Lien created by section 30 of the act. -The Kentucky Title Company asks several questions, some of which are covered hereinbefore. I find this one: "The owner of real estate conveys it, retaining a vendor's lien to secure the payment of promissory notes given by the buyer as part of the purchase money. Is it necessary to stamp both the conveyance and notes $\%$ " I hold that it is, foilowing the rule which I have heretofore laid down.

Another question: "Is the lien created by section 30 of the act a lien upon the legacy or distributive share, which is to pay the tax, or is it a lien upon the whole estate of the decedent $\$$ In other words, will the real estate which descends to the hair be subject to a lien for the taxes on a legacy devised to anotherq"

The tax provided in section 29 of the act pertains exclusively to legacies and distributive shares of personal property. Section 30 provides that the tax or duty levied under section 29 shall be a lien and charge upon the property of every person who may die, as aforesaid, for twenty years, or until the same shall within that period be fully paid to and discharged by the United States. By the terms of this provision the lien is created and the taxes made a charge upon the property of the deceased person. The term property is nomen generalissimum, and includes both realty and personalty, and, construing the language strictly, the lien attaches to all the property of the decedent of whatever character, and if the Government should be put to its remedy to recover the tax, it would seem that all of the decedent's property would be liable for the tax upon any part of it.

But section 30 makes the property in the hands of the executor, administrator, or trustee first liable for this tax, because it provides that the executor, administrator, or trustee, before payment and distribution to the legatees, or any parties entitled to a beneficial interest in the property held by them, shall render to the collector of the district in which the decedent was a resident a duplicate list or statement of the amount of such legacy or distributive share, together with the amount of duty which has accrued or shall accrue thereon, belonging to legatees or distributees, and such executor, administrator, or trustee is required to pay the tax on the same from the funds in hand before paying out the legacies or distributive shares. So it is probable that the question as to whether other property of the decedent is bound will never arise, for the reason that the fiduciary is required to pay the tax on the fund in hand before distribution.

The next question by this company is, that the company is engaged in the business of examining and insuring titles to real estate and lends part of its capital on promissory notes, secured by mortgage on real estate, and these notes are sometimes bought from the company by others. They ask if the company is a broker within the meaning of the act.
I think to carry on the business described in the question constitutes a broker under subdivision 2 of section 2 of the act.

Duplicate and triplicate transportation, warehouse, and distillerg' bonds.-John C. Lynch, collector at San Francisco, asks if duplicate and triplicate transportation, warehouse, and distillers' bonds should be staniped.

I have been unable to find any law requiring duplicates or triplicates of such bonds to be made. It may be that, under the authority vested in the Secretary of the Treasury to make regulations in regard to these bonds, he has issued some regulation to this effect. The statute requires that a distiller shall give a bond with certain conditions to be approved by the collector, and like provisions are made in the existing internal-revenue law for the execution of what are called transportation bonds, either for distilled spirits or manufactured tobacco. The same provisions are made as regards what are called warehouse bonds, but in no instance do these laws require anything other than the original bond.

I therefore conclude that the stamp upon the original bond is all that is required of the maker. If the Government takes duplicates or triplicates for its own convenience, which are mere copies of the original bond, $I$ do not think the maker of the bond liable for stamp tax upon such duplicates or triplicates, for he has fulfilled the requirement of the law when he executes the original bond.

Entry of goods at warehouse-Bonds in connection, therewith.-The entry of goods, wares, or merchandise at any custom-house, either for consumption or warehousing, is made liable to stamp duty according to the value of the goods, etc., so entered. Entry for withdrawal of any goods or merchandise from customs bonded warehouses requires a stamp of 50 cents. I hold that goods entered for consumption or warehousing, and at the same time entered for withdrawal, are liable to pay the stamp tax for each. And in regard to bonds taken in connection with warehousing or withdrawal of goods, wares, or merchandise, such bonds are required to be stamped as any other bonds; also bonds connected with the entry and clearance of vessels.
Bonds in general-Bonds required in legal proceedings.-In this connection, it is well to say that bonds of Government contractors and all bonds given by individuals or others, except such as are exempted specially by the terms of the act, should have the stamp tax paid on the same. In other words, all bonds are liable to the tax except such as may be required in legal proceedings. I construe bonds required in legal proceedings to he such as are given or taken in the courts of justice in either civil or criminal causes, such as prosecution bonds, injunction bonds, bonds to stay proceedings, bonds upon appeal, writs of error, bonds for cost, and the like; and in criminal cases, recognizances, bonds for appearance, bail bonds, and also bonds in criminal cases upon appeal and writs of error, supersedeas bonds, etc.

Bond for commissary of subsistence of volunteers, amount of tax required.-The War Department presents a form of bond for commissary of suhsistence of volunteers, with rank of captain, in the penal sum of $\$ 12,000$, to which a guarantee company is surety, and requests an opinion as to the amount of stamp required upon this bond.

In the first place, the bond should have a 50 -cent stamp as required under the head of "Bond," on page 14, and in addition thereto this bond should have a stamp denoting one-half of 1 cent on each dollar, or fractional part, thereof, paid by the principal obligor thereof on this bond as a premium. Of course the amount of this latter stamp can not be determined until the amount of such premium is ascertained.

In order to make plain, a bond of the above description would require 50 cents. Then, suppose the guarantee company charges the principal obligor 3 per cent. On this bond, the penalty of which is $\$ 12,000$, the premium would be $\$ 360$. This would make the additional stamp required under the act $\$ 1.80$, thus making the whole stamp upon the instrument $\$ 2.30$.

Fraternal beneficiary associations.-The Travelers' Protective Association of St. Louis, Mo., asks if the war-revenue bill exempte fraternal beneficiary associations giving life insurance to their members. Are not fraternal beneficiary associations giving their members accident insurance exempt under this law?

I have already construed the provisions for exemption as applied to marine, inland, and fire insurance. The exemption for life insurance is in substance the same, and I will only add that, in order to be entitled to the exemption, the insurance business must be carried on strictly within the letter and spirit of the provision. I can not see how any company doing a general accident insurance business can come within this provision. The basis of the exemption is the fact that the business carried on by the association, as referred to in the said provision, is not for profit, and I think this is the test. I hold that wherever the motive of protit enters into the operation of any life insurance company, accident or otberwise, the exemption can not apply. Accident companies insure against death as well as against injury, and belong in the class called life insurance.
Exemption of German consuls from tax on their checks.-M. Bettman, collector of internal revenue, Cincinnati, desires to know if the Imperial German consul at Cincinnati is required to put 2 -cent stamps on his private checks.

Under Article III of the consular convention between the United States and the German Empire, signed December 11, 1871, the respective consuls-general, consuls, vice-consuls, and consular agents, as well as their chancellors and secretaries, are exempt from all direct, personal, or sumptuary taxes, duties, and contributions, whether Federal, State, or municipal, unless the said consular officers become owners of property in the country or engage in commerce, in which instance they shall be subject to the same taxes and imposts and the same jurisdiction as citizens of the country, property holders, or merchants.
$l$ therefore hold that the private check of the consul or of his secretary, given in the course of their residence here in their official capacities, for incidental expenses and other private affairs not connected with trade or traffic, are exempt from the stamp tax.

Enrolled vessels-Registered vessels.-The Lake Carriers' Association, representing the enrolled vessels engaged in commerce on the Great Lakes and other tributary waters, ask a ruling as to whether such enrolled vessels are subject to the tax provided for under the head of "Charter party," Schedule A. I think not.

The law as found in the Revised Statutes, Title XLVIII, the regulation of commorce and navigation, providing for the registry and recording of vessels, applies to such vessels as are required to be registered, and the law in Title L, Revised Statutes, regulation of vessels in domestic commerce, provides for the enrollment of vessels.

Under Title XLVIII registered tonnage comprises the tonuage of vessels of the United States employed in foreign trade or the whale fisheries, and under Title L enrolled tonnage comprises the tonnage of vessels eruployed in domestic trade and in trade on the Great Lakes with Canada over 20 tons, those under 20 tons of this class being termed "licensed vessels."
I am of the opinion that the clause of the war-revenue act under consideration applies only to vessels registered under Title XLVIII, and does not apply to vessels eurolled or licensed under Title L. I think the purpose of the law was to make this distinction because of the fact that the vessels enrolled and licensed under Title L are engaged in domestic transportation, and it would be a palpable discrimination against them in favor of other methods of domestic or inland transportation to require the tax provided for under the paragraph cited. When the term "registered tonnage" was used in the act, it could mean, in my opinion, nothing more than to apply the law to such vessels as are required by law to be registered. It is a technical term and applied to a particular class of vessels known as registered vessels in distinction from enrolled vessels and licensed vessels.

Receipts for the payment of money.-There are several communications asking if stamps are required upon ordinary receipts or acknowledgments for the payment of money; for instance, such as a merchant would give when a store account is paid.

I find no provision in the law requiring a stamp upon such receipts or acknowledgmenṭs.

Deeds of release.-Another question asked is as follows: "Is a stamp required on a deed of release the same as on a deed of conveyance?" I answer, "Yes." A release which operates as a deed of reinvestment to title or release of liens, so that the holder of an equity of redemption takes a legal title, or any paper of this character concerning real estate, executed with the solemnity of a deed, requires to be stamped in a like manuer with deeds of conveyance.

Steamship master's ocean receipt.-Cbarles F. Ortheveir \& Sons, steamship agents, New Orleans, ask this question: "Is it necessary to atfix revenue stamps to steamship master's ocean receipt issued in connection with through railroad bill of ladingr for export goods covering goods to foreign destination, upon which through bill of lading export revevue stamp has already been affixed; and if so, is it the duty of the railroad who requires the receipt of the swamship company to affix the same?"

I am not sure that I fully understand this question, becanse I do not know precisely what is meant by a steamship master's ocean receipt. I will say, however, that if goods or mercliaudise are started for shipment to a foreigu destination and are carriod in part by rail to a port or place in the United States where they are reloaded upon vessels to be carried to the foreign country, the railroad company would have to give, at the place where the goods or merchandise are received by the company for shipment, the bill of lading, manifest, or memorandum, with duplicates as required, and upon these a stamp of 1 cent should be affixed. When the goods have reached the limits of domestic transportation and are reshipped from the port or place whence they go to the foreign conntry, then the "bills of lading or receipt" for goods, merchandise, or effects to be exported must have a stamp of 10 cents placed uponit.

It may be that inland transportation compauies operating in connection with vessels carrying goods from this country to a foreign country, where the goods are first shipped upon the domestic line consigned to the foreign country, would give a domestic bill of lading and also the bill of lading or receipt for export. If this is done, then both the domestic bill of lading, manifest, or nemoraudum as well as the bill of lading or receipt for the goods for export would have to be stamped as required.

An illustration: Suppose a manufacturer in Cincinnati desires to ship a cargo of his manufactured articles to a merchant in Liverpool. A railroad company running from Cincinnati to New York has freight rates in connection with a steamboat line from New York to Liverpool. The railroad company might receive the shipment at Cincinnati consigned to Liverpool, but certainly the bills of lading, manifests, or memoranda required for the domestic shipment and also the bills of lading or receipts for goods for export would have to be given and stamped as required. In other words, the railroad company would give a bill of lading stamped with the 1 -cent stamp and, as agent for the boat line at New York, would give a bill of lading or receipt for goods for export stamped with a 10-cent stamp. I do not know that such freight arrangements are made by inland and foreign transportation companies, but certainly goods which are shipped from this country to foreign countries and go partly inland must have the bills of lading for both domestic transportation and for export, and both must be stamped. The fact that the statute says "Goods, merchandise, or effects to be exported from a port or place in the United States" does not alter my opinion. I think this applies to the port or place where such goods leave the confines of this country and to which the goods are brought by domestic transportation.

This is as clearly as I can answer this question from the nnderstauding which I gather.
J. W. Laffey, of Harrison, N.J., asks this question:
"Whether the tax required upon bills of lading, manifests, and memoranda given upon receipt of goods for shipnient applies to. local deliveries of merchandise-i. $\theta$;, merchandise which is distributed throughout Newark, N. J., by a local expressman."

I do not think that persons engaged in the business of what is known as town or city delivery are included within the terms of the act. The law says:
"It shall be the duty of every railroad or steamboat company, carrier, express company, or corporation, or person whose occupation it is to act as such, to issue to the shipper or consignor, or his agent, or the person from whom any goods are accepted for transportation, a bill of lading, manifest," etc., and upon such bill of lading and duplicate thereof a stamp of one cent shall be affixed.

The bills of lading and manifests are, in my opinion, not required of those who operate as local deliverers of merchandise or packages in a town or city. The law is intended to apply to what is known as comnon carriers of freight.

French reciprocity bottled wine and vermuth.-Charles Meinecke \& Co., of San Fraucisco, Cal., ask this question: "Are we obliged to stamp French reciprocity bottled wines and vermuth after reciprocity treaty went into effect $q$ "

The reciprocity treaty which I presume is referred to is that which went into effect June 1, 189\%. In that I find the following as an agreement on the part of the United States:

FI 98-21
"That the rates of duty heretofore imposed and collected on still wines, the product of France, under the provisions of the United States tariff act of 1897, shall be conditionally suspended, and in place thereof shall be imposed and collected as follows, namely:
"On still wines and vermnth, in casks, thirty-five cents per gallon; in bottles or jugs, per case of one dozen bottles or jugs containiug each not note than one quart and more than one pint, or twenty-four bottles or jngs containing each not more than one pint, one dollar and twenty-tive cents per case, and auy excess beyond these quantities fuund in such bottles or jugs shall be subject to a duty of four cents pel: pint or fractional part thereof, but no separate or additional duty shall be assessed upon the bottles or jugs."

This treaty refers exclusively to the tariff duty and can have no reference to an internal-revenue tax provided for articlos to be put upon sale in the United States. The war-revenue bill, under Schedule 13 , provides that:
"Sparkling or other wines, when bottled for sale, upon each bottle containing one pint or less, one cent. Upon each bottle colltaining more than one pint, two - conts."

Under this provision any wines, foreign or domestic, bottled for sale reqnire the stamp. If the wines are imported in casks and bottled here to be put upon the market for sale, theu the stamp must le affixed by the bottler. If the wines are imported in bottles, then the stamp must he affixed as provided in section 24 , becanse that section provides that all such articles of foreign manufacture-that is, such articles as, if manufactured and put up in this country, would require a stamp-"slall, in addition to the import duty imposed upou the same, be subject to the stamp tax prescribed in this act."

Bunker coal.-Collector Bowden, port of Norfolk, submits the following: "There are daily arriving at this port vessels for 'bunker coal,' which are required to present manifest of such coal and clear upon manifest embracing the same under existing requlatious. I ask if such manifests, ombracing only bunker coal, would be deemed a cargo under Schedule $A$ of the act and require the affixing of staups, the amount of which is determined by the registered tonnage of the ship."

I understand that the manifest fur custom-house eutry or clearance of the cargo on any ship or vessel or steamer for a foreign port does not iuclude ship's supplies for its voyage. It ouly includes those things which the ship has taken aboard for transportation. In other words, it would not include its provisions, nor its supply of water, nor of coal to operate its machinery and for other purposes necessary to make the voyage. If what is known as "bunker coal" comes within the term "ship's supplies," then the manifest for it does not have to be stamped, because it is not a part of the cargo. The lading or freight of a ship is its cargo-the goods and merchandise conveyed in it from one port to another.

Tbe Western Uvion Telegraph Company aske several questions:
(1) In filing a combination or circuit report where uews is transmitted at oue sending on one wire, must a stamp be affixed for each paper or only one stamp for the entire dispatch*

A telegraphic dispatch is required to be stamped by the sender at the place of sending. If he sends ouly one dispatch he uses but one stamp, and this would be the case though the person receiving the dispatch at the other end of the line should distribute its contents to otber persons.
(2) In the above instance, when the eutire report is not filerl at once, but in sections at intervals of an hour or so, must a stamp or stamps be atfixed to each section of the report?

If it is, in fact, only one dispatch, though in different sections, it would require but the oue stamip. I do not understand that the law makes any ditference between a long and a short dispatch, or whether a dispatch is on several slips or on one piece of paper, or whether the operator continues to send until he has finished the dispatch or stops for refreshments and then sends the balance. So it is one message and reguires but one stamp.
(3) When one dispatch is filed for transmission to several papers-that is, a dispatch on one piece of paper but with several addresses on it-must there be a stamp alfixed for each address?

My opinion is that a dispatch addressed to several papers or persons should be construed to be a dispatch to each paper or person addressed. In other words, it should he construed as if the dispatch were written separately to each person or paper addressed, the difference being in this case from a combination or circuit report that, in the latter instance, the sender of the dispatch addresses it to one persou who distributes it after he receives it. In the other case, however, the dispateh is really sent by the telegraph company to each of the several addressees.
(4) We understand that stamps need not le affixed to matter filed by leased wire. Reports filed on these wires are not filed as single messages, but as periodical reports, and paid for in a lump sum per week, irrespective of the number of words filed.

I understand the telegraphie dispatches requiring a revenue stamp are such as are sent over telegraphic lines which are operated for public use and for profit-that is, such lines as are put up and conducted for the aceonmodation of such persons as feel inclined to patronize and pay the charges. I think this would except from its operation messages sent over mere private wires. For illnstration, I do not think a railroad company owning or operating wires connected with its business, and entirely in conncetion with its business, such as directions to engineers and conductors and the runniug and operating of trains, ete., is liable to the stamp duty.
There are several other questions proponuded by the telegraph company in the letter from which I have taken the forgoing interrogatories, but I think they are covered in the answers heretofore given.

QUESTIONS SUBMITTED TRROUGF ASSISTANT SECRETARY VANDERLIP UNDER sChedule a.

1. A buys through B, his broker, 100 shares of Rock Island stock. The stock is not delivered to A, the broker B carrying it for him. A memorandan of sale passes on which a $\$ 2$ stamp is affixed. Afterwards A takes up the stock and wishes to have it transferred to him on the books of the company. Must another $\$ 2$ be paid for the transfer ${ }^{4}$
I hold that the law does not require the payment of a second $\$ 2$.
The purchase of the stock in the outset was by B as agent for A, so there is but the one transaction, $B$ acting simply as A's agent, which is the same in law as if A acted himself, and the evidence of the transaction is by the delivery of a memorandum to. B as agent for A. This memorandum has the stamp reqnired for the sale of the stock attached. Under the provision in the first paragraph in Schedule A, in cases of agreement to sell, or where the trausfer is by the delivery of a certificate sigued in wlank, there shall be made and delivered to the seller by the buyer a bill or memorandum of such sale "to which the stamp shall be affixed." This evidently means that the stamp attached to the bill or memorandum of sale is the stamp required upon the transaction.

- 2. A broker bnys several lots of Rock Island stock for different customers, carrying it for them. On each transaction a memorandum of sale is made ont, on which the tax is paid. Before the dividend day the broker wishes all this stock to be trausferred to his name, he still carrying it for his customers. Must he pay the tax on the transfer of stock on the company's books? Does one $\$ 2$ stamp carry the transaction throngh to its completion, including trausfer on the comp:ny's books, or must $\$ 2$ per hundred shares be paid when the stock is trausferred on the books, irrespective as to whetber that transfer is only part of the transaction on which the tax has been paid?
Following the answer to the question next above, if the transaction is carricd ont and the transfer of stock on the books made in purstance of the original memorandum to the broker as agent, and the transfer is made to the principal aud not to the broker himself, the stannp upon the memorandum covers the transaction; but if the broker cbanges the nature of the transaction, and has an assigument of the stock made to himself, and not for those for whom he was acting as agent, this is a new transfer and a variation of the original memorandum of sale, and will reqnire another stamp.

3. A pledges 100 shares of stock with his banker as security for a loan. The stock certificate is assigned in blank and a memoraudum made, on which a $\$ 2$ stamp is affixed and canceled. When A pays the loan, the stock is handed back to him. Must another memorandum then be made, with another $\$ 2$ stanip aftixed?
The pledge or deposit of stock with a memorandum accompanying that the stock is to be forfeited ouly upon condition of failure to pay the debt for which it is pledged is not a sale of the stock nor a triansfer of the absolute title, and I think such a pledge of stock tor the payment of a debt shonld be stamped under the provisions of the law in regard to mortgage or pledge of lands, estate, or property, real or personal, as security for the payment of a certain sum of money, and not stamped as a memorandun of sale, Lecause it is not a sale, and the title of the stock does not pass ont of the person owning and pledging it nutil the conclition arises and it is disposed of by the bolder in accordance with the terms of the condition.
In case the debt is not paid and the stock pledged becomes liable to be sold for the payment of the debt, then whoever buys the stock, or is entitled to it after such condition arises, would be entitled to have a memorandum of sale or a certificate or a transfir ou the books, and, in whichever case, this would require a stamp as for the -sale and transfer of stock.
4. Are live-stock exchanges included under the following provisions?
"Upon each sale, agreement of sale, or agreement to sell any products or merchandise at any exchange or board of trade, or other similar place, either for present or future delivery, for each one hundred dullars in value of said sale, or agreement of
sale, or agreement to sell, one cent; and for each additional one hundred dollars, or fractional part thereof in excess of one huudred dollars, oue cent."

Live stock sold and bought in the markets would, in my opinion, be covered under the head of merchandise. I think it is also included as a product in the above paragraph. "Product" is a bioad term and includes whatever may be brought forth, effected, or yielded as the result of growth or labor, and it includes the product of agriculture, mines, manufactures, husbandry, fisheries, etc. I hold, therefore, if live stock is sold at an exchange or board of trade or other similar place, either for present or future delivery, the sile, agreement of sale, or agrecment to sell should be evidenced by a bill, memorandum, or agreement to be delivered by the seller to the buyer, aud this evidence should have the stamp required in the act.
5. Is a regularly maintained auction room included If an auction room comes within the term "exchange, bourd of trade, or other similar place," then sales made in such anction room would be liable to the tax, but I would not hold that an anction house where small articles or personal goods are sold at public auction and delivered at the time of sale would come within the meaning of this paragraph. For instance, the anctiouing off of secondhand furniture or household goods or remnants of stocks of goods sold by the piece, or even where horses or cattle might be sold one animal at a time and bought by various bidders. My opinion is that this paragraph is intended to apply more particularly to exchauges and offices of boards of trade and places of like character where transactions in present deliveries or futures in considerable quantities of merchandise or products, grain, cotton, tobacco, and the like are made.
6. It is the custom among bankers drawing exchange (foreign) in duplicate to give the purchaser the original, keeping the duplicate, not filled ont or signed, in the book of blank drafts, to be used only in case the parchaser loses the original and applies for the duplicate. In the great majority of cases the duplicate is never issued as a matter of fact. Still, the bill is technically in duplicate. Should a 2-cent stamp be affixed to the blank duplicate or a 4 -cent stamp to the issued original $\%$

A foreign bill of exchange drawn in but payable out of the United States, if drawn singly or otherwise than in a set of three or more, according to the custom of merchants and bankers, shall pay for a sum not exceeding \$100 4 cents, and for each. $\$ 100$ or fractioual part thereof in excess of $\$ 1004$ conts.
lf such foreign bill of exchange is drawn singly, as provided in this paragraph, and the banker or drawer of the bill retains simply a duplicate for his own convenience, which is never issued, the stamp of 4 cents, or whatever is required upon the original, is sufficient; but if the original should be lost and a duplicate actially issued to supply such loss, then such duplicate would require the same character of stamp as was put upon the original.

If, however, the drawing of the duplicate at the time of the making of the original brings the transaction within what is called drawing foreign bills of exchange in sets, then each bill of the set has to be stamped with a 2 -cent stamp as required for each $\$ 100$, and for each additional $\$ 100$ or fractional part of $\$ 100$. This can, therefore, only be settled by the nature of the transaction, for, as stated, if it is a single bill of exchange the tax is 4 cents for $\$ 100$, and for every additional $\$ 100$ or fractional part of $\$ 1004$ ceuts, and a duplicate uvissued would not require a stamp, but would require it in case it were actually issued.

If, however, the trausaction comes under the second clause of bills of exchange drawn in sets of two or more, then each bill of the set requires a stamp of 2 cents, ctc.
7. The question to which an answer is sought appears to be as to what notes or memoranda, of sale of brokers are included in the term "not otherwise provided for in this act."

I think the easiest way to answer this is to say that this includes all brokers' notes or memoranda of sale of any goods or merchandise, stocks, bonds, exchange, notes of hand, real estate, or property of any kind or description issued by brokers or persons acting as such, except those trausactions provided for in the first paragraph of Schedule A, becanse I do not find any transactions which would be entered into by brokers mentioned elsewhere in the act. It is evidently the purpose of the act to tax such transactions on the part of a broker as can be included in the paragraph in regard to brokers' contracts aud which are not specifically provided for in some other part of the act.
8. Does a release, dced, or any other instrument releasing a trust deed or mortgage come under the provision which says: "Deed, instrument, or writing whereby any lands, tcnements, or other realty sold shall be granted, assigned, transferred, or otherwise conveyed to or vested in the purchaser or purchasers, or any other person or persons, by his, her, or their direction?"

1 have already given my opinion heretofore under the head of deeds released, as follows: "A release which operates as a deed or reinvestment to title or release of liens, so that the holder of an equity of redemption takes a legal title, or any paper of this character concerning real estate, executed with the solemnity of a deed,
requires to be stamped in a like manner with deeds of converance." The stamp required upon said release would be the amount of the consideration of such a release, which would be the amount of money paid in order to secure the release, or if no consideration is named, the actual value of the property for which the release was executed.
9. A leases honse from B on monthly rental by a verbal agreement, there being no lease or other written instrument. The only written instrument is the receipt for the rent, stating that the money is received for rent of such and such premises for such and such term. Does such a receipt require a taxq Does a receipt for rent of a safety deposit box, there being no other written evidence of the right to use the box, require a stamp ?
In case there is a lease which has been stamped the monthly receipt presumably requires no stamp.

UnderSchedule A the act provides as follows: "Lease, agreement, memorandum, or contract for the hire, use, or rent of any land, tenement, or portion thereof, if for a period of time not exceeding one year, 25 cents; exceeding one year and not exceeding three years, 50 cents; exceediug three years, $\$ 1 . "$
This law evidently contemplates that the lease, agreement, memorandum, or contract for the use or rent of any land or tenement which is in writing should pay the stamp tax provided. Of course it is impossible to attach a stamp to an oral contract, a mere conversation. A receipt given for rent already accrued and due and which does not contain any stipulations of further renting is not subject to tax. The question in regard to the safe-deposit box would come within the above rule.
In regard to the stamp on a monthly receipt where the lease has been stamper, as I have said above, the receipt does not require any stamp.
10. A power of attorney is commonly incorporated in a real-estate mortgage. Must a separate stamp be affixed for such power of attorney in addition to the mortgage stampi Also, assignments of stock for collateral often contain powers of attorney.
A mortgage with power of sale requires only the stamp provided for a mortgage. That is, a mortgage in which property is conveyed as security for the payment of a debt, and so conditioned on the face of the mortgage that upon failure to pay the delt the mortgagee is empowered to make sale of the property. I regard such a mortgage as one instrnment and only subject to the mortgage tax. If, however, the nortgage, aside from the conveyance of the property as security of the debt, is accompanied by a separate and distinct stipulation in the form of a power of attorney as an independent act authorizing the sale of the property in case the debt is not paid, it is my opinion that both the mortgage and the power of attorney should have the required stamp for each.
11. Under the head "Bonds, debentures, or certificates of indebtedness, on each $\$ 100$ or face value thereof, etc.," is the face value of the coupon for interest to be included in the case of a long-term individual note secured by a mortgage or otherwise? Where coupons for interest are attached, most each coupon bear a stamp as a promisso:y note? Are coupons attached to bonds issued by corporations to be treated as notes and stamped, or included in the face value of the bond, or are they outside the provision of the law?

I have already given construction to the law relating to the above questions in answer to the inquiry of Richard Yates, collector, Springield, Ill., as follows:

In regard to the stamping of promissory notes and ruortgages given in connection therewith as security therefor, and also as to notes with coupons attached and additional notes for interest, I agree with the conclusions set forth in the letter of the Commissioner of Internal Revenue to Collector Yates, bearing date of June 29, 1898. I have already held that in case of a bond or note for money and mortgage for security thereof both instruments are liable for tax. When a note or bond is given for the payment of money aud separate notes or bonds given for accruing interest, I hold that both the bond or note for the principal sum and the separate bonds or notes given for the interest require the stamp. However, a bond for a principal sum with coupon attached denoting the accruing interest, the purpose being to detach the coupons when the amount is due, and surrender thems simply to denote that that interest had been paid, I hold that the ouly stamp required in such case is the stamp upon the bond for the principal money, and that the interest coupons attached do not require separate stamps. This is upou the ground that where a separate paper is given, pronising to pay a sum of money, whether it be for interest or anything else, it is a promissory note, and if it is signed with a seal, it becomes technically a bond, and such instrument being separate and in the form of a bond or promissory note requires a stamp. But a coupon attached to an interest-bearing paper merely to indicate the amount of interest due at the particular time and further to be evidence that the interest to such time is paid by the detachment of the coupon, is not a boud nor a promissory note. It is only a convenient way of estimating and paying interest; aud in stamping the bond to which coupons for
interest are attached, the amonnt of the face of the bond will govern the stamp, the aggregate of the coupons not ljeing included.
12. Under the head of "Broker's note or memorandım of sale," etc., this question is asked: Does this apply to every notice sent out, whetber applyiug to the same transaction or not To cite a common instance, B, a New Yorl broker, instructs C, his Chicago correspondeut, a stock broker, to buy 10,000 bushels of wheat. C, being only a stock broker, turns the order over to D, a board of trade broker. D notities C when the order is executed, C notifies B , and B notifies his customer. Should each notice bear a stanp?

1 think the purpose of this part of the act was to require the stamp for the note or memorandum of sale relating to each separate transaction, not every step that might le takeu in any one transaction, but the note or memorandum which was the evidence of a single completed transaction. If one person starts out to buy and several agencies are involved before the transaction is completed, it wonld not seem that the stamp is required at every step, but the stamp is for each note or memorandum of a sale. The transaction starts on the part of the party desiriag to purchase throngh oue or more agents. 'I'he transaction is brought to a conclusion and a note or memorandum of the sale bccomes necessary, and it is this last that requires the stamp. To use the illustration, B, a New York broker, desires to buy 10,000 bushels of wheat. He instructs C, his Chicago correspondent, who is a stock broker, to buy for him. C does not buy, but turns the order over to D, of the board of trade. D makes the purchase, notifies C, C notifies 13, and B notifies the customer. Now, this is a completed transaction, and the note or memorandum given upon this completed trausaction requires the stamp.

Duplicaie bills of lading on shipments for the Government.-The connsel for the Southern Railway Compauy states that the question has arisen, in regard to shipuents for the Government, that in such shipments sometimes two, three, or four duplicate bills of lading are clemanded, to be used as memoranda in the different departments, and asks this question:

In case of such duplicate bills of lading, there being no legal obligation on the part of the company to issue but one, isn't it fair that, if the Government demands such duplicate or duplicates, it should pay for or be charged with the 1-cent stamp that is necessary upon it or them?

Under Schedule A it is made the duty of railroads, steamboat companies, carriers, express companies, etc., to issue to shippers or persons from whom goods are accepted for transportation a bill of lading or manifest, and upon such bill of lading or nanifest and to each dnplicate thereof a stamp of 1 cunt is required. The question then arises as to whether the carrier is required under the provisions of the law to make one or more duplicates of the bill of lading or manifest. The provision of the statnte imposing a penalty of $\$ 50$ under this paragraph is for failure to issue the bill of ladiug. manifest, or other memorandum. There seems to be no penalty attached for failure to make a duplicate. So, then, the question presents itself as to whether a carrier can be compelled in the ordinary course of business to do more than issue the bill of lading, manifest, or memoranduim.

I have already held that the corporation or person required by the law to make, sign, or issue an instrument, document, or paper sulject to a stamp is primarily bonnd to aftix the stamp. Bnt section 6, in addition to devolving the duty of paring the tax upon those who make, sign, or issue a paper or instrument requiring a stamp, also devolves the duty of paring the tax npon those for whose use or henefit such papers or instruments are issned. It would seem fair, therefore, to hold that when a ralroad company or other carrier has issued a bill of lading, manifest, or memorandum, properly stamped, together with such duplicate or duplicates as are made and used in the ordinary course of their business, also stamped, if additional duplicates are demanded by the shipper and issued by the carrier purely for the convenience and benefit of the shipper, the tax on such additional duplicates shonld be paid by the party for whose nse or benefit they are made. In other words, it would be, in may opiuion, unjust to require a railroad or other carrier to issue duplicates simply for the benefit of the shipper, and out of the usual and ordinary course of business, and at the same time to be required to pay tax on them.

In regard to duplicates or additional duplicates which would not be issned by the carrier in the ordinary course of business and are only made npou the demand of the shipper, in cases where these duplicates are made to the Government, there is another question and that is, if the railroad company or carrier is not required to stamp then, whether they can be stampoel at all. It would be an unnecessary labor for the officers of the United States to use stamps and stamp instruments when the cost of such stamps would come out of the Government, the result being, to use a common expression, that the Government would be taking money out of one pocket and putting it into the other.

But I did not start out to discuss this view of it in this place. I was merely undertaking to make the point that where a railroad company or carrier hadl performed
the act required by the law-that of issning the bill of lading and such daplicate or duplicates (if there be sucb) as are required and customary in the ordinary course of business and stamped the same-the company or carrier shonld not be burdened with the tax upon duplicate or duplicates purely for the use and benelit of the shipper.

Oaths of national-bank officers.-The Comptroller of the Currency under date of July 1 says: "I desire a ruling on the question as to whether or not the list of shareholders required by section 5210 , Revised Statutes, of every national bank is such certiticate as to come within the provisions of the war-revenue law."
Section 5210 , above referred to, requires that the president and cashier of every national banking association shall cause to be kept at all times a full and correct list of the names and residences of all the shareholders in the association and the number of shares held by each. The section further requires that a copy of such list, on the first Monday of July of each year, veritied by the oath of such president or cashier, shall be transmitted to the Comptroller of the Currency.
I hold that the list referred to in the statute, verified by the oath of the president or cashier, forwarded to the Comptroller of the Currency, is not such certificate as requires a stamp tax to be paid thereon. The paper is not a certificate at all. It is simply a list of the shareholders in a banking association veritied by the oath of a bank officer.
The Comptroller, under date of July 5, incloses a blank form of oath of a director of a national bank, as required by section 5147 of the Revised Statutes, and asks if it is such a certificate as is required to be stamped under the war-revenue act.

I hold that it is not. Like the list of shareholders forwarded to the Comptroller veritied by the oath of the president or cashier, this oath of a director does not come under the head of "Certificate." The fact that the director swears that he is the owner in good faith and in his own right of the number of shares of stock required by the statute does not change the character of the paper from an oath to a oertificate.

Jurat.-A question has also arisen that may as well bo answered in connection with the above as to whether or not a stamp is required on the memorandum or clause at the font of an affidavit or oath, showing when and before whom it was subscribed and sworn to.
This memorandum is not a certificate. It is what the lav calls a jurat, and dues not come within the term "certificate."

Assignment of a policy of insurance.-H. M. Black \& Co., bankers and brokers, 55 Broadway, New York, make the following inquiry through the Attorney-General: The question propounded is, in substance, as to whether the stamp required upon the assignment of a policy of insurance sball be estimated by the amount of the face of the policy or the cash value of the policy at the time of assignment.
The lav says: "That upon each and every assignment of a policy of insurance a stamp duty shall be required and paid at the same rate as that imposed on the original instrument."
This language is plain and unmistakable and can not be interpreted to mean other than that the stamp upon the assignment shall be at the same rate as that refruired upon the original policy, and the cash value of the policy at the time of the assignment will govern the amount of tax, and in case an insurance policy is pledyed as security for a loan, then the stamp required will be, as in other cases of property pledged as security, according to the anount of the loan and not the value of the property pledged.

Bonds filed in court for sale of real estate, appointment of guardian, etc., as required in Pennsylvania.-George E. Neff, attorney at law', York, Pa., submits through the Attorney-General the following question:
"Under the Pennsylvania statute it is necessary, in order to obtain from the court any order to sell real estate, or for the appointment of guardian, etc., that a boud be filed in conrt. Are such bonds contemplated in the exceptions in the act nuder the head of 'Bonds,' which reads as follows: 'Except such as may be required in legal proceedings ''"'
I have already stated, under the head of "Bouds in general," that I construe bonds required in legal proceedings to include such as are given or taken in courts of justice, either in civil or criminal causes, suits or proceedings, such as prosecution bonds, injunction bonds, bonds to stay proceedinge, bonds upen appeal, bonds upon writ of error, bonds for cost, bonds of receivers or trustees appointed by courts in causes pending, bonds given in claim and delivery actions for properit, etc. Such bonds are exempt. I will add here that a bond filed by order of court to obtain a decree or order for the sale of real estate is a bond given in a legal proceeding, that the appointment of a guardian or administrator is also a legal proceeding, because, before a guardian is appointed, application is made to the court having the jurisdiction of such matters by law, and the court, in parsuance of this application, appoints guardians to have custody of the persous or property, or both, of minors,
persons non compos mentis, etc. Such a proceerling is a legal proceeding. The same rule also applies to the appointment of what are called guardians and trustees pendente lite. In many of the States of the Union, especially those having the coile practice, remedies in courts of justice are divided into, first, actions, and, second, special proceedings. The action is defined to be "An ordinary proceeding in a court of justice by which a party prosecutes another party for the enforcewent or protection of a right, the redress or prevention of a wrong, or the prevention or punishment of a public offense."

Every other remedy is called a special proceeding. Both are, however, legal proceedings, and bonds given in the course of either are included under the head of "Bonds in legal proceedings," and are exempt from the stamp tax.

I will add here, while on this subject, that bonds given by public officers, such as sherifts, clerks, registers or recorders of deeds, treasurers of counties, cities, or towns, and other public ofiicers of like character, are not bonds given in legal proceedings and are therefore required to be stamped.

Stamp tax on Government business (express).-T. C. Platt, president of the United States Express Company, submits a question with reference to the stamp tax on Government business. I presume his purpose is to inquire as to whetber or not bills of lading given by the express company for property received from the Government of the United States or its agents or officers for slipment are required to be stamped.

I have already given my opinion upon this question in answer to the letter of Maj. C. R. Barnett, quartermaster, United States Army, dated at Jacksonville, June 28, 1898. The questiou propounded by Major Barnett was this, so far as it refers to this matter: As to whether it will be required under the revenue act to place a stamp upon Government bills of lading.

I understood this to mean bills of lading given by railroad companies, steamboat companies, express companies, and other earriers for property received by them from the United States Government, its officers or agents, for shipment or transportation. The opinion which I gave in auswer to Major Barnett is as follows:
" Under the head of 'Express and freight,' every railroad or steamboat company, carrier, express company, or corporation or person whose occupation it is to act as such, is required to issue to the shipper or consiguor, or his agent, or the person from whom any goods are accepted for transportation, a bill of lading, manifest, or some other evidence of the receipt of goods, wares, or merchandise received for earriage and transportation, and such bills of lading, manifests, or other meworauda, and each duplicate thereof, is required to be stamped with a stamp of the value of 1 cent. The failure to issue such bill of lading, manjfest, or other memorandum subjects the railroad, steamboat compans, carrier, express company, or other corporation or person to a penalty of $\$ 50$ for each offense. I hold that the carriur is required to give this bill of lading, manifest, or memorandum for articles, goods, wares, merchandise, or supplies belonging to the United States which are received for shipment, the same as if the shipper were an individual or a private party, and such bill of lading, etc., given to the United States or its officers for property delivered for shipment, together with the duplicates, should be stamped as in other cases. It is suggested that this is making the Government pay a tax to itself. This position is untenable, because the bill of lading, manifest, or nemorandum is a paper issmed by the carrier, and it is the duty of the carrier under the law to stamp it, whether it be issued to a Government officer or to a private party."

I have also given an opinion upon this same matter in response to a letter from the counsel for the Southern Railway Company, which will be found under the head of "Duplicate Bills of Lading on Shipments for the Government." This opiaion, however, refers particularly to the question of duplicates, and I desire that it be considered in connection with what I bave said above in answer to Mr. Platt's question.

Certificates-Further opinion regarding same.-The opinion upon exemptions in general as applied to papers executed by United States officers and ofticers of State, county, town, and municipal corporations in the discharge of official functions is not, I think, sufficiently explicit, and, as I stated, I wish to enlarge a little and be more defiuite in regard to this matter and especially in regard to certificates.

In Schedule A a stamp tax on certificates is provided for, first, on certificates of profits, or any certificate showing an intcrest in the property or accumulations of any association, company, or corporation, and of transters thereof, on each $\$ 100$ of face value or fraction thereof, 2 cents; second, on any certificate of damage or otherwise, and on other certificates or documents issued by any port warden, marive surveyor, or other person acting as such, 25 cents; third, certiticates of any description required by law not otherwise specified in this act, 10 cents.

As to the class of certificates required to he stamped under the first two heads, there seems to be no misunderstanding, as they are certificates particularly described, but the certificates which are to be included under the third head, namely, certiticates of any description required by law not otherwise specified in the act, need explanation in order to fully understand what certificates are subject to tax and what are exempt.

The question of exempted certificates arises in considering the scope of the first proviso in section 17, which reads as follows:
"That it is the intent hereby to exempt from the stamp tax imposed by this act such State, county, town, or other municipal corporations in the exercise only of functions strictly belonging to them in their ordinary governmental, taxing, or muvicipal capacity," and also in applying the principle of law which has been laid down that the Federal Government can not tax any agent or instrumentality of a State; in other words, can not tax any department of a State for any act or process which is a part of the government thereof. This, then, presents the subject in abont this form: If the act performed or the certificate issued by the officer is in the discharge of an official function necessary in operating the general machinery of the government it is exempt. But if it is an official act performed at the instance of a private individual, or as agent of outside parties, or in serving interests other than those required to carry on the governmental machinery, then it is subject to the tax; provided that the certificate is required by law for any special or general use.

It would, perhaps, be as well to illustrate, in order to establish more clearly the distinction. Take, for instance, the officer known as secretary of state. He is required generally in the States to certify laws passed by the legislature. Such a certificate would be exempt, because it is the performance of an act necessary as a part of his general goverumental functions.

The secretary of state is also, in some States, required to issue certificates of incorporation to incorporated companies and associations. This latter would be subject to the tax, because, whilst it is an official act, it is not such a one as comes within the description above. It is a certificate at the instance of private interests and not public requirements. He is required by law to issue it, but this requirement does not make it taxable. Its liability to taxation accrues because it is such a certificate as it is required by law must be filed in the proper offices of counties wherein the company is doing business.

Under the head of exemptions would come certificates of election boards in the various States in making returns of elections; also certificates of election issued to persons chosen to office. These certificates are issued to officers in the discharge of general governmental functions.

On the other hand, the certificate of a clerk of a court certifying a copy of a judgment which appears of record, given to any person by the clerk, would be subject to the tax, as would a certificate given by a register or recorder upon a copy of a deed or will of record in his office before the same could be placed to a use wherein it was required by law.

A question has arisen also as to what are known as certificates of search.
I am not certain that I fully understand what is meant by a certificate of search, but from the best information it seems to be a certificate given that the dockets or reaords of a court have been searched and show either that liens exist or do not exist as to property, or that judgments are recorded or are not recorded, and also certiticates of search to ascertain whether or not titles are good, whether taxes bave been paid, and things of this sort. If such be the character of the certificates, they are not such as are required in the general discharge of governmental functions on the part of the officers giving them, but are such as are needed for private use and private interests, and are therefore subject to the tax, provided they are for a use required by law.

I have gove into this subject more fully because of the fact that upon single questions that will be found in the opinion which I have been rendering I felt that there might be some misunderstanding, and I have therefore concluded to deliver this general opinion and apply it, as far as possible, and to draw the distiuctions between certificates or other acts of public officers which are exempt from taxation and those that are sulject to taxation.

Telegraphic dispatches.-In this connection there is a request from the Secretary of the Treasury, at the instance of the Commissioner of Internal Revenue, for au upiniou as to telegraphic dispatches sent by State officers on official business, aud also telegraphic dispatches sent by officers of counties, to wns, and other municipal corporations in their ofticial capacities.

In answer to this request I can but reiterate what I have stated in regard to certificates and other acts of officials of States, comnties, etc. If the dispatch is one which the officers send in the discharge of ofticial governmental finuctions in carrying on the business of the Government, as before stated, it would be exempt; but if it is a dispatch sent in furtherance of a private interest not convected with the operations of the machinery of Goverument, then it will be subject to tax. 'This is as explicit as I can make it. I will give an instance, bowever, which may better illnstrate:

Suppose an adjutant-general of a State, in the organization of recruits, should send an official dispatch to the War Department at Washington, or to some branch of the
military service, upon matters pertaining to the organization and equipment of troops. This would be a dispatch sent in carrying on the general govermmental functions, and would be exempt from the stamp tax. But if the adjutant-general shonld send a dispatch to some person relative to a matter pertaining to the interests of the person to whom it was sent, and not to the public interest, the dispatch would require a stamp.
I might use other illustrations in connection with other State officials, but this is sufficient to present the distinction that I have undertaken to draw.

Certificates of search.-J. Ward Gurley, United States attorney, New Orleans, incloses a letter from the city attorney at New Orleans, in which the city attorney incloses a copy of a blank certiticate of search, and asks as to whether, uuder the revenue law, such certificate is subject to stamp tax. The blank certiticate inclosed is in the following form:
"city taxes.
"No. 6735.
" Fee, \$1.00.
" Comptroller's Office,
"City of New Orleans, La.,
$\qquad$
"By research made this day on real estate in square No. ——.-, assessment distifet bounded by ....., the city taxes appear as follows:

"The foregoing is a true and correct statement as taken from tax records on file in this office.

> "P. Alph. Rabouin, Comptroller.
> "Per

After the opinion which 1 have given beretofore in regard to certificates of search, these certificates are subject to the tax. They are certificates given by the officer, not for a public or governmental purpose, but for private interests and use, and as such are liable to the tax whenever placed in use in answer to a requirement of the law. Until so used, of course, they are not subject to tax. It is this distinction which must be drawn in the matter of certificates.

Express and freight.-I have already, in response to a question asked in the letter from J. W. Laffay, of Harrison, N. J., given an opinion in regard to the application of the stamp law to carriers.

It is hard, under the general wording of this law, to draw a distinction sufficiently definite, in some respects, to accomplish what I regard as the intention of the law, but the better construction seems to be as I have given it-that mere local operators for the delivery of packages, baggage, and such like, within the limits of the same town or city, are not required to give bills of lading and hence to pay the tax, and although such operators may give a receipt for articles to be delivered, such receipt is not required to be taxed as a bill of lading or manifest. The carriers, in my opinion, which were intended to be included within the terms of Schedule A, under the head of "Express and fireight," are such as are engaged in the transportation of express matter and fiejght (thatis, guods, wares, and merchandise) from oue place to another in the ordinary conrse of commerce and trade. I can not think it was the purpose of the lawmakers to include within the provisions of this schedule a mere carrier, say, for instance, with a horse and wagon about a city or town, who does a local delivery business, within the terms of the act, although such person is technically a common carier; but when we undertake to draw the distinction between those sulbject to lie taxed and those that are not, we have to make the distinction general and not apply it to particular instances, and thus it becomes necessary to say that companies or persons engaged in what is called local delivery in operating in the same city or town are not required to pay the tax.

Bonds of State officials.-T. J. Hogan, secretary of state, Helena, Mont., asks, "Do official bonds by State officials require stamps "

The execution of an official bond is the act of an individual appointed to either Federal, State, county, or municipal office, and it is an act antecedent to qualitication as such officers. Such bonds, are not exempt from the stamp tax required nuder the war-revenue act, but should be stamped as other bouds.

When stamp should be affixed to policy of insurance.--Birch F. Rhodus, vice-president of the Western Mutual Life Association, Chicago, asks this question, as to when
the stamp should be affixed to a policy of insurance. He says that the companies usually prepare policies and forward them to their agents, to be delivered when the applicant for the policy pays the preminm, and desires to know if anch policies can not be stamped by the agent at the time of clelivery. I hold that the policy does not require a stamp until it is issued or is operative as an insurance policy; that an insurance company can stamp a policy through its local agent as well as through its general agent. Any ageut of the compans who is charged with the duty of delivering the policy to the pulicy holder and receiving the preminm would be authorized to affix and cancel the stamp, ou behalf of the company. The same principle wonld apply in case of a uote madle payable to a bank. The maker would not be reqnired to stamp the note at the noment he and his sureties signed it, becanse the directors might refuse to negotiate the note and make the loan. He would have a right to wait and learn whether or not his note would be accepted by the bank before be stamped it. It is not a note in contemplation of law until it is accepted, nor is an insurance policy effective and operative as such until it is delivered.

Releases.- What I have said heretofore in regard to releases may not be sufficiently explicit, and I therefore return to the subject.

The revenue act, under the head of "Conveyance," in Schedule A, says: Any "deed, instrument, or writing, whereby any lands, tenements, or other realty sold shall be granted, assigned, transferred, or otberwise conveyed to, or vested in, the pucchaser or purchasers, or any other person or persons, by his, her, or their direction."

I construe this to mean that any conveyance or other instrument whereby the title to real property or au iuterest therein is convesed from one person to another is sulbject to the tax, because persons who take title by conveyances such as deeds or other instruments sufficient to convey real estate are what are known in law as purchasers as contradistinguished from those who take by inheritance or operation of law. In the elementary works, under the bead of "Alienation by deed," a release is included among what are called "original conveyances." A release is technically described to be "the discharge or conveyance of a man's right in lands to another who has some former estate and possession therein."
I therefore reiterate what I have said before, that whare the release is a paper executed with the forms and the solemnity of a convegance of right, title, or interest in real estate, it is subject to the tax provided for under the head of "Conveyance."

However, in some States a release executed in a formal way, such as I have above described, is not required in order to denote that a mortgage has been satisfied. In sume instances, by local legislation, the entry upon the margin of the record of a mortgage that the same is satisfied and signed by the mortgagee and wituessed by the register is declared to cancel the mortgage. I bold that such entry upon the margin of the record is not a release and does not have the effect to pass title or reconvey title. This is accomplished by the operation of the statute, and such an entry upon the margin of the record wiuld not be required to be stamped. But where the release is executed, as before set forth, as a separate instrument in the form of a deed signed by the person who executes it under a seal, it comes under the head of "conveyance" and is subject to the tax.

By way of explanation as to the amount of stamp required upon a release, I am of the opinion that the release requires a stamp according to the value of the iuterest released. For illustration: If a mortgage is executed upon lands worth $\$ 10,000$ to secure $\$ 2,000$, the mortgage requires a stamp according to the amount secured and not according to the actual value of the land conveyed. So, when the release is executed upon the payment of the $\$ 2,000$, the release wonld require a stamp, not according to the value of the whole land, but according to the interest which is released and reconvejed, namely, $\$ 2,000$.

Warehouse receipts.- The Washington Market Company presents the guestion as to whether the provisions of the last paragraph under Schedule A applies to the business of this company, and havefiled copies of the papers which they are accustomed to give in the course of their business for articles stored with them, and wish a construction of the act showing whetber or not such papers should be stamped.

This company has a place of storage in the Central Market Building, Washington, D. C. Their receipts and tickets are all headed "Washington Market Company; Cold storage department." The business of this company, as I understand it, is to receive for storage for preservation meats, fruits, melons, etc., having refrigerators, etc., provided for such use. In addition to the above papers or instrumeuts this company also issues small card tickets abont the size of an ordinary railway card passenger's ticket, headed "Washington Market Company; Cold storage department," and on these tickets are printed such as the following: "One forequarter beef," "One hindquarter beef," "One sheep," "One calf," "One leg mutton," "Onr piece roast," "One watermelon," "One crate berries," etc. This shows the character of business carried on by this company. In addition to that the company in the course of its business lets out butchers' stands according to uumbers in the market
house of their company for certain terms-one month nilually-for a stipulated rental, surrendering the control of the stands for butchers' purposes to the person renting the same for the time mentioned in the memorandun of letting. The question presented is as to whether or not the business of this company is such as to bring it within the meaning of the clause which requires a stamp of 25 cents under the following provision of the act:
"Warehonse receipt for any goods, merchandise, or property of any lind held on storage in any public or private warehouse or yard, except receipts for agricultural products deposited by the actual grower thereof in the regular course of trade for sale, 25 cents."

The definition of a warehonse seems to be a place where goods or merchavdise not wanted for immediate sale are placed for safe-keeping and are kept for hire, and the term seems rather to be applicable to places of storage where goods and merchandise are stored in at least considerable quantities. While the act says "held on storage in any public or private warehouse," it also uses the word " yard," which is inteuded to metun a yard for storage. Now, yards are used for the storage of lumber, cotton, coal, wood for fuel, and such other goods or merchandise as can be safely stored with or witbont sheds. I do not think that Congress intended to include nnder this paragraph of Scherlule A places which were kept for the preservation and safety of perishable articles, such as meats, frnits, and vegetables, especially those which are maintained, as I have said before, for the storage of such articles in small quantities.
I observe on the tickets and rereipts given by the Washington Market Company described above that the charge for storing a watermelon is 10 cents. It would be a very unjust ruling to say that upon this ticket the keeper of the place of storage should put an internal-revente stamp of the value of 25 cents. The storage charges for otber articles are along in this proportion-for instance, a quarter of beef so much, a crate of berries so much-but the charges are of that small character that they at once discard the suggestion that the keeper of the place of storage could afford to place a tax stamp of 25 cents on the tickets.

Another branch of the business of this marle et company is the letting of stands in tbe market to butchers and other dealers in prorisions and family supplies. The letting of the stauds or stalls, as they may be called, is not connected with the storage business, and of course is not a matter for consideration except that the persons to whom the stands or stalls are let use the storage facilities which are provided by the company for the preservation of their stock on hand until they make actual sale of it-such things as fresh meats. fish, and other articles of supply which are kept in markets in cities, where people go to buy for consumption.. I should hold that in the course of these trausactions, where the storage of such things is from day to day merely for preservation and safety, that the receipt given for it would not come under the head of "warehouse receipt." But if the company goes to the extent of receiving for storage a considerable quantity of property to be held for some length of time, then their business in such instance would assmme the character of a warehonse, and the receipt giveu nuder such circumstances ought to bear the stamp.

This is about as well as I can explain my position about this matter. It is in some respects difficult to draw a well-defined line of clistinction, but $I$ have indicated, 1 think, what the intention of the law is by what I have said before and the examples I have given.

Telegraphic dispatches signed by State officers- Whose duty to affx'stamps to telegrams?The Commissioner of Internal Revenue, under date of July 6, asks this question: "Are telegraphic dispatches sirned by Stale officers exempt from stamp tax $q$ " etc.

Under the head of "Certificates" I have undertaken to draw the distinction between the instances in which officers of States, connties, towns, and other nunicipal corporations are exempt from the stamp tax and those in which they are required to pay, and I laid down the principle there under the law that where the act-that is, the making of the paper or othor instrument by the officer-was in the discharge of a duty in carrying out governmental functions required by law in operating the machinery of the Government the exemption applies; but if the act or making of the paper or other instrmment is simply that which the offcer does officially in the interest of a private person or outside party, to serve such private party or outside person individually, then the tax law applies.

The Commissioner also desires to know as to whose duty it is to affix and cancel the stamp required upon a telegraphic message.
I answer unhesitatingly that this duty belongs to the person who makes and delivers the dispatch to the telegraph company, becanse the telegraph company does not cause the dispatch to be written, nor is it written for the use or benefit of the telegraph company; so it would not be included under such papers as devolve the duty of taxing upon both those who make and those who cause to be made, or those for whose use and benefit the paper is made.

The Middiesex Banking Company-Notes, mortgages, certificates, assignments.-The Middlesex Banking Company, through its attorueys, Keatinge, Walrodt \& Miller, ask the following questions:

1. Where a promissory note is secured by a mortgage, is the transaction subject to a double tax; that is, must the note and the mortgage, both representing one loan, be each stamped for the amount of the loan?
Answer. I have already held that hoth the note and mortgage must be stamped.
2. Is a certificate of a notary public or other officer as to the acknowledgment or proof of execution of a mortgage subject to be stamped as a certificate required by law?

Answer. I have alrearly beld that it is not.
3. Is a certiticate of record of a mortgage subject to be stamped as a certificate required by law?

Answer. I have held that the memorandum on the back of a deed or mortgage noting its date of filing and the fact that it was recorded and filed by the register or recorder is not such a certificate as requires a stamp.
4. Is a satisfaction of mortgage subject to be stamped as a certificate required by law

Answer. Under the head of releases I have giren my opinion very fully on this matter. I have held that if a regular release is executed, sealed, and delivered, it comes under the head of a conveyance, and is subject to a stamp according to the value of the interests released or conveyed by such instrument. I have furtber held that where the local laws authorize the entry of satisfaction upon the record, and thus cancels a mortgage, that such entry does not require a stamp. It is veither a release nor a certiticate. If, however, the mortgagee, as he has a right to do in some States, makes a power of attorney to the register or recorder or other person to make the entry of satisfaction of the mortgage, the power of attorney thus given is subject to the stamp provided for a power of attorney.
5. Where there is no actual sale of a mortgage, but an assignment is made of the mortgage by a separate written instrument, and the mortgage and the instrument are merely deposited with the trustee as security for the company's obligations, is this such an assignment as is required to be stamped?
Answer. If the mortgages are pledged as security for the payment of the debt, the law provides the stamp upon the paper inclicated for such pledge as a pledge of property as security for the parment of a certain sum of money. If, however, the papers are placed in the hands of others than the primary holder with a formal assignment thereon or attached thereto, then such assignment is liable to the stamp. The law does not seem to make any distinction in regard to assignments. It simply says that every assignment or transfer of a nortgage shall have the stamp required. The only question, as I stated before, which could possibly arise is as to whether the transfer is made in the nature of a pledge or wonld come under the head of an assignment; and in either case the stamp would be at the same rate.
6. Where a mortgage is deposited with the trustee as security for the company's obligations witbout any assignments, but accompanied by a power of attorney anthorizing an assignment in the event of a default upon the obligations, is the transfer subject to the payment of any stamp other than the tax provided to be paid upon the power of attorney?

Answer. I think not. The law requires the tax to be paid upon an assignment made and not one in contemplatiou. So, if there is no assignment made, an assignment tax will not.have to be paid. If there is a power of attorney which authorizes an assignment, such power of attorney is subject to the tax, and then if the attorney atterwards makes an assignment of the mortgage, the assigument must be taxed when be makes it.

Power of attorney-(a) For use in this country-(b) For use in foreign countries.Louis Casabona, care of Officio Legale Italiano, 937 Christian street, Philadelphia, asks this question: As to whether or not a paper executed in this conntry by an Italian, written in Italian, empowering an attorney in Italy to do some act in connection with business, property, or estate in Italy, and whicli is countersigned by the Italian consular agent or officer in this country, is liable to be stamped as a power of attorney
It is my opinion that the stamp provided for under schedule $A$ is intended for such powers of attorney as are made for use in this country and not such as are written and signed in this country, but for use in foreign conntries. If, however, a power of attorney is executed in a foreign country for use iu this country, when it comes here for use it would be subject to the stamp. Under this construction the power of attorney described in Casabona's letter, being for use in Italy, would not require a stamp.

Official functions of State offcers-Exemptions.-Hon. William A. Ketcham, attorneygeneral of Indiana, under date of July 11, writes the Attorney-General for a construction as to exemption of State officers under the war-revenue act, and especially
as to the first proviso of section 17 of the act. I have already, in my opinion, heretofore drawn the distinction botween such acts of these officers as are exempt and those which are subject to the tax.
Surplus of mational banks.-Under the first paragraph of section 2 of the war-revenue act special taxes are imposed annually as follows:
"Bankers nsing or employing a capital not exceeding the sum of twenty-five thonsand dollars shall pay fify dollars; when using or employing a capital exceeding twenty-five thousand dollars, for every additional thousand dollars in excess of twenty-five thousand dollars, two dollars, and in estimating capital surplus shall be included. The amonnt of such annual tax shall in all cases be computed on the basis of the capital and surplas for the preceding fiscal year."
The question has arisen as to what is meant by "surplus" in this provision of the law, and as to whether or not it includes profits.
I am of the opiniou that it does not include profits, but only the surplus provided for in section 5199 of the Revised Statntes, which says:
"I'he directors of any association may semiannually declare a dividend of so much of the net profits of the association as they shall judge expedient; but each association shall, before the dectaration of a dividend, carry one-tenth part of its net protits of the preceding balf year to its surplus fond until the same shall amount to twenty per centum of its capital stock."
This section is one of the provisions of Title LXII, "National banks," Revised Statutes of the United States.
The distinction is clearly drawn in this provision between what is constituted the surplns under the national banking act and the profits. The profits arising from the busiuess of a national bank are the subject of dividends to the shareholders and are substantially the property of the private shareholders and not of the banking association except in 80 far as they are affected by the foregoing provision of law, which requires a one-terith part thereof to be set aside, as provided, as a surplus, until such surplus shall equal 20 per cent of the capital stock of the bank.

It is plain, therefore, that the surplus of a national banking association is that which is declared by the national banking act to be such. This act does not treat protits as a surplus, but it constitutes a specific fund to be taken from the protits and set aside as a surplas. This surplus thus constituted is, in my opinion, the surplus referred to in the war-revenue act, and it does not include the profits of the bank only so much thereof as are set aside and constitute the surplus as above set forth. In order to give strength to this view of it, the matter of bank surplus is referred to also in section 5151 , which shows that under the laws of the United States the surplus of a bank is the part of the protits set apart from time to time until the fund reaches 20 per cent of the capital stock of the bank, and this is iu law the surplus.

Manifest for custom-house entry and for clearance.-The Commissioner of Internal Revenue, through the Secretary of the Treasury, under date of July 8, 1898, asks this question :
" Does the act of June 13, 1898, clearly impose the stamp tax for manifests of cargo of any ship eutered at acustom-house from a foreign port, as well as upon manifests of the cargo of any ship cleared for a foreign port ${ }^{\prime \prime}$

The provjsion of law which this question involves is under Schedule $A$, and is as follows:
"Manifest for custom-house entry or clearance of the cargo of any ship, vessel, or steamer for a foreign port.
"If the registered tonnage of such ship, vessel, or steamer does not exceed three hundred tons, one dollar.
"Exceeding three hundred tons, and notexceeding six hundred tons, three dollars.
"Exceeding six hundred tons, five dollars."
I think the language of this statute is sufficiently plain to include the manifest for entry of a cargo in the custom-house from a ship or other vessel coming into port, as well as the manifest for the clearance of the cargo of a ship going ont of port destined to some other place. The manifest of a vessel is the descriptive list of her cargo, comprising names of shiplers or consignors, marks, and general character of contents. The vessel is entered when the inaster presents his manifest at the custombouse and makes oath to its correctuess, which must be done before any part of the cargo is unladen. A vessel is cleared when the master presents his outward manifest at the custom-house for authentication. This last manifest is for the cargo of a vessel leaving a port, the distinction being that a nanifost for entry of a vessel applies to a vessel coming into port, and a manifest for clearance applies to a vessel going out of port. Therefore, when the act uses the term "manitest for customhouse entry" it can apply to nothing else save the manifest required as to the cargo of a vessel coming into a port from some other place, and when it uses the term "manifest for custom-house clearance" it means the manifest required of a vessel with a cargo clearing the port where the manifest is made for some other destina-
tion. To separate the act, therefore, and read it as it was undonbtedly intended to be read by the Congress, it would read as follows:
"Manifest for custom-bouse entry-If the registered tonnage of the ship, vessel, or steamer does not exceed," etc. And in the second clause: "Manifest for customhouse clearance of the cargo of any ship, vessel, or steamer for a foreign port."

It must be admitted that the words "for a foreign port" are unnecessary to complote the sense of the paragraph. In fact, it is these words which give rise to the question, and they may woll be discarded if it is evident from the other language of lhe paragraph what the meaning of the legislators was. Certainly there could be nosuch thing as a manifest for custom-house entry of the cargo of a ship for a foreign port, becainse manifests for entry do not apply to cargoes leaving our ports for foreign ports. A manifest for clearance applies to such cargoes. If, therefore, Congress had stopped after using the words "manifest for custom-house entry" there would be no difficulty in understanding what was meant, because a manifest for custom-house entry is the manifest required to be given upon the cargo of anincoming vessel.

I therefore hold that the language is sufficiently explicit to include the manifests both for entry and for clearance of vessels.

Cheoks and arafts of members of the foreign diplomatic corps.-The inquiry is made through tbe Riggs Bank as to whetber the checks and drafts of ambassadors, ministers, and other members of the foreign diplomatic corps residing in this country are subject to stamp duty?

I would hold that such checks and drafts should be exempted from the stamp tax, not because of any positive law, but upon the ground that it is a comity due from oue nation to another.

It is laid down in Hall's International Law, page 191, that "the person of a diplomatic agent, his personal effects, and the personal property belonging to him as the representative of his sovereign are not subject to taxation." Otherwise he enjoys no exemption from taxes and duties as of right. By courtesy, however, most, if not all, nations permit the entry free of duty of goods intended for his private use. The same principle is involved in the question here presented. Where the checks or dralts of a diplomatic agent are made in the course of the conduct of his business as such agent, or in connection with expenses incidental to his residence here as such agent, they should be excused from the payment of tax.

If, however, such agents become property owners or engage in commerce or trade, like other people, then papers which are otherwise subject to tax made in connectiou with such ownership of property, or in carrying on commerce and trade, should be taxed.

The treaty with Germany, of December 11, 1871, which is referred to before in my opinion, exempts consuls, vice-cousuls, consuls-general, and their secretaries, of the German Empire from the payment of Federal, State, or municipal taxes unless they become owners of property or engage in commerce. It may be that there are treaties with other foreign countries to the same end; but whether there be or not, I think it proper to hold that acts done and papers made or issued by diplomatic agents in transactions pertaining to the discharge of their official functions or incidental expenses connected with their residence here. as such agents, ought, in courtesy, to be exempt from the stamp tax.

Certificate relative to the enployment of children, issued by officers of the health department, New York, under a New Fork statute.-M. C. Murphy, president of the health department of New York City, in a letter to the Attorney-General (which has been referred to the Commissioner of Internal Rovenue) asks whether or not certificates jssued under the New York statutes relative to the employment of children shonld be stamped.

The New York State statute provides that "a child under the age of 14 years shall not be employed in any mercantile establishment, except that a child upward of 12 years of age may be employed therein during the vacation of the public schools of the city or district where such establishment is situated. No child under the age of 16 years shall be employed in any mercantile establishment, unless such child shall produce a certificate issued as provided in this article, to be filed in the office of such establishment."

The law provides that the "certificate shall be issued by the executive officer of the board, department, or commissioner of health of the city, town, or village where such child resides or is to be employed," etc.

I hold that these certiticates are not subject to tax. They are issued by the health officer under a general statute made for the benefit of the health and for the protection of the children and are therefore issued by the health officer in the discharge of a functional duty connected with the operations of the Government.

Free sample packages of proprietary medicines.-E. C. De Witt, 203-205 La Salle avemue, Chicaro, Ill., is a manufacturer of proprietary medicines. He manufactures for sale, under his formula and exclusive right, three remedies, namely, a cough cure,
witoh-hazel salve, and a brand of pills. (These, of course, when removed from the place of mauufactore, are sulject to the stamp required for proprietary medicines.) In addition, he manufactures small sample boxes or packages of his medicines for free distribution, which he gives away to the public. in connection with advertising circulars, etc. These small packages are labelled "Free sample package," and are never sold or oflered for sale, but are, as stated before, distributed free as an advertising method. The question is whether or not these sample packages, thits distributed, are subject to a stamp duty.

Section 20 of the war-revenue act says:

*     *         * "Any person, firm, company, or corporation that shall make, prepare, and sell, or remove for consumption or sale, drugs, medicines, preparations, compositions, articles, or things, inclading perfumery and cosmetics, upon which a tax is imposed by this act, as provided for in Schedule 3 , without affixing thereto an adhesive stamp or label denoting the tax before mentioned, shall be deemed guilty of a misdemeanor;" etc.

The tax upon such preparations as are manufactured by DeWitt are provided for under the first paragraph of Schedule B, which, uuder the head of "Medicinal proprietary articles and preparations," reads as follows:
"For and upon every packet, box, bottle, pot, or phial, or other inclosure, containing any pills, powders, tinctures, troches or lozenges, sirups, cordials, bitters, anodynes, tonics, plasters, lininvents, salves, ointments, pastes, drops, waters (except natural spring waters and carbonated natural spring waters), essences, spirits, oils, and all medicinal preparations or compositions whatsoever, made and sold, or removed for sale, by any person or persons whatever, wherein the person making or preparing the same has or claims to have any private formula, etc.
"Where such packet, box, bottle, pot, phial, or other inclosure, with its contents, shall not exceed at the retail price or value, the sum of five cents, one-eighth of one cent."
and following, stamps are provided for packets, etc., of larger price or value.
I have copied so much of section 20 and of Schedule $B$ in order to determine if a proper construction of the two together make these sample packages of medicine manufactured ly DeWitt and sent out of his manufacturing establishment for free distribution subject to stamp duty.

In the portion of section 20 above copied there are two contingencies in which a person would be guilty of the offense therein declared, namely: First, if the person shall make, prepare, and sell the articles named; second, if the person removes for consumption or sale the said articles or any of them.

Now, if the lawmakers had stopped at this stage, a romoval for consumption, strictly construed, of any of the articles named from the place of manufacture without a stamp would be a violation of the law; but the lawmakers went further, and after declaring that it wonld be an offense to make, prepare, and sell or to remove for consumption or sale certain articles, further described the articles as those "upon which a tax is imposed by this act, as provided for in Schedule B."

It then becomes necessary to examine how the tax upon the articles is provided for in Schedule B.

In Scherdule B, after naming the various articles specifically which are comprised nuder general heads in section 20, the law says, "made and sold, or removed for sale," shall require the stamp. It will be observed that the word "consumption" is omitted in the paragraph of Schedule $B$ applying to medicinal proprietary articles and preparations, and such articles are required to bestamped only whon they are "made and sold or removed for sale."

It will be observed that, under the head of "Perfumery and cosmetics and other similar articles," the legislators used the words "made, prepared, and sold or removed for consumption and sale."

Now, scction 20. after comprising generally medicinal proprietary articles and preparations which are particularly described iu Schedule B, also iucludes perfumery and cosmetics; but when we come to Schedule B we see that the language of the statute in cletining the tax upon medicinal proprietary articles and preparations is coulined to such as are "made and sold or removed for sale," whilst in defining the tax npon perfiniery and cosmetics and other similar articles the Congress enlarges and taxes those " made, prepared, and sold or removed for consumption and sale."

It is evident to my mind, therefore, that a medicinal proprietary article or preparation which is not made for sale nor sold, or removed from the place of manufacture for sale, is not subject to the stamp tax. Hence a mere sample box of a proprietary medicine or preparation put up and labeled "For free distribution," which is actually given away by the owner or proprietor, could not be classerl under the head of an article "made and sold or removed for sale," because it is made, but it is not sold;
it is removed, but it is not removed for sale. It is removed to be given away in connection with circulars and other papers as a method of advertiscment. Of course, if, after these boxes or packages for free distribution are put up and marked as above statcd, the proprietor or any other person were to sell them, or any of them, or offor them for sale, they would be grilty of a misdemeanor, becanse that would be a violation of the law, because the act of selling or offering for sale of such packages would be conclusive evidence that they were removed from the manufacturing place not for free delivery, but for sale.

I therefore conchide that the sample packages described as manufactured by DoWitt to be givell away in connection with other methods as a part of his advertising scbeme do not require the stamp provided in Schedule B.

Acknowledgments upon deeds.-I have heretofore held generally that certificates of acknowledgments upon deeds were subject to the stamp. This was upon the principle that the delivery of a deed passed title and that registration was not a necessary element to the completion of the deed as an instrument of conveyance. I therefore held that when a delivered deed was effective to pass title it required a stamp as a deed. although it had not leeer admitted to registration.

The question bas arisen, however, 1 n a different view, aud that is as to localities in which, by statute, a deed is not complete or operative to pass title until admitted to registration or record. In such case registration or record becomes a part of the execution of the deed, because under such circumstances it is not a completed deed and does not bave the effect as such until it is almitted to registration or record. A necessary step to the admission of a deed to registration or record is the acknowledgment or proof of execution before some officer authorized to take such acknowlment and proof and the certificate of such officer that such acknowledgment has been had or proof made. This certificate, therefore, antecedent to the registration, necessary to permit the instrument to go to registration, becomes simply an aet incident to the perfection of the instrument, and it would therefore seem consistent to hold that the cortificate of acknowledgment in cases like this would not be required to bave a separate stamp, but would be covered by the stamp required upon the completed deed or conveyance. The result, under ihese conditions, would be that in some States certificates upon deeds would be suljeet to stamp and in others exempt. Therefore, in order to make the administration of the law aniform throughout the country, I advise that certificates upon deeds and mortgages, in order to put them to registration, be exempted from stamp tax altogether.

Tarehouse receipt for tobacco deposited by the actual grower.-Beverly T. Crump, attorney at law, files a statement and brief in behalf of the tobacco trade of the city of Richmond, Va., aud propounds a question as to the application of the war-revenue act. The question presented br him is in substance as follows:
"If the actual grower of toliacco, which is an agricultural product, deposits the same in a warehouse in the regular course of tride for sale, and takes a warehouse receipt, which is a negotiable instrument under the statute law of Virginia, this receipt being exempt from the stawp tax when it is issued, does it become subject to the stamp tax at auy time thereafter, especialiy when presented by the holder in order to oltain possession of the profluct stored in the warehouse?"

I answer that such a receipt as is described by Mr. Crump is exempt from the stamp tax under the exception made as to warehouse receipts, and there is no provision of law which would require it to be stamped at any time thereafter, althongh the same may be transferred as a negotiable instrument and presented to the warehonseman by other than the original holder.

Drug brokers.-William L. Crounse, 1415 G street, Washington, D. C., applies to the Commissioncr of luternal Revenue for a construction of the war-revenue act in regard to what are called "drug brokers." A drug broker is described by Mr. Crounse to be a person or association in New York through whom orders for drugs from merchants in other parts of the conntry are delivered to wholesale drug honses in New York. For example, if a druggist in Washington, D. C., desires to buy a bill of drugs in New York, instead of sending his order directly to wholesale drug houses in the latter city, he seuds it to the New York drug broker. This broker, as he is called, talkes the order aud visits the various wholesale houses, and he places the merchant's order with the house proposing to sell for the lowest price. In case the bill is for an assortment of drngs, parts of the order are frequently placed with different honses, and each honse tills the order to the extent of such part of it as is so paced. No note or memorandum of the sale is given by the drug broker to the wholesale merchant, nor does the wholesale merchant do anything more tban fill the order as if it had come directly from the Washington merchant ju the outset. I think these brokers can properly be included under the head of "Commercial brokers," described in the war-revenue act to be "a person, firm, or company whose business it is as a broker to negotiate sales or purchases of goods, wares, produce, or merchandise," etc. These so-called drug brokers negotiate purchases from the wholesale houses in New York for merchants in other parts of the country. I think, there,

FI 98-22
fore, that they are subject to the $\$ 20$ tax provided in section 2 of the act, but $I$ do not think they are subject to the stamp tax provided for under the head of "Contract," in Schedule A, because the broker's note or memorandum of sale, provided for under Schedule A under the bead of "Contract," is not in use by the drug brokers. These brokers do not issue brokers' notes or memorauda of sale such as are contemplated in Schedule A.

Building and loan associations.-James P. Harter, secretary of the National Building and Loan Association, Hagerstown, Md., under date of July 13, 1898, asks whether it is necessary to stamp bonds giveu by members of the association as an evidence of indebtedness in borrowing on their stock, the said bonds being secured by deed of trust or mortgage, and whether the deed of trust or mortgage given by the borrower to the association requires a stamp.

The second proviso to section 17 of the war-revenue act is as follows:
"That stock and bonds issued by cooperative building and loan associations whose capital stock does not exceed ten thousand dollars, and building and loan associations or companies that make loans only to their shareholders, shall be exempt from the tax herein provided."

To be readily understoood this proviso should be divided into two paragraphs, the first of which wonld read as follows:
"That stock and bonds issued by cooperative building aud loan associations whose capital stock does not exceed ten thousand dollars shall be exempt from the tax herein provided."

This would exempt from the tax stock and bonds issued by any cooperative bulding and loan association where the capital stock did not exceed $\$ 10,000$.

The second paragraph would read as follows:
"That building and loan associations or companiesthat make loans only to their shareholders shall be exempt from the tax herein provided."

This second paragraph would apply to any building and loan association or company, no uatter what the capital stock, where loans are made only to shareholders, and under this provision all papers and instruments executed by any building and loan association or company wbich confines its loans to its shareholders, executed, made, or issued in the course of its busincss, would be exempt. The only question that presents itself is as to whether the individual member or sharcholder of such association or company is entitled to exemption when he executes a note, or deed of trust, or mortgage to the company for a loanmade to him by the company or association.

In construing a statnte it is always well to ascertain if possible the purpose which the makers had in view iu its enactment, and, if the language of the statute can be interpreted so as to carry ont this purpose, such interpretation should be given it. Building and loan associations that make loans only to their shareholders are understood to be for mutual benefit. They are intended to aid persons who have not present means to build houses and homes. It was, therefore, undoubtedly the intention of Congress to exempt such associations and instruments and papers executed strictly within the bounds of their legitimate operations from the stamp tax. The shareholder is a necessary element in the operation of an association which can loan only to shareholders, for, if there were no shareholders, such association would have no business, its operations in lending money being confined exclusively to shareholders.

It is fair to hold, therefore, that it was the intent of this provision of the law to provide an exemption for the shareholder in dealing with his association, as well as for the association in dealing with the shareholder. In other words, I think it is a fair construction to say that any papers and instruments (otherwise taxable) executed by a building and loan association that makes loans only to its shareholders, or any such papers and instruments made or executed by the shareholders to the association in dealing with the association and within the limits of its legitimate operations, are exempt from the stamp. In this connection I will say, hovever, that checks or drafts given by such associations or by the shareholders therein are not included within the exemption, but are subject to the tax.

Intermediate bills of lading or manifesis.-The question is presented through Charles S. Hamlin, attorney at law, Boston, Mass., as to what are known or called in railroad transportation of merchandise as "intermediate bills of lading or manifests," which are described to be bills of lading issued by connecting railroads, one to the other', merely for purposes of record and convenience.

I think that the bill of lading or manifest contemplated by the war-revenue act to be given by the carrier receiving goods for sbipment is the bill of lading given to the shipper, consignor, or his agent, or the person from whom the goods are accepted for transportation, at the time they are received for transportation from such shipper, consiguor, etc., and is the bill of lading, manifest, or memorandum which, in the hands of the shipper, is evidence that the goods have been received by the carrier for transportation from the point of delivery to the point of destination, or, in other words, from the place where the consignor has delivered them to the carrier to
the place of the consignee to whom the goods are directed. I do not think that the law applies to a memorandum or manifest given by connecting lines of railway for goods in transit consigned from one point to another. These are not bills of lading given to a shipper or consignor, but merely manifests or nemoranda that the goods in transit have passed from one line of railway to another.

Receipts for money drawn from banks.-The questiou is presented by J. A. Fort, casbier of the Bank of Blakely, Blakely, Ga., as to whether, when a depositor in a bank is paid in whole or in part the sum that the bank owes him, and executes a receipt to the bank for the amount paid, such receipt should be stamped.

A receipt given to a bank by a person to whom the bank is indebted as a depositor or otherwise, or for whom it holds funds, is no more subject to a stamp than a receipt given for any other debt or demand. The purpose of the law is to require stamps upon checks, which are commercially negotiable instruments. A check, however, is not required to be in any particular form. If it is in a form sufficient to constitute an order for the payment of money and assumes the character of a negotiable commercial instrument, then it is subject to the tax. There is much of the banking, especially in savings banks, done without the use of checks at all, the depositor having, a book in which the bank notes amounts deposited on the one side and amounts drawn out on the other. Of course the depositor in such case draws his money out of the bank, but still he does it in such a way as not to be subject to stamp duty, because he did not give a check. So, if a person does not give a check he does not have to pay the tax, and if he goes to the bank and the bank pays him upon its dues to him and he gives a receipt, such receipt does not require a stamp. But if he issues his receipt so that it would be good in the hands of another person to draw upon his deposit for the amount of it, then it loses the character of a receipt and becomes a check or draft and is subject to the tax.

Checks-Bills of exchange.-The National City Bank of New York in a letter to the Attorney-General, which is referred to the Commissioner of Internal Revenue, requests a construction of the war-revenue act in relation to bank checks and bills of exchange, the main question presented being whether or not a check drawn in this country upon a bank in a foreign country is to be stamped as a check or is subject to the stamp provided for a foreign bill of exchange. The provisions of the revenue act applicable to these subjects are as follows (Schedule A, p. 13) :
(1) "Bank check, draft or certificate of deposit not drawing interest, or order for the payment of any sum of money drawn upon or issued by any bank, trust company, or any person or persons, companies, or corporations at sight or on demand, two cents."
(2) "Bill of exchange (inland), draft, certificate of cleposit drawing interest, or order for the payment of any sum of money, otherwise than at sight or on demand, or any promissory note except bank notes issued for circulation, and for each renewal of the same, for a sum not exceeding oue hundred dollars, two cents, and for each additional one hundred dollars, or fractional part thereof in excess of one hundred dollars, two cents."
(3) "Bill of exchange (foreign) or letter of credit (including orders by telegraph or otherwise) for the payment of money, issued by express or other companies or any person or persons, drawn in but payable out of the United States, if drawn singly or otherwise than in sets of tbree or more according to the custom of merchants and bankers, shall pay for a sum not exceeding one hundred dollars four cents, and for each additional one hundred dollars, or fractional part thereof in excess of one hundred dollars, four cents."

Then there is a provision of the law applying to foreign bills of exchange and letters of credit when drawn in sets of two or more which it is not necessary to copy for the purposes of the matter under consideration. The provision of the law applicable to stamps upon checks is general and does not by its express provisions confine the tax provided for to checks upon domestic banks, and if there is nothing to be found in the act to qualify this provision, then it extends as well to checks drawn in this country upon foreign banks as to those drawn upon domestic banks, because a eheck, which is a well-defined commercial paper, is the same whether drawn upon funds on deposit in a foreign bank or upon funds on deposit in a domestic bank.

It is suggested, however, that a check drawn in this country upon a bank in a foreign couutry is taxable under the provisions of the law in relation to foreign bills of exchange or letters of credit. The distinction between a check and a bill of exchange either inland or foreign, is well defined. Daniels on Negotiable lnstruments defines a check to be "a draft or order npon a bank or banking house purporting to be drawn upon a deposit of funds for the payment at all events of a certain sum of money to a certain person therein named, or to him or his order, or to the bearer, and payable instantly on demand."

Tiedeman, in his work on commercial paper, says: "A check may be defined to be a draft or order having the essential characteristics of a bill of exchange and differ-
ing from the bill in being drawn on a bank or banker, apparently and presumptively against a deposit of fuods, payable on demand withont grace."

The Supreme Court of the United States, in the case of Merchants' Bank v. State Bank ( 10 Wall., 604), holds as follows:
"Bank checks are not iuland bills of excbange, but liave many of the properties of such commercial paper, and many of the rules of law morchant are alike applicable to both. Each is for a specilic sum, payable in money. In both cases there is a drawer, drawee, and payee, but without acceptance no action can be maintained upen either against the drawce. The chief point of difference is that a check is always drawn on a bank or banker and no days of grace are allowed."

A bill of exchange Mr. Daniels defines to be "an open letter addressed by one person to a secoud directing him, in effect, to pay absolntely and at all events a certain sum of money therein named to a third person or to any other to whom the third person nay order it to be paid, or it nay be payable to bearer or to the drawer himself."

Blackstone's definition of a bill of exchange is, "An open letter of request from one man to another desiring him to pay a sum of money therein named to a third "person on his account."

Mr. Tiedematn described a bill of exchange as follows: "A bill of exchange is an unconditional witten order by one person on another, directing him to pay to a third person or to his order, or to the bearer, the sum of money therein named."

The only difference between a foreign bill of exchange ind an inland bill of exchange is that the first is drawn in one country and made payable in another, while the latter is drawn and made payable in the same conntry.

From the foregoing the distinctions are sufficiently manifest to show that in comnucreial law a check drawn upon a bank is a different justrument from a bill of cxchange, either inland or foreign, and that thé distinctions are fully known and recognized in commercial transactions; that a check drawn in this country upon a bank is subject to the same tax whether the bank upon which it is drawn is a domestic bank or a bank located in a foreign country; that such check can not be construed into a bill of exchange and can not be legally subjected to the stamp required upon a bill of exchange.

Tobacco warehouses.-Hon. F. A. Woodard, Wilson, N. C., through Hon. Harry Skinner, M. C., submits a question as to tobacco warehouses, the question being whether the stamp of 10 cents required under the lead of "Contract" in the warrevenue act upon brokers' notes or umoranda of sale of any goods or merchandise, stocks, etc., applies to the dealings through what are known as to bacco warehouses.
Tobacco warehouses, as they are commonly called, are places in which tobacco is placed for actual sale, and the warehouseman sells it and dilivers it to the purchaser. 1 think Congress had such warehouses in mind when, mider the provision for stamp tax on warehouse receipts, it excepted receipts for agricnltural products deposited hy the actual grower thereof in the regular coursi of trade for sale. To those familiar with the manner of doing business through what are called tobacco warehonses it is well known that the great bulk of tobacco placed on sale or stored for sale is deposited by the actual grower-in other words, by the tobacco farmer-who brings his product and places it with the tobaceo warehouseman either for present or future sale. I have already held that the receipt given to the actual grower of tobacco who stores it in a tobacco warehonse for sale is exempt from tax. The question then arises as to whether the warchonseman himself, who conducts the lusiness, is a broker, either in the general acceptation of the term or as described.

The war-revenue act divides brokers into fonr classes, namely:
(1) Brokers who are defined to be those "whose business it is to negotiate purchises or sales of stocks, bonds, exchange, ballion, coined money, bank notes, promissory notes, or other securities, for fliemselves or others."
(2) Pawnbrokers, who are defined to be those "whose business or occupation it is to take or receive, by way of pledge, pawn, or exchange, any goods, wares, or merchandise, or any kind of personal property whatever, as security for the repayment of money loaned thereon."
(3) Commercial brokers, defined to be those "whose business it is as a broker to negotiate sales or purchases of goods, wares, produce, or merchandise," etc.
(4) Custom-honse brokers, detined to be those "whose occupation it is, as the agent of others, to arrange entries and other custom-house papers," etc.

There is only one of these classifications in which a tobacco warehonseman could by any construction be inchoder, and that is that of "commercial broker," and if the tobacco warchonseman negotiates sales or purchases of goods, wares, prodnce, or merchandisc as a broker, then he would come under this head.

But does he negotiate such sales as a broker? In otber words, does his business as conducted by him cone within the general meaning of the term "broker"
I think not, my opinion being that such warehouseman is a factor and not a broker.
As I understand it, the general distinction between a factor and a broker ị that a
factor has possession of the goods, wares, or merchandise with nower to sell under the usages of trade. A factor can sell in his own name if he sees proper, becanse the is intrusted with the muniments of title and the possession of the goods. Snch is the case, as I understand it, as relates to tobacco warehousemen. They have acturl possession of the tobacco, which is delivered to them for sale and complete control thereof.

On the other hand, a broker is neither intrusted witb the muniments of title nor the possession of the goods, wares, or merchandise. He sells simply, and only in the name of the owner and without actial possession.

I think, however, that a tobacco warchonseman, such as I have referred to, is subject to tax under the second paragraph of Schedule A, which reads as tollows:
"Upon each sale, agreement of sale, or agreement to sell any products or merchandise at any exchange or board of trade or other similar place, either for present or future delivery, for each $\$ 100$ in value of said sale or agreement of sale or agreement to sell, 1 cent," etc.

Under this provision it is made the duty of the seller of prodncts or merchandise at any exchange, board of trade, or othersimilar place to deliver to the buyer a bill, memorandum of agreement, or some other evidence of the sale, agreement of sale. or agreement to sell to which the stamp shall be affixed. And I advise nuder this construction of the law that it is the duty of a tobacco warehonseman to give to earh person who buys from bim as such, or to whom he agrees to sell, a bill or memorandum of the transaction, and if the amount of such bill or memorandrm is as much as $\$ 100$, then it should bear a stamp of 1 cent, and for each $\$ 100$ additional or fractional part thereof an additional cent.

Cotton factors.-Messrs. Alexander \& Alexander, cotton factors, 727 Reynolds street, Augusta, Ga., ask two questions:
(1) "On to-day, in the regnlar course of our business, we sold to a purchaser "f cotton in this city 25 bales of spot cotton from samples shown in our olfice. This cotton was on hand at the time of the sale and in our warehonse and ready for delivery, and the delivery of the same was also made to-day, and we have rendered a bill for the same, showing weight, price, and totals. That bill will be collectible to-morrow. Is it necessary that such a bill for cotton thus sold should carry a revenue stamp, and if so, how much ${ }^{\prime \prime}$

In line with what I have said in regard to tobaceo factors above, I hold that a transaction like that above does not come within the business of a broker, but that of a factor, and that such transaction is not subject to a broker's tax, but that it is subject to the tax provided by paragraph 2 of Schedule $A$ of the act-that is, that a bill or memorandum of sale should be given by the factor to the buyer, and that this should bear a stamp of 1 cent for the first $\$ 100$, and 1 cent for each additional $\$ 100$ or fractional part thereof.
(2) "Uo cotton factors come under the head of commercial brokers within the meaning of the war-revenue tax bill $\%$ "

I answer that they do not. They do not deal as brokers-that is, as I understand it. Cotton factors have cotton delivered to them for sale, and they have possession of the cotton at the tine of the sale, with the power to sell, while a broker cloes not actually handle goods, wares, or merchandise, but sells simply in the name of the owner and withont the actual possession of the goods.

Kansas City Live Stock Exchange.-The question is presented as to whether the transactions of the above-named association are liable to tax under the war-revenue act.

I have already said in answer to question 4; under head of "Questions submitted through Assistant Secretary Vanderlip under Schedule A," that live stock bought and sold in market is included under the term "merchandise." The second paragraph in Schedule A of the act provides a tax upon sales, agreements of sale, and agreements to sell products or merchandise at any exchange, board of trade, or other similar place, either for present or future delivery.

If the above-named association is not operating nuder a misnomer it is an exchange, the name adonted by the association itself being "The Kansas City Live Stock Exchange." The business of the concern is to deal in live stock, cattle, and, as I understand, negotiate sales for the owners of such stock who bring or send it to Kansas City to be put npon the market. I think the business carried on by this exchange is included within the provisions of the paragraph of the act to which I Lave above referred, and that it is the duty of this exchange, when a sale is made or an agreement of sale or an agreement to sell entered into, to give to the buyer a bill, memorandum, agreement, or other evidence of such sale, agreement of sale, or agreement to sell, and to place thereon the stamp required by the act, which is 1 cent for each $\$ 100$ in value of the said sale, agreement of sale, or agreement to sell, and 1 cent for each additional $\$ 100$ or fractional part thereof in excess of $\$ 100$.

Railroad-ticket broker.-A form of letter written in the Commissioner's office in answer to an inquiry of J. Spliedt, railroad-ticket broker, 507 Pennsylvania avenue,

Washington, D. C., is submitted to me. The question propounded by Mr. Spliedt is as follows:
"Will jou kindly iuform me moder what bead of brokers and what amount I ought to pay for war-revenue tax $\%$ "

He says: "I have been doing bnsiness in the city of Washington as a railroads ticket broker. I deal in railroad tickets. I buy the unused portion of railroad tickets from passengers and dispose of them to other passengers."
'The letter submitted advises Mr. Spliedt that he comes under the head of a commercial broker, as described in the fourth paragraph of section 2 of the war-revenue act. This paragraph says:
"Every person, firm, or company whose business it is as a broker to negotiate sales or purchases of goods, wares, produce, or merchandise, etc., shall pay a tax of twenty dollars."

In the outset I very much doabt if the business carried on by Spliedt can be included under the head of the term "broker," for a broker, as distinguished from a factor, is a person who negotiates sales as agent without having actual possession of the property bought and sold, whilst with the factor the owner places actual possession of the property to be sold. This act says the business shall be done as a broker. Now, Spliedt does not negotiate sales as an agent at all. He buys the ticket himself and takes it into bis possession as his own property, according to his statement, and then sells it again. So he is a dealer in railroad tickets in his own right and not as a broker. He does not negotiate sales for others as their agent in the usual manner of brokers, but he buys and sells for himself.

It is further necessary, in order to include Spliedt, that the articles in which he deals should come under the head of goods, wares, produce, or merchandise. The writer of the letter referred to seems to conclude that railroad tickets do not come under the head of goods, wares, or produce, for he says: "These railroad tickets are made merchandise of by being made subjects of barter and sale."

I do not agree to the position that the buying and selling of railroad tickets can make them merchandise if they are not otherwise, any more thau the buying and selling of a bank note, which is currency, would make such bank note merchandise.

In the case of The Citizens' Bank v. The Nantucket Steamboat Company (2 Story, 16), it is held:
"That the term 'merchandise' does not apply to mere evidences of value such as notes, bills, checks, policies of insurance, and bills of lading, but only to articles having an intrinsic value in bulk, weight, or measure, and which are bought and sold."

In United Stat6s $v$. One Sorrel Horse ( $22 \mathrm{Vt} ., 655$ ), it is held that, in construing the word "merchandise" used in section 4282 of the United States revenue statute, the term "merchandise" is used in its mercantile sense only. I would advise that the same signification should be given to the word "merchandise" in construing the present revenue act.

I have given this much space to the discussion of the term "merchandise" in order to show that an unused railroad ticket, thongh bouglit and sold, is not merchandise. I am, however, of the opinion that it can be included within the term "goods" (though the writer of the letter in the Commissioner's office did not seem to think so). The text writers say that the term "goods" means primarily "chattels, real as well as personal." It is generally, however, applied to movables only or to personalty, including choses in action as well as in possession.

In Seymour v. Bascombe (12 Wend. (N. Y.), 486), it is held that the term "goods" comprehends all a man's personal or movable property. Now, property is a nomen generalissimum, and comprebends everytbing over which a man may have dominion and ownership; so that I think a railroad ticket which a man buys becomes his prop-erty-hence, his goods. And if Spliedt is dealing in these goods as a broker, be is liable to the $\$ 20$ tax provided under the head of commercial broker. But if he does not deal as a broker, as the act requires, then he is not liable to that tax.

As I have before indicated, the doubt is as to whether he deals "as a broker," which is used in the statute to qualify the manner of dealing which constitutes a commercial broker. I before stated that what I regard as the distinguishing features of the business of a broker is that a broker negotiates purchases and sales for others. He is neither intrusted with the maniments of title nor the possession of the goods, wares, or merchandise. He sells simply and only in the name of the owner and without actual possession of the property. Spliedt does not do business for others at all. It is his own business. He buys and takes possession of the property and then resells it.

I Lave written this much upon this question, though perhaps not a very important one so far as it affects the revenue, because the same questions may arise in construing other parts of the revenue act. I do not hesitate to advise that Spliedt is not required to give a broker's note or memorandum of sale such as provided for in Schedule A under the head of "Contract," and that he is not liable to tax under this paragraph.

Banker-Broker.-The Wisconsin Trust Company, Mil waukee, Wis., makes inquiry as to whether the business conducted by this company is taxable under the warrevenue act. The letter to the Commissioner states:
"The lonsiness of this company is in every way strictly a trust busiuess. Its capital is employed in making loans upon note and mortgage, occasionally loaning upon United States bonds, first-class State or municipal securities, but always the capital of the company or such funds as it may hold as executor, trustee, or guardian of the estates which come into its hauds while acting in such fiduciary capacity, furnishing such of its clients as desire to purchase mortgages made by it as they care to purchase."
I am unhesitatingly of the opinion that this company is liable for the tax provided under section 2 of the war-revenue act upon bankers. While the company may not be a banker under the State laws of Wisconsin, it comes within the description of a banker given by the war-revenue act, which says:
"Every person, firm, or company * * * having a place of business where * * * money is advanced or loaned on stocks, bonds, bullion, bills of exc̣ange, or promissory notes." * * *
The facts as stated by the letter written to the Commissioner are that the company makes loans upon note and mortgage and occasionally loans upon United States bouds. It is unuecessary to take further time to say that the business of this company is taxable as a banker under the war-revenue act.

Bill of exchange.-Kuhn, Loeb \& Co., of 2729 Pine street, Nerr York, through Charles H. Treat, collector of iuternal revenue, submit a copy of a paper and request to be advised as to the stamp tax required thereon. The paper is as follows:

> Check No. 233.
> Messrs. Kuhn, Loeb \& Co., New Fork:

Frankfort a/M., den July 14, 1898.
Pay to the order of Messrs
the sum of three thousand four hundred and sixteen dollars sixty-seven cents
$\$ 3,416$.
Deutsche Effecten and Wechsel Bank.

This instrument is drawn in a foreign country for payment and use in this country. If it is in fact a check by the drawers upon bankers in this country with whom the drawers have deposits or credit to meet it, then, when it is presented for payment at the bank upon which it is drawn, it should have a 2 -cent internalrevenue stamp upon it.
If, however, Kuhn, Loeb \& Co. are not bankers, but are drawees, who are required to accept this paper before they are responsible for its payment, then it is a bill of exchange, because a foreign bill of exchange is one drawn in one country and payable in another, as distinguished from an inland bill of exchange, which is drawn aud payable in the same country. But the war-revenue act describes the foreign bills of exchange, which are taxable as such under that act, as those "drawn in but payable out of the United States," so the general definition of a foreigu bill of exchange is not applicable, such bills being confined, as before stated, by the express provisions of thie act to those drawn in but payable out of the United States.
Section 11 of the war-revenue act provides:
"That the acceptor or acceptors of any bill of exchange or order for the payment of any sum of money drawn, or purporting to be drawn, in any foreign country, but payable in the United States, shall, before paying or accepting the same, place thereupon a stamp, indicating the tax upon the same, as the law requires for inland bills of exchange or promissory, notes; and no bill of exchange shall be paid or negotiated without such stamp."

So, by the terms of the act itself, the instrument, a copy of which is under consideration, if, as before stated, drawn apon Knhn, Loeb \& Co. for acceptance, is a bill of exchange and must, before they accept it, be stamped as an inland bill of exchange. If, however, Kuhn, Loeb \& Co. are bankers and this paper is drawn by a depositor to be paid as a check from his deposit, then it should be stamped as a check.
The purpose of section 11 is evident, for while, technically, a paper like the one under consideration is a foreign bill of exchange, still this Government has no power to require the affixing of a stamp beyond its limits, and it is therefore made a provision of the law that when such paper or instrument reaches the Jnited States it assumes the character of an inland paper or instrument and is taxable as such.

Sight drafts drawn in foreign countries.-Collector Treat forwards a letter also from M. Bierling \& Son, brokers in foreign exchange, 39 Broad street, New York, in which they asis this question:
'If a merchant receives a draft from a foreign country drawn at three days' sight and he accepts it at sight, tendering a check for the same on his bank with the necessary 2 -cent stamp attached, would he be compelled in addition to place the war-
revenue stamp on the acceptance of same, since accepting at sight and not taking adrantage of the three days' interest?"

I think the provisions of section 11 cover this case, and the acceptor, no matter whether he takes advantage of the three days or not, is required, at the time of accepting, to place upon the paper a stamp as required upon an inland bill of exchauge. If he gives his check iu payment, of course the check requires a two-cent stamp.

Certain papers used by Italian moncy brokers and ticket agents in New York in sending money to Italy.-Collector Treat also incloses a letter from Bolognesi, Hartfield \& Co., 29 Wall street, Now York, to which are attached copies of papers ased by Italian money brokers and ticket agents in New York in seuding money to Italy.

I do not understand, from the meagerness of these copies, the precise modus operandi connected with these transactions. They really seem to have a dual purpose. In the first place, they advise the person to whom they are directed that a certain amount has been sent to him from New York, in care of a certain post-otice, and that the same is sent through the bank of A. Pagano Passadore \& Co., of Gonoa. I presame this means that the monoy is forwarded from New York through this bank and is sent in a letter to the holder of this paper at his post-office. If these be the ficts about it, then this paper is nothing more than a mere notification that the money luas been sent and wonld not be subject to a tax.

But furtber along the holder of the paper is advised to go to the post-office and ask for the rogistered letter, and if, after live days it has not arrived, to write to the bank mentioned, giving his name and the number and amount of the paper which has been sent him, and that the bank will give prompt satisfaction. I do not know whether this means that the bank will pay the money upon the order or not. If it cloes, and the paper is used as authority upon which the bank pays the money, then it assumes the character of acheck or order for the payment of money and would be subject to a 2-cent stamp before it leaves this country.

Yon had probably better let the collector get a more explicit explanation of the nature of the transactions in which these papers are used.

Corporation bonds secured by mortgage-Amount of stamp required on mortgage to secure bonds part of which are reserved to be issued at a future time-Railroad morigage to secure bond̀s which are reserved to be issued only on a mileage basis of road aftervards constructed.-Davies, Stone \& Auerbach, 32 Nassau strcet, Now York, through Collector Treat, ask:

1. Where a corporation issues bonds and executes a mortgage to secure same, must mortgage and bonds be stamped?

Answer. Both.
2. Where a portion of the bonds secured by a mortgage are required to be issued at a future time, does the mortgage require to be stamped at the time of its execution for the amount represented by the reserved bonds, which may never be issued ?

Answer. My opinion is that lhe mortgage rnust be stamped according to the amount which purports to be secured upon its face. There is no other rule which could be safely adopted in regard to the stamping of mortgages, and this is undoubtedly the meaving of the act. The bonds of course will be stamped as they are issued. If none are issued, then no stamp will be required.
3. Where a railroad mortgage is issued for the purpose of securing bonds, all of which are reserved to be issmed only on a mileage basis of road afterwards constructed, is stamp required on mortgago at the time of its execution?

Answer. Whenever the mortgage goes into operation it shonld have the stamp indicated by the amount secured upon its face. The mortgage can not go to registration without such stamp; and no recorder or register should receive it for registration without the stamp.

There is a fourth question, but it is answered by the foregoing.
Banker-The Wisconsin Trust Company.
July 29, 1898.
Hon. N. B. Scott,
Commissioner of Internal Revenue.
My Dear Mr. ScotT: Yours of this instant, relative to my memorandum decision in the case of the Wisconsin Trust Company, under the head of "Banker, Broker," is received.

I thank you for citing me to the case of Selden $v$. The Equitable Trust Company ( 94 U. S., 419). I bad not read this decision when I gave jou my opinion, but according to the facts given by the company (The Wiscousin Trust Company) itself as to the character of its business, I do not think it is exempt under this positiou. In that case the Equitable Trust Company, a corporation, describes its business as follows:
"Its only business has been and is the investing of its own capital in mortgage securities on real estate and selling such mortgage securities with the company's
guaranty. It does not collect or receive, nor has it ever collected or received, any deposit of money subject to be paid or remitted ou draft, check, or orler; nor does it receive deposits, issue notes, or make discounts of any description whatsoever, nor do any other business than aloove stated." Its manner of business was "to make loans thereof to individuals, taking from the borrower a bond * * * and securing the payment of said bond ly a mortgage deerl of real estate, executed by the borrower in conformity with the laws of the State where such real estate is situated. To the negotiation, sale, and guaranty of such bonds this company is exclusively devoted, and it incurs no obligations except those arising from such guaranty."

The business of the Wisconsin Trust Company, as stated by the company itself, is as follows:
"The business of this company is in every way strictly a trust business. Its capital is employed in making loans upon note and mortgage, occasionally loaning upon United States bouds, first-class State or municipal securities, but always the capital of the company, or such funds as it may hold as executor, trastee, or giardian of the estates which come into its lands while acting in such fidnciary capacity, furuishing such of its clients as desire to purchase mortgages made by it as they care to purchase."

The principle unon which the Supreme Court based its decision in the Selden Case was, that all the loans the compauy made were investments of its own capital in mortgige secnrities on real estate, and the court treated the bonds referred to as bonds tikiken from the borrowers as evidences of debt, and decided that, such investmeuts were not loans of money on bonds or promissory notes, because the bond was given by the borrower directly to the company as an evidence of the debt, and was not a boud or a promissory note hypothecated or deposited as security for the payment of tho debt to the company.

Now, if the Wisconsin Trust Company shonld be exempt from taxation under this decision, very ce:tainly when the company admits that it loans money upon United States bonds and first-class State and rumicipal securities, it can uo long or fall within the principle deciled in the Selden Case, becanse that is what the Supreme Court says expressly is the exception to the princjple litid down. In other words, the Wisconsin Trust Company admits that, in addition to loans which it makes upon note and mortgage, it does make loans in which United States bouds and first-class State and manicipal securities are hypothecated or deposited as security for the payment of the loan. It is not material what amount of bonds are pledged as security for the payment of the debt, so the loan is made upon bonds, wherther a bond of the United States, a bond of a State, a bond of a county, or the bond of any other municipal corporation.
With the distinction thus apparent between the business of the Equitable Trust Company in the Selden Case and the Wisconsin Trust Company, I still adhere to the opinion that the Wisconsin Trust Company is liable to the tax as a banker, and is not exempt under the principle declared in the Selden Case.

The tobaceo question submitted by the Commissioner at the request of Mr. Swanson is more a question of fact than the application of any general legal priuciple, and it is therefore diticult to reoder an opinion that can be applied in every instance. I think, however, that the Commissioner might well draw this distinction and make this modification of his ruling-that is, as follows: That while the general rule must. apply, if a sale be made trom a board of trade, exchange, or other like place, or if the dealer assumes the character of a commercial broker, the tax must be paid as required under the provisions of the act. But in cases where farmers bring tobacco which is the product of their own farms directly from the places of production to the places of sale, and it is sold at such places of sale by auctioneers, who make the sales in the names of the farmers and owners of the tobacco, a memorandum of sale and stamp is not required. In other words, it is held that where the farmer or prodncer brings his tobacco and sells it in his own name through an auctioneer the sale thus made will come within the scope of a sale made at an auction house, and not through an exchange, board of trade, or other like place.

## alaska.

The internal-revenue laws extend over Alaska as well as other portions of the country. Alaska is attached to the collection district of Oregon.

The internal-revenue collections in the Territory of Alaska for the fiscal year euded June $30,189 \mathrm{~S}$, amounted to $\$ 15,946.21$.

The internal-revenue taxes in that Territory are being faithfully collected at all points accessible, and it is believed that the losses sustained by the Government at points which can not be covered are very small.

The breweries and cigar factories, as well as most of the special taxpayers, are located in southeastern Alaska.

The internal-revenue special-tax laws are not license laws. They do not authorize auy person to carry on, in contravention of local laws, the busiuess which he chooses to engage in, and for which he makes return and pays tax to the United States; nor does his payment of this tax entitle him to any protection against trial, conviction, or sentence for violation of the laws of a State or Territory regulating the sale of liquors.

The United States Supreme Court, in the License Tax Cases ( 5 Wall., 462), held that the special tax stamp is not a license, but merely a receipt for the tax. It puts the United States under no obligation whatever to the holder beyond assuring him against prosecution under the special tax laws.
Under the act of May 17, 1884, permits for the sale of liquor for medicinal, mechanical, or scientific purposes are issuable by the governor of Alaska. (See Executive order of March 12, 1892, concerning the sale of intoxicating liquors in the Territory of Alaska, 38 Internal Revenue Record, 87.)
The collector of internal revenue is not to presume that a party who makes a return and applies for the special-tax stamp intends to violate the act of Congress regarding the sale of intoxicating liquors in the Territory of Alaska.

## INDIAN TERRITORY.

The same question has arisen in regard to the issuing of special-tax stamps in the Indian Territory.

The act of Congress approved March 1, 1895, prohibited the sale of spirituous, vinous, or malt liquors or other intoxicating beverages in the Indian Territory, and the later act, approved January 30, 1897, forbids the sale of such liquor to Indians in that Territory.*

It has been alleged that on this account the Government should not issue liquor dealers special-tax stamps, as some people in the Territory lave imagined that, having stamps issued by the collector of internal revenue, they are protected thereby fiom criminal prosecution under the laws relative to the Indian Territory.
There is no excuse for this supposition on the part of any person who takes out a special tax stamp as a liquor dealer. He is given full warning in advance, by the words printed on the stamp issued to him, that it is not a license, but merely a receipt for tax paid.

When application is made for a liquor dealer's special tax stamp, the presumption is that the applicant intends to carry on a lawful business, and it is the duty of the collector thereupon to receive the tax proffered and to issue the stamp.
The amount of internal-revenue taxes collected in the Indian Territory during the fiscal year ending June 30,1898 , was $\$ 5,946.81$.

[^21]There were in the Indian Territory during the last fiscal year 9 retail liquor dealers who paid the special tax under the internal-revenue laws, 301 retail dealers in malt liquors, and 12 wholesale dealers in malt liquors.

The Attorney-General, in an opinion rendered October 4, 1898, held that the establishment of a distillery in the Indian Territory, notwithstanding it was on land the Indian title to which was extinct, would be in contravention of law. (See decision published in the Treasury Decisions, vol. 2, p. 669.)

I recommend that the law in regard to the Indian Territory be amended so as to authorize the establishment of breweries and distilleries on land where the Indian title is extinct, so that the same provisions of law will apply there as in other States and Territories.

## THE HAWAIIAN ISLANDS.

The question of collecting internal-revenne taxes in the Hawaiian Islands has been considered, and in view of the opinion of the AttorneyGeneral dated July 22, 1898, it has been held that the Hawaiian Islands are treated as foreign territory until Congress has passed laws governing the subject.

The opinion of the Attorney-General referred to says, in reference to the resolution of Congress for annexing the islands to the United States:

No arrangement is made for collecting our tonnage tax upon ressels of other countries entering Hawaiian ports, nor is any other tax law or other law of the United States, unless it be the law prohibiting Chinese immigration, expressly or impliedly, furnished with instrumentalities for its execution. (See Treasury Decisions, vol. 2, No. 5, p. 216.)

PORTO RICO.
Questions are beginning to arise in regard to this island, which is soon to come under the authority of the United States as a result of the war with Spain.

I recommend that Congress be requested to enact the necessary leg. islation, so that the collection of internal-revenue taxes may be made there as in other parts of the United States as soon as possession is acquired.

## CUBA.

Provision should also be made for the collection of internal-revenue taxes in Cuba while occupied by the United States authorities.

## PHILIPPINE ISLANDS.

If the peace negotiations now in progress result in the acquisition or retention of the Pbilippine Islands, or any portion of them, I recommend suitable legislation looking to the collection of internal-revenue taxes and the enforcement of the internal-revenue laws in such territory.

## DIVISION OF DISTILLED SPIRITS.

The statements under the above heading relating to the fiscal year ended June 30, 1898, exhibit the number of grain, molasses, and fruit distilleries which were registered and operated in each State; the number of fruit distilleries registered and operated in each collection district; the number and capacity of the grain and molasses distilleries in operation at the beginning of each month in the year and of the three following months; the number of grain distilleries, classified according to their different capacities, registered and operated in each district and State; the quantities and several kinds of grain and other materials used in the production of clistilled spirits in each collection district and State; the different kinds of fruit brandy produced during the year in each collection district and State; the quantity of distilled spirits, in proof gallons, rectified in the several districts and States; the number of cattle and hogs fed at the registered grain distilleries; the quantity of distilled spirits gauged during the fiscal years ended June 30, 1897 and 1898, in each collection district and State, and the quantity of fermented liquors produced during the fiscal year ended June 30, 1898, in each collection district and State, together with other items.

DISTILLERIES REGISTERED AND OPERATED.
The following statement shows the number of distilleries registered and operated during the fiscal year ended June 30, 1898:

| States and Territories. | Grain. |  | Molasses. |  | Fruit. |  | Total regis. tered. | Total operated. |

COMPARATIVE STATEMENT OF DISTILLERIES REGISTERED AND OPER-
ATED DURING 'J'HE FISCAL YEARS ENDED JUNE 30,1897 AND 1898.
The whole number of grain distilleries registered during the fiscal year ended June 30,1898 , was 1,689 , of which number 1,152 were operated.

The numbers registered and operated during the fiscal year ended June 30, 1897, were 1,635 and 1,231 , respectively, showing an increase dluring the last fiscal year of 54 in the number registered and a decrease of 79 in the number operated, as appears in the table following:
Total Grain Distilleries Registered and. Operated during the Fiscal Years ended June 30, 1897 and 1898.

| Condition. | 1897. | 1898. | Increase (+) or decrease (-). |
| :---: | :---: | :---: | :---: |
| Registered. | 1,635 | 1,689 | $+54$ |
| Operated ........ | 1,231 | 1,152 | -79 |

The decrease in the class of distilleries having the smaller capacities for the production of spirits was 111 in the number operated, while there was an increase of 53 in the number registered but not operated.

In the class of larger distilleries there was an increase of 1 only in the number registered, but an increase of 32 in the number operated.

During the fiscal year ended June 30,3897 , there were registered 1,398 distilleries of the smaller class, varying in daily grain capacity from not over 5 to not over 60 bushels each, and of this number 1,101, or $78+$ per cent, were operated.

Of the larger distilleries having daily grain capacities varying from over 60 bushels and not over 100 bushels to several thousand bushels each, 237 were registered and 130 , or $54+$ per cent, were operated.

During the fiscal year ended Juve 30,1898 , of the smaller distilleries, 1,451 were registered and 990 , or $68+$ per cent, were operated.

Of the larger distilleries, 238 were registered aud 162, or $68+$ per cent, were operated.

These figures may be tabulated as follows:
Grain Distilleries of Small Capacity and of Large Capacity Registered and Operated during the Fiscal Years ended June 30, 1897 and 1898.

| Condition. | Small capacity. |  |  | Large capacity. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1897. | 1898. | Increase <br> $(+)$ or de. crease (-). | 1897. | 1898. | Increase $(+)$ or decrease (-). |
| Registered. | 1,398 | 1,451 | + 53 | 237 | $2: 8$ | $+1$ |
| Operated . | 1,101 | 990 | -111 | 130 | 162 | +32 |

There were 11 molasses distilieries registered and 10 operated, there being no change in the numbers registered and operated during the previous year.

A very considerable increase occurred in the number of fruit distilleries registered and operated, there having been 3,578 registered and 3,558 operated, an increase over the previous fiscal year of 1,573 in the number registered and of 1,641 in the number operated.

The total number of grain, molasses, and fruit distilleries registered during the fiscal year is 5,278 , and the total number operated is 4,720 , an increase of 1,627 in the number of all kinds of distilleries registered and of 1,562 in the number of all kinds of distilleries operated during the fiscal year ended June 30, 1898, as compared with the fiscal year ended June 3n, 1597.

In this table, as prepared prior to the fiscal year ended June 30, 1896, the grain used included the molasses used for the production of spirits other than rum reduced to its equivalent in grain, and the spirits produced included the spirits produced from both grain and molasses.

The quantity of grain used for the production of spirits during the fiscal year ended June 30,1898 ( $17,260,246$ bushels), shows an increase of $4,128,355$ bushels over the quantity used in the preceding fiscal year ( $13,131,891$ bushels), and is $4,225,592$ bushels less than the average ( $21,485,838$ bushels) for the last ten years.

The number of gallons of spirits produced from grain during the year (77,443,199 gallons) shows an increase of $18,288,322$ gallons over the product of the fiscal year ended June 30, 1897 ( $59,154,877$ gallons), and is $15,917,704$ gallons less than the average product ( $93,360,903$ gallons) for the last ten years.

The yield of spirits from each bushel of grain used was $4.48+$ gallons.

The yield for the two preceding years was $4.42+$ gallons for 1896 , and $4.50+$ gallons for 1897.

The quantity of molasses used for the production of spirits during the fiscal year ended June 30 , 1898 (2,591,382 gallons), shows a decrease of $1,850,100$ gallons from the quantity used in the preceding fiscal year (4,441,482 gallons), and is 922,109 gallons less than the average (3,513,491 gallous) for the last three years.

The quantity of spirits produced from molasses during the fiscal year ended June 30,1898 ( $1,978,468$ gallons), shows a decrease of $1,332,303$ gallons from the product of the previous year ( $3,310,771$ gallons), and is 665,385 gallons less thạn the average product ( $2,643,853$ gallons) for the last three years.

The quantity of molasses used for the production of rum during the fiscal year ended June 30, 1898 ( $1,772,113$ gallons), shows an increase of 60,253 gallons over the quantity used in the preceding year ( $1,711,860$ gallons), and is 431,647 gallons less than the average ( $2,203,760$ gallons) for the last ten years.

The quantity of rum distilled from molasses during the fiscal year ( $1,340,546$ gallons) shows an increase of 46,389 gallons over the product of the previous year ( $1,294,157$ gallons), and is 331,940 gallons less than the average product ( $1,672,486$ gallons) for the last ten years.

| Missouri. | $383,111.87$ |  |  |

## 2. By Articles and Occurations, 1897 and 1898.

The following table shows the assessments made by the Commissioner of Internal Revenue during the fiscal years ended June 30, 1897, and June 30, 1898, respectively, and the increase or decrease on each article or occupation:

| Description of tax by article or occupation. | Assessed during fiscal year ended- |  | Fiscal year ended June 30, 1898. |  |
| :---: | :---: | :---: | :---: | :---: |
|  | June 30, 1897. | June 30, 1898. | Increase over 1897. | Decrease from 1897. |
| Tax on deficiencies in production of distilled spirits | \$59,321. 97 | \$41, 131.76 |  | \$18, 290.21 |
| Tax on excess of materials used in the production of distilled spirits. | 4,309. 56 | 1, 665. 13 |  | 2,644. 43 |
| Tiax on circulation of banks and others. I'ax on distilled spirits fraudulently removed |  | 300.00 | \$300. 00 |  |
| Iax on distilled spirits fraudulently removed or seized; also taxes overdue | 500, 561.61 | 1, 208, 538. 95 | 707, 977. 34 |  |
| Tax on fermented liquors not paid by stamp... | a 14, 215. 79 | 255, 795.07 | 241,579. 28 |  |
| Tax on tobacco, snutt, and cignas removed from factory nnstamped. | a9, 043.79 | 428,593. 48 | 419,549.69 |  |
| I'ax on cloomargarine not paid by stamp | 30.90 | 1,691. 02 | 1,660. 12 |  |
| Assessed penalties. | 91, 204. 77 | 113, 850. 95 | 22, 646. 18 |  |
| Tax on filled chesse. | 25.05 | 111.27 | 86.22 |  |
| Tax on documentary | b. 44 | 3. 26 | 2.82 |  |
| Tax on case stamps. |  | 1, 316.10 | 1, 314.10 |  |
| Special tax on capital of ban |  | 715, 186. 33 | 715. 186.33 |  |
| Unassessed and unassessable penalties, interest, deficiencies in bonded accounts which have been collected, taxes previously ahated, conscience money; ilso fines, penalties, and order of court or by order of Secretary, and unassessable taxes recovered; also amount of penalties and interest received for validating unstamped instruments (Form 58)....... | 133, 993. 19 | 158, 612.48 | 24,619. 29 |  |
| Special taxes (licenses) .......................... | 66, 148.30 | 75, 226. 93 | 9,078. 63 |  |
| Total | 878, 855.37 | 3, 002, 022.73 | 2, 144, 002.00 | 20,834.64 |

$a$ This amount includes assossments of additional taxes imposed by the act of June 13, 1898.
$b$ Tax on playing cards ouly.
Taxes on deficiencies in the production of distilled spirits and on excess of materials used by distillers abated before assessment during the fiscal year ended June 30, 1898, are as follows:
One hundred and eighteen claims received from grain distillers, amount of tax abated-

On excess of material used ......................................................... $\$ 3,344.18$
On deficioncies in production of distilled spirits................................ 48, 446.73:

## Total

51, 790.91
Claims received from fruit distillers, amount of tax abated-
On deficiencies in production of distilled spirits
788. 83:

Total grain and fruit.
52,579. 74

## STATEMEN'T AS TO STAMP TAXES ȦSSESSED.

All taxes payable by stamps not paid at the time and in the manner required by law have been assessed and accounted for separately from those not payable by stamps. The amount of stamp taxes so assessed and accounted for is as follows:

[^22]| Amonnt collected during year. | \$227, 479.83 |
| :---: | :---: |
| A mount abated during the year. | 56, 308.14 |
| Balance on haud June 30, $1898 .$. | -460, 295.91 |
| Total | 744, 083.88 |
|  | * |

## INCREASED PRODUCTION OF SPIRITS.

The quantity of spirits ( $80,762,213.4$ gallons) produced and deposited in distillery warehouses during the fiscal year ended June 30,1898 , is greater than the production ( $62,465,647.8$ gallons) of the year 1897 by 18,296,565.6 gallons. The difference is distributed among the different kinds as follows:
Increase in the production of

Gallous.

Bourbon
7, 325, 732. 7
Rye
$4,549,019.8$
Alcohol
$2,169,441.6$
Rum
46, 389.6
Gin.
108, 265.5
Pure neutral or cologne spirits
3, 735, 899.7
Miscellaneous
$394,430.7$
Total iucrease
$18,329,179.6$
Decrease in the production of-
High wines
32, 614
Net increase
$18,296,565.6$

a This does not show spirits redeposited, but shows spirits produced except frait brandy not deposited in special bonded warehouses.

## INCREASED WITHDRAWALS OF TAX-PAID SPIRITS.

The quantity of tax-paid spirits (76,797,624.2 gallons) withdrawn from distillery warehouses during the fiscal year ended June 30, 1898, is greater than the quantity ( $64,324,367.9$ gallons) withdrawn from distillery warehouses during the fiscal year 1897, by $12,473,256.3{ }^{\circ}$ gallons, the increase being distributed among the different kinds known to the trade as follows:

```
Increase in withdrawals of-
    Bourbon whisky
    Rye whisky
    Alcohol
Gallons.
\(1,886,546.8\)
1,520, 265.2
Alcohol \(778,597.4\)
Rum
69,933. 2
Gin. 202, 798. 7
Pure neutral or cologne spirits
5, 783, 399.7
Miscellaneous
\(2,259,034.2\)
Total increase
12,500,575.2
```

## Decrease in withdrawals of -

```
High wines
27, 318.9
Net increase
\(12,473,256.3\)
```

If the quantity 913,557 gallons (as stated by the Chief of the Bureau of Statistics) upon which a customs duty was paid equal to the inter-nal-revenue tax, be added, the quantity virtually withdrawn from dis. tillery warehouses during the year ended June 30,1898 , is found to be 77,711,181.2 gallons, or 12,430,053.3 gallons more than during the year 1897, including the 956,760 gallons reimported and tax paid during that year.

There were also tax-paid withdrawals of spirits from general bonded warehouses amounting to $912,872.8$ gallons which should be added to the above, making the total domestic spirits, exclusive of fruit brandy and bottled spirits withdrawn from bond on the payment of the tax, or of a duty equal to the tax, on $78,624,054$ gallons, or $9,006,255.5$ gallons more than the quautity ( $69,617,798.5$ gallons) so withdrawn during the fiscal year 1897.

There were also withdrawn, tax-paid, for bottling in bond during the year under the provisions of au act approved March 3, 1897, 535,535.9 gallons of spirits, as stated in the following table, which quantity added to the $78,624,054$ gallons gives $79,159,589.9$ gallons as the entire quantity of spirits other than fruit brandy withdrawn from bond on the payment of tax.

The increase of leakage allowed, as compared with the year 1897, is 846,427.1 gallons, and is distributed among the different kinds known to the trade as follows:
Increase of leakage allowed for- Gallons.
Bourbon whisky ..... 371, 011.3
Rye whisky ..... 376,570. 7
Gin ..... 989.3
Pure neutral or cologne spirits ..... 25, 602.7
Miscellaneous ..... 86, 329
Total increase ..... 860,503
Decrease in-
Alcohol ..... 12, 665.8
Rum ..... 100.5
High wines
Total decrease ..... 14,075. 9
Net increase. ..... 846, 427. 1

## DISTILLED SPIRITS ALLOWED FOR LOSS BY LEAKAGE OR EVAPORATION IN DIS'IILLERY WAREHOUSES.

The quantity of spirits ( $4,348,006.3$ gallons) reported in the preceding table as lost by leakage or evaporation in warehouse is that portion of actual leakage in warehouse from packages withdrawn during the year which has been allowed in accordance with the provisions of section 17 of the act of May 28,1880 , and section 50 of the act of August 28, 1894.
The following statement shows the quantity of spirits, as per original gauge, withdrawn from warehouse for all purposes during the stated period, and the amount and percentage of leakage allowed thereon under the provisions of the act named:

|  | Year. | Total quantity withdrawn. | Leakage allowed. | Percentage of withdrawals. |
| :---: | :---: | :---: | :---: | :---: |
|  |  | Gallons. | Gallons. |  |
| 1880 |  | 78, 199, 283 | 75, 834 | . 096 |
| 1881 |  | $84,335,900$ | 811, 466 | . 962 |
| 1882 |  | 80, 281, 611 | 1,231, 336 | 1. 533 |

| Withdrawn during the year ended June 30,1897 | 796.8 | 1,393.2 | 139, 478.3 | 2,541. 2 | 356.9 | 144, 566. 4 |

## INGREASED WITHDRAWALS OF SPIRITS FOR SCIENTIFIC PURPOSES and for the use of the united sirates.

The preceding table shows an increase of spirits withdrawn for scientific purposes and for the use of the United States of $179,407.7$ gallons over the quantity so withdrawn during the fiscal year 1897, as follows:
Increase in withdrawal of-
Gallons.
Bourbon whisky.................................................................. 560.1
Rye whisky 281.3

Alcohol 95, 997.7
Pure, nentral, or cologne spirits ............................................ 54, 725.2
Miscellaneous................................................................................... 27, 843.4
Total increase
179, 407. 7

As compared with the transfers in 1897 the above table shows an increase of $11,387.1$ gallons in the quantity of spirits transferred to manufacturing warehouses, distributed as follows:
Increase in withdrawal of-

Gallons.
Rye whisky ..... 877.8
Rum ..... 3, 652.2
Gin ..... 710.6
Miscellaneous ..... 12, 003. 7
Total increase ..... $17,244.3$
Decrease in withdrawal of-
Bourbon whisky ..... 4, 198
Pure, neutral, or cologne spirits ..... 1, 659.2
Total decrease ..... $5,857.2$
Net increase ..... 11,387. 1

## DIFFERENT KINDS OF SPIRITS DEPOSITED, WTTHDRAWN, AND remaining in geníral bonded warehouses.

Quantity of Distilled Spirits of the Different Kinds as Known to the Trade, Produced, Withdrawn, and Remaining in General Bonded Warehouses in thie Unithd States for the Fiscal Year hnded June 30, 1898.
[Quantities in taxable gallons.]

| Distilled spirits. | Bourbon whisky. | $\begin{gathered} \text { Rye } \\ \text { whisky. } \end{gathered}$ | Alcohol. | Rum. |

| Total | 237, 100, 186 | 219, 084, 071.9 | 224, 838, 154. 7 | 214, 591, 624. 9 | 220, 483, 733. 3 |
| Withdrawn, tax-paid, during tiscal year. | 87, 087, 618 | 74, 540, 569 | 66, 877, 986.8 | 68, 661, 038.5 | 78,246 032.9 |
| Withdrawn for exportation dar. ing fiscal year $\qquad$ |  | 1,312, 006.5 | 1, 190, 258.4 | 2,091, 788.1 | 3,372,864. 7 |
| Withdrawn for scientifio parposes, for use of United States, for transfer to manufacturing warehouse, destroyed by casualty, allowed for loss by leakage in warehouses, etc ......... | 5,905, 073 | 4, 982, 700.2 | 4,644, 414.1 | 4, 117, 294 | 5,800,914.6 |
| Total. | 99, 107, 108 | 80, 835, 275.7 | 72, 712, 659.3 | 74, 870, 120.6. | 87, 419, 812. 2 |
| Remaining in warehouse at end of fiscal year, including spir. its in transit between warehouses $\qquad$ | 137, 998, 078 | 138, 248, 796. 2 | 152, 125, 495.4 | 139, 721, 504. 3 | 133, 063, 921.1 |
| * * | * |  |  | * | * |

## EXPORTATION OF MANUFAGTURED TOBACCO AND SNUFF IN BOND.

The quantity of manufactured tobacco removed from the place of manufacture in bond free of tax during the year, also the quantity actually exported during the year and the quantity unaccounted for at the beginning and at the end of the year, are shown in the subjoined statement:

## Exportation of Cigars and Cigarettes in Bond.

| . ${ }^{\text {a }}$ ( | Cigars and cigarettes weighing more than 3 pounds per thousand. | Cigars and cigarettes weighing not more than 3 pounds per thousand. |
| :---: | :---: | :---: |
| Removed and unaccounted for July 1, 1897. | 61, 663 | 47, 888, 200 |
| Removed during the year endedJune 30, 1898 | 1, 094, 472 | 1,032, 124, 046 |
| Total | 1, 156, 135 | 1, 080, 012, 246 |
| Exported and accounted for during the year 1898............................ | 1, 094, 134 | 1, 033,983, 246 |
| Remaining unaccounted for at the close of the fiscal year ended June 30, | 62,001 | 46,029,000 |
| Total | 1,156, 135 | 1,080,012, 246 |

Upon comparing the foregoing statements as to the manufactured tobacco, cigars, aud cigarettes removed for export, with those for the fiscal year ended June 30, 1897, the increase in 18:18 as to tobacco and cigarettes and the decrease as to cigars are found to be as follows:

|  | Increase. | Decrease. |
| :---: | :---: | :---: |
| Tobacco. | 1,725, 880 |  |
| Cigars |  | 316, 722 |
| Cigarettes, including all tobacco cigarettes | 139, 167, 746 |  |

The increase as to cigarettes continues to be the prominent feature of this class of exportations. The business of exporting cigarettes has grown during the past seventeen years as follows:

Number Removid for Export during Fiscal Years 1882 to 1898.

| $\begin{aligned} & \text { Year ended June } \\ & 30- \end{aligned}$ | Number. | Year ended June | Number. | Year ended June | Number. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1882. | 64, 001, 500 | 1888 | 180, 769, 800 | 1894 | 401, 605, 300 |

## DISTILLED SPIRITS IN THE UNITED STATES OCTOBER 1, 1898.

The quantity of distilled spirits in the United States (except what may be in customs bonded warehouses and in fruit brandy distilleries) on the 1st day of October, 1898, was 169,853,440.6 gallons, this quantity being distributed as follows:

| In distillery warehou | 124, 582, 336.7 |
| :---: | :---: |
| In special bonded wareh | 1, 323, 122.6 |
| In general bonded wa | 1, $925,120.9$ |
| In transitbetween distillery warehous | 24,543. 4 |
| In hands of wholesale liquor dealers | 12, 603, 717 |
| In hands of retail liquor dealers | 29, 394, 600 |
| Total | 169, 853, 440.6 |
| In making the above compu | each retail |
| liquor dealer in the United St |  |

## OLEOMARGARINE.

The subjoined statements show operations under the act of August 2,1886 , defining butter and imposing a tax upon and regulating the manufacture, sale, importation, and exportation of oleomargarine.
It appears from the subjoined table that the average monthly production of oleomargarine under the operations of the law has been as follows:

Pounds.
During the eight months ended June 30, 1887................................ 2, 711, 828
During the fiscal year ended June 30-
1888 .............................................................................. 2, 860, 460
1889 .............................................................................. 2, 972, 002
1890 ................................................................................. 2, 693, 669
1891 ............................................................................... 3, 699, 367
1892 ................................................................................ 4, 030, 346
1893 ............. ................................................................... 5, 602, 024
1894 ................................................................................... 5, 501,853
1895 ............................................................................. 4, 746, 508
1896 ...................................................................................... 4, 4, 237, 769

1898 ................................................................................... 4, 493, 011
It also appears that the average monthly quantity withdrawn from factories on payment of the tax was as follows:

Pounds.
During the eight months ended June 30, 1887................................ 2, 592, 946
During the fiscal year ended June 30 -
1888 ............................................................................ 2, 707,430
1889 ................................................................................. 2, 821,970

1891 ............................................................................................... $3,601,292$
1892 ........................................................................... 3, 909, 625
1893 ................................................................................ 5, 571, 989

1895 .............................................................................. 4, 469, 686
1896 ................................................................................ 3, 978,482
1897 .............................................................................. 3, 541, 636
1898 ................................................................................... $4,588,267$
The average quantity withdrawn monthly for exportation during the same time is shown to have been as follows:

Pounds.

During the fiscal year ended June 30 -
1888
140,516

1889 ..................................................................................... 145, 746
1890 .................................................................................... 134, 866
1891 .................................................................................... 102,426
1892 ................................................................................... 107, 981
$1893 \ldots \ldots$. ......................................................................... 232, 124
1894 ..................................................................................................... 283, 890
1895 ...................................................................................... 278, 123
1896 ..................................................................................... 258, , 850
1897 ................................................................................. 262, 367
1898 ..................................................................................... 188,308

In the fiscal years 1887 and 1888 the largest production month was March; in the fiscal year 1889, December; in the fiscal year 1890, October; in the fiscal year 1891, March; in the fiscal year 1892, March; in the fiscal year 1893, January; in the fiscal year 1894, October; in the fiscal year 1895, October; in the fiscal year 1896, October; in the fiscal year 1897, March; while the greatest production during the fiscal year ended June 30, 1898, occurred in November. The quantity produced during these months was as follows:

The months in which the production fell below $2,000,000$ pounds were as follows:

| During the fiscal year ended June 30, 1887 : <br> May, 1887, produced <br> June, 1887, produced | $\begin{array}{r} \text { Pouads. } \\ 1,885,027 \\ 1,375,423 \end{array}$ |
| :---: | :---: |
| During the fiscal year ended June 30,1888 : July, 1887, produced. | 208, 638 |
| During the fiscal year ended June 30, 1889 : Juue, 1889, produced | 1,575, 362 |
| During the fiscal year ended Junne 30, 1890: |  |
| July, 1889, produced | 404,74 |
| August, 1889, produced | 1, 975, 773 |
| May, 1890, produced. | 1, 864, 746 |
| June, 1890, produced | 1, 364, 826 |
| During the fiscal year ended Jnne 30, 1891: |  |
| July, 1890, produced. | 1,723,966 |
| June, 1891, produced | 1, 988, 633 |

There was an increase in the number of persons engaged in the sale of oleomargarine during the fiscal year ended June 30,1898 , as well as an increase in the production of the article as compared with the previous fiscal year.

The following table shows the quantity of oleomargarine, in pounds, at 2 cents tax, produced at manufactories during the fiscal year ended June 30, 1898, the quantity withdrawn therefrom during the year, and the stock of oleomargarine remaining in factories June 30, 1898:

Summary of Operations at Oleomargarine Manufactories during the Fiscal Year ended June 30, 1898.

Pounds.
Stock on hand July 1, 1897..................................................... 267, 226
Removed for export and remaining unaccounted for July 1, $1897 \ldots . .$. .... 243, 158
Quantity produced during the year .......................................... 57, 516, 136
Withdrawn for export and returned to factory ................................ 100
Withdrawn tax-paid and returned to factory .................................. . 875
Total........................................................................ 58, 027, 495

## Contra.

| Oleomargarine withdrawn, tax-paid | 55, 079, 887 |
| :---: | :---: |
| Withdrawn from manufactories for $e$ certificate filed. $\qquad$ | 2, 159, 357 |
| Withdrawn from manufactories for e of tax on account of certificate not | 12,972 |
| Removed for export and unaccounte | 330, 534 |
| Remaining in factories June 30, 1898 | 444, 745 |
| Total | 58, 027, 495 |

## OPERATIONS IN OLEOMARGARINE DURING THE LAST TWO FISCAL YEARS.

The following statements, by districts, show the quantity, in pounds, of oleomargarine produced at manufactories, the quantity withdrawn therefrom tax paid, for export, and the quantity lost or destroyed at manufactories during the two fiscal years ended June 30, 1897, and June 30, 1898, respectively; also the stock remaining on hand at the close of each year:

a Including the State of Rhode Island. No oleomargarine was manofactured in the State of Connecticut.
bIncluding the Indian Territory and the Territory of Oklahoma; but no oleomargarine was manufactired in either of these Territories.

Statement Showing the Quantity of Oleomargarine Produced, Withdrawn Tax-Paid, for Export, for Exposition Purposes, and Lost or Destroyed in Manufactories Monthly, from November 1, 1886, to June 30, 1898.

## FILLED CHEESE.

The following statements show the operations under the act of June 6,1596 , defining chreese, imposing a tax upon, and regulating the manufacture, sale, importation, and exportation of filled cheese.

The quantity of gilled cheese produced, withdrawn tax paid for export, and that withdrainn tax paid for domestic use from manufactories, monthly, from September 4, 1896, to Juve 30, 1898, is as follows:

|  | Month. | Quantity produced. | Quantity withdrawn tax paid. |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  | For domestic use. | Forex. port. |

| October . |  | 165, 097 | 162, 221 | 2,876 |
| November. |  | 1.51, 885 | 151, 211 |  |
| December |  | 222, 022 | 219, 238 | 2, 784 |
|  | 1898. |  |  |  |
| Jannary. |  | 230,684 | 228, 054 | 2,630 |
| February. |  | 195, 029 | 192, 307 | 2, 12 |
| March.. |  | 188, 453 | 188, 453. |  |
| April. |  | 143, 406 | 136, 474 | 6,932 |
| May.. |  | 240 |  | 240 |
| Total |  | 3, 065, 928 | 2, 859,947 | 205,981 |

. It will be noted from the above table that the largest production month of the fiscal year ended June 30 , 1807, was March, and that the quantity produced that month was 371,569 pounds. The largest production month for the fiscal year ended June 30,1898 , was January, and the quantity produced that month was 230,684 pounds.

There were $1,663,067$ pounds of filled cheese produced at manufactories during the ten months ended June 30, 1897, and the tax of 1 cent per pound was paid upon the entire quantity, and the same withdrawn from the factory. For the fiscal year ended June 30, 1898, 1,402,861 pounds were produced and tax paid, showing a falling off in production as compared with the previous fiscal year of 260,206 pounds.

It appears that the average monthly production for the ten months ended June 30, 1897, was 166,306 pounds, and for the nine production months of the fiscal year ended June 30, 1898, the average monthly production was 155,873 pounds. There was no production in the months of July, August, and May of the fiscal year ended June 30, 1898.

Statement, by States, showing the Number of Establishments for which Sphelal Tax was Paid to carry on the Business of Manufacturing and Dealing in Filled Cheese during the Fiscal Year ended June 30, 1898.

Receipts under the Filled-Cheese Law during the Fiscal Year ended June 30, 1898.

## DIVISION OF CHEMISTRY.

## The samples examined in the laboratory at San Francisco, Cal., during the fiscal year ended June 30, 1898, were as follows:

Fortified sweet wines.:................................................................... 1,679
Miscellaneous 3
'Total ...................................................................................... 1,682
The following table shows the number and cbaracter of samples examined in the work of the laboratory at Washington during the past fiscal year:
Oleomargarine .................................................................................. 25
Batter..................................................................................................... 35
Malt liquors ........................................................................................ 19
Fermented liquors other than malt........................................................... 25
Distilled liquors ................................................................................ 154
Fortified (and sweetened) wines............................................................ 38
Ink ............................................................................................................. 50
Macilage ......................................................................................... 14
Typewriter ribbons ................................................................................. 15
Miscellaneous . . ................................................................................................... 7
Total ................................................................................ 382
Increase over last fiscal year.............................................................. 142
The number of samples suspected of being oleomargarine examined during the year was 60 , an increase of 8 over last year.

No samples of material suspected of being filled cheese were received.
The laboratory has been slightly enlarged to provide for the examination of samples of flour under sections 45 to 49 , inclusive, of the act of June 13,1898 , taxing mixed flour. Since the date on which this tax became operative (August 9), 21 samples of this character have been received.

I have the honor to be, very respectfully,

N. B. Scoit,<br>Commissioner.

Hon. Lyman J. Gage, Secretary of the Treasury.

(No. 4.)

## REPORT OF THE DIRECTOR OF THE MINT.

## Treasury Department. <br> Bureau of the Mint,

Washington, D. U., November 21, 1898.
SIR: I have the honor to berewith submit the twenty-sixth annual report of the Director of the Mint, covering the operations of the mints and assay offices of the United States for the fiscal year ended June 30, 1898, with such available statistics and information as may be valuable in connection therewith.

DEPOSITS OF GOLD BULLION, FISCAL YEAR 1898.
The deposits of gold bullion at the mints and assay offices of the United States during the fiscal year ended June 30,1898, were the largest in the history of this country. Exclusive of redeposits, they were of the value of $\$ 147,693,194.83$, against $\$ 87,003,337.71$ in the previous year. Only once-before have the original deposits of twelve months exceeded the record of 1896-97, being in the year ended June 30, 1881, when the resumption of specie payments and a heavy favorable balance of trade caused extraordinary imports of foreign coin and bullion. The original deposits in that year were $\$ 130,833,102.45$.

Deposits of bullion may be made at a mint or assay office for conversion into oars for the convenience of the depositor. When delivered to him and disposed of by nim they frequently find their way to another one of the Government institutions and are there classified as redeposits. The same applies to transters of oullion between the.mints and assay offices.

The aggregate of all deposits, including redeposits, is the total of metal operated upon in the year by the mint service. This total of gold bullion received in the fiscal year ended June 30, 1898, was $10,682,301.457$ standard ounces, of the value of $\$ 198,740,492.23$, an increase of $3,742,880.800$ standard ounces, of the value of $\$ 69,634,991.70$, over the deposits reported for the fiscal year 1897.

The deposits of domestic bullion amounted to $3,756,110.230$ standard ounces, of which $937,194.467$ standard ounces were in a crude condition, direct from the miners operating in the various States, $804,149.610$ standard ounces of refinery bars (less than .992 in fineness), and $2,014,766.153$ standard ounces of refined bars (fineness . 992 and over), being bullion received from private refineries, chlorination, and cyanide works.

Uncurrent and mutilated domestic gold coin received for recoinage contained 63,837.961 standard ounces, of the coinage value in new coin of $\$ 1,187,682.99$. Of this amount $29,272.300$ standard ounces were received on transfers from the Treasury and 34,565.661 standard ounces were received over the counter at the various mints and assay offices.

Foreigu bullion containing 1,423,15S.641 standard ounces were also received, of the value of $\$ 26,477,370.06$, of which $215,737.881$ standard onnces represents the deposits of unrefiued bullion and $1,207,420.760$ stindard ounces of refined bullion.
The following table shows the countries from which this bullion was received:

| Country. | Unrefined. | Refined. |
| :---: | :---: | :---: |
| Klondike | Standard ozs. $40,767.831$ | Standard ozs. |
| British Columbia | 60,824.513 |  |

In the Appendix* tables will be found showing in detail the weight and value of the deposits and redeposits of gold bullion.

## DEPOSITS OF SILVER BULLION, FISCAL YEAR 1898.

Including silver coutained in gold deposits, the deposits and purchases of silver bullion during the fiscal year ended June 30, 1898, exclusive of redeposits, amounted to $11,396,687.62$ standard ounces, against $8,138,816.99$ standard ounces in the previous year.

Deposits of silver bullion may be made at a mint or assay office for conversion into bars, and these, when delivered to the depositor and disposed of by him, may find their way to another one of the Government institutions. These bars, bearing the stamp of the mint service, are then classified as redeposits.

The aggregate of all deposits and purchases, including redeposits, at all of the mints and assay offices shows the total operations of the mint service. This aggregate of silver received in the fiscal year was $14,459,645.52$ standard ounces.

The deposits of domestic bullion amounted to $5,572,500.41$ standard ounces, of which $677,817.18$ standard ounces were in a crude condition direct from the miners operating in various States, $136,652.26$ standard ounces of refinery bars (less than .992 in fineness), and 4,758,030.97

[^32]standard ounces in refined bars (fineness .992 and over) being bullion received from private refineries, chlorination, and cyanide works.

Uncurrent and mutilated domestic silver coins were received for recoinage containing $4,677,952.93$ standard ounces of the coinage value in silver dollars equal to $\$ 5,443,436.13$, or the coinage value in new subsidary silver coins equal to $\$ 5,820,159.16$. Of this amount $4,673,600.62$ standard ounces were received by transfer from the Treasury, and $4,352.31$ standard ounces were received over the connter at the various mints and assay offices.

Foreign silver bullion, unrefined, containing $544,062.01$ standard ounces was received.

The following table shows the countries from which this bullion was received:

| Country. | Amount. |
| :---: | :---: |
| - | Standard ozs. |
| Klondike | J1,361.06 |
| British Columbia .. | 6, 379. 48 |

| 1898. | 147, 693, 195 | 13, 261, 600 | 160,954, 795 |

In the Appendix will be found tables of deposits and purchases during the fiscal year 1898.

## DEPOSITS OF GOLD, 1873-1898.

The value of the deposits of gold bullion, coin, and jewelers' bars at the mints and assay offices of the United States, by fiscal years, from 1873 to 1898 is exhibited in the following table:

Deposits of Gold at United States Mints and assay Offices, 1873-1898, inclusive.

| Fiscal year ended June 30- | Character of gold deposited. |  |  |  |  | Total. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Domestic. bullion. | Domestic coin (coining value). | Foreign bullion. | Foreign coin (U. S coining value). | Jewelers' bars, old plate; etc. |  |

## COINAGE.

Gold and silver coinage operations were conducted during the fiscal year 1898 at the mints at Philadelphia, San Francisco, and New Orleans, and amounted to $44,708,144$ pieces, of the value of $\$ 81,120,449$.

The coinage of nickel and bronze is confined by law to the mint at Philadelphia, at which institution $72,887,039$ pieces, of the value of $\$ 1,489,484.11$ were manufactured.

Coinage operations were suspended at the mint at New Orleans from January to May, 1898, owing to the exhaustion of the supply of silver bullion at that institution.

Coinage operations at the mint at Carson have been suspended since May, 1893.

The following table exhibits the coinage by the mints, by denominations and pieces:

## Coinage Executed at the Mints of the United States During the Fiscal Year 1898.

| Denomination. | Pieces. | Value. |
| :---: | :---: | :---: |
| Gold : |  |  |
| Dimble eagles. | 2,348, 723 | \$46, 974, 460.00 |
| Eagles. | 993, 162 | 9,931, 620.00 |
| Half eagles | 1,536,067 | 7, 680, 385.00 |
| Quarter eagles. | 19,380 | 48, 450.00 |
| Total gold | 4,897, 332 | 64,634; 865.00 |
| Silver : |  |  |
| Standard dollars | 10,002, 780 | 10,002, 780.00 |
| Subsidiary: |  |  |
| Half dollars | 4,787, 652 | 2,393, 826.00 |
| Quarter dollars | 10,579,600 | 2,644, 900.00 |
| Dimes | 14, 440, 780 | 1,444, 078.00 |
| Total sabsidiary | 29, 808, 032 | 6,482, 804.00 |
| Total silver. | 39,810, 812 | 16, 485, 584.00 |
| Fire cents | 19, 015, 343 | 950,767.15 |
| One cent | 53,871, 696 | 538, 716.96 |
| Total minor | 72,887, 039 | 1,489, 484. 11 |
| Total coinage | 117, 595, 183 | 82, 609, 933. 11 |

The standard silver dollars embraced in the above table ( $10,002,780$ ) were coined from the balance of silver bullion on haud, purchased under the act of July 14, 1890, and contained $8,596,139.05$ standard ounces of silver, costing $\$ 6,928,821.41$.

The seigniorage or profit on this coinage was $\$ 3,073,958.59$ which has been deposited in the Treasury of the Uuited States.

Of the subsidiary coinage $(\$ 6,482,804)$ executed during the year, $\$ 5,962,141$ were from bullion resulting from the melting of uncurrent silver coins received from the Treasury for recoinage, and $\$ 520,663$ from sibver bullion purchased under the provision of section 3526 of the Revised Statutes.

The loss on the recoinage of $\$ 1,198,860$ in worn and uncurrent gold coins was $\$ 11,177.01$, and the loss on the recoinage of $\$ 6,109,772.32$ in worn and uncurrent silver coins was $\$ 289,613.16$, for which the Treasurer of the United States was reimbursed from the appropriations for that purpose.

The number of pieces of domestic coin manufactured by the mints of the United States during the fiscal years 1897 and 1898 and the increase or decrease in the number of pieces coined in the last year named is shown in the following table:

Coinage of the Mints of the United States, by Pirces, during the Fiscal Years 1897 and 1898, and the Increase and Decrease of the same during the Latter Year.

| Classification of coinage. | Fiscal year. |  | Iucrease, 1898. | $\begin{gathered} \text { Decrease, } \\ 1898 . \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: |
|  | 1897. | 1898. |  |  |
| Gold coins | Pieces. <br> 4, 566, 290 | Pieces. $4,897,332$ | Pieces. $\text { 331, } 042$ | Pieces. |
| Silver dollars | 21, 203, 701 | 10, 002, 780 |  | 11, 200, 921 |
| Subsidiary silver coins | 12,900, 449 | 29, 808, 032 | 16, 907, 583 |  |
| Minor coins. | 49,665, 403 | 72, 887, 039 | 23, 221, 636 |  |
| Total | 88, 335, 843 | 117, 595, 183 | 40, 460, 261 | 11, 200, 921 |

The value of the domestic coinage executed by the mints of the United States during the fiscal years 1897 and 1898 and the increase or decrease in the nominal value of the coinage during the year named is shown by the following table:

Coinage of the Mints of the United States, by value, during the Fiscal Years 1897 and 1898, with the Increase or Decrease of the same during the Latter Year.

| Classitication of coinage. | Fiscal year. ${ }^{\text {P }}$ |  | Increase, 1898. | Decrease, 1898. |
| :---: | :---: | :---: | :---: | :---: |
|  | 1897. | 1898. |  |  |
| Gold coins | \$71, 646, 705.00 | \$64, 634, 865.00 |  | \$7, 011, 840.00 |
| Silver dollars | 21, 203, 701.00 | 10,002, 780.00 |  | 11, 200,921.00 |
| Subsidiary silver coins | 3, 124, 085.65 | 6, 482, 804.00 | \$3, 358, 718. 35 |  |
| Minor coins. | 984, 509. 50 | 1, 489, 484.11 | 504, 974.52 |  |
| Total | 96, 959, 001. 24 | 82, 609, 933.11 | 3,863,692.87 | 18,212, 761.00 |

The number of silver dollars coined from bullion purchased under the act of July 14, 1890, from August 13, 1890, to June 30, 189s, agyregated $78,751,257$ pieces, containing $60,909,175.32$ ounces of fine silver, costing $\$ 58,460,975.54$, giving a seigniorage of $\$ 20,290,281.46$. All profits on the coinage of silver dollars are deposited each month in. the Treasury of the United States. The aggregate number of silver dollars coined from March 1, 1878, to June 30, 1898, under the provisions of the acts of February 28, 1878, July 14, 1890, and March 3, 1891, was $\$ 461,996,022$, as shown by the following table:

During the fiscal year 1898 the mint of the United States at Philadelphia manufactured, in addition to the domestic coinage, 20,00020 colon gold planchets, the value of which was $\$ 186,141.02$, for the Government Costa Rica, and also for the Government of San Domingo (Dominican Republic) 3,326,714 silver pieces, as follows:

| Denominations. | Perfect pieces. | Imperfect pieces. | Total pieces. |
| :---: | :---: | :---: | :---: |
| Pesos | 250,539 | 527 | 251,066 |
| Medio pesos | 908, 668 | 8,036 | 916, 704 |
| 20-centavos | 1,382, 189 | 12,368 | 1,394,557 |
| 10-centavos | 759, 715 | 4,672 | 764,387 |
| Total | 3,301, 111 | 25,603 | 3, 326, 714 |

The planchets for this silver coinage were furnished by the agent of the Government of San Domingo ready for striking.

There are exhibited in the Appendix tables showing, by denominations and value, domestic coins manufactured during the fiscal year 1898, calendar year 1897, and also tables of the total coinage, by denominations, institutions, and year, from the establishment of the mint in 1792 to June 30, 1898.

## BARS MANUFACTURED.

During the fiscal year 1898 there were manufactured by the mints and assaj offices gold and silver bars containing $11,544,663.481$ standard ounces, representing the coining value of $\$ 99,855,279.57$.

Bars of Gold and Silver Manufactured during thr Fiscal Year 1898.

| Description. | Standard ounces. | Value. |
| :---: | :---: | :---: |
| Gold | 4, 955, 072. 301 | \$92, 187, 391.67 |
| Silver. | 0, 589, 591. 180 | 7, 667, 887.90 |
| Total |  | 99, 855, 279. 75 |

In the Appendix will be found tables showing in detail the character of bars manufactured at each institution during the fiscal year.

## WORK OF GOVERNMENT REFINERIES.

There were received and operated upon by the refineries connected with the mints at Philadelphia, San Francisco, Carson, and New Orleans and the assay office at New York, during the fiscal year 1898, $1,514,102.461$ standard ounces of gold and $4,538,889.73$ standard ounces of silver, of the coining value of $\$ 33,450,964.18$, as shown by the following table:

Refinery Operations, Fiscal Year 1898.

| Institutions: | Gold. |  | Silver. |  | Total value. |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Standard ounces. | Value. | Standard ounces. | Value. |  |
| Philadelphia.. | 729, 332.219 | \$13, 568, 970. 48 | 1,624, 106.60 | \$1, 889, 869.50 | \$15, 458, 839. 98 |
| San Francisco.. | 251, 127. 163 | 4, 672, 133. 26 | 132, 823.26 | 154, 557.97 | 4, 826, 691.23 |
| New Orleans. | 12,879.963 | 239, 627.21 | 36,267. 22 | 42,201. 85 | 281, 829.06 |
| Carson...... | 36, 209.516 | 673, 665.41 | 331, 065.78 | 385, 240.18 | 1, 058, 905.59 |
| New York | 484, 553. 600 | 9, 014, 950.69 | 2, 414, 626.87 | 2, 809,747.63 | 11, 824, 698. 32 |
| Total | 1, 514, 102. 461 | - $28,169,347.05$ | 4, 538, 889.73 | 5, 281, 617. 13 | 33, 450, 964. 18 |

## PURCHASE OF SILVER.

The purchase of silver by the Government since November 1, 1893, the date of the repeal of the purchasing clause of the act of July 14, 1890, has been confined to the silver contained in deposits of gold bullion, the fractions of silver for return in fine bars, the amount retained in payment for charges on silver deposits, surplus silver ballion returned by the operative officers of the mints on the ammal settlement of their accounts at the close of the fiscal year, and uncurrent mutilated domestic silver coin purchased under section 3526 of the Revised Statutes for the subsidiary silver coinage.

The following tables show the quantity in fine ounces and cost of silver purchased for the subsidiary coinage doring the fiscal year 1598:

Silver Purchased for, Subsidiary Coinage during the Fiscal Yiear 1898.

| Stock. | Fine ounces. | Cost. |
| :---: | :---: | :---: |
| Partings, charges and fractions purchased ........ | 184, 595. 39 | \$101, 780.39 |
| Mutilated coins, including melted assay coins purchased $\qquad$ | 3,391. 20 | 2,497. 63 |
| Surplus bullion purchased | 5,535. 71 | 3,463. 26 |
| 'Total | 193,522.30 | 107, 741. 28 |

Quantity and Cost of Silver Purchased for Subsidiary Coinage, by Mints, during the Fiscal Year 1898.

| Mints. | Fine ounces. | Cost. |
| :---: | :---: | :---: |
| Philadelphia. | 120, 356. 89 | \$67, 231.13 |
| San Francisco | 65, 275.27 | 36,179.44 |
| New Orleans. | 6, 078.41 | 3,330. 20 |
| Carson. | 1,811.73 | 1,000. 51 |
| Total | 193, 522. 30 | 107, 741.28 |

The following table exhibits the amount, cost, and coinage of silver obtained for the subsidiary coinage during the fiscal year 1898, and the sources from which the metal was obtained:

Quantity and Cost of Metal Obtained by Transfer and Purchasf, for Subsidiary Silver Coinage and Coinage Derived Thererrom, during the Fiscal Year 1898.

THE MARKET FOR SILVER DURING THE FISCAL YEAR 1898.
The steady decline of silver which began after January, 1897, continued until the end of the first month (July) of the fiscal jear 1897-98. This decline was caused, in great part, by the adoption of the gold standard in Japan. The causes of the decline in the first part of August continued throughout the inonth, at the end of which the lowest figure of the calendar year was reached-235 $d$. per ounce standard.

The decline in August was caused by a species of panic. Speculators abstained from purchasing, while the American holder hastened to sell, so that in the space of three weeks silver fell from $27{ }_{16}^{\frac{3}{6}} \mathrm{~d}$. to $23 \frac{3}{4} \mathrm{~d}$. on the 25th of August.

On September 3 the Indian council announced that it intended to stop drawing on India for three or four months, and that it was ready to purchase bills on India in the market. It felt bound to come to this decision by the state of the Indian treasury, due to the revolt of the Afridis and other tribes, and the decline of revenues due to the failure of crops. The result was an immediate rise in exchange on India and silver. Silver was quoted September 6 at $25 \frac{1}{2} d$. and on September 20 at $27 \frac{1}{4} \mathrm{~d}$. It subsequently fell to $2 \overline{5} \mathrm{~d}$. on the 29 th of September and rose to $27 \frac{3}{4} \mathrm{~d}$. on the 6 th of December.

On the 7 th of December the Indian council decided to resume the selling of dralts on India and the silver market remained firm between 26 d . and 262 2 d . During the first week in January, 1898, the price declined to $26 \frac{3}{16} \mathrm{~d}$., showed a slight recovery on the 6 th to $26 \frac{1}{4} \mathrm{~d}$., after which it gradually hardened, owing to special orders, and after touching $26 \frac{7}{8} \mathrm{~d}$. fell rapidly to $26 \frac{7}{8}$. Considerable purchases were made for China and India, resulting in a rise on January 20 to- $26 \frac{1}{4}$ d. Toward the close of January the plague in Bombay interfered to some extent with Indian sales, but there was a good demand for the Straits at $26 \frac{3}{16} \mathrm{~d}$. The silver market was very inactive during February, resulting in a decline as compared with prices in January. The decline was intensified early in March by the repeated circulation of Indian rumors that a prohibitive duty would be placed on silver, and to a momentary cessation of purchases for the Straits, rising to $26 \frac{1}{6} \mathrm{~d}$. on the 17 th , after the Indian rumors ceased, but the improvement did not last to the end of March; which closed with silver at $25 \frac{1}{1} \frac{1}{6} d$. Orders from India and the Straits and the cessation of American sales early in the month caused a rise in the first half of April, followed by a decline on the

21st and an advance to $26 \frac{1}{4} d$. on the 28th. In May a large coinage order from Paris raised the price to $26 \frac{7}{16} \mathrm{~d}$., but the price soon relapsed to $26 \frac{3}{16} \mathrm{~d}$., owing to the United States selling freely. It rose again for like causes to $26 \frac{7}{16} \mathrm{~d}$. about the middle of May and increased to the end of the month. In June the market fluctuated greatly, owing largely

The highest price of silver during the fiscal year ending June 30 , 1898, was $27 \frac{3}{4} \mathrm{~d}$. for silver 0.925 British standard, equivalent with exchange at par ( $\$ 1.8665$ ) to $\$ 0.60831$ per ounce for silver 1,000 fine. The lowest market price was 235 s d., equivalent to $\$ 0.51789$ per ounce fine, and the average London market price for the twelve months ending June 30 , 1898, was $26 \frac{5}{16} \mathrm{~d}$., equivalent to $\$ 0.57675$ per ounce fine. At the highest market price during the fiscal year the bullion value of the standard silver dollar was $\$ 0.47040$; at the lowest market price, $\$ 0.40055$; at the average market price, $\$ 0.44607$.
At the highest market price, the commercial ratio of silver to gold was as 1 to 33.98; at the lowest price, 1 to 39.91; at the average price, 1 to 35.84 .
The number of grains of pure silver purchasable with $\$ 1$ in United States money at the highest price for silver during the year was 799.015 grains; the lowest price, 926.710 grains, and at the average price, 830.204 grains.

The table following is selfexplanatory:
Highest, Lowest, and Average Price of Silver Bullion and Value of a Fine Ounce Each Month during the Fiscal Year 1898.

Highest, Lowest, and Average Price of Silver Bullion and Value of a Fine Ounce Each Month during the Calendar Ylear 1897.

## PURCHASE. AND COINAGE OF SILVER BY RUSSIA.

During the calendar years 1895, 1896, and 1897 the Russian Government purchased $84,129,031$ ounces of fine silver and coined therefrom $134,466,234$ one-ruble pieces to be used in the redemption of paper rubles.

From the following extract from the Budget for 1898 , of the finance minister, it would appear that little, if any, more silver will be required by Russia for resumption purposes.

By Your Majesty's decree of November 14, 1897, all reference to silver coinage was removed from the inscription on bank notes, which were then declared to be exchangeable for gold alone, and to be in circulation on an equal footing with it. In consequence of this, silver has taken the position of a subsidiary coinage. The next step in this divection will doubtless be the limiting of the coinage of silver and of the amount for which it can be legal tender, while, of course, as heretofore, it will be received by government treasuries to an unlimited amonnt. The supplies of silver at our disposal, both in ingots and in coin, will probably last a considerable time, though at present it is difficult to say definitely what amount of silver is required for circulation. In any case, silver coins, counting both the standard (rubles, 50 copecks and 25 copecks) and the token coinage ( $20,15,10$, and 5 copecks), will hardly be required to an amount greater than 2 rubles 50 copecks or 3 rubles per inhabitant; that is, about $320-380$ million rubles. As our general supply of silver
already amounts to 240 million rubles, and small notes will be withdrawn from circulation gradually, it is clear that the subsequent purchases and coinage of silver will be far below that of the last few years. The position of silver in our currency: in the opinion of the minister of finance, fully answers to the requirements of a wellordered monetary system.

## EXPORTS OF SILVER TO THE EAS'f.

The exports of silver from London to India, China, and the Straits, since 1881, have been as follows:

| Years. | India. | China. | Straits. | Total. |
| :---: | :---: | :---: | :---: | :---: |
| 1881. | \$12,375, 612 | \$3, 898, 860 | \$3,577,729 | \$19,852, 201 |

a Rupees.
$b$ Eleven months.
c From 1858-59 to 1860-61, inclusive, the home treasury was open at all times for the sale of bills on India, at rates altered from time to time by advertisement. Consequent on the mutiny, it was necessary to refrain from drawing on India, and exchange was raised to a prohibitory rate.

## DISTRIBUTION OF SILVER DOLLARS.

During the fiscal year 1898 the number of silver dollars distributed from the mints was $1,750,248$, against $1,749,775$ during the fiscal year 1897, an increase in the distribution of these pieces during the present fiscal year of 473 .
The number of silver dollars on hand, the amount transferred, the coinage, and the distribation from each mint is shown in the following table:

Distribution of Silver Dollars from the Mints, Fiscal Year 1898.

| Date. | Philadelphia. | San Francisco. | New Orleans. | Carson. | Total. |
| :---: | :---: | :---: | :---: | :---: | :---: |

## SEIGNIORAGE ON SILVER COINAGE.

On July 1, 1897; the balance on hand at the mints on account of profits accruing in the coinage of silver was $\$ 501,566.18$.

The seigniorage on the coinage of silver during the fiscal year 1898 was, on silver dollars, $\$ 3,073,958.59$, and on subsidiary pieces $\$ 286,311.22$, a total seigniorage of $\$ 3,360,269.81$.

The amount reimbursed on account of silver wastage and loss on sale of sweeps paid from this seigniorage was $\$ 276.14$, leaving the net seigniorage on the silver coinage of the fiscal year, $\$ 3,359,993.67$.

The amount deposited in the Treasury during the year was $\$ 3,406$,459.70 , leaving a balance of $\$ 455,100.15$ on hand at the mints June 30 , 1898.

Including the balance on hand at the mints July 1, 1878, the net seigniorage or profits on the coinage of silver from that date to June 30,1898 , aggregated $\$ 88,182,815.37$.

The seigniorage on the coinage of silver dollars under the act of July 14, 1890, from August 13, 1890 (the date the act went into effect), to June 30, 1898, was $\$ 20,290,281.46$.

A table showing the seigniorage on the silver coinage during the fiscal year at each mint and the disposition of the same will be found in the Appendix.

## APPROPRIATIONS AND EXPENDITURES.

The act making appropriations for legislative, executive, and judicial expenses of the Government for the fiscal year ended June 30, 1898, contained specific appropriations for the support of the mints and assay offices of the United States amounting in the aggregate to $\$ 968,950$. It was necessary to procure additional appropriations to supply deficiencies in the appropriations for contingent expenses of the mints at Philadelphia, Pa., of $\$ 23,500$; at San Francisco, Cal., of $\$ 10,000$, and at the assay office at New York of $\$ 10,000$. Adding these amounts, the specific appropriations for the support of the mints and assay offices amounted to $\$ 1,012,450$, of which there were expended $\$ 921,165.46$, leaving an unexpended balance of the several appropriations for salaries, wages, and contingent expenses of $\$ 91,284.54$.

In addition to the amount expended from the specific appropriations there was expended from the general appropriations contained in the act of July 14,1890 , the sum of $\$ 148,352.16$ on account of the coinage of standard silver dollars and the storage of silver bullion purchased and dollars coined therefrom under the act of July 14, 1890, of which amount $\$ 75,094.35$ was expended at Philadelphia, $\$ 41,906.59$ at San Francisco, and $\$ 31,351.22$ at New Orleans.

a Includes $\$ 240$, payments made in the fiscal year 1897.

## ESTIMATES OF APPROPRIATIONS FOR THE FISCAL YEAR 1900.

The estimates of the appropriations that will be required for the support of the mint service, including the office of the Director of the Mint, for the fiscal jear 1900, as submitted, aggregate $\$ 1,162,350$.

## EARNINGS AND EXPENDITURES OF THE REFINERIES OF THE COINAGE MINTS AND OF THE ASSAY OFFICE AT NEW YORK

The charges received for parting and refining bullion during the fis cal year 1898 aggregated $\$ 173,614.07$, exclusive of the amount received from the sale of by-products, $\$ 8,198.83$, which sum is deposited in the Treasury as a miscellaneous receipt.

The amount expended during the year on account of expenses incident to parting and refining bullion aggregated $\$ 144,257.62$, showing an excess of charges collected over expenditures of $\$ 29,356.45$.

The amount of charges collected for and the amount disbursed on account of the expenses incident to parting and refining bullion at the coinage mints and assay office at New York during the fiscal year 1898 are shown in the following table:

Charges Collected and Expinditures for Parting and Refining Bullion 1898.

| Institutions. | Charges collected. | Grossexpenditures. | Sarplus of charges collected. |
| :---: | :---: | :---: | :---: |
| Mint at Philadelphia | \$42, 359.18 | \$35, 223. 65 | \$7, 135. 53 |

APPROPRIATIONS AND EXPENSES OF THE OFFICE OF THE DIRECTOR OF THE MINT FOR THE FISCAL YEAR 1898.

The expenditures for the office of the Director of the Mint, including salaries, expenses incurred in collecting and compiling the statistics of the production of gold and silver, supervising the annual settlements, incidental and contingent expenses, and for the support of the assay laboratory connected with the Bureau, aggregated, for the year, $\$ 34,442.61$, leaving an unexpended balance of $\$ 2,067.39$ to the credit of the several appropriations for the office of the Director of the Mint, as shown in the following table:

Appropriations and Expenses, Office Director of the Mint, for the Fiscal Ylear 1898.

| Purpose for which appropriated. | Appropriated. | Expended. | Unexpended. |
| :---: | :---: | :---: | :---: |
| Salaries... | \$29, 360.00 | \$28, 005. 62 | \$1, 354. 38 |
| Examination of mints. | 2,500.00 | 2, 470.95 | 29.05 |
| Mining statistics | 3,500.00 | 3,040.75 | 459.25 |
| Laboratory .............................. | 750.00 | 667.92 | 142.08 |
| Books, pamphlets, and incidental expenses. | 400.00 | 317.37 | 82. 63 |
| Total .............................. | 36,510.00 | 34, 442.61 | 2, 067.39 |

EARNINGS AND EXPENDITURES OF THE MINTS AND ASSAY OFFICES.
The amount of earnings of the mints and assay offices during the fiscal year 1898 was $\$ 4,695,797.96$; of this amount $\$ 173,614.07$ was for parting and refining bullion, $\$ 10,046.17$ for copper alloy, and $\$ 15,321.46$ for melting, assaying, and stamping charges collected by the minor assay offices. The seigniorage on the coinage of standard silver dollars was $\$ 3,073,958.59$, on subsidiary silver coinage, $\$ 286,311.22$, on minor coinage, $\$ 1,031,000.25$, and on the recoinage of minor coins, $\$ 18,383.12$.
The value of the deposit melting room grains and sweeps recovered was $\$ 8,726.65$; the value of the surplus bullion returned by operative officers, $\$ 53,024.28$, and the gain ou bullion shipped by the minor assay offices to the mint for coinage was $\$ 6,675.30$.

The expenditures of the mint service, including wastages by the operative officers, losis on sale of sweeps, and expense of distributing minor coins was $\$ 1,263,133.02$.
The net earnings for the year were $\$ 3,432,664.94$.
A table will be found in the Appendix showing in detail the earnings and expenditures for the year.

## CLASSIFIED STATEMENT OF EXPENDITURES.

The expenditures of the mints and assay offices and of the refineries connected therewith for supplies, salaries, and wages of workmen during the fiscal year ended June 30, 1898, are shown by the following table:

Consolidatid Statement of Expenditures for Supplits of the Mints and Assay Offices of the United States during the Fiscal Year ended June 30, 1898.

| Total imports ................................................ | 120, 402, 195 |

GoLD Exports.-Gold bars, bearing the stamp of a United States mint or assay office, of the value of $\$ 1,507,535$ were exported, all of which went to France. There was also exported other domestic gold bullion of the value of $\$ 469,115$, nearly all of which went to England.

Gold coins of the United States were exported of the value of $\$ 8,402,216$, of which $\$ 2,509,042$ went to Ontario and Quebec, $\$ 2,500,000$ to France, $\$ 1,250,000$ to Germany, $\$ 1,080,355$ to the Hawaiian Islands, and the remainder to various countries, principally to Central American States and West Indies. Domestic gold ore valued at $\$ 160$ was exported to Nova Scotia.

Foreign gold bullion valued at $\$ 1,000$ was exported to France, and foreign gold coin valued at $\$ 4,935,020$ was also exported, the greater part of which went to Cuba.

Gold contained in foreign base bullion, of the value of $\$ 39,973$, was exported to England.

The total gold exports from the United States during the fiscal year were as follows:

Gold Exports, Fiscal Yeaŕ 1898.

In the above table the item "in copper matte and bullion, $\$ 178,700$," 8,645 ounces, fine, ascertained by the Bureau of the Mint from the superintendent of the United States assay office and thecollectors of the ports at New York and Baltimore (see correspondence below), has been sub-
stituted for the amount of gold exported in the form of copper matte and base bullion, viz, $\$ 81,345$, contained in the custom-house returns to this Bureau.

The value of the net gold imports for the fiscal year 1898 was $\$ 104,868,476$, as against $\$ 44,609,841$ net exports for the fiscal year 1897.

The net exports of United States gold coin, from January 1, 1870, to June 30,1898 , were $\$ 552,564,528$, as shown by the following table:

Imports and Exports of United States Gold Coin.

| Period. | Imports. | Exports. | Period. | Imports. | Exports. |
| :---: | :---: | :---: | :---: | :---: | :---: |

SILVER IMPORTS.-During the fiscal year there were imported $4,411,528$ ounces of foreign silver bullion, of the commercial value of $\$ 2,566,338$, of which $\$ 2,333,823$ came from Mexico, $\$ 226,292$ from Honduras, and the remainder from various countries.

The imports of foreign silver coin amounted to $\$ 7,615,826$, of which $\$ 6,199,203$ came from Mexico, and the remainder principally from the West Indies and Central and South America.

Foreign silver ore of the value of $\$ 230,789$ was imported, of which amount $\$ 194,228$ came from Mexico, and the balance from Peru and Colombia.

Silver coins of the United States were returned to this country amouuting to $\$ 148,410$, of which amount $\$ 68,049$ were returned from Canada, $\$ 51,235$ from Central America, $\$ 13,485$ from the West Indies, $\$ 3,554$ from South America, and the remainder from various countries.

The invoiced value of silver contained in copper matte, lead bullion, and silver-lead ore imported was $\$ 20,368,088$, received principally from British Columbia and Mexico.

The following table, compiled from returns made monthly to the Bureau by collectors and surveyors of customs of the various ports, shows the character and value of the base bullion imported:

Imports of Base Bullion and Ore.

| Itoms. | Weiglt | Value. |
| :---: | :---: | :---: |
| Silver-lead ore................................ . ponuds.. | 385, 557, 632 | \$11, 467, 672 |

| - | 20,368, 088 |
| Total foreign bullion | 30,781, 041 |
| United States coin. .................................................... | 148,410 |
| Total silver imports | 30, 929, 451 |

SILVER EXPORTS.-Domestic silver bullion bearing the stamp of a United States mint or assay office, containing 375,523 ounces, of the value of $\$ 211,948$, was exported; $\$ 176,711$ of this amount went to Mexico and the remainder to England and Cauada. Other silver bullion, containing $82,796,775$ ounces, of the invoiced value of $\$ 47,342,174$, was exported, $\$ 41,002,577$ of which went to England, $\$ 2,115,880$ to Hongkong, $\$ 1,417,588$ to the British East Indies, $\$ 1,062,250$ to France, $\$ 928,066$ to Mexico, and the remainder to various other countries.

Domestic silver coins of the value of $\$ 112,201$ were exported, $\$ 75,000$ of which went to the Hawaiian Islands, $\$ 23,108$ to British Columbia, and the remainder to Canada and the British West Indies.

Silver contained in base bullion and ore, of the value of $\$ 163,302$, was also exported, the greater part of which went to England.

The following statements relative to the amount of gold and silver exported in copper matte and pig copper from the ports of New York and Baltimore are submitted:

## The United States absay Otfice at New York, Superintendent's Office, October 4, 1898.

SIR: In accordance with your letter of the 1st instant, I give below a statement showing the amount of gold and silver contained in pig copper and copper matte exported from the port of New York during the fiscal year ended June 30, 1898, viz:

| Items. | Gross weight (avoirdupois). | Fine gold. | Fine silver. |
| :---: | :---: | :---: | :---: |
| Pig copper.... Copper matte. | Pounds. $\begin{array}{r} 25,728,000 \\ 3,640,709 \end{array}$ | Ounces. 5, 018 3, 618 | Ounces. 837,515 <br> 377, 173 |
| Total | 29, 368, 709 | 8, 636 | 1, 214, 688 |

Respectfully, yours,
Hon. George E. Roberts,
Direotor of the Mint, Washington, D. C.
Hon. George E. Roberts,
Direator of the Mint, Washington, D. C.

> Oftice of the Collector of Customs,
> Port of Nero York, November $3,1898$.

SIR: In reply to your letter of the 28th ultimo, asking for a statement showing the amount of gold and silver contained in pig copper, copper matte, etc., exported from this port during the fiscal year ended June 30, 1898, I.would state that the exports of gold and silver contained in such pig copper, copper matte, etc., were as follows:

Andrew Mason, Superintendent.

The Director of the Mint, Washington, D. C.

> Office of the Collector of Customs, Port of Baltimore, Md., October $31,1898$.

Director of the Mint, Treasury Department, Washington, D. C.
Sir: Inclosed please find statement of the amount of gold and silver contained in copper matte exported from this port during the fiscal year ended June 30, 1898.

Our records do not indicate any pig copper or other ore containing gold or silver exported during that period.

Respectfully, yours, A. Lincoln Dryden,
Hon. George E. Roberts,

Statement of the Amount of Gold and Silver Contained in Copper Matte Exported from the Port of Baltimore, Md., during the Fiscal Year ended June 30, 1898.
[Calculated on a basis of 60.5 per cent pure copper, 35 ounces pure silver, and 0.14 ounces prre gold.]

| Montb. | Matte. |  | Pure copper. | Pure silver. | Pure gold. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| November 1897. | Pounde. $142,240$ | Tons. 63.5 | $\begin{array}{r} \text { Pounds. } \\ 86,055 \end{array}$ | Ounces. $2,222.5$ | Ounces. $8.89$ |

The following table shows the silver exports from the United States during the fiscal year :

Sllver Exports, Fiscal Year 1898.

| Items. | Value. |
| :---: | :---: |
| Domestic bullion (United States mint or assay office bars, commercial value). | \$211, 948 |
| Other domestic bullion (commercial value).. | 47, 342, 174 |
| Domestic coin.. | 112, 201 |
| Silver in copper matte and base bullion (custom-house returns, <br> \$163,202) $\qquad$ | 701, 866 |
| Silver in domestic ore. | 100 |
| Total domestic. | 48, 368, 289 |
| Foreign coin reexported ........................... \$7, 275,594 |  |
| Silver in foreign base bullion ....................... 107, 114 |  |
| Total foreign | 7,383,308 |
| Total silver exports. | 55, 751, 597 |

In the above table the item "in copper matte and bullion, $\$ 701,866$," 1,$216 ; 911$ ounces fine, ascertained by the Bureau of the Mint from the superintendent of the United States assay office and collectors of the ports at New York and Baltimore (see correspondence above), has been substituted for the amount of silver exported in the form of copper matte and base bullion, viz, $\$ 163,202$, contained in the custom-house returns to this Bureau.

The value of the net exports of silver for the fiscal year was $\$ 24,822,146$, against $\$ 32,636,835$ for the previous fiscal year.

There will be found in the Appendix tables showing in detail the imports and exports of gold and silver bullion and coin.

FI 98-28

## MOVEMENT OF GOLD FROM THE UNIJED STATES.

The table following, showing the imports and exports of gold at the port of New York during the fiscal year 1898 has been prepared by the superintendent of the United States assay office in that city:

| Gold . | \$861, 514, 780 |
| Silver (including bullion in Mercantile Safe Deposit Co.).... | 637, 672, 743 |
| Total .............................................................. | 1,499, 187, 523 |

The total metallic stock on July 1, 1897, was as follows:

| Coin and bullion. | Value. |
| :---: | :---: |
| Gold Silver (including bullion in Mercautile Safe Deposit Co.) | $\begin{array}{r} \$ 696,270,542 \\ 634,509,781 \end{array}$ |
| Total | 1,330, 780, 323 |

A comparison of the amounts in the above tables shows that there was an increase in 1898 over that of 1897 in the stock of gold, $\$ 165,244,238$, and of silver, $\$ 3,162,962$; a total increase of $\$ 168,407,200$.

## OWNERSHIP OF THE MEIALLIC SIOCK.

The metallic stock of the United States, comprising the gold and silver bullion and coin, was owned on July 1, 1898, as follows:

Ownersalp of Gold and Silver in the United States July 1, 1898.

| Ownership. | Gold coin and bullion. | Silver coin and bullion. |  |  |  | Total gold and silver coin and bullion. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| United States Treasary .. | $a \$ 167,807,726$ | b\$14, 896, 040 | $\$ 12,070,690$ | \$99, 354, 337 | \$126, 321, 067 | \$294, 128, 793 |
| National banks (July 14, 1898) | c284, 921, 377 | d 44, 421, 601 | 6, 334, 153 | . | 50, 755, 754 | 335, 677, 131 |
| Private banks and individuals ....... | 408, 785, 677 | $402,678,881$ | 57, 722, 767 | 194, 274 | 460, 595, 922 | 869, 381, 599 |
| Total | 861, 514, 780 | 461, 906, 522 | 76, 127, 610 | 99, 548,611 | 637, 672, 743 | 1, 499, 187, 523 |

$a$ Gold coin and hallion in Treasury, exclusive of $\$ 35,811,589$ gold certificates outstanding. $b$ Silver dollars in Treasury, exclusive of $\$ 390,126,510$ silver certificates outstanding. c Iucludes $\$ 152,033,340$ Treusury and clearing-house gold certificates.
dIucludes $\$ 36,458,014$ silver certificatea held by national banke.

On July 1, 1897, the ownership of the metallic stock in the United States was as follows:

Ownership of Gold and Silver in the United States July 1, 1897.

| Owuership. | Gold coin and bullion. | Silver coin and bullion. |  |  |  | Total gold and silver coin and bullion. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Silver dollars. | Subsidiary silver coin. | Silvor bullion. | Total silver. |  |
| United States <br> Treasury $\qquad$ | $a \$ 141,395,515$ | $b \$ 42,204,149$ | \$.16, 201, 960 | \$106, 490, 744 | \$104, 896, 853 | \$306, 292, 368 |
| National banks (July 23, 1897).. | c 193,686, 596 | d 41, 479, 900 | 5, 756, 106 |  | 47, 236,000 | 240, 922, 602 |
| Private banks and individuals | 361, 188, 431 | 368, 309, 693 | 53, 860, 303 | 206, 926 | 422, 376, 922 | 783, 565, 353 |
| Total | 696, 270, 542 | 451, 993, 742 | 75, 818, 360 | 106, 697, 670 | 634, 509, 781 | 1,330, 780, 323 |

a Gold coin and bullion in Treasury, exclusive of $\$ 37,285,339$ gold certificates outstanding.
$b$ Silver dollars in Treasury, exclusive of $\$ 357,849,312$ silver certificates outstanding.
$c$ Includes $\$ 74,218,990$ I'reasury and cloaring-house gold cortificates.
$d$ Includes $\$ 34,626,625$ silver certificatos held by national banks.
It will be seen on examination of the above tables that the stock of gold coin and bullion owned by the Treasury on July 1, 1898, was greater than that of July 1, 1897, by $\$ 26,412,211$, and that owned by national and private banks and individuals on July 1, 1898, exceeded that owned on the same day of the previous year by $\$ 138,832,027-\mathrm{a}$ total increase in ownership of gold in 1898 of $\$ 165,244,238$.

In silver dollars owned by the Treasury there was a decrease in 1898 from that of 1897 of $\$ 27,308,109$, while the number owned by national and private banks and individuals on July 1, 1898, exceeded that of the previous year by $\$ 37,310,889$, or a total increase in ownership during 1898 of $\$ 10,002,780$.

## STOCK AND LOOATION OF THE METALLIC AND.PAPER MONEY IN THE UNITED STATES.

The following table shows the stock and location of the metallic and paper money in the United States on July 1, 1898:

Location of the Moneys of the United States July 1, 1898.

| Moneys. | In Treasury. | In national banks July 14, 1808. | In other banks and in general circulation. | Total. |

| Total | 157, 754, 862 | 252, 948, 237 | 758, 888, 556 | 1, 169, 591, 655 |

a Includes $\$ 57,426,000$ gold clearing-house certificates.
$b$ Includes $\$ 8,326,505$ of their own notes held by different national luanks.
A comparison of the above tables shows an increase in the Treasury in 1898 over 1897 of $\$ 18,639,873$ in gold and silver bullion and coin, and a decrease during the same period of $\$ 76,684,282$ in the amount of paper money-a uet decrease in metallic and paper currency of $\$ 58,044$,409. In gold bullion there was an increase of $\$ 71,116,954$, and in gold coin a decrease of $\$ 46,178,493$.

In silver bullion there was a decrease of $\$ 7,136,407$, and in silver dollars an increase of $\$ 4,969,089$.

On July 1, 1898, the metallic stock in the national banks was $\$ 280$, 761,777 , as against $\$ 189,502,987$ on the same date for the previous year, or an increase in 1898 of $\$ 91,258,790$. The increase in gold coin for 1898 was $\$ 89,570,431$, that in silver dollars being $\$ 1,110,312$.

The amount of paper money held in the national banks July 1, 1898, was less by $\$ 36,132,342$ than on July 1, 1897. The total increase in metallic and paper money held in the national banks on July 1, 1898, over that of July 1,1897 , was $\$ 55,126,448$.

The total metallic stock in other than national banks and in general circulation on July 1, 1898 , was $\$ 498,358,854$, and in paper currency $\$ 840,553,651$, as against $\$ 439,850,317$ and $\$ 758,888,556$, respectively, on July 1, 1897-an increase in the former of $\$ 58,508,537$ and in the latter of $\$ 81,665,095$.

The increase in gold coin over the previous fiscal year was $\$ 50,735$,346 , and in standard silver dollars $\$ 3,923,379$.

The increase in the total metallic stock on July 1, 1898, over that of July 1,1897 , was $\$ 168,407,200$. The increase in gold coin was $\$ 94,127$,284 and in standard silver dollars $\$ 10,002,780$. There was a decrease during 1898 of $\$ 31,1.51,529$ in the total stock of paper currency and an increase of $\$ 137,255,671$ in the total stock of metallic and paper currency.

## STOCK OF GOLD AND SILVER IN THE UNITED STATES FROM 1873 TO 1898.

The stock of gold and silver and the amount per capita at the close of each fiscal year from 1873 to 1898 in the United States is exhibited in the following table, compiled from the reports of the Director of the Mint:

Estimated Stock of Gold and Silyer in the United States and the amount Per Caplta at the Close of Each Fiscal Year from 1873 to 1898 Inclusive.

| Fiscal year ending June 30- | Population. | Total coin and bullion. |  | Per capita. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Gold. | Silver. | Gold. | Silver. | Total metallic. |
| 1873. | 41,677, 000 | \$135,000,000 | \$6, 149, 305 | \$3.23 | \$0.15 | \$3.38 |

The following letter from the Secretary of the Treasury, in response to resolution of the Senate of April 5, 1898, relative to amount of gold in actual circulation, etc., is submitted :

## Treasury Department, Office of the Secretary, <br> Washington, D. C., April 18, 1898.

Sir: I have the houor to acknowledge receipt of Senate resolution dated the 5th instant, as follows:
"Resolved, That the Secretary of the Treasury be directed to inform the Senate how he ascertains the amount of gold in actual circulation, after deducting the reserves in the Treasury and in the banks, and if he has any actual statistics upon which to base his statement; and also to inform the Senate whether he makes any ahowance for the wear and loss of the paper circulation of the Government in his Treasury statement, or does he assume that there is no diminution of the amount of paper money in circulation by reason of wear and loss."

In reply the Senate is respectfully informed that the starting point of the estimate of the stock of gold in the United States is the calculation made of the stock June 30, 1872, by Dr. Henry R. Linderman, then Director of the Mint. At that period there was no gold in active circulation in the United States (except on the Pacific
coast), and the estimate comprised only the metallic stock in the Treasury ana national banks, with an estimate of $\$ 20,000,000$ as a minimum in use on the Pacific coast, and an allowance of $\$ 10,000,000$ for that in State and private banks and private hoarde. Dr. Linderman's aggregate was $\$ 128,389,864.49$. The estimates from year to year since 1873 have been arrived at by adding to the stock of coin at that date the annual coinage and amount of domestic coin imported, deducting the loss by recoinage of United States coin, the amount exported, and estimated as used in the industrial arts.

The amount exported and imported is obtained from the custom-house officials at the ports of entry, except what may be taken nut or brought in by individuals in their private possession. That would be small, and the outgo and income are assumed to offset each other, as parties going abroad or returning usually convert their pocket change at the point of departure or on arrival.

The estimate of the amount used in the industrial arts is based non several censuses made by the Bureau of the Mint and upon annual reports received from private smelters and refiners. Manufacturing. jewelers, doing any considerable business, prefer to buy refined bars rather than use coin, because by so doing they get full weight, while by using coin they lose by whatever amount the coin is abraded. The coin melted down by refiners is usually mutilated or underweight, and bought by them at its bullion value. The amount of coin melted down by small manufacturers is estimated from the returns obtained by circulars sent to all the jewelers in the United States whose names appear in directories.

It is not believed that any officer of the Government has assumed that there is no diminution of the amount of paper money in circulation by reason of wear and loss, but the official reports published by the Department from time to time contain no allowance for such loss because there is no authority of law for making any reduction, on that account, of the stated liabilities of the United States. The subject bas been considered from time to time and estimates have been made of the probable loss, the latest of which, recently made by the actuary of the Department, is as follows:

Estimatr of the Amount of Unitrd States Paper Money that Will Never bie Presiented for Redimption.

| Kind. | Total issued, including reissues. | Amount outstanding. | Estimated loss. |
| :---: | :---: | :---: | :---: |

| Total | 9,602, 757, 333 | 1,168, 166, 194 | 13,045, 300 |

Respectfully, yours,
The President of tee Senate.
L. J. Gage, Secretary.

THE WORLD'S STOCK OF MONEY IN THE PRINCIPAL COUNTRIES OF THE WORLD IN 1873.

Inquiries have frequently been received within the last few years asking for information as to the stock of money in the principal countries of the world at different periods and especially as to 1873. To answer such inquiries, as far as practicable, the following table, showing the stock of money in 1873 in the countries named therein, has been compiled from the most reliable data obtainable:

Approximate Stogks of Money in the Aggregate and Per Capita in the Princlpal Countrifs of the World, 1873.

| Countries. | Popula. tion. | Stock of gold. | Stock of silver. | Uncovered paper. | Per capita. |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  | Gold. | Silver. | Paper. | Total. |
| United States. | 41, 700, 000 | \$135, 000, 000 | \$6,150, 000 | \$749, 445, 000 | \$3.24 | \$0.15 | \$17.97 | \$21. 36 |

## WORLD'S STOCK OF MONEY.

Owing to the absence of official information from many countries, it is a difficult and laborious undertaking to make an estimate of the world's stock of money, and especially of gold and silver.

The following table, showing the money systems and the approximate stock of gold, silver, and uncovered paper money in the principal countries of the world has been compiled from the latest data obtainable, both official and unofficial, the latter being used only in the absence of official information. While the table is but an estimate, it is believed to exhibit approximately the stocks of money in the world.

Monetary Systems and Approximate Stocks of Money in the aggre

a November 1, 1898; all other countries January 1, 1898.

$f$ C. Cramer Froy.
g Bulletin de Statistique, Paris, January, 1898.
\& Except Venezuela, Chile, and Peru.
iIncludes Aden, Perim, Ceylon, Hongkong, Labaan, and Straits Settlements.
Upon comparison of the foregoing estimate of the world's stock of money with the estimate of the same for 1896 as published in the Report of the Bureau of the Mint for the fiscal year ended June 30, 1897, it is found there is an increase in the world's stock of gold in 1897 over 1896 of nearly $\$ 235,000,000$ and a decrease in the world's stock of silver of $\$ 291,800,000$. The decrease is solely due to the reduction in the estimate of the stock of silver in certain countries.

The stock of gold in the United States is estimated to have been
on July 1, $1897, \$ 696,300,000$, and on July 1, $1898, \$ 861,515,000$, showing a gain of $\$ 165,215,000$. On the 1 st of November, 1898, the stock was estimated to have been $\$ 925,100,000$, showing a gain from July 1 to November 1, 1898, of $\$ 63,585,000$, making the gain in the stock of gold in the United States from July 1, 1897, to November 1, 1898, of $\$ 228,800,000$. The method of estimating the stock of metallic money in the United States is fully explained in a letter addressed to the President of the Senate by the Secretary of the Treasury under date of April 18, 1898, and which will appear in another part of this report.
The stock of gold in France January 1, 1897, was officially estimated at $\$ 772,000,000$, and on January 1,1898 , at $\$ 810,000,000$, a gain during the year of $\$ 38,000,000$. Russia's stock of gold was estimated January 1, 1897, to have been $\$ 586,900,000$, and from official information received is found to have been on January $1,1898, \$ 756,600,000$, showing an increase over the former estimate of $\$ 169,700,000$.

For a number of years the Government of Russia has been accumulating gold from year to year, not, as many believed, as a war fund, but, as now appears, for the resumption of specie payments, and which has been successfully accomplished.

The stock of gold in the Austro-Hungarian Empire, based upon official information, was estimated to have been January 1, 1897, $\$ 178,500,000$, and on January $1,1898, \$ 227,700,000$, an increase during the year of $\$ 49,200,000$. By a law enacted August 2,1892 , AustriaHungary adopted the single gold standard, and has since that time been accumulating gold to carry out that act.

During the calendar year 1897, Germany's holdings of gold increased $\$ 14,000,000$ over 1896.

The stock of gold in the South American States from unofficial information was estimated January 1,1897 , at $\$ 65,000,000$, while from official information received it is estimated to have been, January 1, 1898, $\$ 77,500,000$, an increase of $\$ 12,500,000$ over the amount held January 1,1897. The estimate, $\$ 584,000,000$, as the stock of gold in the United Kingdom December 31, 1896, as published in the fiscal report for 1897, was based upon information contained in Money and Prices, published under the anspices of the Bureau of Statistics, State Department. The estimate of $\$ 438,000,000$ now made is based upon official information received from the British Government.

Roumania's stock of gold, estimated upon official information at $\$ 38,600,000$ December 31, 1896 , is now on like information estimated at $\$ 14,500,000$, a reduction of $\$ 24,100,000$.

For the stock of gold in Egypt as published in previous reports, $\$ 129,300,000$ was the estimate of the late Ottomar Haupt, an eminent statistician of France, but from unofficial information there is substantial reason for the belief that Haupt's estimate was far too great, and it is now placed at $\$ 30,000,000$. The few statistics, as well as the information from Egypt, are very unsatisfactory, and the estimate of the stock of gold in that country is based upon the best data obtainable.

The stock of gold in Hawaii is estimated upon official information at $\$ 4,000,000$. The population of Hawaii is estimated at 100,000 , giving the island a gold per capita of $\$ 40$, the largest per capita in gold of any country of the world.

The most important changes in the stock of silver in the different countries have been made in the estimates for France, India, and Russia.

From 1893 to 1897 the estimate of India's stock of silver was $\$ 950,000,000$, which was based upon figures furnished the Indian Currency Commission in 1893 by Mr. F. C. Harrison.

In an official document recently issued by the Indian Government, the stock of silver in that country is estimated at $1,250,000,000$ rupees, equivalent to $\$ 592,125,000$, which sum is now adopted as the estimated stock of silver in India in the money of the United States.

From information received from the French Government the stock of silver in that country December 31, 1896, is estimated to have been $\$ 443,900,000$, and December 31, 1897 , at $\$ 419,800,000$, a reduction of $\$ 22,100,000$.

Russia's stock of silver is now estimated at $\$ 128,400,000$, an increase of $\$ 54,200,000$. Within the past three years, that is from January 1, 1895, to January 1, 1898, Russia has increased her stock of silver by coinage from $\$ 48,000,000$ to $\$ 128,400,000$, the increase being for the purpose of redeeming the paper rubles.

GOLD AND SILVER USED IN THE INDUSTRIAL ARTS IN THE UNITED STATES DURING THE CALENDAR YEAR 1897.

By the favor of returns from all the private refineries and Government institutions, as in former years, this Bureau has ascertained the amount of gold and silver used in the industrial arts, in the United States, during the calendar year 1897.

In compliance with these requests, statements showing the number of five ounces, and value of gold and silver bars sold to manufacturers and jewelers for industrial purposes and also the class of material used in the manufacture of such bars, have been received.

The following table from the United States assay office at New York is submitted.

The weight and value of gold and silver bars furnished manufacturers and jewelers by the United States assay office at New York during the calendar year 1897 was as follows:

Bars Manufactured for Use in the Industrial Arts by the United States Assay Office at New York during the Calendar Year ended December 31, 1897.

| Material used. | Gold. |  | Silver. |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Fine ounces. | Value. | Fine ounces. | Value. |
| Domestic bullion | 297, 628. 184 | \$6, 152, 520.59 | 4, 272, 505.70 | \$5, 524, 047.77 |
| Foreign material | 29, 70.1. 301 | 613, 980.38 | $616,578.77$ | 797, 192.75 |
| Old jewelry, etc. | 83,358. 644 | 1,723, 176.11 | 373,548. 49 | 482, 971. 78 |

The United States mint or assay office bars are included in the above table, and in order to avoid duplication they must be eliminated from the amounts reported by private refineries.
The following table, with the United States mint or assay office bars eliminated, is submitted:

Bars for Industrial Use (Exclusive of Government Bars) Furnished Goldsmithsand Otaers by Private Refineries during the Calmndar Year 1897.

| Material used. | Gold. |  | Silver. |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Fine ounces. | Value. | Fine ounces. | Coining value. |
| Domestic bullion. | 22, 522 | \$465,566 | 2,841,494 | \$3, 673,851 |
| United States coin............ | 8,709 | 180, 028 |  |  |
| Old plate, jewelry, and other old material | 37,172 | 768, 412 | 429, 779 | 555, 674 |
| Total .-................... | 68,403 | 1,414, 006 | 3, 271, 273 | 4,229, 525 |

The following table is compiled from returns from Goverument institutions and private refineries:

Gold and Silver Bars Furnished for Use in Manufactures and tre arts during the Calendar Year 1897, and Classification of the Material Used.

| Material used. | Gold. | Silver (coining value). | Total. |
| :---: | :---: | :---: | :---: |
| Domestic ballion | \$7, 184, 822 | \$9,200,497 | \$16, 385, 319 |
| United States coin | 191,854 |  | 191,854 |
| Old material | 2, 571,428 | 1,103,460 | 3, 674, 888 |
| Foreiga ballion and coin | 813,981 | 797, 193 | ], 411, 174 |
| Total | 10,562, 035 | 11, 101, 150 | 21, 663, 235 |

The actual amount of United States coin melted by goldsmiths and jewelers would not appear in the reports from institutions manufacturing bars, and, in fact, is not known. But assuming the total amount of such coin used in the arts to be as in former years-gold, $\$ 1,500,000$; silver, $\$ 100,000$-the following table shows the industrial consumption of the precious metals in the United States during the calendar year 1897:

Industrial Consumption of the Precious Metals dúring the Calendar Year 1897.

| Material used. | Gold. | Silvor (coining value). | Total. |
| :---: | :---: | :---: | :---: |

The production of gold and silver from the mines of the United States since 1860 is shown in the following table.

The silver product is given at its commercial value, reckoned at the average market price-based ou daily quotations-of silver each year as well as its coining value in United States dollars.

Product of Gold and Silver from Mines in the United States, 1860-1897.
[The estimate for 1860-1872 is by R. W. Raynond, commissioner, and since 1872 by the Burean of the Mint.]

| Calendar jears. | Gold. |  | Silver. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Fine ounces. | Value. | Fine ounces. | Commercial value. | Coining value. |

Tables showing the product of gold and silver from mines of the United States since 1792 will be found in the Appeudix.

## COINAGE OF THE UNITED STATES.

The following table exhibits the number of fine ounces and value of gold and silver coinage of the United States, by calendar years, from 1873 to 1897:

Coinage of Gold and Silver of the Mints of the United States, 1873-1897.

| Calendar years. | Gold. |  | Silver. |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Fine onnces. | Value. | Fine ounces. | Coining value, |
| 1873. | 2;758,475 | \$57, 022, 748 | 3,112,891 | \$4, 024; 748 |

| 1892. | 1,682, 832 | 34, 787, 223 | 9,777, 084 | 12,641, 078 |
| 1893. | 2, 757, 231 | 56, 997, 020 | 6,808, 413 | 8,802, 797. |
| 1894. | 3,848, 045 | 79,546, 160 | 7, 115, 896 | 9, 200, 351 |
| 1895. | 2,883, 941 | 59, 616, 358 | 4,407, 055 | 5,698, 010 |
| 1896. | 2, 276, 192 | 47, 053, 060 | 17,858, 594 | 23,089,899 |
| 1807. | 3,677, 878 | 76, 028, 485 | 14, 298, 769 | 18, 487, 297 |
| Total | 54, 187, 664 | $1,120,158,536$ | 453, 017, 553 | 585, 719, 673 |

In the Appendix a table will be found showing the value of the coinage executed by each mint from 1792 to June 30, 1898.

WORLD'S PRODUCTION, 1895, 1896, AND 1897.
The production of gold and silver in the world for the calendar years 1895, 1896, and 1897 was as follows:

Product of Gold and Silver in the World.

| Calendar years. | Gold. | Silvor. |
| :---: | :---: | :---: |
| 1895. | \$198, 763, 600 | \$216, 566, 900 |
| 1896. | 202, 682, 300 | 217, 442, 900 |
| 1897. | 237, 504, 800 | 236, 730, 300 |

Tables compiled from information furnished by foreign governments through our diplomatic representatives and revised from the latest data, exhibiting the weight and value of the gold and silver product of
the principal countries of the world for the calendar years $1895, \mathbf{1 8 9 6}$, and 1897 , will be found in the Appendix.

For the sake of uniformity the value of silver has, as heretofore, been calculated at its coinage rate, viz, $\$ 1.2929+$ per fine ounce.

The following table shows the production of the precious metals in the world for the calendar years 1860-1897:

Product of Gold and Silver in the World, 1860-1897.
[The annual production of 1860 to 1872 is obtained from 5 year period estimates, compiled by Dr. Adolph Soetbeer. Since 1872 the ostimates are those of the Burean of the Mint.]

THE GOLD IN SIGHT.
What has become of all the gold produced in recent years, since the annual output began to largely exceed the average of about $\$ 115,000,000$, which was so evenly maintained from 1861 to 1890 ?

The figures for production, consumption in manufactures and arts, and even for coinage, are all more or less inexact. The statements of coinage for some countries include their recoinages, not only of their own mutilated pieces, but of the foreign coins brought to their mints. Iir many countries no official or trustworthy returns are made of the consumption in the manufactures and arts. The estimates for production are believed to approximate the truth; but it would be gratifying to be able to check them by statements showing how the gold has entered into use, and it is particularly desirable to know what proportion of the annual gold product is actually available for monetary use.

During the five years 1893-1897, inclusive, the world's production of gold has been estimated by the Bureau of the Mint as follows:

| Year. | Production. |
| :---: | :---: |
| 1893. | \$157, 494, 800 |
| 1894. | 181, 175, 600 |
| 1895. | 199. 304, 100 |
| 1896. | 202, 956, 000 |
| 1897. | 337, 504, 800 |
| Total. | 978, 435,300 |

Can this great amount, said to have been added to the world's stock in the e years, be accounted for now? The following figures are given in reply:

The estimates of the Bureau of the Mint of the amount of gold consumed in the manufactures and arts, made annually at the end of each year, have been as follows:

| Year. | Amount consunied. |
| :---: | :---: |
| 1893. | \$50, 177, 300 |
| 1894. | $52,183,736$ |
| 1895. | 58,579, 16u |
| 1896. | 59, 251, 640 |
| 1897. | 59, 005, 980 |
| Total. | 279, 197, 816 |

The stocks of gold in the principal banks of Europe on or about the 31st day of December, 1892, and the 31st day of December, 1897, are given below. With the banks the figures, if not for the 31st day of the month, are from the statements nearest thereto. The sums for Russia and Austria-Hungary include amounts in Government treasuries, as reported by the official representatives of the United States in these countries.

Gold Coin and Bullion in European Banis and Treasuries December 31, 1892, and December 31, 1897.

[^34]The following table shows approximately the gain of gold in banks in South Africa, Australia, and Canada from 1892 to 1897. The figures for all but the South African Republic are from the Statistical Abstract for the Colonial Possessious of the United Kingdom. Most of them are averages for the year named.

Stock of Coin and Bullion in Banirs in South Africa, Aus'tralia, and Canada at the End of 1892 and 1897, and the Increase or Decrease of the Same in the Five Years.

| Country. | Stock, 1892. | Stock, 1897. | Increase. | Decrease. |

$a$ For 1890.
Little allowance for error in these figures need be made, for they are definite returns of gold in sight and counted. A similar statement of gold in sight in the East in 1892 and 1897 can not be compiled with data at hand, but the movement between the East and Great Britain is obtainable. For the British East Indies, China, and Japan the excess of imports and estimated production over exports in the five years under review are $\$ 43,500,000$, which may reasouably be counted as the gain made by the East.

The stock of gold in the United States on December 31, 1892, was estimated at that time by the Bureau of the Mint at $\$ 649,788,020$, and that of December 31, 1897, at $\$ 745,245,953-a$ gain of $\$ 95,457,933$.

Of this gain, $\$ 45,726,750$ appears in the Governmeut Treasury and national banks; the balance is considered to bave gone into State and private banks and general circulation.

In the countries of the world not covered by the foregoing statements the change in stocks is not enough to be important.

We now have the following showing of gains in gold stocks between December 31, 1892, and December 31, 1897, and of use in the manufactures and arts during that period:

## Gains in Gold Stocks of rhé World and Amount Used in Manufactures from December 31, 1892, to Deciember, 31, 1897.

| European banks and treasuries | \$515, 094, 096 |
| :---: | :---: |
| Increase in the United Staters | 95, 457, 933 |
| Increase in British East Indies, China, and Japan | $43,500,000$ |
| Increase in banks of South Africa, Austrilia, and | 28, 200, 160 |
| Used in manufactures and arts | 279, 197, 816 |
| Total | 961, 450, 005 |

Subtracting this aggregate from the production of five years, as it has been annually estimated by this Bureau, we have only $\$ 16,985,295$ unaccounted for.

The calculation comes out too close to be entirely satisfactory. A larger sum than this must have been absorbed in general circulation, although Russia and the United States are the only countries in which any considerable increase in circulation is known to have been made. The calculation seems to show conclusively that the annual estimates of production have been conservative and of industrial consumption liberal.

$$
\text { WORLD'S COINAGE, 1895, 1896, AND } 1897 .
$$

In the Appendix will be found a table, revised from the latest information received, exhibiting the coinages of the various conntries of the world during the calendar years 1895, 1896, and 1897. The following is a summary of the same:

Coinage of Nations.

|  | Calendar jears. | Gold. | Silver. |
| :---: | :---: | :---: | :---: |
| 1895. |  | \$231, 087, 438 | \$126, 873, 642 |
| 1896. |  | 195, 899, 517 | 159,540, 027 |
| 1897. |  | 437, 719, 345 | 167, 760, 297 |

The above figures represent, as nearly as this Bureau has been able to ascertain, the total value of the gold and silver coinages executed in the world during the years therein named.

It must be borne in mind, however, that the total of these coinages does not correctly represent the amount of new gold and new silver made into coins during the year, for the reason that the coinages as reported include the value of domestic and foreign coins melted for recoinage, as well as old material, plate, etc., used in coinage.

In the circular letter of iuquiry prepared at this Bureau and sent to foreign goveruments through the Department of State, asking for information on these subjects, it was especially requested that each country report the amount of such recoinages. This has been done in many instances, but not in all.

Coinage of Gold and Silver of the Mints of the World for the Calendar Years 1873-1897.

| Calendar years. | Gold. |  | Silver. |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Fine ornces. | Value. | Fine ounces. | Coining value. |
| 1873. | 12, 462, 890 | \$257, 630, 802 | 101, 741, 421 | \$131, 544, 464 |
| 1874 | 6, 568, 279 | 135, 778, 387 | 79,610,875 | 102, 931, 232 |
| 1875. | 9,480,892 | 195, 987, 428 | 92, 747, 118 | 119, 915, 467 |
| 1876. | 10, 309, 645 | 213, 119, 278 | 97, 899, 525 | 126, 577, 164 |
| 1877. | 9,753,196 | 201, 616, 466 | 88,449, 796 | 114, 359, 332 |
| 1878 | 9, 113, 202 | 188, 386, 611 | 124, 671, 870 | 161, 191, 913 |
| 1879. | 4, 390, 167 | 90, 752, 811 | 81, 124, 555 | 104, 888, 313 |

| Chile . | 389, 333 |  |  |  |
| Germany | 9, 036, 833 | ........ | 15, 257, 943 |  |
| Russia. |  |  | 520,510 |  |
| Turkey |  |  | 778, 640 |  |
| Japan |  | 709, 507 | 2, 920,846 |  |
| Total | 40, 048, 237 | 933, 349 | 50, 399, 560 | 120, 527 |

## RECOINAGES OF THE WORLD.

The following table, compiled from official sources, exhibits, approximately, the recoinages of gold and silver of the principal countries of the world for the calendar years 1896 and 1897, so far as the same have been reported to this Bureau:

Gold and Silver Recoinages Reported by the Principal Countries of tele World during the Calendar Yfars 1896 and 1897.
[Value expressed in United States money.]

| Countries. | 1896. |  | 1897. |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Gold. | Silver. | Gold. | Silver. |
| United States. | \$1, 939, 173 | \$4, 552, 051 | \$750, 688 | \$5, 81I, 833 |
| Australia. | 8,429 | ............. | 4,224 |  |
| Austria-Eungrar | 362, 439 | 714,061 | 2,561, 021 | 131, 336 |
| France | 175, 485 |  | 1,930, 000 |  |
| Great l3ritain | 12, 627, 044 | 1,100,642 | 13,379,512 | 1,845,416 |
| Germany | 124, 140 | 2,718, 368 | 276, 707 |  |
| India (British) |  | 2,593, 721 | - | 4,183, 854 |
| Italy. |  |  | 23 |  |
| Japan. | 16,362 | 6,016 | 57, 067 | 143, 350 |
| Mexico |  | 12,500, 000 |  |  |
| Netherlands |  | 427, 023 |  | 965, 739 |
| Norway |  |  |  | 26,204 |
| Pera |  |  |  | 154, 667 |
| Russia |  | 285, 584 | 127, 517, 884 | 505, 274 |
| Switzerland |  | 1,930 |  |  |
| Tarkey |  |  | 145, 068 | 446, 634 |
| Denmark |  | 1,007 |  | 894 |
| Sweden |  | 884 |  | 1, 395 |
| Total | 15, 253, 072 | 24, 901, 287 | 146, 622, 194 | 14, 216, 656 |

The replies to the interrogatories, which are given in full in the Appendix to this report, are indicated by the numbers of the questions.

In the list of questions propounded to foreign Governments for the calendar year 1897 were the following:

What was the total import of United States gold coin during the year 9
What was the total import of gold from the United States, direct, in 1897?
What was the amount of United States gold coin deposited at the mints and melted?

The following table shows the countries from which answers to these three interrogatories were received, the amount of United States gold coin imported by them, and the value of the United States gold coin melted at their mints:

| Countries. | Import of United States gold coin. | Total import of gold from United States. | United States gold coin melted. |
| :---: | :---: | :---: | :---: |
| Austria-Hungary. |  |  | \$6, 960, 669 |
| Costa Rica. |  | \$465, 432 |  |
| Great Britain. | \$30, 854 | 331, 194 |  |
| Germany | 1, 175, 348 | 1,232,504 | 7, 892, 263 |
| Japan. | 6,670 |  |  |
| 'rotal | 1,212,872 | 2,029, 130 | 14,852,932 |

VALUE OF FOREIGN COINS.
The law requires (sec. 25, act August 28, 1894)-
That the value of the foreign coins as expressed in the money of account of the United States shall be that of the pure metal of such coin of standard value; and the values of the standard coins in circulation of the various nations of the world shall be estimated quarterly by the Director of the Mint, and be proclaimed by the Secretary of the Treasury immediately after the passage of this act and thereafter quarterly on the 1st day of January, April, July, and October in each year.

In accordance with the above requirement, the values of foreign coins have been estimated and proclaimed as follows:

Values of Forkign Coins January 1, 1898.

a The "British dollar" has the same legal value as tho Mexican dollar in Hongkong, the Straits Settlements, and Labuan.

Values of Foreign Coins January 1, 1898-Continued.

| Counlries. | Standard. | Mouetary unit. | $\begin{gathered} \text { Value } \\ \text { in } \\ \text { termat ot } \\ \text { United } \\ \text { States } \\ \text { gold } \\ \text { dollar. } \end{gathered}$ | Coins. |

a The "British dollar" has the same legal value as the Mexican dollar in Hongkong, the Straits Settlement, and Labuan.

## LABORATORY OF THE BUREAU OF THE MIN'T.

During the calendar year of 1897 there were tested by the assayer of the Bureau 410 gold and 978 silver coins, all of which, with the exception of a single piece, were found to be within the legal requirements as to weight and fineness. This piece was a silver dollar struck at the Philadelphia mint, and was one of the pieces representing delivery number 267 ; its weight 410.82 grains, or 1.68 grains below standard (the legal limit being 1.50 grains).

In the gold coins the greatest deviation above standard (the legal limit being 0.001 above or below) was 0.0005 , while the greatest deviation below was 0.0007 .

The greatest deviation of a silver coin above standard (the limit being 0.003 above or below) was 0.0025 , while the greatest deviation below was 0.0011 .

During the past year a larger number of counterfeit silver coins have been assayed than in any previous year. Many of these closely approximate standard silver in composition, while in some cases the dies, though lacking in sharpuess, are very dangerous, and are with difficulty distinguished from the genuine.

The work of the assayer was greatly increased during the year 1808, not only by a large number of determinations of gold and silver in imported ores, but also by special work required in connection with the chemical examination of samples of oils, pipe linings, etc., submitted to the Department with bids for supplying these articles.

Under the law the Commissioner of Patents may reject an application for'patent when he has reason to believe the process inoperative, but in such cases the applicant is given the opportunity, should he demand it, to demonstrate bis process.

In April, 1897, the application of E. C. Brice, of Chicago, for a process of making gold having been rejected as inoperative, Brice offered to demonstrate his process. The Patent Office being without facilities for such work, the Commissioner of Patents, through the Secretary of the Interior, requested the Secretary of the Treasury to permit the demonstration to be made in the laboratory of the Bureau of the Mint. The request was referred to the Director of the Mint, who appointed the following committee to conduct the work under the direction of the applicant: Mr. Andrew Mason, superintendent United States assay office, New York City; Dr. David K. Tuttle, melter and refiner, United States Mint, Philadelphia, Pa.; Dr. Cabell Whitehead, assayer of the Bureau of the Mint.

These gentlemen, after three weeks' labor, made a report concluding as follows:

[^36]While this demonstration was directly of no interest either to the chemist or metallurgist, it has served to call attention to the fact that silver and gold are very widely distributed in nature, and again to the fact that it is exceedingly difficult to perfectly free one metal from all others, even when the impurities possess such characteristic reactions as gold and silver.

The following tables show the number of pieces assayed at the Burreau and by the Annual Assay Commission, and their average fineness; also, the total number assayed from each mint, with the average fineness for the year:

Number and average Fineness of Gold and Silver Coins of the Unitid States Tested at the Bureau of the Mint during the Year 1897.

Number and Averdge Fineness of Gold and Silyer Coins of the United States Tested by the Annual Assay Commission of 1898.

PROCEEDINGS OF THE ASSAY COMMISSION OF 1898.
The following commissioners were appointed by the President, under the provisions of section 3547 of the Revised Statutes, to test the weight and fineness of the gold and silver coins of the coinage of the calendar year 1897 reserved for that purpose by the coinage mints, viz: Hon. J. C. Burrows, Finance Committee, United States Senate; Hon. Charles W. Stone, chairman Committee Coinage, Wejghts, and Measures, House of Representatives; Mr. Edward L. Brewster, Chicago, Ill.; Prof. Henry S. Pritchett, Superintendent Coast and Geodetic Survey, Washington, D. C.; Dr. John K. Rees, Columbia University, New York, N. Y.; Mr. Joseph Wharton, Philadelphia, Pa.; Mr. U. StuartPatterson,

Philadelphia, Pa.; Mr. Leverett Mears, professor of chemistry, Williams College, Williamstown, Mass.; Mr. Charles E. Cooper, Oil City, Pa.; Mr. Oliver C. Bosbyshell, Philadelphia, Pa.; Mr. John Marshall; professor of chemistry, University of Pennsylvania; Mr. Cabell Whitehead, assayer, Bureau of the Mint, Washington, D. C.; Mr. Myron T. Herrick, Cleveland, Ohio.

The commission met at the mint at Philadelphia, Wednesday, the 9th day of February, 1898, together with the following ex-officio commissioners: Hon. William Butler, United States judge for the eastern district of Pennsylvania, and Mr. Herbert G. Torry, assayer of the United States assay office at New York.

## REPORT OF THE COMMITTEE ON COUNTING.

February 10, 1898.
To the Board of Assay Commissioners of 1898.
Gentlemen: The committee on counting respectfully reports-
The packages containing the pieces reserved by the several mints for the trial of coins, in accordance with section 3539, Revised Statutes, were delivered to us by the superintendent of the mint at Philadelphia.

The number of coins, with the exceptions hereafter noted, corresponded with the record kept by the Director of the Mint of all transeripts sent him by the superintendents of the several mints.

The quantities of coin reserved at the several mints for the purposes of the commission were as follows:
(1) Gold coins from the mint at Philadelphia, 3,337 in number, of the value of $\$ 42,892.50$.
(2) Silver coins from the mint at Philadelphia, 12,532 in number, of the value of $\$ 3,952.65$.
(3) Gold coins from the mint at San Francisco, 2,062 in number, of the value of \$33,560.
(4) Silver coins from the mint at San Francisco, 4,326 in number, of the value of \$3,282.70.
(5) Goid coins from the mint at New Orleans, 43 in number, of the value of $\$ 430$.
(6) Silver coins from the mint at New Orleaus, 3,389 in number, of the value of $\$ 2,385.30$.
In all 25,689 coins, of an aggregate value of $\$ 86,503.15$.
In the delivery of quarter-dollars at the Philadelphia mint of April $20,1897,15$ pieces were reserved, being 9 pieces in excess of the transcript furnished the Director of the Mint.

In the deliveries of half-dollars at the New Orleans mint of 21st, 24th, and 27th of September, 1897, 20 pieces were reserved from each, being 10 pieces in each delivery in excess of the transcript furuished.
In the following deliveries of dollars at the Philadelphia mint, on the dates stated, there were reserved an aggregate of 351 pieces in excess of the transcripts furnished, to wit:

A letter from the coiner, approved by the superintendent of the Philadelphia mint and addressed to this commission, was received and cousidered by the committee, and is as follows:

Mint of the United States at Philadilphia, Superintendent's Office, February 10, 1898.

## To the Board of Assay Commissioners.

- Gentlemen : The following statement is respectfully submitted for the infornation of the commissiou, setting forth the reasons why the reserved coins (silver dollars), representing certain deliveries from the coiner to the superiutendeut of the United States mint at Philadelphia, daring the calendar year 1897, do not coincide with the number of reserved coins as shown by the records of the Bureau of the Mint. ${ }^{\prime}$
In addition to the number of coins reserved for the annual assay, and as a precautionary measure, two pieces from each delivery are habitually sent to the Bureau of the Mint, at Washington, for special test by the assayer of the Bureau.
On November 30, 1897, delivery No. 275 ( $\$ 38,000$ ) was made to the superintendent, and, iu accordance with the usual practice, two pieces were sent to the Bureau for special test. Some teu days later a communication from the Director of the Mint was received to the effect that one of said coins was below the tolerance of weight allowed by law, and directing the delivery to be withheld.
The delivery being intact his instructions were complied with, and upon reweighing this delivery it was discovered that other pieces were outside the limit of tolerance as to weight.
Upon investigation as to the cause it was found that the Seyss weighing machines, which have been in use some sixteen years, were defective and doing inaccurate work.
Upon the discovery of this fact, and to prevent any such defective pieces getting into circulation, all the deliveries of silver dollars made during the fiscal jear were withdrawn and weighed by hand.
It was held that with the withdrawal of the deliveries the reserved pieces in the pyx represented nothing, and that a new pyx should be taken in the usual way. This was done and a memorandum was made on the envelopes containing the coins stating the facts.
The coins from these redeliveries were then placed in the pyx to represent the actual deliveries.
The reserved pieces first taken as above stated are therefore surplus, and represent no actual delivery, but it was deemed not to be within our province to make any withdrawal of them from the pyx.

$$
\text { Very respectfully, } \quad \text { W. E. Morgan, Coiner. }
$$

This staterucnt represents the actual facts and is approved.
Herman Kretz, Superintendent.

- On consideration of the facts stated in the said communication-

Resolved, That in the opinion of the committee the examination of pyx pieces, which do not represeut coins in circulation, is unnecessary, and that such examination be dispensed with.
The verification of the number of coins being completed, the committee on weighing aud assaying selected such coins as were required.
In the report of those committees will be fond au account of the disposition of these coins.

- Very respectfully,

o. C. Bosbyshell, Chairman.<br>Myron T. Herrick.<br>C. E. Cooper.<br>Leverett Mears.<br>John Marshall.<br>J. K. Rees.<br>H. G. Torrey.<br>Henry S. Pritchetr.

The committee on assaying reported:
In compliance with section 3547 of the Revised Statntes, we have taken samples of the coins reserved from time to time at the United States miuts at Philadelphia, San Prancisco, and New Orleans for asnay.
These samples represent the various deliveries made by the coiners to the superintendents of the sereral mints during the calendar year 1847.
The rosult of the assays made of the individual coins aud of the same in mass are given in the following sechednles.

From these it will be seen that the greatest excess in the assay valus of the gold coinage above standard at the different mints (the liuit of tolerance being onethousandth) is iut-

The greatest deficiency below standard (the limit of tolerance being one-thousandth) is at-
Philadelphia. ..... 899.7
Now Orleans ..... 899.3

The greatest excess in silver coins above standard (the limit of tolerance being three-thousandths) is at-

The greatest deficiency below standard (the limit of tolerance being three-thousandths) is at-

> Philadelphia
> 899.6
> San Francisco
> 807.7
> New Orlcans.
> 809.1

The assay committee also tested the quartation silver and the lead used in the assay of the gold bullion, and found them free from gold.
The acid nsed in the humid assay of silver was found to be free from silver, and also from chlorine.
The balances used were also tested and found to be correct.
The committee, therefore, deem the assays exhibited in the accompanying schednles to be trustworthy.

## The committee on weighing reported:

That they have examined sample coins, selected at random from those reserved by the various mints, as follows:

## MIN'T AT PHILADELPHIA.

73 gold coins, of which all were weighed in mass. 126 silver coins, of which 108 were weighed in mass.

## MINT AT SAN FRANCISCO.

86 gold coins, of which all were weighed in mass. 148 silver coins, of which all were weighed in mass.

## MINT AT NEW ORLEANS.

18 gold coins, of which all were weighed in mass. 162 silver coins, of which all were weighed in mass.
The weighing of the single pieces was made with a balance by Troemner, of Philadelphia, and the weights employed were provided by the Director of the dint, who stated to the committee that the same had been certified to him in 1893, by the United States Superintendent of Weights and Measures, as being the true standard of weight as fixed by law, and as being correctly related to the troy pound of 1827.
The mass weighings were made upon the large Saxton balance of the mint.
The committee examined the weights ordinarily employed in the mint, and found them to be in accordance with the usual interpretation of the standard prescribed by law.
The details of the weighings, as shown in the following tables, indicate but slight deviation from the statutory standard weight, and the coins were all within the legal tolerance.
In accordance with the resolution of the counting committee, pyx pieces to the number of 351 (silver dollars), representing coinage which had been condemned and remelted by the officers of the mint without having gone into circulation, were not weighed.
The committee on weighing pronounces the examination of the weights of the coinage of the several mints during the year 1897 to be satisfactory.
The committee recommends that the standard weights which are kept specifically for the use of the assay commission, and which are retained in the possession of the Director of the Mint, be sent in December of each year by him to the Superintendent of the Bureau of Weights and Measures, who shall have them compared
with the legal standard, and who shall forward them each year, under seal, to the commission, with a certification of their accuracy.

On motion of Mr. Bosbyshell it was-
Resolved, That the assay commission, having examined and tested the reserved coins of the several mints of the United States for the year 1897, and it appearing that these coins do not differ from the standard fineness and weight by a greater quantity than is allowed by law, the trial is considered and hereby reported satisfactory and adopted unanimously.

## MINT OF THE UNITED STATES, PHILADEIPHIA, PA.

The following table shows by weight and value the gold and silver deposited at the mint at Philadelphia during the fiscal year ended June 30, 1898:

| Metal. | Standard ounces. | Coining value. |
| :---: | :---: | :---: |
| Gold | 2,842,359.475 | \$52, 881, 106.52 |
| Silver. | 3, 388, 433. 02 | 3,942,903. 88 |
| Total. |  | 56, 824, 010. 40 |

In addition to the above, there was exchanged 300,000 standard ounces of silver bullion, for the purpose of subsidiary coinage, of the cost value of $\$ 170,123.62$, and charged to the mint at San Francisco, in exchange for silver bullion purchased under the act of July 14, 1890, of the cost value of $\$ 241,766.73$.

There were transferred from the Treasury for recoinage during the year worn and uncurrent domestic gold coins having a face value of $\$ 509,188$, containing $27,147.540$ standard ounces, of the coining value of $\$ 505,070.51$, and uncurrent domestic silver coins of the face value of $\$ 4,134,327.60$, containing $3,175,552.27$ standard ounces, having a coining value of $\$ 3,695,188.08$ in standard dollars or $\$ 3,950,920.40$ in new subsidiary coins.

There were also received over the counter uncurrent gold coins of the face value of $\$ 85,285$, containing $4,552.481$ standard ounces of the coining value of $\$ 84,697.33$, and uncurrent domestic silver coins of the face value of $\$ 3,343.32$, containing 2,662.01 standard ounces, having a coining value of $\$ 3,097.62$ in silver dollars or $\$ 3,311.99$ in new subsidiary coins.

| Total.. | 740,043.913 | 14, 698, 491.41 | 1,231, 905. 132 | $22,919,165.24$ | 676, 007. 610 | 12, 576.885. 77 |

The amount includes $\$ 30,077,038.79$ transferred from the assay office at New York for coinage.

Redeposits of Silver Bullion.

| Institution at which manufactured. | Unparted bars. |  |
| :---: | :---: | :---: |
|  | Standard ounces. | Value. |
| Denver | 58,764.52 | \$ $\$ 68,380.53$ |
| Buise | 14,803. 74 | 17,226.17 |
| Helena | 38, 948.24 | 45,321. 59 |
| 'Charlotte | -1,330.67 | 1,548.42 |
| St. Louis | 1,152. 21 | 1,340.75 |
| Deadwood | 243.19 | 282.99 |
| Total. | 115,242. 57 | 134, 100.45 |

Minor coins of the face value of $\$ 338,822$ were received on transfer orders and melted for recoinage during the year, while during the same period there were received by transfer, cleaned, and reissued 5-cent uickel coins of the face value of $\$ 198,900$.

Bronze and nickel blanks for minor coinage purposes were purchased as follows:

| Character. | Pounds, avoirdupois. | Cost. |
| :---: | :---: | :---: |
| Bronze 1-cent blanks | 305,500 | \$60, 916. 70 |
| Nickel 5-cent blanks | 150,000 | 47, 910.00 |
| Total | 455, 500 | 108,826.70 |

The amount of uncurrent copper-nickel and bronze coins transferred from the Treasury during the year for conversion into current coins,
cost and seigniorage, and also the quantity recoined and the loss in recoinage, is shown in the following table:
Minor Coins for Recoinage, Fiscal Year 1898, Mint of the United States at Philadelphia.

MINOR COINAGE.
Tbe total minor coinage for the year was, in nickel 5 -cent coins, $\$ 950,767.15$, and in bronze 1-cent coius, $\$ 538,716.96$. Of these amounts $\$ 321,169.50$ in nickel coins and $\$ 20,075.80$ in bronze coins were recoinage.

The seigniorage or gain on this recoinage was $\$ 18,383.12$, as against a wastage or loss of $\$ 16,229.27$, showing a net seigniorage of $\$ 2,153.85$. The seigniorage on the coinage of nickel and brouze coins coined from new material purchased during the year was $\$ 1,031,000.25$, which, added to the net seigniorage on the recoinage of minor coins, gives a total seigniorage on minor coinage of $\$ 1,033,154.10$ for the year.

The total amount of the several types of minor coins manufactured from 1793, when the first coinage of copper cents was made, until June 30,1898 , aggregated $\$ 30,292,101.41$. From the records of the mint at Philadelphia, to which that coinage has been assigned by law, it appears that there has been melterl for recoinage $\$ 2,980,699.40$, leaving outstanding June 30, 1898, $\$ 27,311,402.01$.

The several types and denominations of minor coins issued, manafactured by the mint at Philadelphia since its establishment, the amount remelted, and the amount outstanding June 30, 1898, is set forth in the following table:

Types of Minor Coins Issued.

| Denominations. | Coined. | Remelted. | Outstanding <br> June 30, 1898. |
| :---: | :---: | :---: | :---: |
| Copper cents | \$1, 562, 887.44 | \$378, 836. 93 | \$1, 184, 050. 51 |

The following table shows the number of proof coins and medals manufactured, the nominal value, amount received, and profit ou the same during the fiscal year ended June 30, 1898:

Report of Sales of Medals and Proof Coins.

| Items. | Number of pieces. | Nominal value. | Amount received. | Profit. |
| :---: | :---: | :---: | :---: | :---: |
| Gold medals | 30 | \$1,236. 50 | \$1, 413.68 | \$137. 50 |
| Silver medals.. | 260 | 338.14 | 490.17 | 106.84 |
| Bronze medals. | 639. | 78.90 | 417.05 | 293.45 |
| Gold proof coins. | 410 | 3,117. 50 | 3,220.00 | 102.50 |
| Silver and minor coins | 4, 572 | 1, 455.42. | 1, 905.00 | 449.58 |
| Minor proof coins. | 2,498 | 74.94 | 99.92 | 24.98 |
| Total | 8,409 | 6,301. 40 | 7, 545.82 | 1,114.85 |

MELTER AND REIFINER'S DEPARTMENT.
During the fiscal year the melter and refiner received from the superiutendent and operated upon 3,204,464.523 ounces of gold, of the value of $\$ 59,617,944.62$, his legal allowance for wastage being $3,204.464$ standard ounces, of the value of $\$ 59,617.94$. He also received and operated upon $15,875,907.32$ standard ounces of silver, of the value of $\$ 18,473,7 \dot{8} 3.06$, with a legal allowance for wastage of $23,814.54$ standard ounces, of the value of $\$ 27,711.46$.

On the annual settlement of the melter and refiner's accounts at the close of the fiscal year it was found that his actual loss in gold was 166.124 standard ounces, of the value of $\$ 3,090.68$, or 5,187 per cent of his legal allowance, while in silver he returned a surplus of 453.45 standard ounces, of the value of $\$ 256.35$.

The number of melts made for the bars and ingots during the year aggregated 6,934, as follows:

| Metals. | For bars. | Ingots made. | Ingots condemned. |
| :---: | :---: | :---: | :---: |
| Gold | 1,430 | 547 | 5 |
| Silver. | 470 | 4,48' | 4 |
| Total | 1,900 | 5,034 | 9 |

In addition to the above there were 5,444 deposit melts, of which 5,162 were gold and 282 silver and 589 melts of granulations, or a total of 6,033 during the year.

The weight and value of the gold and silver bars manufactured for industrial use duing the fiscal year were:

| Metals. | Fine ounces. | Coining value. |
| :---: | :---: | :---: |
| Gold | 33, 422.398 | \$690, 902. 29 |
| Silver. | 71,643.88 | 92,630.47 |
| Total |  | 783, 532. 76 |

From 290 barrels of sweeps there were obtained 864.289 standard ounces of gold and $4,887.08$ standard ounces of silver.

The operations of the refinery comprised:

| Ballion. | Gold. | Silver. |
| :---: | :---: | :---: |
| Gross weight, $2,194,877.67$ ounces. | Standard ozs. | Standard ozs. |
| Refined, by assay | 729, 176.992 | 1,621,807.04 |
| Returned from refinery | 729, 332. 219 | 1, 624, 106.60 |

coiner's department.
During the fiscal year the coiner received and operated upon $3,222,164.190$ standard ounces of gold, of the value of $\$ 59,947,240.76$, upon which there was a wastage of 36.996 standard ounces, of the value of $\$ 688.30$. The wastage was only computed on the amount, $23,529.540$ standard ounces, operated upon by the coiner, Mr. W. E. Morgan, from July 1, 1897, to February 28, 1898.

The present coiner, Mr. John IF. Landis, received 2,498,634.650 standard ounces of gold, of the value of $\$ 46,486,226.05$, from March 1 to June 30, 1898.

There was also received and operated upon 16,481,694.69 standard ounces of silver, of the value of $\$ 19,178,699.27$, upon which there was a wastage of $3,453.86$ standard ounces, of the value of $\$ 4,019.03$. The wastage was computed, as in the case of gold, only upon the amount,
$11,119,609.19$ standard ounces, operated upon by the coiner, Mr. W. E. Morgan, from July 1, 1897, to February 28, 1898.

The present coiner, Mr. John F. Landis, received and operated upon $5,362,085.50$ standard ounces of silver, of the value of $\$ 6,239,417.66$, from March 1, 1898, to June 30, 1898.

The following statement shows the coinage executed at the mint at Philadelphia during the fiscal year:

| Denominations. | Number of pieces. | Value. |
| :---: | :---: | :---: |
| GOLD. | - |  |
| Double eagles. | 170, 473 | \$3,409, 460.00 |
| Eagles. | 724, 562 | $7,245,620.00$ |
| Half eagles | 915, 067 | 4, 575,335.00 |
| Quarter eagles | 19,380 | $48,450.00$ |
| Total | 1,829, 482 | 15, 278, 865.00 |
| Dollars | 4, 158, 780 | 4, 158, 780.00 |
| Half dollars | 2, 600, 780 | 1,300,390.00 |
| Quarter dollars | 8, 484, 780 | $2,121,195.00$ |
| Dimes | 12,560,780 | 1, 256, 078.00 |
| Total | 27, 805, 120 | 8, 836, 443.00 |
| Five-cent nickels | 19, 015, 343 | $950,767.15$ |
| One-cent bronze | 58,871, 696 | $538,716.96$ |
| Total | 72,887, 039 | 1, 489, 484. 11 |
| Total coinage | 102, 521, 641 | 25, 604, 792. 11 |

The percentage of good coin produced from the amount operated upon was, gold 50.6, and silver 48.7.

In addition to the domestic coinage there were manufactured for the Government of Costa Rica 20,000 twenty-colon gold planchets, of the value of $\$ 186,141.02$, and the following silver coins for the Government of Santo Domingo:

| Denominations. | Good coins struck. | Imperfect strikes and blanks. | Total pieces handled. |
| :---: | :---: | :---: | :---: |
| Dollars (pesos) | 250,539 | 527 | 251;066 |
| Half dollars (medio pesos) | 908, 668 | 8,036 | 916, 704 |
| 20-cent pieces (20 centaros) | 1,382, 189 | 12,368 | 1, 394, 557 |
| 10 -cent pieces ( 10 contavos) | 759, 715 | 4,672 | 764, 387 |
| Total | 3,301, 111 | 25,603 | 3,326, 714 |

## Medals Manufactured during the Fiscal Yeak ended June 30, 1898.

|  | Description. | Number of medals. |
| :---: | :---: | :---: |
| Gold . |  | 30 |
| Silver. |  | 206 |
| Bronze. |  | 830 |
| Total |  | 1,066 |

ASSAYER'S DEPARTMENT.
The number of assays and ounces of proof gold made during the fiscal year were:

Assays and Ouncles of Proof Gold Made.

| Description. | Number. |
| :---: | :---: |
| Gold assays... | 34, 100 |
| Silver assays | 11,820 |
| Sweep assays. | 180 |
| Special bullion assays | 156 |
| Bronze and nickel assays. | 75 |
| Ounces of proof gold made | 120 |

ENGRAVER'S DEPARTMENT.
The number of coinage dies prepared in the engraver's department for the mints were 137 for gold coinage, 579 for silver coinage, and 585 for minor coinage, a total of 1,301 , and in addition to the above 11 were made for medals and 23 for proof coinage.

The annual settlement at the close of the fiscal year was superintended by Mr. M. H. Cobb, of the Philadelphia mint, who reported the settlement as satisfactory.

## MINT OF THE UNITED STATES AT SAN FRANCISCO, CAL.

Gold and silver bullion was deposited at the mint at San Francisco during the fiscal year ended June 30, 1898, as follows:

| Metals. | Standarct ounces. | Coining value. |
| :---: | :---: | :---: |
| Gold | 2,702, 651.046 | \$50, 281, 879.93 |
| Silver. | 1, 041, 057.14 | 1, 211, 411. 94 |
| Total |  | 51, 493, 291.87 |

In addition to the above there was an exchange of 300,000 standard ounces of silver bullion for the purpose of coinage, being silver bullion purchased under the act of July 14,1890 , of the cost value of $\$ 241,776.73$, and charged to the United States mint at Philadelphia in exchange for silver bullion for subsidiary coinage from the same institution of the cost value of $\$ 170,123.62$.

During the year there was deposited at this mint for recoinage 2,394.435 standard ounces United States gold coin of the face value of $\$ 45,892$, coining value $\$ 44,547.63$, of which there was transferred from the Treasury worn and uncurrent coin of the face value of $\$ 40,163$, containing $2,124.760$ standard ounces of the coining value of $\$ 39,530: 42$. Also $529,853.95$ standard ounces United States silver coin of the face value of $\$ 689,860.70$, having a coining value of $\$ 616,557.33$ in standard dollars, or $\$ 659,227.30$ in subsidiary coin, of which silver coin there was transferred from the Treasury worn and uncurrent subsidiary silver coin of the face value of $\$ 689,429.55$, containing $529,541.85$ standard ounces, with a coining value in new subsidiary silver coin of $\$ 658,839$.

Foreign gold bullion containing 152,194.367 standard ounces, of the
value of $\$ 2,831,520.07$, was deposited, of which $49,493.776$ standard ounces was in unrefined bullion and 102,700.589 standard ounces in refined bullion.

The following table shows the country from which this bullion was received:

Foreign Gold Bullion, Unrefined.

Foreign Gold Bullion, Refined.

| Countries. | Weight. | Valne. |
| :---: | :---: | :---: |
| New Zealand | Standard ozs. 102, 672.987 | \$1,910, 195. 10 |
| Australasia. | 27.602 | 513.53 |
| Total | 102,700.589 | 1,910, 708.63 |

Foreign gold coin containing $1,209,256.638$ standard ounces, of the value of $\$ 22,497,797.92$, was also received.

The following table shows the country of coinage and value of foreign gold coin received:

Foreign Gold Coins Received.

| Countrics of coinage. | Nominal weight. | Countries of coinage. | Nominal weight. |
| :---: | :---: | :---: | :---: |
|  | Standard ozs. |  | Standard ozs. |
| Argentina | 1.554 | Italy | . 207 。 |
| Austria. | . 122 | Japan | 111,183.456 |
| Chile | 6.516 | Mexico | 1,766.855 |
| Colombia | 5. 201 | Pera. | 5. 617 |
| Costa Rica. | 1. 296 | Russia. | 3.040 |
| Denmark | . 784 | Spain | 88.771 |
| France.. | 31.835 | Sweden | . 144 |
| Germany | 51.212 | Turkey | . 236 |
| Australasia. | 1,090, 760. 512 |  |  |
| Guatemala | 27.686 | Producing .... | 1, 209, 256. 638 |
| Holland.. | . 215 |  |  |
| Honduras.. | . 259 | Loss by abrasion | 679.580 |

The amount $1,209,936.218$ standard ounces represents the weight of new coins of the respective countries, while the amount 1,209,256.638 standard ounces is the actual weight at which they were received at the mint, showing a loss by abrasion of 679.580 standard ounces.

The following is an extract from a communication from the Superintendent of the Mint:

The pieces in oach deposit of coin are counted and a record thereof leept. The computatiou as appears in our statement is made upou such count. The difference between the aggregate as it appears thereon and the aggregate in the footnote and in our statement of deposits is caused by abrasion, etc.

There was redeposited $31,599.195$ standard ounces of gold bullion, of the value of $\$ 587,892$, representing fine bars made at the mint at Carson.
Foreign silver bullion, unrefined, containing 26,163.70 standard ounces, of the value of $\$ 30,445.03$, was received. There was no refined foreign silver bullion received.
The following table shows the country from which the bullion was received:

Foreign Silver Bullion, Unrefined.

| Countries. | Weight. | Value. |
| :---: | :---: | :---: |
|  | Std. ozs. |  |
| Klondike | 4,706. 40 | \$5,476.54 |
| Canada | 643.84 | 749.20 |
| Mexico | 20,759.65 | 24, 156. 68 |
| South America | 27.63 | 32.15 |
| Central America. | - 25.44 | 29.60 |
| Australasia. | . 74 | . 86 |
| Total | 26,163. 70 | 30,445. 03 |

There was redeposited 444,603.04 standard ounces of silver bullion, of the coining value of $\$ 517,356.26$, representing fine bars made at the mint at Carson.

## Melter and Refiner's Department.

The bullion received from the Superintendent and operated upon by the melter, and refiner during the year contained $4,811,658.039$ standard ounces of gold and $8,589,227.30$ staudard omices of silver, of which amount operations of the refinery comprise 251,127.163 standard ounces of gold and $132,823.26$ standard ounces of silver.
The bullion melted for coinage during the same period being 4,801,655.520 standard ounces of gold and $7,985,600.90$ standard ounces of silver.
No fine bars were manufactured during the year.
During the year the melter and refiner made $1,649 \mathrm{melts}$ of gold ingots, of which 1 was condemned, and 4,880 melts of silver ingots, of which 44 were coudemned.

Upon the annual settlement he returned a surplus of $1,639.305$ standard ounces of gold, valued at $\$ 30,498.7$, and $5,615.83$ standard ounces of silver, valued at $\$ 3,163.74$.

## Melts of Ingots Made and Condemned at the Mant at San Francisco FROM 1874 to 1898.

OPIERATIONS OF THIE COINER'S DEPARTMENT.
The bullion received and operated upon by the coiner during the fiscal year contained $4,832,271.54$ standard ounces of gold and $8,709,110.39$ standard ounces of silver.

During the year the coiner manufactured $\$ 48,931,000$ in gold coin and $\$ 4,889,411$ in silver coin, a total of $10,604,242$ pieces. The percentage of finished coin produced during the year from ingots operated upon was: Gold, 55.53 per cent; silver, 49.60 per cent.

Upon the annual settlement of the coiner's accounts it was found that there had been a wastage during the fiscal year of 498.553 standard ounces of gold, valued at $\$ 9,275.40$, or 20.63 per cent of his legal allowance in gold, and a wastage of $2,399.81$ standard ounces of silver, valued at $\$ 1,351.96$, being 27.55 per cent of his legal allowance on silver.

Coinage Executed at tee Mint at San Francisco during the Fiscal Year 1898.

| Denomination. | Pieces. | Value. |
| :---: | :---: | :---: |
| GOLD. |  |  |
| Double eagles. | 2, 178, 250 | \$43, 565, 000 |
| Eagles. | 226,100 | 2, 261, 000 |
| Half eagles. | 621, 000 | 3, 105, 000 |
| Total | 3, 025, 350 | 48, 931, 000 |
|  |  |  |
| Dollars. | 3,720, 000 | 3,720,000 |
| Half dollars | 1, 646, 872 | 823, 436 |
| Quarter dollars | 832, 020 | 208, 005 |
| Dimes. | 1,380,000 | 138, 000 |
| Total | 7,578,892 | 4, 889, 441 |
| Total coinage | 10,604, 242 | 53, 820, 441 |

The annual settlement at the close of the fiscal year was made by Mr. F.W Braddock, of the Mint Bureau, assisted by Mr. F. D. Hetrick, of the Carson mint, and W. A. Lamson, who weighed and counted the bullion aud coin on hand and found the balances as shown by the books to be correct.

The assayer made during the year the following assays:

| Description. | Number. |
| :---: | :---: |
| Gold assays.. | 39.084 |
| Silver assays | 17,903 |
| Sweep assays. | 210 |
| Special bullion assays ..... | 160 |
| Ounces of proof gold made. | 50 |
| Ounces of proof silver made. | 40 |

MINT OF THE UNITED STATES AT NEW ORLEANS, LA.
The weight and value of the gold and silver deposited at the mint of the United States at New Orleans during the fiscal year ended June 30,1898 , were as follows:

| Metal. | Standard ounces. | Coining value. |
| :---: | :---: | :---: |
| Gold. | 20, 354. 159 | \$378,682. 01 |
| Silver. | $460,132.66$ | 4, 026, 336.19 |
| Total |  | 4, 405, 018.20 |

There were purchased over the counter during the year 681.805 standard ounces of uncurrent domestic gold coin of the face value of $\$ 12,880$, producing in new coin $\$ 12,684.74$.

There were also deposited $13,605.112$ standard ounces of unrefined foreign gold bullion and 3,150.61 standard ounces of unrefined foreign silver bullion, as follows:

| Countries. | Gold. | Silver. |
| :---: | :---: | :---: |
| Mexico .......... <br> Central America | $\begin{array}{r} \text { Standard ozs. } \\ 286.500 \\ 13,318.612 \end{array}$ | Standard ozs. $\begin{array}{r} 35.61 \\ 3,115.00 \end{array}$ |
| Total | 13,605.112 | 3,150. 61 |

Foreign gold coins containing 1,609.060 standard ounces were received, as shown by the following table:

| Country of coinage. | Standard ounces. |
| :---: | :---: |
| Austria. | 1. 659 |
| France. | 3. 378 |
| Greece. | . 396 |
| Great Britain . | 14.5.78 |
| Mexico | 1,267. 222 |
| Spain ....... | 302.636 |
| South America. . | 17.125 |
| Central America. | 2.066 |
| Total | 1,609.060 |

Gold bullion to the amount of $4,072.892$ standard ounces of the value of $\$ 75,774.73$ was obtained from deposits of old plate and jewelry.

There were transferred and deposited by the Treasury of the United States for recoinage $968,506.50$ standard ounces of worn and uncurrent domestic silver coin of the nominal value of $\$ 1,280,383.65$, representing a.value of $\$ 1,204,984.76$ in new subsidiary silver coin.

There were no redeposits of gold. The redeposits of silver amounted to $2,479,659.25$ standard ounces, and consisted of $2,471,660.63$ standard ounces in fine and $7,998.62$ standard ounces in standard bars, all made at the mint at Philadelphia.

MELTER AND REFINER'S OPERATIONS.
The amount of gold and silver delivered by the superintendent during the fiscal year to the melter and refiner was as follows:

| Metal. | Standard oinces. | Coining value. |
| :---: | :---: | :---: |
| Gold . | 61, 058. 830 | \$1, 508, 071.25 |
| Silver. | 7,366, 242.660 | 8,571, 627. 82 |
| Total |  | 10, 079, 699.07 |

The number of gold and silver ingot melts made by the melter and refiner and the number condemned by the assayer are shown in the following table:

Ingot Melts made and Condemned.

|  | Mado. | Con. dewned. |
| :---: | :---: | :---: |
| Gold | 21 | 0 |
| Silver. | 581 | 1 |
| Total | 602 | 1 |

REFINERY OPERATIONS.
The weight and value of gold and silver operated upon in the refinery were as follows:

| Bullion. | Standard ounces. | Coining value: |
| :---: | :---: | :---: |
| Gold | 12, 879:963 | \$239, 627. 21 |
| Silver. | 36, 267.220 | 42,201.85 |
| Total |  | 281, 829.06 |

The melter and refiner had on hand at the end of the fiscal year 1898 the following amount of copper:

|  | Tons. |
| :---: | :---: |
| Copper on hand July 1, 1898. | 4.62 |
| Copper received during year. | 5.00 |
| Total | 9.62 |
| Used in operatious. | 5.86 |
| On hand June 30, 1898 | 3.76 | COINER'S OPERATIONS.

There were operated upon by the coiner during the fiscal year 1898 $54,817.830$ ounces of standard gold and $5,020,479.20$ ounces of standard silver, delivered to him in the form of ingots. The amount of coin manufactured therefrom is shown in the following tables:

GOLD COINAGE.

| Denominations. | Standard ounces. | Value. |
| :---: | :---: | :---: |
| Eagles.. | 22, 843.750 | \$425,000 |

The percentage of gold coin derived from ingots operated on $(54,817.830)$ was 41.672 .

SLLVER, COINAGE.

| Denominations. | Standard ounces. | Value. |
| :---: | :---: | :---: |
| Dollars | - 1,825,312.50 | \$2, 124, 000.00 |
| Half dollars | 217, 012.50 | 270,000.00 |
| Quartor dollars | 253, 743.87 | $315,700.00$ |
| Dimes | 40,187. 50 | 50,000.00 |
| Total. | 2,336, 256. 37 | 2,759,700. 00 |

The percentage of silver coin derived from ingots operated on (5,020,479.20) was as follows:
Percentage of coin to amount operated on ..................................................................................... 46.53

Percentage of subsidiary to amount operated on 50.18

Owing to the fact that this institution commenced operations so late in the fiscal year it was not deemed necessary to have a settlement on June 30, 1898.

$$

## ASSAY DEPARTMENT.

The number of assays made during the year was 3,005 , as follows:

| Character. | Bullion. | Ingots. | Ore. |
| :---: | :---: | :---: | :---: |
| Gold | 781 | 21 |  |
| Silver | 974 | 565 | 664 |
| Total.. | 1,755 | 586 | 664 |

One melt was condemned (not properly mixed).

## MINT OF THE UNITED STATES AT CARSON, NEV.

The mint at Carson was authorized by the act of March 3, 1863, but was not opened until 1870. Excepting in the years when the production of the Comstock lode was in its height the deposits have been small compared with the mints at San Francisco and Philadelphia, and have been gradually decreasing since 1878. In February, 1879, owing to lack of bullion, coinage operations were suspended from March 1 to June 30, and again from November 1, same year, to May 1, 1880, and again from April 1 to October 1, 1881. On March 28, 1885, coinage operations were again suspended and the force in the coiner's department and refinery furloughed, owing to the sinall amount of bullion deposited. On November 6, 1885, it was directed that the mint be closed. The coiner, melter and refiner, and assayer were suspended by the Presideut, and the clerks, assistants, and workmen were discharged, the superintendent being retained in custody of the building. The mint remained closed to the receipt of deposits until October 1, 1887, when it was reopened and refinery operations resumed. On October 1, 1889, coinage operations were resumed. This continued until May, 1893, though at times a supply of bullion was difficult to obtain, as the amount of deposits was small, and both refinery and coinage operations were restricted. It was necessary on two or three occasions to furlongh. a large number of the force. The coiner was removed, to take effect July 1,1893 , for want of occupation. Since this time the mint has contimued to be open to the receipt of deposits, though on three occasions it has been found necessary to furlough the force employed in the refinery owing to the small amount of bullion deposited.

The value of the gold and silver bullion deposited at the mint at Carson during the fiscal year ended June 30, 1898, aggregated $\$ 786,126.06$, against $\$ 912,203.01$ for the previous year, a decrease of $\$ 126,076.95$.

The weight and value of the deposits of gold and silver were as follows:

During the year gold bullion to the amount of 17.589 standard ounces, of the coining value of $\$ 327.24$, and silver bullion to the
amount of 6.35 standard ounces, of the coining value of $\$ 7.39$, were obtained from deposits of jewelers' bars and old plate.

There were no deposits of foreign or mutilated or uncurrent coins of the United States.

The quantity of gold and silver operated upon by the melter and refiner's department during the year was:

| Metal operated upon. | Standard ounces. | Coinlng value. |
| :---: | :---: | :---: |
| Gold. | 37,321. 750 | \$694,358.14 |
| Silver. | 300, 026. 70 | 349,121. 98 |
| Total |  | 1, 043, 480.12 |

The operations of the refinery were as follows:

| Bullion. | Weight. | Coining value. |
| :---: | :---: | :---: |
| Gross weight, $351,576.48$ ounces. <br> Gold. <br> Silver. | $\begin{gathered} \text { Standard ozs. } \\ 36,209.516 \\ 331,065.78 \end{gathered}$ | $\begin{array}{r} \$ 673,665.41 \\ 385,240.18 \end{array}$ |
| Total |  | 1, 058,905. 59 |

During the year tine gold bars, containing $35,245.868$ ounces of standard gold, valued at $\$ 655,737.08$, and fine silver bars, containing $275,049.90$ ounces of standard silver, of the coining value of $\$ 320,058.07$, were manufactured and delivered to the superintendent.

On the annual settlement of the melter and refiner's account,June 30, 1898, it was found that in operating upon 37,321.750 ounces of standard gold he returned an excess of 82.164 standard ounces, of the value of \$1,528.63.

In operating upon $300,026.70$ ounces of standard silver bullion during the year the wastage was 70.70 standard ounces, equivalent to 15.1 per cent of the legal allowance for wastage.

Owing to a breakage of part of the machinery in the melter and refiner's department a thorough clean-up was not made by that officer. Had be been allowed a few days longer in which to have done so he would, in the judgment of the superintendent, have recovered sufficient metal to have given him a slight excess, instead of this apparent wastage.

The annual settlement at the close of the fiscal year was superintended by Mr. F. W. Braddock, of the Mint Bureau, assisted by Messrs. Frank D. Hetrick and W. A. Lamson, who reported that they found on hand all the coin and bullion with which the superintendent was charged.

## UNLTED STATES ASSAY OFFICE AT NEW YORK.

The deposits of the year ended June 30, 1898, were as follows:

| Metals. | Standard ounces. | Coining value. |
| :---: | :---: | :---: |
| Gold. | 3,989, 072. 704 | \$74, 215, 306. 12 |
| Silver | 6,230,571. 08 | 7, 250, 119.07 |
| Total |  | 81, 465, 425. 19 |

Showing an increase in value over that of the previous year of $\$ 31,942,663.42$ in gold and $\$ 1,145,306.13$ in silver.

Of the gold, $\$ 23,951,162.07$ was in foreign coiu and $\$ 22,915,703.44$ in foreign bullion.
The bullion returned by the melter and refiner in excess of the amount charged to him was 641.552 ounces of standard gold, of the value of $\$ 11,935.85$, and $5,641.01$ ounces of standard silver.

The deductions in favor of the melter and refiner's accounts amounted to $1,789.90$ ounces gross, containing 156 ounces of gold (fine) and 1,288 ounces of silver (fine).

About 50 ounces of gold (fine) and 1,000 of silver (fine), an accumulation of years, were recovered from the large stack; the inside firebrick lining laving been removed entirely and a new one put in. This involved also an entire stoppage of the separating work of the melter and refiner's department for several months and the necessity of delivering at the anuual settlement of his accounts to the superintendent a large amount of unparted bullion.

Uncurrent and mutilated Uuited States gold coin of the face value of $\$ 545,029$ was melted, producing $\$ 29,031.734$ ounces of standard gold, of the value of $\$ 540,125.28$.
The value of gold bars exchanged for coin was $\$ 8,291,038.17$, and the bars (gold) paid to depositors was $\$ 2,753,363.96$, total, $\$ 11,044,402.13$; of which $\$ 9,536,865.86$ was for domestic use and $\$ 1,507,536.27$ for export.
The amount of silver bars paid to depositors (for use in the arts, etc., ) was $6,100,094.08$ standard ounces.

Gold of the value of $\$ 30,077,038.79$ was transferred to the mint at Philadelphia for coinage.
There were received over the counter uncurrent domestic gold coins of the face value of $\$ 545,029$, as shown by the following table:

| Denomination. | Face value. |
| :---: | :---: |
| Donble cagles | \$147, 940 |
| Eagles. | 214,520 |
| Half engles. | 164,330 |
| Quarter eagles. | 17,935 |
| Three-dollar pieces. | 120 |
| Dollars. | 184 |
| Total | 545, 029 |

These coins contained $29,031.734$ standard ounces, of the coining value of $\$ 540,125.28$.

Foreign gold bullion containing $1,231,719.060$ standard ounces, of the value of $\$ 22,915,703.44$, was deposited, of which $126,998,889$ standard ounces was unrefined and $1,104,720.171$ standard ounces was refined.

The following tables show the country from which the bullion was received:

Forbign gold Bullion Unrefined.

| Countries. | Weight. | Value. |
| :---: | :---: | :---: |
|  | Standard ozs. |  |
| Klondike ......... | 1,077.945 | \$20, 054. 79 |
| Canada | 57,310.945 | $\cdot \mathrm{l}, 066,250.14$ |
| South America | 14, 071.945 | 261, 803.63 |
| Central America | 8,833.704 | 164,347. 98 |
| Mexico | 40,652.120 | 756, 318.51 |
| West Indies | 57.519 | 1, 070.12 |
| Asia | 62, 144 | 1,156. 17 |
| China. | 17.947 | 333.90 |
| Unknown | 4,914.620 | 91, 434.79 |
| Total | 126, 998.889 | 2, 362, 770.03 |

Foreign Gold Buldion Rerined.

| Countries. | Weight. | Value. |
| :---: | :---: | :---: |
|  | Standard ozs. |  |
| England. | 985, 839. 530 | \$18,341, 200. 56 |
| France | 97, 010. 376 | 1, 8u4, 844.20 |
| Germany | 21, 870.265 | 406, 888.65 |
| Total | 1, 104, 720. 171 | 20,552, 933.41 |

Foreign gold coin containing $1,287,374.961$ standard ounces, of the value of $\$ 23,951,162.07$, was received.

The following table shows the country of coinage of this bullion:

| Countries. | Weight. | Value. |
| :---: | :---: | :---: |
|  | Standardozs. | - |
| France | 216, 934, 592 | \$4, 035, 992.41 |
| Great Britain. | 225, 087.837 | 4, 187,680.69 |
| Mexico | 14,517. 283 | 270, 088.99 |
| Spain. | 144, 716. 269 | 2,692, 395.71 |
| South America | 1.352 | 25.15 |
| Germany | 331, 970.513 | 6, 176, 195.59 |
| Japan | 300, 084.445 | 5, 582, 906. 42 |
| Unknown | 54, 062.670 | 1, 005, 817. 11 |
| Total | 1. $287,374.961$ | 23, 951, 162.07 |

The redeposits of gold amounted to 59.337 standard ounces, of the value of $\$ 1,103.95$. Of this amount 59.068 standard ounces contained in unparted bars manufactured at the essay office at Helena, Mont., and 0.269 standard ounce in unparted bars made at the assay office at St. Louis.

Foreign silver bullion, unrefined, containing 508,055 standard ounces, of the coining value of $\$ 591,191.27$, was received.

The following table shows the country from which the bullion was received:

| Countries. | Value. |
| :---: | :---: |
|  |  |
| Klondike | \$368.48 |
| Canada | 6,631. 43 |
| Mexico. | 573, 231.99 |
| South America. | 3,919.38 |
| Central America. | 5,463.02 |
| West Indies. | 294.48 |
| Asia, | . 78 |
| China | . 88 |
| Unknown | 1,280.83 |
| Total. | 591, 191. 27 |

There were no deposits of refined foreign silver bullion.
Foreign silver coin, $72,305.11$ standard ounces of the coining value of $\$ 84,136.86$, was deposited, and the following table shows the country of coinage:

| Countries. | Weight. | Value. |
| :---: | :---: | :---: |
|  | Standard ozs. |  |
| Mexico.. | 2 , 039.32 | \$2,373. 03 |
| South America........................................ | $39,038.03$ | 45,426.07 |
| West Indies.. | 1,170.66 | 1,362. 23 |
| Sprin | 1, 024.54 | 1, 192. 19 |
| Unknown. | 29, 032.56 | 33,783. 34 |
| Total . ......................................... | 72, 305.11 | 84, 136. 86 |

Redeposits of silver bullion amounted to $20,271.79$ standard ounces of the coining value of $\$ 23,588.99$, of which amount $19,771.78$ standard ounces in fine bars were manufactured at New York assay office and returned to that institution, and 489.24 standard ounces in unparted bars made at the assay office at St. Louis, and 10.77 standard ounces in unparted bars made at the assay office at Helena, were received.

## MELTER AND REFINER'S DEPARTMEN'T.

The enforced inactivity of the refinery for about six months conseguent upon the work on main stack caused an unusual accumulation of unparted metal to be turued over in the recent settlement, and a correspondingly decreased amount to the credit of metal acid refined.
The total amount of metal received by the melter and refiner was $9,720,113.91$ gross ounces, consisting of gold deposits, $3,763,464.21$; silver deposits, $5,783,591.87$; settlement of $1897,173,057.83$; the total standard ounces of gold being $3,994,656.167$, and of silver standard ounces, 6,350,755.90.
The number of fine, mint, and standard bars made and delivered to the superintendent was 63,098 , containing $3,783,371.948$ standard ounces of gold and $6,109,028.52$ standard ounces of silver. The number of gold deposits melted was 8,454 , of silver deposits 3,273 ; total, 11,727 .

The amount of acid refined was $2,807,096.08$ ounces gross, equal 484,553.600 ounces standard, of gold, and 2,414,626.87 ounces standard of silver. Sulphuric acid used equaled $1,075,870$ pounds, of the value of $\$ 9,467.64$. Waste acid sold equaled $1,603,820$ pounds, of the value of $\$ 1,764.20$; blue vitriol sold equaled 149,704 pounds, of the value of $\$ 4,683.80$; old materials sold (lead, iron, etc.), of the value of $\$ 591.29$; making total sales from by-products $\$ 7,039.29$.
The amount of deductions on base bullion was 1,791,15 ounces gross (estimated as 1,400 ounces standard).

There was returned in settlement in excess of the amount charged 641,552 standard ounces of gold and $5,641.01$ standard ounces of silver; total value of metal recovered equaled $\$ 17,576.86$.

## ASSAYER'S DEPARTMENT.

There has been but slight variation from the usual steady work of this department during the fiscal year 1897-98, excepting that an influx of foreign gold during the last two or three months of the year taxed the capacity of the department to its fullest extent, as it was well occupied without it.
During the year we assayed 11,727 inelts of gold and silver, from 500 to 600 barrels of sweeps, several hundred specials, about 600 mixed melts, 1,300 melts of fine gold and silver, stamped 63,000 bars, made about 70,000 cupels, and verified the calculations incident to the payment for deposits.

These figures give but a slight idea of the amount of care and labor involved in a year's work of this department.

## MINT OF THE UNITED S'AATES AT DENVER, COLO.

The value of the bullion operated upon at this institution and during the fiscal year ended June 30, 1898, was $\$ 16,279,973.20$ as against $\$ 6,974,016.42$ for the previous fiscal year, an increase of $\$ 9,305,956.78$.

United States mutilated gold coins of the nominal value of $\$ 98.50$, containing 5.243 standard oluces, of the coining value of $\$ 97.54$, were received and melted during the year.
There were also received 402.534 standard ounces of unrefined foreign gold bullion and 202.44 standard ounces of unrefined foreign silver bullion from the following countries:

The redeposits were unparted bars containing 284.788 standard ounces gold and 251.74 standard ounces silver, originally made at this institution.

The number of deposits for the year was 4,695 , a gain of 1,322 over the previous year.

Four large melting furnaces are in operation at present, and three assay muffle furnaces. The mechanical plant has been materially improved to meet the steadily increasing tax upon it.

The following table exhibits the value of deposits, earnings, and expenditures, also the percentage of net expenses to deposits for the tiscal year 1898:

ASSAY OFFICE OF THE UNITED STATES AT BOISE, LDAHO.
The bullion deposits at the United States assay office at Boise for the fiscal year 1898 numbered 1,923 . There were also received 2,743 deposits weighing less than 5 ounces. These small deposits were melted, assayed, and their value computed, and while they required a little less work in the melting room, they made the same work for the assay and clerical departments as the same number of regular deposits. The Government received $\$ 1,371.50$ for assaying these small deposits, a sum which nearly equals the annual expenditure at this office for fuel, acid, and other material used in the melting and assaying departments.

The work at the different offices is to be compared by the number of melts, assays, and computations rather than by the value of the bullion deposited. It means nothing as to the work of the assayer whether the sample that is given him to analyze is taken from a large or a small bar.

Putting the above figures together there were 4,666 melts, assays, and computations made during the year.

The heavily increased demands made upon this office require constant study toward the improvement of the equipment and the methods of work.

During the year just closed the melting room, which was formerly, on the first floor, was located in the basement where a large room convenient to the fuel was secured. The room thus vacated on the first floor was badly needed for the use of the clerical force.

Deposits were received from Idaho, Oregon, Montana, Washington, Colorado, Wyoming, Utah, and British Columbia, the greater portion coming from Idaho, Oregon, and Montana.

The redeposits consisted of unparted gold bars, containing 13,630.571 standard ounces, and unparted silver bars, containing 2,861.08 standard ounces, all originally made by this office.

The following statement shows the deposits, earnings, and expenditures, also the perceutage of net expenses to deposits, for the fiscal year 1898:

| Items. | Amonnt. |
| :---: | :---: |
| Deposits: |  |
| Gold...................................... $\$ 1,344,913.23$ |  |
| Silver................................... $21,544.72$ |  |
| Earnings. | 4,833.43 |
| Expenditures............................................... | 13,621. 73 |
| Percentage of net expense to deposits ........... 0.643144 |  |

ASSAY OFFICE OF THE UNITED S'PATES AT HELENA, MONT.
During the fiscal year 1898 there were 2,414 regular deposits of gold bullion at the United States assay office at Helena. The average loss in melting these deposits was 2.04 per cent, and the average fineness of the bullion was .742 gold and .219 silver. A large proportion of these deposits were in the shape of retort and low-grade bulliou, and accounts for the seemingly large percentage of loss in melting.
The value of the gold and silver deposited was $\$ 2,529,378.63$, an average of $\$ 1,047.79$ for each deposit. The volume of the annual business was the largest since the establishment of the office, being $\$ 438,427.76$, or 17 per cent greater than that of the preceding year.

The greater part of the bullion handled originated from mines and placers in Montana, Idaho, and Canada. Smaller amounts were also received from Washington, Oregon, Utah, and Wyoming.

Foreign bullion, unrefined, was received from the Klondike containing 21,605,633 standard ounces gold and 6,124.73 standard ounces silver. The redeposits consisted of 208.957 standard ounces gold and 68.43 standard ounces silver, all being unparted bars origiually made at this office.

The number of melts was nearly 3,500 , and consisted of the regular deposits, special bullion deposits for assay, and the consolidation mass melts. An equal number of assays were made by the assaying department. Charles Rumley, the first assayer in charge of the office in 1876, and who was melter at the time of his death, which occurred on August 6, 1897, was succeeded by Louis A. Walker.

The melting room was equipped with an electric exhaust fan, with direct motor attachment. This has been of great benefit in clearing the room of fumes and gases.
There were no deposits of mutilated or uncurrent coins of the United States during the year.

The following table shows the amount of deposits, earnings, and expenditures, with the percentage of net expenses to deposits, for the fiscal year 1898:

| Items. | Amount. |
| :---: | :---: |
| Deposits: | \$2, 529, 378.63 |
| Gold ...... . . . . . . . . . . . . . . . . . . . . . . . . . \$2, 483, 535. 83 |  |
| Silver . ................................... $45,842.80$ |  |
| Earnings .... | 6,172.05 |
| Expenditures................................................. | 25, 543.29 |
| Percentage of net expenses to deposits, 0.76584. |  |

## ASSAY OFFICE OF THE UNITED STATES AT CHARLOTTE, N. C.

The worl of this office during the fiscal year ended June 30,1898 , was without important change, embracing assays of gold bullion and of gold and silver ores. The assays of ores appears to be increasing.

The deposits for the fiscal year amounted to $\$ 280,909.36$, against $\$ 239,722.99$ reported during the previous year, being an increase of $\$ 41,186.37$.

Foreign gold coins, containing 6.143 standard ounces, were received. There were no redeposits of gold or silver:

The machinery and apparatus of the office is old and decidedly worn.
No mutilated or worn United States coin was received during the year, and of foreign gold coin (French, German, and British) only 6.145 standard ounces.

The deposits, earnings, and expenditures for the fiscal year were:

| Items. | Amount. |
| :---: | :---: |
| Deposits: | - |
| Gold...................................... \$279, 418.81 |  |
| Silver........................................ 1, 490.55 |  |
| Earnings | 1,199. 72 |
| Expenditures................................................. | 4,730.39 |
| Percentage of net expenses to deposits, 1.25687. |  |

ASSAY OFFICE OF THE UNITED STATES AT ST. LOUIS, MO.
The value of deposits of bullion during the fiscal year ended June 30,1898 , at the assay office at St. Louis aggregated $\$ 107,168.68$, against $\$ 99,195.74$ for the previous fiscal year, an increase of $\$ 7,972.94$.

There was deposited uncurrent domestic gold coin containing 24.723 standard ounces of the coining value of $\$ 459.96$, and 33.252 standard ounces of unrefined gold bullion aud 5.14 standard ounces of uurefined silver bullion from Mexico.

The redeposits of gold bullion were fine bars originally made at the mint at Philadelphia. containing 52.732 standard ounces.

The following table shows the amount of deposits, earnings, and
expenditures, also the percentage of net expenses to deposits, during the fiscal year 1898:

| Items. | Amount. |
| :---: | :---: |
| Deposits: |  |
| Gold . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . \$105, 960.98 |  |
| Silver . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 1,207. 70 |  |
| Earnings... | 641.69 |
| Expenditures | 4,348.83 |
| Percentage of net expenses to deposits, 3.45916. |  |

## THE ASSAY OFFICE OF THE UNITED STATES AT DEADWOOD, S. DAK.

The establishment of the assay office at Deadwood, S. Dak., was under the act of February 19, 1897, when arrangements were made for renting of a suitable building for such purpose and providing the same with necessary furnaces, tixtures, and apparatus. The office, however, was not opened for business until April 20, 1898, from which time until the end of the fiscal year 1898 deposits of gold and silver bullion mined in South Dakota were made at that office amounting to $\$ 28,502$.

The deposits, earnings, and expenditures were as follows:

| Items. | Amount. |
| :---: | :---: |
| Deposits: | \$28, 502.00 |
| Gold. . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . $\$$ \$28, 223.05 |  |
| Silver............................................ 27.1 |  |
| Earnings . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . | 99.97 |
| Expenditures .......................................................... | 14,836. 36 |
| Percentage of net expenses to deposits, 51.70300. |  |

There were forty-six deposits of gold bullion at this office from its opening, April 20 , to the close of the fiscal year, June 30, 1898, whose aggregated value amounted to $\$ 28,502$.

These deposits were principally small "retorts" and "placer" dust from South Dakota. There were no deposits of mutilated or uncurrent coins during the fiscal year.
The assayer in charge says:
The extremely short time that the office was in operation previous to June 30 can urnish but a very inadequate idea of what the institution is doing at present or what it will do in the future. In this connection I may say that the deposits of this office have been steadily increasing since its establishment, and that this increase is particularly noticeable since July.
Several of the many gold and silver extraction works which have been in contemplation for a long period have now been practically completed, and it is presumed that their bullion will be deposited at this office. In view of this fact, as well as that the supply of placer gold will probably be much greater next year than has been the case this season, when the scarcity of water rendered the working of many usually profitable claims an impossibility, I think it is not too much to say that, with the close of the next fiscal year, the ratio of earnings to expenditures will at least approximate that of the other offices.

## ASSAY OFFICE OF THE UNITED STATES AT SEATTLE.

Au important institution has been added to the miut service of the United States during the past year by the act of May 21, 1898, which is as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is hereby authorized and required to establish an assay office of the United States at Seattle, in the State of Washington, said assay office to be conducted under the provisions of the act entitled "An act revising and amending the laws relating to the mints and assay offices aud the coinage of the United States," approved February twelfih, eighteen hundred and seventythree; that the officers of the assay office shall be an assayer in charge, at a salary of two thousand five hundred dollars per annum, who shall also perform the duties of melter; chief clerk, at a salary of one thousand five hundred dollars per annum. And the Secretary of the Treasury is hereby authorized to rent a suitable building for the use of such assay office; and there is hereby appropriated the sum of twenty thousand dollars for salary of assayer in charge, chief clerk, and wages of workmen, rent, and contingent expenses.
Mr. F. A. Wing was appointed assayer in charge by the President, and took the oath of office on the 23d of June, 1898. Immediate steps were taken to procure a building, provide the necessary equipment and supplies, and open the office in time to receive the tirst shipments of gold bullion expected from the Klondike. The first deposit was made on the 15 th day of July, and the deposits from that date to the present writing, November 1, are as follows:

Deposits of Gold and Silver Bullion at the United States Assay Office at Seattle, July 15 to November 1, 1898.

While the bulk of the receipts of this office will come to it during the season of the year when the Yukon River is open, it is expected that a considerable amount will be deposited there in the other months of the year.

Of the $\$ 20,000$ appropriated for this institution, $\$ 8,785.86$ were expended for its equipment. The expenditures for the next fiscal year are estimated at $\$ 31,000$, leaving an amount insufficieut for support during the balance of the year. This office promises to be a very active and important one, its receipts thus far greatly exceeding the expectations of the Bureau, and it is elsewhere recommended that ground be procured and a proper building erected by the United States for its occupancy.

## RECOINAGE OF STANDARD SILVER DOLLARS.

No mutilated or uncurrent standard silver dollars were transferred from the Treasury to the mints for recoinage during the fiscal year 1898. There were, however, purchased as bnllion by the mints at Philadelphia and New Orleans 260 mutilated silver dollars which were for use in the manufacture of subsidiary silver coins.

The total number of mutilated and uncurrent silver dollars received and melted at the mints and at the assay office at New York from 1883 to the close of the fiscal year 1898 is shown in the following statement:

| Fiscal years. | Amount. | Fiscal years. | Amount. |
| :---: | :---: | :---: | :---: |
| 1883. | \$621 | 1892. | \$42,881 |

a The wastage by the coiner at the Philadelphia mint is computed only on the operations from July 1,1897 , to February 28,1898 , gold $723,529.540$ standard ounces; silver, 11,119,609.19 standard ounces at the transfer and settlement of the coiner's accounts February 28, 1898. There was no settlentent of the coiner's account June 30; 1898.

## QUANTITY OF METAL OPERATED UPON, WASTAGE, AND LOSS, FISCAL

 YEAR 1898.In quantity the precious metals operated upon in the different departments of the mints and assay offices during the fiscal year ended-June 30,1898 , exceeded 690 tons of gold and 2,350 tons of silver.

The value of the precious metals wasted in the metalurgical and mechanical departments was $\$ 16,423.74$. A loss of $\$ 15,866.62$ occurred from the difference between the assay value of bullion contained in sweeps and leady melts sold and the amountreceived for the same.

The wastages and losses aggregated \$32,290.36. Against these losses there were gaius arising from the operations on bullion as follows:

Gains arising from Bullion Operations, 1897 and 1898.

| Character of gains. | Fiscal year 1897. | $\begin{gathered} \text { Fiscal year } \\ 1898 . \end{gathered}$ |
| :---: | :---: | :---: |
| Surplas bullion returned by the operative officers... | \$47, 243. 16 | \$53,024. 28 |
| Precious metals recovered in gains and s weeps.. | 13, 244. 92 | 8,726.65 |
| Gain on bullion shipped from the minor offices to the mint for coinage $\qquad$ | 5,874.37 | 6,675.30 |
| Total gains | 66,362. 45 | $68,426.23$ |

Deducting the value of the total operative wastage, and loss on sale of sweeps from the iucidental gains ou bullion, there was a net gain in the operations of the mints during the fiscal year of $\$ 36,135.87$.

## SUMMARY OF THE WORK OF THE MINOR ASSAY OFFICES, 1898.

The following table of deposits, earnings, and expenditures, with the percentage of net expenditures to deposits and the manufacture of unparted bars, summarize the work of the minor assay offices, including the mint at Denver, during the fiscal year 1898:

Deposits, Earnings, and Expenditures, with Percentage of Net Expenses to Deposits.

| Institutions. | .Deposits. | Earnings. | Expendi. tures. | Percentage of net expenses to deposits. |
| :---: | :---: | :---: | :---: | :---: |
| Denver | \$16, 279, 973.20 | \$17, 319.57 | \$37, 270. 36 | 0.12254 |

| Total | 20, 452, 097.73 | 139, 311. 04 |

SUMMARY OF OPERATIONS OF MINTS AND ASSAY OFFICES.
The precious metals received at the mints and assay offices during the iscal year 1898 were valued at $\$ 215,566,262$, against $\$ 138,830,523$, the amount reported the previous fiscal year.

## METALLURGICAL OPERATIONS, 1897 AND 1898.

The operations of the melting and refining departments of the coinage mints and the assay office at New York for 1897 and 1898, as far as the value of the metals treated is concerned, are exhibited in the following table:

Bullion Operations of the Melting Defartments, 1897 and 1898.

MECHANICAL OPERATIONS, 1897 AND 1898.
The operations of the coining branches of the mints during the fiscal years 1897 and 1898 in the manufacture of fivished coin from ingots prepared by the melting departments were, in value of the metals operated upon, as follows:

Bullion Operations of the Coining Departments, 1897 and 1898.

WORK OF THE MINOR ASSAY OFFICES, 1897 AND 1898.
The work of the minor assay offices at Helena, Mont.; Boise, Idaho; Charlotte, N. C.; St. Louis, Mo., and Deadwood, S. Dak.; and of the mint at Denver, Colo., which consists in the receipt and assaying of deposits and the manufacture of unparted bars of gold and silver during. the fiscal years 1897 and 1898, was as follows:

Operations of Minor Assay Offices, 1897 and 1898.

| Metals. | Fiscal year 1897. |  | Fiscal year 1898. |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Standard ounces. | Coining value. | Standard ounces. | Coining value. |
| Gold. | 574, 226 | \$10, 683, 274 | 1,099,353 | \$20, 453,079 |
| Silver. | 98,793 | 114, 958 | 119,721 | 139,312 |
| Total ...... |  | 10,798, 232 | - $\cdot$ | 20,592,391 |

## OPERATIONS OF THE MINT SERVICE, 1897 .AND 1898.

The following table is a summary of the three preceding tables, showing the value of the precious metals operated on at mints and minor assay offices during the fiscal years 1897 and 1898:

Bullion Operated upon in the Melting and Coining Departments of ale the Mints and Assay Offices, 1897 and 1898.

| Metals. | Fiscal year 1897. |  | Fiscal year 1898. |  |

## LEGISLATION RECOMMENDED.

Wastage.—Section 3542 of the Revised Statutes of the United States limits the amount allowed for wastage by the operative officers in the mint service, in the case of the melter and refiner, to one-thousandth part of the gold and two thousandths part of the silver, and in the case of the coiner, to one-half thousandth part of the gold and onethousandth part of the silver, delivered to each.

The experience of the service has demonstrated that one-half of this allowance would be ample to cover the necessary loss involved in their operations upon these metals. It has previously been suggested that the legal allowance be reduced accordingly, and the recommendation is repeated.

Foreign gold coin.-Whe amount of foreign gold coin deposited at the mints and assay offices during the fiscal year ended June 30, 1898, was $\$ 47,210,078$. Under the law these coins can not be paid out again, but must be melted. If the Secretary of the Treasury were permitted, in
his discretion, to hold these deposits, he could frequently use them to supply the demand for gold for exportation instead of delivering domestic coin or bars. Our own coin frequently goes abroad and remains for years in foreign treasuries and finally returns. There is no reason why every foreign coin received at our mints and assay offices should be imperatively required to be melted.

Increased coinage of subsidiary silver.-The only provision of law now existing by which any increase in the stock of fractional coin in the country can be made is that (Sec. 3545 , Rev. Stat.) authorizing the purchase of the small amount of silver contained in and separated from gold deposits.

The amount of silver thus obtained during the fiscal year ended June 30, 1898, from gold deposits was 184,595.39 fine ounces, which would be sufficient to coin about $\$ 255,000$ of our fractional coin. This is wholly inadequate to meet the actual demand. There has been in the past a large stock of fractional coin in the Treasury, accumulated after the resumption of specie payments. During the period of paper money our stock of silver coin was exported principally to Central and South American countries, where it passed at its face value, but apon the resumption of specie payments and the passage of the act of June 9,1879 , providing for the redemption of fractional silver at its face value, these coins returned in such quantities that with the new coinage executed the fractional silver became redundant and accumulated in the Treasury.

For the last ten years the country has been absorbing that stock at the rate of from $\$ 1,500,000$ to $\$ 2,000,000$ per year, and this year the demand has been exceptionally large. The amount of fractional silver coin held by the Treasury July 1, 1897, was $\$ 16,201,960$; on July 1, $1898, \$ 12,070,690$. This stock has at the present writing, Noveuber 18 , been reduced to $\$ 7,122,506$, much of which is so worn as to be unfit for circulation.

The amount available, distributed among the several subtreasuries, gives but a small stock to each, and some denomivations are exhausted. The Secretary of the Treasury should be authorized to recoin this uncurrent stock, and any such coin which may hereafter accumulate in the Treasury, the difference between its face value and the new coin it will make to be paid out of any moneys in the Treasury not otherwise appropriated. Further provision should be made to add to the stock of fractional coin, and to that end it is suggested that the Secretary of the Treasury be authorized to use any silver bullion now in the Treasury for the coinage of such denominations as may be required from time to time to meet the demand from the different sections of the country.

With an ever-iucreasing population, which will be greatly added to in the near future by the acquisition of additional territory, the demand for fractional coin will be such as to make it essentially necessary that the stock should be increased, as aside from providing for our own population, it is more than probable that in a short period of. time the circulating medium of the Island of Cuba will be composed of the currency of the United States, and absorb a large amount of fractional silver coin.

Discontinuance of the Carson mint and St. Louis assay office.-The total deposits of gold at the Carson mint during the last fiscal year were of the value of only $\$ 530,438.87$. The expense of conducting the institution was $\$ 37,578.41$, in addition to which the Government paid the express charges on the bullion to San Francisco in preference to
conducting coinage operations at Carson with so small a supply. The cost of maintaining the institution was therefore above 7 per cent of the value of the gold handled there. The total product of Nevada in the calendar year 1897 was $\$ 2,976,400$, from which it appears that fourfifths of the product of that state is more conveniently deposited elsewhere than at Carson, and it may be inferred that the remainder might go elsewhere without serious inconvenience to the producer. The deposits now made at Carson could be received and treated at the San Francisco mint without serious inconvenience to the producers. The deposits now made at Carson could be received and treated at the San Francisco mint without increasing the expense of the latter institution to exceed $\$ 1,000$ per year. It is therefore recommended that the mint at Carson be discontinued. If it is considered desirable to continue an assay office there, and the institution can be relieved of the care of the silver dollars now on storage in it, the annual outlay can be reduced to about $\$ 12,000$.
The assay office at St. Louis received during the last fiscal year gold deposits amounting to $\$ 105,960.98$ and in the previous year $\$ 97,938.26$. In each case old jewelry furnished one half of the sum. The office is scarcely of sufficient importance to the mining industry or to the general public to warrant the expense of maintaining it, which, last year, was about $\$ 4,300$. The saving which might be made by abolishing this office and the mint at Carson would meet the new outlay incurred by establishing an assay office at Seattle.
Assay office at Seattle.-This office was established by an act approved May 21,1898 , and immediate steps were taken to open the same as early as practicable.
The office was opened for the receipt of deposits July 15, 1898, and from that date to November 16, 1898, 2,531 deposits of gold bullion of the value of $\$ 5,478,549.75$ were received, melted and assayed, and paid for.

It is probable that the assay office at Seattle will be one of the most important offices in the mint service. It is now located in a rented building without such provision for the safe-keeping of treasure as should be provided where so much value is at times in charge. It is therefore recommended that Congress be requested to provide for the erection of a suitable building, to be supplied with fire and burglarproof vaults for the use of the assay office at Seattle.
Deficiencies in the bullion accounts of the mints at San Francisco, Philadelphia, New Orleans, and Carson.-Attention is respectfully called to the deficits in the bullion accounts of the mints at San Francisco, Philadelphia, New Orleans, and Carson, amọnting in the aggregate to $\$ 530,681.67$.
The items embraced in this sum are not only carried in the accounts of the respective mints, but also in the accounts of the Treasurer of the Onited States as unavailable assets, from which relief should be granted by Congress.

The following is a brief summary of the causes of the deficits at the respective mints:

Mint at San Francisco.-The first item of shortage in the bullion accounts of this mint occurred in 1856, upon the settlement of the accounts of A. Haraszthy, melter and refiner, when it was found that in his gold operations the wastage was $\$ 150,550.70$ in excess of the legal limit of allowance, and in his silver operations $\$ 1,776.33$, making a total wastage of $\$ 152,327.03$ in excess of the legal allowance. Suit was instituted against Haraszthy and his șureties for thè recovery of
the amount ( $\$ 152,327.03$ ) of wastage over the legal allowance, and judgment given for the defendant. It was alleged on the trial that the chimney flue of the refinery as constructed by the Government was defective, permitting gold to escape by volatilization in undue quantity, and also that the assayer upon whose reports the value of the bullion delivered to the melter and refiner was determined was of unsound mind and his assays were not reliable, $\$ 152,327.03$.

The second item arises from a difference between entries made on the books of the coiner and the treasurer's cashier, of a delivery of coin, December 9,1865 , the coiner charging the treasurer with $\$ 120,000$ in double eagles, and the cashier crediting the coiner with only $\$ 100,000$. There is little doubt that the coiner delivered to the cashier the amount, $\$ 120,000$, claimed by him, as shortly afterwards it was discovered that the cashier was guilty of the embezzlement of other moneys from the mint and had abscouded. No suit appears to have been brought against either the coiner or the treasurer for the recovery of this sum, $\$ 20,000$.

The third item is a loss in gold in the melter and refiner's accounts in 1867, stated to be due to the fraudulent alteration of the assayer's report by a clerk in the office of the treasurer of the mint in increasing the fineness in gold of certain deposits. The clerk was arrested, tried, and acquitted. No suit was ever instituted against the melter and refiner, Mr. J. M. Eckfeldt, deceased, for the recovery of this loss, $\$ 10,665.28$.

The fourth item is the amount of the net wastage of William Schmolz, coiner, for the fiscal year 1866, and not reimbursed the bullion fund from the appropriation for contingent expenses. As the treasurer of the mint declined to credit or acknowledge the receipt of the $\$ 20,000$ heretofore referred to, the coiner maintained that he was entitled to credit for that sum, $\$ 1,956.21$.

The fifth item, annual assay coins for the years 1865, 1866, and 1867, sent to the mint at Philadelphia for test as to their weight and fineness by the annual assay commission, being expended on the request of the superintendent of the mint at San Francisco in the purchase of supplies for the San Francisco mint, and the coinage accounts not reimbursed by a transfer from the appropriation for Incidental and contingent expenses for this sum, $\$ 21,962.85$.

The sixth item, amounting to $\$ 195,258.81$, arises from the loss on sale of sweeps for a series of years prior to June 30, 1870, and wastage of operative officers, though within the legal limit of allowance. The bullion fund should have been annually reimbursed for these items from the appropriation for incidental and contingent expenses.

The seventh item is the amount claimed by the coiner, William Schmolz, to have been wasted in his gold operations from July 1 to August 14, 1869; disallowed by the accounting officers upon the ground that the wastage claimed was not a bona fide one. No suit appears to have been brought for the recovery of this sum, $\$ 14,317.72$.

The items above enumerated make the total deficit in the bullion accounts of the mint at San Francisco $\$ 416,587.90$.

Mint at Philadelphia.-A deficit of $\$ 13,543.82$ exists in the bullion accounts of the mint at Philadelphia. Of this sum $\$ 12,810.82$ is the balance due on account of $\$ 113,423.85$ in gold bullion embezzled in 1893 by Henry S. Cochran, weigh clerk, not recovered, and the remainder, $\$ 733$, a shortage found on recount in the number of silver dollars stored in the vaults of that institution.

Suit was instituted against the late superintendent, Mr. O. C. Bosbyshell, and the sureties on his bond, for the recovery of the amount of the deficit, and judgment was rendered in favor of the Government for
the balance due on account of gold bullion embezzled, but the decision of the court was adverse to the United States on the loss of 733 silver dollars.

Mr. Bosbyshell has taken an appeal from the decision of the United States district and circuit courts, holding he was responsible for the balance due the Government on account of gold bullion embezzled, to the Supreme Court of the United States, and the case is still pending. A bill has also been introduced into both Houses of Congress for his relief.

Mint at Newo Orleains.-The deficiency of $\$ 25,000$ in the accounts of the mint at New Orleans is due to that amount in currency the cashier, Mr. J. M. Dowling, claimed was destroyed by a fire that occurred in his vault between the closing of the same Saturday afternoon, June 24, and the opening thereof on Monday morning, June 26, 1893.

An expert in the handling of mutilated and charred currency was sent from the office of the Treasurer of the United States to New Orleans to examine the charred currency found in the vault of the cashier, who, after much patient labor, found in the charred paper $\$ 1,182$ in currency which had not been destroyed beyond identification, and which will ultimately reduce the deticit to $\$ 23,818$. The circumstances of the fire were such as to lead to the belief that it was of incendiary origin for the purpose of concealing a shortage in the cashier's accounts, he being the only person having access to the vault. Acting on this belief, he was arrested, indicted, and tried for embezzlement, but, upon trial in the United States district court, acquitted. Suit was also instituted and is still pending against the superintendent, A. W. Smyth, and the sureties on his bond for the recovery of the amount alleged to have been destroyed by fire in the cashier's vault.

Mint at Carson.-A deficiency of $\$ 75,549.75$ exists in the bullion accounts of this institution, due to the embezzlement of that amount in gold bullion from the melter and refiner's department by John T. Jones, while occupying the position of assistant melter and refiner, and James Heney, silver dissolver in the refinery. Both of these persons were arrested, tried, and convicted, being sentenced to undergo imprisonment at hard labor for a term of eight years and to pay a fine of $\$ 5,000$.

The embezzlement of the above-named sum was made at various times between January 1, 1891, and June 1, 1894, and was effected by abstraction and the substitution of base silver bullion containing a small percentage of gold.

Suit has been instituted and is pending against the estate and sureties of E. B. Zabriskie, deceased, who held the position of melter and refiner of the Carson mint during the period the amount above mentioned was embezzled. The recovery of any part of the amount is very doubtful.

It is earnestly desired that Congress be requested to enact such legislation as will relieve the accounts of the Treasurer of the United States and the respective mints of ${ }^{\circ}$ all deficieucies existing in the bullion fund thereof and now carried in the accounts as unavailable assets.

## MONETARY STATISTIOS OF FOREIGN COUN'IRIES.

The statistics of the production and coinage of the precious metals, imports and exports of gold and silver, amount of bank- and Government notes, both covered and uncovered, of the different foreign countries, published annually in the reports of this Bureau, are obtained directly from the governments of such countries by the representatives of the United States accredited to them.

A list of the interrogatories covering the points on which information is sought from the governments of foreign countries is sent yearly to the United States ambassadors and ministers through the Department of State, and the replies in the form of reports are forwarded directly to the Bureau of the Mint.

The interrogatories for 1897 are as follows:

1. What was the amonnt of gold coined during the calendar year 1897, by clenominations and values? What amount of this was recoinage? Domestic and foreign coins glven separately.
2. Same question as to silver.
3. What was the weight of tine gold used in the industrial arts during the calendar gear 18979
4. What amount of this was new gold and what amount old gold \&
5. What was the weight of fine silver used in the industrial arts during the calendar year 1897 ?
6. What amonnt of this was new silver and what amount old silver?
7. What was the import and export of gold during the calendar year 1897 \& (Coin, bullion, and ore, as well as their weight and value, should be given separately, if possible.)
8. Same question as to silver.
9. What was the total import of United States gold coin during the year?
10. What was the total import of gold from the United States direct, in 1897 ?
11. What was the amount of United States gold coin deposited at the mints and melted ?
12. What was the weight expressed in kilograms fine, and the value of the gold produced from the mines of the country during the calendar year 1897 ?
13. Same question as to the gold product of the colonies of the country.
14. What was the weight expressed in kilograms fine, and the value of the silver produced from the mines of the country during the calendar year 1897\%. (In anewering this interrogatory, state whether the value given is commercial or coining value.)
15. Same question as to the silver product of the colonies of the country. (State whether the value given is commercial or coining value.)
16. What were the weight and value of the output of gold from the refineries of the country during the year?
17. Same question as to silver.
18. What, approximately, was the stock of gold coin and bullion in the country at the close of the calendar year 1897?
19. Same question as to sil ver.
20. What was the amount of Government notes outstanding at the end of the year 1897 \%
21. What was the amount of bank notes outstanding at the end of the year $1897 \%$
22. What was the amount of uncovered Government notes at the end of the year 1897 g
23. What was the amount of uncovered bank notes at the end of the year 1897
24. What was the actual currency of the country, gold, silver, or inconvertible paper
25 . Is gold at a premium as compared with the actual currency of the country; and if it is, what was the average premium during the year $1897 \%$
25. What was the average rate of exchange on London during the year $1897 \%$
26. Were any laws passed during the year 1897 affecting the coinage, issue, or legal-tender character of the metallic or paper currency\% If so, please forward copies of the same.
27. Is there a report published on the operations of the mint If so, please forward a copy of the same; also a report of the department of mines for 1897.
It is usual for this Bureau to supplement the information received through our foreign representatives by other statistical data obtained from printed documents, both official and nonofficial.

The replies to the interrogatories, which are given in full in the appendix to this report, are indicated by the numbers of the questions.

In the list of questions propounded to foreign governments for the calendar year 1897 were the following:

What was the total import of United States gold coin during the year?
What was the total import of gold from the United States, direct, in 18979
What was the amount of United States gold coin deposited at the mints and melted?
The following table shows the countries from which answers to these three interrogatories were received, the amount of United States gold
coin imported by them, and the value of the United States gold coin melted at tineir mints:

| Countries. | Imports of United States gold coin. | Total <br> imports of gold from the United States. | United States gold coin melted. |
| :---: | :---: | :---: | :---: |
| Austria Fungary. |  |  | \$6,960, 669 |
| Costa Rica |  | \$465, 432 |  |
| Great Britain. | \$30,854 | 331, 194 |  |
| Germany | 1,175,348 | ], 232, 504 | 7, 892, 263 |
| Japan | 6,670 |  |  |
| Total | 1,212,872 | 2, 029, 130 | $14,852,932$ |

## IMPORTS AND EXPORTS OF THE PRINCIPAL COUNTRIES OF THE WORLD.

The imports and exports of the precious metals of the principal countries of the world during the calendar year 1897 are exhibited in the following table. The information relating to foreign countries was received through representatives of the United States in them:

Imports and Exports of the Precious Metals in the Principal Countries of the Wolldd, 1897.

## INTERNÁTIONAL MONETARY COMMISSION.

## Chapter 376, acts of the Fifty-fourth Congress, is as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That whenever after March fourth, eighteen hundred and ninety-seven, the President of the United States shall determine that the United States should be represented at any international conference called by the United States or any other country with a view to securing by international agreement a fixity of relative value between gold and silver as money by means of a common ratio between these metals, with free mintage at such ratio, he is hereby authorized to appoint five or more commissioners to such international conference; and for compensation of said commissioners and for all reasonable expenses connected therewith, to be approved by the Secretary of State, including the proportion to be paid by the United States of the joint expenses of any such conference, the sum of one hundred thousand dollars, or so much thereof as may be necessary, is hereby appropriated.

Sec. 2. That the President of the United States is hereby authorized, in the name of the Government of the United States, to call, in his discretion, such international conference, to assemble at such point as may be agreed upon. And he is further authorized, if in his judgment the purpose specified in the first section hereof can thus be better attained, to appoint one or more special commissioners or envoys to such of the nations of Europe as he may designate to seek by diplomatic negotiations an international agreement for the purposes specified in the first section hereof. And in case of such appointment so much of the appropriation herein made as shall be necessary shall be available for the proper expenses and compensation of such commissioners or envoys.

SEC. 3. That so much of an act approved March second, eighteen hundred and ninety-five, entitled "An act making appropriations for sundry civil expenses of the Government for the iscal year ending Jone thirtieth, eighteen hundred and ninety-six, and for other purposes," as provided for the appointment of delegates to an international conference and makes an appropriation for their compensation and expenses, be, and the same is hereby, repealed.

Approved, March 3, 1897.
Under this act the President of the United States, on April 14, 1897, appointed the following-named persons as special envoys to France, Germany, Great Britain, and other countries: Edward O. Wolcott, of Colorado; Charles J. Paine, of Massachusetts, and Adlai E. Stevenson, of Illinois. This commission spent six months in Europe on its errand, returning in November, 1897. It was known that there, as well as in this country, an active sentiment in favor of a bimetallic monetary standard existed, and the legislative bodies of Great Britain, France, and Germany had, during, the year previous, recorded a desire to cooperate in an effort to establish such a standard. It seemed therefore, opportune that a conference upon the subject should be had with a view to ascertaining what concerted action might be agreed upon.

The theory that a fixed ratio between gold and silver could be maintained by an international agreement is based upou the assumption, scarcely to be contested, that the monetary use of these metals is a factor in their value. If this is true the concerted exclusion of either one from the mints of all the more important countries of the world would have an influence to depreciate its value. If, then, an agreement should be reached between such nations to coin only at a certain ratio, and one metal should rise even slightly above that ratio, it would pass out of monetary use eutirely. The cessation of that demand upon the dearer metal, the redoubling of it upon the cheaper, would tend to bring them together again.

This is far from saying that the mint stamp fixes the value of the soin, or that relative cost, supply, and demand do not regulate the value of the metals. It is only saying that a larger use is opened to each of these metals by Government coinage than it would be likely to
have as a commodity, and that this employment when given or with. held by concerted action, coupled with the readiness and predisposition of the masses to use them interchangeably, would be an effective influence to hold them together through ordinary variations in production.

A single nation, acting alone, is certain to lose the dearer metal entirely, and retain only the cheaper as its standard. Thus, for any country under present conditions to open its mints to the unrestricted coinage of both gold and silver at 16 to 1 , or any thereabout ratio, would be for it to lose what gold it possessed, because that metal would surely go where it was rated higher. If, however, there was no country in the world where it was legally rated bigher, there would be no place to which it might go for monetary use. "Allowing that the ratio originally agreed to was approximately the market ratio, the valuation thins coinciding with the judgment of the commercial world, there seems every reason to believe that such an international agreement would accomplish its purpose. Furthermore, if it did not, no disastrous conserfuences would follow. Even though one metal should become established in a value above the legal ratio, and become merchandise, the currencies of all countries would retain their fixed relations to each other. No shock or distress would ensue, no nation would be isolated or sacrificed. They would all be together on a common plane, with a common measure of value. These are the considerations which have led many scientific students of finance and sagacious publicists to favor open mints to both metals under an international agreement, although each uuaterably opposed to such a policy by his own country acting alone. Nowhere in Europe is there an important party which favors the opening of the mints of its own country to the unrestricted coinage of both metals, unless the ratio fixed can be protected by a similar valuation at the mints of otber countries. They perfectly comprehend that the value of a metal in one country is affected by its value in other - countries, and they know that no one nation can afford to sever the bond which attaches its monetary system to the staudard by which the bulk of the business of the world is done.

One of the chief ends for which, since 1873, the leading bimetallists of the world have persistently sought au international agreement has been to bring all the world to one standard of value. That end is not merely ignored, but contemptuously abandoned by those who insist that each country should have a standard all its 0 wn , or act without conference and without regard to the policies of other countries. All the forces of commerce, industry, and civilization are moving the nations to more intimate relations with each other, and the demand for a common staudard of value becomes steadily more imperative. Those who advocate monetary anarchy oppose forces that are irresistible. These considerations have been infuential in all monetary conferences that have been held, and prompted the effort made in the United States last year.

Although the efforts of the commission were brought to an end by the refusal of the Government of India to join the movement, it is probable that the failure was indirectly due to a growing feeling that the rapidly increasing product of gold has radically changed the situration from what it was ten years ago, when the gold product seemed to be at a standstill or declining. It has changed to indifference or opposition the attitude of mauy who then feared an appreciating standard but who are quite as much opposed to a depreciating one.

The commission met with cordial cooperation by the Government of France, but failing to obtain expected cooperation from the Government of India, an essential factor in the situation, did not extend its
negotiations beyond Paris and London. The following correspondence between the British Foreign Office, the Treasury, the India Office, and the Indian Government records the reasons which controlled the Indian and British Governments in their final action:

## CORRESPONDENCE RESPECTING PROPOSALS ON CURRENCY.

Mr. Chandler presented the following correspondence respecting the proposals on currency made loy the special envoys from the United States:

No. 1.
Foreign Office to Treasury.

## Foreign Office, July 27, 1897.

SIR: I am directed by the Marquess of Salisbury to inform you that a meeting took place at the foreigu office on the 15th instant, which was attended by his lordship, Mr. Balfour, Sir M. Hicks-Beach, Lord George Hamilton, the French ambassador, the French minister (M. Geoffray), the American ambassador, and Messrs. Wolcott, Paine, and Steveuson.

The following proposals were made by Senator Wolcott:

1. The opening of the Indian mints, and the repeal of the order making the sovereign legal tender in Inclia.
2. The placing of one-fifth of the bullion in the issue department of the Bank of England in silver.
3. (a) The raising of the legal-tender limit of silver to, say, $10 l$.
(b) The issue of 208 . notes based on silver which shall be legal tender.
(c) The retirement, gradual and otherwise, of the 10a. gold pieces, and substitution of paper based on silver.
4. An agreement to coin annually $\quad l$. of silver.

Present silver coinage average for five years, about $1,000,000 l$., less annual withdrawal of worn and defaced coin for recoinage, about $350,000 l$.

Alternative proposal.-4. Agreement to purchase each year $l$. in silver at coinage value.
5. The opening of English mints to the coinage of rupees and of a British dollar, which shall be full tender in Straits Settlements and other silver-standard colonies, and tender in United Kiugdom to the limit of silver legal touder.
6. Action by the colonies and coinage of silver in Egypt.
7. Something laving the general scope of the Huskisson plan.

I am, \&c.,
(Signed) George N. Curzon.

## No. 2. <br> Treasury to India Office.

Treasury Chambers, Augu8t 2, 1897.
SIR : I am directed by the lords commissioners of Her Majesty's treasury to request you to lay before the secretary of state for India in council the inclosed copy of a letter, dated the 27 th ultimo,* which has been received from the foreign office, embodying the currency proposals which have been made to Her Majesty's Government by the special envoys from the United States, and which are supported by the ambassador of France.

- It will be seen that among the proposals is one for reopening the Indian mints to the free coinage of silver, and the repeal of the order making the sovereign legal tender in India. My lords regard this as the most important of the proposals which they are invited to consider. The question which it raises involves serious issues in India, and, before expressing any opinion on it themselves, they will be glad to learn the views of the secretary of state and of the government of India.

I have, \&c.,
(Signed)
E. W. Hamilton.

[^38]No. 3.

## Foreign Office to Treasury.

Fordign Office, August 5, 1897.
SIr: With reference to the letter from this department of the 27th ultimo, I am directed by the Marquess of Salisbury to transmit herewith, to be laid before the lords commissioners of Her Majesty's treasury, copies of printed memoranda of the meetings held at the foreign office on the 12 th and 15 th July, at which the special envoys of the United States submitted the proposals of their Government with regard to currency.

Lord Salisbury would be glad to be favoured with the views of the lords commissioners upon these proposals.

I am, \&c.,
(Signed)
F. H. Villiers.
[Inclosure 1 in No. 3.]
Memorandum of a meeting held at the foreign office on Monday, July 12, 1897.
Present: The Marquess of Salisbury, Her Majesty's prime minister and secretary of state for foreign affairs; the Right Honourable Lord George Hamilton, secretary of state for India; the Right Hononrable Arthur James Balfour, first lord of the treasury; the Right Honourable Sir Michael Hicks-Beach, chancellor of the exchequer; his excellency the Honourable John Hay, ambassador extraordinary and plenipotentiary of the United States; the Honourable Edward O. Wolcott, General Charles J. Paine, the Honourable Adlai E. Stevenson, envoys of the United States on special mission.
Lord Salisbury invited a statement from the representatives of the United States as to the nature of their mission, whereupon Mr. Wolcott, on belalf of the special envoys, recited the essential provisions of the law under which he and his colleagues had been appointed, and explained the objects of their mission. He said also, in substance, that the special en voys had determined that it was important to ascertain, as definitely as possible, in advance of an international binetallic conference, if one should be called, the views of the Governments which might participate therein, and the extent to which they would contribute to bring about a favourable result of such conference.

Mr. Wolcott explained that the special envoys had determined, in the first instance, to ascertain the views of the French, English, and German Governments on the question of reaching an international agreement respecting bimetallism. This determination was based upon the resolutions heretofore passed by the English House of Commons on the 17th March, 1896, by the Prussian Landtag and Herrenhaus on the ' 16 th and 21 st May, 1896, and upon the resolution proposed in the French Chamber of Deputies by M. Méline on the 17th March, 1897, and signed by 347 of his colleagues, all of which resolutions Mr. Wolcott read.

Mr. Wolcott said that the special envoys had proceeded first to France, and that they had reached a complete and satisfactory preliminary understanding with the Government of that country; that in the negotiations to be carried on in England the special envoys believed they would have the full cooperation of the ambassador of the French Republic in London, His Excellency Baron de Courcel; that the French ambassador was, for the moment, absent from England, and that the special enroys of the United States would have asked a postponement of the meeting had it not been for the fact that the French ambassador had requested them to proceed with the meeting in his absence.

Mr. Wolcott then presented some reasons which, in the opinion of the special envoys, rendered it desirable that some international agreement for the restoration of bimetallism should be reached, and explained why, in their opinion, the success of this effort depended upon the attitude which England would take regarding the $O$ question. He then stated that the special envoys requested that England should agree to open English mints as its contribution to an attempt to restore bimetallism by international agreement, and dwelt upon the importance of the fact that France and the United States were together engaged in an attempt to bring about such an agreement and were cooperating together to that end.

Lord Salisbury desired to know if the French Government would cooperate upon the basis of opening their mints to the free and unlimited coinage of silver. Mr. Wolcott answered in the affirmative. Lord Salisbury then asked at what ratio, and was informed log Mr. Wolcott that the French Government preferred the ratio of $15 \frac{1}{2}$ to 1 , and that the United States were inclined to yield this point and accept this as a proper ratio. Considerable discussion on the question of the ratio and the method by which it should be settled then took place, the special envoys taking the ground
that the countries which opened their mints should among themselves determine the ratio. The chancellor of the exchequer suggested that if Indian mints were to be opened England might be held to be interested in the ratio, but the special envops did not accede to this view, and called attention to the fact that by opening Indian mints the English Government did not thereloy adopt bimetallism in any form.
It was then suggested that further proceedings should be deferred until the French ambassador might be also present.
The chancellor of the exchequer, in fürther conversation, said that if the suggestion of opening the English mints was to be made he thought an answer in the negative would undoubtedly be given. The first lord of the treasury asked whetber, assuming this request for opening English mints to be refused, it was desired that the subject be discussed upon the basis of something different and less than the opening of English mints.
Upon a mutual understanding that in the absence of the French ambassador anything said should be considered as said informally, a discussion then took place as to the concessions that England might make towards an international solution of the question if it should refuse to open English mints.
Mr. Wolcott, for the special envoys, presented the following as a list of contributions, which, among others, England miglt make towards bimetallism if an international agreement could be effected:

1. Opening of the Indian mints.

Repeal of the order making the sovereign legal tender in India.
2. Placing one-fifth of the bullion in the issue department of the Bank of England in silver.
3. (a) Raising the legal-tender limit of silver to, say, $10 l$.
-
(b) Issuing the 208 . notes based on silver, which shall be legal tender.
(c) Retirement, gradual or otherwise, of the 108 . gold pieces, and substitution of paper based on silver.
4. Agreement to coin annually $l$. of silver [present silver coinage average for five years about $1,000,000 l$., less annual withdrawal of worn and defaced coin for recoinage, $350,000 l$.].
5. Opening of English mints to coinage of rupees, and for coinage of British dollar, which shall be full tender in Straits Settlements and other silver-standard colonies, and tender in the United Kingdom to the limit of silver legal tender.
6. Colonial action and coinage of silver in Egypt.
7. Something having the general scope of the Huskisson plan.

Some general conversation followed in regard to the preceding suggestions, and the interview terminated, to be resumed on the 15th July, 1897, when it was understood that the French ambassador would also be present.

## [Inclosure 2 in No. 3.]

Memorandum of a meeting held at the foreign office on Thursday, July 15, 1897.
Present: 'The Marquess of Salisbury, Her Majesty's prime minister and secretary of state for foreign affairs; the Right Honourable Lord George Hamilton, secretary of state for India; the Right Honourable Arthur James Balfour, first lord of the treasury; the Right Honourable Sir Michael Hicks Beach, chancellor of the exchequer; His Excellency the Baron de Courcel, ambassador of the French Republic; M. L. Geoffray, French minister plenipotentiary; His Excellency the Honourable John Hay, ambassador extraordinary and plenipotentiary of the United States; the Honourable Edward O. Wolcott, General Charles J. Paine, the Honourable Adlai E. Stevenson, envoys of the United States on special mission.
The French ambassador was invited to declare the position of the French Government upon the question under consideration, and said in substance the following:

Senator Wolcott having asked me to state precisely the point of view of the French Government in the question which engages us, I shall attempt, despite my slight personal competence, to make clear the consideratious which have led my Government to associate itself in the actual negotiation.

I should first of all recall the fact that the French monetary system, as it was established at the end of the last century and at the leginning of the present century, is based upon the simultaneous employment of gold and silver, of which the legal ratio has been fixed at $15 \frac{1}{2}$. This ratio has not been arbitrarily conceived. The men of great scientific worth, who recommended it to the adoption of the legislative power, had madelong and careful preliminary investigations, and they reached the conclusion that the figure of $15 \frac{1}{\text { represented the average and, in some degree, }}$ normal and natural ratio of the value of the two precious metals, such as resulted
from universal use from an early period-that is to say, almost since the epoch of the discovery of America and the great economic renaissance of the sixteenth century.

The legal system established in France upon this basis has operated for a long time in a manner fully satisfactory to the French nation. But for about twenty years this system has been disturbed by different causes, which I will not attempt to enumerate here, because I should be afraid of doing it in an incomplete or insufficiently exact manner.

One of these causes is doubtless the superabundant production of silver. However that may be, a disturbance has been produced, the former normal ratio of the value of gold and silver has been put in question, and there has resulted therefrom au unrest almost universal. This unrest has been more or less profoundly felt by the different nations. Perhaps England is less sensitive thereto than we are in France; but I am persuaded that she does not escape it, at least if the position of the British Empire in its entirety is considered-with all its dependencies-notably that very considerable dependency, India.

Even in England it is incontestable that the agricultural classes complain of the depreciation of silver, and that more and more numerons voices demand that a remedy be applied to a monetary situation actually inadequate.

In France we have been led to fight the evil by the closing of our mints to the silver metal-that is to say, by the temporary suspension of the coivage of silver. But this measure is only a palliative, and it is itself the symptom of a disturbed situation. We cease, in fact, to coin a money of which we do not cease to have need; and which has preserved its entire legal value. This paradox naturally does harm; our population, notably the agricultural population, finds that it has not at its disposition sufficient resources in currency, in metallic money. On the other hand, if the Government in the actual state of affairs reopens the mints to the free coinage of silver, we would be flooded by the abundance of this metal coming from all other countries of the world, and we could not resist the even greater evil of the inevitable depreciation of one of our precious metals-that is to say, of the effective destruction of the legal ratio upon which our monetary system is based.

We are persuaded that the state of affairs which has cansed among us this very disadvantageous perturbation is in itself a temporary remedial phenomenon', and that it is only a question of remerlying it by temporary measures, which will permit us, and which will permit the entire world with us, to attain the epoch of a reestablishment of a normal exchange. In other words, we think that the production of silver, more active in certain quarters of the globe in the last quarter of a century, is not of itself considerable enough to change in an enduring manner the normal ratio between gold and silver after these two metals will have been scattered over the entire surface of the world anong all nations who are called upon to absorb them.

There is, then, in our eyes, a need which is perhaps transitory, but which is actually common to all the commercial nations, of taking measures adequate for assuring, by a common understanding, the reestablishment of the normal ratio of $15 \frac{1}{2}$ between silver and gold.

If measures of this kind should be adopted by all the commercial nations, we would be able to reopen our mints to the free coinage of silver without fear of being submerged by an excessive influx of this metal.

The reopening of the mints of all the commercial countries to the free coinage of silver in the ratio of $15 \frac{1}{2}$ with gold would be the most natural and the most efficacious means of arriving at the result sought for. This is the desideratum which I am instructed to bring forward here, and which I am particularly to urge upon the English Government as a primordial condition of the success of the common understanding.

If the Government of the Queen, even in consenting to reopen the mints in India, should refuse to adopt the same measure for England, at least would they not be able to take certain measures which would be, up to a certain point, equivalent, in order to maintain the full valuè of silver and to prevent India from being the victim of a depreciation of this metal in consequence of an unlimited coinage it is not within the province of representatives of France to search out or to formulate these equivalent measures which it is in the interest of England itself to take, and the choice of which should belong to it. But in default of measures of this kind, which should be really sufficient to contribute to the maintenance of the norminal value of silver, the French Government would not consider the reopening of the mints of India alone as a guarantee sufficient to permit them to reopen the French mints to the free coinage of silver.

By way of suggestion, I would indicate, as one of the measures which the English Government might usefully adopt, the annual purchase of a certain quantity of silver metal, which might afterwards be disposed of as seemed best-either it might be preserved in ingots, or it might be used for regular consumption, or it night be sent to India. This-quantity might be fixed approximately, at least, for a number of
years, at á sum of $10,000,000 \mathrm{l}$. in nominal value. This is, perhaps, only a palliative; it is, in any event, only one of the expedients which would be deemed necessary. But I am to urge strongly that the English Government determine to take measures of this kind, or other equivalent measures, if, as I believe, it recognizes with us the necessity of improving the monetary situation in a great part of its Empire-I may say, in a great part of the entire world.

Lord Salisbary then asked whether the French Government would decline to open its mints unless England would also open her mints. The French ambassador replied that he preferred to discuss the subject upon the basis that France would go to open mints if England would consent to open her mints, but that he would not exclude from his view the question of contributions by Englaud towards maintaining the value of silver short of open mints. The chancellor of the exchequer, in response to this, stated definitely that the English Government would not agree to open English mints to the unlimited coinage of silver, and that, whatever views he and his colleagues might separately hold on the question of bimetallism, he thought he could say they were united upon this point.
The Freuch ambassador, upon being asked what contributions he suggested, replied that among other contributions he thought England should open her Indian mints and should also agree to purchase annually, say, 10,000,000l. of silver for a series of years.
The suggestions made by the special envoys at the interview on the 12th July were again read, and the special envoys accepted also as important and desirable the proposal that the English Government should purchase annually, say, $10,000,000 l$. of silver, with proper safegnards and provisions as to the place and manner of its use.

The French ambassador expressed his approval generally of the suggestions of the special envoys as being serviceable in the consideration of the question. It was then understood that the proposals submitted by the French ambassador and by the special envoys of the United States should be considered, and due notice given when a reply could be made.
Lord Salisbury requested Mr. Wolcott to prepare a résume of the proceedings of this and the preceding meeting.

No. 4.

## India Office to Government of India.

## India Office, August 5, 1897.

My Lord: Your excellency is aware that special envoys from the United States and the ambassador of France have had interviews with members of Her Majesty's Government in order to discuss the subject of currency reform, in which the Governments of both those countries are at present much interested.
2. The result of those discussions is that Her Majesty's Government have been asked whether, on certain conditions, the question of reopening the Indian mints, which hare been closed since 1893, would be taken into consideration.
3. Her Majesty's Government understand that the Governments of France and of the United States desire to open their mints to the free coinage of silver, as well as of gold, such silver to be made legal tender to an unlimited amount at a ratio of $15 \frac{1}{2}$ of silver to 1 of gold, provided that they are satisfied they would receive such assistance from other powers in increasing the demand for silver as would, in their opinion, justify them in such a policy. They propose to summon an international conference to deal with the matter if they are led to believe, by the preliminary iuquiry which they are now undertaking, that such a conference would arrive at any satisfactory result; and they ask whether, if their mints were opened as snggested, your excellency's Government would undertake to reopen concurrently tbe Indian mints to the free coinage of silver and to repeal the order which made the sovereign legal tender in India. It would, in this case, be clearly understood that no action shall be taken by you until you are satisfied that the intentions and undertakings of the two Governments will undonbtedly be carried into effect.
4. Her Majesty's Government have replied that they will consult your excellency's Government upon these proposals, and I invite you accordingly to give them your most careful consideration.
5. It is argued that, on the one hand, very great advantages would be gained for India under an arrangement which could not fail to have the effect of raising materially the gold value of silver, and consequently of the rupee, and which, if it were maintained, would give a good prospect of a more stable ratio, when once the first disturbance was over, than has been known for many years. In that case the heavy
loss which is now sustained both by your Government and by all individuals who depend upon a silver currency for the payment of liabilities contracted in gold would; in all likelihood, disappear; and holders of rupee valıes would benefit greatly by the increased command of sterling values which such a change would necessarily give them.
6. The present system, however great may be the benefits which it has conferred, may appear to be one of artificial and arbitrary restriction, which is thought by some to have an injurious effect on the course of trade, and the fact of its removal would have the advantage of leaving the expansion and contraction of the currency to the natural forces of the market. I believe, moreover, that your excellency will agree with me in thinking that the maintenance of the exchange value of the rupee at a point considerably above the intrinsic value of the silver which it contains is not without inconvenience, and that a policy which, without lowering exchange, would restore the rupee to a value practically unmodified by mint regulations, has much to recommend it.
7. On the other hand, there are certain objections which will readily occur to your excellency, such as the disturbance and dislocation of trade which might, perhaps, follow a great alteration in the rate of exchange and the possibility, however remote, that the value of the rupee, as measured in commodities in India, would be so far enhanced as to cause discontent by increasing seriously the amount payable as taxation.
8. A more serious question in my opinion, is whether the combination of only two Governments, even though the countries which they represent are as important financially as France and the United States, is sufficient to give such a reasonable promise of stability and permanence to an arrangement of this nature as would justify India in facing the undeniable risks and inconveniences attaching to such a change in her system of currency. No doubt, however, the conclusions to be formed on this aspect of the question must in part depend on the terms of the arrangement made between the Governments concerned.
9. In conclusion, I will remind your excellency that in 1892 the policy of closing the mints was only recommended by your excellency's predecessor in council on the ground that an international arrangement similar to that which is now contemplated was not then obtainable. This is clearly stated in the letters of Lord Lansdowne's government, dated the 23rd March and 21st June, 1892, and I shall we glad to learn whether your excellency sees any reason to modify the views therein expressed; and, if so, on what grounds.
10. The question involves issues of such magnitude that I can not ask jour excellency to reply to this despatch without taking such time as you may require for full deliberation and confidential discussion. As, bowever, it is important that Her Majesty's Government should, as soon as possible, be in a position to give an answer to the French and American representatives, I trust that you will at once undertake the consideration of the matter and that you will let me know your views without any unnecessary delay.

I have, \&c.,

George Hamilton.

No. 5.
India Office to Treasuvy.
India Office, October 13, 1897.
SIR: I am directed by the secretary of state for India in council to forward, for the information of the lords commissioners of the treasury, the inclosed copies of a correspondence which has taken place between his lordship and the government of India on the subject of the currency proposals of France and the United States.
2. It will be observed that on the 5th August Lord George Hamilton invited the government of India to give their most careful consideration to these proposals, which were to the effect that the Governments of the United States and France should open their mints to the free coinage of silver, as well as of gold, such silver to be made legal tender to an unlimited amount at the ratio of $15 \frac{1}{2}$ of silver to 1 of gold, provided that those Governments were satisfied they would receive such assistance from other powers in increasing the demand for silver as would, in their opinion, justify them in such a policy. They proposed to summon an international conference to deal with the matter if they were led to believe, by the preliminary inquiry which they were undertaking, that such a conference would arrive at any satisfactory result, and they asked whether, if their mints were opened as suggested, the government of India would undertake to reopen concurrently the Indian mints to the free coinage of silver and to repeal the order which made the sovereign legal tender in India.
3. To this despatch the goverument of India have replied in a letter, dated the 16 th September, in which, as will be seen, they recommend the rejection of these proposals, for reasons which they state at considerable length.*
4. The government of India have, in consideration of this question, the advantage which local knowledge and daily experience of the working of the present currency system can not fail to give. It is upon them, moreover, that the duty of carrying out the proposed change would necessarily fall; and they would have an interest in its success or failure with which that of no other Government or public body can for a moment be compared. In these circumstances the secretary of state in council feels that, apart from all other considerations, he could not act in opposition to the strongly expressed views of the government of India unless he were convinced that the proposed scheme is intrinsically sound and that it would confer real and lasting advantages upon the government and people of India.
5. After most careful consideration Lord George Hamilton has arrived at the conclusion that the scheme does not fulfill those conditions and that the criticisms of the government of India upon it are in the main well founded. Those criticisms are so clearly and fully stated in the inclosed letter that he does not feel it necessary to. recapitulate or enlarge upon them. There are, however, one or two of their arguments in which he desires more especially to express his concurrence.
6. The first of these relates to the question of the ratio between gold and silver to be adopted in the proposed international agreement. The difference in the market value of the two metals is in the proportion of about 35 to 1 , whereas the ratio proposed is $15 \frac{1}{2}$ to 1 ; and his lordship can not avoid the conclusion that the adoption of a ratio differing so widely from that which actually obtains between the two metals at the present time constitutes in itself a most serious, if not insuperable, objection to the proposals under consideration.
7. Lord George Hamilton is also in agreement with the goverument of India as to the grave results which any failure of the suggested arrangement would entail upon India. He belieres that, owing to the special circumstances of that couutry and the peculiar nature of the obligations of its government, those results would be far more disastrous than any which would, in the event of such a failure, be incurred by France and the United States; and he would therefore be unable to consent on the part of India to the proposed experiment unless he were thoroughly convinced that its effects would be not only advantageous, but durable.
8. On this point, he regrets to say, he can not profess to be satisfied. Without discussing in detail the reasons which have led the government of India to conclude that the proposed system could not. be regarded as secure, he considers that, taken together, they show that it contains elements of uncertainty and danger which he does not think that the government of India should be called upon to face in disregard of their own strong conviction as to the peril of the course they are asked to pursue.
9. It has not been suggested, nor is it part of the proposed agreement, that France and the United States should, if the arrangement failed to maintain the desired ratio between gold and silver, become monometallic silver-using countries, nor is it easy to see, even if such an undertaking were offered, how it would be made effective under certain conceivable contingencies. Yet, in the absence of any such safeguard, India has strong reasons for declining to adopt a policy which might end in placiug her in the position of a country having a monometallic currency heavily depreciated, and yet unassisted, or at best only slightly assisted, by the currency requirements of the countries upon whose invitation she had taken such action.
10. Lord George Hamilton desires me to say that he is fully conscious of the fact that these proposals, if they were adopted, might have an effect extending far beyond the boundaries of Her Majesty's Indian dominions, with which he is principally concerned. But he does not think it necessary to discuss the subject from that point of view, or to consider whether, or upon what conditions, it would now be desirable to substitute an international agreement such as was contemplated by the government of India in 1892 for the policy which was adopted in 1893. He can only deal with the particular proposals now before him; and, as regards these proposals, he has been unable to avoid the conclusion that they do not satisfy the conditions necessary to justify such a change of policy as has been suggested to him.
11. The secretary of state in council must therefore record his concurrence in the request of the government of India that Her Majesty's Government will not assent to the undertaking desired by France and the United States.

I have, \&c.,
(Signed)
Arthur Godley.
[Inclosure 1 in No. 5.]
India office to government of India, August 5, 1887.
[See No. 4.]
[Inclosure 2 in No. 5.]
Government of India to India office.
Simla, September 16, 1897.
My Lord: We have the honour to acknowledge receipt of your lordsbip's despatch of the 5th of August last, asking for onr opiuion whether the Iudian mints may be reopened to silver as part of a contemplated arrangement under which France and the United States of America will open their mints to silver as well as gold.

The present currency systems of the three countries may be thus described: France and the United States both have a gold standard; their mints are open to gold and closed to silver, but gold and silver coins are alike legal tender to an unlimited amount in both countries, at a ratio of $15 \frac{1}{2}$ to 1 in the former and of 16 to 1 in the latter. The currency system of India is in a transition state; the government of India in 1893 decided to establish a gold standard, and the first step towards that object was the closing of the mints to silver by Act VIII of 1893. The silver rupee is still the sole legal-tender coin, though the government has by executive orders undertaken to receive gold and sovereigns under certain restrictions set forth in Notifications Nos. 2662 and 2663 of the 26th June, 1893, the rate of exchange adopted being 16d. the rupee or 15 rupees $=1 l$. The measures to be taken when the transition period has passed have not been laid down, but it is probable that the Indian mints will be opened to gold, and gold coins will be made legal tender to an unlimited amount; silver rapees would also continue to be legal teucler to an unlimited amount, and the ratio between the rupee and the gold coins as legal tender would at the same time be finally settled. The system towards which India is moving is thus a gold standard of the same kind as that which now exists in France and the United States, but with a different ratio for legal tender; hut for the present the mints are closed both to gold and silver. The transition period has lasted for more thau four years, but there is ground for hope that it is now drawing to a close.

The changes which are involved in the arrangements proposed to Her Majesty's Government are the following: France and the Unitecl States are to open their mints to the free coinage of silver, continuing the free coinage of gold and the unlimited legal tender of coins of both metals, the ratio remaining unchanged in France and being altered to the French ratio of $15 \frac{1}{z}$ to 1 in the United States. India is to open her mints to silver, to keep them closed to gold, and to undertake not to make gold legal tender. France and the United States would thus be bimetallic; India would be monometallic (silver); while most of the otheri important countries of the world would be monometallic (gold).

The object which the proposers have in view is the establishment of a stable relation between the values of gold and of silver. This would include the estahlishment of a stable exchange between the rupee and sterling currency, which was the object of the government of India in the proposals made in our financial despatch of the 21st June, 1892, which proposals ultimately resulted in the adoption, in view to the attainment of that object, of the policy of a gold standard, and in the closing of the mints to the free coinage of silver. If, then, it were certain that the suggested measures would result in the establishmentof a stable ratio, the governmentof India might well consider whether their adoption would not be preferable to the policy to which they committed themselvesin 1893 in the hope of attaining the same result by isolated action on the part of India alone. The principal questions, therefore, for us to consider are whether the measures are more likely to succeed than the policy of 1893, and what consequences to India may be apprehended if the measures should fail of success after being brought into operation. From this point of view we propose to discuss the effect on trade and industry and on our own revenues, of the changes when made, and of the failure of the arrangement if it shonld fail, the chances of success, and the risks of failure.

The first result of the suggested measures, if they even temporarily succeed in their object, would be an intense disturbance of Indian trade and industry by the sudden rise in the rate of exchange, which, if the ratio adopted were $15 \frac{1}{2}$ to 1 , would be a rise from about $16 d$. to about $23 d$. the rupee. Such a rise is enough to kill our export trade, for the time at least. If the public were not convinced that the arrangement would have the effect intended, or believed that it would not be permanent, the paralysis of trade and industry would be prolonged and accompanied by acute individual suffering, none of the advantages expected would be attained, and the country would pass through a critical period which would retard its progress
for years. How long the crisis wonld last before normal or stable conditions were restored it is not possible to conjecture. It would be long even if the mercantile and banking community saw that silver was being steadily naintained at the prescribed ratio, while any indication of unsteadiness would greatly prolong the period by giving foundation for doubt. If the doubt should happen to be justified by the results, the position would be disastrous alike to the State, to individuals, and to trade generally. The exchange value of the rupee having risen suddenly, without any intermediate steps, from 16d. to some higher figure, it would fall quite as suddenly to a point far lower than its present level, probably to 9 ., or even lower. Such a fall would, apart from other disastrous results, necessitate the imposition of additional taxation to the extent of many crores.

We may here remind your lordship that such an agreement as is proposed is an infinitely more serious question for India than for either of the other two countries, for it seems clear that practically the whole risk of disaster from failure would fall on India alone. What wont happen in each of the three countries if the agreement broke down and came to an end? France possesses a large stock of gold, and the United States are at present in much the same situation as France, thongh the stock of that metal is not so large. It may be admitted that if no precautions were taken these gold reserves might disappear under the operation of the agreement, and in that case, if the experiment ultimately failed, the two countries concerned would suffer great loss. But it is inconceivable that precautions would not be taken, at all events so soou as the danger of the depletion of the gold reserves manifested itself, and therefore it is probable that no particular change would take place in the monetary system of France or the United States, the only effect of the agreement being a coinage of silver which would terminate with the termination of the agreement. Thus the whole cost of the failure, if the experiment should fail, would be borne by India. Here the rupee would rise with great swiftness; it would keep steady for a time, and then, when the collapse cane, it would fall headlong. What course could we then adopt to prevent the tluctuation of the exchange value of our staudard of value with the fluctuations in the price of silver? We do not think that any remedy would be open to us, for if the Indian mints were reopened to silver now, it would, in our opinion, be practically impossible for the government of India ever to close them again, and even it they were closed it would only be after very large additions had been made to the amount of silver in circulation.

There is anotber important consideration in which India is affected in a manner different from France and the United States. The effect of the scheme will probably be an incre ise in gold prices (that is, in the prices current in France andin the United States) and a fall in silver prices (thatis, in the prices current in India). This is not the place in which to discuss the economic effects of a rise or fall in prices, a matter in respect of which there may be difference of opinion. But we presume that France and the United States contemplate with equanimity the possible effects of the change of prices upon their trade and production generally, while it is manifestly impossible for us, affected as we are in the opposite direction, to take the same view.

Moreover, it seems to us somewhat unfair to expect that India should, after its struggles and difficulties of the last decade, cousider itself on the same plane in the discussion of these projects as France and the United States. India has, since 1893, passed through a period of serious tension and embarrassment alike to trade and to the government. We are satisfied that, great as have been the troubles which have attended this period of transition, the attainment in the end of the paramount object of stability in exchange is worth more than all the sacrifices made. We believe that our difficnlties are now nearly over, and that we shall, in the near future, succeed in establishing a stable exchange at $16 d$. the rupee by continuing the policy initiated in 1893.
The United States are possibly, in part at least, inspired in making these proposals by the idea that they may have before them some of the difficulties and dangers which we have experienced. We need not say that, if our way was clear before us, the consideration that another and a frieudly nation would derive beuefit from the course adopted by us would present itself to our minds as a good reason for the adoption of a course of action which would have that result. But the case is quite different when, on the eve of emerging with success by our own unaided efforts from the monetary disturbances of the last twenty jears, we are asked, in view of the benefit to other nations, to throw away the adrautages we have gained and plunge into a new period of struggle aud change. Only the most absolnte certainty of early and permanent success would warrant our acceptance of such a position. We can not help seeing that if the policy of 1893 is now abandoned, and if the triple union now proposed as a substitute should fail in its operation or should terminate, and in its failure subject Indian trade to the violent shocks we have described, the government of India could not, as a respousible government, call upon the comnercial public to face another prolonged period of doubt, suspense, agitation, and difficulties. For

$$
\text { FI } 98-35
$$

it must be clearly and fully recognized that if India joins in tho proposed measures, we shall be left dependent, as the sole means of attaining stability in exchange, on the success of those measures, and that if they should fail India must be content to remain permanently under the silver standard with all its admitted disadvantages.

If, then, there is any reasonable doubt of the success of the suggested measures, we are of opiniou that we ought to refuse to cooperate, and should maintain our freedom to watch the course of events, and take such action from time to time as these may render expedient. A possibility or even a probability that the efforts of France and the United States might meet with success would not be enough to justify us in parting with our freedom or doing anything to further an experiment which, if it fails, will entail consequences to the trade aud finances of India which must be described, without any exaggeration, as disastrous.

We have given very careful consideration to the question whether France and the United States are likely, with the help of India, to be able to maintain the relative value of gold and silver permanently at the ratio they intend to adopt, and have come to the conclusion that while we admit a possibility of the arrangements proposed resulting in the permanent maintenance of the value of gold and silver at the ratio of $15 \frac{1}{2}$ to 1 , the probability is that they will fail to secure tbat result, and that it is quite impossible to hold that there is anything approaching a practical certainty of their doing so.

One reason for this conclusion is that the arrangement would rest on too narrow a basis. A union consisting of two countries, with a third lending assistance, is a very different thing from the general international union of all or most of the important countries of the world, which was advocated by the government of India in the despatches of March and June, 1892, and of February and September, 1886.

To afford a hope that a monetary union will succeed in establishing stability in the relative value of gold and silver, it is essential that the nations adheriog to it should be of such number and importance that the metallic currency of the whole body shall be of sinfficient extent to allow of the exercise of adequate influence on the value of the two metals. We doubt whether any two, or even three, nations in the world, unless, indeed, one of them was Great Britain, could comply with this condition, and we have no hesitation in saying that France aud the United States and India certainly could not. The intencled ratio assigns to coined silver a much higher valne than the present market value of silver, and the market value conld only be raised by trausferring the demand for coinage from gold to silver. But France, the United States, and India all possess a very large stock of silver coin, and it is donbtful whother there is much room in them for a large increase in the silver coinage except by the displacement in France and the United States of the existing gold coins. It is quite possible that the whole of the gold coinage of both France and the United States might disappear and be replaced by silver coins before the market value of silver was raised to the intended ratio with gold. Whether the goveruments of those countries will allow a total displacement of their gold by silver coins, and the possible export from the country of the entire stock of gold is, as we explain in paragraphs 6 aud 16 of this despatch, open to more than donbt; and in so far as either enforces measures to prevent gold from being exported, the poser of the union, and possibly also its desire, to effect its object will be diminished.

A further doubt occurs to us in the possibility that either France or the United States may, for reasons which will suggest themselves to your lordship, be reduced for a time to a paper currency. In that case the agreement would cease to operate for an indefinite period under the stress of circumstances. This possibility, though of no importance in the case of a union comprising all the important countries of the world, can not he disregarded when two or three countries only form the union.

Another important source of doubt lies in the consideration that a three-sided agreement is open to much greater risk of termination by the action of one or two of the parties than a many-sided agreement such as the government of India advocated before 1893. In the latter all the commercial comntries would be in the union, and all would be in an equal position; there would be no ground for supposing that the operation of the agreement benefited one country at the expense of another. There would therefore be no substantial inducement for withdrawal from the regime adopted by common consent; the union might for practical purposes continue to subsist and to produce its effect even after the dissenting country had withdrawn. On the other hand, in a three-sided agreement such as is now proposed, either France or the United States might any day find some reason for thinking that some other nation was obtaiṇiug some advantage at tbeir expense in consequence of the great difference in the standard of value, and thereupon discnssions might ensue as to the expediency of terninating the agreement, which would have only a less serious effect than its actual termination.

Another reason for anticipting that the proposed agreement is not likely to succeed will be found in the considerations mentioned in paragraph 6 regarding the improbability of France and the United States allowing their gold reserve to disap-
pear. We attach great importance to these considerations, because we are convinced that they vitally affect the prospects of any agreement being successfully carried out. With the precautions to which we have referred the expcriment might be continued, for the risk to the two nations would be very small. Butwithout these precautions, or if they proved to be inadequate for their purpose, i. e., the retention of a sufficient stock of gold, we believe the inducement to abandon the experiment would be very strong, and if even one country adopted that course it would be impossible to prevent the whole agreement breaking down.

For these reasons alone, without taking into consideration the objections based on the particular ratio proposed, which we shall separately discuss, we have no hesitation iu recommending your lordship to refinse to give the undertaking desired by the governmeuts of France and the United States. We are quite clearly of opinion that the interests of India demand that her mints shall not be opened as part of an arrangement to which two or three countries only are parties, and which does not include Great Britain.

We note that the proposals of the governments of France and the United States are subject to the proviso that they are satisfied that they will receive assistance from other powers in increasing the demand for silver. We believe that a limited increase of the quantity of silver used as currency will exercise a very trilling influence, if any, in raising the gold price of silver, and that the only assistance from other powers which can be of any real value would be the addition of other countries to the bimetallic union of France and the United States. If, however, assurances of really substantial cooperation should be secured from other countries, we shall be glad to learn the exact nature of the assurances, and weshall then consider whether the promised cooperation changes the conditions of the problem, or adds materially to the chances of success.

We believe, however, that whatever inducements are held out to us by other nations, our best policy in mouetary matters is to link our system with that of Great Britain. Our commercial conncetions with that country are far more important than those with all the rest of the world put together, and more than a sixth part of our expenditure is incurred in that conntry, and measured in its currency. The advantages which in this respect we gain by following the lead of Geeat Britain are not obtained, or not fully obtained, if we become members of a monetary union in which Great Britain takes no part. And, indeed, as we have already explained, we have little hope of an efficient union being formed unless Great Britain is a nember. We think it a reasonable position for us to take with regard to the present proposals by France and the United States, that we should say that the government of India strove long and earnestly to further the formation of an international union; that when they saw that the opposition of England rendered iopossible the attainment of that object within any neasurable time, they temporarily abandoned their efforts in that direction, and decided, as the least prejudicial of the courses open to then, to throw in their lot with Great Britain and to adopt the gold standard; that as it appears improbable that an effiective union will be formed without the adhesion of Great Britain, and as the measures adopted to introduce a gold standard in India are now approaching final success, they consider that it will be wisest to adhere to the course adopted in 1893 until Great Britain is prepared to join in iuternational bimetallism; and that they therefore wish to adbere to the same monetary standard as Great Britain, with which nation they are most closely linked, both in respect of their commercial relations and in all other lespects, and to refrain from becoming a party to arrangements with other nations in which Great Britain sees ample reason for refusing to join.

So far the arguments we have offered in discussing the chances of success or failure of the arrangement have been independent of consideration of the precise ratio proposed by France and United States. We have objected to the arrangement on grounds which apply to it whatever be the ratio adopted, but we must add that our objections are greatly strengthened by the fact that so high a ratio is proposed as $15 \frac{1}{2}$ to 1 . It seems to us that the difficulty of making the arrangement effective will be immensely increased by the adoption of a ratio differing so widely from the present market ratio. Indeed, even if it could be maintained successfully, we sbould object to that ratio in the interests of India, and we recominend that your lordslip should, on belalf of India, decline to participate in or do anything to encourage the formation of a union based on that ratio.

We have said in paragraph 5 that the first result of the proposed arrangement wonld be an immediate disturbance of trade and industry by the advance of the exchange value of the rupee, which will be very intense if the rise is from between 15 and 16 pence to about 23 pence. There is no doubt that the effect would be to throw some branches of the export tracke of Iudia and the industries connected therewith (the planting industries, for example, in which a large amount of European capital has been embarked) in to the most depressed condition, for some time, at least. The period of depression might be long or comparatively short, though there are authori-
ties who are inclined to attribute a permanently disastrous effect to such a large and sudden rise in exchange, and to apprehend that Indian commerce might be utterly shaken by the clange.

In any case, we are of opinion that the true interests of India demand that any measures for attaiuing stability in the rate of exchange between gold and silver should be based upon a rate not greatly differing from $16 d$. the rupee, and that any measure which would raise the rupee materially higher than that level involves great dangers, for which we see no adequate compensations. Your lordship will observe that we attach no special importance to the advantages to be derived from the proposed considerable rise in exchange, mentioned in paragraph 5 of jour despatch, and consider them to be far outweighed by the resulting evils.

Pressed as we have been for many years by the difficulty of finding the continually increasing number of rupees requisite to discharge our sterling liabilities, we are apt to look too exclusively at the effect which a rise of exchauge would have in diminishing the burden of that demand upon us. We no not deny that a large surplus of revenue will arise from so great an improvement in exchange; but it is not to be forgotten that there are nany respecis in which our revenue account must directly suffer by a rise in the exchange value of the rupee, and that these considerations ought to greatly influence our estimate of the benefit to our revenue account which is almost the sole advantage which, as a government, we can expect to obtain from the proposed measures.

The anticipated fall in prices is one that will adversely affect both our revenues and the general condition of the agricultural classes in the country. To take the case of our land revenue, a very large portion of the country has passed under landrevenue settlement cluring the last ten or fifteen years. One of the factors iu fixing the demand of the government for revenue is the price of agricultural produce; if that price falls away, the heavier the demand becomes; and if it falls away materially; the relation between the price that the ryot can obtain for his produce and the assessment he las to meet may be so seriously altered as to affect the agricultural prosperity of large tracts of country. The work of resettlement is a tedious one; it can not be effected in all probability for some years, and when it is effected it will pro tanto dissipate much of the advantage which the rise of exchange would bring to the government account.

So, also, as regards our railway revenues, which are now so important a portion of our income. They are in part directly dependent upon the activity of the export trade, and a blow struck at that trade will be felt by us immediately and directly through our railway account.

For these reasons, therefore, in addition to those set forth in the earlier portion of this despatch, we recommend that the reply to the request of the Governments of France and the United States should be in the negative. We presume that a union based upon a ratio low enough to suit our interests would be unacceptable to France and the United States.

With reference to paragraph 6 of your lordship's despatch, we invite attention to the description of the present currency system of India given in paragraph 2 above. There appears to be some misapprehension in the comparison drawn between the arrangement proposed by the United States and France and the "present system" in India. The present system is, of course, open to the objection that it is one of artificial restriction, but it is essential to bear in mind that it is not a permanent system, or, indeed, a system at all. We are in a transition period, moving from one system to another, and tho present artificial restriction is merely a temporary expedient which has for its sole object the acceleration of the movement, and which will cease to exist at the completion of the movement. Thereafter the expansion and contraction of the currency will be left to the natural forces of the market; that is, it will be regulated automatically by the inflow and outflow of gold.

It is true that the syetem will be open to the other objection stated in paragraph 6 of the despatch, that the rupee will continue to remain at a value above its metallic value; but, as was pointed ont by Lord Fersclell's committee, this is an objection which has not made itself seriously felt in the other countries, including France and the United States, in which an analogous system has been in operation for many years. It is not likely that the objection will make itself seriously felt in India when the gold standard has been effectively introduced.

The question really is not one of comparison, as put by your lordship, between the present temporary expedient in India and the arrangement proposed, but between a gold standard and the proposed arrangement, which involves the abandoninent of the policy of a gold standard, adopted in 1893, in favour of reversion to the policy of a silver standard.

In paragraph 9 of the despatch your lordship reninds us that "in 1892 the policy of closing the mints was only recommended" by Lord Lansdowne's Government "on the ground that an international agreement, similar to that which is now contemplated, was not then obtainable," and we arc isked to say whether wo see any
reason to modify the views expressed in that sense in the despatches of the 23rd March and 21st June, 1892.
In reply, we have first to point out that the international arrangement which Lord Lansdowne's Government contemplated is very far from being similar to that which is now proposed. The proposal now under consideration is for a union of two countries only, with some assistance from a third. The international arrangement contemplated in 1892 was a general bimetallic, union of all important nations, or, to use the words of the despatch of the 4th September, 1886, which is referred to in paragraph 2 of the despatch of the 21st June, 1892, as expressing the views held by Lord Lansdowne's Government, "an international agreement for the free coinage of silver and the making of both gold and silver coin a legal tender at a fixed ratio by a group of nations possessed of a metallic currency of sufficient extent to maintain that ratio permanently." We have already stated our opinion that the agreement now proposed does not fulfill the last-named essential condition.
Secondly, circumstances have essentially altered since 1892. Despairing of securing the adoption of any of the measures which they had persistently urged, the government of India decided to attempt the establishment of a gold standard and, as the first step, closed the mints to the coinage of silver tendered by the public. If the proposals now made had been made in 1892 or at any time before June, 1893, it is conceivable that the government of India of that time would have welcomed them as containing a possibility of securing the objects they desired, and would, in order to secure their adoption, have agreed to postpone the closing of the mints and to keep them open for a period sufficient to allow a full trial to the measures of France and the United States; say, for five years. But our position is now very different. The experience of the last three or four years has cleared up many doubts which were present to our predecessors' minds in 1893, and it has taught us that the course we actually adopted in 1893 really had in it better chances of success than the alternative of a partial intornational agreement. To agree not to close mints still open for a definite time, and to agree to reopen closed mints, are two very different things. The former course would hive been justifiable if the measures propesed were sucb as to afford a reasonable expectation of securing the main object of the government of India, namely, stability in the rate of exchange. The latter is entirely unjustifiable, unless the measures afford a practical certainty of securing that object.
The conditions nuder which we have had to reply to your lordship's despatch preclude our consulting the commercial and banking communities in this country, although the subject is one in which they are, as we have explained, most closely interested. It was only after prolonged public discussion, and after a formal examination by a committee of experts, that the policy of 1893 was adopted; and if we thought it our duty to adrocate a change in that policy instead of to set out the strong objections which we see to its abandonment we would, nevertheless, strongly deprecate any steps of the kind being taken without the fullest preliminary consideration on the part of the banking and commercial bodies in this country.
To sum up our reply to rour lordship's reference is a strong recommendation that you should decline to give the undertalking desired by France and the United States: Our unanimous and decided opinion is that it would be most unwise to reopen the mints as part of the proposed arrangements, especially at a time when we are to all appearance approaching the attainnent of stability in exchange by the operation of our own isolated and independent action.

## Treasury to Foreign Office.

Treasury Chambers, Ootober 16, 1897.
SIR: With reference to jour letters of the 27th July and the 5th August last, I am directed by the lords conmissioners of Her Majesty's treasury to request you to inform the secretary of state for foreign affairs that they have had under their consideration the proposals respecting currency which were submitted to Her Majesty's Government by the representatives of the United States and France at the conferences held at the toreign office on the 12th and 15 th Jnly last.

Of these proposals it is evident that the first, which relates to the reopening of
the Indian mints to the free coinage of silver, is by far the most important; and on the 5 th Angust the secretary of state for India in conncil addressed a despatch to the government of India, asking for an expression of their opinion on the subject.

I am now to inclose a copy of a letter from the India office,* forwarding the reply of the government of India to this inquiry.

It will be observed that their " unanimous and decided opinion is that it would be most unwise to reopen the mints as part of the proposed arrangements," and that this conclusion is endorsod by the secretary of state iu council.

My lords have read with attention the reasons by which this conclusion is supported. Among other arguments, the government of India point out that they can hardly be expected to give up the policy which for four years they have been endeavouring to make effective in the absence of substantial security that the system to be substituted for it is practically certain to be stable. If, owing to the relative smallness of the area over which the bimetallic system is to be established, to the great divergence between the proposed ratio and the present gold price of silver, or to any other cause, the legal ratio were not maintaiued, the position of silver might be much worse than before, and the financial embarrassments of tbe government of India greater than any with which they bave as yet had to contend.

These are arguments against the proposals as they staud, of which it is impossible to deny the force. But even were they less strong than they appear to my lords, or than they will probably appear to the representatives of the Uniter States and France, the government of India could hardly be compelled, against their own decided opinions, to make a second important change iu Indian currency within so short a period as four years, at a time of exceptional difficulty and suffering.

In these circumstances, my lords would suggest that the French and American representatives should be informed that their first proposal is one which Her Majesty's Government are nnable to accept.

Due consideration has also been gived to the remaining proposals, but my lords do not feel it to be necessary to discuss them at the present moment. The proposal respecting the Indian mints was not only alluded to by the first lord of the treasury and the chancellor of the exchequer in the debate of the 17th March, 1896, as by far the most important contribution which could be made br the British Empire to wards any international agreement, with the olject of securing "a stable monetary par of exchange between gold and silver," but it would also appear that the representatives of the United States and France entertain a similar opinion with regard to $i t$.

My lords would, therefore, ask the secretary of state to ascertain how far the views of the French and American Governments are modified by the decision now arrived at, and whether they desire to proceed further with the negotiations at the present moment. It is possible that the time which has elapsed since the proposals were put forward in July last mas have enabled the representatives of the two Governments concerned to form a more accurate estimate than was then practicable of the amount of assistance which they may expect from the other powers and of the success which their scheme is likely to attain, and that Her Majesty's Government might thus be placed in a position to consider the subject with a fuller knowledge than they now possess of many circumstances materially affecting the proposals before them.

I have, \&c.,
(Signed) E. W. Hamilton.

## The Marquess of Salisbury to Mr. Hay. $\dagger$

Foreign Ofrice, October 19, 1897.
SIR: Her Majesty's Government have given their most careful consideration to the proposals respecting currency which were submitted by the representatives of the United States and France at the conferences held at the foreign office on the 12th and 15th of July last.

Of these proposalsit is evident that the first, which relates to the reopening of the Indian mints for the free coinage of silver, is by far the most important, and consequently a despatch was addressed on the 5th August to the government of India by the esecretary of state in council, $\ddagger$ asking for an expression of their opinion on the subject.

I have the honour now to inclose a copy of a letter from the India office to the treasury, forwarding the reply of the government of India to this inquiry $\$$.

It will be observed that their "mnanimous and decided opinion is that it would

[^39]be most unwise to reopen the mints as part of the proposed arrangements," and that this conclusion is indorsed by the secretary of state in council.

Her Majesty's Government have carefully considered the reasons by which this conclusion is supported. Among other arguments, the governinent of India point out that they can hardly be expected to give up the policy which for four years they have been endeavouring to make effective in the absence of substantial security that the system to be substituted for it is practically certain to be stable. If, owing to the relative smallness of the area over which the bimetallic spstem is to be established to the great divergence between the proposed ratio and the present gold price of silver or to any other cause, the legal ratio were not maintained, the position of silver might be much worse than before, and the financial embarrassments of the government of India greater than any with which they have as yet had to contend.

These are arguments against the proposals as they stand of which it is impossible to deny the force. Buteven werethey less strong than they appear to Her Majesty's Government, or than they will probably appear to the representatives of the United States and France, the government of India could hardly be compelled against their own decided opinions to make a second important change in Indian currency within so short a period as four years at a time of exceptional difficulty and suffering.

In these circumstances, Her Majesty's Government feel it their duty to state that the first proposal of tho United States' representatives is one which they are unable to accept.
Due consideration has also been given to the remaining proposals, but Her Majesty's Govemment do not feel it to be necessary to discuss them at the present moment. The proposal respecting the-Indian mints was not only alluded to by the first lord of the treasury and the chancellor of the exchequer in the debate in the House of Commons of the 17 th March, $1 \times 96$, as by far the most important contribution which could be made by the British Empire towards any international agreement, with the object of securing " a stable monetary par of exchange betweon gold and silver," but it wondd also appear that the representatives of the United States and France entertain a similar opiaion with regard to it.

Her Majesty's Government are, therefore, desirous to ascertain how far the views of the American and French Governments are moditied by the decision now arrived at, and whether they desire to proceed further with the negotiations at the present moment. It is possible that the time whicl has elapsed since the proposals were put forward in July last may have enahled the representatives of the two Governments concerned to form a more accurate estimate than was then practicable of the anount of assistance which they may expect from other powers, and of the success which their scheme is likely to attain. Her Majesty's Government might then be placed in a position to consider the subject with a fuller knowledge than they now possess of many eircumstances materially affecting the proposals before them.

I am, \&ç.,
(Signed)
Salisbury.

## MONETARY REVIEW.

The most important events of the fiscal year in the world of government finance have been the consummation of the long-planned resumption of specie payments by Russia in gold, the reorganization of the monetary system of Japan with gold as the standard, and the refusal of the government of India to cooperate with the Governments of the United States and France in an efiort to establish bimetallism by international agreement. These occurrences are treated separately and in detail elsewhere.

The gold coinage of the world in 1897 was the largest recorded, amounting in value to $\$ 437,719,342$, against $\$ 195,899,517$ in 1896 . Of the former sum $\$ 146,622,194$ was recoinage, and approximately $\$ 291$, 097,148 a net addition to the stock of gold coins. The principal coinage was by the United States, Great Britain, Russia, Germany, AustriaHungary, France, and Japan. The extraordinary coinage of the year is accounted for by the preparations of Russia, Austria-Hungary, and Japan for their monetary reforms. In the case of Russia, particularly, gold which has been accumulating for years, much of it in bars, was passed through the mints to prepare it for circulation.

The completion of Russia's plans of monetary reform and the opening
to the uses of commerce of her great gold reserve, systematically gathered year by year until it is the greatest single hoard of treasure the world ever saw, is in itself a most notable event. The demands of Russia for this purpose have been a steady drain upon the gold supplies of the world. Every coin that went into her reservoir dropped out of sight for the time as completely as though dropped overboard in mid ocean. On the 1st day of July, 1898, the Russian treasary held over $\$ 70,000,000$ of United States gold coins, $\$ 50,000,000$ worth of English sovereigns, $\$ 27,000,000$ worth of German gold coins, and $\$ 15,000,000$ in francs, besides the coins she may have previously melted and a great stock in bars. Now her reservoir is full; what is added in the future will run over, unless she proceeds to fill anotber reservoir as a war treasury. It seems improbable that she will do this when there are so many ways in which the money can be spent or invested to develop the resources of her people and thus add greater strength than by an idle hoard. The development of Russia, her position as an exporter of breadstufts, her policy of developing home manufactures, will all tend to protect her stock of gold and make use for more, but her own gold production is increasiug and, unless she is about to euter upon a period of unprecedented activity and development, seems likely to supply her needs. One thing is certain, viz, that whereas she has been laying away an average of $\$ 50,000,000$ in gold annually in an idle hoard, hereafter she must absorb and use her imports actively and profitably in business, or opportunities in other parts of the world will draw it away from her. It is worth thiuking about that there is now no other government in the world which can make such drafts on the common gold supply as Russia has made during the last ten years. India is confessedly unable to levy the taxation necessary to enable the government to gather such a stock, and eveu if the government succeeds in forcing the payment of its favorable balance of trade in gold instead of silver, the annual sum, on the basis of the imports of silver in the last ten years, would be considerably below the past demands of Russia. Furthermore, the drafts of Russia have been met out of an average annual world's product of $\$ 160,000,000$, while the annual world's product of the next ten years will probably average twice that sum.
Throughout the world, among all peoples who are sufficiently civilized and ambitious to have interuational intercourse, there is manifest a desire to bring their own currencies into definite and stable relations with the money of the peoples with whom they trade. The exporter desires that the money with which he buys at home and the money for which he sells abroad shall have a common unit of value. The manufacturer who is competing in foreign markets desires that the money with which he buys raw material and labor at home and the money in which he must quote prices abroad shall bave a relation to each other upon which he may rely and calculate. With him, months usually separate his investment in material from the final payment for his finished goods. His accounts receivable are due in the money of one country and his accounts payable in the money of another. If the monetary systems of these countries have no common unit-if each nation, in ignorance or misled independeuce, prefers "an independent system of its own"-they will inevitably vary in value to each other, and the profits of the international transaction we are considering are subject to these variations. Such variations are, therefore, a barrier to trade between the countries. They constitute a risk, additional to all the ordinary contingencies affecting domestic trade, for which the trader must be reimbursed. Either the producer must sell his goods
enough cheaper or the consumer must pay enough more to cover it. It was to escape from such fluctuations of the Russian currency, which in 1892 reached 9.6 per cent and in 1891, 28 per cent, that the Russian Government has fixed its paper money at the gold standard. For the same reason Austria-Hungary and Japan have lately done likewise. For the same reason India closed its mints to the unrestricted coinage of silver and has been struggling since to hold its rupee at the fixed value of 16 pence. It is for this reason that even Peru, with its comparatively small foreign trade, has closed its mints to the unlimited coinage of silver, the preamble of its President's proclamation reciting:
Whereas the variations in exchange resulting from the continual fall in the value of silver require the Executive to take such steps as are within the range of his legal powers, etc.

It is for this reason that the Government of France, while friendly to an international agreement upon a bimetallic money standard, will not entertain any proposition that involves a possible separation of her own curreucy from the standard used by the other important commercial nations of the world. That these fluctuations are inevitable to a currency not held to the international standard, and convertible on demand into the metal of that standard, is evidenced by the experience of the United States loug after the stress and chances of war had ceased to affect its paper currency. Thus in the year 1876, when no question of the stability or resources of the Government conld have been involved, the range of our paper currency to gold was 8 per cent, in 1870 13 per cent, and in 186818 per cent. It is apparent to anyone familiar with modern business affairs that such fluctuations in their money as these are a burdensome handicap to the efforts of any people to build up a foreign trade. The business man who bids on a contract over his country's border does not want to add 18 per cent or 13 per cent, or 8 per cent, or even 1 per cent, to allow for a possible variation in the relations of the two systems of money. Even 1 per cent thus added might throw the contract to a competitor who did not labor under this disadvantage. The enterprising peoples of the world are not voluntarily assuming or remaining under conditions which put them at a disadvantage in the keen rivalry that salesmeu find in every market. The enlightened judgment of the time condemns such a meaningless and burdensome restraint upon the exchanges.

Nor is there any merit in the plea, sometimes made, that inasmuch as most of a country's business transactions are domestic and only a small percentage of them international, therefore the relations of its money to the money of other countries is of equally small importance.

The truth is that prices in all domestic sales are related to prices in international transactions and can not be separated from them. The values of all goods that enter into the common consumption of mankind are internatioual, and can not be affected by monetary legislation. Legislation can alter the valne of a local currency, but the owner of goods of world-wide demand simply raises or lowers his price to correspond with the changed value of the money. Goods in every country are attached to the world's standard whether the money is or not. If the money is not, then the wage-earners of that country receive their pay on one basis and buy the necessities of life on another. All such confusion and uncertainty is to be avoided. The specialized industrial system of to day, under which every man is a part of a great social machine, requires, in the interests of justice, that he shall be able to buy by the same standard by which he sells his labor. The man who, as one of ten thousand, contributes to the making of a certain product, should
have the finished product measured to him by the same standard by which he sold his contribution to it, and the world in this age is too small to have this end defeated or obscured by a new standard of value at every boundary line. There may be no injustice in paying a man a uniform wage of $\$ 2$ for a day's work whether that sum buys two sacks of flour or one, if the fall in purchasing power is due to an actual increase in the cost of producing flour, but when the difference is due to a variation in the value of the money, the wage-earner is the victim of a swindle from which his Government ought to protect lim.

Clear as these principles would seem to be, and attested by the unvarying experience of all countries, there are those everywhere who protest against all measures to enforce them. Certain narrow objections and sophistical doctrines become familiar. Some assert that the depreciation of a country's money has a good effect by stimulating its exports. The shipper sells his products abroad for gold, converts the gold into the currency of his own country, and as the latter declines in value, of course he gets more of it. The net gain depends upon his opportunity to work this depreciated currency ofti on somebody else at its old value. In some countries the exporters claim to have succeeded $n$ doing this, and they are pleased, and pronounce it a good thing. It is said, for instance, that in India, while the price of wheat and tea in silver currency has advanced, the planters can still hire labor at about the same wages as before. Evidently, if the wage-earner consumes wheat and tea, he is not sharing the good thing. It is said that in Mexico manufacturers and planters have enjoyed prosperity by reason of the rising price of their products in silver, while wages have advanced but little. The question naturally arises, who buys these products? Who consumes in those countries cotton, flour, sugar, shoes, meat, and the other things which in this country are counted necessities of life, all of which in any country are certain to rise as the local currency declines? It is evident that the stimulus to enterprise which these countries have enjoyed has been precisely such a stimulus as the United States would have if the wage-earners of this country would agree together to accept a 25 to 50 per cent reduction in their pay. That might truly stimulate the export trade for a time. As a measure of wage reduction a depreciating currency may be accepted as effective. As a policy to stimulate exports it is in any case effective but temporarily; for, if it ceases to depreciate, wages and other expenses will gradually adjust themselves to it, the exporter losing his "premium," while if it continues to depreciate it will eventually become worthless and all its influence, beneficent or otherwise, will perish with it. As a policy upon which to build a nation's trade and prosperity, it begins in frand and ends in failure.

Thus it is that the statesmen of all countries which have experienced the evils of an isolated and depreciated currency, without touch or connection with the monetary systems of other countries, are seen to be striving to rescue their people from that condition. In some instances they encounter grave difficulties, due to the poverty of their people. They may have to submit to disadvantages for a time, even as an embarrassed individual is unable to pursue the methods of his forehanded neighbor. Adverse conditions of trade and revenue may postpone or defeat their plans. But they all give testimony to the evils of their enforced condition, and make apparent their desire to join their more forehanded neighbors in the use of a common standard of value.

The monetary situation and plans of India have been of special interest to the people of the United States by reason of their bearing upou the price of one of our products, silver. There has been, during the past year, great pressure upon the government of India either to bring to speedy completion its reorganization of that country's currency system or to abandon that policy and reopen its mints to the free coinage of silver, the present state of transition being very unsatisfactory to everybody. Five years have elapsed since the government inaugurated its movement toward the gold standard by closing its mints to the unrestricted coinage of silver. Its avowed purpose was to establish a stable relation between the rupee-the standard coin of India-and the English sovereign, in the interest of trade between the countries, to encourage the investment of English capital for the development of India, and to relieve the Indian government from the embarrassment occasioned by the constantly declining value of the silver curreucy in which its revenues are paid. The probable value of the rupee in gold has been a perplexing question for the Indian government, in making up its budgets, for many years. That government has to pay away more than one fourth of its revenue-a sum amounting to between $£ 16,000,000$ and $£ 17,000,000$ in England-for interest on its debt and other gold obligations there. It receives its revenue in silver rupees, and twenty-five years ago one of these rupees was equal in exchange to 22 or 23 pence. For the year ending March 31, 1893, the average rate which the government obtained was a little under one rupee for 15 pence. It took, therefore, one and one-half times as many rupees out of the Indian treasury to pay the same obligation and the government professed to be unable to meet this annually growing deficit. Lord George Hamilton, secretary of state for India, in the House of Commons, March 29, 1898, defending the act of 1893, described the embarrassment of the government as follows:

What was the position which the late government had to face? I do not want to use language too strong, but India was unquostionably nearing bankruptcy. She could not pay. her way, and one of two things was inevitable-either that she would be unable to meet her obligations or that this country would have to come to her aid. * * * The Indian government must pay its way, and it could not pay its way under that state of things except by increased taxation. It cannot increase its taxation, and therefore it could not have paid its way unless it received help from this country.

The large class of salaried officials under the Indian government, whose pay was fixed before the decline of the rupee, complained of the practical reduction in their incomes and appealed for relief, either by an increase in nominal salaries or by some measure to check the decline of the rupee.

It has been earnestly affirmed by those who oppose the policy adopted, that the authorities gave entirely too much weight to the fiscal problems of the government and to the complaints of the official class, and not enongh consideration to the bearing of its policy upon the producing and commercial classes of India. They deny that the government confronted such an emergency as bankruptcy. They quote it as saying in 1893 that "hitherto the expansion of the revenue has largely provided for the additional calls which the falling exchange has made," and assert that India was prosperous and likely to enjoy expanding revenues in the future.

The government defends itself against the charge of considering only its own fiscal difficulties. It represents that if the rupee could have
been held equal to 16 pence throughout the last three years it would have saved $\$ 40,000,000$ to the taxpayers of India, and affirms that a stable rate of exchange, if established, will stimulate enterprise in India to the benefit of all interests. It's general argument is drawn from the condition described by a merchant of India before the Indian commission of 1893, as follows:

Supposing we, as merchants, having establishments in Bombay and Kurrachee, at the commencenient of this sear, looking forward for example to large crops, and more money being required, had decided to send out an increased amount of capital for the time being, say to be returned at the end of the busy season; supposing that we had sent out on the 1st of January of this year 20,000 pounds at 1s. $4 \frac{1}{2}$ :, and brought it back at the eud of the busy season, it would bave come back to us at 1s. 2dd. We would bave lost 14 per cent by moving our funds, even temporarily, to India. The result of that is that parent houses at home can not give that support to their mercantile establishments in India that they would do; in short, they can not move funds either way unless at the risk of serious loss.

Lord Hamilton, in an address in London on January 26, 1898, said:

[^40]would be given for gold at that rate, but it did not venture to agree to give gold for paper or silver. The latter provision had to wait until a stock of gold was accumulated. If the rate of exchange had risen to 16 pence and been established in the confidence of the world, and gold had gone to India for the balances and to meet all monetary demands, a stock of gold might have been gathered into the government treasury and the gold standard made an accomplished fact.

The policy did not, however, so work out. The price of silver bullion fell with the closing of the mints; silver continued to compete with council bills, and to go to India for private hoards, although the imports were considerably reduced, and gold did not go. The amount of council bills sold, the rate in pence obtained, and the net imports of silver into India for the five fiscal years preceding the closing of the mints and the five following are given below:

| Years. | Net imports of silver. | Average rate of Indian rupee. | Amount of council bills sold. |
| :---: | :---: | :---: | :---: |
|  |  | Pence. |  |
| 1888-89. | \$30, 709, 917 | 16. 379 | \$69,410, 203 |
| 1880-90 | 36, 741, 437 | 16.566 | 75, 306, 635 |
| 1890-91. | 51, 993, 287 | 18.089 | 77, 713, 304 |
| 1891-92. | 30, 611, 949 | 16.733 | 78, 320,740 |
| 1892-93. | 39, 083, 615 | 14.984 | 80, 454, 024 |
| 1893-94. | 40, 466, 665 | 14.546 | 46, 378, 884 |
| 1894-95 | 16, 812,318 | 13.100 | 82, 268, 679 |
| 1895-96. | 18, 206, 409 | 13.641 | 85, 278,507 |
| 1896-97. | 17, 163, 165 | 14. 454 | 76, 028, 915 |
| 1897-98. | 26, 447, 429 | 15. 393 | 44, 271, 918 |

From the figures it appears that the Government, while not able to maintain the value of the rupee at 16 pence, has held it considerably above its bullion value. For the year 1897-98 the council obtained an average rate for the rupee of 15.39 pence, although the bullion value averaged but 10 pence. That rate is close to the mark set, but the influence of this apparent success is impaired by the fact that the council offered scarcely more than one-half the amount of bills sold in the year 1895-96. It met the rest of its London obligations for that year by selling gold bonds. If it had offered the usual amount of bills, nobody knows what rate it would have obtained. The opponents of the policy say that the rate would then have been no better than in former years, and that the council abstained from offering bills and incurred a new debt solely to force up the rate. The London Times in March, 1898, commenting upon the situation said:

[^41]Meanwhile India has been suffering from a distressingly tight money market and exorbitant rates of interest. The minimum discount rate at the Bank of Bombay at times last year was 13 per cent and at Bengal and Madras 12 per cent, and these high rates have ruled for an exceedingly long time. It has occasionally been imnossible to borrow ou the very best security even at these rates in Bombay and Calcutta, and in the interior it has very often been impossible to borrow at any rate, no matter how extortionate. Conditions were aggravated, it is agreed, by the fiscal policy of the Government, or by the fact that its policy has only been sufficiently developed to cause uncertainty without realizing the expected advantages. The government dispatch of September 16, 1897, said:

The present system is of course open to the objection that it is one of artificial restriction, but it is essential to bear in miud that it is not a permanent system, or indeed a system at all. We are in a transitory period, moving from one system to another.

Money is always dear in India during a part of the year, 10 and 12 per cent being not iufrequently reached before the mints were closed, but large amounts of silver were then going into India annually, and all could be taken to the mints and coined to relieve the stringency. It has been said to be a common custom of the natives to bring their hoards or their ornaments in seasons of famine and have them melted and coined. That is no longer possible. The government, as a measure of temporary relief, in January, 1898, offered to accept gold in London and immediately issue currency notes for it in India, the object being to induce, by this speedy method of transfer, capital to go to India to the relief of the situation. The London Times, commenting upon the offer the next day, prephesied that no gold would be so deposited, because the Government did not offer to return gold for the currency. The prophecy was justified, no gold being offered under the proposition.

And not only was capital not attracted to India by the excessive rates offered there, but capital in India was actually withdrawn. When the stringent money market and high rate of exchange put the rupee so far above its bullion value, foreign investors in India deemed it an advantageous time to take their capital home, and did so. Thus, instead of the natural movement of capital to a country in need, there was the strained and anomalous movement of capital away from apparently great rewards. The reason for this seems to bave been that there was no confidence that India could keep the rupee worth 16 pence, no chance that it could be wortb more, and the probability that so favorable an opportunity for withdrawing would not again occur. The situation recalls the movement of European capital out of the United States when a premium on gold was thought inminent. The mere offer of bargaius could not stay it in either case.

The Iudia Times, in January, 1898, declares that "India ought not to tolerate for a day longer than is absolutely necessary a currency system under which it is possible to have 12 per cent money here and yet impossible to attract capital from a country where the rate of interest is 3 per cent or under."

The Pioneer, of Calcutta, said: "The present situation is intolerable. It is not only that Huctuations in exchange continue, but that the commercial community see that, without further Government action, they must continue, so that all confidence in the future has disappeared. The existing condition of the Calcutta money market is an excellent illustration in point. The exchange banks sent home every penny they could scrape together every time exchange went above 15 peace."

The president of the Calcutta Chamber of Commerce, at its annual meeting in March, 1898, said: "It is not for us to say by what plan a gold standard should be made effective, but we can point out to the Government that the present position is intolerable, and that it is clearly their duty in the interests of their own finances and of our trade to tix on a sound currency system." He protests against delay, " not only because loanable capital is being driven from India, fresh capital repelled, and trade hampered by the ancertainty of the future, but also because the recurring periods of monetary stringency which we have recently experienced are gaining in intensity, and it is impossible to foretell what the effect on Indian commerce may be when we are face to face with the next period of stringency, which under the present policy is as certain to come as the sun is to rise to-morrow."

The Loudon Times of March 22, 1898, commenting on the last-quoted remarks, said:

It is apparent that the present artificial rise in the rupee has failed to produce any sense of security as to its foture. No facilities of deposit in the Bank of England or any other kind will induce capitalists to convert large sums of gold into rupees as long as they do not know on what terms they will be able to reconvert rupees into gold.

The Indian measure for the closing of the mints fixed the maximum exchange value to which the rapee could rise, bat it failed to fix the mivimum exchange value to which the rupee might fall. It practically asks British capitalists to change their gold for silver at the maximum exchange value of the rupee, and it leaves to them the risk of not being able to get back their gold except at a much lower rate. What the president of the Calcutta Chamber of Commerce wants to know, on behalf of the banking and mercantile communities in India, is whether the Government are now prepared to fix not merely a maximum, but also a mivinum, convertible value for the rupee. Until that first principle is decided upon no security can be felt. English capitalists in India will, to use the expression of a leading Iudian newspaper, seud away to England every rupee they can scrape together at the naximum gold rate, while capitalists in England will not send a single sovereign which they can avoid to India at a rate that they know to be the maximum price of the rupee and with a possible fall of silver to an undefined minimum looming before them.
Sir James Westland, the Indian finance minister, before the viceroy's council, on January 14, 1898, discussing the stringency in the money market, recognized it fully and said:

[^42]And Lord George Hamilton, secretary for India, in the House of Com. mons, March 29, 1898, said:

No doubt money is dear in India. I do not wish to dogmatize on this point, but it seems to me that dearness of money is not identical with scarcity of currency.

I think the dearness of money is caused by want of capital, and the cause of want of capital in India is no doubt due to the sufferings of that country from drought, famine, plague, and war.
It will be seen that the extraordinary stringency in India during the past year is not in dispute. Opinion is divided only upon how permanent relief may best be effected. The advocates of a return to open mints affirm that the policy begun in 1893 has been a failure in every respect, that the experiment has borne heavily upon the producing industries; that no confidence exists in the ability of the Government to establish the gold standard, and that it is impossible to do so, because, with public opinion what it is, any gold reserve the Government has the ability to accumulate would quickly be lost. The usual arguments in favor of depreciating currency are made. It is asserted that the steady rupee, if attainable, would put India at a. disadvantage compared with China, where silver is the standard; that the falling value of currency stimulates exports and has made India prosperous in the past. It is said that the agricultural classes pay a certain rent for land to the Government in rupees and sell their products nominally for rupees, but really at the world's gold price; and that whereas it takes about 16 pence to equal a rupee at the exchange price fixed by the Government, every 10 pence would equal a rupee at the bullion value of the latter throughout the last year. Therefore, if the price of wheat was 32 pence per bushel, the Indian farmer would get, at the forced rate of exchange, 2 rupees, while at the bullion rate he would get 3. It is charged that this enhancement of the rupee has been injurions to debtors. The tea plauters, indigo planters, and owners of cotton aud jute mills are said to be, for the most part, in favor of open mints and the old standard.
To the charge that the Government has forced up the value of the rupee, thereby reducing the price of products, response is made that the rate of exchange has not been forced materially higher than it was under free coinage, the effiorts of the Government having been exerted to prevent the rupee from continually falling. If it would have been au advautage to the debtor for the rupee to decline, it would have been an unjust advantage, to which he was not entitled, aud for the country in the long account no advantage at all. The attitude of the tea planters is explained as due to the fact that, selling their product for gold and paying their laborers in silver, it is clearly to their advantage for silver to fall, as the more it falls the less their labor costs.
Lord Hamilton, in the House of Oommons on March 29, 1898, referred to the exporter's interest briefly in this paragraph:

The exporter wants a cheap rupee. Everyone who exports produce from India likes a falling rupee, for the reason that it raises prices. But there is always an interval between the rise in price of a commodity and the rise in wages of those engaged in producing the commodity, and the exporter gets the benefit for the time being.
The assertion that a falling currency is good for a country is pronounced absurd, being equivalent to saying that a country becomes more prosperous as its money becomes more worthless, a proposition that evidently has something wrong in it.

Lord Farrer condemns it in this vigorous paragraph :

[^43]home or abroad, may, as was pointed out by Lord G. Hamilton in the recent debate, increase for a short time the profits of a capitalist employer at the expense of those whom he employs. But such a man, whetber a Lancashire mill owner or a Lincolnshire landowner, would not be listened to at home if he sought to depreciate our English currency.

Lord Hamilton in his speech of March 29, 1898, addressing himself to a general defense of the Government's policy, spoke as follows:

The object of bimetallism is to establish a stable rate of exchange between gold and silver money, and the object of anybody who takes an interest in Indian finance is to try and bring that stability of exchange about. It is my belief that if that can be established so as to induce capitalists to invest their money in India, with the knowledge that they will get it back at very much the same rate, I know no bounds to the productive prosperity of India. How is it possible to establish that stability of exchange It might be done by an international agreement, and theoretically that would be the best plan, but the world unfortunately does not agree. We have not to deal with individual opinion, but with the opinions of the world. Twentyfive years ago, when the fall in the price of silver took place, largely due to the action of Germany in closing her mints, after a period of seven years, from 1870 to to 1877 , a certain number of nations demonetized silver and adopted a gold standard, and foremost was Germany. For thirteen years there was a cessation of the movement, but in 1890 it began again, aud since then Roumania, Austro-Flungary, Cbile, Bulgaria, Russia, and Japan have all adopted the gold standard. Now we must look facts iu the face. I believe at this moment there are only two silver-using countries-Mexico and Chiua-and believing as I do in bimetallism, and not having abandoned the theory, I think it is obvious that we can not carry out that thcory of establishing a stable exchange between England and India. There has been no blame of the Government for rejecting the proposal made in the autumn for reopening the Indian mints. It was obvious to anyone who looked into the matter that the proposal would not obtain stability, it was the object to secure. A government can give an artificial value to silver in circulation only on condition tbat of kcepiag restrictions on the coinage of silver. All nations can open their mints to free coinage, but the valuc of the coins will be that of the metal they contain. The proposition made to us was that the ratio of silver to gold should be $15 \frac{1}{2}$ to 1 . But the market ratio was 35 to 1 , and if the wishes of the Government came into contact with the universal law of supply and demand, that law will prevail, and the rates of $15 \frac{1}{4}$ to 1 could not be sustained. If we can enter into an international arrangement which does not achieve its object we shall be in a worse position than before, for we shall have all the inconveniences of instability of exchange, while having tied our hands and fettered our liberty of action. I will go so far as to say, and I speak my own opinion-and I think of everyone connected with the Indian Governmentwe do not believe that circumstances now exist for entering into an international bimetallic arrangement, because no such arrangernent would be worthy of being called international that did not inelude France, and France would only accept a $15 \frac{1}{2}$ ratio. The population of France is 11 per cent of the total population of Europe, butits currency is 23 per cent of the total currency of Europe. When that is subdivided, the note circulation is $6 \frac{1}{2}$ per cent of the total circulation of Europe, the gold circulation is 25 per cent, but the silver circulation is 40 per cent. In fact I believe there is a larger amount of silver in circulation in France than there is in the whole of British Iudia. At any rate there is an enormons amonnt of silver at $15 \frac{7}{2}$ to 1 , and I do not believe that France can accept any other ratio. So long as sle adheres to that ratio you can not enter into an international arrangement that will be a real international arrangement. That, in a nutshell, is the position of the Indian government, and let the House remember that they did not close their mints until after they saw there was no chance of an international bimetallic arrangement. Another fact which my investigation has bronght to my mind very strongly is that I do not believe it is possible for any one nation by its own exertions to rehabilitate silver. America made a tremendons effort in 1890 by the Shermau Act. By that act the United States Goverument was compelled annually to buy $54,000,000$ ounces of silver, whether the currency of the United States wanted it or not. The $54,000,000$ onnces is about 30 or 40 per cent of the silver production of the whole world. America continued that operation for three years, and at the end of those three years silver was 6 pence lower than it was before. That shows clearly that no one conntry: can, by its own unaided exertions, rehabilitate the price of silver.

At the close of his speech of March 29 Lord Hamilton moved that a select committee be appointed upon the monetary system of India. The committee was created and has taken testimony, but has not yet made a report. Proposals have been submitted by the Indian govern-
ment for further steps toward creating a gold reserve and establishing a fixed par of exchange. In offering these proposals the Government reviews the difficulty that has beset the situation, and attributes its partial failure to the unusual conditions in which war, plague, aud famine have involved the affairs of India. It holds that with normal conditions of trade, and once over the "stage of distrust," gold would probably go to lindia at 16 pence and the introduction of the gold standard become practicable. "But while this might in the end be attained under the present policy, it can not be looked for in the near future, and the Government considers that it will be wiser not to pursue a course of inaction which may be prolonged indefinitely, and that it is desirable in the interests of the State and of the mercantile community to terminate the period of transition without delay." It proposes accordingly to take measures to accumulate a stock of gold: It asks authority to borrow up to a maximum of about $\$ 100,000,000$, and outlines a plan to withdraw silver rupees from circulation and sell them for gold. This reduction in the volume is calculated to make certain the value of the rupee, create a need for more money, and force gold into circulation. The ability to borrow $\$ 100,000,000$ is depended upon to assure the owner of the gold that in parting with it he runs no risk of loss in regaining it. This is to fortify the spot where the system is known to have been weak.

These proposals are opposed by many who are gold-staudard advocates, but who hold that they are not adapted to conditions in India. It is objected that they subject India to increased stringency without any certainty that gold will enter the circulation to bring relief. The London Economist pronounces the plan "nothing but pure currency starvation, with the object of compelling the Indian market to import gold as the only means of preventing the greatest monetary and commercial disasters." The fact that the Government does not say in plain terms that it will protect those who part with gold, by agreeing to replace it at the same rate of exchange, but, on the contrary, admits its unwillingness to assume such indefinite liability, is given as proof that the "stage of distrust" will continue to exist. In other words, so long as the Government betrays distrust individuals will not be likely to get over it. It is apprehended by some, whose judgment is bighly regarded, that $\$ 100,000,000$ in gold would be too small an amount with which to maintain the gold standard in India, and, further, that the poverty of that country makes such an increase in its debt unjustifiable, and, moreover, that the rapid withdrawal of such an amount from England is impracticable.

It is not supposed that in any event gold will take the place of silver in the common trade of Iudia. In a country where the earnings of the masses run from 12 to 20 shillings per month a coin of the value of a sovereign is not likely to circulate very fast. It is known that there are vast hoards of gold in tbe country, estimated by competent authorities at the enormous amount of $\$ 1,500,000,000$. In a country where the hoarding habit was not so fixed this could be counted on to come out into use when the gold standard was established, but the Indian people are not accustomed to put their wealth at interest or to investments in bonds and stocks. That hoarding habit makes the country a vast sink into which the precious metals go and remain, and sets aside the ordinary rules of finance: The Goverument shows no inclination to revise its general purpose to establish the gold standard, but it now seems likely that the task of accumulating a reserve will be spread over a term of years. How, in the meantime, to protect the money
market from the stringency which all parties pronounce insufferable is the problem.

Lord Rothschild, in his paper read before the select committee on July 25, 1898, condemns the new proposals of the government, and states that he considers it "a mistake on the part of the India government discarding in the way it has done the proposals made by America and France last year." His paper, which discusses various phases of the situation, is given in full in the Appendix.

## RUSSIA.

The Russian Government during the past year has completed and put into final effect its plans, long maturing, for giving its monetary system a stable connection with the systems of the other important commercial nations of the world. Since the time of the Crimean war, when all ordinary methods of taxation and resources of finance were inadequate to supply the Government with money as fast as the demands fell upon it, the currency of Russia has been irredeemable paper. The variations in value which this currency experienced, compared to the money of the nations to which Russia sold her chief exports and from which she bought most of her imports, were found to be a serious disadvantage to her people. Mr. Witte, the minister of finance, in his report upon the budget of 1897 , said of this state of affairs:

The unhappy consequences of this state of things have al ways been recognized by the Gnancial administration, which was unceasingly reminded by the general movement of the economic life of the country and by thousands of isolated facts, that it was indispensable to correct the vices of our monetary system. Ihe history of our paper money regime is, in fact, the history of an uninterrupted struggle against this scourge. And if, up to the present time, Russia has not been able to restore its circulation to a normal basis, the reason thereof must not be sought in a forgetfulness of the absolute necessity of a sound currency; it must be attributed solely to political and economic conjectures, the variations of which could not fail to have an influence on the mauner of stating the problem of monetary reorganization.

In his report for 1896, the same minister said :

#### Abstract

The great instability of the rate of exchange had a very bad infuence on Russian commercial life. Agreements which had any relation directly or indirectly with foreign- trade, and were not guarded against by the so-called "covering of risks" proved generally unprofitable. The most careful fiuancial calculations were often risky. The cunsiderable fluctuation of the ruble caused the prices of different articles to change. If the rate of exchange fell, it embarrassed the import of loreign goods, and, in case of advance, it facilitated foreign competition with Russia's production; hence, some speculators gained large unmerited profits and others lost. On the average, the country had only occasional profits, but generally sustained large, unexpected losses, which often embarrassed enterprises.

As far back as January 1, 1877, Russia began to collect her customs duties in gold and since then has pursued a consistent policy looking to the resumption of gold payments for her outstanding paper. Having succeeded by wise administration in obtaining annually a steady surplus of revenues above expenditures, that surplus was hoarded in the gold reserve. The heavy exports of grain gave the country a balance of trade in its favor and the Government bought the bills of exchange on London and collected the proceeds. Loans were also resorted to, the gold product of the country was retained, and by all of these methods, resting as all of them did upon the steady surplus of revenues, the Government for a long period of years piled up its stock of gold until the amount on hand actually exceeded the total paper money outstanding. January 1, 1887, the stock of gold in the treasury and bank (valued by the new standard) was $441,600,000$ rubles,
with $1,046,500,000$ paper rubles outstanding. December 23, 1897, the stock of gold had risen to $1,315,000,000$ rubles with only $999,000,000$ rubles of paper outstanding, and this was accompanied by the actual payment to the public of $117,500,000$ rubles in gold coin in 1897. These figures mean that in round numbers $\$ 500,000,000$ of gold was accumulated by Russia during these ten years in pursuance of her purpose to firmly establish her monetary system on a gold basis. There has been no like feat in the history of finance.

In 1890 the fluctuations of the paper currency of Russia compared to the gold sovereign of England amounted to 191 per cent, in 1891 to 28 per cent, in 1892 to 9.6 per cent. These figures indicate the margin which had to be allowed in all international transactions to cover the mere variations in the value of money. By this time the Government had appeared as a buyer of exchange and began to steady the rate. In 1893 the fluctuations were 6 per cent, and in 18941.94 per cent. The Government had gained confidence in its ability to hold the rate of exchange level, and exerted itself so successfully that the fluctuations of 1895 scarcely exceeded one-half of one per cent. The Government, through the bank, was now both selling and buying gold at a fixed rate. In August, 1895, the bank began to issue gold certificates for gold deposits, and to accept gold accounts and pay checks on them in gold. It was not, however, until November 14, 1897, that the final ukase was issued which declared all of the paper currency redeemable on demand in gold.

Instead of raising the value of the paper ruble to that of the gold ruble, the Government early determined to bring them together by reducing the latter, thus avoiding all disturbances of prices and wages. The minister of finance says:
The following question having been submitted to the committee on finances for examination, "Should an effort be made to raise, progressively, the credit ruble to par and to maintain it at par, or should our object be to give stability to the value of the ruble at a rate of exchange near to the actual rate, and to resume specie payments at that rate?" that committee declared in favor of the second system, being convinced that the object of the measures to be taken with respect to the monetary circulation could not be to restore the full nominal value of the ruble, but to give the value of our monetary unit a basis solid enough to put an end to all fluctuations, however small, of the course of exchange. The committee was at the same time of the opinion that an effort shonld be made to establish a fixed ratio between the credit (paper) ruble aud the gold ruble, and the exchange of the two units should be affected at the rate of about 1.50 credit rnbles to 1 gold ruble.

This policy was carried out. The new gold coins, imperials, and half imperials, contain two-thirds the weight of the old gold coins bearing the same names. This change, however, in nowise affects the Russian gold debt, which will be scrupulously paid in coin of the weight current when it was contracted.

The gold reserve of Russia is no longer a locked-up hoard withdrawn from the monetary supply of the world. It is now as accessible to the public as the gold reserve of the Bank of England or that of the United States Government. Gold can be obtained there, as from the other sources, by gathering up the bank notes and presenting them for payment. The minister of finance recognizes and refers to these new conditions in the following paragraph:

[^44]notes uncovered by metal, the metallic stock of the bank, the gold in circulation in Russia, the gold circulating in England, in Germany, etc., the gold metallic stocks of the banks of issue, constitute a system of comrnuicating vessels. As no chasm now separates Russia from other prosperous countries, the general movement of business and business transactions will act on the circulation of the Empire and on the reserve of the bank as it does elsewhere, neither more nor less.

I'he artificial demand, which for more than ten years has kept a steady stream of gold flowing to Russia, is therefore satisfied. Hereafter we may suppose that gold will go to Russia only when it can be more profitably used there than elsewhere in business enterprises; and when it goes it will be free to leave if special demand arises for it in other markets.

## AUSTRIA-HUNGARY.

The monetary reform that has been in progress in Austria-Hungary since 1892 is not yet consummated, but the fluctuations of the paper currency have practically ceased. The par value of the gold 20 -franc piece of France in Austrian money is 9.52 florins. Its average value on the Vienna bourse in 1893 was 9.83 Horins; in 1894, 9.92 florins; in 1895, 9.67 florius; in 1896, 9.543 florins; in 1897, 9.526 florins.

The circulating medium of Austria-Hungary for years has been paper money, state notes, and notes of the Austro Hungarian bank, a semiofficial institution whose paper is a legal tender. The fluctuations of this currency inflicted upon the country the evils that are inseparable from such instability, and in 1892 a commission was appointed to investigate the subject and report upon the reforms advisable. The commission took the testimony of thirty-five persons whose eminence in finance and political economy made their opinions desirable, and reported in favor of adopting the gold standard. The law of 1892 resulted, and since then the Government has pursued a policy looking to the retirement of bank notes on demand in gold. At the close of 1892 the state notes in circulation amounted to $343,970,577$ florins, and the bank notes to $477,987,590$ florins. The bank held $103,200,000$ gold florins, and the total gold stock of the country was estimated at about $250,000,000$ florins. On December 31, 1897, the Government notes had been reduced to $119,315,410$ florins, and were fully covered by gold coin accumulated in the treasury to redeem them. The bauk notes ontstanding on that date amounted to $699,907,100$ florins, against which the bank had in its vaults $363,789,113$ florins in gold. The total stock of gold in the country at that time was estimated at about $550,000,000$ florins, an increase of $300,000,000$ florins since 1892. The reduction of Government notes outstanding has been accomplished by the substitution of bank notes. Gold is not yet paid out freely, but is supplied by the bauk to meet the actual needs of the foreign trade and to steady the rate of exchange. The new monetary unit is the crown, worth 20.26 cents in United States money. The rate of exchange fixed between the crown and the florin is 1 florin for 2 crowns. This is retiring the florin at 40.52 cents instead of at 48.2 cents, its nominal value. The rate was intended to correspond with its average commercial value for a term of years, the same plan of transition from one system to another adopted by Russia and Japan.

It was expected that in 1897 a great advance would be made in the monetary reform of the two countries; in fact, that their paper circulation would have been replaced by a metallic one. Everything seemed ready for the taking of such a measure, and it is understood to have been political rather than economic events that prevented its adoption,
for the total coinage of gold and silver pieces of the crown currency since the passage of the law of August 2, 1892, introducing the gold standard, amounting, on December 31, 1897, to $963,824,000$ crowns of gold and $158,687,000$ crowns of silver.

JAPAN.
The law of March 8, 1897, which introduced the gold standard into Japan on the 1st of October following, has been in force since, during which time, unfortunately, the country has been suffering from a commercial crisis, the effects of which serve to obscure to some extent the operation of its monetary reform and its influence on the economic state of the country. The reform, however, has had little to do with the crisis. The worst that can be said is that the going over of Japan to the gold standard did not put an end to its commercial disturbances, especially in the cotton trade, which begun before the reform and were not, therefore, caused by it. These latter were produced, and would have been produced, by a forced development through speculation of the industries of the country in 1897, similar to those Germany experienced in 1873 after the payment to it by France of the war indemnity of $\$ 1,000,000,000$.

Japan carried out its programme for the introduction of the gold standard in the manner it had promised. After that introduction the rate of exchange on London, the real barometer of the monetary condition of the country, became fixed at about $24 \frac{3}{8}$ pence. As the theoretical parity of the new yen amounts to only 24.58 pence, that rate of exchange showed the monetary state of the country to be normal.

The Government has obligated itself to redeem the old silver yen up to July 31, 1898, in gold. About the beginning of March last the price of standard silver was such that the bullion value of the yen was about 22 peuce. The rate at which the Government had promised to redeem it was 24.48 pence. One would, therefore, have supposed that so much of the $151,000,000$ one yen silver pieces which had been coined as had been exported would have come back immediately in consequence of the decline of silver in 1897. Such, however, was not the case, and there were comparatively few silver yen exchanged for gold between October 1, 1897, and end of 1897.

The figures below show the monetary condition of Japan when the law for the monetary reform went into effect:

| Years. | Gold. | Silver. | State notes. | Bank notes. | Total. |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Yen. | Yen. | Yen. | Yen. | Yeir. |
| 1871 | 2,700, 000 | 2, 700,000 | 91, 300,000 |  | 96, 700,000 |
| 1891. | 6,500, 000 | 8,700, 000 | 24, 400,000 | 140,700, 000 | 180,300,000 |
| 1893. | 5,700,000 | 13, 700,000 | 12,600,000 | 171, 300, 000 | 203, 300, 000 |
| 1895. | 5, 200, 000 | 28,300, 000 | $8,500,000$ | 201, 000, 000 | 243, 000,000 |
| 1896. | 5, 400, 000 | 32,000,000 | 7, 100,000 | 214, 800, 000 | 259, 300; 000 |
| 1897. | 21, 100, 000 | 32,000, 000 | 5,800, 000 | 208, 800, 000 | 267, 700,000 |

The very rapid pace which Japan had been traveling economically and politically for several years resulted in a natural reaction. Enterprise had been the order of the period, investments in new industries had been very extensive, speculation had become quite prevalent, wages had advanced rapidly, the cost of living had become high as
compared with former years and as compared with conditions in China, and finally, Government expenditures by reason of the war with China and the reorganization of military and naval forces have recently been very much larger than in previous years. The gold standard, while providing a steady rate of exchange with gold-standard countries, has broken the par of exchange with China and affected trade with that country unfavorably.

The exports of Japan in 1897 amounted to $164,135,077$ yen and the mports to $219,165,694$ yen, leaving a balance of trade against it which had to be settled in gold, a discouraging condition under which to inaugurate its new monetary system. The same condition prevails in 1898, but the Government officials believe it to be in part due to extraordinary imports in anticipation of increased import duties, which go into effect January 1, 1899. The warehouses at the treaty ports are said to be at this writing overflowing with goods rushed in to escape the new tariff. In general terms it may be said that Japan is suffering from a commercial reaction, such as in every country inevitably follows a period of intense national activity. Money has been very tight, because, as in similar crises elsewhere, it is not an inviting time in which to invest money there. It is a period of liquidation and not of enterprise. It was hoped that by adopting the gold standard an inflow of capital would be obtained, but as the laws of the land as yet restrict the investments of foreigners, that expectation has been disappointed. The restrictions will soon be withdrawn. Japan has abundant resources for recuperation, and normal conditions will doubtless be restored in due time.

The general views of the Government in changing its monetary system and adopting gold as the standard are summarized in these two paragraphs from the speech of Count Matsukata, the prime minister, before the Japanese diet on March 3, 1897:

[^45]
#### Abstract

wages, injure the productive power of the country, and tend to decrease exports, while suddenly falling prices cause losses to the commercial and economic world. Then it is best that prices do not fluctuate violently, but it is impossible to avoid such fluctuations with a silver standard, and the only remedy is to be found in a gold standard. Secondly, a gold standard.will tend to increase exports; for while it makes commercial transactions with foreign countries adopting a similar standard more convenient, it enables the country to avoid violent fluctuations of prices and tends to develop her industry. Again, a gold standard diminishes the exchange Huctuations. Japan's commerce has been frequently hampered by the fluctuations of exchange with gold countries, consequent upon the fluctuations of silver. If slie adopts a gold standard now, all such evils will not be repeated. Another advantage is that of enabling the country to extend her machinery of circulation. As Japan progresses it becomes necessary for her to be in constant touch with various foreign markets, but at present she is isolated from foreign countries in respect of circulation. Such inconvenience will be obviated by a gold standard, which will render the circulation between foreign and native markets smooth and give many other financial advantages. I would not say, however, financial conveniences alone ought to settle the question, for the proposal is an economic question of vital importance to the State.

SPAIN.
Without being a member of the Latin Union, Spain has on the statute book the same monetary system as the countries comprising it, that is, the bimetallic; but at present, only on the statute book. Its actual currency, both metallic and paper, is in a condition of the utmost disorder. Six years ago the depreciation of its metallic currency began-silver largely preponderating in the circulation. As Spain, following the principles of the Latin Union, coins a 1-pes ta piece, equal to 1 franc, the par of 100 pesetas would be about $\$ 19.30$. But while Spain has the monetary system of the Latin Union, it has not followed the monetary policy of the Union, the countries belonging to which, France, Belginm, Greece, Italy, and Switzerland, suspended the coinage of silver 5 -franc pieces by the convention of November 5 , 1878. Spain, on the contrary, has continued to coin so many of these undervalue pieces (i. e., as compared with gold) that the decline of its rate of exchange began as far back as May, 1891.

This early decline would have taken place even if Spain had had no wars either with its revolted colonies or the United States, for it was a necessary consequence of its continued large coinages of 5 -peseta silver pieces on Government account.

In the present condition of Spain's currency all the gold has disappeared from circulation and was soon followed by the full-weight 5 -peseta pieces. In May last, 100 silver pesetas had a commercial value of only $\$ 8.09$ while 100 pesetas in paper had a value of $\$ 9.52 \cdot$ This was about May 7, 1898. In June and later the premium on gold continued high, but notwithstanding the rude shock given to Spanish credit during the present year, the paper peseta continued to be quoted above the bullion value of the silver peseta. Five hundred pesetas in silver, when the price of silver was $27-\frac{3}{16}$ pence, had a commercial value of 233.50 gold francs or pesetas, while 500 paper pesetas were quoted in Paris at 270 francs in gold. The notes of the Bank of Spain, although redeemable in silver pesetas, were thus worth 36.50 pesetas per 500 more than the silver pesetas, outside of Spain. Yet silver was exported from the country in such quantity that the Goverument was compelled to take measures to prevent the shipment abroad. This it did by royal decree of March 30, 1898, the full text of which will be found in the Appendix to the present report. The reasons for the issuance of this decree are easily understood. The gold previously in circulation in Spain was driven out of the country by a few years' unfavorable balance of trade (so called), and that balance having
become still more unfavorable recently in consequence of the wars the country has had to wage, speculators began to export Spanish coins to places where they still preserved their full nominal values, or to sell them at the bullion price of silver. During 1898 it became difficult to get small change for the bank note of 25 pesetas, because between that denomination and the 2-peseta piece there were only silver coins, and silver was gradually disappearing from circulation. Hence the prohibition of the exportation. It may be questioned whether the measure was a wise one. If there be any place where the peseta is still accepted at its nominal value, its exportation thither should be encouraged rather than prohibited, for about the date of the decree the peseta was worth everywhere else, Spain included, only 54 per cent of its nominal value, and the remaining 46 per cent would be a Spanish gain.

Although the paper peseta was worth more than the silver peseta, there was a rush on the bank of Spain during the present year for the redemption of its notes in the less valuable silver peseta. So many of the latter having been exported, in order that the bank might be able to effect such redemption, the Spanish Government was authorized in August, 1898, to purchase for coinage 250,000 kilograms or $8,037,500$ ounces-representing $50,000,000$ pesetas, which the ministry of finance supposed would be sufficient to meet the wants of the circulation. These 50 millions cost more than $\$ 5,000,000$, which, at a rate of exchange of at least 65 per cent premium, amounted to about $41,000,000$ pesetas plus the cost of coinage.

The bank made great efforts, beginning about the end of July, 1898, to strengthen its cash reserves. On the 15 th of October, 1898, the bank held $374,700,000$ pesetas in gold, against $225,700,000$ on the 16 th of October, 1897, but only $131,900,000$ in silver as compared with $261,600,000$ on October 16, 1897. The total metallic stock on October 15,1898 was $406,600,000$ pesetas; a year previous it was $487,300,000$. The note circulation October 15, 1898, was $1,445,400,000$ against 1,178,800,000 October 16, 1897. Thus the proportion of the metallic stock to the circulation at the latter date was 41 per cent, while on October 16,1898 , it was only 28 per cent. The law requires it to hold half its metallic reserve in gold and half in silver and its total reserve equal to one-third of its note circulation. It thus appears that in October neither of these requirements was complied with.

## CHILE.

The gold standard was introduced iuto Chile by the law of February 11, 1895, since when it has stamped gold pieces as follows: In 1895, $22,891,315$ pesos; in $1896,14,861,615$ pesos, and in 1897,135 pesos at the Freuch mint, a total of $37,735,265$ pesos. As to the gold coinage at the national mint in 1897, no information has been received. Of the amount coined in $1895,4,505,265$ pesos were obtained from foreign coins melted down, and of that minted in $1896,1,065,348$ pesos were obtained from a like source.

The President of Chile stated in his inaugural message to Congress on June 1, 1898, that the redemption of Chile's paper currency in coin might be considered accomplished.

Before the passage of the law of February 11, 1895, the composition of the Chilean currency was: National paper currency, $\$ 29,459,364$; national treasury bills, $\$ 8,901,728$; bank notes authorized and guarantecd, $\$ 20,993,330$. The total circulating medium, all paper, was in January, 1895, $\$ 59,354,422$; in January, 1898, the Government had
redeemed in gold and canceled paper currency amounting to $\$ 27,845,305$, and national treasury bills to $\$ 8,888,228$. Thus, of these two kinds of paper money, there remained comparatively little in circulation. The banks had redeemed $\$ 3,448,858$ of their notes. The entire amount of paper currency of all kinds was thus reduced from $\$ 59,354,422$ in January, 1895 , to $\$ 19,172,031$ in January, 1898, consistiug of national paper money not presented for redemption, and probably either destroyed or lost, to the amount of $\$ 1,614,059$, treasury bills of $\$ 13,500$, and bank notes redeemable in gold of $\$ 17,544,472$.
The $\$ 40,182,391$ withdrawn were replaced by gold and silver token money issued from the national mint up to the end of December, 1897, in accordance with the law of February 11, 1895.
The total metallic and paper currency of Chile January 1, 1898, was $\$ 64,995,389$, in round numbers $\$ 65,000,000$, in all respects gold currency, as the bank issues are fully guaranteed by Government funds deposited in the national treasury, the Government having undertaken to pay the bank notes in gold on any of the banks failing to do so.

In July, 1898, there was a war scare in Chile consequent on the protracted boundary question between it and the Argentine Republic, resulting in a financial panic and, as usual under such circumstances, in the hoarding of gold, a run on the banks, and the withdrawal of millions of their deposits. Unable to withstand the sudden onslaught the banks asked for a month's time to meet their creditors; which was granted by the Government.

Speaking of the preparations to maintain the gold standard, the United States minister to Chile says that they have been rendered ineffective by the extraordinary preparations for war, undertaken in view of the boundary dispute. He says:

#### Abstract

The Government therefore has expended in gold for extraordinary war purposes abont twice as much as the loan authorized by Congress to aid in the resumption of specie payment, and for every gold dollar brought into the couutry under the loan, two lave been sent ont in the purchase of war material. If other reasons were lacking, this alone would be sufficient explanation for the failure of the Government to carry to a successful issue a financial policy conceived in perfect good faith and sound wisdom, aud which, while in force brought unmeasured benefits to the conumercial and industrial classes in Chile.

An issue of paper money, amounting to $50,000,000$ pesos, was authorized July 30, which notes are a legal tender except on contracts otherwise providing. January 1, 1902, the Government agrees to redeem these paper pesos in gold at par, the gold to be provided in the meantime from customs receipts or by the sale of bonds. Writing under date of August 13, 1898, the United States minister, Mr. Wilson, states tbat the paper currency has depreciated about 30 per cent in purchasing power, and adds that the wage earniug class are receiving the same nominal pay as before, the old story of injustice under a fluctuating currency. Mr. Wilson's report appears in full in the appendix.

## BRAZIL.

Brazil has this year declared its intention to raise its greatly depreciated currency to 18 pence per milreis. The par of exchange of the milreis is 27 pence. About the end of June, 1898, its course of exchange was $5 \frac{7}{8}$ pence. Brazil origiually had the same currency as Portugal, of which it was a colony, and then its milreis was the same as the Portuguese, 54 pence. When, in 1849 , it formally adopted the gold standard, its milreis was reduced to 27 pence in order to make it correspond in value with that of the depreciated paper milreis which had been in circulation in the country for decades previous.

Gold coins were stamped at this rate: Brazilian 10 -milreis piece of the value of $\$ 5.462$ was quoted for years at par with the paper money of the then republic, while the Portuguese milreis still continued to be worth $\$ 1.08$. But even the rate of 27 pence had to be abandoned after the revolution. The iniroduction of forced currency depressed the Brazilian milreis until it had sunk to 6 pence; that is, a premium of 350 per cent had to be paid on gold, 100 gold milreis being equal to 450 in paper. The paper milreis, which, in 1888 , was still worth $\$ 0.5462$, declined to about $\$ 0.116$, and was worth toward the end of June, 1898, only about $\$ 0.147$, so that it has still a long road to travel to reach 18 pence, which is 9 pence less than its former par value.
hongkong, straits settlemients, and labuan.
By an order of the Queen in council, February 2, 1895, the Mexican silver dollar of the weight of 417.74 grains, .9027 fine, is made the standard coin of Hongkong. The British dollar and the Hongkoug dollar, each of the standard weight of 416 grains, .900 five, and with a least current weight of 411 grains, are also legal tender. The subsidiary coins of the island colony were not affected by the order of the council. The above-named silver dollars are legal tender for the payment of an amount not exceeding $\$ 2$, but for no greater amount. The British dollar was directed to be coined by an order of the Queen in council of the same date as that making it legal tender in Hongkoug, for which place, the Straits Settlements, and Labuan, it was specially intended. It is coined at the mint at Bombay, which in 1896-97 (Indian fiscal year ending March 31) turned out $6,135,617$ pieces of the same, and in $1897-98,21,286,487$ pieces. The law provides that it shall be of the millesimal fineness of 900 , of the standard weight of 416 grains ( 26.967 grams), shall have a least current weight of 411 grains or 26.633 grams, and that the remedy allowances for it shall be, for weight per piece, 2 grains, or 0.1296 grams, for millesimal fineness .002 .

By an order in council, also of the date of February 2, 1895, the silver Mexican dollar was made the standard coin of the Straits Settlements. The British dollar, the Hongkong dollar, and the Japanese yen are also legal tender in them, with a least current weight of 411 grains. The subsidiary coins are $50,20,10$, and 5 cent pieces, which are legal tender for sums not exceediug $\$ 2$.

In his report for 1897 the governor of the Straits Settlements makes a statement to the effect that, in consequence of the adoption of the gold standard by Japan, large quantities of yens have been withdrawn from circulation in the colony and shipped to Japan. The place of these coins have been taken by new British dollars stamped at Bombay, of which there were imported by the banks alone, in 1897, the large amount of $£ 15,782,900$.

The governor's report adds that the British dollar is already in great demand in Siam, aud that its introduction into the colony in such large amounts has been of great utility. It is doubtful if Mexican piasters in quantities sufficient to replace the retired Japanese yen could have been obtained.

The standard coin of the colony of Labuan is the Mexican dollar, but the British dollar, the Hongkong dollar, and the Japanese yen are treated as equal to it. It has silver subsidiary coins of $50,20,10$, and 5 cent pieces. The dollars are legal tender for the payment of any amount, the remaining silver dollars to an amount not exceeding $\$ 2$.

It is a noteworty fact that while the Mexican silver dollar contains
377.170 grains of pure silver, the British dollar, the Japanese yen, and the Hongkong dollar, all of which by order in council have been made legal tender in one or other of the above-named colonies equally with the Mexican dollar, contain 3.170 grains less, a fact which suggests the possibility that the British dollar was provided for mainly to drive the Mexican dollar out of circulation in Hongkong, the Straits Settlements, and Labuan, by virtue of Gresham's law, that the worse currency drives out the better.

## FRANCE'S MONETARY CENSUS OF SEPTEMBER 15, 1897.

The determination of the monetary stocks of the various countries, that is, of the amount of gold and silver held by them or in circulation in them, is a matter not only of great interest, but of importance, since the amount of such stocks constitutes an element that must be taken into account in the discussion of monetary questions. Estimates of such stocks, based on the best data obtainable, have been made by the Bureau of the Mint both for the United States and foreign countries. But the best data obtainable of the quantity of gold and silver serving a monetary purpose are, in the case of most countries, unsatisfactory, being obtained by no scientific statistical process. The exception to this rule is France. In that country, as far back as 1878, M. de Foville, the eminent statistician and present director of the mint, invented a method of ascertaining the monetary stock of gold and silver in the conntry which leaves little to be desired. The method will be tound fully described in the appendix to the present report, among the papers from France, in the article on the French monetary census of September 7, 1897, which was the fourth taken since August, 1878, the other two having been in 1885 and 1891. These censuses are now taken every six or seven years in France, and it would be well if, in the countries in which the method devised by M. de Foville could be followed, it should be employed.

The results of the French monetary census of 1897 are as follows:
[In millions of france.]

|  | French coin. | Foreign coin. | Total. |
| :---: | :---: | :---: | :---: |
| Gold coins . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . | 3,675 | 525 | 4,200 |
| Five-franc silver pieces. | 1,380 | 555 | 1,935 |
| Divisional silver coin. | 205 | 35 | 240 |
| Total. | 5,260 | 1,115 | 6,375 |

M. de Foville claims for these figures only the value of an approximation.

GOLD COMPARED TO COMMODITIES.
The contention of those opposed to gold as a standard of value is very well summarized in the following extract from an address delivered by one of their representatives at the Omaha Monetary Convention, in August, 1898:

The gold standard, dating approximately from 1873, has furnished the nations attempting to use it with a money unit that since that date, in spite of short temporary periods of relative stability, and with even slight occasional declinations toward its formor commodity equivalence, has, upon the whole, constantly and pro-
gressively risen in value until the purchasing power of a unit weight of gold is to day approximately 100 per cent greater than in 1873.

The decline of average prices is one of the notorious commonplaces of recent economic history, and is nolonger seriously disputed by anybody. It has been conclusively established by the table of prices used by the London Economist newspaper, by Dr. Soetbeer, of Germany, and by many others, and especially by Mr. Augustus Sauerbeck, the well known statistician of the English Statistical Society. The method was first extensively used by Jevons, probably the greatest of English economists, and has the indorsement of the leading authorities in such investigations. These investigations are conducted by means of the now familiar system of "index numbers" which, being based upon the average prices of staple commodities at a time used as the basis of comparison, indicate by their variation the change in the average price level of commodities from time to time.

This great fact, this indisputable and portentons fact, of the tremendous appreciation of gold is the central point of this controversy. Rightly apprehended, it is alone absolutely destructive of all claims upon the part of the gold standard to be considered a satisfactory money system. Any such claim is confronted at the very beginning of the discussion with this obtrusive and insuperable fact, viz, that during the existence of that system it has given the gold-using world a most unstable measure of values, one that has nearly doubled in twenty-five years.

Falling prices are an industrial, economic, political, and social evil of almost unparalleled proportions.

On the other hand, stable or rising prices have always been associated with prosperity and progress.

That the average price of a group of commodities gathered from all parts of the earth to one spot has fallen in terms of gold since 1873 is not disputed. In this sense gold has unquestionably appreciated. But the values of gold and commodities are of practical interest only as they in turn relate to human labor. That is the final standard by which they are rightly measured. Commodities are worth in the exchanges to:day, not the value of the labor required to produce them twenty-five years ago, but the value of the labor required to produce them now. With human effort and skill-the one kind of capital of which all men are born to some share-as the vital thing by which the value of their products shall be compared, it is apparent that the increased command of gold over a group of commodities gathered from widespread quarters may be due to any one of three causes, viz, a rise in gold, a fall in commodities, cheaper transportation.

Before the proposition that "falling prices are an industrial, economic, political, and social evil of unparalleled proportions," is accepted, it is important to know to which of the above causes they are due. If it cost 50 or 60 cents per bushel to ship wheat from Chicago and similarly situated primary markets to London in 1873 , and by reason of better transportation facilities the cost in 1897 was reduced to 20 cents, a corresponding fall of the price of wheat in London can not be regarded as either an industrial, economic, political, or social evil. While it may occasion loss to some individuals, it is greatly to the benefit of the masses, and even the few who incidentally suffer are compeusated by benefits due to the same cause. Every reduction in the labor cost of transportation and of exchanging the products of the various parts of the earth tends to endow the individual with the skill of all the race and with the resources of every land and clime. Likewise, if the invention of the self-binder and other machinery has made it possible to produce a bushel of wheat with less outlay of labor than formerly, a corresponding fall in the price of wheat is not an evil.

And so before stable or rising prices can be admitted to signify general prosperity and substantial progress, it must be knowu whether
they are due to a healthy expansion in the demand for actual use or to some other cause. The former is always welcome, because it signifies increased purchasing power in the people. It indicates their general employment and a well-balanced condition in production. Coming after a period of stagnation, paralysis, and timidity, such rising prices bring cheer and relief.

But prices that rise and prices that fall merely because the money in which they are stated is undergoing a change are alike to beavoided. They give nothing to one that they do not take from another. They alter contracts and obscure and confuse normal relations. Rising prices that are caused by depreciating money are no more a factor in progress than speculative or "boom" prices are a factor in industry.

The reduction in the labor cost of production and transportation may be called one of the "notorious commonplaces of recent economic history." It is the one indisputable fact bearing directly upon what the foregoing quotation calls the central point of this controversy. To what extent is the fall in prices of a group of commodities, gathered from the four quarters of the globe, due to the reduced labor cost of producing and of transporting them to one spot, and to what extent is it due to a rise in gold compared to labor? This analysis must be made, and the legitimate decline due to the elimination of labor-cost separated from the total decline before the appreciation of gold compared to labor, or the consequent injustice of the gold standard to the laboring millions, can be proven. If a given amount of labor commands as much gold as formerly, but through a stable relation to gold commands more commodities, the decline in the latter is not something to be deplored. On the contrary, it affords the simplest and most effective means by which the benefits of progress may be distributed to the masses.

If prices fall to correspond with improvements in production, the benefits go direct to all cousumers, the iguorant and intelligent, the weak and the strong, sharing on comparative equality iu proportion as they are consumers. On the other hand, if commodities are always to be stable or rising in price, no matter to what extent labor may be eliminated from them, the benefits from such improvements reach the masses more indirectly, slowly, and unevenly. Each wage-earner to get his share must obtain a certain advance in his rate of pay. How much that advance should be be does not know, and a fight for it always involves risks and difficulties which all are not equally ready or able to meet. The average man is much more independent in claiming the bottom price on what he wants to buy than in demanding the highest price on the labor or products he has to sell.

If all products could be exchanged on the basis of the labor and slill required to produce them, and all services rendered and loans contracted upon the basis of a return in kind of day's work for day's work, that would seem to be an ideally accurate and equitable arrangement. The apparent advantage to the lender in receiving, by the lapse of time, a more efficient labor than he gave, would be promptly offset by the falling interest rate, and at most is. a small factor when the average length of loans is considered. It is much more than balanced by the advantages to the masses of a standard which is just to the wage-earner and a stable measure for the exchanges. The primitive exchanges began with an exchange of labor, and the same results are obtainable now by using for the measurement of values a standard which maintains a steady relation to labor-a commodity, for example, in which a given amount of labor commands, throughout a term of years, an approximately level price.

The tendency of wages in gold has been a subject of active controversy. They have been acted upon by many in!!uences arising from constantly changing conditions. The new and more rapid means of communication between countries, the drawing together of all parts of the world and mingling of all races of men, have brought the latter in closer competition with each other and had a leveling effect upon wages as upon products. The use of new machinery has changed the character of many trades, so that a different grade of labor is now used in them, and comparisons with forwer wages are in such cases misleading. The entrance of women into many occupations has brought a new competitive influence that has had its effect. All of these considerations must be given due weight before the influence of the money standard can be calculated. On the whole, however, the evidence seems conclusive that a given quality of skill or giveu amount of manual labor is better paid now than during a term of years preceding. 1873. Mr. Augustus Sauerbeck, of London, whose tables of commodity prices are accepted as reliable, in his original paper upon prices, published in 1886, said:
There is much difference of opinion whether wages have changed materially. They bave been reduced in many branches, but are probably in all cases still higher than before 1870, and the reduction has certainly been in no proportion to the fall in prices.

In the field of transportation it is quite certain that wages have not declined, and consequently whatever fall in commodities is due to a decline in freight rates is net gain to producer and consumer. The decline due to improved methods of production can not be so accurately determined.

The agricultural classes are most often named as the greatest sufferers from the continual decline, and if the examination is limited to the agriculturists of the old countries-those located in close proximity to great markets in which, until recently, they enjoyed decided advan-tages-the claim that a great fall has occurred is amply sustained. But if prices in markets distant from these old centers of population, yet supplying them, are examined, it will be found that the decline is comparatively small. For illustration the following tables are given, showing the average value in gold of the principal farm products mar. keted in Chicago for each year from January 1, 1861, to June 30, 1898. The average value of wheat is based on the highest and lowest sales on the Chicago Board of Trade for each day of the period. The values of oats and corn are based on the highest and lowest sales on the 1st, $10 \mathrm{th}, 15 \mathrm{th}$, and 20 th of each month. For the purpose of comparison the average price of English wheat in Liverpool is also given.

## Average Prices of No． 2 Spring Wheat at Chicago．

The course of prices upon beef cattle and packing hogs, live weight, in Ohicago since 1878 is shown by the tables below, the figures being compiled from the records of the Chicago Live Stock Exchange. The following letter accompanied the statement:

The Chicago Live Stock Exchange, Office of thi Secretary, Union Stock Yards, Chicago, Ill., November 24, 1898.

Mr. George E. Roberts,
Director of the Mint, Washington, D. C.
Dear Sir: Referring to your favors of October 6 and November 19, 1898, in re average values of sales of live stock on the Chicago market, I beg leave to hand you herewith statement, which is self-explanatory.
These figures have been carefully prepared and are to be relied upon. As indicated, they are compiled from daily sales. The daily saies are averaged weekly and recorded, the weekly averages are averaged monthly, and the monthly averages are averaged annually. My records do not go back of A. D. 1878.

Very respectfully,
C. W. Baker, Secretary.

Yearly Average Pricrs per Hundrfd Pounds for 1,200 to 1,500 Beeves, and Heavy Packing Hogs Averaging 250 to 300 Pounds on the Chicago Lives Stock Malret for Twenty Years and Six Months, Compilidd by the Chicago Live-Stoci Exchange from Daily Avirage Salis, Following the Same Classification Througeout the Entire Period.

| Years. | Cattle. | Hogs. | Years. | Cattle. | Hogs. |

| 1888. | 4.70 | 5.70 |  |  |  |

a First six months.
Following the practice of representing later periods by index num bers or percentages of a base price, in the table below the period from 1861 to 1870, inclusive, is taken as the base. It would seem fair to use the average of these ten years as representative of prices before the movement for the exclusion of silver from free coinage began. It was not a period of low prices, but rather of high ones compared with prior years. The tables for live cattle and hogs are completed from 1877 back to 1861 from private records which are believed to be trustworthy, and which are consistent with newspaper quotations tor that time.

Summary of average Prices, in Gold.

| Years. | Liver. pool. | Chicago. |  |  |  |  |

| 1881-1890. | 69 | 104 | 100 | 99 | 108 | 139 |
| 1891-1897. | 54 | 82 | 85 | 87 | 93 | 123 |

The price of English wheat in Liverpool averaged the same in the first two ten-year periods, and then fell rapidly. The price of wheat in Chicago averaged 15 cents per bushel higber in the second period than in the first. Transportation rates were falling and enabled an advance in the one place without any in the other. In the period 1891-1897 wheat in Liverpool was down to 54 per cent of the base price, while in Chicago it was only down to 82 per cent of the base price. The difference between the two percentages is due to the reduction in the cost of delivering the grain from Chicago to Liverpool.

It is the price which the producer receives for his wheat that determines the supply. No matter how fast the price was falling in the Eng. lish market, so long as the price received at Chicago, Buenos Ayres, Bom. bay, Odessa, and similar markets, which stood for great areas of cheap and rich lands, remained remunerative, so long was an ample supply of wheat certain to be forthcoming, no matter how disastrons the result was to the farmer in Europe or the eastern part of the United States.
$W$ hile the reduction in the cost of transportation accounts for a large part of the fall in wheat, the remainder can not all be charged to the money standard. There is yet to be estimated the reduction in the cost of production affected by the self-binder, improved threshers, and other machines.

The figures for the visible supply of all the grains show that the years of lowest prices have been years in which greatly increased supplies were offered on the markets. The records available show but five years in which the stocks of wheat in sight on the first day of July, which is just before the new crop comes on the market, have exceeded $100,000,000$ busbels, and those years were 1892, 1893, 1894, 1895, and 1896. The figures since 1889 have been as follows:

Wheat Stocks in the United States, Canada, Europe, Afloat for Europe, and in Australia.
[ By wire and cable to Bradstreets.]

| Period. | Uuited States and Canada. | Europe and alloat. | Anstralia. | Totals. |
| :---: | :---: | :---: | :---: | :---: |

| July 1, 1894........ | 73, 503,000 | 73, 016, 000 | 7, 300, 000 | 154, 319, 000 |
| July 1, $1895 . . . . . .$. | 60, 117, 000 | 70, 760, 000 | 5, 800, 000 | 136, 677, 000 |
| July 1, 1896........ | 63, 281, 000 | 41,920, 000 | 2,600,000 | 107, 801, 000 |
| July 1, 1897........ | 28,202, 266 | 50,200,000 | 1,300,000 | 79,702, 266 |

All of these facts are pertinent to a discussion of the relation of wheat to gold, and so each and every article in any table given to prove an illegitimate rise of gold must be traced in its economic history before its true value in the argument can be determined.

## ACKNOWLEDGEMENTS.

The acknowledgements of the Director are due to the clerical staff of the Bureau, and to the officers and clerks of the various mints for the zeal and fidelity they have shown in the performance of the duties required of them.

Respectfully yours,
Geo. E. Roberts;
Director of the Mint.
Hon. Lyman J. Gage,
Secretary of the Treasury.

\section*{REPORT OF THE CHIEF OF THE SECRET SERVICE DIVISION.}

\author{
Treasury Department, \\ Sedret Service Division, Washington, D. C., August 25, 1898.
}

SIR: I have the honor to submit herewith the thirty-third annual report, containing a summary of work of the Secret Service Division during the fiscal year ended June 30, 1898.

The arrests by agents of this division and other duly qualified officers numbered 705.

The offenses alleged were as follows:
Manufacturing, having in possession, dealing in, passing and attempting to pass
counterfeit paper money \(-\ldots . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . ~\) 8
counterfeit paper money -............................................................................
attempting to pass such altered obligations............................................. 39

Passing Tennessee State warrant as United States note................................ 1

Making and having iu possession lithograph stones for counterfeit notes......... 3
Manufacturing, dealiug in, having in possession, and passing counterfeit coins.. 507
Mutilating, having in possession, and passing mutilated coins...................... 3
Having in possession molds and material for manufacturing counterfeit coins... 13
Counterfeiting foreign securities.............................................................................. 6

Violating United States postal laws............................................................................. 5

Uttering forged \(\$ 500\) United States bond................................................................... 1

Attempting to defraud the United States through false or forged claims.......... 11
'Total .............................................................................................. 705
Of the above number of persons arrested, 269 were convicted, 290 are awaiting action by the courts, 1 died while awaiting examination, 1 is a fugitive from justice, and 144 were acquitted.

The cases above referied to were distributed among the States and Territories as follows:
Missonri 66 Virginia ..... 24
Peunsylvania ..... 63

Printer's varnish, paint, and oils (cans) ..... 46
Oil stoves ..... 4
Printer's ink rollers ..... 15
Scales ..... 2
Revolvers ..... 2
Plating batteries ..... 6
Rolling machine ..... 1
Hand punch and large shears combined ..... 1

Also a large quantity of tools and material, consisting of files, wrenches, tongs, pinchers, screw-drivers, reeding tools, printer's plate, knives, hand bellows, bar tin, and lead; also chemicals of all kinds used in plating and photographing.

Twenty claims for back pay and bounty were investigated for the Auditor for the War Department. For the Auditor for the Interior Department twenty claims for reimbursement of expenses incident to the last sickness and burial of deceased pensioners were investigated. These claims aggregated \(\$ 12,753.81\). The amount allowed by the Auditor after investigation was \(\$ 2,710.04\), a saving to the Government of \(\$ 10,043.77\).

From time to time agents of the division have been detailed to make special investigatious for other Departments of the Government, the pay and expenses of the agent in every case being defrayed by the Department requesting the service. A notable instance of this special service was the investigation of violations of the naturalization laws in Philadelphia, Pa., which resulted in the arrest of 10 persons, most of whom were convicted and sent to the penitentiary.

The simplification of modern processes of photo-engraving has tempted novices to euter the field in competition for criminal honors with the older members of the craft and has resulted in the floating of an unusually large number of counterfeits, nineteen new ones and one reissue of an old one having made their appearance during the year. Of these but five are in any sense dangerous, the others being so quickly detected through their crudity of execution as to discourage the makers. Of the five dangerous notes, three were the work of Frank Holston, an Illinois criminal, who was arrested and his entire outfit captured. The fourth, a \(\$ 10\) silver certificate of excellent appearance, was discovered in Colorado, and its circulation was confined to a limited area. The fifth was a \(\$ 100\) silver certificate, which was detected in January, 1898, and was by far the most dangerons of any of the notes produced in recent years. Its existence was considered so great a menace as to warrant the recall of the entire issue.

So-called "trade checks" and "token money" circulating in various parts of the United States in lieu of lawful money have been a fruitful source of annoyance, and, acting under the advice of the law officer of the Department, the division has suppressed them and warned the
users against a repetition of the offense. Another abuse of the circulating medium has been found in an advertising "sticker" attached to the standard silver dollars. Coins bearing the " stickers" cease to be legal tender, and bankers generally through the West have complained of the use of the coins for such purposes. An opinion from the law officer of the Department, holding that a coin bearing one of the "stickers" is defaced within the meaning of the statute, has resulted in a partial suppression of the nuisance through the agents of the division.

Comparative statement.

Complaints relating to the use of Confederate facsimiles originally used as advertising matter and later colored and passed on ignorant people as genuine money led to a crusade against this form of advertising, and quantities of the facsimiles, with the plates from which they were printed, were seized and destroyed. These seizires account for the unusually large total credited to "Imitations and facsimilies of notes" in the comparative table.

The following statement shows the character and amount of expenditures for "suppressing counterfeiting and other crimes" during the year:
\begin{tabular}{|c|c|}
\hline Transportation & \$4, 664. 06 \\
\hline Subsistence. & 6, 767.00 \\
\hline Incidentals & 12,832. 06 \\
\hline Service & 44, 911.50 \\
\hline & 69, 174. 62 \\
\hline Credits (amounts received from United States marshals) & 211.92 \\
\hline & 68, 962.70 \\
\hline Rewards. & 1,485.00 \\
\hline Total & 70,447.70 \\
\hline
\end{tabular}

Amount appropriated, \(\$ 73,000\).
Balance, \(\$ 2,552.30\), to be used in the settlement of claims for reward.
Of the \(\$ 2,000\) appropriated for expenses incurred in the investigation of claims for "reimbursement of expenses incident to the last sickFI \(98=55\)
ness and burial of deceased pensioners," under section 4718, Revised Statutes, the following amounts have been expended:

Immediately after the declaration of war with Spain, the War Department called upon this division for operatives to investigate the actions of suspected agents of the Spanish Government, and a special fund placed at your disposal by the President was credited to the Secret Service Division to defray such expenses as might be incurred in this work. An auxiliary force of what were termed "emergency operatives" was organized, the special qualifications being a thorough knowledge of Spanish and experience in investigation. The regular force of the division was also employed in the work wherever necessary. Hundreds of cases referred by the War Department were investigated, and, as a result of the careful and conscientious work of the operatives, the spy system inaugurated by Spanish agents was disorganized, emissaries in this country arrested, and the principals, who had been sheltering themselves in Canada, were ordered to leave the country. Up to and including June 30, 1898, there had been drawn against this special fund \(\$ 7,779.72\).

In the prosecution of certain cases during the year, it became apparent that the existing statutes do not sufficiently and clearly cover some modern processes used in counnterfeiting, and the following draft of section 5430, Revised Statutes, amended to correct this fault, was prepared by this division, and by you referred to the Congress for consideration. It is to be hoped that it may be favorably acted upon at the earliest opportunity.

\begin{abstract}
Sec. 5430. Every person having control, custody, or possession of any plate, stone, or other thing or any part thereof, from which has been printed, or which may be prepared 'by direction of the Secretary of the Treasury for the purpose of printing, any obligation or other security of the United States, who uses such plate, or knowingly suffers the same to be used for the purpose of priuting any such or similar obligation, or other security, or any part thereof, except as may be printed for the use of the United States by order of the proper officer thereof; and every person who by auy way, art, or means makes or executes, or causes or procures to be made or executed, or assists in makiug or executing, or sells or brings into the United States from any foreign place without authority of the Secretary of the Treasury or other proper officer, or who hay in his control, custody, or possession any plate, stone, or other thing intended to he used in forging or counterfeiting any such obligation, or other security, or any part thereof; or who has in his coutrol, custody, or possession any plate, stone, or other thing engraved, or in anp other manner made after, or in the similitude of any plate, stone, or other thing from which any such obligation, or other security bas been printed, with intent to use sucb plate, stone, or otber thing, or suffer the same to be used in forging or counterfeiting any such obligation, or other security, or any part thereof; or who has in his possession or custody, except nuder authority from the Secretary of the Treasury or other proper officer, any obligation or other security, made or execnted after the similitude of any obligation or other security issued under the authority of the United States, with intent to sell or otherwise use the same; and every person who prints, photograpls, or in any other manuer makes or executes, or causes to be printed, photographed, made, or execnted, or aids in printing, photographing, making, or executing any engraving, photograpb. print, or impression in the likeness of any such obligation or otber security, or auy part thereof, or who sells any such engraving, photograph, print, or impression, except to the Unitell States, or who brings into the United States frum any foreigu place any such engraving, photograph, print, of
\end{abstract}
impression, except by direction of some proper officer of the United States, or who has or retains in his control or possession, after a distinctive paper has been adopted by the Secretary of the Treasury for the obligations and other securities of the United States, any similar paper adapted to the making of any such obligation or other security, except under the authority of the Secretary of the Treasury or some other proper officer of the United States, shall be punished by a fine of not more than five thousand dollars, or by imprisonment at hard labor not more than fifteen years, or both.

The following amendments were also drafted and submitted by you, the sections in their existing forms being inoperative, because of the absence of penalty clauses:
Section 4 of "An act further to prevent counterfeiting or manufacture of dies, tools, or other imple. ments used in counterleiting, and providing penalties therefor, and providing for the issue of search warrants in cerlain cases." (Vol. 26, chap. 127, p. 742, U.S. Stat. L., 1884-1891.)
That all counterfeits of any of the obligations or other securities of the United States or of any foreigu government, or counterfeits of any of the coins of the United States or of any foreign yovernment, and all material or apparatus fitted or intended to be nsed, or that shall have beeu used, in the making of any of such counterfeit obligations or other securities or coins hereinbefore mentioned, that shall be found in the possession of any person without authority from the Secretary of the Treasury or other proper officer to have the same, shall be taken possession of by an authorized agent of the Treasury Department and forfeited to the United States, and disposed of in any manner the Secretary of the Treasury may direct. Any person having the custody or control of any such counterfeits, material, or apparatus, who shall fail or refuse to surrender possession thereof upon request by any such authorized agent of the Treasury Department, shall be punished by a fine not to exceed one hundred dollars or by imprisonment not more than one year, or both.
Section 5 of "An act authorizing the appointment of receivers of national hanks, and for other purposes." (Chap. 156, p. 218, Supp. Rev. Stat., 1874-1881.)
That all United States officers charged with the receipt and disbursement of public moneys, and all officers of national banks, shall stamp or write in plain letters the word "counterfeit," "altered," or "worthless" upon all frandulent notes issued in the form of or intended to circulate as money, which shall be presented at their places of business; and if such officers shall wrongfully stamp any genuine note of the United States, or of the national banks, they shall, upon presentation, redeem such notes at the face value thereof. Any such United States officer, or national bank officer, who shall knowingly fail to comply with the provisions of this act shall be punished by a fine of one hundred dollars, recoverable one-half to the informer.

The necessity for a statutory provision which should enable the Government to prosecute those who willfully conceal incriminating knowledge of the possession by others of counterfeits, suggested the following proposed law, which has the unqualified indorsement of the law officer of the Department:

\section*{AN ACI further to prevent connterfeiting and prescribing penalty.}

Any person baving knowledge or information of the possession or handling by another of any counterfeit of any obligation or other security of the United States who shall refuse to divulge such knowledge or information to any duly qualified officer or agent of the United States Treasnry Department upon demand shall be punished by fine of one hundred dollars, or imprisonment not to exceed one year, or both such fine and imprisonment, in the discretion of the court.

\section*{Respectfully submitted.}

\section*{To the Honorable \\ The Segretary of the Treagury.}

\section*{REPORT OF THE BOARD OF UNITED STATES GENERAL APPRAISERS.}

Office of Board of U. S. General Appraisers, New York, N. Y., October 1, 1898.
Sir: We have the honor to submit our eighth annual report, which embraces the period from October 1, 1897, to September 30, 1898.

\section*{REORGANIZATION.}

On the 22d of October, 1897, the Department, by its circular of that date (a copy of which, with certain other statistical information, will be found in the appendix \({ }^{1}\), established new regulations "for the organization of the Board of United States General Appraisers, aud for the orderly conduct of its business."

On the same date, in pursnance of section 10 of such regulations, General Appraiser Ham was designated by the Secretary of the Treasury to act as president of the General Board of General Appraisers. \({ }^{2}\) General Appraisers Lunt, Ham, Sharretts, Jewell, and Shurtleff were desiguated for the duty of reappraising merchandise, under section 13 of the customs administrative act, \({ }^{3}\) and General Appraisers Somerville, Tichenor, Ham, Wilkinson, and Sharpe were designated for classification work, under section 14 of the same act. \({ }^{4}\)

On the 25th of October General Appraisers Somerville, Tichenor, and Ham were designated as a board of three on classification work, under article 11 of the regulations aforesaid, \({ }^{5}\) and on the 29th of October the following boards of three on reappraisement were designated, under article 12 of the new regulations: \({ }^{6}\)

Board 1.-General Appraisers Lunt (chairman), Sharretts, and Jewell.
Board 2.-General Appraisers Jewell (chairman), Ham, and Sharretts.
Board 3.-General Appraisers Shurtleff (chairman), Ham, and Lunt.
On the same date the following tea board was established for the consideration of protests coming before the board under the act of March 2, 1897, for the prevention of the importation of impure and unwholesome teas: \({ }^{7}\)

Board.-General Appraisers Sharretts (chairman), Lunt, and Jewell.
Copies of the orders relating to the foregoing-described boards will be found in the appendix.
\begin{tabular}{llll}

\({ }^{2}\) Appendix B. & \({ }^{\text {Apppendix }} \mathrm{D}\). & \({ }^{6}\) Appendix F. &
\end{tabular}

\section*{NEW OFFICES.}

The offices of this board were transferred on the 1st of May from the quarters formerly occupied, at the corner of Bleecker and Wooster streets, to the new Government building, corner of Washington and Christopher streets, the ninth floor of which having been assigned to the board and fitted up for its use.

The arrangement of the offices is very satisfactory and well adapted to the work of the board. The crowding of several general appraisers into one room has been avoided by apportioning a separate office to each. Large and well-appointed audience rooms bave been assigued for the reappraisement and classitication boards, and a sample room is, for the first time in the history of the board, thoroughly and properly equipped. Ample space is also provided for the clerks and records, remote from disturbance or interference by the general public, and a convenient room, designed exclusively for use as a library, has been set apart for that purpose.

The fact, however, that the General Appraisers now occupy separate rooms at such distance from the clerical force as to make it necessary to assign clerks to them as special assistants, has reduced the clerical force available for the current work. The distribution of the offices around the four sides of the building, while unavoidable, has been found to occasion considerable delay by reason of the time consumed in travers. ing the long corridors. This makes the present force of messengers entirely inadequate to the ueeds of the office.

Some delay has been occasioned in the fitting up of the tea room, the library, and the supply and files rooms. These, however, are expected to be completed within a few mouths.

\section*{EMPLOYEES. \({ }^{1}\)}

The employees of this office number 38, as follows: A chief clerk, 29 clerks, 6 messengers, 2 openers and packers, and 1 chairwoman. Of these, 6 clerks, 3 inessengers; and 2 openers and packers are engaged exclusively on the reappraisement work; being one more than the number employed at this port for ten years previous to the establishment of the present board.

Eighteen clerks and 1 messenger are engaged in the classification work; 1 clerk has charge of the correpondence records; 1 of the tea board records, and 2 of the reports and sample work.

Of the 18 clerks engaged in the classification work, 4 are employed as amanuenses or private secretaries to individual general appraisers; 2 are employed coustantly as reporters of testimony, and 2 are detailed to the service of the counsel for the Government before the board, leaving only 10 for the work of recording, examining, and filing protests, writing, compairing, and mailing decisions, and attending to the numerous details of the work.

\section*{SUMMARY OF WORK.}

A portion of the work covered by this report was performed under the regulations and the aduinistration in force prior to the 22 d of October, but the period was so short, twenty-two days, that this report can, for all practical purposes, be considered as showing the result of a full year's work under the new regulations.

\footnotetext{
! Appendix P.
}

The details of the work will be found fully set forth in the tables in the appendix, but a short summary of it abstracted from the tables will perhaps give a better general idea of the labors of the board.

During the past year this office has received 16,969 protests on classification, 3,464 appeals to reappraisement by one general appraiser, 1,053 appeals to reappraisement by a board of three general appraisers, and 284 protests against rejection of teas, and has decided 19,213 protests on classification, 4,337 appeals to reappraisement, and 278 tea protests.

In the performance of this work, hearings have been given on 8,273 protests, as to which testimony was taken in 1,317 of them (the testimony covering 4,912 typewritten pages). Hearings have been given in all the decided reappraisement appeals and tea protests, and general appraisers have visited, in the performance of their duties, fourteen different ports, some of them frequently, extending territorially from Boston to New Orleans, Galveston, San Francisco, and Portland, Oreg.

Two regular docket hearings have been conducted by the board of classification-one covering twenty-two dates between December 10, 1897, and February 23, 1898, \({ }^{1}\) and the other twelve dates between June 21 and July \(26,1898,{ }^{2}\) besides a large number of special hearings, covering 759 protests.

In response to orders of court, returns of the record and evidence taken have been made on 502 appeals from the board's decisions on classification, and, in compliance with the direction of the Department, 200 circulars of reappraisement decisions have been prepared and mailed to 85 ports.

In addition to this, a large correspondence, covering 6,700 letters received and 3,600 letters mailed, has been conducted, and a vast number of reports, daily, weekly, and monthly, from the appraisers at different ports have been examined, compared, and corrected.

This brief survey shows that the couduct of the business of the board comprehends an extent and variety of detail which not only requires a large force of clerks and employees, but necessitates a thorough and rigid system of administration. Nor is this abundance of detail confined to clerks and employees, but extends to the duties of each and every member of the board. This is made plain by the decisions, which in both branches of the service (classitication and reappraisement) number, d"ring the year embraced in this report, nearly 25,000 cases.

No significant change has occurred in the volume of business during the past year to distinguish it from that of previous years, except in the division of classification, where the number of decided cases very largely exceeds that of the year 1897.

\section*{REAPPRAISEMENTSS. \({ }^{3}\)}

In the reappraisement division a slightly less number of cases hare been decided than during the immediately preceding year, but this difference is accounted for by the fact that for a special reason more appeals were pending at the close of the current year than at the close of the year 1897.

The habit of undervaluation is still persistent, especially in consigned merchandise. In our report for the eleven months ended October 1, 1895, we considered the subject of undervaluation exhaustively, quoting Secretary of the Treasury Fairchild in support of the proposition

\footnotetext{
\({ }^{1}\) Appendix K.
s Appendix L.
\({ }^{3}\) Appendix I .
}
that the abuse was more prevalent fifteen years ago than at the date of the report cited. This may have been a too sanguine view, though we are still of opinion that the evil is in process of ultimate extinction, notwithstanding the fact that there are now pending consignment cases involving very large if not entire lines of merchandise, as iu 1895 , about which such wide differences of opinion regarding values exist as to render contlicting opinions inevitable. It follows that the question of the adjustment of values in reappraisement cases is the most difficult one in which the board is called upon to act.

A single generalization on the subject of undervaluations found in our report for the year 1895, already referred to, is so pertinent that it is here reproduced:

Undervaluation is not only an offense against the Government, but an offense against mercantile honor. It not only depletes the revenue, but filches away the business of the honest importer and transfiers it to the undervaluer. Nor are small undervaluations less disastrous to honest competing importers than large ones. An advantaye of 5 per cent in price is sulticient to control the trade of an empire. It follows that undervaluation is a graver offense than the common one of the evasion of State, county; and city taxation, becanse in the latter cases no question of the destruction of the business of a competitor is involved.

\section*{CLASSIFICATION. \({ }^{1}\)}

The work of the general board was divided into two separate divisions or departments on October 22, 1897, under the provisions of certain regulations for the government of the board, promulgated by Department circular (No. 176) of that date. These are known as the classification and reappraisement divisions, organized under the provisions of sections 13 and 14 of the customs administrative act of June \(10,1890\).

The business of the "board of classification" has since that time been conducted as nearly as practicable in accordance with those rules. Dockets or calendars of hearings have been arranged as often as possible throughout the current year, of which the importers and the counsel for the Government were given reasonable notice, so that satisfactory evidence could be adduced-to enable the issues to be properly decided by the board. The rule is, analogously to that of the courts, to regard the classification of imported merchandise as made by the collector to be presumptively correct, unless shown to be erroneous by the record, or by the preponderance of the evidence introduced at the hearing.

Cases involving the same contention as to similar merchandise, whether from the same or different ports, are grouped and heard together, so as to reach the result of a harmonious classification, followed by like rates of duty.

\section*{SUSPENDED CASES. \({ }^{2}\)}

Where appeals are taken to the United States circuit court from a board decision, under the provisions of section 15 of the act of June 10, 1890, other protests involving the same issues are, on request of either party, placed on the file of "suspended cases" and kept there until these issues are finally settled by judicial determination. This course prevents the crowding of the court dockets with trivial customs cases, accompanied with the slow and unsatisfactory method of taking testimony in such appeals, which the law requires to be done by one of the general appraisers to be designated by the court. This practice of suspending cases, furthermore, saves the Government the expense that

\footnotetext{
\({ }^{1}\) Appendix \(J\).
\({ }^{\text {a }}\) Appendix 0.
}
would otherwise be incurred by clerical labor necessary in the preparation of thousands of returns required to be made in all appeals taken from the board's decision to the circuit courts. Prior to the organization of the board, in 1889-90, the court dockets are known to have become so burdened with customs 'suits that the Secretary of the Treasury, in calling attention to the fact, expressed the opinion that there was "no reasonable prospect of disposing of them in this generation."

The number of suspended cases now pending is something over 35,000, as against abont 40,000 in 1897, 36,000 in 1895 , and 29,000 in 1894 . As many as about 4,000 , however, involve but a single subject, and eight subjects cover as mauy as 12,000 or 13,000 of these protests.

\section*{THE WORK OF CLASSIFICATION FOR 1897-98.}

The division of classification has decided over 19,000 protests in the past year, as against about 8,800 for the year 1897 , and about 21,000 for 1896, when two boards were in charge of this branch of the work.

\section*{APPEALS TO UNITED STATES COURTS. \({ }^{1}\)}
chrcuit court.
In the southern district of New York the whole number of appeals taken from decisions of the boards since October 1, 1897, is 184 , as against 122 for the period covered by the report of last year. Many of these appeals are upon like claims aud contentions, having beeu thus taken to save the rights of appellants.

The number of returns made by the board to the circuit court since last report is 502 , as against 96 for the period covered by the last report. It may be said that of the returns made in the 502 cases, 187 were iucluded in three omnibus returns.

The number of cases in which orders for further evidence have been obtained since last report is 207 .

The number of cases in which further evidence has been taken since last report is 66. The number of hearings in said cases is 92 .

The number of cases tried in the circuit court during the same time is 34 .

The number of cases in which the Board of General Appraisers has been affirmed after trial (24), together with the number of cases in which the board has been affirmed without trial (298) and those in which the appeals from the decisions of the board have been dismissed (88), aggregates 410, as against 109 for the period covered by the report of last year. Many of these cases cover duplicate issues waich have been determined by the appellate courts; for iustance, 207 cases involving the question of initial handkerchiefs, 26 cases on the subject of leaf tobacco, 13 cases on the subject of gloves, etc.

The number of cases in which the decisions of the board have been reversed is 78 , of which 50 were reversed without argument or by consent, most of them being so reversed in accordance with decisions rendered in other cases by the circuit court of appeals. It may be stated that 9 of these latter cases cover the question of valuation of the Austrian florin and 9 the question of fees and charges.

The number of cases in which the decisions of the board have been affirmed in part and reversed in part is 4.

\footnotetext{
\({ }^{1}\) Appendix M.
}

The number of cases in which appeals have been taken from decisions of the circuit court to the circuit court of appeals during the same time is 22 , two of which have since beeu abandoued by the appellants and dismissed, and ove has been argued before the circuit court of appeals and a question of law therein certified to the Supreme Court. The remaining 19 cases are pending in the circuit court of appeals.

The number of cases heard by the circuit court of appeals during the same time is 15 , all of these cases being appealed prior 10 last report excepting 1. Of these 15 cases, the circuit court of appeals sustained the decisions of the board in 7, reversed the decisions of the board in 7 , and 1 case has been certified to the Supreme Court on a question of law, and is still pending.

We have not this year collated similar statistics from the districts other than the southern district of New York. We are aware that such statistics would be very meager, as the great bulk of customs appeals is made and heard in New York, and in many districts there are none.

We beg to repeat a recommendation from our report of 1897 , viz:

\begin{abstract}
The board desires to call attention to the advisability of making some arrangements by which it may be more promptly informed of decisions of the courts upon its decisions in other districts and circuits than the sonthern district of New York, and second circait. We receive adequate reports from this circuit, but months sometimes elapse before we have intelligence of the decisions of other courts. Both for the relief of our suspended files and the dispatch of current business it is of great importance that we should have early reports of all decisions in customs cases, and it is earnestly hoped that the Department will arrange for their prompt transmission direct to the board.

We would also respectfully suggest that the Department will cause the attention of United States attorneys to be called to the importance of avoiding unnecessary delays in bringing enstoms cases to trial.
\end{abstract}

SUPREME COURT.
The Supreme Court bas during the current year passed on the following customs cases appealed from the decisions made by the Board of General Appraisers:

United States \(v\). Klumpp (18 Sup. Ct. Rep., 311), decided February 1,1898 . This appeal involved the construction of paragraph \(29{ }^{\circ}\) of the tariff act of 1894 , in its relation to the wool schedule of said act. The board's decision was reversed by both the circuit court and the circuit court of appeals, but was affirmed by the Snpreme Court.

Fink \(v\). United States (18 Sup. Ct. Rep., 770), decided May 23, 1898, involving the construction of paragrapbs 74 and 76 of the tariff act of 1890. The Supreme Court sustained the view of the board, which, in an analogous case, had been overruled by the circuit court and circuit court of appeals in the eighth circuit (Missouri).

United States \(v\). Passavant (18•Sup. Ct. Rep., 219), decided January 3,1898 , involving the construction of section 10 of the act of Juve 10 , 1890 , known as the customs administrative act, and other questions.

The decision of the board was affirmed by the circuit court, but on being certified by the circuit court of appeals to the Supreme Court, was reversed by that court, two of the judges dissenting.

United States \(v\). Salerubier (18 Sup. Ct. Rep., 771), decided May 23, 1898, involving the legal sufficiency of a protest filed under the provisions of section 14 of the customs administrative act ( 26 Stat., 131). The board reversed the action of the collector, and their decision was sustained by the circuit court, and, on being certified by the circuit court of appeals to the Supreme Court, was affirmed by that court.

United States \(v\). Goldenberg (18 Sup. Ct. Rep., 3), decided October

25,1897 , involving the construction of section 14 of the act of June 10, 1890 , as to the time within which duties should be paid on filing protests.

The board's decision in this particular case was reversed by the circuit court, and that reversal was sustained by the Supreme Court.

The board, it is but just to add, in a decision made in November, 1890 (In re Stevens, G. A. 150), had taken a view of this subject in entire accord with that of the Supreme Court above cited, but had reversed that ruling in deference to the opinion of the Attorney-General, as stated in the later decision appealed trom by the importers (In re Áuffmordt, G. A. 1035).

\section*{LITIGATION UNDER VARIOUS TARIFF ACTSS.}

We append a comparative statement showing the number of protests received by the board during the first twelve months after the enactment of each of the tariff acts of 1890,1894 , and 1897 , respectively. \({ }^{1}\)

Leaving out the very large number involving the constitutiouality of the McKinley Act of 1890 (over 32,000 ), the date on which the Wilson Act of 1894 went into effect (over 3,600), aud the time the Dingley Act of 1897 became operative (over 900 ), the following results may be summarized:

\section*{Protests filed.}

Act of 1897 ................................................................................ 12, 149
It will thus appear that customs litigation has apparently lessened, and not increased, under the operations of the present tariff act of 1897.

\section*{SUPERVISION OF APPRAISEMENTS AND CLASSIFIOATION.}

The bureau of samples, long pressed upon the attention of the Department as an essential coudition of efficient administration, and finally established uuder the provisions of the customs administrative act, is of increasiug utility, and is now receiving the careful direction its importance demands.

Until the removal of this office to its present office, proper accommodations and cases for samples were lacking, but with the added facilities now possessed its growth will not be further hampered. The power of supervision provided for in section 12 of the act of June 10, 1890, has been exercised by the board as far as practicable under existing conditions, and the extensive use of samples proves to be of the highest value in securing uniformity of appraisement and classification.

The system of reports to the board of importations, and the action thereon of the various ports, was early in the present year changed from monthly to daily issues at 81 of the more important ports. (S. 18964.) This change has been productive of excellent results through the increased facilities thereby afforded for closer observation of the various transactions involved, and the shortening of the period between the custom-house action and the review thereof by this office. It thus becomes practicable to correct errors more promptly, and usually in time to apply such corrections to the merchandise in question, as well as to subsequent importations of like character.

Approximately, 14,000 reports have been received and examined during the past year, together with the accompanying samples, the number and variety of which have been extensive; and a voluminous

\footnotetext{
\({ }^{1}\) Appendix \(\mathrm{J}^{3}\).
}
correspondence has been conducted relative to the errors discovered and corrected.

\section*{APPENDIX A.}

REGULATIONS FOR THE GOVERNMENT OF THE BOARD OF GENERAL APPRAISERS AND FOR THE TLANSACTION OF BUSINESS BLTORE THE BOARD.
[Department Circular No. 176. Division of Customs. 1897.]
Treasury Department, Office of the Secretary, Washington, D. C., October 22, 1897. To officers of the customs and all other's concerned:

The following new regulations are hereby established for the organization of the Board of United States General Appraisers, and for the orderly procedure of business before such board:
1. The executive administration of the board shall be committed to the president. He shall preside at all meetings of the general board, shall have control of the clerical force, and perform the duties and exercise the authority usually devolving upon an executive officer. There shall be a regular meeting of the general board at 11 o'clock a. m. on the second Saturday of every month. Special meetings of the geneal board shall be called by the president at such times as in his judgment the interest of the public service requires, and also whenever so requested by one or more general appraisers. A record shall be kept of the official proceedings at all meetings.
2. liegnlar bearings of protests on classification shall be held at the port of New York whenever the public interests may require and the condition of the business of the board permits. A docket or calendar of such hearings shall be arranged by the board of classification, and shall include all protests except such as shall have been suspended under the provisions of article 5 of these regulations.
3. Notice of hearings in each case will be mailed, at least two weeks in advance of the date set, to protestauts or their attorneys of record, and they may appear, either personally or in writiog, and submit their protests for decision, upon the recoud or upon evidence presented, or may abandon the same, or apply for an order of continuance, or of suspension.
4. Continuances to the next docket may be granted on the gronnd of the inability of the parties in interest to be present, or by reason of the unavoidable absence of impurtant witnesses, or when more time is required to oldtain further evidence, or for any other reason satisfactory to the board.
5. Suspensions will be granted on written application, describing the protest, and specifying the case on appeal to the courts, and the issue involved, aud ouly when the board is satistied that such case actually involves the sable question, and is being pushed to trial; also that there is no evidence necessary to the determination of the protest that is liable to be impaired through lapse of time. The board may order the production of samples, or other proof of facts at the hearing, and may then suspend the further consideration of the protests.
6. Objections on the part of the counsel for the 'Treasury Department, or of the importer or his counsel, to the continuance or suspensiou of protests at hearings will be duly heard and considered by the board. Applications also for the revocation of orders of suspension or continuance of protests, previonsiy made, will be entertained by the board in dine course, and, if the reasons presented are deemed sufficient, the protests will be decided, or set for hearing, within the discretion of the board, after due notice to the protestants.
7. All suspended protests will be promptly decided upon the termination of the suits involving the guestions at issue, or whenever it appears to the satisumeno of the board that the trial of the suits involving the issues is being unnecessarily: delayed, or whenever the protests involve fyivolous clains, or are found to be manifestly defective in any respect.
8. The bourd will entertain applications for special hearings whenever urgency can be shown, and in case numerous witnesses are to be examined.
9. (In lien of article 932, Cnstoms Regulations.) The collector or officer acting as such shall, in cases arising under section 14 of the customs administrative act of June 10,1890 , transmit to the Board of General Appraisers, along with the protest, a statement of the reasons which governed him in affirming the assessment of duty, together with any special report which he may have received from the naval officer or from the appraiser, and any other information rele ant to the matter, in his possession, including a sample of the merchandise whenever practicable.
A receptacle shall be provided at every custom-honse for notices of protest, and the date of its reception must be stamped or written upon each; also the date of entry of the merchandise and of the liquidation, the name of the importing vessel, and serial number of the protest indorsed thereon. A permanent record shall be 1.ept by collectors of customs, or officers acting as such, aud by naral officers, of all jrutests at their respective ports, with particulars of the successive steps taken in each case.
10. (In lieu of article 1134, Customs Regulations.) General appraisers are anthorized by law to exercise joint powers only as boards of three, duly designated by the secretary of the Treasury; but for the orderly dispatch of business and for the formation of joint reports and recommendations to the Secretary of the Treasury they will be known as "The General Board of Geueral Appraisers." The Secretary will designate one of their number as president and executive ofticer of the "general board," who shall be duly recognized as the medinm for all communications to or from such board, and who may designate any nember of the general board to be acting president during lis teruporary abseace.
11. Hive general appraisers, of whom the president of the general board shall be one, will be designated by the Secretary of the Treasury for the examination and consideration of cases arising under section 14 of the customs administrative act of June 10, 1840, three of whom (to be known as "The board of classitication") will lie designated from time to time as a "Board of three general appraisers, which shall be on duty at the port of New York," and shali perform the riuties devolved upon such a board by said section. The other two geueral appraisers so designated shatl aid in the examination and investigation of classitication cases and in their preparation for decision, and, subject to the approval of the Secretary of the Treasury; may be designated by the president of the general board to fill vacancies on said "board of classification" occasioned by the temporary absence of any member thereof fiom official duty, or for other good and sufficient reason, in his discretion. The Secretary of the Treasury will designate boards of three to visit ports orher than New Yorir, for the purpose of reappriaising imported merchandise and for deciding questions arising under said section 14, at such times as the internsts of the public service may require.
12. Five geveral appraisers, of whom the presiden tof the general board shall be one, will be assigned by the Secretary of the Treasury to the duty of reappraisement under the provisions of section 1.3 of the customs administrative act of Jinde \(1 \mathrm{~J}, 1890\), who will act singly or as members of a board or of boards of three, to be designated from tine to time by the Secretary as the exigencies of the public service may require, and also to consider and decide cases arising nuter the provisions of the "Act to prevent the importation of impure and, un wholesome teis," approved Marich 2, 1897: Provided, That no general appraiser shall sit as a membor of a board of three which shall review a reappraisement made by himself.
13. The present customs regulations relating to the matters above spocified will continue in full force and effect, except so far as they may beinconsistent with these regulations.
L. J. Gage, Secretary.

Appendix B.
Washington, D. C., October 2R, 1897.
Sir: Under the new regulations this day issued by the Department, you are designated to act as president of the General Board of General Appraisers. A copy of the circular containing the new regulations will be sent you as soon as practicable.

Respectfully, jours,
L. J. Gage, Secretary.

Hon. Charles H. Ham,
United States General Appraiser, New York, N. Y.

\title{
Board 3.-General Appraisers F. N. Shurtleff (chairman), Charles H. Ham, and W. F. Lunt. \\ Respectfully, yours, \\ The President of the General Board of General Appraisers, New York, N. Y.
}

\section*{Appendix G.}

Treabury Department, office of the secretary,
Washington, D. C., October 29, 1897.
SIr: In accordance with the recommendation contained in your letter of the 26th instant, the following board is hereby established for the consideration of protests arising under the act of March 2, 1897, for the prevention of the importation of impure and unwholesome teas:
General Appraisers T. S. Sharretts (chairman), W. F. Lunt, and J. A. Jewell.
Respectfully, yours,

\title{
The President of the Gieneral Board of General Appraisers,
New York, N. Y. \\ The President of the General Board of General Appraisers,
New Yorki, N. Y. \\ W. B. Howell, ,Assistant Secretary.
}

\author{
Appendix \(H\). \\ Office of the U. S. General Appraisers, \\ New York, October 21, 1897.
}

Sir: Representation having been made to the Board of General Appraisers,designated for the reexamination of teas, that there is a general desire that protests shonld be decided with as little delay as possible, you are recquested to notify importers of teas that notices of hearings will hereafter be discontinued, unless a request for such notice is filed with the protest.
On and after November 9 next the days for reexamination of teas will be as follows:
For cases from Chicago and points west of that meridian, the first and third Tuesdays of the month; for cases from ports east of Chicago, the second and fourth Tuesdays: Provided, That sbould any Tnesday be a holiday the cases will go over until the following Tuesday.
All protests with samples reaching this office before said days will be taken up and decided, and no delay will be granted except for good reasons and at the request of the importer or the Government.
All parties having cases thus docketed will be given an opportunity, should they so desire, of appearing before the board at \(11 \mathrm{a} . \mathrm{m}\). on said days and submitting any statements or documents which they may desire to offer.

Respectfully,

\section*{J. B. Wiliernson, Jr., Chairman.}

To Collector of Customs, New Fork, N. F.

[^35]:    $a \dot{\nabla}$ alue of the rupee to be determined by consular certificate.

[^36]:    Conclusion.-During these experiments, which have extended over some three weeks, and have involved an amount of painstaking labor which we hope has not been entirely wasted, we have seen not the slightest evidence of any "creation" or transmutation.

    On the contrary, the claimant failed in every instance to recover the entire amount of silver and gold known to be present in the materials. The claimant seems to have devised a variety of irrational and wasteful methods for recovering a portion of the silver and gold known to metallurgists as being present in many commercial metals, auch as antimony and lead.

[^37]:    Denominations and Amounts of Uncurrent Gold and Silver Coins Transferred from the Treasury and Received Over the Counter at the Mint at Philadelphia.

[^38]:    *See No. 1.

[^40]:    In this country there is a great accumulation of capital, and in India there is an immense productive capacity which has not been fully developed; but, unfortunately, India does not get the benefit of British capital. This is due to the fluctuations of exchange. . Men will not risk their capital in India if by the automatic fluctuations in exchange they can not remit it back except at euormous loss. As soon as I came into office I was anxicus to see whether it was not possible to give some stability to the exchange value of the rupee. That can either be done by some international arrangement or by India endeavoring to establish a standard of her own, necessarily a gold standard. Proposals were made to us last summer by Senator Wolcott to enter into a bimetallic conference, but those proposals were confronted by the difficulty that France would not consent to join on the understanding that the rates at which silver should be taken to gold should be $15 \frac{1}{2}$ to 1 , where itis now 35 . In our view that was an impossible proposal, because it would be almost impossible to maintain that ratio, and if it had gone back it would have caused far worse disasters. I believe, however, that the obstacles in the way of India establishing a standard of her own are not as impossible to surmount as some believe, and I think it is not impossible that in the next year we may possibly make a material advance toward that object. If we could ever establish a gold standard in India, fixing the stable exchange of the rupee at 16d., subject only to the fluctuations of trade, the advantage to India would be enormous. At the present moment the great industries of tea and indigo and jute are carried on to a great extent by borrowed money, and in India money can only be borrowed at 6 to 10 per cent. On the other hand, if you can secure anything like a stable exchange you would hare all the hoarded capital of this country waiting for employment ready to be used in developing the resources of India.

    The exports of India annually exceed its imports, and the balance in its favor creates a demand for exchange on that country. This enables the Government to meet its payments in England by selling drafts on its treasuries in India. They are offered in London by the India council-that is, the council in London for the secretary of state for India-from time to time, and called council bills. The alternative method of remittance to India has been by shipping silver; and so long as the mints of India were open to the unlimited coinage of silver rupees the rate which the government could obtain for its drafts was of course dependent upon the value of silver bullion. In 1893 it proposed to divorce the value of the rupee from the value of silver bullion and hold the former up to 16 pence, no matter where the latter might go. It closed the mints, so that payments due in India could no longer be made by shipping silver and coining.rupees. This, with the 5 per cent import duty laid on silver, might be expected to increase the demand for council bills in London and raise the rate at which they could be sold. The government seems to have anticipated that when exchange was established at 16 pence gold would go to India instead of silver, for it provided that silver or currency rupees

[^41]:    The exchange value of the rupee has been artificially raised from about 1s. to 1 s . $4 d$. by the abstention of the secretary of state from drawing upon India for the full amount of the gold obligations due from India in England and by his raising gold loans in England to discharge a part of these obligations.

    On the other hand, Lord Hamilton explains that the conncil abstained from drawing more bills because the famine in India last year had affected the Government's revenue and the treasury was iu no condition to meet additional drafts. He says the loan was made to carry the Government over the famine and the extraordinary disbursements caused by the war on the frontier, and gives it as his opinion that the present rate of exchange can be approximately maintained.

[^42]:    The causes of this scarcity of money are not far to seek. They are, shortly, the withdrawal of no small portion of the European capital which Las been employed for banking purposes in India. With the exception of the capital of the Presidenoy banks and of one or two others, the capital of the larger banking institutions of India is sterling capital, and the continual fall in the value of the rupee and consequent depreciation of such sterling capital as was held in the form of money bas induced these banks (and many of their constituents also) both to remit howe to England much of the capital they used in this country and to adopt the policy of keeping as little of their capital as they can help emplojed in India. This policy was adopted by the banks before the currency legislation of 1893 , and is iu no sense a consequence of it. If the policy of that legislation is pursued to a successful end, it will provide a remedy for the state of things I describe, as it will give the banks and other capitalists an assurance that whatever capital they bring to this country for any temporary purpose they will be able to remit back without loss. But while we are still in a condition of advancing to ward the attainment of a 16 -pence rupee the very success of our efforts militates for the time against the transfer of sterling capital to India. At the present moment, for example, when the rupee is even above 16 pence, the only effect of the rate upon the exchange banker is to convince him that the less he remits to India the better for himself, for le is bringing out his money at the very top of the market. He can not possibly re-remit it at better rates and he may lave to do so at worse rates.

[^43]:    Of all the mischievous currency delusions prevalent in the mercantile world, there is, perhaps, none more mischievous than the notion that a nation can, by depreciating its standard of value, increase its power of production, of exportation, and of compettion with other nations. It is essentially akin to the old fallacy which would delude men into believing that they can grow richer by increasing the number of counters with which thej trade. Depreciation of the standard, whether at

[^44]:    "Some years ago the metallic stock of the Bank of Russia, at least to a certain extent, could not be affected by bad harvests, an unfavorable balance of trade, etc. (evils, real or imaginary, manifested themselves in the depreciation of the credit ronble.) On the other hand, the circulation, composed exclusively of notes and of billon, might remain the same when the crisis was at its beight, and at a time of great commercial activity. At present, when the bank recleems in gold its notes without any limitatioin as to amount, and may issue only $300,000,000$ of rubles in

[^45]:    Every proposal is sure to meet with more or less opposition. Especially anent a question of the monetary system, it is impossible in every country to come to a unanimous decision. A natural opposition to the present proposal is that the present silver standard shall be maintained; but with silver fluctuating violently, Japan can not maintain her present system without prejudicially affecting her national development, as I have already explained. Another and stronger olojection is that based on metallic theories which are supported by many scholars and merchants engaged in the Eastern trade. Bimetallism, implying as it does the alternate use of gold and silver as standard, is not easily feasible; it is impossible to be carried out by any single country independently of other countries. An international monetary conference has been held several times, with a view to maintaining the value of silver and carrying out a binetallic system, but always in vain. The latest conference was opened in Brussels, Belgium, in 1892, at the instance of America, which is most keenly interested in silver. Twenty countries were represented in that conference, but the meeting closed without coming to any definite result. Subsequently, it has been proposed in various countries since 1895 again to hold such conference, but the matter still remains undecided, and even if such conference be opened again it is deubtful whether it will come to any decision. In the year following the conference at Brussels, one of the most powerful countries-Great Britain-reformed the monetary system of India, and an international bimetallic system has become more hopeless than ever. Even supposing an international monetary union is possible and a bimetallic system is adopted by all countries, there will be no harm caused to Japan by adopting a gold standard now. To sum up, a bimetallic system is impracticable without all powers combining; and if it is difficult to see such a union of powers, such an important proposal as the present one can not be put off on account of the uncertain bimetallic theories.

    As I have shown, anent the gold-standard proposal, neither fears nor objections have any strong basis. I wish now to speak on the necessity and benefits of the proposed change. Firstly, a gold standard has the advantage of making prices steadier, for, as compared with silver, gold is more stable in value, and if the standard of value is steady, prices a's measured by the standard must also be steady. Rising prices make markets active for a time, but will soon affect the material and

[^46]:    ${ }^{1}$ Rupee calculated at coining rate, $\$ 0.4737$.

    ## XL.-IMPORTS AND EXPORTS OF THE PRECIOUS METALS OF THE PRINCIPAL COUNTRIES OF THE WORLD.

    'Tables Showing the Value of the Gold and Silver Coin and Bullion Imported into and Exported from the Principal Countrims of the World, also the Excess of Imports over Exports or Exports over Imports, for a Series of Years.

    UNITED STATES.
    Falue of GOLD COIN and BULLION imported into and exported from the United States, fiscal years 18श5-1897.
    

    Value of GOLD COIN and BULLION imported into and exported from the Onited States, fiscal years 1825-1897-Continued.
    

    Note.-I'liere were no exports of domestic gold previous to 1826, the exports of domestic gold not being separately stated from 1826 to 1861, and in 1863 were included in the exports of domestic silver by the Bureau of statistics (Statistical Abstracts, 1879-1891). In the Abstracts for 1892-93 this item is onitted entirely, while iu the Abstracts for 1894-95 it is included in tbe gold exports, with the fol lowing note appended: "Gold and silver can not be separately stated prior to 1864, but it is probable that the greater portion of the exports was gold."

    (No. 5.)

    ## REPORT OF THE DIRECTOR OF THE BUREAU OF ENGRAVING AND PRINTING.

    Treasury Department, Bureau of Engraving and Printing, Washington, D. O., November 1, 1898.

    Sir: I have the honor to submit the following report of the operations of this Bureau during the fiscal year 1898:

    The number of sheets delivered during the year was $92,979,478$, an increase of $6,804,712$ sheets. This increase is nearly 8 per cent. The expenditures for this year were $\$ 1,570,598.46$, while the expenditures for last year were $\$ 1,450,611.86$, showing an increase in expenditures of about the same per cent as the increase in deliveries; but when we deduct from the expenditures $\$ 12,590.68$ increase of stock on hand, $\$ 30,000$ paid for machinery, which is a part of the permanent plant of the Bureau, and $\$ 6,416.30$ paid to employees detailed outside of the Bureau in excess of the amount paid during the fiscal year 1897, making in all $\$ 46,006.99$, we find that the increase in expenditures which is properly chargeable to the actual production of the Bureau is but 4.9 per cent. over the preceding year, whereas, as above stated, the increase in the work is nearly 8 per cent.

    The average cost per 1,000 sheets during the year 1897, figured on gross expenditures, was $\$ 16.83$. The average cost during this year, 1898, figured on gross expenditures, is $\$ 16.89$, on its face showing an increase of cost of 6 cents per 1,000 sheets; but when we deduct the above-named items not applicable to the actual cost of the work from the gross expenditures, we find the average cost per 1,000 sheets to be $\$ 16.36$ per 1,000 sheets, or a reduction of 47 cents per $1 ; 000$ sheets, which is equivalent to a reduction in the cost of the whole delivery of \$43,700.35.

    It is gratifying to find that the increase in compensation to the laborers and the lowest grade of skilled helpers in this Bureau, which was made as an act of justice to deserving men, has been more than offset by the reduction in the expenditures for otber purposes.

    The highest average number of sheets per employee ever handled in the Bureau was 55,991 sheets during the year 1896; whereas, during the present year the average number handled per employee has been 57,290 sheets, showing an increased usefulness during this year over the most successful previous year in this respect of 2.3 per cent. Going back still further, a comparison with the year 1893 as to usefulness of employees shows that the average number of sheets handled per employee that year was 36,650 , against 57,290 during the present fiscal year, an increased usefulness of 56 per cent.

    During the civil war, when Congress passed an act imposing a tax to be collected by the use of adhesive stamps and providing for the issue of bonds, the capacity of nearly every bank-note company in the country was taxed to the utmost limits to produce the instruments necessary to enforce it. When, upon the 13th day of June last, an act of a similar nature was approved, the impression seemed to prevail that this Bureau would be unable to furnish the necessary adhesive stamps
    to enforce said law upon the 1st day of July following, and it was proposed that contracts should be made with outside bank-note companies to aid this Bureau in that work. You will recall the controversy that occurred at that time and my pledge to supply a sufficient quantity of stamps in time to enable the Commissioner of Internal Revenue to reach collectors of internal revenue far and near by the 1st day of July.

    Although there were but seventeen days in which to execute this work, by the date mentioned, this Burean had delivered to the Commissioner of Internal Revenue 185,390,926 adhesive stamps, and every collector of internal revenue had been supplied with stamps for the collection of this tax. At the same time orders had been given for the engraving of plates to print the bond issue authorized in the same act; orders for national-bank notes had increased to a large extent; all the regular internal revenue stamps were imprinted with the date of the recent act and made available for use under it; the demand for United States notes, silver certificates, and Treasury notes was up to the full limit, and the delivery of such notes was kept at the maximum point. In addition to this, the Post-Office Department had ordered the production of a new series of postage stamps, known as the Trans-Mississippi stamps, and was demanding large quantities of them, while orders for the ordinary stamps were increased to a considerable extent. Such conditions had never before existed during the existence of this Bureau nor could the demands upon it have been anticipated and provided for, and yet it proved itself equal to the most extreme emergency.

    In this connection I desire to say that the assistant officers and employees of the Bureau can not be commended too highly for their earnest and patriotic work during these trying times.

    The furnisbing of the securities required for the purpose of meeting expenditures resulting from a state of war was, in my opinion, as essential as the presence of the soldier in the field or as the ammunition used in action, and to accomplish it it was necessary to call upon the employees for extraordinary services. At no time did any of them, when asked to volunteer to work excessively long hours, display the least unwillingness to conform to the requirements of the service. It is generally believed that, in cases of great strain where continuous work is necessary, men are better able to stand long hours of labor, and while the men in this service were faithful in every respect, I can not help commending particularly the women who so faithfully and willingly stood at their posts of duty. It should be remembered that it is impossible to go outside of this Bureau and secure the services of skilled employees, as there is no other school of training. While a great many inexperienced hands were necessarily appointed, still the main dependence was upon our regular trained force, and in many instances it was necessary to ask the women operatives to worls sixteen hours out of the twenty-four during the hottest portion of the hottest summer for many years. They responded to these requests cheerfully and willingly, and are eutitled to the greatest commendation for their fidelity.

    One of the most difficult problems to be solved with reference to the future operations of this Bureau is to perform the worl necessary under unusual demands in the regular working hours from 8 until 4 o'clock each day and during the working days of the year. Working overtime in this Bureau has its advantages. To start operations in the morning and to make the balances in the afternoon require a full hour's time. Whether the day be limited to eight hours or extended to ten or twelve, as the case may be, there is no additional time lost in the opening and balancing. Therefore the actual bours of labor are proportionately
    greater in twelve than in eight hours; but this advantage, in my opinion, is offset by the fact that it is impossible to prevent entirely the abuse of overtime privileges. In other words, it is impossible to limit the number of employees retained and paid for overtime to the actual requirements of the service. Another disadvantage is the liability to raise, without legal basis, the question of a violation of the eight-hour law. The solution of this problem is to increase the capacity of the Bureau, so far as its machinery is concerned, to an extent that will meet any emergency within the regular hours of the day.

    The conditions now existing are such that it will be impossible to print the number of sheets estimated for during the present fiscal year, or the fiscal year 1900, without continuing the operations of several branches of the service beyond 4 o'clock, particularly the printing division. Every available foot of space in the Bureau for hand plate-printing presses is now occupied, and still we are unable in the regular hours to keep up with the average number of sheets to be produced daily. We have ordered 20 additional perforating machines, 2 additional gumming machines, and 2 additional surface presses, an additional steam boiler, and 3 washing machines. Ten additional power plate-printing presses would make the capacity of this Bureau equal to the demand as to plate printing. The Bureau would then be able to execute all of its work within an eight-hour day.

    No question should arise between the plate printers and the Treasury Department as to the use of these presses in its service, for the reason that the act passed by the present Congress regulating the use of power presses will remain a continuing provision of law. It allows the use of these presses in the printing of internal revenue and postage stamps, and the use of the additional presses would, of course, be limited so as to conform to that law. Not only is it important to have these presses for the purpose of increasing the printing capacity of the Bureau, but an inspection of the expenditures of this Bureau will suggest the necessity for the use of any improved machinery which will reduce the cost as the volume of work increases. The expenditures during the year under consideration were $\$ 1,570,598.46$, with a production of $92,979,478$ sheets. The estimated number of sheets to be produced during the fiscal year 1899 is $101,693,376$. The estimated number of sheets to be produced during the fiscal year 1900 is $118,954,737$, which will increase the expenditures from $\$ 1,570,598.46$ during the years to follow, we may say, enormously; and it is the duty of the officers of the Treasury Department having control of this work, as a matter of economy, to endeavor by the use of improved machinery to save as much of this great expenditure as possible.

    Another means of reducing the cost of the work by the use of machinery is the establishment of an electric plant, operated by the steam plant already established in the Bureau. The present limited use of electricity for the direct operation of presses and for light, together with the amount of gas used for heating printing plates and for lighting, cause an annual expenditure of from $\$ 12,000$ to $\$ 15,000$, which can be reduced at least 50 per cent by the establishment of an electric plant in this Bureau to produce all the power and light needed.

    For the purpose of showing the increase of work being done by the Bureau, it may not be out of place to make reference to the current iscal year, four months of which have passed. The deliveries during these four months have exceeded an average of $10,000,000$ sheets per month, or equivalent to an annual delivery of $120,000,000$ sheets, which indicates au increase in the number of sheets to be produced over the year 1896, when the deliveries amounted to $85,000,000$ sheets, of 40 per cent.

    The average number of employees on the rolls of this Bureau during the year 1896 was 1,519 . The number of regular employees on the rolls November 1, 1898, was 1,857 , or an increase of 22 per cent.

    There has been no addition to the building since 1896. It is obvious, therefore, that the repeated recommendation for an appropriation to build storerooms, an ink mill, a laundry, aud stables is more essential at this time than ever before. In fact, it is imperative. The condition of this building, crowded as it is with operatives, is not in accordance with good business methods or proper sanitation. It is with great concern that I call attention to the immense amounts of combustible matter stored therein, which make the possibilities of fire so great as to be alarming, in the hope that Congress may be moved to furnish the necessary relief by authorizing the construction of a proper storage building separate from the main building. This material includes millinets, oils, turpentine, benzine, colors, chemicals, blanketing, paper, etc. In the use of oils and rags in printing and waste about machinery, fire by spontaneous combustion is quite possible in this building. We are, therefore, dependent upon the vigilance of our employees and watchmen to prevent damage to the building and the securities it contains in this way. When suitable outbuildings are provided, much of the space now occupied as storage rooms will be available for the expansion of some of the branches that are overcrowded, and much of the inflammable material in the main building will be removed from it to more suitable quarters. I can not urge too strongly united effort on the part of the Treasury Department to help secure an appropriation from Congress for the building so often requested in past reports.

    I desire to repeat the recommendation contained in my annual report for 1897 relative to appropriations made by Congress for the printing of securities, as follows: That appropriations for all work done in this Bureau be made direct to its own credit, so that it may not be dependent upon repayments from the Post-Office and Treasury departments for postage stamps and Treasury notes issued under the act of 1890 . As long as appropriations for postage stamps are made directly to the PostOffice Department, an effort will be made every four years by private engraving and printing establishments to secure the contract for furnishing postage stamps. This is more or less demoralizing to this service, as we have purchased an expensive plant and are employing possibly 200 operatives upon the work. If the appropriation be made direct to the Bureau each year, it will prevent any.question of this kind being raised at the end of each contract term.

    The uncertainty as to the amount of income from the printing of Treasury notes is undesirable in a service where the number of employees and the daily expenses are quite evenly adjusted to the estimated amount of work and the anticipated revenue. When this revenue is not forthcoming by reason of small deliveries of Treasury notes, it is liable to disarrange the financial balances at the end of each fiscal year. I can see no objection to making direct appropriations for the printing of these securities, just the same as is done in printing silver certificates and United States notes; and certainly the reasons above stated are sufficient to justify Congress in changing the mode of appropriating for this work.

    I beg to assure you that my efforts will be continued to improve the almost perfect system now existing in the Bureau. I thank you for your confidence in the past.

    Respectfully, yours,
    Claude M. Johnson, Director.
    Hon. Lyman J. Gage, Secretary of the Treasury.

    ## (No. 6.)

    ## REPORT OF THE REGISTER OF THE TREASURY.

    Treasury Department, Office of the Register, Washington, D. O., October 21, 1893.

    Sir: I have the honor to submit the annual report of the business of this office for the fiscal year ended June 30, 1898.

    The business of this Bureau is divided between two divisions, viz, division of loans, and division of notes, coupons, and currency, each having charge of the work indicated by its respective designation.

    ## DIVISION OF LOANS.

    The division of loans of the office of the Registor of the Treasury iss always in direct contact with the business men of the country-those dealing in United States securities, as well as with the thousands of, individuals who have invested in and are holders of United States; bonds.

    The duties devolving upon the division pertain to the issue, transfer, and exchange of United States bouds, the preparation of schedules for: the quarterly dividends of interest, and the keeping of ledger accounts with each individual holder of registered bonds in the United States and foreign countries, etc.

    The fact that promptness is necessary when dealing with securities; of the kind mentioned above makes it necessary that there shall be no clelay in the transfer of bonds; and it affords me pleasure to state that; the employees of this division are thoroughly in accord with the idea, that it is necessary to clear their clesks each day of the accumulated matter thereon, so that the worls is always current, always in hand, and always finished (except as to the cases requiring investigation) at the close of the day. It has required no urging to bring about this state of affairs; it has long existed, and as a consequence it has become a, recognized fact with the business men of the country that bonds received. for transfer one day are due for return by succeeding mail, all of the work necessary to a change of title having been accomplished in the meantime. This speaks well for the promptness and alertness of the clerical force, and they are to be commended for faithful work cheerfully performed.

    During the current year nothing of an extraordinary nature occurred. in the operations of the division. The work of the 3 per cent loan of 1898 was begun, so far as this office is concerned, about the 28th of June. At the close of the fiscal year it had only progressed far enough. to show that the undertaking was a stupendous one. This division. was removed to the new city post-office, and its force increased from 15 people to upwards of 200 . The work of issuing the bonds was then. begun, and with the close of June the fact was demonstrated that the greatest piece of elerical work ever uudertaken by this or, any other Government was successfully begun.

    The history of this division's share in that work will appear in the next aunual report. Aside from the beginning of the work on the war loan, nothing of an extraordinary nature occurred in the operations of the division during the past year.

    Following is appended a table showing the numbers and amonnts of United States and District of Columbia bonds of various kinds issued, canceled, etc., during the year as recorded upon the books of the division:

    Statiment Showing the Number and Amount of United States Bonds
    Issued during the Year ended June 30.1898.

    As it has always been considered by the Department that registered bonds are safer for the payee to handle than coupon bonds, a regulation. has long been in vogue permitting the holders of the latter class of securities to exchange them for the former. This is done by forwarding: the coupon bonds to the Secretary of the Treasury, accompanied by a, letter of transmittal, requesting the exchange, and giving name and address of the payee for the registered bonds. During the current; year coupon bonds to the amount of $\$ 12,219,150$ were forwarded for exchange as against $\$ 17,600,800$ last year. This falling off is accounted. for by the fact that when a loan is placed, the greater part of it (a ratio of 8 to 1 , probably) goes out in coupon bonds. The dealers seem to prefer the coupon bonds, as they are payable to bearer, but when the bonds reach the hands of the purchasers who are making permanent investments, registered bonds are preferred and the coupon securities gravitate toward the Treasury for exchange. After a year or two the bonds usually find their way into the hands of permanent investors, and. the exchanges gradually increase in amount. For the next year or two the exchanges will be heavy, as the 3 per cent loan, now being placed, is especially freighted with coupon bonds.

    During the year the following District of Columbia bonds were redeemed:

    | Loan. | 0 | Number of bonds. | Amount. |
    | :---: | :---: | :---: | :---: |
    | 6 per cent permanent improvement bonds |  | 6 | \$1,500 |

    ## SPANISH INDEMNITY CERTIFICATES.

    As a matter of special interest at this time, the short history of the crigin of the Spanish indemnity certificates, embraced in the last annual report of the Register of the Treasury, is repeated:

    The sum of $\$ 28,500$ bas been received annoally, through the Department of State, and divided pro rata among the holders of this stock. The fifty eighth instalment has not yet been paid. The transters from one owner to another for the last ten years are shown in the following table:

    |  | Year. | Issued on transfers. |  | Canceled on transfers. |  |
    | :---: | :---: | :---: | :---: | :---: | :---: |
    |  |  | Number of bonds. | Amount. | Number of bonds. | Amount." |
    |  | $\bigcirc$ |  |  |  |  |
    | 1888-89. |  | 16 | \$59,891. 48 | - 23 | \$59, 891. 48 |
    | 1889-90. |  | 4 | 36.813 .86 | 4 | 36, 813.86 |
    | 1890-91. |  | 3 | 10, 189.70 | 3 | 10, 189. 70 |
    | 1891-92. |  | 7 | 61, 56 ti5. 77 | 6 | 61, 565.77 |
    | 1892-93. |  | 128 | 595, 972.51 | 136 | 595, 97251 |
    | 1893-94. |  | 9 | 44.523.95 | 8 | 44, 523.95 |
    | 1894-95. |  | 4 | 12,306. 53 | 3 | 12,306. 53 |
    | 1895-96. |  | 4 | 39,550.94 | 4 | 39, 556.94 |
    | 1896-97. |  | 8 | 28, 475.78 | 8 | 28, 475. 78 |
    | 1897-98. |  | 51 | 54, 446. 68 | 11 | 54, 446. 68 |

    The third installment of certiticates, showing the indebtedness of the Government on account of the Cherokee lands, issued under the act of Augast 15, 1894, and amounting to $\$ 1,660,000$, was redeemed in full, the same having become due March 4, 1598.

    The following issues of bonds in aid of the construction of the various branches of the Pacific railroads matured during the year:
    

    ## NEW BONDS RECEIVED.

    Below is a statement showing the number and amount of bouds received from the Bureau of Engraving and Printing during the year:

    Loan of 1925 , coupon, 200 sheets, amouting to $\$ 200,000$; loan of 1904, registered, 5,000 sheets, amousting to $\$ 4,100,000$; loan of 1907 , registered, 14,760 sheets, amounting to $\$ 10,290,000$; loan of 1925, registered, 9,000 sheets, amounting to $\$ 54,000,000$; Pacific Railroad, registered, 430 sheets, amounting to $\$ 3,250,000$; District of Columbia 3.65 per cent loan, registered, 400 sheets, amounting to $\$ 1,600,000$. The total number of bonds received was 29,740 , aggregating $\$ 73,440,000$.

    It is always necessary that a stock of bonds, unsigned, and not filled in, should be kept on band, in order that the demand occasioned by the transfers and exchanges may be promptly met.

    It is no small part of the duty of this division to prepare the schedules for the payment of the interest upon the various loans. These
    schedules are delivered to the Treasurer of the United States, who from them draws the checks, which he forwards to the persous entitled to receive them. Upon most of the loans the interest is payable quarterly, and the work of preparing the schedules each quarter is an enormous one.

    ## DIVISION OF NOTES, COUPONS, AND CURRENĊY.

    In this division, within the fiscal year, there were registered, scheduled, and filed, 13,096 canceled coupon bonds, with 941,620 coupons attached, amounting to $\$ 11,339,950$. These bonds were received in exchange for registered bonds of the same loans, namely, the 4 per cent cousols of 1907,5 perceuts of 1904,4 percents of 1895.1925 , and three sixty fives of the District of Columbia.

    At the close of the year there were on file in this office $2,004,49$, canceled, redeemed, exchanged, and transferred compon bouds, with $62,589,438$ conpons attached, amounting to $\$ 1,180,614,300$.

    There were received, counted, and verified during the year 997,669 paid detached coupous of various loans; counted and arranged numerically, 965,503 ; entered in numerical registers, 650,712 ; and examined after registration, 068,059 .

    The total number of redeemed detached coupons on file in this office, of various loans, to June 30,1898 , was $102,902,057$, amounting to $\$ 1,234,749,052.59$.

    The following table gives the places of payment and amounts of remittances of detached redcemed conpons received in this olfice during the year:

    NEW YORK, N. Y.

    | Classification and authoriziog acts. | Amount. |
    | :---: | :---: |

    The above classification of work performed does not include the hundreds of letters received, briefed, and entered upon the register, nor likewise the hundreds of ofticial letters written relative to matters before the office.

    It will be observed that on June 30, 1898, there were on hand 55 appeals as against 78 on hand June 30,1897 , and in the matter of rehearings ouly 50 on hand as against 225 on hand at the close of the prior fiscal year. On June 30, 1897, there were 40 appeals which had been on hand for more than thirty days, while on June 30, 1898, there were only 26. The number of opinions rendered during the fiscal year 1898 exceeds by 234 the number rendered during the fiscal year 1897.

    From the foregoing it will appear that the work of the office is in a most satisfactory condition, and may be said to be practically up to date. The ability aud industry of the office force is amply attested by the amount and character of the work performed.

    The unfinished business of the late First and Second Comptrollers' Offices-being accounts remaining on hand in said offices September 30, 1894, the date when the change in the accounting system took effecthas been practically completed. Of the very few accounts still unfinished, some are awaiting action of the courts and others are awaiting action of the claimants themselves.

    In obedieuce to the act of Congress approved Fobruary 19, 1897, and in conjunction with the Anditor for the Treasury Department, I caused an examination and inspection to be made of the following disbursing offices of the Treasury Department: T. D. Keleher, disbursing clerk for the Auditor for the Post-Office Department; Vau H. Bukey, disbursing agent for the Bureau of Engraving and Printing; Samuel McDonald, disbursing clerk for the Auditor for the War Department; Scott Nesbit, disbursing agent for the Coast and Geodetic 'Survey; Commander G. F. F. Wilde, naval secretary of the Light.House Board; George A. Bartlett, disbursing clerk for the Treasury Department; Cant. John Millis, engineer secretary of the Light-House Board; Thomas J. Hobbs, disbursing clerk for the Treasury Department. The results of these examinations are shown in the reports made, by the expert accountints who conducted them, to the Comptroller and Auditor, nnmbered from 1 to 9 , inclusive, which reports are herewith transmitted for your inspection. These examinations were searching and thorough, and the suggestions contained thererein merit your consideration.

    Since the date of my last anuual report Congress, in pursuance of the suggestious therein incorporated that this oftice did not hare a sufficient force to collect the information necessary for the proper revision of settlements, on the mótion of the Comptroller, wherein $n o$ appeals have been taken, or accurately ascertain whether the rulings of the former Comptrollers of the Treasnry and of the Commissioner of Customs prior to October 1, 1894, wheu the Dockery Act took effect, and the decisions of the present Comptroller's office since that date are being properly applied, has added to the force of this office two expert accountants available for the fiscal year 1899, who will during the present fiscal year be kept constantly employed in examining the methods of settlements prevailing in the several anditors' offices and in acquiring the necessary information upon which the Comptroller can revise, on his own motion, all such settlements as need revision, wherein there have been no appeals, and in advising the clerks in the several offices of the Departments as to the rulings made upon any given subject by the Comptroller.

    It is regretted that only two such expert accountants. were added to the force instead of the six, as suggested in my report for the fiscal year ended Jane 30,1897 . Nothing can be more important in the accounting system of the Govermment than accurate knowledge that the moneys appropriated and expended for governmental purposes have been accounted for and expended in strict accordance with law. In the large
    majority of cases, where the claimant is satisfied with the adjustment of his account, in the absence of. such aid it is a physical impossibility for the Comptroller to know whether, in the adjustment of such account, the law has been complied with or not; and it is in just such cases that the Government may be subjected to heavy losses, either through the incompetency, ignorance, or dishonesty of the clerk or clerks in the Auditor's office who settlo such account. I am of the opinion, considering the large number of claims settled in each of the six Auditors? offices, wherein there is no appeal to the Comptroller, that the number of these expert accountants should be increased to six, one for each Auditor's office, and therefore respectfully urge that the estimates for the clerical force for the ensuing fiscal year for this office include an item for four additional law clerks and expert accountants, at $\$ 2,000$ each, $\$ 8,000$.

    In pursuance of the practice established under the new accounting system of publishing the decisions of the Comptroller upon auestions of importance, for the purpose of establishing precedents in the settlement of other similar accounts in the future, volume 4 of these decisions is now available for distribution to the accounting and disbursing officers of the Government. This volume contaius 776 pages, and includes the more important decisions of the office from July 1, 1897, to June 30, 1898. It is thoroughly indexed, and contains a list of claimants, a table of statutes, opinions of the Attorneys-General, etc., cited in the decisions.

    The suggestion of the late Comptroller of publishing the decisions at the expiration of each quarter in a temporary pamphlet form for the purpose of furnishing immediate information to clisbursing and other officers of the Government directly interested in public accounts is carried out.

    Although the desirability of passing some general statute of limitations, applicable to the time within which claims against the Government might be presented to the accounting officers, has been repeatedly urged in the past by the accounting officers as a most desirable reform and no action has been taken, I venture again to bring forward this subject, adopting the language used in my last report:

    The case particulariy referred to in that enactment was that of United States $x$. Strong (125 U. S., 656). It appears that the petition in the Strong case was filed in the Court of Claims July 17, 1886, and as the statute of limitations relating to that court excludes from its jurisdiction any claims accruing prior to six rears from the date of filing the petition, the date, "July 16, 1880," referred to by Congress in the above-quoted clause, relates to claims which would have been barred in the Court of Claims in the test case.
    In this connection the action of Congress in attaching the following proviso to two clauses appropriating for naval claims in the act of July 19, 1897, is noteworthy:
    "Provided, That no part or any one of tho clains to which this appropriation is applicable shall be paid therefrom which acerned more than six years prior to the filing of the petition in the Court of Claims upon which the judgeneut was rendered, which, veing affirmed by the Supreme Court, has been adopted by tle accounting officers as the basis for the allowance of said claim."

    In the act of July 7, 1898 ( 30 Stat., 708), Congress also placed a limit upon the allowance of mileage to navy officers, claimed under the decision of the Supreme Court in United States $v$. Graham (110 U. S., 279), in the following lavguage:

    Provided, That hereafter the accounting officers of the Treasury shall not recoive, examine, consider, or allow any claim against the United States for difference between mileage and actual expenses which has been or may be presented ly officer; of the Navy, their heirs or legal representatives, under the decisions of the Supreme Court, which bave heretofore been adopted as a basis for the allowance of such claims which aecrued prior to July first, eighteen hundred and seventy-four.

    Another matter in which it seems to me that legislation is necessary has been called to my attention since my induction into this office. In the offices of the First and Second Comptrollers it was a long established practice to waive the taking out of letters of administration in cases where sums were due from the United States to a deceased employee, or to any other person having a claim againist the Government, where the amount involved was less than $\$ 100$. There is no authority of law for such a waiver, and this action has apparently been taken from the earliest times simply to accomplish substantial equity, for oftentimes the cost of taking out letters of administration would either absorb the entire amount due from the Government to such claimants, or take such a considerable part of the little sum due as to lead to an apparent injustice. Doubtless on this account the Comptrollers have been, and still are, in the habit of permitting payment to be made in such cases without administration. However, as it is his duty to administer the law as he fiuds it and not as it should be, I find myself embarrassed by the absence of any law to sustain this longestablished practice and my desire to do equity. I have the honor, therefore, to recommend that this matter be laid before Cougress with a view to obtaining such legislation as is necessary in the premises.

    Former Comptrollers have called attention to the difficulty experienced in determining what appropriations are to be considered as "permanent specific appropriations," which are available for the payment of expenses incurred after the fiscal year has expired for which the appropriations were made. I beg to renew the request that Congress will furuish a definition of these words.

    Respectfully, yours,

    R. J. Tracewell,<br>Comptroller.

    The Secretinry of the Treasury.
    (No. 8.)

    ## REPORT OF THE AUDITOR FOR THE TREASURY DEPARTMENT.

    Treasury Department, Office of the Auditor for min Treasury Department, September 1, 1898.

    Sir: I have the honor to submit the following report concerning the business of this oftice for the fiscal year ended Juiue 30, 1898:

    CLASSES OF ACCOUN'SS.
    The different classes of accounts assigned to the Auditor for the Treasury Department for examination and certification are desiguated by the following statute:

    #### Abstract

    The Auditor for the Treasury Department shall receive and examine all acconnts of salaties and incidental expenses of the Office of the Secretary of the Treasury and all bureans and offices under his direction, all accounts relating to the customs service, public debt, internal revenue, Treasnrer and assistant treasurers, mints and assay offices, Bureau of Engraving and Priuting, Coast and Geodetic Survey, Revenuc-Catter Service, Life-Saving Service, Light-House Board, Marine-Hospital Service, public buildings, Steamboat-Inspectiou Service, immigration, navigation, Secret Service, Alaskan fur-seal fisherjes, and to all obler bosiness within the jurisdiction of the Department of the Treasury, and certify the balances arisiug thereon to the division of bookkeeping and warrauts ( 28 Stat. L., 206).

    At the beginning of the year, July 1, 1897, there were 1,352 accounts on hand, and 21,784 were received during the year, making a total of 23,136 .

    ## DIVISIONS.

    To expedite the proper examination of the accounts thas received, the auditing clerks are separated into four divisions-customs, public debt, internal-revente, and miscellaneous.

    ## CUS'COMS DIVISION.

    The castoms division audits the accounts of collectors of customs for receipts of customs revenue, and disbursements for the expenses of collecting the same, and also including accounts of collectors for receipts and disbursements in conuection with the Revenue. Cutter, Light-House, and Marive-Hospital services, and accounts for official - emoluments, clebentures, refund of duties, warehonse and bond accounts, and miscellineous disbursements.

    The following summary indicates the work of the year:

    |  | $\begin{aligned} & \text { Number } \\ & \text { of } \\ & \text { accounts. } \end{aligned}$ | Amount. |
    | :---: | :---: | :---: |
    | Receipta.. | 2,656 | \$136, 277, 200. 11 |
    | Disbursements | 7,775 | 10, 372, 890. 36 |
    | Sotal reecipts and disbursemeuts | 10,431 | 146, 650, 096.47 |
    | Warehouse and boud accounts | 997 | 107, 005, 339.06 |
    | Total receipts and disbursements, and warehonse and bond accounts. | 11,428 | $253,655,435.53$ |

    Uuder Department circular No. 61, of April 5, 1897, relative to teutative liquidation of customs entries, the customs accounts for A pril, May, June, and July of that year were delayed and could not be passed to final liquidatiou and settlement until said circular was revoked by Department circular No. 101, of July 21, 1897.

    On July 24, 1897, the Dingley law went into effect. Thus it became necessary for our clerks to acquaint themselves with the complicated schedules of a new tariff.
    There were 1,011 customs accounts on hand July 1, 1897, and 11,565 were received during the year, making a total of 12,576 , of which 11,428 were settled, leaving 1,148 on hand at the close of the fiscal year, 509 of the unsettled accounts being examined and ready for settlement.
    Liquidating section.-The liquidating section of the customs division has charge of the final liquidation of all customs entries made at the Uuited States ports that do not have naval offices. The work performed by this section during the year is shown by the following summary:

    | Number of entries exami | 6, 441 |
    | :---: | :---: |
    | Number of invoices, weigbers' returns, and other papers examined in connection with the verification of the liguidation of the above entries... |  |
    | Number of letters written to and received from collectors of customs, etc., in connection with the above entries | 4,378 |
    | Total number of papers handled | 486, 135 |
    | Number of tariff errors noted in connection with the examinatiou of the alove entries | 1,039 |
    | Number of errors in form | 5,500 |
    | Total number of errors | 6,53 |
    | Amount involved in the tariff errors- |  |
    | In favor of the United States, "overcollections" | , 233.62 |
    | In favor of the iruporter, "short collections" | ,552.66 |
    | Total amount involved in errors. | 785. 28 |

    Thus it appears that our examination of those entries, 196,441 , discovered and corrected 6,539 errors, involving $\$ 36,785.28$, of which amount $\$ 2,232.62$ were "overcollections" unduly favoring the Government and $\$ 34,552.66$ werè "short collections" tunduly favoring importers, making a net balance of $\$ 32,320.04$ due to and collected by the Government over and above amounts originally reported by the collectors of customs.
    If we had not corrected those errors, they would probably bave been repeated in other entries for an indefinite period of time, and the Government would have consequently sustained losses greatly in excess of the amount indicated.

    $$
    \text { FI } 98-47
    $$

    Manifest section.-The manifest section of the customs division receives, examines, and checks the manifests of vessels, cars, wagons, and vebicles arriving with foreign merchandise at American ports which do not have naval offices. During the year 407,506 manifests were received, examined, and checked as per the following table:

    | Collection district. | Manifests received. |  |  |  |
    | :---: | :---: | :---: | :---: | :---: |
    |  | Vessels and small boats. | Railroad cars not sealed. | Wagons and other vehicles. | Railroad cars un. der constilarseal |

    Total of all classes, 407,506.
    This section also compared 208,184 of these manifests with their appropriate entries and returned 703 imperfect manifests to collectors for correction. It also received and checked 232 reports of merchandise imported under consular seal; 857 reports of unclaimed merchandise, and 1,205 reports of merchandise transported without appraisement.

    The subject of manifests is now under consideration for the purpose of a general revision, the results of which cau not be given in this report.

    Statistics.-In former years the reports of this office have contained several statistical tables which are omitted from this report because it seems proper that the tabulation and publication of general statistics should be restricted to the bureau desigued expressly for such purposes.

    In accordance with the request of the supervising special agent, however, this office will prepare and forward to him in due time statistical reports relating to merchandise triusported without appraisement under act of June 10, 1880, and to merchandise imported under consular seal during the fiscal year 1898.

    It is understood that such information will be furnished by the Bureau of Statistics after June 30, 1898.

    We will keep proper checks upon the returns made by the forwarding and receiving ports in relation to such importations, and will promptly report to your office any irregularities that may require special investigation. This plan will release us from statistical pursuits and enable us to concentrate our efforts upon the legitimate work of accounts.

    ## PUBLIC-DEBT DIVISION.

    - The public-debt division audits all accounts for payment of interest on the public debt, both registered stock and coupon bonds, Pacific Railroad bonds, Louisville and Portland Canal bonds, navy pension fund, redemption of Uuited States bouds, redemption of coin and currency certificates, old notes, and bounty scrip, and accounts for notes
    and fractionat currency destroyed. The following summary shows the work performed by this division during the year:

    |  | $\left\|\begin{array}{c} \text { Namber } \\ \text { of } \\ \text { accounts. } \end{array}\right\|$ | Amount. |
    | :---: | :---: | :---: |
    | Interest on United States securities | 699 | \$37, 298, 085. 30 |
    | Redemption of United States bonds | 81 | 124, 002, 352. 30 |
    | United States circulating securities destroyed. | 61 | 253. 747, 21.1. 50 |
    | Total | 841 | 415, 047, 649.10 |

    The work of this division will be largely increased hereafter by the accounts relating to the payment of interest on the war loan of 1898.

    ## INTERNAL-REVENUE DIVISION.

    The internal-revenue division audits all accounts relating to internal revenue. Said accounts receive an administrative examination in the office of the Commissioner of Internal Revenue before they are forwarded to the Auditor for final examination and settlement. The work performed by this division during the year is indicated by the following summary:

    |  | $\begin{aligned} & \text { Number } \\ & \text { of } \\ & \text { accounts. } \end{aligned}$ | Amount. |
    | :---: | :---: | :---: |
    | Recoipts | 316 | \$157, 911, 346.35 |
    | Disbursements | 2,155 | 3,762, 491. 91 |
    | Total receipts and disbursements | 2,471 | 161, 673, 838. 26 |
    | Stamp accounts of the Commissioner of Internal Roveune | 93 | 178, 377, 923.32 |
    | Total receipts, disbursements, aud stamp accounts. | 2,564 | 840, 051, 761. 58 |

    The work of this division will be enlarged hereafter under the provisions of the war-revenue law of 1898 .

    ## MISCELLANEOUS DIVISION.

    The miscellaneous division audits all accounts of the Department of the Treasury, including salaries and contingent expenses, Life-Saving Service, outstanding liabilities, bonded and land-grant railroads, Coast and Geodetic Survey, accounts of mints and assay offices, construction and care of public buildings, United States Treasurer and assistant treasurers, Light-House Establishment, Bureau of Engraving and Printing, independent treasury, Marine Hospital, Steamboat-Inspection Service, and sales of old material.

    The accounts examined and settled by this division are briefly sum. marized as follows:
    

    During the preceding fiscal year this division audited a smaller number of accounts, 5,954 , involving a much larger amount, $\$ 1,813,959,116.28$. This difference in amounts is largely explained by the fact that the general accounts of the Treasurer of the United States for the fourth quarter of the fiscal year 1897 and the first quarter of 1898 were not received by this office in time to male the examinations and issue the certificates of settlement prior to June 30, 1898, although the work was completed soon thereafter.
    Those accounts involved receipts amounting to $\$ 344,948,598.20$, and expenditures amounting to $\$ 372,759,175.35$, making a total of $\$ 717,707,773.55$. Of course this total could not be included in the record of certificates actually issued.
    unsettled accounts ( 1,201 ).
    The enforced transfers and details of clerks to other offices made it impossible to reduce the number of unsettled accounts to a lower figure. In fact, there would have been from 1,800 to 2,000 instead of 1,201 unsettled accounts at the close of the year if the clerks bad not responded cheerfully to the necessity for extra time and exertion during the last half of the year. I gladly avail myself of this opportunity to express to you my hearty commendation of their conduct in meeting this emergency.
    The following statement shows the number of accounts on hand July 1, 1897, the number received, the number audited, and the number remaining at the close of the fiscal year:
    

    The accounts remaining June 30, 1898, were received as follows:
    

    ## The following recapitulation exhibits the work of the office for the year as to settlements upon which certificates were issued:

    | $\circ$ - - | $\left\lvert\, \begin{aligned} & \text { Number } \\ & \text { of } \\ & \text { accounts. } \end{aligned}\right.$ | Amount. |
    | :---: | :---: | :---: |
    | Customs division: Jeceipts nnd disbursments. | -10, 431 | \$14G, 650.096. 47 |
    | Internal-revenne division: Receipts and disbursements | 2,471 | - 161, 673,838. 26 |
    | Public debt division: Total... | 841 | 415, 047, 649. 10 |
    | Miscellancous division: Receipts and disbursements............. | $\cdots 7,102$ | 995, 581, 226. 23 |
    | Total receipts and disbursements........................................ | 20,845 | 1,718, 052, 810. 96 |
    | Customs division: Warehouse and bond accounts ............................ | 097 | 107, 005, 339.06 |
    | Interual-revenue division : Stamp accounts. | 93 | 178, 377, 923.32 |
    | Total nimber of accourts settled, and total amount involved in settlement. | 21,935 | 2, 004, 336, 072.44 |

    The customs accounts (509) examined and ready for settlement, as stated on page 6, and the Treasurer's general accounts mentioned on page 10 , approximated $\$ 750,000,000$.

    ## MISCELLANEOUS WORK.

    ## The following statement shows the miscellaneous work requred in connection with the examination and settlement of accounts during the year:

    Number of certificates recorded ..... 12, 949
    Number of letters written ..... 19, 983
    Number of letters typewritten ..... 33, 305
    Number of letters press copied ..... 19,983
    Number of letters indexed ..... 19,983
    Requisitions answered ..... 4, 237
    Entries on register of anthorities. ..... 5,324
    National bank changes ..... 2, 689
    Acconnts, letters, etc., received and eutered ..... 36, 094
    Authorities filed ..... 1, 819
    Authorities recorded ..... 3, 907
    Number of references to other offices ..... 987
    Number of powers of attorney entered and referred to the Comptioller. ..... 1, 932
    Number of acknowledgments ..... 3,397
    Number of warrants received and entered ..... 6, 823
    Certificates of authority farnished ..... 456
    lines registered ..... 2,562
    Public fund statements referred. ..... 6, 495
    Money returns examined ..... 1,959
    Stubs received ..... 267, 971
    Stubs summarized ..... 201, 183
    Books of internal-revenue stamps received and counted ..... 47, 406
    Files Room:
    Accoments received, arranged, ehecked, and filed ..... 11, 885
    Accounts withdrawn from files ..... 6,548
    Accounts returned to files ..... 7,494
    Vouchers in accounts numbered ..... 674, 600
    Pay warrants received, arranged and labelod. ..... 43,403
    Contracts, etc., received aud filed. ..... 3, 441
    Contracts; etc., arranged, labeled, and sent to the permanent filcs ..... 4,403
    Number of notices of official bonds received and filed. ..... 383
    Number of requisitions upon superintendent's office issued ..... 350
    Number of reports on suits in Court of Claims, ete ..... 51
    Transeripts prepared and forwarded to the Comptroller on which suits are to bo instituted against defaulting officers ..... 8
    Number of settlements received and passed by law clerk ..... 33

    ## MONTHLY AṆD QUARTERLY ACCOUNTS.

    Section 12 of the legislative act approved July 31, 1894, requires all monthly accounts to be "mailed or otherwise sent to the proper officer at Washibgton within ten days after the end of the month to which they relate, aud quarterly and other accounts within twenty days after the period to which they relate."

    Differences of opinion have frequently arisen concerning the proper classification of monthly and quarterly accounts. In such cases it was doubtful whetber requisitions for the advance of funds should be approved or disapproved under the provisions of said section. Upon investigation I discovered that no distinct classification had been made by competent authority after the passage of said act. These facts were promptly reported to your office for a Department order under the provisions of paragraph 4 of the sundry civil act of August 30,1890 (26 Stat., 413).

    On May 12, 1898, you addressed to this office a letter giving directions.
    That the accounts of the several disiursing officers of the Treasury Department for dislursements made ou account of salaries, contingent expenses, and other appropriations pertaining to the Treasury Department shall be rendered to the proper officers at regular monthly and quarterly periods, as follows:

    ## MONTHLY.

    Salaries, wages of workmen, and contingent expenses, United States mints.
    Salaries, United States assistant treasurers.
    Salaries, party expenses, vessels, and general expenses, Coast and Geodetic Survey.
    Salaries and expenses of agents, etc., of internal revenue.
    Compensation of employees, plate printing, materials, rent, etc., Bureau of Eugraving and Printing.
    Marine-Hospital Service.
    Cnstody of dies, rolls, and plates.
    Collection of statistics relating to commerce.
    Examinations of national banks and bank plates.
    Expenses of national currency.
    Parting and refining bullion.
    Coinage of silver bultion.
    Storage of silver bullion.
    Contingent expenses, national currency.
    Expenses of Treasury notes.
    Contingeat expenses, Director of the Mint.
    Sealing and separatiug United States securities.
    Special witness of destruction of United States sccurities.
    Distinctive paper for United States securities.
    Cancelling United States securities.
    Treasury 13 nilding.
    Treasury luilding, special repairs.
    Post-offico, Washington, D. C.
    Court-honse and post-office, New York.
    Bnildings, Government exhibit, Trans-Mississippi and International Exposition at Omaha.
    Fuel, lights, and water for public buildiugs.
    Furniture and repairs for public buildings.
    Repairs and preservation of public buildings.
    Heating apparatus for public buildings.
    Electric-light plant, post-office buildiug, Washington, D. C.
    Survey of Yukon River, Coast and Geodetic Survey.
    Public debt.

    ## QUARTERLY.

    Salaries of the Treasury Department and its bureans.
    Salaries and expenses of agents at seal fisheries in Alaska.
    Salaries, Steamboat-Inspection Service.

    Pay of assistant custorlimus and janitors.
    Collecting revenue from customs.
    Detection and prevention of frauds upon the customs revenue.
    Enforcement of Chinese exclusion aet.
    Expenses of regulating immigration.
    Enforcement of alien contract-labor law
    Quarantine service.
    Preventing spread of epidemic diseases.
    Expenses of Revenue-Cutter Service.
    Life-Saving Service.
    Establishing life-saving stations.
    Suppressing counterfeiting and other crimcs.
    Protection of salmon tisheries in Alaska.
    Trans-Mississippi and luternational Exposition at Omala.
    Examination of subtreasuries and depositories.
    Construction of public buildinge.
    Plans for public buildings.
    Vanlts, safes, and locks for public buildings.
    Inspuctor of furniture, etc., for public buildings.
    Contingent expenses, Treasury Department.
    Contingent expenses, Independent Treasury.
    Contingent expenses, St amboat-Iuspection Scrvice.
    National defense (Treasury).
    As these monthly and quarterly lists are frequently needed for ready reference in the transaction of current business, they are given in this report for the information and guidance of the officers and clerks charged with the consideration and settlement of the accounts therein specified.

    ## ADMINISTRATIVE EXAMINATION OF ACCOUNTS.

    Every account settled by an auditor involves the question of a "proper administrative examination" by virtue of the provisions of sections 22 aud 14 of the legislative act of July $31,1894$.

    This question should be decided as soon as an account is taken up, because the accounts settled under section 22 require only one examination in an auditing office, while those settled nuder section 14 slould have two independent examinations. Hence, the accounts settled under section 14 require double the clerical force that would be needed if the same accounts were settled under section 22.

    It is necessary, thercfore, to make a definite classification of all accounts under said sections in order that settleinents may be properly provided for and the Anditor may correctly estimate for the Secretary and Congress the clerical force needed for the prompt transaction of business.

    This work was commenced in the early part of the year and continued until it was discovered that the Auditor does not possess adequate legal authority to make such a classification and enforce his decisious. In view of this fact, this part of the work could not be systematized as it should be.

    ## DISBURSING CLERKS.

    The legislative act of February 19, 1897 (29 Stat., 550 ), made the following provision:

    All books, papers, and other matters relating to the office or accounts of disbursing officers of the Execntive Departments, and commissions, boards, and establishments of the Government in the District of Colnmbia shall at all times be sulject to inspection and examination by the Comptroiler of the Treasury, and ibe Auditor of the Treasury anthorized to settle such accounts, or by the duly authorized agents of cither of said officials.

    Under the authority conferred by said act an inspection of the offices of the disbursing clerks whose accounts are settled in this office was
    made by a joint committee of three, one representing the Comptroller of the Treasury and two the Auditor for the Treasury Department.

    The committee made the investigations in a thorough, practical manner, and submitted in each case a written report clearly disclosing the actual condition of the office with respect to each appropriation under its control. A summary of the results of the inspections was prepared and presented to your office, with the reports, as soon as they were filed by the committee.

    That summary was supplemented by additional information showing, in comparison with his bond, the maximum and minimum liability of each disbursing clerk within the second quarter of the fiscal year, and also showing, in most cases, the amount of cash in his possession on each day of the month of November, 1897. 'Thus the record of the second quarter of the fiscal year 1898 disclosed the general conditious of business for each quarter of the year.

    Said reports and summaries are now on file in this office and subject to your order at any time.

    ## REFERENCES.

    1. A brief statement of audits relating to the collections of public revenues will be found on page 15.
    2. Audits relative to miscellaneous disbursements of public funds appear on pages 15-19.
    3. A comparative statement of the business transacted by this office each fiscal year since 1861 is presented on pages 20 and 21.

    The Auditor and the Deputy, the Hon. Edward McKitterick, hereby express to you their hearty appreciation of the efficiency and fidelity manifested by the chiefs of divisions, clerks; assistant messengers, and laborers in this office in the discharge of their official duties during the year.

    Respectfully, yours,
    W. E. Andrews, Auditor.

    Hou. Lyman J. Gage, Secretary of the Treasury.

    ## (No. 9.)

    ## REPORT OF THE AUDITOR FOR THE WAR DEPARTMENT.

    Treasury Department, Office of auditor for the War Department, Washington, D. C., August 27, 1898.

    SIR: I have the honor to submit the following annual report, showing the details of the work performed in this office during the fiscal year ending June 30, 1898.

    During the last year I found some confusion arising from the assignment of duties among the different divisions, and with a view of simplifying the organization, I have rearranged the duties of the office, seeking to make as little change as consistent with the interests of the service.

    Under the assignment of duties as given in the annual reports for 1895 and 1896, and referred to in my last annual report, it was often necessary that three different items of one claim be settled by as many different divisions, whereas, under the rearrangement, a claim presented to the office is now settled as an entirety.

    Of the six divisions of the office as now constituted, two examine and andit disbursing officers' accounts, two examine and audit claims coming within the jurisdiction of the office, one reviews the accounts and claims stated by the examining divisions, and one has charge of the archives containing the record of payments to the armies of the United States.

    The pay and bounty division receives and audits all claims presented against the Government by or in behalf of soldiers or officers of the Army or their legal representatives.

    The claims division receives and audits all other claims arising within the jurisdiction of the Department of War or relating to the military establishıent.

    The military division receives and audits all accounts of disbursements pertaining to the Engineer Corps and Signal Corps, the Quartermaster's Department, and the Subsistence Departinent.

    The paymaster's division receives and audits all accounts pertaining to the Pay Department, Ordnance and Medical Departments of the Army, and the accounts of the disbursing clerk of the War Department, also all accounts pertaining to the Soldiers' Home and National Home for Disabled Volunteer Soldiers.

    The review division revises all balances as stated by the other divisions of the office. All claims stated by the pay and bounty division and claims division, consisting of original claims against the Government, are carefully reexamined before the balance is certified, and, in cases of the accounts of disbursing officers which have had administrative action, aceneral review is had, with a view of determining that a proper examination has been made of the accounts, before the balances are certified.

    The archives division receives, files, and has charge of all accounts and $\dot{\text { vouchers showing payment to officers and enlisted men of the }}$

    Army, keeps an index to all such payments, and furnishes information trom the archives when required for use in the examination of claims pending before the office.

    The following tabulated statement shows the work performed during the fiscal year and the condition of business at its close, Juve 30. 1898:

    During the year the sum of $\$ 115,007.33$ was placed to the credit of the permanent fund of the Soldiers' Home, being the amount retained from enlisted men of the Regular Army on account of the $12 \frac{1}{2}$ cent fund, and amount found due deserters, dishonorably discharged men, and deceased soldiers. There was withdrawn from said fund during the year, for current expenses, the sum of $\$ 129,000$, and the amount paid the treasurer of the Home on account of interest on the permanent fund, under section 8 of the act of March 3, 1883, was $\$ 101,897.82$.

    The records of deposits by enlisted men under act of May 15, 1872, show that 20,074 deposits were made since last report, amounting to $\$ 527,656.64$, and that 12,055 deposits have been withdrawn, amounting to $\$ 437,259.17$, upon which the depositors received interest amounting to $\$ 36,894.35$.

    The total amount involved in the accounts of disbursing officers settled and allowed was $\$ 55,641,131.56$, and the amount of claims allowed was $\$ 5,159,534.61$.

    The amount of the 2,803 requisitions approved during the year was $\$ 88,196,98$ ? .61 , of which amount $\$ 5,857,955.46$ was of the appropriation "National defense (war)," act of March 9,1898 . Twenty-five requisitions were disapproved during the year because of delinquencies of officers in reudering their accounts, but were subsequently approved upon the delinquencies being waived under act of July 31, 1894.

    From the foregoing statement it will be seen that the number of unsettled claims of officers and enlisted men has largely increased during the year, as has many other branches of the work of the office. One reason for this large increase in the number of unsettled clains, most of which arise out of services rendered during the war of the rebellion, is the fact that during the last fiscal vear the number of such claims received has been more than 50 per cent greater than the average for the three years inmediately preceding. The number of such claims received in the year ending June 30, 1895, was 15,085; in the year ending June 30, 1896, 15,139; in the year ending June 30, 1897, 17,336; while in the last fiscal year the number was 24,899 .

    The vast increase in expenditures, occasioned by the existing war with Spain, has ouly begun to affiect the work of the office, as but comparatively few accounts involving such expenditures were received prior to June 30,1898 . However, that work will be increased many fold during the coming year.

    Disbursing officers of the War Department have, in pursuance of your instructions rendered separate accounts for expenditures under the appropriation of act of March 9,1898 , for the national defense, and such accounts are, upon receipt in this office, kept entirely separate and distinct from other accounts and settled promptly.
    With a view of carefully and promptly disposing of the increased work of the office occasioned by the war, under date of May 11, 1898, request was made for an increase in the force of the office for the fiscal year 1899 by the appointment of 8 clerks of class 4,17 clerks of class 3,10 clerks of class 2 , and 30 clerks of class 1 . By act of May 31, 1898, appropriation was made for the number of clerks requested, but to expire March 31, 1899.

    It is recommended that Congress be requested to provide for the additional force for this office authorized by act of May 31, 1898, for the balance of the present fiscal year, and that the same number of clerks of the classes therein mentioned be added to the regular appropriation for the year ending June 30, 1900. It is also recommended that Congress be requested to provide for the following clerks in addition to the number now employed, such appropriation to be included in the regular appropriation for salaries of this office for the year 1900, viz, ten clerks, at $\$ 1,000$ per annum; ten clerks, at $\$ 900$ per annum, and three assistant messengers, at $\$ 720$ per annum, making the appropriation for the next fiscal year as follows:
    

    On July 6, 1898, I recommended, for reasons set forth in letter of that date, that Congress be requested to consider the question of the enactment of a law authorizing the accounting officers to adjust the accounts of certain volunteers who die within six months of their enrollment. The bill passed the House of Representatives July 7, 1898, in the following form:

    Be it enacted, etc., That in the adjustment of the accounts of volunteers enrolled on account of the existing war with Spain who have died, or may hereafter die within six months from the date of their enrollment, the accounting officers of the Treasury shall make no stoppage on account of clothing overdrawn, against the pay or allowances otherwise found due the widow, heirs, or legal representative of the soldier, unless the amount of clothing actually drawn by him is in excess of the clothing allowance for a soldier of his grade for the first six monthe of service.
    too late to be favorably considered by the Senate. I have to recommeud that the attention of the Senate be called to the matter with a view to its favorable consideration at an early date after the convening of that body.

    I also recommend that Congress be requested to favorably consider the question of repealing the act of July 13,1870 , and amendments so far as they limit the time for filing claims for bounty under act of July 28, 1866 (14 Stat., 322).

    There is no other statute limiting the time within which claims for bounty for service during the war of the rebellion shall be filed with the accounting officers. There is no bounty law more equitable in its terms thian the act of July 28,1866 , and no records more complete and accurate than the record of payments already made thereunder.

    The act provides for the payment of $\$ 100$ or $\$ 50$ for service of three years or two years, respectively, provided the soldier never received or was entitled to receive more than $\$ 100$ bounty under any other law or laws for all his services during the rebellion, and limits the payment to the soldier, his widow, minor children, or parents. The great majority of all who were entitled under the act of July 28, 1866, have been paid, and while the amount of money involved will be very small, the apparent injustice to deserving claimants will be removed by the repeal of the law of limitation in this case.

    I am persuaded that I should not close this report without a word of cominendation for the faithful and efficient service rendered by the force of the bureau, including laborers, clerks, chiefs of divisions, and other officers. With scarcely an exception, each has performed his respective duty with zeal and fidelity to the public.

    During the month of June it became important that more work should be done than could be crowded into the hours between $9 \mathrm{a} . \mathrm{m}$. and $4 \mathrm{p} . \mathrm{m}$., in order to keep abreast with the increasing business incident to the Spanish war, before the increased force authorized by Congress could be appointed and their service to any great extent utilized. lll the emergency it was found necessary to work over hours. It was a: source of extreme pleasure to note the willing and ready response to the order by nearly every clerk in the office, as well as the great increase of work turned out during the extra hour of labor required of them. While I should be opposed to a general extension of the hours of labor in the Bureau, I can plainly see the importance of occasional resort to this plan of expediting business, and, when such resort is necessary, of a ready and willing response thereto. In this connection I deem it my duty to urge the importance of the electric wiring of the Winder Building, so that artificial illumination-found necessary often in the winter, between 3 and 4 o'clock-may be supplied for the building during such extra time in the evening as may, in emergency, be needed.

    Respectfully submitted.

    W. W. Brown, Auditor.

    ## REPORT OF THE AUDITOR FOR THE INTERIOR DEPARTMENT.

    ## Treasury Department, Office of the Auditor for the Interior Department, August 9, 1898.

    SIR: I bave the honor to submit herewith the annual report of this Burean for the fiscal year ending June 30, 1898. The following statement shows, in tabular form, the number of accounts and claims, and amounts involved therein, on hand July 1, 1897; received and settled during the fiscal year, and remaining unsettled June 30, 1898. The total number of accounts and claims settled during the year was 22,574, involving $\$ 149,319,366.94$ :

    ## INDIAN DIVISION.

    The general duties of the division are to examine and state the cash accounts of Indian agents and other disbursing officers of the Indian service, and to keep records of coutracts for supplies, so that any article can be traced from its place of purchase to its destination, and the fulfillment of the contract can be ascertained. It also audits the claims of contractors for supplies, and claims of contractors for the transporting of the same; claims of employees of the Indian service, and others, for services rendered and supplies furnished by open-market purchase.
    Such information and documentary evidence as is found in the files, bearing upon suits against the United States in Indian matters, is furnished to the Attorney-General and the proper courts by this division, and transcripts of the accounts of the disbursing officers in the Indian service are also furnished in cases where it is necessary to bring. suit for the recovery of balances found due to the Government.

    The total number of disbursing officers in the Indian service whose accounts were examined and settled in this division during the fiscal year is as follows:
    Agents ..... 112
    Agents, special ..... 11 ..... 11
    Inspectors ..... 8
    General superintendent of schools ..... 1
    Superintendents of schools ..... 51
    Supervisors of Indian schools ..... 5
    Allotting agents ..... 17
    Disbursing officers, special commissions ..... 10
    Land examiners. ..... 3
    Governor, Alaska ..... 1
    Examiners of survegs ..... 4
    Secretary of Board of Indiau Commissioners ..... 1
    Superintendents of Indian warehouses ..... 2
    Receiving and shipping clerks ..... 4
    Snrveyors-general and special disbursing agent ..... 3
    Receiving clerk, Indian Office ..... 1
    Others of a miscellaneous nature ..... 25
    Secretary of the Interior, trust fund ..... 1
    Total ..... 260

    The following tables exhibit the volume of work done from July 1, 1897, to June 30, 1898, compared with the same period for the two previous years:

    | - | Accounts. |  |  |  |  |  |
    | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
    |  | Cash. |  |  | Claims. |  |  |

    | Total ........................... | 1, 1,711 | 1,626 | 1,761 | $8,6,946$ 8,455 | 8,841 8,309 | 7,481 7,059 |
    | Remaining on haud | 218 | 202 | 164 | 491 | 532 | 422 |
    |  | 1896. |  | 1897. |  | 1898. |  |
    | Disbursed in accounts Disbursed in claims. <br> Total | $\begin{array}{r} \$ 8,092,057.33 \\ 5,360,253.87 \end{array}$ |  | $\begin{array}{r} \$ 7,385,582.52 \\ 5,339,263.34 \end{array}$ |  | $\begin{array}{r} \$ 7,150,257.27 \\ 4,891,110.14 \end{array}$ |  |
    |  | 13, 452, 311.20 |  | 12, 724, 845. 86 |  | 12, 041, 367. 41 |  |

    The number of cash accounts received was 80 less than during the year 1896, and 151 more than the year 1897. The number of claims received was 1,670 less than during the year 1896 , and 1,401 less than during the year 1897. The total disbursements in both accounts and claims audited decreased during the year $1898 \$ 1,410,943.79$ as compared with the year 1896 , and $\$ 683,478.45$ as compared with 1897.

    The average number of clerks employed during the year 1898 was 24, against 26 for 1897 and 30 for 1896.

    Under the head of "Accounts" are included both the regular quar. terly returns of officers and the "explanations" filed by them to remove suspensions, so that the actual status June 30,1898 , may be exhibited thus:
    

    The following is a detailed statement of the 422 claims and 164 accounts on hand June 30, 1898, showing the amount of disbursements involved in each class:

    Clayms on Hand June 30, 1898.

    | 62 current claims | \$8, 086.22 |
    | :---: | :---: |
    | 314 depredation claims | 435, 412.46 |
    | 46 Eastern Cherokee claims | 8, 756. 12 |
    |  | $452,254.80$ |
    | 164 accounts on hand, amount involved. | $800,081.50$ |
    | Total . | $252,336.30$ |

    One hundred and eighteen of the depredation claims are either appealed or motion pending for new trial. The balance was appropriated for by act of July 7,1898 , and can be paid only on the certificate of the Attorney-General. Of the 164 accounts remaining on hand 102 were under examination, leaving but 62 accounts ( 5 quarterly accounts and 57 sets of explanations) to be given out for examination and settlement against 92 for last fiscal year.

    Seven hundred and three advance requisitions were approved during the year 1898, amounting to $\$ 6,637,529.57$, against 649 , amounting to $\$ \overline{7}, 761,411.33$, for the year 1897.

    Other work accomplished by this division is shown as follows:
    Comparative Statement by Fiscal Years.
    

    ## LAND, FILES, AND MISCELLANEOUS DIVISION.

    The accounts of receivers of public moneys, as such, and as special disbursing agents; the accounts of United States surveyors general and deputy surveyors, and all other accounts for receipts and disbursements in the public lands service; the accounts of the disbursing clerk of the Interior Department, and of the disbursing officers of the Geological Survey, Howard University, Government Hospital for the Insane, Columbia Institution for the Deaf and Dumb; the accounts of the Commissioner of Patents, and of all receiving and disbursing officers of the Department of the lnterior, exclusive of those in the pension and Indian service, are examined and adjusted in this division.

    The claims of railroad, navigation, and telegraph companies for services rendered on account of the above-named bureaus are examined, reexamined, and settled in this division.

    The work incidental to the boxing, labeling, arranging, and keeping in proper order for permanent preservation and convenient reference all the public records of this bureau is assigned to this division.

    The shelving space in the main files rooms las been entirely exhausted and the proper handling and preservation of the accumulating.important records has become a matter of serious embarrassment; and it is respectfully submitted that the necessity for additional shelving accommodations is urgent and important.

    The work in the division is in a satisfactory condition and practically up to date.

    There was an increase of about 25 per cent over the previous year in the number of public lands accounts settled. This was due to the changes in the personnel of the officials of the public lands service, and to the requirement, beginuing January 1, 1897, of the rendering of accounts by receivers of public moneys for unearned fees and unofficial moneys. There was also a material increase in the number of miscellaneous accounts settled. There was no material increase in the number of employees assigned to the division.

    The following tables are submitted to show the amount and character of work performed and its status on June 30, 1898:

    ## Statement of Work Performed by Public Lands Section.

    ## PENSION DIVISION.

    To this division is assigned the examination and settlement of the accounts of the United States pension agents for disbursements to pensioners, etc., and the adjustment of all matters relating to payments from the pension funds. For the performance of this work it is necessary to keep an account with each pensioner, and to see that the amount due in each case-no more and no less-from the time when the certificate issues and the pensioner's name is placed upon the rolls until such pension terminates by death or otherwise is paid, and that proper vouchers and receipts therefor are furnished. These accounts are kept in 388 large roll books (current series), and the proper adjustments of the payments made necessitates the examination and computation of nearly $4,000,000$ vouchers per annum and the entry on the rolls of the payment made in each case, the determination of the correctness of such payment requiring, in many cases, references to former roll books through several series. These records must be accurately kept, in order to answer inquiries and calls for information as to payments that have been made in any given case since the establishment of the Government, for use by the Commissioner of Peusions, pension agents, and others. They are the only complete rolls of United States pensioners in existence, and are an index to the many millions of vouchers on file in this office. The division also examines and settles all clains against the pension funds not payable by United States pension agents, such as reimbursements on account of expenses of last sickness and burial of pensioners; amounts of lost, reclaimed, or unindorsed pension checks, refunded attorneys' fees, and all matters payable from pension appropriations other than those for current fiscal years. The work is kept practically up to date. The following tabulated statements show in detail the work of the division during the fiscal year :

    Accounts of Pension agents, including Supplemental Settlements; also Claims for Payments from Pension Funds on account of Lost Checks, Reclaimed Checks, Examining Surgeons' Fees, Attorneys' Fees, etc., on hand July 1, 1897 ; Received and Settled during the Year and Remaining on hand June 30, 1898.

    ## LAW CLERK.

    The duties of the law clerk were explainea in the preceding annuas report.

    During the fiscal year 1898 he prepared 35 written opinions, 23 of which were original constructions of statutes submitted to the Comptroller for approval, disapproval, or modification. Of the 23 cases submitted, the action of this office was approved in 18 cases, disapproved in 4 , and one was not acted upon by the Comptroller, the claimant having applied to Congress for relief before the Comptroller acted upon, the claim.

    Upon my recommendation the clerical force in this Bureau has been reduced from 130 to 119 employees, thereby saving over $\$ 15,000$ per annum to the Government, as compared with the appropriation for the fiscal year ending June 30,1838 . The credit for this reduction is due to the ability, industry, and honest attention of the clerks employed in this Bureau to their duties. The Auditor and the Deputy Auditor desire to thus publicly thank the employees under them for their faithful and earnest labor. With very few exceptions the clerical force of this office can not be excelled.

    Very respectfully,
    Wm. Youngblood, Auditor for the Interior Department.
    The Secretary of the Treasury.

    ## REPORT OF THE AUDITOR FOR THE NAVY DEPARTMENT.

    Treasury Department,<br>Office of auditor for the Navy Department, Washington, D. C., October 4, 1898.

    SIR: I have the honor to submit the annual report of this Bureau for the fiscal year ended June 30, 1898.

    I desire especially to call your attention to the following data, which show the very great increase of the work of the Bureau:
    

    In some of the divisions of the office, particularly the division of claims, in which claims for arrears of pay, traveling expenses, etc., are adjusted, the increase of work incident to the war has not yet been felt to any considerable extent, but the work will very materially increase during the fiscal year ending June, 1899. It is certain that there will be no decrease of work in this Bureau even for the fiscal year 1900. The work pertaiuing to the computation and distribution of prize money resulting from captures made by our Navy in the present war, which is all performed in this Bureau, has not yet begun and is not expected to be reached much before the year 1899. This will further increase the work to be performed.

    I desire especially to commend to your notice my three chiefs of division, Louis K. Brown, George P. Davis, and Paul T. Bowen. For earnestness, efficiency, and thorough knowledge of their duties their superiors are not to be found in the public service. It is with great
    pleasure, too, that I commend the service of this office. My clerks, generally, through the severe trial of the past six months have taken hold with a will and have responded cheerfully to the additional service required. The increased amount of work which has been accomplished speaks volumes for their faithful cooperation, and it is owing to their efficiency and industry that I am able to report that the business of the office is practically up to date.

    The following table exhibits in detail the appropriations and expenditures for the fiscal year 1898:
    appropriations and Expienditures of the United States Navy for the Fiscal Year ended June 30, 1898.
    

    ## appropriations and Expenditures of the United Statrs Navy for the Fiscal Year ended June 30, 1898-Continued.

    | Increase of the Navy, training vessels for Naval Academy |  | .125,000.00 |  | 125, 000.00 |

    Total appropriations and balances
    \$135, 634, 910. 41
    Net amount drawn ont by warrant
    $\$ 57,136,917.15$
    Carried to surplus fund

    In addition to the sum of $\$ 78,298,940.45$ available June 30,1898 , the general deficiency act of July 7, 1898, appropriated $\$ 44,541,261.66$, which is not included in the foregoing statement, making the total available appropriations for the naval service $\$ 122,840,202.11$.

    ## PAY OF THE NAVY, 1898, AND PAY OF THE MARINE CORPS, 1898.

    The returns of pay officers are so incomplete as to make an approximate statement of the condition of these appropriations impracticable, but it is probable that there is sufficient money to meet outstanding liabilities incurred before May 4, 1898, and that a deficiency may be avoided by the use of the appropriations for the fiscal year 1899 , which became available from that date.

    ## Increase of the Navy.

    | Amount heretofore appropriated |  | 7, 296, 962.91 |
    | :---: | :---: | :---: |
    | Appropriated by act of February 1 |  | 125, 000.00 |
    | Appropriated by act of May 4, 1898 |  | 21, 262, 273.00 |
    | 'Total appropriated. |  | 148, 684, 235. 91 |
    | Heretofore expended. | \$103, 823, 652. 26 |  |
    | Expended in fiscal year 1898 | $10,753,388.73$ |  |
    | Carried to surplus fund | 125, 001.80 |  |
    | Total expended |  | 114, 702, 042.79 |
    | Available for the fiscal jear 1899 |  | 33, 982, 193. 12 |

    ## PAY OF IHE NAVY, DEPOSI' FUND.

    Since this fuud was created by the act of February 9,1889 , its operations have been as follows:

    | Fiscal year. | Deposits. | Repayments. |
    | :---: | :---: | :---: |
    | 1891. | \$111, 077. 32 | \$34,702. 56 |
    | 1892 | 186, 429.50 | 113,422.92 |
    | 1893. | 141, 442.80 | 147, 852.00 |
    | 1894. | 181, 457.97 | 107, 387.37 |
    | 1895. | 163, 194.96 | 160, 288.45 |
    | 1896. | 173, 944. 00 | 146, 339.09 |
    | 1897. | 190, 792.81 | 169, 531.56 |
    | 1898. | 163,728.43 | 172, 943. 19 |
    | Total | 1,312,007.79 | 1, 052,467. 14 |
    | Balance in the fund July 1, 1898. |  | \$259,600.65 |
    | Interest paid heretofore |  | 46, 742. 28 |
    | 'Interest paid during the fiscal year 1898 |  | 10,302.59 |
    | Total interest paid |  | 57, 044.87 |

    ## SPECIAL FISCAL AGENTS AT LONDON.

    The Messrs. Seligman Brothers have continued to act as the special fiscal agents of the Navy Department at London during the fiscal year 1898. Owing to the favorable rates of exchange the Government has derived a considerable profit on remittances to them. The following are the receipts and expenditures of the Government under the contract with the Messrs. Seligman Brothers:
    

    ## PRIZE MONEY TO CAPTORS.

    This Bureau is doing all that is possible to prepare for the speedy distribution of prize money accruing from the war with Spain when the money, acconnts, and claims shall have been received. All captures are
    yet under consideration in the prize courts, and no money has been covered into the Treasury for distribution. Thongh not required by law, it is my purpose to keep the account of the prize money of the war with Spain distinct from that which accrued from former wars.

    Of the prize money of former wars there was on the books of the Department June 30, 1898, an undistributed balance of $\$ 446,343.70$. Some of this has been forfeited by desertion, but the most of it is due to the persons to whom it stands credited. That but a small part of this money will ever be claimed by those entitled to it is indicated by the fact that during the fiscal year 1897 but $\$ 1,475.58$ was paid, and the average annual payment on valid claims during the past ten years has been only $\$ 2,861$.

    ## NAVY PENSION FUND.

    By the act of July 17, 1862, the Government's share of prize money was assigned to the navy pension fund. The act of July 1,1864 , required the investment of the navy pension fund in the registered securities of the United States, and the act of July 23, 1868, fixed the rate of interest at 3 per cent per annum. Since then the invested portion of the navy pension fund has remained stationary at $\$ 14,000,000$, and the annual income has been $\$ 420,000$. The expenditure for navy pensions for the fiscal year 1898 was $\$ 3,823,447.28$, and the average expenditure during the past eight years has been $\$ 3,389,837.79$. The income from the navy pension fund is less than one-eighth of the amount required for navy pensions, and it now seems probable that it will never again be sufficieut.

    The Governmen's share of prize money from captures of the enemy's vessels during the war with Spain will be iuconsiderable, while, on the other hand, a large increase of navy pensioners may be anticipated as a result of the war. These facts lead to the suggestion that no advantage accrues to anyone from the continuance of the navy pension fund, and that it may properly be abolished and dropped from the statement of the public debt, the whole of the amount required for navy pensions being provided by direct appropriation as is already done for seveneighths of the awount required. No increase of appropriations would result, as the appropriation for interest on the public debt would be decreased to the exact extent that the appropriation for navy pensions would be increased. The principal of the public debt would be reduced $\$ 14,000,000$ and the accounts of the Department would be simplified.

    ## WORK OF THE OFFICE.,

    The following is a statement of the work performed by the office during the fiscal year 1898:

    | Accounts and claims settled. | Number. | Vouchers examined. | Amounts allowed. |
    | :---: | :---: | :---: | :---: |
    | Disbursing officers' accounts. | 481 | 72,168 | \$31, 305, 290. 14 |
    | Transfer accounts. | 102 | 2,713 | 867, 189.92 |
    | Railroad clains | 750 | 1, 727 | 45, 390.99 |
    | Telegraph claims | \%4 | 134 | 160.38 |
    | Miscellaneous elaims | 2,500 | 13,469 | 257, 598.28 |
    | Prize-monoy claims | 163 | 489 | 3,128. 30 |
    | Total. | 4,030 | 90,600 | 32, 478, 758.01 |

    F. H. Morris, Auditor:

    ## REPORT OF THE AUDITOR FOR THE STATE AND OTHER DEPARTMENTS.

    Treasury Department, Office of the Auditor for the<br>State and other Departments, Washington, D. C., October 8, 1898.

    Sir: In accordance with your request of July 11 last I have the honor to submit a report of the transactions of this office during the fiscal year 1898 , and of the present condition of the public business committed to my charge.

    ## WORK OF THE OFFICE.

    In my last annual report I referred to the fact that a comparison of the worls of that year with the work of previous years showed an increase in the work of the office from year to year, and in order to expedite the settlement of accounts I asked for an increase of the clerical force. This recommendation, having been approved by you, was favorably acted upon by Congress, and four additional clerks, two of class 4 and two of class 3, were provided for. With this additional force the worls of the office has been brought up to date and has been performed more thoroughly and more satisfactorily than heretofore with an inadequate force.

    ## SUITS AGAINST THE UNITED STATES.

    The act of June 27, 1898 ( 30 Stat. L., 494, 495), amends the act of March 3, 1887 (24 Stat. L., chap. 359), conferring concurrent jurisdiction with the Court of Claims upon the circuit and district courts of the United States in the following particular:
    Sec. 2. That section two of the act aforesaid, approved March third, eighteen hundred and eighty-seven, be, and the same is herely, amended by adding thereto at the end thereof the following: "The jurisdiction hereliy conferred upon the said circuit and district courts shall not extend to cases brought to recover fees, salary, or compensation for olficial services of officers of the United States, or brought for such parpose by persons claiming as such officers or as assignees or legal representatives thereot."

    This legislation is in line with the recommendation made to the same effect in my last annual report, and I am confident that the result will be for the benefit of claimants and of the Goverument in bringing alout uniforinity in the construction of the statutes governing the payment of official fees and in facilitating the trial of such causes.

    ## EXAMINATIONS UNDER THE ACT OF MARGH 15, 1898.

    The act making appropriations for the legislative, executive, and judicial departments for the fiscal year ending June 30 , 1899, which was approved March 15, 1898 (30 Stat. L., 316), contains the following provision, i. e.:

    SEC. 5. All books, papers, and other mattere relating to the accounts of officers of the Government in the District of Columbia shall at all times be subject to inspection and examination by the Comptroller of the Treasury and the Auditor of the Treasury anthorized to settle such accounts, or by the duly authorized agents of either of said officials.

    This act amends the act of February 19, 1897 (29 Stat. L., 550), in making subject to this inspection and examination by the Comptroller of the Treasury and the proper Auditor the books, papers, and other matters relating to the offices or accounts of all officers of the government in the District of Columbia. Acting under this anthority, by direction of the Secretary of the Treasury, I have, in conjunction with the Comptroller of the Treasury, directed examinations to be made of the books, papers, and accounts of all officers of the Government in the District of Columbia whose accounts are settled in this office, and at the date of this report many of the examinations have been completed, while others are still in progress. As was stated in my last report concerning these examinations in relation to disbursing officers, they differ from the usual auditing of the accounts as rendered to this office in that the offices themselves of the various Government officials, with all their books, papers, etc., are inspected, their cash in hand counted, and their balances with the Treasurer or assistant treasurers of the United States ascertained, thus enabling this office to know absolutely that all public funds intrusted to these officers or coming into their hands through the administration of their offices are in hand or properly accounted for. It atfords me pleasure to report that the examinations so far made show that the accounts bave been correctly and accurately kept, and that all funds coming into the hands of these officers were properly accounted for at the dates of these examinations. Upon completion of the examinations the reports will be filed in your office.

    The following is a summary of the work of the ofice:

    | Settlements made and certified | 18,598 |
    | :---: | :---: |
    | Vouchers contained therein | 827, 230 |
    | Amonnt involved in said settlements | \$59, 707, 453.46 |
    | Folios copied relating to settlements | 21, 461 |
    | Letters written | 19,422 |
    | Certificates of deposit indorsed | 2, 747 |
    | Diplomatic and miscellaneous requisitions ex | 3,449 |
    | Certificates copied | 15, 256 |
    | Transcripts certified for evidence in suits | 41 |
    | Auditor's requisitions prepared and issued | 1,574 |
    | Bonds, etc., registered | 606 |
    | Consular drafts registered | 1, 702 |
    | Invoice and debenture certificate numbers collectors of customs (sec. 4213, Rev. Stat | 310, 394 |
    | Cousular fee reports proven | 3, 790 |
    | Pages of consular feo reports tabulated | 20,765 |

    Work Done by Law Clerk in Connection with Suits ror and Against the Unitied States During Fiscal Year Ended June 30, 1898.
    I.-GASES REPORTED ON AND GONE TO JUDGMENT DURING FISCAL YEAR.

    ## REPORT OF THE AUDITOR FOR THE POST-OFFICE DEPARTMENT.

    Treasury Department, OFFICE OF THE AUDITOR for dhe Post-Office Department, Washington, D. C., October 1, 1898.

    Sir: I have the honor to present the following report of the operations of this office and the financial transactions of the Post-Office Department during the fiscal year ended June 30, 1898:

    ## PERSONNEL OF THE BUREAU.

    The employees of this Bureau number 484, embracing 7 chiefs ot division, at $\$ 2,000$ per annum; 18 clerks of class 4 , at $\$ 1,800 ; 63$ clerks of class 3 , at $\$ 1,600 ; 78$ clerks of class 2 , at $\$ 1,400 ; 94$ clerks of class 1 , at $\$ 1,200 ; 81$ clerks, at $\$ 1,000 ; 21$ clerks, at $\$ 900 ; 20$ money-order assorters, at $\$ 900 ; 26$ money-order assorters, at $\$ 340 ; 2$ messengers, at $\$ 840 ; 23$ money-order assorters, at $\$ 720 ; 12$ assistant messengers, at $\$ 720 ; 23$ male laborers, at $\$ 660 ; 3$ female laborers, at $\$ 660$, and 10 charwomen, at $\$ 240$. The official staff of the Bureau at the close of the official year is as follows:

    ```
    Auditor.-Henry A. Castle, Minnesota.
    Deputy auditor.-Abraham L. Lawshe, Indiana.
    Chief elerk.—John M. Bishop, Tennessee.
    Disbursing clerk.-B. W. Holman, Wisconsin.
    Collecting division.-Chief, Arthur Clemients, Maryland.
    Bookkeeping division.-Chief, David W. Duncan, Pennsylvania.
    Pay division.-Chief, John B. Sleman, Illinois.
    Inspecting division.-Chief, M. M. Holland, Ohio.
    Checking and assonting division.-Chief, R. M. Johnson, Indiana.
    Foreign division.--Chief, Emanuel Speich, Nebraska.
    Recording division.-Chief, B. A. Allen, Kansas.
    ```

    An earnest effort has been made to correct some injustice in the distribution of salaries, which has grown up in past years through political pressure, favoritism, mistaken judgment, or otherwise. Many clerks doing the highest grades of work were receiving much lower salaries than others who were far less efficient. The effort at a fair readjustment has been partially successful, and will be steadily prosecuted until salaries are fixed on the basis of merit only.

    In the interest of greater efficiency of administration, the deputy auditor and the chief clerk, in addition to the duties previously assigned them, have each been requested to exercise special personal supervision over a designated group of divisions. The deputy anditor made an exhaustive study of the money-order system in all its complications. The result of this inquiry more than justified our previous impressions as to the faults of the accounting methods then in use, and led to the radical changes hereinafter described.

    All of the chiefs of division are men of long experience in the

    Bureau. They are faithfully and energetically directing their several branches of our important work. The steadily increasing efficiency of the employees, which bas enabled us to perform the rapidly augmented service with the same uumerical force, is largely due to their intelligent zeal.

    ## IMPROVED METHODS OF ACCOUNTING.

    Although this Burean has been in existence more than sixty years, and was created in response to a manifest necessity which was clearly stated in advance, the correct theory of its functions has never yet been applied to all departments of the postal service. This is due partly to the numerous and increasing ramifications of that great system, which with the progress of discoveries and inventions annually takes on new features, and partly, no doubt, to the insufficient force in this Bureau at all stages of its history, to properly cope with the immense labor necessarily attached to it. With the hearty cooperation of the responsible officials of the Post-Office Department considerable progress has been made during the past year in extending correct methods of andit in several new directions. Other and still more important extensions are now under consideration. Only when every branch of the service is subjected to the operation of sound auditing methods will the full intent of the law be complied with.

    Hon. William Lawrence, Comptroller of the Treasury, in his decisions of 1880 , quoted and confirmed a decision of Comptroller Hiland Hall in 1851, which summarized the conditions which prevailed in the PostOffice Departwent before the creation of this Bureau, which conditions demonstrated its necessity and led to its establishment in 1836. Previous to that time the Postmaster-General received all the revenues of the system, made all its disbursements, kept all its accounts, and had unlimited jurisdiction over all its functions, administrative and financial.
    The revenues of the Department down to about 1830 always exceeded its expenditures. The cash balances were deposited in the United States Treasury at irregular intervals by the Postmaster-General. Various complications ensued from this method of administration. After a thorough investigation by the Senate Committee on the Post-Oftice and Post-Roads the chairman, Mr. Ewing, made a very unfavorable report. He ascribed the derangement of the affairs of the Department "to the uncontrolled discretion exercised by its officers over its contracts and funds."

    President Andrew Jackson, in his annual message in 1834, adopted the suggestions of the committee, and recommended that the Post. Uffice Department be so reorganized that the final adjustment of accounts and disbursements of money be confided to officers, appointed by the President and Senate, who should be branches of the Treasury Department.
    The Senate committee, having further pursued their investigations duping the recess of Congress, made their final report January 27, 1835. This report vividly portrayed the abuses which had grown up under the current system, and urgently recommended such change in the organization of the Department as would place the collection and disbursement of its funds under the control of officers entirely independent of each other.

    Hon. Amos Kendall, who had meantime become Postmaster.General, in his annual report of December 4, 1835, strongly urged the proposed reorganization. He expressed his belief in the sounduess of the principle that public officers who have an ageucy in originating accounts
    should have none in their settlement. He desired that the system in his office should conform to that already existing in the War and Navy Departments, which were organized upon that principle. He said:

    > The most important improvement required is to separate the settlement of accounts entirely from the Post-Office Department, and vest it in an auditor appointed by the President with the advice and consent of the Senate.

    In pursuance of the foregoing recommendations the act of July 2, 1836, entitled "An act to change the organization of the Post Office Department and to provide more effectually for the settlement of the accounts thereof," was passed. This act provided a separate auditor for that Department, who was authorized to settle all accounts accruing therein, subject to an appeal by either the Postmaster-Geueral or the claimant, to the Comptroller of the Treasury, whose decision was to be final.

    If the absolute necessity for this system of auditing accounts so forcibly presented itself to the mind of the Postmaster-General in 1835, when the total financial transactions of the Post-Office Department were less than $\$ 6,000,000$ annually, how much greater is the necessity now for its rigid enforcement in every branch of the service when the aggregate financial transactions of the postal service are more than $\$ 180,000,000$, and of the money-order system $\$ 400,000,000$, making a grand total of $\$ 580,000,000$ annually. The responsibility for an accurate and legal settlement of the almost innumerable separate transactions aggregating this vast sum, by far the largest annual transactions of any accounting office in this Government or any other, is not to be lightly undertaken, but having been undertaken, is not to be evaded or ignored.

    The law makes it the duty of the Auditor to receive all accounts arising in the Post-Office Department, with the vouchers necessary to a correct adjustment thereof. A legal and intelligent audit can only be made when the accounting office has all the information available to the Department when it ordered an administrative allowance of the account. It is clearly the duty of the Auditor to decline to certify to the Postmaster-General for payment any clain in regard to which he has not been furriished with all such necessary vouchers and information.

    ## ADIITIONAL CLERICAL FORCE REQUIRED.

    The pressure of work on the clerical force of this Bureau is unremitting and increases day by day. Aside from the more effective methods introduced, each in volving additional labor, the steady increase of the business of the postal system continues and will continue to enhance our work. The Government has a direct interest in prompt settlements with postmasters, since only thus can defalcations and embezzlements be promptly detected. It is estimated that at least fifty additional clerks will be required for the fiscal year beginning July 1, 1899, if the duties of this Bureau are to be promptly and efficiently performed.

    ## POSTAL ACCOUNTS.

    The audit of quarterly postal accounts continues to be kept fully up to date, and there are fewer delinquent accounts than in previous years. Postmasters who neglected to render were reported to the PostmasterGeneral, and those in arrears for more than one quarter were reported by special letter, with the request that they be removed or the office discontinued if he deemed such action advisable. A number of changes for the good of the service have thus been secured.

    Postmasters at Presidential offices who failed to promptly deposit their surplus postal funds as required by law were immediately required to explain by letter why they did not make deposits. Those habitually negligent were reported to the Postmaster-General and the facts in each case laid before him, in order that proper action be taken to secure the Government against possible loss.

    During the year an innovation was made in auditing the compensation of clerks at first and second class post-offices. Heretofore, allowances for clerk hire were made in a lump sum, which the postmaster was permitted to expend at his discretion. The First Assistant Post-master-General furnished the Auditor with a list of the names and salaries of all clerks in these offices on A.pril 1-nearly 13,000-and bas since certified weekly the changes occurring in the personnel or grade. A register of these clerks is kept, and postmasters are now required to pay each one the full amount due him every quarter.

    A very large number of quarterly returus from fourth-class offices, which should be sent to the Auditor, are erroneously mailed to the different bureaus of the Post-Office Department, particularly to the office of the Third Assistant Postmaster-General, causing delay and occasional loss of matter belonging to this office. Notices are being sent to postmasters instructing them how and where to forward their reports, and it is confidently expected that the result will show marked improvement, such as has already been brought about in regard to money-order statements by similar meaus.

    A great many offices of all classes have been forwarding their moneyorder statements and quarterly postal accounts by "registered" mail. This occasions much work in the postal service, and, as it is deemed unnecessary, these postmasters are being instructed to send their reports by ordinary mail.

    During the year, envelopes addressed to the Auditor, and bearing distinctive marks showing the several divisions from which they emamated, liave been inclosed with communications from this office requiring answer. Replies are returned in them, and the large daily mail received is now quickly assorted and distributed, saving time and insuring its reaching the proper section or desk.
    In making settlements the tinal reports of late postmasters are given preference, so that balances found due the United States may be promptly collected from them or their sureties, thus reducing the liability to loss by " bad debts."
    The collection of balances due the United States on the postal accounts of late postmasters, who retired during the fiscal year 1898, has received special attention, with the result that the amount due the United States for that year from the late postmasters is but \$16,910.02, while the amount reported for the fiscal year 1897 was $\$ 26,203.50$. When it is considered that the number of postmasters retired during the fiscal year 1897 was 13,783 , and the number retired during the fiscal year year 1898 was 22,052 , the small amount of indebtedness for 1898 may be regarded as phenomenal.

    A change has been made during the fiscal year 1898, in the method of paying balances of $\$ 5$ or less, due late postmasters on their postal accounts, which has resulted in saving considerable expense and much clerical labor in this office, as well as in the office of the Third Assistant Postmaster-General. This change has made it possible to pay these balances much more promptly than heretofore, and has resulted in the payment, during the three months succeeding the close of the fiscal year, of all balances due on the postal accounts of late postmasters who retired from office during the fiscal year 1898.

    ## INTERNATIONAL ACCOUNTS-SPAIN.

    The condition of the money order and postal accounts between the United States and foreign countries at the close of the fiscal year is fairly satisfactory, all international money-order accounts having been closed to June 30 last except seven, viz: France, Honduras, Hungary, Queensland, South Australia, Tasmania, and Portugal. Settlements with these countries will, however, be made within the next thirty days, and the accounts may therefore be considered as up to date, or as nearly so as circumstances will admit, and as compared with previous years. International postal accounts have been stated up to December 31, 1897, with all the countries and colonies of the Universal Postal Union (about 75 in number), with the exception of that with the postal administration of Spain. Much vexatious delay was experienced in securing from that country necessary vouchers and documents upon which to prepare the subaccounts. It was not until oear the end of March last that the papers necessary for the preparation of the last of these subaccounts were received, namely, the closed transit account for correspondence dispatched from Ouba through the intermediary of the United States for other countries. While awaiting the acceptance and return of this account by the Madrid office, war was declared between the two countries and a final settlement to December 31,1897 , necessarily remains in abeyance. The apparent balance due from Spain to the above date for the conveyance of her mails and those of her colonies is $192,281.25$ francs, or $\$ 37,110.28$.

    ## ARCHIVES AND RECORDS.

    The recommendation in my last annual report that authority be secured from Congress for the destruction of obsolete letters, accounts, memorandums, etc., estimated to weigh 50 tons, was carried out. The authority was granted, and a board of officials appointed to represent the Treasury and the Post-Uffice Departments is now engaged in the preliminary work of carefully selecting the useless papers to be destroyed. This action will afford a much needed relief to this Bureau. It will give us the use of many needed file cases and much valuable storage room. It will also greatly reduce the labor and expense of removing our files and archives to the new building.

    This Bureau is the custodian of all the finaucial records of the entire postal system. We have an accumulation of many thousands of ledgers and account books which ought to be preserved. After ten years they are of little official value, but they are of great historic value, since they contain the records of the postal service from the foundation of the Government. Our ledgers contain the business history of every to wn, city, and village in the United States as ropresented in the transactions of the local post-offices. These books should be carefully preserved in such systematic order that they may be readily referred to by the numerous searchers for historic information who desire to consult them. It is believed that, until a hall of records shall be provided for the preservation of such archives, the Congressional Library will be an appropriate place for them. Probably 8,000 bound volumes of accounts can be transferred thither without detriment to the work of this Bureau. It is hoped that satisfactory arrangements can be made for their transfer to that institution at an early date. There is no room for their proper arrangement in the new building, and unless they can be disposed of as above suggested they are liable to become greatly damaged or eutirely lost through neglect.

    $$
    \text { FI } 98-53
    $$

    ## THE MONEY-ORDER DIVISIONS.

    The work of the money-order divisions is current. During the fiscal year there has been an unprecedented increase in the business, $27,798,078$ domestic money orders having been issued against $25,169,055$ for the preceding year, an increase of over 10 per cent, against an increase of 5 per cent for the year 1897. New money-order offices to the number of 2,422 were created, rendering it necessary to open that number of new accounts. To keep the work current has required unusual industry on the part of the employees engaged in this work.

    The number of money.order offices in operation June 30, 1892, was but 12,069. By June 30, 1894, the number had grown to 19,262, and on June 30,1898 , to 23,412 .

    In 1892, 270 clerks were engaged in these divisions. In 1894, there were 304, but at the close of the fiscal year 1898 the number had been reduced to 282 by withdrawals to meet the imperative demands of other divisions. A large increase in busivess has thus been disposed of by a reduced force, which is a tribute to the faithfulness and efficiency of the present employees. However, it will not be possible to maintain a current audit without a material increase in the clerical force in the near future.

    Money orders are assorted and reassembled as fast as received from the paying offices, and any such order may now be produced, if desired, in a few moments.

    ## PROMPT DEPOSIT OF MONEY-ORDER FUNDS REQUIRED.

    The law requires prompt deposit of surplus money-order funds by postmasters, and in every instance where a statement, as rendered, indicates that the postmaster is improperly withholding funds, he is at once required to explain and instructed to deposit in future in accordance with the law. Every statemeut which shows irregularities is made "special" and promptly andited. When the conditions require it, a request is made that a post-ottice inspector be detailed to give the case such attention as the protection of the Government's interests may demand. As a result of this policy, postmasters are now depositing surplus funds more closely than ever before. Irregularities are discovered in their incipiency, and defalcations are reduced to the minimum, being readily detected where they exist.

    ## - INSIRUCTIONS TO POSTMASTERS.

    Special attention has been given to instructing postmasters as to rendering their money-order accounts, and the postmasters themselves baving shown commendable interest, great improvement is noted. When a postmaster persistently fails to properly render his reports, the Post.Office Department is requested to detail an inspector to give him proper instructions.

    APPLICATIONS FOR WARRANTS.
    During the fiscal year ended June $30,1898,2,510$ applicatinns for warrants to pay invalid money orders were referred by the Post-OfficeDepartment to the Auditor's office, amounting in the aggregate to the sum of $\$ 32,976.94$. Of this number 2,431 , amounting to $\$ 32,618.01$, were certified to thePost-Office Department for payment. Of the number' referred to, 73 , amounting to $\$ 347.64$, were rejected and returued for cancellation, for the reason that an inspection of the files developed the fact that the original orders had been paid. The remaining 6 , amounting to $\$ 11.29$, are yet pending.

    A number of requests for warrants to pay money orders purporting to have been outstanding more than seven years have been received, but as legislation has caused the destruction of all data concerning such money orders the Auditor is unable to certify the same for payment by warrant. It was the evident intention of the act of January 27, 1894, to provide in the Auditor's office a permanent register of all invalid money - orders, as evidenced by the advices̀ to be transmitted to the Auditor monthly by postmasters. But this valuable feature of the law has thus far not been conaplied with, for the reason that by some previous misconstruction of the act postmasters have been instructed to forward these advices to the Post-Office Department.

    ## INVALID MONEY ORDERS.

    Reports received from the Post-Office Department indicate that the amount of domestic money orders remaining unpaid for one year from the last day of the month of issue for the tiscal year ended June 30, 1898 , was $\$ 44,248.89$, as evidenced by the advices and postmasters' monthly statements transmitted to the Post-Office Department. The aggregate amount of these invalid orders, as shown by similar statements for the fiscal years $1895,1896,1897$, and 1898, is $\$ 126,527.59$, which amount is available for transfer to the credit of the Post-Office Department for use as current revenues under section 4 of the act of January $27,1894$.

    ## DOUBLE PAYMENTS OF MONEY ORDERS.

    During the fiscal jear 341 of the duplicate money orders issued by the money-order division of the Post-Office Department, received from postmasters as paid vouchers, were found upon investigation to be double payments, the original order in each case being found in the files of this office. The amount represented by these duplicate payments is $\$ 1,193.50$. In each of these cases the amount has already been refunded to the Government through the postmaster in error or is in process of collection. A large decrease is noted in the number of these double payments, there having been 877 , amounting to $\$ 3,058.50$, in the preceding fiscal year. The marked decrease denotes greater accuracy and vigilance on the part of postmasters in keeping their money-order records.

    ## VOLUME OF THE MONEY-ORDER BUSINESS.

    During the fiscal year 374,594 money-order statements were received accompanied by $27,954,777$ paid domestic and international orders, representing $\$ 196,519,826.41$. The number of domestic orders issued was $27,798,078$, representing $\$ 191,354,121.63$, and the number of international orders issued was 955,334 , representing $\$ 13,239,769.27$. The sum represented by the issue and payment of domestic and international money orders during the fiscal year amounted, therefore, to $\$ 401,113,717.31$, against $\$ 368,188,855.57$ for the preceding year.

    ## OHANGES IN METHOD OF AUDITING MONEY-ORDER ACCOUNTS.

    During the fiscal year a number of radical changes in the method of auditing money-order accounts have been made, the most important of which is the abandonment of the system of checking the debits of a postmaster's money-order statement by the coupons and the return to the former system of checking by the paid orders.

    The reasons for this change were imperative. The possibilities of undetected fraud were found to be so great under the coupon system that the protection of the Government's interests absolutely demanded a different method. Checking by the paid order, inaugurated in December, 1897, could only begin with orders of a prior date sufficiently reassembled by office of issue and consecutive number as to enable the checking and assorting division to maise a practically clean check. This involved a rechecking of the debit entries in all statements rendered during the first half of the fiscal year-the first checking having been from the coupon and the second by the paid order-the real voucher. The results fully vindicated the office in rejecting the coupon for the purposes of audit. Numerous frauds were revealed, discrepaucies aud errors of almost every possible variety were disclosed, and numbers of money orders not entered by postmasters were found. These frauds, errors, discrepancies, and omissions would have remained uudetected under the coupon system of checking.

    ## HISTORY OF THE COUPON.

    The money-order coupon was created by act of Congress, January 27, 1894. The act itself simply provided that it should be the duty of postmasters to send the coupon to the Auditor, but it did not prescribe what use the Auditor should make of it. Its proposed function, however, was indicated in the committee report (Senate Doc. No. 93, Fifty-third Congress, second session) recommending its adoption, which stated that-

    #### Abstract

    The use of the proposed money order will enable the Auditor to adjust the postmaster's money-order account on its receipt, the coupon of money orders sold determining the debits at once without waiting for the checking of the paid orders agrainst the issuing office.

    And again in another report (No. 210, Fifty-third Congress, second session) it is stated that-
    It (the conpou) will enable the Auditor to make a definite check of the postmaster's money-order accounts immediately upon their receipt. The present system involves delay until the orders issued bave been piid, received at the Department, and checked against the report of the issuing office before the debit of that office is fully determined.

    The purpose of Congress in devising the coupon was a most laudable one. It sought to relieve the Auditor's office of its greatest hindrance to a prompt audit caused by delay in the receipt of many orders, a money order not becoming invalid for payment before twelve months from the last day of the mouth of issue. It is a matter of regret, therefore, that the coupon has proven a failure.

    A proper respect for the authority of Congress and a due regard for the good motives which impelled that body to adopt the coupon demands that sufficient reasons be given for its rejection by this office. They are submitted with the hope that such light may be thrown upou the subject as will lead to needed legislation.

    While the coupon was created in Jauuary, 1894, it was not put into practical use in the process of auditing accounts for some time thereafter. In his annual report for the tiscal year ended June 30, 1894, the then Auditor said:

    Until the coupons are separated by postmasters with greater accuracy it will not be practicable to audit by the coupon alone the monoy orders issued, aud it will remain necessary to check the orders with the statements of the issuing offiees as at present.

    The law creating the present money order provides for coupons that "by their separation from the money order will designate the amount for which the orders are drawn." As a matter of fact, the coupon wheu detached does not designate the amount of the order. The nargin of the order, when the coupon is correctly detached, expresses the amount for which the order is issued, but the coupon itself expresses an amount each digit of which is one greater than its corresponding digit in the amount of the order. Not until a system was devised of printing on the reverse side of each coupon the figures which should appear upon its face was there any attempt to make practical use of them, as will be disclosed by reference to the annual report of this Bureau for the fiscal year ending in 1895, page 4. Thereafter the debit entries on moneyorderstatements were compared with the coupons, and the real vouchers (the paid orders) were discarded for such purpose.

    The inability of postmasters to always correctly detach the coupons was a source of perplexity which continued substantially unabated. A careful record kept during the early part of the fiscal year shows that there were received daily an average of over 600 orders in which the marginal amounts did not agree with the amounts written. In addition to this there were about the same number of orders reported "not issued," because the postmasters had discovered their errors before the orders were delivered.

    The original regulations of the Post-Office Department provided that a money order showing a discrepancy between the amount written and the amount expressed by the coupon could only be paid upon the receipt from the issuing postmaster of a second advice naming the correct amount. This requirement caused so much delay and annoyance to the patrons of the system that the Postmaster-General soon modified the regulation by authorizing payment of all orders if the written amount in advice and order agreed and the amount expressed in the coupon margin had been accidentally torn or mutilated. (Sec. 1277, Postal Laws and Regulations of 1893, as amended in Postal Guide for 1897.)

    This order and the liberal construction placed upon it by moneyorder offices afforded relief to the public and the postmasters, but the Auditor's office had no option but to attempt an audit from the inaccurate coupons. Thus the door to fraud was unconsciously opened a little wider.

    ## POSSIBILITIES OF FRAUD UNDER THE REJECTED SYSTEM.

    The possibilities of fraud under a system of checking an account by something separate and apart from the real voucher will be apparent to any one who gives the matter careful consideration. A few of these possibilities may be considered.

    Under the rejected system, if the coupon agreed with the debit entry and the paid order agreed with the credit entry both entries were necessarily passed as correct; but the coupon and the paid order might not have agreed, and, as before stated, in over 600 instances a day they did not agree. As many postmasters made the debit entries on the statement from the coupons instead of from the applications for money orders, the possible divergence of the debit from the credit of the same money order is evident.

    A dishonest postmaster or money-order clerk with a supply of counterfeit coupons, as easily produced as ordinary engraved business cards, could have depleted the revenues without limit with small chance of being detected. By using counterfeit coupons, each entry ${ }^{\circ}$ of an issued
    order in a large statement might have been fraudulent, with all the entries accepted as correct if they agreed with the bogus coupons sent to the Auditor. An easy method of providing coupons for such fraudulent purposes would have been to exchange the proper coupon tor the coupon of a "not-issued" order. While the substituted coupon, prepared to indicate a smaller amount than the one discarded, would not bear the correct consecutive number, that fact, in all likelihood, would have escaped the notice of the checking clerk, whose attention was more particularly directed to the figures on the reverse side of the coupon.

    Under the coupon checking system, if an order were issued for $\$ 100$, an advice for that amount being sent to the paying office, $\$ 100$ would be paid, and the paying postmaster credited that amount on a good voucher sent to the Auditor. The issuing postmaster or money order clerk, intending fraud, might cut an extra or substituted coupon for $\$ 1$, charge himself with that amount in his statement and cashbook, and criminally profit by the difference to the amount of $\$ 99$. The debit entry of $\$ 1$, being checked by the coupon and not by the paid order, would have been necessarily accepted as correct by the Auditor's office. This system of fraud was actually perpetrated in a number of instances, and was detected in the rechecking by the paid orders alter the account had been accepted as correct under the discarded coupon system.

    The method of raising repaid orders afforded an attractive field for fraud to one familiar with the discarded system of auditing. A postmaster might have written an order for 90 cents, or any number of cents, sending forward the advice so issued. The lines usually drawn through the space for dollars might have been purposely omitted, as is done through ignorance by many postmasters. The advice going forward would receive the dated stamp of the paying office. The coupon sent to the Auditor's office, expressing 90 cents and agreeing with the debit entry, must have passed as correct. The order, retained in the hands of the postmaster until months afterward, and the advice recalled from the paying office as required in the case of repayment of orders, might have been raised by the entry of "ninety," or any other sum of dollars, in the blank space left in both order and advice, credit being taken for the raised amount in the statement and cashbook of the postmaster, and the difference criminally retained. After mutilating the margin of the order, as described in section 1277 as amended, both order and advice might have been transmitted to the Auditor and accepted as a credit for $\$ 90.90$, whereas ouly 90 cents was received in payment therefor. The order as paid going to the files without being checked against the postmaster's original debit months before, the fraud might have remained undetected.

    In a similar manner a paying postmaster might have raised both order and advice after satisfying the payee, retaining the amount for which the order was raised. In this case he would also mutilate the margin of the paid order, as indicated in section 1277 as now ameoded.

    A postmaster who, by oversight or otherwise, failed to enter in his statement an issued money order would almost certainly escape being charged therewith under the coupon system, because the paid order was not checked against the entry of orders issued.

    Some of these possible frauds herein described found practical illustration in the reaudit by the orders as paid.

    A fruitful method of fraud, many instances of which were brought to light, consisted in the reissue of orders and advices reported by
    postmasters as "not issued," and transmitted to the Auditor without being defaced, as required by section 1258, Postal Laws and Regulations of 1893, as amended. This fraud was perpetrated by persons having access to the files of this Bureau. The advices were forwarded to offices within convenient distances as "missent" to the Auditor's office. Identification being waived on the orders, payment was not questioned in any instance.

    How many of these "not issued" orders were fraudulently issued and cashed it is impossible to determine, but a careful examination discloses that over 250 of such orders which were received and checked as "not issued" by the inspecting division are not now to be found in the files. The perpetrators of this fraud were doubtless aware that under the system then practiced the orders as paid would not be checked against the office purporting to have issued them, and that their crimes would therefore remain concealed. It was possible for the person or persons having access to the files to abstract from the "stray" files immediately after the receipt orders upon which payment had thus been fraudulently secured, thus effectually destroying the material evidence of the crime. The abrupt change from checking by the coupon to checking by the paid order brought these fraudulent orders to light. Every effort has been made with the aid of the secret-service agents of the Treasury Department to discover the criminals. While there have been no convictions as yet, arrests have been made, and it is believed that the guilty will not escape punishment.

    ## SAFEGUARDS AGAINSI FRAUDS ADOPTED.

    In order to render such crimes impossible hereafter, all "not issued" orders are now being mutilated by punching through them in large letters the word "Void," immediately upon their receipt by an inspecting clerk, who is beld responsible for their treatment in this manner. All "not issued" orders received during the past year were withdrawn from the files and so mutilated.

    The present system of checking by the paid order makes the disclosure of any of these frauds a practical certainty. Other safeguards have been adopted which, it is believed, have effectually closed all avenues of undetected fraud, and they are apparently a thing of the past.

    The experience of this bureau during the past year emphasizes the declaration that any departure from checking an account by the real voucher is inadvisable and dangerous. That there was no organized raid under the system discarded is a high tribute to the integrity of those who had knowledge and opportunity and did not yield to temptation.

    ## OUTSTANDING INDEBTEDNESS.

    The amount of balances due on June 30, 1898, from late postmasters, and the actual damages due from failing contractors, late contractors, and failing bidders, on account of the fiscal year 1897 and prior years, was $\$ 531,003.26$, divided as follows:

    Late postmasters:
    Postar account.......................................................................... \$124, 250. 08
    Money-order account............................................................................ 94,940.07
    Failing bidders and late and failiug contractors.......................................... 311,813.11
    Total....................................................................................... 531,003.26
    Suit bas been instituted for $\$ 468,984.34$ of the above indebtedness, leaving $\$ 62,018.92$ otherwise in the process of collection.

    Within the past year 22,052 postmasters have been retired from office by death, resignation, or removal. The accounts of these postmasters, both postal anid money order, have been audited.
    The amount of the balances outstanding on account of the iscal year 1898 is $\$ 37,065.94$, viz:

    ## Late postmasters:

    Postal account................................................................................ $\$ 16,910.02$
    Money-order account. .................................................................. 16, 994. 41
    
    Total
    37, 065.94
    Of the 189 S indebtedness suit has been brought for $\$ 1,515.63$, leaving the sum of $\$ 32,550.31$ otherwise in the process of collection.

    ## COLLECTIONS BY SUIT.

    The following table shows the number and amount of cases submitted to the Department of Justice for suit during the past fiscal year:

    |  | Accounts. | Number. | Amount. |
    | :---: | :---: | :---: | :---: |
    | Postal. |  | 46 | \$12, 559.02 |
    | Money order. |  | 12 | 5, 153.93 |
    | Total |  | 58 | 17,712.95 |

    The amount collected by legal proceedings on postal, money-order, and mail-service accounts, including interest at 6 per cent, was $\$ 22,006.30$, which is the largest percentage of collections, as compared with the amounts for which suits were instituted, for several years.
    The small amount entered for suit is due to the close collections made without legal proceedings. It is a matter of pride that during the year there were no suits for large amounts, showing that the prompt settlement of accounts and close collections made large defalcations impossible.

    Following is a list of the accounts of late postmasters, failing contractors, late contractors, and failing bidders, with the balances remaining due thereon, exclusive of costs and interest, upon which legal proceedings were pending June 30, 1898.*

    Henry A. Castle, Auditor.

    ## (No. 14.)

    ## REPORT OF THE SUPERVISING SPECIAL AGENT.

    Treasury Department, Office of the Secretary, Washington, D. C., December 7, 1898.

    SIR: The following is a brief summary of the operations of the special agents of the Department and of the other branches of the service under this division during the fiscal year ended June 30, 1898:
    Number of reports and letters written by agents and subordinates ..... 16, 058
    Number of seizures ..... 540
    Number of arrests:
    For violation of customs laws ..... 114
    For violation of Chinese exclusiou laws ..... 766
    Miscellaneous. ..... L
    Number of suits commenced. ..... 27
    Amount involved in suits ..... $\$ 225,474.02$
    Number of customs districts examined ..... 86
    Reduction in expense recommended ..... $\$ 316,975.95$
    Amounts recovered on account of :
    Seizures ..... \$6, 799. 73
    Suits ..... \$9, 265. 47
    Fines, penalties, and forfeitures ..... \$27, 879.57
    Undervaluation and improper classification ..... \$303, 611. 32

    ## EXAMINATION OF CUSTOMS DISTRICTS.

    During the last fiscal year, in compliance with the requirements of section 2649, Revised Statutes, the special agents, by direction of the Department, made examinations of books, papers, and accounts of collectors and other chief officers of customs in eighty-six customs districts and independent ports. The agents in their reports of such examinations called attention to numerous irregularities of more or less importance, which received the immediate attention of the Department. The agents also recommended net reductions in the expense of maintaining the customs service amounting to $\$ 316,975.75$, as shown above, and in most instances their recommendations were approved by the Department. That such methods are effective is shown by the fact that the expense of maintaining the customs service during the last fiscal year was $\$ 44,133.05$ less than in the last fiscal year preceding, notwithstanding increased expense was made necessary by the development of commerce in the District of Alaska and in several other sections of the country.

    In several instances the agents discovered that customs officers charged with the collection of moneys had misappropriated funds of the Government temporarily in their possession. All such cases were promptly reported to the officers of the Department of Justice, and these discoveries resulted in the conviction and punishment by the United States courts of-three dishonest customs officials and the recovery of a large part of the moneys so misappropriated.

    ## REDUCTION OF EXPENSE.

    Attention is called to the condition of the force of this division as contrasted with its condition at the time $I$ assumed charge.

    On the 1st day of March, 1897, the following amounts were required to pay the annual salaries of the officers of the force, exclusive of special agents:
    Special inspectors of customs ................................................. $\$ 80,362.50$
    
    Chinese inspectors . ....................................................................... 66, 665.00
    Total............................................................................ 207, 697.50
    During the last fiscal year, ended June 30,1898 , the amounts disbursed for salaries of the above-named classes of officers are as follows:
    

    $$
    \text { Total.............................................................................................. 166, 611. } 60
    $$

    It will be noted that, with the exception of the special employees, a considerable decrease in salaries has been effected. In the case of special inspectors this has been accomplished by abolishing the offices of inspectors stationed at ports where their services were not necessary and by reducing the number of inspectors at such ports where it was found more were employed than were necessary to properly transact Government business. It has not yet appeared that any injury to the Government has been wrought by this reduction of employees, the sole object of which was to promote the best interests of the service.

    In the case of Chinese inspectors a similar reduction was effected, the force on June 30, 1898, numbering 24, while on March 1, 1897, there were 34 officers on the rolls. But while on March 1, 1897, there were 24 men who received salaries exceeding $\$ 4$ per diem, but 5 of the force on June 30 last received a salary exceeding that amount. This adjustment of salaries was made on the basis of the amount and character of the work performed by the respective officers.

    It will be noted, also, from, an examination of the figures above given, that an increase has been made in the force of special employees. This important branch of the service was created to assist the snecial agents primarily in the detection and prevention of frauds upon the customs revenue, and such increase indicates a stronger effort on the part of this Department to discover, correct, and punish irregularities and frauds growing out of the importation of dutiable merchandise into this country.

    ## UNDERVALUATIONS.

    Constant attention has been given by the special agents to the subject of undervaluation of imported merchandise. The force of special officers employed in Europe has been reorganized, and those officers have made numerous investigations and reports on this subject. In many cases reported by them invoice values have been advanced and proper duties have been collected. In every case of fraudulent undervaluation supported by testimony accessible to the courts, the facts have been reported to the United States attorneys with a view to criminal prosecution.

    Special attention has lately been given to the suspected undervaluation of $S$ wiss embroideries, and an experienced and able special agent visited Switzerland and marle an exhaustive investigation of the subject. The information thus gained has already been of great service to appraising officers in the ascertainment of dutiable values and has proved of value in appraisement. In consequence importers of this
    class of goods are entering their importations at much higher valuations than heretofore.

    The special agents in Europe continue to receive valuable cooperation from the consuls, and the latter frequently report, through the Secretary of State, undervaluations and other irregularities on the part of shippers. One of the consular officers, at the request of this Department, was directed to ascertain what discounts are allowed to English purchasers of French chinaware. His reports were of great value to the appraising officers at New York, whose advances on such importations, amounting to about 20 per cent, were sustained on reappraisement. The special agents in Europe earnestly urge that foreign shippers be required to make out their invoices covering shipments to the United States in the English language, to enable appraising officers to more effectually perform their duties.

    ## SMUGGLING.

    Numerous seizures of articles attempted to be smuguled on the Canadian and Mexican frontiers have been made by the special agents and their subordinates. An important arrest and seizure was recently made at one point on the Canadian frontier, growing out of the attempted smuggling of wool, as was suggested would be the case in my last annual report. The systematic smuggling of leaf tobacco from New Brunswick has been detecter, seizures of this merchandise have been made, and steps have been taken to punish the guilty parties. At the port of New York the extensive smuggling of valuable laces by an individual offering them for sale at low prices, the subject of numerous complaints of reputable importers for years past, was successfully investigated; a large stock of goods valued at over $\$ 25,000$, in the custody of the principal, who is now a fugitive from justice, was seized; a confederate was arrested and is now awaiting trial, and the irregularities of the parties referred to, so long continued, have been broken up, to the great satisfaction of honest importers.

    The attention of an officer of the special agents service having been called to the lumber camps in the vicinity of a place known as "Seven Islands," situated in a remote part of the collection district of Houlton, Me., a visit was made to the locality by said officer. The camps are situated about 100 miles above Fort Kent, on the St. John River. The only means of access is through the Province of Quebec by team, and by canoe from Fort Kent, a distance of 75 miles up the St. John River. The first visit made was in 1895, when the sum of $\$ 507.63$ was collected as duties on the supplies, teams, etc., found in the camps, and during the last year, on the occasion of another visit, the total amount collected aggregated $\$ 4,111$. Much personal incouvenience to the officer making the visits referred to was involved, and the results are creditable to the intelligent manner in which the business was conducted. Valuable assistance was rendered to him by a deputy collector for the district of Houlton, who accompanied him on his visits, and to whose intelligent cooperation the success which resulted is largely due.

    ## CHINESE EXCLUSION.

    Many difficulties and complicated questions have confronted officers acting under the direction of this division in the enforcement of the Chinese exclusion laws.

    The total number of Chinese persons other than laborers who applied for admission during the last fiscal year was 6,843 . Of this number

    5,273 persons of the exempt.class were admitted, 865 were in transit, 425 were allowed entrance to attend the Omaha Exposition, and 280 were rejected. In addition to the foregoing, 2,200 Chinese registered laborers departed with the intention of returning, and 1,497 such laborers were permitted to return to this country. The total number of all classes actually admitted, not including those in transit, was 7,195.

    The number of Chinese persons arrested for deportation because unlawfully in the United States, was 756; of this number, 220 were deported by due process of law, at a total expense of $\$ 24,132.24$. The amount of expense incurred in the maintenance of a force of Chinese inspectors to assist in the enforcement of the Chinese exclusion laws, including the compensation and expenses of other officers temporarily engaged in investigating alleged irregularities in the enforcement of such laws, was $\$ 56,238.41$.

    Early in the last fiscal year alleged irregularities in the admission of Chinese persons of the exempt classes through one of the important customs districts were investigated by officers of this division, and although it was fomed to be impossible to secure sufficient evidence to convict those who were believed to be guilty, it is significant that whereas 1,109 Cbinese of the exempt classes were admitted into that district during the fiscal year ended June 30, 1897, but 626 Ohinese of the same classes were admitted through the same district during the last fiscal year.

    The admission of Chinese to this country to participate as exhibitors in expositions of various kinds is the subject of great abuse. The most recent instance is that of the Trans-Mississippi and International Exposition at Omaba, Nebr. By the terms of the joint resolution approved June 30, 1897, the admission of such number of mechanics, artisans, artists, actors, and others, natives of China, as the Secretary of theTreasury might deem necessary for the purpose of preparing and conducting any privilege or concession which might be grauted by the authorities of said exposition was authorized. Under the authority of said resolution 425 Chinese persons were allowed to enter the country upon the representation of the exposition authorities that a considerably larger number was requixed for the purpose. It was intended to require bonds providing for the departure of such Chinese after the expiration of the time specified in the resolution for their return to China, and to exact a full and explicit description, with photograph, of each so admitted, for their proper identification, but the Solicitor of the Treasury, to whom the subject was referred, advised that there was no authority for either of the proposed precautions.

    Before the close of the exposition nearly all of the Chinese persons so admitted had scattered througb the country, and among them, it is said, are a number of women who since their admission have beeu the subject of barter for immoral purposes. To apprehend and deport these Chinese will involve large expenditure, and it will doubtless be impracticable to secure the deportation of all. It has been represented that the privilege of allowing Chinese to participate iu such expositions under the broad authority which has beretofore been accorded has resulted in an arrangement under which the holders of concessions have agreed for a consideration to secure the admission to this country of Chinese persons who under the laws would not be allowed to enter. It has not been practicable to verify this statement, but in view of the abuses which have been practiced it is urged that if Chinese persons not of the exempt classes are to be hereafter admitted to attend expositions, authority be given to exact bonds for their deportation within a reasonable time after the close of such expositions; that the number
    to be admitted be specified by Congress, and that authority be given to make such regulations as in the discretion of the Secretary of the Treasury may be necessary to identify such persons.

    To obviate an expense amounting to about $\$ 20,000$ per annum, resulting from the employment of guards to watch vessels arriving at New York and other ports, and upon which were Chinese cooks, stewards, seamen, etc., it was proposed to require the masters of such vessels to give bonds providing for the departure of the Chinese with the vessels. It having been found, however, that there was no law under which such bonds could be exacted, the expense of the guards is paid from the Chinese appropriation, and, in my judgment, provision should be made to obviate the practice which now obtains.

    There has lately been a great increase in the number of Chinese laborers who apply for admission on the ground that they were born in the United States, supporting their claims with Chinese testimony only. On one steamer recently arriving at San Francisco 110 Chinese passengers made this claim. When the customs officers, satisfied that such representations are usually false, reject their applications, the applicants usually apply to the courts, and are generally permitted to land upon the testimony of their countrymen, who have no regard for the binding force of an oath as administered under our laws. In Vermont and northern New York prosecntions for perjury in such cases have had a good effect; but this evasion of the laws is on the increase. One of the greatest obstacles to the proper enforcement of the Chinese exclusion laws is the belief of certain high judicial officers that they are unjust.

    SEAL ISLANDS OF ALASKA.
    The work of the Treasury agents on the seal islands during the past year, in addition to the usual duty of supervising the taking of seals and the regulation of the affairs of the uative inhabitants, has been mainly that of putting into practical effect the recommendations of the Fur-Seal Investigation Commission, which was present on the islands the two years previous, and of which Dr. David Starr Jordan was the chief.

    Following the conclusions reached by the commission, such young male seals as were rejected from the drives on the killing grounds were turned into the fenced inclosure provided for that purpose and there kept until the killing season was over, thus obviating to a great extent the necessity for redriving nonkillable seals. The young females were also confined in the inclosure during the time pelagic sealing was permitted in Bering Sea, to reduce as far as possible the number of seals from which the pelagic sealer obtains his catch. A number of young female seals also were branded this year, thereby destroying the commercial value of the skins, while in no wise injuring the health of the animals. The Department has received recently the salted skins of several female seals, which were branded in the fall of 1896 and which returned to the islands and were killed in the autumn of 1897. These skins show well-marked scars where the branding iron was applied, which healed perfectly and at the same time left the branded portion devoid of fur and hair. These skins demonstrate the utility of branding, as it destroys the commercial value of the skins without injury to the animals.

    Considerable work has been done also during the past winter by the agents on the islauds in removing so-called death traps or sandy portions of the breeding rookeries, where the belpless pups were injured
    by being trampled upon by the adult seals. These sandy stretches have been strewn with large bowlders by the natives, under the direction of the agents, and it is the opinion of scientists that by this action the death rate among pups will be appreciably lessened.
    From reports received from the agents on the islands it would appear that certain material is needed in the way of additional posts, wire net, etc., to render the fence surrounding the pound or inclosure more effective in confining the seals, but such expense can not be incurred without an appropriation for the purpose.

    ## IMPORTATION OF LIQUOR INTO ALASKA.

    Strenuous efforts have been made to enforce the law prohibiting the importation of liquor into Alaska except for medicinal; mechanical, and scientific purposes by numerous seizures of the contraband article by the customs officers in Alaska and at the ports of shipment in the northwest. Public sentiment is, however, so strongly opposed to the enforcement of the law referred to that such efforts seem almost fruitless, and the repeal of the law referred to is urged, especially in view of the rapidly changing conditions in Alaska.

    ## SALMON FISHERIES.

    The two inspectors of salmon fisheries whose duty it is to see to the enforcement of the act approved June 9, 1896, for the protection of the salmon fisheries of Alaska, made a careful investigation this year of all canneries in Alaska, with the exception of four or five which, owing to lack of transportation, could not be visited by them during the canning season. From the advance reports which have been received thus far it would appear that the catch of salmon in Alaska last year is about equal in numbers to that of the year preceding, and that, with the proper precautions taken to prevent fishing in excess of the natural increase, there will be no diminution of the present supply.
    If a revenue cutter could be assigned, for at least a portion of the next season, to aid in the transportation of the inspectors, it would insure a more effective inspection of the canneries than can otherwise be had.
    It has been reported to the Department recently that certain persons were violating the President's proclamation of December 24, 1892, creating Afognac Island a Government reservation, by catching salmon thereon, and in the consideration of the matter it was found that the proclamation in question provided no penalty for trespass on the reservation. While no doubt is entertained as to the power of the Government to evict trespassers on this island, or to destroy such nets and other paraphernalia as they may be found to be using there, a definite and adequate penalty for a violation of the proclamation in question is needed.
    Attention is called to the tables appended, which give detailed information of the customs business at the several ports, including receipts, expenditures, classification of imported sugars, and other items of general public interest.

    Respectfully, yours,
    Walter S. Chance, Supervising Special Agent.
    The Honorable the Secretary of the Treasury.
    A.-Statement of customs business for the fiscal year ended June 30, 1898.

    | 1895 |  | 153, 092, 518. 20 | 6,712, 597. 30 | 4.23 |
    | 1896 |  | 161, 150, 706. 77 | 6, 904, 517. 17 | 4.28 |
    | 1897 |  | 177, 533, 674.67 | 6, 952, 866.05 | 3. 91 |
    | 1898 |  | 150, 443, 936. 93 | 6, 944, 905. 45 | 4.62 |

    Note.-The accounts of receipts and expenditures published by the Register will vary in some cases from the figures above given, for the reason that bis statement is made up from warrants issued during the fiscal year, regardless of balances in the bands of officers at the beginning and end of the year. If the accounts of each collector were closed and halances settled at the end of the fiscal year, the two statements would agree.
    C.-Statement of merchandise transported without appraisement under section. 1, act of June 10, 1880, from the undermentioned ports of first arrival during the fiscal year ended June 30, 1898.
