Fiscal year 1908.
The revenues of the Government for the current fiscal year are thus estimated upon the basis of existing laws:

The expenditures for the same period are estimated as follows:

| For the civil establishment | \$132, $000,000.00$ |
| :---: | :---: |
| For the military establishment. | 97, 000, 000.00 |
| For the naval establishment | 96, 000, 000.00 |
| For the Indian service | 12,000, 000.00 |
| For pensions | 149,000, 000.00 |
| For public works | 93, 000, 000.00 |
| For interest on the public debt | 22,000, 000.00 |
| For postal service | 201, 025, 581. 10 |
| Total estimated expenditures_ | 802, 025, 581. 10 |
| Or a surplus of | 42,000,000.00 |

Fiscal year 1909.
It is estimated that upon the basis of existing laws the revenues of the Government for the fiscal year 1909 will be-
From customs $\$ 320,000,000.00$

Total estimated revenues
$878,123,011.30$

The estimates of appropriations required for the fiscal year 1909, as submitted by the Executive Departments and offices, are as follows:

Executive establishment-

State Department 292, 360.00
Treasury Department
$11,680,390.00$
War Department
$2,217,332.00$
Navy Department
889, 910.00
Interior Department
$5,414,432.33$
Post-Office Department
$1,822,880.00$
Department of Agriculture
$10,666,351.00$
Department of Commerce and Labor
$2,800,509.80$
Department of Justice
503, 710. 00
Judicial establishment
36, 711, 385.13

Foreign intercourse 977, 920.00

Military establishment
3, $960,320.91$
$90,484,326.62$

$70,194,295.12$
$\qquad$
Collecting revenue from customs_
Miscellaneous, exclusive of sinking fund and national-bank redemption fund.-- $26,515,295.12$

Total
Total estimated appropriations
$14,179,000.00$
$5,500,000.00$

Showing an excess of the total estimates of appropriations submitted by the several Executive Departments over the estimated revenues of the Government for the fiscal year 1909 of
$912,949,288.96$

The above estimates are submitted in pursuance of law. I regret the necessity of submitting them, for they are for the most part problematical.

## STATISTICAL TABLES.

A revision of the statistical tables showing the operations of the Treasury Department has been deemed advisable in the interest of clearness and simplicity, and certain changes have already been made, but in view of the many details yet to be worked out it has been found necessary to defer further action until the next fiscal year.

## REPORTS OF BUREAUS AND OFFICES.

For a detailed account of the operations of the Department for the year attention is respectfully invited to the reports of the heads of the several bureaus and offices. Certain of the recommendations contained in these reports will be made the subject of later communications to the Congress.

The most noticeable transactions of the Treasury during the past fiscal year have been the dealings with depositary banks and the manner of disposing of accumulating revenues. For the first quarter the excess of ordinary revenues over expenditures, the deposit of lawful money in excess of national-bank notes redeemed, together with the proceeds of the Panama Canal bond sale, amounted to $\$ 40,020,671.22$, which was restored to the channels of trade by direct deposits in national banks, aggregating $\$ 42,986,700.09$, increasing the balance therein to $\$ 124,088,475.42$ by October 1. For the second quarter the net excess from the first two sources previously named was $\$ 20,238,089$, while the balance in depositary banks to the credit of the general fund had grown to $\$ 146,827,867.99$ by January 1, an increase of $\$ 22$,$739,392.57$ since October 1. The Treasury also purchased $\$ 2,441,260$ principal of the interest-bearing debt. For the third quarter the excess from the two sources named amounted to $\$ 28,649,480.14$, of which $\$ 7,265,094.10$ was deposited in national banks, increasing the balance therein to $\$ 154,092,962.09$ by April. The Treasury also purchased and redeemed $\$ 14,484,220$ principal of the interest-bearing debt. For the fourth quarter the net excess from the two sources named amounted to $\$ 34,271,285.86$, of which $\$ 12,961,817.03$ was deposited in national banks, increasing the balance therein to $\$ 167,054,779.12$ by July 1 , and the Treasury redeemed $\$ 13,399,380$ principal of the interestbearing debt. In the meantime (April.2), the residue of the 4 per cent loan of 1907, about $\$ 36,000,000$, after refunding operations were completed, was called for redemption, interest on same to cease on July 2, 1907, and in order to provide for the payment thereof a call was made upon the depositary banks June 12 for the return, by July 10 , of $\$ 30,000,000$ of the public moneys held by them.

Under the provisions of the act of March 14, 1900, $\$ 50,307,800$ in United States bonds of the loan of 1907 were received during the last fiscal year, at a valuation equal to their present worth, to yield an income of $2 \ddagger$ per cent per annum, and a like amount of consols of 1930 were issued in exchange therefor at a premium of 3 per cent.

The addition of $\$ 30,000,000$ in bonds of the Panama Canal loan to the interest-bearing debt during the past fiscal year was more than offset by the purchase and net redemption of $\$ 30,324,860$ in bonds of the loan of 1907, and refunding certificates. The noninterestbearing debt was increased $\$ 4,980,082.50$. The net increase of the debt proper was $\$ 4,655,222.50$.

The trust funds consisting of gold coin and standard silver dollars, held for the redemption of certificates and notes for which they are respectively pledged, amounted to $\$ 1,160,009,869$ at the close of the
last fiscal year, an increase of $\$ 115,371,000$ as compared with that of 1906 .
The monetary stock of the country increased $\$ 180,584,416$ during the last fiscal year. The growth in gold was $\$ 125,682,336$, in silver $\$ 13,623,750$, and in national-bank notes $\$ 42,676,330$, while there was a decrease of $\$ 1,398,000$ in Treasury notes of 1890. At the close of the fiscal year 1907 the money in circulation amounted to $\$ 2,772,956,455$, or a per capita of $\$ 32.22$. The percentage of gold to total circulation was 41.90.

The notes and certificates of United States paper currency issued during the past fiscal year numbered $173,093,911$ pieces, of the total value of $\$ 698,273,000$. The redemptions were $161,434,830$ pieces, of the value of $\$ 582,902,000$. Gold certificates outstanding increased $\$ 118,465,000$, while silver certificates decreased $\$ 1,696,000$, and Treasury notes of $1890 \$ 1,398,000$. The average cost of each piece of United States paper currency issued and redeemed was 1.571 cents, and the annual cost of maintenance of the currency issued by the National Government averages about one-fifth of 1 per cent of the amount outstanding.

There was an increase of $\$ 42,676,330$ in the volume of nationalbank notes during the past fiscal year, but the amount presented for redemption was only $\$ 240,314,681$, as against $\$ 296,292,885$ in 1906. The expenses incurred for such redemptions were $\$ 233,650.52$, which have been assessed on the banks at the rate of $\$ 0.98615$ per $\$ 1,000$ of notes redeemed.

The act of March 4, 1907, met a long-existing need. It enlarged the resources of the Treasury for the issue of paper currency in the smaller denominations. The issue of $\$ 5$ United States notes and $\$ 10$ gold certificates began on July 1, and the demands for notes and certificates of the smaller denominations have been supplied as rapidly as possible since that date.

The United States bonds pledged to secure bank circulation amounted to $\$ 558,364,660$ on June 29, 1907, an increase of $\$ 37,759,450$ during the fiscal year. The United States bonds and other obligations held to secure public deposits in national banks aggregated $\$ 193,244,052.88$, an increase of $\$ 97,668,327.88$ since June 30, 1906.

The moneys presented for redemption and exchange during the fiscal year 1907 amounted to $\$ 1,026,876,500$, as against $\$ 1,104,449,492$ in 1906.

The Treasury holdings of gold at the close of the fiscal year 1906 amounted to $\$ 807,051,690.30$. By April 27, 1907, this increased to $\$ 927,912,211.13$, after which the demands for export during the month of June caused withdrawals, reducing the amount to $\$ 904,691,-$ 730.14 by the close of the fiscal year 1907

The redemptions from the reserve fund during the last fiscal year were, in United States notes $\$ 12,690,887$, in Troasury notes $\$ 101,278$, making a total of $\$ 12,792,165$. The redeemed notes were restored to the general fund in exchange for gold, and the reserve thereby maintained at the fixed amount.

On June 30, 1906, there were $77,001,368$ silver dollars in circulation; the number distributed at Government expense for transportation during the last fiscal year was $37,500,118$, but the number in circulation on June 29, 1907, was only 81,710,444. The accumulation of this coin in the Treasury is not in excess of the amount that can be used in the regular transactions of the Treasury offices. The amount of subsidiary silver shipped at Government expense for transportation was $\$ 30,395,662.55$. The average rate for transportation was $\$ 2.40$ per $\$ 1,000$.

The available cash balance in the general fund at the close of the fiscal year 1907 was $\$ 272,061,445.47$, an increase of $\$ 91,372,090.65$ as compared with that of 1906.

## NATIONAL BANIKS.

Under the act of February 25, 1863, establishing the national banking system, and the revised act of June 3, 1864, and during the period ended March 13, 1900, national banking associations were organized to the number of 5,264 , of which 3,617 were in existence on that date, 1,273 having been placed in voluntary liquidation and 374 in the charge of receivers. The minimum amount of capital of national banks, under these acts, was $\$ 50,000$, and the average capital of associations in existence at the close of business March 13, 1900, was $\$ 170,392$. The assumed demand for national banks in localities not warranting a capital of $\$ 50,000$ induced the Congress, under date of March 14, 1900, to authorize the incorporation of associations with minimum capital of $\$ 25,000$, but only in towns with population not in excess of 3,000 . From the date of the act to the close of business on August 31, 1907, a period of nearly seven and one-half years, 2,333 banks were incorporated under that act with authorized capital of $\$ 60,840,500$, the average capital being $\$ 26,078$. During this same period 1,256 associations, with individual capital of $\$ 50,000$ or over and with aggregate capital of $\$ 150,712,800$, were authorized to begin business. The number of banks chartered under both acts in this period was 3,589 (approximately the same number as was in existence on March 14, 1900), with capital of $\$ 211,553,300$. Included in this total were 415 State banks converted into national banks; 1,164 associations organized to succeed State or private banks, closed for reorganization, and 2,010 banks of primary organization. The capital of banks of the latter class aggregated $\$ 109,838,500$, and that of converted and reorganized banks $\$ 101,714,800$. During the year ended

August 31,1907 , charters were granted to 504 associations, the aggregate capital being $\$ 34,290,000$, of which 315 banks with aggregate capital of $\$ 8,210,000$ were organized under the act of March 14, 1900that is, with individual capital of less than $\$ 50,000$-and 189 , total capital of $\$ 26,080,000$, with individual capital of $\$ 50,000$ or over. Of the banks chartered during the year, 70 were conversions of State banks, 148 organizations to succeed State or private banks, and 286 banks of primary organization. While there was a gross increase in number of banks organized during the year of 504, the net increase was but 420 , as 81 banks were placed in.voluntary liquidation, one, theretofore insolvent, being authorized to. resume business, and 4 closed as a result of insolvency. Receivers were appointed for 8 banks during this period, but in 4 instances the réceivers were discharged and the banks permitted to resume business, having been placed in a solvent condition. Of the banks closed by voluntary liquidation, 31 were absorbed by other national banks, 39 by State banking institutions, and 11 closed to discontinue business.

From the date of incorporation of the first national bank in 1863 to August 31, 1907, 8,853 associations were chartered, of which 6,582, with authorized capital of $\$ 904,494,775$, were in existence at the elose of that period. Associations to the number of 1,822 have been placed in voluntary liquidation and 449 in the charge of receivers. The number of failures represents approximately 5 per cent of the total number of banks chartered, and from records at command of the Comptroller of the Currency it appears that creditors of insolvent associations have received, on an average, nearly 80 per cent of the amounts due.

In the act authorizing the incorporation of banks with minimum capital of $\$ 25,000$ were included provisions for the reduction of tax on circulation, where secured by 2 per cent consols, and for the issue of circulation to the par value of bonds deposited, not in excess, however, of the paid-in capital stock. As primary results of this legislation, the authorized capital stock of national banks has been increased to the extent of $\$ 288,186,680$, or to $\$ 904,494,775$, and circulating notes outstanding, secured by bonds, have reached $\$ 556,945,917$, an increase of $\$ 340,571,122$. The total outstanding circulation secured by bonds and by lawful money deposited for the reduction of circulation or on account of liquidating and insolvent banks, amounting to $\$ 604,056,321$, is an increase of $\$ 349,653,591$ since March 14 , 1900.

The number and capital of national banks organized in each State and geographical division, from March 14, 1900, to August 31, 1907, and the paid-in capital stock of national banks on August 22, 1907, are shown in the following table:

Summary, by States, Geographical Divisions, and Clabses, of Naytonal Banes Organized from March 14, 1900, to August 31, 1907, and the Paid-in Capital Stoce of all Reporting National Banes on August.22, 1907.

| August 31...... | 6,582 | 904, 494, 775 | 559, 319, 710 | 105.9135 | 556,945, 917 | 47, 110, 404 | 604,056, 321 |

Of the total amount of bonds on deposit as security for circulation $\$ 528,841,550$ are 2 per cent consols of $1930 ; \$ 16,774,380$, Panama Canal bonds; $\$ 8,513,900,4$ percents of $1925 ; \$ 5,177,380,3$ percents of 1908 ; and $\$ 12,500,4$ percents of 1907 .

On August 22, the date of latest returns of national banks to the Comptroller of the Currency, there were in existence 6,544 associations with aggregate capital of $\$ 896,451,314$, the surplus and undivided profits amounting to $\$ 548,303,602$ and $\$ 186,554,151$, respectively. Individual deposits are shown to amount to $\$ 4,319,035,402$, against which, and other reserve liabilities, banks held in cash, redemption fund, and with reserve agents, 25.56 per cent. The act of June 22, 1906, relating to the limitation of loans, authorized an increase in the amount of a loan to a single interest to 10 per cent of the capital and surplus, but not in excess of 30 per cent of the capital stock. As a partial result of this change in the law, the increase in surplus of national banks, June 18, 1906, to August 31, 1907, was approximately $\$ 100,000,000$, about 30 per cent of which was transferred from the undivided profit account.
The August returns show that the banks had received from the Comptroller, for issue, circulating notes to the amount of $\$ \mathbf{5} 56,872,010$, of which $\$ 551,949,461$ had been issued, leaving the amount on hand $\$ 4,922,548$. These notes are secured by bonds with the Treasurer of the United States in trust to the amount of $\$ 557,277,950$. In addition to the bonds on deposit as security for circulation, the banks had $\$ 95,628,650$ Government bonds on, deposit in the Treasury to secure United States deposits; in bank $\$ 7,390,840$; and in addition they had on deposit other bonds to secure public deposits amounting to $\$ 68,198,039$.

Loans and discounts on August 22 amounted to $\$ 4,678 ; 583,968$; bonds, securities, etc., other than those mentioned, $\$ 700,352,456$; lawful money, $\$ 701,623,531$, which includes $\$ 404,799,628$ gold coin and gold certificates; $\$ 126,308,121$ silver and silver certificates, and \$170,515,782 legal tenders.

Comparing the current returns with those received from the banks on approximately the corresponding date in 1906, namely, September 4, it appears that there has been an increase in number of banks of 407 ; capital, $\$ 61,384,518$; surplus and other profits, $\$ 64,042,772$; circulation, $\$ 33,984,950$; individual deposits, $\$ 119,097,092$, and United States deposits $\$ 53,206,350$. The net increase in resources was $\$ 374,307,336$, but the increases in the principal items of resources were as follows: Loans and discounts, $\$ 379,600,652$; United States bonds, $\$ 31,500,730$; specie, $\$ 66,670,459$, and legal tenders, $\$ 8,940,662$. Exchanges for clearing house decreased during this period from $\$ 395,340,487$ to $\$ 190,602,163$.

## MINT SERVICE.

The four coinage mints, located at Philadelphia, New Orleans, Denver, and San Francisco, have been in operation throughout the year. The domestic coinage aggregated $208,543,958$ pieces, of the value of
$\$ 95,916,324.93$. Of this, $\$ 79,622,337.50$ was gold coin, $\$ 12,974,534.25$ was subsidiary coin, and $\$ 3,319,453.18$ was minor coin. The coinage for the Philippine Islands amounted to $5,604,000$ peso pieces and $8,740,057$ pesos in subsidiary coins.

The following amounts were coined for foreign governments:

```
Mexico:
        Gold-
        5-peso pieces_----------------------------------------------
        Silver-
            50-centavo pieces_--.---------------------------------------17;-244,000
            20-centavo pieces_-----------------------------------------------
Panama:
    Nickel-
```

```
        \frac{1}{2}-balboa pieces_---------------------------------------------------
```

The charges collected on Philippine coinage amounted to $\$ 97,875.87$ and upon foreign coinage to $\$ 174,605.98$.
The value of the original deposits of gold at the several mints and assay offices during the fiscal year 1907 aggregated $\$ 176,580,654.53$.

## Production and deposit of gold.

During the caleńdar year 1906 it is estimated that the production of gold in the United States was $\$ 94,373,800$.
The amount consumed in the industrial arts during the year is estimated to have been $\$ 39,126,763$, of which $\$ 32,619,841$ was new material.

## Silver purchases.

During the fiscal year $11,999,866$ ounces of silver bullion were purchased for the coinage of subsidiary pieces at an average of $\$ 0.67727+$ per ounce 0.999 fine. When purchases were resumed the supply of coin in the Treasury was low and the demand imperative, making heavy purchases necessary. Since a fair stock has been accumulated the policy has been adopted of spreading the purchases uniformly over the year to avoid making the Treasury an uncertain and disturbing factor in the market.

## Minor coins.

For many years it was the practice to buy nickel and bronze blanks for the minor coins from contractors, but of late these blanks have been to a considerable extent made at the Philadelphia mint from pig metal. To carry out this policy completely and do the work with the greatest economy, it is desirable to have special equipment and separate the minor coin work from the gold and silver coinage, with which special care is required. Plans have been prepared which will require a small expenditure upon the building, under the direction of the Supervising Architect.

New issue of gold coinage.
By direction of the President a contract was entered into by the Department with the late Augustus Saint Gaudens for designs to be used on a new issue of gold coinage.
The designs and models were received from Mr. Saint Gaudens and approved. Dies have been made from these models, and of the eagles several millions of dollars have been coined and furnished to the various subtreasuries to be put in circulation. The design for the eagle will also be used for the two and one-half and five dollar gold pieces. The design for the double eagle is entirely different from the tagle and other coins.

## Numismatic collection.

The collection of historical coins in the Philadelphia mint has heretofore been allowed the sum of $\$ 500$ per year for purchases. The collection is a very good one for its size, and may be made the foundation for one of great educational value. It is impossible, however, to do much at building it up unless more money is available in the purchase fund. The annual assay commission which met at the mint in 1907 volunteered to pass a resolution urging that the annual appropriation be increased to $\$ 5,000$ per year, and as such national collections are supported in other countries this sum is of only moderate proportions. The Director of the Mint also urges that authority be given the superintendent of the mint to strike a small souvenir medal to be sold to visitors and the profits turned into the purchase fund. There is a popular demand for such a souvenir, and a medal bearing upon one side the head of the President and upon the other a view of the mint edifice would doubtless bring in considerable income and be highly prized by purchasers. I recommend that such authority be granted.

## Earnings and expenditures.

The earnings and gains of the Mint Service during the fiscal year 1907 were as follows:

| for | \$233, 800.82 |
| :---: | :---: |
| Charges for alloy | 15, 503.95 |
| Charges for assaying and stamping | 34, 637.77 |
| Seigniorage on subsidiary coinage | 6, 645, 909.44 |
| Selgniorage on minor coinage- | 2, 805, 142.03 |
| Seigniorage of recoinage of minor | 3,178. 79 |
| Profits on medals and proof coins | 1,252. 37 |
| Charges received for mounting, etc., medal fund account | 764.84 |
| Charges for the manufacture of medals, etc | 6,756.86" |
| Depositing melting room grains and sweepings. | 31, 493.34 |
| Surplus bullion recovered by operative offfcers | 32, 583.78 |

Gain on bullion shipped mint for coinage ..... $\$ 5,360.97$
Proceeds sale of old material ..... 10, 057. 19
Receipts from special assay of bullion and ore ..... 4, 177. 60
Receipts from sale of by-products ..... 71, 239. 67
Receipts for manufacturing appliances for Government and other institutions ..... 4, 965.49
Charges received for coinage for Philippine government ..... 97, 875.87
Charges received for coinage for foreign countries ..... 174, 605. 98
Gain on leady melts sold ..... 27.25
Total earnings and gains $10,179,334.01$
The expenditures were as follows:
Salaries of officers and clerks ..... \$222, 992.92
Wages of workmen and adjusters ..... $943,034.42$
Contingent expenses, less amount paid to reimburse wastage and loss on sweeps sold ..... $280,355.85$
Parting and refining expenses, less amount paid to reimburse wastage and loss on sweeps sold ..... 226, 261. 31
Wastage of the operative departments ..... 28, 636. 68
Wastage of the operative departments, minor coinage operations_ ..... 2, 082. 18
Loss on sweeps sold during the year ..... 8, 926.52
Expenses of distributing minor coins ..... 54, 962.43
Expenses of medal fund (charges paid for mounting, etc.) ..... 764.84
Loss on recoinage on minor coins ..... $9,655.07$
Loss on light weight United States gold coin melted ..... 6. 75
Loss on bullion shipped the mint for coinage ..... 18.81
Total expenditures and loss_ 1, 777, 697. 78
LOANS AND CURRENCY.

The changes in the amount of the interest-bearing debt during the fiscal year ended June 30, 1907, are shown in the following statement:

## Less-

| Purchase of refunding certificates | 1, 160 |
| :---: | :---: |
| Purchase of 4 per cent bonds of 1907 | 5, 237, 550 |
| Redemption of 4 per cent bonds of 1907 under circular of March 14, 1907 $\qquad$ | 25, 088, 75 |

The particulars respecting the sale of the Panama Canal bonds may be found in the annual report for 1906. Besides the changes in the amoun't of the interest-bearing debt as set forth above, there 13091-H. Doc. 9, 60-1-3
was a reduction in the amount of the 4 per cent bonds of 1907 of $\$ 50,307,800$ and a corresponding increase in 2 per cent consols of 1930, due to refunding of the first-named bonds by authority of the act of March 14, 1900, under a circular published April 2, 1907. This circular provided for the refunding of the 4 per cent bonds to an amount not exceeding 50 millions, the bonds to be surrendered at a valuation equal to their present worth to yield $2 \frac{1}{4}$ per cent per annum, and the 2 per cent bonds to be issued at a premium of 3 per cent. By the same circular the residue of the 4 per cent loan not surrendered for refunding was called for redemption, July 2, 1907, being named as the date of maturity and the date when interest on the bonds would cease.

As results of refunding, the annual interest charge was reduced $\$ 1,006,156$; there was covered into the Treasury the sum of $\$ 1,509,234$ received as premium on the 2 per cent bonds, and there was paid to the owners of the 4 per cent bonds the sum of $\$ 175,390.45$ as the surrender value of the bonds.

The amount of the interest-bearing debt outstanding November 1, 1907, was $\$ 858,685,510$, of which the Treasurer of the United States held as security for circulating notes and public deposits bonds of the face value of $\$ 659,510,260$.

For some time the Director of the Mint has been engaged in a revision of estimates made by his predecessors of the amount of gold in the United States. A detailed statement, which may be found in his annual report, shows his reasons for believing that the amount has heretofore been overestimated by about $\$ 135,000,000$. This amount was deducted from the estimated general stock of money in the United States in the monthly circulation statement for August 1, 1907.

The changes in the amounts of the several kinds of money in the United States, outside the Treasury, between November 1, 1906, and November 1, 1907, are shown in the table following:

Comparative Statement Showing the Changes in Circulation.

| Classes. | In circulation Nov. 1, 1906. | In circulation Nov. 1, 1907. | Decrease. | Increase. |
| :---: | :---: | :---: | :---: | :---: |
| Gold coin | a \$552,686, 761 | \$574, 459,086 |  | \$21,772, 325 |
| Standard silver dollars. | 83,606,468 | 88,822,959 |  | 5,216,491 |
| Subsidiary silver. | 120,278, 648 | 127,461, 229 |  | 7,182,581 |
| Gold certificates. | 575, 958,419 | 677, 295, 909 |  | 101, 337, 480 |
| Silver certificates. | 473, 419, 449 | 464,349,568 | \$9,069,881 |  |
| Treasury notes, act of Jul | 6,894,518 | 5,601,926 | 1,292,592 |  |
| United States notes.... | 344,516, 149 | 343, 254,153 | 1,261,996 |  |
| National-bank notes | 574, 522, 374 | 595, 123, 866 |  | 20,601, 402 |
| Total. | 2,731,882,786 | 2,876,368,696 | 11,624, 468 | 156, 110, 379 |
| Net increase |  | -*............. |  | 144, 485, 910 |

- a The gold in circulation November 1,1906 , has been reduced $\$ 135,000,000$ to conform to the revised estimate of the Director of the Mint published in July, 1907.

## PUBLIC MONEYS.

The monetary operations of the Government have been conducted through the Treasurer of the United States, nine subtreasury officers, the treasury of the Philippine Islands, the American Colonial Bank of Port Rico, the Banco de la Habana, the National Bank of Cuba, and 1,269 national-bank depositaries.

The amount of public moneys held by the bank depositaries on June 30, 1907, including funds to the credit of the Treasurer's general account and United States disbursing officers, was \$178,741,438.52 , an increase since June 30,1906 , of $\$ 88,297,514.86$. On June 30, 1907, there were 397 regular and 862 temporary depositaries; 346 were designated during the fiscal year and 10 discontinued. -On November 1, 1907; the number of depositaries was 1,340 and the amount of public moneys held by them was $\$ 220,270,625.13$.

## ENGRAVING AND PRINTING.

The Bureau executing this work is one of the most important connected with the public service under my charge. It prepares for this and other Departments of the Government all the instruments defined by law to be " obligations or securities of the United States," which comprise all impressions representing or designed to represent values, from a postage stamp of the denomination of 1 cent to a bond of the denomination of $\$ 50,000$.

The aggregate representative value of the work delivered by this Bureau during the fiscal year just closed is $\$ 1,421,882,608.45$. In the execution of a product so valuable it is obviously necessary that the utmost care should be exercised, not only to protect the people through whose hands these obligations and securities pass from loss by counterfeiting, but also to protect the Government against unauthorized issues. To secure these ends, the establishment should be thoroughly organized, its personnel should be of the best obtainable efficiency, and its work should be up to the highest standard of excellence. Having a thoroughly organized and efficient force, the rooms in which the work is executed should be adequate in size for the force employed and the work to be done therein, and they should be arranged to give the fullest measure of light and air and be kept in a thoroughly sanitary condition. I recently made a personal inspection of this Bureau, and while its organization is admirable and the character of the work turned out by it shows the efficiency of its force, I was painfully impressed with the inadequacy of the rooms available for the number of people employed and the volume of work executed. I found the most deplorable overcrowding of men and women in every part of the building. In addition to the overcrowding of the
employees, I found that it was necessary to work a part of the force beyond the regular hours, and a considerable number of men and women at night. That part of the force engaged on overtime is required to work from $8 \mathrm{a} . \mathrm{m}$, to $5 \mathrm{p} . \mathrm{m}$., and the night force to work from $3.30 \mathrm{p} . \mathrm{m}$. until 11.30 p . m., daily. The working of any portion of the force of the Bureau beyond the regular hours and at night is objectionable. The long hours involved in the overtime are exhausting to the men and women engaged in this laborious work, and it is obviously undesirable in many other ways. Arrangements have been made to the end that hereafter no portion of the operative force shall be required to work overtime. The only relief that can be afforded the men and women working at night is to provide adequate facilities for the execution of their work during the regular hours of business in the Department.

The Director of the Bureau called the attention of the Secretary of the Treasury to this condition of affairs during the last session of the Congrèss, and his letter was transmitted by the Secretary with a strong indorsement for favorable action by the Congress. This resulted in a provision in the sundry civil act for the fiscal year 1908 authorizing the Secretary of the Treasury to prepare estimates on three separate plans for the alleviation of these conditions. In compliance with this provision of law the matter will be made the subject of a special report to the Congress during the coming session.

The results of the operations of the Bureau during the fiscal year just closed have been very satisfactory. Every impression of the obligations and securities of the Government needed by the several Departments has been promptly furnished. The work delivered during the year aggregated 201,123,528 sheets, an increase over 1906 of $20,833,762$ sheets, or slightly over $11 \frac{1}{2}$ per cent. In addition to the impressions delivered, miscellaneous work was executed to the value of $\$ 147,732.97$, an increase over 1906 of $\$ 29,439.27$, or $24 \frac{9}{10}$ per cent. A considerable saving has been accomplished. The aggregate amount available for the operation of the Bureau during the year from appropriations and repayments was $\$ 4,003,368.54$. The aggregate amount expended for all purposes connected with the work of the Bureau was $\$ 3,849,064.39$. The unexpended balances of appropriations aggregate $\$ 154,304.15$.

The act approved March 4, 1907, making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30,1908 , and for other purposes, under the head, "Wages of plate printers," repealed the second proviso under this same head in the sundry civil act approved March 3, 1899, requiring the use of handroller presses in the printing of internal-revenue stamps. The repeal of this provision permitted, after July 1, 1907, the use of power presses in the printing of this class of work. This was a most im-
portant piece of legislation, as it enables the Bureau to use rapid and improved machinery, which will greatly facilitate the execution of its work. Immediately upon the approval of the act, the matter of obtaining a number of power presses was taken up and the Director was authorized to make a contract for the construction and delivery of 20 such presses. This contract was made on March 19, 1907, the delivery of the presses to commence July 1, 1907, and the entire number to be delivered by September 19, 1907. The cost of these presses will be $\$ 64,500$, which will be paid from the saving effected in the appropriation for materials and miscellaneous expenses, engraving and printing for 1907. Some delays have been experienced in the delivery of the presses, but satisfactory progress is now being made. Twelve of them are in successful operation, and it is expected that within a few weeks the entire twenty will be in use.

## PUBLIC BUILDINGS.

The general policy of this Department with reference to public buildings has been continued, it having been found by experience that a type of building as nearly classic as conditions will permit, and of fireproof construction, is best in Federal architecture. This policy, however, is subordinated to the purposes for which the buildings are intended, convenience of arrangement always being the first consideration.
The strictly technical force of the Supervising Architect's Office has been largely increased since the date of the last report made by my predecessor, and is rapidly becoming efficient. However, some time must yet elapse before the high state of efficiency is reached which existed June 30, 1905, when the disintegration mentioned in the last report of the Secretary of the Treasury was made necessary by lack of appropriations for public buildings. Every effort has been exhausted to secure the architectural talent needed to prepare drawings and specifications for public buildings, but the field of private enterprise for this kind of service was never more inviting than at present, and therefore the work of reorganizing this branch of the Department has proceeded less rapidly than the necessity of the situation demanded. Much, however, has been accomplished in this direction, and it is hoped that the strictly technical side of the Supervising Architect's. Office will shortly be restored to its former efficiency.
During the year ended September 30, 1907, there were completed 18 buildings, which, added to the 515 previously reported, together with the buildings at Perry and Kingfisher, Okla. (the former transferred by legislation and the latter by Executive order), make 535 completed and occupied buildings, including 43 marine
hospitals and quarantine stations, under the control of this Department. There are 28 new buildings in course of erection at this time, and work is in progress extending, improving, and enlarging 17 other buildings. Extensions have also been made during the period above mentioned to the buildings at Burlington, Iowa; Fargo, N. Dak.; Kansas City, Mo., and Toledo, Ohio.

Much has been accomplished in the reconstruction and restoration of the public buildings in California destroyed by the earthquake and fire, and the Department completed in ample time the buildings authorized for the Ter-Centennial Exposition held near Norfolk, Va. The commemorative monument and public comfort station on Jamestown Island, Virginia, have also been constructed under the direction of this Department.

In addition to the construction work accomplished, nearly all of the sites authorized by the act approved June 30,1906 , have been selected, and titles to most of them are now vested in the Government.

There are 174 buildings upon which construction operations have not been commenced, and this does not include 31 buildings which are to be extended, improved, or enlarged.

In this connection, the attention of the Congress is invited to the fact that unusually high prices have prevailed during recent years with reference to building materials and labor, caused by the generally prosperous condition of the country. As a result the Department has been unable to award contracts for public buildings as rapidly as desired, and it has been necessary in many instances to revise the plans in order to obtain proposals within the limits of cost fixed by the Congress. The general policy of the Department has been to provide buildings amply large for all branches of the service which will have quarters therein, and, as stated above, this result is difficult to secure because of present market conditions. Every effort, however, has been made to overcome these conditions with a fair measure of success.

At the last session of the Congress but one site and building was authorized, the post-office at Athens, Ohio, but the legislation failed to make any appropriation to carry its provisions into effect.

The old site for the public building at Los Angeles, Cal., has been sold and the proceeds of sale will be added to the amount available for the.construction of the new building, as provided by law. This leaves at present 87 sites for which no authorization has been made for the construction of buildings.

An act of the Congress approved March 4, 1907, appropriated the sum of $\$ 360,000$ to be used in substituting granite for sandstone in the east front of the Treasury building, and, in pursuance of this act, the Department has awarded a contract to perform the work for the sum of $\$ 298,965$, to be completed by December $1,1908$.

The following tables show the financial operations of the Department with reference to the public buildings under its control during the fiscal year ended June 30, 1907:

## EXPENDITURES DURING THE FISCAL YEAB.

contract liabilities existing on june 30, 1907.
On account of sites, for the construction of public buildings, and
for extensions and repairs especially appropriated for-_..... $\$ 9,690,481.62$

## PUBLIC HEALTH AND MARINE-HOSPITAL SERVICE.

## National quarantine.

The Surgeon-General reports that 4,635 vessels were inspected, of which number 478 were disinfected at the 43 national quarantine stations in continental United States. Inspection has been maintained on the Canadian and Mexican borders. A train-inspection service was maintained to prevent the introduction of smallpox into the State of Maine from New Brunswick and Nova Scotia, where it prevailed in epidemic form. National quarantine has also been
maintained at 8 ports in Porto Rico, 7 in Hawaii, and 7 in the Philippines. Medical officers were stationed at the following named foreign ports: Habana, Cienfuegos, Matanzas, and Santiago, Cuba; Rio de Janeiro, Brazil; Veracruz, Progreso, Coatzacoalcos, and Salina Cruz, Mexico; Colon; Bridgetown, Castries, and St. Thomas, West Indies; Guayaquil, Ecuador; Callao, Peru; Yokohama and Kobe, Japan; Shanghai and Hongkong, China; Naples, Italy, and Calcutta, India. These officers have exercised quarantine supervision over outgoing vessels bound for the United States, its insular possessions, and dependencies. At a number of the foreign ports they have also examined emigrants by request of the Immigration Bureau and steamship companies. On their certification of physical defects which would cause rejection on arrival in the United States the steamships refused to transport the emigrants. Medical officers have also been stationed at nine fruit ports in Central America to enforce at the foreign ports the special regulations relating to fruit vessels which permit their entry at ports of the United States without detention.

During the fiscal year, under the law of June 19, 1906, the Service obtained possession of and operated the quarantine station at Charleston and three smaller stations in South Carolina, the quarantine station in Mobile Bay, Alabama, the New Orleans quarantine station, and four substations in Louisiana. The purchase of the South Carolina and Louisiana stations, though they are operated by the Government, has not been completed on account of technicalities.

Overtures were made to the governor of Texas for the purchase of the five quarantine stations of that State, the principal one being at Galveston. A bill for the purpose was introduced in the legislature, which adjourned without taking action thereon. Measures have been taken for the selection of a new quarantine site in Galveston Harbor, looking to the construction and operation of a national quarantine station at that port. The local quarantine station is badly located and on ground which is claimed by the War Department, so that its purchase in any event is undesirable.

The National Quarantine Service now has jurisdiction over the whole of the Pacific coast, the Gulf coast, with the exception of Texas, and the Atlantic coast, with the exception of Baltimore, New York, Philadelphia, and Boston, and a few of the neighboring minor ports.

## Bulletins of the public health.

The Service has issued each week 3,500 copies of bulletins entitled " Public Health Reports," containing sanitary information and statistics relating to the public health, received from its own officers and from State and municipal officers and from the United States consuls in foreign ports. Special bulletins were also issued on the diagnosis
and prevention of contagious diseases, the destruction of mosquitoes, the proper organization of local authorities to combat epidemic disease, and flies and mosquitoes as carriers of disease.

## Medical inspection of immigrants.

During the fiscal year $1,285,349$ immigrants were inspected under the provisions of the immigration laws and regulations. These examinations have been made at 32 ports in the United States, at some ports officers being detailed for this duty exclusively, while at others the examination has been made in conjunction with other duties of the officer, and at all ports provision is made for a board of medical officers to pass upon cases that have given rise to dispute. Under the last immigration act, approved February 20, 1907, the responsibility of the medical officers is materially increased, and hereafter all certificates which may result in the deportation of the immigrant will be signed by a board of officers instead of by a single officer. The medical inspection of immigrants has also been conducted by the Service in Porto Rico, Hawaii, and the Philippines.

## Investigation of typhoid fever in the District of Columbia.

The board of officers appointed to investigate the origin and prevalence of typhoid fever in the District of Columbia have submitted a report (Hygienic Laboratory Bulletin No. 35), embodying every detail relating to the cause of the disease. Ten per cent of the 866 cases studied were attributable to infected milk, about 15 per cent of the cases were imported, and about 6 per cent were attributable to contact. The board is now engaged in making further investigations of this all-important problem. The report is so thorough in detail that it will prove of great value to students of this epidemic disease in all parts of the country.

## Investigation of the mill industry from farm to consumer.

As a result of the report of the typhoid board, the District Commissioners, with a view to eliminating the dangers from impure milk, called a milk conference to make recommendations in the matter, with a view to future legislation. Many valuable papers were presented to this conference by officers of the Service and of the Agricultural Department, physicians in private practice, members of the legal profession, and business men.

Pending the establishment of a municipal laboratory, as recommended by the conference and by request of the Commissioners, the Service, at its Hygienic Laboratory, has daily made bacteriologicn] and chemical examinations of milk collected and submitted by the health officer, to whom the findings are reported.

With the approval of the President, and with the cooperation of the Departinent of Agriculture, the Service has undertaken to prepare a complete report upon the mill industry from farm to the consumer in its relation to the public health.

This report will be of a character to be serviceable to all State and municipal authorities.

## Sanatorium for consumptives, Fort Stanton, N. Mex.

Three hundred and sixty-five patients were treated at this sanatorium, and 179 discharged during the year. There were remaining under treatment June 30, 186 patients. Of the 179 patients discharged, 101 were cured, apparently cured, improved, or their disease arrested.

Leprosy investigation station, Molokai, Hawaii.
Plans and specifications for the erection of the necessary buildings were completed by the Supervising Architect, and competitive bids received. These, however, were excessive and were rejected by the Department, causing a necessary delay. Arrangements have been made for the erection of a building under the supervision of a constructor without formal contract for the whole work. In the meantime a medical officer and assistant are engaged in preliminary investigation, both at Honolulu and Molokai.

## Hygienic Laboratory.

In accordance with estimate submitted, the last Congress appropriated $\$ 75,000$ for an additional building and improvements of the Hygienic Laboratory, located on the old naval observatory grounds in Washington. Tentative plans have been prepared and are in the hands of the Supervising Architect for completion and construction of the building.

## Sanitation, Jamestown Exposition.

By request of the president and board of governors of the Jamestown Exposition, a commissioned officer of the Service was detailed in October, 1906, as sanitary director of the exposition. Through his efforts, by drainage and oiling, the site of the exposition has been made free of marshes and mosquitoes and made healthful.

Sanitary conference.
Conformably to an act of the Congress approved July 1, 1902, the fifth annual conference of State health authorities with the SurgeonGeneral of the Public Health and Marine-Hospital Service was held in Washington May 29 of the present year. Twenty-two States and the District of Columbia were represented.

International sanitary measures.
The international sanitary convention at Paris, which was signed ad referendum December 3, 1903, was proclaimed by the President of the United States May 18, 1907. This convention codifies the measures relating to the prevention of the spread of plague and cholera, and provides for an international sanitary bureau at Paris. Since the United States has subscribed to the convention it is expected that this Government will be represented in the international sanitary bureau at Paris, which has for its object the collection and exchange of sánitary information.

A like sanitary convention relating to the prevention of the spread of plague and cholera, with the addition of measures relating to yellow fever, has been ratified by 10 of the American republics. Both these sanitary conventions relate principally to quarantine measures against the diseases named, but, by resolution of the International Conference of American States in Rio, August, 1906, special attention to measures for securing improved sanitation of ports where these diseases prevail is imposed upon the third international sanitary convention, which is to be held in Mexico City in December of this year. It is further imposed upon this last-named convention to establish relations between the International Sanitary Bureau of American Republics now existing in Washington and the Bureau Sanitaire Internationale of Paris.

The Congress at its last session authorized the President to extend an invitation to the International Congress of Hygiene and Demography to hold its next meeting, in 1909 or 1910, in the United States. The invitation will be delivered by the delegates of the United States at the Berlin meeting of this congress in September of the present year.

## Epidemic diseases.

Yellow fever.-Owing to sanitary measures adopted and to great care exercised in the administration of maritime quarantine, there were only 7 cases of yellow fever reported during the year and they occurred as follows: Six at quarantine stations, imported on vessels, and one in the State of Louisiana. In Cuba during the first half of the fiscal year there were in Habana 53 cases and 7 deaths, imported from the provinces mainly. January 14 there was no known case in the island. Since that date to June 30, 8 cases and 2 deaths have been reported.

Cholera.-In the Philippine Islands during the fiscal year there were 828 cases of cholera and 719 deaths in Manila and 6,487 cases and 4,738 deaths in the provinces. From the original outbreak in Manila, in August, 1905, to December 1, 1906, the date of the last
case, there were 1,103 cases and 970 deaths. In the provinces the last case was reported in February, 1907.

Plague.-One fatal case of plague was reported at the marine hospital; San Francisco, Cal., from the tug Wizard, May, 1907. No subsequent cases have been reported. An outbreak of the disease occurred in Hawaii in August, 1906, three deaths having been reported. A second outbreak occurred during March, 1907, and subsided in May. A total of 26 cases and 21 deaths were then reported. In the Philippines there was no report of plague, the last case occurring in April, 1906.

Smallpox.-Smallpox was reported during the fiscal year in 40 States, 1 Territory, and the District of Columbia, with a total of 14,377 cases and 38 deaths. As shown by previous reports there has been a marked annual decrease in the number of deaths. The increased number of cases over the last report is due to the more complete reports received by the Bureau.

## Marine hospitals and relief.

During the fiscal year 55,113 patients received treatment, 14,984 being treated in hospital and 40,129 as dispensary or out-patients.

There were examined during the year physically for other services, exclusive of the examination of immigrants, 5,284 persons connected with the Revenue-Cutter Service, the Life-Saving Service, Steamboat-Inspection Service (pilots for color-blindness), Coast and Geodetic Survey, Light-House Service, Civil Service Commission, and Isthmian Canal Commission. Of these, 485 persons were rejected. In addition there were 231 merchant seamen examined to determine their fitness for shipment on merchant vessels of the United States, of whom 13 were rejected.

## Personnel.

At the close of the fiscal year there were 125 commissioned medical officers, namely, the Surgeon-General, 5 assistant surgeon-generals, 28 surgeons, 57 passed assistant and 34 assistant surgeons. There were also 256 acting assistant surgeons and 47 pharmacists.

Expenditures.
Prior to the fiscal year 1907 the maintenance of the general service was provided for by a lump sum derived from the receipts from tax on tonnage. At the close of the fiscal year 1906 there was an unexpended balance of this fund of $\$ 338,313.47$, which was turned into the Treasury. The expenditures of 1907 have been made from definite appropriations for specified objects, the total appropriation for the ordinary maintenance of the Service being $\$ 1,185,000$, of which sum $\$ 110,000$ was made payable from the permanent appropriation for expenses of regulating immigration.

The receipts and reimbursements from all sources, repayment for care of foreign seamen, etc., were $\$ 16,358.80$. The expenditures for the same period were $\$ 1,006,762.95$; estimated outstanding liabilities, $\$ 24,655.02$, leaving an estimated balance of $\$ 169,940.83$.

The amount available of the appropriation for preventing the introduction and spread of epidemic disease at the beginning of the fiscal year was $\$ 297,453.04$. An appropriation of $\$ 200,000$ was provided by the Congress in addition to the available balance reappropriated. The expenditures were $\$ 117,649.87$, leaving a balance June 30 , 1907, of $\$ 379,803.17$.

The appropriation for the maintenance of the quarantine service was $\$ 340,000$. The amount of repayments was $\$ 466.16$. The expenditures were $\$ 318,740.04$, which, deducting outstanding liabilities, leaves an estimated balance of $\$ 6,000$.

## Quarantine and sanitation.

The amount available, at the beginning of the fiscal year, under the act of June 19, 1906, was $\$ 500,000$; the expenditures were $\$ 43,885.42$; the repayments were $\$ 110.90$; the balance on hand June 30, 1907, was $\$ 456,225.48$.

## LIFE-SAVING SERVICE.

The number of disasters to documented vessels during the last fiscal year within the field of the operations of the Life-Saving Service was 347 . On board these viessels were 3,936 persons, 22 of whom were lost. The estimated value of the vessels was $\$ 6,478,220$ and that of their cargoes $\$ 1,824,045$, making the total value of property imperiled $\$ 8,302,265$. The estimated value of property saved was $\$ 6,916,400$ and of property lost $\$ 1,385,865$. The number of vessels totally lost was 55 .

The number of undocumented vessels-those under 5 tons burdenincluding sailboats, gasoline launches, rowboats, etc., which sustained casualties within the year was 491 , involving 1,176 persons, of whom 23 were lost. The estimated value of property involved in these disasters was $\$ 530,320$, of which $\$ 516,585$ was saved and $\$ 13,735$ lost.

There were sheltered at the stations 807 distressed persons, to whom a total of 1,140 days' relief was furnished.
The foregoing figures aggregate as follows:

More or less important assistance was rendered by the station crews to 714 vessels not included in the preceding figures, making the total number of vessels assisted 1,325 .

The crews saved the lives of 174 persons not connected with vessels, who had fallen from docks, piers, etc., or were otherwise endangered.

Warnings to 204 vessels running into danger were given by the signals of the patrolmen and watchmen of the Service. These signals were made at night in 182 instances, and 22 were given during the day in thick weather. Of the vessels so warned 96 were steamers.

The number of stations embraced within the Service at the close of the year was the same as that given in last year's report, 278 , no additional stations having been established during the year.

The net expenditure for the maintenance of the Service was \$1,790,198.97.

Contract was entered into during the year for the building of two new stations-one at Bethany Beach, Del.; the other at Garibaldi, Oreg., at the entrance to Tillamook Bay. The former station has just been completed and the latter is now under construction.

## Lifeboats with power.

The appropriation made for the maintenance of the Service during the current fiscal year was increased over that for the year preceding by $\$ 100,000$, with the intention that a good portion of the amount should be expended in providing additional lifeboats with power, and this intention is being fulfilled.

A brief account of the development of these boats was given in last year's report. The experience which the Service has since had with them shows that the prospective value of this improvement to the efficiency of the Service was not then overestimated.

## Books for life-saving stations.

The estimates for the maintenance of the Service for the ensuing fiscal year will contain an item providing for books for life-saving stations. It is not asked that the appropriation be increased on account of the inclusion of this item, but that it may be made available for the expenditure of the necessary funds therefrom for the purpose indicated. The majority of life-saving stations are situated on the outlying barren beaches of our coasts, and on islands remote from the public centers and inaccessible to places affording opportunities or advantages for entertainment or instruction. The keepers are required by law to reside continually at or in the immediate vicinity of their stations and the crews must live at the stations during the entire period of the active season. This means that these men are on duty all the time during the active season, excepting for a short liberty in regular turn, which of necessity must be taken up by visits to their families-in many instances residing long distances away-and in
attending to their pressing personal affairs. Thus situated, they have but little time they can call their own, and certainly no opportunity for recreation of any kind other than that which they are able to provide for themselves at their posts of duty. In these circumstances it would seem that as in the case of the Light-House Service the Government might properly lend its aid in providing some means of self-education, instruction, and entertainment for these men, whose vocation separates them from home and family and carries them to environments affording no advantages of social intercourse or facilities for intellectual improvement. No better plan suggests itself for the accomplishment of this end than the introduction into the stations of good, wholesome reading matter made up of well-selected books of fiction, travel, history, biography, newspapers, and magazines. There can be no doubt that much good would attend such a course. It would have a strong influence in maintaining harmonious relations among the men, which is so essential to the welfare of the Service, and in promoting their efficiency. The members of the Service can not afford, at their present pay, which is hardly adequate to provide for their own subsistence at the stations and the keep of their families at home, to furnish themselves, for their use at the stations, with a desirable class of literature. An inconsiderable expenditure each year for a few years, from the moneys appropriated for the support of the Service, would be sufficient to establish a creditable library at each station. If the provision suggested should be enacted into law, it is not proposed to furnish each station with a library at the outset, but to supply the more isolated stations first and to gradually extend the system as funds can be spared for the purpose. Arrangements can be made for the exchange of the libraries between the stations of the same district at stated periods, thus furnishing fresh matter at each station for some time to come. It is earnestly hoped that the provision suggested will receive the sanction of the Congress.
In the Treasury Department library at the present time there are some 6,000 volumes of fiction, biography, history, etc., which are no longer needed and can be discarded. It is believed that these books will form a nucleus for libraries in the life-saving stations, but without specific authority of law they can not be forwarded to such stations. It is therefore recommended that the necessary authority, by Congressional enactment, be granted the Department for their transfer.

## Retirement of employees.

Attention has heretofore been called to the impairment of the efficiency of the personnel of the Service, due to the difficulty of securing competent and reliable men for the station crews. The problem confronting the Service is a very serious one and demands
immediate and earnest consideration by the Congress. It appears that during the last five years rapid and constant decline has taken place both in the number and qualifications of men who offer themselves as recruits to fill occurring vacancies, which are becoming more and more numerous, as men are constantly leaving the Service for less hazardous and better compensated positions. This depletion has occurred to such an extent that there is scarcely a station with its full complement of surfmen. To remedy this condition it is necessary to offer such attractions as will draw desirable recruits to the Service, and to this end a retirement plan has been proposed and submitted to the Congress. I have been unable to give the subject sufficient examination to warrant adherence to the details of any particular, plan, but present the matter in this way for the consideration of the Congress with the earnest recommendation that adequate relief be afforded, so that the Life-Saving Service may be restored to a proper basis of efficiency.

## REVENUE-CUTTER SERVICE.

The following is an abstract of the regular work performed by the United States Revenue-Cutter Service during the fiscal year 1907, together with the net expenditures:

| Lives saved (actually rescued) from dr | 41 |
| :---: | :---: |
| Persons on board vessels assisted | 2,937 |
| Persons in distress taken on board and cared | 78 |
| Vessels assisted | 138 |
| Vessels boarded and papers examined | 14, 122 |
| Vessels seized or reported for violation of law | 319 |
| Fines and penalties incurred by vessels reported | \$53, 732 |
| Value of vessels assisted and their cargoes | \$9, 196, 097 |
| Derelicts and obstructions to navigation removed or destroyed_- | 17. |
| Net expenditure: |  |
| Appropriation for maintenance of the Service, including appropriation for special repairs_ | $\$ 1,800,000.00$ |
| Estimated unexpended | \$4, 999. |

The operations of the Service during the past year have covered the entire coast line of the United States, including Porto Rico, Alaska, the Hawaiian Islands, and the waters of the Great Lakes. At the close of the year five vessels were actively engaged in the North Pacific Ocean and Bering Sea in protecting the fur-seal and other fisheries and in safeguarding the public interests in those waters and on the adjacent coast. A British schooner was seized by the Rush May 29 in Fairweather Ground, off the southeast coast of Alaska, for illegal sealing during the closed season and was subsequently delivered to the proper authorities in British Columbia, in accordance with our agreement with Great Britain in regard to the disposition of such cases. Much important work has been accomplished by the Service, and is still in progress, toward correcting cer-
tain evils that have been found to exist among the whaling fleet in the Arctic Ocean. The commanding officer of the Thetis, which vessel has made the last two annual cruises in the waters of the far north, has been directed to act jointly with and assist the officers of the Department of Justice in Alaska to eradicate these abuses.

The work of patrolling the Atlantic coast in the winter season for the relief of distressed mariners was effectively carried out by séven seagoing cutters designated by the President as provided by law. Timely assistance in various ways was rendered disabled and stranded vessels and their crews, the value of property aided, including cargoes, being greater than for a number of years past.

Destroying derelicts and removing sunken wrecks and other dangers to navigation have become an important duty of the Service, and during the year many obstructions of this character have been promptly and effectively cleared from the paths of commerce. Owing to their activity in coast waters, their readiness to respond quickly to calls made upon them, and to the knowledge of the use of explosives possessed by their officers, revenue cutters have shown special aptitude for this branch of work.

Whenever their services have been required revenue cutters have enforced the regulations governing the conduct of regattas. The supervision of these events, which are usually attended by a concourse of water craft and spectators, has been satisfactorily maintained for the safety and in the interest of all concerned.
Naval organization and discipline are maintained on board all vessels of the Service. Drills and target practice with rapid-fire guns and small arms have been regularly conducted, and the revenue cutters are in readiness for immediate cooperation with the Navy, in accordance with law, whenever called upon.

During the year there have been in active commission 21 cruising cutters and 16 harbor vessels and launches which do boarding and anchorage duty at various ports. Fourteen officers have been on duty with the Life-Saving Service for the purpose of inspecting, drilling, and disciplining the crews of that Service and superintending the construction of buildings and life-saving appliances, etc. One officer is on duty in connection with the Immigration Service at the port of New York.

> Vessels.

The Itasca, formerly the gunboat Bancroft, which was transferred to the Revenue-Cutter Service by authority of Congress, has been completely overhauled and repaired, both as regards hull and machinery, and will be used as a practice cutter for cadets. Extensive repairs have been made to the McCulloch and Bear, stationed on the Pacific coast, and those vessels have been put in first-class condition. The Androscoggin, intended for service on the coast of Maine, will, under 13091-H. Doc. 9, 60-1——4
the contract with her builders, be completed December 25. The ocean-going tug No. 16, to be used for relief work in connection with the life-saving station at Neah Bay, Washington, and the vessel authorized for the Service to remove derelicts and other dangers to navigation, are now in course of construction. Specifications and plans are being prepared for an ocean-going tug for New Bedford, Mass., two cruịing cutters of the first class for Puget Sound and Savannah, Ga., and a boarding vessel for the port of New Orleans, and proposals will soon be invited for their construction.

The small steamer Manhattan, which is detailed to enforce the anchorage laws of the port of New York, is in poor condition and is not worth rebuilding or many repairs. She is 34 years old, having been built in 1873, has been in constant service, and is now obsolete and nearly worn-out. I recommend that she be replaced by a modern vessel at a cost of $\$ 75,000$. The anchorage system of New York Harbor, which includes the North and East rivers and Kill van Kull, is too extensive to be efficiently supervised by the employment of a single vessel, as is now the case, and two swift, able motor launches that will cost not. more than $\$ 20,000$ each are urgently needed as auxiliaries in this important work, and to assist, when necessary, the customs service. There is required a seagoing cutter of suitable dimensions for the Gulf coast, and I recommend that one be provided at a cost of $\$ 250,000$. At present the Service has no vessel available which can be used to aid distressed craft under all conditions in those waters.

## Personnel.

While various acts of the last Congress have been of benefit in increasing the efficiency of the Service, additional legislation is needed further to improve its organization and personnel. Greater opportunity for advancement should be held out to the officers and men, as the life and strength of a corps depend chiefly upon an adequate and a just system of promotion. A commissioned line officer, after many years of service, now can attain only the rank of captain (equivalent to a major in the Army), while the highest rank of an engineer offcer is practically that of chief engineer (equivalent to a captain in the Army). This limited promotion is not conducive to the best interests of the Service, nor commensurate with its scope and character or the qualifications required for its officers. Difficulty is being experienced, particularly in the engineer corps, in obtaining suitable candidates for cadetships for the reason, manifestly, that the Service does not offer sufficient inducement for young men to enter it as a life profession.

These conditions can be largely overcome by the enactment of a bill along the lines of that recommended to the Fifty-ninth Congress
by my predecessor. This measure (S. 7663), which was favorably reported to the Senate by the Committee on Commerce, provides, among other things, for two additional grades each in the line and engineer corps and a reduction in the present number of captains and chief engineers. By its terms suitable status is given the chief of the Service, who, notwithstanding his larger duties and greater responsibilities, has now no higher rank than any other captain, a situation not consistent with proper organization and discipline and without parallel in other military branches of the Government. The proposed legislation will, in the interest of efficiency, also insure benefits for the warrant officers and enlisted force. The features of the bill are based upon military precedent in accordance with the character and purpose of the Revenue-Cutter Service and the laws for its government. A careful estimate shows that the annual increase in expenditure due to the operation of the measure would be in round numbers not more than $\$ 70,000$.

## SECRET SERVICE.

The Secret-Service Division reports a continued and satisfactory decrease in the number of offenses against the currency of the United States. Of 15 new counterfeit issues discovered and described during the fiscal year only 5 were in the "deceptive" class, and the circulation of even the best of the counterfeits was very much restricted. Most of the counterfeits suggest the work of novices or ignorant foreigners. In the coin counterfeits the spurious dollars and halves made of low-grade silver have almost wholly disappeared and the volume of base-metal counterfeits showed a material reduction from the previous year. There were only 216 prosecutions for counterfeiting, as compared with 705 ten years ago and 356 during the previous year.

Attention is called to the persistent circulation of notes of defunct banking and railway corporations which so closely resemble the Federal currency as to be readily accepted by those not thoroughly familiar with all of the genuine issues, and legislation is suggested to cover this offense, which is not adequately dealt with in any of the existing statutes.

## DISTRICT OF COLUMBIA.

The net expenditures on account of the District of Columbia for the fiscal year 1907, by warrants paid, were $\$ 11,370,801.55$. The net revenues deposited in the Treasury by warrant on this account for the same period were $\$ 6,266,396.32$.
The amount of the funded debt retired during the year was $\$ 483,950$, reducing the annual interest charge by $\$ 17,664.17$. Since the close of the fiscal year the debt has been further reduced by the
purchase of $\$ 481,000$ of the 3.65 per cent bonds, leaving outstanding October $1,1907, \$ 10,622,750$ in bonds bearing 3.65 per cent interest.

The total issue of 3.65 per cent bonds is limited by law to $\$ 15,000,000$, and of this sum $\$ 14,997,300$ has now been issued.

At the close of the fiscal year the 10 per cent guaranty fund retained from District contractors amounted to $\$ 319,969.92$, and is represented by $\$ 124,870$ in bonds purchased at the request and risk of contractors, and $\$ 180,697.73$ uninvested cash.

Detailed information in regard to the affairs of the District of Columbia will be found in the report of the District Commissioners and of the Treasurer of the United States as ex-officio commissioner of the sinking fund of the District.

STATE BONDS AND STOCKS OWNED BY THE UNITED STATES.
The following statement shows the nonpaying State bonds-and stocks, formerly in the Indian trust fund, now in the Treasury, belonging to the United States:

A history of these State stocks and bonds is given in House Document No. 263, Fifty-fourth Congress, second session.

CENTRAL PACIFIC DEBT.
All amounts which have become due to the United States under the agreement dated February 1, 1899, for the settlement of the indebtedness of the Central Pacific Railroad Company, have been paid by the railroad company in full, including interest on all outstanding notes to August 1, 1907.
The principal of all notes held .August 1, 1907, amounted to. $\$ 8,821,907.34$, and first-mortgage bonds to the amount of $\$ 8,822,000$ are held as security for the payment thereof.

## TERRITORY OF HAWAII.

The debt of Hawaii assumed by the terms of the joint resolution of July 7,1898 , consisted of $\$ 3,235,400$ in interest-bearing bonds and $\$ 764,570.31$ in postal savings deposits. This indebtedness has been fully paid by the United States, except $\$ 2,670.05$ in postal savings certificates not yet presented for payment.

The appropriation of $\$ 1,000,000$ provided by Congress for the liquidation in part of awards made for property destroyed in suppressing the bubonic plague in the Territory in 1899 and 1900 has been practically expended. The First National Bank at Honolulu reports that 26 awards, amounting to $\$ 2,298.71$, are now outstanding.

## INTERNAL REVENUE.

The only important legislation affecting internal revenue, enacted by the last session of the Congress, is the act approved March 2, 1907, amending the act of June 7, 1906, which took effect January 1, 1907, providing for the withdrawal from bond free of domestic alcohol rendered unfit as a beverage or for liquid medicinal uses by the addition thereto of denaturing materials. The amendment has the effect of removing certain restrictions imposed by the original act to authorize the withdrawal from bond of rum of not less than $150^{\circ}$ of proof for denaturation only, and to facilitate the manufacture of alcohol and rum for denaturing purposes, the denaturation and sale thereof, and to extend the use of the same for use in the arts and industries, and for fuel, light, and power.
During the six months ended June 30, 1907, there were withdrawn from bond, free of tax, for denaturation 3,084,950.8 proof gallons of alcohol, the tax upon which at the existing rate, $\$ 1.10$ per gallon, would equal $\$ 3,393,445.88$.

The receipts from internal-revenue taxes for the fiscal year 1907, as shown by collectors' reports, were $\$ 269,664,022.85$, a net increase over 1906 of $\$ 20,561,284.85$.

The following items show increases for 1907: Distilled spirits, $\$ 12,942,846.77$; manufactured tobacco, $\$ 3,388,072.31$; fermented liquors, $\$ 3,925,959.62$; oleomargarine, $\$ 317,603.38$; filled cheese, $\$ 3,412.89$; mixed flour, $\$ 155.02$; adulterated butter, $\$ 3,485.17$; process or renovated butter, $\$ 23,717.70$; total increases, $\$ 20,605,252.86$.

The following items show decreases for same period: Banks, bankers, etc., $\$ 50.10$; miscellaneous, $\$ 43,917.91$; total decreases, $\$ 43,968.01$.

The total expenditures for the maintenance of the Internal-Revenue Service for the fiscal year 1907 .were $\$ 4,875,745.66$. The cost of collecting $\$ 1$ of internal revenue was $\$ 0.018$.

The following table gives a comparative statement of receipts for the fiscal years 1906 and 1907. For a more detailed statement reference should be made to the Report of the Commissioner of Internal Revenue.
Receipts from Internal Revenue in 1906 and 1907, as Shown by Collectors' Reports.

| Objects of taxation. | Fiscal year ended June 30- |  | Increase. | Decrease. |
| :---: | :---: | :---: | :---: | :---: |
|  | 1906. | 1907. |  |  |
| Distilled spirits.... | \$143, 394,055. 12 | \$156, 336, 901.89 | \$12,942, 846.77 |  |
| Manufactured tobacco | 48, 422,997. 38 | 51, $811,069.69$ | 3,388, 072.31 |  |
| Fermented liquors. | $55,641,858.56$ | 59, 567, 818.18 | 3, 925, 959.62 | ............. |
| Oleomargarine. | 570,037.93 | 887,641.31 | 317,603. 38 | ........... |
| Filled cheese. | 1. 40 | 3,414.29 | 3, 412.89 |  |
| Mixed flour. ........ | 2,567. 23 | 2,722. 25 | 155.02 |  |
| Adulterated butter. | 9,258. 43 | 12,743.60 | 3,485. 17 |  |
| Process or renovated butter | 138,078. 09 | 161,795.79 | 23,717. 70 |  |
| Banks, bankers, etc......... | 138, 50.10 | - $\times 1.9$ | 23,717.70 | \$50. 10 |
| Miscellaneous. | 923,833.76 | a 879,915. 85 |  | 43,917.91 |
| Total. | 249, 102, 738. 00 | 269, 664, 022.85 | 20, 561, 284, 85 |  |

a Includes $\$ 572,714.48$ from playing cards, $\$ 253,652.43$ from penalties, $\$ 49,5 \mathrm{l} 5.29$ from legacies on which the tax had accrued prior to the repeal of the act, and $\$ 4,033.65$ from misce

The total production of distilled spirits, exclusive of fruit brandies, was $168,573,913.2$ taxable gallons, against $145,666,125.1$ gallons in 1906, an increase of $22,907,788.1$ gallons.

The production of fruit brandies increased 1,694,232.8 gallons.
During the fiscal year 1907, 1,587 distilleries of all kinds were operated, a decrease of 298.
The production of beer was $58,622,002$ barrels, an increase of 3,897,449 barrels.

## CUSTOMS.

The fiscal year ended July 1, 1907, was by far the greatest in the customs history of the country. The total value of imports of merchandise during the year was $\$ 1,434,421,425$, an increase of more than $\$ 200,000,000$ over the preceding year, and for the third successive year the largest in the country's history. The imports of merchandise have almost doubled in value since 1896. The customs duties collected in the past year amount to $\$ 333,230,126$, an increase of $\$ 33,000,000$ over 1906 , which up to that time was the greatest year in point of customs receipts. For the third successive year the value of the exports of domestic merchandise has also been the largest known, amounting to $\$ 1,854,553,956$, over $\$ 136,000,000$ more than in 1906.

An idea of the customs business done during the past year can be gained from the fact that at the port of New York the number of packages examined was 778,135 , nearly 78,000 more than during the previous year, and the appraised value of merchandise brought into that port was $\$ 852,000,000$, an increase of $\$ 100,000,000$ over that reported for 1906.

The 20 leading ports of the country, according to the amount of revenue collected, in their order, are as follows:

| 1. New Yo | \$222, 782, 650 | 11. Puget Sound | \$1, 705, 089 |
| :---: | :---: | :---: | :---: |
| 2. Boston | 28, 177, 079 | 12. Cleveland | 1, 264, 475 |
| 3. Philadelphia | 21, 153, 995 | 13. Cincinnat | 1, 001, 737 |
| 4. Chlcago | 10, 162, 952 | 14. Buffalo | 854, 778 |
| 5. San Francisco | 10, 150, 066 | 15. Newport News | 765, 356 |
| 6. New Orleans, | 8, 130, 923 | 16. Pittsburg | 758, 323 |
| 7. Baltimore | 5, 296, 975 | 17. Milwaukee | 755, 616 |
| 8. Detroit | 2, 050, 244 | 18. Plattsburg, N. Y | 739, 233 |
| 9. St. Louis | 2, 473, 363 | 19. Burlington, Vt.----- | 716, 515 |
| 10. Tampa | 1, 722, 551 | 20. Galveston | 702, 959 |

During the past year several changes have been made in customs regulations to benefit the service by applying new methods better adapted to present business conditions.

For some time past it has been the practice of the Department, in connection with the distribution of dutiable merchandise, to require common carriers to furnish bonds to the collector of customs at each
port of entry at which the carrier did business. In addition, separate bonds were required for appraised and unappraised merchandise, the one being in the sum of $\$ 100,000$ and the latter in the sum of $\$ 250,000$. While under these bonds the common carrier was obligated to deliver the merchandise to the collector at the ultimate port of destination, or in default thereof to pay the penalty provided for, the individual shipper on all transportation and exportation entries was also required to furnish bond.

This practice has been changed and now but one form of bond is required for the transportation of both appraised and unappraised merchandise, and no bond is taken from the individual shipper on transportation and exportation entries. Further, the carrier is required to execute but one bond in the sum of $\$ 100,000$, instead of filing bonds at each port. Under the old practice the penalties in the bonds were not the same, whereas under the new bond for all kinds of transportation the penalty of the bond will be uniform.

One form of carrier's manifest has been adopted in lieu of the several forms now in use, and as a means of preventing the delivery by the carrier of merchandise in bond to the ultimate consignes instead of to the customs officer these manifests will be printed upon paper of a distinctive color.
These changes benefit not only the common carrier by reducing both the amount of surety bonds carried and the amount of penalties assessed, and securing a more uniform compliance with the terms of the bond, but also benefit the Department by greatly reducing the clerical work which has heretofore been necessary.

The Department has adopted new regulations in regard to mail importations which better safeguard the revenue and secure more expeditious delivery of such importations to the persons to whom they are addressed. The importation of merchandise in the mails exchanged with foreign countries has increased so largely in volume within the past few years that the old system was found inadequate to meet the new conditions. These new regulations were issued jointly with the Post-Office Department and have already resulted in a considerable increase in the collection of dúties and in a handling of the mail packages from foreign countries much more satisfactory both to the Government and to the public.

A radical change has also been made in the matter of passenger haggage declarations which is intended to do away with a system which has been a source of constant annoyance and much complaint on the part of the traveling public. There were two features in connection with the examination of passengers' baggage that were especially the subject of criticism and complaint. These were the herding of the passengers in the cabin of the steamship in the last hour of the trip in order to have declarations made before a customs
officer, and the oath that was required when the declaration was made, which involved compelling the passenger to swear to what foreign articles his baggage contained and immediately thereafter searching his baggage to see whether or not he told the truth under oath. The Department decided that these two features could be eliminated with no detriment to the revenues. A new system was accordingly adopted which provided for the distribution of declarations to passengers in the early part of the voyage to this country, to be made out by them at their leisure. The declaration itself was revised and simplified. These declarations are now collected by some officer of the ship held responsible both by the steamship company and the Department for seeing that such a written statement is received for each passenger, and then handed over to the customs officers on the arrival of the ship at port. In this way the passenger makes out his own statement, without haste and without being required to make oath of any character.

## Remedial power needed.

There is need of legislation that will give to the Secretary of the Treasury such power as will enable him to remedy mistakes made by the importer whose transaction is in good faith and who has no intent to evade the law or defraud the revenue. The existing law and regulations fall harshly and with injustice upon the occasional individual importer. Those who import as a business, and are thus of necessity familiar with all the provisions of the customs administrative act, are in a position to take advantage of the opportunities and privileges which it affords. But the infrequent and small importer, not having occasion to acquire this special knowledge, often finds himself the victim of an injustice through some purely technical fault. As his protest, for example, has not been made within the narrow limit of time prescribed by law, he can not appeal to the Board of General Appraisers for a rehearing, and the Secretary is powerless to grant relief, no matter how glaring the error nor how innocent the technically offending importer. The penalties for such mistakes, which, in many instances it has appeared impossible for importers to avoid, are severe additional duties, yet their imposition and collection are made necessary by existing law, in the absence of manifest clerical error. The Secretary of the Treasury should be authorized to remit additional duties when, in his opinion, an unintentional error has been committed. Additional duties are in their nature penal, and to give to the Secretary the power to remit a penalty that the conditions and the circumstances prove to be undeserved would take away nothing from the safeguarding of the revenue and would prevent manifest injustice.

Similar power should be vested in the Secretary of the Treasury in regard to refunds. At present he is not authorized to make refùnds; in the absence of timely protest and appeal, in cases where more moneys have been paid to the customs officers than the law requires. It very frequently happens that the Department is satisfied that such noncompliance with the requirements as to protest and appeal is owing to circumstances wholly beyond the control of the persons making these payments, in which cases the inability to make refunds works an absolute hardship.
The power to provide for refunds should be extended to cases of nonimportation. Often there are short shipments of merchandise which are not discovered until the duties have been paid and the transactions closed. No appeal can be taken to the collector, for the Supreme Court has held that protests and appeals are authorized only in cases of imported merchandise, and the exaction of duty presupposes importation. And there can be no appeal to the Department, for while the courts have many times held that duties do not accrue upon merchandise not landed in this country, the money has been collected and covered into the Treasury and can not be refunded. In the same way the Secretary of the Treasury should be empowered to refund as well as remit fines. A fine once paid and covered into the Treasury can not be refunded, no matter how unfair its imposition, for the reason that there is no appropriation available for the purpose.

## Licensing of customs brokers.

For the protection alike of the Department and of the customs brokers there should be a law licensing persons desiring to transact business as custom-house brokers. Such brokers as a class are men of standing and integrity, and the relation they bear both to the exporter and the importer is of such a character that of necessity large financial interests are involved. The customs law provides that all merchandise imported into the United States shall be deemed and held to be the property of the person to whom the merchandise may be consigned, and therefore the customs broker is, in many instances, the only person to whom the Government looks for the payment of duty and for such information as to the character of the merchandise and its value as is necessary for customs officers to have for the proper assessment of duties. The high standing of customs brokers should be protected, not only in the interests of the Government, but also in the interests of the importing public. No broker whose business methods are of such a nature as to reflect adversely upon customs brokers as a class or who has been guilty of unfair practices should be permitted to represent the public before the Department. I recommend, therefore, that legislation be enacted, containing, of
course, such provisions as will prevent the arbitrary exercise of power by Government officials, to secure to reputable customs brokers the needed protection. A license to do such business should be granted only by the Department and should be revocable at any time for cause by the Secretary of the Treasury, such legislation not to be construed to prohibit in any way any importer from transacting business in the custom-house pertaining to his own importations.

## Mail importations.

The increase of parcel-post conventions between the United States and foreign countries makes necessary the application of customs penalties to the senders of mail packages. Merchandise sent through the mails should be upon the same footing as merchandise sent through the regular customs channels. At present there is no penalty for mail undervaluation. It is possible to put upon the customs declaration accompanying the packages any value desired, and no matter how far the value is advanced by the customs officers upon appraisement no additional duty can be collected nor seizure made, as there has been no formal entry made and the declaration required for importation was not made under oath. The provisions of law in the case of regular importations should be applied to importations by mail, for the parcel-post mails are being used more and more for the exchange of merchandise, and the interests of the Government are being jeopardized by permitting importers by mail to evade the customs laws.

## Abolish fee system.

The fee system of payment of public officials is full of evils that are apparent and recognized. This system is still in force in a great part of the customs service. Customs fees were established by a law passed in 1799, at which time officers of the customs were allowed nominal salaries, they being permitted to retain the fees. At that time it was apparently the idea that the customs business should be self-sustaining, and that persons transacting business at custom-houses should assume the expense of maintaining the service. But whatever may have been the theory and whatever the result of such system at that time, the fact remains that for many years the expenses of no. custom-house have been met by fees received. These fees are petty exactions from importers and owners, and the work of auditing and keeping accounts which is involved by the present system may well be dispensed with and expenses connected with such work stopped. Collectors and other chief officers of the customs should be paid fixed and suitable salaries. The temptation and the opportunity to increase
the emoluments of their offices by the collection of fees for services should be removed. Such practice is contrary to good administration and beneath the dignity of the Government. The Congress has already recognized the advisability of paying fixed salaries to officers at some of the principal ports, and has passed such legislation. It is recommended that similar legislation be enacted for all ports. The same idea has recently been adopted by the Congress in abolishing fees heretofore paid to United States consuls and putting them on a salary basis.

No uniform practice now exists with regard to furnishing blank forms to importers and others who have need of them in the ordinary and regular transaction of customs business. In many cases the necessary blanks are printed by parties having need therefor and in other cases the blanks are furnished by the Department or sold by the officers of customs. It frequently occurs that the much-needed report is greatly delayed, and a constant trouble is that liquidating and auditing officers are embarrassed by the continued use of forms which do not harmonize with improved methods. Adverse criticism is engendered because of the charges for such blanks. Such delays and annoyances would be obviated if only such blanks as had been officially approved and issued by and at the expense of the Government were used. To that end I recommend the repeal of section 2648 of the Revised Statutes, which authorizes chief customs officers in certain collection districts to keep on sale blank manifests and clearances required for the business of their district and to charge for each blank prepared and executed by them.

## Extend protest time.

The provisions of the present customs administrative act work unfairly to importers in the matter of the time within which they are permitted to protest against the action of customs officers, both as to value and classification of merchandise. The Government has one year in which to request reappraisement or reliquidate entries in order to increase the amount of duties theretofore collected, while the importer has but two days for filing a request for reappraisement and ten days within which to protest against classification. In the present great and increasing pressure of business such time is inadequate, and it is often impossible for the importer to receive information as to the decision in the case of his importation before the time within which he can protest has passed. Many importations are made through brokers and forwarders who are not familiar with

- the character and value of the imported articles. By the time the goods have been delivered to the consignees and the error in appraise-
ment or classification has been discovered the time for protest has lapsed and the importer and the Government are alike powerless to change the amount of duties paid, which, as a matter both of fact and law, may be excessive. The importer should be permitted fifteen days in which to apply for reappraisement or protest against classification, and sections 13 and 14 of the customs administrative act should be so amended.

## A protest fee.

The volume of work devolving upon the Board of General Appraisers and its highly important character make it essential that the Board should not have put upon it any unnecessary labor. During the fiscal year just closed the Board settled protests in 87,631 cases. At the present time thousands of protests are filed having in them no merit whatever. Many of them allege grounds of dissatisfaction against the action of the collector or appraiser which are admittedly without foundation, and many more are filed because the importer is not at hand to resolve doubts. Hundreds of such protests are not followed up by the importers, and are overruled for lack of prosecution. The same amount of clerical work is required with respect to all such protests as is demanded in a case where the issue between the customs officers and the importer is one of substance. The filing of a protest against the action of the collector not only delays a specific case, but paves the way for others to follow. The proper classification of that particular kind of merchandise is held in abeyance pending the decision of the courts, and the trial case is made up and the balance of the protests are placed on file, each day adding to their number. No efforts to secure an early decision are made by the importers or counsel for the reason that the larger the number of protests filed the greater will be the refund in the event of a decision favorable to them, and they are in the position of risking nothing and gaining everything. Many of these protests would not be filed if a filing fee were exacted in each case. I therefore recommend that a filing fee of $\$ 5$ be required for each and every protest, this to be refunded in case of a decision in favor of the protestant.

## Increase duty exemption.

The advisability of increasing the amount of our duty exemption in the matter of articles acquired abroad now permitted citizens of thi: country returning from foreign travel is recommended for the serious consideration of the Congress. The present exemption of $\$ 100$ seems to me to be an amount too low to meet the case of the average traveler o and causes much and unnecessary annoyance and complaint. In my
judgment, this exemption should be increased to $\$ 200$, which would provide for the personal purchases abroad of the average traveler and at the same time not be large enough to work injustice to domestic merchants by permitting articles of great value to be brought in without the payment of duty to compete with and injure their legitimate trade.

## Special agents.

Special agents of the Department have been actively and effectively employed during the last fiscal year in the prevention and detection of frauds on the customs revenue through undervaluation and irregular classification, as well as in the suppression of smuggling. They have cooperated with collectors of customs and appraising-officers in all parts of the country and with the Board of General Appraisers, submitting information as to values. In many instances it is due to their efforts and their information that advances in value have been made by the appraising officers and such advances sustained when the cases came for final decision before the Board of General Appraisers. In the aggregate these advances have been large and the revenue from customs much increased thereby.

The confidential agents of the Department stationed abroad have cooperated with consular officers and boards of trade, chambers of commerce and reputable manufacturers and dealers, and obtained information as to market values which, submitted to the appraising officers, have resulted in just values being put upon imports and proper classification given. While making no attempt to interfere with the conduct of the business of the chief officers at the different ports, special agents have exercised, in a general way, supervision over the customs business, and have reported to such officers and to the Department instances where customs laws and regulations are not properly observed. They have from time to time examined the accounts of all collectors and the transactions in their respective districts to ascertain whether or not laws are enforced and moneys paid as duties on imports properly recorded and accounted for.

In the matter of the refund of duties paid on articles manufactured from imported materials when such articles are exported from this country the applications for refund are referred to special agents for investigation, who visit the places of manufacture, ascertain the wastage incurred as well as other essential facts, and make the report upon which the rate of drawback is established. Special attention has been paid during the past year to this drawback work, and to assistance to customs officers in handling cases before the Board of General Appraisers.

Under an act of the Congress approved February $9,1907, \$ 1,000,000$ was appropriated to aid in completion of the Jamestown Exposition, and the Secretary of the Treasury was authorized to collect this amount from the company at certain stated intervals during the progress of the Exposition. Full reports not having yet been received from the Exposition Company, this matter will be made the subject of a special communication to the Congress.

## SURETY COMPANIES.

Within the past few years there has been a great increase in the number and amount of bonds written for the Government by surety companies. It is estimated that the aggregate amount of such bonds written in favor of the Government during the last fiscal year approximated $\$ 400,000,000$. In some instances companies have written single bonds in an amount greater than their total capital and surplus.

On February 1, 1907, my predecessor issued regulations fixing a limit to the liability which any company might assume as sole surety on any single risk running to the Treasury Department and prescribing the general conditions under which the business should be conducted. Under its operations conditions have improved, but it seems essential, in view of the magnitude of the business and of the interests involved, that an insurance division should be created in this Department to supervise the general bonding business of the Government, and with ample power to examine and investigate the solvency and methods of the various companies doing business with the Government. The Department could by this means better safeguard the interests of the public service, could secure a uniformity of forms, and could supply information with reference to bonds and bonding companies to all the other Executive Departments.

Legislation terminating the liability of the sureties on a bond in regard to any future transaction after a new bond has been executed at the end of four years as required by law for the same class of disbursements is also desirable.

The law relating to the liability of the sureties upon the bonds of assistant treasurers s̊hould be amended so as to authorize a bonded deputy to act in the event of the decease of an assistant treasurer or to make the bond of the deceased officer liable for the act of the deputy until the appointment of a successor. Only the Treasurer of the United States can now act in case of the death of an assistant treasurer. The law should also be amended which provides that
the estate of a deceased customs officer shall be liable for the acts of his deputy. It is very embarrassing to the Government when such principal happens to have no estate. The law should specifically make the sureties upon the bond liable for the acts of the deputy of such deceased principal, or the deputy should be separately bonded.

The law prescribing the form of bond for customs officers should be repealed and the adoption of a proper form should be left to the Secretary of the Treasury, as are the forms of all other bonds under the Department. Because of the fact that the form of bond of customs officers is recited in the law, it is necessary to require in some cases six or eight separate bonds from such officers for the disbursement of funds which might properly be assigned to them by the Secretary under one official bond if their bonds as customs officers could be made broad enough to cover such disbursements.

## RETIREMENT OF NATIONAL-BANK NOTE CIRCULATION.

Section 4 of the act approved March 4,1907 , entitled "An act to amend the national-banking act, and for other purposes," increased from $\$ 3,000,000$ to $\$ 9,000,000$ per month the amount of lawful money which might be deposited with the Treasurer of the United States for the retirement of the circulating notes of national banks.
Owing to the currency stringency which has existed for the past two months, the national banks have taken out circulation in large amounts (from October 1 to November 20, $\$ 38,546,820$ ). It is not difficult to foresee that at a period not very remote these banks will not only be in position to retire a large amount of this circulation, but should be encouraged to do so. It is therefore recommended and urged that the act referred to be further amended, and limitation upon such retirement of circulation be left within the discretion of the Secretary of the Treasury.

## - bAN゙IK peserves.

Under existing law a national bank located in a city which is not a reserve city must maintain 15 per cent of its deposits as a reserve. It may count its 5 per cent redemption fund, held for the redemption of national-bank notes, as a part of the reserve, and after deducting this fund it may deposit three-fifths of the remainder in some bank in a reserve city. The national banks located in reserve cities and in central reserve cities must maintain 25 per cent of their deposits as a reserve, and they may count their 5 per cent redemption fund as a part of the same; and the banks located in reserve cities may deposit 50 per cent of the remainder of their reserves in banks in
central reserve cities. There are three central reserve cities, New York, Chicago, and St. Louis. There are about 40 other reserve cities.

According to the report of the condition of national banks on August 22, 1907, the amount of reserves held by all the national banks in the country was $\$ 1,121,358,395$. Of this amount about $\$ 165,000,000$ was held in the three central reserve cities as deposits of banks located in the 40 other reserve cities. A further amount, which can not be estimated, was also deposited in the central reserve cities as constituting the three-fifths reserve which all other banks might so deposit. Assuming the deposits in central reserve cities by banks not located in reserve cities to be $\$ 35,000,000$, the amount so held by the central reserve cities would be approximately $\$ 200,000,000$. The total amount held by central reserve banks due to national banks was $\$ 427,000,000$, so that nearly one-half of the deposits by other national banks in the banks of the central reserve cities consisted of funds counted as reserves by national banks outside of the central reserve cities.

It might be regarded as worth while to consider the effect of amending the laws so that the country might be divided into geographical or commercial sections, with provision for the retention within each section of a larger proportion of the bank reserves required to be held against deposits in the national banks of such section. The result of this would be, taking present conditions, that the banks in the three central reserve cities would lose a considerable amount, and this amount would be transferred to banks in the reserve cities located in the different sections and would necessarily be held by them as cash. This addition to the available and actual cash in banks outside of the central reserve cities would constitute an element of strength, which, in times of stress, might aid materially in diminishing the violence of financial disturbances. Such a provision of law as this would not affect in any way the depositing by national banks of their unemployed capital, outside of their reserves, wherever they could best use it.

## BOND TRANSACIIIONS.

When the present Secretary assumed charge of the Treasury Department, March 5, 1907, there was an available cash balance of $\$ 251,231,426.10$, of which $\$ 140,013,087.81$ consisted of deposits in national-bank depositaries. These deposits included the sum of $\$ 30,000,000$, approximately, which had been lodged with the banks. in September, 1906, with the understanding that they were to be returned to the Treasury during the winter and spring, beginning February 1, 1907. Owing to unfavorable conditions which appeared after these deposits had been made, my predecessor refrained from
calling on the banks for their return, and as on March 5 there appeared to be no immediate need of the return of the money to the Treasury, the banks were permitted for a further time to retain the deposits.

The 4 per cent funded loan of 1907, by its terms, was redeemable at the pleasure of the United States after July 1, 1907. The amount outstanding March 1, 1907, was $\$ 111,696,300$, and small amounts of the bonds were being presented from day to day for sale at par, with interest to April 1. As it was advisable, owing to the demand for money in all sections of the country, to increase the disbursements from the Treasury, the owners of the 4 per cent bonds were invited by a circular published March 14 to surrender their bonds for redemption with interest to July 1 to an amount not exceeding $\$ 25,000,000$. Under this circular there were redeemed, between the date of its issue and June 24, registered and coupon bonds to the amount of $\$ 25,088,750$. Meanwhile, the disposal of the remainder of the loan was considered.

The Department had the option of three methods: First, its redemption; second, its continuance at a lower rate of interest at the pleasure of the United States; third, the refunding under authority of the act of March 14, 1900, into 2 per cent consols of 1930 of all or any part of it.

The redemption of the loan would take from the Treasury about $\$ 86,000,000$, a loss which seemed to be inadvisable in view of the uncertainty then existing as to future financial conditions. Its continuance at a lower rate of interest, while possessing some advantages, was, on the whole, uncertain as to its operation and effect. So it was decided to refund a part of the loan, leaving outstanding an amount which could easily be redeemed in July without disturbing financial conditions.

Accordingly on April 2, 1907, there was published a circular inviting the surrender of $\$ 50,000,000$ of the bonds for refunding into 2 per cent consols of 1930. The premium to be charged for the new bonds was fixed at 3 per cent, and the old bonds were to be received upon the terms prescribed by the act of March 14, 1900, namely, a price equivalent to their present worth to yield an annual income of 21 per cent to the investor. The circular inviting the surrender of the bonds also included a call for the redemption of the residue which might be outstanding after the refunding was discontinued. Under this circular the Department received for refunding, between April 2 and May 31, $\$ 50,307,800$, and there remained outstanding, subject to redemption under the call above mentioned, bonds to the amount of $\$ 36,121,450$, which matured and ceased to bear interest July 2, 1907.

13091-H. Doc. $9,60-1-5$

As the time approached for the redemption of the 4 per cent bonds it was decided to withdraw from the banks the deposits lodged with them in September last, in order that the actual cash in the Treasury might not be materially reduced by the redemption of the maturing bonds and that the Department might be in position
' later in the year to afford relief to the money market during the crop-moving period. The call for the return of the deposits was made on the 12th of June, the date of return to be July 10 or earlier, at the convenience of the depositary banks. The money was promptly lodged in the Treasury on or before the day mentioned and without any disturbance to the monetary situation.

In pursuance of the authority contained in an act of the Congress approved March 4, 1907, all collectors of customs, except those in subtreasury cities, have been instructed to deposit their entire collections with a national-bank depositary if there be one located in the same town. There has also been transferred to banks from time to time of the receipts of customs in subtreasury cities an aggregate amount of $\$ 22,724,404.20$. The total sum transferred to nationalbank depositaries in all cities receiving customs revenues up to November 1 is approximately $\$ 118,515,397$.
The advisability of depositing customs receipts in this manner at subtreasury cities has been under consideration for some time, but no satisfactory conclusion has yet been reached.

## SPECIAL TREASURY OPERATIONS.

During the summer the gradually increasing rate of interest charged for call money, time money, and discounts of commercial bills indicated a progressive diminution in the amount of available cash. Accordingly, it was decided August 23, 1907, to make each week substantial deposits in the different sections of the country, with the particular object of facilitating the fall movement of the crops. In his announcement of this plan the Secretary of the Treasury said:

This action is taken to meet the commercial and industrial needs of the country at this season, and is believed to be preferable to waiting until a time of acute stringency, when the only alternative would be a large general deposit. The latter policy the Secretary desires to supersede by one which shall have as its ultimate object the adjustment of the operations of the Treasury Department, as rapidly as may be practicable under existing law, in such manner as shall preclude their being in any sense a disturbing factor in the business world.

These distributions were continued weekly until the aggregate amount of $\$ 26,000,000$ had been so distributed. Notwithstanding this measure, there was a constantly increasing stringency in the monetary centers, which culminated in the forced suspensions of several important institutions.

Prior to this crisis the shipments of currency to the West by eastern banks for crop-moving purposes had been small. There had been no important shipments of gold abroad, so the monetary stringency seemed to be due, in large measure, to the hoarding of funds by owners thereof who had become apprehensive of their financial safety. As the crisis approached, the Department adopted the strongest measures to give material assistance. Within four days there was transferred from the Treasury to the banks the sum of $\$ 35,000,000$, the security received therefor being such State, municipal, and railroad securities as are acceptable under the laws of the States of New York, Massachusetts, Connecticut, and New Jersey as investments by savings banks. On November 11 there were on deposit in national-bank depositaries-
To the credit of the Treasurer of the United States_-----..- \$212, 958, 811.64

Total
226, 836, 237.04
This sum was distributed among national banks in every State and Territory of the Union.

These deposits, and other Treasury operations, in connection with the associated efforts of prominent financiers and other business men, who aided first by giving important relief to certain embarrassed institutions and afterwards by providing for the imports of gold, of which up to November 15 there had been engaged more than $\$ 60,000,000$, operated to prevent a dangerous panic. The Secretary of the Treasury made such adjustment of deposits between the various cities and sections as was possible in such a time of financial stress, and through the cooperation of eastern bankers secured the transfer, through the usual commercial channels, of large sums of money to the South, the West, the Northwest, and the Pacific coast. There was, however, great financial distress in many sections of the country and a remarkable scarcity of currency. The clearing houses in nearly all the prominent cities of the United States felt obliged to adopt such measures of relief as they found available. The remarkably sound and prosperous condition of the country would seem to warrant the belief that the strain will leave behind no extensive business depression.

When the story of the recent commercial and industrial disturbance has been fully told, I am confident that many misapprehensions will be cleared away and that the interdependence of all sections of the country will be more fully understood. It is said that many of our people have hoarded money. This is undoubtedly true; but so have many of the banks. We hear little, however, of the untold numbers of patriotic citizens who, knowing that the banking situation through-
out the country was essentially sound, did not allow themselves to be influenced by the excitement of the moment, but cooperated with national banks, savings banks, trust companies, and other institutions to support credit and restore confidence.

## CURRENCY LEGISIAATION NEEDED.

The Secretary of the Treasury is given wide discretion in many matters wherein he is rarely called upon to exercise it, and little, if any, in others where it is needed daily, particularly as to certain of those having to do with the vitally important subject of our currency. In times of emergency his hands are virtually tied. If in such periods of stress, in an effort to avert calamity and serve the interests of all the people, he is obliged to resort to unusual measures, criticism is unfortunately in many instances directed not to the inadequacy of the system, but solely to the effort to give relief, even though it be successful in accomplishing that purpose. It should not be forgotten that he has to deal with the practical rather than the theoretical side of the currency question. The failure of the adherents of the various suggested plans of currency reform to cooperate or to agree upon a practical measure would hardly appear to be a sufficient reason for holding him responsible for their indecision and inaction. The laws under which he administers his office should be made to meet the daily needs of the people, and his duties, sufficiently onerous as they are, should not be made more burdensome by restrictions which leave him with the responsibility, but with no adequate means at his disposal to meet it.

What has happened not only this year, but many times before, should serve as an admonition to enact wise laws for the prevention in the future of disasters due in part at least to the imperfect organization of our monetary system. Admittedly it has been of great service to our people, but with changing conditions there has become more apparent each year the need for improvement of a substantial and permanent character. If no action is thought advisable at this time fully to meet this need, I deem it important that something be done as speedily as may be consistent with thorough consideration to provide under Government guaranty a greater elasticity to the cur-rency-something which shall be automatic in its operation and which shall tend to equalize rates of interest not only in different sections of the country, but at different periods of the year. Provision should be made either for such elasticity without the necessity of intervention on the part of the Secretary of the Treasury or he should be granted the authority to supply it by properly safeguarded measures. I believe that simplicity of plan and promptness of action are what the people need and will demand. What particular form this proposed legisla-
tion should take must be left to the action of the Congress. I have no pride of opinion as to the method, but I have the deepest concern that the result shall be adequately beneficial.

The only specific recommendation I would make at present is that it be given prompt attention, and that it be not laid aside until some definite means of relief shall have been enacted into law.

## CONCLUSION:

Owing to the unusual demands made on the various officials of the Department, and particularly on the force of my own immediate office, during the past month, I have been unable to embrace in this report several topics upon which data have been collected and to which I had intended to refer at some length. These matters will be made the subjects of later reports for the information of the Congress.

Geo. B. Cortelyou, Secretary of the Treasury.
To the President of the Senate.

Treasury notes might be exchanged for Unjted States bonds to July 1, 1863. The amount of notes authorized by this act were to be in lieu of $\$ 100,000,000$ authorized by the resolution of January 17, 1863 ( 12 Statutes, 822 ). The act of May 31, 1878 ( 20 Statutes, 87 ) provides celed or retired and that when any of said notes are redeemed or received into the Treasury under any law, from any source whatever, and shall belong to the United States, they shall not be retired canceled, or destroyed, but shall be reissued and paid out again, and kept in circulation.
The act of March 14, 1900, provides that United, States notes, when presented to the Treasury for redemption, shall be redeemed in gold coin of the standard fixed in said act, and that in order to secure the prompt and certain redemption of such notes it shall be the duty of the Secretary of the Treasury. to set apart in the Treasury a bullion, to be used for such redemption purposes only, and that whenever and as often as any of said notes shall be redeemed from waid fund it shall be the duty of the Secretary of the Treasury to use said notes so redeemed to restore and maintain the reserve fund so established-first, by exchanging the notes'so redeemed for any gold coin in the general fund of the Treasury; second, by accepting deposits of gold coin at the Treasury or at any subtreasury in exchange for such notes' third, by procuring gold coin by the use of said notes in accordance with the provisions of section 3700 of the also provides that if the Secretary of the Treasury is unable to restore and maintain the gold coin in the reserve fund by the foregoing methods, and the amount of such gold coin and bullion in said fund shall at any time fall below one hundred million dollars, it shall be his duty to restore the same to the maximum sum of one hundred and fifty million dollars by borrowing money on the credit of the United States, and for the debt so incurred to issue and sell coupon or registered bonds of the United States bearing interest at the rate of not exceeding three per centum per annum, payable States after one year from the date of their issue, and to be payable, principal and interest, in gold coin of the present standard value, the gold coin received from the sale of said bonds to be exchanged for an equal amount of the notes redeemed and held for exchange and the secretary of the Ireasury may, in his discretion, use said notes in exchange for gold, or to purchase or redeem any bonds or the United States, or for any other lawful purpose the public interests may require, except that they shall not be used to meet defiThe act of Mareh 4 , 1007 section
The act of March 4, 1907, section 2, provides that whenever and so long as the outstanding silver certificates of the denominations of
one dollar, two dollars, and five dollars, issued under the provisions of section seven of an act entitled "An act to define and fix the standard of value, to maintain the parity of all forms of money issued or coined by the United States, to refund the public debt, and

NOTE 1.-Annual interest charge computed on amount of outstanding principal at close of fiscal year and is exclusive of interest charge on Pacific Railway bonds. Nore 2.-The figures for July 1, 1879, were made up assuming pending funding operations to have been completed.
Note 3.-The temporary loan per act of July 11, 1862, is included in the 4 percents from 1862 to 1868 , inclusive, with the exception of the amount outstanding August
1,1865 , this being the date at which the public debt reached its highest point. This loan bore interest from 4 per cent to 6 per cent, and was redeemable on ten days' notice after thirty days, but being constantly changing it has been considered more equitable to include the whole amount outstanding as bearing 4 per cent interest on an average for the year.

Table D.-Statement of the Issue and Redemption of Loans and Treasury Notes (by warrants) for tee Fiscal Year ended June 30, 1907.

|  | Issues. | Redemptions. | Excess of issues. | - Excess of redemptions. |

$a$ Based on warrants issued.
$b$ The cost of collecting the internal revenue embraces the following items: Salaries and expenses of collectors, including pay of deputy collectors, clerks, etc., and including expenses incident to enforcing the provisions of law taxing oleomargarine; salarics and expenses of revenue agents, surveyors of distilleries, gaugers, storekeepers, and miscellaneous expenses; paper for internal-revenue stamps, and expenses of detecting and punishing violations of internal-revenue laws.
$c$ The expenses of collecting the revenue from customs includes all sums drawn from the appropriation made by Congress for that purpose. The money is expended for salaries, rents, labor in weighing, gauging, and measuring imported merchandise, revenue boatmen, repairs, and other expenses incident to rented buildings, stationery, and the traveling expenses of special agents, but does not include expenditures for revenue cutters, fuel, lights, water, furniture, janitors, etc., for buildings owned by the Government, nor expenditures for erecting new buildings, all of which are paid for from specific appropriations made for those purposes.

The expenses of collecting internal and customs revenue do not include the expenditures for salaries, etc., incident to auditing these accounts in the Departments at Washington.
d No data.

Table I.-Statement showing the Revenues and Expenditures of the Government by Montes; the Legal-Tender Notes, Net Gold, and Available Cash in the Treasury at the end of each Month; the Monthly Redemption of Legal-Tender Notes in Gold, $-$ and the Imports and Exports of Gold, from July, 1896, to June, 1907, inclusive.

Table I.-Statement showing the Revendes and Expenditures of the Government by Monthe, etc.-Continued.

| Month | Revenues, exclusive of postal. | Expenditures, exclusive of postal, principal of debt, and premium. | Surplus revenues. | Legal-tender notes in Treasury. | Net gold in Treasury. | Available cash balance, including net gold. | ```Legal-tender notes redeemed in gold.``` | Imports of gold. | Exports of gold. |

a Excess of expenditures.
Note.-The revenues and expenditures by months are made up from partial reports, and, being subject to change by subsequent concentration of accounts, do not agree with the totals by years. The latter are the actual results, as shown by complete returus.

Table J.-Statement of Receipts of the United States from March 4, 1789, June 30) from

Note 1.-Specie payments were suspended from January 1, 1862, to January 1, 1879. During the greater part of that period gold and silver coins were not in circulation except on the Pacific coast, where, it is estimated, the specie circulation was generally about $\$ 25,000,000$. This estimated amount is the only coin included in the above statement from 1862 to 1875 , inclusive.
Note 2.-In 1876 subsidiary silver again came into use, and is included in this statement, beginning with that year.
Note 3.-The coinage of standard silver dollars began in 1878, under the act of February 28, 1878.
Note 4.-Specie payments were resumed January 1, 1879, and all gold and silver coins, as well as gold and silver bullion in the Treasury, are included in this statement from and after that date.
Note 5.-For redemption of outstanding certificates an exact equivalent in amount of the appropriate kinds of money is held in the Treasury, and is not included in the account of money held as assets of the Government.
NoTE 6. This table represents the circulation of the United States as shown by the revised state ments of the Treasury Department for June 30 of each of the years specified.
Note 7.-The Director of the Mint recently made a revised estimate of the stock of gold coin, and as a consequence of such revision, the estimated stock of gold in the United States and of gold coin in circulation has been reduced $\$ 35,000,000$ in the figures for 1907.
Note 8. The details of the foregoing table, showing the amount of each kind of money in circulation each year since 1860 , are omitted; but they may be had npon application to the Secretary of the Treasury, Division of Loans and Currency, where a circular covering information on the subject has been prepared for distribution.

Table M.-Statement of United States Bonḍs and other Obligations Received and Issued by the Office of the Secretary of the Treasury from November 1,1906 , то October $31,1907$.

| Title of loan. | Received for transfer and exchange. | Received for redemption. | Issued. | Total transactions. |

[^1]Table O.-Statement Showing the Aggregate Receipts, Expenses, Average Number of Persons Employed, añd Cost to Collect Internal Revenue in the Several Collection Districts during the Fiscal Year ended June 30, 1907.

a Based on reports of collectors.
Note.-The foregoing statement of expenses does not include salaries and expenses of internalrevenue agents, salaries of the officers and clerks in the Office of the Commissioner of Internal Revenue, amounts expended in detecting and punishing violations of internal-revenue laws, cost of paper for internal-revenue stamps and certain miscellaneous expenses.
Amount of expenses as above stated
\$4, 247, 596. 14
Expenses not included in above
Total expenses for fiscal year ended June 30, 1907

-
appendix to the report on the finances.

## APPENDIX.

## REPORTS OF HEADS OF BUREAUS.

## REPORT OF THE TREASURER.

Treasury Department, Office of the Treasurer, Washington, D. C., October 21, 1907.

Sir: The transactions of the Treasury of the United States for the fiscal year ended June 30, 1907, and its condition on that and subsequent dates, are presented in the annexed tables.

REVENUES AND EXPENDITURES FOR 1906 and 1907.
The favorable conditions prevailing in the financial affairs of the Government at the close of the fiscal year 1906 were continued during the last fiscal year, and have added largely to the available resources of the Treasury. The net excess of ordinary revenues over expenditures for the fiscal year 1907 was $\$ 84,236,586.30$.

Comparison of the items of revenue and expenditure for the past two years may be studied in the table following:

Revenues and Expenditures for Fiscal Years 1906 and 1907.

[^2]In former years an accumulation of moneys in the Treasury in excess of the amount actually required for an economical administration of the Government was generally looked upon with disfavor, but a surplus is now hailed as an evidence of national prosperity, and as a demonstration that the conditions of trade and finance throughout the country are healthful and sound. The surplus for the past year, large as it was, fortunately met public requirements; a portion of it was used in the redemption of the funded loan of 1907 that matured on July 1, and the remainder will be applied to the payment of the increased expenditures authorized by Congress.
revenues and expenditures, first quarters of 1907 and 1908
The preliminary figures for the first quarter of 1908 show the revenues to be less than the expenditures by $\$ 4,419,263.92$, and as compared with the same period twelve months earlier there is an increase of $\$ 5,767,588.91$ in the revenues, and of $\$ 16,058,167.10$ in the expenditures.

In the subjoined statement the items for the two quarters are compared:

| Account. | First quarter- |  | Increase. | Decrease. |
| :---: | :---: | :---: | :---: | :---: |
|  | 1907. | 1908. |  |  |
| . REVENUES. . . |  |  |  |  |
| Customs. | \$82, 468, 814.83 | \$84, 157, 057.30 | \$1,688, 242.47 |  |

| Excess of expenditures. |  | 4, 419, 263.92 |  |  |

## RECEIPTS AND DISBURSEMENTS ON ACCOUNT OF THE POST-OFFICE DEPARTMENT.

The receipts of the Post-Office Department are kept separate and distinct from other revenues of the Government; they are deposited in a special account to the credit of the Treasurer of the United States for the service of the Post-Office Department, over which the Treasury has no control. They are drawn out by the warrant of the PostmasterGeneral, countersigned by the Auditor of the Treasury for the PostOffice Department. The greater part of the postal revenues is received and disbursed by postmasters without actually going into the Treasury; being carried into and out of the Treasurer's account for service of the Post-Office Department by warrants of the PostmasterGeneral for the gross amounts involved issued at the end of each quarter.

The receipts for the fiscal year 1907 were $\$ 194,924,636.90$, and the disbursements $\$ 201,599,981.88$, of which amounts $\$ 121,548,541.23$
was received and expended directly by postmasters. To cover the deficit, $\$ 7,695,998.21$ was drawn from the appropriation made by Congress.

There was an increase of $\$ 16,330,815.57$ in the receipts and of $\$ 12,863,374.64$ in the disbursements, as compared with the preceding year. The. statement of transactions on account of the Post-Office Department will be found on page 154 of this report.

## TRANSAOTIONS IN THE PUBLIC DEBT.

The receipts and disbursements relative to the public debt during the past fiscal year were principally in connection with the consols of 1930, funded loan of 1907, and to the replacing of the worn and mutilated paper currency issued under the direct authority of the Government.
The details for the past two fiscal years may be observed in the following table:
Receipts and Disbursements on Account of the Public Debt for 1906 and 1907.

| Account. | 1906. | 1907. | Increase. | Decrease. |

public debt 1906 and 1907 and first quarter of 1908.
Refunding operations under the provisions of the act of March 14, 1900, completed to the close of the fiscal year 1907, have resulted in the issue of consols of 1930 to the amount of $\$ 646,250,150$ bearing interest at the rate of 2 per cent per annum in exchange for United States bonds as follows: Loan of 1904, $\$ 72,071,300$; funded loan of $1907, \$ 441,728,950$, and loan of $1908-1918, \$ 132,449,900$. The annual interest charge on the consols of 1930 is $\$ 12,845,003$, while that on

$$
\text { 13091-H. Doc. } 9,60-1-9
$$

the bonds received in exchange therefor was $\$ 25,246,220$. The result is a saving of $\$ 12,401,217$ in the interest charge.

The public debt, including certificates and Treasury notes offset by an equal amount of cash in the Treasury June 30, 1906, aggregated $\$ 2,337,161,839.04$, and at the close of the fiscal year 1907, $\$ 2,457,188,061.54$, an apparent increase of $\$ 120,026,222.50$. The addition of items resulting in an increase were, consols of 1930, $\$ 50,307,800$; Panama Canal loan, $\$ 30,000,000$; national-bank notes (redemption fund), $\$ 5,023,165.50$, and gold certificates, $\$ 118,465,000$, while reductions were made in the following accounts: Funded loan of $1907, \$ 80,629,000$; refunding certificates, $\$ 3,660$; matured loans, $\$ 41,320$; fractional currency, $\$ 1,763$; silver certificates, $\$ 1,696,000$, and Treasury notes, $\$ 1,398,000$.

The total debt at the close of the first quarter of 1908 was $\$ 2,467,869,991.04$, an apparent increase of $\$ 10,681,929.50$ since June 30 , caused by the net issue of $\$ 40,310,000$ certificates for which an equal amount of cash is held in the trust funds and the redemption of matured and demand obligations of the Government to the amount of $\$ 29,628,070.50$, as may be observed from the comparative statement of the debt following:

Public Debt, 1906 and 1907, and First Quarter of 1908.

PURCHASE OF 4 PER CENT BONDS FUNDED LOAN OF 1907.
The Secretary of the Treasury, by public notice, December 10, 1906, offered to purchase $\$ 10,000,0004$ per cent bonds of the funded loan of 1907 at the following prices: Registered bonds ex interest at 101, and
coupon bonds at 102 flat. Also, on February 11, 1907, he offered to purchase, of the same loan, $\$ 25,000,000$ at $101 \frac{1}{2}$ flat. The latter offer was rescinded on March 14, 1907. The purchases made under the foregoing offers were:

|  | Date. | Principal. | Premium and pastdue coupons. | Total. |
| :---: | :---: | :---: | :---: | :---: |
| December 10, 1906 |  | \$3,169,200 | \$32, 811.00 | \$3, 202,011.00 |
| February 11, 1907. |  | 2,068,350 | 31,075.75 | 2,099, 425.75 |
| Total. |  | 5,237, 550 | 63,886. 75 | 5,301, 436. 75 |

REDEMPTION OF FUNDED LOAN OF 1907 BEFORE MATURITY.
The Secretary of the Treasury offered, March 14, 1907, to anticipate payment of $\$ 25,000,0004$ per cent bonds of the funded loan of 1907, with interest in full to their maturity July 1,1907 , and $\$ 25,088,750$ with interest of $\$ 377,553$ were so paid.

## EXCHANGE INTO CONSOLS OF 1930.

The Secretary of the Treasury, on April 2, 1907, offered to receive in exchange for consols of 1930, 4 per cent bonds of the funded loan of 1907 to the amount of $\$ 50,000,000$. The conditions were that the older bonds mentioned would be received at a valuation equal to their present worth to yield an income of $2 \frac{1}{4}$ per cent per annum, and like amounts of United States registered or coupon bonds bearing interest at the rate of 2 per cent per annum would be issued in exchange therefor at a premium of 3 per cent. Bonds to the amount of $\$ 50,307,800$ were exchanged, and the details of the operation are presented in the annexed statement:

## UNITED STATES BONDS CALLED FOR REDEMPTION.

The Secretary of the Treasury, on April 2, 1907, called for redemption the residue of the bonds of the funded loan of 1907 ( $\$ 36,126,150$ ) on the 2d day of July, 1907, interest on the same to cease on the latter date. The amount redeemed to October 1 was $\$ 28,956,800$.

## ANTICIPATION OF INTEREST ON THE PUBLIC DEBT.

The Secretary of the Treasury, on December 5, 1906, gave public notice to the holders of United States bonds that the interest maturing on the several interest dates between and including January 1
and May. 1, 1907, would be anticipated and paid without rebate on and after December 15, 1906, and that the prepayments would continue only until January 15, 1907.

The items of interest authorized to be prepaid were:

| Loan. | Registered. | Coupon. | Total. |
| :---: | :---: | :---: | :---: |
| Consols of 1930. | \$5,890,930.50 | \$68, 493.00 | \$5, 959, 423.50 |
| Funded loan of 1907 | 1,749,822.00 | $585,289.00$ | 2,335, 111.00 |
| Loan of 1925. | 1, 879, 610.00 | $490,188.00$ | 2,369, 798.00 |
| Loan of 1908-1918. | 526, 272.00 | 432,909.90 | 959, 181.90 |
| Panama Canal loan | 299, 357.00 | 643.00 | 300, 000.00 |
| Total. | 10, 345,991. 50 | 1,577,522.90 | 11, 923, 514. 40 |

Checks for the registered interest due April 1, 1907, not prepaid under the foregoing offer, were mailed to the holders of such bonds on March 26, 1907.

## RESERVE AND TRUST FUNDS.

The transactions in the reserve fund represent more truly exchanges to secure an accommodation of denominations than presentations to obtain gold. The redemptions from the reserve fund during the last fiscal year were in United States notes $\$ 12,690,887$ and in Treasury notes $\$ 101,278$, making a total of $\$ 12,792,165$. The redeemed notes were immediately restored to the general fund in exchange for gold, and the reserve thereby maintained at the fixed amount.

The trust funds, consisting of gold coin and standard silver dollars, are held for the redemption of the certificates and notes outstanding for which they are respectively pledged. The movements in the certificates and notes represented by the trust funds were as follows:

| - Kind. | Outstanding June 30, 1906. | Fiscal year 1907. |  | Outstanding <br> June 29, 1907. |
| :---: | :---: | :---: | :---: | :---: |
|  |  | Issued. | Redeemed. |  |
| Gold certificates. | \$559, 779, 869 | \$288, 545, 000 | \$170,080,000 | \$678, 244, 869 |
| Silver certificates. | 477, 473,000 | 304, 708, 000 | 306, 404,000 | 475, 777,000 |
| Treasury notes. | 7,386,000 |  | 1,398,000 | 5, 988,000 |
| Total. | 1,044, 638,869 | 593, 253, 000 | 477, 882,000 | 1,160,009,869 |

The foregoing statement does not include $\$ 180,000$ in gold certificates, series of 1900 , that had been issued but not reported in time to be included in the public debt statement for June.

The revised figures at the close of the fiscal year were:
Reserve Fund.
Gold coin and bullion in division of redemption
$\$ 1.50,000,000$
Trust Funds.
[Held for the redemption of the notes and certificates for which they are respectively pledged.]

## AVAILABLE CASH BALANCE.

The net result of the fiscal transactions of the Government for 1907 have produced a marked advance in the available cash balance. The total balance in the general fund at the close of the year was $\$ 272,061,445.47$, of which the depositary banks and treasury of the Philippine Islands held in general account $\$ 168,092,542.12$, leaving in the Treasury vaults, in excess of demand liabilities $\$ 103,968,903.35$. However, the vaults contain gold and silver bullion to the amount of $\$ 61,660,904.98$ which is not available for immediate payment, and the subsidiary silver and minor coin can not be used for large payments. Making deductions for such items there remained available July 1 in the vaults about $\$ 32,000,000$ as the working fund.

The balance in the Treasury at the end of each month from January, 1902, is stated in Table No. 31, page 191, and for July 1 in each year since 1896, in the following statement:

Available Casif Balance (including the Reserve Fund), from the Revised
Statements, on the Dates Named.

| Date. | Available cash balance. |  |  |

GOLD IN THE TREASURY.
The gold held in the Treasury at the close of the fiscal year 1906 amounted to $\$ 807,051,690.30$, and the holdings of the precious metal steadily increased until April 27, 1907, when the maximum was attained at $\$ 927,912,211.13$. The demands for export during the month of June caused withdrawals, reducing the amount to $\$ 904,691,730.14$ by the close of the fiscal year 1907.

By October 15, 1907, the holdings had grown to $\$ 927,391,703.33$, an increase of $\$ 22,699,973.19$ since July $1,1907$.

The total amount of gold in the Treasury on July 1 in each year, from 1897, set apart for the respective uses, is here stated:

Gold in the Treasury.

| Date. | Reserve. | For certificates in circulation. | General fund (belonging to Treasury). | Total. |

BONDS HELD AS SECURITY FOR NATIONAL BANKS.
United States bonds held by the Treasurer as security for the circulating notes of the national banks were gradually increased and attained a maximum at $\$ 558,364,660$ by the close of the fiscal year 1907.

The increase in the number of depositary banks, together with the changes in securities incident to the refunding operations during the year necessitated unusual transactions in the bonds pledged as security for public deposits. The amount held on this account at the close of the last fiscal year was $\$ 193,244,052.88$, an increase of $\$ 97,668,327.88$ as compared with that of 1906.

State, municipal, and other bonds acceptable for savings-bank investments under the laws of New York and Massachusetts were received in pledge for the safe-keeping of public deposits.

The kind of bonds and the changes therein during the fiscal year 1907 are recorded in the table following:

Bonds Held for National Banks, Close of June, 1905, 1906, and 1907, and September 30, 1907, and Changes during 1907.

## WITHDRAWAL OF BONDS TO SECURE CIRCULATION.

It appears from the discussions that have engaged the attention of bankers and students of finance for the past few years that numerous plans have been suggested for rendering the national-bank circulation more elastic. Throughout this period there has been a universal demand for the repeal or modification of the restrictions limiting the aggregate retirement of notes to $\$ 3,000,000$ in any one month.

In response to this demand Congress, at the last session, modified this provision by section 9 of the act of March 4, 1907, so that from and after that date the limit was fixed at $\$ 9,000,000$ during any calendar month. The extent to which this privilege would be exercised by the banks has been watched with some degree of anxiety by those advocating the measure. There has been, however, no great urgency to retire circulation under this enlarged opportunity.

The account of withdrawals by months for the past two calendar years to date was as follows:

|  | 1906. |  | 1907. |
| :---: | :---: | :---: | :---: |
| January. | \$1, 255, 000.00 | January. | \$1,261, 700.00 |

During the earlier months of the last fiscal year the return of the temporary deposits placed in depositary banks in the preceding months of March and May, and the deposit of proceeds of the Panama Canal bond sale," together with a growing excess of the ordinary revenues over expenditures, increased the cash holdings of the Treasury beyond its immediate requirements. The Secretary of the Treasury, in order to facilitate the return of this exicess of moneys to the channels of trade, enlarged the number of depositary banks.

The number of such depositaries which qualified during each month of the fiscal year is given in the annexed statement:

## PUBLIC DEPOSITS IN NATIONAL BANKS.

The record of public deposits in national banks given in the annual report of the Treasurer of the United States for the fiscal year 1906 embraced transactions to October 15, 1906. The balance in banks to the credit of the Treasurer on that date was $\$ 144,907,857.41$, including $\$ 12,487,000$ of temporary deposits made during September and October to facilitate importations of gold. These temporary deposits were returned to the Treasury by November 14, 1906, at which time the balance in banks to the credit of the general fund had been reduced to $\$ 134,368,920.75$, and it remained at that figure practically until December 10,1906 , when, owing to the stringency in the money market and the extraordinary high rates of interest, the Secretary of the Treasury directed that $\$ 10,000,000$ be deposited in existing depositaries in the following cities:

| New York | \$1,500, 000 |
| :---: | :---: |
| New Orleans. | 1, 500, 000 |
| Boston | 1,000, 000 |
| Philadelphia. | 1,000, 000 |
| Baltimore | 1,000, 000 |
| Chicago | 1,000, 000 |
| St. Louis. | 1,000,000 |

| Cincinnati. | \$500, 000 |
| :---: | :---: |
| Louisville.. | 500, 000 |
| Atlanta. | 500, 000 |
| Memphis. | 500, 000 |
| Total | , 000,000 |

to be secured by bonds acceptable for savings-bank investment under the laws of New York and Massachusetts, taken at 90 per cent of their value; these deposits to be returned one-half on the 20th of January and the remainder on the 1st of February.

There was no delay in transferring the money from the Treasury, and in fact nearly $\$ 13,000,000$ was placed in banks, as the balance to the credit of the general fund had increased to $\$ 148,386,054.80$ by the latter part of December. Some of the deposits were returned to the

Treasury in January, though the time of repayment had been extended to February 1 and 15. The balance in banks February 1 was $\$ 149,-$ $327,789.55$, which became $\$ 142,146,057.84$ by February 6, and was further reduced to $\$ 140,282,289.54$ by March 1 .

The conditions of the money market at this time were so acute that the Secretary of the Treasury, owing to the cash in the Treasury vaults in excess of its immediate wants, deemed it inexpedient to recall deposits from the banks, and in order to relieve the situation placed $\$ 15,000,000$ additional deposits in existing depositaries in the city of New York. In accordance with the provisions of the act of March 4, 1907, he issued instructions to collectoris of customs in places other than subtreasury cities to deposit their collections in local depositary banks. This increased the balance in banks to the credit of the general fund at the end of March to $\$ 154,092,962.09$, and by May 1 it had grown to $\$ 167,445,244.03$.

The greater part of the taxes assessed in the district of Columbia are collected during the month of May and deposited in the Treasury of the United States, from which it is not returned immediately to circulation. The local banks contend that a large part of the money required for the purpose is withdrawn from their vaults by the taxpayers, and that under the operations of law a stringency in local financial conditions ensues. To ameliorate this local condition the Secretary of the Treasury directed that the public deposits in depositary banks located in the District of Columbia be increased by $\$ 4,100,000$ on May 1, and that 10 per cent of the same is to be returned monthly after the 1st of July. It was observed in making the transfers to depositary banks that nearly all of them seemed to forget the local stringency and had the money placed with their New York correspondents.

The foregoing measures increased the balance in banks to the credit of the general fund by May 25 to $\$ 173,166,315.80$, the maximum point reached during the fiscal year 1907, after which the amount was gradually reduced, standing at $\$ 171,058,705.17$ on June 12, 1907. In order to provide means for the payment of the bonds of the funded loan of 1907 called for redemption July 2, 1907, the Secretary of the Treasury issued a call upon certain depositary banks throughout the country for return to the Treasury of about $\$ 30,000,000$ which had been deposited in September, 1906, the money so called to be returned to the Treasury on or before the 10th of July. The balance in banks to the credit of the general fund became $\$ 167,054,779.12$ by the close of the fiscal year 1907.

The banks promptly paid back the sums required of them and the balance therein to the credit of the general fund was reduced to $\$ 143,304,411.37$ by July 17 : There were but slight variations in this amount until the latter part of August, when the Secretary of the Treasury, with a view to furnish funds to move the crops during the fall months, announced that it was his belief the interests of the business world would be best conserved by depositing Government funds in depositary banks at various points throughout the country each week, and that this would be the policy of the Department during the next few weeks. There would be no public announcement of the places selected nor of the amounts to be deposited. The security required of the banks will be such as are acceptable for savings-bank investments, and the deposits, if called for, are to be
returned after January 1, 1908, in installments to be fixed by the Secretary of the Treasury.

The first weekly allotment of $\$ 5,410,000$ was made on August 28, the second of $\$ 3,812,000$ on September 4, and the third of $\$ 4,149,000$ on September 14: Many of the banks were dilatory in pledging acceptable securities for the public deposits. However, the balance therein to the credit of the general fund had increased to $\$ 152,052,299.70$ by September 17, and its growth thereafter was gradual. The fourth weekly allotment of $\$ 5,150,000$ was made on September 24, and the balance in banks to the credit of the general fund at the end of September was $\$ 158,304,380.82$. The fifth weekly allotment of $\$ 3,913,000$ was made on October 3, and the sixth of $\$ 3,465,000$ on October 15. The balance in banks to the credit of the general fund on the latter date was $\$ 162,708,310.90$.
deficits in subtreasury offices during the fiscal year 1907.
After many years of accurate accountability and faithful services rendered by hundreds of subtreasury employees, handling thousands of millions of dollars, it is a painful duty to report another blot upon the record, and to announce the loss of public funds in three of the nine subtreasury offices during the last fiscal year, as follows:
Deficit, subtreasuries United States-

| St. Louis, Mo., 1906. | \$61,500 |
| :---: | :---: |
| Chicago, Ill., 1907. | 173,000 |
| Boston, Mass., 1907 | 3, 000 |
| Total. | 237, 500 |

These losses were freely commented upon at the time by the press throughout the country, and one is led to believe, by reading therefrom, that a higher degree of integrity is expected in public employees engaged in receiving and disbursing the public moneys than in the trusted clerks in banks and other institutions. As a matter of fact, the record of such public servants in the past for integrity, taken as a whole, will appear to advantage when placed in comparison with that of a like number of trusted employees in other channels of business.

In banking and commercial transactions during the last year are recorded many acts of dishonesty, and, in fact, a wave of crime appears to have swept over the country engulfing bank officials and trusted employees, and it is to be regretted that the number included some subtreasury employees, who either yielded to temptation or were derelect in the performance of their duties and thereby brought great discredit to the public service.

UNAVAILABLE FUNDS OF THE GENERAL TREASURY AND POST-OFFICE DEPARTMENT.

The aggregate amount of unavailable moneys carried in the balances of the accounts kept in this office is $\$ 29,856,721.22$, of which $\$ 28,101,644.91$ represents the amount deposited with the States by act of June 23, 1836. At first this deposit was subject to call by the Secretary of the Treasury, but by act of October 2, 1837, it can only be demanded by act of Congress. The remainder of $\$ 1,755,076.31$ represents items which, by deficit, by default, by theft, through neglect of administrative officers in the mints of the United States, by failure
of depositary banks, and by shortages in transfers between offices, have passed from the control of the Treasurer of the United States, and which sums he can not, from the nature of the case, account for and thereby obtain credit therefor on the books of the Department.

Many recommendations have been made by my predecessors to relieve the Treasurer of accountability for amounts that become unavailable without fault or negligence on his part. The whole subject has been repeatedly gone over with committees in the Senate and House, and bills have been introduced in both Houses of Congress and reports made thereon that fully explained the subject.

Special attention is invited to Senate Report No. 371, Forty-fourth Congress, first session, from the Finance Committee, submitted by the honorable chairman, Senator Sherman. On page 3 reference is made to this question of unavailable moneys as follows:

[^3]Notwithstanding the necessity for such legislation Congress has failed to act in the matter, and as the items of unavailable moneys are becoming more numerous it is desirable that you should recommend such measures as will clear the accounts of unavailable items. There is precedent for such legislation in the act of March 3, 1837 (5 Stat. L., 178).
An itemized statement of the unavailable funds will be found in Table No. 22, on page 170 of this report.

## GENERAL STOCK OF MONEY IN THE UNITED STATES:

The estimated amount of gold in the monetary stock of the United States was revised by the Director of the Mint (George E. Roberts) during the last fiscal year and deductions amounting to $\$ 135,000,000$ were made therefrom on account of errors discovered in previous estimates. However, such deductions do not affect the record for the past year.

The growth of gold in the general stock of money during the fiscal year 1907 was $\$ 125,682,336$, notwithstanding the fact that there was a great demand for the precious metal from foreign nations. Our exports of gold for the year amounted to $\$ 51,399,176$. The result is a demonstration of the commanding control that the United States has over the gold supplies of the world. No other country has profited more by adhering to the gold standard than the United States. The growth in șilver was $\$ 13,623,750$, principally in subsidiary coin to meet the demand for small change; the increase in national-bank
notes was $\$ 42,676,330$, while Treasury notes decreased. $\$ 1,398,000$. There was no change in the volume of United States notes. The net increase in the monetary stock was $\$ 180,584,416$.

By October 1 the general stock of money advanced to $\$ 3,134,-$ 688,449.

The amount of each kind of money included in the general stock is given in the statement following:

## Monetary Stock.

This statement represents the inonetary stock of the United States, as shown by the revised statements for June 30, 1906 and 1907.]

| July 1, 1905. | 2,883,109, 864 | 1,357,655,988 | 47.09 |
| July 1, 1906. | 3,069,976,591 | 1,475,706,765 | 48.07 |
| July 1, 1907. | 3,115,728,887 | 1,466,389,101 | 47.06 |

## MONEY IN CIRCULATION.

The total amount of money in actual circulation at the close of the fiscal year 1907 was $\$ 2,772,956,455$, an increase of $\$ 36,309,827$, as compared with that of twelve months earlier. The rapidity of the increase in circulation has been one of the remarkable evidences of business expansion. This country has the largest stock of money of any nation in the world, and at present its circulation per capita of $\$ 32.22$ is exceeded only by that of France. Since 1896 there has been a steady increase annually in the total circulation and in the circulation per capita.

Comparisons for the years since 1890 are presented in the subjoined table:

Money in Circulation at the End of each Fiscal Year from 1890.

| Fiscal year. | Money in circulation. |  |  |  |  | Cireulation capita. | $\left\lvert\, \begin{gathered}\text { Percent- } \\ \text { age of } \\ \text { gold coin } \\ \text { and cer- } \\ \text { tificates } \\ \text { to total } \\ \text { totroul } \\ \text { circula- } \\ \text { tion. }\end{gathered}\right.$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Gold coin and gold cer- tificates. | United States notes notes. | Nationalbank notes. | Silver certificates standard dollars, and subsidiary silver. | Total. |  |  |
| 1890. | 8505,089, 782 | \$334,688,977 | \$181 | \$40 | 70 |  |  |
|  |  | 383,556,064 | 162,221, | 424,281, | 1, 497, 440,707 |  | 35.22 |

a Decrease.

CONDITION OF THE UNITED STATES PAPER CURRENCY.
The paper circulation of the country returned to this office for redemption bears evidence of very rough usage. Inquiry and observation leads to the conclusion that its life of service is materially shortened by the great activity of business, and especially by one of the modern methods of handling money. The use of the "cash trolley" in department stores not only mars the appearance, but shortens the life of the notes and certificates. The paper currency is very much crumpled to get it into the small cash carrier; the wrinkles raise and disturb the surface, which soon wears away and weakens the tensile strength of the note; in a short time the note tears easily along the line of folding or wrinkling and portions become detached and are frequently lost. Such missing parts may result in loss to the owner by discount.

As a matter of economy the paper issues of the Government should be renewed before they are too badly worn. The facilities for transportation and redemption should be enlarged and the return of unfit currency to the Treasury in exchange for new encouraged by legislation that will equalize the expense and give better opportunities to the people in all sections of the country for making the exchange.

Congress has provided that the national banks shall bear the expense of transporting their circulating notes to the Treasury for redemption; this has done much to keep the bank circulation in good condition.

The Government issues a greater volume of paper currency than the national banks, and it should do at least as much toward keeping it in good condition as it requires of the national banks.

It would be a wise and popular measure for the Government to bear the expense of transporting its unfit currency to the Treasury for redemption; and it can well afford to do this, for by the use of the registered mail, with the insurance feature attached, it would give equal opportunities to the people of all sections and reduce the expense. Banking institutions throughout the country are resorting to this method of transportation with satisfactory results. Can there be objection to the same use of the registered mail by the Government?

It is suggested that recommendation be made to Congress for legislation that will remove the limit on the weight of a package that may be sent through the registered mail of the United States, and that will authorize the transportation of moneys to and from the Treasury or between Treasury offices by registered mail insured.

UNITED STATES NOTES.
The act of March 4, 1907, authorized the issue of United States notes of the denominations of $\$ 1, \$ 2$, and $\$ 5$, in lieu of equal amounts of such notes of higher denominations which shall be retired and canceled, provided, however, that the aggregate amount of United States notes at any time outstanding shall remain as at present fixed by law.

The amount of each denomination issued and redeemed during the year and the amounts outstanding at the close of 1906 and 1907 are recorded in the subjoined statement:

Public sentiment is again agitating the desirability of utilizing the advantage of an overflowing National Treasury for the gradual retirement of United States notes, or what are known as "greenbacks."
The minimum sum, $\$ 346,681,016$, has not been changed since Secretary Sherman was instructed by Congress not to retire any more of these notes, and Congress declared that this amount should remain in circulation. Since that time there has been periodical agitation by bankers and financial students to secure a revival of the practice of Secretary Sherman to retire "greenbacks," when the surplus of the Treasury justified such a step, under the enactment of January 14, 1875.

Various objections have been raised to this suggestion on the part of some, because it would result in a contraction of the currency; on the part of others, because it would destroy, in a measure, the amount
13091-H. Doc. 9, 60-1-10
of reserve money which was not at all excessive for banking use, and others; that there would be saving of interest to retain the notes in circulation.

The continuous increase in supply of gold would seem to be an assurance that there need be no apprehension of a sufficient legal reserve in case $\$ 10,000,000$ or $\$ 20,000,000$ per annum of "greenbacks" were replaced by gold coin. It has perhaps escaped public attention that the Treasury holds $\$ 150,000,000$ of gold coin and bullion in reserve against the outstanding $\$ 346,681,016$ of United States notes, which practically leaves only $\$ 196,681,016$ available for circulation. The saving of interest to the Government is but a small item on this amount. At 2 per cent it would be less than $\$ 4,000,000$.
If the gradual retirement of "greenbacks" were known to be the settled policy of the Government, it would stimulate an enhancement of the credit of the United States and the financial advantage therefrom would far outweigh any paltry saving of the interest account. Such a step would convince the international investor that gold was the legal and established standard of the Government and that he might confidently feel that his investment would always be repaid him in gold on demand.
The retirement of the United States notes would promote a larger growth of the national banking system, which is doing so much to uphold the credit of Government securities. It would seem, therefore, that no apprehension need be felt of injurious results from a gradual retirement of the "greenbacks."

I believe that from $\$ 10,000,000$ to $\$ 20,000,000$ might be safely retired annually, because the new product of our gold mines and the sales of our cereals and cotton crops abroad, to say nothing of our manufactured exports, would enable us always to command a full supply of gold.

TREASURY NOTES OF 1890.
It is only a question of time when the Treasury notes will disappear from circulation under the provisions of law. The total amount issued for the purchase of silver bullion to November 1, 1893 (the date of the repeal of the act), was $\$ 155,931,002$.

The amount of each denomination redeemed during the year and the amounts outstanding at the close of 1906 and 1907 may be studied in the table following:

| Denomination. | $\begin{gathered} \text { Outstanding } \\ \text { June } 30 \text {, } \\ 1906 . \end{gathered}$ | Redeemed during fiscal year 1907. | Outstanding <br> June 30, 1907. |
| :---: | :---: | :---: | :---: |
| One dollar. | \$496, 084 | \$33,097 | \$462, 987 |
| Two dollars. | 356, 506 | 32,208 | 324, 298 |
| Five dollars. | 1, 658, 700 | 303,515 | 1,355, 185 |
| Ten dollars. | 2,792, 210 | 601, 800 | 2,190,410 |
| Twenty dollars | 1, 364,250 | 266,180 | 1,098,070 |
| Fifty dollars. | 31,750 | 5,100 | 26,650 |
| One hundred dollars. | 361, 500 | 49,100 | 312, 400 |
| One thousand dollars | 325, 000 | 107,000 | 218,000 |
| Total. | 7,386,000 | 1,398, 000 | 5, 988,000 |

Standard silver dollars in equal amount are held in the trust funds for the redemption of the outstanding notes when presented.

## GOLD CERTIFICATES.

The issue of certificates of the denomination of $\$ 10$ was authorized by the act of March 4, 1907, thereby increasing the resources of the Treasury for supplying the smaller denominations needed in marts of trade. The deposits or accumulation of gold coin in the Treasury determines the volume of gold certificates that may be issued, the provision of law being that gold coin equal in amount to the gold certificates outstanding shall be retained in the Treasury and held for the payment of such certificates on demand, and used for no other purpose.
The amount of each denomination issued and redeemed during the year and the amounts outstanding at the close of 1906 and 1907 are given in the annexed statement:

| Denornination. | Outstanding June 30, 1906. | Fiscal year 1907. |  | Outstanding June 30, 1907. |
| :---: | :---: | :---: | :---: | :---: |
|  |  | Issued. | Redeemed. |  |
| Ten dollars. |  | \$40, 000 | \$4,000 | \$36,000 |
| Twenty dollars | \$198, 132, 164 | 94, 800,000 | 42, 153, 800 | 250, 778, 364 |
| Pifty dollars.. | 43, 397, 855 | 17, 600,000 | 10, 882, 700 | 50, 115, 155 |
| One hundred dollars. | 63, 596, 350 | 22, 400,000 | 14, 637,500 | 71, 358, 850 |
| Five hundred dollars. | 15, 739,000 | 5,100, 000 | 3,774,000 | 17,065,000 |
| One thousand dollars | 59,684, 500 | 11,500,000 | 9, 838, 000 | 61, 346,500 |
| Five thousand dollars | 58,360,000 | 25,005,000 | 2,050,000 | 81,315, 000 |
| Ten thousand dollars. | 120,870,000 | 112, 100, 000 | 86,740,000 | 146, 230, 000 |
| Total. | 559, 779, 869 | 288, 545, 000 | 170,080,000 | $678,244,869$ |

## SILVER CERTIFICATES

The recent legislation by Congress authorizing the issue of $\$ 10$ gold certificates and small denominations of United States notes will ultimately lead to the change of the entire volume of silver certificates into the smaller denominations, which heretofore the Treasury has not been able to supply. However, the progress of the movement is dependent upon the presentation of the larger denominations for redemption. When silver certificates of $\$ 5$ and above are redeemed they will be replaced by ones and twos until the demand for such denominations is supplied.

The amount of each denomination issued and redeemed during the year and the amounts outstanding at the close of 1906 and 1907 are given in the statement following:

| Denomination. | $\begin{aligned} & \text { Outstand- } \\ & \text { ing June } 30, \\ & 1906 . \end{aligned}$ | Fiscal year 1907. |  | $\begin{aligned} & \text { Outstand- } \\ & \text { ing June } 30 \text {, } \\ & 1907 . \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: |
|  |  | Issued. | Redeemed. |  |
| One dollar. | \$101,020,197 | \$101,996,000 | \$94,964,739 | \$108,051,458 |
| Two dollars. | 47,172,090 | 48,752,000 | 40,899,996 | 55,024,094 |
| Five dollars. | 298,923,782 | 153,960,000 | 163,279,185 | 289,604,597 |
| Ten dollars. | 16,851,411 |  | 4,454,890 | 12,396,521 |
| Twenty dollars | 9,876,640 |  | 2,041,090 | 7,835,550 |
| Fifty dollars. | 2,484,960 |  | 613,100 | 1,871,860 |
| One hundred dollars | 1,042,420 |  | 135,000 | 907,420 |
| Five hundred dollars | 38,500 |  | 3,000 | 35,500 |
| One thousand dollars | 63,000 |  | 13,000 | 50,000 |
| Total. | 477,473,000 | 304,708,000 | 306, 404,000 | 475,777,000 |

CHANGES IN DENOMINATIONS.
The total amount of United States notes, Treasury notes of 1890, gold certificates, and silver certificates, of each denomination issued
and redeemed during the year, and the amounts outstanding at the close of 1906 and 1907 are recorded in the table following:

| Denomination. | Outstanding June 30, 1906. | Fiscal year 1907. |  | Outstanding June 30, 1907. |
| :---: | :---: | :---: | :---: | :---: |
|  |  | Issued. | Redeemed. |  |
| One dollar. | \$103, 402, 204 | \$101, 996,000 | \$95, 008, 371 | \$110, 389, 833 |
| Two dollars | 48, 961,626 | 48, 752, 000 | 40, 943, 864 | 56, 769, 762 |

The average annual increase in the volume of the smaller denominations ( $\$ 10$ and under) for the past four years may be reckoned as the yearly growth in such notes that will be required to meet the demands of business for some years to come.

The following comparative statement shows the additions by years, to the denominations of $\$ 10$ and under since July 1, 1904:

| Denomination. | Amount outstanding- |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | July 1, 1904. | July 1, 1905. | July 1, 1906. | July 1, 1907. |
| One dollar. | \$83,600, 358 | 892,896, 514 | \$103, 746, 556 | \$110, 734,082 |
| Two dollars | 47, 304, 234 | 50, 205, 802 | 49, 126, 432 | 56, 934, 470 |
| Five dollars. | $359,590,602$ $478,301,222$ | $364,217,427$ $503,593,702$ | $384,414,562$ $536,000,012$ | 411, 406,602 $545,759,387$ |
| Total ....... | $968,796,416$ 3.1 | 1,010, 913, 445 | 1,073,287, 562 | 1,124,834,541 |

Recent legislation by Congress, without inflating the currency, has enlarged the resources of the Treasury for the issue of small denominations through the process of redemption and reissue. The change will be made as rapidly as possible under existing conditions. The facilities for printing the notes are limited at present, but it is expected that the output in the near future will enable the Department to respond promptly and fully to all demands for small denominations of currency.

The national banks have increased the volume of their $\$ 5$ notes from $\$ 76,889,175$ outstanding June 30 , 1906, to $\$ 118,596,700$ on October 1, 1907, and it is expected that they will continue the'growth of that denomination until the limit (one-third in amount of their circulating notes) has been reached.

## COST OF PAPER CURRENCY.

The cost attending the production, issue, and redemption of United States paper currency has been the subject of a careful investigation. With due allowance for every item of expenses incident thereto, it appears that the average cost for each piece is 1.571 cents.
The reckoning was made upon the experience of 1906 , and may be followed here:

> Total average expense of 4,000 notes issued............................. 54.04
> Total average expense of 4,000 notes redeemed......................................... 8.80

Aggregate average expense of issue and redemption..................... 62.84
Average expense of issue and redemption of each note............................. 0.01571
Calculations based upon the average cost per piece of paper currency produce results that approximate very closely to the actual cost of maintenance of the United States paper currency.

The details for the fiscal years 1906 and 1907 are set forth in the annexed statement:

Expenses of Issue and Redemption.

|  | Fiscal year. | Number of pieces. | $\begin{gathered} \text { Cost per } \\ 1,000 \\ \text { pieces. } \end{gathered}$ | Total cost. |
| :---: | :---: | :---: | :---: | :---: |

| Ten thousand dollars | 117, 174 | 175, 778 | 1.500 |
| All denominations. | 30, 434, 594 | 90, 504, 432 | 2.978 |

Average Life of Paper Currency-Continued.

## PAPER CURRENCY PREPARED FOR ${ }^{\circ}$ ISSUE AND AMOUNT ISSUED.

It is incumbent upon the Treasury to foresee the wants of the people in the way of a circulating medium and always to be ready to meet any demand that may properly be made. There are $256,393,307$ pieces of United States paper currency in circulation, and they must be replaced when worn and redeemed. Experience and forethought prompts the preparation of an adequate volume of paper currency of the kinds and denominations authorized by law in advance of putting it into circulation, but owing to the increasing demand for the small denominations little progress has been made in accumulating a sufficient reserve of such bills.

The paper currency prepared for issue and the amount issued may be observed in the annexed table.

Number of Pieces of Paper Currency. Prepared for Issue and the Number Issued in the Fiscal Years 1902, 1903, 1904, 1905, 1906, and 1907.

| Fiscal year. | Prepared for issue. |  |  | Paper currency issued. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Number of notes and certificates. | Total value. | Average value. | Number of notes and certificates. | Total value. | Average value. |
| 1902. | 136,721,000 | \$591,580,000 | \$4. 326 | 116,697,874 | \$466,908,000 | \$4.000 |
| 1903. | 148,446,000 | 617,936,000 | 4. 162 | 141,235, 371 | 551,038,000 | 3. 901 |
| 1904. | 159, 463,000 | 762,820,000 | 4.783 | 152,908,853 | -650,026,000 | 4. 251 |

## REDEMPTIONS OF PAPER CURRENCY.

There was an increase of $2,282,557$ in the number of pieces of United States paper currency unfit for circulation presented for redemption during the last fiscal year. Money has been in active demand, and but for the fact that small denominations could be secured only through redemptions in kind many notes of the larger denominations would not have been turned into the Treasury.
For the first quarter of the fiscal year 1908 the number of pieces presented for redemption was $41,512,713$, as against $36,147,652$ in the corresponding period of 1907.
Under present regulations, United States paper currency is redeemed at full face value of the note when not less than threefifths of the original proportions remain. Fragments less than
three-fifths are redeemed at face value of the whole note when accompanied by an affidavit of the owner or other person having knowledge of the facts that missing portions have been totally destroyed.

The redemptions, by months, for the fiscal years 1906 and 1907 and first quarter of 1908 are recorded in the following table:

United States Paper Currency Redeemed during the Fiscal Years 1906 and 1907.

## STANDARD SILVER DOLLARS.

There were $\$ 486,539,538$ in standard silver dollars in the Treasury at the close of the last fiscal year, and $\$ 81,710,444$ in circulation. All of the silver dollars in the Treasury, except $\$ 4,774,538$, were covered by Treasury notes and silver certificates outstanding.

It is apparent, after years of effort, that the circulation of the silver dollars is maintained at very great expense to the Government. The annual movement of these coins to depositors therefor under present
regulations averages about $\$ 41,000,000$, but the circulation is shortlived, the dollars finding their way back in a brief period to the subtreasuries.

Attention is invited to the following comparative statement, showing the maximum and minimum circulation and the amount distributed at the expense of the Government during each fiscal year for the past twenty years:

Stándard Silver Dollars.

The circulation of silver dollars at the end of July, 1904, was $\$ 70,581,561$, and at the end of June, 1907, $\$ 81,710,444$ or an increase of $\$ 11,128,883$, which represents the results accomplished by the distribution of $\$ 124,051,692$ of these coins in the meantime, at a total expense to the Government of $\$ 264,838$ for transportation charges. It will readily be seen that the average expense attending the increased circulation was at the rate of $\$ 23.80$ for each $\$ 1,000$.

Many years ago, when the vaults of the Treasury contained excessive amounts of silver dollars, there was good reason for stimulating their use among the people by the inducement of free transportation to depositors therefor, but such necessity does not prevail at present. The accumulation of silver dollars in the Treasury for the past three years has not been in excess of the amount that could have been disposed of in the regular transactions of the Treasury offices. It is believed that, with the great increase in the smaller denominations of paper currency, it will be an unnecessary expense upon the Government to continue the free distribution of silver dollars under present regulations.

## MOVEMENT OF SILVER DOLLARS.

The amount of silver dollars delivered to depositors therefor, by months, during the past two years and a quarter is shown in the following statement:

| 4 | 1906. | 1907. | 1908. |
| :---: | :---: | :---: | :---: |
| July | \$3,052,999 | \$2, 572,579 | \$2,738, 386 |
| August | 5, 050, 289 | 4, 299, 899 | 3,790,769 |
| September | 6,584, 448 | 4,786,093 | 5, 268,943 |
| First quarter | 14,687,736 | 11,658,571 | 11,798,098 |
| October.. | 5,573,952 | 4,498,946 | ........... |

| May. | 577, 999 | 2, 346, 227 |  |
| June. | 831,100 | 2,664,964 |  |
| Total | 41,562,828 | 37,500,118 |  |

## EXCHANGE OF SILVER DOLLARS.

The silver dollars received at Treasury offices for exchange during the last fiscal year amounted to $\$ 37,604,255$, which was $\$ 5,006,612$ less than was presented in the fiscal year 1906.
The transactions at the several offices were:

| Office. | Fiscal year- |  | First quarter- |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 1906. | 1907. | 1907. | 1908. |
| Washington. | \$1,901, 130 | \$1, 999, 305 | \$375, 191 | \$465,404 |
| Baltimore. | 1,196, 210 | 1,032,643 | 204,210 | 259,430 |
| New York | 5,435, 651 | 4, 646, 648 | - 1,192,436 | 1,137, 145 |
| Philadelphia | 3,507, 210 | 3,548,619 | 822,787 | 1,186, 853 |
| Boston.- | 1,458, 200 | 1,240,040 | 306,700 | 314,980 |
| Cincinnati | 5, 031, 235 | 4, 628, 058 | 895,060 | 1,317, 535 |
| - Chicago.. | 9,549, 155 | 8,370, 225 | 1,794,557 | 2, 614,314 |
| St. Louis. | 8,125,790 | 6,773,266 | 1,280,750 | 1,592,775 |
| New Orleans | 4,487,500 | 3,827,850 | 730, 100 | 818,000 |
| San Francisco. | 1,978,786 | 1,537,601 | 357,511 | 427,819 |
| Total. | 42,670,867 | 37,604, 255 | 7, 959,302 | 10, 134, 255 |

## SUBSIDIARY SILVER COIN.

The stock of subsidiary silver coin in the country at the close of the fiscal year 1907 was $\$ 130,452,218$, an increase of $\$ 12,227,298$, as compared with that of 1906. There was an increase in the circulation of $\$ 10,147,897$.

The amounts shipped to depositors therefor; by months during the past two years and a quarter, were:

|  | 1906. | 1907. | 1908. |
| :---: | :---: | :---: | :---: |
| July. | \$2, 173, 325. 20 | \$2, 246, 930. 60 | \$2, 379, 662.30 |
| August. | 3,085, 898.60 | 2,960, 175. 60 | 2,857, 372.70 |
| September | 3, 650, 375. 20 | 3,878,762. 40 | 3,467,991. 80 |
| First | $8,909,599.00$ | 9, 085, 868. 60 | 8,705, 026.80 |
| October. | 3,265, 396. 90 | 4,140, 739.60 |  |
| November | $2,645,130.10$ | 3,201, 395.70 |  |
|  | 2,451,046.00 | $2,875,108.75$ |  |
| January. | 1,166,670.90 | $1,105,696.30$ |  |
| February | 1,526,540. 10 | 1,588,690. 40 |  |
| March. | 4,561, 447. 60 | 1,868,232. 00 |  |
| April. | 753, 760. 20 | 2,004, 496. 20 |  |
| May. | 1,885, 370. 10 | 2,209, 036.80 |  |
| June. | 2,213, 670. 50 | 2,316,398. 20 |  |
| Total | 29, 378, 631. 40 | 30,395, 662. 55 |  |

The act of June 9, 1879, provided for the redemption of subsidiary silver coin in the lawful money of the United States; also, that the coin so redeemed shall be exchanged for lawful money on demand of any holder thereof. The ease with which this coin can be secured from the Treasury without expense for transportation hastens its return for redemption. However, the amount in circulation is growing, and the holdings in the Treasury are not in excess of its requirements under present regulations.

The subsidiary silver coin received at the Treasury offices for redemption during the fiscal years 1906 and 1907 and the first quarter of 1908 may be observed in the following statement:

## MINOR COIN.

There is a constant growth in the volume of minor coins outstanding. They form no part of the stated stock of money in the United States, though in circulation in every section of the country. During the last fiscal year an addition of $\$ 910,674.97$ was made to the stock of bronze cents, and of $\$ 2,236,016.75$ to the 5 -cent pieces to meet the demands for such coins.

The amount of each denomination of minor coin outstanding at the close of the fiscal years 1906 and 1907 is recorded here:

| Denomination. | Outstanding June 30, 1906. | Fiscal year 1907. |  | Outstanding June 30, 1907. |
| :---: | :---: | :---: | :---: | :---: |
|  |  | Coined. | Remelted. |  |
| Copper cents. | \$1, 182, 792.14 |  | \$114.87 | \$1,182,677.27 |
| Copper half cents. | - 39,926.11 |  |  | 139,926.11 |
| Copper-nickel cents. | '1,206, 887.78 |  | 697.64 | 1,206, 190.14 |
| Bronze 1-cent pieces | 14, 543, 720.30 | \$937, 315.68 | 26,640. 71 | 15,454,395.27 |
| Bronze 2-cent pieces | - 573, 154.28 |  | 218.30 | 572,935.98 |
| Nickel 3-cent pieces. | 625, 015.91 |  | 647.52 | 624, 368.39 |
| Nickel 5-cent pieces. | 24, 859, 324.10 | 2, 382, 137.50 | 146,120.75 | 27,095, 340.85 |
| Total. | 43, 030, 820.62 | 3,319,453.18 | 174, 439.79 | 46, 175, 834.01 |

The amount of minor coin distributed, by offices, to depositors therefor during 1906 and 1907 and first quarter of 1908 is given in the following statement:

Movement of Minor Coins.

| Office. | Fiscal year 1906. |  | Fiscal year 1907. |  |
| :---: | :---: | :---: | :---: | :---: |

| San Francisco | 29,568 | 10, 603 | 4, 857 | 15, 285 |
| St. Louis. | 339,965 | 427,462 | 83,359 | 111,463 |
| Total. | 5,972,138 | 6,273,638 | 1,435,247 | 1,622,022 |

## MONEY FOR MOVING THE CROPS.

In previous years the Treasury was able to render good service in aid of the "crop movement" by receiving large amounts of currency in New York for which payments were made by wire through this office at other points in denominations of paper currency that were required to meet the demands of the locality in which it was to be used. It is presumed that recent legislation by Congress will again place the Department in a position to render like facilities in the annual movement.

The following tables give the deposits in New York for 1905, 1906, and 1907 in all months when any were received, and the resultant payments in the several cities:

Money for Moving the Crops-Continued.

## DEPOSITS OF GOLD BULLION AT THE MINTS AND ASSAY OFFICES.

The activity of the owners of gold mines is adding largely to the wealth of the country. The value of the new product of gold bullion deposited at the mints and assay offices during the fiscal years 1905, 1906, and 1907 may be observed in the annexed statement:

| Office. | 1905. | 1906. | - 1907. |
| :---: | :---: | :---: | :---: |
| Philadelphia. | \$2, 449, 309.64 | \$2,040,242.66 | \$1,809,596.26 |
| San Francisco. | 48,817, 162.46 | 35, 808, 830.73 | 44, 138,661.93 |
| New Orleans. | 568, 394.02 | 737, 333.54 | 874,035.21 |
| New York. | 46, 146, 494.96 | 64, 345, 545. 58 | 77, 754, 786.19 |
| Denver. | 22, 202, 567.00 | 25, 830, 358.12 | 22,569, 154.64 |
| Carson. | 293, 287.44 | 735,974.22 | 811,415.95 |
| Boise.. | 1,035, 764.56 | 811, 377.41 | 884, 713.11 |
| Helena. | 2,476,999.09 | 2,341,811.92 | 2,039,329.03 |
| Charlotte. | 255, 062.73 | 229,582.49 | 173,945.02 |
| St. Louis. | 425,041.58 | 220, 810.55 | 259, 517.48 |
| Deadwood | 1,043, 181.54 | 548, 188.95 | 470, 150. 17 |
| Seattle. | $14,935,825.25$ | 17, 945, 146.16 | 22, 860, 744.44 |
| Total. | 140,649,090.27 | 151, 595, 202.33 | 174,646, 049.43 |

Depositors of gold bullion at mints or assay offices can receive in return coin or checks on the local assistant treasurer, in subtreasury cities, and at other places checks on local depositary banks, or exchange on Chicago, New York, or San Francisco, or in the case of Helena on Philadelphia. To facilitate these transactions during the last fiscal year $\$ 45,000$ in gold coin was transferred from San Francisco to Carson and $\$ 4,900,000$ to Seattle.

## GOLD RECEIVED IN SAN FRANCISCO, PAID FOR BY TELEGRAPHIC EXCFANGE ON NEW YORK.

The sum of $\$ 15,315,739.41$ in gold was deposited in San Francisco for telegraphic exchange on New York during the first five months of the last fiscal year, after which such accommodations were discontinued because of the excessive accumulation of gold at San Francisco.
The subjoined table shows the amounts deposited by months in which transactions took place in the past two years:

|  | Japanese yen. | Proceeds of other foreign coins. | New product of the mines. | Total. |
| :---: | :---: | :---: | :---: | :---: |
| 1905. | , |  |  |  |
| July. |  |  | \$2,939,100.00 | \$2,939, 100.00 |

## ACCUMULATION OF GOLD AT SAN FRANCISCO.

The gold held in the subtreasury and mint at San Francisco is largely in excess of the amount that will be required for public disbursements on the Pacific coast for some years to come; in fact, it is doubtful if it can ever be so used at these offices. On June 30, 1897, the holdings of gold at the two offices in excess of all demands were $\$ 13,909,902$, and at the close of the fiscal year 1907 they had increased to $\$ 260,721,583$, or an average annual growth of more than $\$ 24,600,000$ during ten years.

Heretofore the Department has dealt very liberally with the producers and importers of gold who have deposited it at San Francisco. They have been paid the full value of their product at the place of deposit and have had the proceeds transferred for them free of expense to commercial centers; and as a natural result the Treasury is confronted by a bothersome condition calling for early action to correct the inconvenient accumulation of gold in Treasury offices located on the Pacific coast.

## SHIPMENTS OF CURRENCY FROM WASHINGTON.

The business demands of the country and the growth in the volume of paper currency adds yearly to the work of this office. The increased labor and responsibility of the Treasury in Washington is illustrated by a comparative statement of the number and value of packages of currency shipped for the past two years.

The details follow:

REDEMPTIONS AND EXCHANGES.
The moneys received for redemption and exchange during the last fiscal year amounted to $\$ 1,026,876,500$, a decrease of $\$ 77,572,992$ as compared with that of the preceding year. Gold coin and certificates were freely used in making payments, as $\$ 83,768,261$ more in this form was paid over the counter than received.

The kinds of money received and paid at Treasury offices on account of redemptions and exchanges during the fiscal year 1907 were:

## REDEMPTION' OF NATIONAL-BANK NOTES.

The national-bank notes presented for redemption during the year were valued by the owners at $\$ 240,314,680.86$. This total included $\$ 1,469,317.50$ in United States and other, currency, which was accounted for separately or returned, $\$ 5,369.05$ in notes not redeemable under the regulations of the Department, and $\$ 1,567$ in spurious notes. The corrections in count aggregated $\$ 28,549.10$ in favor of the owners and $\$ 31,794.80$ against them. The net proceeds, exclusive of $\$ 316.85$ applied in payment of express charges, $\$ 238,834,864.76$, were accounted for by the issue of checks on the several subtreasury offices to the amount of $\$ 126,576,021.21$, by the shipment of $\$ 62,899,054.45$ in new United States currency and coin, and by the credit of $\$ 49,359,789.10$ in accounts. Owing to the inability of the Treasury to furnish the new currency asked for in redemption of the notes, the payments in currency, amounting to $\$ 62,747,460$, fell off 49.14 per cent as compared with the payments of this kind in the previous year, and in no year since 1901 have they been so little. During the year there was a net increase of 414 in the number of national banks; an increase of $\$ 42,676,330$ in the volume of notes issued by them; a decrease in the average denomination of note to $\$ 10.43$ from $\$ 11.29$, the result of an increase of $\$ 36,937,530$ in the issue of $\$ 5$ notes, which on June 30 amounted to $\$ 113,826,705$ out of a possible issue of $\$ 201,262,897$; and a decrease of $\$ 55,978,204.09$, or 18.89 per cent, in the amount of notes
presented for redemption as compared with the previous year. Of the average amount of circulation outstanding during the year there was 40.77 per cent redeemed, which is the lowest rate per cent of redemptions since 1900. The rate at which each denomination of note was redeemed is shown by the following percentages: Fives, 45.80 per cent; tens, 38.66 per cent; twenties, 33.29 per cent; fifties, 54.53 per cent; one hundreds, 64.57 per cent. The amount of notes received from New York City during the year was $\$ 102,279,000$. Compared with $\$ 150,087,000$ received in the previous year shows a decrease of $\$ 47,808,000$, which accounts for 85.40 per cent of the total decrease in the redemptions for the year.

The notes assorted and delivered during the year on account of the 5 per cent redemption fund amounted to $\$ 212,080,670$. Of this sum $\$ 43,140,205$ was fit for circulation and was forwarded to the respective banks of issue, and $\$ 168,940,465$ was unfit for circulation and was delivered to the Comptroller of the Currency for destruction and reissue. The notes assorted and delivered on account of the various redemption funds for the retirement of circulation amounted to $\$ 25,454,254.50$. The deposits received under the several provisions of law for the retirement of circulation amounted to $\$ 33,253,849.50$. Of this sum $\$ 22,224,662.50$ was deposited under section 4 of the act of June 20, 1874, an increase of $\$ 4,756,920$ over the previous year. In the month of March only, when the deposits received on this account amounted to $\$ 4,183,950$; was the old limit of $\$ 3,000,000$ receivable exceeded. Apparently some new conditions will need to arise before the enlarged limit of $\$ 9,000,000$ monthly will be availed of.

The annual expenses of the redemption agency, amounting to $\$ 233,650.52$, were assessed on the banks of issue in proportion to the notes redeemed at the rate of $\$ 0.98615$ per $\$ 1,000$.

## RECOINAGE IN THE FISCAL YEAR 1907.

Coins worn so as to need remintage were received at Treasury offices during the fiscal year 1907 to the amount of $\$ 3,106,030.09$, an increase of $\$ 732,449.59$ as compared with that of 1906. The average loss on the silver recoined for the past four years has been a little more than 6 per cent.
The details for the past two years may be observed in the annexed table:

| Denomination. | 1906. |  | 1907. |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Face value. | Loss. | Face value. | Loss. |
| Double eagles | \$157, 820.00 |  | \$489, 840.00 |  |
| Eagles. | 172, 730.00 |  | 489, 010.00 |  |
| Half eagles. | 450, 135.00 |  | 805, 545.00 |  |

| Half dimes. | - 856.45 |  | 698.30 |  |
| Three-cent pieces | 48.45 |  | 150.10 |  |
| Total silver. | 1, 409, 456.50 | 91, 954.53 | 1,138, 260.80 | 77,377.06 |
| Minor coins. | 180, 423.50 |  | 174,439.79 |  |
| Aggregate | 2, 373,580.50 | 98,592.15 | 3,106,030.09 | 84,201.01 |

## SPURIOUS ISSUES DETECTED IN 1907:

An enormous volume of currency is handled annually in the Treasury offices, and its genuineness is attested by the fact that the diligence of the experts detected of spurious issues only $\$ 11,493$ in nominal value in all kinds during the past fiscal year

## SPECLAL TRUST FUNDS.

The Central Pacific Railroad reduced its indebtedness to the Government by the payment of two notes amounting to $\$ 5,881,271.56$ during the fiscal year 1907. Bonds of the company held to secure said notes were released, at the time of each payment.

Special trusts in the custody of the Treasurer, and the transactions therein during the last fiscal year may be observed in the annexed table:

Special Trust Funds in the Custody of the Treasurer of the United States at the Close of the Fiscal Year 1907.

## DISTRICT OF COLUMBIA.

The transactions of the Treasurer of the United States, ex officio commissioner of the sinking fund of the District of Columbia, pertaining to the affairs of the District, are fully set forth in a separate report.
During the fiscal year 1907 the bonds of the funded debt retired amounted to $\$ 483,950$, resulting in a reduction of the annual interest charge by $\$ 17,664.17$.

From July 1, 1878, to the close of the fiscal year 1907, the bonded debt was increased by the issue of 3.65 per cent bonds amounting to $\$ 1,254,050$, and decreased by the operations of the sinking funds and otherwise $\$ 12,256,950$, making a net reduction of $\$ 11,002,900$ and of the annual interest charge $\$ 610,472.25$. The interest-bearing bonds outstanding June 30,1907 , were $\$ 11,103,750$.

Since the close of the fiscal year the debt has been further reduced by the purchase of 3.65 per cent bonds amounting to $\$ 481,000$. This leaves outstanding October 1, 1907, $\$ 10,622,750$ in bonds bearing 3.65 per cent interest.

The retentions from 33 District of Columbia contracts were canceled during the year by the return to the contractors of $\$ 72,150$ in bonds and $\$ 112,746.41$ in cash.

At the close of the fiscal year 1907 the 10 per cent guaranty fund retained from District contractors amounted to $\$ 319,969.92$, and was credited to 56 separate contracts, and is represented by $\$ 124,870$ in bonds purchased at the request and risk of contractors and $\$ 180,697.73$ uninvested cash.

The receipts during the year for account of the police relief fund were $\$ 79,176.53$, and for account of the firemen's relief fund $\$ 33,426.67$ These sums were advanced to the Commissioners of the District in monthly installments.

The secureties of the District in the care and custody of the Treasurer are:
3.65 per cent bonds (unsigned)............................................... $\$ 3,395,450$
Bonds for account of District contractors...................................... 124, 870
Chesapeake and Ohio Canal bonds.
84, 285
Total........................................................................ 3,604,605

Respectfully,

Chas. H. Treat, Treasurer of the Dnited States.

Hon. George B. Cortelyou; Secretary of the Treasury.

## APPENDIX TO REPORT OF THE TREASURER.

No. 1.-Revenues and Expenditures for the Fiscal Year 1907, as Sefown by Warrants Issued.

## REPORT OF THE DIRECTOR OF THE MINT.

## Treasuriy Department, <br> Bureau of the Mint, Washington, D. C., July 31, 1907.

SIR: I have the honor to submit herewith the thirty-fifth annual report of the Director of the Mint, covering the operations of the mints and assay offices of the United States for the fiscal year ended June 30, 1907, with such available statistics for the fiscal year as may be valuable in connection therewith.

## THE YEAR'S OPERATIONS.

The four coinage mints have all been in continuous operation throughout the fiscal year, and the figures for the amount of coinage and other details of the service and the usual tables are to be found as arranged heretofore.

The most notable event of the year in the service was the resumption of silver purchases for the subsidiary coinage. The amount and cost of these purchases will be found elsewhere.

## RECORD OF NINE YEARS

This report closes a period of service for the retiring Director which began on February 14, 1898. These years have been eventful ones in the service, thanks to the intelligent labors of the men who have had charge of the practical operations in the several institutions. The organization of the service has expanded to the extent of one new coinage mint, opened in 1906 in Denver, and one important assay office, opened in 1898 in Seattle. The capacity of all the mints has been greatly increased by the introduction of new and improved machinery. The old mint at Philadelphia, built in the early thirties, has been replaced by a splendid new one, undoubtedly the finest building ever constructed for coinage uses, and it has been thoroughly equipped with machinery of the most approved type. The new mint at Denver, although of smaller capacity than the one at Philadelphia, has a thoroughly modern and perfect equipment.

By the originality and interested labors of the workmen and officers practically every process in the preparation and treatment of the metals has been changed in this time.

> REFINING BY ELECTRICITY.

Contrary to the policy of the European mints, it has always been the practice here to conduct refineries in connection with coinage operations, being thus enabled to receive crude bullion.

In 1898 the time-honored acid-parting methods were used in all the mints and in the assay office at New York. The partial suppression of acid fumes (it could be made only partial) was expensive and they remained a constant source of complaint from Wall street.

In 1907 all parting and refining is done by electrolysis. Experiments in refining gold by the electric current were conducted by the melter and refiner of the mint at Philadelphia as early as 1898, with such satisfactory results that a plant for actual work was about to be installed when an inspection of the records of the Patent Office showed that his process was covered by a patent issued to Dr. Emil Wohlwill, of Hamburg, Germany. The facts were reported to the Mint Bureau and negotiations opened with the patentee which resulted in the purchase of a right to use the process in the mint at Philadelphia. A small plant was installed in the old mint, and in August of the year 1900, 20,000 ounces of electrolytic refined gold was produced of almost absolute purity. Experiments looking to an equally efficient method for refining silver were prosecuted, but the problem here was a more difficult one, since in the parting of mint deposits considerable quantities of base metal have to be reckoned with, such as copper, lead, etc. In the Moebius process, then coming into extended use in private refineries, all bullion to be treated by electrolysis was, and still is, submitted to a preliminary cupellation, by which it was brought to so-called Doré bars, consisting of practically pure silver, with only a small percentage of gold as an impurity. The problem in mint practice was to adapt the electric current to the quartation process-that is to part bullion containing say one-third gold and two-thirds silver and base metals. To have accomplished this result and on a large scale reflects great credit on the melting and refining department of the mint at Philadelphia. Only an untiring devotion to the work, directed by high scientific training, could have produced the results which have been realized. Parting and refining is now done entirely by electrolysis in the mints at Philadelphia and Denver. The process had a successful trial in the assay office at New York, and will be installed in the new structure, now in process of building on Wall street. The acid plant in the mint at San Francisco is now being replaced by one in which electricity is to do the work of tons of acids.

The gradual stages through which this revolution of methods has passed have been detailed in previous reports and find no place here. A great saving has been effected in the cost of parting and refining; valuable by-products, principally platinum, are recovered in important quantities. The refined metals, gold and silver, are almost chemically pure; the acid fumes are eliminated, and the process is a cleanly, healthy one, of scientific as well as commercial interest. Surely such results mark an era in mint methods.
other changes.
Melting is now entirely done by gas, which has many advantages over coal as fuel beyond the mere absence of ashes. A special form of furnace suitable for mint melting had to be devised. This was done and the results are satisfactory. Gas furnaces were installed for annealing the strips and blanks-a marked improvement over the former cumbersome wood-burning ovens. It has been found, however, that with the improved quality of the bullion resulting from
refining by electricity and with care in rolling, the annealing of strips can be dispensed with, and only the planchets are annealed preparatory to stamping.

All machinery in the mints is driven by direct-connected motors after the most approved engineering methods. The rolling mills are from improved patterns and do more accurate work than the old type. The cutting and upsetting machinery is of new and improved patterns. Where formerly only one blank was punched at a stroke, two, and even three, are now punched at once by this heavier machin-ery-a distinct economy.

Nine years ago every coin blank was weighed singly by hand, and the pieces a trifle overweight were filed down by hand, this work being done by women, known as "adjusters." An automatic weighing machine has been developed, which rapidly and accurately selects and assorts by weight. One of these machines is on exhibition at the Jamestown Exposition.

Important and successful experiments have been made at the Philadelphia and Denver mints, independently, upon a process for automatically adjusting the heavy blanks by passing them under a shaving device which has been introduced into the upsetting machine. These experiments are very promising, and this device, together with the automatic weighing and selecting machine previously described, will accomplish a very large annual saving in wages.

Nine years ago the ready-made blanks for 1 and 5 cent pieces were all purchased from contractors. These coins are now to a great extent made in the mints from pig metal. All difficulty in the treatment of these metals has been overcome, and with the installation of additional machinery designed specially for economical production these coins will be wholly made in the mints.

Upon two different occasions during the period under review experts have been sent to visit the principal mints of Europe in order that we might keep in touch with any improvements being made in coinage methods.

More detailed accounts of improvements made, particularly of recent ones, will be found in the independent reports submitted of the operations of the several institutions.

Nine years ago we had practically no medal department. The few medals made at the mint were struck in the coiner's department, and the equipment for that purpose was incomplete and inferior. Upon removal to the new mint at Philadelphia the making of medals was placed under the supervision of the engraver, and ample quarters and first-class equipment were provided. The result has been some exceedingly creditable work, and a prospect that in the future the mint will make all medals conferred by the Government, as it surely should do.

COST KEEPING.
A complete system of cost keeping has been introduced in the mints by which the cost of each process in coinage operations per ounce of metal handled and per dollar of product is calculated monthly, and a statement of the same at each institution is supplied to all the others.

The credit of what has been done in these years would have to be .widely distributed among the officials and employees of the several institutions. A spirit of friendly emulation pervades the service, and in every mint there is constant effort to improve upon present methods. The civil service regulations are observed, and in my judgment the few excepted places should be covered into the classified service.

## DEPOSI'SS OF GOLD BULLION.

The deposits of gold bullion at the mints and assay offices of the United States during the fiscal year 1907, exclusive of the redeposits, were of the value of $\$ 176,580,654.53$, against $\$ 153,109,493.52$ reported the previous year. Redeposits, which consist of bullion transferred from one office of the service to the other, or bars bearing the stamp of one of the offices of the service, amounted to $\$ 65,118,805.02$.
The aggregate of all deposits, including redeposits, is the total metal operated upon in the year by the mint service. This total of gold bultion received in the fiscal year 1907 was $12,991,346.109$ standard ounces of the value of $\$ 241,699,459.55$, against 10,045 ,282.710 standard ounces of the value of $\$ 186,888,975.26$ reported the previous year.

The deposits of domestic bullion amounted to $6,139,183.740$ standard ounces, of which $1,941,006.290$ standard ounces were in crude condition direct from the mines operating in the different States; $701,105.411$ standard ounces of refinery bars (less than 0.992 in fineness) and $3,497,077.039$ standard ounces of refined bultion ( 0.992 in fineness and over) were received from private refineries, bromide, chlorination, and cyanide works.

## UNCURRENT DOMESTIC GOLD COIN FOR RECOINAGE.

Uncurrent and mutilated gold coin received for recoinage contained $148,042.731$ standard ounces of the coining value in new coin of $\$ 2,754,283.29$. Of this amount $52,543.907$ standard ounces were received over the counter and $95,498.824$ standard ounces were received on transfers from the Treasury.

## DEPOSITS OF FOREIGN GOLD BULLION AND GOLD COIN.

Foreign gold bullion containing $1,970,289.471$ standard ounces of the value of $\$ 36,656,545.85$ and foreign gold coin containing 925 ,642.263 standard ounces of the value of $\$ 17,221,251.40$ were received from various countries as follows:

DEPOSITS OF JEWELERS' BARS.
Jewelers' bars and old plate containing $306,381.520$ standard ounces of the value of $\$ 5,700,121.19$ were deposited.

13091—H. Doc. 9, 60-1—17

## REDEPOSITS OF GOLD BULLION.

The redeposits contained $3,500,135.766$ standard ounces of the value of $\$ 65,118,805.02$ as follows:

| Bars manufactured at- |
| :--- |

## DEPOSITS AND PURCHASES OF SLLVER.

Silver is coined in the United States on Government account only.
Deposits of silver bullion are received by the mints and assay offices to be returned to the depositors in fine or unparted bars with the weight and fineness stamped thereon. These deposits are confined almost exclusively to the assay office at New York, and the bars when returned to the depositors are sold for use in the arts or exported.

The deposits and purchases of silver at the United States mints and assay offices during the fiscal year 1907 were as follows:

Included in silver "for Philippine coinage" is $5,200,000$ standard ounces Philippine silver coin received for récoinage at a reduced fineness.

## UNCURRENT DOMESTIC SILVER COINS FOR RECOINAGE.

Uncurrent and mutilated domestic silver coins received for recoinage contained $857,846.15$ standard ounces, of the value of $\$ 1,067,-$ 304.64 in new subsidiary coin.

## DEPOSITS OF FOREIGN SILVER BULLION AND SILVER COIN.

Foreign silver bullion containing $2,835,559.33$ standard ounces, of the coining value of $\$ 3,299,559.97$, and foreign silver coin containing $314,013.12$ standard ounces, of the coining value of $\$ 365,397.08$, were received from various countries, as follows:

a Includes 461,686 fine ounces Hawaiian coin.
$b$ Includes 148,788 fine ounces Hawaiian coin,
c Includes 6,901 fine ounces Philippine special assay coins.
d Includes 3,647 fine ounces Hawaiian coin.
$e$ Includes 3,456 fine ounces Philippine special assay coins.
$f$ Includes 3,895 fine ounces Hawaiian coin.
o Includes 2,663 fine ounces Philippine special assay coins.
$h$ Includes 4,680,791 fine ounces Philippine coins.

COINAGE OF THE UNITED STATES FISCAL YEAR 1907.
The domestic coinage amounted to $208,543,958$ pieces, of the value of $\$ 95,916,324.93$, as follows:

Of the subsidiary coinage made during the year, $\$ 314,579.10$ were from uncurrent domestic coin received from the Treasury for recoinage and $\$ 12,659,955.15$ from silver bullion purchased under the provision of section 3526 of the Revised Statutes.

## RECOINAGE OF STANDARD SILVER DOLLARS.

There were purchased as bullion and melted at the mints and assay offices 1,548 mutilated silver dollars during the fiscal year 1907, which were for use in the manufacture of subsidiary silver coins.

| Fiscal year. | Amount. |  | Fiscal year. | Amount. |

## RECOINAGE OF UNCURRENT SILVER COIN.

The following table shows the face value of abraded subsidiary coin transferred and purchased for recoinage, the amount of new coin made therefrom, and the loss since 1891:

|  | Fiscal year. | Face value. | New coin. | Loss. |
| :---: | :---: | :---: | :---: | :---: |
| 1891. |  | \$910,046. 69 | \$861,680. 41 | \$48,366. 28 |
| 1892. |  | 7,118,602. 78 | 6,937,886. 02 | 180,716. 76 |
| 1893. |  | 7,618, 198. 25 | 7,381,289. 58 | 236,908.67 |
| 1894. |  | 7,184, 472.17 | 6,924,753. 05 | 259,719. 12 |
| 1895. |  | 4,361,761. 36 | 4,161,820. 73 | 199,940. 63 |
| 1896. |  | 4,627,141. 46 | 4,377, 258.40 | 249,883. 06 |
| 1897. |  | 3,197, 998. 50 | $3,048,861.64$ | 149,136. 86 |
| 1898. |  | 6,109,772. 32 | $5,820,159.16$ | 289,613.16 |
| 1899. |  | $8,584,304.26$ | 8,098, 485.18 | 485,819.08 |
| 1900. |  | $5,261,070.35$ | 4,950,088.96 | 310,981. 39 |
| 1901. |  | 3,832,280. 69 | 3,613,021. 59 | 219,259. 10 |
| 1902. |  | 3,333, 437. 06 | 3,141,548.04 | 191,889. 02 |
| 1903. |  | 3,008,747. 98 | 2,829,890. 71 | 178,857. 27 |
| 1904. |  | 2,828,384.90 | 2,656,104. 21 | 172,280.69 |
| 1905. |  | 1,964, 476. 11 | 1,839, 219. 24 | 125,256. 87 |
| 1906. |  | 1,414,963.90 | 1,322,834. 27 | 92,129. 63 |
| 1907. |  | 1,142,184.00 | 1,064,826.39 | 77,357. 61 |
|  |  | 72, 497, 842. 78 | 69,029,727. 58 | 3,468,115. 20 |

The loss on the recoinage of $\$ 2,779,236.50$ in worn and uncurrent gold coins was $\$ 24,953.21$, and the net loss on the recoinage of $\$ 1,142,184$ in worn and uncurrent silver coins was $\$ 77,358.66$.

The Treasury was reimbursed $\$ 16,607.20$ loss on uncurrent gold coin transferred and $\$ 77,377.06$ loss on uncurrent silver coin transferred for recoinage from the appropriations for this purpose.
Connage of Gold and Silver at the Mints of the United States since 1873, by Fiscal Year.

## COINAGE FOR PHILIPPINE ISLANDS.

The mints at Philadelphia and San Francisco coined for the Philippine government during the fiscal year 1907 the following:

| Denomination. | Philadelphis. | San Francisco. | Total. |
| :---: | :---: | :---: | :---: |
| Silver: | Pieces. | Pieces. | Pieces. |
| Pesos. |  | 5,604,000 | 5, 604, 000 |
| 50 centavos. | 1,200,625 | 1,008, 000 | 2, 208, 625 |
| 20 centavos. | 1,250, 651 | 1,260,000 | 2,510,651 |
| 10 centavos. | 1,500,781 | 2,520,000 | 4,020,781 |
| Total. | 3,952,057 | 10,392,000 | 14, 344, 057 |

The coinage made for the Philippine government by the mints of the United States from date of the act of March 2, 1903, authority for this coinage, to June 30 , 1907, is as follows:

| Denomination. | Philadelphia. | San Francisco. | Total. |
| :---: | :---: | :---: | :---: |
| Silver: | Pieces. | Pieces. | Pieces. |
| Pesos. | 2,806, 358 | 29, 762,000 | 32, 568,358 |
| 50 centavos. | 4, 317, 143 | 4,020,000 | $8,337,143$ |
| 20 centavos. | 6,618, 339 | 3, 890,000 | 10,508, 339 |
| 10 centavos. | 6,618,338 | 8,760,000 | 15, 378,338 |
| Nickel: | 9,999,884 |  | 9,999,884 |
| Bronze: |  |  |  |
| 1 centavo. |  |  | 37,845,284 |
| $\frac{1}{3}$ centavo. | 17,752, 884 |  | 17, 752, 884 |
| Total. | 85, 958, 230 | 46, 432,000 | 132,390, 230 |

## RECOINAGE OF PHILIPPINE COINS.

Under the act of June 23, 1906, which provides for the recoinage of Philippine silver coins of a reduced fineness and weight, there were received at the mints and melted for recoinage up to June 30, 1907, the following:

|  | Denomination. | - | Pieces. | Peso value. | Standard ounces. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Peso $\qquad$ 50 centavo |  |  | $\begin{array}{r} 5,998,887 \\ 4,000 \end{array}$ | $\begin{array}{r} 5,998,887 \\ 2,000 \end{array}$ | $\begin{array}{r} 5 ; 199,035.40 \\ 1,733.33 \end{array}$ |
| Total. |  |  | 6,002,887 | 6,000,887 | 5;200, 768. 73 |

The weight and fineness of the Philippine silver coins authorized under the act of March 2, 1903, and of the reduced weight and fineness authorized under the act of June 23, 1906, are as follows:

| Denomination. | Act of March 2, 1903. |  | Act of June 23, 1906. |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Weight in grains. | Fineness. | Weight in grains. | Fineness. |
| Peso. | 416.00 | 900 | 308.640 | 800 |
| 50 centavo. | 208.00 | 900 | 154. 320 | 750 |
| 20 centavo. | 83.10 | 900 | 61.728 | 750 |
| 10 centavo.. | 41.55 | - 900 | 30.864 | 750 |

## COINAGE FOR MEXICO AND PANAMA.

The mint at Philadelphia coined for the Government of Mexico $1,000,000$ gold five-peso pieces; the mint at Denver coined 4,802,000, and the mint at San Francisco coined 12,442,000 fifty-centavo pieces; while the mint at New Orleans made $5,434,699$ twenty-centavo pieces, all for the Government of Mexico. The mint at Philadelphia coined for the Government of Panama 800,000 two and one-half onehundredths ( $\left.\frac{2}{10}{ }^{5}{ }^{5}\right)$ ) of a balboa $=$ one-twentieth of a peso; azda $1,000,000$ one-half one-hundreths ( $\frac{0}{105}$ ) of a balboa $=$ one-fortieth of a peso.

## RECOINAGE OF HAWAIIAN SILVER COIN.

There were transferred from the Treasury to date for the purpose of recoinage Hawaiian silver coins of the face value of $\$ 828,624,50$, producing $\$ 854,351.75$ in domestic subsidiary silver coins on which there was a gain of $\$ 25,727.25$.

## BARS MANUFACTURED.

During the fiscal year 1907 there were manufactured by the mints and assay offices of the United States gold and silver bars of the value of $\$ 158,073,791.58$.

Tables will be found in the appendix showing in detail the character of bars manufactured at each institution during the year.

## WORK OF THE GOVERNMENT REFINERIES.

There were received and operated upon by the refineries connected with the mints at Philadelphia, San Francisco, New Orleans, and Denver, and the assay office at New York, during the fiscal year 1907, gold bullion containing $8,179,555.581$ standard ounces, and silver bullion containing $19,430,818.18$ standard ounces, as shown by the following table:

| Institution. | Gold. |  | Silver. |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Standard ounces. | Value. | Standard ounces. | Coining value. |
| Philadelphia. | 4,425,385.907 | \$82,332,761. 10 | 14,213,866. 26 | \$16, 539,771. 65 |
| San Francisco | 990,327.900 | 18,424,705. 11 | 2,097,602. 72 | 2,440,846. 80 |
| New Orleans. | 51,778. 463 | ,963,320.24 | 118,415.69 | 137, 792.80 |
| Denver ${ }^{\text {a }}$ | 1,708, 189. 456 | 31,780, 268.93 | 340,289. 95 | 395,973. 76 |
| New York | 1,003,873. 855 | 18,676,722. 87 | 2,660,643. 56 | 3,096,021. 59 |
| Total. | 8,179,555. 581 | 152,177, 778. 25 | 19,430,818. 18 | 22,610,406.60 |

a Six months' operations, October -, 1906, to March 31, 1907.

## SILVER BULLION ON WHICH CHARGES WERE COLLECTED.

In order to show the amount of the abcve mentioned silver bullion treated by the Government refineries on which charges were received and the amount handled for parting purposes, the following table is presented:

| Institutions. | Silver bullion on which charges were collected. | Silver bullion owned.by the Government retained by the refinery for parting purposes on which there were no charges. | Total |
| :---: | :---: | :---: | :---: |

a Six months October, 1900, to March 31, 1907.
The figures given above represent the amount of silver received by the melter and refiner, but as it was used over and over it does not represent the whole amount of silver used or sent to the refinery.

## PURCHASE OF SILVER.

The table following shows the amount and cost of silver bullion purchased for the subsidiary silver coinage during the fiscal year ended June 30, 1907:

Sllver Purchases for Subsidiary Coinage during the Fiscal Year 1907.

| Stock. | Standard ounces. | Cost. |
| :---: | :---: | :---: |
| Silver bullion purchased under section 3520, United States Reviscd Statutes, at the Treasury Department. | 12, 415, 988.74 | \$7, 575, 802.20 |
| Silver bullion purchased under section 3526, United States Revised Statutes, at mints. | - 114, 477.07 | - 69,000.15 |
| Partings, charges, and fractions purchased. | $756,990.60$ | 461, 827.10 |
| Melted assay coins purchased.... | 412.35 | 454.63 |
| Mutilated coins purchased. | 2,463.99 | 1,508.94 |
| Surplus bullion purchased | 29, 518. 58 | 17,993. 09 |
| Total. | 13, 319, 351.33 | 8, 127, 186. 11 |

Quantity and Cost of Silver Purchased for Subsidiary Coinage at each Mint and at the Assay Office at New York during the Fiscal Year 1907.

| Institution, | Standard ounces. | Cost. |
| :---: | :---: | :---: |

## BALANCES OF SILVER BULLION.

The balances of silver bullion on hand June 30, 1907, at the mints and assay offices of the United States for the coinage of subsidiary silver coins for the Philippine Islands, the Government of Mexico, and for payment of deposits of silver bullion in fine bars were as follows:

## COURSE OF SILVER.

For the twelve months ended June 30, 1907, the price of silver 0.925 fine (British standard) in the London market ranged from $30 \frac{5}{8}$ pence in July to $33 \frac{1}{\frac{1}{8}}$ pence in November, 1906. The average price for the year, based on daily quotations, was $\$ 0.312914$. At the lowest rate the equivalent of a fine ounce at par of exchange was $\$ 0.66048$; for a fine ounce at the highest rate, $\$ 0.71617$, and at the average price for the year, $\$ 0.68594$.

The monthly fluctuations in the price of silver is shown in the following table:
Highest, Lowest, and Average Price of Silver Bullion and Value of a Fine Ounce each Month during the Fiscal Year 1907.

| Months. | $\begin{gathered} \text { High- } \\ \text { est. } \end{gathered}$ | $\begin{aligned} & \text { Low- } \\ & \text { est. } \end{aligned}$ | Average price per ounce, British standard, 0.925 . | Equivalent valuc of a fine ounce with exchange at par - (\$4.8665). | Average monthly price at New York of exchange on London. | Equivalent value of a fine ounce based on average monthly price and average rate of exchange. | Average monthly New York price of fine bar silver. |

DISTRIBUTION OF SILVER DOLLARS.
The number of dollars on hand June 30, 1906 and 1907, and the distribution from each mint during the year was as follows:

| Item* | Philadelphia. | San Trancisco. | New Orleans. | Total. |
| :---: | :---: | :---: | :---: | :---: |
| In mints June 30, 1906. | \$107, 105, 054 | \$62,301, 050 | \$29,582, 425 | \$198, 988, 529 |
| In mints June 30, 1907. | 106,946, 188 | 61, 400,027 | 29,582, 125 | 197, 928, 340 |
| Distributed from mints during the уеar. | 158,866 | 901,023 | 300 | 1,060, 189 |

SEIGNIORAGE ON SIIVER COINAGE.
The balance of profits on the coinage of silver on hand in the mints June 30, 1906, was $\$ 105,689.97$.

The seigniorage on subsidiary silver coinage during the fiscal year ended June 30, 1907, was $\$ 6,497,804.08$.

Including the balance on hand at the mints July 1, 1878, the net seigniorage on silver coined from that date to June 30, 1907, aggregated $\$ 142,952,968.63$.

The amount of seigniorage deposited in the Treasury during the fiscal year was $\$ 6,497,804.08$, leaving a balance on hand in the mints on June 30, 1907, of $\$ 253,795.33$.

A table showing the seigniorage on subsidiary silver coined during the fiscal year 1907, and the disposition of the same, will be found in the appendix.

## APPROPRIATIONS AND EXPENDITURES.

The acts approved June 22, 1906, and March 4, 1907, making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year 1907, contained specific appropriations for the support of the mints and assay offices of the United States amounting to $\$ 1,311,720$.

The earnings of the mints at Philadelphia, San Francisco, New Orleans, and Denver, collected for the manufacture of coins for foreign countries, etc., amounting to $\$ 283,599.96$, were deposited in the Treasury to the credit of the appropriations for wages of workmen and contingent expenses of the above-named institutions.

The acts approved June 6, 1900, March 3, 1903, April 28, 1904, and March 3, 1905, contained the following specific appropriations:

|  | \$440, 185 |
| :---: | :---: |
| collected and credited | 6 |

New machinery and appliances, mint at Denver................................ 345, 055
Charges collected and credited to above 560

EARNINGS AND EXPENDITURES OF THE REFINERIES OF THE COINAGE MINTS AND ASSAY OFFICE AT NEW YORK, FISCAL YEAR 1907.

The earnings of the refineries, amounting to $\$ 333,912.91$, were deposited in the Treasury to the credit of the appropriation for "Parting and refining bullion."

The expenditures on account of "Parting and refining bullion" during the fiscal year aggregated $\$ 246,816.87$, showing a net gain of earnings over expenditures of $\$ 87,096.04$, as shown by the following table:
Earnings and Expenditures for Parting and Refining Buldion for tee Fiscal Year 1907.

## APPROPRIATIONS AND EXPENDITURES OF THE OFFICE OF THE DIRECTOR OF THE MINT FOR THE FISCAL YEAR 1907.

Under the acts of June 22, 1906, and March 4, 1907, the sum of $\$ 40,670$ was appropriated for the office of the Director of the Mint to meet the expenses of the fiscal year 1907.

The expenditures from these appropriations for salaries, supervising the annual settlements at the mints and assay offices for collecting and compiling statistics of the production of gold and silver in the United States, for incidental expenses and the purchase of and subscription to books and pamphlets and contingent expenses for the laboratory aggregated $\$ 36,293.83$, leaving an unexpended balance of $\$ 4,376.17$ to the credit of the appropriations.

In addition to the above appropriations for the office of the Director of the Mint, the acts of June 22, 1906, and March 4, 1907, contained specific appropriations aggregating $\$ 85,000$ for "Freight on bullion and coin between mints and assay offices." The expenditures from these appropriations for the fiscal year amounted to $\$ 76,286.44$, leaving an unexpended balance to the credit of said appropriation of $\$ 8,713.56$.

Appropriations and Expenditures of the Office of the Director of the Mint for the Físcal Year ended June 30, 1907.

| Purpose of appropriations. | Appropriated. | Expended. | Unexpended. |
| :---: | :---: | :---: | :---: |
| Salaries. | \$31,020.00 | 830,385. 83 | \$634 17 |

| Total. | 125,670.00 | 112,580. 27 | 13,089. 73 |

## EARNINGS AND EXPENDITURES OF THE MINTS AND ASSAY OFFICES.

In the appendix a table will be found showing in detail the earnings and expenditures for the year.
13091-Н. Doc. 9, 60-1-18

Consolidated Statement of Expenditures for Salaries, Wages, and Supplies of the Mints and Assay Offices during the Fiscal Year 1907.

## LABORATORY OF THE BUREAU OF THE MINT.

During the calendar year 1906 there were tested by the assayer of this Bureau 390 gold and 676 silver coins, all of which were found within the legal requirements as to weight and fineness.

In the gold coins the greatest deviation above standard (the legal limit being 0.001 above or below) was 0.0005 , while the greatest deviation below was 0.0007 .

The greatest deviation of silver coin above standard (the limit being 0.003 above or below) was 0.0024 , while the greatest deviation below was 0.0024 , as shown by the following table of assays made at the Bureau of the Mint:

| Fineness. | Philadelphia. |  | San Francisco. |  | New Orleans. |  | Denver. |  | Total. |  |

| Total... | 60 | 145 | 202 | 36 | 14 | 83 | 114 | 74 | 390 | 338 |
| Average fineness. | 900.013 . | 899.341 | 899.88 | 899.855 | 900.036 | 899.30 | 899.735 | 899.974 | 899.795 | 899.659 |

In addition to the above there have been examined 10 Philippine silver coins, all of which were within legal requirements as to weight and fineness.
proceedings of the assay commission, 1907.
The following-named gentlemen were designated as commissioners to test and examine the weight and fineness of the coins reserved at the several mints during the calendar year 1906, pursuant to the provisions of section 3547 of the Revised Statutes:

Hon. John E. Reyburn, House of Representatives; Mr. Sidney A. Foster, Des Moines, Iowa; Dr. George F. Kunz, New York City; Mr. A. O. Ringsrud, Elk Point, S. D.; Mr. Olin Merrill, Enosburg Falls, Vt.; Mr. J. C. Mitchelson, Tariffiville, Conn.; Dr. James Lewis Howe, Washington and Lee University; Mr. Frank Knox, Salt Lake City; Mr. John W. Kelley, Portsmouth, N. H.; Prof. Owen Lewis Shinn, University of Pennsylvania; Prof. E. C. Franklin, Leland Stanford University; Prof. C. E. Mendenhall, University of Wisconsin; Prof. E. Merritt, Cornell University; Mr. Henry Cleveland Perkins, Washington, D. C.; Mr. Edward Whitaker, St. Louis, Mo.; Capt. C. E. Garner, Jacksonville, Fla. (Dr. H. G. Torrey, Hon. William Barrett Ridgely, Comptroller of the Currency, and Hon. J. B. McPherson, judge eastern district of Pennsylvania, ex officio members.)

The commission met at the mint in Philadelphia on February 13, 1907, and Mr. Sidney A. Foster, of Des Moines, was elected chairman.

The following committees were appointed by the chairman, with the approval of the commission:
Committee on counting: Mr. Knox, chairman; Messrs. Ringsrud, Merrill, and Kelley.
Committee on assaying: Dr. Franklin, chairman; Messrs. Shinn, Torrey, Howe, and Perkins.

Committee on weighing: Professor Mendenhall; chairman; Messrs. Merritt, Kunz, and Mitchelson.

The committee on counting reported that the packages containing the pieces reserved by the several mints for the trial of coins were delivered to them, and that they were compared with the transcripts kept by the Director of the Mint and found to be correct. After verification the coins were delivered to the committees on weighing and assaying.
The coins reserved by the mints for the purposes of the assay commission were as follows:

Gold coins from the mint at Philadelphia, 783, of the value of $\$ 5,462.50$.

Silver coins from the mint at Philadelphia, 13,135, of the value of $\$ 2,116.95$.

Gold coins from the mint at San Francisco, 3,122, of the value of \$48,890.

Silver coins from the mint at San Francisco, 2,440, of the value of $\$ 592.40$.
Gold coins from the mint at New Orleans, 87 , of the value of $\$ 870$.
Silver coins from the mint at New Orleans, 3,556 , of the value of $\$ 999$.
Gold coins from the mint at Denver, 1,926 , of the value of $\$ 23,900$.
Silver coins from the mint at Denver, 5,684 , of the value of $\$ 1,620$.
The coins reserved on account of coinage executed for the Philippine Islands were as follows:
Mint at Philadelphia:

The committee on assaying reported receiving and making assays of coins reserved from the mints at Philadelphia, San Francisco, Denver, and New Orleans, representing the deliveries made by the coiners to the superintendents during the calendar year 1906.

The highest assay value of the gold coinage (the limit of tolerance being one one-thousandth) was at-
Philadelphia.
San Francisco ..... 900.0
New Orleans. ..... 899.6
Denver ..... 899.8

The lowest assay value (the limit of tolerance being one one-thousandth) is at-

The highest assay value of silver coins (the limit of tolerance being three one-thousandths) is at-

| San Francisco |  | 899.3 |

The committee also tested the quartation silver and found it free from gold, and the lead used in the assay of gold bullion and found it free from gold and silver. The acid used in the humid assay of silver was found to be free from silver and also from chlorine.

The balances used were tested and found to be correct.
The committee reported the assays as entirely trustworthy, and that none of the coins tested differed from the standard of fineness by a greater degree than the amount allowed by law, except a double eagle piece taken from delivery No. 33, mint at Denver.

The committee on weighing respectfully reported examining sample coins, selected at random from those reserved by the several mints. The weighing of coins in mass was omitted, in accordance with the recommendation of the committee on weighing for the year 1906. The weighing of the single pieces was made in part by a balance by Henry Troemner, of Philadelphia, and in part by a balance by Becker \& Sons, of New York. The weights employed were furnished under seal by the Director of the Bureau of Standards and were accompanied by a certificate stating their variations in mass from the standards fixed by law. Both balances were carefully tested and found to be sufficiently accurate without making corrections.
The secondary troy pound of the mint was compared with the standard pound and found to be correct to one part in 250,000 . A pound built up of working weights of the mint was found to be correct within one part in 80,000

The details of the weighings indicated that the deviations from the statutory standard weights of the coins examined were all within the legal tolerance, consequently the committee on weighing pronounced the examination of the weights of the coinage of the several mints during the year 1906 to be satisfactory.

The committee on resolutions submitted the following:
Resolved, That the assay commission appointed to examine and test the reserved coins of the several mints of the United States for the year 1906 submits the following:

1. That the commission has carefully and according to law examined and tested, in the presence of the Director of the Mint, the fineness and weight of the coins reserved by the several mints for this purpose.
2. The commission, by examination and test, finds that the coins do not differ from the standard and weight by a greater quantity than is allowed by law, but are well within the limits with the exception noted by the committee on assaying (delivery No. 33 , mint, Denver) $a$ and are so reported.
[^7]
## MINT OF THE UNITED STATES AT PHILADELPHIA.

The following table shows, by weight and value, the gold and silver. deposited at the mint at Philadelphia for domestic coinage during the fiscal year 1907:

There were also deposited during the year $535,833.33$ standard ounces of silver bullion, of the coinage value of $\$ 623,515.15$, for coinage for the Philippine government.

Particulars as to the source and character of deposits and redeposits will be found in Tables 1 to 4 of the appendix, and concerning transfers of uncurrent coin in Table No. 7.

ASSAYER'S DEPARTMENT.
The number of assays made in this department was as follows:

There were also 178 barrels of sweeps assayed. In addition to this, 250 ounces of proof gold and 280 ounces of proof silver were made.

Of the 549 melts of gold ingots (for coinage) made by the melter and refiner, 461 were passed by the assayer, being well within the limit of tolerance. Eighty-three melts, while within the range of standard fineness allowed by law, were not sufficiently uniform to warrant passing, and were therefore returned for remelting. Five melts were condemned as being outside the legal limit.

The fineness of the melts passed was:

| 13 melts at | 899.7 | 74 melts at | 900.1 |
| :---: | :---: | :---: | :---: |
| 62 melts at | 899.8 | 26 melts at | 900.2 |
| 109 melts at | 899.9 | 2 melts at. | 900.3 |
| 175 melts at | 900 |  |  |

Two thousand seven hundred and twenty-five melts of silver ingots (for coinage) were made, of which 32 were rejected for want of proper mixture, and 2 condemned, being outside the legal limit.

The melts were of the following fineness:

Four hundred and twenty-eight melts for Philippine coinage, 750 fine, were made by the melter and refiner and passed by the assayer.

During the fiscal year the melter and refiner received from the superintendent gold bullion containing by assay $4,425,385.907$ standard ounces, of the value of $\$ 82,332,761.05$, his legal allowance for wastage being $4,425.385$ standard ounces, of the value of $\$ 82,332.74$; the silver bullion containing by assay $14,213,866.26$ standard ounces, of the value of $\$ 16,539,771.65$, his legal allowance for wastage being $21,320.80$ standard ounces, of the value of $\$ 24,809.66$.

He returned to the superintendent 4,424,420.524 standard ounces of gold and $14,216,353.91$ standard ounces of silver.

He operated upon bullion as follows:

The excess of gold and silver operated upon over the amounts charged during the year is due to duplicate operations.
Upon settlement of the melter and refiner's accounts June 30, 1907, there was found an apparent loss upon the gold bullion during the fiscal year of 965.383 standard ounces, and in the operation upon the silver bullion an apparent gain of $2,487.65$ standard ounces.

The melts made aggregate as follows:

| Melts. | Bars. | Ingots. | Anodes. | Deposits. | Special. | Total. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Gold.....Silver....Total | 405 | 549 | .1,070 | 2,805 | 244 | 5,073 |
|  | 622 | 2,725 |  | 842 | 90 | 4,280 |
|  | 1,027 | 3,274 | 1,070 | 3,647 | 334 | 9,353 |

During the year two gold melts and two silver melts were condemned.
Number, weight, and value of gold and silver bars for industrial use and silver bars for use of New York assay office:

| Metal. | Bars. | Standard ounces. | Coinage value. |
| :---: | :---: | :---: | :---: |
| Gold. . Silver. | 4,292 7,138 | $\begin{array}{r} 395,542.992 \\ 1,981,828.030 \end{array}$ | $\begin{array}{r} 87,358,939.44 \\ 2,306,127.16 \end{array}$ |
| Total. | 11,430 | 2,377, 371.022 | 9,665, 066.60 |

During the year 160 barrels of sweeps were gathered, containing by assay $1,284,531$ standard ounces of gold and $6,221.19$ standard ounces of silver.

The operations of the refinery were as follows:

## a Gain.

Silver bullion sent to the refinery upon which refining charges were collected contained by assay $1,410,229.12$ standard ounces, and silver owned by the Government returned to the refinery for parting purposes upon which no parting charges were imposed contained by assay $1,598,808.34$ standard ounces.

He operated upon minor coinage metal as follows:

COINER'S DEPARTMENT.
During the fiscal year 1907 this department received 2,482,538.033 standard ounces of gold, of the value of $\$ 46,186,754.10$, from which there were produced $1,294,963.142$ standard ounces of domestic coin, of the value of $\$ 24,092,337.50$, and $133,958.333$ standard ounces of Mexican coin, of the value of $\$ 2,492,248.06$, all delivered to the superintendent during the fiscal year prior to settlement, upon which there was a wastage of 73.130 standard ounces, of the value of $\$ 1,360.56$, being 5.89 per cent of the legal allowance. The percentage of coin produced from the amount of metal operated upon was 57.56 per cent.
During the same period the coiner also received $8,834,145.98$ standard ounces of silver, of which $8,678,474.08$ standard ounces, of the value of $\$ 10,797,479.41$ in subsidiary coin, were operated upon, and from which there were produced $4,360,702.43$ standard ounces of domestic coin, of the value of $\$ 5,425,446.25$ in subsidiary silver coin, and $536,112.40$ standard ounces of Philippine coin, of the value of $\$ 667,013.87$ in domestic subsidiary silver coin, all delivered to the superintendent during the fiscal year prior to settlement, upon which there was a wastage of $1,253.61$ standard ounces, of the cost value of $\$ 751.41$, being 14.19 per cent of the legal allowance. The percentage of coin produced from the amount of metal operated upon was 56.84 per cent.

There were also delivered to the coiner during the fiscal year $9,759,627.10$ ounces of nickel ingots and planchets, from which were produced $7,656,322.07$ ounces of domestic 5 -cent nickel coin, of the face value of $\$ 2,382,137.50$, and 208,975 ounces of nickel coin for the Government of Panama, of the value of $\$ 65,000$ in United States nickel-coinage value, upon which there was a wastage of $13,897.49$ ounces.

During the same period there were also delivered to the coiner 14,659,788.13 ounces of copper-bronze ingots and planchets, from which were produced $9,356,543.46$ ounces of 1-cent coin, of the face value of $\$ 937,315.68$, and upon which there was a wastage of $37,730.09$ ounces.

The following table shows the coinage executed during the year:

|  | Denomination. | Pieces. | Value. |
| :---: | :---: | :---: | :---: |
|  | GOLD. |  |  |
| Double eagles. |  | 351,941 | \$7,038, 820.00 |
| Eagles. |  | 1,274,812 | 12,748, 120.00 |
| Half eagles. |  | 635, 611 | $3,178,055.00$ |
| Quarter eagles |  | 450,937 | 1,127, 342.50 |
| Total |  | 2, 713, 301 | 24, 092, 337.50 |
| Half dollars. |  | 3,306,525 | 1,653, 262.50 |

| :---: | :---: | :---: |
| 5 pesos (gold). | 1,000,000 | \$2,492,248.06 |

Grand total, $182,825,251$ pieces.

## ENGRAVER'S DEPARTMENT.

All the dies used in the coinage operations of all the mints of the United States are made in the engraving department at Philadelphia.

The number of dies prepared for United States coinage last year was 2,543 . In addition 566 dies were made for Philippine coinage, 445 for Mexican coinage, 101 for medals, and 19 experimental dies for the new gold coinage, making the largest number of dies manufactured in any one year.

Many of the dies given in the summary below are original dies, which differ very much from regular coinage dies, the former, in some cases, requiring months to execute a single pair. The experimental dies for the new gold coinage have required many reductions from the original models and taken much time and attention. Altogether this has been a year of extreme effort and has taxed this department to the uttermost.

The number of dies made for the different mints, and denominations, are shown by the following table:

## SUMMARY.

The following table shows the number of proof coins and medals and their nominal value manufactured during the fiscal year:

|  | Article. | Number of pieces. | Nominal value value. |
| :---: | :---: | :---: | :---: |
| Gold medals. |  | 216 | \$6,898. 66 |
| Silver medals. |  | 17,717 | 2, 267.80 |
| Bronze medals. |  | 24,469 | 4,152.00 |
| Gold proof coins. |  | 375 | 2,012. 50 |
| Silver proof coins. |  | 1,734 | 491.30 |
| Minor proof coins. |  | 2,597 | 91.92 |
| Total. |  | 47,108 | 15,914.18 |

The manufacture of the 1 -cent bronze and 5-cent nickel coins has heretofore been confined by law to the Philadelphia mint. The Fiftyninth Congress at its first session authorized the making of these coins at the other mints, but the output of the last fiscal year was wholly at Philadelphia, and was the greatest ever issued, comparing with the fiscal year 1906, as shown below:

|  | Denomination. | 1906. | 1907. |
| :---: | :---: | :---: | :---: |
| 1-cent bronze. |  | \$895, 884.80 | \$937, 315.68 |
| 5-cent nickel.. |  | 2,302,397. 50 | 2,382, 137. 50 |

Bronze and nickel blanks were purchased from contractors as follows:

| , | Character. |  | Pounds avoirdupois. | Cost. |
| :---: | :---: | :---: | :---: | :---: |
| Bronze 1-cent blanks Nickel 5-cent blanks. |  |  | 190,000 | \$65,550.00 |
|  |  |  | 405, 000 | 174, 056.25 |
|  |  |  | 595,000 | 239,606. 25 |

The amount of metal purchased for the manufacture of minor coinage other than blanks was 587,926 pounds avoirdupois, at a cost of $\$ 130,237.81$.

The amount of uncurrent copper, nickel, and bronze coins transferred from the Treasury during the year for conversion into current coins, cost and seigniorage are shown by the following table:

| Old' copper cents. | \$114.87 |
| :---: | :---: |
| Nickel l-cent coins | 697.64 |
| Bronze 1-cent coins | 26,640. 71 |
| Bronze 2-cent coins | 218.30 |
| Nickel 3-cent coins | 647.52 |
| Nickel 5-cent coins | 146, 120.75 |
| Total | 174, 439.79 |
| Cost of nickel added to 1-cent me 5-cent coin. | 37.79 |
| Cost of tin and zinc added to old recoinage into bronze l-cent co | 4. 24 |
| Cost of metal of same alloy added t | 15.19 |
| Seigniorage (gain by recoinage) | 3,178.79 |
| Total. | 177,675.80 |
| Coinage executed, nominal value: |  |
| Bronze l-cent coin. . . . . . . . . . |  |
| Nickel 5-cent coin. |  |
| Loss by recoinage. | $\begin{array}{r} 168,020.73 \\ 9,655.07 \end{array}$ |
| Total | 177,675.80 |

The seigniorage, or gain, on recoinage of minor coin was $\$ 3,178.79$, as against a loss of $\$ 9,655.07$, showing a net loss of $\$ 6,476.28$.

The seigniorage on the coinage of nickel and bronze coins coined from purchased metal was $\$ 2,805,142.03$, which, less a net loss of $\$ 6,476.28$ on the recoinage of minor coin and a wastage of the operative officers in the minor coinage operations of $\$ 2,082.18$, gives a net seigniorage on minor coin of $\$ 2,796,583.57$.

The total amount of the several types of minor coins manufactured from 1793, when the first coinage of copper cents was made, until June 30, 1907, aggregated $\$ 50,761,455.45$. From the records of this mint, at which all this coinage has heretofore been made, it appears that there have been melted for recoinage $\$ 4,585,621.44$, leaving outstanding June 30, 1907, \$46,175,834.01.

The several types and denominations of minor coin issued, manufactured by the mint at Philadelphia since its establishment, the amount remelted, and the amount outstanding, June 30, 1907, are set forth in the following table:

Minor Coins Issued, Remelted, and Outstanding.

| Denomination. | Coined. | Remelted. | Outstanding June 30, 1907. |
| :---: | :---: | :---: | :---: |
| Copper cents. | \$1,562,887. 44 | \$380,210.17 | \$1,182,677. 27 |
| Copper half cents | 39,926. 11 |  | 39,926. 11 |
| Copper-nickel cents | 2,007,720.00 | 801,529.86 | 1,206, 190. 14 |
| Bronze cents.. | 15,750,588.93 | 296, 193. 66 | 15,454,395. 27 |
| Bronze 2-cent pieces | $912,020.00$ | 339, 084. 02 | 572,935.98 |
| Nickel 3-cent pieces. | 905, 768. 52 | 281,400. 13 | 624, 368. 39 |
| Nickel 5-cent pieces. | 29,582, 544. 45 | 2,487, 203. 60 | 27,095,340.85 |
| Total. | 50,761,455.45 | 4,585,621. 44 | 46, 175, 834. 01 |

Minor coins to the amount of $\$ 2,912,836$ have been distributed throughout the States and Territories of the United States during the fiscal year 1907 - $\$ 1,895,364.80$ in nickel 5 -cent pieces and $\$ 1,017$,471.20 in bronze 1 -cent pieces.

The expenditure for the distribution of minor coin for the same period was $\$ 54,962.43$.

## SEIGNIORAGE.

The seigniorage on the coinage of purchased metal for the fiscal year was $\$ 5,577,528.36$, as shown by the following table:

MACHINE SHOP AND IMPROVEMENTS IN MINT MACHINERY.
In addition to the necessary repairs to machinery throughout the building there has been built and installed one multiple shear for the rolling room. Six new cutting presses are in course of construction, each of which will be capable of punching six bronze or five nickel planchets at each stroke. Four sets of new ingot molds have been made for the melting room and the material is on hand for ten additional sets. One melting furnace has been built and three more are in course of construction. All the necessary forgings and machine work on two coin riddles have been turned out and the gears and ironwork finished for one coin-inspecting machine. The furnace for burning the refuse from coiner's department having broken down, was torn out and a new one erected at a more convenient place. A great amount of electrical work in the new refinery was installed by the mint electricians.

## AUTOMATIC WEIGHING MACHINES.

The mint at Philadelphia has recently taken up the work of manufacturing automatic weighing machines for use in the coiner's department. An experimental machine was first built and thoroughly tested, and the results were satisfactory enough to warrant the building of four machines. One machine is finished and is on exhibition at the Jamestown Tercentennial Exposition. The other three machines are nearly completed and in a short time will be doing regular work in the weigh room. In designing and building these machines every precaution was taken to make them absolutely reliable, and they will weigh gold coins, which have only one-fourth grain tolerance, with the same certainty and speed as the silver coins, which have $1 \frac{1}{2}$ grains tolerance. Each machine will weigh 100 pieces per minute, and there will be such a saving in wages over hand weighing, and at the same time with more accuracy, that the coiner hopes to eliminate nearly all the hand weighing in the near future. These machines not only perform their duties well, but are objects of beauty, and reflect credit on the mechanical department and force of the mint.

In making the ordinary coin the blank is deposited in a solid ring collar, and the dies strike the piece from both sides when in that position. The pressure on the metal causes it to flow outward, and the edge of the coin receives any impression that may have been made in the collar.

On all of our coins, except the new eagle, the edge is either smooth or has straight flutes or "reeds,"" and coins with edges like either of the ones just mentioned can be readily pushed out of the solid collar. With the new eagle, which has forty-six raised stars on the edge, the conditions are different. If this coin were struck in a solid collar the coin would be locked in, and any attempt to push it out would cause the stars to be sheared off. Therefore it was necessary to make a sectional collar which would open and shut with each stroke of the press. This mechanism interferes in no way with the other movements or speed of the press and may be applied to any of our coining presses of the large size, and if the coinage is continued it will be necessary to equip the other mints with similar devices.

## HOPPER FEEDS ON UPSETTING MACHINES.

One of the mechanical operations required in the manufacture of coin is that of rolling or upsetting the edge of the blank to thicken it at its circumference. This is done by passing the blank between a revolving disk and a stationary segment, each of which has corresponding grooves so shaped that a border of the proper shape will be formed.

Until recently these machines were fed from tubes by a revolving feeder, and some of the most expert women could feed from 600 to 700 blanks per minute. During the last two years a new automatic feeding device has been attached to several of these machines. This mechanism will feed 1,000 coins per minute, and one person can easily keep two machines charged, making a gain in the output per person of 166 per cent.

ANNEALING.
All gold, silver, nickel, and copper strip annealing in this department has been dispensed with. Better percentages are obtained from cold rolling, and blistered metal is now unknown. Out of all strips two and three blanks are cut at one stroke. Double-staggered punches are now in use, and since their introduction less metal in the way of clippings is returned to the melting pot.

The percentages from the ingot rolled cold and the blanks cut therefrom with the new-style punches will be about 66 per cent. In eagles we have reached as high as 70 per cent. From the cut blanks in double eagles we get about 93 per cent and eagles as high as 97 per cent. In silver, which is not adjusted but only weighed after coinage, we get about 96 per cent of good coin. All blanks are annealed twice-once before and once after milling. All blanks are kept bright until they reach the coining press.

A machine has been devised for examining the finished coins on both sides to enable the detection of faulty or defective pieces. The
coins are automatically fed in single layers on a wide endless belt which travels slowly. Each coin as it reaches a certain point is automatically reversed and shows its opposite side for inspection.

After inspection the coins are deposited in a proper receptacle.

## SIEVING MACHINE.

This machine takes the place of the old-time riddle for drying silver, nickel, and copper blanks. Common hard-wood sawdust is used instead of basswood, which had to be specially prepared. This is much cheaper, and a large saving during the year is the result. The loss in wastage from abrasion has also been decreased about 25 per cent. This machine does its work in much less time, saves 25 per cent in wastage, etc., and, like the other machines, it was designed and built in the mint.

CUTTING PRESSES.
Six new extra heavy punching presses have been placed in the rolling room, to be used for punching coin blanks from the strip. These presses are directly connected with 3 -horsepower motors and are driven at a speed of 175 revolutions per minute. They are solidly built and are capable of punching 5 nickels at one stroke. The machines are by far the most substantial and complete of any of this type the mint has ever used. They are equipped with a double set of feed rolls for automatically feeding the strips over the die as the blanks are punched. The rolls are driven by a ratchet feed of a new design which runs silently and by means of which a feed of any length can be secured.

## NEW PLANCHET ANNEALING FURNACE.

A new planchet annealing furnace has been installed. This furnace will be used on gold exclusively, thereby avoiding the danger of getting the blanks mixed.

Visitors.
A large number of visitors from all States of the Union and from foreign countries visited the mint during the year, 95,017 having been shown through by the several guides.

## Number of Employees.

The force of employees at the end of this fiscal year shows a reduction of 37 from the number carried on the rolls at the end of the previous fiscal year.
The total number on the rolls at the close of the fiscal year was 496, distributed in the several departments as follows:

| Department. | Male. | Female. | Total. |
| :---: | :---: | :---: | :---: |
| General department. | 189 | 46 | 235 |
| Coiner's department | 100 | 60 | 160 |
| Melter and refiner's department | 69 | 1 | 70 |
| Assayer's department... | 11 |  | 11 |
| Engraver's department.. | 19 | 1 | 20 |
| Total. | 388 | 108 | 496 |

THE NUMISMATIC COLLECTION.
The numismatic collection of the mint at Philadelphia is in charge of Mr. T. L. Comparette, curator, and from his report is taken the following relative to the aims and needs of that department:
The cabinet for coins has been in existence since 1836, but is even at this time in a most unsatisfactory state due to the inadequacy of the annual appropriations to purchase coins that would improve it. The general-interest of the thousands of persons who annually visit the mint cabinet, the interest taken by students, antiquarians, and teachers, and the sincere enthusiasm of hundreds of our citizens in makinglarge collections of coins of all ages, attest sufficiently to the established approval of such an institution.
The unsatisfactory condition of this collection should be improved, but coins are rather costly objects, and to procure a collection sufficiently comprehensive for scientific work involves considerable outlay of expenditure. This is particularly true of the antique specimens which are so desirable because of their artistic excellence as well as for the light they throw on unsolved problems of history.
The numismatic material has not been wanting so much as trained men to utilize it and as the finest collections in this country are in private possession and not accessible to the public, opportunity for studying the coins themsel ves is limited to the small collections in one or two art museums. The report for 1905 contains a statement of the approximate number of coins in the various cabinets of Europe (at this time, on account of recent purchases, far below the actual figure), sharply contrasting with the lack of progress, due to inadequate appropriation, in our own numismatic collection.

Omitting reference to any investigative work in progress, a word regarding the direction in which part of the funds and a good share of the activities of the cabinet are in the near future to be employed is pertinent. The great opportunity for American numismatists appears to be in the South American coinages. On many of these coins, unattractive as they appear, is a record of fading events that acquires increased importance as some of these Nations attain greater stability of government and a place in the affairs of the West.
It is desired, while continuing to build up as rapidly as possible the collections that represent the coinages of the great culture states of all ages, to procure coins and medals of the small Republics south of us. A beginning was made some years ago when Mexican and South American coins were occasionally used here and specimens were easily obtained at small premium. The collection thus started includes nearly 3,000 pieces, but they are with few exceptions the common issues of the longer-established governments.
Many deficiences in the collection could be pointed out as well as the unsatisfactory state of the medal department, all due to the primary weakness of an insufficient purchase fund. It would seem extremely desirable that a substantial sum be annually appropriated in order to take advantage of the occasional opportunities to purchase collections of coins at reasonable prices. The Nation has seldom spent money that has proved more profitable as investment than have the small amounts allowed this cabinet for the purchase of coins. The grand total of funds thus employed does not exceed $\$ 20,000$. It would not be difficult to select from the cases a single score of coins that would at public auction bring five times that amount and the entire collection is of course worth many times the original cost. That these now costly pieces belong to the Nation rather than to individuals is due to the existence of a suitable place to preserve them and to the activities of authorities interested in bringing them together.
The most valuable pieces belong in our national coinage, to the various colonial issues, and to the production in gold of private firms in the South and West, but few foreign coins being included. The majority of them were purchased at but slight premium over their face value and many of them cost only the bullion value of the gold in them. The cabinet possesses, to mention only a few of the rare pieces, the half eagle of $1815(\$ 2,000$ ), of 1822 ( $\$ 3,000$ ), of 1819 ( $\$ 900$ ); the double eagle of 1849 ( $\$ 40,000$ ); the Brashear doubloon of 1787 ( $\$ 6,000$ ); and private coins, such as Parsons \& Co. 5-dollar piece ( $\$ 2,000$ ), Templeton Reid 10 -dollar piece ( $\$ 1,000$ ), 5 -dollar piece ( $\$ 600$ ), and many other rare pieces whose value it is difficult to state even approximately. There are of course many foreign coins, ancient and modern, of considerable value, although the majority of them are of the common and inexpensive series. The series of our own national coins is by far the nearest complete, finest, and most valuable.

We have expended annually but a small fraction of the amount that other nations have severally devoted to the same purpose, and the natural result is a collection relatively smaller, but large in proportion to its original cost.

The purchases of the past year have been limited almost solely to Greek and Roman coins, following a policy of first attention to chief deficiency; for the specimens of antique and medixval coinages were found to be insignificant, and it seemed proper in the distribution of the meager fund at command to give preference to these periods, and as coins of the former period are of greater interest to students and visitors the larger portion of the funds has been devoted to their purchase.

It has been the aim, therefore, by limiting the purchases to fine specimens that were inexpensive because abundant, to procure as soon as possible a sufticient number and variety to afford a satisfactory conspectus of the various schools, as.well as of the rise and fall of ancient medallic art.

## MINT OF THE UNITED STATES AT SAN FRANCISCO, CAL.

BULLION RECEIVED.
The weight and value of the gold and silver bullion deposited at San Francisco during the fiscal year was as follows:

Of the above amount of silver bullion, $5,200,768.73$ standard ounces of Philippine silver coin were received for recoinage for the government of the Philippine Islands and 78,171.08 standard ounces of Spanish Filipino coin were received for recoinage for the same government.
Particulars as to the source and character of the deposits appear in Tables 1 to 4 of the appendix. Details as to transfers of mutilated coin for recoinage appear in Table 7.

## MELTER AND REFINER'S DEPARTMENT.

The melter and refiner received and operated upon gold and silver bullion during the fiscal year as follows:

| Standard ounces. |  |
| :---: | :---: |
| Received from the superintendent during the fiscal year 1907, bullion containing gold. ... 5,154,546.775 |  |
|  |  |
|  |  |
|  | 5,154, 729.650 |
| Surplus recovered in gold | 182.875 |
| Received from the superintendent during the fiscal year 1907, bullion containing silver. . $20,114,421.63$ |  |
| Returned prior to settlement............................................... 18, 377, 317.16 |  |
| Returned at settlement... |  |
|  | 20,122, 316. 44 |
| Surplus recovered in silver | 7,894,81 |

|  | Melts. | Condemned. |
| :---: | :---: | :---: |
| Gold ingots. | 1,088 | 15 |
| Silver ingots. | 11,001 | 68 |
| Total. | 12,089 | 83 |

13091-H. Doc. 9, 60-1-19

## There were manufactured during the fiscal year:

$\qquad$
There were gathered in sweeps 270 barrels containing by assay:

|  | Standard ounces. ${ }_{\text {a }}^{\text {469. }}$ |  |
| :---: | :---: | :---: |
| Gold. |  |  |
| Silver |  |  |

The refinery operations were as follows:

| Gold bullion refined upon which charges were made: | Standard ounces. |
| :---: | :---: |
| Crude deposits. | 896,012.121 |
| Settlement metal | 84,428.995 |
| Silver deposits. | 3,012.047 |
| Total. | 983, 453.163 |
| Coiner's bars, etc., upon which no charges were made. | 6,874.737 |
| Net amount sent to refinery. | 990,327.900 |
| Net amount received from refinery | 990, 423.096 |
| Gain. | 95.196 |
| Silver bullion refined upon which charges were made: |  |
| Crude deposits. | 160,860.02 |
| Settlement metal | 95, 167.58 |
| Silver deposits. | 289, 183.19 |

In refining $990,327.900$ standard ounces of gold there were used 781,602 pounds of sulphuric acid, being 0.78 of a pound for each ounce of gold refined.

|  | Pounds. |
| :---: | :---: |
| Copper used during the year for the reduction of sulphates. | 37,137 |
| Bluestone manufactured, containing in copper. | 32,925 |
| Copper lost | , 212 |

The old sulphuric-acid plant is being torn down and a new electrolytic plant installed, which will be in operation about the first of the year. The surplus of silver is due in part to the recovery of metal in the tearing down of the old plant.

## COINER'S DEPARTMENT.

The coiner in his department operated upon 3,140,437.630 standard ounces of gold and $17,220,738.25$ standard ounces of silver.

He delivered during the same period $1,824,006.250$ standard ounces of gold coin, valued at $\$ 33,935,000$, and $9,538,071.12$ standard ounces of silver coin, valued at $\$ 11,098,846.39$, in standard dollars, or $\$ 11,866,962.51$ in subsidiary silver coin, aggregating $31,273,014$ pieces. Of this amount there were delivered for the government of the Philippine Islands $6,612,000$ pesos, weighing $3,760,824$ standard ounces, valued at $\$ 4,376,231.56$ in standard dollars, or $\$ 4,679,096.73$ in subsidiary silver coin. Also for the government of Mexico 6,221,000 pesos, weighing $4,444,558.88$ standard ounces, valued at $\$ 5,171$,-
850.33 in standard dollars, or $\$ 5,529,777.77$ in subsidiary silvèr coin. The following table exhibits the coiner's deliveries for the fiscal year:

|  | Pieces. | Value. |
| :---: | :---: | :---: |
| Gold: |  |  |
| 'Total. | 1,696,750 | 33,935, 000 |
| Silver: |  |  |
| Half dollars. | 2,176,154 | 1,088,077 |

## EMPLOYEES.

The total number of employees in this mint at the close of the fiscal year 1907 was 298 , distributed as follows:

## MINT OF THE UNITED STATES AT NEW ORLEANS, LA.

This mint was in operation ten and one-half months during the fiscal year 1907. The greater part of the force of employees were furloughed (without pay) during this period; only such were retained as was necessary to meet the situation. On July 1, 1906, coinage operations were suspended by reason of the exhaustion of bullion supply available for silver coinage. Operations were resumed August 14, 1906.

The assay and melting departments were in operation throughout the fiscal year and the refinery department was operated five months.

The number of employees during the fiscal year were as follows (superintendent and operative officers not included):

| Department. | 'Male. | Female. | Total. |
| :---: | :---: | :---: | :---: |
| General department. | 26 | 6 | 32 |
| Coiner's department | 19 | 34 | 53 |
| Melter and refiner's department. | 12 | ....... | 12 |
| Assay department. | 3 |  | 3 |
| Total. | 60 | 40 | 100 |

The standard weight and value of gold and silver deposited at this mint during the fiscal year was as follows:

| Metal. | Deposits. | Redeposits. | Standard ounces. | Coining value. |
| :---: | :---: | :---: | :---: | :---: |
| Gold. Silver | 657 103 | 2 | $\begin{array}{r} 46,979.547 \\ 2,675,395.370 \end{array}$ | $\begin{array}{r} 8874,038.03 \\ 3,113,187.33 \end{array}$ |
| Total. | 760 | 2 | 2,722, 374.917 | 3,987, 225.36 |

The increased coinage value of gold deposits for fiscal year 1907 as compared with year 1906 amounts to $\$ 103,201.64$.

The greater portion of all gold received came from Central America, the larger portion from Nicaragua, with prospects of continued increase, these mines being gradually developed.

MELTER AND REFINER'S DEPARTMENT.
The amount of gold and silver delivered by the superintendent to the melter and refiner during the fiscal year 1907 was as follows:

|  | Metal. | Standard ounces. | Coining value. |
| :---: | :---: | :---: | :---: |
| Gold. |  | 67, 815. 263 | \$1, 261, 679.31 |
| Silver |  | 5, 892, 165. 25 | 7,330,843. 23 |

The number of gold and silver melts made by the melter and refiner and condemned by the assayer is shown by the following table:

[^8]
## REFINERY OPERATIONS.

The weight and value of gold and silver operated upon in the refinery were as follows:

|  | Metal. | Standard ounces. | Coining value. |
| :---: | :---: | :---: | :---: |
| Gold bullion. |  | 51, 778. 463 | \$963, 320.23 |
| Silver bullion. |  | 119,225.95 | 148,337. 10 |
| Amount of go | d fr | 51, 778. 463 | 963,320. 23 |
| Silver. |  | 118, 415. 69 | 147, 320.94 |

Silver bullion on which charges were collected contained $26,826.78$ standard ounces.
Silver bullion owned by the Government on which there were no charges contained $92,649.17$ standard ounces.

## MELTS MADE DURING THE YEAR.

| Fine gold. | 34 | Silver deposits. | "103 |
| :---: | :---: | :---: | :---: |
| Fine silver | 18 | Grain bars.. | 9 |
| Mass melts. | 28 | Granulations. | 68 |
| Gold deposi | 657 | Miscellaneou | 25 |

From 47 barrels of sweeps there were obtained 52,519 ounces of gold and $3,322.51$ standard ounces of silver.

At the annual settlement of this department, held June 20, 1907, the melter and refiner turned over a surplus in gold of 94.598 standard ounces and silver 57.10 standard ounces.

## COINER'S DEPARTMENT.

During the fiscal year 1907 the coiner received and operated on $5,408,285.50$ standard ounces of silver.

He manufactured during the same period $2,822,101.86$ standard ounces of silver coin, valued at $\$ 3,631,939.80$, aggregating $15,328,699$ pieces, as shown by the following table:

SILVER.

The percentage of coin produced from the amount operated upon was, silver, 52.18 .

At the annual settlement of his accounts it was found that there had been a wastage during the year of $2,862.45$ standard ounces of silver, being 52.92 per cent of the legal allowance.

## ASSAYER'S DEPARTMENT.

The following is the assayer's report of the fineness of the silver ingot melts passed during the fiscal year 1907:

SILVER INGOTS FOR AMERIGAN COINAGE.

| Fineness. | Number of melts. | Fineness. | Number of melts. |

## MINT OF THE UNITED STATES AT DENVER, COLO.

The receipts of gold and silver during the fiscal year 1907 were as follows:

| Metal. | Deposits. | Redeposits. | Standard ounces. | Coining value. |
| :---: | :---: | :---: | :---: | :---: |
| Gold. | 4,410 | 1 | 1,221,599.206 | \$22,727, 427. 11 |
| Silver. | 2,576 | 2 | 3,229, 048. 50 | 3,757, 438.23 |
| Silver for Mexican coinage. | 1,759 |  | 2,214,506. 13 | 2,576,879.86 |
| Total. | 8,745 | 3 | ................ | 29,061, 745. 20 |

The deposits were made up of fine gold and silver bars, chlorination and cyanide product, placer clean-ups, retorts and jewelers' lots.
Domestic bullion, refined, carried $559,011.627$ standard ounces gold, of a coinage value of $\$ 10,400,216.31$, while the metallurgical plants manufacturing high-class bars below . 990 assay fineness furnished $355,929.199$ standard ounces gold, of a coinage value of $\$ 6,621,938.59$, and $4,626.05$ standard ounces silver, of a coinage value of $\$ 5,383.04$.

EMPLOYEES.
The number of employees in the mint at the close of the fiscal year was as follows:

| Department. | Men. | Women. | Total. |
| :---: | :---: | :---: | :---: |
| General department. | 63 | 3 | 66 |
| Coiner's department. | 31 | 47 | 78 |
| Melter and refiner's department | 25 |  | 25 |
| Assayer's department...... | 10 |  | 10 |
| Total. |  |  | 179 |

MELTER AND REFINER'S DEPARTMENT.
The melter and refiner received from the superintendent during. the fiscal year 1907:

SILVER ACCOUNT.

The surplus, as well as the additional amount necessary to cover actual operating losses, was recovered from unreported fractions of assays, from fractional gains in weights of deposits, and from the difference between standard and actual fineness of ingots delivered. The silver surplus includes the one ninety-ninth contained in unparted deposits, amounting to $4,216.68$ standard ounces.

The following melts were made:

|  | Melts. | - | Gold. | Silver. | Gold and silver. | Total. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Deposits. |  |  | 4,616 | . 134 |  | 4,750 |

| Total |  |  | 5,693 | 2,657 | 583 | 8,933 |

Ingot melts condemned: Gold, 3; silver, 9.

One thousand and fifty-six sacks of sweeps were gathered during the year, containing, by mint assay, 486.77 standard ounces gold and 2,413.47 standard ounces silver.

Refinery operations were confined to a period of six months only, and were as follows:

coiner's department.
During the fiscal year 1907 (and prior to settlement of March 30, 1907) the coiner received from the superintendent $1,988,332.630$ standard ounces of gold; the department operated on 1,782,774.930 standard ounces, making therefrom $\$ 21,595,000$ in coin, on which there was a wastage of 75.19 standard ounces, being 8.43 per cent of the legal allowance.

During the same period the coiner received from the superintendent $4,184,048.90$ standard ounces of silver for domestic subsidiary coin. The department operated on $4,081,616.35$ standard ounces, making therefrom $\$ 3,346,000$ in subsidiary coin, on which there was a wastage of $1,194.72$ standard ounces, being 28.94 per cent, of the legal allowance.
Since the settlement of March 30, 1907, the coiner received from the superintendent $3,945,644.11$ standard ounces of silver ingots for Mexican 50 -centavos, making therefrom $2,401,000$ pesos.

The following table shows the denomination, number of pieces, and value of the coin made:

The per cent of coin produced from the amount of ingots operated on was: Gold, 66.67 per cent; subsidiary silver, 68.42 per cent; Mexican 50 -centavos, 52.38 per cent.

## ASSAY DEPARTMENT.

The operations of this department during the fiscal year 1907 were as follows:

## Samples Operated On.

## ASSAY OFFIOE OF THE UNITED STATES AT NEW YORK.

The annual report on the business of this office for the fiscal year 1907 is as follows:

| Bullion received. | Deposits. | Redeposits. | Standard ounces. | Value. |
| :---: | :---: | :---: | :---: | :---: |
| Gold $\qquad$ Silver. $\qquad$ <br> Total. | 10,658 | 2 | 4,179, 413. 148 | \$77,756, 523. 79 |
|  | 2,611 | 53 | 4,766,648.88 | 5,546, 645.97 |
|  | 13,269 | 55 |  | 83, 303, 169.76 |

The gross weight of the bullion as above, $7,970,842.44$ ounces, shows an increase over the previous year of $397,392.68$ ounces.
The value of foreign gold bullion and coin deposited was $\$ 33,997,-$ 711.11, an increase over that of last year of $\$ 3,887,180.96$.

The value of domestic gold in above total was $\$ 43,758,812.68$, an increase as compared with 1906 of $\$ 8,925,528.18$.

The sources of domestic gold bullion deposited were as follows:
From new production in the United States and.Territories
\$5,599,965. 37
From private refineries 33,080,993. 31
From jewelers' bars, plate, etc. 4, 430, 311. 10
From jewelers' bars, plate, etc..............................................................
1,737. 60
From United States gold coin of light weight
645, 805, 30

This statement shows an increase of $\$ 9,336,336.15$ in gold deposits from the amount received last year from private refineries.

Of the silver deposits, the fine silver ( $1,314,846.10$ ounces) from private refineries shows an increase from that of last year of 556,980 ounces.
The silver in foreign unrefined and refined silver bullion ( $1,399,988$ ounces fine) shows a decrease from that of last year of 865,536 ounces fine; of the total amount received nearly all ( $1,263,083$ ounces fine) came from Mexico.

The redeposits of silver consisted of $86,517.90$ standard ounces, contained in fine bars made at this office, $683,294.43$ standard ounces fine bars from Philadelphia, and 18.80 standard ounces of unparted bars made at the Denver mint and Boise assay office.

Owing to the necessity for getting ready for the reconstruction of the refinery building, parting operations were suspended in January, and unparted bullion has since been transferred to the mint at Philadelphia for treatment.
The deductions from base silver bullion for benefit of the melter and refiner's account amounted to $2,528.95$ ounces, containing $1,980.97$ ounces of fine silver and 64.23 ounces fine gold.
The surplus bullion recovered by the melter and refiner in his operations was: Gold, 113.98 ounces fine ; silver, $6,519.78$ ounces fine.
The amount of bullion delivered to the melter and refiner during the fiscal year 1907 was:

Standard ounces.
Gold..................................................................................................... 4, 804, 903. 735
Silver
4,971, 218. 93
The amount of bullion returned by the melter and refiner to the superintendent during the same period was:

Standard ounces.

There were stamped during the year 73,759 gold bars and 23,041 silver bars. During the previous year there were stamped 51,813 gold bars and 23,437 silver bars.

| Gold bars issued to depositors of bullion for domestic u | 84,257,549.14 |
| :---: | :---: |
| Gold bars exchanged for gold coin for domestic use. | 24, 659,360. 57 |
| Total gold bars issued for use in the arts | 28,916,909.71 |

Showing an increase of $\$ 5,557,127.59$ compared with last year.
The value of gold bars exchanged for gold coin for export was $\$ 25,170,899.79$, being an increase from that of last year of $\$ 24,115,-$ 502.37.

The income from the exchange of gold bars for coin was $\$ 22,224.17$.
The force employed in this office at the close of the year comprised 69 men, embracing the superintendent, assayer, melter and refiner and 66 others, distributed as follows:

[^9]-
MELTER AND REFLNER'S DEPARTMENT.
The statement of the business of this department during the fiscal year 1907 is as follows:

The amount of bullion debited to this department was:

| Bullion. | Gross amount. | Standard gold. | Standard silver. |
| :---: | :---: | :---: | :---: |
| Settlement metal of June 30, 1906 | $\begin{aligned} & \text { Ounces. } \\ & 1,433,830.60 \end{aligned}$ | Ounces. $625,490.587$ | Ounces. $789,953.37$ |
| Gold deposits...................... | 4, 144, 841. 47 | 4,123, 450. 249 | 221, 868.46 |
| Silver deposits and purchases | 3,825,947.97 | 55, 836. 254 | 3,952, 152.90 |
| Total. | $9,404,620.04$ | 4,804,777.090 | 4,963,974. 73 |

The number of gold deposits melted was............................................................ 10,660
The number of silver deposits and purchases was.............................................................. 2,651
Tốtal................................................................................................ 13,311
The number of fine, standard, mint and unparted bars made and delivered to the superintendent was of-

containing $4,573,105.966$ ounces of standard gold and $4,826,348.68$ ounces of standard silver. Deductions on base silver bullion = $2,528.95$ ounces gross, estimated as containing 2,000 ounces of standard silver.

The amount of metal refined by acid during the year was $3,587,957.13$ ounces gross, containing $1,003,747.21$ ounces standard gold and $2,653,399.36$ ounces standard silver; included in this statement there was refined by the new electrolytic plant $858,799.01$ ounces gross, containing $546,171.07$ ounces standard gold and $364,943.96$ ounces standard silver.

The amount of silver bullion refined and upon which no charges were collected (and included in previous statement) was 599,931.65 ounces gross, containing $659,208.82$ ounces standard silver.

There was used in the refinery $1,020,293$ pounds of sulphuric acid and 20,016 pounds of reduction copper, the amount in both cases being the quantity purchased and received during the year 1907.

There was used in the electrolytic refinery 8,010 pounds of nitric acid and 7,655 pounds of muriatic acid.

There was sold $1,551,360$ pounds of waste acid and $168,351.8$ pounds of blue vitriol, and there was delivered to the superintendent 440 barrels of melter and refiner's sweeps.

There were returned in settlement June 30, 1907, in excess of the amount debited to the melter and refiner, 126.645 ounces standard gold (value $\$ 2,356.19$ ) and $7,244.20$ ounces standard silver (value $\$ 4,346.52$ ).

The following statement shows the relation between the expenses of parting and refining and the charges collected therefor:
Receipts:

| Charges collected. | \$102,708.48 |
| :---: | :---: |
| Gold surplus. | 2,356. 19 |
| Silver surplus | 4,346. 52 |
| Blue vitriol sold | 11,128. 58 |
| Waste acid sold | 775.69 |
| Old iron sold. | 358. 38 |
| Old lead sold. | 9,728. 78 |
| Platinum sold | 52, 108.81 |
| Old lead and antimony sold : | 297.09 |
| Old rubber sold. | 18. 00 |
| Total |  |

| Expenditures: |  |
| :---: | :---: |
| Labor, per pay roll. | \$48,102, 13 |
| Sulphuric acid. | 10,729.90 |
| Nitric acid... | 431. 26 |
| Reduction copper | ${ }_{3} 119.21$ |
| Fuel and steam. | 10,657.01 |
| Fluxes.. | 1,396. 35 |
| Miscellaneous | 18,084, 26 |
| Loss on sale of sweeps and leady melts. | 3,693. 03 |
| Total. | \$96,966. 15 |
| Excess of receipts over expenditures. | 86, 860. 37 |

During the year a small electrolytic plant was installed and run with very satisfactory results, producing fine gold, most of which was $999 \frac{3}{4}$ fine, and silver of a high grade that needed but very little fluxing.

## ASSAYER'S DEPARTMENT.

The work of the assay department for the fiscal year 1907 was as follows:
There were assayed 10,660 melts of gold deposits and 2,651 melts of silver deposits, a total of 13,311 melts. The fine gold and fine silver melts assayed were about 1,100 , and the fineness was stamped upon 73,759 bars of gold and 23,041 bars of silver, a total of 96,800 .

Special assays numbered 1,064 , being largely articles of jewelry and manufacturers' samples.

Assays were made on 440 barrels of sweeps and on 172 consolidated melts for shipment to the mint, with the usual incidental ones for the melter and refiner, etc. All proof gold, proof silver, and cupels used were made in this department.

## MINT OF THE UNITED STATES AT CARSON, NEV.

The deposits during the fiscal year 1907 at this mint, conducted as an assay office, were increased by 104 deposits of the value of $\$ 75,436.89$ in gold and $\$ 4,573.24$ in silver.
The operations required 2,688 assays. These included gold deposits, consolidations, bullion, and ore assays for gold, silver, copper, and lead.

The force of this office is comprised of seven men.
The following table shows the amount of deposits, earnings, and expenditures, together with the percentage of net expenses to deposits for the fiscal year:

| Item. |  | Amount. |
| :---: | :---: | :---: |
| Deposits: |  | . $882 \dot{3}, 528.23$ |
| Gold. | \$811, 415.95 |  |
| Silver (coining value) | 12,112.28 |  |
| Earnings. |  | $\begin{array}{r} 2,931.96 \\ 10,521.16 \end{array}$ |
| Expenditures. . . . . . . . . . . . . . . . . . . . . . . . |  |  |
| Percentage of net expenses to deposits, 0.09215 . |  |  |

## ASSAY OFFICE OF THE UNITED STATES AT BOISE, IDAHO.

There were received during the fiscal year 1,576 deposits of gold bullion at this office, originating in the States of Idaho, Montana, Nevada, Oregon, Utah, and Washington. No foreign coin or bullion, redeposits, or silver bullion were received for assay.

The employees of this office consist of nine men.
The volume of business, the earnings and expenditures, and the percentage of net experises to deposits are shown by the following table:

## ASSAY OFFICE OF THE UNITED STATES AT HELENA, MONT.

There were 964 deposits of gold bullion, unrefined, received at this office during the fiscal year 1907. Of these, 930 were regular deposits and 34 were small deposits of less than $\$ 50$ value in gold. The weight of the 930 regular deposits, as received from the depositors, was $156,563.26$ ounces; after melting, 154,595.73 ounces, a loss equivalent to 1.257 per cent. The average fineness of the resulting bullion was: Gold, $642 \frac{1}{2}$; silver, 297. The coinage value of the gold and silver contained in the deposits of the year was $\$ 2,112,065.06$, an average of $\$ 2,271.03$.

- The greater portion of the bullion handled was of domestic production from the States of Montana, Idaho, Washington, Nevada, California, Colorado, and Oregon, and the Territory of Alaska. Foreign bullion, unrefined, was received from British Columbia, containing $1,533.159$ standard ounces of gold and 310.64 standard ounces of silver. Jewelry, 140.748 standard ounces of gold and 32.04 standard ounces of silver. Redeposits, 731.050 standard ounces of gold and 861.25 standard ounces of silver, in bars originally made at this office. There were no deposits of mutilated or uncurrent coin of the United States during the year.

The force of employees of this office consisted of 13 men.
The following table shows the value of deposits, amount of earnings and expenditures, and the percentage of net expenses to deposits:

| Item. |  | Amount. |
| :---: | :---: | :---: |
| Deposits: |  |  |
|  |  |  |
|  |  |  |
| Earnings........................................................................ |  | \$2, ${ }_{3,524.47}$ |
| Expenditures.......................................................................... |  | 23,131.32 |
|  |  |  |

assay office of the united states at charlotte, n. c.
The character of the work at this office has not changed during the fiscal year 1907.

The total deposits numbered 232 of the value of $\$ 180,601.91$, a decrease of $\$ 51,502.24$ from last year. There were also 5 redeposits of gold. There were made 175 assays of gold and silver, 31 of copper,

6 of zinc, and 4 of lead. There were 2 special bullion assays and 2 pieces of chemical work performed. The employees are 4 men and 1 woman.

The following statement shows the amount of deposits, earnings and expenditures; also percentage of net expenses to deposits during the fiscal year 1907:

| Item. |  | Amount. |
| :---: | :---: | :---: |
| Deposits: |  | $\begin{array}{r} \$ 180,601.91 \\ 1,289.83 \\ 4,261.48 \end{array}$ |
| Gold. | \$179,207. 40 |  |
| Silver (coining value) | 1,394.51 |  |
| Earnings.. |  |  |
| Expenditures. |  |  |
| Percentage of net expenses to deposits, 1.64541. |  |  |

## ASSAY OFFICE OF THE UNITED STATES AT ST. LOUIS, MO.

The value of deposits of bullion for the fiscal year 1907 at this office aggregated $\$ 260,014.85$, showing a gain in value of deposits compared with those of 1906 of $\$ 38,494.79$.

The receipts of domestic gold bullion amounted to $10,197.792$ standard ounces of gold, and 25.33 standard ounces of silver; of jewelers' bars containing 1,553.679 standard ounces of gold and 397.32 standard ounces of silver; foreign bullion, unrefined, contained 13.045 standard ounces of gold and 4.32 standard ounces of silver; uncurrent domestic gold coin, $2,162.120$ standard ounces of gold; foreign gold coin, 22.171 standard ounces of gold.

There were assayed 196 melts of gold deposits. There were 43 special bullion assays for which a charge of $\$ 2$ each was made, and 20 ore assays were made for gold and silver for which a charge of $\$ 3$ each was imposed.

The working force of this office consists of assayer in charge and one clerk (male).

The following statement shows the amount of deposits, earnings and expenditures, also percentage of net earnings to deposits during the fiscal year 1907:

ASSAY OFFICE OF THE UNITED STATES AT DEADWOOD, S. DAK.
There were received in this office during the fiscal year 1907, 143 deposits of bullion, valued at $\$ 493,762.97$, all from the Black Hills, South Dakota.

There were no redeposits.
There were 10 button assays and 49 ore assays and 10 assays on mass melts, in addition to the 143 assays on the bullion deposited.

No mutilated or uncurrent gold or silver coins were received during the year.
The total number of employees in the assay office at the close of the fiscal year was 5 men.

The following statement shows the amount of deposits, earnings and expenditures, also the percentage of net expense to deposits, during the fiscal year 1907:

| Item, |  | Amount. |
| :---: | :---: | :---: |
| Deposits: |  | $\begin{array}{r} \$ 493,762.97 \\ 1,276.72 \\ 8,882.64 \end{array}$ |
| Gold. | \$470,150.17 |  |
| Silver (coining value) | 23,612.80 |  |
| Earnings.... |  |  |
| Expenditures..................... |  |  |
| Percentage of net expenses to deposits, 1.54040. |  |  |

ASSAY OFFICE OF THE UNITED STATES AT SEATTLE, WASH.
There were deposited during the fiscal year 1907 the following:

| Bullion received. | Number of deposits. | Number of redeposits. | Number stand-- ard ounces.. | Coining value. |
| :---: | :---: | :---: | :---: | :---: |
| Gold. Silver. | 4,195 | 2 | $\begin{gathered} 1,228,808.528 \\ 196,869.03 \end{gathered}$ | $\begin{array}{r} \$ 22,861,553.95 \\ 229,083.95 \end{array}$ |

The operations of the year netted a gain of $\$ 99.63$ in bullion, besides which there were recovered from the melting room grains $\$ 1,370.52$ in bullion, and from melting room slag (or sweeps) $\$ 1,505.58$ in bullion. The gain of $\$ 99.63$ is due to the fact that 3,006 small bars were massed into 210 large bars before being shipped to the mint, thereby giving this office the slight gain of about 0.002 of an ounce on each.
The number of employees at the end of the fiscal year was 32 men, but for six months of the year only 25 men were employed.

Of the 4,197 deposits received the entire number were deposits of gold bullion, 4,180 being crude and 17 refined. Only 1 refined bar was of domestic production, the balance coming principally from smelters and refineries of British Columbia:

The two redeposits received during the year were both originally. deposited at this office. Their weight and value are shown in the table given below.

This year's receipts are the largest in the history of the office, being $\$ 4,951,579.49$ larger than last year's and $\$ 1,383,471.61$ larger than the receipts of 1901 , the previous record year. The increased receipts of this year over last year are entirely in Alaska production, practically all the other districts showing a decrease in production. Nome

$$
\text { 1.3091-H. Doc. 9, 60-1— } 20
$$

receipts increased $\$ 3,715,924.71$, and Tanana receipts increased $\$ 1,854,903.58$, while the Yukon territory receipts are practically the same as last year.

The source of production is shown in the following table:

The receipts from the different districts of Alaska are shown in the following table:

| Locality. | Gold. |  | Silver. |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Standard ounces. | Coinage value. | Standard ounces. | Coinage value. |

Statement of Gold Deposits from Opening of the Institution on July 15, 1898, to the Close of Business June 30, 1907.

Attention is called to the inconveniences of the present assay office building at Seattle, Wash., the many changes that are necessary in order to secure safety and accuracy of work, and the consequent need of a new building. The present site of the office is entirely unsuitable, being on top of a steep hill and many blocks removed from the business district, and the building itself is too small and poorly arranged. At the present time it would be comparatively easy to find a suitable building at a reasonable figure, but in a few years these opportunities will not be found.

A comparison of the receipts of the different assay offices, together with the fact that all branches of the mint service occupy buildings owned by the Government, with the single exception of the Seattle office, would seem to indicate that this office should be equally favored.

The following table shows the amount of deposits, earnings and expenditures, together with the percentage of net expenses to deposits, in the fiscal year 1907:

SUMMARY OF OPERATIONS, WASTAGE, AND LOSS, FISCAL YEAR 1907.
The institutions of the mint service consist of the coinage mints at Philadelphia, San Francisco, New Orleans, and Denver; the mint at Carson, which at present is conducted as an assay office; the assay office at New York, which, like each of the coinage mints, operates a refinery, and the minor assay offices at Boise, Helena, Charlotte, St. Louis, Deadwood, and Seattle. Bullion is received at the assay offices on the same terms as at the mints, except that an additional charge of one-eighth of 1 per cent is made at the former. Bullion purchased at the assay offices becomes the property of the Government and is shipped to the mints at the expense of the Government.

## operations.

The quantity of precious metals operated upon in the different departments of the mints and assay office at New York during the fiscal year 1907 aggregated $22,842,430.255$ standard ounces of gold and $81,467,376.13$ standard ounces of silver.

The figures in the table following are the actual figures as obtained at the settlement of the accounts of the officers in charge, those at the New Orleans mint being closed on June 20, while those at the Denver mint were closed March 30, 1907, and the other institutions on June 30, 1907. The figures in the article showing the operations of each mint or assay office are for the entire fiscal year up to June 30 .

GOLD.

$a$ Settlement June 20, 1907. b Denver mint operations, nine months, July 1, 1906, to Mareh 31, 1907.

## INGOTS MADE AND COIN PRODUCED.

The melts of gold and silver made for ingots, number condemned, and the percentage of finished coin produced from ingots operated upon; as follows:

| Coinage mints. | Gold. |  |  | Silver. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Melts of gold ingots. |  | Percentage of finished coin produced from ingots operated upon. | Melts of silver ingots. |  | Percentage of finished coin produced from ingots operated upon. |
|  | Made. | Condemned. |  | Made. | Condemned. |  |
| Philadelphia.. | 549 | 2 | 57.56 | 2,725 | 2 | 56.84 |
| San Francisco. | 1,088 | 15 | 58.03 | 11,001 | -68 | 50.63 |
| New Orleans. |  |  |  | 700 | 6 | - 52.18 |
| Denver | 312 | 2 | 66.67 | 1,088 | 8 | 68.42 |
| Total. | 1,949 | 19 |  | 15,520 | 84 | ...... |

## WAStage and loss on sale of sweeps.

The value of the precious metals wasted in the metallurgical and mechanical departments was $\$ 28,636.68$. A loss of $\$ 8,926.52$ occurred from the difference between the assay value of the bullion contained in sweeps sold and the amount received for the same, as follows:

| Items. | Mint at- |  |  |  | Assay office at New York. | Total. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Philadelphia. | San Francisco. | New Orleans. | Denver. |  |  |
| Melter and refiner's gold wastage. | 817,960.61 |  |  |  |  | 817,960.61 |
| Coiner's gold wastage. . . . . . . . . . | 1,360. 56 |  |  | \$1,398. 88 |  | 2,759.44 |
| Coiner's silver wastage | 751.41 | \$4, 703. 77 | \$1, 717.47 | 743.98 |  | 7,916.63 |
| Loss on sale of sweeps. | 1,769.35 | 1,526. 55 |  | 1,910. 34 | 83,720. 28 | 8,926. 52 |
| Total. | 21,841.93 | 6, 230.32 | 1,717.47 | 4,053. 20 | 3,720. 28 | 37,563.20 |
| Paid as follows: |  |  |  |  | - |  |
| Froun contingent appropriation. | 6,074. 78 | 6,230.32 | 1,717.47 | 2,985.07 |  | 17,007.64 |
| From parting and refining appropriation. | 15,767. 15 |  |  | 1,068. 13 | 3, 720.28 | 20,555. 56 |
| Total. | 21,841.93 | 6,230. 32 | 1,717.47 | 4, 053. 20 | 3,720. 28 | 37,563.20 |

The wastage and losses aggregated $\$ 37,563.20$. Against these losses there were gains arising from the operations in bullion, as follows:

Deducting the incidental gains on bullion from the value of the total operative wastage and loss on sale of sweeps, there has been a net gain in the operations of the mints during the fiscal year of \$31,874.89.

## RECEIPTS AND DISPOSITION OF GOLD BULLION FISCAL YEAR 1907.

RECEIPTS.
The receipts of gold bullion at the mints and assay offices aggregated $\$ 241,699,505.72$, as shown by the following table:

| Institution. | Deposited. |  | Surplus bullion recovered. | Redeposited. |  | Total. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Deposits. | Uncurrent Unjted States coin transferred for recoinage. |  | Receipts from assay offices. | Government bars. |  |
| Philadelphia. | \$1,808,991. 24 | \$1,738, 626. 46 | a \$8644. 44 | \$20,314,093. 58 | \$30,326, 379.93 | \$54, 188,735. 65 |
| San Francisco | 44, 135, 152.72 | 38;102. 59 | 3,509. 21 | 14, 456, 528.60 |  | 58,633,293. 12 |
| New Orleans. | 872,070.63 |  | b1,967. 40 |  |  | 874,038.03 |
| Denver. | 22,556, 828.89 | 157,880.00 | 12,325.75 |  | 392.47 | 22,727, 427.11 |

| Total. | 7,761 | 27,880,943.95 | 48, 568. 75 | 109,468. 54 | ............. |

The express charges upon bullion shipped from the minor offices to the mints and upon coin from the mints to the assay offices during the year amounted to $\$ 76,286.44$.

## MONETARY LEGISLATION.

[Public-No. 248.]
Chap. 2913.-An act to amend the national banking act, and for other purposes.
Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section six of an act
to define and fix the standard of value, to maintain the parity of all forms of money issued or coined by the United States, to refund the public debt, and for other purposes, approved March fourteenth, nineteen hundred, be, and the same is hereby, amended to read as follows:
"Sce. 6. That the Secretary of the Treasury is hereby authorized and directed to receive deposits of gold coin with the Treasurer, or any assistant treasurer of the United States in sums of not less than twenty dollars; and to issue gold certificates therefor in denominations of not less than ten dollars, and the coin so deposited shall be retained in the Treasury and held for the payment of such certificates on demand, and used for no other purpose. Such certificates shall be receivable for customs, taxes, and all public dues, and when so received may be reissued, and when held by aliy national banking association may be counted is a part of its lawful reserve: Provided, That whenever and so long as the gold coin and bullion hald in the reserve fund in the Treasury for the redemption of United States notes and Treasury notes shall fall and remain below one hundred million dollars the authority to issue certificates as herein provided shall be suspended: And provided further, That whenever and so long as the aggregate amount of United States notes and silver certificates in the general fund of the Treasury shall exceed sixty million dollars the Secretary of the Treasury may, in his discretion, suspend the issue of the certificates herein provided for: And provided further, That of the amount of such outstanding certificates one-fourth at least shall be in denominations of fifty dollars or less: And provided further, That the Secretary of the Treasury may, in his discretion, issue such certificates in denominations of ten thousand dollars, payable to order. And section fifty-one hundred and ninety-three of the Revised Statutes of the United States is hereby repealed."
Sec. 2. That whenever and so long as the outstanding silver certificates of the denominations of one dollar, two dollars, and five dollars, issued under the provisions of section seven of an act entitled "An act to define and fix the standard of value, to maintain the parity of all forms of money issued or coined by the United States, to refund the public debt, and for other purposes," approved March fourteenth, nineteen hundred, shall be, in the opinion of the Secretary of the Treasury, insufficient to meet the public demand therefor, he is hereby authorized to issue United States notes of the denominations of one dollar, two dollars, and five dollars, and upon the issue of United States notes of such denominations an equal amount of United States notes of higher denominations shall be retired and canceled: Provided, however, That the aggregate amount of United States notes at any time outstanding shall remain as at present fixed by law: And provided further, That nothing in this act shall be construed as affecting the right of any national bank to issue one-third in amount of its circulating notes of the denomination of five dollars, as now provided by law.
SEc. 3. That section fifty-one hundred and fifty-three of the Revised Statutes be amended to read as follows:

Currency act vol. 31, p. 47.

Gold certificates issued for deposits of gold coin.
Denominations reduced, vol. 31, p. 47, amended.

Provisos.

## REVISION OF COIN STOCK ESTIMATE.

For a number of years the Treasury Department estimates of the stock of gold in the country have been questioned by competent students who have believed them to be too high. The amounts reported to be in the Treasury and in national banks are not disputed, but the large residue assumed to be in other banks and in circulation has been considered a doubtful quantity.

For example, the estimate for June 30, 1906, was as follows:

The report of the Comptroller of the Currency for 1906 shows that State and other banks, not in the national system, reported to him as holding on that date a total of $\$ 54,397,279$ in gold coin, and $\$ 14,616,500$ in gold clearing-house certificates; together, $\$ 69,013,779$. Such banks also reported $\$ 81,571,680$ in "cash" unclassified, and $\$ 7,027$,629 in "specie." Allowing for a reasonable proportion of gold in these holdings and something for gold in private banks notresponding to the the Comptroller's inquiry, he having no official jurisdiction over them, $\$ 100,000,000$ is perhaps a fair estimate for gold coin in banks other than national.

The laws of the State of California have required that moneys belonging to the State, county, and municipal governments be kept in the immediate custody of the treasurers, and this is construed to mean that the cash must be in the vaults of these treasuries instead of on deposit in banks. The aggregate amount of gold coin so held in the State of California on the first Monday in July, 1906, was $\$ 20,151,409$. These are the only large holdings of gold of which definite knowledge is had.

The total therefore of gold which may be said to have been "in sight" in the United States on June 30, 1906, was $\$ 1,112,201,825$, leaving $\$ 360,793,384$, according to the official calculation, outside of all banks and public treasuries. For this last item it is evident that there can be no exact figures. The sum total of the gold stock is arrived at by the method describied below, and after the sums known to be in the United States Treasury and national banks are deducted the remainder is put down to other banks and in circulation. If, however, the amount of gold in all the national banks is. less than $\$ 200,000,000$ it seems extremely improbable, in view of the known disinclination of our people to use gold coin in trade, that the amount of gold in private hands amounts to $\$ 360,000,000$. For this reason the Director of the Mint during the last nine years has devoted considerable effort to an investigation of the subject, the results of which are set forth below.

The Treasury estimate dates from June 30, 1873, when Dr. Henry R. Linderman, Director of the Mint, estimated the total stock of the country at $\$ 135,000 ; 000$. The conditions then were favorable to a close estimate. The country was on a paper basis, and the stock of gold comparatively small. Doctor Linderman in framing his estimate said that he had taken the amounts in the Treasury and national banks and added an allowance of $\$ 20,000,000$ for the amount in circulation on the

Pacific coast and $\$ 10,000,000$ for the holdings of the public in other parts of the country.
Since 1873 the coinage of the mints and the imports of United States coin have been regularly added and the exports of United States coin and an allowance for the amount consumed industrially have been regularly deducted. By this method the estimate had been built up from year to year to the totals used.

The possible sources of error, as these estimates are carried along, are three, to-wit:

First. Errors in custom-house returns of coin imports and exports.
Second. Errors in estimating the industrial consumption.
Third. The unrecorded movement of coin in and out of the country in the immediate possession of travelers.
It is evident that if errors under these heads should be cumulative they would become important in a long term of years, even though inconsiderable in any single year. Whatever errors occurred would affect the amount assigned to "other banks and in circulation," the sums in the Treasury and national banks being definite and official.

Among the best informed of the critics who have contended that the Treasury estimates were too high has been Mr. Maurice L. Muhleman, for many years an official of the Treasury Department. He has several times reviewed the estimates and pointed out errors in them. (Report Treasurer of United States, 1885; Political Science Quarterly, March, 1901.)

> JRRROR JN ORIGTNAJ ESTIMATE.

The first error to be noted is one discovered by Mr. Muhleman in Doctor Linderman's original estimate of the stock in the country on June 30, 1873. The latter had counted the gold in the Treasury and national banks at $\$ 105,000,000$. The stock of gold actually in the Treasury on that date, however, after various "coin items" are eliminated, was only $\$ 71,188,548$; the stock of "specie" in national banks at the nearest statement thereto was $\$ 4,818,086$. The latter included some silver coin. The nearest date for which the stock of silver coin in banks is obtainable is June 30, 1876, when it was $\$ 1,472,507$. It seems probable that there was silver coin to the amount of $\$ 1,000,000$ in the banks on June 30, 1873, which would make their gold holdings $\$ 3,818,086$. With this revision, but accepting Doctor Linderman's estimate for the amounts in circulation, an analysis of the stock of gold in the United States on June 30, 1873, would be as follows:

| Coim in Treasury... | $\begin{array}{r} \$ 55,518,567 \\ 15,669,981 \end{array}$ |
| :---: | :---: |
| Total in T'reasury. | 71,188, 548 |
| Estimate for Pacific coas | 20,000,000 |
| Estimate in circulation. | 10,000,000 |
| In national banks. | 3,818,086 |
| Total. | 105, 006, 634 |

These figures for gold in Treasury are the result of a search of old records and elimination of all certificates and other gold and specie items carried as gold.

## ERRORS IN IMPORTS AND EXPORTS.

There being no duty upon gold bullion or coin, it naturally follows that customs officials are not as particular to verify the accuracy of declarations as they would otherwise be. If a shipment of gold bullion or foreign gold coin should be accidentally entered at a customhouse as United States coin, it would be taken up in the statistics as an addition to the stock, but the same shipment would probably go directly to some office of the mint service, and, after coinage, be added to the stock again, thus effecting a duplication. Having occasion to suspect that this had actually occurred, clerks were set at work to trace the entries at the New York custom-house and compare them with the entries of foreign coin and bullion at the United States assay office in New York City.

The most important errors of this character prior to 1880 occurred in' the fiscal year ended June 30, 1877. The figures reported this year by the Bureau of Statistics and used in computing the stock are greatly in excess of the imports recorded at the New York customhouse. Moreover, the custom-house records for the month of December, 1876, show imports of United States assay office bars to the amount of $\$ 4,440,840$, while the Bureau of Statistics reports no United States bars during the year, and only $\$ 1,146,869$ for all bullion imports. Evidently the Bureau of Statistics included the United States bars as United States coin. A reduction of $\$ 4,440,840$ is therefore made in coin imports of that year. Altogether an allowance of $\$ 35,000,000$ is made for errors prior to 1880 ; this is including the original error in Treasury stock June 30, 1873.

From January 1, 1880, down to January 1, 1905, a search of the custom-house records revealed errors aggregating \$23,404,710, reducing the figures for United States coin imported as follows, by years:

|  | Year. | Old figures. | Deductions. | New figures. |
| :---: | :---: | :---: | :---: | :---: |
| $1880^{\circ}$ |  | 87,687,011 | \$792,761 | \$6, 894, 250 |
| 1881. |  | 4,129, 289 | 1, 315, 654 | 2, 813,635 |
| 1882. |  | 6, 179, 721 | 471, 276 | 5,708, 445 |
| 1883. |  | 5, 182, 517 | 1,267,692 | 3,914,825 |
| 1884. |  | 4,247, 133 | 1,061, 490 | 3,185, 643 |
| 1885. |  | 2, 305, 934 | 263, 999 | 2,041, 935 |
| 1880. |  | 5, 486, 007 | 2,942, 459 | 2,543, 548 |
| 1887. |  | 5,712, 616 | 2, 546, 375 | 3,166, 241 |
| 1888. |  | 1, 169, 326 | 193,004 | 976, 322 |
| 1889. |  | 1,936, 700 | 88,987 | 1,847, 713 |
| 1890. |  | 2,914, 557 | - 206,050 | 2,708, 501 |
| 1891. |  | 15, 164, 563 | 1,522,598 | 13,641,965 |
| 1892. |  | 2, 338, 097 | 374,152 | 1,963,945 |
| 1893. |  | 34,621, 674 | 2,365, 277 | 32,256,397 |
| 1894. |  | 3,682, 495 | 268,567 | 3, 413, 928 |
| 1895. |  | 8, 939, 064 | $\cdot 1,370,215$ | 7,568,849 |
| 1896. |  | 65, 711, 098 | 2,770, 191 | 62,940,907 |
| 1897. |  | 9,200, 492 | 240, 407 | 8,960,085 |
| 1898. |  | 38, 176, 304 | 3,091;037 | 35, 085, 267 |
| 1899. |  | 7,615, 353 | 15,010 | 7,600, 343 |
| 1900. |  | 5, 110, 290 | 59, 022 | 5,051, 268 |
| 1901. |  | 4,366, 412 | 148,515 | 4,217,897 |
| 1902. |  | 1,630, 368 | 20,028 | 1,610, 340 |
| 1903. |  | 3,755, 856 | 9,938 | 3,745, 918 |
| 1904. |  | 3,584,948 |  | 3,584,948 |
|  |  | 250, 847, 825 | 23, 404, 710 | 227, 443, 115 |

It was, however, utterly impossible at this late day to trace all the shipments entered as United States coin. According to the records the total for these years totaled $\$ 250,847,825$. Allowing for
errors not traced in the New York imports and for errors at other ports of entry, it is believed that $\$ 30,000,000$ is a proper deduction to make for errors in the classification of imports at custom-houses other than those on the Canadian frontier. The movement between the United States and Canada is treated by itself.

## THE CANADIAN MOVEMENT.

The custom-house records of the movement of United States coin between this country and Canada are unquestionably very incomplete. They do not agree with the Canadian records, and the net exports during the years under review are undoubtedly much larger than the official figures indicate. The net exports, according to the customhouse records, since 1880 , have been about $\$ 19,000,000$, but the stock of United States gold coin in the Dominion treasury and in the chartered banks has increased in the same time by between $\$ 36,000,000$ and $\$ 40,000,000$. There had been a considerable use of gold coin by manufacturing jewelers during that time, and doubtless some increase in the amount of gold coin in circulation and in private hands. It should be remembered in this connection that Canada up to this time has had no gold coin of its own, and that United States gold coin, as well as English gold coin, is a legal tender for debts there. It is considered that $\$ 25,000,000$ is a fair estimate to make of the loss of gold coin to Canada over and above the record figures.

The holdings of United States gold coin in the Dominion treasury as a reserve for Dominion treasury notes have been as follows on the dates named:

The chartered banks held on December 31, 1906, $\$ 12,874,005.50$ of United States gold coin as a reserve against their circulating notes. We have not been able to get these figures except for very recent years, but the total specie holdings of the chartered banks on June 30, 1873, was $\$ 6,829,226$. This includes silver as well as gold, and English as well as United States coins. In recent years United States coin has formed about one-half of the total.

## Coin carried by travelers.

It has been assumed in the past that coin carried out of this country by travelers was brought back in the same manner, but it is certain that some is not. While travelers leaving this country usually take drafts or letters of credit, inquiries abroad show that United States
gold coin is carried in small quantities, probably less amounts latterly than in earlier years. This money is gathered up by money changers and bankers, and eventually finds its way to the central banking institutions, or is sold to jewelers and melted. It has been considered proper to make an allowance of $\$ 20,000,000$ for the amount thus carried away from 1873 to 1906.

Reference is here made to letters from steamship agents, tourists' agencies, United States consular officers, and foreign bankers, appearing in the reports of this Bureau for the year 1900.

As it has been sometimes said that steerage passengers to Europe carried large sums of money with them, of which no record was made at the custom-house, a special inquiry was made on behalf of this Bureau, through a competent and interested agent, as to the facts in this respect in the case of Italian laborers returning to Italy from New York. This agent.interviewed the most important Italian bankers doing business in New York City, and submitted the following report, addressed to the Director of the Mint, from which all names have been eliminated:

In reply to your direct questions, there was practically a consensus of opinion, first, that the returning lalian immigrants sometimes carry important amounts of money with them, occasionally as high as $\$ 3,000$ or $\$ 4,000$, but the average amount they take with them does not exceed $\$ 200$. This is almost entirely Italian drafts, or bank notes, with occasionally enough United States coin and bank notes for their traveling expenses there and return, in order to save the cost of exchange. No immigrants returuing to Italy carry important aniounts of gold, with the possible exception of the Genoese and some North Italians returning from the Yukon gold fields. These form a small proportion of the total number returning, not more than 5 per cent, said one banker, and some of the bankers disputed this, saying that they, too, had their gold exchanged for drafts or Italian bank notes before leaving New York. I assume that you wish to know only about the habits of the Italian immigrant or laborer. Merchants and the more intelligent class, who carry large sums of money, of course, do it entirely by drafts, letters of credit, etc. Every year, mostly in October, November, and December, large numbers of the laborers return home for the winter months. Four-fifths of them return to America in the spring, so the bankers claim, and the average amounts they take with them does not exceed $\$ 200$.
These bankers all agreed that the Italians you saw at Ellis Island with United States paper money were the exception, and probably had been sent this money in $\$ 10$ and $\$ 20$ bills by relatives in America to pay their expenses over, or they were immigrants returning to America with some of the money they had taken with them for traveling expenses, or some may have had their Italian money exchanged at the piers just before sailing by some small money dealers. The big banking houses do not encourage this among the immigrants, as it is to their advantage to sell them drafts on their branches here instead.
Second, all of the important houses in New York have branches at the important sailing ports in Italy, especially Naples, but they never ship consignments of United States money to them for the purpose of supplying passengers bound for America. That is an unknown practice. What little they need for this purpose is bought from returning passengers from the United States or from American tourists and travelers in Italy and the stores and banks doing business with them; but this is a very small proportion to the total amount of money brought.over by the immigrants. The bulk of the business is done by drafts from a banking house to its branch in this country (especially the Bank of Naples), through bills of exchange, etc., as you know.
As to the third question, they said that the Italian immigrants bring very, very little American gold with them-a "slim amount," as the banker put it-and that the amount of gold carried out of this country, though small in comparison with the total amount of money taken, and not the usual custom, far exceeded the amount brought in by them.
This, I think, in substance, answers your questions. I can write quite definitely, because all these gentlemen seemed to agree on the main points.
He gave me the last two reports of the "Banca di Napoli," which you may find of interest, though they do not bear directly on the subject.

These bankers all received me with the greatest courtesy and kindness, and seemed willing to give me all the information in their power. Beside the direct answers to your questions, which I have tried to give you as definitely and clearly as possible, I obtained much subsidiary information from them, which was very interesting to me, and I think I will add the substance of it, which may be already familiar to you, but if'not, it will be of value and interest as coming first hand from the Italian bankers themselves:
I. "Do immigrants returning carry important amounts of cash with them, and does any of this cash consist of United States coin, especially gold?"

Mr. - said that immigrants returning do not carry coin with them to any large amount; that they obtained drafts from the Italian bankers here, or had their American money exchanged into Italian bank notes, or occasionally some Italian gold, before leaving America. The reason for this, I learned later, was probably the lower rate of exchange here, and also because the Italian bankers here who have their confidence urge them to do so (as it is to the bankers' advantage to make the exchange or sell drafts themselves). Mr. -_ said that a very "slim" number take American gold in any appreciable amount, and his reason for their doing it at all is that the more intelligent ones know they can sell it in Italy at a premium. But most of them dislike the burdensome weight of gold and are afraid of losing it.or having it stolen. Among the large number returning to Italy in the fall months are likely to be a few who take gold with them. Mr. __ has never known in twenty-two years' experience, of more than $\$ 1,000$ being taken in gold by any one person, and that is very rare. The other bankers did not seem to know of any such amount being taken. Mr. __ roughly placed the proportion at one-tenth American or Italian gold to nine-tenths of amount taken in Italian drafts and bank notes. Mr. - and others put the proportion much lower than this.

From what they told me I would thus summarize:

1. The three ways of taking money out of this country by immigrants returning to Italy, in the order of their importance and frequency, are:
(1) Drafts on Bank of Italy or on branches in Italy of Italian banking houses located in America.
(2) Italian notes and currency obtained here.
(3) Small amounts of American currency, mostly gold, for traveling expenses, as souvenirs to friends in Italy, or to be sold at a premium in Italy.
2. The three ways of bringing money into this country, in the order of importance and frequency, are much the same:
(1) Drafts by Bank of Naples on its branches here or by other Italian banks or branches on their banks here.
(2) Italian bank notes and gold, sometimes French gold.
(3) American bank notes sent by relatives in America to bring them over, or occasionally with small amount of gold obtained from small dealers at sailing ports.

Mr. - told me: "Italians take comparatively little gold coin, mostly Italian bank notes or gold or drafts, but they do carry in all considerable amounts of cash." But this bank deals with a more prosperous class, I think, than do the smaller banks in the Italian quarters.

Mr. - told me of one Italian who carried back $\$ 800$ last week, who refused drafts, but took Italian bank notes entirely. He said he was one in a thousand to do that.

Mr. - and one or two others did not believe that 1 per cent of Italians returning carried gold of any considerable amount; others said that perhaps half of them took a very little with them-mostly to be saved for traveling expenses back; but all agreed that the amount was very small.
II. "Do the money dealers at the sailing ports in Italy obtain their United States money from returning passengers, or do they have consignments of United States money shipped to them?"

Italian dealers do not have consignments of American gold or notes or currency shipped to them from their American houses. All the American money they need can be obtained from American tourists and a few returning immigrants having it and willing to sell it. Little exchange of money is made in Italy, anyway; they bring it here to be exchanged, as the rate is lower.

On the contrary, Italian bankers here are obliged to import large amounts of Italian bank notes and gold to supply the demand of those wishing to have their American money exchanged here before sailing for Italy. The banking firm of import millions of lire for exchange every year; and Mr. — told me he imported over $3,000,000$ lire last year for his own business, but did not ship in Italian notes one dollar to It taly in American gold or bank notes,

Ninety-five per cent of immigrants coming to this country bring Italian money or drafts with them. The Bank of Naples probably does the largest business in drafte. They have agents at all the sailing ports.

The reason why no consignments of United States money are shipped to Italy is that it can not be shipped as cheaply as United States gold and bank notes can be picked up from tourists, etc., over there, said three separate bankers. But they do ship back to America United States bank notes, but no gold coin, because of its weight and the demand for it by Italian jewelers.
Mr. _corroborated Mr. -_'s statement that the Bank of Naples covers, dollar for dollar, the drafts which are brought by the immigrants. This American money is bought up from the tourists, etc., and the exchanges and is shipped here, in lots of from $\$ 20,000$ to $\$ 30,000$ each, to the amount of $\$ 1,140,000$ last year, which was the value of the drafts. I am sure I did not misunderstand this, for I took it down very carefully. Probably you are familiar with this system. These shipments are of United States bank notes entirely, because of the reasons I have already given.
III. "Does the amount of United States gold coin carried out of the country in the immediate possession of passengers exceed the amount brought to this country in the same manner?"

It is difficult to answer this, as the Italians are so secretive and suspicious, and often will not tell even the bankers the amount of money they take with them or bring with them. They often get it exchanged in small amounts and at different times. It was Mr. - who said, in his opinion, about half the immigrants returning to Italy took enough American money, including, perhaps, some gold, to cover their traveling expenses (which are very little in the steerage) in order to avoid the cost of exchange, but that not 5 per cent of the returning immigrants to Italy carry gold to Italy. There are Genoese and north Italian laborers from the Yukon gold fields, who are accustomed to carry gold with them and do not mind the weight and are not afraid of losing it. Mr. __ said there was also an historical reason for the Genoese carrying gold: For centuries Genoa was one of the most important money markets in the world and dealt constantly in gold and silver, hence the habit of carrying gold is very general for people from that locality. Mr. - denied that the Genoese carried gold; said they had it exchanged for Italian bank notes or drafts like everyone else. Perhaps each was right for the men he had happened to deal with. All agreed that there was more American gold leaving this country than was brought over, though the amount was not large either way, and that the American gold that was taken over remained almost entirely in Italy. Italian jewelers are glad to buy it, because of its purity, to be used in making jewelry. All of the bankers spoke of that. Hence, the amount returned to this country is very, very small.
IV. Some general notes.-There are about 3,000 Italian bankers in America and perhaps 300 in New York City.

I wrote you there were 3,000 in New York City. Mr. __ says the exact number in this city can not be determined, as many saloons and cafés do a simple banking business of cashing drafts and exchanging money, and because they do this they hang out a sign "Banca Italiana." . There are not more than 20 Italian bankers here of standing. All of the bankers I interviewed had been in business in New York from twenty to twenty-five years, and were all established houses. They really do an enormous business; it would be interesting to know the amount. But, as you know, their largest business is due to the money regularly sent to relatives in Italy in amounts of usually $\$ 10$ or $\$ 20$ a month by Italians in America. The Commercial National Bank of Chicago (1903) estimated that "Italians living abroad make remittances of money to their relatives or to savings banks in Italy amounting in the aggregate to $150,000,000$ lires ( $\$ 30,000,000$ ) per year."

Mr. -, the head of the foreign department of the Bank of Naples; estimated that last year about $50,000,000$ lires ( $\$ 10,000,000$ ) in Italian bank notes and drafts was taken from America to Italy by returning immigrants (1904) and $\$ 2,400,000$ in American bank notes and American gold coin. He claimed that the gold would not equal more than one-fiftieth of the $\$ 2,400,000$, or $\$ 48,000$. He based his estimate on the fact that in 1904 the Bank of Italy alone bought $\$ 800,000$ of American money in Italy, and they buy about one-third of all the American money that comes to Italy.
This gold ( $\$ 48,000$ ) is mostly sold to jewelers or kept in reserve at the banks, and is not shipped back here because of its weight.
Mr. - also made this interesting (to me) statement-it probably is familiar to you: "Outside of jewelers, American gold is worth less than American bank notes in Italy, because of the expense of shipping it back to America." As an example of this, he said: "A party going to the Bank of Naples with an American $\$ 20$ bill gets 103.20 francs; if he had a $\$ 20$ gold piece he would only receive 102.50 francs." (The exact amount, of course, fluctuates with the rate of exchange.)

## MONEY BROUGHT IN BY IMMIGRANTS.

In order to determine whether important amounts of United States gold coin were brought back to this country by immigrants, inquiries upon the subject were addressed to the Commissioner-General, Mr. Sargent, and through him to the commissioner of immigration at Ellis Island, New York City. Both of these gentlemen extended every courtesy in their power, but, although the results are interesting and of value as showing that important amounts of our gold coin are thus returned to the country, they are necessarily quite indefinite.

The following letters explain themselves:

Mint Service,<br>Office of Superintendent Unired States Assay Office, New York, N. Y., June 12, 1903.

Hon. Geo. E. Roberts, Director of the Mint, Washington, D. C.
SIR: In response to your letter of 5th instant, the following statement is respectfully submitted:

1. The immigrants still bring considerable sums of foreign coin with them. Messrs. Post \& Flagg, 38 Wall street, who succeeded Mr. Scully at the immigrant station on Ellis Island, report that they have received $\$ 1,387,000$ in foreign money from January 1 to June 5, 1903. They estimate that $\$ 113,000$ additional was brought in without coming to them. Of the $\$ 1,387,000$, the amount of foreign gold coin was $\$ 412,000$ (about 30 per cent). Of the balance, 65 per cent was in notes, 3 per cent in silver, and 2 per cent in minor coin. This proportion may be considered as applicable to all the recent receipts. This foreign gold coin is sold to outgoing passengers, sent to foreign countries (including Canada), or deposited in United States minting institutions.
2. Returning immigrants do not take any considerable amount of United States coin with them. The Italians take, largely, Italian bank notes and drafts.

Messrs. Bolognosi, Hartfield \& Co., 29 Wall street, act for Messrs. Post \& Flagg in disposing of the money received from immigrants.

Respectfully, yours,
And. Mason, Superintendent.
June 23, 1903.

## Commissioner-General of Immigratton;

Washington, D. C.
Sir: I reply herewith to the best of my ability to the points raised by the annexed letter of the Director of the Mint:

1. No record is kept of the amount of United States coin which is shown by immigrants at Ellis Island. Our official figures in relation to the amount of money brought here by the immigrants include bills, coin, letters of credit, and drafts.
2. It is impossible to state with any accuracy what proportion of the coin exhibited by immigrants is United States coin, and what proportion is foreign coin. This is a matter concerning which no one man has knowledge, because the immigrants pass along fourteen lines. I have caused to be put to the inspectors on these lines the following questions: "About what proportion of the funds exhibited by immigrants is coin and what'proportion is in form other than coin?" The average of the replies shows that 39 per cent is coin. In a similar manner I learn that a great majority of the coin shown by immigrants is foreign coin, and that only about 19 per cent of the total coin shown is United States coin. Assuming that about $\$ 10,000,000$ be shown in one year (as was the case last year), it would follow upon the basis of the above computation that about, $\$ 3,200,000$ thereof was in foreign coin.
3. Messrs. Post \& Flagg have no information as to the amount of United States coin brought by immigrants. They exchanged during the period between July l, 1902, and June 16, 1903, about $\$ 2,324,000$ worth of foreign money, and they estimate that about 25 per cent of this amount was in coin. By far the greater proportion of such foreign coin is gold.
4. Messrs. Post \& Flagg estimate that the number of people from whom they receive foreign coin is about one-third of those who exchange money at their counter at Ellis Island. They also estimate that since July 1, 1902, about 180,000 immigrants so exchanged their money.
13091-Н. Dос. 9, 60-1-21
5. A small amount of the gold coin purchases at Ellis Island by Messrs. Post \& Flagg finds its way to the assay office, a considerable amount is shipped to foreign countries, but probably at least one-half is sold to outgoing travelers.
6. A considerable proportion of the immigrants do exchange their money abroad for money of the United States instead of waiting until they arrive at this side. This is particularly true of those coming by the North German Lloyd steamers from Bremen. They exchange their money to a large extent at Missler's office in Bremen. Of the Italian immigrants, one-half bring their money in the shape of drafts on Conti's banking house, New York City.

Respectfully,
Wm. Williams, Commissioner.
$\longrightarrow$

> Department of Commerce and Labor,
> Immigration Service, New York, N. Y., June 15, 1905.

Hon. George E. Roberts,
Director of the Mint, Treasury Department, Washington, D. C.
Dear Mr. Roberts: Reverting to my letter of the 2 d instant, I have to advise you, after careful investigation of the matter, that the returns made by this office concerning the amounts of money brought from foreign ports are all made to the Census Bureau through the commissioner-general, and our statistician informs me that, whereas formerly the sums brought by the first-cabin, second-cabin, and third-class passengers were kept separately, they are now reported in bulk, which makes it somewhat difficult for me to give you the specific information that I had hoped to be able to furnish.

It is not possible for me to indicate how much of the money brought is United States coin or currency, but, with a view to enabling you to form some sort of approximate idea, I give you the following figures furnished me at my request by the official moneyexchange manager at this station. This is for the fiscal year ended June 30, 1904: Gold, $\$ 747,250$; paper, $\$ 1,043,825$. The total amount of money brought during the same period of time is over $\$ 17,000,000$, which leaves some $\$ 15,000,000$ to be accounted for.
With a view to giving you some further idea as to how this discrepancy may be. accounted for, I have caused an abstract to be made from our manifests for the month of March, 1904, and the same month in 1905. From these figures it is very evident that less than two-seventeenths of the whole money brought passes through the hands of the official exchange of this station.
Since I had the pleasure of talking with you I have carefully noted what has taken place in this respect, as immigrants have passed along the line, and I have no hesitation in stating to you that the great bulk-certainly more than 90 per cent-of all the foreign money carried by steerage passengers is exchanged here. Nearly all of the passengers from German ports are supplied with American money at the point of embarkation, and I apprehend that money exclangers on the other side, who obtain American money from eastbound passengers, dispose of it again to westbound passengers.

If you see where I can still further serve you in this connection, I shall be very glad to hear from you.

I am, with best wishes, sincerely yours,
Robert Watchorn, Commissioner.

## Department of Commerce and Labor, <br> Immigration Service,

New York, N. Y., June 22, 1905.
George E. Roberts, Esq.
Director of the Wint, Washington, D. C.
My Dear Sir: I am in receipt of your esteemed favor of the 21st instant, and in reply beg to assure you that it will afford me great pleasure to undertake what you have asked me to do. This can be done, in so far as third-class passengers are concerned, by adding a little work to that already performed by our examining inspectors, but is unquestionably of sufficient importance to justify the effort.
It will not be such an easy matter to do this with the first and second class passengers, because a great number-especially of the first-class-content themselves by answering the question relating to the money they carry, "Yes; I have more than $\$ 50$." The inspectors may be ablé to induce a large number of the first and second class passengers to voluntarily state how müch gold they have, and this course I will
have taken, commencing July 1. I will continue the practice for as many weeks or months as you may desire. At the end of the period specified by you I will make a complete report.

I prefer to commence this practice on the 1st of July, because at that time the new concessionaries for the money exchange, the American Express Company, will enter upon the discharge of their contract. This company, in my opinion, is as well qualified, in fact better qualified, than any one institution in the United States to furnish exact data on this question. When the facilities they now have are improved to the extent of giving them absolute facts as to the money brought in by third-class passengers they will hold a unique position on this subject. I do not know where you could possibly turn to find a better source of information than the company named. However, whatever they may or may not do, I wish to assure you of my hearty concurrence in your request for more precise data on this matter.
It is to be borne in mind that neither the American Express Company nor the writer will ever be able to give you absolutely complete information upon this point. It may not be out of place to cite a case which happened yesterday and bears out this view.
An alien was ordered deported yesterday because of some physical defect which precluded the possibility of his admission, but he feared that he was being deported because of lack of funds and asked for a further hearing. He stated that while on his original examination he had shown but $\$ 20$, he hacl $\$ 370$, which he was secreting lest it might be a temptation to some of his fellow-passengers to deprive him of it. There is not the slightest doubt that the amount of money actually brought into the United States by third-class passengers is infinitely greater than the amounts shown by them on inspection. Instances multiply here daily to prove this contention. Another feature may be of interest to you. Whereas formerly much money was transmitted from various points in the United States to prospective immigrants, it is now very. largely the case that persons sending for immediate members of their respective families forward only the passage tickets and transmit the remittances to Ellis Island.
The money exchange here will after the 1st of July be able to report to you the total amounts of such remittances if it will be of any service to you, a clause of their contract with the Government requiring them to cash all such remittances, which are usually forwarded here by check or telegraphic money order. This will suffice to indicate to you to what extent the number of remittances to foreign countries has been reduced.
I believe anotherfact worthy of your consideration is that the first and second class passengers who go to Europe on their summer holidays have during the last few years resorted to the traveler's money-order check system adopted by the American Express Company and similar companies. These companies would be in a position to inform you precisely the amount of money thus deposited here, and it seems to me quite possible that they would be in a position to indicate the outflow and influx of coin to balance these transactions.

These are merely suggestions which you may utilize or not as they commend themselves to you. Such definite information as I shall be able to obtain I shall, as above stated, talke very great pleasure in securing for you.

Respectfully,
Robert Watchorn, Commissioner.

# Department of Commerce and Labor, <br> Immigration Service, 

Hon. F. P. Sargent,
Commissioner-General of Immigration, Washington, D. C.
Sin: I have the honor to report, pursuant to the instructions contained in Bureau indorsement No. 48927, of June 29, 1905, that the following amounts of United States gold coin were exhibited by the steerage arrivals who passed through Ellis Island during the last three months, viz:

Of course, it will be understood that this accounts only for the amount actually exhibited, but it by no means follows that more gold was not brought in. It was found to be impracticable to induce cabin passengers to exhibit their coin, and the figures above mentioned refer exclusively to steerage passengers.

Respectfully,
Robert Watchorn, Commissioner.j

Department of State,<br>Washington, October 19, 1905.

The Secretary of the Treasury.
Sir: Referring to your letter of August 11 last, transmitting communications addressed by the Director of the Mint to certain consular officers requesting information relative to accumulations of American gold coin in the cities in which they are located, I have the honor to inclose reports on the subject from the consular officers at Ham. burg and Amsterdam.

I have the honor to be, sir, your obedient servant,
Elifu Root.

Consulate of the United States, Amsterdam, October 6, 1905.
Hon. Francis B. Loomis,
Assistant Secretary of State, Washington, D. C.
Sin: I have the honor to transmit herewith a report on the stock of American gold at Amsterdam, in accordance with instruction of the Department of State, dated August 19, 1905.

I am, sir, your obedient servant,
Frank D. Hull, Consul.
[Translation.]
Amsterdam, September 27, 1905.
Frank D. Hill, Esq.,
United States Consul, Amsterdam.
Highly Esteemed Mr. Hill: I am very glad so far as lies within my power to furnish you with whatever information I have been able to gather with respect to the circulation of American gold in our country.
It is not easy to obtain positive data. In order to arrive at sound conclusions, I have applied for information of divers parties located in both Amsterdam and Rotterdam, whose business connections are such as to enable them to form opinions with respect to the matter. I do not consider myself at liberty to disclose the names of these parties; if, however, you wish to know them, I will gladly state them to you in confidence.
Tourists.-It seems that little American gold circulates here; much more at Rotterdam. American tourists of a certain standing generally come here provided with letters of credit, and at the offices where the greatest part of payments on letters of credit are made American gold is as good as never received from tourists. If tourists carry money on their persons, such funds consist for the most part of English banknotes and English gold. It can therefore be set down, as a rule, that bankers do not receive American gold from American tourists.
Emigrants:-A second category of travelers are the emigrants, and as Rotterdam is almost the exclusive port of departure for them I have applied for information to one of the principal steamslip companies, who have stated with great willingness that American passengers very seldom carry American gold, and even in these rare cases in very small quantities. Whatever American gold is received from passengers arriving here is sold without any trouble whatever to travelers sailing for America.
Another expert at Rotterdam makes the following statement: "American gold is very seldom seen here, even at the offices of professional dealers in exchange. I have interviewed several of them on this question; many of them agree that the importation is very insignificant. The Holland-American line has in its own business sufficient use for the gold received by it and never brings it into the market, so that on this account gold which thus passes back and forward does not enter into the question of imports and exports. The crew seldom brings gold."

One of the exclange offices shares my opinion that repatriating Hungarians and Russians carry some gold back to their countries; in any case, they do not leave it here.

Netherland Bank.-You will easily recognize that the Netherland Bank must of necessity keep a certain stock of gold on hand in its vaults; in that stock American gold also appears. The quantity of American gold depends on the state of exchange, especially when arbitrage in gold is very active. So far as I was able to discover this has very seldom occurred during late years with respect to American gold, and it would appear, therefore, that the stock of American gold held by the Netherland Bank has remained practically stationary.

Assayers.-There are still two categories of persons to be considered, who come in an immediate contact with foreign gold, to wit, the assayers and goldsmiths.
One of the leading assayers has informed me that American gold is scarcely ever seen in circulation here, and that nothing is known of shipment of large lots. The gold-
smiths have a custom of smelting gold coin in their trade; however, it is their established custom to use for that purpose twenty-mark pieces exclusively. As far as I have been able to ascertain, they never so use American gold.

Exchange offices.-Very little traffic in American gold obtains in the different exchange offices. In this city most of them buy the pieces that now and then appear. This, however, is of small consequence.

- A Rotterdam exchange office, which has also a branch office in the shipping quarter, purchases with considerable regularity from Amsterdam exchange offices whatever American gold is on hand, thus showing that the debouche of American gold is to be found exclusively in the shipping quarter of Rotterdam. As I have already said, such transactions can not be other than insignificant.

Consignments.-Concerning consigriments or shipments of gold to our country I - have not been able to do anything. In case occasionally gold is brought here on account of arbitrage transactions, this would be publicly known there, so that shipments of any considerable quantity would be noted by the American Government and could not be made without its knowledge.
Here and there I have heard it said that it was probable that small lots of gold are sent to inhabitants of Hungary and Russia, etc., by members of their family residing in the United States. I give this for what it is worth. In any case these small shipments of gold only enter our country and pass through it.
.I regret that the information I have received is very vague at best, and for the most part negative.
Hoping that I have complied with your request and holding myself ready to assist you further, if possible,

I have the honor to subscribe myself, your obedient servant,
G. Vissering.

## Consulate of the United States, Amsterdam, April 9, 1900.

Hon. David J. Hill,
Assistant Secretary of State, Washington, D. C.
Sir: In reply to circular dated March 9, 1900, I have the honor to report the result of my investigations concerning American gold carried abroad by travelers:

1. The Holland-American line states that most travelers carry American express checks.
2. Messrs. Anspach \& Donk, exchange office, say that they buy less than they sell. There is here, however, only a small demand for United States gold. 'Greenbacks are principally demanded.
3. The Twentsche Bankvereeniging buy more than they sell, principally $\$ 20$ gold pieces. They handle about $\$ 1,000$ per year, and sell the gold dollars either to Paris or to London. They change more American paper money. Their experience is that American travelers either carry letters of credit or American express checks.
4. Messrs. Adolph Boissevain \& Co. never buy or sell any American gold. They state that travelers carry letters of credit and greenbacks. Amsterdamsche Bank handles per year from $\$ 500$ to $\$ 600$ United States gold. They sell the same amount as they buy. Greenbacks are principally changed by them. They inform me that travelers carry letters of credit, or American express checks. I conclude from the above that very little United States gold coin enters or leaves the city of Amsterdam; so little, indeed, as to be altogether a negligible quantity.
There is no passenger line of steamers direct to Amsterdam, and our men of war do not frequent the port, while tourists, who come in greatly increasing numbers annually, are provided with letters of credit, express checks, and other paper substitutes for coin.

Frank D. Hill, Consul.
american Consulate,
Amsterdam, October 4, 1905.
Hon. George E. Roberts,
Director of the Mint, Washington, D. C.
My Dear Sir: Replying to your inquiry of August 9, forwarded through the Department of State, I have the honor to inclose a letter, in translation, from Mr. G. Vissering, one of the directors of the Amsterdamsche Bank, of this city, correspondent of the Hanover National Bank of New York, and an institution of the highest standing. Mr. Vissering is exceptionally qualified to discuss the subject intelligently, and Ifeel
that the Government is indebted to him for his attention, being naturally a busy man of affairs, as well as a close student of economic and financial questions.

I find upon inquiry nothing to add to the report which I made to the mint in 1899, hence reforward same, in order "to keep the case together."

To show how little American gold is in circulation, the clerk at this office, who has occupied that position for twenty-eight years, states that he does not remember that in all that time an American gold coin has been presented here in payment of consular fees, which of late years have run up to figures of $\$ 8,000$ or more a year. After six yeats experience here I can say the same. I am quite positive that I have never been offered, nor had in my possession during that period, by shopkeepers, at the hotels, restaurants, etc., an American gold coin. This contrasts sharply with the South American ports where I have been stationed, in which American gold coins are constantly in evidence, especially after the visits of American men-of-war, or constantly, as at Montevideo, the headquarters of the naval force on that station.

In this connection it may not be amiss to add that I made a rough census, on my own account, two years ago, and came to the rather surprising conclusion that about 25,000 American tourists visited Amsterdam that year. That number has certainly been exceeded this current tourist year, which begins about March 15 and ends about October 1. Taking the figures this year as, say, 30,000 at least, and the average duration of the stay of such tourists in the Netherlands as four days, and their average expenditures per capita at $\$ 6$ or $\$ 7$ per day, not too high a figure I am persuaded, and the amount of money brought into the country and so expended approaches a million dollars, leaving out of account amount expended for articles purchased. Many of our citizens buy to some extent the productions of the contemporary vigorous Dutch school of art, the work of Israels, Mauve, Mesdag, and American painters resident here, as George Hitchcock, Gari Melchers, etc., parcels of Dutch silver articles, Delft, antiquities, the curious head gear for women worn in certain provinces here, liqueurs, etc.

In case any point has been overlooked or treated scantily, please advise me, and the omission will be supplied as far as may be.

Very respectfully, yours, Frank D. Hill, Consul.

## International Banking Corporation, Washington, D. C., September 27, 1906.

## Hon. George E. Roberts,

Director of the Mint,-Washington, D. C.
SIR: Referring to your inquiry of the 21 st of June last, requesting information relative to the amount of United States gold coin retired from circulation in the Far East, I beg to inclose herewith copy of letter on the subject from our head office, containing reports made by our Shanghai, Hongkong, Yokohama, and Manila branches:
Trusting that the information therein contained may be of service to you, I beg to remain,

Respectfully, yours, J. Siliwin Thit, Manayer.

## Intirnational Banking Corporation, New York, September 25, 1906.

Mr. J. Selifin Tait,
Manager International Banking Corporation, Washington, D. C.
Dean Mr. Tatt: Referring again to yours of the 22d of June, inclosing a letter under date of the 21st of June from the Hon. George E. Roberts, Director of the Mint, requesting information relative to the amount of United States gold coin retired from circulation in the Far East, we have instigated inquiries through our branches at Shanghai, Hongkong, Yokohama, and Manila. Their replies are at hand, and we have pleasure in submitting them herein, as follows:
Shanghai advises: We have now pleasure in submitting to you the result of our inquiries in Shanghai with regard to United States gold coin. Inquiries among the foreign banks established in Shanghai elicited the information that during the year from June 30, 1905, to June 30,1906 , the banks, including ourselves, dealt with only (about) $\$ 82,000$ (gold coin), all of which was purchased and disposed of by them over the counter with the exception of a small shipment of gold coin ( $\$ 2,500$ ) made to San Francisco by ourselves in November. Our compradore informs us that the native banks, as a rule, sell any United States gold coin they receive to the foreign banks, and that, as far as he can gather, very few coins are melted by the local goldsmiths. We conclude from our inquiries that nearly all the United States coin which reaches Shanghai is carried away to other ports "by travelers. Hongkong branch has, we notice, replied to you direct, and from the figures given in its letter addressed to
you, we assume that a fair amount of the United States gold coin which passes through banks in Shanghai eventually reaches Hongkong and stays there. The customs returns for China show no impörts or exports of United States gold coin during the last year.

Hongkong advises: After making careful inquiries we find that during the last two or three years the goldsmiths in Hongkong and Canton have melted down (about) gold $\$ 300,000$ to $\$ 400,000$ per annum. Very little of the American gold coin that comes into this colony is sent back to America, the banks finding that they get a better return by selling here to the local goldsmiths.

Yokohama advises: With reference to your inquiry, in which you ask for information regarding the fate of gold coin imported into this country, it is impossible for us to give absolutely reliable figures. We have, however, received the following particulars from the director of the imperial mint of the amount of United' States gold coin received for coinage into gold yen during the past five years:

These figures do not agree with the published statistics of imports of gold for the United States, which are given as follows:

| 1901. | $\begin{aligned} & \text { Yen. } \end{aligned}$ |
| :---: | :---: |
| 1902. | 3,472, 370 |
| 1903. | 4,317,500 |
| 1905. | 11,540,240 |

and we can only assume that the greater part of the difference is held by the Bank of Japan in their gold reserve.

As regards the importation by travelers, it is our opinion that the greater majority of the traveling public brings United States currency bills and not gold coin, but such coin as they do import almost invariably finds its way back to the States in the pockets of travelers returning. Our reason for arriving at this conclusion is, that before leaving the United States people convert their gold coin into bills, knowing that they are easily negotiable in the Orient, and on account of the greater convenience for carrying, but when returning to their country they do not wish to arrive at a Pacific coast port without any currency in their pockets, and they therefore ask for United States gold coin in preference to bills. The amount of gold dollars bought by the banks and money changers during the year is quite trifling as compared with gold-dollar bills. We are of opinion that gold coin would be more likely to go to Europe than to the Orient, for the reason that gold-dollar bills are freely negotiated in the East, but in Europe preference is given to the hard coin.

Manila advices: In connection with your inquiry as to the probable amount of United States gold coin which is used in these islands in the course of a year for manufacturing purposes, we must confess that any accurate data bearing on this subject is extremely difficult to obtain. Outside dentistry requirements there is no large amount of gold used here for manufacturing purposes. In fact, from careful inquiries we have instituted among Chinese and the other banks we do not think the total amount of gold coin consumed in the Philippines in the course of a year exceeds $\$ 50,000$, although we think the total will come pretty near that figure.

We trust that the above contains the information desired by the Director of the Mint. If we can be of further assistance in this or any other matters, we are pleased to place at his disposal our services and shall be happy to have him command us.

Yours, truly,
P. G. Eastwick, Manager.

Mint of the United States,
Superintendent's Office,
San Francisco, September 20, 1906.

## Hon. George E. Roberts, Washington, D. C.

SIR: In a recent letter you desired inquiry to be made to ascertain if possible how much of our gold coin was carried out of the country by travelers leaving the port of San Francisco for the ports of China and Japan. After considerable inquiry I got hold of an intelligent Chinaman, who is familiar with the departure and arrival of China-
men and Japanese at this port, and he said it was the practice of the people of those countries upon getting ready to leave California, to change their money accumulations into Mexican dollars. He said it was his opinion that no considerable amount of gold coin was carried away from San Francisco by those people. From what I could learn, the Americans and Europeans do not carry much of our gold away with them, as they supply themselves with letters of credit. which enables them to get the coin of the country to which they may be going.

Respectfully, yours,
Frank A. Leach, Superintendent.
While the data for any estimate of the amount of United States coin carried out of the country without being recorded at the customhouses is confessedly meager, it appears that some loss through this channel is experienced, and that some allowance should be made for it in the period under review. The sum of $\$ 20,000,000$ is considered an ample allowance.

## GOLD IN CALIFORNIA.

The following correspondence and tables relative to the gold stock of California, from 1873 down to the present time, is of interest in connection with the foregoing inquiry:

Mint of the United States, Superintendent's Office, San Francisco, May 16, 1905.

Hon. George E. Roberts,
Director of the Mint, Washington, D. C.
SIR: Your letter of the 18 th instant, requesting information relative to the existence of the State banks in Califormia, their holdings of gold coin, etc., received. I knew that we had a system of State banks and that it was very crude, for when I was a member of the State legislature, in 1880 , I took some action in introducing laws for their government and control. If my memory serves me right, there was not over a page and a half of statutes in our books covering our banking system at that time. After making some inquiries in the city for the information you sought without getting any satisfactory result, it occurred to me that Mr. A. B. Nye, secretary to the governor, was in a position to secure the facts, so I addressed him a letter at Sacramento, sending him a copy of your request. To-day I received the inclosed letter from him, from which you will see that there were no reports made to any State official as to the gold on hand in any bank prior to 1878. Mr. Nye very correctly calls attention to the fact that the money on hand in the banks at that time was almost wholly gold. There was very little currency and not an excessive amount of silver. I would say that 5 per cent would safely cover all the currency and silver, consequently 95 per cent of the amount would be gold.

Respectfully, yours,
Frank A. Leach, Superintendent.
Executive Department, State of California, Sacramento, May 15, 1905.
Hon. Frank A. Leach, San Francisco, Cal.
Dear Mr. Leach: Your letter of the 13th, inclosing one from Mr. Roberts, came to hand yesterday. The State bank commission was not established until 1878, and until then the State banks, although we had had them from the beginning, did not report to anybody, I-believe. From 1878 on there is a succession of State reports, but they are not made out in a manner to be of any assistance to Mr. Roberts, if his object is to find out the exact amount of gold in the State. The reports from the first showed simply "money on hand" and not the amount of gold or any other particular kind of money. However, as you know, in those times the money in California was almost wholly gold, so that if he cares to guess Mr. Roberts has the materials for making a fairly accurate guess. According to the first reports, the amounts of money held by the State banking corporations (savings and commercial) were as follows:

[^10]Executive Department, State of California,
June 15, 1905.
Hon. F. A. Leach,
San Francisco.
Dear Mr. Leach: I send at last figures wanted by Director Roberts, or, rather, as near an approximation to them as can be had. At first I undertook to make up the figures myself from the printed reports of the bank commission, but you know there was a period some years ago when the State printing office was shut up and no reports were issued; it also appeared that there was no regular time of the year when the banks reported-I mean the date for reporting varied from year to year. I finally decided to turn the job over to the commissioners themselves.

Herewith you have the best they were able to do. It was impossible to comply with Mr. Roberts's request for the amount of money on hand on the lst of January each year, for the reason already given; but the figures are given for one or more dates each year since the bank commission was established.

There are two things to which I would call your attention. First, the reports include the private (unincorporated) banks, and also the branches of several foreign banks, which, as you know, have done business in San Francisco for many years. This, as I understand it, will not lessen the value of the statistics for Mr. Roberts's purpose, but will increase it, because the figures are more complete than they would otherwise be. National banks are not included in any of the totals. The otheripoint is that the banks report not only actual money on hand, but also checks and other cash items. The commissioners estimate these items at $12 \frac{1}{2}$ per cent of the whole. The commissioners failed to give an estimate of the proportion of gold in the total cash of the banks, although I requested them to do it. If you think it is important, you might call up the office on California street, in San Francisco, and ask them about this.

Yours, truly,
A. B. Nye.

## Bank Commission, State of California, San Francisco, June 14, 1905.

Money in the commercial, private, and savings banks of California, as shown by reports to the board of bank commissioners on the following dates, respectively (national banks not included):

| July 1, 1878 | \$14,791,217. 35 |
| :---: | :---: |
| January 1, | 12,507, 724.81 |
| July 1, 1880 | 16,682, 485.67 |
| January 1, 1881. | 10,094, 198. 00 |
| January 1, 1882. | 10,243, 084. 24 |
| January 1, 1883. | 9, 148, 488.00 |
| January 1, 1884. | 10,373, 951. 20 |
| January 1, 1885 | 10,431, 275. 04 |
| January l, 1886. | 11,896.327. 26 |
| January 1, 1887. | 13,495, 745.44 |
| January 1, 1888. | 15, 315, 245. 13 |
| January 1,1889. | 20,295, 975. 25 |
| January 1, 1890 | 17,656,915. 97 |
| January 1, 1891. | 18,732,055.69 |

| January 1, 1892. | \$19,773,284. 56 |
| :---: | :---: |
| January 1, 1893 | 19,228,209. 49 |
| January 1,1894 | 23,112, 151. 77 |
| January 1, 1895 | 25, 105, 530.45 |
| March 30, 1896 | 19,096,795. 37 |
| July 31, 1897 | 20,102, 180.90 |
| August 31, 1898 | 21, 058,675. 97 |
| July 31, 1899. | 22, 277,639.33 |
| August 31, 1900 | 21,002,598. 45 |
| August 17, 1901 | 20, 962, 658.42 |
| August 23, 1902. | 22,330,991. 61 |
| September 8, 1903 | 22, 142, 188. 19 |
| August 8, 1904. | 22, 581, 484. 33 |
| January 5, 1905. | 25,544,085. 52 |

We are unable to give amounts at the first of each year, owing to the fact that the commissioners call for reports at different dates.
We estimate that $12 \frac{1}{2}$ per cent of the several amounts above enumerated consist of clearing-house checks in cash items.

Very respectfully,
Board of Bank Commissioners, By J. Cal. Ewing.

## Executive Department, State of California, <br> June 22, 1905.

Mr. F. A. Leach, San Francisco.

Dear Friend: After sending the bank figures which were desired by Mint Director Roberts I thought of something else which is pretty certain to be of interest to him. As you know, the State of California has always followed the practice of keeping its money in its own vaults, whence it comes about that usually the largest single stock of gold in California is not in any bank, but in the State treasury.

I asked the State treasurer to give me the figures for a series of years, and he has done so, as you will see by the two tables inclosed herewith. One shows the amount and description of money on hand June 30 for a series of years and the other shows the same thing for a less number of years for January 1. The official year ends June 30, and the tieasurer's reports are made as of that date.

It is interesting to note the relatively small amounts of paper and silver in the State treasury at most times. Twenty-dollar pieces are a medium in which the business of California, State as well as private, is done. To illustrate, on June 30, 1904, there were in the State treasury: Double eagles, $\$ 3,840,000$; eagles, $\$ 40,000$; half eagles, $\$ 34,000$, besides the amounts in silver and paper, which the table shows.

If Mr. Roberts should want information more in detail as to the exact denominations of coins in the treasury at different periods, he could find it in the annual reports, which are always printed in the statute book and may be found in the Library of Congress.

> Yours, truly, A. B. Nye.

The Mint of the United States at San Francisco,
Superintendent's Office, August 9, 1905.
Hon. Geo. E. Roberts,
Director of the Mint, Washington, D.C.
Sir: Herewith please find the letter of the secretary of the bank commission giving the amount of money on hand at the close of the fiscal year in the banks of California, showing the amount of gold, silver, and various other notes, checks, etc., representing the cash.
This is the information promised by the bank commission which I spoke of in my letter to you of June 23 last.

Respectfully, yours,
Frank A. Leach, Superintendent.
Bank Commission,
San Francisco, Cal., August 9, 1905.
Hon. Frank A. Leach,
Superintendent U. S. Mint, San Francisco, Cal.
Dear Sir: As per your request of recent date, we have caused the following tabulation to be made. In some cases it has been necessary for us to approximate, inasmuch as we have not required the banks of the State under our jurisdiction to segregate the different kinds of moneys.

Money on Hand, Commercial, Savings and Private Banks, May 29, 1.905.

| Checks and other cash item | \$1,956, 863. 30 |
| :---: | :---: |
| Uncurrent money and nickels | 20,902. 85 |
| Exchanges for clearing house | 3,363, 623.35 |
| Gold coin. | 15,602,645.00 |
| Silver coin. | 792, 958.00 |
| Legal-tender notes (approximate) | 1,248,288.00 |
| National-bank notes (approximate) | 452, 977,00 |
| Gold certificates (approximate) | 231, 796. 00 |
| Clearing-house certificates | 829, 824. 00 |

Trusting the above will serve your purpose, we remain, very respectfully, yours,
J. Cal. Ewing, Secretary.

Executive Department,
State of California, Sacramento, August \%5, 1906.
Hon. Geo. E. Roberts,
Director of U. S. Mint, Washington, D. C.
Dear Sir: I send you herewith some figures on the amounts of gold, as well as of money in other forms, held in the county and city treasuries in this State. This is in compliance with a request made by you some time since through Superintendent Leach of the branch mint in San Francisco, and I want to apologize for the delay in furnishing the data, a delay caused by the dilatoriness of county and city officials in responding to requests for information. Even now one county is lacking and several other counties have reported in such form that their figures do not possess much value, "while of the cities of the State a number have failed to supply the data asked for. In looking over the sheets of compiled figures you will probably observe some things tending to show that the amounts reported must be regarded as approximations rather than as the exact amounts ascertained by actual count, but you will be able to obtain, I think, substantially the data you require.

Sheet A contains a statement of the amounts in the hands of county treasurers on the first Monday in January, 1906.

Sheet $B$ contains a statement of the amounts in the hands of city treasurers on the first Monday in January, 1906.
(Note.-San Francisco, which has a combined county and city government, appears in the county and not in the city table.)

Sheet C contains a summary of both county and city reports for the first Monday in July, 1906. I have the July reports in the same detailed form as those for January, but have only added up the figures representing the amounts of gold on hand. I understand that the gold statistics are what you desire to receive.

At the bottom of Sheet A I have inserted the figures showing the amount of gold in the State Treasury at or near the same date (first Monday in January, 1906). It think you already have reports for the gold holdings for the banks of California. If not, they can be procured without delay from the bank commission.

You will notice that some of the counties report relatively very large holdings of "currency," while generally the holding of that kind of money is small as compared with the holding of gold. County treasurers are permitted to make "special deposits" in bank of county funds, the bank to return, without having used it in the meantime, the identical money received.

The "certificates of deposit," so called, which appear in the last column (Sheets $\Lambda$ and $B$ ) are the acknowledged deposits in bank. There are more of these in the city table than in the county table, because the charters of a good many of our cities permit the banking of funds, which the county government law does not permit (except as to special deposits).

Very truly, yours, A.B. Nye,
Private Secretary to Governor.

Statement for First Monday in January, 1906.

## CONSUMPTION IN INDUSTRIAL ARTS.

Dr. James P. Kimball, Director of the Mint in 1885, made a revision of the estimates of his predecessor as to the amount of gold coin consumed in the arts. He estimated $\$ 30,000,000$ for the years from 1874 to 1880 inclusive, and the following years to 1885, as follows:

These estimates were based upon the result of a census taken by addressing inquiries to all known manufacturers of gold and silver wares.

After 1885 Dr. Kimball dropped his estimate to $\$ 3,500,000$, investigation indicating that bar gold was being used more generally by
manufacturers. In 1893 the Director of the Mint dropped this estimate to $\$ 1,500,000$, and it remained at that figure until 1903 when it was restored to $\$ 3,500,000$ as the result of extensive inquiries begun in 1900 and reported in detail in the reports of that and succeeding years. It should be understood that this is the only annual deduction made from the stock to cover not only losses by melting on the part of jewelers, but destruction and disappearance by every means except natural abrasion, which is computed at the time of recoinage. As the latest investigations reveal an actual reported consumption of about $\$ 3,000,000$, it is concluded that an average allowance of $\$ 3,500,000$ for the ten years during which the estimate was only $\$ 1,500,000$ per year is not too great. It is also considered that $\$ 5,000,000$ more in the aggregate should be deducted for the years prior to 1885. During that time it is known that bars had not entered so generally into consumption as they have since. It has always been the practice for small manufacturers and dentists to use coin freely, while the large manufacturers and makers of dental supplies who buy the bullion in quantities prefer bars. Altogether, these deductions for consumption in the arts aggregate $\$ 25,000,000$.

## TOTAL DEDUCTIONS.

Summing up the deductions of $\$ 35,000,000$ prior to $1880, \$ 30,000$,000 in customs entries, $\$ 25,000,000$ for the Canadian movement, $\$ 25,000,000$ for industrial consumption, and $\$ 20,000,000$ for the unrecorded exports, a total of $\$ 135,000,000$ is reached. This sum taken from amount "in other banks and in circulation" on June 30,1906 , would leave that estimate at $\$ 345,944,793$, and deducting the allowance of $\$ 100,000,000$ as the amount in other banks and $\$ 20,000,000$ for the holdings of California treasuries would leave $\$ 225,793,384$ as the amount actually unaccounted for. Bringing the calculation down to June 30, 1907, with the deductions, we have the following:

It is believed that these are liberal allowances under each head and that they fully cover all the deductions that can be properly made.

In no other country of the world can so large a percentage of the estimated stock of standard money be definitely located.

REVISED TABULAR ESTIMATE.
In order to correct the estimates for previous years it is necessary to distribute these deductions by a somewhat arbitrary method, and this has been done in the following table. The known errors in import records have been corrected in the years when they occurred, but the allowance for untraced errors has been distributed over the whole period by a percentage deduction from the recorded imports. In a similar manner the deductions for losses to Canada and by the unrecorded movement at the hands of travelers have been distributed by a percentage deduction upon the exports of each year. The factors in
the calculation and the revised estimate for each year of the period are shown in the following table:

Corrected Stock of Gold.

| Fiscal year. | Coin in Treasury. | Bullion in Treasury. | Coin in national banks (Comptroller's report). | Coin in circulation. | Total stock of gold. |
| :---: | :---: | :---: | :---: | :---: | :---: |

Changes in United Syites Coln Stocl-Continued.

## ERRORS IN IMPORT AND EXPORT RECORDS.

The following table has been made up in course of the investigation of the records of United States coin imports and exports. It shows that the imports of foreign coin and bullion are not fully recorded. Bullion and coin brought into the country are either reexported or deposited at the mints. Foreign ores imported are treated by domestic reduction works and these establishments report to the Mint Bureau the amount of bullion extracted therefrom. The amounts of foreign bullion and coin received by the mints, plus the amounts reexported, plus the bullion extracted from foreign ores, should be approximately equal to the imports of foreign coin, bullion, and ores.

It will be seen by this table that they largely exceed such imports, showing that the records of imports are incomplete.

## GOLD BULLION RECEIVED FROM HALIFAX.

The table following shows the official import figures as recorded by the United States Bureau of Statistics of gold bullion received from Halifax, and the amount of gold bullion received and deposited at the New York assay office and reported there as having come from Halifax.

Halfax Gold Bullion Imported and Amount Defosited at New York Assay Office, from January 1, 1873, to December 31, 1903.

| Calendar year- | Imports. | Deposits. | Calendar year- | Imports. | Deposits. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1873. |  | \$306,870 | 1890 |  | \$454, 223 |

gains and losses of gold.
Writers about the Treasury estimates upon the stock of gold have pointed out apparent discrepancies between the figures for the total acquisition of gold from all sources and the total disposition through all channels. Thus it has been shown that taking the figures for gold production within the United States and adding thereto the net imports and subtracting therefrom the net exports and amount consumed in the arts, the sum remaining is materially less than the estimated addition to the gold stock. This is said to be prima facie evidence that the additions have been overestimated.

These discrepancies, however, are largely explained by the tables above, which show that import figures have been unreliable.

The following table shows the total acquisition of bullion from all sources and the total disposition of it, and shows that the old differences are closely explained.

Stock of Gold and Estrmated and Apparent Gain or Loss, and Explanation of the Same.

$a$ Loss.
$b$ Additional gain of $\$ 4,000,000$ in Hawaiian coin in 1900 .

## STOCK OF MONEY IN THE UNITED STATES.

It has been the custom to present in the reports of this Bureau an estimate of the stock of domestic gold and silver coin in the United States at the end of each calendar and fiscal year.

Official Table of Stock of Coin in the United States June 30, 1907.

| Items. | Gold. | Silver. | Total. |
| :---: | :---: | :---: | :---: |
| Estimated stock of coin June 30, 1906 | \$1,368, 612,051 | \$686, 476, 450 | \$2,055, 088,501 |
| Net imports United States coin, fiscal year 1907 | 21,813,119 | 493, 400 | 22, 306, 519 |
| Coinage, fiscal year 1907. | 79, 622, 338 | 12,974, 534 | 92,596,872 |
| Total. | 1,470,047, 508 | 699, 944, 384 | 2,169,991,892 |
| Less: |  |  |  |
| United States coin melted for recoinage (face value). | 2,779,237 | 1, 142, 184 | 3,921, 421 |
| United States coin estimated to have been used in the arts. | 3,500,000 | 100,000 | 3,600,000 |
| Amount deducted by the Director of the Mint as errors in former estimates since 1873. | 135,000,000 |  | 135,000,000 |
| Total. | 141,279, 237 | 1,242, 184 | 142, 521, 421 |
| Estimated stock of coin in the United States June 30,1907. | 1,328, 768, 271 | 698, 702, 200 | 2,027, 470,471 |

Note.-The number of standard silver dollars coined to June 30,1907 , was $570,272,610$, which, added to the Hawaiian dollar coinage, 500,000 , plus the number imported from the Philippine Islands, 150,000, and the number returned in Government transports, 462,730 , equals $571,385,340$. Since July 1, 1898, the number of standard silver dollars exported in transports has been $2,495,000$; and since 1883 , the number melted has been 185,540 (see this report, p. 248, and the number of Hawaiian dollars melted to June 30,1907 , has been 454,818, a total disposition of $3,135,358$, leaving in the United States on June 30, 1907, $568,249,982$ standard silver dollars and $130,452,218$ dollars in subsidiary silver coin.

## UNITED STATES GOLD COIN IN CANADA.

The holdings of United States gold coin in the treasury of the Dominion of Canada on the 30th of December, 1906, was $\$ 31,040,149$; the holdings of the charter banks ( 33 in number) on the same date aggregated $\$ 12,836,881$, or 70.27 per cent of their specie holdings.

The total amount of United States gold coin in Canadian reserves on the foregoing date was, therefore, $\$ 43,877,030$.

For a number of years it has been customary to publish in the fiscal reports of the Bureau of the Mint an approximate estimate of the world's stock of money at the close of the preceding calendar year. The compilation of this estimate is tedious, requiring much research, and is at best but an approximation.

The following table exhibits the monetary systems and an estimate of the approximate stock of gold, silver, and uncovered paper money, with the per capita of each, in the different countries of the world at the close of the calendar year 1906. This table is compiled from official information as far as obtainable, and only in the absence of such information from unofficial sources:

Monetary Systems and Approximate Stocks of Money, in the Aggregate

a In United States Treasury and national banks.
$b$ Official information furnished through United States representatives.
c No information.
d Estimate, Bureau of the Mint.
$e$ The figures for the total stock of gold in India are for the net imports since 1893-94 plus the production of the country. The amount in the government treasury is from official advice. The net imports of gold since 1835-36, when the records begin, amount to $\$ 841,407,489$, and the production recorded to $\$ 115,030,200$. The tide of gold and silver has been flowing into India for centuries.
and Per Cafita, in the Principal Countries of the World, December 31, 1906.

$f$ Includes Straits Settlements, the Malay States, and Jehore.
$g$ L'Economiste European, January 1, 1906.
$h$ Except Costa Rica and British Honduras-gold-standard countries.
$i$ Le Marche Financier, 1907.
$k$ These figures may include some gold credits in foreign banks.
Note.-The value of the monetary stock of the silver-standard countries has been changed to conform to the decline in silver values. The monetary stock of Mexico and other countries where the Mexican dollar circulates is given in Mexican dollars at bullion value.

The figures for the total amount of gold in banks of issue and public treasuries show an increase during the calendar year 1906 of $\$ 295,600,000$. The figures for the total stock of gold in the world in use as money show an increase over the figures given for the close of 1905 of $\$ 405,400,000$. As this amount exceeds the world's prodụction, of course no such increase actually occurred, but must be accounted-for in part by changes from the provisional estimate. The increases and decreases over the estimate made for the close of 1905 are given below, by countries:

| Country. | Increase. | Decrease | Country. | Iucrease. | Decrease. |

GOLD AND SILVER USED IN INDUSTRIAL ARTS IN THE UNITED STATES DURING THE CALENDAR YEAR 1906.

Among the purveyors of gold and silver bars for use in the industrial arts the United States mint at Philadelphia and the United States assay office at New York hold the foremost places; consequently the larger portion of the material consumed in the arts is brought under Government notice and is a matter of public record.
The following table gives the value of the gold and the quantity of the silver bars issued by the Government institutions and private refineries during the calendar year 1906:

Gold and Silver Bars Issued by the Government Institutions and Manufactubed bì Private Refineries for Use in the Industrial Arts during the Calendar Year 1906.

| Material used. | - Gold. |  | Total. | Silver. |  | Total. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Govern- ment insti- tutions. | Private refinerios. |  | $\begin{gathered} \text { Govern- } \\ \text { ment insti- } \\ \text { tutions. } \end{gathered}$ | Private refineries. |  |
| Domestic bullion | \$18, 479, 762 | \$188, 042 | \$18;667,804 | Fine ozs. $1,490,662$ | Fine ozs. 13,740,966 | Fine ozs. $15,231,628$ |
| Foreign material. | 10, 451, 331 | 706 | 10,452, 037 | 2, 472, 486 | 261,701 | 2, 734, 187 |
| United States coin |  | 343, 493 | 343, 493 | ${ }^{205}$ | 1,500 | 1,705 |
| . Old jewelry. | 4, 416,859 | 2,090,063 | 6,506,922 | 519,179 | 3,290,926 | 3,810,105 |
| Total. | 33, 347,952 | 2,622,304 | 35,970,256 | 4, 482, 532 | 17,295,093 | 21, 777, 625 |

Estimating that the total amount of gold coin used in the arts during the calendar year has been $\$ 3,500,000$ and silver coin $\$ 100,000$, equivalent to 77,344 fine ounces, the total industrial consumption would be as follows:

|  | Material used. | Gold. | Silver. |
| :---: | :---: | :---: | :---: |
| Domestic bullion. |  | \$18,667, 804 | Fine ounces. $15,231,628$ |
| Foreign material. |  | 10, 452, 037 | 2,734,187 |
| United States coin |  | 3,500,000 | 77, 344 |
| Old material. |  | 6, 506, 922 | 3,810, 105 |
| Total. |  | 39, 126, 763 | 21,853,264 |

The following table gives the amounts and the classification of gold and silver used in the industrial arts in the United States since 1880:

Gold and Silver Bars Furnished for Use in Manufactures and the Arts, and Classification of the Material Used, by Calendar Years, since 1880.

Of the total value of bers ( $\$ 56,923,202.61$ ) exchanged for coin, $\$ 25,170,899.79$ were exported and $\$ 31,752,302.82$ were used in the industrial arts.

THE WORLD'S INDUSTRLAL CONSUMPTION OF THE PRECIOUS METALS IN 1906.

This Bureau estimates the world's consumption of the precious metals in the arts during the calendar year 1906 as follows: Gold, 182,969 kilograms, fine, of the value of $\$ 121,601,200$, equivalent to $5,882,458$ ounces, fine; and silver, 2,649,956 kilograms, fine, of the commercial value of $\$ 57,668,388$, equivalent to $85,196,100$ ounces, fine. In these estimates only new material is taken into account.

PRODUCT OF GOLD AND SILVER IN THE UNITED STATES IN 1906.
The detailed statistics of the product of gold and silver in the United States for the calendar year 1906 were presented in a special report to the Secretary of the Treasury.

The distribution of the product among producing States and Territories was as follows:

Approximate Distribution, by Producing States and Territories, of the Product of Gold and Silver in the United States for the Calendar Year 1906.
[As estimated by the Director of the Mint.]

| State or Territory. | Gold. |  | Silver. |  | Total value (silver at commercial value). |

## WORLD'S PṘODUCTION.

Tables compiled from information furnished by foreign governments through our diplomatic representatives and revised from the latest data, exhibiting the weight and value of the gold and silver product of the principal countries of the world for the calendar years 1904, 1905, and 1906, will be found in the appendix.

## WORLD'S COINAGE.

In the appendix will be found a table, revised from the latest information received, exhibiting the coinages of the various countries of
the world during the calendar years 1904, 1905, and 1906. The following is a summary of the same:

Coinage of Nations.

| . | Calendar year. |  | Gold. | Silver. |
| :---: | :---: | :---: | :---: | :---: |
| 1904. |  |  | \$455, 427, 085 | \$176,508, 646 |
| 1905. |  |  | 245, 954, 257 | 173, 333, 093 |
| 1906. |  |  | 366, 326, 788 | 155, 590, 466 |

The above figures represent, as nearly as this Bureau has been able to ascertain, the total value of the gold and silver coinages executed in the world during the years given.

It must be borne in mind, however, that the total of these coinages does not correctly represent the amount of new gold and new silver made into coins during the year, for the reason that the coinages as reported include the value of domestic and foreign coins melted for recoinage, as well as old material, plate, etc., used in coinage.

In the circular letter of inquiry prepared at this Bureau and sent to foreign governments through the Department of State, asking for information on these subjects, it was especially requested that each country report the amount of such recomages. This has been done in many instances, but not in all.

Coinage of Gold and Suver of the Mints of the World for the Calendar Years since 1873.

|  | Calendar year. | Gold. |  | Silver. |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Fine ounces. | Value. | Fine ounces. | Coining value. |
| 1873. |  | 12, 462,890 | \$257,630, 802 | 101, 741, 421 | \$131, 544, 464 |

Early in the year conditions in the United States and abroad evidenced the probability of contraction of business in general and tightness of the money market, but the extraordinary conditions developing in. October were not foreshown to an appreciable extent in the banks' reports as a whole up to August 22. It will be noted from the foregoing summary that there was a steady increase in the volume of loans and discounts from $\$ 4,366,045,295$ on November 12, 1906, to $\$ 4,678,583,968$ on August 22, 1907, the total increase being $\$ 312,538$,673. This increase was due in part to the fact that 516 banks, with authorized capital of $\$ 34,967,000$, were chartered during the year, but mainly to the increase in business of the older associations. Since the date of the corresponding report in 1906 (September 4) the banks increased their investments in United States bonds on August 22, 1907 , to $\$ 660,297,440$, a net increase of $\$ 31,500,730$. Lawful money held by the banks on August 22, aggregating $\$ 701,623,532$, consisting
of $\$ 531,107,750$ in specie and $\$ 170,515,782$ in legal tenders, exceeded the amount held in September, 1906, by $\$ 75,611,121$. In addition to lawful money, the banks held on August $22 \$ 33,554,657$ in notes of other banks, fractional currency, etc. The only notable diminution in assets was in exchanges for clearing house, the net decrease being $\$ 204,738,324$. Between November 12, 1906, and January 26, 1907, there was a reduction in exchanges of $\$ 248,422,717$, a fall from $\$ 376,672,336$ to $\$ 128,249,619$. In the period between the January and March calls there was an increase of $\$ 134,617,117$ and from March to May of $\$ 10,234,333$. On August 22 the amount had fallen $\$ 82,498,906$, or to $\$ 190,602,163$.

Considering the liability side of the banks' accounts, there is shown to have been an increase of from $\$ 10,000,000$ to $\$ 13,000,000$ in capital stock between each call, the net increase for the year being $\$ 61,384$,518. While there was but a nominal increase in net undivided profits, approximately $\$ 6,000,000$, the increase in surplus funds was $\$ 58,058$,478 , this account on August 22 standing at $\$ 548,303,602$, as against $\$ 490,245,124$ in September, 1906. The act of June 22, 1906, amending, section 5200 of the Revised Statutes, to permit of a loan to a single interest to the extent of 10 per cent of capital and surplus, the aggregate not to exceed 30 per cent of capital stocls, unquestionably resulted in extraordinary additions to the surplus fund, as on June 18,1906 , with capital $\$ 826,129,785$, the surplus amounted to but $\$ 448,858,491$, approximately 54 per cent of capital, while on August 22,1907 , the surplus exceeded 60 per cent of the capital stock.

Individual deposits, representing over 50 per cent of the banks' liabilities, reached the maximum in the history of the system on May 20,1907 , when they amounted to $\$ 4,322,880,141$. The amount to the credit of depositors on August 22 was $\$ 4,319,035,402$, a decrease of $\$ 3,844,739$. The gross increase in deposits during the year was $\$ 297,-$ 065,436 ; the gross decrease, $\$ 177,968,344$, leaving the net increase \$119,097,092.

Government deposits in the banks were at their lowest on November 12,1906 , standing at $\$ 129,193,379$. This account increased to $\$ 145,891,090$ on January 26; declined to $\$ 140,801,794$ on March 22; increased to $\$ 170,062,674$ on May 20, and declined to $\$ 143,282,393$ on August 22.

With the exception of the returns on March 22, when a decrease of $\$ 2,161,495$ was shown in the amount of circulation outstanding, as compared with the January call, there was a steady increase in circulating notes during the year, the net increase on August 22, 1907, over September 4, 1906, being $\$ 33,984,950$.

The liabilities of banks on account of rediscounts and bills payable fluctuated from a minimum of $\$ 27,230,818$ on January 26 to a maximum of $\$ 59,176,079$ on August 22, the net increase on the latter date over September 4,1906 , being $\$ 10,333,367$.

## CLASSIFICATION OF LOANS.

Reports of condition of national banks show, in detail, the amount and character of the paper held, classified as follows:
Demand paper with one or more individual or firm names; demand paper collateraled by stocks, bonds, and other securities; time paper with two or more individual or firm names; time paper, single name, and time paper secured by stocks, bonds, etc.

Of the total amount of loans and discounts of national banks on August 22, 1907, aggregating $\$ 4,678,583,969$, the 60 banks located in the central reserve cities, New. York, Chicago, and St. Louis, held $\$ 1,061,212,415$; the 306 banks in other 40 reserve cities held investments of this character to the amount of $\$ 1,242,440,028$, the total for both classes of reserve cities being $\$ 2,303,652,443$, divided as follows: Demand single-name paper, $\$ 187,656,946$; demand paper secured by stocks, bonds, etc., $\$ 598,917,625$; time paper with two or more individual or firm names, $\$ 631,742,158$; time paper single name, $\$ 466$,335,350, and time paper secured by stocks, bonds, etc., $\$ 418,999,364$. Of the aggregate amount of loans granted by the 6,178 country banks, namely, $\$ 2,374,931,526$, the demand single-name paper amounted to $\$ 240,563,589$; demand paper with collateral, $\$ 233,960,854$; time paper with two or more individual or firm names, $\$ 1,017,009,280$; time paper single name, $\$ 433,159,308$, and time paper with collateral, $\$ 450,238,495$.
For the purpose of comparison, there is submitted herewith a statement of the amount and percentage of each class of loans made by the banks on or about October 1, 1897, 1906, and 1907.

| Class. | 1897. |  | 1906. |  | 1907. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Amount | Per cent. | Amount. | ${ }_{\text {Per }}$ Pent. | Amount. | ${ }_{\text {Per }}^{\text {cent. }}$ |
| On demand, paper with one or more individual or firm names... | 8103,837,578 | 5.1 | \$374,689,245 | 8.7 | \$428,221,535 | 9.2 |
| On demand, secured by stocks, bonds, and other personal secur- |  |  |  |  |  |  |
|  | 326, 447, 8 | 15.9 | 828,016,734 | 19.3 | 832,878,47 | 17.8 |
| individual or frm names........ | 896, 099, 397 | 43.7 | 1,502,034, 898 | 35.0 | 1,648,751, 438 | 35.2 |
|  | 317,520,501 | 15.5 | 776, 125,101 | 18.0 | 899, 494,658 | 19.2 |
| On time, secured by stocks, bonds, and other personal securities, or security. | 407,104,110 | 19.8 | 818,117, 338 | 19.0 | 869,237,859 | 6 |
| Total | 2,051, 009, 438 | .... | 4,298,983,316 | ... | 4,678,583,969 |  |

The following table will be of interest as showing the amount and per cent of loans of national banks in New York in the three central reserve cities and other reserve cities, in banks in all reserve cities combined, and in banks outside of reserve cities, to the total loans of all national banks, on August 22, 1907, September 4, 1906, and August 25, 1905. The relative proportion of loans in all reserve city banks, which was 53.8 per cent in 1905 and 50.7 per cent in 1906, was 49.2 per cent in 1907. The country banks held 46.2 per cent in 1905, 49.3 per cent in 1906, and 50.8 per cent in 1907.

## LOANS BY NEW YORK BANKS.

As approximately one-fifth of the loans of all national banks are made by associations located in the city of New York, the following statement will be found of interest as showing the amount and character of such loans on comparable dates from 1902 to 1907, inclusive.

| Loans and discounts. | Sept. 15, 1902. | Sept. 9, 1903. | Sept.6,1904. | Aug. 25, 1905. | Sept. 4, 1906. | Aug. 22, 1907. |

## RATES FOR MONEY.

In connection with the foregoing comments and data relating to loans of national banks the range and average monthly rates for money in the New York market during the year ended October 31, 1907, as reported by the New York Commercial and Financial Chronicle, are of interest. Excluding the rate on thirty and sixty day time loans, from November to March, ordinary rates prevailed during the year, except for call loans on stock exchange. The high point for stock exchange loans in November was 27 ; in December, 36 ; in January, 45; March, 25; June, 12; July, 16; September, 10, and October, 125.

The bank and trust company rate ranged from $1 \frac{1}{2}$ to 6 per cent, the maximum being reported in November and December, 1906, and March and October, 1907.

The range and average rates during the year are shown in the accompanying table:

| Character of loans. | 1906. |  | 1907. |  |  |  |

a Minimum.

## RESERVE.

The deposits on which reserve was required on November 12, 1906, aggregated $\$ 4,969,961,039$, the reserve held being $\$ 1,033,578,142$, or 20.8 per cent. The central reserve city banks held an average of 25.31
per cent; other reserve city banks an average of 24.32 per cent, and the country banks an average of 16.77 per cent. Including credits with reserve agents, in excess of the amount available as lawful reserve, the reserve city banks' average is increased from 24.32 to 26.72 per cent; that of the country banks from 16.77 to 24.86 per cent, and that of the banks of the country at large from 20.80 to 25.48 per cent. On August 22, 1907, the deposits on which reserve was required amounted to $\$ 5,256,085,087.14$; the reserve, $\$ 1,121,358,395$, the average being 21.33 per cent. The average reserve held by the central reserve city banks was $26: 18$ per cent; other reserve city banks, 25.46 per cent, and of country banks, 16.88 per cent; but with the inclusion of excessive credits with the lawful reserve the average in the reserve cities is increased to 27.48 per cent; in the country banks to 24.24 per cent, and of all banks in the country to 25.56 per cent. On January 26 this average for all banks reached 26.87 per cent, the highest for the year.

It is generally known that the entire reserve required to be held by central reserve city banks must be in their vaults and that onehalf of the 25 per cent reserve required for other reserve city banks may consist of money deposited to their credit with associations in the central reserve cities. The so-called country banks-that is, those located elsewhere than in reserve cities-are required to maintain a reserve of 15 per cent, two-fifths of which must be in bank and the balance may be on deposit with approved correspondents. On August 22 the national banks in New York, Chicago, and St. Louis held $\$ 315,549,993$, against liabilities of $\$ 1,205,487,206$; banks in other reserve cities, with liabilities of $\$ 1,423,433,236$, held $\$ 362,346,068$, of which $\$ 165,736,796$ was with their central reserve correspondents, $\$ 6,305,035$ in the redemption fund, and $\$ 190,304,236$ in specie and legal tenders in bank, the proportion of the latter being somewhat in excess of the legal requirement. On liabilities aggregating $\$ 2,627,164,654$ the reserve required by country banks was $\$ 394,074,-$ 698, 40 per cent of which was required to be held in lawful money in bank. As a matter of fact the country banks held 50 per cent of their reserve in specie and legal tender.

## RELATION OF CAPITAL TO INDIVIDUAL DEPOSITS, ETC.

The changes which have occurred in the relative proportion of capital to deposits, loans, and aggregate resources; capital and surplus to deposits, and specie and legal tenders to deposits, are of interest as shown in the comparative statement of the returns nearest to September, 1897, 1906, and 1907.

Ratios of Capital, etc., to Individual Deposits, etc., of National Banks in September, 1897, 1906, and 1907.

| Items. | 1897. | 1906. | 1907. |
| :---: | :---: | :---: | :---: |
| Capital to individual deposits. | \$1.00 to \$2.93 | \$1.00 to \$5.03 | \$1.00 to \$4.82 |
| Capital to loans. | 1.00 to 3.25 | 1.00 to 5.15 | 1.00 to 5.22 |
| Capital to aggregate resources. | 1.00 to 5.87 | 1.00 to 9.60 | 1. 00 to 9.36 |
| Capital and surplus and other profts to individual deposits. | 1.00 to 1.92 | 1.00 to 2.79 | 1.00 to 2.65 |
| Specie and legal tenders to individual deposits......... | 1.00 to 5.35 | 1.00 to 6.71 | 1.00 to 6.16 |

Loans and discounts, United States bonds, and lawful money represent approximately 70 per cent of the aggregate resources of national banks and a like proportion of liabilities is represented by capital, surplus and profits, and individual deposits. The relative proportion of each of these items has changed but slightly during the past seven years, as will be observed by reference to the accompanying table.

| Items. | 1900. | 1901. | 1902. | 1903. | 1904. | 1905. | 1906. | 1907. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Loans and discounts. | Per cent. | Per cent. $53.0$ | Per cent. 53.7 | Per cent. 55.2 | Per cent. 53.4 | Per cent. 53.9 | Per cent. | Per cent. 55.8 |
| United States bonds.. | 8.1 | 7.8 | 7.5 | 8.6 | 7.9 | 7. 4 | 7.8 | 7.9 |
| Lawful money.. | 10.3 | 9.5 | 8.3 | 8.8 | 7.2 | 8.9 | 7.9 | 8.4 |
| Total | 71.6 | 70.3 | 69.5 | 72.6 | 68.5 | 70.2 | 69.3 | 72.0 |
| Capital. | 12.5 | 11.5 | 11.5 | 11.9 | 11.0 | 10.7 | 10.4 | 10.7 |
| Surplus and profits... | 7.7 | 7.6 | 8.1 | 8.8 | 9.8 | 8.3 | 8.4 | 8.8 |
| Individual deposits... | 49.7 | 51.6 | 52.5 | 50.0 | 49.6 | 51.1 | 52.4 | 51.5 |
| Total. | 69.9 | 70.7 | 72.1 | 70.7 | ${ }^{7} 0.4$ | ${ }^{7} 0.1$ | 71.2 | 70.9 |

CAPITAL, BONDS, AND CIRCUIAATION.
In the year closed October 31, 1907, there was a gross addition to the capital stock of national banks of $\$ 76,148,000$, of which $\$ 34,967,000$ was that of associations organized during the year, $\$ 41,031,000$ of old associations increasing their capital, and. $\$ 150,000$ the capital of national banks theretofore placed in the charge of receivers, but permitted to resume business. The losses were as follows: By liquidation, $\$ 11,325,000$; by expiration of charters, $\$ 420,000$; by failures, $\$ 925,000$; by reduction of authorized capital, $\$ 410,000$, making the total decrease $\$ 13,080,000$, the apparent net increase being $\$ 63,068,000$. As a matter of fact the exact increase was $\$ 63,335,000$, the difference, $\$ 267,000$, being represented by the capital of banks closed, but still carried on the books of the office by reason of the fact that lawful money has not been deposited for the retirement of circulation and withdrawal of bonds on deposit as security therefor.

On March 14, 1900, the average capital of the 3,617 associations then in existence was $\$ 170,000$, and as a result of the organization of 2,389 banks since that date, with average capital of approximately $\$ 26,000$, the average capital of the 6,650 associations in existence on October 31, 1907, was \$136,733.

## CLASSIMICATION OF BANKS BY CAPITAL.

By reference to the following table it will be noted that approximately 50 per cent of the banks are with capital ranging from $\$ 50,000$ to $\$ 100,000$, inclusive, the aggregate amount being 25.95 per cent of the capital of all associations. Thirty-one per cent represents the proportion of banks with capital of less than $\$ 50,000$, the proportion of capital of these banks being but 6.7 per cent. Banks with capital of $\$ 250,000$ to $\$ 1,000,000$, numbering 472 , represent 27.93 per cent of the aggregate capital, and nearly 25 per cent of the capital is that of 70 associations with individual capital ranging from $\$ 1,000,000$ to $\$ 25,000,000$. The table in question follows:

| Capital, classified. | Number of banks. | Per cent. | Capital. | Percent. |
| :---: | :---: | :---: | :---: | :---: |
| Less than \$50,000. | 2,063 | 31.02 | \$54,322,000 | 6.07 |
| \$50,000 to $\$ 100,000$, inclusive | 3,304 | 49.69 | 232,250,920 | 25.95 |
| 0 ver $\$ 100,000$ to $\$ 250,000$, inclusive | 741 | 11.14 | 135,379, 585 | 15. 13 |
| Over $\$ 250,000$ to $\$ 1,000,000$, inclusive | 472 | 7.10 | 250,026,920 | 27.93 |
| Over $\$ 1,000,000$ to $\$ 5,000,000$, inclusive | 64 | . 96 | 139,080,700 | 15. 54 |
| Over $\$ 5,000,000 . . . . . . . . . . . . . . . . . . . .$. . | 6 | . 09 | 84,000,000 | 9.38 |
| Total. | 6,650 | 100.00 | 895,060, 125 | 100.00 |

At the close of the current report year the authorized capital stock of all national banks was $\$ 909,274,775$; circulation outstanding $\$ 562,727,614$, secured by bonds deposited to the amount of $\$ 566,994$, , 910. The aggregate circulation outstanding was $\$ 609,980,466$, which includes $\$ 47,252,852$, covered by lawful money deposited with the Treasurer of the United States on account of liquidating and insolvent banks and those reducing their circulation.

The interest-bearing bonded debt of the United States on October 31 was $\$ 858,685,510$, the amount and rate of interest of each class of bonds deposited to secure circulation, Government deposits, and the amounts not thus deposited being shown in the accompanying table.

| Class. | - | Bonds outstanding October 31, 1907. | Deposited to secure circulation. | Deposited to secure United States' deposits. | Bonds outstanding in excess of amounts deposited to secure circulation and United States' deposits. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Consols of 1930, 2 's. |  | \$646, 250, 150 | \$532,543,550 | \$65,996, 550 | 847,710,050 |

Changes in the amount and classes of bonds on deposit as security for circulation, on March 13, 1900, and October 31, 1903-1907, inclusive, are shown in the following table:

As will be seen from the subjoined table there was an increase in national-bank circulation between 1900-1907 of $\$ 355,900,000$, over 140 per cent. The act of March 14, 1900, limited the amount of $\$ 5$ notes that might be issued to one-third of the total amount issuable by each association. Immediately prior to this date notes of the denomination of $\$ 5$ represented 31.2 per cent of the total circulation outstanding, but on October 31, 1907, the proportion had been reduced to 19.7 per cent. The amount of $\$ 10$ notes was increased from $\$ 79,378,160$ to $\$ 249,946,530$, and the $\$ 20$ notes from $\$ 58,770,660$ to $\$ 183,416,620$.

## CIRCULATION BY DENOMINATIONS.

The amount of each denomination of notes outstanding March 13, 1900, October 31, 1906, 1907 and the total outstanding on each of the dates mentioned, together with the total amounts outstanding, secured by bonds and by lawful money, are set forth in the accompanying table.

| Denominations.a |
| :--- | :--- | ---: | ---: | ---: |

a Gold notes not included.

Amount of each denomination of circulation outstanding on October 31, 1907, the amount previously issued, together with total redemptions, are shown in the following table:

| Denominations. | Issued during the year. | Issued previous years. | Total issued to Oct. 31, 1907. | Total redeemed to Oct. 31, 1907. | Outstanding Oct. 31, 1907. |

| Total. |  |  |  | 3,192, 226, 523.50 | 609, 905, 441.50 |

Circulation outstanding, based on bonds deposited with the Treasurer of the United States in trust, represented 35 per cent of the maximum issuable on the amount of capital stock on March 14, 1900, but on October 31, 1907, approximately 62 per cent of the maximum issuable was outstanding.

The relative proportion of circulation issued by reserve city and country banks has varied but slightly during the past year, as appears from the accompanying table, based upon the periodical reports made by national banks.

| Date. | New York. | New York, Chicago, and St. Louis. | Other reserve cities. | All reserve cities. | Country. | Total. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| November 12...... | Millions. 52.0 | Millions. 76.8 | Millions. 121.2 | Millions. 198.0 | $\begin{array}{r} \text { Millions. } \\ 338.1 \end{array}$ | Millions. 536.1 |

| March 22... | 51. 8 | 75.3 | 125.5 | 200.8 | 342.5 | 543.3 |
| May 20. | 51.4 | 76.1 | 126.0 | - 202.1 | 345.8 | 547.9 |
| August 22. | 50.7 | 75. 4 | 125.9 | - 201.3 | 350.6 | 551.9 |

REDEMPTION OF CIRCULATION.
Receipts of national-bank notes for redemption at the Treasury redemption agency during the year ended October 31, 1907, amounted to $\$ 257,154,923$, of which $\$ 209,424,957$ were delivered to the Comptroller for destruction, and $\$ 39,903,555$ being in good condition, were returned to the banks of issue. The destructions represent 81.44 per cent of the receipts and the returns to the banks 15.51 per cent. The receipts at the agency varied from a minimum of $\$ 15,483,851$ in November, 1906, to a maximum of $\$ 31,730,178$ in January last, the average monthly receipts being $\$ 21,429,577$. Nearly 80 per cent of the aggregate receipts came from the central reserve cities, New York, Chicago, and St. Louis, and the reserve cities of Boston and Philadelphia. The receipts from the city of New York were in excess of 42 per cent of the total. The amount and per cent of receipts
from the cities named, and elsewhere, are stated in the following table:

National Bank Currency Received for Redemption, by the National Bank Redemption Agency, November 1, 1906, to November 3., 1907.

| Month. | Amount. | Month. | Amount. |
| :---: | :---: | :---: | :---: |

| March... | 18, 187, 816 | October.. | 19, 955,863 |

## RELATION OF NATIONAL-BANK CURRENCY TO MONEY IN THE UNITED STATES.

The outstanding circulation of national banks reached the lowest point in the life of the system, from 1865 to date, in 1891, amounting at that time to approximately $\$ 167,000,000$, and representing but 10 per cent of the stock of money in the United States. There was a variation of but 1 or 2 per cent from that date until 1900, when the proportion increased to 13.23 per cent. On June 30, 1907, nationalbank notes represented 19.38 per cent of the stock of money in the country.

## PROFIT ON CIRCULATION.

Approximately 97 per cent of the bonds on deposit as security for circulation on October 31, 1907, were 2 per cent consols of 1930, and 2 per cent Panama Canal bonds. Notes secured by these two classes of bonds are subject to a semiannual tax of but one-fourth of 1 per cent; hence the profit on the issue of notes so secured is materially greater than on notes otherwise covered. The average price of 2 per cent consols in October was 105.368, making the cost of $\$ 100,000$ worth of bonds $\$ 105,368$. Interest on the circulation at 6 per cent, and the interest on the bonds, show gross receipts of $\$ 8,000$. Deductions therefrom of the tax, redemption expenses, and sinking fund, aggregating $\$ 677.14$, give net receipts of $\$ 7,322.86$. Interest on the cost of bonds at 6 per cent amounts to $\$ 6,322.08$, the difference between which and the net receipts represents the measure of profit in excess of 6 per cent on the investment in bonds, namely $\$ 1 ; 000.78$, or 0.95 per cent.

## EARNINGS AND DIVIDENDS.

Up to September 1, 1906, reports of earnings and dividends of national banks were abstracted as of semiannual periods ending March 1 and September 1. In view of the fact that a great majority of the banks have fixed their dividend periods to end on June 30 and December 31, the current report contains abstracts for the four months ended December 31, 1906, and the six months ended June 30, 1907.

The average capital of the 6,043 banks, whose reports are included in the abstracts mentioned, was $\$ 842,685,939$, on which dividends were paid to the amount of $\$ 99,728,239$, an average of 11.8 per cent. The gross earnings are shown to have been $\$ 314,701,592$, against which were charged losses and premiums of $\$ 30,922,182$ and expenses of $\$ 131,543,975$, leaving the net amount of earnings $\$ 152,235,433$.

Supplementary to the semiannual abstracts, there appears in the appendix to the report of the Comptroller of the Currency a table relating to the capital and surplus, dividends, and net earnings of national banks, annually, for the years ended March 1, 1870, to March 1, 1906, to which has been added similar information covering the period from March 1, 1906, to June 30, 1907. In this period of sixteen months, on an average capital of $\$ 837,002,528$, dividends were paid to the amount of $\$ 144,376,245$, an average rate of 17.2 per cent. The average annual rate of dividends declared by national banks since March 1, 1869, is shown to have been 8.76 per cent, and the aggregate amount of dividends declared has reached a total of $\$ 1,925,088,959$ on average annual capital of $\$ 578,251,374$, the proportion of aggregate dividends to average capital being 333 per cent.

## EXPENSES OF NATIONAL BANKS.

In so far as the Department is concerned, the expenses of national banks are represented by the tax on circulation, cost of redemption of notes, assessments for plates, and examiners' fees. In the year ended June 30, 1907, these items aggregated $\$ 3,554,128.71$, of which $\$ 2,806,070.54$ represented the tax on circulation; $\$ 233,650.52$, cost of redemption; $\$ 89,250$, cost of plates for new associations and those extending their charters, and $\$ 425,157.65$ assessments for examiners' fees. The Treasury redemption agency states the cost of redemption per $\$ 1,000$ at 98.615 cents.

Expenses of banks for the items mentioned, and for the periods indicated, are shown in the accompanying statement:

| ital to June 1, 1883 | 4 |
| :---: | :---: |
| Tax on capital, under war-revenue a | 7, 048, 413. 00 |
| Tax on deposits to June 1, 1883 | 60, 940, 067.16 |
| Tax on circulation to June 30, 190 | 101, 536, 976. 32 |
| Total | 177, 381, 344.22 |
| Cost of redemption of notes, 1874-19 | Ј, 695, 609. 33 |
| Assessment for cost of plates for new banks, 1883-1907 | 658, 185.00 |
| Assessment for cost of plates for extended banks, 1874-1907 | 412, 595.00 |
| Assessment for examiners' fees | 5,519, 430.17 |
| ggregate taxes and oth | 189, 667, 163. 72 |
| Expenses of the Currency Bureau, including amount appropriated, and all other estimated | 22,572, 100.00 |
| Excess of receipts by the Government from the banks over expenses of the Bureau $\qquad$ | $37,095,063.7$ |

CHANGES IN TITLES OF NATIONAL BANKS.
During the year ended October 31, 1907, there were 13 changes of corporate titles of national banking associations, the banks concerned, the new and old titles, with date of approval of the changes, being shown in the following table:

| No. | Title and location. | Date. |
| :---: | :---: | :---: |
| 3598 | "The First National Bank of West Newton," Newton, Mass., to "The First National Bank of West Newton, Newton." Mass. | $\begin{aligned} & 1906 . \\ & \text { Dec. } \end{aligned}$ |
| 8018 | Bank of West Newton, Newton," Mass. <br> "The Stratford National Bank," Stratford, Tex., to "The First National Bank of Stratford," Tex. | Dec. 8 |
| 4044 | "The Exchange National Bank of Spokane Falls," Spokane, Wash., to "The Exchange National Bank of Spokane," Wash | $\begin{aligned} & \text { 1907. } \\ & \text { Jan. } 16 \end{aligned}$ |
| 4424 345 | "The National Bank of Waupaca," Wis., to "Old National Bank of Waupaca," Wis. <br> "The New York National Exchange Bank," New York, N. Y., to "Irving National Exchange Bank of New York," N. Y. | Jan. 17 Feb. 20 |
| 2522 | "The Citizens National Bank of Hornelisvilie," N. Y., to "The Citizens National Bank of Hornell," N. Y | Mar. 21 |
| 7027 | "The First National Bank of Greenwood," S. C., to "National Loan and Exchange Bank of Greenwood," S. C. | May 6 |
| 7503 | "The Hagerman National Bank," Hagerman, N. Mex., to "The First National Bank of Hagerman," N.Mex. | May 9 |
| 3755 | "The Citizens National Bank of Attica," Ind., to "The Central National Bank of Attica," Ind | June 7 |
| 6886 | "The Citizens National Bank of Lebanon," Va., to "The First National Bank of Lebanon," Va. | July ${ }^{\text {a }} 1$ |
| 3767 | "The Thomasville National Bank," Thomasville, Ga., to "The First National Bank of Thomasville," Ga. | July 20 |
| 8662 | "The First National Bank of Engle," N. Mex., to "The First National Bank of Cutter," N. Mex. . | Sept. 7 |
| 8617 | "The First National Bank of Sunnyside," N. Mex., to "The First National Bank of Fort Sumner," N. Mex. |  |

## EXTENSIONS OF CORPORATE EXISTENCE OF NATIONAL BANISS.

In the year just closed the corporate existence of 132 associations was extended under the act of July 12, 1882, and 4 reextended under the act of April 12, 1902. The total number of first extensions, from July, 1882, to 1907, was 2,582, and the total number of reextensions 961 . During the year terminating October 31, 1908, the period of existence of 86 banks will expire for the first time and that of 7 for the second time. Lists of both classes of banks, with dates of expiration of charters, will be found in the appendix of the report of the Comptroller of the Currency.

## LIQUIDATIONS.

Charters of 4 associations expired by limitation, and 80 associations were placed in voluntary liquidation, as provided by section 5220 of the Revised Statutes, during the past year. The aggregate capital of associations so closed was $\$ 11,745,000$. The business of 27 banks, with aggregate capital of $\$ 6,390,000$, was absorbed by other associations; 5 banks, including 4 the charters of which expired, were liquidated for the purpose of reorganizing; 38 were closed to reorganize as State banking institutions, and the remainder (14) closed to discontinue business.
The liquidating national banks, with date of authority to begin business, date of closing, capital stock, circulation issued, redeemed, and outstanding, are herewith listed.

National Banks Placed in Liquidation.

| Name and location of bank. | Date of closing. | Date of authority to commence business. | Capital stock. | Circulation. |  |  |

$a$ Resumed business Aug. 1, 1907. b Kesumed business Aug. 7, 1907. c Resumed business Aug. 12, 1907.
While the redemption at par of national bank circulation is assured by the banks, or, in the event of their failure, by the Government, from the proceeds of bonds held as security, every note issued during the existence of the system having been redeemed upon presentation, general creditors' reliance is based primarily on assets and secondarily on shareholders' liability, in case of insolvency. Upon the appointment of a receiver he is directed to convert the liquid assets into cash and take prompt action looking to the ultimate collection of remaining assets in order that, as speedily as practicable, dividends may be paid. As a rule the first and most substantial dividend is made within a brief period after the appointment of a receiver.

The average life of an active receivership is approximately four years, and the expense of administering a trust, salary, legal, and other incidental expenses, based upon the assets (nominal value) of banks, the affairs of which are closed, has been 4.30 per cent.

From the date of the first failure in 1865 to October 31, 1907, the affairs of 453 insolvent national banks have been administered through
the instrumentality of receiverships. Receivers have been appointed, however, for 475 banks, but of that number 22 were restored to solvency and authorized to resume business. The number of failures is only 5 per cent of the total number of banks chartered.

The aggregate capital of all insolvent national banks at date of failure amounted to $\$ 76,192,420$, against which assessments were levied to the amount of $\$ 42,141,240$, to provide for the estimated deficiency in the value of the assets. The liabilities in excess of circulating notes were represented by assets of the nominal value of $\$ 299,547,480$, claims proved to October 31, 1907, being $\$ 161,307,663$. The disposition of assets was as follows:

| Collections | \$146, 509, 297 |
| :---: | :---: |
| Offsets allowed and settled | 22, 602,597 |
| Loss on assets compounded or sold under order of court | 105, 557, 453 |
| Nominal value of assets returned to stockholders | 9, 526, 564 |
| Nominal value of the remaining assets | 15, 351, 569 |
| Total | 299, 547, 480 |

The assessment upon shareholders produced $\$ 20,575,420$, giving the total amount realized from assets and shareholders $\$ 167,084,717$. The collections have been disposed of as follows:

Dividends paid
\$117, 140, 338
Loans paid and other disbursements
Receivers' salaries and other expenses
Legal expenses
Returned to shareholders in cash
Balance with Comptroller or receivers
32, 769, 622
7,924, 828
4, 535, 777
2, 826, 222
1, 887, 930

Total
167, 084, 717
Up to and including October 31, 1907, the affairs of 387 insolvent national banks had been settled and the receivers discharged. The capital of these banks was $\$ 59,622,420$. United States bonds to the amount of $\$ 20,866,400$ held by the Treasurer of the United States in trust to secure circulation to the amount of $\$ 18,680,295$ were sold, the proceeds of which were $\$ 22,504,521.67$, leaving a balance which was transferred to the general assets of the trusts of $\$ 3,824,226.67$. The assessment of $\$ 36,246,390$ on stockholders produced $\$ 17,616,404$, which amount added to the collections from assets of $\$ 115,955,385$ gave $\$ 133,571,789$ as available funds, from which dividends were paid to the amount of $\$ 95,815,643$, or 74.37 per cent, the claims proved aggregating $\$ 128,847,308$. Taking into consideration offsets allowed and settled, and loans paid, etc., aggregating $\$ 43,433,718$; creditors received an average of 80.83 per cent.

In the appendix to the report of the Comptroller of the Currency, Table No. $\% 9$, are shown the amount of claims proved, amount and per cent of loss to creditors of insolvent national banks which failed in each year from 1865 to 1893, inclusive; claims proved and estimated loss from 1894 to 1907, together with the amount of individual deposits in active national banks at date of the October call in each year. A summary of this data gives the following results:
Annual average deposits, active national banks
\$1, 529, 339, 311
Aggregate claims proved, insolvent national banks 161, 307, 663
Loss to creditors, actual and estimated
47, 911, 583
1, 114, 223

3, 751, 341
Annual average loss, per cent
29. 70

Annual average loss, based on annual average deposits of active
banks, per cent
0.073

Aggregate liabilities of insolvent national banks, excluding circulating notes-that is, claims proved, offsets allowed and settled, loans paid and other disbursements-amount to $\$ 216,679,882$, making the annual average liabilities $\$ 5,039,067$, giving the annual average loss 22.11 per cent, but the same resultant ratio of loss to annual average deposits of active national banks as on the basis of claims proved, namely, 0.073 per cent.

The losses sustained by creditors of insolvent national banks that failed in each year from 1865 to 1907, the affairs of which have been settled, together with the percentage of losses to individual deposits (October call) of national banks in active operation, are shown in the table following:

| Year. |  | Number of national banks in operation. | Individual deposits. | Amount of loss to creditors insolvent national banks, affairs of which have been finally closed. | Ratio to deposits of active national banks. |
| :---: | :---: | :---: | :---: | :---: | :---: |

[^14]The following table relating to the aggregate liabilities, amount received by creditors, net loss, and per cent of loss to creditors of insolvent national banks, the affairs of which have been finally closed, by report years, 1865 to 1906, will be found of interest:

a None by averaging.

## ORGANIZATION OF NATIONAL BANKS.

National banking associations to the number of 8,937 have been chartered, of which 6,650 are in existence, and are located in 4,560 cities, towns, and villages; 2,287 have been closed, of which 1,663 were placed in voluntary liquidation, 171 terminated by expiration of charter, and 453 by failure. While there were 475 receiverships, the number of failures was 453 , as stated, as 22 associations placed in the charge of receivers were restored to solvency.
The law provides for the conversion of State banks into national banking associations resulting in the continuation of the identical corporation but with changed title and governmental supervision. State banks to the number of 1,345 with capital at date of conversion of $\$ 308,427,928$, entered the national banking system up to and including October 31, 1907.

As a result of legislation of March 14, 1900, authorizing the incorporation of national banks with minimum capital of $\$ 25,000$, the issue of circulation to the par of bonds deposited, and the reduction of tax on circulation when secured by 2 per cent consols, charters were granted to 2,389 banks with individual capital of less than $\$ 50,000$, the aggregate capital being $\$ 62,312,500$. During the same period 1,284 associations were organized under the act of 1864, with capital of $\$ 50,000$ or over, and with aggregate capital of $\$ 153,117,800$. The total number of banks chartered since 1900, under both acts, was 3,673 , with authorized capital of $\$ 215,430,300$. The number chartered in this period exceeds by 56 the number of banks in existence prior to March 14, 1900. These additions have been classed as conversions, reorganizations, and primary organizations, and of the first class there were 426 ; of the second, 1,183 ; and of the third, 2,064 .

During the past year 516 banks with aggregate capital of $\$ 24,967,000$ were chartered, of which 327 with aggregate capital of $\$ 8,557,000$ were organized under the act of March 14, 1900, and 189 with capital of $\$ 26,410,000$ under the act of 1864 . In the appendix of this report is given a list of banks chartered during the year, in each State and geographical division, chronologically arranged.

Information of interest is contained in the table following, relating to the number and capital, by classes, of associations organized in each State and geographical division, March 14, 1900, to October 31, 1907:

National Banks Organized from March 14, 1900, to October 31, 1907.

Great interest attaches to present conditions and those of 1900 with respect to capital stock, circulation, and number of national banks. By reference to the table following it will be noted that the number of banks in the system has increased from 3,617 to 6,650; the authorized capital from $\$ 616,308,095$ to $\$ 909,274,775$; circulation secured by bonds from $\$ 216,374,795$ to $\$ 562,727,614$, and the total circulation outstanding (secured by bonds and deposits of lawful money) from $\$ 254,402,730$ to $\$ 609,980,466$. The table in question includes corresponding statistics on October 31, 1905 and 1906, and is as follows:

|  | Mar. 14, 1900. | Oct. 31, 1905. | Oct. 31, 1906. | Oct. 31, 1907. |
| :---: | :---: | :---: | :---: | :---: |

## BANIS AND BANKING IN THE DISTRICT OF COLUMBIA.

As the result of liquidation of the Central National Bank of Washington, for consolidation with the National Bank of Washington, the number of associations in the District has been reduced to 12 , but there has been no change in the authorized capital stock by reason of the fact that the absorbing bank increased its capital to the extent of that of the Central National. The capital of these 12 associations is $\$ 5,402,000$. The authorized capital of the trust companies in the District was increased during the year to the extent of $\$ 1,000,000$ by the organization of the United States Trust Company. Corporations of this character to the number of 5 , with authorized capital of $\$ 7,200,000$, are now in existence. There are also in operation in the District 11 banks, organized under State Laws, and 1 savings bank, organized under the District Code. These concerns are generally known as saving banks, all paying interest on deposits and at an average rate of approximately 23 per cent. There have been no failures nor suspensions of banks in the District during the year. The affairs of the Peoples Savings Bank, which institution failed in

[^15]claims in full. Thé Ætna Banking and Trust Company, a West Virginia concern, which failed in 1906, is still in charge of a receiver, through whom a dividend has been paid to the extent of 20 per cent, mainly from funds obtained from a Montana stockholder, who was largely interested in a branch of the bank at Butte.

In the annual report for the year 1905 attention was called to the urgent necessity for enactment of a law regulating banking institutions within the District. Contrary to the custom of other communities in modern times, banks operating under foreign charters were not required to make reports of condition, were not subject to any examination and were permitted to invite and receive deposits without any restrictions whatever as to their reserve fund, their loans, or the amount and character of their investments. This has been partly remedied. By act of Congress of June 25, 1906, all banks deriving their charters either from Congress or from any of the States of the Union having an office or bank in the District of Columbia where deposits or savings are received are required to make reports of their condition, are subjected to examination by the Comptroller of the Currency, and are liable to be closed by him "for the reasons and in the manner and to the same extent as are provided in the laws of the United States with respect to national banks." This law gives the Comptroller power to ascertain the condition of the banks within the District and to close any found to be actually insolventbut nothing more. It left the banks free to engage in hazardous or even illegal practices with perfect immunity, so long as they managed to keep the capital required by their charters unimpaired. Upon the first examination made by the Comptroller after the passage of the act one institution was found to be completely wrecked. Although having the name and appearance of a banking institution, it was, strictly speaking, not a "bank." Among other reprehensible practices, acting strictly within the terms of its charter and unforbidden by any law of Congress, it guaranteed payment of bonds issued. by any corporation which could succeed in raising sufficient money to pay the price of guaranty. Attractively engraved bonds, calling for enormous amounts of money, are now held by innocent holders in many parts of the United States, guaranteed by the 灰tna Banking and Trust Company and issued by corporations which had no existence except on paper. In the absence of a law regulating banking in the District of Columbia, the Comptroller can not prevent the inevitable result of such perversionis of legitimate banking. Until actual insolvency occurs, or at least until the bank's capital is impaired, he is powerless to act. It can hardly be doubted that the ※tna Banking and Trust Company was attracted to the District of Columbia by the exceptional advantages offered here to such a concern. Under the laws regulating banking in the State where its charter was obtained its hazardous schemes were much restricted, and it did no business there.
In the annual report for 1906 the attention of Congress was again called to the pressing necessity for the passage of a law providing for the punishment of criminal offenses committed by officers and employees of banking institutions. So far as known no State in the Union has failed to protect depositors against the evils of unrestricted banking and the special temptations offered to those who are intrusted
with the savings of its citizens. No doubt many are lulled into a false sense of security by the law giving the Comptroller authority to examine the banks and to close them when insolvent. Not infrequently a bank in the District advertises that it is under the supervision of the Comptroller of the Currency. Such an advertisement encourages the idea that the bank is guarded by all the provisions of the national-bank act regulating the method of banking, whereas in fact the provisions of that act for the prevention of hazardous risks and a safe reserve have no application to banking institutions other than national banks. The necessity for appropriate legislation on this subject can not be emphasized too strongly.

The principal items of resources and liabilities, in million dollars, of banks subject to the supervision of the Comptroller, in operation in the District, on or about June 30, 1907, were as follows:

| Items. | National banks. | Trust companies. | Savings banks. | 'Total. |
| :---: | :---: | :---: | :---: | :---: |
| Loans and discounts. | 22. 4 | 19.5 | 4. 3 | 46.2 |

BANIS AND BANKING IN OKLAHOMA.
By proclamation of the Executive, dated November 16, 1907, Oklahoma and Indian Territories entered the Union as the State of Olilahoma, with an area of 70,430 square miles and a population, officially stated, of 1,414, 177. In these Territories on August 22, 1907, there were 304 national banks, with aggregate capital of $\$ 12$,012,500 , individual deposits of $\$ 11,800,000$, and resources of $\$ 72,100$,000. In addition, Territorial and private banks to the number of 370 were reported in June last, with individual deposits of $\$ 16,155-$ 517; aggregate resources, $\$ 23,215,819$, making 674 banks in these Territories, with combined capital of $\$ 16,866,625$; individual deposits, $\$ 57,900,000$; and aggregate resources, $\$ 95,300,000$.

Inquiries have been submitted by national banks organized in these Territories as to their corporate rights and necessity for action by stockholders and directors as a result of their admission as the State of Oklahoma, in reply to which the correspondents have been informed that the laws have been construed as requiring no action whatever on the part of either body, as the associations will continue to enjoy all the rights and privileges granted and be subject to all the duties, liabilities, and restrictions imposed by the laws under which charters were granted. This is the position taken when other Territories were admitted into the Union as States.

As rapidly as the work can be accomplished the Bureau of Engraving and Printing will change, at the expense of the Government, all plates for printing of national-bank notes for these Territoral banks to show the location as the State of Oklahoma and the date of the change as November 16, 1907.

STATE, SAVINGS, AND PRIVATE BANKS AND LOAN AND TRUST COMPANIES.
As required by law, a general statement of the resources and liabilities and condition of banks and banking institutions other than national, namely: State, savings, private banks, and loan and trust companies, is presented herewjth. Through the courtesy of State officers having supervision of these institutions, official returns have been obtained from each State and Territory except Arkansas, Indian Territory, Nevada, Alaska, and Hawaii.

Summaries of this information, at the close of the fiscal year ended June 30, 1907, show that there were in operation 13,317 banks other than national, with aggregate resources of $\$ 11,168,514,516$, being an increase of 1,465 banks and over $\$ 805,000,000$ in resources reported the previous year. The returns include 9,967 commercial banks, 794 loan and trust companies, 1,415 savings banks (of which 678 were of the mutual class, i. e., without capital stock), and 1,141 private banks.

Capital stock of the State banks is $\$ 471,663,037$, individual deposits $\$ 3,068,649,860$, and surplus and undivided profits $\$ 281,251,478$. Loans aggregate $\$ 2,531,627,320$, investments in stocks, bonds, and other securities, $\$ 489,504,637$, and total resources, $\$ 4,119,190,337$, an increase in resources of $\$ 442,140,020$ over 1906.

Reports received from 794 loan and trust companies show aggregate resources of $\$ 3,071,419,360$ against 742 companies with aggrêgate resources of $\$ 2,959,230,534$ in 1906 , a gain of $\$ 112,188,826$. In resources of loan and trust companies during the year ended June 30, 1906, there was a gain of $\$ 93,254,055$. Figures relating to trust companies for 1907 do not include the returns from California, which are incorporated with the returns for State banks furnished by the board of bank commissioners of that State and not reported separately. Resources of loan and trust companies of California in 1906 aggregate $\$ 44,142,931$. The resources in detail of all reporting trust companies compared with 1906 are: Loans $\$ 1,602,024,555$, against $\$ 1,610,407,833$, a loss of $\$ 8,383,278$, and investments in bonds and other securities $\$ 785,999,670$, against $\$ 760,285,420$, a gain of $\$ 25,714,250$. Capital stock of these institutions as reported for June 30,1907 , shows a gain of $\$ 7,761,744$, being $\$ 276,146,081$ as against $\$ 268,384,337$. Surplus and undivided profits, which in 1906 amounted to $\$ 395,373,620$, are now reported at $\$ 397,865,026$, a gain of $\$ 2,491,406$, while the gain in surplus profits in 1906 over 1905 was approximately $\$ 32,000,000$. Individual deposits have increased from $\$ 2,008,-$ 937,790 in 1906 to $\$ 2,061,623,035$ in 1907, a gain of $\$ 52,685,245$. The gain in 1906 over 1905 in individual deposits was approximately $\$ 28,000,000$.

Reports were obtained from 1,141 private banks and bankers, with aggregate resources of $\$ 195,031,619$. In 1906 reports were received from 929 private banking concerns, with resources of $\$ 144,045,800$, the increase for the current year being about $\$ 51,000,000$. Loans and discounts of the reporting private banks aggregate $\$ 132,790,691$; investments in stocks, bonds, and other securities, $\$ 9,734,772$, and amounts deposited in other banks, $\$ 31,424,217$. The capital reported by private banks and bankers amounts to $\$ 25,144,822$; surplus and profits, $\$ 10,842,313$, and individual deposits, $\$ 151,072,225$.

Statistics submitted. with respect to the amount and average rate per cent of dividends paid by State banks, private banks, and loan
and trust companies for the year ended June 30, 1907, will be found in the appendix to the report of the Comptroller of the Currency. Reports covering the subject were received from 1,394 State banks, with capital of $\$ 120,640,007$, showing the payment of dividends to the amount of $\$ 11,514,171$, or an average of 9.54 per cent; from 602 loan and trust companies, which paid dividends amounting to $\$ 22,996,437$, or 10.38 per cent on capital stock of $\$ 221,403,067$; and from 103. private banks, with capital of $\$ 4,963,666$, on which dividends aggregating $\$ 620,7 \tau 0$, or 12.51 per cent, were paid. Similar statistics for 1906 show that State banks paid an average of 9.02 per cent in dividends; loan and trust companies, 9.64 per cent, and private banks, 14.05 per cent.

CONSOLIDATED RETURNS FROM STATE, SAVINGS, AND PRIVATE BANKS AND LOAN AND TRUST COMPANIES.

A table showing the principal items of resources and liabilities of banks other than national in the years 1900 and 1904 to 1907 is submitted herewith for the purpose of comparison:

| Item. | 1900. | 1904. | 1905. | 1906. | 1907. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Loans. | \$3, 013, 449, 827 | \$4, 360, 209, 382 | \$5, 097, 761, 364 | \$5,656, 832, 201 | 86, 099, 897, 535 |
| Bonds | 1,723, 830,351 | 2,522,890,815 | 2, 748, 447, 464 | 2, 790, 159, 501 | 2,931,506, 252 |
| Cash. | 220, 667, 109 | 301, 578, 011 | 314, 248, 369 | 334, 938, 185 | 391, 847, 497 |
| Capital.................. | 403, 192, 214 | $625,116,824$ | 671, 599, 149 | 739, 163, 401 | 807, 178, 262 |
| Surplus and undivided profits. | 490,654,957 | 779, 241, 781 | 824, 243, 066 | 893, 679, 524 | 924, 655, 010 |
| Deposits. | 4,780, 893, 692 | 6,688, 107, 157 | 7,567, 080, 822 | 8,159,894,029 | 8,776,755, 207 |
| Resources. | 5, 841, 658, 820 | 8,542,839,386 | 9,590, 401, 009 | 10,363, 350, 846 | 11, 168,514, 516 |

The foregoing statements indicate an increase in aggregate resources in 1907 over 1906 of $\$ 805,163,670$, of $\$ 772,949,837$ in 1906 over 1905 , of $\$ 947,561,623$ in 1905 over 1904 , and of $\$ 5,326,855,696$ since 1900 , a gain of over 91 per cent in seven years. Loans and discounts have increased during the year over $\$ 443,000,000$ and individual deposits approximately $\$ 617,000,000$ as against an increase in deposits of $\$ 559,000,000$ and $\$ 593,000,000$, respectively, in 1906 over 1905.

A statement showing the principal items of resources and liabilities of national banks from reports of condition on May 20, 1907, and of all other reporting banks and banking institutions on or about June 30 , separately and in the aggregate, is presented herewith:

| Classification. | $\begin{gathered} 6,429 \\ \text { national } \\ \text { banks. } \end{gathered}$ | 13,317 State, etc., banks. | Total, 19,746 banks. |
| :---: | :---: | :---: | :---: |
|  | Millions. | Millions. | Millions. |
| Loans. | \$4, 664.0 | \$6, 099.9 | \$10,763. 9 |
| United States bonds. | 671.1 | 22.7 | 693.9 |
| All other bonds. | 774.4 | 2,908.8 | 3,683.2 |
| Cash | 721.9 | 391.8 | 1,113.7 |
| Capital stock | 883.7 | 807.1 | 1,690.8 |
| Surplus and profits | 720.4 | 924. 6 | 1,645. 0 |
| Deposits (individual) | 4,322.9 | 8,776. 7 | 13, 099.6 |
| Aggregate resources. | 8,476.5 | 11,168.5 | 19,645.0 |

From the furegoing statement it appears that over two-thirds of the amount of individual deposits and the same proportion of investments in bonds, etc., in all reporting banks are held by banks other
than national. About 56 per cent of the aggregate loans, of the surplus profits, as well as the total resources, are credited to this class of banks, while they have only about 48 per cent of the capital and 35 per cent of the cash holdings of all banks.

Tables I to IV in the appendix to the report of the Comptroller of the Currency show by States the resources and liabilities in detail of the several classes of banks other than national from reports on or about June 30, 1907, and Tables V to VIII, inclusive, the aggregate resources of the several classes of banks annually from 1903 to 1907.

The following table is a summary of reports received for the year 1907 from State banks, loan and trust companies, savings and private banks:

Resources and Liabilities of State Banks, Loan and Trust Companies, Savings and Private Banks, 1907.

|  | 9,967 State banks. | 794 loan and trust companies. | 1,415 savings banks. | $\begin{aligned} & \text { 1,141 pri- } \\ & \text { vate } \\ & \text { banks. } \end{aligned}$ | Total, 13,317 banks. |

| Other liabilities | 85, 870, 952 | 167,620,993 | 10,363, 323 | 4,996, 234 | 268, 851, 502 |
| Total. | 4, 119, 190, 337 | 3, 071, 419, 360 | 3,782, 873,200 | 195, 031, 619 | 11, 168, 514,516 |

Table XXI in the appendix to the report of the Comptroller of the Currency is a statement of the resources and liabilities of the first bank of the United States for 1809 and 1811, and Table XXII a statement of the second bank of the United States for the years 1817 to 1840 , inclusive. Table XXIII shows the number of colonial and State banks, their capital, circulation, deposits, specie, and loans for the years indicated from 1774 to 1833.

The principal items of resources and liabilities of State banks, by years, from 1834 to 1872 and from 1873 to 1907, inclusive, are shown in Tables XXIV and XXV of the appendix; Table XXVI is a statement of the principal items of resources and liabilities of State, savings, and private banks, loan and trust companies, and national banks, from 1864 to 1907, inclusive. By reference to Table XXVI it will be noted that the aggregate resources of all banks reported at $\$ 7,822,100,000$ in 1897 is ṣhown to be $\$ 19,645,000,000$ for the present-
year, an increase of $\$ 11,823,000,000$ for the decade, or an average increase of $\$ 1,182,300,000$ annually. The largest increase in any one year during this period was in 1905, when the gain in resources over the prior year was $\$ 1,719,400,000$. The increase in the resources of all reporting banks for the year ended June 30, 1907, aggregates \$1,497,400,000.

## SAVINGS BANKS.

Savings bank reports to the number of 1,415 have been received, of which 678 are from mutual institutions and 737 from stock savings banks, the latter being operated for the benefit of both the shareholders and depositors. The principal items of resources and liabilities of savings banks, both mutual and stock, are as follows:

Compared with 1906 these figures show increases in loans of $\$ 156,525,954$; investments in bonds, stocks, and other securities, $\$ 36,491,591$, and deposits, $\$ 195,865,486$. Aggregate resources have increased in the sum of $\$ 199,849,005$. The increase in deposits during the year ended June 30, 1907, was somewhat less than shown for the year ended June 30, 1906, but the increase in loans appears to have been about $\$ 14,000,000$ greater than in 1906.
In the following table is given a comparative statement of the number of depositors, amount of deposits, and the average savings deposit in savings banks in the States named for the years 1906 and 1907. Included in this table are deposits in savings departments of commercial banks in operation in the State of Illinois, for the reason that the auditor of public accounts of that State in his periodical statements reports such deposits separate from deposits subject to check. The result of the addition of Illinois savings deposits is the raising of the aggregate savings deposits of the United States to $\$ 3,690,078,945$, the number of depositors to $8,588,811$, the average deposit being $\$ 429.64$.
Number of Savings Depositors, Aggregate Savings Deposits, and Average amount dué to Depositors in Savings Baniss in each State in 1906 and 1907.

c Included in abstract of State banks having savings departments.
MUTUAL SAVINGS BANKS.
All mutual savings banks are in operation in the New England and Eastern States, with the exception of 25 located as follows: One in West Virginia, 3 in Ohio, 5 in Indiana, 2 in Wisconsin, and 14 in Minnesota. The number of reporting institutions is 678 , the same number as reported last year. As shown by Table IV in the appendix to the report of the Comptroller of the Currency, the aggregate resources of mutual savings banks is $\$ 3,274,988,205$, or a gain of $\$ 140,396,980$ since June 30, 1906. Loans and discounts are $\$ 1,491,788,174$, classified as follows: On real estate, $\$ 1,212,085,499$; other collateral security, $\$ 60,972,643$; other nonclassified loans, $\$ 218,830,032$. Compared with 1906 , real estate loans have increased approximately $\$ 62,000,000$; loans on other collateral, $\$ 14,000,000$, and unclassified loans, $\$ 40,500,000$. The amount invested in bonds, stocks, and other securities has increased from $\$ 1,522,989,449$ in 1906 to $\$ 1,554,409,273$ in 1907, a gain of over $\$ 31,000,000$. The investments in bonds and other securities are as follows:

Bank stocks
Other stocks, bonds, and securities 290, 014, 704

Cash in bank amounts to $\$ 18,040,966$, an increase of only $\$ 669,981$ over the amount reported in 1906. Cash on deposit with other banks is $\$ 111,962,341$, or $\$ 5,878,486$ less than was shown by the reports for 1906. Individual deposits have increased from $\$ 2,908,710,654$ in 1906 to $\$ 3,055,287,322$, a gain of $\$ 146,576,668$. Deposits are credited to $7,071,219$ depositors, the number reporting for 1906 being $6,753,037$,
a gain in 1907 of 318,182 . The average deposit account has increased during the same period from $\$ 430.73$ to $\$ 432.07$. Reports from each State having this class of banks show large increases both in number of depositors and amount of deposits, the largest gain during the year being in New York, where a gain of 103,573 depositors and $\$ 59,200,000$ in deposits is shown.

Comparing the average deposit account in the mutual savings banks by geographical sections, it will be noted that the average for the New England States is $\$ 395.72$, against $\$ 391.04$ in 1906 ; for the Eastern States, $\$ 464.93$, against $\$ 446.91$ in 1906 . In the Middle States the average deposit it $\$ 395.76$, against $\$ 392.42$ in 1906. The one mutual savings bank in West Virginia, being the only bank of this class reporting from the Southern States, gives the average deposit account as $\$ 210.37$, against $\$ 206.30$ in 1906 . It will be noted that the average deposit account in the Eastern States this year is less by $\$ 1.98$ than in 1906. This decrease is caused by the fact that unofficial returns from savings banks of Maryland for the present year were incomplete as to the number of depositors; the number had to be partially estimated from the returns received. The result shows a greater ratio of increase in depositors than in deposits.

## STOCK SAVINGS BANKS.

Returns have been received from 737 stock savings banks located in the District of Columbia, North Carolina, South Carolina, Iowa, and California, stock savings banks said to be in existence in other States being included with the returns for State banks received from those States. Resources of these banks amount to $\$ 507,884,995$, a gain of $\$ 59,452,025$ over 1906. Loans aggregate $\$ 341,566,795$; investments in stocks, bonds and other securities, $\$ 91,857,900$; deposits with other banks, $\$ 51,381,041$; and cash on hand $\$ 9,365,962$. The capital is $\$ 34,224,322$; surplus and undivided profits, $\$ 20,410,634$; deposits, $\$ 440,122,765$; number of depositors, 911,674 ; and the average deposit $\$ 482.76$. Compared with the returns for 1906 loans have increased $\$ 40,219,846$; investments in bonds, etc., $\$ 5,071,767$; and cash on deposit with other banks augmented to the extent of $\$ 12,457,350$. Capital stock has gained $\$ 5,327,955$ and individual deposits have increased from $\$ 390,833,947$ to $\$ 440,122,765$, a gain of $\$ 49,288,818$. The number of depositors-estimated at 742,165 in 1906, now estimated to be 911,674 -shows a gain of 169,509 for the year. The exact number of depositors is given only in the District of Columbia; those for the four States named are partially estimated, the estimate being based upon unofficial returns from such banks as reported that information.

## ALL SAVINGS BANKS.

The number of depositors in savings banks reporting (exclusive of those having accounts in savings departments of the State banks of Illinois) has increased since 1900 from $5,898,091$ to $7,982,893$, and the average deposit from $\$ 404.33$ to $\$ 437.86$. For the current year the number of depositors has increased by 487,691 , but the average deposit account appears to have slightly decreased, being now $\$ 437.86$, against $\$ 440.22$ in 1906. The total number of savings depositors, including those in Illinois State banks having savings departments,
has increased from $8,027,192$ in 1906 to $8,588,811$ in 1907, and the average amount to the credit of each depositor estimated at $\$ 433: 79$ in the former year is $\$ 429.64$ this year. Aggregate deposits, which were $\$ 3,482,137,198$ in 1906 , are now $\$ 3,690,078,945$, an increase of \$207,941,747.
The following table shows the growth of savings banks in the United States from 1820 to 1907, as evidenced by the amount of deposits, number of depositors, average deposit account, and the average per capita in census years from 1820 to 1890 and annually thereafter. The figures given, however, include the number of to 1907, together with aggregate capital, assets, liabilities and diviings departments, but not the number of such banks, by reason of the fact that general reports from these institutions are incorporated with State bank returns.

Number of Savings Baniss in the United States, Number of Depositors, amount of Savings Deposits, Average amount due each Depositor in the Years 1820, 1825, 1830, 1835, 1840, and 1845 to 1907, and Average per Captta in the United States in the Years Given.

## INTEREST RATES PAID BY SAVINGS BANKS.

From an examination of the returns submitted with respect to the rate of interest paid on savings accounts it will be noted that the maximum rate is 4.50 per cent, the minimum rate 2.72 , and the estimated average rate is 3.615 , a slight increase over the estimated average interest of 3.545 per cent in 1906. Average rate of interest paid depositors in mutual savings banks of the New England States is 3.66 per cent, in the Eastern States 3.50 per cent, and in the Middle Western States 3.86. The average rate of interest paid by all reporting mutual savings banks is 3.72 per cent.

## STATE AND PRIVATE BANK FAILURES.

Information relating to the number, assets, and liabilities of State and private banks which failed in the year ended June 30, 1907, has been furnished this office through the courtesy of the Bradstreet Commercial Agency. The total number of failures during the year was 34 , the assets of the banks being $\$ 13,037,497$ and liabilities $\$ 22,165,448$. For the year ended June 30,1906 , there were 37 failures of banks of this character, with assets of $\$ 6,591,515$ and liabilities of
$\$ 7,187,858$. Included in the 34 failures of banks in 1907 were 10 State banks, 4 trust companies, and 20 private banks. The failures by geographical sections were as follows: New England States, 2; Eastern States, 8; Southern States, 3; Middle Western States, 9 ; Western States, 8, and Pacific States, 4 .
The number of banks of this class that failed annually from 1864 to 1907, together with aggregate capital, assets, liabilities and dividends paid from 1864 to 1896, are shown in the following table:

Number of Failures, Capital, Assets, Liabilities, and Dividends Paid by State and Private Banks that falled in each Year from 1864 to 1907.

| Year. |  | Capital. | Nominal assets. | Liabilities. | Dividends paid. |

## INDIVIDUAL DEPOSITS IN BANKS OF THE UNITED STATES.

Individual deposits in all reporting banks in 1900 aggregated $\$ 7,238,986,450$; for the current year individual deposits in all reporting banks aggregate $\$ 13,099,635,348$, a gain of over $\$ 5,860,000,000$ within the past seven years, or 80 per cent. During the current year
there has been a gain of approximately $\$ 884,000,000$, or 7.23 per cent. The compilation of returns for the years 1900, 1904, 1905, 1906, and 1907 for each State and geographical division, showing the amount of individual deposits in each class of banks, will be found in the appendix, and a summary for the years named, by geographical divisions, is presented in the accompanying table:

| Location and class of banks. | Individual deposits. |  |  |  |  |

$a$ Statements for $\Delta$ pril 6, 1906.
The following table shows the amount of individual deposits in national and other reporting banks by geographical divisions on or about June 30, 1906, and 1907, together with the amount and per cent of increase :

| Geographical Division. | Individual deposits. |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |
|  | 1906. | 1907. | Increase. | Por cent of increase. |
|  | Millions. | Millions. | Millions. |  |
| New England States. | \$1,869.0 | \$1,959.3 | \$90.3 | 4.83 |
| Eastern States.. | 5,411.8 | 5,597. 1 | 185.3 | 3.42 |
| Southern States. | 882.3 | 1,008.4 | 126. 1 | 14.29 |
| Middle Western States | 2,729.4 | 3,036.9 | 307.5 | 11.27 |
| Western States........ | 206.1 | ${ }^{6} 07.2$ | 101.1 | 19.98 |
| Pacific States.. | 797.5 | 868.4 | 70.9 | 8.89 |
| Islands........ | - 19.7 | 22.3 | 2.6 | 13.20 |
| Total. | 12,215. 8 | 13,099.6 | 883.8 | 7.23 |

From the foregoing it will be noted that the highest record of increase in deposits in the year ended June 30, 1907, was made by banks in the Western States, individual deposits in that section haviing increased nearly 20 per cent during the year. Statistics from all the States in this section show increases in individual deposits far above the average of 7.23 per cent for the whole country. Deposits in two of these States increased during the year 25 per cent or more, viz, South Dakota 25 per cent and New Mexico 26 per cent. In Oklahoma and Indian Territory the increase was 35 per cent and 36 per cent, respectively. . The average individual deposit in the United States per capita of population has risen from $\$ 65$ in 1896 to $\$ 95$ in $1900, \$ 122$ in 1904, $\$ 136$ in 1905, $\$ 144$ in 1906, and $\$ 152$ in 1907, or an average increase per capita of about $\$ 8$ annually.

The following table shows the amount and per cent of deposits held by the several classes of banks in 1900, 1906, and 1907:

| Classification. | 1900. |  | 1906. |  | 1907. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Amount. | Percent. | Amount. | Per cent. | Amount. | Percent. |
|  | Millions. |  | Millions. |  | Millions. |  |
| State banks. | 81,266.7 | 17.5 | \$2,741. 5 | 22.5 | \$3,068. 6 | 23.4 |
| Savings banks. | 2,389.7 | 33.0 | 3,299. 5 | 27.0 | 3,495. 4 | 26.7 |
| Private banks. | 96.2 | 1.3 | 109.9 | . 9 | 151.1 | 1.2 |
| Loan and trust companies | 1,028 2 | 14.2 | 2,008. 9 | 36.4 | 2,061. 6 | 15.7 |
| National banks..... | 2,458.1 | 34.0 | 4,055.9 | 33.2 | 4,322.9 | 33.0 |
| Total. | 7,238.9 | 100.0 | 12,215. 7 | 100.0 | 13,099.6 | 100.0 |

It will be noted that in 190034 per cent of all individual deposits were held by national banks, 33 per cent by savings banks, 17.5 per cent by State banks, 14.2 per cent by loan and trust companies, and 1.3 per cent by private banks. For the current year national banks hold 33 per cent, savings banks 26.7 per cent, State banks 23.4 per cent, loan and trust companies 15.7 per cent, and private banks 1.2 per cent. From the table it thus appears that the percentage of deposits in State banks increased from 17.5 in 1900 to 22.5 in 1906 and to 23.4 in 1907 ; that savings-bank deposits decreased from 33 per cent in 1900 to 27 per cent in 1906 and to 26.7 per cent in 1907. The percentage in trust companies rose from 14.2 in 1900 to 16.4 in 1906, but declined to 15.7 in 1907. Deposits in national banks declined eighttenths of 1 per cent between 1900 and 1906 and two-tenths of 1 per cent from 1906 to 1907, these associations holding, however, in each year approximately one-third of the deposits in all reporting banks.

The following comparative statement showing the increase in population, individual deposits, and money in circulation in the United States for 1900, 1906, and 1907 is of interest:

|  | 1900. | $1906 .$ | 1907. | Increase 1900 to 1907. |  | $\begin{gathered} \text { Increase } 1906 \\ 1907 . \end{gathered}$ |  |

## BANIK RESOURCES.

Table XII in the appendix to the report of the Comptroller of the Currency shows the average per capita of resources of each class of banks, State and national, and the per capita of all banks, arranged by States and geographical sections. The average per capita of bank resources in the United States, exclusive of island possessions, is $\$ 228.58$, a gain of $\$ 13.89$ during the year, in 1906 the average per capita for the United States being $\$ 214.69$. Geographically the largest gain during the year was in the Pacific States, where the per capita increased from $\$ 319.55$ in 1906 to $\$ 345.82$ in 1907, a gain of $\$ 26.27$. Next in order, the Middle States increased from $\$ 164.24$ to $\$ 183.31$, a gain of $\$ 19.07$, the New England States being third with an increase of $\$ 15.42$, or from $\$ 393.2$ to $\$ 408.67$. The per capita gain in the Western States was $\$ 14.43$, or from $\$ 131.41$
in 1906 to $\$ 145.84$ for the present year. Eastern and Southern States show tne lowest per capita gain for the year- $\$ 10.47$ and $\$ 8.07$, respectively. The per capita of the Eastern States is now $\$ 438.33$, against $\$ 427.86$ in 1906 , and in the Southern States it is now $\$ 69.32$, against $\$ 61.25$ last year. The State of New York has the largest per capita of bank resources, or $\$ 648.87$, California is next with $\$ 532.40$, and Rhode Island third, with $\$ 486.70$. Total resources of all banks, including those in the island possessions, on or about June 30, 1907, were $\$ 19,645,015,950$. The population of the United States, as estimated by the Government actuary at $85,754,000$ on June 1 , has been used in making the above calculations.

## GROWTH OF BANKING IN THE UNITED STATES.

The following table shows the growth of banking in the United States, including island possessions, as indicated by the number of banks, capital stock, and individual deposits, from 1902 to 1907 :

From returns to this office on May 20, 1907, it appears that there were in operation 6,429 national banking associations with capital of $\$ 883,690,917$ and individual deposits of $\$ 4,322,880,141$. On or about June $30,{ }^{\prime} 1907$, there were in operation 13,317 State, savings, private banks, and loan and trust companies reporting aggregate capital and deposits of $\$ 807,178,262$ and $\$ 8,776,755,207$, respectively, and nonreporting banks to the number of 4,191 with capital and deposits esti-
mated at $\$ 92,357,000$ and $\$ 554,900,000$, respectively, or a total of 23,937 banks and banking institutions with capital of $\$ 1,783,226,179$ and deposits of $\$ 13,654,535,348$. Since 1902 the increase in the number of banks has been 7,781. Capital stock has increased in the sum of $\$ 443,065,763$ and individual deposits $\$ 4,071,219,570$.

In 1902 national bank capital represented 52.4 per cent, and deposits 32.3 per cent of aggregate capital and deposits, respectively. of all reporting banking institutions. The percentage of capital of national banks to capital of all banks in 1906 was 50.23 and deposits 32.12. For the present year the percentage of capital is 49.56 and of deposits 31.66 . During the period from 1902 to 1907 the percentage of capital of banks other than national to the capital of all banks has increased from 47.06 to 50.44 per cent, and the percentage of individual deposits in such banks from 67.7 to 68.34 per cent. In 1904 there was in operation in the United States one bank for every 4,897 inhabitants, in 1905 one for every 4,182 , in 1906 one for every 3,956 and for the present year one for every $3,595$.

## banks and banking in the island possessions.

## Philippines.

There were in operation in the Philippines on June 30, 1907, the following banks: Banco Español-Filipino at Manila, and the Iloilo subagency; the Manila agency and the Cebu subagency of the Chartered Bank of India, Australia, and China; the Manila agency and the Iloilo subagency of the Hong-Kong and Shanghai Banking Corporation; the International Banking Corporation at Manila and its Cebu subagency; the Monte de Piedad Savings Bank at Manila; the Bank of Zamboanga at Zamboanga, and postal savings banks, the latter referred to elsewhere only.

The treasurer of the Philippine Archipelago is required by law to make examinations of these banking institutions and to obtain from them periodical statements of their condition. These statements are forwarded to the Insular Bureau of the War Department, and the reports of condition under date of June 29, 1907, have been submitted by that bureau to this office for use in connection with this report.

A summary of the returns from the Philippine banks on. June 29, 1907, together with individual statements made to the treasurer of the Pbilippines under that date, appears in the appendix to the report of the Comptroller of the Currency.

The resources of the ten banking institutions named aggregate $\$ 19,560,412$, or an increase of $\$ 2,200,929$ as compared with the returns submitted in 1906. The principal items of resources and liabilities are:

| Loans and discounts, including | \$9, 749,492 |
| :---: | :---: |
| Philippine and other currency | 4, 367, 168 |
| Due from banks and agencies | 1,919, 569 |
| Capital stock paid in | 1, 399, 136 |
| Surplus and undivided profits | 1,319, 574 |
| Bank notes outstanding | 729, 513 |
| Deposits, including deposits of insular treasurer | 9, 172, 295 |
| Bank depo | 4, 666, 663 |

Comparing these returns with those submitted to this office in June, 1906, loans and discounts show an increase of $\$ 46,183$, currency in bank has increased in the sum of $\$ 2,074,215$, surplus and profits
13091-H. Doc. 9, 60-1——28
show an increase of $\$ 95,344$, and deposits $\$ 1,831,326$. The items which show a decrease are: Due from banks and agencies by $\$ 330,009$, bank notes outstanding by $\$ 20,487$, and bank deposits by \$258,152.

## POSTAL SAVINGS BANKS IN THE PHILIPPINES.

Under date of September 3 the chief of the postal savings bank division submitted his annual report to the director of posts of the Philippine Islands relating to the operations of postal savings banks for the period ended June 30, 1907. A copy of the report has been submitted to this office, from which the following general information and statistics are taken:

The law providing for the establishment of postal savings banks in the Philippine Islands was enacted by the United States Philippine Commission May 24, 1906. The Manila office was opened for the transaction of business October 1, 1906, and other offices were subsequently established as conditions seemed to warrant until the close of the fiscal year, June 30, 1907, when there were 235 offices open for the transaction of business. On that date the deposits amounted to $510,100.64$ pesos (one peso equals 50 cents).

The investment of funds of the postal savings banks : placed in the charge of an investment board, composed of the secretary of commerce and police, the secretary of finance and justice, the director of posts, the insular treasurer, and a Manila business man. On the recommendation of the board the following investinent of postal savings bank funds, in the form of time deposits bearing $3 \frac{1}{2}$ per cent interest, had been made at the end of the fiscal year:

Pesos.

Chartered Bank of India, Australia, and China__................................ 130,000

All of these banks are duly authorized depositaries of the Filipino government, and the deposits in them are stated to be amply protected by surety bonds filed with the Treasurer of the United States. The remainder of the resources of postal savings banks were held as follows:

Pesos.
With the insular treasurer
5, 000. 00
With the cashier Manila post-office 7, 261. 66

At the close of the year interest had accrued on the deposits in the sum of $6,495.36$ pesos, being $2,893.84$ in excess of the amount of interest paid to depositors. The depositors number 2,676, of whom 1,616 were Americans, 944 Filipinos, 60 Europeans, 45 Asiatics, and 11 societies. The average deposit account was 223.54 pesos.

In order to obtain a more lucrative investment of funds the act under which the postal savings bank system was established was amended March 22, 1907, to provide that loans may be made upon city real estate to the extent of 25 per cent and upon improved agricultural land to the extent of 10 per cent of the total deposits. Provision was also made for investments in and loans upon any securities
the principal and interest of which are guaranteed by the Government of the United States or of the Philippine Islands. On May 3 a further provision was made for the loaning of the bank funds to the various provinces for public improvements under guaranty of the insular government. Under the provisions of this act the Province of Pangasinan has applied for a loan of 160,000 pesos for six years with interest at the rate of 5 per cent. The opinion is expressed that this widening of the field of investment will enable a self-supporting basis to be reached much sooner than the original provisions would have allowed and at the same time give ample protection to the bank.
In connection with expenses it is stated that the outlay for the year was $37,393.33$ pesos; but if from that amount there be deducted 6,495.36 pesos, representing interest earned on the investment of the bank's funds, there remains $30,897.99$ pesos, representing the real deficit. A considerable part of this deficit is, however, more nominal than real, as there should be excluded from consideration that part' of the sưpplies in the hands of the postmasters which will not have to be duplicated for several years. There were on hand June 30 supplies to the estimated value of 10,000 pesos.

Reference is made in the report to telegraphic withdrawals, and it is shown that 103 such withdrawals were made, at an average cost of 1.14 pesos, the total amount of postal savings deposits so withdrawn being 10,678.39 pesos.

Postal savings bank stamps for the special use of school children have been received from the United States Bureau of Engraving and Printing, of the denominations of 5,10 , and 20 centavos, to the number of $4,747,636$, valued at $365,914.40$ pesos. The stamps were not available until about the close of the school year (April), in consequence of which but a limited amount was sold, namely, $1,856.30$ pesos, of which 1,219 were deposited, Ieaving 637.30 of the amount sold undeposited.
Of the depositors' balances, $441,400.96$ pesos are to the credit of Americans and $14,697.37$ to Europeans, leaving 46,197.40 to the credit of Filipinos and $7,167.61$ to Asiatics, in connection with which it is stated in the report that to the Americans stationed throughout the islands the bank has proven to be a great blessing; and while it is probable that about one in ten are depositors, there is much to be desired in the extension of the work among the natives, who are, as a class, notably improvident. The success of the bank must be measured by the interest taken in it by the natives. Up to June 30 accounts to the number of 944 , representing 35 per cent of the total, had been opened by Filipinos. It is believed that the most valuable means of furthering the use of the savings bank is the cooperation of the schools, which has been most cordially extended.

Porto Rico.
There are in the island of Porto Rico 6 territorial banks, 3 private banks, and 1 national banking association, with aggregate capital of $\$ 2,305,273$ and resources of $\$ 10,966,856$. By the courtesy of the treasurer of Porto Rico reports have been received showing the condition of 6 territorial and 3 private banks in operation in the island. The aggregate capital stock of these 9 banks is $\$ 2,205,273$, which
includes $\$ 575,215$ due by stockholders of 2 of the territorial banks. The principal items of resources and liabilities are:

| Loans | \$4, 266, 701 |
| :---: | :---: |
| Stocks, bonds, and securities | 1,916, 027 |
| Due from banks and bankers | 1, 063, 339 |
| Cash in bank. | 1, 272, 806 |
| Surplus and undivided profits | 553, 680 |
| Deposits | 5, 723, 221 |
| Bank deposits. | 218, 738 |
| Aggregate resources | 10, 486, 143 |

The aggregate resources of the reporting banks of the island have increased over two millions of dollars during the current year, and more than doubled since 1902 .
Four of the Territorial banks have savings departments with 4,632 depositors, one bank paying 3 per cent, one 4 per cent, and two 6 per cent to such depositors. All the banks, with the exception of one recently organized, paid dividends to stockholders during the year ranging from $2 \frac{1}{2}$ per cent to 10 per cent, and 14 per cent on a certain class of stock by one bank. No banks were closed in Porto Rico during the past year. During the fiscal year the Royal Bank of Canada and the Union Bank of Halifax were authorized to transact business in the island.

## Hawail.

Unofficial returns have been received from 4 territorial and 2 private banks in the Territory of Hawaii. The aggregate paid-in capital of these banks as shown by reports of June 29,1907 , is $\$ 1,795,859$; resources, $\$ 9,087,717$. Besides there were in operation on May 20, 1907, four national banking associations with capital of $\$ 610,000$ and aggregate resources of $\$ 2,524,865$, the total resources of all reporting banks-private, Territorial, and national being $\$ 11,612,582$, a decrease since 1906 of $\$ 243,739$. The principal items of resources and liabilities of the 6 reporting Territorial and private banks are:

| Loans including | \$5, 803, 337 |
| :---: | :---: |
| Stocks, bonds, etc | 1, 343, 169 |
| Due from banks and bankers_ | 196,507 |
| Cash on hand | 1, 149, 131 |
| Capital | 1, 759, 859 |
| Surplus and profits | 452, 582 |
| Individual deposits | 6, 153, 136 |

Statements relating to the national banks in operation in the Territory of Hawaii will be found in the appendix of this report.

Through the courtesy of the secretary of the United States League of Local Building and Loan Associations, Mr. H. F. Cellarius, of Cincinnati, this office has been furnished with statistics relating to the condition of the building and loan associations of the United States. From the data submitted it appears that during the year ended December 31, 1906, these associations gained $\$ 43,784,941$ in assets and increased the amount of annual receipts nearly $\$ 45,000$,000 ; and that within the last two years they have gained in assets nearly $\$ 73,000,000$. The gross gain in membership for the past year was 87,103. It appears that there are now in the United States 5,316
such associations, having a membership of $1,699,714$ and assets amounting to $\$ 673,129,198$. States showing the largest gains are: Ohio, $\$ 11,353,028$; Pennsylvania, $\$ 9,587,177$; New Jersey, $\$ 4,330,808$; Massachusetts, $\$ 3,832,494$, and New York, $\$ 3,125,116$. The only State from which the statistics show a material loss is California, in the sum of $\$ 3,357,193$, this decrease in business being accounted for by the unusual conditions caused by the earthquake and fire. The receipts and disbursements of the associations for the year ended December 31, 1906, are shown in the following statement:
receipts, 1906.
Cash on hand January 1, 1906_ \$22, 570, 436 Weekly dues 167, 346, 676
Paid-up stock 12, 625,500

## SCHOOL SAVINGS BANKS.

Statistics relating to the operation of school savings banks of the United States in existence on January 1, 1907, have been received through the courtesy of Prof. J. H. Thiry, of Long Island City, N. Y.

From Professor Thiry's report it appears that the school savingsbank system is now in operation in 1,098 schools of 113 cities of the United States and Canada; and the pupils of these schools have deposited $\$ 5,485,514.48$, of which $\$ 4,675,897.26$ has been withdrawn, leaving a balance of $\$ 809,617.22$ due depositors.

## MONEY IN THE UNITED STATES.

Distribution of money in the United States, showing the amount in the Treasury as assets, in reporting banks and elsewhere, from June 30, 1892, to 1907, is stated in the following table:

| Year. | Coin and other money in the United States. | Coin and other money in Treasury as assets. |  | Coin and other money in reporting banks. |  | Coin and other money not in Treasury or banks. |  |  | In circulation, exclusive of coin and other money in Treasury as assets. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Amount. | Per cent. | Amount. | Per cent. | Amount. | $\begin{aligned} & \text { Per } \\ & \text { cent. } \end{aligned}$ | Per capita. | Amount. | Per capita. |
|  | Millions. | Mullions. |  | Millions. |  | Millions. |  |  | Millions. |  |
| 1892 | \$1,752.2 | \$150.9 | 8.60 | \$586.4 | 33.48 | \$1,014.9 | 57.92 | \$15.50 | \$1, 601.3 | \$24. 44 |
| 1893 | 1,738.8 | 142.1 | 8.17 | 515.9 | 29.68 | 1,080.8 | 62.15 | 16.14 | 1,596.7 | 23.85 |
| 1894. | 1, 805.0 | 144.2 | 7.99 | 688.9 | 38.17 | 971.9 | 53.84 | 14.21 | 1,660.8 | 24.28 |
| 1895 | 1,819.3 | 217.4 | 11.95 | 631.1 | 34.69 | 970.8 | 53.36 | 13.89 | 1,601.9 | 22.93 |
| 1896 | 1,799.9 | 293.5 | 16.31 | 531.8 | 29.55 | 974.6 | 54.14 | 13.65 | 1,506. 4 | 21.10 |
| 1897. | 1,905.9 | 265.7 | 13.95 | 628.2 | 32.96 | 1,012.0 | 53.09 | 13.87 | 1,640.2 | 22.49 |
| 1898. | 2,073.5 | 235.7 | 11.37 | 687.7 | 33.17 | 1,150.1 | 55.46 | 15. 43 | 1,837.8 | 24.66 |
| 1899. | 2,190.0 | 286.0 | 13.06 | 723.2 | 33.02 | 1,180.8 | 53.92 | 15.51 | 1,904.0 | 25.01 |

$a \$ 12,567,265, b \$ 10,125,909, c \$ 9,240,801, d \$ 7,620,304, f \$ 6,301,890, \sigma \$ 5,661,868$, and $h \$ 7,250,574$ in banks of island possessions not included in these returns.
$i$ Revised estimate.
The amount of money held by national and other reporting banks in the United States (exclusive of island possessions) on June 30, 1906 , was $\$ 1,010,700,000$. About the same date for the present year the cash holdings of the banks of the United States was $\$ 1,106,500,000$, or a gain of $\$ 95,800,000$. The total stock of money in the United States on June 30, 1906, was $\$ 3,069,900,000$. On July 1 of the present year it was reported at $\$ 3,115,600,000$, being an increase of $\$ 45,700,000$. Of this $\$ 45,700,000$ gain in the stock of money during the fiscal year, $\$ 9,300,000$ was added to the amount held in the Treasury as assets, leaving a balance of $\$ 36,400,000$ for general circulation. The amount of coin and other money not in the Treasury or banks in 1906 was $\$ 1,725,900,000$; in 1907 the amount was $\$ 1,666,500,000$, a difference of $\$ 59,400,000$, which sum, together with the $\$ 36,400,000$ gain in the general stock in circulation, as above noted, has been added to the cash holdings of the banks during the current year. Of the total stock of money in the country, 11 per cent is held in the Treasury as assets, 35.51 per cent is in reporting banks, and 53.49 per cent elsewhere, the per capita not in the Treasury or banks in 1907 being $\$ 19.36$, or $\$ 1.03$ less than in 1906.

The geographical distribution of money in banks of the United States in $1900,1904,1906$, and 1907 is shown in the following table:

The following table shows deposits and cash holdings of the several classes of reporting banks on or about June 30, 1907, together with the percentage of cash to deposits for 1906 and 1907:

| Banks. | Individual deposits. | Cash on hand. | Ratio of cash to deposits. |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | 1906. |  | 1907. |  |
|  | Millions. | Millions. | Per cent. | Per cent. | Per cent. | Per cent. |
| National banks. | \$4,322.9 | \$721.9 |  | 16.80 |  | 16.70 |
| State banks. | 3,068.6 | 254.0 | 8.30 |  | 8.28 |  |
| Savings banks. | 3,495.4 | 27.4 | . 79 | 4.04 | - $\quad .78$ | 5.60 |
| Private banks. | 151.1 | 8.7 | 0.15 | 4.04 | 5.76 | 5.60 |
| Loan and trust compani | 2,061.6 | 101.7 | 3.49 |  | 4.93 |  |
| Total. | 13,099.6 | 1,113.7 |  | 8.29 |  | 8.50 |

The percentage of cash to individual deposits held by all national banks on May 20, 1907, was 16.70 per cent, and the percentage of reserve held to deposit liabilities on that date was 21.22 per cent, of which 13.23 per cent was in lawful money.

The percentages of cash held against deposits by all other banks on or about June 30, 1907, were as follows: State banks, 8.28 per cent; private banks, 5.76 per cent; loan and trust companies, 4.93 per cent, and savings banks, 0.78 per cent, or an average cash reserve of 5.60 per cent held by banks other than national. The percentage of cash holdings to deposits for the several classes of banks in 1907 is shown to be less than in 1906, with the exception of loan and trust companies, which increased their percentage from 3.49 to 4.93 .
In the appendix to the report of the Comptroller of the Currency will be found a table showing the amount of gold and other money held by national banks on May 20, 1907, and by other reporting banks and bankers on or about June $30,1907$.
Referring to the tables in question, it will be seen that on or about June 30,1907 , the sum of $\$ 1,113,742,316$ was in 19,746 banks of the country, $\$ 7,250,574$ of this amount being in 30 banks located in the island possessions.
Sixty-four per cent of the money in banks consisted of specie and the remaining 36 per cent paper currency and unclassified cash, as follows:

$\begin{array}{ll}\text { Paper currency (including Philippine currency) -------------------- } & 311,769,968\end{array}$

## Total <br> 1, 113, 742, 316

Gold represented over 51.2 per cent of cash in bank; silver and unclassified specie, 13.4 per cent; legal tenders and national-bank notes, 27.8 per cent, the balance, 7.6 per cent, being unclassified.

The following table shows the cash holdings of banks in 1906 and 1907 and the amount of increase, geographically arranged:

| Geographical division. | 1906. | 1907. | Increase. |
| :---: | :---: | :---: | :---: |
|  | Millions. | Millions. | Millions. |
| New England States. | \$61.8 | \$63.5 | \$1.7 |
| Eastern States. | 462.0 | 519.2 | 57.2 |
| Southern States. | 78.4 | 87.2 | 8.8 |
| Middle States. | 280.5 | 305.8 | 25.3 |
| Western States. | 53.0 | 55.2 | 2.2 |
| Pacific States. | 75.1 | 75.6 | . 5 |
| Islands.: | 5.6 | 7.2 | 1.6 |
| Total. | 1,016.4 | 1,113.7 | 97.3 |

From the foregoing it appears that the New England States had in their banks on or about June 30, 1907, $\$ 63,500,000$; the Eastern States, $\$ 519,200,000$; Southern States, $\$ 87,200,000$; Middle States, $\$ 305,800 ; 000$; Western States, $\$ 55,200,000$; Pacific States, $\$ 75,600,000$, and island possessions, $\$ 7,200,000$.

The banks of the country, including island possessions, increased their cash holdings during the year by $\$ 97,300,000$. Of this amount the Eastern States gained $\$ 57,200,000$ and the Middle States $\$ 25,300,000$. Of the $\$ 57,200,000$ gained in the Eastern States, approximately $\$ 46,400,000$ went to banks in New York State and over $\$ 9,200,000$ to banks in Pennsylvania. The increase of $\$ 25,300,000^{\circ}$ in the Middle States went chiefly to Ohio, Illinois, and Missouri. Banks in these States gained $\$ 5,000,000, \$ 7,000,000$, and $\$ 6,000,000$, respectively, in cash holdings during the year. The banks of the Southern

States gained during the year $\$ 8,800,000$ in cash. Of this sum $\$ 5,600,000$ went to banks in Texas.

From the published statements of the superintendent of banking of the State of New York it appears that on or about June 30 there were in New York City and Brooklyn (New York and Kings counties) 54 State banks, 51 savings banks, and 50 loan and trust companies. Combining the cash holdings of these 155 banks with the amount of cash held by the 43 national banks of New York City and Brooklyn, from reports made to this office on May 20, it appears that all banks in the reserve cities of New York and Brooklyn on or about June 30, 1907, held approximately $\$ 363,700,000$ in their vaults, or over 32.5 per cent of the available cash in the banks of the United States. In 1906 banks in New York City and Brooklyn held $\$ 321,-$ 900,000 , or 31.6 per cent of the available cash in banks of the whole country.
The following table shows the amount of cash in each class of banks located in the cities of New York and Brooklyn in 1906 and 1907, with the amount and per cent of increase:

| Banks. | 1906. | 1907. | Increase. |
| :---: | :---: | :---: | :---: |
| National banks. | $\begin{array}{r} \text { Millions. } \\ \$ 227.5 \end{array}$ | Millions. $\$ 234.6$ | Millions. $\$ 7.1$ |
| State banks.. | 54.6 | 65.9 | 11.3 |
| Savings banks. | 6.4 | 6. 4 | . 0 |
| Loan and trust companies. | 33.4 | 56.8 | 23.4 |
| Total, | 321.9 | 363.7 | 41.8 |

In connection with the foregoing statistics relating to cash holdings of the banks of New York and Brooklyn, the following table relating to individual deposits of banks in those cities will be found of interest:

a Net increase.
On May 20, 1907, the 43 national banks located in the cities of New York and Brooklyn had $\$ 884,900,000$ in deposit-liabilities subject to reserve requirements, against which they had on hand lawful money amounting to $\$ 233,100,000$, or 26.35 per cent. The individual deposits in these banks on the same date amounted to $\$ 600,800,000$ and their actual cash holdings of lawful money and other currency aggregated $\$ 234,600,000$, or 39 per cent of individual deposits and 26.51 per cent of all deposit-liabilities.

On June 30, or thereabouts, the cash holdings of State banks in the cities named were 19.50 per cent of individual deposits, of loan
and trust companies, 6.69 per cent, and of savings banks less than 1 per cent, or 0.66 per cent.

Of the $\$ 41,800,000$ added to their cash holdings by the banks of New York and Brooklyn during the fiscal year ended June 30, 1907, national banks gained $\$ 7,100,000$, State banks $\$ 11,300,000$, and loan and trust companies $\$ 23,400,000$. Practically no increase was noted in the cash holdings of savings banks located in these cities. On May 16, 1906, as will be observed from the foregoing tables, the loan and trust companies of New York and Brooklyn had $\$ 790,800,000$ in individual deposits, against which they held a reserve of cash in bank of $\$ 33,400,000$, or 4.22 per cent. On June 4, 1907, the loan and trust companies of New York had $\$ 849,400,000$ in individual deposits, against which was held $\$ 56,800,000$, or 6.69 per cent.

Acts were passed by the legislature of New York in 1906 amending the banking law to provide in part that every trust company in the city of New York shall have on hand at all times after January 1,1907 , a reserve equal to at leaşt 15 per cent of its deposits, and the trust companies elsewhere in the State a reserve equal to at least 10 per cent of deposits, corresponding to the percentages of the reserves required for State banks. One-third of the reserve required to be held by the trust companies in the city of New York may consist of bonds of the United States, of the State of New York, or of cities of the first and second class, within the State. Of the remaining portion one-half must be in lawful money on hand, and the balance may be deposited, subject to call, in banks and trust companies approved by the State superintendent of banks.

FOREIGN BANIKS OF ISSUE.
The following table exhibiting the principal items of resources and liabilities of foreign banks is compiled from late reports published in financial journals and is complete only in respect of loans, cash holdings, and circulation:

Capital, Specie, Circulation, etc., of the Principal Foreign Banes of Issue from Latest Obtainable Reports, $1906-7$.

At the request of the Comptroller statistics have been compiled and an analysis thereof submitted for this report, from the latest data available, by Dr. I. M. Rubinow, of the Bureau of Statistics. The statistics are divided into three tables, which appear in the appendix to the report of the Comptroller of the Currency as Nos. LII, LIII, and LIV, the first relating to the number of depositors, average number of depositors per thousand of population in postal and other savings banks, with the number and percentage of increase. The second pertains to deposits, the amount and percentage of increase, the average deposit, and average deposit per inhabitant. The third table is confined to statistics in relation to postal-savings banks, showing the number of depositors, amount of deposits, and average deposit for the latest and prior years, with the amount and percentage of increase. In the tables the countries have been segregated by continents and the totals given for each continent in addition to the general total.

In the analysis of Table LII it is stated that the data in regard to the number of depositors show the average number for all countries possessing savings banks to be about 109 per 1,000 , with only a slight increase over the preceding year and strong fluctuations between various continents and countries. Europe, with its large savings, does not show the highest average number of depositors per 1,000 inhabitants, Australasia having almost twice as many, namely, 301 against 166 for Europe, as well as a more rapid growth, the increase in the average number of depositors in the year being 9 per 1,000 . In many European countries, however, the average number of depositors is considerably higher than in Australasia, Denmark having 511, Switzerland 419, Sweden 364, Norway 342, Belgium 323, France 309, Netherlands 295, Germany 285, and the United Kingdom 274 depositors per 1,000 inhabitants. The countries enumerated have 1 sav-ings-bank deposit for every 2 to 4 inhabitants, while the proportion in this country is only 1 to 10 . The small average for the whole of Europe is due mainly to the small average number of depositors in Russia, Spain, Hungary, and the countries of the Balkan Peninsula. The change in the number of depositors during the brief period of one year is characteristic of the economic conditions. The increase has been 11 per 1,000 in Belgium, 9 in France, 12 in Netherlands, 9 in Norway, 6 in the United Kingdom, while Italy is the only country in Europe showing a large decrease, though the accuracy of this is somewhat questionable, owing to the fact that it was impossible to obtain data relative to private savings banks for any year except 1904; and while the decrease in number of depositors in postal savings banks was very large, it might have been compensated by an increase in the number of depositors in private savings banks. Outside of Europe, savings banks seem to be developing to a considerable extent in Anglo-Saxon countries only. On the two American continents, they exist, outside of the United States, in the main, only in the British colonies, and the same is true of the continent of Africa; but one notable exception to this is found in the case of Japan, which has more savings bank depositors even than this country, the average number of depositors per 1,000 inhabitants being 260 , or more than 1 depositor to 4 inhabitants, the increase in one year being 22 per 1,000 . The total increase in the number of depositors during the last year,
in all countries outside the United States, seems to have been about $3,500,000$, of which $1,879,000$ was in Europe and 1,437,000 in Japan.

Statistics of savings deposits for the latest and prior year, the percentage of increase, the average deposit per depositor, and the average deposit per inhabitant are shown in Table LIII. In the total amount of deposits, the predominance of Europe is much stronger than in the number of depositors. The total deposits of the world, outside of the United States, have increased from $\$ 7,969,000,000$ to $\$ 8,417,000,000$, an increase of $\$ 448,000,000$, or 5.62 per cent. Of this increase, $\$ 406,000,000$ belongs to Europe. The total deposits in the United States ( $\$ 3,690,000,000$ ) are greater than in any other country, Germany being second with $\$ 2,831,000,000$, followed by Austria; United Kingdom, and France, in the order named. Of the total deposits outside of the United States almost 95 per cent are to be found in Europe and 2.8 per cent in Australasia, leaving a little over 2.5 per cent for all the other countries. Notwithstanding its great number of depositors, Japan has deposits amounting to only $\$ 76,000,000$, the average deposit in 1906 being but $\$ 6.05$, the smallest of any country. With the exception of a few minor colonies, such as St. Helena or Falkland Islands, the United States has the highest average deposit ( $\$ 429.64$ ) per depositor. The average deposit in Canada (\$293.07) is greater than in any European country. The highest average deposit per depositor in Europe (not taking Malta into account) is found in Hungary, \$239.84, and Austria, $\$ 187.32$. The average in Germany is $\$ 163.71$, and in Denmark, $\$ 160.98$. In the Latin countries the average deposit seems to be considerably smaller, being $\$ 65.59$ in Belgium, $\$ 74.03$ in France, and $\$ 35.71$ in Italy. The average deposits per inhabitant are subject to variations equally great. For all countries outside of the United States the average was only $\$ 10.52$; in Europe, $\$ 18.60$, and in Australasia, $\$ 47.61$. In Europe the highest average deposit per inhabitant was found in Denmark, $\$ 82.26$ in 1905; in Switzerland, $\$ 62.20$; Germany, $\$ 46.66$, Norway, $\$ 43.38$, and Austria, $\$ 38.20$. The lowest average deposits per inhabitant are found in Russia, $\$ 3.67$, Spain, $\$ 2.90$, and Bulgaria, 68 cents. In the various colonies of Australasia the average deposits per inhabitant vary from $\$ 33.94$ in Tasmania to $\$ 53.52$ in New Zealand, the average in Australasia having increased from $\$ 44.73$ in the prior year to $\$ 47.61$ in the year of latest returns. The increase in the average deposits in Australasia is shown to have been greater than in any other country or continent. For all American countries, outside the United States, the average deposit per inhabitant is only $\$ 4.91$, an increase of but 16 cents over the preceding year. In Africa the average is only 97 cents as against $\$ 1.08$ in the preceding year, due to a considerable reduction in the savings banks deposits in Cape Colony and Natal. In Asia the average deposit per inhabitant is still smaller, being only 40 cents during the latest year for which statistics are available, as against 35 cents during the preceding. year.

Special interest attaches to Table LIV, relating to postal savings banks, and wherein is shown the number of depositors for the latest and preceding year, the per cent and amount of increase in deposits, and the average deposit for the two years. The number of depositors in postal savings banks was a trifle over 51 per cent of the depositors in all foreign savings banks, although the amount of such deposits
is but 24 per cent of the total of all foreign savings banks. The average deposit in postal savings banks is $\$ 52.36$, against an average of $\$ 111.73$ in all foreign savings banks. That postal savings banks are favored by the smaller depositors is shown by comparison of the average dèposit in postal savings banks and all savings banks combined in those countries where both classes of savings institutions exist. Thus, in Austria the average savings account in the postal savings bank is only $\$ 22.39$, against $\$ 187.32$ in all savings banks. In Finland the average deposit in postal savings banks was $\$ 18.79$, against $\$ 100.33$ in all savings banks; in France, $\$ 53.90$, against $\$ 74.03$; in Hungary, $\$ 24.78$, against $\$ 239.84$, and in Russia, $\$ 66.95$, against $\$ 94.13$.

From the tables in question, compiled by the Bureau of Statistics, others have been prepared confining the data, relating to all savings banks, to the number of depositors, amount of deposits, average deposit account, and average deposit per inhabitant; and with respect to postal savings banks to the number of depositors and amount and average deposit.

The tables in question follow:
Number of Depositors and Amount of Deposits in Savings Baniss in Foreign Countries, 1.904-1906.

| Country. | Period. | Number of depositors. | Total deposits. | Average deposit account. | Average deposit per inhabitant. |

## BANKING POWER OF THE WORLD.

The banking power of the United States in 1907, as represented by capital, surplus and other profits, deposits and circulation of national and other reporting banks, together with the estimated amount of funds of this character in the nonreporting banks, is shown to be $\$ 17,824,847,682$. The items composing this sum are set forth in the accompanying table:

Banking power of the United States.

|  | Num- ber. | Capital. | Surplus, etc. | Deposits. | Circulation. | Total. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| National banks. | 6,429 | \$883, 690, 917 | \$720, 413,039 | a\$4, 503, 568, 351 | \$547, 918,696 | 86, 655, 591, 003 |

a Includes Government deposits.
b Estimated capital, etc., based on reports received from private banks.

From the latest and most reliable data obtainable, the banking power of foreign countries is estimated at $\$ 27,034,200,000$, the details being set forth in millions of dollars in the following table:

| Banks. | Capital. | Surplus, etc. | Deposits. | Circulation. | Total. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| British Empire. | \$1,207.2 | \$666. 4 | \$9,016. 1 | \$416. 4 | \$11,306. 1 |
| Continental Europe.......................... | 411.7 | ${ }^{\text {a }} 143.8$ | 1,481.4 | 3,590.5 | 5,627. 4 |
| Central and South America and other foreign banks. | 306.2 | 100.3 | 957.5 | 340.4 | 1,704. 4 |
| Foreign savings banks |  |  | 8,396. 3 |  | 8,396. 3 |
| Total. | . 1,925.1 | 910.5 | 19,851.3 | 4,347.3 | 27,034, 2 |

${ }^{a}$ Partial.
In 1890 Mulhall estimated the world's banking power at $\$ 15,985$,000,000 , the United States being credited with $\$ 5,150,000,000$ of this amount. Since that year the banking power of the United States has increased to the extent of $\$ 12,674,800,000$, or over 246.1 per cent; that of foreign countries $\$ 16,199,200,000$, or 149.5 per cent, and the combined banking power $\$ 28,874,000,000$, or 180.6 per cent.
The statement following relating to the banking power of the world in 1890 and 1907 shows also the amounts and percentages of increase in 1907 over 1890:

world's stocik of money.
From the latest and most reliable data obtained by the Director of the Mint, it is estimated that at the close of the calendar year 1906 the stock of money of the world was $\$ 14,281,100,000$, divided as follows: Gold, $\$ 6,888,900,000$; silver (full and limited tender), $\$ 3,260$,200,000 ; uncovered paper currency, $\$ 4,132,000,000$. Eighty-two per cent of the gold, that is, $\$ 5,588,900,000$, was held by eight countries of the globe, and in amounts in the order named: United States, $\$ 1,593,300,000$; Germany, $\$ 1,030,300,000$; Russia, $\$ 939,400,000$; France, $\$ 926,400,000$; United Kingdom, $\$ 486,700,000$; Austria-Hungary, $\$ 306,400,000$; Italy, $\$ 215,500,000$, and Spain, $\$ 90,900,000$. Over 56 per cent of the stock of silver, namely, $\$ 1,834,900,000$, is held by the same countries, the United States leading with $\$ 698,700,000$, followed by France with $\$ 411,100 ; 000$; Germany, $\$ 219,700,000$; Spain, $\$ 173,700,000$; United Kingdom, $\$ 116,800,000$; Austria-Hungary, $\$ 105,300,000$; Russia, $\$ 77,900,000$, and Italy, $\$ 31,700,000$. Forty per cent of the stock of uncovered paper currency was also held by these countries, the United States again leading with $\$ 610,800,000$; France
being second on the list with $\$ 269,200,000$, followed by Germany with $\$ 267,100,000$; Italy, $\$ 150,600,000$; Austria-Hungary, $\$ 119,300,000$; United Kingdom, $\$ 116,800,000$, and Spain, $\$ 97,100,000$. Outside of the countries named India has the largest stock of gold, namely $\$ 337,300,000$, followed by Argentina with $\$ 102,700,000$. The stock of gold in Japan is $\$ 80,100,000$. The latter country reports silver to the amount of $\$ 48,200,000$ and uncovered paper currency, $\$ 96,900$,000. Exclusive of the United States, the largest stock of silver is in India, namely $\$ 603,800,000$. The circulation of Colombia, with the exception of $\$ 100,000$ in gold, is in uncovered paper currency, stated at $\$ 1,000,000,000$. The per capita of gold, $\$ 23.57$, and of all money, $\$ 40.88$, is the greatest in France, followed by the United States, with a per capita of gold of $\$ 18.66$ and a per capita of all money of $\$ 33.99$. Germany is third in the list, with a gold per capita of $\$ 17.00$ and an aggregate per capita of all circulation of $\$ 25.03$. The details of the Mint report relate to 47 countries, and include information as to the monetary standard, monetary unit, and population of each country.

## CLEARING-HOUSE TRANSACTIONS AND ISSUE OF CLEARING-HOUSE LOAN CERTIFICATES.

The New York Clearing House Association was organized in 1853, and the report therefrom for the year ended September 30, 1854, showed a membership of 50 , representing a capital of $\$ 47,044,900$. The amount of clearings was $\$ 5,750,455,987$, the average daily clearings being $\$ 19,104,505$. The average daily balance paid in money was $\$ 988,078$, the percentage of balances to clearings being 5.17. The membership for the year ended September 30, 1907, was 54 ; capital represented, $\$ 129,400,000$; clearings for the year, $\$ 95,315,421,238$; average daily clearings, $\$ 313,537,570$; aggregate balances paid in money, $\$ 3,813,926,108$, the proportion of balances to clearings being 4 per cent. The aggregate clearings of the association for the fiftyfour years ended September 30, 1907, are shown to have been $\$ 1,856,617,161,436$, the average daily clearing $\$ 112,426,860$, and the average ratio of balances to clearings 4.64 per cent. The transactions of the association for the current year were less by $\$ 8,438,678,853$ than during the year ended September 30, 1906.

Mr. William Sherer; manager of the New York Clearing House, has kindly furnished this office with the report of the transactions of 114 clearing houses in the United States for the year ended September 30 last, the total clearings reported being $\$ 154,662,515,258$, as against $\$ 157,681,259,999$ for the previous year, a net decrease of $\$ 3,018,744,741$. From every city increases are reported for the current year, with the exception of the following:

| New York, decrease. | \$8, 438, 678, 853 |
| :---: | :---: |
| Philadelphia, decrease | 45, 177, 568 |
| Rochester, decrease | 6, 724, 479 |
| Savannab, decrease | 5, 368, 950 |
| Memphis, decrease | 17, 818, 560 |
| Peoria, decrease | 4, 344, 089 |
| Fargo, decrease | 1, 428, 751 |
| Jacksonville, (Ill.), decrease | 334, 034 |
| 13091-H. ®ос. 9, 60-1-29 |  |

The clearing-house transactions of the whole country, from 1900 to 1907, were as follows:

Incident to the usual business of clearing, documents termed "clearing-house certificates," representing specie or lawful money deposited for the purpose, are issued for the convenience of members of the association in settling balances. Under section 5192 of the Revised Statutes such certificates are deemed to be lawful money in the possession of any association belonging to the clearing house issuing such certificates. In addition to the issue of certificates representing deposits of lawful money, clearing-house associations under exceptional circumstances have issued clearing-house loan certificates based on bills receivable and other securities approved by the loan committee. In 1873 the New York Clearing House by its loan committee authorized the issue of certificates bearing 7 per cent interest, in denominations of $\$ 5,000$ and $\$ 10,000$ to an amount not in excess of 75 per cent of the securities deposited, except when the securities consisted of either United States stocks or gold certificates, when certificates were issued upon the par value of such securities. It was provided that the certificates in question were to be issued for use in the settlement of balances of the clearing house for a period not extending beyond the 1st of November, 1873. The interest accruing thereon was apportioned among the holding banks. The first issues were dated September 22 to 29, and amounted to $\$ 22,080,000$. From October 1 to 29 the aggregate amount issued was $\$ 3,205,000$, and from November 1 to $20, \$ 1,280,000$. The total issue was $\$ 26,565,000$, all of which was redeemed and canceled in less than four months from the date of the first issue. The Philadelphia clearing house issued similar certificates to the extent of $\$ 6,785,000$.
"This measure," says the Comptroller of the Currency in his report for 1884, "was not taken until after the panic (1873) had assumed such proportions that the use of certificates and the consequent relief to the banks in settling their balances at the clearing house could not restore confidence."

As a result of the large number of bank failures in 1883, considerable financial uneasiness developed during 1884, and culminated on May 6 with the failure of the Marine National Bank of New York, followed on May 13 by the closing of the Second National Bank of New York, when a defalcation in that association to the extent of $\$ 3,185 ; 000$ was discovered. The suspension of the Metropolitan National Bank followed on the next day, with that of a number of bankers and brokers. The New York Clearing House promptly took action by authorizing the issue of clearing-house loan certificates bearing 6 per cent interest, under practically the same conditions as in 1873. In connection with the crisis of 1884, the Comptroller in his annual report that year said:

There is little doubt that one of the causes which led to the local disturbance among the banks, national and state, and private bankers, of the city of New

Fork, was their intimate relation in many instances with the New York Stock Exchange, and the fact that a large portion of the loans made by the banks and bankers of New York were based upon the security of stocks and bonds, often speculative in their character, which are dealt in and regularly called at the stock board.

The issues of loan certificates in 1884, beginning with May 15 and terminating June 6, aggregated $\$ 24,915,000$, all of which, with the exception of $\$ 5,290,000$, had been redeemed by October 3 of that year. On October 1, 1885, there was still outstanding $\$ 2,680,000$, of which $\$ 1,945,000$ was issued to the Metropolitan National Bank, which had been placed in liquidation, and $\$ 735,000$ to State banks in New York City. These certificates were redeemed and canceled in due course.

The following is a copy of the loan certificates issued in 1884:
No.
$\$ 10,000$
LOAN COMMITTEE OF THE NEW YORK CLEARING HOUSE association.
New York, May 15, 1884.
This certifies that the -_ National Bank has deposited with the committee securities in accordance with the proceedings of a meeting of the association held May 14, 1884, upon which this certificate is issued. This certificate will be received in payment of balances at the clearing house for the sum of ten thousand dollars from any member of the Clearing House Association. On the surrender of the certificate by the depositing bank above named, the committee will endorse the amount as a payment, on the obligation of the said bank, held by them, and surrender a proportionate share of collateral securities held therefor.

During the monetary stringency of 1890 , clearing-house loan certificates were again brought into use in New York, Boston, and Philadelphia. The total issue made by the New York Clearing House amounted to $\$ 16,645,000$, beginning with November 12 of that year, and the entire issue was retired by February 7, 1891. In Boston the issue began November 19, 1890; the maximum reached being $\$ 5,065,000$, the last of the issue being retired on January 6, 1891. A total of $\$ 9,655,000$ was issued by the Philadelphia Clearing House from November 19, 1890, to May 22, 1891, all of which was promptly retired.

As a result of the unprecedented condition of the money market from June to September, 1893, extraordinary remedies were called into action. In that year about 160 national banking associations suspended, all of which, however, with the exception of 54 , having placed their affairs in satisfactory condition, were authorized to resume business. As in 1873, 1884, and 1890, recourse was had to the use of clearing-house loan certificates to the amount and by the associations indicated in the accompanying table.

|  | Date of issue of first certificate. | Date of largest amount outstanding. | Largest amount outstanding. | Date of surrender of last certificate. | Amount outstanding Oct. 31, 1893. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| New Yorl: | June 21, 1893 | Aug. 29 to Sept. 6, 1893. | \$41, 490,000 | Nov. 1 |  |
| Philadelphis | June 16, 1893 | Aug. 15, 1893............ | 10, 965,000 |  | \$3,835,000 |
| Boston... | June 27,1893 | Aug. 23 to Sept. 1, 1893. | $11,445,000$ | Oct. 20 |  |
| Baltimore | $\ldots .$. do..... | Aug. 24 to Sept. 9, 1893. | $1,475,000$ |  | 845,000 |
| Pittsburg. | Aug. 11, 1893 | Sept. 15, 1893.......... | -987,000 |  | 332,000 |
| Total |  |  | 66,362,000 |  | ....-... |

The aggregate issues of clearing-house loan certificates, from 1873 to 1893 , inclusive, were as follows:

| Ẏear. | - | Association. | Amount. |
| :---: | :---: | :---: | :---: |
| 1873 | New York. |  | \$26,565,000 |
| 1873. | Philadelphia. |  | 6,785,000 |
| 1884. | New York. |  | 24,915,000 |
| 1890. | .....do. . . |  | 16, 645,000 |
| 1890. | Boston. |  | 5,065,000 |
| 1890-91. | Philadelphia. |  |  |
|  | New York... |  | $41,490,000$ |
|  | Philadelphia. |  | 10,965, 000 |
| 1893. | $\left\{\begin{array}{l}\text { Boston..... }\end{array}\right.$ |  | 11, 445, 000 |
|  | Baltimore. |  |  |
|  | Pittsburg. |  | $987,000$ |

The manager of the New York clearing house submits the following corrected statement relating to the issue of loan certificates by that association from 1860 to 1893 , inclusive:

| Loan committee of- | Date of first issue. | Date of last issue. | Date of final cancellation. | Aggregate issue.a | Maximum amount out standing. | Date. | Rate of interest. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1860. | Nov. 23, 1860 | Feb. 27, 1861 | Mar. 9, 1861 | \$7, 375,000 | \$6,860,000 | Dec. 22,1860 | Per ct. $7$ |
| 1861. | Sept. 19,1861 | Feb. 17, 1862 | April 28, 1862 | 22,585,000 | 21,960,000 | Feb. 7,1862 | 6 |
| 1863. | Nov. 6, 1863 | Jan. 9, 1864 | Jan. 30, 1864 | 11,471,000 | 9,608, 000 | $\left\{\begin{array}{l} \text { Nov. } 27 \text { to } \\ \text { Dec. } 1,1863 \end{array}\right.$ | 6 |
| 1864. | Mar. 7, 1864 | Apr. 25, 1864 | June 13, 1864 | 17,728,000 | 16,418, 000 | Apr. 20, 1864 | 6 |
| 1873. | Sept. 22, 1873 | Nov. 20, 1873 | Jan. 14, 1874 | 26,565,000 | 22,410,000 | Oct. 3,1873 | 7 |
| 1884. | May 15, 1884 | June 6, 1884 | Sept. 23, 1886 | 24, 915,000 | 21,885,000 | May 24, 1884 |  |
| 1890 | Nov. 12, 1890 | Dec. 22, 1890 | Feb. 7, 1841 | 16,645,000 | 15, 205, 000. | Dec. 12, 1890 | 6 |
| 1893. | June 21, 1803 | Sept. 6, 1893 | Nov. 1, 1893 | 41,490,000 | 38, 280, 000 | $\begin{cases}\text { Aug. } & 29 \\ \text { Sept. } & 6,1893\end{cases}$ | 6 |

a Nature of collaterals in 1860: United States stocks, Treasury notes, stocks of State of New York; in 1861: Temporary receipts of the United States for purchase of government bonds; in 1863: United States or New York State stocks, bonds, etc., or temporary receipts as in 1861; in 1864: Same as in 1863; in 1873: Bills receivable, stocks, bonds, and other securities; in 1884, 1890, and 1893: Same as in 1873.

## CLEARING-HOUSE EXAMINATIONS.

For several years past there has been an increased tendency on the part of all banks to make independent examination in addition to those made by the national-bank examiners. This is considered most desirable, and has been encouraged in every way by the Comptroller's office. Within the last year or two such examinations have been inaugurated by some of the clearing-house associations in the large cities. So far the trial of this system has been very satisfactory, and it is therefore recommended to the consideration of the clearinghouse cities of the country as a means by which better methods of banking can be attained.

The examinations by a national-bank examiner and the power of the Comptroller's office are necessarily more or less limited to the discovery of specific violations of the national-bank act, and criticisms and recommendations of the Comptroller's office can not always be made sufficiently mandatory. The information acquired by clearinghouse committees, through their own examinations, has in many cases resulted in their being able to enforce better methods and more conservative policies.

## DIGEST OF BANK CASES.

In the appendix, immediately preceding the statistical tables, appears a digest of decisions in bank cases rendered since the last publication, the most important of which are the following:

Tax on circulation under section 3417, as distinguished from tax on national bank circulation; tax on corporations (Iowa and Kentucky), capital being invested in United States bonds; civil and criminal liability of directors and other officers of national banks; lien on securities deposited for special purpose and lien on stock; verification and attestation of reports of condition and false entries in reports; liability of trustee and pledgee of national bank stock; payment of capital stock and rights of stockholders on increase of capital.

## DIAGRAMS.

Following the text of the report of the Comptroller of the Currency will be found a folder in which are diagrams, in colors, relating, first, to the amount and composition of the circulating medium of the country from 1863 to June 30, 1907, and, second, to the progress of banking as shown by the amount of capital, circulation, individual deposits, and loans of national banks on or about October 1, 1863-1907.

The act providing for the resumption of specie payments in 1879 was passed January 14, 1875. With the exception of a limited amount of specie, estimated by the Department at $\$ 25,000,000$, the circulating nedium of the country from 1863 to 1875 , inclusive, consisted of legal tenders, commonly lenown as " greenbacks," nationalbank and State-bank notes. State-banlk circulation was practically eliminated in 1865 by the imposition of the 10 per cent tax. In July, 1875, the circulating medium consisted of $\$ 375,000,000$ legal tenders, $\$ 354,000,000$ national-bank notes, and $\$ 42,000,000$ fractional currency. In the year following, legal tenders and national-bank notes had declined to $\$ 369,000,000$ and $\$ 332,000,000$, respectively, and the fractional currency to $\$ 34,000,000$. In that year, 1876, in addition to the estimated amount of specie on the Pacific coast $(\$ 25,000,000)$, subsidiary silver appeared to the amount of $\$ 27,000,000$. In 1877 there was an appreciable increase in the metallic currency, but a decrease in the amount of legal tenders and national-bank notes. In 1878 the volume of outstanding legal tenders was fixed at $\$ 346$,681,016 . With the resumption of specie payments in 1879 , specie, including bullion in the Treasury, amounted to over $\$ 357,000,000$, the remaining stock of money in the country consisting of $\$ 346,681$,016 legal tenders and $\$ 329,691,697$ national-bank notes. The stock of coin, including bullion, in the Treasury steadily increased to 1890 , when it amounted to $\$ 1,152,000,000$. This amount was not exceeded until 1897, when it reached $\$ 1,214,000,000$. From the lastnamed date to 1907 there was a rapid and notable increase in the stock of metallic currency, reaching $\$ 2,159,000,000$ in June last out of the total circulating medium of $\$ 3,116,000,000$.

The second diagram shows variations in circulation and capital to a comparatively limited extent, but the progress, as indicated by deposits and loans, is most notable. There was a gradual increase in these two items up to 1875 , but a material decline in 1878 , the year
preceding resumption of specie payments. The effect of the panics of 1884 and 1893, and the agitation of the silver question in 1896 are distinctly shown in the decline in deposits and loans.

## INCREASE AND RETIREMENT OF CIRCULATION.

The following table shows the total outstanding circulation of the national banks at the end of each report year from 1900 to 1906, and the amount at the end of each month for the year ending November 30, 1907.

Circulation Outstanding, Secured by Bonds and Lawful Money, on October 31, 1900, to October 31, 1906, and at the End of Eacif Month, Year Ending November 30, 1907.

|  | Date. | Circulation outstanding secured by- |  | Total. |
| :---: | :---: | :---: | :---: | :---: |
|  |  | Bonds. | Lawful money. |  |
| October 31- |  |  |  |  |
| - 1900..... |  | \$298, 829,064 | \$32, 864, 348 | \$331, 693,412 |
| 1901. |  | 328, 198, 613 | 31, 713, 070 | 359, 911, 683 |
| 1902. |  | 335, 783, 189 | 44,693,145 | 380,476, 334 |
| 1903. |  | 380,650, 821 | 38,959, 862 | 419, 610,683 |
| 1904. |  | 424, 530, 581 | 32, 750,919 | 457,281, 500 |
| 1909. |  | 490, 037, 806 | 34, 470, 443 | 524, 508, 249 |
| 1905. |  | 536, 933, 169 | 46,238,816 | 583,171,985 |
| 1906. |  |  |  |  |
| November 30 |  | 546, 981, 447 | 46, 399, 102 | 593, 380, 549 |
| December 31. |  | 549, 280, 084 | 46, 882,385 | 596,162, 469 |
| 1907. |  |  |  |  |
| January 31: |  | 649, 698,574 | 46, 498, 995 | 596, 197, 569 |
| February 28 |  | 549,737, 373 | 46, 605,649 | 596, 343,022 |
| March 31 .. |  | 547, 633, 063 | 49,579,000 | 597, 212, 063 |
| April 30. |  | 650, 204, 771 | 49, 709,069 | 599, 913, 840 |
| May 31 |  | 553,614,574 | 48, 325,976 | 601, 940, 500 |
| Juine 30 |  | $555,570,881$ | 48, 217,809 | 603, 788, 690 |
| July 31 |  | 555, 023, 290 | 48, 372,596 | 603, 395, 886 |
| August 31 |  | $556,945,887$ | 47, 110, 434 | 604, 056, 321 |
| September 30 |  | 566, 101, 329 | 47, 885, 785 | 603, 987, 114 |
| October 31. |  | $562,727,61.4$ | 47, 252, 852 | 609, 980, 466 |
| November 30 |  | $610,156,008$ | 46,062;188 | 656, 218, 196 |

Reference to this table shows the very rapid increase in circulation which has taken place since October 31, 1900, amounting on November 30,1907 , to $\$ 324,524,784$. Of this increase, $\$ 46,000,000$ occurred during November, 1907.

This increase during the month of November was due to the efforts of the Treasury Department to increase the circulation to meet the special emergency. It is quite probable that if this crisis is followed by a general reduction in the volume of business, the volume of currency may become redundant, so that it may be very desirable to have this circulation retired in order to prevent possible export of gold. This makes more evident the necessity of a change in the law, which has been recommended by every Comptroller of the Currency for many years, by removing the limit on the amount of currency that may be retired in any one month by the deposit of lawful money.

On this account the Comptroller would again most earnestly recommend that this section of the law be repealed, and that the amount of bank notes which would be thus retired in any one month be left to the discretion of the Secretary of the Treasury and the Comptroller of the Currency. The only reason for this provision of the law is the
possibility of some concerted action on the part.of the banks to contract the currency against the general interests of the people. The discretion lodged in the two officers of the Treasury Department, who would have direct charge of the interests of the people in these matters, could be relied upon to protect the public against any possible contingency of this kind, and this is a matter that can, with safety, be left to their judgment.

## THE CRISIS OF 1907.

Certainly since as long ago as the date of the San Francisco catastrophe there has been no lack of warning indications of financial troubles and possible business disaster. For at least ten or twelve years there has been an era of advancing prices and great industrial, commercial, and speculative activity in all the countries of the world. Credits have increased and multiplied until the limit has been reached in the amount of reserve money on which they must be based.

For at least two or three years, however, it has been becoming more and more evident that there must soon be a slackening of pace if we were to avoid a general and universal crisis in financial and commercial affairs. These conditions have been world-wide and not by any means confined to the United States. Crises of more or less severity have arisen in several important countries. As is always the case when there is a demand for liquidation, it first manifested itself in the stock market. For months there has been a more or less steady decline in stock-market quotations. Not only stocks, but the very best bonds, have dropped lower and lower in price. The difficulty in selling bonds has become so great that for several years many of the railways have had to raise money for their necessary expenditures and improvements with so-called short time notes, instead of regular bond issues, the rates of interest on such issues rising higher and higher and each issue being harder to place. Merchants and manufacturers of the highest standing and credit have found it more and more difficult to secure or renew loans and the rates have risen steadily for months past.

With such conditions existing we approached the autumn cropmoving period, when there is always more or less disturbance of credits on account of currency shipments and withdrawals of balances from the reserve cities. For a time it seemed as if there were good reason to hope that there might be no more than a gradual liquidation which might be conducted in detail, one interest or line at a time, beginning with the stock market, and that while there might be a general decline in the volume of trade and the gradual liquidation of credits, it would not develop into a bank or commercial crisis. But during the month of October the collapse of a highly speculative corner in stocks, dealt in on the "curb" in New York-not even listed on any regular exchange-brought suspicion upon an old, wellestablished national bank in the city of New York. Although examinations by the national-bank examiners and the New York clearing house committee showed this bank to be entirely solvent, with its large capital and a considerable surplus still beyond question intact, public interest had been aroused to such an extent that runs developed in New York City on a number of other banks and trust companies and some national banks between which and the bank first under
attack there was known to be community of ownership and management. The national banks of New York City were all found to be solvent by the clearing house committee, and being supported by the clearing house banks none failed.

But, unfortunately, a few other banks and trust companies were not in such good condition, and many of them, not being members of the clearing house or any similar association, they were not so well prepared for cooperation and support of each other. The Knickerbocker Trust Company, with $\$ 1,200,000$ of capital and $\$ 48,387,000$ of deposits, closed its doors on October 22, and this was followed by a large number of failures among smaller banks and trust companies. During the months of. October and November ten State banks and trust companies, two of which have since resumed, closed their doors in New York City and vicinity. There were long and serious runs on two large trust companies, which were only kept from failure by the support of the other trust companies and the clearing-house banks. One national bank, the First National Bank of Brooklyn, which was clearing-house agent for two large trust companies in Brooklyn which had failed, was compelled to close its doors on October 25 in order to avoid the responsibility for the clearings of these trust companies, and is now in the hands of a receiver.

On October 26 the New York clearing-house banks decided to issue clearing-house certificates for use in the payment of balances, and to limit, if not suspend, the shipment of currency to out-of-town banks. In this the New York banks were followed by those of the other central reserve and most of the reserve cities. The result was to at once precipitate a most serious bank crisis and a famine of currency for pay rolls and other necessary cash transactions. All domestic exchanges were at once thrown into disorder and the means of remittance and collection were almost entirely suspended. Money has been withdrawn and hoarded by individuals, corporations, and even more, perhaps, by the banks themselves, all of whom at once drew and held all the money of any kind they could obtain, often really in larger sums than needed.

It has been one of the peculiar features of the situation that there has actually been more of a panic among the banks themselves than there has been among the people. The banks have been fearful as to what might develop, and finding their usual reserve deposits only partially available, if available at all, they have been compelled in self-protection to gather from every source all the money they could possibly reach and to hold on to it by refusing payment wherever it is possible and satisfying their customers with the smallest possible amount of cash. It has been remarkable how patiently and with what forbearance the people in the business community generally have borne with the situation and helped the banks to deal with the emergency. With the exception of the first excitement in New York and some smaller runs in other places, there has really been surprisingly little excitement or uneasiness among the people.

The greatest hardship to business generally has been the derangement of the machinery for making collections and remittances. As can readily be seen, this has interfered with every kind and class of business and led to great curtailment of business operations of every kind. Factories have suspended, workmen have been thrown out of employment, orders have been canceled, the moving of crops has been
greatly retarded and interfered with and exports have fallen off at a time of the year when they should be at their highest. Another result has been a reduction of the volume of the foreign credits available just at the time they are most needed to offset the large imports of gold which have been made.

## CENTRAL BANK OF ISSUE AND RESERVE.

The conditions which led to the panic of October and November, 1907, were not due to the failure of a few individual banks. They were not due to the lack of confidence of the people in the banks, but more to a lack of confidence of the banks in themselves and their reserves. Banks have been fearful that the reserve system would break down, and in consequence it has broken down, and the reserve deposits have been only partially available. They were also fearful that not sufficient currency could be supplied to meet the demand, and as they all made the demand at once, there has not been sufficient currency. The result has been a currency famine.

The remedy for this state of affairs is to improve the reserve system so that the reserve deposits of the banks can be kept in a bank where they are surely and certainly available. We must impart to our currency system some element of elasticity, so that when there comes a sudden demand for currency it can be supplied in bank notes, without depleting the supply of reserve money.

These two most desirable changes can be best accomplished-in fact, they can only be satisfactorily accomplished--through the establishment by the Government of a central bank of issue and reserve. This is the system which has been adopted and found to work most satisfactorily in the great commercial countries of Europe and is the one that gives the-surest promise of satisfactory operation in this country.

Such a bank would not only solve the two great problems of our banking system, but it would also provide the machinery for conducting the Treasury operations in their relations to the banks with the least disturbance.

The chief weakness of our present national banking system is the provision in regard to reserve deposits, which piles reserve on reserve, in reserve cities and central reserve cities, without requiring a sufficient amount of actual cash reserve on hand. As we have seen in the present crisis, when a real emergency arises these reserves are not reserves at all, because they may in a day become unavailable.

It will be an improvement to add to the proportion of reserve to be held in cash by the country banks and the reserve city banks, but the proper solution of the difficulty is to increase the amount to be held in cash by all the banks and require all the reserve deposits to be kept with a central bank organized for that purpose. The increase in cash reserves from 6 to 10 or even 15 per cent in the country banks would not help a bank very much when it had any large demand for its deposits. What such a bank needs is a safe reserve in cash and a further reserve with a bank where it is surely available, at any time, in currency. This would be the case with reserve deposits in a central bank. Further than this, the depositing bank could be sure that at any time, as long as it was solvent, it could go to the central bank and get any amount of cash needed on the notes of its customers, or other good security. With such a bank to depend on, no solvent bank need ever have any fear of its ability to meet all demands.

The present banking law prescribes a minimum reserve on deposits in central reserve cities-New York, Chicago, and St. Louis-of 25 per cent, all of which must be in the vaúlts of the bank, in lawful money. The reserve cities are required to keep 25 per cent reserve, one-half of which may be on deposit in the central reserve cities. Banks in all other cities are required to keep 15 per cent of reserve, of which threefifths may be on deposit with reserve or central reserve cities, all three classes of banks being given credit for their 5 per cent redemption fund as reserve. Whenever there is a disturbance among the banks and any impairment of confidence, this system is always a source of weakness instead of strength. This is what may make a panic among the banks before there is even any decided uneasiness among their depositors. The banks realize upon what a small margin they depend, and each one, in self-defense, is compelled not only to collect its loans, but withdraw its deposit reserves.
Under this reserve system, deposits of $\$ 10,000,000$ in country, or nonreserve city banks, would call for a cash reserve to be kept in their vaults of but $\$ 600,000$. They could carry and count as reserve $\$ 900,-$ 000 , on deposit with reserve city banks. These reserve city banks would be required to have in their vaults cash to the amount of only $\$ 112,500$, and might deposit $\$ 112,500$ in central reserve cities, who, in turn, would have to have on hand 25 per cent, or but $\$ 28,125$ in cash.

To recapitulate this in the form of a table:
Casfi Reserve on Defosits of $\$ 10,000,000$.

Amount of cash outside original country banks, $\$ 140,625$; or 1.4 per cent.
It will thus be seen that the country bank keeps but 6 per cent on hand in cash, and of the country bank's reserve deposits the city banks keep but 1.4 per cent on hand in cash. There is therefore but 7.4 per cent of cash, or $\$ 740,625$, kept unloaned anywhere against this deposit of $\$ 10,000,000$ in the country banks. Of this but $\$ 140,625$ is outside the country bank's own vaults. If, therefore, there is a reduction in the deposits of the country banks of $\$ 150,000$ out of $\$ 10,000$,000 , or only $1 \frac{1}{2}$ per cent, it calls for more cash or reserve money than has been kept on hand for the whole $\$ 10,000,000$ in the reserve banks.
Is it any wonder, then, that the demand in the fall for about $\$ 200,000,000$ in currency for crop moving always makes a disturbance and that when this demand was accompanied by withdrawal of deposits and a curtailment of credits, caused by uneasiness and distrust, that the banks were forced in self-defense to partially suspend payments, adopt clearing house certificates, and various other expedients to furnish currency to meet such an emergency? The surpris-
ing thing is not 'chat there has been such a disturbance of credit and business, but that the situation has been met as well as it has. It speaks volumes for the credit of the banks that they have done as well as they have, and shows the confidence of the people in their ultimate solvency and strength. It is the greatest possible evidence of the , wisdom, patience, forbearance, and sound, conservative sense of our business men.

It does not, however, speak well for our political wisdom that this condition has been allowed to stand unchanged without any attempt to improve our laws. This situation is nothing new, but has been known to all students of our banking and currency system and written and talked about for many years. It has produced disturbance and stringency every autumn for forty years, and panic after panic.

It is directly and immediately due to this that the crisis of October, 1907,.assumed the phase of a bank panic and spread all over the country, instead of being confined to the comparatively few people and concerns who were first involved, and. it undoubtedly added to and spread the business reaction in all directions.
The people of all the world have been overtrading for years, especially in the United States, and the reaction was inevitable and doubtless desirable, but it might and should have been more gradual and should not have had its greatest effect on our banks. Many firms might have failed and probably some banks which were badly extended or loaded up with speculative loans and securities. We should have had a gradual, though considerable, reduction in the volume of all kinds of business and a wholesome period of economy and more normal living and trading. This would have been, in the end, beneficial, and with the wonderful recuperative resources and wealth of the United States any business properly managed and based on right conditions would soon have improved and have been as prosperous as ever. There is no reason at all that our banks, as a whole, should have become involved as they have and not only their business, but that of all their customers, have been so disturbed as it is to-day. All that is needed to have prevented this is a proper system of credit bank-note currency and bank reserves, both of which could have been supplied by the central bank of issue and reserve.

If the banks had known that there were facilities for exchanging any reasonable amount of deposit credits to note credits without depleting cash reserves, and, further, that the reserves that they had were on deposit where they would be immediately and surely available in currency, there need have been no alarm among them. There would have been no scarcity of currency; no derangement of the domestic exchange; and there would have been no panic among the banks nor among the people.

The only way in which bank deposit credits can be properly protected from sudden and unexpected calls, when all may be involved at the same time, is by a system of note credits which can be at any time immediately exchanged for the deposit credits. They are essentially the same thing, and should be, daily and hourly if necessary, convertible from one to the other, at the option of the creditor who is the depositor or note holder. The bank of issue should be required, and must in self-defense, keep the same reserves against notes as against deposits. If this is done, there is no expansion or inflation when a note is paid out to a depositor, and no contraction when a note is re-
turned to the bank for deposit. With a given amount of reserve money, a given total of deposits and notes can be maintained, and it makes no difference to the bank or anyone else but the customer, who uses either, at his own option, whether the deposit remains in the bank as a credit to be checked against or is taken away in the shape of a circulating note. The only thing is to make the note, from the circumstances and conditions of its issue, perfectly secure to the holder, which can be done with absolute safety in a credit note.

Our bond-secured bank notes offer no help to a bank in any sudden call for deposits. From their very nature they are fixed currency, issued on the secured-currency principle, as distinguished from the credit or banking principle. When issued they stay out indefinitely, without redemption, merely being renewed on the average once in two years because they are worn out. They can not be issued or retired quickly, and the purchase of bonds for their security requires as much money as they furnish when issued. It is only when the bonds for security can be borrowed or there is some government deposit obtained that they are of any value in meeting an emergency calling for deposits. Nor will it help the situation any to increase the volume of bonds obtainable as security for notes or to accept as security for them other than United States Government bonds. That would only add to the volume of the rigid, inelastic notes, such as we now have, and they would be no more responsive to the demands of business. There would be some power of expansion until they were all issued; then they would stay out with no more tendency to contract when not needed than we have at present. They would tend to inflation, but having no tendency to contract there would be no expansion possible to offer relief in any emergency calling for current cash or the payment of deposits. What is needed in such a case is note circulation which can change quickly and automatically in response to the demand, and contractibility is quite as necessary as expansibility.

The issue of the so-called emergency credit notes, with a high tax to retire them when not needed, would be somewhat better than more bond-secured notes, but the high tax would prevent their use except when the situation had become acute and the emergency-very grave. Their issue would at once be a confession of weakness and a danger signal that no bank would dare make until in desperate condition. They undoubtedly would be useful in emergencies, and would be a great aid in restoring confidence and quieting a panic after it might be well under way, but they would not be an efficient means of preventing panics, except so far as there might be some moral effect from the knowledge that they would be available in case conditions became bad enough to justify their use.

The present bank-note circulation can be best improved and made elastic by permitting the banks to issue a fixed percentage of their note-secured circulation or capital in notes uncovered by bond deposits. If, against these notes, banks are required to carry the same reserve as against deposits, it will preserve the similarity which is necessary between note credits and deposit credits. These notes can be made perfectly safe by a guaranty fund of not over 5 per cent, which would be many times the amount of money required to redeem the notes of failed banks, based on the experiences of fortyfour. years. There should be a graduated rate of taxation on these notes, beginning with not over $2 \frac{1}{2}$ per cent, and reaching finally to

6 or 7. The addition of such notes to our system would do much to improve it, but still it is not believed that it would be as efficient or as satisfactory in anyway as to have all the credit notes issued by a central bank of issue.

The use of clearing-house certificates by the banks has been found a very efficient means for their defense, and has, on many occasions, probably prevented a great number of bank failures during panics, and there is some merit in the suggestion that the clearing house should be recognized by law and authorized, under certain conditions, to issue clearing-house certificates for use as emergency circulation. The adoption of this idea might make a great improvement in our banking system, but this is only a half-way measure. The full development of the national clearing-house idea in the adoption of this principle should carry us further and to the inevitable and logical conclusion and lesson to be drawn from it, which is that we should have a national central bank of issue and reserve.

Instead of stopping at the issue of clearing-house certificates, which are really credit notes on a large scale, it would be far better to have these notes issued by a central bank under Government authority and under proper laws and regulations. This could be done far more systematically and efficiently; it would have none of the disadvantages of the other system, and would have all its advantages, and more besides.

It is useless to try to evade this question or dodge the issue. The need is far more for something that will prevent emergencies and panics than for devices to be used in stopping one after it has occurred. The only way to make our system what it should be is through the agency of a national governmental bank. The experience of all other countries has demonstrated this. Every important commercial country in Europe has adopted this general plan. If we had had such a bank in operation in 1907, no such bank panic as we have had would have been possible. Unless we do something of this kind we shall always be in danger of a recurrence of the same thing, and we shall have panic after panic until we learn the plain lesson from experience and adopt the only efficient, scientific, and proper means to protect our people in business from such disasters. This is a matter that is of even greater interest and importance to business men, and the people generally, than it is to the banks themselves.

When a panic occurs the banks are able, as they have been in the last few weeks, to stand together, and through their clearing-house associations and other means, cooperate for their own protection. They issue clearing-house certificates and other temporary currency, and by partial or more or less complete suspension of payments tide things over and avoid failure. They call for and very properly receive all the aid that can be given them by the Treasury Department, and the National Government, and the net result is that while a few banks that are badly expanded or improperly managed fail, the great majority of them are able to take care of themselves.
While such a condition prevails among the banks, the other business of the country is almost in a state of chaos. All the machinery of domestic exchange suddenly stops. Collections are almost impossible to make, and it is almost equally difficult to make remittances. When a business man has obligations coming due, not only his bank account is unavailable, but the people who are indebted to
him, and who may want to pay, are entirely unable to send him remittances, in any shape, which he can make available. Manufacturers are forced to suspend; workmen are thrown out of employment; business men are forced to fail, through no fault of their own, but simply for the reason that suddenly, and without warning to them, all the banking machinery and facilities of the country break down and cease to perform their proper functions. There is no citizen of the United States who is free from the dangers, losses, and embarrassments produced by such a situation, and probably the worst feature about it all is that after such a panic there is always a long period of depression, bringing suffering and privation to those who are the least to blame.

There can be no higher duty of government than the passing of the necessary laws and the adoption of a system to prevent occurrences which produce such widespread financial injury and disaster. The thing absolutely essential for banking is a system of thoroughly safe bank notes, which will be responsive to the demands of business and as readily contract as expand; and, in addition to this, a system of bank reserves, which will be real reserves when needed and always immediately available.

There have been many plans suggested by which some elasticity may be introduced into our national bank-note currency. All of them have more or less merit, and all of them have some serious objection. The best way, and in fact the only thoroughly efficient and good way, to issue these notes is through a central Government bank. That is the way it is done in France, where they have had, for more than a century, a central bank which is the admiration of the world. It is the method adopted after several experiments in Germany, and it has worked with great satisfaction and benefit to all the German people. Business is very much the same all over the world, and our problem is so similar to theirs that we should take profit from their experience and learn from them how to perfect our system.

The installation of a proper central bank would not only be a great benefit to all the business of the country and a great protection to our people, but it would solve the problem of the relations of our Treasury Department to the business of the country. It would give us not only a reliable and efficient system in handling our Government finances, but add stability and safety to our banking system. It would shield and protect the citizen in all the relations which are so vital to him for the conduct of his business or the support of his family. From the very necessity of the case our Treasury Department must have vast transactions in the collection and disbursements of its revenues, which vitally affect the business of the country every day of the year. In its relations with the banks and financial institutions, not only through the funded debt and deposits made with them, but in the collection of revenues and disbursements, the operations of the Treasury are so vast and their ramifications so infinite that it is of vital importance that they be conducted by the most systematic and efficient means which can be devised.

For several years past the revenues of the Government have been largely in excess of expenditures, and there has been a constant problem presented to each successive Secretary of the Treasury as to the best means of replacing in circulation the money which the Government is forced to collect. The method of replacing it by
deposit with the banks is probably the only one available and, although it has been handled with unusual skill and ability, is most unsatisfactory, unsystematic, and inefficient. It always is a matter which provokes criticism and complaint. It could be handled with far better results if the Government had under its control a central bank to which all revenues could be paid and through which all disbursements could be made. It would be better for the Government and would result in far better service to the people.

Many plans have been suggested for the organization and control of a central Government bank. An essential feature of it should be that it must be under Government control, so that it could never be monopolized or used by any man or set of men. It should be kept out of politics. The men chosen for its managers and directors should be men of the highest character and ability, whose duties and interest would be for the undivided advantage and interest of the bank. It would not be difficult to accomplish this end by having the control divided between certain directors elected by the shareholders and a certain number chosen by the Government.
The bank should not be allowed to do a general or commercial business, but should be confined to the transactions of the Government business, the issue of credit notes, receiving reserve deposits from other banks, the discount of their paper on approved security, or rediscounting notes of their customers for other banks. It should also have the right to deal in United States Government bonds, and probably the bonds of States and muicipalities, but not in stocks. It should have such authority for dealing in foreign exchange as will enable it to accumulate gold credits abroad and import gold and bullion when needed for its reserves. The main office of the central bank should be in the city of Washington, and such branches established in the reserve cities and sub-treasury cities as are found necessary. Its note issues should be credit notes, the same as in Germany and France, and they should have the same protection in the way of a very large gold reserve, the balance to be covered by bonds of the Government or other approved issues or by the notes discounted by it for other banks. The central bank, if given the exclusive right to issue credit bank notes, as it should have, could regulate the issue of notes in accordance with the demand, which could be determined automatically and with precision, through its relations with the other banks of the country. This should not make any change in the present bond-secured notes of the national banks, and would therefore not disturb the present volume of the currency or make any change in the demand for United States Government bonds as a basis for circulation. Such a bank as is described, if established, would be a very great aid in the establishment of the postal savings bank system and make that a real practical question. One of the hardest problems in connection with the postal savings bank is to determine how the deposits should be handled and invested, or how deposited with the banks, in order to prevent the postal savings bank only adding to the amount of money the Government now takes out of circulation. The postal savings bank funds could be deposited with the central bank of issue and reserve, and thus be made available for the business of the banks, which would lead to their distribution wherever needed.

Undoubtedly the most practicable plan which has been suggested would be to have the stock of the central bank subscribed by the other
banks in a fixed proprotion to their capital. In addition to this, there might also be some shares sold by public subscription, with a limit as to the amount or number of shares which could be held by any individual. If it should be deemed advisable, there could be no objection to the Government owning a certain proportion of the shares, which might be paid in in cash or in Government bonds, but as there would be no trouble in getting all the capital needed this would seem to be unnecessary. The better plan would be to have the stock subscribed by the banks of the country in a fixed percentage of their capital; have the stock nontransferable, and require its surrender at its par value when any bank failed or went out of business. The national banks should be compelled to subscribe for this stock in proportion to their capital on entering the system. The capital would thus expand as the number of banks increased and there would be more business for it to do. The directors of the bank should be chosen, two-thirds by the shareholders and one-third by the United States Government. Some of the Government directors, if necessary, could be given the right to veto certain transactions, and the interests of the Government, and of the people generally, could be protected in this way. The profits of the bank should be limited, and the bank be conducted for the general welfare, not with a view of making profits. After providing for the accumulation of a moderate surplus there should be a return to the shareholders of, say, 3 or 4 per cent, and the remainder of the profits should be divided as in Germany-a small proportion to the shareholders and the balance to the United States Government.

A national central bank organized in this way, with its profits limited and its ownership widely distributed, mainly among the banks who were to be its customers, which would not be permitted to do a commercial business, but be limited to transaction of business with the Government and with other banks, would not be open to the objection urged against the former United States banks, that they were really private institutions engaged in a general banking business.

Such a bank would be little more than a department of the Government. It would greatly improve the efficiency and value of the Treasury Department, and make it a means of assistance and benefit to business, instead of a menace and a danger, and would make our currency and banking system a source of impregnable strength in times of financial stress. By the wise use of its great powers and facilities it would be able to absolutely prevent the recurrence in the United States of a widespread bank panic. It would add to the stability of our business in every line and give us a banking and a financial system equal to any in the world.

The central bank of issue and reserve is urged mainly in the interest of people engaged in general business outside of the banks as a protection to them. The banks would have no interest in it except as it aided the general welfare. In fact it would rather tend to reduce the profits of the banks, and would interfere with the business of some banks holding large reserve deposits. The advantage to the banks would be in the protection afforded them in the reliability and mobility of their reserves and the steadiness and safety it would insure to business transactions of all kinds. If a satisfactory plan for the mutual guarantee of deposits by the banks can be worked out, it could be done through the means of the central bank better
than through the Treasury Department. Some of the objections to the guarantee of deposits by the General Government would not hoild in the case of its being done by a central bank which might be given power to do that in its charter.

If the experience of the country in the bank panics from 1857 to 1893 needed any further confirmation, the panic of 1907 has demonstrated beyond the possibility of denial that perfectly solvent banksif independent, isolated units with no power of cooperation except through such voluntary association as their clearing houses-can not protect themselves in a panic and save themselves from failure without such a suspension of payments as to produce disorder and demoralization in all the business of their customers.

Well managed, sound, and solvent banks have been dishonored by having to refuse payment, and all our commercial, industrial, and financial affairs have been thrown into confusion because the Government fails to provide the necessary financial machinery to protect them in times of excitement and peril. No single bank or group of banks can do this for themselves. They must depend on the Government of the United States. For this reason this question is submitted for your consideration.

The solution of such a vast problem as this presents is not to be hoped for in any short time. Opinions are still too diverse to bring about quickly any such agreement as is necessary to accomplish a definite and final result.

In the meantime, we have a real emergency to face. Confidence is only in a measure restored and, while there is real progress being made, it is from necessity very slow. The banks are resuming as fast as they dare, and this is increasing daily, but it could be done more quickly and with much greater benefit to business if some aid could be given by legislation.

If a bill should be passed by Congress providing for some emergency issue of currency, through the clearing-house associations or other machinery now organized and existing, so that the action might promise to be very prompt and effective, it would doubtless be very helpful.

If the action taken should meet with such approval and indorsement as to convince bankers and business men that it would meet the emergency, it might operate as the suspension of the bank act has done in England on several occasions and give the relief needed before the provisions of the act ever were really in operation.

Any measure of thiskind, however, to be of any assistance in this emergency must be adopted very promptly.

Wm. B. Ridgely, Comptroller of the Currency.

The Speaker of the House of Representatives.

# REPORT OF THE REGISTER OF THE TREASURY. 

> Treasury Department, Ofeice of THe Reglister, Washington, D. C., September 20, $190 \%$.

Sir: I have the honor to make the following report of the business transacted in this office during the fiscal year ended June 30, 1907:

The duties of the Register of the Treasury are thus defined: * * * Signs and issues all bonds of the United States, the District of Columbia, the sundry loans of the Philippine Islands, the City of Manila, the Panama Canal, and the Spanish indemnity, and transmits to the Treasurer of the United States schedules showing the name of every individual, corporation, etc., holding registered bonds and entitled to receive interest thereon. He receives, examines, and registers coupon bonds exchanged for registered bonds or redeemed, and registered bonds transferred and finally redeemed. He receives, examines, arranges, and registers the upper halves of all redeemed United States notes, gold certificates, silver certificates, and Treasury notes; fractional currency notes, detached interest coupons, interest checks on registered bonds, and all other United States securities redeemed and destroyed. He is represented on the committee having in charge the destruction, by maceration, of certain of the United States securities, etc., mentioned herein. Also all customs, internal-revenue, and postage stamps condemned for imperfections and destroyed. He signs all the correspondence of the office. The work is performed in two divisions, as follows:

## Division of Loans.

The division has charge primarily of the interest-bearing debt of the United States. To this has been added the care of loans authorized by Congress for the District of Columbia, the Government of the Philippine Islands, the City of Manila, and the Panama Canal. It also is intrusted with the care of the Spanish indemnity loan, an amount due from the Kingdom of Spain to certain American citizens.

The principal duties of this division are as follows: The receipt of new coupon and registered bonds after they have been prepared by the Bureau of Engraving and Printing, together with the custody of the same; the preparation of registered and coupon bonds for issue, including the inscription of the names of the owners on registered bonds, and signing the same; writing the letter which accompanies each package or lot; preparing the receipt to be signed by consignees,
and delivering the bonds for transmittal. Full records are kept: First, of all issues of bonds; second, of the transfer of registered bonds from one owner to another, and, third, of canceled bonds which have been purchased, have been refunded, or have been redeemed at maturity. Accounts in detail are opened with each holder of registered bonds.
The assignments of all registered bonds presented for transfer to other parties or for redemption are carefully examined. The assignments of much the larger part of the values involved being made by attorneys, executors, administrators, guardians, and representatives of banks and other corporations, it is necessary that the papers showing the authority of such agents shall be examined, indexed, and filed for instant reference. It is also necessary in every such transaction to see that the powers exercised by the attorney or representative are included among those granted him by his principal.

Quarterly schedules are prepared for the payment of interest on all United States registered bonds, on the three Philippine issues, on the two issues of City of Manila sewer and water bonds, and on the Panama Canal bonds. The schedules on the 3.65 per cent bonds of the District of Columbia are prepared semiannually, and those on the Spanish indemnity certificates annually. These schedules show the amount of registered bonds of each loan standing in the name of every owner at the date of the dividend, the amount due at each date of payment, together with the address to which the Treasurer of the United States is to forward checks for interest.
The following table shows the number and amount of new bonds received from the Bureau of Engraving and Printing during the year:

New Bonds Regetved During the Year ended June 30, 1907.

| Loan. | Class. | Number of impressions. | Amount. |

During the year two new loans were issued.
PANAMA CANAL LOAN.
Between August 1 and September 15, 1906, $\$ 30,000,000$ was issued under the act of June 28, 1902, to provide funds for the construction of the Panama Canal. Of the whole amount but a little over 1 per cent ( $\$ 358,300$ ) was issued in coupon bonds, as against $\$ 29,641,700$ in registered bonds; and of this small amount of coupon bonds, all but $\$ 21,500$ was very speedily exchanged for registered. At the date of the latest dividend on this loan (August 1, 1907), $\$ 29,672,380$ of the registered had been deposited with the Treasurer of the United States as security for circulation or for deposits, leaving but $\$ 306,060$ for individual holders or corporations other than banks.

## LOAN OF THE CITY OF MANILA.

Prior to the last fiscal year there had been issued four series of 4 per cent Philippine bonds, under acts of Congress approved March 8, 1902, July 1, 1902, March 2, 1903, and February 6, 1905, and acts of the Philippine Commission approved by the President of the United States February 20, 1905, May 1, 1905, and January 25, 1906.
These issues were:
Philippine loan of 1914-1934, land purchase............................. $\$ 7,000,000$
Philippine loan of 1915-1935, public improvements, first series.......... 2,500,000
Philippiue loan of 1916-1936, public improvements, second series ........ 1,000,000
City of Manila, sewer and water loan of $1915-1935$, first series............ 1, 000,000
On January 2, 1907, an additional issue was made of $\$ 1,000,000$ in bonds of the City of Manila, the proceeds to be devoted to the improvement of the sewer and water facilities of that city. These bonds are redeemable at the pleasure of the City of Manila after January 2, 1917, and payable Januarỳ 2, 1937. As in previous issues of this character, by agreement between the Secretary of the Treasury and the Secretary of War, it was arranged that issues and transfers of this issue should be made in this office, and that interest should be paid by the Treasurer of the United States on schedules prepared by this office.

During the year $\$ 27,000$ in the temporary issue of Philippine public improvement bonds of 1915-1935 have been reissued in engraved bonds, thus completing the reissue of all the temporary Philippine issues in permanent bonds.

REDEMPTION OF FOUR PER CENT BONDS, FUNDED LOAN OF 1907.
By the terms under which the bonds of the 4 per cent funded loan of 1907 (acts of July 14, 1870, and January 20, 1871) were issued, they were redeemable at the pleasure of the Government after July 1, 1907.

On December 10, 1906, a statement was published in which the Secretary of the Treasury announced his readiness to buy $\$ 10,000,000$ of the foregoing bonds, registered bonds ex-interest at 101 per cent, and coupon bonds at 102 per cent.

On February 11, 1907, the Secretary gave public notice that he would purchase not exceeding $\$ 25,000,000$ of the same loan if offered at $101 \frac{1}{2}$ flat.

On March 14, 1907, the Secretary gave notice of his readiness to redeem not exceeding $\$ 25,000,000$ in bonds of the same loan, on which the interest to July 1, 1907 would be paid with the bonds when presented.

On April 2, 1907, the Secretary of the Treasury gave notice that on and after April 6 , and before June 30,1907 , he would refund $\$ 50,000,000$ of the bonds of the said loan into bonds of the 2 per cent consols of 1930. The bonds of the 4 per cent funded loan of 1907 were to be received at a valuation equal to their present worth, to yield an income of $2 \frac{1}{\frac{1}{2}}$ per cent per annum, and like amounts of 2 per cent bonds were to be issued in exchange therefor at a premium of 3 per cent.

The residue of the bonds of the same loan, after the refunding. provided for, was called for redemption after July 2, 1907, at which time the bonds so called for redemption ceased to bear interest. Bonds redeemed under this last clause will appear in the report for the year ending June 30, 1908.

The following table shows the amount of bonds of the funded loan of 1907 purchased, redeemed, and refunded under the foregoing calls:

Four Per Cent Bonds, Funded Loan of 1907, Purchased, Redeemed, and Refunded.

| Call. | Coupon. | Registered. |
| :---: | :---: | :---: |
| Circular of December 10, 1906 | \$341,950 | \$2, 827, 250 |
| Circular of February 11, 1907. | 198,800 | 1,869,550 |
| Circular of March 14, 1907. | 4,652,900 | 20, 435, 850 |
| Circular of April 2, 1907, refunding into 2 per cent consols of 1930 | 4,312,550 | 45, 995,250 |
| Total. | 9,506, 200 | 71, 127,900 |
| Total amount of coupon and registered bonds canceled | $\cdots \cdot \cdots$ | \$80,634, 100 |

All the registered bonds ( $\$ 71,127,900$ ) were delivered to this office for record at the time of payment or settlement, and appear in the table of bonds canceled on page 455 .

The canceled coupon bonds pass through the office of the Auditor for the Treasury Department before reaching this office, and of the whole amount $\$ 3,804,500$ was received in time to be recorded in the books and included in the same table. The remaining $\$ 5,701,700$ have since been received and will be included in the report for the current year.

The 2 per cent bonds of the consols of 1930 issued in exchange for the bonds presented for refunding under the circular of April 2, 1907, were:
Coupon bonds.............................................................. \$1, 094, 300
Registered bonds................................................................ 49, 213, 500
Total........................................................... 50,307,800
Under date of December 5, 1906 (Circular No. 101), the Secretary of the Treasury gave notice to holders of United States bonds that interest maturing on the several dates between and including January 1 and May 1, 1907, would be prepaid without rebate if claimed after December 15, 1906, but the right to claim such prepayment only continued to January 1, 1907.
The first of the following tables shows the amount of registered bonds outstanding at the date of each dividend on which interest was prepaid under the above circular. These amounts include coupon bonds on which the interest had been prepaid and which had subsequently been exchanged for registered bonds.

The remaining amounts on which interest was paid on the regular dates appear in the second table. The sum of the amounts in the two tables is the amount due at any particular date.

Registered Bonds on which Interest was Prepaid under Circular No. 101, of December 5, 1906.

## SPANISH INDEMNITY CERTIFICATES.

These certificates represent debts due from the Kingdom of Spain to American citizens amounting to $\$ 599,850.16$, being the amount awarded said citizens under the treaty of February 17, 1834. About once a year the sum of $\$ 28,500$ is received from Spain and divided among the present holders of the certificates. The United States assumes no responsibility except to see that the money reaches those to whom it may be due.

The sixty-sixth installment was paid September 25, 1906. There are at present 109 holders of these certificates.

The following table shows the transfer of Spanish indemnity certificates from one owner to another during the last ten years:

Transfer of Spanish Indemnity Certificates.

| Year. |  |

PACKAGES RECEIVED AND SENT.
During the year there were received by registered mail 2,408 packages containing bonds amounting to $\$ 26,378,651.47$. There were sent from the office by registered mail 4,435 packages containing bonds of the aggregate value of $\$ 53,016,429.97$.

During the year the Panama Canal loan ( $\$ 30,000,000$ ) was issued, and the transfers, etc., consequent upon that issue have since been regularly made, becoming a portion of the current work of the division. An additional issue of $\$ 1,000,000$ in bonds of the City of Manila was made, and this was also added to and became regularly part of the current work. The work of refunding at various times, and the redeeming of the 4 per cent funded loan of 1907, were also added to the current work.

## Division of Notes, Coupons, and Currency.

This division receives, counts, arranges, registers, examines, and files for future reference all redeemed, exchanged, and transferred coupon bonds, paid coupons, interest checks, and all United States interest-bearing securities, such as Treasury notes, seven-thirty notes, compound-interest notes, and gold and other certificates payable to order. It also makes the final count and examination of the upper halves of all redeemed United States currency prior to its final destruction. This division represents the Register on the various committees having in charge the examination and counting of customs, internal-revenue, and postage stamps condemned for imperfections, burnt and mutilated notes sent in for exchange and redemption, and witnessing the final destruction of the above by the process of maceration.

## COUPON BONDS.

During the year there were received, counted, entered in blotters, examined, transferred to numerical registers, and scheduled 25,502 coupon bonds, with 804,410 coupons attached, the bonds amounting to $\$ 13,304,160$.

## Amounts of Various Redeemed Vouchers Received, Canceled, and Destroyed to June 30, 1907.

| Classification. | Amount. |
| :---: | :---: |
| United States coupon bonds (destruction ceased in 1880) | \$1, 412, 995, 450.00 |
| District of Columbia coupon bonds (destruction ceased in 1880) | 8,692,000.00 |
| One-year Treasury notes, act of Mar. 3, 1863. | 44, 489, 580.00 |
| Two-year Treasury notes, act of Mar. 3, 1863. | 166, 453, 150.00 |
| Compound-interest notes, acts of Mar. 3, 1863, and June 30, 1864 | 266, 435, 560.00 |
| Gold certificates, act of Mar. 3, 1863 (destruction ceased in 1873) | 574, 506, 700.00 |
| Gold certificates, act of July 12, 1882, payable to bearer. | 822, 260, 111.00 |
| Silver certificates. | $3,412,217,000.00$ |
| Refunding certificates, act of Feb. 26, 1879, payable to bearer | 39, 930, 810.00 |
| Old demand notes. | 59, 976, 717. 50 |
| United States notes. | 3, 496, 054, 792.00 |
| Treasury notes of 1890. | 441, 447, 000.00 |
| Fractional currency notes | 353, 484, 146.84 |
| Total | 11,098, 943, 017.34 |

## Recommendations.

I respectfully recommend that the salaries of the two chiefs of division of this office be increased from $\$ 2,000$ to $\$ 2,250$ per annum, and thus make their salaries more nearly on a par with the salaries of chiefs of division doing work in other bureaus of the Department involving no greater responsibility nor more exacting duties than the chiefs of division of this office.

The custodian of the vault in the division of loans in this office receives for his regular work $\$ 1,800$ per annum; in addition he has control of Government securities amounting to many millions of dollars. I would respectfully recommend that his salary be increased $\$ 100$, which would make it more nearly conform to that of other vault keepers in the Department.

I also respectfully recommend that the office be given one additional clerk of Class 4, in place of one of Class 3. Such recommendation provides a just remuneration for a deserving and efficient employee in this office. Its adoption would restore to his former grade a clerk who was reduced under what is known as "the Dockery Act," and who is now doing the identical work performed by him at the time of his reduction.

I also recommend, in view of the progressive requirements upon this office, that the 9 counters who are now paid $\$ 720$ per annum be increased to 14 and be made expert money counters of Clpss D , with salaries of $\$ 900$. This will place them on an equality in compensation with other employees doing similar work, and will be a slight promotion to a deserving and faithful force of counters.

Respectfully submitted.

W. T. Vernon, Register.

The Secretary of the Treasury.

# REPORT OF THE COMMISSIONER OF INTERNAL REVENUE. 

## Treasury Department, Office of Commissioner of Internal Revenue, Washington, D. C., November 1, 1907.

SIR: I have the honor to make report of the work of the Bureau of Internal Revenue for the fiscal year ended June 30, 1907, accompanied also with a statement of the receipts from the several sources of internal revenue for the months of July, August, and September of the current fiscal year.

## RECEIPTS.

The receipts of this Bureau for the past fiscal year were $\$ 269,664,022.85$, being an excess of $\$ 20,561,284.85$ over the collections for the preceding year.

The receipts for the first three months of the current year show an increase in collections of $\$ 2,872,037.93$, as compared with the same months of the past fiscal year, and, based upon this increase, it is estimated that the total receipts for the fiscal year ending June 30, 1908, will aggregate $\$ 278,000,000$.

The objects of internal-revenue taxation producing the largest amount of revenue are distilled spirits, fermented liquors, and tobacco.

During the past fiscal year there was collected on distilled spirits $\$ 149,749,338.63$; on fermented liquors, $\$ 58,546,110.69$; on tobacco, $\$ 51,81.1,069.69$.

## RECEIPTS IN LARGE TAX-PAYING STATES AND DISTRICTS.

The leading States in the payment of internal-revenue taxes for the past year are Illinois, $\$ 54,856,141.97$; New York, $\$ 32,353,647.70$; Indiana, $\$ 29,675,182.10$; Kentucky, $\$ 28,444,138.38$; Pennsylvania, $\$ 22,727,998.26$; Ohio, $\$ 21 ; 834,068.60$.

Among the States paying the smallest amounts are Idaho, Maine, Mississippi, Nevada, New Mexico, North Dakota, Vermont, and Wyoming.

Of the 66 collection districts in the territory of the United States subject to internal-revenue laws the Fifth district of Illinois reported the largest collections- $\$ 35,577,448.10$.

In 1906 the total production of distilled spirits was $150 ; 110,197$ gallons; in 1907, 174,712,218. In 1906, in round numbers,
$124,500,000$ gallons of tax-paid spirits were withdrawn; in 1907, $136,100,000$. There has been an increase in the amount of tobacco and snuff manufactured and in the production of beer.

The four States having the largest production of distilled spirits during the past fiscal year are Illinois, $48,273,128$ gallons; Kentucky, 38,301,247 gallons; Indiana, 26,873,413 gallons; Ohio, 12,625,801 gallons. The two collection districts having the largest output of distilled spirits are the Fifth district of Illinois, 38,129,229 gallons, and the Fifth district of Kentucky; 18,148,956 gallons.

The four States which made the largest quantity of fermented liquor are New York, 13,018,902 barrels; Pennsylvania, 7,541,796 barrels; Illinois, $5,423,328$ barrels; Wisconsin, 5,026,322 barrels. The two districts which produced the largest quantity of fermented liquor are the Third district of New York, $5,119,588$ barrels, and the First district of Illinois, $4,570,238$ barrels.

The four States producing the greatest number of cigars weighing more than 3 pounds per thousand, and the production of each during the year, are as follows:

| Pennsylvania. | 1,923,575,754 |
| :---: | :---: |
| New York. | 1, 453, 317, 020 |
| Ohio. | 682, 944, 846 |
| New Jersey. | 470, 842, 704 |

The two districts showing the largest production of cigars are the Ninth Pennsylvania, $795,248,267$, and Third New York, $723,866,912$.

The States showing the greatest production of little cigars (weighing less than 3 pounds per thousand) are:

The greatest production by districts is as follows:

Second New York. . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 58, 922, 570
The States of New York, Virginia, Louisiana, North Carolina, Pennsylvania, and California, in the order named, show the greatest production of cigarettes weighing less than 3 pounds per thousand.

| New York produced | 2, 738, 574, 955 |
| :---: | :---: |
| Virginia produced | 1, 104, 201, 630 |
| Louisiana produced | 389, 368, 890 |
| North Carolina produced | 109, 660, 000 |
| Pennsylvania produced. | 79, 475, 160 |
| California produced | 28, 998, 658 |

The two districts showing the greatest production of little cigarettes are the Second New York, which produced $1,609,801,830$, and the Third New York, which produced $1,074,238,625$.

New York State produced the greatest number of large cigarettes, showing a production of $10,127,954$; of which number $6,026,804$ were manufactured in the Third district and $4,097,650$ in the Second district.

The States of Missouri, North Carolina, Kentucky, Ohio, and Virginia, in the order named, were the largest producers of both chewing and smoking tobacco, the quantity produced being as follows:

Pounds.
Missouri................................................................................. $72,048,808$
North Carolina.............................................................. 63,440, 723
Kentucky............................................................................... 32, 342,943

Virginia.
$28,625,393$
The First Missouri district produced the largest quantity, the returns showing the manufacture of $71,779,095$ pounds during the year, the next largest being the Fifth Kentucky, which produced $47,451,316$ pounds.

## COST OF COLLECTING THE INTERNAL REVENUES.

The cost of collecting the internal revenues for the past fiscal year was 1.81 per cent, which is a reduction of cost as compared with the last fiscal year, when the percentage was 1.90 .

The average cost since the creation of the Bureau is 2.74 per cent.

## DENATURED ALCOHOL.

Under the provisions of the act of June 7, 1906, which took effect January 1, 1907, domestic alcohol of the required proof may be withdrawn from bond, free of tax, on application of any registered distiller, for use in the arts and industries, and for fuel, light, and power, when rendered unfit for use as a beverage or for liquid medicinal purposes, by the admixture of suitable denaturing material in a denaturing bonded warehouse specially designated or set apart for that purpose.

The privilege so conferred is limited to alcohol withdrawn from distillery warehouses and denatured on the distillery premises. Provision, however, is made in the act for the redenaturation and reuse of alcohol recovered by manufacturers during any manufacturing process; and, by a supplemental act, approved March 2, 1907, which went into effect September 1, 1907, provision is also made for the establishment of central denaturing, bonded warehouses; for the transfer thereto from distillery warehouses of alcohol in packages, tanks, or tank cars; for the substitution of cisterns or tanks for bonded warehouses at distilleries producing alcohol from any substance whatever for denaturation only, and having a daily spirit producing capacity of not exceeding 100 proof gallons; and for the exemption of such distilleries from such other provisions of existing law relating to distilleries as the Commissioner of Internal Revenue and the Secretary of the Treasury may deem expedient.

The amendatory act also authorizes the use of denatured alcohol in the manufacture of ether or chloroform and other definite chemical substances, where the alcohol so used is changed into some other chemical substance; also the denaturation of rum of not less than $150^{\circ}$ proof; the establishment of storage tanks in distillery bonded warehouses, for alcohol (or rum) intended for denaturation, and the transfer therefrom, or from distillery receiving cisterns, of alcohol by pipes directly to the distillery denaturing bonded warehouse.

Regulations governing the manufacture, sale, and use of denatured alcohol, under the act of June 7,1906 , were duly issued, and the same, have been revised and supplemented with such further provisions as were made necessary by the amendatory act of March 2, 1907. In many respects these regulations are similar to those in force in England and Germany, where denatured alcohol may be used free of tax; and a brief synopsis of the same is hereto appended.

Under these regulations two classes of denatured alcohol may be used.
(1) Completely denatured alcohol which may be used for domestic or mechanical purposes, including fuel, light or power, or for manufacturing purposes not prohibited. For this class of alcohol the following denaturants have been prescribed:
(a) To every 100 gallons of ethyl alcohol (of not less than $180^{\circ}$ proof) 10 gallons of approved methyl (wood) alcohol and one-half gallon of approved benzine.
(b) To every. 100 gallons of ethyl alcohol 2 gallons of approved methyl alcohol and one-half gallon of approved pyridin bases.
(2) Specially denatured alcohol.-This class of spirits is permitted to be used for manufacturing purposes only, where completely denatured alcohol is not suitable for the use intended. Alcohol prepared with special denaturants has thus far been authorized for use in the manufacture of the following named articles:
(a) Shellac varnish, photographic dry plates, embalming fluid, heliotropin, lacquers from soluble cotton, resin of podophyllum, and similar products, manufacture of thermometer and barometer tubes.
(b) Celluloid, pyralin, and similar products.
(c) Transparent soap.
(d) Smoking and chewing tobacco.
(e) Photo-engravings.
(f) Fulminate of mercury.
(g) Watches.
(h) Sulphonmethane.
(i) Purification of rubber.
(j) Pastes and varnish from soluble cotton.
(k) Photographic collodion.
(l) Imitation leather.
( $m$ ) Sulphuric ether, acetic ether.
(n) Ethyl chloride.
(o) Surgical ligatures.
(p). Filaments for incandescent lamps.
(q) Silverware and bronze.

## alcohol withdrawn for denaturation.

During the six months ended June 30, 1907, there were withdrawn from bonded warehouse for denaturation $3,084,950.8$ taxable (proof) gallons of alcohol, or at the rate of 6,169,901.6 gailons annually; or approximately the quantity ( $7,367,594$ gallons) which from reports received from collectors in 1882 it was then estimated would be used annually for industrial purposes if exempt from tax. (Report of Commissioner of Internal Revenue, 1882, pp. CXXVII-VIII.)

The estimate then made, however, included alcohol used in liquid medicinal preparations, which at that time represented a large per-
centage of that used for manufacturing purposes. At that time, also, comparatively little wood alcohol was produced. But, owing to the high rate of tax imposed on ethyl alcohol (which in 1894 was raised from 90 cents to $\$ 1.10$ per proof gallon), the use of wood alcohol rapidly increased, and at the time of the passage of the act of 1906 had to a large extent supplanted that of grain alcohol for industrial purposes. According to information obtained by the Committee on Ways and Means, pending the consideration of the denatured alcohol bill, the quantity of wood alcohol produced in the United States during the year 1905, exclusive of that exported, was about $6,000,000$ gallons, and the price of producing the crude alcohol is stated in the committee's report as 40 cents per gallon, or nearly double the cost ( 20.5 cents per gallon ${ }^{4}$ ) of denatured alcohol to which 10 per cent of wood alcohol had been added, as estimated by the committee. (House Report 2888, 59th Cong., 1st sess., pp. 3-5.)

After the passage of the act of June, 1906, however, the market price of refined wood alcohol was reduced from 70 cents per gallon (in December, 1906) to about 40 cents per gallon (in January, 1907), the then selling price of denatured spirits. Notwithstanding this large reduction in price it would appear that this class of alcohol has been in turn displaced to a large extent by denatured alcohol.

That little, if any, loss of revenue has thus far resulted from the use of industrial alcohol free of tax appears from the fact that the quantity of alcohol withdrawn from warehouses on payment of tax during the last fiscal year exceeded like withdrawals during any previous fiscal year since 1894.
The expenses incident to the administration of this law have also been materially less than anticipated at the time the act of June 7, 1906, was enacted. Of the $\$ 250,000$ appropriated by that act there were expended during the six months ended June 30 , 1907, $\$ 43,266.76$ only, which amount covers salaries and expenses of inspectors, deputy collectors, storekeepers, gaugers, traveling expenses, office force, laboratory supplies, locks, etc.

## MANUFACTURE, SALE, AND USE OF DENATURED ALCOHOL.

As already noted, specially denatured alcohol can be obtained and used only by manufacturers and for certain authorized purposes.
Of the $382,415.19$ wine gallons of this class of spirits denatured during the six months ended June 30, 1907, there were shipped directly from denaturing warehouses to 130 manufacturers holding permits, $375,276.94$ wine gallons, and of the $332,499.61$ gallons used during that period for manufacturing purposes, $56,887.20$ gallons were recovered for reuse. Of the $1,397,861.16$ wine gallons of completely denatured alcohol produced (which class of spirits may be obtained by manufacturers, dealers, and others and used for any lawful purpose) there were likewise shipped during the same period $1,355,763.19$ wine gallons, as follows:

Gallons.

| To manufacturers ( 777 in number) | 181, 759. 28 |
| :---: | :---: |
| To wholesale dealers ( 784 in number) | 1,149, 029.24 |
| To retail dealers ( 7,038 in number). | 7,057.83 |
| To persons other than registered dea | 17, 916. 84 |

[^17]13091-H. Doc. 9, 60-1-32

Manufacturers using this class of spirits, unless recovering the same for reuse, are not required to render returns of the quantity received or used by them, and in many instances alcohol used for manufacturing purposes is obtained from wholesale dealers, who, in some instances also obtain their stock of denatured alcohol from other wholesale dealers. For the reasons here stated, no accurate statistics as to the; final disposition and use of this class of spirits can be furnished. On comparing the various reports received, however, it appears that of the $1,149,029.24$ wine gallons shipped directly from denaturing warehouses to wholesale dealers, $577,715.26$ wine gallons were sold by such dealers to manufacturers and to persons other than retail dealers. This quantity added to that shipped directly from warehouse to manufacturers and "others" totals $777,391.38$ wine gallons, which it is believed closely approximates the quantity of completely denatured alcohol used for manufacturing purposes during the period stated.

As shown by the tabulated statement under the heading "Assessment Division," the quantity of denatured alcohol received by retail dealers during the period referred to, including that shipped directly from denaturing warehouses, was $295,670.19$ gallons only. This quantity, which was used mainly, if not wholly, for domestic: purposes, averages about 42 gallons to each of the 7,038 registered dealers, or, based on the estimated present population of the United States, less than .004 gallon per capita. From reports received it appears that a large proportion of these dealers are retail druggists;: but the total number of such dealers is less than 20 per cent of the: number. of retail druggists in business in the United States, as shown. by the last census.
Except in the matter of obtaining permit, and properly labeling the denatured alcohol sold, no restrictions are imposed on such dealers, provided alcoholic liquors are not drunk on the premises where such denatured alcohol is sold or stored. No restriction whatever is placed on persons purchasing industrial alcohol, either in retail quantities or in original packages for general use, such as light, heat, power, or for mechanical purposes, and the present limited use of such alcohol for these purposes can hardly be attributed either to stringent laws or regulations.

On examination of such reports as are now available, it is found that the quantity of methylated (denatured) alcohol produced in the United Kingdom of Great Britain during the fiscal year ended March 31, 1906, was $5,663,429$ imperial proof gallons (equivalent to about $6,800,000$ proof gallons United States standard) or about the estimated quantity now being used in the United States. The quantity of absolute alcohol produced in Germany for industrial purposes during the fiscal year ended October 1, 1904, was $1,394,607$ hectoliters (equivalent to about $37,000,000$ United States wine gallons), $10,000,000$ gallons of which are reported as having been used for manufacturing purposes and $27,000,000$ gallons for light, heat, and power.

While the quantity so reported used for manufacturing purposes far exceeds that now being used in this country for like purposes, a yet more noticeable difference appears as to the quantity entering into general use.

PROBABLE CAUSE OF LIMITED USE OF ALCOHOL IN THIS COUNTRY.
While possessing fewer heat units, denatured alcohol, being less inflammable and disagreeable in odor, is far preferable to either gasoline or kerosene for heating, lighting, or power; and the fact that it is not now being extensively used in this country for these purposes is doubtless due (1) to the relatively greater cost of production and (2) to the lack of proper appliances for its use.

As understood by this Office, various types of alcohol lamps, heaters, and motors are in successful use in Germany, and to encourage the manufacture and use of industrial alcohol the Government of Germany not only "offers inducements" to growers of potatoes, from which the alcohol is manufactured, but imposes an import duty on petroleum and petroleum products.

It also appears that under this system there are some 70,000 farm distilleries in Germany producing industrial alcohol, and that the alcohol so produced is sold to consumers at about 27 cents per gallon. The number of distilleries in this country producing alcohol for industrial purposes has so far not exceeded ten; and the average price of denatured alcohol in barrel lots has been about 36 cents per gallon. To encourage the establishment of industrial distilleries the most liberal regulations, consistent with the safety of the revenue, have been prescribed; but up to the present time no distilleries of this class have been registered.

No large number of these industrial distilleries seems probable under existing conditions. While these distilleries are now permitted to use any material whatever in the production of industrial alcohol, the alcohol so far manufactured has been produced mainly from corn; and, until a cheaper distilling material is found and its practical use demonstrated, it may be doubted whether this class of alcohol can successfully compete with gasoline or kerosene in this country. Unlike ordinary proof spirits; the profitable manufacture of commercial alcohol requires much skill and the most improved distilling apparatus; and, except possibly for local sales and uses, alcohol produced at small distilleries could hardly compete with that produced at larger, better equipped, and more centrally located plànts. Even for local uses little if any demand can be expected (unless for manufacturing purposes) until proper appliances for its use have been placed on the market.

While the quantity of industrial alcohol so far produced and used has evidently fallen far short of the expectation of those instrumental in having the denatured alcohol laws passed, it is, nevertheless, a subject of congratulation that few, if any, frauds have been committed or attempted in connection with the manufacture or use of this class of spirits.

EXPLANATORY CIRCULARS ON DENATURED ALCOHOL LAW AND REGULATIONS.

In order to meet what appeared to be a very general and widespread demand for instruction regarding the intent and purposes of the denatured alcohol law and for elucidation of the regulations concerning the withdrawal of alcohol free of tax, I have during the past few
months prepared and issued, at stated intervals, explanatory circulars addressed to collectors and revenue agents and directing these officials to instruct taxpayers and inquirers generally regarding the law and the regulations promulgated thereunder.

The first of these circulars, of date September 26, was devoted to the subject of industrial distilleries, and described the methods which could be employed by the farmer or frưit grower who might desire to utilize the products of his labors in the manufacture of alcohol for domestic uses. This circular called particular attention to the fact that small distilleries which had been rendered useless for producing alcohol for beverage purposes by reason of local prohibitory laws might be profitably employed in the distillation of spirits for denaturation. The second circular, of date October 12, was designed to dispel the impression that there existed many governmental restrictions which interfered with the handling of denatured alcohol by wholesale and retail dealers. The regulations in this respect were explained and their simplicity fully illustrated. The succeeding circular, dated October 19, instructed internal-revenue officers in the field, as opportunity offered, to fully advise those persons in whose business alcohol could be used, and called attention in detail to the rights and privileges of manufacturers who use denatured alcohol.

## DENATURED ALCOHOL EMPLOYEES.

The officials appointed; and who are now in the service, for the purpose of enforcing the provisions of the denatured-alcohol law are: Four revenue agents, salary $\$ 6$ per day and expenses; 17 inspectors, salary $\$ 5$ per day and expenses; 4 inspectors, salary $\$ 4$ per day and expenses; 2 inspectors, salary $\$ 3$ per day and expenses; 2 deputy collectors, salary $\$ 1,400$ per annum; 2 deputy collectors, salary $\$ 1,200$ per annum; 3 deputy collectors, salary $\$ 1,000$ per annum; 4 deputy collectors, salary $\$ 900$ per annum; 1 deputy collector, salary $\$ 720$ per annumi; 1 chemist, salary $\$ 3,000$ per annum; 1 chemist, salary $\$ 1,200$ per annum; 1 clerk, salary $\$ 1,600 ; 1$ clerk, salary $\$ 1,400 ; 1$ clerk, salary $\$ 1,200 ; 6$ clerks, salary $\$ 1,100 ; 2$ clerks, salary $\$ 900 ; 1$ assistant messenger, salary $\$ 720$. In addition to these officials, the following deputy collectors and clerks were employed for the periods set forth: One deputy collector, May 1 to May 15, 1907, at salary of $\$ 1,000$ per annum; 1 deputy collector, May 27 to August 1, 1907, at salary of $\$ 1,200$ per annum; 1 deputy collector, July 1 to August 20, 1907, at salary of $\$ 900$ per annum; 1 clerk, August 15 to October 15, 1907, at salary of $\$ 1,500$ per annum; 2 clerks, December 27, 1906, to September 15, 1907, at salary of $\$ 1,200$ per annum; 2 clerks, December 27, 1906, to June 30, 1907, at salary of $\$ 1,000$ per annum; and 1 assistant messenger, July 15 to September 20, 1907, at salary of $\$ 720$ per annum.

Notwithstanding, as before stated, that certain general conditions have retarded rapid development of the use of denatured alcohol, there has been and is a gradual increase in the number of those who sell and those who utilize this commodity, and an increased number of applications for information as to the methods, laws, etc., incident thereto. This growth has required recent additions to the office and field force employed for supervising the withdrawal of alcohol for denaturation, and additional appointments are required from time to time. The appropriation for the current year, however, will be sufficient to defray all of the expenses incident to this branch of the service.

## SYNOPSIS OF REGULATIONS.

Distillery denaturing bonded warehouses.-Warehouses of this class are to be established on the distillery premises where the spirits to be denatured are produced, and are to be used exclusively for denaturing purposes. They are to be properly constructed and equipped with storage and mixing tanks, and are to remain in the custody of the officer whose duty it is to see that all such spirits are properly mixed with approved denaturants, to be kept securely stored in such warehouses. Alcohol of not less than $180^{\circ}$ proof and rum of not less than $150^{\circ}$ proof may be removed to such warehouses for denaturation at such times as the distiller may elect.

All shipping tanks or packages containing the denatured spirits are to be properly gauged and marked, and all such packages are to have affixed thereto engraved denatured alcohol stamps. The proprietor of each warehouse must execute a satisfactory bond; must keep a record of all denaturants and spirits received and of all spirits denatured and shipped from time to time. The officer in charge must also keep like records and make daily and monthly reports to the collector and to the Commissioner of Internal Revenue.

Industrial distilleries.-Distilleries producing alcohol from any substance whatever and having a daily spirits producing capacity not exceeding 100 proof gallons, are classed as industrial distilleries. Such distilleries are exempt from all requirements of existing laws relating to distilleries, except such as apply to the registry of stills; the filing of a descriptive notice of the premises and the business to be carried on; the giving of bond; the proper accounting of all materials received or used on the premises, and the spirits produced therefrom, and certain other requirements respecting signs, locks, etc. In lieu of a distillery bonded warehouse the proprietor of each such distillery may provide an alcohol room into which the alcohol produced may be conveyed. Where the daily spirit producing capacity does not exceed 50 proof gallons, or where an assignment of an officer is not deemed necessary, each such distillery may operate in the absence of an officer, and in such cases the keys to all locks attached to the stills, pipes, cistern, or cistern room may be intrusted to the distiller or his designated agent. All alcohol produced at these distilleries, however, must be gauged and must be denatured, or removed for shipment to a central denaturing warehouse, under the supervision of an officer to be detailed for that purpose. All denaturing materials, when approved (including approved denaturants which may be obtained by the distiller in sealed packages from other denaturers), are to be safely stored in the alcohol room and are to be duly accounted for by the distiller.

Central denaturing bonded warehouses.-Warehouses of this class may be established by any person, firm, or company, and on premises (subject to approval) other than those on which distilled spirits, wines, or liquors are manufactured, rectified, sold, or stored, or where mash, wort, or wash is used in the manufacture of vinegar by vaporizing process, or where liquid medicinal preparations are manufactured. Such warehouses are to be constructed and operated in a manner similar to denaturing warehouses on distillery premises, and like records and returns are to be kept and rendered. The bond to be given by the proprietor of each such warehouse will be a combined transportation and warehouse bond, under which alcohol may be
shipped to such warehouse from any distillery free of tax. Alcohol, when denatured and properly gauged or weighed, may be shipped from such warehouses to manufacturers, dealers, or consumers in packages, tanks, or tank cars, as in the case of shipment from distillery denaturing warehouses.

Tanks, tank cars, and pipe lines.-Alcohol intended for denaturation may be transferred directly from distillery cisterns, by pipes, to storage or mixing tanks in the denaturing warehouse, or to storage tanks in the distillery bonded warehouse, and from such storage tanks to tanks in the denaturing warehouse, or to tanks or tank cars for shipment to central denaturing warehouses. Denatured alcohol may also be removed from distillery denaturing warehouses or central denaturing warehouses for shipment, in tanks or tank cars, to manufacturers, dealers, or consumers.

Alcohol, before or after denaturation, so removed must be first weighed; all tanks or tank cars containing such alcohol must be properly marked, sealed, or locked.

Dealers in and consumers using completely denatured alcohol.-Dealers who sell denatured alcohol in quantities of 5 gallons or more at one time are classed as wholesale dealers, and those selling in quantities of less than 5 gallons are classed as retail dealers. Dealers and consumers purchasing denatured alcohol in other than stamped packages, and in quantities exceeding 5 gallons, must obtain from the collector of the district a permit; and wholesale dealers must keep the prescribed record of all alcohol received and disposed of by them. The storage or sale of denatured alcohol on premises where distilled spirits, wines, liquors, or liquid medicinal preparations are kept or stored, is prohibited, except in the case of druggists and grocers who, after careful inquiry made, are found to be entitled to the full confidence of the Department, and who sell, only as an incident to their business, wines or liquors which are not drunk on the premises.

Denatured alcohol intended solely as fuel, light, or power, or for other domestic purposes may also be stored on the same premises with other distilled spirits, wines, or liquors if kept in a room'separate from that in which such other spirits, wines, or liquors are stored, and in tanks securely locked where the quantity so held exceeds 5 gallons. But under no circumstances will denatured alcohol be permitted on premises where distilled spirits, wines, or liquors are produced, rectified, or compounded, or where vinegar is manufactured by vaporizing process from any mash, wort, or wash.

Wholesale dealers may receive denatured alcohol in stamped packages, tanks, or tank cars. They may also store such alcohol in registered tanks, and, if so authorized by the permit granted, they may deliver such alcohol from delivery tanks of the prescribed size and construction to other dealers or to consumers.

Such deliveries will be evidenced by delivery tickets, to be signed in duplicate by the dealer and the purchaser, one copy of which will be furnished to the collector of the district. Other sales in wholesale lots by denaturers or dealers must likewise be evidenced by memorandum slips furnished for that purpose.

Wholesale dealers may also cask denatured alcohol received in tanks or tank cars and also recask such alcohol in stamped packages. All packages so used by dealers must be properly marked and numbered and have affixed thereto stamps, to be obtained for the purpose from the collector of the district. Retail dealers must affix to each pack-
age or container of alcohol sold by them a label on which is printed (red on white) in legible letters the words "Denatured alcohol." But no record or return is required of such dealers, either as to alcohol purchased or sold by them.

Manufacturers using denatured alcohol.-Manufacturers using specially denatured alcohol and manufacturers using completely denatured alcohol in quantities of 50 gallons or more during any one calendar month must file with the collector of the district an application describing the premises where the alcohol is to be stored and used and the purposes for which it is to be used. Locked storage rooms or tanks must be provided for the safe storage of such alcohol. If, on examination, the premises and uses described in the application are found to be satisfactory permit will be granted. Manufacturers using specially denatured alcohol, and manufacturers using completely denatured alcohol which is intended to be recovered for reuse, must also file a satisfactory bond, and must keep the prescribed records showing the quantity of alcohol received, used, recovered, restored, and redenatured, or sent to a restoring plant for redenaturation.
Sworn transcripts of these records will be made monthly and will be verified by the visiting officer.

Alcohol recovered, restored, and redenatured on manufacturer's prem-ises.-Where the alcohol used for manufacturing purposes is to be recovered and redenatured for reuse, the stills and other apparatus and method to be used for this purpose must be described in the manufacturer's application, as also the estimated quantity of alcohol to be recovered and reused during the year. All stills so used must be duly registered and must be used for no other purpose.

Such stills must be kept securely locked in the absence of an officer, except where an officer can not be assigned at the appointed time, in which case the collector, if satisfied that the alcohol recovered and restored will be duly accounted for, may deliver the keys to the manufacturer and permit the use of such stills in the absence of the officer during the time to be specified in such permit.

Manufacturers using denatured alcohol and recovering the same in its original denatured state, or practically so, will also be permitted to recover the same in the absence of an officer if the alcohol is stored, used; and recovered for reuse in locked or sealed tanks, stills, vessels, or other receptacles connected by continuous closed pipes. The alcohol so recovered will also be subject to inspection by the visiting officer, and unless found, on test, to be properly denatured, the necessary quantity of approved denaturants must be added under his supervision.

Central restoring and redenaturing plants.-Centrally-located plants for restoring and redenaturing alcohol recovered by manufacturers may be located at such places as the Commissioner of Internal Revenue may deem necessary. Each such plant must be provided with a warehouse, similar in construction to a distillery bonded warehouse, for the storage of such recovered alcohol received on the premises. A separate apartment or building, similar to denaturing bonded warehouses heretofore described, must be provided for denaturing purposes. Application for the establishment of such restoring and redenaturing plants must be made on the prescribed form, and the proprietor of each such plant must execute a satisfactory bond. The restoring and redenaturing of alcohol will be done under the super-
vision of an officer assigned for that purpose, and a record will be kept by both the proprietor and such officer of all recovered alcohol received, restored, redenatured, and returned to the manufacturer from whom received.

Duties of officers.-It is the duty of all officers assigned to denaturing warehouses to see that all alcohol and denaturants received are properly stored, used, and accounted for; that the alcohol so received is properly denatured; that all packages and tanks containing the same are properly marked, branded, etc., and that all requirements of the regulations respecting the denaturation of spirits are properly complied with. Revenue agents, division deputy collectors, and inspectors must make frequent and irregular visits to the premises of denaturers, dealers, and manufacturers and other premises where denatured alcohol in any considerable quantity is stored or used, and they will report any fraud or irregularity discovered by them in connection with the manufacture, sale, or use of this article. Such examination, however, must be made in such a manner as not to unnecessarily interfere with the business of such persons. But it will be the duty of every person engaged in such business to afford all necessary facilities to enable officers to make the required inspection.

## NEW LEGISLATION.

Attention has heretofore been directed to the large cost to the Government of gauging spirits at rectifying houses and the furnishing of stamps by the Government for rectified spirits and wholesale liquor dealers' packages. The gauging is done at governmental expense and the stamps are furnished free of cost to rectifiers and wholesale liquor dealers. The annual expenditures on these two accounts amount, at the least, to $\$ 500,000$. This office recommended last year the enactment of legislation under which a charge of 20 cents per stamp be made for each stamp issued to rectifiers or wholesale liquor dealers for use upon packages prepared and sent out by them. It is believed that if this recommendation be enacted into law a revenue of some $\$ 750,000$ would be derived thereunder, and in this way the total cost to the Government of this work would be met, with a small surplus resulting. I again call attention to this subject and repeat the recommendation of last year.

## ILLICIT DISTILLING.

Reports received from revenue agents in charge of divisions indicate that illicit distilling is on the decrease throughout the country generally. There appears to be cooperation between the marshals and their deputies with the revenue officers in the suppression of illicit distilling, and assistance has been rendered by the district attorneys and the United States commissioners.

There is very little illicit distilling on the Pacific coast.
The natives of the Hawaiian Islands make a spirituous drink by distillation of the ti root, but as the Hawaiian Islands are well policed by United States officers illegal distillation is on the decrease and will eyentually be stamped out.
The Esquimaux in Alaska are said to make a distilled spirits called "hootch" in small quantities for immediate consumption. This is difficult to control on account of the impossibility of policing Alaska.

## RECEIPTS FOR FIRST $\mathfrak{T H R E E}$ MONTHS, CURRENT FISCAL YEAR.

The following table shows the receipts from the several objects of taxation for the first three months of the fiscal years ending June 30, 1907 and 1908. A comparison of the receipts for the two periods is also given.

| Objects of taxation. | Amount of tax paid during first 3 months of fiscal year- |  | Increase. | Decrease. |
| :---: | :---: | :---: | :---: | :---: |
|  | 1907. | 1908. |  |  |
| adulterated butter. |  |  |  |  |
| Adulterated butter, manufactured or sold, etc. | \$6,466. 50 | \$3,637. 70 |  | 82,828. 80 |
| Mamufacturers of aduiterated butter (special tax) | 2,350.00 | 6,800.00 | \$4, 450.00 |  |
| Retail dealers in adulterated butter (special tax). |  | 92.00 | 92.00 |  |
| Wholesale dealers in adulterated butter (special tax) | 200.00 | 600.00 | 400.00 | ......... |
| Total. | 9,016.50 | 11,129.70 | 2,113. 20 | ............. |
| PROCESS OR RENOVATED IUTTER. | $\bigcirc$ |  |  |  |
| Process or renovated butter, manufactured or sold, etc. $\qquad$ | 39,722. 39 | 32,218. 17 |  | 7,504. 22 |
| Manufacturers of process or renovated butter (special tax) | 1,512.51 | 1,287.50 | ....... | 225.01 |
| Total. | 41,234.90 | 33, 505.67 | -........ | - 7,729. 23 |
| Miscellaneous. |  |  |  |  |
| Filled Cheese. |  |  |  | . |
| Mixed flour. | 1,027. 38 | 828.25 |  | 199.13 |
| Playing cards | 102,150. 50 | 97,723.04 |  | 4,427. 46 |
| Penalties.................................. | 39,007.19 | 39,591. 33 | 584.14 |  |
| Collcctions not otherwise herein provided for. | a 36, 616.87 | b3,876.75 |  | 32,740.12 |
| Total | 178,801.94 | 142,019.37 | …….... | 36,782. 57 |
| Aggregate receipts...................... | 66,611, 171. 10 | 69, 483, 209.03 | 2,872,037.93 |  |

a Includes $\$ 36,249$ from legacies, on which the tax had acerued prior to the repeal of the act.
$b$ Includes $\$ 3,384.68$ from legacies, on which the tax had accrued prior to the repeal of the act.

## COST OF COLLECTION.

The cost of collection for the fiscal year, distributed among the different items of appropriation, was approximately as follows:
Salaries and expenses of collectors of internal revenue, 1907........ \$1, 952, 608. 06
Miscellaneous expenses, internal-revenue service, $1907 \ldots \ldots .$. $75,761.97$
Salaries and expenses of agents and subordinate officers of internal revenue, 1907.
$2,357,822.47$
Paper for internal-revenue stamps, 1907. ............................................... 72, 621. 52
Punishment for violation of internal-revenue laws, $1907 \ldots \ldots . .$.
Salaries, Office Commissioner of Internal Revenue, $1907 \ldots \ldots \ldots \ldots$. . . . . . $319,592.59$
Total amount incurred.................................................... 4,875,745.66
Expenditures from appropriation" Withdrawal of denaturalized alco-hol."-The expenditures from the appropriation for "Withdrawal of denaturalized alcohol" were as follows:
Salaries and expenses of inspectors.
$\$ 15,668.53$
Salaries of nine deputy collectors 1, 986.23

Fees and expenses of four gaugers ${ }^{b} \ldots \ldots . .$. ........................................... 2, 171.00
Salaries of office force............................................................................. 908.04

Laboratory supplies. . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 5, 790.67
Locks.
406.63

Paper for denaturalized alcohol stamps.................................................. 409.61
Gauging instruments................................................................... 233.00
Total amount expended
43, 266.76

[^18]
## ESTIMATED EXPENSES FOR NEXT FISCAL YEAR

I estimate the expenses of the Internal-Revenue Service for the fiscal year ending June 30, 1909, as follows:Office of Commissioner of Internal Revenue: For salaries of officers,clerks, and subordinate officers.
Salaries and expenses of collectors of internal revenue: For salaries and expenses of collectors of internal revenue, and deputy collectors and surveyors, and clerks and messengers and janitors in internal-revenue offices.
$2,075,000.00$
Salaries and expenses of agents and subordinate officers of internal revenue: For salaries and expenses of 40 revenue agents provided for by law, and fees and expenses of gaugers, salaries and expenses of storekeepers and storekeeper-gaugers, and for miscellaneous expenses.
$2,500,000.00$
Miscellaneous expenses, Internal-Revenue Service: For rent of offices outside of the District of Columbia, telephone service, and other miscellaneous expenses incident to the collection of internal revenue..
1.20, 000.00
Withdrawal of denaturalized alcohol, acts of June 7, 1906, and March 2, 1907
$250,000.00$
Paper for internal-revenue stamps: For paper for internal-revenue stamps, including freight
$80,000.00$
Punishment for violation of internal-revenue laws: For detecting and bringing to trial and punishment persons guilty of violating the in-ternal-revenue laws, or conniving at the same, including payments for information and detection of such violations
$125,000.00$
Total
$5,478,380.00$
Salaries, Office of Commissioner of Internal Revenue (reimbursable): For salaries of two stamp agents and one counter
3, 400.00

## SALARIES.

I have the honor to recommend that Congress appropriate for the fiscal year ending June 30, 1909, the sum of $\$ 328,380$ as salaries for the following officers, clerks, and employees in this Bureau:

I also recommend the appropriation of the sum of $\$ 3,400$ as salaries for two stamp agents, one at $\$ 1,600$, one at $\$ 900$, and one counter at $\$ 900$, the same to be reimbursed by the stamp manufacturers, as provided by the act of August 5, 1882.

## SCALE OF SALARIES OF COLLECTORS.

The recommendations made for the salaries of collectors are based upon an estimate of their probable collections according to the following scale, with the qualifications that if the actual collections should vary from the amounts estimated the salaries will be readjusted at the end of the fiscal year:

| For collection of - | Salary. | For collection of- | Salary. |
| :---: | :---: | :---: | :---: |
| \$25,000 or less. | \$2,000 ${ }^{\text { }}$ | \$375,001 to \$425,000. | \$3,375 |
| \$25,001 to $\$ 37,500$ | 2, 125 | \$425,001 to \$475,000. | 3,500 |
| \$37,501 to 850,000 | 2,250 | \$475,001 to 8550,000 . | 3, 625 |
| \$50,001 to \$75,000 | 2,375 | \$550,001 to \$625,000. | 3,750 |
| \$75,001 to \$100,000 | 2,500 | \$625,001 to \$700,000 | 3,875 |
| \$100,001 to \$125,000 | 2,625 | \$700,001 to \$775,000. | 4,000 |
| \$125,001 to \$175,000. | 2,750 | \$775,001 to \$850,000. | 4,125 |
| \$175,001 to \$225,000 | 2,875 | \$850,001 to \$925,000. | 4,250 |
| \$225,001 to \$275,000. | 3,000 | \$925,001 to \$1,000,000. | 4,375 |
| \$275,001 to \$325,000. | 3,125 | \$1,000,001 and upward. | 4,500 |
| \$325,001 to $\$ 375,000$ | 3,250 |  |  |

In addition to the salary based upon the above-mentioned scale, the collector shall receive a commission of one-half of 1 per cent on tax-paid spirit stamps, and may receive additional compensation on account of territorial extent, as provided by law, provided the gross compensation does not exceed $\$ 4,500$. (See secs. 3148 and 3314, Rev. Stats.)

## OFFICIAL FORCE.

At the close of the fiscal year ended June 30, 1907, 258 officers, clerks, messengers, and laborers were employed in this Bureau, and the aggregate amount paid during the year for their salaries was $\$ 319,592.59$, which does not include office force paid from the appropriation "Withdrawal of denaturalized alcohol," from which was paid $\$ 9,308.04$, covering salaries of 12 employees.

The force connected with this Bureau during the fiscal year which ended June 30, 1907, in the various districts throughout the United States, as reorganized under the Executive order of May 21, 1887, was 66 collectors, who received per annum salaries and commissions as follows:

| Number. | Salary. | Number. | Salary. |
| :---: | :---: | :---: | :---: |
| 49. | 84,500.00 | 1. | \$3, 558. 37 |
| 1. | 4,375.00 | 1. | 3,500.00 |
| 1. | 4,323.84 | 1. | 3,472. 02 |
| 1. | 4,250.00 | 1. | 3,375. 00 |
| 1. | 4, 125.00 | 1. | 3, 356. 27 |
| 1. | 4, 047.83 | 1. | 3,315. 33 |
| 2. | 3,750.00 | 1. | 3,001. 71 |
| 1. | 3,657. 35 | 2. | 3,000.00 |

There were also employed 1,126 deputy collectors, who received per annum salaries as follows:

| Number. | Salary. | Number. | Salary. | Number. | Salary. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 33....... | \$2,000 | 263. | \$1,200 | 43. | $\$ 600$ |
| 3. | 1,900 | 3. | 1,150 | 14. | 500 |
| 39. | 1,800 | 148. | 1,100 | 5. | 480 |
| 8. | 1,700 | 143. | 1,000 | 8. | 400 |
| 26. | 1,600 | 3. | 950 | 3. | 360 |
| 1. | 1,550 | 70. | 900 | 21. | 300 |
| 40. | 1,500 | 1. | 850 | 4. | 200 |
| 5. | 1,450 | 24. | 800 | 1. | 100 |
| 137. | 1,400 | 3. | 750 |  | 60 |
| 4. | 1,350 | 4. | 720 |  |  |
| 58. | 1,300 | 8 | 700 |  |  |

There were also employed in the offices of the different collectors 133 clerks, who received per annum salaries as follows:

Also 12 messengers and 2 janitors, who received per annum salaries as follows:

STOREKEEPERS, GAUGERS, ETC.
There were also employed 189 gaugers, who received fees not to exceed $\$ 5$ per day; 71 storekeepers, whose pay did not exceed $\$ 4$ per day; 1,931 storekeeper-gaugers, whose pay ranged from $\$ 2$ to $\$ 5$ per day; and 6 distillery surveyors. All the employees above enumerated were paid only when actually employed.

## INTERNAL-REVENUE RECEIP'IS DURING THE LAS'T TWO FISCAL YEARS.

Comparative Statement showing the Receipts from the Several Objects of Internal Taxation in the United States during the Fiscal Years ended June 30, 1906 and 1907.

| Objects of taxation. | Receipts during fiscal years ended June 30- |  | Increase. | Decrease. |
| :---: | :---: | :---: | :---: | :---: |

## RECEIPTS FOR THE PAST TEN FISCAL YEARS:

Fiscal year ended-

## Respectfully,

John G. Capers, Commissioner of Internal Revenue.

## Hon. George B. Cortelyou, Secretary of the Treasury.

[Nots.-For a detailed report of the Commissioner of Internal Revenue, see his annual report.]

[^0]:    

    201

[^1]:    amount of expenses reported by collectors, as above
    
    Total.
    Cost to collect $\$ 1$
    $9,436,752.68$

[^2]:    a In previous years the expenditures on accọunt of the District of Columbia were included in Treasury proper:

[^3]:    All moneys in the Treasury, wherever it may be deposited or placed for disbursement or custody, is charged to the Treasurer of the United States. It is obvious, however, that this money may be lost without fault on the part of the Treasurer, by robbery, accident, defalcation of a subordinate officer, misconduct of depositaries having it in charge, or otherwise. Still, under the law, the Treasurer is responsible, and is charged with these sums. Such a deficit would, in the accounts of a firm, be a simple plain entry in the profit and loss account by crediting cash and debiting the defaulter. But from the fact before stated that money can not be taken from the Treasury except by an appropriation, this course could not be pursued. An account called "unavailables" was created, which was charged with the amounts, and the Treasurer credited in his general account through the statement of an account by the accounting officers. This nethod of relieving the Treasurer is, your committee are informed, a practice which has grown up, and is not authorized by law, and for some years past has been prohibited by the Comptroller, and has been discontinued. It is plain that the Treasurer should be relieved from this responsibility, and that Congress should in some proper way provide by law for the dropping of these unavailable funds, by authorizing a credit to the Treasurer, and a corresponding charge against the defaulting officer who fails to pay the moncy on demand.

[^4]:    Note.-Currency certificates, act of June 8, 1872, are included in the amount of United States notes and Treasury notes during the years when they were in use.

[^5]:    a The charge against the mint, Philadelphia, covers the expense of transfers from that point to supply other offices.

[^6]:    a Includes $\$ 10,777.05$ charges on coins, Government of Mexico; $\$ 15,304$ charges on coins, Philippine government; $\$ 2,030$, charges on coins for Government of Panama; $\$ 135.01$, machinery for Mexican mint; $\$ 1,679.56$, automatic scales for Customs Service; $\$ 140.91$, counting boards for assistant treasurers; \$2,712.47 for manufacture of medals, State, War, Navy Departments, and Life-Saving Service; $\$ 940.77$ for manufacturing appliances for other offices, Mint Service; $\$ 2,658.12$ for manufacture miscellaneous medals; $\$ 30.25$, miscellaneous work.
    $b$ Includes $\$ 3,550$ charges on coins, Government of Mexico; $\$ 5,068.50$ charges on coins, Philippine government; $\$ 494.20$ charges on coins, Government of Panama; $\$ 106.58$, machinery for Mexican mint; \$791.38, automatic scales for Customs Service; $\$ 625.80$ for manufacturing appliances, other offices; $\$ 627.86$ for manufacturing medals, State, War, Navy Departments, and Life-Saving Service; $\$ 83.79$, counting boards; $\$ 790.60$, manufacture miscellaneous medals; $\$ 13.29$, miscellaneous work.
    c Includes $\$ 53,434.25$ for Philippine coinage; $\$ 57,862.85$, Mexican coinage; $\$ 75.25$, boxing Mexican coins; $\$ 196.12$, storing Philippine coins.
    $\boldsymbol{a}$ Includes $\$ 23,873$ for Philippine coinage; $\$ 33,461.43$ for Mexican coinage; $\$ 150.50$, boxing Mexican coins.
    ${ }^{e}$ Includes $\$ 20,637.50$ for Mexican coinage.
    $f$ Includes $87,894.25$ for Mexican coinage.
    $g$ Includes $\$ 22,800$ for Mexican coinage.
    $n$ Includes $\$ 15,200$ for Mexican coinage.

[^7]:    ${ }^{a}$ As soon as practicable after the report of the annual assay commission was submitted, Mr. J. B. Eckfeldt, assayer of the United States mint, Philadelphia, and Mr. F. P. Dewey, assayer of the Bureau of the Mint, were, with the approval of the Secretary of the Treasury, directed to visit Denver and make a thorough investigation of all coins in that mint belonging to delivery 33 . They were directed to open all sacks containing such coins and take samples therefrom for assay.

    After examination and repeated assays they concluded that considering all the facts in the case the low fineness of a few coins found in delivery No. 33 was due to a want of proper mixture of one of the melts.

[^8]:    Gold melts made.
    0
    Silver melts made. . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 706
    Silver melts condemned.
    6

[^9]:    
    
    

[^10]:    
    June 30, 1879........................................................................................... 13,895,642.29.
    January 1, 1880 15,654:912. 12
    A. B. Nye.

[^11]:    $a$ Loss.
    b Foreign coin brought in transports, without custom-house record at New York, but included in deposits at mints ( $\$ 6,804,227$ ).

[^12]:    a The sovereign is the standard coin of India, but the rupee ( $\$ 0.3244 \frac{1}{3}$ ) is the current coin, valued at-15 to the sovereign. bSeventy-five centigrams fine gold.
    $c$ Value in Mexico, $\$ 0.498$
    $d$ The current coin of the Straits Settlements is the silver dollar issued on Government account and which has been given a tentative value of $\$ 0.567758 \frac{1}{3}$.

    Note.-The coins of silver-standard countries are valued by their pure silver contents, at the average market price of silver for the three months preceding the date of this circular.

[^13]:    a Includes $\$ 475,000$ in Columbian coins.
    $b$ Includes $\$ 2,026,052.50$ in Columbian coins.

[^14]:    a None by averaging. $\quad b$ Ratio aggregate loss to annual average deposits.

[^15]:    13091-H. Doc. 9, 60-1- 27

[^16]:    Note.-The United States not being responsible for the payment of the Spanish indemnity certificates, this table does not include twenty said certificates amounting to $\$ 32,230.47$, in the number of bonds canceled during the year. See table on page 461.

[^17]:    a Computed on the average price of corn ( 42.36 cents per bushel) for ten years.

[^18]:    a Where alcohol was produced at a distillery and only a portion of the product was denatured and the distillery was of that class where a storekeeper was assigned to perform all the work in connection with the entry and withdrawal of alcohol and denaturing the same, payment of salary and expenses was made from the appropriation for "Salaries and expenses of agents and subordinate officers of internal revenue."
    $b$ Where there was not a sufficient amount of alcohol denatured at one distillery to employ the entire time of one gauger in such work, the compensation and expenses of such gauger were paid from the appropriation for "Salaries and expenses of agents and subordinate officers of internal revenue."

[^19]:    a Includes $\$ 49,515.29$ from legacies on which the tax had accrued prior to the repeal of the act.

[^20]:    ${ }_{a}$ Including the State of Nevada.
    $b$ Including the State of Wyoming.
    c Including the State of Rhode Island.
    a Including the Indian Territory and the Territory of Oklahoma.
    $e$ Including the State of Mississippi.
    $f$ Including the State of Delaware, District of Columbia, and two counties of Virginia.
    $o$ Including the States of Idaho and Utah.
    ${ }^{n}$ Including the States of Maine and Vermont.
    $t$ Including the Territory of Arizona.
    § Including the Territory of Alaska.
