# ANNUAL REPORT ON THE FINANCES. 

Treasury Department, Washington, D. C., December 6, 1909.

Sir: I have the honor to submit the following report:

## ESTIMATES.

The estimates of expenditures for the executive departments for the fiscal year 1911, submitted herewith, are the result of great attention on the part of heads of departments. The consideration of these estimates was taken up at an unusually early time and continued until now. The aim has been to reduce them to as low amounts as is practicable, in conformity with the policy of the Administration to recognize practically the recent and present disparity between revenues and expenditures, and to seek the necessary adjustment through reduced expenditures on the one hand and needed revenues on the other.
The total estimates for 1911, including the Naval building program, are $\$ 684,132,197.21$. Excluding the increase in the Panama Canal estimates, the total estimates for 1911 show a decrease of $\$ 57,244,493.89$ under the appropriations for 1910. Including the increase in the Panama Canal estimates, the total estimates for 1911 show a decrease of $\$ 42,818,969.19$ under the appropriations for 1910 .
For the fiscal year 1910 the Naval building program was not included in the estimates submitted to the Congress. It is, therefore, a matter of interest to note that when the Naval building program is eliminated from the estimates for the fiscal years 1910 and 1911, the total estimates for 1911 are $\$ 94,001,492.92$ less than the total estimates for the fiscal year ending June 30, 1910.

The increasing appropriations from year to year have become a recognized incident of the general growth of the Government's business, due to the growth of the country and the increase in the Government's occupations and undertakings. A summary of estimates, therefore, which shows no increase over previous years means that a large retrenchment has been made. This applies not only to the total estimates of the department but to the estimates of its individual branches. So that estimates showing a reduction of totals is a double
retrenchment-a retrenchment of the actual amount reduced and a retrenchment of the usual increase.

The estimates submitted have no intentional exaggeration in them. If at any previous time there was shown a tendency to exaggerate estimates without an expectation of their full appropriation, the case is now quite different. While the final authority in appropriations rests with Congress, it is proper to present the estimates for the coming year as a careful measure of the actual and irreducible needs of the Government.

The estimates of receipts, with their very long look ahead, are always subject to many vicissitudes, and perhaps never more than now, when the revenue results of the new tariff law are still largely undetermined, when the new conditions affecting the internal revenue from distilled spirits and fermented liquors are still a factor, and when the corporation tax is yet unexecuted. The estimates must therefore be taken as the best under the circumstances.

For the fiscal year 1910, the ordinary receipts are estimated at $\$ 648,000,000$, and the ordinary disbursements at $\$ 682,075,620.12$, showing a deficit in ordinary receipts of $\$ 3 \pm, 075,620.12$. When the payments on account of the Panama Canal and the public debt are added, the total deficit of the fiscal year 1910 is estimated at $\$ 73,075,620.12$.

The estimated ordinary receipts for 1911 are $\$ 672,000,000$, and the estimated ordinary appropriations $\$ 636,068,672.51$, or a surplus in ordinary receipts of $\$ 35,931,327.49$. When the Panama Canal estimates for 1911 are added the surplus is turned into a deficit of \$12,132,197.21.

Since the Treasury has not at present, either in the banks or in its vaults, materially more than a working balance, it will become necessary, in order to meet these deficits, to sell either bonds or certificates of indebtedness. In due course it would seem that it must be made practicable to both estimate receipts, with a close approximation to the actual, and to provide for their annual rise or fall by the introduction of some flexible factors in our annual taxation. The hard rigidity of the present revenue system, with its recurrent economical agitations and its long intervals of fixity, with no anrual adjustment, can not always satisfy the Government or the nation.

## ECONOMIES.

It is a favorable opportunity-partly created by the influence of the deficit-to consider the Government's outgo, not alone in its totals, but in its details, and to institute proper economies. The time is clearly ripe for wise and judicious savings in federal expenditure; and if this should be successfully accomplished there is a pros-
pect that the example would influence the overhauling of state and municipal expenditures, to the great advantage of the nation.

There are two classes of reductions in the present estimates. One class is of those economies which result from an improved handling of the Government work, and from cutting off expenditures which are discovered to be avoidable without injury to the service or to the people. These result from a close scrutiny, and this scrutiny of course has, as it were, just begun, and must be a continuous process to become completely effective. This class of economies is permanent and undeniably wholesome.

The other class consists of postponements of expenditures which can be delayed, in an effort to adjust immediate expenses and receipts. Such reductions are not wholly permanent; but even in these cases the more thorough scrutiny and consideration which they are receiving and the greater interest in proper saving and economy which marks the present period will tend to economies and reductions.

It would be a great mistale, however, as all will agree, to let this epoch of economy discredit itself and come to an untimely end by reason of losing the sense of difference between reductions of appropriations that we are better without and reductions of the appropriations that we are better with. Extravagance, waste, inefficiency, and poor administration on the one hand, and too hurried or too expensive development of governmental activities on the other hand, can afford savings to the advantage of everybody; but it would be unfortunate if the current impulses toward true and real economy should go further and seek to curtail any of the wise instruments of the Government which are or shall be demanded by the interests of the people.

There is a tendency at the same time to overestimate the possible reduction in appropriations through improved administration or other distinctively executive retrenchments, and the reductions in appropriations will be disappointing unless equal attention is given to other important savings.

The departments should undoubtedly scrutinize every opportunity for reduction of expenses of administration. It will be necessary, however, in order to effect full permanent reductions in appropriations to also take in hand every item of expenditure, and, among others, as instances, the following: The heavy losses to the Government on second-class mail matter which require a discrimination to be made between mail matter demanded by the interests of the people and that which merely promotes private gain; the excessive expenditures for public buildings which suggest the simple arrangement by which such buildings will be approved and ordered for the needs of the public service only; the expenditures for public works; and the expenditures for printing. In other words, in order to
effect a real revision of the expenditures of the Government, it must be a gencral revision, both of those appropriations which have their initiative in the executive departments and of those that have their initiative in the Congress.

## THE EQUIVALENT OF A BUDGET.

The absence of anything like a budget in our Government has undoubtedly led to a great deal of extravagant appropriation. Originally, no doubt, it was contemplated that a budget should be presented by the Secretary of the Treasury. And Alexander Hamilton began in that way. But the complete plan of a budget was never fully realized, could not have lasted, and can not now be instituted. The elements of financial responsibility of such a system as the English have all been present, but the separation between the executive and legislative branches has prevented these elements from getting together. And, unfortunately, the responsibility for the adjustment of revenues and appropriations instead of drifting toward an efficient system of legislative and executive cooperation, devised as best it could be in our form of government, has drifted always toward an elimination of the responsibility of the executive branch. It finally came to the point where the executive had little or nothing to say about the revenues, and where the executive estimates of expenditures were constructed more or less for trading purposes with the appropriation committees. On the other hand, the Congress, into whose hands the control so largely came, was obliged to meet these economic and business responsibilities with an organization that made revenue questions necessarily political and partisan, and which turned over the separate appropriation bills to a series of unrelated committees which were obliged to deal with them in singular isolation. In neither house of Congress was there a corelation or cooperation of these committees.

In this way the Government arrived at the farthest extreme from a responsible budget. The demand for something better has undoubtedly arisen, and has already taken form in a marked attempt on the part of the Congress to organize these important responsibilities. In March last there was incorporated in the sundry civil appropriation bill the following provision:

Immediately upon the receipt of the regular annual estimates of appropriations needed for the various branches of the Government it shall be the duty of the Secretary of the Treasury to estimate as nearly as may be the revenues of the Government for the ensuing fiscal year, and if the estimates for appropriations, including the estimated amount necessary to meet all continuing and permanent appropriations, shall exceed the estimated revenues, the Secretary of the Treasury shall transmit the estimates to Congress as heretofore required by law and at once transmit a detailed statement of all of said estimates to
the President, to the end that he may, in giving Congress information of the state of the Union and in recommending to their consideration such measures as he may judge necessary, advise the Congress how, in his judgment, the estimated. appropriations could with least injury to the public service be reduced so as to bring the appropriations within the estimated revenues, or, if such reductions be not in his judgment practicable without undue injury to the public service, that he may recommend to Congress such loans or new taxes as may be necessary to cover the deficiency.

Then followed the announcement of the President favoring a reduction in appropriations and an earlier and more thorough consideration of the estimates by the heads of the departments. It was determined that instead of the former system, by which each member of the Cabinet had sent his own department estimates to the Congress without any common consideration of all the estimates by the whole Cabinet, the estimates of all the departments should be reported to the President and the Cabinet and be considered by them with a view to a relationship to the expected revenues. This was a decided step towards a more rational dealing with these great questions.

Then came the action of the Senate appointing a Committee on Expenditures, including the chairmen of the separate committees having charge of appropriation bills, with a view of binding together the work of these committees, and of having it all passed upon together and in common, thus tending toward making the appropriations of Congress one appropriation instead of many. All of this is the beginning of an organization of the fiscal responsibilities of the executive and legislative branches of the Government. These beginnings should be, and I believe will be, conserved and developed.

It is too early to say what final form this reorganization of the fiscal responsibilities will take, but it is fair to hope that there will be constant progress away from the extreme disorganization of the past. Even if our country is rich it can not afford to be wholly unscientific in its appropriations.

## BONDS.

I respectfully recommend that the tax on bank circulation, secured by United States bonds hereafter deposited, be continued at the rate of one-half of 1 per cent per annum for circulation based on 2 per cent bonds, but that the tax on circulation secured by United States bonds hereafter deposited bearing rates of interest higher than 2 per cent shall be increased in exact proportion to the increase of the rate of interest above 2 per cent. So that, for example, the tax on circulation secured by $2 \frac{1}{2}$ per cent bonds would be 1 per cent per annum, by 3 per cent bonds $1 \frac{1}{2}$ per cent per annum, and so on, it being understood that the tax on circulation secured by existing bonds bearing 3 or 4 per cent interest, and now on deposit to secure circulation, would not be affected.

This would complete the availability of the Panama bonds authorized by the law of August 5, 1909. These bonds, as the law now stands, if issued at 3 per cent would have a much better circulation privilege than the outstanding 2 per cent bonds, the tax being only 1 per cent; and their issue, therefore, would constitute a discrimination against the 2 percents that the Government could not justly contemplate. The circulation privileges of any new issues should certainly not be better than those of the 2 percents; but a parity would, I think, be sufficient protection to make good for the time being the imperative moral obligation of the Government to see to it that the market value of these 2 percents does not unduly decline because of their abnormally low rate of interest.

At the same time it is desirable to thus complete the legislation respecting the new authorization of Panama bonds, so as to carry out the intention of Congress to make them available. The indebtedness of the Panama Canal to the general fund of the Treasury now amounts to $\$ 97,069,649.26$ and the continuing outlay for construction adds to the drain upon the general revenues. It is desirable that the settlement of this account should be at least begun; and that the expressed policy of the Government to pay the cost of the canal from the proceeds of bonds in order that the next generation or two shall share with this in the cost of the great enterprise, should be secured and established. If the sale of any part of these bonds for the repayment of the general fund should produce more cash than the Treasury balance needs there might be bought in the market for the sinking fund some of the 2 per cent bonds. Such a purchase-though of no great amount-should tend to keep the market price of these bonds, now unduly depressed, above par-a favorable condition to which the Government can not be indifferent. It might also have effect as an approach toward some present elasticity in the national bank currency. The 2 per cent bonds are nearly all held by the banks, mostly as a basis for circulation; and the banks would face so much loss in an attempt to dispose of them in addition to the heavy sum, estimated at $\$ 25,000,000$, which they have already lost on them, that the influence of the situation is decidedly against the retirement of circulation. The present condition of the national bank circulation is therefore as unresponsive as it has ever been at any time; and any influence, however limited, that should tend to relax this currency rigidity would be an advantage.

The introduction of the 3 per cent Panama bonds and the withdrawal of even a small amount from the surplus of the 2 percents would substitute for bonds that are almost wholly used as a basis for circulation, bonds that might be used for circulation purposes if there should be a real need for them, but which would have the advantage of a broad competition created by the demand of investors.

The 2 per cent bonds as a basis for circulation have no elasticity, but are practically stagnant and unchangeable in amount. Being at their low rate of interest only desirable for circulation, there is no demand for them in the market from investors; the banks can not buy and sell them at will; and the effect is one of rigidity on their own part, and rigidity of the currency created by them. Therefore even such a slight change in the conditions as I suggest would be at least in the right direction.

If now the objection should be made that selling 3 per cent bonds and buying 2 per cent bonds with the surplus part of the proceeds would be increasing the Government's interest payments by 1 per cent on that amount, the answer is that that would be one of the best features of the transaction. It is, in my judgment, high time for the Government to realize that it does not have a 2 per cent borrowing power and has never had. No government, however rich, has a 2 per cent borrowing power. Possibly it would have been better never to have issued 2 per cent bonds or bonds at any rate of interest below the borrowing power of the Government in the open-investment market. By varying the tax on the circulation oprivilege the transaction between the Government and the banks could be at the same net rate of interest, whatever the bond rate might be. For instance, a 3 per cent bond with a payment of $1 \frac{1}{2}$ per cent by the banks to the Government for circulation and the 2 per cent bonds with one-half of 1 per cent circulation charge make precisely the same net rate between the Government and the banks, to wit, $1 \frac{1}{2}$ per cent. If, therefore, the Government had issued 3 per cent bonds instead of 2 per cent bonds, or if it should do so now or at any time, it would not change in any way the net interest result of its transactions with the banks; and such a course would have the advantage of issuing bonds that investors would want and which would have a broad and wholesome market that would aid materially in introducing elasticity in the currency. Even if we were certain of a basic reform of our banking and currency system at an early date, there would still be no objection to affording in this incidental way some relaxation of the present immovability of the currency.

## REHABILITATION OF THE CUSTOMS SERVICE.

The alarming revelations of the condition of the customs service at the port of New York, which resulted from inrestigations started during the last administration, confronted the Treasury Department in March last with the necessity for still further investigation and for a general overhauling and rehabilitation of the service at that port; and for a general inquiry into the condition of the customs service as a whole. The revelations of the sugar customs frauds of the

American Sugar Refining Company showed a long-continuing system of corruption. For a period of years this system had been thoroughly organized, involving one of the largest corporations of the country and necessarily a considerable number of men in the government service. These frauds were so extensive and had been so intrenched that over $\$ 2,100,000$ has been paid to the Government since March 4 in acknowledgment of evaded duties. An instance of organized corruption of dimensions like these could not be treated as an isolated case. Since this case was possible there must have been at that port a wide-spread demoralization. The Treasury Department therefore of necessity has given great attention to uncovering the actual conditions at New York, to bringing to punishment offenders who can be reached, and especially to reforming and rehabilitating the service and putting it upon a basis of decency, honesty, and efficiency.

There could not have been a more favorable time for undertaking this important reform. The revelations made and proven were so startling and impressive that opposition was silenced; and in this silence the necessary, clear-cut measures could be carried out without meeting serious obstructions.

It soon developed that the frauds of the American Sugar Refining Company, while perhaps the most important instances, were, as had been apprehended, symptoms of a diseased condition, not universal by any means, but almost general. And difficult as it always is to sufficiently bring to light the facts of such a condition to afford a basis for rehabilitation, this has been already largely accomplished. Much has been discovered to afford an understanding of the situation, with the result of numerous seizures, of numerous prosecutions made or projected, and of important and successful beginnings of a complete rehabilitation. While the recovery of evaded duties and the prosecution of individuals have been of large significance, the greatest asset to the Government of these disgraceful conditions is the knowledge and the light which guarantee in time a wholesome reorganization.

The study of the causes of the demoralization which has been revealed is still incomplete, but the main causes are evident. It is clear, for instance, that the influence of local politics and politicians upon the customs service has been most deleterious, and has promoted that laxity and low tone which prepare and furnish an inviting soil for dishonesty and fraud. Unless the customs service can be released from the payment of political debts and exactions, and from meeting the supposed exigencies of political organizations, big and little, it will be impossible to have an honest service for any length of time.
, Any considerable share of the present cost of this demoralization to the public revenues, to the efficiency of the service, and to public and
private morality is a tremendous amount to pay in mere liquidation of the small debts of political leaders.

It is also clear that the widespread disposition of returning American travelers to evade the payment of legal duties has greatly helped to create the conditions which have become intolerable. Those Americans who travel abroad belong to the sections of the people which most readily create public sentiment and are most responsible for it; and the fact that in so many instances these travelers are willing to defraud the Government out of considerable or even small sums creates an atmosphere on the docks that strongly tends to affect the morale of the entire customs service. And when to this is added the frequent willingness upon the part of these responsible citizens to specifically corrupt the Government's men, then the demoralization is further accentuated.

Still another explanation of the influences which, through a series of years, have worked toward the corruption of the service is the determination or willingness of certain classes of importers to defraud the Government of as much of its duties as they can compass. Some of these importers work through undervaluations, with which the service has been in many instances unable to contend, and to defeat which the present tariff law has introduced new methods of administration. Others, as shown by recent court trials, work through a combination of consignor, consignee, and customs officials. And still others, as in the sugar frauds, disregard the foreign shipper and form a corrupt organization out of their own people and the people of the Government.

All these revelations, and the efforts to carry the revelations further, the prosecutions and the reorganization, so far as it has gone, have occupied but a few months. None of this difficult work is complete or nearly complete. It has had to be carried on at the same time with the usual business of the customs service. The Treasury Department, having the firm support of the President, will continue it without pause and will have, as it has had, the effective cooperation of the Department of Justice. The undertaking is not primarily one of punishment. Prosecutions are but unavoidable incidents of the purpose to rehabilitate the service. We must have the facts and the facts necessarily lead to prosecutions. But they will lead in the end to the establishment of an administration of the customs service that is fit for the government of a great nation.

## EFFICIENCY.

The matter of efficiency in the administration of the Treasury Department is also being inquired into. This is not an inquiry that can be quickly concluded if it is to be productive of results. There should be, of course, in every great executive organization, a constant
and almost automatic efficiency test with practical results; and in any prosperous private business this obtains. But even then a periodical set investigation is necessary, especially in government offices. In the inquiries now being made in the Treasury Department, there is no further intention than the ordinary one of finding out whether the work is done under the most effective system and with reasonable individual efficiency, or whether improvements can be made, having, of course, in view the normal relation between efficiency and economy and between efficiency and morale. The more efficiency you can secure in system and in personnel the less the cost will be. The saving, however, would show itself probably more in forestalling increases in expenditure than in reducing present totals; for the increase in public business is as certain and unavoidable as the increase in the private business of the country.

RETIRING PENSIONS.
Any inquiry into the efficiency of administration very soon involves a consideration of a policy of civil service retiring pensions. And it seems to me that the conclusion is unavoidable that a really efficient service is out of the question without a method of honorably and justly retiring persons whose efficiency is seriously impaired. It is quite true that the older clerks of the service are no more likely than the younger clerks to be inefficient. Indeed, their experience and cheir settled relations to the service could easily compensate for the lack of some other personal equipment. But just as there are instances where the younger clerks should be disciplined or dismissed so there are many cases of the older clerks where, in justice to both themselves and the service, they ought to be honorably relieved.

The service is blocked in many instances by the unwillingness of the officials in charge to throw out of place worthy men and women who have given the best of their lives to the work of the Government. So that, in a very imperfect and wholly unsatisfactory manner, practically a pension system is and long has been in operation.

The United States is the only nation that has no general legal retiring pension for the employees of its civil service. We have this unique position in the world, along with a reputation for great wealth and for otherwise liberal expenditures. The entire civilized world has shown great and growing recognition of pensions or retiring allowances; and while the United States is so far behind the rest of the world in civil pensions, it has by far the largest pension list among the nations. The war and navy pensions are a recognized part of our policy; and in the civil service pensions have been extended to the judiciary. And though as a government we have halted at a general retiring allowance for civil employees, the great universities of our country and the
great corporations have been taking immense steps along this very line; and the Federal Government is becoming more and more isolated. While I have spoken only of the effect upon the service itself of the lack of a system of retiring pensions, there are, as everyone knows, other claims upon the Government to establish this policy. I hope that the Congress will take up and consider favorably one of the various forms of law that are proposed. This subject has been before the country and before the Government for a long while; and if the policy were to be adopted at this time it would undoubtedly give a strong impulse to that improvement of every branch of the service which is now so much desired by the people and which is a matter of so much interest to the Congress and to the Administration. In expressing my opinion in favor of the retiring allowance, I purposely avoid the expression at this time of a preference for any particular plan or system.

## THE CORPORATION TAX.

There has been much discussion throughout the country as to what would be taxed under the corporation-tax law and as to what form of return would be adopted. It could only be assumed by the Treasury Department that the single purpose of the law is to tax at 1 per cent the actual net profits of a corporation, as net profits are commonly understood, and that the term " net income" was used in the law instead of " net profits " in order that there might be no confusion as to this-that net profits mean not merely the actual net earnings from the operations of the business, but also net revenues received from the corporation's investments and from all other sources. With this controlling purpose of the law. clearly defined and adhered to, it follows that the form of return must be strictly conformed to it, and the terms of the law construed accordingly.

THE TARIFF BOARD.
The Tariff Board, authorized by Congress and appointed by the President, has been organized and has entered upon its work. This Board was authorized by the Congress to gather information to assist the President, and also to gather information to assist the Treasury Department in the administration of the customs. The Board has most ample authority; and I look forward with great confidence to most important results in both branches of the Board's work, and to the establishment of the Board in the confidence of the country.

## THE NATIONAL BANES.

The improvement in the dealings of the office of the Comptroller of the Currency with the national banks is going forward. The misconception of the purposes of the department respecting the responsibilities of bank directors has practically passed away. The purpose
in this respect was and is to stimulate bank directors to a livelier and more detailed sense of their active responsibilities, and to reawaken in the department itself practical oversight of the relations of the directors to the banks. I am confident that we shall have a very distinct and much-needed improvement in this very important factor in the management of the national banks.

The improvement in bank examination is already considerably advanced, and this critical function is sure to be better and better performed. An essential feature of improved administration of the function of bank examination is that the examiners themselves shall be exclusively identified with the service. The practice has therefore been adopted by the Treasury Department, with the approval of the President, that no bank examiner after he has entered the service shall take any part whatever in practical politics. The lessons of the panic of 1907 , following the other conspicuous experiences and lessons of the department in recent years, brought into a stronger light, along with the defects of the directorship system as then carried on', the almost equal deficiencies of bank examinations. There is ground for the assumption that with such examinations and such responsible directorships as are now aimed at and partly achieved the bank failures in New York which precipitated the panic would have been foreseen and prevented.

The cooperation that is becoming established between the nationalbank examiners, the state-bank examiners, and the new order of examiners of the clearing-house associations, and the more searching and individualized study of examiners' reports at Washington, are making the department's improved relations with the banks progressively effective.

## THE TREASURY PRINTING OFFICE AND BINDERY.

The printing office and the bindery which were found established in the Treasury building have been removed to the Government Printing Office and there absorbed. The Treasury building has thus avoided a decided fire hazard and secured much-needed additional room, and the Government is saved some expense. The department finds the new arrangement for its printing and binding very convenient and satisfactory, and the example is being used to enforce the removal of all similar branch offices and the consolidation of all the government printing and binding in the Government Printing Office.

## THE DAILY STATEMENT.

The form of the Daily Statement of the Treasury was changed to take effect on July 1 last, in order that the discrepancies should be avoided which were due to the daily returns made to the Treasurer's office and those made to the division of bookkeeping and warrants being taken independently and without reconcilement for the difference
in their dates. The further and still more important purpose was to separate the ordinary receipts and disbursements from the disbursements for the Panama Canal and the public debt, the latter inclusive of money received and paid for the retirement of national-bank notes. The new statement also gives a clearer understanding of the available cash in the Treasury and in the banks. It contains other information that is of daily interest. It will be possible, doubtless, to further improve this statement at another time, but nothing more is ${ }^{\prime}$ necessary at this time. The statement has the advantage of drawing attention away from the grand total of appropriations to the more actual cost of the administration of the Government, and to fix attention upon those facts of our finances which need and which repay the consideration of the Congress, of the Administration, and of the public.

The exhibits of the year's finances on pages 15-17 of this report are conformed to the practice of the Daily Statement.

## THE TREASURY PERMANENT STAFF.

I am greatly impressed by the importance to the Government's service of the permanent staff of the Treasury Department. Secretaries of the Treasury and Assistant Secretaries come and go, but the permanent staff continues. And with it persist the traditions of the department, and upon it largely depends the standard of its administration. Nothing is more important than that this permanent staff should be recruited from the very best available ability in the country. I have no specific recommendations to make at this time. At a later time I may wish to suggest to the Congress a revision of the salaries of some of those upon whom the Treasury Department so greatly depends.

Nearly all members of this important staff except auditors are already in the classified permanent service, and there seems to be no good reason for this exception.

## CONCESSIONS TO PUBLIC CONVENIENCE.

The tendency to affiliate the subtreasuries with the clearing houses of their localities is, I think, clearly in the right direction. There seems to be no good reason why the receiving and paying work of the Government should not be on the lines of the receiving and paying work of other business organizations, and so far as the discretion lies with the Secretary of the Treasury, I shall consider with great interest suggestions for the adjustment of the ordinary paying and receiving business of the Government to the convenience of the people.

I even hope for, and I beg to suggest to the consideration of the Congress, a reconsideration of the methods of the payment of customs duties so that these transactions may cease to be so very inconvenient and may conform themselves to the ordinary practices of business.

The spectacle should not be possible of a detail from the navy carrying $\$ 30,000$ in cash through the streets of New York from the subtreasury to the custom-house to pay duties on navy importations and of a return trip from the custom-house by the representatives of the collector back to the subtreasury with this same money, all because the collector of customs could not legally accept a check of the Navy Department upon the subtreasury.

## BANIING AND CURRENCY REFORM.

It is not necessary and not appropriate for the Secretary of the Treasury at this time to discuss the plan of banking and currency reform. The necessity for such reform is universally recognized, and when the time is ripe it will be the duty of the Treasury Department to express its judgment. Meanwhile the initiative in this important legislation was committed by the Congress to its Monetary Commission, and until that commission has reported it will be the policy of the department to preserve an open mird. The question has been and still is growing. The reform of our currency system has enlarged itself into the reform of our banking and currency systems, which brings into contemplation not merely the national banks, but the state banks in their three divisions-commercial banks, trust companies, and savings institutions. It is to be hoped that the extent and gravity of these broad readjustments will induce a public demand for calm and disinterested treatment of the issues and a public recognition of the profound importance of a rational, harmonious agreement. Neither political partisanship nor special interest nor pride of opinion should be allowed to obstruct a purely economic reform of such great significance to the nation in both its national and international relations. The change, when it comes, and whatever it may be, must be at any rate fundamentally right. It is better by far that there shall be no change whatever than that it shall be another makeshift. We must have at least the beginning of a permanent system. At present we have neither an adjustable currency nor trustworthy surplus reserves, two absolutely essential features of any banking system upon which the finances and the commerce of this great nation can securely rest. To secure these essentials-to speak of no others-the looked-for reform must deal with fundamentals.

The Secretary of the Treasury is the head of a business whose current expense accounts for mere administration foot up yearly to the amount of $\$ 38,000,000$. It spends altogether $\$ 84,000,000$, but $\$ 38,000,000$ are for mere operating expenses of the department. The appropriations for these large expenditures are specifically dedicated. In handling the varied interests of this great business the Secretary
of the Treasury has no contingent fund, and it would be greatly in the interests of the service if one were provided to the extent, say, of $\$ 100,000$.
Every head of a private business has control of sufficient funds to deal with contingencies and can, among other things, make such investigations and studies of the business as are necessary to put and keep it upon a progressive foundation. The interests of the Treasury Department would be equally promoted if a similar discretion should be given to the Secretary.

## FINANCES.

I have the honor to now call attention to the following statements showing receipts, disbursements, estimates, and the condition of the Treasury:

## Receipts and Disbursements.

Fiscal year 1909.
(See details in tables, pp. 20-25.)
The receipts and disbursements of the Government by warrants in the fiscal year ended June 30, 1909, were as follows:

ORDINARY RECEIPTS.

| Custom |  | \$300, 711, 933.95 |
| :---: | :---: | :---: |
| Internal revenu |  | 246, 212, 643.59 |

$a$ Exclusive of grants from the Treasury for deficiencies in postal revenues, for $1908, \$ 12,888,040.94$, and for $1909, \$ 19,501,062.37$, included in expenses of civil establishment, page 22.

## Fiscal year 1910.

The ordinary receipts of the Government for the current fiscal year are estimated upon the basis of existing laws as follows:

| From customs. | \$335, 000, 000.00 |
| :---: | :---: |
| From internal revenue, ordinary | 253, 000, 000.00 |
| From corporation tax. | 15,000, 000.00 |
| From miscellaneous sources | 45, 000, 000.00 |

Total estimated ordinary receipts.
$\$ 648,000,000.00$
The ordinary disbursements for the same period are estimated as follows:

For the civil establishment......................... $\$ 175,000,000.00$
For postal deficiency ............................... $16,880,620.12$
For the War Department ............................ 165, 000, 000.00
For the Navy Department .......................... 125, 000, 000.00
For the Indian service................................. 17,000,000.00
For pensions............................................ 161,000,000.00
For interest on the public debt..................... $22,195,000.00$
Total estimated ordinary disbursements.
$682,075,620.12$
Or a deficit in ordinary receipts of
34, 075, 620. 12
For Panama Canal disbursements $38,000,000.00$
For miscellaneous redemptions of the public debt 1, 000, 000, 00

A total deficit of
$73,075,620.12$

Transactions in deposits and redemptions for the national-bank note redemption account, act of July 14, 1890, are excluded from the estimates, no excess of redemptions over deposits for retirement of the notes being anticipated:
Postal service:
Estimated postal revenues for the current year................. \$217, 811, 749. 88
Estimated expenditures for the postal service, payable from said revenues except any excess over the revenues
$234,692,370.00$
Showing a deficiency in the postal revenues payable by law
from the General Treasury and included in the foregoing
estimates for ordinary disbursements ................................16,880,620.12
Fiscal year 1911.
It is estimated that upon the basis of existing laws the ordinary receipts for the fiscal year 1911 will be-

From customs........................................................................... $\$ 345,000,000.00$
From internal revenue, ordinary ............................................... 255, 000,000.00
From corporation tax. .............................................................. 25, 000, 000.00
From miscellaneous sources.................................................... 47,000,000.00
Total estimated ordinary receipts......................................672,000.000.00
The estimates of appropriations for the fiscal year 1911, as submitted by the Executive Departments and offices, are as follows:

Legislative establishment
$\$ 7,093,201.00$
Executive establishment-
Executive proper....................................... $\$ 472,270.00$
Department of State................................... 299, 720.00
Treasury Department................................. 11,220,515.00
War Department............................................2,272,908.00
Navy Department..................................... $841,500.00$
Department of Interior.............................. $5,044,745.00$
Post-Office Department................................ 1,695,690.00
Department of Agriculture........................ 13, 377, 136.00
Department of Commerce and Labor......... 3, 431, 330.00
Department of Justice................................ $\quad 525,740.00$
Territorial governments ............................ $266,850.00$

Permanent annual appropriations-
Interest on the public debt...................... $22,195,000.00$
Refunds-customs, internal revenue, etc....- 19, 144, 300.00
Collecting revenue from customs
$5,500,000.00$
Miscellaneous, exclusive of sinking fund and
national-bank note redemption account....
$23,160,295.12$
$69,999,595.12$
$623,224,550.51$
Add estimated naval appropriations for new ships for expenditure
the first year, received from the Secretary of the Navy after com-
pletion of the Book of Estimates and to be separately transmitted
to Congress.
$12,844,122.00$
Total estimated ordinary appropriations, excluding postal service payable from the postal revenues, but including the postal deficiency
$636,068,672.51$
The Panama Canal appropriations to be met by sales of bonds are estimated at
$48,063,524.70$
Total estimated appropriations for 1911
$684,132,197.21$
A surplus of ordinary receipts over ordinary appropriations of.... $35,931,327.49$.
A deficit, including Panama Canal appropriations of.
12, 132, 197. 21

## Postal service:

The postal revenues for the year 1911 are estimated at
$233,058,572.37$
And the appropriations for the postal service, payable from said revenues, except deficiencies therein, are submitted at. .
$243,692,695.00$
Showing a deficiency in the postal revenues, payable by law from the General Treasury and included in the foregoing estimates for the year 1911, of

Comparison of the estimates for 1911 with the appropriations for 1910 shows a decrease in the 1911 estimates of $\$ 42,818,969.19$, as exhibited in the tables following.

> Statement of Estimates of Appropriattons for 1911 Decreased under Appropriations for 1910.
[Excluding sinking fund, national-bank note redemption account, and postal service payable from the postal revenues.]

Note.-The above estimates for 1911 for the Navy Department, $\$ 129,874,036.38$, contain an estimate of $\$ 12,844,122$ for new ships for the Navy, received from the Secretary of the Navy after the completion of the Book of Estimates, and therefore not included therein, but to be separately transmitted to the Congress.

Last year the Naval building program was not included in the estimates submitted to the Congress. Excluding, therefore, the Navy program for new building construction for both years, the estimates are as follows:
Total estimates for 1910.
$\$ 765,289,568.13$
Total estimates for 1911.......................................................... $671,288,075.21$
Decrease in 1911 estimates.
94, 001, 492. 92

## Exhibit of appropriations for 1910.

Total appropriations for 1910, including estimated permanent annual appropriations and deficiencies for prior years.........
Deduct appropriations made for the postal service for 1910, $\$ 234,692,370$, and deficiencies made therefor for oprior years, $\$ 1,453,493.86$, which are payable from the postal revenues, exept any excess of expenditures over the revenues 236, 145, 863.86
808, 512, 758.78

## Add-

Deficiency in the postal revenues for 1910, payable by law from the General Treasury, estimated at
Appropriations made by the 1st session, 61st Congress, for the Thirteenth Census and miscellaneous objects. $10,200,000.00$

835, 593, 378.90
Deduct-
Sinking fund, national-bank note fund-redemption account, and deficiencies for prior years 108, 642, 212.50

Total
726, $951,166.40$
Agreeing with the appropriations for 1910 shown in the preceding table, against which the estimates of appropriations submitted for 1911 show a decrease of $\$ 42,818,969.19$.

I respectfully call your attention to the two further divisions of this report, to wit: The condensed annual reports of the various bureaus and divisions of the Treasury Department, and the tables accompanying the report on the finances.

Franklin MacVeagh,<br>Secretary.

To the Speaker of the House of Representatives.

## abSTRACTS OF REPORTS OF BUREAUS AND DIVISIONS.

## ABSTRACTS OF REPORTS OF BUREAUS AND DIVISIONS.

The following is a summary of the reports of bureaus and divisions of the Treasury Department for the fiscal year ended June 30, 1909, with the exception that the figures in relation to public moneys and loans and currency are brought to November 1:

## TREASURER OF THE UNITED STATES.

The conditions that confronted the Treasury during the last fiscal year were largely increased expenditures, and revenues that were but little in excess of those received in the fiscal year 1908, when there was a deficit on ordinary transactions. The governmental activities have increased the disbursements during the past two years without adequate provision having been made for a corresponding income. The deficit thus created was paid from the general fund in the Treasury, accumulated in previous years, and it has resulted in the depletion of the greater part of the available cash in that fund.

The ordinary revenues, by warrants, and adjustments for moneys received but not covered by warrants in the year, were $\$ 603,589,489.84$, an increase of $\$ 2,528,766.57$ over those of 1908 , while the ordinary expenditures were $\$ 662,324,444.77$, an increase of $\$ 41,222,054.13$, as shown by similar comparison. The net result of ordinary transactions was a deficit of $\$ 58,734,954.93$.

The receipts from proceeds of United States bonds sold during the fiscal year 1909, to be used in the construction of the Panama Canal, were $\$ 30,731,008.21$, while the disbursements on the canal amounted to $\$ 31,419,442.41$, or an excess of disbursements over receipts of $\$ 688,434.20$, which was advanced from the general fund in the Treasury. Under the act of August 5, 1909, provision was made to reimburse the Treasury for all expenditures on the canal not covered by previous issues of bonds.

The total amount expended on the purchase and construction of the canal to the close of the fiscal year 1909 was $\$ 170,184,668.70$, of which $\$ 87,309,594.83$ was from proceeds of sales of bonds. The balance of $\$ 82,875,073.87$ was advanced from the general fund in the Treasury and is reimbursable from proceeds of bonds not yet sold.

The cash receipts on account of the public debt (exclusive of Panama Canal loan) were wholly deposits of lawful money for the retirement of national-bank notes, and amounted to $\$ 45,624,239.50$;
$\$ 89,562,083$ was disbursed for national-bank notes canceled and retired, leaving a net payment from the Treasury, on account of banknote retirements, of $\$ 43,937,843.50$. In addition, there was disbursed $\$ 15,434,687$ on account of principal of matured loans and fractional currency, a total disbursement for the public debt of $\$ 104,996,770$, and a total excess of disbursements, therefore, of $\$ 59,372,530.50$. The interest-bearing debt on June 30, 1909, was $\$ 913,317,490$, and the interest charge thereon $\$ 21,275,602.40$.
In previous years it was deemed advisable to restore accumulating revenues in the Treasury to the channels of trade by making direct deposits thereof in national banks; consequently, with the growth in disbursements in later years, not equaled by the income, such deposits have been gradually recalled to the Treasury as needed. The balance in depositary banks to the credit of the general fund at the beginning of the last fiscal year was $\$ 149,004,924.29$. Calls for the return of deposits to the Treasury were made as follows: July 2, 1908, $\$ 33,403,120$; November 18, 1908, $\$ 4,864,750$; January 11, 1909, $\$ 24,716,760$; February 4, 1909, $\$ 28,478,000$, and June 30, 1909, $\$ 24,954,900$. The total amount of these calls had not been paid by the close of the fiscal year, but the balance in banks to the credit of the general fund had been reduced to $\$ 60,427,525.69$.

The trust funds, amounting to $\$ 1,341,380,869$, were $\$ 39,125,000$ greater at the close of the fiscal year than twelve months earlier, by reason of an increase of $\$ 29,828,000$ in gold certificates, $\$ 10,064,000$ in silver certificates, and a decrease of $\$ 767,000$ in Treasury notes of 1890.

The amount of national-bank notes presented for redemption was $\$ 461,522,202$, equal to 67.80 per cent of the average amount of such notes outstanding during the year. Compared with 1908, the sum is $\$ 111,887,861$, or 32 per cent larger, and it is the maximum presented in any year in the history of such redemptions. The expenses incurred for such redemptions were $\$ 396,743.15$, which has been assessed on the banks at the rate of $\$ 0.79762$ per $\$ 1,000$ of notes redeemed.

The monetary stock aggregated $\$ 3,406,328,354$ at the close of the fiscal year 1909, an increase of $\$ 27,564,334$ as compared with that of twelve months earlier. The growth in gold was $\$ 23,908,507$, and in silver $\$ 12,836,670$, while there was a decrease of $\$ 8,413,843$ in nationalbank notes and of $\$ 767,000$ in Treasury notes of 1890 . The money in circulation on June 30, 1909, amounted to $\$ 3,106,240,657$, a per capita of $\$ 34.93$. The percentage of gold to total circulation was 45.53 .

The notes and certificates of United States paper currency issued during the fiscal year numbered 202,746,192 pieces, of the total value of $\$ 764,510,000$. The redemptions were $194,507,569$ pieces, of the value of $\$ 722,395,000$. The average cost of each piece of United

States paper currency issued and redeemed is about 1.571 cents, and the annual cost of maintenance of the currency issued by the National Government averages about one-fifth of 1 per cent of the amount outstanding.

The United States bonds pledged to secure circulation amounted to $\$ 660,753,070$ on June 30, 1909, an increase of $\$ 32,580,940$ during the fiscal year. United States bonds and other securities, amounting to $\$ 81,244,071.10$, were held to secure public deposits in national banks. The United States bonds pledged to secure circulation and deposits on June 30,1909 , were equal to 78 per cent of the total amount of such bonds outstanding.

On July 1, 1907, the silver dollars in circulation amounted to $\$ 81,694,518$; on July 1, 1908, $\$ 76,354,933$; and on July 1, 1909, $\$ 71,990,679$. However, the accumulation of this coin in the Treasury is not in excess of the amount that can be utilized for the issue of silver certificates of the smaller denominations for which there is great demand.

The amount of subsidiary silver coin shipped to depositors therefor at government expense for transportation during the last fiscal year was $\$ 36,058,567.75$. The average rate for transportation was $\$ 2.90$ per $\$ 1,000$ (a large increase, because one-half of the appropriation was used in transporting said coin by registered mail by direction of Congress).
The redemptions from the reserve fund during the year were as follows: United States notes, $\$ 19,984,536$, and Treasury notes, $\$ 31,405$. The redeemed notes were immediately restored to the general fund in exchange for gold, and the reserve was thus maintained at the amount fixed by law. The receipts of moneys for redemption and exchange during the last fiscal year were $\$ 1,343,787,588$, as against $\$ 1,338,405,106$ in 1908. The Treasury holdings of gold at the close of the fiscal year 1909 aggregated $\$ 1,042,704,301.02$, of which $\$ 975,569,205.62$ was in coin, and set apart for the respective uses it was held on the following accounts: Reserve fund, $\$ 150,000,000$; trust funds (for the redemption of gold certificates in actual circulation), $\$ 815,005,449$; and in general fund (belonging to Treasury), \$77,698,852.02.
The available balance in the Treasury at the close of the fiscal year 1909 was $\$ 126,375,428.10$, a decrease of $\$ 118,795,919.63$ as compared with that of 1908.

## District of Columbia.

The net expenditures on account of the District of Columbia for the fiscal year 1909 , by warrants paid, were $\$ 14,776,541.75$.
The net revenues deposited in the Treasury, by warrant, on this account for the same period, were $\$ 7,323,538.10$.

The amount of the funded debt retired during the year was $\$ 491,300$, reducing the annual interest charge by $\$ 17,833.90$. Since the close of the fiscal year, the debt has been further reduced by the purchase of $\$ 446,3503.65$ per cent bonds, leaving outstanding on October $1, \$ 9,667,800$ in bonds bearing 3.65 per cent interest.

The total issue of 3.65 per cent bonds is limited by law to $\$ 15,000,000$, and of this sum $\$ 14,997,300$ has now been issued.

At the close of the fiscal year 1909, the 10 per cent guaranty fund retained from District of Columbia contractors amounted to $\$ 249,326.56$; and is represented by $\$ 151,480$ in bonds purchased at the request and risk of contractors, and $\$ 86,057.84$ uninvested cash.

Detailed information in regard to the affairs of the District of Columbia will be found in the reports of the District Commissioners and the Treasurer of the United States, ex officio commissioner of the sinking fund of the District of Columbia.

## COMPTROLLER OF THE CURRENCY.

During the fiscal year ended June 30, 1909, national banking associations to the number of 292 , with authorized capital of $\$ 17,184,000$, were chartered, of which 72 were conversions of state banks, 69 reorganizations of state and private banks, and 151 banks of primary organization. During the year, banks to the number of 164 were closed, of which 150 , with capital of $\$ 11,300,000$, were placed in voluntary liquidation by authority of the stockholders. In this class was one bank the charter of which expired by limitation. From July 1, 1908, to June $30,1909,21$ banks, with aggregate capital of $\$ 2,228,500$, were placed in charge of receivers. The nominal value of the assets of these banks at the date of closing aggregated $\$ 12,459,931$, and their liabilities to depositors and other creditors $\$ 7,611,283$. Seven of the banks in the charge of receivers, their capital being $\$ 400,000$, were permitted to resume business, their affairs having been placed in a condition to warrant the discharge of the receivers and the resumption of business. The assets of these banks amounted to $\$ 3,097,358$, and their liabilities to depositors and other creditors $\$ 2,209,717$. It ordinarily requires about four years to liquidate the affairs of an insolvent national bank, but of the associations closed in the year the affairs of two have been settled, the creditors having been paid dividends covering their claims in full, principal and interest; one trust has paid 85 per cent, two 75 per cent, six from 20 to 55 per cent, and three have paid nothing so far.

Banks placed in voluntary liquidation to the number of 150, heretofore indicated, were closed generally for the purpose of reorganizing or transferring their business to state institutions, this being the case notably in Oklahoma. The records of the office of the Comptroller show that 91 liquidating banks were absorbed or reorganized
as state banks, 35 absorbed by other national banks, 1 reorganized as a national banking association, and 23 liquidated to discontinue business.

Between March 14, 1900, and July 1 of the current year charters were granted to 4,202 national banking associations, their authorized capital stock being $\$ 254,058,300$. Of the total number of banks chartered during this period, 2,701 were organized under authority of the act of March 14, 1900, and with capital stock of $\$ 70,355,500$. The large majority of these banks were incorporated with the minimum amount of capital authorized, namely, $\$ 25,000$, but the number organized with a greater amount, but less than $\$ 50,000$, raised the average to approximately $\$ 26,000$. The remaining banks chartered in this period were organized under the act of 1864, the number being 1,501, the authorized capital being $\$ 183,702,800$. Further classifying these banks, it appears that 565 , with capital of $\$ 40,410,800$, were conversions of state banks; 1,321 , with capital of $\$ 86,372,000$, reorganizations of state and private banks; 2,316, with capital of $\$ 127,275,500$, were banks of primary organization. Practically one-half of the authorized capital of all banks organized since March 14, 1900, is that of the converted and reorganized state and private banks.
The act of February 25, 1863, was repealed and reenacted with material amendments on June 3, 1864, and on July 12, 1870, the act was passed authorizing the organization of gold banks-that is, banks the redemption of the circulation of which was specifically provided for in gold. The only subsequent legislation in relation to the organization of national banking associations was the act of March 14, 1900, permitting the incorporation of associations with a minimum capital of $\$ 25,000$, authorizing the issue of circulation to the par value of the bonds deposited, and reducing the tax on circulating notes when secured by bonds bearing interest at the rate of 2 per cent.
Under these various acts charters have been issued to 9,466 associations, of which 456 were issued under the act of $1863,6,299$ under the act of 1864,10 under the act of 1870 , and 2,701 under the act of 1900 . On June 30, 1909, there were in active operation 6,955 national banking associations, with authorized capital of $\$ 947,726,775$. Banks to the number of 2,028 have been closed by voluntary liquidation, including those closed as a result of expiration of charter, and 483 failed and were placed in charge of receivers. The number of failures is only approximately 5 per cent of the total number of banks chartered.

As will be noted by reference to tables hereinafter submitted, the number of national banks in operation increased from 3,617 on March 14,1900 , to 6,955 at the close of the current fiscal year, the net increase being 3,338 . The capital of these banks rose from $\$ 616,308,095$ to
$\$ 947,726,775$, or an increase of $\$ 331,418,680$. The total amount of national-bank circulation outstanding on the date first named was $\$ 254,402,730$, of which $\$ 216,374,795$ was secured by bonds on deposit with the Treasurer in trust, and $\$ 38,027,935$ by lawful money deposited with the Treasurer by banks reducing their circulation, those placed in voluntary liquidation, and on account of insolvent associations. On June 30, 1909, the total circulation was $\$ 689,920,074$, or an increase of $\$ 435,517,344$ since 1900 . Circulation secured by bonds had increased to $\$ 659,673,408$, or an increase of $\$ 443,298,613$ during this nine-year period. Circulation secured by bonds and lawful money reached its maximum on July 11, 1908, when it amounted to $\$ 700,516,665$, but the maximum outstanding on the security of bonds was reached on June 30, 1909, the amount being $\$ 659,673,408$.
Comparing the national-bank circulation statement at the close of the current fiscal year with the statement for the year ended July 1, 1908, it appears that the bond-secured circulation increased from $\$ 623,250,517$ to $\$ 659,673,408$, or an increase of $\$ 36,422,891$. The amount of outstanding circulation secured by lawful money on July 1, 1908, was $\$ 75,083,400$, and on July 1, 1909, was only $\$ 30,246,666$, or a decrease of $\$ 44,836,734$, resulting in a net decrease during this period of circulation secured by bonds and lawful money of $\$ 8,413,843$.
The increase in number and capital of national banks organized since March 14, 1900, by States and geographical divisions, together with the number and paid-in capital stock of national banks on June 23, 1909, appear in the table following:

Summary by States, Geographical Divisions, and Classes of National
Banks Organized from March 14, 1900, to June 30 , 1909, and the Paid-in
Capital Stoce of all Reporting Banes on June 23, 1909.

## a Decrease.

The gross resources of national banking associations reached their maximum prior to the panic of 1907, on May 20 of that year, when they aggregated $\$ 8,476,501,434$, and this amount was not equaled until May 14, 1908, when they reached $\$ 8,594,622,697$. From the latter date to June 23,1909 , there was a gradual increase, the maximum being reached on the latter date, and is then shown to have been $\$ 9,471,732,663$, an increase of $\$ 757,668,263$ since July 15, 1908. The principal increases in the resources of the banks during the past year are the following: Loans and discounts from $\$ 4,615,675,531$ to $\$ 5,035,883,516$, an increase of $\$ 420,207,985$; United States bonds, including those held as security for circulation, public deposits, and amount on hand, from $\$ 716,348,490$ to $\$ 729,657,330$, an increase of $\$ 13,308,840$; other bonds, securities, etc., from $\$ 840,115,350$ to $\$ 903,863,266$, an increase of $\$ 63,747,916$; lawful money-that is, specie and legal tenders-from $\$ 849,018,750$ to $\$ 885,915,771$, the increase being $\$ 36,897,021$.

As a result of the legislation of June 22, 1906, amending section 5200 of the Revised Statutes to the extent of increasing the limit of loans from 10 per cent of the capital to 10 per cent of the capital and
surplus, but the aggregate not to exceed 30 per cent of the capital, the surplus funds of national banks have steadily increased, the amount on June 18, 1906, being \$448,858,491, and on June 23, 1909, $\$ 590,837,706$. The paid-in capital of the national banks on the latter date was $\$ 937,004,036$; circulation outstanding, $\$ 641,312,282$, and individual deposits, $\$ 4,898,576,696$. Compared with the returns on the approximately corresponding date in 1908, it appears that the capital has increased to the extent of $\$ 17,903,186$, surplus and other profits, $\$ 58,369,234$; circulation, $\$ 27,648,319$, and individual deposits, \$524,025,487.

The net deposits, on which reserve was required, on June 23 last were $\$ 6,074,509,161$, against which the banks carried an aggregate legal reserve of $\$ 1,358,750,753$, or 22.37 per cent. The composition of the reserve is as follows: Specie, $\$ 694,141,010$, of which 78 per cent was gold, $\$ 191,774,761$ legal tenders, $\$ 31,502,052$ redemption fund with the Treasurer of the United States, and $\$ 441,332,930$ net funds available with reserve agents. The total amount of cash in bank, due from reserve agents, and in redemption fund was $\$ 1,637,616,037$, or approximately 27 per cent of the deposits on which reserve was required. The average net reserve held by national banks in central reserve cities-'that is, New York, Chicago, and St. Louis-was 26.82 per cent, in other reserve cities 26.28 per cent, and in all reserve cities 26.54 per cent. While the banks outside of reserve cities are required to maintain a reserve of 15 per cent, the average for the country at large on the date in question was 17.34 per cent, and including excessive credits with reserve agents, not counted as reserve, the percentage was 25.09.

## MINT SERVICE.

The value of the original deposits at the several mints and assay offices of the United States during the fiscal year ended June 30, 1909, amounted, in the aggregate, to $\$ 142,124,941.59$. There was also deposited uncurrent domestic gold coin of the coining value of $\$ 3,432,288.62$. The deposits of silver bullion at these institutions contained $18,027,877.82$ standard ounces.

## Coinage.

The domestic coinage executed at the mints in Philadelphia, San Francisco, Denver, and New Orleans during the fiscal year 1909 ag gregated $130,277,522$ pieces, of the value of $\$ 120,399,953.35$, consisting of $\$ 108,180,092.50$ in gold, $\$ 11,093,810$ in subsidiary silver, and $\$ 1,126,050.85$ in minor coin. Of the latter, a small amount was made at the San Francisco mint. This is the first coinage of this character executed at any other than the Philadelphia mint.

Of the subsidiary silver coinage made during the year, $\$ 1,407,000$ was from bullion resulting from the melting of uncurrent coin transferred for recoinage; the balance, $\$ 9,686,810$, was from purchased bullion.

In addition to the domestic coinage executed, the mint at San Francisco coined for the Government of the Philippine Islands $18,083,944$ pieces in silver, of the value of $15,407,944$ pesos, and bronze 1 -centavo pieces, having a value of $39,246.12$ pesos. There were also coined at this mint 693,170 peso pieces in silver for the Government of San Salvador.

## Profts on silver and minor coinage.

The profit on the coinage of subsidiary silver during the year was $\$ 5,800,917.80$, and the profit on the minor coinage amounted to $\$ 846,978.81$, all of which has been duly accounted for and paid into the Treasury.

> Annual settlements.

At the annual settlement of the mints at Philadelphia, San Francisco, New Orleans, and Denver, and the assay office at New York, at the close of the fiscal year, all the bullion and coin and other moneys on hand were weighed and counted and found to correspond with the balances called for by the books.

## Purchases of silver.

There were purchased for the subsidiary silver coinage during the year $6,192,425.93$ ounces of fine silver at a cost of $\$ 3,207,857.83$, making the average price paid $\$ 0.518$ per fine ounce. A large amount of subsidiary silver coin having accumulated in the Treasury, the purchase of silver bullion for this coinage, with the exception of that contained in gold deposits, bar fractions and charges on silver deposits, was discontinued in February last, and has not been resumed, the stock of coin on hand appearing to be ample to meet the requirements for some time to come.
The total purchases of silver for the subsidiary silver coinage from July 1, 1906, to June 30,1909 , amounted to $34,663,800.68$ fine ounces, costing $\$ 20,950,293.39$. The balance of silver bullion on hand June 30, 1909, available for subsidiary silver coinage was $6,719,224$ fine ounces, costing $\$ 4,211,356.53$, the coining value in subsidiary silver coin of which is $\$ 9,288,480$.

Transfer of gold coin from San Francisco.
To relieve the crowded condition of the vaults of the San Francisco mint the bill making appropriations for the sundry civil expenses
of the Government, approved May 27, 1908, contained an appropriation of $\$ 300,000$ " to defray the expense of transporting money stored in the mint at San Francisco and receiving and storing the same elsewhere." Under this authority there were transferred from the mint at San Francisco to the mint at Denver $\$ 272,500,000$ in gold coin, at a cost of $\$ 277,431.12$.

## New York assay office.

Pending the construction of a new building for the refinery of the New York assay office it is necessary to transfer at the expense of the Government all the crude bullion deposited at that office to the mint at Philadelphia, to be parted and refined. Under section 3545 , Revised Statutes, the Secretary of the Treasury is required to keep in the assay office at New York an amount of public money or bullion procured for the purpose to enable payment to be made to depositors in coin or bars. It is therefore necessary, in order to enable the superintendent of the assay office at New York to make payments for silver bullion deposited, to transfer fine silver bars at the expense of the Government from the mint at Philadelphia to the assay office at New York.

The deposits of gold and silver at this office are large, and at present the office is working under very great disadvantages, which will be the case until the completion of the new building for the refinery.

## Minor assay offices.

Exclusive of the assay office at New York there are 8 assay offices at which gold bullion is deposited and the value of the same paid to depositors after determination by melt and assay. These offices are located as follows: Charlotte, N. C.; St. Louis, Mo.; Helena, Mont.; Boise, Idaho; Deadwood, S. Dak.; Seattle, Wash.; Carson, Nev., and Salt Lake City, Utah.

The bullion deposited at these institutions is transferred to the coinage mints at the expense of the Government, to be refined and converted into coin. The value of the deposits at these institutions for the fiscal year 1909 was $\$ 27,177,988.99$. The cost of transporting the same to the coinage mints was $\$ 37,971.92$. The salaries, wages, and contingent expenses of these offices for the fiscal year ended June 30, 1909 , amounted to $\$ 124,638.51$, and the earnings were $\$ 44,342.37$.
The total earnings of the mints and assay offices, including the profits on the subsidiary silver and minor coinage, were $\$ 7,263,861.04$, and the expenditures were $\$ 1,727,471.06$, making the net earnings $\$ 5,536,389.98$.

The earnings, gains, and expenditures were as follows:

## Earnings and expenditures.

The earnings and gains of the Mint service during the fiscal year 1909 were as follows:

Charges received for mounting, etc., medal-fund account_-_-_-...- 392.87
Charges for the manufacture of medals, etc_-......-.-...-.-.-.-. $8,255.47$

Surplus bullion recovered by operative officers_-_----.-.....-- $34,829.99$

Receipts from special assays of bullion and oret-_------------- $3,397.00$

Gain on light-weight United States gold coin for recoinage_-_-_- $\quad 250.71$
Remnants of bullion returned by the assayer...-----.-..........- 919.92
Charges for treatment of deposit melting-room sweeps_---.------ 41.35

The expenditures were as follows:

Contingent expenses, less amount paid to reimburse wastage and loss on sweeps sold

227, 413.84

Wastage of operative departments, minor coinage operations__-_ $1,372.81$

Expenses of medal fund (charges paid, mounting, etc.) _-_----- 385.50

## Assay office at Salt Lake City, Utah.

The act of May 30, 1908, provided for the establishment of an assay office at Salt Lake City, Utah, and appropriated the sum of $\$ 20,000$ for salaries, wages, and contingent expenses, including rent
of building. Rooms were rented, the necessary equipment installed and the office, opened for the receipt of deposits of bullion in February, 1909.

New design for the 1-cent piece.
A new design for the 1-cent piece was adopted in 1909, and its coinage commenced in July last. The obverse of this coin bears the head of President Lincoln instead of the Indian head which has been on this coin since 1864.

## Annuial assay commission.

The annual assay commission provided for by section 3547 , Revised Statutes, to test the fineness and weights of the coins of the calendar year 1908, reserved by the several mints for this purpose, met at the mint in Philadelphia, on the 10th of February, 1909, and after careful examination reported that the coins examined complied in all respects with the law as to fineness and weight.

## Medals.

The mint at Philadelphia is now equipped with a complete plant of the most modern character for the manufacture of medals, and during the year made a large number of medals for the government departments at cost for the labor and materials employed, thus effecting a large saving.

Production of gold and silver.
It is estimated that the mines of the United States produced, during the calendar year 1908, gold of the value of $\$ 94,560,000$, while the amount consumed in the industrial arts during the year is estimated to have been $\$ 31,476,091$, of which sum $\$ 14,754,945$ were new material.

The production of silver during the calendar year 1908 by the mines of the United States amounted to $52,440,800$ fine ounces, of the commercial value of $\$ 28,050,600$. Of this amount, it is estimated there were consumed in the industrial arts during the year $23,850,828$ fine ounces. Of this amount, $20,411,098$ fine ounces were new material.

## INTERNAL REVENUE.

The receipts from internal-revenue taxes for the fiscal year 1909, as shown by collectors' reports, were $\$ 246,212,719.22$, a net total decrease of $\$ 5,453,230.82$ from the preceding fiscal year. All of this decrease was from distilled spirits, fermented liquors, oleomargarine, adulterated butter, process or renovated butter, banks, bankers,
etc., as follows: Distilled spirits, $\$ 5,290,773.03$; fermented liquors, $\$ 2,351,205.39$; oleomargarine, $\$ 52,107.65$; adulterated butter, $\$ 5,086.60$; process or renovated butter, $\$ 5,839.11$; banks, bankers, etc., $\$ 100$.

The principal increase was from tobacco, which amounted to $\$ 2,024,423.78$, and miscellaneous, which was $\$ 226,948.77$.
The total expenditures for the maintenance of the Internal Revenue Service for the fiscal year 1909 were $\$ 4,973,782.37$.

The cost of collecting $\$ 1$ of internal revenue was $\$ 0.02$.
The following table is a comparative statement of receipts during the last two fiscal years. A more detailed statement will be found in the Annual Report of the Commissioner of Internal Revenue.

Receipts from Internal Revenue in 1908 and 1909, as Shown by Collectors' Reports.

| Object of taxation. | Fiscal year ended- |  | Increase. | Decrease. |
| :---: | :---: | :---: | :---: | :---: |
|  | June 30, 1908. | June 30, 1909. |  |  |
| Distilled spirits | \$140, 158, 807.15 | \$134, 868, 034.12 |  | \$5, 290, 773.03 |
| Manufactured tobacco | 49,862, 754. 26 | 51, 887, 178.04 | \$2,024, 423.78 |  |
| Fermented liquors. | 59,807, 616.81 | 57, 456, 411. 42 |  | 2, 351, 205.39 |
| Oleomargarine. | 954, 304. 96 | 902, 197.31 |  | 52,107.65 |
| Filled cheese | 1, 671.52 | 1,942.61 | 271.09 |  |
| Mixed flour. | 2,380.72 | 2,618.04 | 237.32 |  |
| Adnlterated butter | 43,537.30 | 38, 450.70 |  | 5,086.60 |
| Process or renovated butter | 128,003.86 | 122, 164.75 |  | 5,839.11 |
| Banks, bankers, etc. | ${ }^{7} 100.00$ |  |  | 100.00 |
| Miscellaneous | 706,773.46 | a $933,722.23$ | 226, 948.77 |  |
| Total. | 251, 665, 950.04 | 246, 212, 719.22 |  | 5, 453, 230.82 |

${ }^{\text {a }}$ Includes $\$ 502,252.58$ from playing cards, $\$ 411,987.53$ from penalties, and $\mathbf{\$ 1 9 , 4 8 2 . 1 2}$ from miscellaneous sources.

The total production of distilled spirits, exclusive of fruit brandies, was $133,450,755.1$ taxable gallons, against $126,989,740.1$ gallons in 1908, an increase of $6,461,015$ gallons.
The production of fruit brandies decreased 458,965 gallons.
During the fiscal year 1909, 1,292 distilleries of all kinds were operated, an increase of 92.

The production of beer was $56,364,360$ barrels, showing a decrease of $2,449,673$ barrels.

## BUREAU OF ENGRAVING AND PRINTING.

The Bureau of Engraving and Printing executed during the fiscal year a greater volume of work than it has ever before accomplished in any one year, the aggregate number of sheets delivered being $239,405,723$, or a net increase of 13.68 per cent over the deliveries of the previous year. This aggregate comprises the delivery of $51,725,000$ sheets of United States notes and certificates; 4,000 sheets of registered bonds; $20,185,008$ sheets of national-bank notes; 77,806,830 sheets of internal-revenue stamps; 348,500 sheets of customs stamps;

86,593,058 sheets of United States postage stamps; 323,278 sheets of postage stamps and postal cards for the Philippine Islands; 104,135 sheets of silver certificates, revenue and documentary stamps, registered bonds, and diplomas for the Philippine Islands; and 2,315,914 sheets of checks, drafts, etc. In addition to these deliveries, miscellaneous work was executed to the value of $\$ 205,694.85$.

Compared with the deliveries of the previous year, there was an increase of 4.98 per cent in United States notes and certificates and bonds, 113.68 per cent in national-bank notes, 6.12 per cent in inter-nal-revenue stamps, 14.77 per cent in postage stamps, and 0.12 per cent in checks, drafts; etc., and a decrease of 12.66 per cent in customs stamps, making a net total increase of 13.68 per cent.

The amount available for the work of the bureau during the year was $\$ 4,888,612.67$, comprising $\$ 3,555,058$ appropriated by Congress and $\$ 1,333,554.67$ repaid for services and materials furnished the Treasury and other departments of the Government. The amount expended was $\$ 4,355,935.65$, which included $\$ 192,401.99$ for salaries, $\$ 1,715,466.79$ for compensation of employees, $\$ 1,798,268.07$ for plate printing, and $\$ 649,798.80$ for materials and miscellaneous expenses, leaving an unexpended balance at the close of the year of $\$ 532,677.02$.

The large unexpended balance is due partially to decreased cost of the work performed in the year, and principally to the fact that the preparation of the national-bank emergency currency for issue under act of May 30, 1908, for which the bureau's appropriations were reimbursed from the appropriation provided by the act, was given preference to other worls which had been provided for in the annual appropriations for the bureau and was not furnished.
In compliance with the act to amend the national banking laws, the bureau completed the delivery in January, 1909, to the Comptroller of the Currency, of the required $\$ 500,000,000$. The total number of sheets was $13,131,185$, of which 30,224 were delivered in the fiscal year 1908. The act necessitated the altering of engraved face plates in order that the notes might, in the inscription thereon, conform to its provision, and the back plates were also altered for the series of 1902, and new design prepared for the series of 1882, to distinguish them from other issues and connect them with the act. From the date of the act to the end of August, 1909, 9,506 of the plates were altered-282 in the fiscal year 1908, 9,217 in the fiscal year 1909, and 7 in the current fiscal year. The cost of preparing the notes was $\$ 544,780.18$, and of altering the plates $\$ 121,381.29$, totaling \$666,161.47.

## SUPERVISING ARCHITECT.

The department is carrying into effect as rapidly as possible all legislation of Congress concerning public buildings directed to be
constructed under the supervision of the Secretary of the Treasury. The office of the Supervising Architect is being brought to the highest state of efficiency, and is responding to the demands made upon it with the utmost dispatch consistent with good designs and business methods. It must be borne in mind, however, that much time is required to design and prepare working drawings for the great number of buildings carried in the public building act of May 30, 1908. When that act was passed, a large volume of work under the public building act of June 30,1906 , still remained to be done. The projects carried by the act last mentioned have been practically disposed of, and the department, acting through the office of the Supervising Architect, has been engaged in the arduous task of selecting sites for all of the buildings provided for by the act of May 30, 1908.

In many instances difficulties have been encountered in securing sites on account of conflicting local interests which delayed selections; prices largely in excess of the amount available have been placed upon properties which were the most suitable for governmental purposes; and in numerous instances condemnation proceedings have been forced upon the department in order that it might secure desirable locations. Despite these drawbacks, the administrative work with reference to sites has been nearly finished, and the department has taken up the extensions of old buildings carried by the last public building act, and is now commencing work upon plans for the new buildings.

The question as to the rapidity with which these buildings shall be constructed is largely a matter of policy to be determined by Congress itself. The 1911 estimates provide ample funds to keep this office working at full speed at its present capacity. At a time when the revenues and expenditures of the Government are receiving the most serious consideration at the hands of the executive branch, the expenditure of approximately $\$ 12,000,000$ annually for public buildings is worthy of serious consideration by both the legislative and executive branches of the Government.

The following statements show the construction and financial operations of the department with reference to public buildings under its control during the fiscal year ended June 30, 1909:

## Statement of Buildings.

In course of erection (including 2 marine hospitals) _ 114

In addition, 16 extensions were completed and 31 extensions in course of erection. There are 141 sites for which no buildings are provided. During the fiscal year titles to 175 new sites and additions to sites were vested in the United States.

## PUBLIC HEALTH AND MARINE-HOSPITAL SERVICE.

The annual report of the Surgeon-General of the Public Health and Marine-Hospital Service, now in print, sets forth in detail the activities of this bureau.
13518—FI 1909——4

The plague situation on the Pacific coast is completely in hand, though conditions are being carefully watched at home and in foreign ports; and important preventive action is still being undertaken. Plague in India showed a decrease during the year. In South America it remained about the same.

An important study of typhoid fever in the District of Columbia has been made and is still in progress, the details of which are set forth in Hygienic Laboratory Bulletin No. 52. This work presents a standard method of investigating typhoid fever which has been already adopted in some other cities. The bureau is also participating in the study of the pollution of interstate waters:

The bureau has participated in the movement to study and control tuberculosis, reporting its data in Bulletin No. 57.

It has made an investigation to determine the prevalence of rabies in the United States and its geographical distribution, and has carried on extensively the Pasteur treatment at the Hygienic Laboratory and distributed the laboratory's " fixed virus."

Four bulletins have been issued as the result of the investigations due to the recent appearance of pellagra in this country.

The distribution of four pamphlets giving the results of investigations of the hookworm disease, and the delivery of public lectures without cost to the Government have, in the absence of legislation, constituted the activities of the bureau respecting this important matter.

The leprosorium on the island of Molokai, of the Hawaiian group, has been completed for a scientific study of that disease in all its stages. Six reports have been made on this subject. The service was represented at the International Congress Against Leprosy, held in Bergen, Norway, in August.

There has been no yellow fever in the United States during the year.

Cholera is being closely watched in other countries.
In the United States during the year there were reported 24,650 cases of smallpox-7,583 cases less than during the previous year.

## Vaccine virus and antitoxins.

Twenty-one establishments were licensed by the department, 10 of them being foreign, under the act approved July 1, 1902.
Investigations during the year demonstrated that foot-and-mouth disease may be transmitted to animals through vaccine virus. An outbreak of this disease was traced to the vaccine virus of two establishments. The license of one firm, which had expired, was not renewed, and the license of the other was suspended until all infected virus was withdrawn from the market and the infection eradicated.

The infection was due to importation from abroad, and revised regulations were therefore issued which will effectually control the importation of this product, whether intended for sale or for laboratory purposes.

> Bygienic laboratory.

The additions to the building, provided by Congress and trebling its capacity, were completed during the year. Nine bulletins, containing the results of scientific investigations, were prepared for publication, four of which were issued and five deferred until the fiscal year 1910 on account of insufficiency of the appropriation.

## Sanitary conference and advisory board.

The Seventh Annual Conference of State and Territorial Health Officers with the Public Health and Marine-Hospital Service was held in Washington June 2 and 3, 1909. Twenty-six States and Territories and the District of Columbia were represented. The discussions illustrated the value of this official organization.

The advisory board of the Hygienic Laboratory was convened by the Surgeon-General on March 26, 1909. Investigations conducted in the laboratory were discussed, and the advice of the board obtained with regard to the continuation of the same and new investigations.

## National quarantine.

At the 44 quarantine stations in the continental United States 8,266 vessels were inspected, of which 520 were disinfected. Inspection has been maintained on the Mexican border.
National quarantine has been administered at 7 ports in the Philippine Islands, 7 in Hawaii, and 8 in Porto Rico.
Medical officers have been stationed at 8 fruit ports in Central America to enforce special regulations relating to fruit vessels, to permit their entry into the United States without detention.

Details have also been made to ports in Cuba, Mexico, Barbados, and St. Thomas, to Rio de Janeiro, Callao, Guayaquil, Naples, Calcutta, and to 2 ports in China and 3 in Japan. The officers have exercised quarantine supervision over vessels bound to the United States, and at a number of foreign ports have examined aliens by request of the Immigration Bureau and steamship companies. By request of the Venezuelan authorities, on account of the bubonic plague, an officer was detailed for duty at La Guiara; 1 also for immigration and quarantine service at Amoy, China, by request of the United States consul, with special reference to the protection of the Philippines.

In view of the establishment of a new line of steamers, plying from Salina Cruz and Manzanillo, on the Mexican-Pacific coast,
direct to Honolulu, officers were appointed for the disinfection of vessels at the two Mexican ports named to prevent the introduction of yellow fever into the Hawaiian Islands, where this disease is at present unknown, but where the conditions are ripe for its spread should it be introduced.

New buildings of the quarantine station at Mobile, Ala., have been completed. Technical difficulties in the matter of title have prevented the completion of the purchase of the Mississippi River Quarantine Station, but it is expected the transaction will be completed in the near future. At Galveston, Tex., difficulty having been experienced in obtaining a waiver of jurisdiction over the site selected for the new quarantine station, a new site has been determined upon, already in the possession of the United States Government, and it is expected the construction of the station will be begun during the coming year. One quarantine station, the South Atlantic, Blackbeard Island, Ga., has been practically discontinued as no longer necessary, because of changed commercial conditions. It is kept, however, in readiness as a refuge station in case of need under skeleton organization.

## Medical inspection of immigrants.

During the fiscal year, 966,124 immigrants were inspected under the immigration laws and regulations, and 14,536 were certified for rejection on account of physical and mental defects. The inspections were conducted at 58 stations in the continental United States, Canada, Porto Rico, and Hawaii, but do not include the examinations in the Philippines or at foreign ports. Personal examinations were made of 965 aliens reported as public charges in various institutions throughout the United States to ascertain whether they should be deported under the immigration laws.

Service officers have also under the supervision of the Commissioner of Immigration conducted the large hospital for immigrants at Ellis Island, where 6,186 patients were admitted for treatment.

## Service publications.

During the year 246,060 copies of the various publications edited in the bureau were distributed. These include the annual report, the weekly Public Health Reports, the bulletins of the Hygienic Laboratory, and various special bulletins relating to the public health. A new edition of the bulletin entitled "Milk and Its Relation to the Public Health" has been published.

> Marine hospitals and relief.

In the 21 marine hospitals owned by the Government, and at the 126 other stations, where seamen of the merchant marine receive hos-
pital ànd dispensary treatment, there were treated during the fiscal year 53,074 patients, of which number 14,209 were treated in hospitals and 38,865 at the dispensaries. The new marine hospital at Buffalo, N. Y., has been completed and is occupied. At the sanatorium for consumptives at Fort Stanton, N. Mex., 399 patients were cared for during the year.

Physical examinations, exclusive of immigrants, were made of 4,980 persons connected with the Revenue-Cutter, Life-Saving, Steamboat-Inspection, Immigration, and Light-House services, the Coast and Geodetic Survey, Civil Service Commission, Isthmian Canal Commission, and Philippine Service.

## Expenditures.

The appropriation for the ordinary maintenance of the service was $\$ 1,299,750$, of which sum $\$ 200,000$ was payable from the appropriation for expenses of regulating immigration. The receipts from all sources, repayments for care of foreign seamen, etc., were $\$ 17,712.59$. The expenditures were $\$ 1,176,549.03$; estimated outstanding liabilities, $\$ 10,487.84$, leaving an estimated balance of $\$ 130,425.72$.

The amount available of the appropriation for preventing the introduction and spread of epidemic disease at the beginning of the fiscal year was $\$ 711,007.58$. An appropriation amounting to $\$ 750,000$ was made in addition to the available balance reappropriated. The expenditures were $\$ 482,993.71$, leaving a balance June 30, 1909, of $\$ 978,013.87$.

The appropriations for the maintenance of the quarantine service were $\$ 420,000$. The amount of repayments was $\$ 935.46$. The expenditures were $\$ 399,784.03$, which, deducting outstanding liabilities, leaves an estimated balance of $\$ 18,313.66$.

The amount available of the appropriation for national quarantine and sanitation at the beginning of the fiscal year was $\$ 368,666.68$; the repayments were $\$ 92$; the expenditures were $\$ 43,014.60$; the balance on hand June 30, 1909, was $\$ 325,744.08$.

The amount available of the appropriation for the maintenance of the leprosy hospital, Hawaii, at the beginning of the fiscal year was $\$ 28,258.53$. An appropriation amounting to $\$ 20,000$ was made in addition to the available balance reappropriated. The expenditures were $\$ 24,442.67$, which, deducting outstanding liabilities, leaves an estimated balance of $\$ 11,815.86$.

## LIFE-SAVING SERVICE.

During the last fiscal year, 1,376 vessels suffered disaster, more or less serious, within the field of the operations of the life-saving establishment. These vessels carried a total of 8,900 persons, including
passengers and crews, of which number only 30 , or thirty-four onehundredths of 1 per cent, were lost. The estimated value of the vessels was $\$ 13,143,610$, and of their cargoes $\$ 2,962,470$, making the total value of imperiled property $\$ 16,106,080$. The totally lost vessels numbered 72. The following is a tabular presentation of the important statistics relating to these casualties, the data being apportioned between documented and undocumented craft, which latter class includes vessels of less than 5 tons burden, such as small sailboats, launches, rowboats, etc.:

The disasters that occurred during the year exceeded in number the record of any former year in the history of the service, the increase over the next preceding year being more than 25 per cent, and over that of two years ago 64 per cent, or nearly two-thirds.

With regard to the amount of property imperiled, the year's record also exceeds that of any former year, but the difference- $\$ 2,575,855-$ between the property values given for the last two years represents an increase of only 19 per cent for 1909 over 1908, while the increase was 53 per cent for 1908 over 1907, the difference being $\$ 4,697,640$.

The excess in the number of disasters chronicled during 1908 over the corresponding figures for 1907 was explained in the last annual report as chiefly due to the extension of the field of life-saving operations resulting from the introduction of power lifeboats in the service and to the growing popularity of gasoline motor boats for purposes of business and pleasure. The rapid development of the same causes accounts for the notable increase in the number of casualties which occurred in the year last past.

Another interesting fact pertaining to this matter is the large preponderance of undocumented vessels over documented, there being nearly twice as many of the former as of the latter to meet disaster. Prior to 1901 the disasters to documented vessels each year exceeded those to undocumented. The preponderance of motor boats in the list of 917 undocumented vessels included in the tabular statement is likewise significant, the number being 470 , or approximately 50 per cent of the class to which they belong. It may also be stated that of the 22 lives lost from undocumented
vessels, as shown in the table, 10 were lost from gasoline boats, exceeding by 2 the entire number lost from documented craft.

In this connection, it is worthy of note that during the last decade the rescue and salvage work of the service has practically doubled.

Of the 1,376 vessels mentioned in the table, 1,062 , valued with their cargoes at $\$ 2,995,760$, were assisted by the crews of the service alone; 257 vessels, valued with their cargoes at $\$ 10,321,055$, were aided by the station crews in conjunction with revenue cutters, wrecking vessels, tugs, etc.; 16 vessels, valued with their cargoes at $\$ 1,853,150$, were assisted solely by private agencies; and 41 vessels, valued with their cargoes at $\$ 936,115$, were able to care for themselves without assistance.

Assistance of more or less importance was also afforded to 171 documented and 343 undocumented vessels not included in the table, making in all 1,833 vessels that received aid from the life-saving establishment.
The service crews gave warnings to 310 vessels and 161 sailing craft standing into danger near the shore. In 246 instances these signals were made at night and in 26 during the day. Of the vessels so warned, 149 were steamers.

The crews also rendered much humanitarian service during the year that had no relation to their duties in connection with casualties to vessels. Such service included the rescue of 109 persons from drowning and various other situations of peril, the giving of medical and surgical attention to 57 sick and injured persons, and the succoring of 235 persons for periods amounting to two hundred and fortynine days. In addition, they performed effective service at 65 fires, involving both government and private structures, and recovered and restored private property of considerable value in the aggregate.

The net expenditures for the maintenance of the service during the year were $\$ 2,215,035.52$.

At the close of the year the establishment comprised 281 stations, distributed upon the sea and lake coasts as follows: On the Atlantic and Gulf coasts, 201; on the coasts of the Great Lakes, 61; on the Pacific coast, 19.

Only one additional station was put in commission during the year, namely, that authorized by law to be established at Waaddah Island, Neah Bay, Wash. The station authorized to be located at Lorain, Ohio, at the mouth of Black River, is advancing toward completion. Contract has been entered into for the construction of a station at the Isles of Shoals, off Portsmouth, N. H.; and plans and specifications for stations at Green Hill, R. I., and Eagle Harbor, Mich., are nearly completed.

The influence of the introduction of power in the lifeboats and surfboats of the service, in greatly extending its scope and enhancing
its efficiency, has been referred to. So indispensable have these powerboats become that they are being supplied as rapidly as possible to all stations at which they can be advantageously used. Especial care has been taken to have them of the very best obtainable material, construction, and equipment. Official reports show that in the performance of wreck duty in the worst of weather they have repeatedly accomplished hazardous enterprises, taking the crews far beyond the former limits of their field of work. In no instance has it been shown that they have failed to withstand the severest test. Thirty-two of them were added to the station equipment during the year, and others are now building.
Under the provisions of the act of Congress approved December 11, 1908, authorizing the Secretary of the Treasury "in his discretion to transfer from time to time from the Treasury Department library to the life-saving stations of the United States such books as, in his judgment, may be no longer needed for use in said library," a total of 4,388 volumes were distributed to the various stations of the serv: ice, giving to each station an average of 16 books. The collection included 1,166 volumes of fiction, 737 of history, 673 of biography, 489 of description and travel, 229 of scientific character, 19 of fine-art reproductions, and 1,075 of miscellaneous literature. The variety in classification made it possible to supply each station with a selection of reading matter sufficient to satisfy a diversity of tastes.

For several years past the Secretaries of the Treasury have called attention in their annual reports to the desirability and justice of a provision for pensioning the keepers and crews of the service disabled in the line of duty, and especially for some measure providing for the retirement of those whose usefulness hàs been more or less impaired by disease, injury, and the infirmities of age, or who have become entirely disqualified for continuance in the service from these causes. Previous to the passage of the act of March 26, 1908, it was shown that the efficiency of the service itself was seriously affected by the lack of able-bodied men, it having been found impossible to enlist suitable surfmen at the compensation then paid. The act referred to has materially improved the situation in this respect. A situation yet remains, however, which compels the injustice, not to say inhuinanity, of thrusting out upon the world men who, in devoted service to the Government, have become incapacitated for earning a living in any private vocation-men who have to their credit deeds of heroism and self-sacrifice that have honored the nation and won for this branch of our public service acknowledged preeminence.

Such a condition is not in accord with the present-day civilization as shown in the adoption of the pension idea by leading nations abroad, and as manifested in our own country by the action of the principal municipal governments and the most prominent public
service and private corporations in providing pensions and retirement for those classes of employees who engage in hazardous service. Former recommendations for remedial legislation along the line indicated are therefore earnestly renewed.

## REVENUE-CUTTER SERVICE.

The following is a synopsis of the regular work of the United States Revenue-Cutter Service during the fiscal year 1909, with the. net expenditure:

| s saved (actually rescued) from | 56 |
| :---: | :---: |
| Persons on board vessels assisted | 5, 050 |
| Persons in distress taken on board and cared for | 454 |
| Vessels assisted | 156 |
| Vessels boarded and papers examined | 14, 826 |
| Vessels seized or reported for violation of law | 330 |
| Fines and penalties incurred by vessels reported | \$39, 175 |
| Value of vessels assisted and their cargoes | \$13, 940, 709 |
| Derelicts and obstructions to navigation removed or destroyed_- | 26 |
| Net expenditure: |  |
| Appropriation for maintenance of the service, including appropriation for special repairs $\qquad$ | $2,423,564.74$ |
| Estimated unexpended balance | \$5,599.06 |

The duties of the service along the coasts of the United States, embracing Alaska and Porto Rico, and on the Great Lakes, have been carried out in a faithful and an efficient manner. The fur-seal fisheries in the north Pacific Ocean and Bering Sea have, as usual, received protection by the detail of four cutters, which have actively cruised in those waters during the season when depredations are likely to occur. These vessels have performed also other important duty in connection with the public interests in Alaska. On July 22, 1908, the Japanese schooners Saikai Maru and Kinsai Maru were seized for sealing within the waters of St. Paul Island. Their officers and crews were subsequently tried at Valdez, Alaska, and convicted. The Thetis made the annual cruise into the Arctic Ocean, did much valuable work generally in northern Alaska, and rendered timely assistance to various passenger and freight steamers which were caught and imperiled in the ice packs while trying to reach Nome on the first opening of navigation. Owing to the number of vessels bound for St. Michael and Nome which now enter Bering Sea early in June, when ice conditions are often extremely hazardous, it probably will be necessary in future to have two revenue cutters in the vicinity of the ice fields at that time for the purpose of aiding shipping.

During the year there have been in active commission 26 cruising cutters, and 18 harbor vessels and launches which are charged with boarding duty and the enforcement of anchorage laws at various
designated ports. Under authority of the provisions of law, 12 officers have been on detached duty in connection with the Life-Saving Service, for the purpose of inspecting the life-saving stations and their equipments, drilling their crews, enforcing discipline, and superintending the construction of buildings, boats, and other appliances.

The work of assisting vessels in distress has been active and efficient. The cruising cutters have performed excellent service in this respect and have been quick to respond to the calls made upon them by merchant craft in need of succor. On the same day, December 29, 1908, two abandoned lumber-laden schooners of considerable value, which had been picked up adrift at sea, were towed into Chesapeake Bay, one by the Seneca and the other by the Onondaga, and promptly turned over to the owners. The record shows that the value of marine property assisted was greater than in any previous year since the establishment of the service. The installation of wireless telegraph, and its effective maintenance, on the seagoing vessels of the service have aided materially in relief and rescue work. This was strikingly shown when four revenue cutters started from distant parts of the coast for the sinking steamship Republic, in collision off Nantucket Shoals, immediately upon receipt of her wireless call for help. A boat from the Gresham rescued the last survivors as the ship went down.
The duties of the Revenue-Cutter Service are increasing in scope and importance, and now include the enforcement of nearly every statute bearing upon the maritime interests of the country. It performs, besides, considerable work not specifically required by law. In the past year it has rendered assistance, in one way or another, to about every department under the Government. The military requirements of the service, both as to drills and discipline, have been fully complied with and efficiently maintained.

## Vessels.

It is recommended that the Woodbury, Forward, Perry, and Rush be replaced, as soon as practicable, by modern, able, well-equipped vessels. The cutters named are obsolete, have been under constant repairs for many years, and are not suitable, either as to hulls or machinery, for the work they are intended to perform. The Rush, which was the last of these vessels built, has done service on the Pacific coast and the waters of Alaska for 24 years, while the Woodbury is 45 years old. There is required also a stanch, seagoing cutter for the Gulf coast, to aid distressed craft in those waters. A suitable boarding vessel, to cost not more than $\$ 80,000$, should be provided for the port of Chicago. On account of the great shipping and commercial interests in that locality such a vessel is needed not
only for the increasing requirements of the port named, but for duty on the south and east shores of Lake Michigan. The recommendation is renewed that the steamer Manhattan, which is detailed to enforce the anchorage laws of the port of New York, be replaced by a modern vessel.

> Control of regattas--Seal islands.

Special attention is invited to the service rendered by revenue cutters, first, in enforcing under the present law regulations to promote the safety of life during regattas and marine parades, and, second, in patrolling the North Pacific Ocean and Bering Sea, for the protection of the fur seals. Revenue cutters are called upon constantly in the summer season to patrol the courses of yacht and boat races on all parts of the sea and lake coasts, at the request of the Department of Commerce and Labor. The rigorous patrol by vessels of the service maintained in northern waters for a considerable period of each year, the greater part of which work is in the vicinity of the Pribilof Islands, is carried out also at the request of that department. The execution of both of these services is necessarily under the immediate direction of the Secretary of the Treasury, who issues the instructions for the proper conduct of the patrols named. Formerly all this work was under the Treasury Department exclusively. The present system, whereby another department exercises certain jurisdiction, while this department attends to and carries out all the essential and important details, is cumbrous and unsatisfactory. It is believed that it would be in the interest of the Government and the public to place the authority for the control of regattas and marine parades and the administration of the seal islands entirely with the RevenueCutter Service. Relative to the latter, it would seem, from the very nature of the case, that better results would be obtained for the protection of seal life and the government and care of the natives on the islands.

Removing dangers to navigation.
The Seneca, authorized by Congress to destroy or remove derelicts and other obstructions to navigation and the only vessel of her kind in the world, was placed in active service in November, 1908, with headquarters at Tompkinsville, N. Y. She was assigned a district on the North Atlantic Ocean bounded by a line from Portland, Me., to Sable Island, Nova Scotia; thence to the Bermuda Islands, and thence to Charleston, S. C. The meritorious work of this vessel off the east coast of the United States in keeping the ocean highways clear of dangerous obstructions to shipping has exceeded expectations, and she has proved herself a valuable auxiliary to commerce. In this connection, it may be stated that all revenue cutters of the first class on the Atlantic seaboard are provided with explosives suitable for the
work of removing sunken wrecks and other marine obstructions as occasion may require.

## Transfer of Fort Trumbull.

The transfer to this department is again recommended of the Fort Trumbull reservation in Connecticut, which the War Department is willing to relinquish with certain limitations, that it may be used by the school for the instruction and training of cadets which is now located at Arundel Cove, Md. The reasons for this transfer were clearly set forth in the last annual report.

## DIVISION OF LOANS AND CURRENCY.

The changes in the amount of the interest-bearing debt during the fiscal year ended June 30, 1909, are shown in the following statement:
Amount outstanding June 30, 1908
\$897, 503, 990
Panama Canal bonds issued, Series 1908 30, 000, 000

|  | 927, 503, 990 |
| :---: | :---: |
| Less 3 per cent certificates of indebtedness, redeemed_ | 14, 186, 500 |
| Outstanding June 30, 1909 | 913, 317, 490 |

The changes in the amounts of the several kinds of money in the United States, outside the Treasury, between November 1, 1908, and November 1, 1909, are shown in the table following:

Comparative Statement Showing the Changes in Circulation.

| Classes. | In circulation Nov. 1, 1908. | In circulation Nov. 1, 1909. | Decrease. | Increase. |
| :---: | :---: | :---: | :---: | :---: |
| Gold coin | \$610, 060,562 | \$598, 773,175 | \$11, 287,387 |  |
| Standard silver dollars | 74, 740,245 | $74,383,857$ | 356, 388 |  |
| Subsidiary silver. | 131, 663,701 | 142, 324, 038 |  | \$10, 660, 337 |
| Gold certificates | 807, 246,389 | 795, 205, 489 | 12,040, 900 |  |
| Silver certificates | 483, 899, 842 | 481, 794, 889 | 2, 104, 953 |  |
| Treasury notes, act of July 14, 1890 | 4,691,225 | 4, 021,535 | 669,690 |  |
| United States notes.............. | 342, 994, 056 | 342, 179, 962 | 814, 094 |  |
| National-bank notes | 643, 202, 001 | 685, 996, 112 |  | 42, 794, 111 |
| Total. | 3,098, 498,021 | 3, 124, 679, 057 | 27, 273, 412 | 53, 454, 448 |
| Net increase |  |  | . . . . . . . . . . | 26,181, 036 |

## DIVISION OF PUBLIC MONEYS.

The monetary operations of the Government have been conducted through the Treasurer of the United States, nine subtreasury officers, the treasury of the Philippine Islands, the American Colonial Bank of Porto Rico, the Banco de la Habana, the National Bạnk of Cuba. and 1,457 national-bank depositaries.

The amount of public moneys held by the bank depositaries on June 30, 1909, including funds to the credit of the Treasurer's general account and United States disbursing officers, was $\$ 71,662,801.28$, a decrease since June 30, 1908, of $\$ 88,694,198.42$. On June 30, 1909, there were 439 regular and 975 temporary depositaries; 23 were designated during the fiscal year and 43 discontinued. On Novem-
ber 1,1909 , the number of depositaries was 1,388 and the amount of public moneys held by them was $\$ 49,497,653.76$.

DIVISION OF BOOKKEEPING AND WARRANTS.

## State bonds and stocks owned by the United States.

The following statement shows the nonpaying state bonds and stocks, formerly in the Indian trust fund, now in the Treasury, belonging to the United States:

| Louisiana | \$37, 000.00 |
| :---: | :---: |
| North Carolina | 58, 000.00 |
| Tennessee | 335, 666. 663 |
| Total_ | 430, 666.663 |

A history of these state stocks and bonds is given in House Document No. 263, Fifty-fourth Congress, second session.

## Territory of Hawaii.

The debt of Hawaii, assumed by the terms of the joint resolution of July 7,1898 , consisted of $\$ 3,235,400$ in interest-bearing bonds and $\$ 764,570.31$ in postal savings deposits. This indebtedness has been fully paid by the United States, except $\$ 2,357.05$ in postal savings certificates not yet presented for payment.

The appropriation of $\$ 1,000,000$ provided by the Congress for the liquidation in part of awards made for property destroyed in suppressing the bubonic plague in the Territory in 1899 and 1900 has been practically expended. The First National Bank at Honolulu reports that 26 awards, amounting to $\$ 1,730.51$, are now outstanding.

## SECRET-SERVICE DIVISION.

The secret-service division reports continued and somewhat extraordinary activity among counterfeiters in the larger industrial and commercial districts. There were 19 new issues of counterfeit notes during the year, several of which were in the dangerous class. There was effective cooperation between municipal authorities and agents of the Treasury Department wherever the counterfeiters seemed most active, and the principals with many of their associates in the most important conspiracies were arrested and either have been convicted or are awaiting trial. Several organizations were discovered whose supplies were imported from certain districts in Italy where the notes were manufactured, and in these cases the prisoners were found to be closely' affiliated with what is usually known as the "Mafia" and "Black Hand" societies. The activity and loyalty of the members of the field force of the division and its efficiency seem to have been maintained at their normally high level. The arrests numbered 400 against 345 the previous year, and the counterfeit coins and notes confiscated represented $\$ 67,091.42$ in value.

## DIVISION OF PRINTING AND STATIONERY.

## Printing and binding.

The expenditure for printing and binding for the entire Treasury service during the year amounted to $\$ 368,217.95$, as follows:
Bureaus, offices, and divisions of the department :
Chief Clerk
\$6, 528. 12

Office of the Auditor for the--

Surgeon-General Public Health and Marine-Hospital Service_-- 25, 537. 88

$248,667.97$
Treasury service outside of Washington:

Life-Saving Service. 1,530. 77
Public Health and Marine-Hospital Service_------- 2, 456. 72
Revenue-Cutter Service. 3,707. 69

Superintendents of construction of public buildings_ $\quad \mathbf{2 4 5} .10$

$119,549.98$
Total
2368,217. 95
The total expenditure for printing and binding for the fiscal year 1908 was $\$ 346,900.61$. A comparison of the expenditures for 1909 as above shown discloses an increase of $\$ 21,317.34$ for 1909. The

[^1]increase is due to a change in the cost rate of the Government Printing Office and the natural growth of business.

## Stationery.

The cost of the stationery supplied to the officers of the whole Treasury service during the year 1909 amounted to $\$ 114,273.52$, while that for the previous year amounted to $\$ 108,809.28$, showing an increase in expenditure in 1909 of $\$ 5,464.24$.

Amount appropriated for stationery for the department proper for the fiscal year 1909 was $\$ 45,000$.

The expenditures on account of this appropriation were divided between the bureaus, offices, and divisions of the department as follows:

Office of the Secretary :

Division of Bookkeeping and Warrants _--..------_- 869.25

Division of Revenue-Cutter Service_-_---_--------- 321.68

Division of Secret Service _----------------------- 145.51

Transportation Rate Board_-------------------------143.05

Office of Auditor for War Department_........................ 1, 697.99

Office of Auditor for State and other Departments_----- 423.38
Office of Auditor for Post-Office Department_-_--------- 4, 865. 33
Office of Treasurer of the United States_-.-.-.-.-.-.-.-.-. 7, 978.90

Office of Commissioner of Internal Revenue_--.-.------- 6, 028.34
Office of Director of Bureau of Engraving and Printing-- 319.89

Office of Surgeon-General Public Health and Marine-
Hospital Service
701. 78

Office of General Superintendent Life-Saving Service _-_- $\quad 280.85$

[^2]The amount expended during the fiscal year 1908 (department proper) was $\$ 46,663.63$; the expenditure for 1909 was $\$ 43,721.07$, a decrease for the latter year of $\$ 2,942.56$.
The amount expended for stationery furnished to the different branches of the outside Treasury service during the fiscal year 1909 amounted to $\$ 70,552.45$, distributed as follows:

Secret Service
146. 61

Engraving and Printing
2, 971. 20
Supervising Architect
49.50

National-Bank Redemption Agency.-.-------------------------------3, 332.86

Superintendents of construction of public buildings..................- $2,023.81$

Attention is called again to the objectionable method of appropriating money for the purchase of stationery for this department and to the embarrassment occasioned thereby.
The present practice, which has existed for many years, is to appropriate a certain amount ( $\$ 40,000$ being the amount for the present fiscal year) for the purchase of stationery for the department proper and its several bureaus, offices, and divisions in Washington; but in order to secure the benefits of the favorable department contract prices, the several outside Treasury services are supplied from this appropriation by means of a repay method by which sixteen different appropriations reimburse the stationery appropriation, to the amount (this year) of $\$ 70,552.45$. This method. is cumbersome, dilatory, and expensive, and serves no good purpose. Under its operation contractors' bills for supplies furnished can not be paid as promptly as they ought to be, on account of the delay experienced in obtaining repay credits. Repay accounts are not approved by the auditor in the absence of the receipts of consignees for supplies furnished them, and these receipts, in many instances, are not received for weeks after shipment; consequently the fund from which bills are paid is but slowly replenished.
If a lump sum were appropriated for the whole service, as is done in the case of the printing and binding, the public business would be
simplified and improved, and the recommendation of last year for legislation to that end is renewed.

The total amount required would be, in round numbers, $\$ 115,000$, about $\$ 70,000$ of which would be for the outside reimbursing services, as given in detail in the foregoing table.

The magnitude of the correspondence conducted by this department is illustrated by the number of envelopes used by the 1,800 chief officers of the Treasury service, $12,900,000$ having been issued during the year.

## LOAN OF JULY AND AUGUST, 1861.

The act of July 17, 1861 (12 Statutes, 259), authorized the issue of $\$ 250,000,000$ bonds, with interest at not exceeding 7 per centum per annum, redeemable after twenty years. The act of August 5,1861 $(12$ Statutes, 316 ), authorized the issue of bonds, with interest at 6 per centum per annum, payable after twenty years from date, in exchange for 7-30 notes issued under the act of July 17, 1861.

## LOAN OF JULY AND AUGUST, 1861.

Continued at $3 \frac{1}{9}$ per cent interest, and redeemable at the pleasure of the Government.
OLD DEMAND NOTES.

Acts of July 17, 1861 (12 Statutes, 259); August 5, 1861 (12 Statutes, 313); February 12, 1862 (12 Statutes, 338 )

## SEVEN-THIRTIES OF 1861

Act of July 17, 1861 ( 12 Statutes, 259)

$$
\text { FIVE-TWENTIES OF } 1862 .
$$

Acts of February 25, 1862 (12 Statutes, 345); March 3, 1864 (13 Statutes, 13), and January 28, 1865 (13 Statutes, 425).
LEGAL-TENDER NOTES.

The act of February 25,1862 (12 Statutes, 345 ), authorized the issue of $\$ 150,000,000$ United States notes, not bearing interest, payable to bearer at the Treasury of the United States, and of such denomimight deem expedient $\$ 50,000,000$ to be applied to the redemption of demand notes authorized by the act of July 17, 1861; these notes to be a legal tender in payment of all debts, public and private, within the United States, except dutjes on imports and interest on the public debt, and to be exchanseable for 6 per cent united States bonds. The act of July 11, 1862 (12 Statutes, 532), authorized an additional issue of $\$ 150,000,000$, of such denominations as the Secretary of the Treasury might deem expedient, but no such note should be for a fractional part of a dollar, and not more than be a legal tender as before authorized $T$ e act of Mesch 3,1863 (12 Statutes 710), authorized an additional issue of $\$ 150,000,000$ of such denominations, not less than one dollar, as the Secretary of the Treasury might prescribe; which notes were made a legal tender as before authorized. The same act limited the time in which the ASER

Treasury notes might be exchanged for United States bonds to July 1863. The amount of notes authorized by this act were to be in (12 Statutes, 822). The act of May 31, 1878 (20 Statutes, 87 ) provides that no more of the United States legal-tender notes shall be canceled or retired, and that when any of said notes are redeemed or received into the Treasury under any law, from any source whatever, and shall belong to the United States, they shall notbe retired, canceled, or destroyed, but shall be reissued and paid out again, and
The act of March 14, 1900, provides that United States notes, when presented to the Treasury for redemption, shall be redeemed in gold the prompt and certain redemption of such notes it shall be the duty of the Secretary of the Treasury to set apart in the Treasury a eserve fund of one hundred and fifty million dollars in gold coin and bullion, to be used for such redemption purposes only, and that whenever and as often as any of said notes shall be redeemed from said fund it shall be the duty of the secretary of the Treasury to use said notes so redeemed to restore and maintain the reserve fund so established-first, by exchanging the notes so redeemed for any gold coin in the general fund of the Treasury; second, by accepting deposits of gold coin at the Treasury or at any subtreasury in exchange for such notes; third, by procuring gold coin by the use of said notes in accordance with the provisions of section 3700 of the Revised Statutes of the prides that if the Secretary of the Treasury is unable to restore and maintain the gold coin in the reserve fund by the foreoing methods, and the amount of such gold coin and bullion in said fund shall at any time fall below one hundred million dollars, it shall be his duty to restore the same to the maximum sum of one hundred and fifty million dollars by borrowing money on the credit of the United States, and for the debt so incurred to issue and sell coupon or registered bonds of the United States bearing interest at quarterly, the bonds to be payable at the pleasure of the United quarterly, the bonds to be payable at the pleasure of the United principal and interest, in gold coin of the present standard yalue the gold coin received from the sale of said bonds to be exchanged al amount the notes redeemed and held for exchange and the Secretary of the Treasury may, in his discretion, use said notes in exchange for gold, or to purchase or redeem any bonds of the United States, or for any other lawful purpose the public interests may require, except that they shall not be used to meet defi ciencies in the current revenues.
The act of March 4, 1907, section 2, provides that whenever and so long as the outstanding silver certificates of the demominations of long as the outstanding silver certificates of the denominations of of section seven of an act entitled "An act to define and fix the tandard of value, to maintain the parity of all forms of money ssued or coined by the United States, to refund the public debt, and for other purposes," approved March fourteenth, nineteen hundred,

Note 1.-Annual interest charge computed on amount of outstanding principal at close of fiscal year and is exclusive of interest charge on Pacific Railway bonds Note 2.-The figures for July 1,1879 , were made up assuming pending funding operations to have been completed
311865 this being the date at which the public debt reached its highest point. This loan bore interest from 4 per cent to 6 per cent and was redeemable on ten $d$ us 3otice after thirty days, but being constantly changing it has been considered more equitable to include the whole amount outstanding as bearing 4 per cent interest on an average for the year.

Table D.-Statement of the Issue and Redemption of Loans and Treasory Notes and of Deposits and Redemptions in National-Banis Note Account (by warrants) for the Fiscal Year ended June 30, 1909.

a Based on warrants issued.
$b$ The cost of collecting the internal revenue embraces the following items: Salaries and expenses of collectors, including pay of deputy collectors, clerks, etc., and including expenses incident to enforcing the provisions of law taxing oleomargarine; salaries and expenses of revenue agents, surveyors of distilleries, gaugers, storekeepers, and miscellaneous expenses; paper for internal-revenue stamps; and expenses of detecting and punishing violations of internal-revenue laws.
cThe expenses of collecting the revenue from customs includes all sums drawn from the appropriation made by Congress for that purpose. The money is expended for salaries, rents, labor in weighing, gauging, and measuring imported merchandise, revenue boatmen, repairs, and other expenses incident to rented buildings, stationery, and the traveling expenses of special agents, but does not include disbursements for revenue cutters, fuel, lights, water, furniture, janitors, etc., for buildings owned by the Government, nor disbursements for erecting new buildings, all of which arc paid for from specific appropriations made for those purposes.

The expenses of collecting internal and customs revenue do not include the disbursements for salaries, etc., incident to auditing these accounts in the departments at Washington.
d No data.

Table I.-Statement showing the Ordinary Receipts and Disbursements of the Government by Months; the Legal-Tender Noths, Net Gold, and Available Cash in tee Treasury at the end of each Month; the Montely Redemption of Legal-Tender Notes in Gold and tee Imports and. Exports of Gold, from July, 1896, to June, 1909 , inclusive.

## a Excess of disbursements.

Notm.-The above figures are exclusive of disbursements for the Panama Canal, the first payments for which occurred in the fiscal year 1903 .
Note.-The receipts and disbursements by months are made up from partial reports, and being subject to change by subsequent concentration of accounts, do not agree with the totals by years. The latter are the actual results, as shown by complete returus.

Table J.-Statement of Receipts of tee United States from March 4, 1789, June 30) from that time. For Postal

Note 1.-Specie payments were suspended'from January 1, 1862, to January 1, 1879. During the greater part of that period gold und silver coins were not in circulation except on the Pacific coast, where, it is estimated, the specie circulation was generally about $\$ 25,000,000$. This estimated amount is the only coin included in the above statement from 1862 to 1875 , inclusive.
Note 2.-In 1876 subsidiary silver again came into use, and is included in this statement, beginning with that year.
Note 3.-The coinage of standard silver dollars began in 1878, under the act of February 28, 1878.
Note 4.-Specie payments were resumed January 1,1879 , and all gold and silver coins, as well as gold and silver bullion in the Treasury, are included in this statement from and after that date.
Note 5.-For redemption of outstanding certificates an exact equivalent in amount of the appropriate tinds of money is held in the Treasury, and is not included in the account of money held as assets of the Government.
Note 6. This table represents the circulation of the United States as shown by the revised statements of the Treasury Department for June 30 of each of the years specified.
Note 7.-The Directnr of the Mint recently made a revised estimate of the stock of gold coin. and, as a consequence of such revision, the estimated stock of gold in the United States and of gold coin in circulation has been reduced $\$ 135,000,000$ in the figures for 1907.
NOTE 8. - The details of the foregoing table, showing the amount of each kind of money in circulation each year since 1860, are omitted; but they may be had upon application to the Secretary of the Treasury, Division of Loans and Currency, where a circular covering information on the subject has been prepared for distribution.

Table N.-Statement of United States Bonds and other Obligations Received and Issued by tee Office of the Seceetary of tef Treasury from November 1, 1908, то Остовег 31, 1909.

## APPENDIX TO THE REPORT ON THE FINANCES.

## APPENDIX.

## REPORTS OF HEADS OF BUREAUS.

## REPORT OF THE TREASURER.

Treasury of the United States, Washington, October 27, 1909.

SIr: The transactions of the Treasury of the United States for the fiscal year ended June 30, 1909, and its condition on that and subsequent dates, are presented in the annexed tables.

ORDINARY REVENUES AND EXPENDITURES FOR 1908 AND 1909.
The federal activities in response to a popular demand during the past two years have increased the expenditures without adequate provisión having been made for a corresponding income.
For the fiscal year 1909 the ordinary revenues by warrants, and adjuștments for moneys received but not covered by warrants in the year, were $\$ 603,589,489.84$, an increase of $\$ 2,528,766.57$ over those of 1908, while the ordinary expenditures were $\$ 662,324,444.77$, an increase of $\$ 41,222,054.13$ as compared with 1908 ; the net result was a deficit of $\$ 58,734,954.93$.

The ordinary revenues and expenditures classified for the past two years are compared in the table following:

Ordinary Revenues and Expenditures for Fiscal Years 1908 and 1909.

REVENUES AND EXPENDITURES, FIRST QUARTERS OF 1909 AND 1910.
For the first quarter of the fiscal years 1909 and 1910 the preliminary figures set forth the following comparison:

-THE PANAMA CANAL.
The purchase and construction of the Panama Canal is to be paid from the proceeds of United States bonds issued and sold specially for the purpose.

The proceeds of sales of bonds and the disbursements on account of the canal to the close of the fiscal year 1909 are set forth, by years, in the statement following:

Receipts and Disbursements on Account of the Panama Canal.

| Fiscal year. |  | Proceeds of United States bonds sold. | Disbursements for Panama Canal. | Excess of- |  |
| :---: | :---: | :---: | :---: | :---: | :---: |

| 1909. |  | $\begin{aligned} & 56,578,586.62 \\ & 30,731,008.21 \end{aligned}$ | $\begin{array}{r} 138,765,226.29 \\ 31,419,442.41 \end{array}$ | 4,012,199. 24 | $\begin{array}{r} 86,198,838.91 \\ 688,434.20 \end{array}$ |
|  |  | 87,309, 594.83 | 170, 184, 668.70 | 4, 012, 199. 24 | $\begin{aligned} & 86,887,273.11 \\ & 82,875,073.87 \end{aligned}$ |

## RECEIPTS AND DISBURSEMENTS ON ACCOUNT OF THE POST-OFFICE DEPARTMENT.

The receipts and expenditures on account of the Post-Office Department are under the exclusive control of the PostmasterGeneral. A statement of transactions relative thereto at the Treasury offices during the past year will be found on page 172 of this report.

The disbursements for purchase and construction of the canal to the close of the last fiscal year were $\$ 82,875,073.87$ in excess of the receipts from proceeds of bonds sold. This amount having been advanced from the general fund of the Treasury is reimbursable from proceeds of bonds when sold.

## TRANSACTIONS IN THE PUBLIC DEBT.

The receipts on account of the public debt during the last fiscal year were $\$ 840,865,247.71$, and the disbursements $\$ 827,391,770$. In studying the details of public debt transactions it will be observed that the greater part of the receipts and disbursements relate to the issue and redemption of the United States paper currency. For the fiscal years 1908 and 1909, comparison, by items, is made in the annexed table:

Receipts and Disbursements on Account of the Public Debt for 1908 and 1909.

| Account. | 1908. | 1909. | Increase. | Decrease. |

|  | $39,535,156.50$ | 89, 562, 083.00 | 50, 026, 926.50 |  |
| Notes and certificates redeemed: <br> United States notes. $\qquad$ <br> Treasury notes. $\qquad$ <br> Gold certificates. $\qquad$ <br> Silver certificates. $\qquad$ <br> Total $\qquad$ <br> Aggregate. | 73,891, 906. 50 | 104, 996, 770.00 | 62, 964, 273. 50 | 31,859, 410.00 |
|  | 123, 610, 000.00 | 132,940, 000. 00 | 9,330,000.00 |  |
|  | 1,006, 000. 00 | 767,000.00 |  | 239,000.00 |
|  | $236,821,000.00$ | 261, 892, 000.00 | 25,071,000.00 |  |
|  | 303, 783, 000.00 | 326, 796,000.00 | $23,013,000.00$ |  |
|  | $665,220,000.00$ | 722,395, 000.00 | 57, 414,000.00 | 239,000.00 |
|  | 739, 111, 906. 50 | 827, 391, 770.00 | 120, 378, 273.50 | $32,098,410.00$ |
| Excess of receipts. . . . . . . . . . . . . . . | 170, 351, 498. 67 | 13, 473, 477. 71 |  |  |

The certificates issued are offset by an equal amount of the respective coins held in the trust funds for their redemption; the United States notes issued are offset by an equal amount of worn notes in kind retired; hence, omitting the issues 'and redemptions of notes and certificates and the Panama Canal loan from the foregoing state-
ment for 1909 it appears that the actual cash receipts and disbursements on account of the debt proper were:

Excess of disbursements over receipts.......................... 59, 372, 530. 50
The receipts from sale of Panama Canal loan are taken up in the account of receipts and disbursements for the Panama Canal (see p. 134).

PUBLIC DEBT, 1908 AND 1909, AND FIRST QUARTER OF 1910.
The total amount of the public clebt, including certificates and Treasury notes (trust funds, offset by an equal amount of cash in the Treasury), June 30, 1908, was $\$ 2,626,806,271.54$, and at the close of the fiscal year 1909, $\$ 2,639,546,241.04$, an apparent increase of $\$ 12,739,969.50$. The items increased were: Panama Canal loan, $\$ 30,000,000$; gold certificates, $\$ 32,818,000$; and silver certificates, $\$ 10,064,000$; while reductions were made in the following accounts: Certificates of indebtedness, $\$ 14,186,500$; matured loans, $\$ 1,246,160$; national-bank notes (redemption fund), $\$ 43,940,343.50$; fractional currency, $\$ 2,027$; and Treasury notes, $\$ 767,000$.

The public debt at the close of the first quarter of 1910 amounted to $\$ 2,648,602,845.54$, an increase of $\$ 9,056,604.50$ since June 30 , the net result of the following transactions: Debt bearing no interest decreased $\$ 2,772,395.50$, while there was an increase of $\$ 11,829,000$ in the trust funds.

Comparison of the public debt is made, by items, for the past two years and a quarter in the table following:

Public Debt, 1908 and 1909, and First Quarter of 1910.

|  | Rate. | When payable. | Outstanding June 30, 1908. | Outstanding June.30, 1909. | Outstanding September 30, 1909. |

## PURCHASE OF CERTIFICATES OF INDEBTEDNESS.

The Secretary of the Treasury on September 14, 1908, authorized the purchase of $\$ 250,000$ of the certificates of indebtedness issued under the act of June 13, 1898, at par and interest to date of purchase. The total disbursement in the transaction was $\$ 256,143.83$.

## REDEMPTION OF CERTIFICATES OF INDEBTEDNESS.

The Secretary of the Treasury on November 9, 1908, gave notice as follows:

Owners of the one-year 3 per cent certificates of indebtedness, which were issued under the act of June 13, 1898, and are lodged with the Treasurer of the United States as a basis for circulating notes of national banks, are hereby notified that the certificates will mature and cease to bear interest November 20, 1908. Any national bank desiring to maintain the circulation secured by these certificates must furnish other United States bonds to be substituted therefor not later than November 20, 1908. Any national bank desiring to retire its circulation may do so by adopting a resolution of its board of directors authorizing the redemption of the certificates and the application of so much of the proceeds thereof as may be necessary to the retirement of the circulation based thereon * * * . Owners of the 3 per cent certificates are advised that the one year's interest due November 20, 1908, will be prepaid, without rebate, upon receipt at this department of the necessary resolution providing for the redemption of the certificates.

The certificates outstanding were $\$ 13,936,500$, and the interest thereon to maturity, $\$ 418,095$.

## MATURED BONDS NOT PRESENTED FOR REDEMPTION.

Attention is again invited to the United States bonds of matured loans outstanding and the neglect of the owners in withholding the same from redemption.

The amount of such bonds and the loans may be observed in the statement following:

| Loan. | Matured. | Amount. . |
| :---: | :---: | :---: |
| Funded loan of 1891. | Sept. 2, 1891 | \$23,750 |
| Funded loan of 1891 continued at 2 per cen | Aug. 18, 1900 | 32,000 |
| Loan of 1904.. | Feb. 2, 1904 | 18,750 |
| Funded loan of 1907. | July 2, 1907 | 1,760,000 |
| Refunding certificates. | July 1,1907 | 17,630 |
| Total. |  | 1,852, 130 |

## RESERVE AND TRUST FUNDS.

The redemptions from the reserve fund during the last fiscal year were, in United States notes, $\$ 19,984,536$, and in Treasury notes, $\$ 31,405$, making a total of $\$ 20,015,536$. The redeemed notes were immediately transferred to the general fund in exchange for gold, and the reserve thereby maintained at the fixed amount.
The aggregate amount of the trust funds at the close of the fiscal year 1909 was $\$ 1,341,230,869$, a net increase of $\$ 42,115,000$ as compared with that of twelve months earlier. The gold coin increased $\$ 32,818,000$, and the standard silver dollars $\$ 9,297,000$. These funds are held for the redemption of the certificates and notes out-
standing, for which they are respectively pledged, and in which the transactions during the year were as follows:

|  | Outstanding June 30, 1908. | Fiscal year 1909. |  | Outstanding <br> June 30, 1909. |
| :---: | :---: | :---: | :---: | :---: |
|  |  | Issued. | Redeemed. |  |
| Gold certificates.. | \$819, 783, 869 | \$294, 710,000 | \$261, 892,000 | \$852, 601, 869 |
| Silver certificates. | 474, 350, 000 | 336, 860,000 | 326, 796,000 | 484, 414,000 |
| Treasury notes. | 4,982, 000 |  | 767,000 | 4,215,000 |

## AVAILABLE CASH BALANCE.

The available balance in the Treasury should, at all times be large enough to enable the Government to continue operations without embarrassment, especially at times when the influences of trade depression causes a reduction of the ordinary income below the required outgo.

The experience of the past two years, in each of which there has been a deficit, should be an admonition to conservative action in authorizing expenditures largely in excess of variable revenues.

The balance in the Treasury at the end of each month from January, 1902, is stated in Table No. 31, page 214 of the appendix; and for July 1 in each year since 1900 in the annexed statement.

Available Case Balance (including the Reserve Fund), from the Revised Statements, on the Dates named.

## GOLD IN THE TREASURY.

The gold held in the Treasury at the close of the fiscal year 1909 amounted to $\$ 1,042,704,301.02$, an increase of $\$ 37,815,618.84$ as compared with the holdings of twelve months earlier.

By October 16, 1909, the holdings attained a maximum at $\$ 1,050,284,472.58$, an increase of $\$ 7,580,171.56$ since July 1, 1909.

The total amount of gold in the Treasury on July 1 in each year from 1900, set apart for the respective uses, is here stated:

Gold in the Treasury.

| Date. | Reserve. | For certificates in circulation. | General fund (belonging to Treasury), | Total. |
| :---: | :---: | :---: | :---: | :---: |
| Juily 1, 1900 | 8150,000,000 | \$200, 733,019 | \$72, 844, 952.68 | \$423; 577, 971. 68 |
| July 1, 1901 | 150,000,000 | 247, 036,359 | 97,811, 938.42 | 494, 848, 297.42 |
| July 1, 1902 | 150, 000, 000 | 306, 399, 009 | 103, 801, 290. 97 | $560,200,299.97$ |
| July 1, 1903 | 150,000,000 | 377, 258, 559 | 104, 162, 230. 43 | 631, 420,789.43 |
| July 1, 1904. | 150,000,000 | 465,655,099 | 66, 183, 722.60 | 681, 838, 821.60 |

## BONDS HELD AS SECURITY FOR NATIONAL BANKS.

The United States bonds held in trust to secure the circulating notes of national banks amounted to $\$ 660,753,070$ at the close of the fiscal year 1909, an increase of $\$ 32,580,940$ as compared with that of 1908.

The withdrawal of public deposits from depositary banks necessarily released a large amount of the obligations held to secure the public moneys therein. The bonds and securities held to secure public deposits in national banks amounted to $\$ 81,244,071.10$ at the close of the fiscal year 1909 as against $\$ 180,509,419.25$ on June 30, 1908.

The transactions relative to deposits and withdrawals of bonds during the fiscal year 1909 are recorded in the table following:

Bonds held for national banks, close of June, 1908 and 1909, and September 90,1909, and changes during 1909.

## WITHDRAWAL OF BONDS TO SECURE CIRCULATION.

The national banks have utilized but little more than one-fourth of their option in depositing lawful money in the Treasury during the last fiscal year for the retirement of national-bank circulation. The act of March 4, 1907, limited such deposits to $\$ 9,000,000$ per month, and until this limit has been reached it must be admitted there is no restriction on retirements.

During the last fiscal year the largest monthly deposit was $\$ 15,252,850$, of which $\$ 13,316,500$ was proceeds of called bonds. The total deposits were $\$ 30,780,495$.

The monthly deposits are recorded in Table No. 64, page 246, of this report.

NATIONAL BANKS DESIGNATED AS DEPOSITARIES OF THE UNITED states.

The Secretary of the Treasury determines the number of such depositaries, the amount of public money required in each for the transaction of the public business, fixes the amount of balances they may hold, and requires the banks thus designated to give satisfactory security, by the deposit of United States bonds and otherwise, for the safe-keeping and prompt payment of the public money deposited with them, and for the faithful performance of their duties as financial agents of the Government. The regular depositaries receive and disburse the public moneys, and are required to pay interest at the rate of 1 per cent per annum on the average monthly amount of public deposits held in excess of the sum needed for the transaction of the public business, while the special depositaries hold only the moneys transferred to them from the Treasury. They pay interest at the same rate on the average monthly amount of public deposits held.

The number of national-bank ${ }^{\circ}$ depositaries at the close of the fiscal years 1908 and 1909 is shown in the statement following:

|  | Regular. | Special. | Total. |
| :---: | :---: | :---: | :---: |

The transactions relative to public deposits in national banks from July 1, 1908, to October 31, 1908, may be seen in the annual report of the Treasurer of the United States for the fiscal year 1908.

The balance in banks to the credit of the general fund on October 31,1908 , was $\$ 120,279,145.98$. Owing to the large disbursements made from the Treasury, not equaled by the income, the Secretary of the Treasury on November 18 issued a call to 839 special depositary banks throughout the country for the return to the Treasury, by each, on or before November 30 , of $\$ 5,000$ of the public moneys deposited therein. The depositaries responded promptly to the call, and voluntarily added thereto $\$ 669,750$, making a total of $\$ 4,864,750$ returned. The balance in banks to the credit of the general fund was reduced to $\$ 113,578,810.64$ by December 3 , and decreased slowly thereafter till the close of December, when it became $\$ 110,148,907.30$. Early in January it became apparent, from the large disbursements being made, that it would be necessary to recall to the Treasury additional deposits from banks, and accordingly the Secretary of the Treasury, on January 11, issued a call to the depositary banks throughout the country for the return to the Treasury of a part of the public moneys deposited with them, payable as follows:
Payable on or before January 23, 1909.................................... \$17, 717, 700

A large number of the depositaries anticipated the payment of the amounts required, and the balance therein to the credit of the general fund gradually decreased to $\$ 88,523,857.04$ by January 31 .

The disbursements continued in excess of the receipts, and the Secretary of the Treasury, on February 4, issued a call to the depositary banks throughout the country for the return to the Treasury of $\$ 28,478,000$ of the public moneys deposited with them, payable on or before February 24. With few exceptions, the banks promptly returned the amounts required, which reduced the balance therein to $\$ 83,420,449.78$ by February 13 and to $\$ 59,696,892.90$ by the close of February.

The balances in banks to the credit of the general fund were but slightly changed during the months of March and April. On April 22,1909 , the Secretary of the Treasury deemed it advisable to temporarily increase the public deposits in depositary banks located in the District of Columbia by $\$ 3,000,000$, as an offset to the large amount of taxes collected in the District of Columbia and deposited in the Treasury during the month of May, accepting as security therefor bonds acceptable as legal investment under the savings banks laws of the States of New York, New Jersey, Massachusetts, or Connecticut, at 90 per cent of their market value, but not exceeding 90 per cent of their par value, the deposits to bear interest at the rate of 1 per cent per annum under the act of May 30, 1908. The depositaries agreed to the terms, and accordingly the amount was equitably allotted and transferred to the banks early in May. Of the amount so placed, the depositaries were required to return to the Treasury 20 per cent on or before July 15, 20 per cent on or before August 15 , and 10 per cent on or before the 15 th of each following month, making the final deposit on or before February 15, 1910. The department
reserved the right, however, to demand an earlier return of the money thus deposited if for any reason it should be deemed advisable.

The balance in banks to the credit of the general fund at the close of May was $\$ 1,388,906.98$.

The assistant treasurer of the United States at Boston in May advised the department that there was doubt as to the safety of the vault in his office, in which was stored more than $\$ 3,000,000$ in silver dollars, and asked that action be taken to remove the danger to the building. The Supervising Architect of the Treasury, upon investigation, confirmed the views of the assistant treasurer, and recommended a transfer of a part of the coin to other places of storage. Thereupon, the Secretary of the Treasury, as a measure of immediate relief to the situation, deemed it advisable to increase the public deposits in national banks in the city of Boston by $\$ 1,500,000$ in standard silver dollars, accepting as security therefor bonds that are legal investments for savings banks in the States of New York, Massachusetts, Connecticut, or New Jersey at 90 per cent of their market value, but not exceeding 90 per cent of their par value; and the deposits to bear interest at the rate of 1 per cent per annum, and to be returned in kind after due notice.

Two of the depositary banks in Boston agreed to receive the deposit, one to take $\$ 1,000,000$ and the other $\$ 500,000$ upon the foregoing terms; and the transfer to the banks was made on June 1 and 8, respectively.

At the close of the fiscal year June 30, 1909, the balance in banks to the credit of the general fund was $\$ 60,427,525.69$. The Secretary of the Treasury, on June 30, 1909, issued a call on the depositary banks for the return to the Treasury of $\$ 24,954,900$. The regular depositaries were required to pay the amount demanded of them in equal parts on July 15 and 31, and the special depositaries the whole of the amount demanded of them on or before July 15 .

The balance in banks to the credit of the general fund at the end of July was $\$ 43,555,422.59$, and this amount was further reduced by payments into the Treasury during the month of August, and by the close of that month it became $\$ 38,065,058.79$. There was but little change therein to the close of the month of October.

## UNAVAILABLE FUNDS.

The unavailable funds in the accounts of the Treasurer have not as yet been made the subject for legislation by Congress. Attention is again invited to this matter, and in relation thereto the statement of the case as submitted in the annual report of the Treasurer of the United States for the fiscal year 1908 is repeated here:

[^5]13518-FI 1909-10
ever, that this money may be lost without fault on the part of the Treasurer, by robbery, accident, defalcation of a subordinate officer, misconduct of depositaries having it in charge, or otherwise. Still, under the law, the Treasurer is responsible and is charged with these sums. Such a deficit would, in the accounts of a firm, be a simple plain entry in the profit and loss account by crediting cash and debiting the defaulter. But from the fact before stated that money can not be taken from the Treasury except by an appropriation, this course could not be pursued. An account called "unavailables" was created, which was charged with the amounts, and the Treasurer credited in his general account through the statement of an account by the accounting officers. This method of relieving the Treasurer is, your committee are informed, a practice which has grown up, and is not authorized by law, and for some years past has been prohibited by the Comptroller, and has been discontinued. It is plain that the Treasurer should be relieved from this responsibility, and that Congress should in some proper way provide by law for the dropping of these unavailable funds, by authorizing a credit to the Treasurer and a corresponding charge against the defaulting officer who fails to pay the money on demand."

It is desirable that you should recommend such measures as will provide for the dropping of these unavailable funds by authorizing a credit to the Treasurer and a corresponding charge against the defaulting officer who fails to pay the money on demand.: There is precedent for such legislation in the act of March 3, 1837. (5 Stat. L., 178.)

An itemized statement of the unavailable funds will be found in Table No. 22 on page 188 of this report.

## GENERAL STOCK OF MONEY IN TEE UNITED STATES.

To the general stock of money in the country a net addition of $\$ 27,564,334$ was made during the last fiscal year. The gold increased $\$ 23,908,507$, the silver $\$ 12,836,670$, while the treasury notes of 1890 decreased $\$ 767,000$ and the national-bank notes $\$ 8,413,843$. United States notes remained under the law unchanged.

In the first quarter of the fiscal year 1910 the metallic stock was increased by $\$ 5,536,802$, of which $\$ 4,791,502$ was in gold and $\$ 745,300$ in silver. There was an increase of $\$ 12,887,385$ in national-bank notes and a decrease of $\$ 144,000$ in treasury notes of 1890 .

Comparison may be made from the annexed tables:

## Monetary Stock.

[This statement represents the monetary stock of the United States, as shown by the revised statements for June 30, 1908 and 1909.]

| Kind. | In Treasury and mints. | In circulation. | Total stock. |
| :---: | :---: | :---: | :---: |
| June \$0, 1008. |  |  |  |

## RATIO OF GOLD TO THE TOTAL STOCK OF MONEY.

The volume of gold in the general stock of money in the country and its ratio thereto on July 1 in each year since 1900 is given in the annexed table:

## Ratio of Gold to Total Stock of Money from July 1, 1900.

[From the revised statements of the Treasury Department.]

|  | Date. | Total stock of money. | Gold. | Per cent. |
| :---: | :---: | :---: | :---: | :---: |
| July 1, 1900. |  | \$2,339,700,673 | \$1,034,384, 444 | 44.21 |
| July 1, 1901. |  | 2, 483, 147, 292 | 1,124,639,062 | 45.29 |
| July 1, 1902. |  | 2,563, 266,658 | 1,192,594,589 | 46.52 |
| July 1, 1903. |  | 2,684,710,987 | 1,248,681,528 | 46.51 |
| July 1, 1904. |  | 2,803, 504, 135 | 1,327,656,398 | 47.35 |
| July 1, 1905. |  | 2,883, 109,864 | 1,357,655,988 | 47.09 |
| July 1, 1906. |  | 3,069,976,591 | 1,475,706,765 | 48.07 |
| July 1, 1907. |  | 3,115,728,887 | 1,466,389, 101 | 47.06 |
| July 1, 1908. |  | 3,378,764, 020 | 1,618,133, 492 | 47.89 |
| July 1, 1909. |  | 3,406,328,354 | 1,642,041,999 | 48.20 |

## MONEY IN CIRCULATION.

The net addition to the money in circulation during the fiscal year 1909 was $\$ 68,225,169$. The gold coin and certificates increased $\$ 18,121,718$, national-bank notes, $\$ 33,890,126$, silver in its three forms of silver certificates, silver dollars and subsidiary coin, $\$ 16,251,495$, while there was a decrease of $\$ 38,170$ in United States notes and Treasury notes of 1890. The circulation per capita increased from $\$ 34.72$ July 1, 1908, to $\$ 34.93$ July 1, 1909. The percentage of gold coin and certificates to total circulation was $\$ 45.53$.

Comparison by kinds of money in circulation for the years since 1900 are presented in the table following:

Money in Circulation at tee End of eace Fiscal Year from 1897.

| Fiscal year. | Money in circulation. |  |  |  |  | Circulation per capita. | Percentage of gold coin and certificates to total circulation. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Gold coin and gold certificates. | United States notes and Treasury notes. | Nationalbank notes. | Silver certificates, standard dollars, and subsidiary silver. | Total. |  |  |
| 1897 | \$554, 875, 027 | \$390, 384, 139 | \$225, 544,351 | \$469, 406, 002 | \$1, 640, 209, 519 | \$22.87 | 33.82 |
| 1898 | 693, 762, 052 | 408, 440, 459 | 222, 990,988 | 512, 666,396 | 1, 837, 859,895 | 25.15 | 37.74 |
| 1899 | 712,393,969 | 421, 188, 606 | 237, 805, 439 | 532, 683, 867 | $1,904,071,881$ | 25.58 | 37.41 |
| 1900 | 811, 539, 491 | 392, 980, 487 | 300, 115, 112 | 550, 515, 908 | 2,055, 150, 998 | 26.94 | 39. 48 |
| 1901 | 876, 827, 124 | 377, 569, 944 | 345, 110, 801 | 575, 800, 093 | 2, 175, 307, 962 | 27.98 | 40.30 |
| 1902. | 938,793, 298 | 364, 094, 498 | 345, 476, 516 | 601,026,239 | 2, 249, 390, 551 | 28. 43 | 41.73 |
| 1903. | 994, 519, 298 | 353, 325, 215 | 399, 996, 709 | 619,850,947 | 2, 367, 692, 169 | 29.42 | 42.00 |
| 1904. | 1,111, 472, 675 | 346, 601, 482 | 433, 027, 836 | 627, 980, 867 | 2, 519, 142, 860 | 30.77 | 44.12 |
| 1905 | 1, 136, 274, 338 | 341, 692, 715 | 480, 028, 849 | 629, 886, 751 | 2, 587, 882, 653 | 31.08 | 43.90 |
| 1906 | 1, 185, 216, 924 | 343, 277, 540 | 548,001, 238 | 660, 150,926 | 2, 736, 646, 628 | 32.32 | 43.30 |
| 1907 | 1,161,769, 670 | 348,245,590 | 589,242, 125 | 673,699,070 | 2, 772,956, 455 | 32.22 | 41.90 |
| 1908 | 1, 396, 221,429 | 344,359, 852 | $631,648,680$ | 665, 785, 527 | 3,038, 015, 488 | 34.72 | 45.95 |
| 1909 | 1, 414, 343, 147 | 344, 321,682 | 665, 538, 806 | 682,037,022 | 3,106,240,657 | 34.93 | 45.53 |

Note.--Currency certificates, act of June 8, 1872, are included in the amount of United States notes and Treasury notes during the years when they were in use.
It will be observed that the total advance in the circulation since July 1,1902 , was $\$ 856,850,106$, or an annual average of $\$ 122,407,158$.

## CIRCULATION AND POPULATION.

The increase in circulation during the fiscal year 1909 was 0.6 per cent, while that in population was 1.6 per cent. The annexed statement presents for ten years the money in circulation, the population, the circulation per capita, the per cent of increase of population, and the per cent of increase of circulation per capita per year:

Increase in Population and in Circulation per Captra.

| Fiscal year. | Money in circulation. | Population. | Circulation per capita. | Per cent of increase of population per year. | Per cent of increase of circulation per capita per year. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1900. | 2,055,150,998 | 76,295,220 | 26.94 | 2.5 | 5.3 |
| 1901 | 2,175, 307, 962 | 77,754,000 | 27.98 | 1.9 | 3.8 |
| 1902 | 2,249, 390, 551 | 79, 117,000 | 28.43 | 1.7 | 1.5 |
| 1903 | 2,367, 692,169 | 80,487,000 | 29.42 | 1.7 | 3.5 |
| 1904. | 2,519, 142,860 | 81, 867,000 | 30.77 | 1.7 | 4.5 |
| 1905 | 2,587, 882, 653 | 83, 260,000 | 31.08 | 1.7 | 1.0 |
| 1906. | 2,736, 646, 628 | 84, 662, 000 | 32.32 | 1.7 | 3.9 |
| 1907 | 2,772, 956, 455 | 86, 074, 000 | 32.22 | 1.7 | a 0.3 |
| 1908 | 3, 038, 015, 488 | 87, 496, 000 | 34.72 | 1.6 | 7.8 |
| 1909. | 3,106,240,657 | 88,926,000 | 34.93 | 1.6 | 0.6 |

[^6]The total amount of paper money in the country at the close of the fiscal year 1909 was $\$ 2,377,981,959$, of which the Government issued directly $\$ 1,688,061,885$, or 71 per cent, and the national banks $\$ 689,920,074$, or 29 per cent.

There are two provisions of existing law which operate to keep the national-bank notes in good condition, first, that which excludes said notes from the national bank reserves accelerates the movement of the notes from the banks where they accumulate to the Treasury for redemption in lawful money of the United States; second, that which requires the national banks to bear the expense of transporting their circulating notes to the Treasury for redemption. The first provision practically forces the notes to the Treasury for redemption, the other lightens the burden to the owners of the notes by taxing the banks of issue with the expense of transportation to the Treasury. The transportation charges on the return of the proceeds are borne by the owners of the notes.

The paper issues of the Government are not favored by legislation that encourages the return of the worn and unfit notes to the Treasury for redemption; however, in subtreasury cities such notes may be exchanged for other currency, but there is no certainty of securing any desired denominations in return therefor. The demand for small denominations of currency causes the return to the Treasury of large amounts of paper issues to be exchanged for small denominations, and in such cases the owners of the government paper have to pay the transportation charges both ways. It is in the payment of these charges under contract rates which gives rise to a burden that does not bear equally upon the banks and other business interests in the different sections of the country, as for instance, the contract rates from Chicago, St. Louis, and Boston to Washington are 20 cents per $\$ 1,000$, while such rates from New Orleans, Atlanta, and Richmond to Washington are 60 cents per $\$ 1,000$.

From the foregoing it is apparent that there is a necessity for legislation that will equalize the expense of redemption between the different sections of the country, and that will require or encourage the return of all worn currency to the Treasury when received by bankers, national banks, and postmasters.

## UNITED STATES NOTES.

The United States notes issued and redeemed during the last fiscal year were $\$ 132,940,000$. There was a noticeable decrease in the $\$ 10$ notes outstanding, which, however, was offset by an increase in notes of the denominations of $\$ 5, \$ 500$, and $\$ 1,000$. The changes were necessary in order to supply the demand for small denominations, and to provide large denominations to be used by the subtreasury in the settlement of clearing-house balances at New York.

The amounts issued and redeemed, by denominations, during the fiscal year 1909 are recorded in the annexed table:

| Denomination. | $\begin{gathered} \text { Outstanding } \\ \text { June } 30, \\ 1908 . \end{gathered}$ | Fiscal year 1909. |  | $\begin{gathered} \text { Outstanding } \\ \text { June } 30, \\ 1909 . \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: |
|  |  | Issued. | Redeemed. |  |
| One dollar. | \$1,861, 343 |  | \$11,396 | \$1,849,947 |
| Two dollars | 1,408,025 |  | 12,414 | 1,395,611 |
| Five dollars. | 75,316, 465 | \$50,520,000 | 37,871, 840 | 87,964,625 |
| Ten dollars. | 203,317, 936 | 54, 440,000 | 84, 440, 590 | 173, 317, 346 |
| Twenty dollars. | 17,171, 022 | 4,320, 000 | 4,657, 100 | 16, 833, 862 |

TREASURY.NOTES OF 1890.
The Treasury notes of 1890 , under provisions of law, are disappearing. The total amount issued was $\$ 155,931,002$, and the amount outstanding at the close of the last fiscal year had been reduced to $\$ 4,215,000$, against which standard silver dollars in equal amount were held in the trust funds for their redemption when presented. The amount outstanding by denominations is stated in Table No. 33, page 217, of this report.

## GOLD CERTIFICATES.

The gold certificates are the representatives of gold coin deposited in the Treasury under provisions of law. The increase in the amount uutstanding during the last fiscal year was $\$ 32,818,000$. There has been a rapid growth in the volume of these certificates since 1900, but it threatens no peril to the stability of the currency.
The transactions in gold certificates during the fiscal year 1909 are set forth, by denominations, in the subjoined table:

| Denomination. | $\begin{aligned} & \text { Outstanding } \\ & \text { June } 30, \\ & 1908 . \end{aligned}$ | Fiscal year 1909. |  | $\begin{gathered} \text { Outstanding } \\ \text { June 30, } \\ 1909 . \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: |
|  |  | Issued. | Redeemed. |  |
| Ten dollars. | \$98, 177, 160 | \$39, 480, 000 | \$31, 261, 540 | \$106,395, 620 |
| Twenty dollars | 257, 238, 104 | 45, 360, 000 | 69, 893, 560 | 232, 704, 544 |
| Fifty dollars. | 50,667, 755 | 6,600,000 | 12,396, 800 | 44, 870,955 |
| One hundred dollars. | 72,814,850 | 14,000,000 | 16,806,600 | 70,008,250 |
| Five hundred dollars. | 19,524, 500 | 1,850,000 | 3,690, 500 | 17,684,000 |
| One thousand dollars. | 65, 451, 500 | 15,500,000 | 11,758,000 | 69,193,500 |
| Five thousand dollars. | 82, 150,000 | 23,000,000 | 6, 505,000 | 98,645,000 |
| Ten thousand dollars. | 173, 760,000 | 148,920,000 | 109, 580, 000 | 213,100,000 |
| Total | 819, 783, 869 | 294, 710, 000 | 261,892, 000 | 852,601, 869 |

## SILVER CERTIFICATES.

The demand for denominations of currency under $\$ 10$ is met principally by the issue of silver certificates against silver dollars in the general fund of the Treasury, or by turning larger denominations of silver certificates, as they are redeemed into $\$ 1, \$ 2$, and $\$ 5$.

The total amount of silver certificates outstanding at the close of the fiscal year 1909 was $\$ 484,414,000$, an increase of $\$ 10,064,000$ as compared with that of twelve months earlier.

In the following statement may be observed the transactions, by denominations, during the last fiscal year:

| Denomination. | Outstanding June 30, 1908. | Fiscal year 1909. |  | Outstanding June 30, 1909. |
| :---: | :---: | :---: | :---: | :---: |
|  |  | Issued. | Redeemed. |  |
| One dollar.. | \$112, 805,795 | \$127, 768, 000 | \$116,432,634 | \$124, 141, 161 |
| Two dollars, | 56,043, 742 | 49,832,000 | 49, 595, 506 | 56, 280, 236 |
| Five dollars | $263,629,282$ $18,195,111$ | $124,980,000$ $25,680,000$ | $\begin{array}{r}142,599,070 \\ 10,053 \\ \hline\end{array}$ | $246,010,212$ $33,821,821$ |
| Twenty dollars | 14, 773,290 |  | 1, $3,863,900$ | 10,909, 390 |

| Five hundred dollars... | 7,182,000 |  | 91,000 | 17, 152, 000 | 28,000 | 24, 453, 000 |
| One thousand dollars... | 48, 149,000 | 140,000 | 23,000 | 68,960, 500 | 34, 000 | 117,306, 500 |
| Five thousand dollars. |  |  |  | 97, 820, 000 |  | $97,820,000$ |
| Ten thousand dollars... | 10,000 |  |  | 215,670,000 |  | 215,680, 000 |
| Fractional parts. |  |  | 45,789 |  |  | 45,789 |
| Total. | 347,681, 016 | 4,071,000 | 702, 807,459 | 864, 162, 869 | 484, 826,000 | 2, 403, 548, 344 |
| Unknown, destroyed. | 1,000,000 |  |  |  |  | $1,000,000$ |
| Net | 346, 681, 016 | 4,071,000 | 702, 807, 459 | 864, 162, 869 | 484, 826,000 | 2, 402,548, 344 |

## RATIO OF SMALL DENOMINATIONS TO ALL PAPER CURRENCY.

The ratio of denominations of $\$ 10$ and less to the total paper currency, by fiscal years since 1900, and on October 1, 1909, is recorded here:

| Date. | Total paper currency. | Denominations of \$10 and less. |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | One dollar. | Two dollars. | Five dollars. | Ten dollars. | Total. |
| July 1, 1900. | \$1, 380, 832, 739 | 4. 36 | 2.74 | 21.20 | 26. 72 | 5.5 .02 |
| July 1, 1901 | 1, 473, 177, 892 | 4. 34 | 2.74 | 20.72 | 27.11 | 54.91 |
| July 1, 1902 | 1, 534, 962, 196 | 4.63 | 2.77 | 21.34 | 27.44 | 56. 18 |
| July 1, 1903 | 1, 654, 420,535 | 4.97 | 2.83 | 21.10 | 27.87 | 56.77 |
| July 1, 1904. | 1,775,000,680 | 4.71 | 2.66 | 20. 26 | 26.94 | - 54.58 |
| July 1, 1905. | 1,835, 868, 791 | 5.06 | -2.73 | 19.83 | 27.43 | 55.06 |
| July 1, 1906. | 1, 953, 712, 245 | 5.31 | 2.51 | 19.67 | 27.43 | 54.93 |
| July 1, 1907. | 2,111,659,575 | 5.24 | 2.69 | 19.48 | 25.84 | 53. 26 |
| July 1, 1908. | 2, 345, 130, 802 | 4. 92 | 2.46 | 20.79 | 26.00 | 54. 19 |
| July 1, 1909. | 2,375, 261, 959 | 5.33 | 2. 44 | 19.84 | 25.77 | 53: 40 |
| October 1, 1909 | 2, 403,548, 344 | 5.57 | 2.37 | 20.19 | 25.71 | 53.85 |

It appears from the foregoing that the outstanding volume of the smaller denominations is about equal to the demand at the present time.

## COST OF Paper CURRENCY.

The cost attending the production, issue, and redemption of United States paper currency may be studied in the last reckoning made, as shown in the statement following:
Cost of each 1,000 sheets of paper delivered to the Bureau of Engraving andPrinting
Cost of engraving and printing each 1,000 sheets ( 4,000 notes) of perfect work, delivered to the Treasurer of the United States.
Cost of sealing, separating, bundling, and issuing each 1,000 sheets $(4,000$ notes)
Total average expense of 4,000 notes issued ..... 54.04
Total average expense of 4,000 notes redeemed ..... 8.80
Aggregate average expense of issue and redemption ..... 62.84
Averageexpense of issueand redemption of each note. ..... 0.01571

Total Expenses of Issue and Redemption.

United States Paper Currency Outstanding and Cost of Maintenance.

## AVERAGE LIFE OF PAPER CURRENCY.

Inquiries often reach the department relating to the average life of the paper currency. From the latest data available, the average lifetime of each note, by kinds, may be studied in the statement here:

Ayerage Life of each Note and Certifictate in Years.

| Denominations. | United States notes. | Treasury notes. | Gold cer-certificates. | Silver certifcates. | Nationalbank notes. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| One dollar. | 3.073 | 1.720 |  | 1.214 | 4.361 |
| Two dollars | 3.195 | 1.852 |  | 1.383 | 4. 464 |
| Five dollars. | 3.974 | 2.942 |  | 1.938 | 3. 542 |
| Ten dollars | 3.691 | 3. 677 | 0.911 | 3.483 | - 3.483 |
| Twenty dollars | 5.948 | 3.937 | 3.048 | 3.920 | 3.762 |
| Fifty dollars. | 6.092 | 3.670 | 3. 390 | 3.134 | 4. 261 |
| One hundred dollars | 6.078 | 3.590 | 3.354 | 2.753 | 4. 030 |
| Five hundred dollars | 3.721 |  | 3.137 | 1.878 | 5.210 |
| One thousand dollars | 3.918 | 1. 905 | 2.782 | 1.412 | 3.342 |
| Five thousand dollars | . 326 |  | 1. 685 |  |  |
| Ten thousand dollars. | . 160 |  | 1. 495 |  |  |
| All denominations. | 3.600 | 2.176 | 2.560 | 1.512 | 3:616 |

The national bank circulation owes its apparent advantage of longevity to the circumstance that the original plan of redemption was found to be practically inefficient. Since the inauguration of the present system of redemptions in the office of the Treasurer on July 1, 1874, these notes have been freely retired on becoming unfit for use with a consequent shortening of their life, but the records of the earlier period still affect the calculations based on the whole history of the issue.

PAPER CURRENCY PREPARED FOR ISSUE AND AMOUNT ISSUED.
Precaution prompts the preparation of an adequate volume of paper currency of the kinds and denominations authorized by law in advance of putting it into circulation. The pieces of currency actually issued during the last fiscal year numbered 202,746,192, as against $206,898,000$ prepared for issue. The reserve essential to permit the paper, printing, and sealing to dry and harden so as to secure the best results in appearance and wear is not yet as large as economy and prudence suggests. In the coming year it is believed this criticism will be no longer justified.

The number of pieces and amount of paper currency prepared for issue and the amount issued since 1902 is set forth in the subjoined table:

| Fiscal year. | Prepared for issue. |  |  | Paper currency issued. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Number of notes and certificates. | Total value. | Average value. | Number of notes and certificates. | Total value. | Average value. |
| 1902. | 136,721,000 | \$591,580,000 | \$4. 326 | 116,697, 874 | \$466, 908,000 | 84.000 |
| 1903. | 148, 446,000 | 617,936,000 | 4. 162 | 141, 235, 371 | 551,038,000 | 3.901 |
| 1904. | 159, 463, 000 | 762, 820,000 | 4. 783 | 152, 908, 853 | 650,026, 000 | 4. 251 |
| 1905 | 155,389, 000 | 510,524,000 | 3. 285 | 169,259, 812 | 637,540,000 | 3.766 |
| 1906. | 157, 425,000 | 602, 172,000 | 3. 825 | 172,930,548 | 629,826, 000 | 3.642 |
| 1907. | 178, 180.000 | 679, 480,000 | 3. 813 | 173,093, 911 | 698, 273, 000 | 4. 034 |
| 1908. | 197,012,000 | 858,944, 000 | 4. 359 | 188, 999,912 | 804,326,000 | 4.255 |
| 1909. | 206,898,00@ | 637, 320,000 | 3.080 | 202, 746, 192 | 764,510,000 | 3. 770 |

The paper currency issued during the fiscal year 1909 was in number of pieces $13,746,280$, or 7.2 per cent greater than in 1908.

In the first quarter of 1910 the number of pieces issued was $58,477,836$, an increase of $11,453,432$, or 24.3 per cent, over that for the corresponding period in 1909.
,The issues of United States paper currency, by months, for the fiscal years 1908 and 1909 and first quarter of 1910 are stated in the subjoined table:
United States Paper Currency Issued during the Fiscal Years 1908 and 1909.

| Month. | Fiscal year 1908. |  |  | Fiscal year 1909. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## REDEMPTIONS OF PAPER CURRENCY.

The redemptions follow closely the issues of government paper currency. During the fiscal year 1909 the number of pieces redeemed was $194,507,569$, an increase of $22,328,992$, or 12.9 per cent, over those of 1908.

In the first quarter of 1910 the number of pieces redeemed was $49,763,706$, an increase of $8,175,765$, or 19.6 per cent, as compared with the corresponding period in 1909.
Under present regulations United States paper currency unfit for circulation, when not mutilated so that less than three-fifths of the original proportions remain, is redeemed at full face value of the note; if less than three-fifths, but clearly more than two-fifths of the original proportions remain, is redeemed at one-half the face value of the whole note or certificate. Fragments less than three-fifths are redeemed at face value of the whole note when accompanied by an affidavit of the owner or other person having knowledge of the facts that missing portions have been totally destroyed.

Comparison of the redemptions, by months, for the fiscal years 1908 and 1909 and first quarter of 1910 may be observed in the annexed table:

## STANDARD SLIVER DOLLARS.

At the close of the last fiscal year the total stock of standard silver dollars was $\$ 564,061,719$ (exclusive of $\$ 4,215,000$ held against outstanding treasury notes).

The amount held in the Treasury was $\$ 492,073,819$ while there were in circulation $\$ 71,987,900$ as against $\$ 76,328,657$ in 1908.

Silver dollars are in demand in some parts of the country and are shipped to depositors therefor, but the expense of transportation is now paid by the consignee. The accumulation of these coins in the Treasury is not in excess of the amount that can be utilized as a basis for the issue of silver certificates.

The shipment of silver dollars to depositors therefor, by months, during the past two years and a quarter is recorded in the subjoined statement:

Movement of Standard. Silver Dollare.

|  | Month. | 1908. | 1909. | 1910. |
| :---: | :---: | :---: | :---: | :---: |
| July. |  | \$2, 738, 346 | \$797,530 | \$1,182,000 |

| Total |  | 31,466,911 | 11,865,180 |  |

## EXCHANGE OF STANDARD SILVER DOLLARS.

The standard silver dollars presented at the treasury offices for exchange during the fiscal year amounted to $\$ 23,488,604$, a decrease of $\$ 20,192,163$, as compared with the fiscal year 1908.
The exchanges of these coins exceeded the shipments in 1907 by $\$ 104,137$, in 1908 by $\$ 12,213,856$, and in 1909 by $\$ 11,623,424$.
The amounts presented at the several offices were:

| Office. | Fiscal year- |  | First quarter- |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 1908. | 1909. | 1909. | 1910. |
| Washington | \$2,294, 639 | \$771,113 | \$204, 281 | \$89,476 |
| Baltimore. | 1,168, 360 | 842, 650 | 133,590 | 173,280 |
| New York-. | 5, 820,240 | 3,595, 592 | 1,140,705 | 833, 628 |
| Philadelphia. | 3, 619,804 | 2,594, 168 | 628, 817 | 709, 121 |
| Boston... | 1,360,430 | 755, 770 | 211, 290 | 191,445 |
| Cincinnati. | 5, 1081,908 $10,372,210$ |  | 899,790 $1,697,810$ | 697,085 $1,170,742$ |
| St. Louris. | 6,707, 808 | 2,718,820 | 472,090 | -485, 663 |

| San Francisco. | 2,355,418 | 1,229,769 | 287, 636 | 187,948 |
| Total. | 43,680, 767 | 23,488,604 | 6,173,009 | 4,950,888 |

SUBSIDIARY SILVER COIN.
The stock of subsidiary silver coin in the country at the close of the fiscal year 1909 was $\$ 159,408,546$, an increase of $\$ 12,052,763$ as compared with that of -1908 .

The treasury holdings were $\$ 27,076,747.52$, while the amount in circulation was $\$ 132,331,798$ as against $\$ 124,178,165$ in 1908.

These coins are redeemable in the lawful money of the United States, and when so redeemed they are again distributed either by shipments to depositors therefor or paid over the counter at treasury offices in exchange for other kinds of money. The coins accumulate in the Treasury from January to July, after which there is demand for them until the end of December.

The amounts shipped to depositors therefor, by months, during the past two years and a quarter are set forth in the statement following:

|  | Month. | 1908. | 1909. | 1910. |
| :---: | :---: | :---: | :---: | :---: |
| July |  | \$2,379, 912.40 | \$1,977,268.80 | \$2,982,761. 45 |

| Total |  | 31, 438,830.99 | 36,058,567.75 |  |

## REDEMPTION OF SUBSIDIARY SILVER COIN.

The amount of subsidiary silver coin redeemed at the treasury offices for the fiscal years 1908 and 1909 and the first quarter of 1910 is stated here:

## MINOR COIN.

The minor coins are in great favor. An addition of $\$ 889,040.25$ to the coinage was made during the last fiscal year, of which $\$ 501,951.35$ was in bronze cents and $\$ 387,088.90$ in nickel 5 -cent pieces.

The amount of each denomination of minor coin outstanding at the close of the fiscal years 1908 and 1909 may be studied in the statemẹnt following:

MOVEMENT OF MINOR COIN.
Minor coins to the amount of $\$ 3,784,903.12$ were shipped to depositors therefor in 1909 , an increase of $\$ 479,192.32$ as compared with that of 1908.

The transactions by offices for the past two years and a quarter are reported in the statement following:

| Office. | Fiscal year 1908. |  | Fiscal year 1909. |  |
| :---: | :---: | :---: | :---: | :---: |

| Total. | 897, 257.65 | 11,048.82 | 1,621,031.58 | 20,609.94 |

${ }^{a}$ The charge against the mint, Philadelphia, covers the expense of transfers from that point to supply other offices.

## REDEMPTION OF MINOR COIN.

Minor coins are redeemable in the lawful money of the United States, and the amount presented for such redemption at each of the Treasury offices for the fiscal years 1908 and 1909 and the first quarter of 191.0 is recorded in the annexed statement:

## MONEY FOR MOVING THE CROPS.

The growth in the volume of small denominations of currency during the pust few years, and its wider distribution throughout the country, has diminished the requests for assistance, which the Treasury has heretofore rendered, in making transfers of funds from New York to other subtreasury cities for moving the crops.

The following tables give the deposits in New York in all months, when any were made, and the resultant payments in the several cities from January, 1905, to September, 1909:

| Transactions. | Gold coin and certificates. | United States notes. | Silver dollars and certificates. | Total. |

a National-bank notes.

## DEPOSITS OF GOLD BULLION AT THE MINTS AND ASSAY OFFICES.

The movement of the new product of gold bullion, from the mines and imports, to the Treasury during the last fiscal year, shows a large decrease as compared with that of the preceding two years.

The amount deposited at each of the mints and assay offices during the fiscal years 1907, 1908, and 1909 is stated here:

Depositors of gold bullion at the above-named offices are paid therefor in coin or by checks on assistant treasurers and depositary banks. During the fiscal year 1909, $\$ 395,000$ in gold coin was transferred from San Francisco to Carson, and $\$ 2,400,000$ to Seattle to be used in making payments for local deposits of gold bullion.

## TRANSFÉ Of GOLD COIN FROM SAN FRANCíSCO.

The accumulation of gold coin in the mint of the United States at San Francisco in excess of public requirements on the Pacific coast, and to which attention had been invited in previous reports, was transferred to the mint at Denver during the last fiscal year. The amount moved was $\$ 272,500,000$, at a cost of $\$ 1$ per $\$ 1,000$.

## SHIPMENTS OF CURRENCY FROM WASHINGTON.

The currency shipped from the Treasury in Washington to the subtreasuries, banks, and others during the fiscal year 1909 amounted to $\$ 571,380,547$, as against $\$ 631,287,614$ during the preceding twelve months. In 1908, the packages sent were 93,919 , while in 1909 they numbered 96,172 , an increase of 2,253 .

The comparison of two years follows:

## RECOINAGE IN THE FISCAL YEAR 1909.

The worn gold, silver, and minor coins withdrawn and transferred to the mint for recoinage during the fiscal years 1908 and 1909 are recorded in the statement following:

## REDEMPTION OF NATIONAL-BANK NOTES.

The national-bank notes presented for redemption during the fiscal year amounted to $\$ 461,522,202$, exceeding by $\$ 111,887,861$ the largest sum ever presented for redemption in any year. The redemptions were 67.80 per cent of the average amount of the notes outstanding during the year, which was $\$ 680,666,307$. This percentage, however, was exceeded in the year 1877, when redemptions, amounting to $\$ 242,885,375$, were 75.47 per cent of the average amount outstanding during that year. The average denomination of the notes outstanding during this fiscal year was $\$ 10.11$; of the notes redeemed it was $\$ 9.71$. The total number of notes redeemed was $47,294,777$. The redemptions by denominations of the average amount outstanding amounted to 75 per cent of the $\$ 5$ notes, 69.34 per cent of the $\$ 10$ notes, 64 per cent of the $\$ 20$ notes, 54.40 per cent of the $\$ 50$ notes, and 51.17 per cent of the $\$ 100$ notes.

Following the usual movement of bank notes to the Redemption Agency, the redemptions in the first six months, July to December, were only 39.59 per cent of the total for the year, while 60.41 per cent was redeemed in the second six months, January to June. The smallest monthly amount redeemed was $\$ 24,776,186$ in September, and the largest was $\$ 56,627,458$ in January. A monthly average would have been $\$ 38,460,183$.

The redeemed notes were paid for in the following ways: By the treasurer's checks on the various subtreasuries to the amount of $\$ 219,617,316$, by remittances of $\$ 165,668,342$ in new United States currency, by remittances of $\$ 187,979$ in gold, silver, and minor coins, and by the credit of $\$ 74,063,371$ in various accounts.

The notes assorted and delivered during the year amounted to $\$ 500,636,735.50$. The excess of deliveries over redemptions was caused by the reduction of the balance of $\$ 62,277,880$ in redeemed notes on hand unassorted at the commencement of the year to a balance of $\$ 20,645,204$ at the close of the year. The assorted notes forwarded to the banks of issue as fit for use amounted to $\$ 89,629,100$, those delivered to the Comptroller of the Currency for reissue to $\$ 321,445,552.50$, and those for retirement to $\$ 89,562,083$. Under provisions in the emergency currency act of May 30, 1908, it became impracticable to separate the notes issued by a bank prior to that act from the notes issued subsequent to that act from plates which had been changed to conform to the requirements of the act. In consequence of this the deposits of lawful money previously received from banks under the various provisions of law for the retirement of certain series of their notes and the deposits subsequently so received, have been used since July 1 to retire any notes issued by the bank making the deposit without regard to the series. Under this practice the redemptions of the notes of a bank on the 5 per cent account cease until the deposit for retirement of its notes is exhausted. This change in practice accounts for the large sum of notes retired by redemption during the year. Notwithstanding this retirement of notes the transactions during the year in further deposits for retirement of notes and in fresh deposits of bonds for additional notes, resulted in a net decrease of only $\$ 8,413,843$ in the amount of circulation during the year. The total deposits for the retirement of notes
amounted to $\$ 45,621,739.50$, those received under the compulsory provisions of law relating to extended bank charters and bank liquidations were $\$ 14,841,244.50$, and those under the provision of law for the voluntary retirement of notes with a monthly limit of $\$ 9,000,000$ were $\$ 30,780,495$. Of this latter sum, however, $\$ 13,316,500$ came from the redemption by the Government of 3 per cent certificates which had been pledged by the banks for notes.

Inclusive of charges for transportation, salaries, printing, stationery, and contingent expenses, the total costs for the year were $\$ 396,743.15$, which have been assessed upon the banks at the rate of $\$ 0.79762$ per $\$ 1,000$ of notes redeemed.

## SPURIOUS ISSUES DETECTED IN 1909.

The nominal value of the counterfeit coins and paper currency of all kinds detected at the Treasury and subtreasuries during the last fiscal year was $\$ 13,629.14$, as against $\$ 13,236.19$ in 1908 .

## SPECIAL TRUST FUNDS.

The Central Pacific Railroad settled the balance of its indebtedness to the Government on July 28, 1908, and the bonds of the company held as security therefor were released.

The kind and amount of securities held in special trust and the transactions therein during the fiscal year 1909 are enumerated in the annexed table:

Special Trust Funds in the Custody of the Treasurer of the United States at the Close of the Fiscal Year 1909.

## DISTRICT OF COLUMBIA.

The transactions of the Treasurer of the United States, ex officio commissioner of the sinking fund of the District of Columbia, pertaining to the affairs of the District, are fully set forth in a separate paper.

During the fiscal year 1909 the bonds of the funded debt retired amounted to $\$ 491,300$, resulting in the reduction of the annual interest charge by $\$ 17,833.90$.

From July 1, 1878, to the close of the fiscal year 1909 the bonded debt was increased by the issue of 3.65 per cent bonds amounting to $\$ 1,254,050$, and decreased by the operation of the sinking funds and otherwise $\$ 13,246,550$, making a net reduction of $\$ 11,992,500$, and of the annual interest charge $\$ 646,592.65$. The interest-bearing bonds outstanding June 30, 1909, were $\$ 10,114,150$.

Since the close of the fiscal year the debt has been further reduced by the purchase of 3.65 per cent bonds amounting to $\$ 446,350$. This leaves outstanding October 1, 1909, $\$ 9,667,800$ in bonds bearing 3.65 per cent interest.

The retentions from 39 District of Columbia contracts were canceled during the year by the return to the contractors of $\$ 65,170$ in bonds and $\$ 67,534.36$ in cash.

At the close of the fiscal year 1909 the 10 per cent guaranty fund amounted to $\$ 249,326.56$, and was credited to 86 separate contracts, and is represented by $\$ 151,480$ in bonds purchased at the request and risk of contractors, and $\$ 86,057.84$ uninvested cash.

## INCREASE OF SALARIES.

Since I have held the office of Treasurer of the United States the duties and responsibilities of the employees of this bureau have been carefully studied, and it is my observation that the salaries paid are not adequate for the services rendered.

The salaries of employees in this office should be large enough to command the best talents, and should be at least large enough to give them and their families a respectable livelihood, and to enable them to save something for the needs of old age.

The salaries of the classified service (clerks of classes 1,2,3, and 4) were established by the law, April 22, 1854, and have not since been changed. At that time the cost of living was much less than at present, and the salaries were adequate; but now the cost of all the articles that enter into the consumption of a family have increased so largely that the government official holding a position in the classified service, the salary of which has not been increased for more than fifty years, finds it a difficult matter to provide for the wants of a family and quite impossible to put aside but a small part of his earnings for the wants of that period when he shall have outlived the days of his usefulness in the public service.

The risk of loss and the pecuniary responsibilities of many of the employees of this office are very great. The arguments urged may perhaps apply with more strength and force to an office like this, but the same reasons for an increase of pay apply, with more or less force, to every branch of the public service.

Daily wages have been increased in every line of industry throughout the country, but the salary of the clerk has remained stationary. It is suggested that you invite the attention of Congress to this subject.

Your attention is invited to the comparison of annual salaries paid, in the following statement for the fiscal years 1856, 1876, and 1910:

| Office. | Annual salaries paid for the fiscal years- |  |  | Percentage of increase since 1856. |
| :---: | :---: | :---: | :---: | :---: |
|  | 1856. | 1876. | 1910. |  |
| The President. | \$25,000 | \$50,000 | \$75,000 | 200 |
| The Vice-President | 8,000 | 8,000 | 12,000 | 50 |
| The Speaker of the House | 8,000 | 8,000 | 12,000 | 50 |
| Secretary of the Treasury. | 8,000 | 8,000 | 12,000 | 50 |
| Assistant Secretary of the Treasury | 3,000 | 4,500 | 5,000 | 66 |
| Comptroller of the Treasury....... | 3,500 | 5,000 | 5,500 | 57 |
| Auditor for the Treasury.. | 3,000 | 4,000 | 4,000 | 33 |
| Treasurer of the United States | 3,000 | 6,500 | 8,000 | 166 |
| Register of the Treasury | 3,000 | 4,500 | 4,000 | 33 |
| Classified service: |  |  |  |  |
| Clerks of class 1. | 1,200 | 1,200 | 1,200 | None. |
| Clerks of class 2 | 1,400 | 1,400 | 1,400 | None. |
| Clerks of class 3. | 1,600 | 1,600 | I, 600 | None. |
| Clerks of class 4. | 1,800 | 1,800 | 1,800 | None. |

RETIREMENT OF EMPLOYEES GROWN OLD IN THE SERVICE OF THE GOVERNMENT.

The question has been before the public for several years and numerous bills in relation thereto have been introduced in Congress, but none of these bills have been sanctioned by that body. Throughout the country the necessity for making provision for those who have grown old in the service of mercantile establishments, banks, and great railway lines is receiving attention, and in many instances ample funds have been provided and the plans put into practice with very satisfactory results.

The employees of the Government, a faithful and efficient class of citizens, are growing old in its service, and that, too, on salaries which, in these times of high prices and cost of living, afford no margin for saving to provide for the wants of old age. Therefore it is suggested that in the legislation to come before Congress at the next session relative to a readjustment of salaries, there be coupled with the measure some kind of retirement plan whereby the Government will make deductions from the salaries of all employees in future sufficient to provide the necessary retirement fund. Such a plan would in the course of a few years be self-supporting, and on a basis entirely different from that of a civil pension system to be paid for out of taxation. Under such provisions it would fall to the lot of Congress to provide for the old clerks who are now on the rolls of the departments, but who manifestly could not at this date contribute enough for their own pensions. With this temporary aid the plan would be on its face essentially like the Australian requirement, that every clerk, on appointment would at once begin the purchase of a deferred annuity, and thus make provision for old age.

The Treasurer can not close this, his final report, without expressing his high appreciation of the integrity, loyalty, efficiency, and hearty cooperation of the officers and clerks with whom he has been associated in the conduct of the affairs of the bureau since July 1, 1905. Vast sums of money mounting up to the billions have been handled in this bureau since that date, and it is gratifying to state that not one cent of the public moneys has been lost.

Respectfully,
Chas. H. Treat, Treasurer of the United States.

## Hon. Franklin MaoVeage,

Secretary of the Treasury.

## APPENDIX TO REPORT OF THE TREASURER.

N9. 1.-Revenues and Expenditures for the Fiscal Year 1909, as Shown by Warrants Issued.

## REPORT OF THE DIRECTOR OF THE MINT.

## Treasury Department, Bureau of the Mint, December 14, 1909.

Sir: In compliance with' the provisions of section 343, Revised Statutes of the United States, the following report covering the operations of the mints and assay offices of the United States during the fiscal year ended June 30, 1909, being the thirty-seventh annual report of the Director of the Mint, is respectfully submitted:

DEPOSITS OF GOLD BULLION.
The value of the gold contained in original deposits at the mints and assay offices during the fiscal year 1909 was. $\$ 142,124,941.59$, and the value of uncurrent domestic gold coin deposited was $\$ 3,432,288.62$, making a total of $\$ 145,557,230.21$.

The redeposits during the year, consisting of bullion transferred from one office to another and bars bearing the stamp of one of the mints or assay offices, which had been paid out, amounted to $\$ 46,757$,462. The total value of gold bullion and uncurrent domestic and foreign coin received, including redeposits, amounted to $\$ 192,314,693$. Domestic bullion deposited contained $6,435,350$ standard ounces, of which $2,691,889$ standard ounces were crude bullion requiring parting and refining. There were contained in refinery bars (less than 0.992 in fineness) 641,690 standard ounces, and $3,101,771$ standard ounces of refined bullion ( 0.992 and over in fineness). The latter was received from private refineries, chlorination and cyanide works.

Uncurrent and mutilated United States gold coin containing 184,486 standard ounces was received for recoinage, the coining value of which in new coin was $\$ 3,432,288.62$. Qf this amount 69,735 standard ounces were purchased over the counter at the different mints and assay offices, and 114,751 standard ounces were contained in coin transferred by the Treasury for recoinage. The difference between the face value of the mutilated and uncurrent gold coin received during the year and the value of the same in new coin was $\$ 26,049.38$, which sum represents the loss on recoinage.

> DEPOSITS OF JEWELERS' BARS.

Jewelers' bars and old plate containing 284,814 standard ounces of the value of $\$ 5,298,857$ were received.

## REDEPOSITS OF GOLD BULLION.

The redeposits contained $2,513,214$ standard ounces of gold of the value of $\$ 46,757,462$, fine bars representing 2,399 standard ounces ( $\$ 44,634$ ), and unparted bars representing $2,510,815$ standard ounces ( $\$ 46,712,828$ ), as follows:

## DEPOSITS AND PURCHASES OF SILVER.

The deposits of silver received at the mints and assay offices during the fiscal year ended June 30, 1909, for return to depositors in fine or unparted bars,. with the weight and fineness stamped thereon, aggregated $3,597,155.34$ standard ounces. The United States assay office at New York received the greater part of these deposits.

The government of the Philippine Islands deposited at the United States mint, San Francisco, silver coin issued under the act of March 3, 1903, containing $8,127,302.80$ standard ounces, for recoinage into coins of reduced weight and fineness, as authorized by the act of June 23, 1906.

The Government of San Salvador deposited for coinage at the mint, San Francisco, 557,148.53 standard ounces of silver.

The purchases and deposits of silver bullion at the mints and assay offices of the United States during the fiscal year 1909 were as follows:

| Item. | Standard ounces. |
| :---: | :---: |
| Silver purchased. | 4,141, 124. 62 |
| Silver parted from gold deposits and purchased | 2,739, 529.43 |
| Uncurrent domestic coin for recoinage. | 729, 971.04 |
| For return in fine bars.. | 3, 597, 155. 34 |
| For Philippine coinage. | 8, 127, 302.80 |
| For San salvador coinage. | 557, 148.53 |
| Total. | 19,892, 231.76 |

## UNCURRENT DOMESTIC SILVER COINS FOR RECOINAGE.

Uncurrent and mutilated domestic silver coins received for recoinage contained 733,261 standard ounces of the value of $\$ 912,300$ in new subsidiary coin. The net loss on this recoinage was $\$ 65,018$.
Jewelers' bars and old plate containing 556,693 standard ounces were deposited.

REDEPOSITS OF SILVER BULLION.
The redeposits contained $3,261,789$ standard ounces of silverfine bars representing 253,349 standard ounces, unparted bars representing $2,152,546$ standard ounces, and mint bars representing 855,894 standard ounces as follows:

a Includes 461,686 fine ounces Hawaiian coin.
$b$ Includes 148,788 fine ounces Hawaiian coin.
c Includes 6,901 fine ounces Philippine special assay coins.
d Includes 3,647 fine ounces Hawailan coin.
e Includes 3,456 fine ounces Philippine special assay coins.
$f$ Includes 3,895 fine ounces Hawaiian coin.
$g$ Includes 2,663 fine ounces Philippine special assay coins.
$h$ Includes 4,680,791 fine ounces Philippine coins.
SIncludes 3,411 fine ounces Philippine assay coins and 8,866,622 fine ounces Philippine coins for recoinage.
4 Includes 5,739 fine ounces Philippine assay coins and 7,314,573 fine ounces Philippine coins for recoinage.

## NEW DESIGN FOR THE ONE-CENT PIECE.

With the approval of the Secretary of the Treasury the new design for the bronze one-cent piece was adopted in April, 1909. On the obverse the head of Lincoln appears instead of the Indian head which this piece had borne since 1864 .

The engraver of the mint at Philadelphia was instructed to prepare dies, and coinage of this piece was commenced in May. No coins were paid out until after the close of the fiscal year. A stock was accumulated at the Philadelphia mint to enable that institution to be in a position to fill orders promptly. The distribution of this piece was commenced on August 2, 1909.

COINAGE OF, THE UNITED STATES, FISCAL YEAR 1909.
The domestic coinage was as follows:

|  | Denomination. | Pieces. | Value. |
| :---: | :---: | :---: | :---: |
| Gold. |  | 10,655,469 | \$108, 180, 092. 50 |
| Silver, subsidiary |  | 53,371, 200 | 11,093, 810.00 |
| Nickel, 5-cent pieces. |  | 11, 588, 558 | 579, 427.90 |
| Bronze, 1-cent pieces |  | 54, 662, 295 | 546, 622.95 |
| Total. |  | 130,277, 522 | 120,399, 953.35 |

Of the subsidiary coinage made during the year $\$ 1,407,000$ were from uncurrent domestic coin received for recoinage and $\$ 9,686,810$ from silver purchased under provisions of section 3526 of the Revised Statutes.

MUTILATED STANDARD SILVER DOLLARS PURCHASED AND USED IN SUBSIDIARY SILVER COINAGE.

There were purchased as bullion and melted at the mints and assay offices 1,293 mutilated silver dollars during the fiscal year 1909, which were for use in the manufacture of subsidiary silver coins.

| Fiscal year. | Amount. | Fiscal year. | Amount. |

## COINAGE FOR THE PHILIPPINE GOVERNMENT.

Owing to the advance in the price of silver bullion in 1905 and 1906, the bullion value of the silver contained in two Philippine pesos and the subdivisions thereof, as authorized by the act of March 2, 1903, was greater than that of one dollar in United States gold coin.

For the purpose of preventing the melting and exportation of the coins from the islands as a result of the appreciation in the price of silver, Congress passed an act on June 23, 1906, authorizing the government of the Philippine Islands to reduce the weight and fineness of the coins as authorized under the act of March 2, 1903, and to recoin the coins previously made. Under date of December 6,1906 , the Philippine Commission passed an act fixing the weight and fineness of the Philippine coins.

The weight and fineness of the Philippine silver coins authorized under the act of March 2, 1903, and of the reduced weight and fineness authorized under the act of June 23, 1906, are as follows:

The total Philippine coinage under the act of March 2, 1903, from April, 1903, to December 31, 1906, was as follows:

| Denomination. | Pieces. | " Value. | Silver consurned. |
| :---: | :---: | :---: | :---: |
| Pesos, silver | 27,024, 358 | $\begin{gathered} \text { Peso. } \\ 27,024,358.00 \end{gathered}$ | Fine ounces. $21,078,999.24$ |
| 50 centavo, silver | 6,128,518 | 3,064, 259.00: | 2,390, 122.02 |
| 20 centavo, silver | 7,997, 768 | 1,599, 553.60 | 1,246, 152.22 |
| 10 centavo, silver | 11,357,557 | 1,135, 755.70 | 884,824.67 |
| 5 centavo, nickel. | 9,999, 884 | 499, 994.20 |  |
| 1 centavo, bronze. | 37, 845, 284 | 378, 452.84 |  |
| Half centavo, bronze | 17,752,884 | 88, 764. 42 |  |
| Total. | 118, 106, 253 | 33,791, 137. 76 | 25,600,098. 15 |

RECOINAGE OF PHILIPPINE COINS.
Under the act of Congress approved June 23, 1906, and the act of the Philippine Commission dated December 6, 1906, providing for the recoinage of Philippine silver coins issued under the act of March 2, 1903, into coins of a reduced weight and fineness, there were received at the mint, San Francisco, and melted for recoinage up to June 30, 1909, the following:

| Denomination. | ; | Pieces. | Fine ounces. |
| :---: | :---: | :---: | :---: |
| Pesos. |  | 22,862,873 | 17,828,264. 16 |
| 50-centavo |  | 4,815,000 | . $1,875,136.87$ |
| 20-centavo |  | 4,490,500 | .. $: 697,283.64$ |
| 10-centavo. |  | 5,829,000 | 452,346. 16 |
| Mlxed Philippine coins. |  | - 425 | . 149.85 |
| . Total: |  | 37,997,798 | $20,853,180.68$ |

Of the coins manufactured for the Philippine government under the act of March 2, 1903, there were remaining in the Philippine Islands, June 30, 1909, the following coins:

|  | - Denomination. | Pieces. | Value in pesos. |
| :---: | :---: | :---: | :---: |
| Pesos. 50-centavo. 20-centavo. 10-centavo. |  | 4,161, 485 | 4,161,485. 00 |
|  |  | 1,313,518 | 656,759.00 |
|  |  | 3,507,268 | 701,453.60 |
|  |  | 5,528,557 | 552,855.70 |
| Total |  | 14,510,828 | 6,072,553.30 |

The following coinage was executed during the fiscal year 1909 at the United States Mint, San Francisco, for the Philippine government:

|  | Denomination. | Pieces. | Fine ounces. |
| :---: | :---: | :---: | :---: |
| Silver: |  |  |  |
| Pesos. |  | 14,546,944 | 7, 482,947.99 |
| 50-centavo. |  | 1,092,000 | 263,308. 50 |
| 20-centavo |  | 705,000 | 67,997. 25 |
| 10-centavo. |  | 1,740,000 | 83,911. 60 |
| Bronze: 1-centavo. |  | - 3,924,612 |  |
| Total. |  | 22,008,556 | 7,898,165. 24 |

The total silver coinage to June 30, 1909, from coins received from the Philippine Islands for recoinage and from bullion purchased for such coinage was as follows:

| Denomination. | Coined from new bullion, acts of March 2, 1903, and June 23, 1906. |  | Coined from Philippine coins received for recoinage, act of June 23, 1906. |  | tal. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Pieces. | Fine ounces. | Pieces. | Fine ounces. | Pieces. | Fine ounces. |

## COINAGE FOR SAN SALVADOR.

The mint at San Francisco coined for the Government of San Salvador 693,170 silver peso pieces during the fiscal year 1909.

## BARS MANUFACTURED.

During the fiscal year 1909 there were manufactured by the mints and assay offices the following:

## WORK OF THE GOVERNMENT REFINERIES.

There were received and operated upon by the refineries connected with the coinage mints during the fiscal year 1909 gold and silver as shown by the following table:

| - Mint. | Gold. |  | Sllver. |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Standard ounces. | Value. | Standard ounces. | Colning value. |
| Philadelphia. | 1,668, 892. 456 | \$31,049, 161.97 | 3,149, 873.14 | \$3,665, 306.92 |
| San Francisco. | 2,518,687.792 | 46, 859, 307.75 | 1,222,347.03 | 1,422,367.45 |
| New Orleans. | 53,934.799 | 1,003,438.12 | 125,151. 23 | 145,630.52 |
| Denver. | 2,042,995.755 | 38,009, 223.35 | 1,839,604.62 | 2,140,630.83 |
| Total. | 6, 284,510. 802 | 116, 921,131.19 | 6,336, 976.02 | 7,373,935.72 |

SILVER BULLION ON WHICH CHARGES WERE MADE.
In order to show the amount of the above-mentioned silver bullion treated by the government refineries on which charges were received and the amount handled for parting purposes the following table is presented:

[^8]
## PURCHASE OF SILVER.

The table following shows the amount and cost of silver bullion purchased for the subsidiary silver coinage during the fiscal year 1909:

| Stock of silver bullion. | Standard ounces. | Cost. |
| :---: | :---: | :---: |
| Purchased under section 3526, Revised Statutes, at the Treasury Department | 3,786, 644. 27 | \$1,729,224. 23 |
| Purchased under section 3526, Revised Statutes, at mints. | 300,327. 53 | $139,669.63$ |
| Partings, charges, and fractions purchased. | 2,762, 638.59 | 1,322,947. 28 |
| Melted assay coins purchased. | 6,749.14 | 3,708.00 |
| Mutilated coins purchased. | . 2,595.82 | 1,201.55 |
| Surplus bullion purchased. | 21,698. 70 | 11,192.11 |
| Total. | 6, 880, 654.05 | 3,207,942.80 |

Quantity and Cost of Silver Purchased for Subsidiary Coinage at Each Mint and at the Assay Office at New York during the Fiscal Year 1909.

| Institution. | Standard ounces. | Cost. |
| :---: | :---: | :---: |
| Mint at- |  |  |
| Philadelphia.. | 2,007, 165.85 | 8973, 381. 37 |

## DISTRIBUTION OF SILVER DOLLARS.

The number of dollars on hand June 30, 1908 and 1909, and the distribution from each mint during the year was as follows:

| Items. | Philadelphia. | San Francisco. | New Orleans. | Total. |
| :---: | :---: | :---: | :---: | :---: |
| In mints June 30, 1908. | \$106, 850, 900 | \$61, 401, 432 | \$29,581, 825 | \$197, 834, 157 |
| Total. | 106,850,900 | 61, 401, 432 | 29,581,825 | 197, 834, 157 |
| In mints June 30,1909 | 106, 693,926 | 61, 401, 432 | 29,574,649 | 197, 670, 007 |
| Distributed from mints during the year | 156,974 | ............... | 7,176 | 164,150 |

## SEIGNIORAGE ON SILVER COINAGE.

The seigniorage on the coinage of subsidiary silver coins during the fiscal year ended June 30, 1909, was $\$ 5,800,917.80$, which, added to the balance on hand July 1, 1908- $\$ 114,366.16$-gives a total of $\$ 5,915,283.96$ to be accounted for during the year. The amount deposited in the Treasury was $\$ 5,913,687.14$, leaving a balance on hand June 30, 1909, of $\$ 1,596.82$.

Including the balance on hand at the mints, July 1, 1878, the net seigniorage on silver coined from that date to June 30, 1909, was $\$ 157,467,155.61$.
The earnings, gains, and expenditures were as follows:

## EARNINGS AND EXPENDITURES.

The earnings and gains of the mint service during the fiscal year 1909 were as follows:

## The expenditures were as follows:

| Salaries of officers and clerks | \$220,017.52 |
| :---: | :---: |
| Wages of workmen and adjusters | 983,916. 44 |
| Contingent expenses, less amount paid to reimburse wastage and loss on sweeps | 227, 413.84 |
| Parting and refining expenses, less amount paid to reimburse wastage and loss on | 247, 275.98 |
| Wastage of operative departments. | 23,833. 52 |
| Wastage of operative departments, minor coinage operations | 1,372.81 |
| Loss on sweeps sold during the year. | 9,263.95 |
| Expenses of distributing minor coins | 2,831.66 |
| Expenses of medal fund (charges paid, mounting, etc.). | 385.50 |
| Loss on recoinage of minor coin. | 10,666.69 |
| Loss on bullion shipped to mint for coinage | - 244.62 |
| Wastage Philippine minor coinage......... | 248.53 |
|  | 1,727, 471.06 |

## APPṘOPRIATIONS AND EXPENDITURES.

The act of May 22, 1908, making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year 1909 contained specific appropriations for the support of the mints and assay offices, amounting to $\$ 1,367,450$.

The earnings of the several mints amounted to $\$ 192,680.35$ and were deposited in the Treasury to the credit of the appropriations for "Wages of workmen" and "Contingent expenses" of the respective mints.

Of the appropriations made for "New machinery and appliances," mint at
Denver, by the acts of June 6, 1900, March 3, 1303, April 28, 1904, and
March 3, 1905, there remained on hand at the close of the fiscal year 1908. Of this amount there has been expended during the fiscal year 1909.....

EARNINGS AND EXPENDITURES OF THE REFINERIES OF THE COINAGE' MINTS ${ }^{\circ}$ AND ASSAY OFFICE AT NEW YORK, FISCAL YEAR 1909.

The earnings on account of parting and refining bullion during the fiscal year ended June 30, 1909, all of which were deposited in the Treasury, amounted to $\$ 325,006.81$; the expenditures on the same account aggregated $\$ 258,590.79$; and net earnings over expenditures \$66,416.02.

The earnings and expenditures of the several mints and the assay office at New York were as follows:

|  | Institution. | Charges collected. | Surplus bullion. | Expendi- tures. |
| :---: | :---: | :---: | :---: | :---: |
| Philadelphia. |  | \$101, 741.86 | \$8,846. 72 | 874,508.00 |
| San Francisco |  | $54,143.81$ | 6,532.43 | 78,084.01 |
| New Orleans. |  | 4,005.08 | 1,543. 23 | 1,655. 26 |
| Denver. |  | 86, 519. 21 | 17,581. 54 | 42,977.75 |
| New York. |  | 43,766.86 | 326.07 | 61,365.77 |
| Total. |  | 290, 176.82 | 34,829.99 | 258,590.79 |

## APPROPRIATIONS AND EXPENDITURES, OFFICE OF THE DIRECTOR OF the mint, fiscal year 1909.

Under the act of May 22, 1908, there was appropriated for the office of the Director of the Mint to meet the expenses of that office for the fiscal year 1909 the sum of $\$ 36,770$.

The expenditures from the appropriations for salaries, supervising the annual settlements at the mints and assay offices, collecting and compiling statistics of the production of gold and silver in the United. States, for incidental expenses and the purchase of and subscription to books and pamphlets, and contingent expenses for the laboratory aggregated $\$ 34,666.69$, leaving an unexpended balance to the credit of the various appropriations of $\$ 2,103.31$.

In addition to the above appropriations, the act of May 22, 1908, contained a specific appropriation of $\$ 65,000$ for "Freight on bullion and coin between the mints and assay offices." The expenditures from this appropriation for the fiscal year 1909 amounted to $\$ 55$,756.69 , leaving an unexpended balance of $\$ 9,243.31$ to the credit of the appropriation.
There was also a specific appropriation of $\$ 300,000$, under the act of May 27, 1908, for "Transportation of money from the mint at San Francisco, 1909," of which $\$ 277,434.12$ was expended, leaving a balance of $\$ 22,565.88$.

Appropriations and Expenditures, Office of the Director of the Mint, Freight on Bullion and Coin Between Mints and Assay Offices, and Transportation of Money from Mint at San Francisico, 1909.

| Appropriations. | Amount appropriated. | Amount expended. | Unexpended balance. |
| :---: | :---: | :---: | :---: |
| Salaries. | \$30, 120.00 | \$29,693.34 | \$426.66 |
| Contingent expenses. | 6,650.00 | 4,973.35 | 1,676. 65 |
| Frelght on bullion and coin . . . . . . . . . . . . . . . . . . . . . . . $\bigcirc$. | 65,000.00 | 55,756. 69 | 9,243. 31 |
| Transportation of money from mint at San Francisco....... | 300,000.00 | 277, 434. 12 | 22,565.88 |
| Total. | 401, 770.00 | 367,857. 50 | 33,912,50 |

In the appendix will be found a table showing in detail the earnings and expenditures for the year.
1351.8-FI 1909——18

Consolidated Statement of Expenditures for Salaries, Wages, and Supplies of the Mints and Assay Offices during tee Fiscal Yeár 1909.

## LABORATORY OF THE BUREAU OF THE MINT.

From the coinage of the calendar year 1908 the assayer of this bureau tested 425 gold and 666 silver coins, all of which were found within the legal requirements as to weight and fineness.
In the gold coins the greatest deviation above standard (the legal limit being 0.001 above or below) was 0.0003 , while the greatest deviation below was 0.0006 .

The greatest deviation of silver coins above standard (the limit being 0.003 above or below) was 0.0009 , while the greatest deviation below was 0.0013 .
The following table summarizes these assays:

| Fineness. | Philadelphia. |  | San Francisco. |  | New Orleans. |  | Denver. |  | Total. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

In addition to the above there were examined 334 Philippine silver coins, all of which were within the legal requirements as to weight and fineness. Also 68 assays of miscellaneous gold were made in settlement of differences between the Denver mint and the Seattle assay office, and 55 samples of ores were assayed for the United States Geological Survey.

THE ASSAY AND VALUATION OF GOLD BULLION. ${ }^{a}$

[By Frederic P. Dewey, assayer, Bureau of the Mint.]

The Bureau of the Mint of the United States Treasury maintains 13 offices for the purchase of gold bullion, and this paper describes an investigation to establish the reasonable differences in the assay results at the various institutions which may be commercially allowable in the settlements between them. Beginning with the comparative assay of proof gold at the Philadelphia mint and the Utrecht mint, which shows 0.00002 as the closest agreement now possible, nine tables of comparative results, taken from the regular work of the service, are given. These tables begin with very fine gold, produced in an electrolytic refinery, showing close agreement in the assay results, and follow through decreasing gold fineness and increasing amounts and complexity of base metals to very impure and complex bars produced at cyanide mills, some of which give widely varying results. Next is given a series of results on samples, prepared and sent out to various laboratories in the service, to test the influence of different metals and various combinations upon the agreement of the assay results; 11 samples were sent out and each one was assayed from 44 to 71 times, making a total of 623 assays. To these are added 107 assays of identical samples of coin gold.
On a previous occasion, $b$ I have endeavored to show the degree of accuracy that may be expected in the ordinary every-day analysis of various materials, and on another

[^10]occasion $a$ I have called attention to the accuracy of the commercial assay for silver. The present paper deals chiefly with an effort to establish certain commercial standards of agreement or accuracy in the assaying of gold bullion for purchase in the various laboratories of the United States mint service.

Besides the coinage mints at Philadelphia, New Orleans, Denver, and San Francisco, and the large assay office.on Wall street in New York City, all of which purchase and refine bullion, the Mint Bureau of the United States Treasury maintains eight smaller assay offices, scattered about through the mining districts of the country which purchase bullion and ship it to the mints to be refined. These smaller offices were established as an aid to the mining industry of the country by giving the small miners the opportunity to sell their bullion easily and quickly for cash.
Owing to the particular and rigid methods of bookkeeping of the Treasury Department, the mints are compelled to treat the bullion sent to them from the assay offices in exactly the same manner as the bullion deposited directly by individuals, and the prices are carefully determined at which the assay office bullion should be charged against the mint in the Treasury accounts. Naturally, discrepancies sometimes arise between the mints and the assay offices.. A. very large proportion of these are small and are easily adjusted. In fact, most of them adjust themselves automatically, as they are on both sides of the account, and the gains and losses over a period of time will counterbalance each other. On rare occasions, however, the differences require adjustment by umpire assays in the laboratory of the Bureau of the Mint at Washington. For several years I have been gathering data upon the subject, and have had a series of assays made in order to establish standard limits of differences which might be considered as allowable on different classes of bullion.
The methods of assaying followed in the various institutions are substantially the same, and have grown up as the result of many years of experience, so that with careful work on pure bullions the results obtained at different institutions ought to agree very closely; but with impure bullions-that is, bullions containing other constituents besides gold and silver-the chances for variations in the results increase. The action of different impurities varies widely. Only small amounts of some impurities induce excessive variations in the results, while comparatively large amounts of others have but little effect, and, on the other hand, a combination of several impurities in a bullion may be most disastrous to any agreement of the assay results.

The bullion is handled in the same manner at all the institutions. It is weighed as received, and then melted. Generally a simple melting with soda or borax, or both, is sufficient, but sometimes it is more or less refined in the pot. In the case of large melts, 1,000 ounces or over, or of very impure bullion, a small sample may be dipped or poured out from the well-stirred pot and granulated in water. The granulations are used for the assay sample. In general, however, the metal is cast into bars, and these bars are chipped, top and bottom, to obtain the assay samples. The bars are again weighed and the assays made, when the value of the deposit is calculated from this data. If, however, the various assays made on a deposit do not agree well enough to satisfy the assayer, the bar is remelted, with or without refining in the pot.
The determination of gold in ores by the fire assay, when properly executed, is justly regarded as one of the most accurate of analytical methods. With ordinary care and an excellent bead balance, 1 part of gold in more than $20,000,000$ parts of ore can be readily and accurately determined. The determination of 1 part of gold in $5,000,000$ parts of ore is very easily done. Until recently, however, it was rare for commercial ore assaying to attain to the accuracy of 1 part in $5,000,000$.

The ability to determine gold in ores with such great accuracy is due to the fact that very large amounts of ore, up to 0.25 kg ., are taken for the assay, and on a high-grade button balance the resulting bead can be weighed to $\frac{10}{3} \frac{\mathrm{mg}}{\mathrm{mg}}$. In assaying bullion, however, such extreme accuracy is out of the question, for the simple reason that there is a limit to the amount of bullion that can be taken for the assay. To obtain the most accurate results the assay sample must be weighed on the same high-grade balance on which is weighed the resulting cornet, and the sample must also be weighed with the same degree of care and accuracy as the cornet. Now, the load that a very sensitive bead balance will safely carry is generally limited to 1 g ., and the amount of metal generally taken for a gold-bullion assay is 0.5 g ., or one-half of the maximum load of the balance.

Another point in bullion assaying which militates against extreme accuracy in the results lies in the fact that the cornet which is weighed is itself gold, and, in high-grade bullions, it is a very large part of the sample taken for the assay, so that even slight

[^11] No. 8, p. 505 (Aug., 1894); Accuracy in silver assaying, Jour. Soc. Chem. Ind., vol. xv, No. 6, p. 434 (June 30, 1896).
errors in the handling of the cornet, resulting in slight losses or gains in its weight, count heavily against the fighest accuracy of the results.

About two years ago samples of proof gold were exchanged between the Philadelphia mint and the Utrecht mint, and these samples were assayed in comparison with the utmost care at both institutions, with the result that the Utrecht proof was pronounced slightly the best by both mints. The difference in the results of the assays at the two places was only 0.00002 . This is by far the most careful and exhaustive comparison of gold bullion assays known to me, and undoubtedly represents the limit of accuracy at present attained by human skill in such work.

Table I shows a series of results obtained by three assayers working in the same laboratory upon fine gold from an electrolytic refinery. Each assayer worked upon the same sample in each set of assays as averaged, the samples being cut from both the tops and bottoms of the bars. While there is a possibility that there may be some difference in composition between the tops and bottoms of the bars, yet in such highgrade material as this any such difference must be slight, and 8 tests upon the subject showed a maximum difference between the top and bottom of only 0.0001 , which is considerably less than many of the differences between individual assays. On the whole, then, the figures may be taken as fairly representing the ordinary run of commercial work upon such high-grade bullion. It will be noted that in several cases the figures exceed 1,000 , which is due, in part at least, to the high grade of the material. It may also be due in part to the presence in the electrolytic gold of unusual impurities in very small amounts. These data emphasize the necessity of averaging a large number of assays to get a satisfactory determination of the fineness in such very high-grade material.

Table II shows results obtained by various assayers in a single laboratory in assaying granulation samples from a wide variety of bullion.
The figures given in Table III are all taken from a single shipment and show the accuracy that can be obtained upon material of fairly uniform composition, being mostly gold and silver, with but little base metal present. This table shows, first, the results obtained at the assay office where the bullion was originally purchased; and, second, the results obtained upon the same material when shipped to a mint. In some of these samples there is undoubtedly a difference between the tops and bottoms of the bars, but the figures show the agreement that may be expected between two institutions in arriving at the value of such deposits.

Table IV gives the assays of 14 bars which were referred to the bureau laboratory for adjustment, although the average differences between the mint and the assay office were only slight.

The handling of bullion produced at mills using the cyanide process of gold extraction has given a great deal of trouble.

Even when properly prepared such bars are likely to be troublesome, but when, as not infrequently happens, the slimes are not properly purified before being melted into bars, they may give no end of trouble.
A very mild case of variation in cyanide bars is shown in Table V. As received, these bars were chipped and the chips assayed. Since the figures thus obtained were considerably higher than the shipper's figures, the bars were then carefully bored and the borings assayed. Finally, the bars were remelted, with small losses in each case, and granulations taken. The granulations were then assayed.

## SILVER FINENESS

Table VI exhibits the results obtained by sampling three cyanide bars, high in gold and very low in silver, in three different ways. The assays show a wide variation on the chip samples. While the drill-sample assays are fairly concordant for this class of material, the dip-sample assays agree much better and are to be preferred.

## Table VI.-Assay of Cyanide Bars.

An assay office had received a cyanide bar which showed 546, 545.5, 546.2, 546 fine in gold. This was considered satisfactory, and it was shipped to a mint, but the chip samples there yielded most varying results, as follows: $544.6,535.2,543,535$, $542.4,555.6$. The bar was then remelted, and granulations showed 550.2 and 551.2. Another cyanide bar received at the same assay office from the same mill showed 592, $593.9,592.9,593.3$ fine in gold, and was accepted. It was shipped to the same mint, where chips showed 603.6 and 590 , while borings showed 588 and 588.6. The bar, which weighed 559.65 ounces Troy, was remelted, with a loss of 1.78 ounces, and granulations from the melt showed 601.8 and 601.8 fine in gold.
Having had a great deal of trouble with some bars from this mill, while others gave but little trouble, the assay office gave one of the bad bars a very thorough treatment by melting and refining in the pot. As received, the bar weighed 643.30 ounces Troy, and was probably about 847 fine in gold. It was melted seven times, when it weighed 502.01 ounces, showing a loss of 141.29 ounces in weight. The final bar was 933.4 fine in gold and 21 fine in silver. The gold loss from this excessive course of meltings was only approximately 3.75 ounces, most of which could undoubtedly be recovered from the slags.
The details of the meltings are shown in Table VII. It should be noted that the fourth melt shows practically no refining, and the weight was only slightly reduced, so that no practical change is shown in the assays.

Table VII-Cyanide Bar, Melted Seven Times.
[Original weight, 643.3 ounces Troy.].

From an extensive series of tests made at the San Francisco mint it was found that, as a rule, in the cyanide bars from several Califormia plants the chip samples taken from the outside of the bars would be about 2.5 fine less in gold than the borings when taken away from the edges of the bar, and that the borings gave satisfactory samples of the bars.
Thirteen miscellaneous deposits were united in a mass melt and cast into 17 bars, weighing $2,841.77$ ounces. Each bar was chipped twice and each chip was assayed in duplicate for gold. The following table shows the number of times the stated fineness was obtained:

Table VIII.-Mass Melt Assays.

| Fineness. | Number. | Fineness. | Number. | Fineness. | Number. | Fineness. | Number |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 405.0 |  | 406.0 | 3 | 407.0 | 8 | 408.0 | 5 |
| 405.2 |  | 406.2 | 5 | 407.2 | 6 | 408.2 | 4 |
| 405. 4 | 1 | 406.4 | 3 | 407.4 | 8 | 408.4 | 3 |
| 405. 6 |  | 406.6 | 7 | 407.6 | 2 | 408.6 | 1 |
| 405.8 | 4 | 406.8 | 3 | 407.8 | 5 | 408.8 |  |

The average of the 68 assays showed the mass to be 407.16 fine in gold.

When made from the highest. grade of metals our coin gold, 900 gold and 100 copper, does not segregate. The gold used may contain a very small amount of silver, but should be as free as possible from all other impurities, and the copper should be of the highest purity possible. Occasionally, in practice, however, there will be some segregation due to some impurities present in minute amounts. On one occasion an inside strip cut from a double eagle was assayed six times and yielded the following gradually decreasing figures: $900.2,900.1,899.9,899.85,899.5,899.45$. On another
occasion a double eagle was cut as indicated in fig. 1 and the following results were obtained:

One of our most annoying and yet very interesting and instructive cases was a lot of foreign coin gold, the product of a mint which is very careful in the manufacture of its coins. Twelve deposits of this material were received at the Philadelphia mint from the New York assay office. It was supposed to be $916 \frac{2}{3}$ fine in gold, the balance being copper, and very uniform in composition, but the New York assays showed considerable variation. At Philadelphia one man assayed each deposit in duplicate, and he was checked by another man with a single assay, as shown in Table IX.
table IX.-Foreign Coin Gold Assays.
GOLD FINENESS.

| First assayer. $\ldots \ldots .$. | 917.6 | 916.4 | 916.4 | 917.6 | 917.5 | 917.1 | 915.6 | 917.3 | 917.6 | 914.7 | 917.0 | 917.0 |  |

|  |  | 918.3 | 917.9 | 917.9 | 917.8 | 917.9 | 917.5 | 917.3 | 917.3 | 917.5 | 916.8 | 916.9 | 917.1 |
| Second assayer....... | 917.2 | 917.3 | 917.7 | 917.3 | 916.5 | 916.3 | 917.2 | 916.3 | 916.0 | 915.8 | 915.4 | 916.0 |  |

This bullion was diluted with copper to bring it down to the United States standard. While our standard is 900 fine, and the law allows a variation of one one-thousandth up or down, so that legally the coins may run from 899 to 901 fine in gold, yet the working limits adopted at the mints are much narrower than the legal limits, and generally no gold ingots are passed by the assayer below 899.7 fine nor above 900.2 fine.

In making ingots from this metal an unusual number of melts had to be rejected and remelted for want of uniformity. It was expected that the coins made from this bullion would run low, but none of those regularly tested did. In fact, two from one delivery were most unusually high, viz, 900.6 and 900.7 . Thereupon 12 coins were selected from the same delivery and 46 assays were made upon them, with the following results:

| , | Gold fineness. |  | Gold fineness. |
| :---: | :---: | :---: | :---: |
| 3 assays showed. | 899.7 | 3 assays showed. | 900.2 |
| 3 assays showed. | 899.8 | 11 assays showed. | 900.3 |
| 5 assays showed. | 899.9 | 5 assays showed. | 900. 4 |

| 7 assays showed. | . 900.1 | 1 assay showed. | 900.7 |
|  |  | $\overline{46}$ |  |

The trouble with this metal undoubtedly arose from the presence of a small amount of some impurity causing a segregation of the gold, but enough work to decide what this was could not be given to the matter. In a similar case, with a different highgrade foreign coin gold at the San Francisco mint, the trouble was traced to the presence of a minute amount of antimony.

In order to get a much wider range of comparison, and to test the influence of the different metals and of various combinations upon the gold assay, a series of samples was prepared in the bureau laboratory and sent out to various laboratories in the service for assay. In preparing the samples the metal was thoroughly mixed by stirring when molten and remelted as often as appeared necessary. They were finally cast into small bars, and when sufficiently ductile were rolled out thin. The strips were cut into small squares, and these were mixed up and the samples for each institution taken out of the mixed pile of pieces. In the case of the brittle bars, they were hammered out and rolled until they crumbled to pieces. The larger pieces were then cut up, and the whole mixed before the samples were taken out.

All through the preparation of the samples very great care was exercised, so that in each set every sample sent for assay should be identical, and thus eliminate from the
assay results all chances of differences being due to differences in the samples operated upon, and to confine the differences shown to the actual assay work. In one very base sample, which will be further noted, it was not possible to adhere to this rule because the metal was too hard.

In making such small melts it is practically impossible to adhere to any predetermined composition with any degree of closeness.
The first sample sent out was gold about 105 fine in silver and about 10 fine in copper; seventy-one assays of this sample were made in 9 laboratories, with the following results:

|  | Gold fineness. |  | Gold fineness. |
| :---: | :---: | :---: | :---: |
| 3 assays showed. | . 884,-1 | 19 assays showed. | $\therefore 884.7$ |

| 528.800 | 529.238 | 529.283 |
| 528.963 | 529.250 | 529.300 |

Having on hand some ferruginous bullion, I attempted to prepare a sample for this work, but experienced considerable difficulty in getting a satisfactory metal, owing to the separation of magnetic globules on solidification. By melting several times with niter I finally obtained a sample that did not show visible segregation, and it must have been close to saturation with iron. It was about 763 fine in gold and 185 fine in silver, so that the entire base metals, including the iron, were only about 52 fine.
Thissample was assayed forty-seven times in 9 laboratories, with the following results:

|  | Gold fineness. |  | Gold fineness. |
| :---: | :---: | :---: | :---: |
| 2 assays showed.. | . 762.9 | 9 assays showed. | 763.7 |

| 763.300 | 763.500 | 763.833 |

It having been supposed that much of the difficulty with cyanide gold bars was due to the zinc left in the slimes and going into the bars, a sample was prepared which was nearly 590 fine in gold, about 245 fine in silver, slightly over 130 fine in zinc, and containing a little copper and very little lead.

This sample was assayed fifty times in 8 laboratories, with the following results:

| $\theta$ | Gold fineness. |  | Gold fineness. |
| :---: | :---: | :---: | :---: |
| 1 assay showed. | . 588.9 | 6 assays showed | 589.6 |
| 3 assays showed | . 589.0 | 2 assays showed | 589.7 |
| 4 assays showed. | . 589.1 | 5 assays showed | 589.8 |

| 7 assays showed. | . 589.3 | - |  |
| 7 assays showed. | - 589. 4 | 50 |  |
| 9 assays showed. | 589.5 |  |  |

The averages obtained in the different laboratories were as follows:

| Gold <br> fineness. | Gold <br> fineness. | Gold <br> fineness. |
| :---: | :---: | :---: |
| - | 589.040 | 589.417 |
| 589.400 | 589.475 | 589.567 |
| 589.400 | 589.483 |  |

A simple inspection of these results shows very clearly that zinc alone does not materially militate against agreement in the assay work itself, and if it is the cause of the trouble with cyanide bars it must be owing to its causing segregation, and thus preventing the proper sampling of the bars by chipping or boring. Other elements may also be active in producing segregation in such bars, either by themselves or through combinations with the zinc or other metals present. A low-grade and very base bar along this line was prepared to run about 100 fine in zinc, 200 fine in copper, and 50 fine in lead. It was about 268 fine in gold and 370 fine in silver. This bar was very hard, and it was impossible to prepare identical samples for the various laboratories. It was simoly cut into pieces and a piece sent to each institution.

This sample was assayed forty-four times in 8 laboratories, and while the difference between the highest and the lowest result is only 1.7 fine, yet the results are scattered all along through the range, and there is only a slight concentration of the results about one point. This is, of course, due in part to the fact that the samples assayed were not identical.

The results obtained were:

|  | Gold fineness. |  | Gold fineness. |
| :---: | :---: | :---: | :---: |
| 1 assay showed. | 268.0 | 1 assay showed. | 268.9 |

| 3 assays showed. | . 268.8 | 44 |  |

It has long been known in a practical way that the presence of arsenic in a gold bullion prevents any agreement in the assays. Fortunately, however, the presence of assenic very plainly reveals itself in the melting of the bullion, and when found the melter proceeds to refine the bullion in the pot, and ultimately removes it very completely before the bullion can be accepted.

Three test samples containing arsenic were prepared, and they yielded most astonishing and interesting results. The first sample was approximately 785 fine in gold, 107.5 fine in silver, 100 fine in copper, and 7.5 fine in arsenic. This is only a small proportion of arsenic, and yet it completely prevented any agreement whatever in the assay results. This sample was assayed sixty-five times in 10 laboratories. The lowest result obtained was 779.7 fine in gold, and the highest 792.4 , with an extreme difference of 12.7 in the fineness. Moreover, there is the utmost divergence in the results as well as no agreement whatever; 30 results were obtained only a single time each, 11 only twice each, 3 only three times each, and only a single result was obtained four times. In only three instances did one laboratory obtain the same result twice.

A sample approximately 675 fine in gold, 200 fine in silver, 100 fine in zinc, 24 fine in lead and copper, and only 1 fine in arsenic yielded a trifling better set of results; but still very widely divergent. This sample was assayed sixty-two times in 10 laboratories. The lowest result obtained was 671.4 fine in gold, and the highest 681.4, showing an extreme difference of 10 in the fineness; 31 results were obtained a single time only, 10 only twice each, 2 only three times each, and only a single result was obtained five times. In three instances one laboratory obtained the same result twice, and in one case a laboratory obtained the same result three times.

It would appear, however, that the influence of arsenic upon the assaying of highgrade bullion containing only trifling amounts of base metals is far less injurious. While the results on a sample running approximately 865 fine in gold, 130 fine in silver, 1 fine in arsenic, and only 4 fine in other base metals can not be considered satisfactory, yet they are very much better than those yielded by the other two arsenical bullions. This ample was assayed fifty-three times in 9 laboratories, with the following results:

The averages obtained in the different laboratories were:

| Gold fine- <br> ness. | Gold fine- <br> ness. | Gold fine- <br> ness. |
| :---: | :---: | :---: |
| 864.933 | 865.233 | 865.500 |
| 865.183 | 865.286 | 865.517 |
| 865.200 | 865.300 | 865.717 |

As in so many other directions, antimony behaves similarly to arsenic in assaying gold bullion, but its influence is not so pronounced. A sample of bullion approximately 723 fine in gold, 245 fine in silver, 1 fine in antimony, and 31 fine in mixed base metals, copper, lead, zinc, was assayed forty-six times in nine laboratories. The lowest assay obtained was 721.3 , and the highest 725.1 , showing a range of 3.8 in the fineness. However, 24 of the results, or just over a half, ranged from 722.8 to 723.9 fine, and outside this range only two results were obtained more than a single time.

Finally, some of our gold coin was melted up and assayed one hundred and seven times on identical samples in 5 laboratories, with the following results:

|  | Gold fineness. |  | Gold fineness. |
| :---: | :---: | :---: | :---: |
| 6 assays showed. | .. 899.6 | 32 assays showed. | 900.0 |
| 10 assays showed. | . 899.7 | 5 assays showed. | 900.1 |
| 26 assays showed. | . 899.8 | - 107 |  |
| 28 assays showed. | . 899.9 | 107 |  |

The actual average of this sample is 899.879 fine in gold.
With these results as a basis, the investigation of the subject is being continued with the hope of ascertaining the causes of the variations shown and improving the agreement in the results attained. It is, for instance, well known that gold cornets are not pure gold. They always carry some silver, and I have never failed to find copper in them when tested for with great care. On several occasions I have found lead present on testing the silver nitrate solution from parting a large number of cornets at one time in a platinum basket. The amounts of these base metals present in the cornets are, of course, quite small, and their influence is corrected by the proof assay, in the same way that it corrects for the silver left in the cornets. I am, however, carrying on a series of quantitative determinations of base metals present in gold cornets, the results of which I hope to publish at some future date. Again, it is assumed that the proof furnishes a very close correction for the assays, but it is evident that the proofs themselves must be subject to variations and it is known that cupels containing proofs and touching each other in the furnance may show appreciably different results. A very large collection of proof figures is being made for the purpose of studying this question. Also the question of absorption of the precious metals by the cupel is most important and is being investigated.

## PROCEEDINGS OF THE ASSAY COMMISSION, 1909.

The following-named gentlemen are hereby designated as commissioners to test and examine the weight and fineness of the coins reserved at the several mints during the calendar year 1908, pursuant to the provisions of section 3547 of the Revised Statutes:

Hon. William E. Borah, United States Senate; Hon. George E. Roberts, Chicago, Ill.; Hon. William H. Edmunds, Yankton, S. Dak.; Dr. S. Weir Mitchell, Philadelphia, Pa.; Prof. Leverett Mears, Williams College, Mass.; Mr. Ambrose Swasey, Cleveland, Ohio; Mr. Gardner F. Williams, Washington, D. C.; Mr. James H. Manning, Albany, N. Y.; Mr. Farran Zerbe, Tyrone, Pa.; Mr. John E. Wilkie, Washington, D. C.; Mr. Joseph Auld, Burlington, Vt.; Mr. H. W. Child, Helena, Mont.; Mr. William. J. McCaughey, Washington, D. C.; Mr. George M. Root, Sioux Falls, S. Dak.; Mr. J. A. Cauldwell, WilkesBarre, Pa.; Hon. Ira W. Wood, House of Representatives; Mr. John Hays Hammond, New York, N. Y.; Hon. Pearl Wight, New Orleans, La.; Mr. J. B. Tiffany, New York, N. Y.; Dr. Willlam Sturgis Bigelow,

Boston, Mass.; Hon. William D. Bynum, Muskogee, Okla.; Mr. Truxton Beale, Bakersfield, Cal. (Dr. H. G. Torrey, ex officio member.)
The commission met at the mint at Philadelphia on February 10, 1909, and Hon. Ira W. Wood was elected chairman.
The following committees were appointed by the chairman with the approval of the commission:

Committee on counting.-Mr. Tiffany, chairman; Messrs. Manning, Zerbe, Auld, Cauldwell, and Child.

Committee on weighing.-Doctor Bigelow, chairman; Messrs. Wilkie, McCaughey, and Bynum.

Committee on assaying.--Professor Mears, chairman; Messrs. Williams, Mitchell, Swasey, Root, and Torrey.
The committee on counting reported that the packages containing the pieces reserved by the several mints for the trial of coins were delivered to them, and that they were compared with the transcripts kept by the Director of the Mint and found to be correct. After verification the coins were delivered to the committees on weighing and assaying.

The coins reserved by the mints for the purposes of the assay commission were as follows:

Gold coins from the mint at Philadelphia, 6,397, of the value of \$99,205.
Silver coins from the mint at Philadelphia, 8,102, of the value of $\$ 1,400.05$.

Gold coins from the mint at San Francisco, 164, of the value of \$1,450.

Silver coins from the mint at San Francisco, 2,827, of the value of $\$ 671$.

Silver coins from the mint at New Orleans, 6,697, of the value of $\$ 2,210$.

Gold coins from the mint at Denver, 2,212, of the value of $\$ 31,540$.
Silver coins from the mint at Denver, $8 ; 279$, of the value of $\$ 1,918$.
The coins reserved on account of coinage executed for the Philippine Islands were as follows:

The committee on assaying reported receiving and making assays of coins reserved from the mints at Philadelphia, San Francisco, New Orleans, and Denver, representing the deliveries made by the coiners to the superintendents during the calendar year 1908.
The highest assay value of the gold coinage (the limit of tolerance being one one-thousandth) was at-

The lowest assay value of the gold coinage (the limit of tolerance being one one-thousandth) was at-

[^12]The highest assaty value of the silver coinage (the limit of tolerance being three one-thousandths) was at-

The lowest assay value of the silver coinage (the limit of tolerance being three one-thousandths) was at-

The highest assay value ${ }^{a}$ of the Philippine silver coinage was at -

|  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |

The lowest assay value of the Philippine silver coinage was at -
San Francisco (pesos) ......................................................................................799. 2

The committee also tested the quartation silver and found it free from gold, and the lead used in the assay of gold bullion and found it free from gold and silver. The acid used in the humid assay of silver was found to be free from silver and also from chlorine.

The balances used were tested and found to be correct.
The committee reported the assays as entirely trustworthy, and that none of the coins tested differed from the standard of fineness by a greater degree than the amount allowed by law.

The committee on weighing respectfully reported examining sample coins selected at random from those reserved by the several mints. The weighing was made on a balance by Henry Troemner, of Philadelphia. The weights employed were furnished under seal by the Director of the Bureau of Standards, and were accompanied by a certificate, stating their variations in mass from the standards fixed by law. The balance was carefully tested and.found to be sufficiently accurate without making corrections.

The secondary troy pound of the mint was compared with the standard pound and found to be correct within 1 part in 350,000 . Three separate pounds built up of working weights of the mint were found to be correct within 1 part in 50,000 .

The details of the weighings indicated that the deviations from the statutory standard weights of the coins examined were all within the legal tolerance, consequently the committee on weighing pronounced the examination of the weights of the coinage of the several mints during the year 1908 to be satisfactory.

The committee on resolutions submitted the following:
Recognizing that the national coin collection in the mint at Philadelphia is a serious educational institution, and that it is one deserving of greater financial aid that it may be made more complete and instructive, and that it is now inconsiderable, except in the coinage of the United States, when compared with cuin collections of many countries, be it
Resolved, That it is the sense of the members of the Annual Assay Commission of 1909 that the mint coin collection should be made as complete as possible; and that since there are over 100,000 visitors to the mint annually, many of whom, we believe,

[^13]would purchase a mint souvenir in the form of an artistic medal if they knew that the profits from the sale of such medal would be devoted to the improvement of the coin collection, it is

Recommended that a medal, of a different design each year, be made and offered for sale to visitors, and that the profits derived from the sale of such medal be devoted to the improvement of the national coin collection.

We further believe that the striking of this medal should be made close to public view, thus demonstrating the process of coining better than the distant view the visitors now have of the coining operations; and that medallic art effects not practical in our coinage could be produced in a medal.

Inasmuch as medals and medalettes have been sold to visitors at the mint for many years, the profits from which have not served a public purpose, it is believed that these resolutions can be made operative without congressional action. And be it further

Resolved, That the thanks of the members of the Assay Commission of 1909 be extended to the Director of the Mint, and to the superintendent, officers, and employees of the Philadelphia mint for their many courtesies during the session.

MINT OF THE UNITED STATES AT PHILADELPHIA, PA.
The following table shows by weight and value the gold and silver deposited during the fiscal year 1909:

| - Metal. | Deposits. | Redeposits. | Standard ounces. | Coinage value. |
| :---: | :---: | :---: | :---: | :---: |
| Gold. | 3,156 | 2,366 | 1,561, 534. 174 | \$29, 051, 798.69 |
| Silver | 655 | 226 | 3,838, 417. 59 | 4, 466, 522.29 |
| Total. | 3,811 | 2,592 | ................ | 33, 518, 320.98 |

Of the above amount of silver bullion $5,769.45$ ounces standard are the surplus bullion recovered by the melter and refiner in his operations during the fiscal year 1908, and of the above amount of gold bullion 475.511 ounces standard are the surplus bullion recovered by the melter and refiner in his operations during the fiscal year 1909.

## Assayer's Department.

The number of assays made in this department was as follows:

In addition to this, 350 ounces of proof gold and 475 ounces of proof silver were made.

Of the 417 melts of gold ingots made by the melter and refiner, 384 were passed; 33, while within the standard fineness required by law, were returned for remelting. No melts were condemned. There were 1,839 melts of silver ingots made, of which 1,831 were passed, 6 returned for remelting, and 2 condemned.

| The fineness of gold melts passed was: 8 melts at 899.6 |  |
| :---: | :---: |
|  |  |
| 22 melts at. | 899.7 |
| 79 melts at. | 899.8 |
| 99 melts at. | 899.9 |
| 146 melts at. | 900.0 |
| 26 melts at. | 900.1 |
| 7 melts at. | 900.2 |
| 1 melt at. | 900.3 |
| 384 |  |
| 13518-FI 1909-19 |  |

The fineness of silver melts passed was:
77 melts at ..... 898
542 melts at ..... 8983
280 melts at ..... 898 ..... 899
580 melts at
580 melts at
175 melts at ..... 8994
65 melts at ..... 8991
11 melts at
900
900
6 melts at ..... 900
1,831

## Melter and Refiner's Department.

During the fiscal year the melter and refiner received from the superintendent gold bullion containing by assay $3,332,697.306$ standard ounces, of the value of $\$ 62,003,670.81$, his legal allowance for wastage being $3,332.697$ standard ounces, of the value of $\$ 62,003.67$.

He also received silver bullion containing by assay $10,868,012.24$ standard ounces, of the value of $\$ 12,646,414.24$, his legal allowance for wastage being $16,302.02$ standard ounces, of the value of $\$ 18,969.62$. He returned to the superintendent $3,333,172.817$ standard ounces of gold and $10,862,727.65$ standard ounces of silver.

He operated upon bullion as follows:

The excess of gold and silver operated upon over the amounts charged during the year is due to duplicate operations.

Upon the settlement of the melter and refiner's accounts, June 30, 1909, there was found an apparent gain upon the gold bullion during the fiscal year of 475.511 standard ounces, and in the operations upon the silver bullion an apparent loss of $5,284.59$ standard ounces.
The melts made aggregate as follows:

|  | Melts. | Bars. | Ingots. | Anodes. | Deposits. | Special. | Total. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Gold.....Silver....Total |  | $\begin{aligned} & 188 \\ & 903 \end{aligned}$ | $\begin{array}{r} 417 \\ 1,839 \end{array}$ | 1,024 | 3, 405 | 371 | 5,4053,366 |
|  |  |  |  |  |  |  |  |
|  |  | 1,091 | 2,256 | 1,024 | 4,029 | 371 | 8,771 |

During the fiscal year two silver melts were condemned.

## Number, Weight, and Value of Gold and Silver Bars for Industrial Use.

During the year 183 barrels of sweeps were gathered, containing by assay $1,128.323$ standard ounces of gold and $3,743.35$ standard ounces of silver. There were 245 barrels of old sweeps reworked, containing by assay $1,619.100$ standard ounces of gold and $3,698.87$ standardou ouncess of sillver.

The operations of the refinery were as follows:

b Apparent loss.
Silver bullion sent to the refinery upon which refining charges were collected contained by assay $2,578,437.07$ standard ounces, and silver owned by the Government and returned to the refinery for parting purposes upon which no parting charges were collected contained by assay $571,436.07$ standard ounces.

Troy ounces.
During the year the melter and refiner received from the superintendent minor coinage metal $17,034,826.36$

| Delivered prior to settlement: |  |  |  |
| :---: | :---: | :---: | :---: |

|  |  | 1,517,954. 46 | $17,034,826.36$ |

## Coiner's. Department.

The coiner received gold, silver, nickel, and bronze from the superintendent during the fiscal year as follows:

During the fiscal year ended June 30, 1909, this department received $2,340,380.115$ standard ounces of gold, of which $2,242,109.995$ standard ounces, of the value of $\$ 41,713,674.325$, were operated upon, from which there were produced $1,060,116.222$ standard ounces of coin of the value of $\$ 19,723,092.50$, all delivered to the superintendent during the fiscal year prior to the settlement, and 165.820 standard ounces of coin delivered to the superintendent at settlement upon which there was a wastage of 60.192 standard ounces, of the value of $\$ 1,119.85$, being 5.14 per cent of the legal allowance.

The percentage of coin produced from the amount operated upon was 47.27 per cent.

During the same period the coiner also received $6,756,883.29$ standard ounces of silver, of which $6,568,728.99$ standard ounces, of the value of $\$ 8,172,621.66$, were operated upon, from which there were produced $3,816,614.92$ ounces of coin of the value of $\$ 4,748,510$ in subsidiary coin delivered to the superintendent during the fiscal year prior to settlement, and 19,969.79 standard ounces of coin delivered to the superintendent at settlement, upon which there was a wastage of $1,123.37$ standard ounces of the value of $\$ 585.14$, being 16.63 per cent of the legal allowance.

The percentage of coin produced from the amount operated upon was 58.41 per cent.

There were also delivered to the coiner during the same period $3,777,560.40$ ounces of nickel ingots, from which were produced $1,862,715.87$ ounces of 5 -cent pieces of the face value of $\$ 579,427.90$, upon which there was a wastage of $15,256.92$ ounces.
During the same period the coiner also received $11,739,311.50$ ounces of copper-bronze ingots, from which there were produced $5,323,326.90$ ounces of 1 -cent coin of the face value of $\$ 532,382.95$, upon which there was a wastage of $34,459.99$ ounces.

Owing to experimental work in new gold coins during the past year the percentage of coin produced from the amount of metal operated upon is somewhat lower than otherwise would have been.
The following table shows the coinage executed during the year:

## Engraver's Department.

All the dies used in the coinage operations of all the mints of the United States are made in the engraving department at Philadelphia.

The number of dies prepared for United States coinage last year was 2,230 . In addition 408 dies were made for Philippine coinage, 17 for San Salvador, 61 for medals, and 156 master dies, hubs, and experimental dies for the new gold and minor coinage.

The following table shows the number of proof coins and medals and their nominal value manufactured during the fiscal year:

| Article. | Pieces. | Nominal value. |
| :---: | :---: | :---: |
| Gold medals. | 154 | \$4,542.86 |
| Silver medals. | 1,562 | 1,308.06 |
| Bronze medals.. | 43, 109 | 9,764.99 |
| Silver-proof coins. | 1,872 | 530.40 |
| Minor-proof coins. | 5,828 | 174.84 |
| Total. | 53,291 | 22,158.65 |

## MINOR COINAGE.

The manufacture of the 1 -cent bronze and 5 -cent nickel coins has, until this fiscal year, been confined to the Philadelphia mint. The Fifty-ninth Congress at its first session authorized the making of these coins at the other mints, and a few 1-cent bronze pieces were made during the fiscal year at the San Francisco mint.

The coinage of minor coin during the fiscal year 1909 at the Philadelphia mint is shown in the following table:

|  | Denomination. | Value. |
| :---: | :---: | :---: |
| 1-cent bronze. |  | \$532,382.95 |
| 5-cent nickel.. |  | 579, 427.90 |

No blanks for minor coinage were purchased during the fiscal year.
The amount of metal purchased for the manufacture of minor coinage was 217,192 avoirdupois pounds, at a cost of $\$ 28,589.74$.

The amount of uncurrent copper, nickel, and bronze coins transferred from the Treasury during the year for conversion into current coins, cost, and seigniorage are shown by the following table:

The seigniorage, or gain, on recoinage of minor coin was $\$ 3,324.34$, as against a loss of $\$ 10,666.69$, showing a net loss of $\$ 7,342.35$.

The seigniorage on the coinage of nickel and bronze coins coined from purchased metal was $\$ 830,877.04$, which, less a net loss of $\$ 7,342.35$ on the recoinage of minor coin and a wastage of the operative officers in the minor coinage operations of $\$ 1,323.75$, gives a net seigniorage on minor coin of $\$ 822,210.94$.

The total amount of the several types of minor coin manufactured at this mint from 1793, when the first coinage of copper cents was made, until June 30, 1909, aggregated $\$ 53,819,274.52$. There have been melted for recoinage $\$ 5,003,859.44$, leaving outstanding June 30, $1909, \$ 48,815,415.08$, the product of this mint.

The several types and denominations of minor coin issued, manufactured by the mint at Philadelphia since its establishment, the amount remelted, and the amount outstanding June 30, 1909, are set forth in the following table:

Minor Coins Issued, Remelted, and Outstanding.

| Denomination. | Coined. | Remelted. | Outstanding June 30, 1909. |
| :---: | :---: | :---: | :---: |
| Copper cents. | \$1,562, 887.44 | \$380, 542.45 | \$1, 182, 344. 99 |
| Copper half-cents. | 39,926. 11 |  | 39, 926.11 |
| Copper-nickel cents. | 2,007,720.00 | 802, 835. 55 | 1,204, 884.45 |
| Bronze cents. | 17,094, 680.00 | 348, 458.16 | 16,746, 221.84 |
| Bronze 2-cent pieces | 912,020.00 | 339, 667.82 | 572,352. 18 |
| Nickel 3-cent pieces. | 905, 768. 52 | - 282,668. 86 | 623,099.66 |
| Nickel 5 -cent pieces. | 31,296, 272.45 | 2,849,686.60 | 28,446, 585.85 |
| Total. | 53,819, 274. 52 | 5,003,859.44 | 48,815,415.08 |

Minor coins to the amount of $\$ 1,078,229.95$ have been distributed throughout the States and Territories of the United States during the fiscal year $1909 — \$ 656,963.10$ in nickel 5 -cent pieces and $\$ 421,266.85$ in bronze 1-cent pieces.

The expenditure for the distribution of minor coin for the same period was $\$ 2,757.68$.

## All Seigniorage.

The seigniorage on the coinage of purchased metal for the fiscal year was $\$ 2,901,384.28$, as shown by the following table:

|  | Coined. | Seigniorage. |
| :---: | :---: | :---: |
| Subsidiary silver coins. | \$3, 586,510.00 | \$2, 070, 507. 24 |
| Minor coins............ | 1, 111, 810.85 | 830,877.04 |
| Total. | 4,698,320.85 | 2,901, 384. 28 |

Visitors.
A large number of visitors from all States of the Union and from foreign countries visited the mint during the year, 70,992 having been shown through by the several guides.

## Number of Employees.

The force of employees at the end of this fiscal year shows a reduction of 12 from the number carried on the rolls at the end of the previous fiscal year. The total number on the rolls at the close of the fiscal year was 460 , distributed in the several departments as follows:

| Department. | Male. | Female. | Total. |
| :---: | :---: | :---: | :---: |
| General. | 184 | 43 | 227 |
| Assayer's. | 13 | - | 13 |
| Melter and refiner's. | 64 |  | 65 |
| Coiner's. | 91 | 48 | 139 |
| Engraver's. | 16. |  | 16 |
| Total. | 368 | 92 | 460 |

Percentage of Loss in Melting during the Fiscal Year ended June 30, 1909.

## MINT OF THE UNITED STATES AT SAN FRANCISCO, CAL.

During the fiscal year ended June 30, 1909, one change was made among the operative officers of this mint, Mr. E. R. Leach becoming melter and refiner, on August 4, 1908, succeeding Mr. C. M. Gorham, who resigned. Mr. Gorham had given many years of faithful services to the Government, having been assistant coiner, and coiner, in this mint for over thirteen years, and melter and refiner for nearly seven years.

The manufacture of United States minor coin was instituted at this mint during the year, and on November 27, 1908, the first 1-cent pieces ever made at the San Francisco mint were delivered by the coiner to the superintendent. The 1-cent bronze pieces struck during the year amounted to $\$ 14,240$.

The following table shows by weight and value the gold and silver deposited during the fiscal year:

| Metal. | Deposits. | Redeposits. | Standard ounces. | Coinage value. |
| :---: | :---: | :---: | :---: | :---: |
| Gold <br> Silver | 7,544 4,988 | 233 | $\begin{aligned} & 2,203,992.107 \\ & 9,196,212.29 \end{aligned}$ | $\begin{array}{r} \$ 41,004,504.31 \\ . \\ .10,701,047.02 \end{array}$ |
| Total. | 12, 532 | 233 |  | 51, 705, 551. 33 |

Of the above amount of silver bullion $8,127,302.80$ standard ounces of Philippine silver coin were received for recoinage for the government of the Philippine Islands.

Assay Department.
The following tables show the operations of the department for the fiscal year ended June 30, 1909:

## Ingot melts were passed as follows:

| Fineness. | Melts. | Fineness. | Melts. |
| :---: | :---: | :---: | :---: |
| GOLD INGOTS. |  | SILVER INGOTS. |  |
| 899.6 | 29 | 898.5. | 31 |
| 899.7 | 201 | 898.6 | 155 |
| 899.8. | 511 | 898.7 | 2 |
| 899.9. | 625 | 898.8 . | 122 |
| 900.0 | - 299 | 899.0. | 6 |
| 900.1. | 57 | 899.1. | 138 |
| 900.2 | 7 | 899.3 . | 87 |
| 900.3 . | 1 | 899.5 | 73 |
| Total passed | 1,730 | 899.8. 900.0 | 32 |
| Condemned...... | 1,75 | 900.2 |  |
| Total made.. | 1,735 | Total passed | 649 |
|  |  | Condemned. | 12 |
|  |  | Total made. | 661 |

PHILIPPINE COINAGE.

## MElter and Refiner's. Department.

The melter and refiner received and operated upon gold and silver bullion during the fiscal year, as follows:

The same officer operated upon the following minor coinage metal:

| MINOR COINAGE METAL. |  |
| :---: | :---: |
| Received: | Troy ounces. |
| Copper account United States minor coinage. | 583, 333. 32 |
| Philippine coins, account Philippine Island recoinage | 648,632. 20 |
| Clippings................................................. | 508,661.04 |
| Alloy (zinc and tin). | 43, 545.82 |
| Settlement bullion, A pril 1, 1909. | 455,383. 78 |
| Total. | 2,239,556.16 |
| Delivered: | 2,230,556. 10 |
| Ingots.... | 1,316, 474. 60 |
| Settleraent, March 31, 1909. | 455,383.78 |
| Settlement, June 30, 1909.. | 461, 796.03 |
| Total. | . $2,233,654.41$ |
| Wastage. | 5,901.75 |

Ingot Meliss Made.

|  | Metals. | Number. | Condemned. |
| :---: | :---: | :---: | :---: |
| Gold . |  | 1,729 | 5 |
| Silver |  | 10,850 | 38 |
| Bronze. |  | 943 |  |

Bronze ingots for the coinage of American ${ }^{\circ} 1$-cent pieces and Philippine 1-centavo pieces were made this year for the first time, no difficulty whatever being experienced in their manufacture.

In addition to the fine gold and silver produced, 90,459 troy ounces of electrolytic copper were recovered from the crude bullion and scrap copper used in the refinery operations. As this copper can be used for alloy for gold and silver coin, and as an arrangement has been made whereby the refinery will get credit for it, the production of electrolytic copper will be a source of considerable income for the refinery.

During the year we discarded the horizontal system of silver refining for the vertical, which we find very much cheaper and more satisfactory in every respect.

All deposits of fine gold assaying less than 999 were sent to the refinery and rerefined. The large excess in silver is due to the recovery of silver from these deposits.

## SWEEP CELLAR.

There were gathered in sweeps 292 barrels, containing 819.880 standard ounces of gold and $5,497.52$ standard ounces of silver.

During the fiscal year ended June 30, 1909, the coiner operated on $4,959,391.800$ standard ounces of gold, $17,568,001.39$ standard ounces of silver, and $1,316,474.60$ troy ounces of copper.
He delivered to the superintendent during the same period $2,839,666.250$ standard ounces of gold coin, valued at $\$ 52,831,000$; $9,755,659.52$ standard ounces of silver coin, valued at $\$ 16,627,114$, and 796,502 troy ounces of copper coin, valued at $\$ 53,486.12$.

Of the above, $557,147.86$ standard ounces in silver pesos were coined for the Government of San Salvador, and 8,775,739.16 standard ounces of silver coin, in pesos and subsidiary, and 654,102 troy ounces of copper were coined for the government of the Philippine Islands.
The following table exhibits the coiner's deliveries for the fiscal year:

SAN SALVADOR.

PHILIPPINE ISLANDS.

| Silver: |  | Pesos. |
| :---: | :---: | :---: |
| Pesos. | 14,546,944 | 4,546, 944.00 |
| 50 centavos | 1,092,000 | $546,000.00$ |
| 20 centavos. | - 705,000 | 141,000.00 |
| 10 centavos. | 1,740,000 | 174,000.00 |
| Total. | 18,083,944 | 15,407,944.00 |
| Minor: 1 centavo. | 3,924,612 | 39,246.12 |

The number of pieces coined aggregated $29,051,826$. The coinage of gold for fifty continuous working days amounted to $\$ 51,382,500$. The percentage of coin produced from the amount operated upon was: Gold, 58.47 ; silver, 57.17 ; copper, 56.15.

From the operation on gold there was an excess of 2.367 ounces and from the operations' on silver a wastage of $9,391.13$ ounces, or 58.55 per cent of the legal allowance.

A few months' trial of the new water-cooled rolling mill, which was installed during the year, has demonstrated that this roll is a great improvement over the old machines in lessening the vibration and noise, formerly so objectionable, and in increasing the accuracy of the work. The continuous flow of water keeps the roll cool and at an even temperature, thus preventing the expansion that was so hard to guard against under the old methods.

The bronze coins manufactured at this mint during the year were made on the silver presses. Two new presses for bronze coining are now being installed to handle this class of work.

## NUMBER OF EMPLOYEES.

The total number of employees in this mint at the close of the fiscal year 1909 was 237 , distributed as follows:

| Department. | Male. | Female. | Total. |
| :---: | :---: | :---: | :---: |
| General. | 85 | 1 | 86 |
| Assayers. | 14 |  | 14 |
| Melter and refiners. | 61 |  | 61 |
| Coiners. | 38 | 38 | 76 |
| Total. | 198 | 39 | 237 |

The number of employees during the year approximated 311, but in June 26 men and 48 women were furloughed:

VISITORS.
During the year 51,038 visitors were shown through the mint.
Percentage of Loss in Melting Gold Deposits.

## MINT OF THE UNITED STATES AT NEW ORLEANS, LA.

The standard weight and value of gold and silver deposited at the mint during the fiscal year was as follows:

There were purchased over the counter 2,745.417 standard ounces of uncurrent domestic gold coin, of the face value of $\$ 51,793.50$ producing in new coin, $\$ 51,077.53$, showing a loss in recoinage of $\$ 715.97$; and 123.33 standard ounces of uncurrent domestic silver coins, of the face value of $\$ 157.30$, producing in new coins $\$ 153.44$, showing a loss in recoinage of $\$ 3.86$.

The Treasurer transferred for recoinage uncurrent domestic subsidiary silver coins of the face value of $\$ 85,425$, containing $63,209.40$ standard ounces, producing in new coins $\$ 78,643.11$, showing a loss by wear of $\$ 6,781,89$.

There were deposited 127.777 standard ounces (unrefined) domestic bullion, producing in gold coin $\$ 2,377.24$.

There were deposited $1,468.88$ standard ounces (unrefined) silver domestic bullion, producing $\$ 1,709.24$.
There were deposited $41,679.317$ standard ounces (unrefined) gold foreign bullion, producing in gold $\$ 775,429.15$.
There were deposited $21,995.43$ standard ounces (unrefined) silver foreign bullion, producing $\$ 25,594.68$.

The following table shows the countries from which the bullion was received:

| Country. | Gold. |  | Silver. |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Standard ounces. | Coinage value. | Standard ounces. | Coinage. value. |
| Mexico. | 448.621 | \$8,346. 43 | 145.10 | \$168.84 |
| Nicaragua. | 39, 506. 139 | 734, 997.93 | 21,681.65 | 25,229.56 |
| Honduras. | 172.767 | 3,214, 27 | - 40.25 | 46.84 |
| Guatemala. | 1, 532.373 | 28, 509.27 | 124.37 | 144.72 |
| Colombia, South America. | 19.417 | 361.25 | 4.06 | 4.72 |
| Total. | 41, 679.317 | 775, 429.15 | - $21,995.43$ | 25, 594.68 |

Foreign gold coin containing 262.173 standard ounces of the coinage value of $\$ 4,877.64$ and foreign silver coin containing $19,658.50$ standard ounces of the value of $\$ 22,875.34$ in standard silver dollars was received.

Gold bullion amounting to $3,069.596$ standard ounces and coinage value of $\$ 57,108.63$, and silver bullion amounting to $6,469.17$ standard ounces and coinage value of $\$ 7,528.39$ in standard silver dollars was obtained from jewelers' bars, old plates, etc.

Percentage of Loss in Melting.

The number of employees during the fiscal year were as follows (the superintendent and operative officers not included):

## Assayer's Department.

The following is the assayer's report of the fineness of the silver and gold ingot melts passed during the fiscal year 1909:

| Fineness. | Melts. | Fineness. | Melts. |
| :---: | :---: | :---: | :---: |
| GOLD INGOTS. |  | silver ingots. |  |
| 899.5. | 1 | 898.6..... | 43 |
| 899.8. | 3 | ${ }_{899.1 . .}$ | 88 |
| 900.0 | 5 | $899.3 \ldots .$. | 51 |
| 900.1. | 1 | 899.4........ | 6 |

| Mint bureau samples. | 23 |  | 23 |
| Transfer orders |  | 3 | 3 |
| Sweeps.. | 3 | 14 | 17 |
| Total. | 1,033 | 1,667 | 2,700 |

## Melter and Refiner's Department.

The melter and refiner received and operated upon $163,824.384$ standard ounces of gold bullion, and returned at the settlement $148,230.658$ standard ounces, showing a surplus of 73.015 standard ounces. He also received and operated upon 4,297,687.35 standard ounces of silver and returned at the settlement $80,704.95$ standard ounces, showing a gain of 401.82 standard ounces. From 64 barrels of sweeps there were obtained 68.946 standard ounces of gold and $2,833.69$ standard ounces of silver.
The number of gold and silver melts made and the number condemned by the assayer is as follows:

## Melts Made during the Year.

## REFINERY OPERATIONS.

The weight of gold and silver operated upon in the refinery is as follows:

|  | Items. | Standard ounces. |
| :---: | :---: | :---: |
| Gold bullion. |  | 53,934.799 |
| Silver bullion. |  | 126,064. 44 |

Amount of bullion received from the refinery :

|  | Items. | Standard ounces. |
| :---: | :---: | :---: |
| Gold bullion. <br> Silver bullion. |  | $\begin{gathered} 53,906.416 \\ 126,064.44 \end{gathered}$ |
|  |  |  |

Thus showing loss in gold of 28.383 standard ounces and gain in silver of 913.21 standard ounces.
Silver bullion on which charges were collected contained 35,742.62 standard ounces; silver bullion owned by the Government on which there was no charge contained $89,408.61$ standard ounces.

## Conner's Department.

During the fiscal year the coiner received and operated upon $4,246,412.60$ standard ounces of silver and $14,770.900$ standard ounces of gold.
He manufactured during the same period $2,386,574.875$ standard ounces of silver coin, valued at $\$ 2,969,300$, and $9,191.250$ standard ounces of gold coin, valued at $\$ 171,000$, aggregating $10,689,600$ pieces, as shown by the following table:

|  | Denomination. | Pieces. | Value. |
| :---: | :---: | :---: | :---: |
| Gold: . . 2171 |  |  |  |
| Half eagles. |  | 34,200 | \$171;000.00 |
| Total gold. |  | 34, 200. | 171,000.00 |
| Silver: . |  |  |  |
| Hall dollars. |  | 3, 667, 400. | 1, $833,700.00$ |
| Quarter dollars. |  | 2,912,000 | 728,000.00 |
| Dimes. |  | 4,076,000 | 407,600.00 |
| Total silver. |  | 10,655, 400 | 2,969,300.00 |
| Total coinage. |  | 10, 689, 600 | $3,140,300.00$ |

The percentage of coin produced from the amount operated upon was, silver, 56.20 ; gold, 62.22 .

At the annual settlement of his accounts it was found that there had been a wastage during the year of $1,037.075$ standard ounces of silver, being 24.42 per cent of the legal allowance, and of gold 0.813 standard ounce, being 11.008 per cent of the legal allowance.

## MINT OF THE UNITED STATES AT DENVER, COLO.

The standard weight and value of bullion received during the fiscal year 1909 was as follows:

Domestic bullion, unrefined, carried $496,239.124$ standard ounces gold of a coinage value of $\$ 9,232,355.79$, and $334,906.50$ standard ounces silver of a coinage value of $\$ 389,709.38$.

From chlorination and cyanide plants were received $365,537.969$ standard ounces gold of a coinage value of $\$ 6,800,706.39$, and 17,685.52 standard ounces silver of a coinage value of $\$ 20,579.51$.

Purchases for subsidiary silver coinage aggregated $1,003,642.72$ standard ounces of a coinage value of $\$ 1,167,875.16$ in standard dollars, or $\$ 1,248,700.12$ in subsidiary silver coin.

Redeposits by United States assay offices amounted to $995,471.779$ standard ounces gold of a coinage value of $\$ 18,520,405.19$, and 163,646.61 standard ounces silver of a coinage value of $\$ 190,425.15$.
There were purchased over the counter during the year gold and silver coins of a face value, respectively, of $\$ 552$ and $\$ 32.50$, and of a coinage value of $\$ 511.52$ in gold and $\$ 34.88$ in subsidiary silver.

PERCENTAGE OF WEIGHT REMOVED IN MELTING.
The following table exhibits the percentage of weight removed in melting deposits for the year:

|  | Description. | , | Weight before melting. | Base removed. | Per centremoved. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Gold: |  |  | Ounces. | Ounces. |  |
| Bars. |  |  | 710,084. 89 | 2,360. 62 | 0.0033 |
| Retorts. |  |  | 184, 927. 05 | 2,643. 74 | . 0142 |
| Dust.. |  |  | 2,698.76 | 114.29 | . 0423 |
| Gold exchanges.. |  |  | 931.58 5 | 1.81 | . 0019 |
| Miscellaneous.... |  |  | 5,267. 28 | 62.50 | . 0118 |
| Sllver: |  |  |  |  |  |
| Bars.. |  |  | 275,793. 40 | 2,551.39 | . 0092 |
| Retorts. |  |  | 27,900. 76 | 572.70 | . 0205 |
| Dust.. |  |  | 109.54 | 14.84 | . 1354 |
| Silver exchanges. |  |  | 2,236. 68 | 41.35 | . 0184 |
| Miscellaneous... |  |  | 2,598. 28 | 53.73 | . 0206 |

The main halls and stairways of this mint building have been very handsomely decorated, the designs being highly artistic, and several mural paintings typical of mining, manufacturing, and commerce, reflecting exceptional talent in conception and execution on the part of the artist, adorn the vestibule and corridor at the main entrance.
The elaborate carvings of patriotic designs on marble slabs over the main doorway and 13 windows have been completed.

New, and what are believed to be highly effective, ventilating devices have been installed in the refinery.

During the year 91,954 visitors witnessed coinage operations from the balconies.

## OFFICERS AND EMPLOYEES.

The number of officers and employees in the mint at the close of the fiscal year was as follows:

## Assayer's Department.

The operations of this department during the fiscal year 1909 were as follows:

| Number of samples operated on. |  |  |  |
| :---: | :---: | :---: | :---: |
| Items. | Gold. Silver. Total. |  |  |

|  |  |  |  |

## Melter and Refiner's Department.

The melter and refiner received from the superintendent during the fiscal year 1909:

The surplus was recovered from unreported fractions of assays, from the difference between standard and actual fineness of ingots delivered, and from fractional gains in weights of deposits.

The following melts were made:

|  | Melts. | Gold. | Silver, | Gold and silver. | Total. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Deposits |  | 4,175 | 623 |  | 4,798 |
| Anodes. |  | 144 | 676 |  | 820 |

| Total. |  | 5,209 | 2,203 | 1,652 | 9,064 |

Ingot melts condemned: None. Remelts: Gold, 1; silver, none.
The sweeps cellar extracted $1,436.204$ standard ounces of gold and $3,199.24$ standard ounces of silver, and produced 974 sacks of mill tailings which contained 324.562 standard ounces of gold and 1,949.86 standard ounces of silver.

Refinery operations, covering a period of nearly ten months, were as follows:

The refinery also recovered 39.35 ounces of sponge platinum and 1,352 avoirdupois pounds of electrolytic copper.

## Earnings of Refinfry.

## Coiner's Department.

## 0

During the fiscal year 1909 the coiner received from the superintendent $2,812,280.060$ standard ounces of gold, making therefrom $\$ 35,455,000$ in coin, on which there was a wastage of 52.538 standard ounces, being 3.73 per cent of the legal allowance.

During the same period the coiner received from the superintendent $3,451,574.05$ standard ounces of silver, making therefrom $\$ 2,850,000$ in subsidiary silver coin, on which there was a wastage of $1,201.58$ standard ounces, being 34.81 per cent of the legal allowance.

The following table shows the denomination, number of pieces, and the value of the coin made.

| Denomination. | Pieces. | Value. |
| :---: | :---: | :---: |
| Gold: |  |  |
| Double eagles. | 401,250 | \$8,025,000 |
| Eagles.... | 958,000 | $9,580,000$ 17550 |
| Half eagles. | 3,570,000 | 17,850,000 |
| Total. | 4,929,250 | 35,455,000 |
| Silver: |  |  |
| Half dollars. | 780,000 | 390,000 |
| Quarter dollars. | 7,968,000 | 1,992,000 |
| Dimes. | 4,680,000 | 468,000 |
| Total. | 13,428,000 | 2,850,000 |
| Total coinage. | 18,357, 250 | 38,305,000 |

The per cent of coin produced from the amount of ingots operated on was: Gold, 67.76 per cent; subsidiary silver, 66.37 per cent.

## assay office of the United states at new york, n. y.

The report on the business of this office for the fiscal year 1909 is as follows:

| Bullion received. | Deposits. | Redeposits. | Standard ounces. | Coinage value. |
| :---: | :---: | :---: | :---: | :---: |
| Gold. Silver. | 10,557 2,375 | ${ }^{\frac{1}{5}}$ | $\begin{aligned} & 3,210,774.615 \\ & 4,883,286.60 \end{aligned}$ | $\begin{array}{r} \$ 59,735,341.67 \\ 5,682,338.76 \end{array}$ |
| Total. | 12,932 | 26 |  | $65,417,680.43$ |

The gross weight of the above bullion was $7,597,984.99$ ounces, a decrease from last year of $4,223,140.42$ ounces.

The value of the foreign gold bullion and coin deposited was $\$ 11,551,-$ 049.93, a decrease from last year of $\$ 67,637,342.35$.

The value of the domestic gold coin and bullion deposited was $\$ 48,184,291.73$, a decrease from last year of $\$ 4,419,350.96$.
The sources of domestic gold bullion and coin were as follows:

| From new production in United States and Territories. | 86, 430, 774. 21 |
| :---: | :---: |
| For private refineries | 37, 415, 804.31 |
| From jewelers, bars, plate, etc | 3,801,527. 36 |
| From redeposited bullion. | 203.70 |
| From United States gold coin of light weigh | 535,982. 15 |
| Total. | 48,484, 291. 73 |

This statement shows a decrease compared with last year in the amount of gold bullion received from private refineries of $\$ 4,151,240.11$ and from United States gold coin of light weight of $\$ 250,000.12$.

Of the fine silver received during the year, $1,443,504.70$ standard ounces consisted of Treasury purchases.

The redeposited silver consisted of $52,138.48$ standard ounces, contained in fine bars made at this office, and 29,173.87 standard ounces, contained in fine bars made at the mint of the United States, Philadelphia, Pa., and 98.12 standard ounces, contained in unparted bars made at the United States assay office, Deadwood, S. Dak.

The unparted bullion received during the year has been transmitted to the United States mint, Philadelphia, Pa., for treatment, as the parting operations have not been resumed during the year.

The surplus bullion recovered by the melter and refiner in his operations was 735.98 ounces, fine silver, and he incurred a wastage of 110.354 ounces, fine gold.

The amount of bullion delivered to and returned by the melter and refiner to the superintendent during the fiscal year 1909 was as follows:

The grains and fluxes from the deposit melting room yielded $\$ 7,483.61$, the sweeps ( 54 barrels) $\$ 5,527.05$.

There were stamped during the year 47,434 gold bars and 13,379 silver bars; previous year 50,903 gold bars and 15,451 silver bars.

showing an increase of $\$ 2,335,601.64$ compared with last year.
The value of gold bars exchanged for gold coin for export was $\$ 17,390,896.26$, being a decrease compared with last year of $\$ 23,408,291.70$. The income from the exchange of gold bars for gold coin was $\$ 16,692.84$.

The force employed in this office at the close of the year comprised 77 men and 2 women, including the superintendent, assayer, melter, and refiner, and others distributed as follows:

No actual operations on the new refinery building have taken place during the fiscal year ended June 30, 1909, but operations are now under way.

## Assayer'ṣ Defartment.

There were assayed 10,557 melts of gold deposits and 2,375 melts of silver deposits, a total of 12,932 melts, involving 64,790 assays. The fine gold and fine silver melts assayed were about 462, and the fineness was stamped upon 47,434 bars of gold and 13,379 bars of silver, a total of 60,813 .
Special assays numbered 898, being largely samples of articles of jewelry and manufacturers' samples.

Assays were made on 155 barrels of sweeps and on 140 consolidated melts for shipment to the United States mint at Philadelphia, Pa., with the usual incidental ones for the melter and refiner, etc.

All proof gold, proof silver, and cupels used were made in this department.

## Melter and Refiner's Department.

The melter and refiner received during the fiscal year 1909 the following metal:

| Items. | Gross amount. | Standard gold. | Standard silver. |
| :---: | :---: | :---: | :---: |
| Settlement metal, June 30, 1908. | Standard oz. 240,779. 73 | Standard oz. 94, 389. 849 | Standard oz. 140,624. 03 |
| Gold deposits, July 1, 1908, to Jume 30,1909 | 3,265,279. 12 | 3,177,091.973 | 270,873.96 |
| Silver deposits, July 1, 1908, to June 30, 1909 | 3,032,334.97 | 33,682. 642 | 3,168,907.94 |
| Silver purchases. | 1,300,370.90 |  | 1,443,504. 70 |
| Deposit melting-room grains and fluxes, first, second, and third quarters. |  | 239.340 | 399.78 |
| Total. | 7,838,764. 72 | 3,305,403. 804 | 5,024, 310. 39 |

The melter and refiner returned during the year the following:

There were receeived and melted 10,557 deposits of gold and 2,375 deposits of silver, producing 47,434 gold bars, 10,857 fine silver bars, 2,522 mint silver bars, and 14,472 unparted bars, containing the following standard ounces of gold and silver:

| Kind of bar. | Bars. | Gold. | Silver. |
| :---: | :---: | :---: | :---: |
| Gold |  | Standard oz. | Standard oz. |
| Silver: |  |  |  |
| Fine. | 10,857 |  | 2,219, 224. 82 |
| Mint. | 2,522 |  | 1,027,861. 26 |
| Unparted. | 14,472 | 1,059,210.090 | 1,684,362.04 |
| Total. | 75,285 | 3,203,245. 552 | 4,931,448. 12 |

There were returned from the melters and delivered to the superintendent as consolidated unparted mint bars: Gold, 302,624.929 standard ounces; silver, 243,265.41 standard ounces.

In the settlement of June 30, 1909, there was a wastage of 122.616 standard ounces of gold and an excess of 817.76 standard ounces of silver.
The percentage of loss in melting gold deposits was as follows:

## MINT OF THE UNITED STATES AT CARSON, NEV.

[Conducted as an assay office.]
The value of the deposits at this mint during the fiscal year 1909 showed an increase of $\$ 841,608.97$, a gain of over 47 per cent over those of the previous year. The value of the gold deposited was $\$ 2,552,309.07$,. and that of silver $\$ 50,380.44$. Nearly all of this product originated in Nevada. California contributed but $3,820.253$ ounces of gold and $1,391.43$ ounces of silver, while 30.683 ounces of gold and 1.77 ounces of silver were received from Alaska. The greater part of the Nevada product originated in the Goldfield district.

Deposits of bullion to the number of 1,052 were received during the year. This was an increase in number of 182 over the previous year.

Seventy-one assays of ore were made, embracing 17 for the Department of Agriculture and 3 for the General Land Office.

The operations of the mint required a total of 5,330 assays. This number includes deposits, mass melts, bullion and ore assays for gold, silver, copper, and lead.

Percentage of Loss in Melting.

Note.-The heavy loss in melting bars, kings, is accounted for by the fact that a large percentage of the deposits were cyanide bars, containing an excessive quantity of base metal.

Eight persons (including the assayer in charge), 7 men and 1 woman, comprised the entire force for nine months of the year, and 1 man was added for the last quarter.
The following table shows the amount of deposits, earnings, and expenditures, and the percentage of net expenses to deposits.

ASSAY OFFICE OF THE UNITED STATES AT BOLSE, IDAHO.
During the fiscal year 1909 there were received at this office 1,697 deposits of gold bullion, all of domestic production. The States from which deposits were made are California, Idaho, Montana, Nevada, Oregon, Utah, and Washington. No silver bullion or coin were received for assay.

The amount of deposits shows an increase over those of last year of \$202,219.18.

The weight before melting of the bullion received was $85,252.51$ ounces, and after melting 81,766 , the average loss in melting being 0.0409 .

Mass melting for the year showed a loss of $\$ 31$, but there was a net gain on shipments to the mint of $\$ 20.10$.

Percentage of Loss in Miblting.

| Earnings. |  |  |
| Expenditures............. |  | 13,310. 24 |
| Percentage of net expenses to deposits, \$0.79968. |  |  |

## ASSAY OFFICE OF THE UNITED STATES AT HELENA, MONT.

During the fiscal year 1909 there were received at this office 894 deposits.

| Number of assays m | 4,040 |
| :---: | :---: |
| Number of cupels manufactured | 9,000 |
| Inquartation silver manufactured | 144 |
| Total weight of deposits before melting. | 144,065.31 |
| Average per cent of loss in melti | . 04701 |

Fifty-two mass melts were made from 704 bars, weighing $28,901.56$ ounces, valued at $\$ 443,631.93$.

Cost of handling bullion was $\$ 0.1257$ per ounce.
In handling the deposits received at this institution during the fiscal year the following losses and gains were sustained:

1. A loss of $\$ 7.72$ was incurred in the general department.
2. A loss of $\$ 35.85$ in shipments to the mint arose from a difference in the weight at which the bullion was shipped by this institution and the weight at which it was received by the mint at Philadelphia.
3. A gain of $\$ 4.39$ was made in mass melts.
4. In the assaying department a gain of $\$ 7.13$ was made and is accounted for by taking advantage of the swing of the needle in weighing the clips from 894 deposits.
5. During the above-mentioned period there were recovered from sweeps 27.880 standard ounces of gold, and 14 standard ounces of silver, coinage value of which was $\$ 534.98$.

Oriann of Bullion Purchased.

## ASSAY OFFICE OF THE UNITED STATES AT CHARLOTTE, N. C.

During the year 1909 there were received at this office 229 deposits of gold bullion, principally from the Appalachian Range.

In addition to the assays of regular bullion deposits, there were made 165 assays of ores for which fees amounting to $\$ 472.50$ were received.

The weight of bullion before melting was $7,390.51$ ounces and after melting was $7,282.50$ ounces, an average loss in melting of 1.46 per cent.

## Statement of Loss in Melting Gold Deposits.

The force of this office consists of 2 officers, 1 clerk, and 2 laborers.
The following table shows the amount of deposits, earnings, and expenditures, and the percentage of net expenses to deposits:

## ASSAY OFFICE OF THE UNITED STATES AT ST. LOUIS, MO.

The value of the gold and silver bullion deposited at the United States assay office, St. Louis, Mo., during the fiscal year 1909, amounted to $\$ 554,588.53$, showing a gain of $\$ 112,303.30$ in the value of deposits compared with the year 1908 .
There were 314 deposits of bullion received, which were melted and assayed; 47 special bullion assays made (for which a charge of $\$ 2$ each was collected), and 35 special assays of ores for gold and silver (for which a charge of $\$ 3$ each was imposed).
The bullion weighed $30,805.86$ troy ounces before melting and 30,695.70 troy ounces after melting, an average loss of 0.00357 per cent. The following table shows the losses per cent in melting the various classes of bullion deposits:

## ASSAY OFFICE OF THE UNITED STATES AT SEATTLE, WASH.

There were received at this office during the fiscal year 1909, 2, 059 deposits of gold and 2 redeposits.
Number of bullion assays determined. ..... 6,000
Number of ore assays and analyses determined for the Forestry Department ..... 265
21
Number of special bullion assays received ..... 7
Number of ounces of quartation silver manufactured ..... 400
Number of cupels manufactured ..... 15,000
Total weight of deposits before melting (ounces) ..... 1,075,323. 18
Total weight of deposits after melting (ounces) ..... 285

There were 1,141 bars, each below 300 ounces, massed into 58 larger bars, the total weight of which was $54,517.57$ ounces. The gain in weight from massing these bars was 2.41 ounces, showing an average gain of 0.0021 of an ounce on each deposit.

Average cost of handling bullion melted and assayed was $\$ 0.0397$ per ounce.

A net loss of $\$ 381.30$ resulted from the operations of the year, the source of same being as follows:

1. A loss of $\$ 176.32$ in the melting department. This loss is due to the fact that depositors are allowed full weight for the granules or pannings from each deposit, whereas these granules almost invariably run lower in fineness than the bar and also contain more or less slag.
2. A loss of $\$ 116.55$ in the assay department, the greater part of which undoubtedly arises from the clipping of bars.
3. A gain of $\$ 218.13$ in the general department, this gain being the result of two years' accumulation of grains swept from trucks and from the packing-room floor. This includes only bullion for which the depositor has been paid, consequently should be shown as a gain in the general department. The truck sweepings accruing from bars which have not been weighed after melting are not included in this amount.
4. A gain of $\$ 1.56$ in mass melts. The gain from the swing of the needle in massing the 1,141 bars netted a gain of about $\$ 43$, but loss in assay practically canceled this gain.
5. A loss of $\$ 308.12$ in shipments to the mint, due entirely to difference in assays.
The loss in shipments to the mint was made up from the gains in charges. The net loss in operations within the office, amounting to \$73.18, was made up from bullion recovered from melting-room slag.

The deposit melting-room grains for the year amounted to $\$ 664.33$, but none of this amount was taken to reimburse losses.

The slag from the melting room for years 1908 and 1909 was reduced in a small smelting furnace erected for that purpose, but the resulting bullion was so largely iron that satisfactory assays could not be obtained. It will be necessary to refine this metal with air, but the work has been delayed, owing to lack of proper tubing to insert in the molten metal. Electro-quartz tubing proved to be unsatisfactory with this very base bullion. In two hours' refining about 2 feet of the tubing was eaten away by the oxides and 50 ounces of iron were removed. Three hundred ounces of metal were treated. For use in treating good grade bullion the electro-quartz tubing should give excellent satisfaction. The work of refining this bullion will be continued as soon as fire-clay tubes can be delivered.

Of the 2,061 deposits received, the entire number were deposits of gold bullion, 2,035 being crude and 26 refined. Only one of the refined bars was of domestic production, the other 25 coming from refineries of British Columbia.
The number of employees at the end of the fiscal year was 30 (all male), but for seven months of the year only 25 were employed.

Statement of Gold Bullion Deposited at the United States Assay 'Offtce, Seattle, Wash., during the Fiscal Year ended June 30, 1909.

| Earnings. |  |  |
| Expenditures... |  |  |
| Percentage of net expenses to deposits, 0.09923. |  |  |

As in previous reports, attention is again called to housing this office in a new building. Other assay offices doing but a fraction of the annual business are comfortably located in buildings of their own, and the prospect of a rapid increase in population and values of real estate in this city would seem to point to this as an opportune time to secure a location and erect a building.

ASSAY OFFICE OF THE UNITED STATES AT SALT LAKE CITY, UTAH. ${ }^{a}$
There were received at this office during the fiscal year 1909, 130 deposits of gold.

[^14]These were 76 bars, all under 300 ounces in weight, massed into seven larger bars, the total weight of "which was $1,958.30$. ounces. The gain in weight from massing was 0.11 ounce, showing an average gain of 0.0014 of an ounce on each deposit.

The average cost of handling bullion melted and assayed was $\$ 0.31197$.

A net gain of $\$ 44.01$ resulted from the operations of the year, the source being as follows:

1. Loss of $\$ 18.58$ in the assaying department, due to the clipping of bars, and also to the fact that depositors are allowed full weight for the granules, while the granules are lower in fineness than the bar. The granules are delivered to the assayer and put into his chips bar.

[^15]2. Gain in shipments to the mint of $\$ 48.26$.
3. Gain in massing bars of $\$ 14.33$.

The deposit melting-room grains for the year amounted to $\$ 41.52 .^{\circ}$
Of the 130 deposits received, the entire number were gold bullion crude, and all of domestic production, except one from Australia.

Statement of Gold Bullion Deposited at the United States Assay Office, Salt Lake City, Utah, during the Fiscal Year ended June 30, 1909.

Total receipts, coinage value, $\$ 535,063.54$.
All above unrefined. No refinery bars, and no redeposits 'received. The last item, which is shown as "Precipitation," was a deposit of gold which was precipitated from solution found in the laboratory of a coin sweater, who was arrested here.
The following table shows the number of each kind of deposit, and the average percentage loss in melting each kind:

| Deseription. |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |

The number of employees at the end of the fiscal year was seven, all males; but from March 15 to May 12, 1909; there were eight.

The following table shows the amount of deposits, earnings, and expenditures, and the percentage of net expenses to deposits:

| Items. | ! | Amount. |
| :---: | :---: | :---: |
| Deposits: |  | $\begin{array}{r} \$ 535,063.54, \\ 791.95 \\ 16,068.54 \end{array}$ |

SUMMARY OF OPERATIONS, WASTAGE, AND LOSS, FISCAL YEAR 1909.

- The institutions of the mint service consist of the coinage mints at Philadelphia, San Francisco, New Orleans, and Denver; the mint at Carson, which at present is conducted as an assay office; the assay office at New York, which, like each of the coinage mints, operates a refinery; and the minor assay offices at Boise, Helena, Charlotte, St. Louis, Deadwood, Seattle, and Salt Lake City. Bullion is received at the assay offices on the same terms as at the mints, except that an additional charge of one-eighth of 1 per cent is made at the former. Bullion purchased at the assay offices becomes the property of the Government and is shipped to the mints at the expense of the Government.

## OPERATIONS.

The quantity of precious metals operated upon in the different departments of the mints and assay office at New York during the fiscal year 1909 aggregated $27,292,233$ standard ounces of gold and $74,028,139$ standard ounces of silver.

The figures in the table following are the actual figures as obtained at the settlement of the accounts of the officers in charge. The figures in the article showing the operations of each mint or assay office are for the entire fiscal year up to June 30 .

| New Orleans. Denver...... | 17 510 | 4 | 62.22 67.76 | 469 737 |  | 56.20 66.37 |
| Total. | 2,673 | 9 |  | 13,895 | 40 |  |

## WASTAGE AND LOSS ON SALE OF SWEEPS AND GAINS FROM OPERATIONS.

The value of the precious metals wasted in the metallurgical and mechanical departments was $\$ 23,833.52$. A loss of $\$ 9,263.95$ occurred from the difference between the assay value of the bullion contained in sweeps sold and the amount received for the same, as described in the following table.

$$
13518-\text { FI } 1909 — 21
$$

| Items. | Mint at-: |  |  |  | Assay office at New York. | Total. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Philadelphia. | San Francisco. | New Orleans. | Denver. |  |  |

| Melter and refiners' silver wastage | \$2, 752. 62 |  |  |  |  | 2,752.62 |
| Coiners' gold wastage. | 1,119.85 |  | \$iJ. 12 | \$977. 45 |  | 2,112. 42 |
| Coiners' silver wastage. | 585.14 | 4,894.31 | 476.98 | 556.90 |  | 6, 513.33 |
| Loss on sale of sweeps. | 3,211.80 | 2,956. 75 | 1,007.94 | 1,381.83 | 705. 63 | 9, 263.95 |
| Total. | 7,669.41 | 18,024.99 | 1,500.04 | 2,916. 18 | 2,986. 85 | 33,097. 47 |
| Paid as follows: |  |  |  |  |  |  |
| From contingent appropriation...... | 4,795. 56 | 13,253.73 | 1,500.04 | 2,233.33 |  | 21,782.66 |
| From parting and refining appropriation | 2,873.85 | 4,771. 26 |  | 682.85 | 2,986. 85 | 11,314.81 |
| Total. | 7,669.41 | 18,024.99 | 1,500.04 | 2,916.18 | 2,986.85 | 33,097. 47 |

The wastage and losses aggregated $\$ 33,097.47$. Against these losses there were gains arising from the operations in bullion amounting to $\$ 70,798.79$, as follows:

Deducting the incidental gains on bullion from the value of the total operative wastage and loss on sale of sweeps, there has been a net gain in the operations of the mints during the fiscal year of \$37,701.32.

## receipts and disposition of gold bullion, fiscal year 1909. receipts.

The receipts of gold bullion at the mints and assay offices aggregated $\$ 192,305,855.25$, as shown by the following table:

| Institution. | Deposited. |  | $\begin{gathered} \text { Surplus } \\ \text { bullion } \\ \text { recovered. } \end{gathered}$ | Redeposited.. | Total. |

## UNITED STATES GOLD COIN IN CANADA.

The holdings of United States gold coin in the treasury of the Dominion of Canada on December 31, 1908, was $\$ 54,909,076$. The holdings of the charter banks (31 in number), on the same date aggregated $\$ 15,679,259$, or 79.96 per cent of their specie holdings. The total amount of United States gold coin in Canadian reserves on the foregoing date was therefore $\$ 70,588,335$.

GOLD AND SILVER USED IN INDUSTRIAL ARTS IN THE UNITED STATES DURING THE CALENDAR YEAR 1908.

Among the purveyors of gold and silver bars for use in the industrial arts the United States mint at Philadelphia and the United States assay office at New York hold the foremost places; consequently, the larger portion of the material consumed in the arts is brought under government notice and is a matter of public record.

The following table gives the value of the gold and the quantity of the silver bars issued by the government institutions and private refineries during the calendar year 1908.

Gold and Sluver Bars Issued by the Government Institutions and Manufactured by Private Refineries for Use in the Industrial Arts during the Calendar Year 1908.

| Material used. | Value of gold issued by- |  |  | Weight of silver issued by- |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Government institutions. | Private refineries. | Total. | Government | Private refineries. | Total. |
| Domestic bullion. | \$8,147,514.90 | \$260, 456. 00 | \$8, 407, 970. 90 | Fine ounces. 681,295. 08 | Fine ounces. $15,161,517.00$ | Fine ounces. 15, 842, 812.08 |
| Foreign material. | 2,846,767.12 | 207.00 | 2,846,974. 12 | 1,829, 103.63 | 2,661,838.00 | 4, 490, 941. 63 |
| United States coin | 14, $686,845.78$ | r $334,713.00$ | 16,721, 145178 |  | 3, 115, ${ }^{1,938.00}$ | ( $\begin{array}{r}1,938.00 \\ 3,439,\end{array}$ |
| Old jewelry, etc. | 14, 686,845. 78 | 2,034,300.00 | 16,721, 145.78 | 324, 364.21 | 3, 115, 366. 00 | 3, 439, 730.21 |
| Total. | 25, 681, 324.97 | 2, 629, 676.00 | 28,311, 000. 97 | 2,834, 762. 92 | 20, 940, 659.00 | 23, 775, 421.92 |

Estimating that the total amount of gold coin used in the arts during the calendar year has been $\$ 3,500,000$ and silver coin $\$ 100,000$, equivalent to 77,344 fine ounces, the total industrial consumption would be as follows:

Gold and Silver Bars Furnished for use in Manufactures and tee Arts, and Classification of the Material used, by Calendar Years, since 1880.

Of the total value of bars ( $\$ 45,359,941.62$ ) exchanged for coin, $\$ 19,391,034.23$ were exported, and $\$ 25,968,-$ 907.39 were used in the industrial arts.

THE WORLD'S INDUSTRIAL OONSUMPTION OF THE PREOIOUS METALS IN 1908.

This bureau estimates the world's consumption of the precious metals in the arts during the calendar year 1908 as follows: Gold, of the value of $\$ 113,996,000$, equivalent to $5,514,557$ ounces, fine; and silver, $91,835,000$ ounces, fine, of the commercial value of $\$ 49,122,542$. In these estimates only new material is taken into account.

PRODUCT OF GOLD AND SILVER IN THE UNITED STATES IN 1908.
The detailed statistics of the product of gold and silver in the United States for the calendar year 1908 are presented in a special report to the Secretary of the Treasury.

The distribution of the product among producing States and Territories was as follows:

#### Abstract

Approximate Distribution by Producing States and Territories of the Product of Gold and Silver in the United States for the Calendar Year 1908.

[As estimated by the Director of the Mint.]

| State or Territory. | Gold. |  | Silver. |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Fine ounces. | Value. | Fine ounces. | Commercial value. |
| Alabama. | 1,993 | \$41,200 | 400 | \$200 |
| Alaska. | 960,669 | 19,858,800 | 204,600 | 109,400 |
| Arizona. | 120,937 | 2,500,000 | 2,900,000 | 1,551,200 |
| California | 935, 074 | 19, 329,700 | 1,703, 700 | 911,300 |
| Colorado | 1,106, 385 | 22,871,000 | 10, 150, 200 | 5, 429, 400 |
| Georgia. | 2,719 | 56,200 | 7 200 | 100 |
| Idaho. | 69,829 | 1,443,500 | 7,558,300 | 4,042,900 |
| Illinois. |  |  | 2,000 | 1,100 |
| Michigan. |  |  | 294, 100 | 157,300 |
| Missouri. |  |  | 49,400 | 26, 400 |
| Montana. | 152,865 | 3,160,000 | 10,356, 200 | 5,539,500 |
| Nevada. | 565, 475 | 11,689,400 | 9, 508,500 | 5,086, 100 |
| New Hampshire | 179 | 3,700 | 6,300 | 3,400 |
| New Mexico.. | 14,817 | 306,300 | 400,900 | 214,500 |
| North Carolina. | 4,716 | 97,500 | 1,300 | ${ }^{7} 700$ |

| Virginia | 174 | 3,600 | 300 | - 200 |
| Washington. | 12,273 | 253, 700 | 86,800 | 46, 400 |
| W yoming. | 368 | 7,600 | 3,500 | 1,900 |
| Total. | 4,574,340 | - 94,560,000 | 52,440,800 | 28,050,600 |

WORLD'S COINAGE.
In the appendix will be found a table, revised from the latest information received, exhibiting the coinages of the various countries of the world during the calendar years 1906, 1907, and 1908. The following is a summary of the same:

Coinage of Nations.

|  | Calendar year. | Gold. | Silver. |
| :---: | :---: | :---: | :---: |
| 1906. |  | \$366,326,788 | \$155,590,466 |
| 1907. |  | 411,803,902 | 221,651,826 |
| 1908. |  | 327,018, 200 | 194,692,737 |

The above figures represent, as nearly as this bureau has been able to ascertain, the total value of the gold and silver coinages executed in the world during the years given.
It must be borne in mind, however, that the total of these coinages does not correctly represent the amount of new gold and new silver made into coins during the year, for the reason that the coinages as reported include the value of domestic and foreign coins melted for recoinage, as well as old material, plate, etc., used in coinage.

In the circular letter of inquiry prepared at this bureau and sent to foreign governments through the Department of State, asking for information on these subjects, it was especially requested that each country report the amount of such recoinages. This has been done in many instances, but not in all.

Cotnage of Gold and Silver of the Mints of the World by Calendar Years since 1873.

| Calendar year. |  | Gold. |  | Silver. |  |
| :---: | :---: | :---: | :---: | :---: | :---: |

## VALUES OF FOREIGN COINS.

## Treasury Department, <br> Office of the Secretary, Washington, October 1, 1909.

In pursuance of the provisions of section 25 of the act of August 28, 1894, I hereby proclaim the following estimate by the Director of the Mint of the values of foreign coins to be the values of such coins in terms of the money of account of the United States, to be followed in estimating the value of all foreign merchandise exported to the United States on and after October 1, 1909, expressed in any of such metallic currencies.

> Charles D. Norton,

Values of Foreign Coins.

a Gold standard adopted December 31, 1908, 12를 bolivianos equal the pound sterling, or Peruvian pound (\$4.866 $\frac{1}{3}$ ).

Values of Foreign Coins-Continued

| Country. | Standard. | Monetary unit. | Value in term of U.S. gold dollar. | Coins. |
| :---: | :---: | :---: | :---: | :---: |
| Finland | Gold.. | Mark | \$0. 193 | Gold: 20 marks ( $\$ 3.859$ ), 10 marks (\$1.93). |

## MONETARY STATISTICS OF FOREIGN COUNTRIES.

The statistics of the production and coinage of the precious metals, imports and exports of gold and silver, amount of bank and govérnment notes, both covered and uncovered, of the different foreign countries, published annually in the reports of this bureau, are obtained directly from the governments of such countries by the representatives of the United States accredited to them.
A copy of the interrogatories covering the points on which information is sought from the governments of foreign countries is sent yearly to the United States ambassadors and ministers through the Department of State, and the replies in the form of reports are forwarded directly to the Bureau of the Mint. The interrogatories sent are as follows:

1. What was the amount of gold coined during the calendar year 1908 by denominations and values? What amount of this was recoinage? Domestic and foreign coins melted given separately.
2. What was the amount of silver coined during the calendar year 1908 by denominations and values? What amount of this was recoinage, and what amount was from new bullion? Domestic and foreign coins melted given separately. If any coinage was executed at foreign mints, please give separate statement.
3. Was any coinage executed for other governments during the year 1908? If so, state character and amount of same.
4. What was the weight of fine gold used in the industrial arts during the calendar year 1908? What amount of this was new gold, what amount old gold, and what amount coins?
5. Same questions as to silver.
6. What was the import and export of gold during the calendar year 1908? (Coin, bullion, and ore, as well as their weight and value, should be given separately, if possible.) If practicable, give imports and exports by countries.
7. Same question as to silver.
8. What was the total import of United States gold coin during the calendar year 1908?
9. What was the amount of United States gold coin deposited at the mints and melted during the year 1908?
10. What was the weight, expressed in kilograms fine, and the value of the gold produced from the mines of the country during the calendar year 1908? Give the product of the colonies of the country, naming them separately.
11. What was the weight, expressed in kilograms fine, of the silver produced from the mines of the country during the calendar year 1908? Also give product of the colonies of the country.
12. What was the weight and what the value of the output of gold from the refineries of the country during the year? Give the sources of this output if practicable.
13. Same question as to silver.
14. What, approximately, was the stock of gold coin and bullion in the country at the close of the calendar year 1908? Give stock in public treasuries and banks and in circulation separately, at the close of the calendar year 1908.
15. Same question as to silver.
16. What was the amount of Government notes outstanding at the end of the year 1908?
17. What was the amount of Government notes outstanding not covered by legaltender gold and silver coin or bullion at the end of the year 1908?
18. What was the amount of bank notes outstanding at the end of the year 1908?
19. What was the amount of bank notes outstanding not covered by legal-tender gold and silver coin or bullion at the close of the year 1908?
20. What was the actual currency of the country, gold, silver, or inconvertible paper, during 1908?
21. 'Is gold at premium as compared with the actual currency of the country? And if it is, what was the highest, lowest, and average premium during the year 1908 ?
22. Were any laws passed during the year 1908 affecting the coinage, issue, or legaltender character of the metallic or paper currency? If so, please forward copies of the same.
23. Is there a report published on the operations of the mint? If so, please forward a copy, also a report of the department of mines for 1908.

The foregoing report, covering the operations of the mints and assay offices of the United States for the fiscal year ended June 30, 1909, was for a period prior to my appointment and entry upon duty as Director of the Mint, and was prepared under the direction of R. E. Preston, examiner.

Respectfully,
Hon. Franklin MacVeagh,
Secretary of the Treasury.
13518-FI 1909——22
A. Piatt Andrew,

Director of the Mint.

# REPORT OF THE COMPTROLLER OF THE CURRENCY. 

## Treasury Department, Office of the Comptroller of the Currency, Washington, December 6, 1909.

Sir: In compliance with the requirements of section 333 of the Revised Statutes of the United States, the forty-seventh annual report of the operations of the Currency Bureau for the year ended October 31, 1909, is herewith submitted.

## CONDITION OF NATIONAL BANKS.

The resources and liabilities of national banks in active operation at date of the periodical reports made to the Comptroller during the past year are shown in detail in the following table:

Abstract of Reports of Condition of National Banes in the United States
from November 27,1908 , to September 1 , 1909.

|  | Nov. 27, 19086,865 banks. | Feb. 5, 19096,887 banks. | Apr. 28, 19096,893 banks. | June 23, 19096,926 banks. | Sept. 1, 19096,977 banks. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| RESOURCES. |  |  |  |  |  |
| Loans and discounts... | \$4,840,367,677.15 | \$4,840,766,587.54 | \$4,963,110,869.55 | 85,035,883,516.59 | \$5,128,882,351. 18 |

An analysis of the abstract of reports made during the past year shows that there has been a net increase in the number of banks of 124, and that the assets in the aggregate, amounting on November 27, 1908, to $\$ 9,197,075,816$, increased on September 1, 1909, to $\$ 9,573,954,377$, or a net increase during the year of $\$ 376,878,561$. With the exception of the call of February 5, 1909, when the amount of loans and discounts was less by $\$ 9,434,774$ than on November 27,1908 , there was a steady increase in the volume, rising from $\$ 4,879,278,503$ to $\$ 5,158,434,592$ on September 1, 1909, a net increase during the year of $\$ 279,156,089$. The banks' investments in United States bonds increased from $\$ 703,010,310$ to $\$ 731,028,110$, or an increase of $\$ 28,017,800$. Bonds and other securities, exclusive of United States bonds, stated at $\$ 855,309,593$ in November, 1908, increased to $\$ 916,380,301$ on September 1 last, or an increase of $\$ 61,070,708$. Amounts due from banks, including clearing-house
exchanges, show greater fluctuations than any other items of assets. In November, 1908, the amount due from banks, etc., was $\$ 1,581,949,779$, dropped to $\$ 1,555,737,987$ in February, and to $\$ 1,536,146,481$ in April. From the last-named date to June 23, there was in increase of $\$ 10,279,136$, and a further increase by September 1 is shown of $\$ 10,541,206$. These changes resulted in a net decrease on September 1, 1909, as compared with November 27, 1908, of $\$ 24,982,956$. Bills of other national banks, amounting to $\$ 37,904,774$ in November, reached the maximum on April 28, 1909, namely, $\$ 45,413,071$, but decreased to $\$ 40,204,902$ on September 1, 1909 , showing a net increase during the year of $\$ 2,300,128$.

Lawful money in bank; that is, specie, and legal tenders, amounted in November, 1908, to $\$ 844,759,520$, and on September 1, 1909, to $\$ 854,071,857$, a net increase of $\$ 9,312,337$. Gold, including certificates, increased in the sum of $\$ 7,232,738$, the amount held on September 1,1909 , being $\$ 519,440,109$. The holdings of silver increased only $\$ 2,636,383$, or from $\$ 144,321,405$ to $\$ 146,957,788$. At date of last report the banks held $\$ 187,673,960$ in legal tenders against $\$ 188,230,114$ in November, 1908 , or less than at that time by $\$ 556,784$.
By the organization of new associations and the increase in capital of those existing on November 27, 1908, the paid in capital stock of all national banks steadily increased during the year from \$921,019,383 in November, 1908, to $\$ 944,642,067$ on September 1, 1909, an increase of $\$ 23,622,684$. There is shown to have been a regular and material increase in surplus fund from $\$ 568,159,293$ to $\$ 597,981,876$, an increase for the year of $\$ 29,822,583$. By reason of a reduction in other undivided profits of $\$ 7,510,627$, the net increase of surplus and other undivided profits is shown to have been $\$ 22,311,956$.

As a result of the withdrawal of government deposits from United States depositaries, the amount of deposits on November 27, 1908, being $\$ 111,802,031$, and on September $1,1909, \$ 35,226,912$, bonds on deposit as security for the government deposits have been withdrawn and redeposited to a large extent as security for circulation. The outstanding note issues of the banks in November, 1908, aggregated $\$ 599,319,369$, and on September 1; 1909, $\$ 658,040,356$, an increase for the year of $\$ 58,720,987$. This increase was in part due to the organization of new banks, but mainly to the increased issues of old banks on bonds transferred from deposit to circulation account. Including deposits of United States disbursing officers with United States deposits, government funds held by the banks were reduced from $\$ 124,428,585$ in November, 1908 , to $\$ 48,704,883$ on September 1, 1909, a net reduction of $\$ 75,723,702$. Amounts due to banks, inclusive of bills payable and rediscounts, increased during the year $\$ 70,688,623$, or from $\$ 1,998,434,254$ to $\$ 2,069,122,877$.

With the exception of the February 5, 1909, returns, there is shown to have been a steady and substantial increase in the amount of individual deposits, the net increase during the year being $\$ 289,608,440$, or from $\$ 4,720,284,640$ to $\$ 5,009,893,080$, the last-named amount representing the largest volume of individual deposits ever held by national banking associations.
In connection with the foregoing, it is of interest to note the fluctuations in the volume of loans and discounts, lawful money, individual deposits, etc., of central reserve city banks, other reserve city banks, and country banks. On November 27, 1908, the loans and discounts
of the New York City banks reached $\$ 956,037,960$, but declined on September 1, 1909, to $\$ 925,910,750$, a reduction during the year of $\$ 30,127,210$. The lawful money held by these banks decreased from $\$ 310,824,159$ to $\$ 301,932,158$, a decline of $\$ 8,892,001$. The deposits of the New York City banks on September 1, 1909, amounting to $\$ 779,886,679$, were less by $\$ 41,196,036$ than in November, 1908, when they amounted to $\$ 821,082,715$. The Chicago banks increased their loans from $\$ 229,969,096$ to $\$ 262,788,523$, an increase of $\$ 32,819,427$. In St. Louis there was an increase from $\$ 111,653,851$ to $\$ 118,505,297$, or an increase of $\$ 6,851,446$. The net increase in the loans and discounts of all central reserve city banks was $\$ 9,543,663$, or from $\$ 1,297,660,907$ to $\$ 1,307,204,570$. The other reserve cities increased their volume of loans to the extent of $\$ 119,353,732$, and the country banks $\$ 150,258,693$, resulting, as heretofore stated, in a net increase in the loans of all national banks of the country of $\$ 279,156,089$. Lawful money held by the Chicago banks increased to the extent of $\$ 5,269,029$, and the St. Louis banks held $\$ 1,883,448$ more on September 1, 1909, than on November 27, 1908, the result of which is a net decrease in the holdings of lawful money by central reserve city banks of $\$ 1,739,624$. Other reserve city banks increased their holdings of lawful money from $\$ 215,824,406$ to $\$ 225,357,352$, an increase of $\$ 9,532,946$. There was but a slight change in the holdings of lawful money by the country banks, the net increase being only $\$ 1,538,916$; or from $\$ 218,197,607$ to $\$ 219,736,523$. Individual deposits in Chicago and St. Louis banks increased to the extent of $\$ 18,796,795$ and $\$ 1,850,747$, respectively; but the reduction in the deposits in the New York City banks resulted in a net reduction of all central reserve city banks of $\$ 20,548,494$. Other reserve city banks increased their deposits to the extent of $\$ 118,150,842$, or from $\$ 1,099,957,191$ to $\$ 1,218,108,033$, and the increase in the deposits of country banks was $\$ 192,006,092$, rising from $\$ 2,561,067,910$ in November, 1908, to $\$ 2,753,074,002$ on September 1, 1909. Reductions in loans and discounts and lawful money in the New York City banks was attended by a reduction of $\$ 40,858,832$ in the aggregate amount of their assets. The Chicago and St. Louis banks increased their assets to the extent of $\$ 27,261,702$ and $\$ 4,096,770$, respectively, or a net reduction in all central reserve city banks of $\$ 9,500,360$. Other reserve city banks increased their assets to the extent of $\$ 181,023,635$, or from $\$ 2,473$,297,960 to $\$ 2,654,321,603$. The increase in the assets of the country banks was $\$ 205,355,288$, or from $\$ 4,229,140,438$ in November, 1908, to $\$ 4,434,495,726$ on September 1, 1909.

## RESERVE HELD BY NATIONAL BANKS.

The law requires every bank located in the three central reserve cities, New York, Chicago, and St. Louis, to maintain a reserve in bank of 25 per cent; the same rate is required for other reserve city banks, but one-half of the amount may be deposited to their credit with correspondents in central reserve cities. Country banks are required to maintain a 15 per cent reserve, two-fifths of which must be in bank and three-fifths may be with correspondents. In the periodical abstracts of reports of condition of national banks a separate statement is incorporated with respect to the amount of deposits on which reserve is required, together with the amount required and held, the latter showing the various items constituting the whole, to which is appended a column showing the total amount of cash on
hand, due from reserve agents, and the redemption fund. The amount due from reserve agents is materially in excess of the legal reserve with such agents, as it is held that the excessive amount deposited over and above the legal limitation can not be regarded as legal reserve. The percentages of legal and available reserve at date of each report during the year for each class of banks are shown in the accompanying table:

| Classes oi banks. | Nov. 27,1908. |  | Feb. 5, 1909. |  | Apr. 28,1909. |  | June 23, 1909. |  | Sept. 1, 1909. |  |

## CLASSIFICATION OF LOANS AND DISCOUNTS.

In the periodical reports made by national banks, loans and discounts are divided into the following classes: On demand, paper with one or more individual or firm names; on demand, secured by stocks, bonds, and other personal securities; on time, paper with two or more individual or firm names; on time, single-name paper (one person or firm) without other security; on time, secured by stocks, bonds, and other personal securities or on mortgages or other real-estate security.

Of the $\$ 5,128,882,351$ loans and discounts of national banks on September 1, 1909 , one-fourth, or $\$ 1,398,879,624$, consisted of demand paper, of which $\$ 957,349,934$ was secured by stocks, bonds, etc. Paper of this character in all central reserve cities aggregated $\$ 910,654,225$, or approximately 70 per cent of all demand paper. Loans made by the New York City banks aggregated $\$ 925,653,623$, of which $\$ 393,139,348$ were demand loans, including $\$ 385,430,495$ secured by stocks, bonds, etc. The demand loans of the New York City banks represented 42 per cent of their totals, leaving 58 per cent as the amount of time paper.

That there is no material change in the relative proportion of each class of loans under ordinary conditions is evident from an inspection of the accompanying comparative statement taken from the reports to this office as of August 22, 1907, September 23, 1908, and September 1, 1909.

| Class. | 1907. |  | 1908. |  | 1909. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Amount. | $\begin{aligned} & \text { Per } \\ & \text { cent. } \end{aligned}$ | Amount. | Per cent. | Amount. | $\begin{gathered} \text { Per } \\ \text { cent. } \end{gathered}$ |
| On demand, paper with one or more individual or firm names. | \$428,221,535 | 9.2 | 8395,892, 695 | 8.3 | \$441, 529,690 | 8.6 |
| On demand, secured by stocks, bonds, and other personal securities. | 832, 878,479 | 17.8 | 922,701, 718 | 19.4 | 957, 349,934 | 18.7 |
| On time, paper with two or more individual or firm names. $\qquad$ | 1,648,751,438 | 35.2 | 1,582,391, 359 | 33.3 | 1,698, 467, 691 | 33.2 |
| On time, single-name paper (one person or firm) without other security. | 899,494,658 | 19.2 | 852,176,044 | 17.9 | 971,477,968 | 18.9 |
| On time, secured by stocks, bonds, and other personal securities, or on mortgages or other real-estate security. | 869, 237, 859 | 18.6 | 997, 450,914 | 21.1 | 1,060,057.068 | 20.6 |
| Total............................ | 4,678,583,969 |  | 4,750,612,730 | $\ldots$ | 5, 128, 882, 351 | ....... |

The amount and relative proportion of loans in the national banks in New York, in the three central reserve cities, in other cities, and in banks located elsewhere, on September 1, 1909, September 23, 1908, and August 22, 1907, are shown in the following table:

| Banks in- | September 1, 1909. |  | September 23, 1908. |  | August 22, 1907. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Loans. |  | Loans. |  | Loans. |  |
|  | Amount. | Per cent. | Amount. | Per cent. | Amount. | Per cent. |
| New York. | \$925, 653, 623 | 18.0 | \$905, 653, 475 | 19.06 | \$712, 121, 059 | 15.2 |
| New York. | 1,306, 785, 530 | 25.5 | 1,242,980, 123 | 26.16 | 1,061,212,415 | 22.7 |
| St. Louis. | 1,306, 78, 530 | 25.5 | 1,24, 080,123 | 26.16 | 1,061,212,415 | 22.7 |
| Other reserve cities | 1,372,311, 584 | 20.7 | 1;231,756,966 | 25.93 | 1,242, 440,028 | 26.6 |

| Total. | 5,128, 882,351 | 100.00 | 4,750,612,730 | 100.00 | 4,678,583,969 | 100.00 |

Nearly one-fifth of the loans of all national banks being made by associations located in the city of New York, the following statement will be found of interest as showing the amount and character of such loans on comparable dates from 1904 to 1909, inclusive:

For the purpose of comparison the following table is submitted showing the amount and classification of loans of all national banks on approximate dates during the past ten years:

| Date. | Number of banks. | On demand, paper with one or more individual or firm names. | On demand, secured by stocks, bonds, and other personal securities. | On time, paper with two or more individual or firm names. | ```On time, single- name paper (one person or firm), without other secu- rity.``` | On time, seclired by stocks, bonds, and other personal securities, or on mortgages or other real estate security. | Total. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Millions. 183.3 | Millions. 576.6 | Millions. 978.3 | Millions. | Millions. 526.8 | Millions. |
| Sept. 5, 1900. | 3,871 4,221 | $\begin{aligned} & 183.3 \\ & 211.6 \end{aligned}$ | 576.6 665.7 | 978.3 $1,087.0$ | 421.8 | 526.8 | $2,686.8$ $3,018.6$ |
| Sept. 15, 1902 | 4, 601 | 237.3 | 706.9 | 1,176. 4 | 517.1 | 642.4 | 3,280. 1 |

Loans and discounts, United States bonds, and lawful money represent approximately 70 per cent of the aggregate resources of national banks, and a like proportion of liabilities is represented by capital, surplus and profits, and individual deposits. The relation of these items has changed but slightly during the past ten years, as will be observed by reference to the accompanying table:

| Items. | 1900. | 1901. | 1902. | 1903. | 1904: | 1905. | 1906. | 1907. | 1908. | 1909. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Perct. | Per ct. | Per ct. | Per ct. | Perct. | Per ct. | Per ct. | Per ct. | Per ct. | Pet ct. |
| Loans and discounts. | 53.2 | 53.0 | 53.7 | 55.2 | 53.4 | 53.9 | 54.0 | 55.8 | 52.6 | 53.6 |
| United States bonds. | 8.1 | 7.8 | 7.5 | 8.6 | 7.9 | 7.4 | 7.8 | 7.9 | 7.9 | 7.6 |
| Sawful money. | 10.3 | 9.5 | 8.3 | 8.8 | 7.2 | 8.9 | 7.9 | 8.4 | 9.6 | 8.8 |
| Total | 71.6 | 70.3 | 69.5 | 72.6 | 68.5 | 70.2 | 69.3 | 72.0 | 70.1 | 70.1 |
| Capital. | 12.5 | 11.5 | 11.5 | 11.9 | 11.0 | 10.7 | 10.4 | 10.7 | 10.2 | 9.8 |

| Individual deposits. | 49.7 | 51.6 | 52.5 | 50.0 | 49.6 | 51.1 | 52.4 | 51.5 | 50.4 | 52.3 |
| Total. | 69.9 | 70.7 | 72.1 | 70.7 | 70.4 | 70.1 | 71.2 | 70.9 | 69.1 | 70.4 |

In connection with the foregoing the following table is of interest as showing the relation of capital, etc., to the principal items of resources and liabilities on the dates indicated:

Ratio of Capital, etc., to Individual Deposits, etc., of National Banks on or about October 1, 1897, 1907, 1908, and 1909.

| Items. | 1897. | 1007. | 1908. | 1909. |
| :---: | :---: | :---: | :---: | :---: |
| Capital to individual deposits. | 81.00 to 82.93 | \$1.00 to \$4. 82 | \$1.00 to \$4.94 | \$1.00 to \$5.30 |
| Capital to loans............... | 1.00 to 3.25 | 1.00 to 5.22 | 1.00 to 5.16 | 1. 00 to 5.43 |
| Capital to aggregate resources. | 1.00 to 5.87 | 1. 00 to 9.36 | 1.00 to 9.80 | 1. 00 to 10.14 |
| Capital and surplus and other profits to individual deposits. | 1.00 to 1.92 | 1.00 to 2.65 | 1.00 to 2.69 | 1.00 to 2.87 |
| Specie and legal tenders to individual deposits. | 1.00 to 5.35 | 1.00 to 6.16 | 1.00 to 5.24 | 1. 00 to 5.87 |

## RANGE AND AVERAGE MONEY RATES.

In connection with the foregoing statistics and general information in relation to loans made by national banks, the accompanying tables, obtained through the courtesy of the William B. Dana Company, publishers of the New York Commercial and Financial Chronicle, relating to the range and average rates for money in the New York market during the year ended October 31, 1909, are of interest. It will be noted that the range and average rates were normal in each month up to October, when call loans on the stock exchange ranged from $2 \frac{3}{4}$ to 6 , making the average for the month 4 per cent. Rates for time loans and commercial paper were slightly above normal in September and October.

Range and Average Rates for Money in the New York Market, Year ended October 31, 1909.

a Minimum.
STATE, ETC., BONDS OWNED BY NATIONAL BANKS.
Paragraph 7 of section 5136 of the Revised Statutes, relating in part to the powers of national banks, provides that the board of directors of an association, or its duly authorized officers or agents,
shall exercise, subject to law, all such incidental powers as shall be necessary to carry on the business of banking; by discounting and negotiating promissory notes, drafts, bills of exchange, and other evidences of debt; by receiving deposits; buying and selling exchange, coin, and bullion; by loaning money on personal security; and by issuing circulating notes. The authority to invest in bonds and like securities is held to be empowered under the clause "by discounting and negotiating promissory notes * * * and other evidences of debt." "That the right to make such investment is impliedly conferred is evident from the legislation contained in the act of May 30, 1908, wherein provision is made for the acceptance by the Treasurer of the United States, under certain conditions, of state, county, municipal, or district bonds as security for circulation, and the acceptance of such securities, commercial paper, etc., for the same purpose by national currency associations.

On September 1, 1909, national banks' holdings of bonds and other similar securities, other than United States bonds, were as follows:
State, county, and municipal bonds..................................... $\$ 155,811,290$
Railroad bonds..................................................................... 342, 525, 242
Other public service corporation bonds........................................ 151, 999,513
All other bonds.................................................................... 170,650,569
Stocks (presumably taken for debt)........................................................ 34; 347,814
Warrants, claims, judgments, etc........................................... 22,408, 161
Various securities held by Treasurer U. S., assecurity for public deposits. 17, 991, 758
Foreign government bonds 13, 115, 621
Other foreign bonds and securities.
7, 530, 350
Over one-third of the foreign bonds are owned by national banks located in the city of New York.

Assuming that the character of the bonds owned by national banks is in accordance with the requirements of May 30, 1908, the amount owned is more than sufficient as security for the aggregate amount of emergency currency authorized by the act in question, namely, $\$ 500,000,000$.

It will be noted by reference to the table in the appendix containing the details relative to investments of this character that the country banks (those not located in reserve cities) own 10 per cent of the state, etc., bonds, 19 per cent of railroad bonds, 10 per cent of other public service corporation bonds, 10 per cent of all other bonds, including foreign securities, and nearly 4 per cent of stocks, warrants, judgments. etc.

## CLEARING-HOUSE TRANSACTIONS.

Through the courtesy of Manager William Sherer, of the New York clearing house, the office has been placed in possession of statistics in relation to the transactions of the clearing houses of the United States for the year ended September 30, 1909, together with separate returns relating to the operations of the New York clearing house.

There are 123 clearing-house associations in the United States, the aggregate exchanges of which during the year in question were $\$ 158,559,487,500$, an increase of $\$ 32,320,793,102$ over 1908 . Since the prior report clearing-house associations have been established at Trenton, N. J., Austin, Tex., and North Yakima, Wash.

The New York clearing house was established in 1854 with a membership of 50 , the capital of the banks being $\$ 47,044,900$ and their clearings for that year $\$ 5,750,455,987$. In September, 1909, the membership was 51 , with capital of $\$ 127,350,000$. During the history of the association the volume of clearings reached the maximum in 1906, when they amounted to $\$ 103,754,100,091$. In 1907 the clearings dropped in round amount to $\$ 95,000,000,000$ and in 1908 to $\$ 73,000,000,000$, but rose to $\$ 99,257,662,411$ in 1909 . On these vast transactions in 1909 balances paid in money amounted to $\$ 4,194,484,028$, or 4.22 per cent. The aggregate clearings of this association from 1854 to 1909 are shown to have been $\$ 2,029,505,795,760$, the balances paid in money being $\$ 93,889,243,199$, or 4.62 per cent.

In the settlement of balances from 1893 to 1898, inclusive, the percentage of payments in gold ranged from 0.01 per cent in 1896 to 51 per cent in 1898. From 1899 to 1907, inclusive, the proportion of gold was a fraction in excess of 99 per cent. In 1908 the percentage dropped to 82.35 per cent, but rose to 87.97 per cent in 1909 .

## CAPITAL, SURPLUS, AND LOANS.

Section 5200 of the Revised Statutes, relating to the total liabilities to any associątion of any person, company, corporation, etc., was amended June 22, 1906, to increase the limit of the liability from 10 per cent of paid-in capital stock to 10 per cent of the capital and surplus, the total, however, not to exceed in any event 30 per cent of the capital stock. In the abstract of reports of condition of national banks on June 16, 1906, the capital of national banks was stated at $\$ 826,129,785$; surplus, $\$ 448,858,492$; other profits, $\$ 216,304,876$, the surplus representing an amount equal to 54 per cent of the capital, and the combined surplus and other profits 80 per cent.

On September 1, 1909, the capital had been increased to $\$ 944,642,067$. The surplus was $\$ 597,981,876$, equaling 63 per cent of the capital. While other undivided profits had been reduced to the extent of $\$ 12,548,438$, the combined surplus and other profits equaled 85 per cent of the capital stock. In other words, the capital increased 14 per cent, the surplus 33 per cent, but the surplus and other profits only 20 per cent, due to a reduction in undivided profits of approximately 5 per cent.

The average capital of the 6,053 reporting banks in June, 1906, was $\$ 136,500$, making the average maximum loan to one individual, etc., $\$ 13,650$. While the average capital in September, 1909, had declined to $\$ 135,400$, the average capital and surplus amounted to $\$ 221,100$, based on which the average loan would be $\$ 22,110$. Upon that basis it is apparent that in this respect the loaning power of the national banks has been increased as a result of the amendment of 1906 to the extent of 62 per cent, although with surplus twice as great as the capital of the banks the authorized increase is 200 per cent.

From reports of condition received from national banks in January; 1906, it was shown that 56 per cent of the associations had made loans in excess of the limitation provided by section 5200 of the Revised Statutes, namely, 10 per cent of the capital stock. In

January, 1907, the percentage had fallen to 28.40 , and steadily decreased from that date to 13.17 per cent in November, 1908. At date of September, 1909, call the proportion of banks violating the provisions of the section in question was 15.02 per cent.

The attention of every bank, the report from which shows that loans have been made in excess of the limitation, has been directed to the double penalty for violations of the restriction; that is, the individual liability of the directors, who knowingly permit an excessive loan to be made, for any loss that may be sustained thereon, and, second, forfeiture of the bank's charter.

## CAPITAL STOCK OF NATIONAL BANKS.

On October 31, 1908, the authorized capital stock of national banking associations was $\$ 930,365,275$. Since that date there has been an increase of $\$ 22,830,000$ by banks organizing and $\$ 26,421,000$ as the net result of changes in capital stock of banks existing prior thereto. The loss of capital by liquidations was $\$ 14,225,850$ and by insolvency $\$ 768,500$. These increases and losses resulted in a net increase during the year of $\$ 34,256,650$, the authorized capital at the close of the current year standing at $\$ 964,621,925$.

In the appendix appears a table giving by States and geographical divisions the number and paid-in capital of national banks by classes, as shown by their reports of condition on September 1, from which it will be seen that 1,815 , or 26.01 per cent, of the banks are operating under the minimum amount of capital stock, viz, $\$ 25,000$, the total capital being $\$ 45,151,532$. The relative proportion of capital of these banks to the totall capital is 4.78 per cent. There are 384 banks with capital in excess of $\$ 25,000$ but less than $\$ 50,000$, their aggregate capital being $\$ 12,615,370$. The percentages of number and capital of banks of this class are 5.51 and 1.33 , respectively. Banks with capital of $\$ 50,000$ but less than $\$ 100,000$ number 2,217 , or 31.77 per cent, and the class with capital of $\$ 100,000$ but less than $\$ 250,000$ numbers 1,909 , or 27.36 per cent. These two classes represent 59.13 per cent in number of banks and 37.62 per cent of the capital. In the class with capital of $\$ 250,000$ but less than $\$ 1,000,000$ are 492 banks, or 7.05 per cent, with capital of $\$ 193,716,920$, or one-fifth of the total. The capital of the 149 banks with individual capital of $\$ 1,000,000$ but less than $\$ 5,000,000$ is $\$ 221,080,700$, or 23.40 per cent. Only 2.14 per cent of the banks are in this class. Banks with capital of $\$ 5,000,000$ and over are 11 in number, with aggregate capital of $\$ 112,000,000$, representing 11.86 per cent of the total capital of all the banks. The foregoing information is summarized in the following table:

| Class. | Number. | Per cent. | Capital. | Per cent. |
| :---: | :---: | :---: | :---: | :---: |
| capital. |  |  |  |  |
| \$25,000. | 1,815 | 26.01 | \$45, 151, 532 | 4.78 |
| Over $\$ 25,000$ and less than $\$ 50,000$ | 384 | 5.51 | 12,615, 370 | 1.33 |
| \$50,000 and less than $\$ 100,000$. | 2,217 | 31.77 | 117, 974, 420 | 12.49 |
| \$100,000 and less than $\$ 250,000$. | 1,909 | 27.36 | 242,103, 125 | 25.63 |
| \$250,000 and less than $81,000,000$ | 492 | 7.05 | 193,716,920 | 20.51 |
| \$1,000,000 and less than $\$ 5,000,000$ | 149 | 2.14 | 221,080, 700 | 23.40 |
| \$5,000,000 and over. | 11 | . 16 | 112,000,000 | 11.86 |
| Total. | 6,977. | 100.00 | 944,642,067 | 100.00 |

## UNITED STATES BONDS, ETC.

The interest-bearing bonded debt of the United States on October 31,1909 , was $\$ 913,370,490$, of which $\$ 679,545,740$ was deposited with the Treasurer of the United States in trust as security for nationalbank circulation, and $\$ 35,451,300$ to secure government deposits. September 1 reports of condition of national banks evidenced the ownership by the banks of United States bonds to the additional amount of $\$ 23,145,640$, making their total investments. in securities of this character $\$ 738,142,680$, or approximately 80 per cent of the interest-bearing bonded debt.

In the following table the bonded debt is shown by issues, together with the amount and character. of securities on deposit to secure circulation and public deposits:
Interest-bearing Bonded Debt of the United States, and Bonds on Deposit to Secure National-bank Circulation and Government Depostrs, October 31, 1909.

| Class. | Bonded debt. | Bonds on deposit to secure circulation. | Bonds on deposit to secure deposits. |
| :---: | :---: | :---: | :---: |
| Consols of 1930 (twos). | 8646, 250, 150 | 8573, 328,450 | \$24, 152, 200 |

| Total. | 913,317,190 | 679, 545, 740 | 52, 341,800 |

The monthly statements relating to capital, bonds on deposit to secure circulation, and circulation secured by bonds and lawful money during the year ended October 31, 1909, are summarized in the accompanying table. It will be noted that there was a monthly increase in capital, bonds, and circulation secured by bonds, and a decrease in the amount of circulation covered by deposits of lawful money. It also appears that the average monthly price of 2 per cent consols declined during the report year from 103.752 in November, 1908, to 101.052 in October, 1909. The table in question follows:

Montely Statement of Captpal, Bonds on Deposit to Sequre Circulation, and Circulation Outstanding.

| Date. | Numbanks. | Capital. | Bonds on deposit. | A verage monthly price of2 per cent consols, 1930. | Circulation secured by- |  | Total circulation outstanding. |

## NATIONAL-BANK CIRCULATION.

Section 16, act of June 3, 1864, required a deposit of United States registered bonds to an amount not less than $\$ 30,000$, nor less than one-third of the paid-in capital stock of an association, on which circulation was issuable not to exceed 90 per cent of the market price, but not more than 90 per cent of the par value of the bonds, and not in excess of the paid-in capital. The aggregate limit was fixed at $\$ 300,000,000$. In the following year (March 3, 1865) the act was amended limiting the issue of circulation as follows: To banks with capital of $\$ 500,000$ or less, 90 per cent of the capital ; over $\$ 500,000$ to $\$ 1,000,000,80$ per cent; over $\$ 1,000,000$ to $\$ 3,000,000,75$ per cent; and over $\$ 3,000,000,60$ per cent. It was further provided that of the aggregate amount authorized to be issued, one-half should be apportioned to associations in cities and territories, according to population, and one-half by the Secretary of the Treasury among the associations located in States, etc., having due regard to the banking capital, business, etc., of such States.

The act of July 12, 1870, authorized the issue of additional circulation to the amount of $\$ 54,000,000$, but provided that no association organized thereafter should issue circulation in excess of $\$ 500,000$. This act also authorized the organization of banks to issue circulation redeemable in gold, but limited the amount to be issued by each bank to 80 per cent of the par value of the bonds deposited.

On June 20, 1874, the act was passed establishing the nationalbank redemption agency and which provided for the retiring of circulation and withdrawing of bonds, changed in part the provisions of the original law with respect to the bond-deposit requirement in that banks with capital in excess of $\$ 150,000$ were permitted to reduce their bond deposit to $\$ 50,000$, thus determining the minimum bond requirement by banks with capital in excess of $\$ 150,000$. Six months later (on Jan. 14, 1875) the limit on the aggregate amount of national-bank circulation was repealed; that is; every bank was permitted to issue circulation secured by bonds to the extent of 90 per cent of the paid-in capital stock.

Prior to February 14, 1880, it became apparent that there was no demand for gold-currency banks, only 10 of which had been organized, and on that date their conversion into currency banks was authorized. Within a short time thereafter, or prior thereto, all banks of that character were either closed or converted into currency banks.

The bond-deposit requirement was again amended on July 12, 1882, by which banks with capital of $\$ 150,000$ or less were compelled to deposit as security for circulation bonds to the amount of one-fourth of their capital only. Increase of circulation within the period of six months from date of reduction was prohibited by this act, which also limited the amount of lawful money that might be deposited to retire circulation to $\$ 3,000,000$ in any one calendar month.

The circulation franchise was given an added value by the act of March 14, 1900, which authorized the issue of circulation to the par value of the bonds deposited, reduced the tax on circulation secured by 2 per cent consols to one-fourth of 1 per cent semiannually, and repealed the provision of the act of 1882 relative to the nonincrease
of circulation within six months from date of decrease. The act of 1882 was further amended on March 4, 1907, to increase the monthly limitation of the amount of lawful money that might be deposited to retire circulation from $\$ 3,000,000$ to $\$ 9,000,000$.

The original actit authorized the issue of national-bank circulation notes in the denominations of $\$ 1, \$ 2, \$ 3, \$ 5, \$ 10, \$ 20, \$ 50, \$ 100$, $\$ 500$, and $\$ 1,000$, but provided that no more than one-sixth part of the notes issued to an association should be of less denomination than $\$ 5$ and that after specie payments should be resumed no notes were to be furnished of less denominations than $\$ 5^{\prime \prime}$. Notes of each denomination indicated, with the exception of threes, have been issued, but the total amount of ones was only $\$ 23,169,677$ and of twos $\$ 15,495,038$. The act of March 14,1900 , limited the amount of notes of denomination of $\$ 5$ to one-third of the aggregate issues of each bank, although as a matter of fact the issues of $\$ 5$ notes have never equaled a third of the total national-bank circulation outstanding and on October 31, 1909, amounted to only 20 per cent of the total.

The currency act of May 30, 1908, made no material change in the law. with respect to the issue of circulation secured by United States bonds, although in addition to other denominations the Comptroller was authorized to prepare plates of the denominations of $\$ 10,000$, and it was required that the legend on the notes relating to the securities for circulation should be changed to read "secured by United States bonds or other securities."

In ordering plates for the printing of circulation the Comptroller is governed by the wishes of the banks, but since 1884-85 no plates have been engraved for the printing of notes of a higher denomination than $\$ 100$.

In conformity with law of 1908 and from May 30 of that year to October 31, 1909, national-bank plates to the number of 9,506 were prepared, and circulation therefrom printed, in addition to the requirements for current issues, to the extent of 50 per cent of the aggregate capital of the banks. The amount of circulation printedinexcess of the current demand is held separately in reserve as contemplated by law.

During the existence of the national-banking system to October 31, 1909, circulation was issued to the amount of $\$ 4,582,302,215$, of which $\$ 3,878,482,225$ has been redeemed, leaving outstanding, exclusive of gold notes and nonpresented fractions, $\$ 703,819,990$. The amount issued during the year was $\$ 413,152,510$ and the stock of incomplete currency on hand at the close of the year was $\$ 666,042,390$.

Changes in the amount of each denomination of notes outstanding on October 31, 1907, 1908, and 1909, as compared with March 14, 1900, are shown in the following table:

| Denominations.a | Mar. 14, 1900. | Oct. 31, 1907. | Oct. 31, 1908. | Oct. 31, 1909. |
| :---: | :---: | :---: | :---: | :---: |

| Total. | 254, 026, 230.00 | 609, $905,441.50$ | 665, 770, 208.00 | 703, 865, 877.00 |
| Circulation secured by lawful money. | $38,004,155.00$ | 47,252,852.00 | 39,065,637. 50 | 25,521, 114.00 |
| Circulation secured by bonds... | 216,022,075.00 | 562, 727,614.00 | 626,779,350.00 | 678, $344,763.00$ |

a Gold notes not included.

On July 9, 1891, the amount of outstanding circulation reported by the banks reached the lowest point in the history of the system with respect to the paid-in capital stock, namely, 18.4 per cent, and at that time was but 7.3 per cent of the metallic and paper currency of the country. In the reports for September 1, 1909, outstanding circulation is shown to have reached the maximum; that is, 69.6 per cent since-December 31, 1881, when it stood at 69.8 per cent of the capital. On June 30, 1909, money in the United States amounted to $\$ 3,406,300,000$, of which the June 23 bank reports show that 18.8 per cent consisted of national-bank circulation.

Changes that have occurred in the amount of outstanding circulation as reported by the banks of the various classes at date of the statements made during the last report year are shown in the following table:

Outstanding Circulation Reported by the Banks on the Dates Indicated.

| Date. | New York. | New York, Chicago, and St. Louis. | Other reserve cities. | $\begin{aligned} & \text { All } \\ & \text { reserve } \\ & \text { cities. } \end{aligned}$ | Country. | Total. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| November 27. . 1908. | Millions. $\$ 46.2$ | $\begin{array}{r} \text { Millionts. } \\ \$ 74.6 \end{array}$ | $\underset{\$ 135.7}{M_{i}}$ | $\underset{\$ 210.3}{M i l l i o n s .}$ | $\begin{array}{\|} \text { Millions. } \\ \$ 389.0 \end{array}$ | Millions. $\$ 599.3$ |
| 1909. |  |  |  |  |  |  |
| February 5 | 50.2 | 79.8 | 139.8 | 219.6 | 395.7 | 615.3 |
| April 28. | 50.4 | 80.4 | 145.2 | 225.6 | 410.7 | 636.3 |
| June 23. | 50.4 | - 80.9 | 146.0 | 226.9 | 414.4 | 641.3 |
| September 1. | 52.7 | 83.9 | 150.6 | 234.5 | 423.5 | 658.0 |

Circulating notes to the enormous amount of $\$ 489,923,468$ were received for redemption at the national-bank redemption agency during the past year, of which $\$ 115,898,700$, being in condition fit for circulation, were forwarded to the issuing banks and $\$ 374,024,768$ delivered to this office for destruction. The receipts for redemption during the current year were $\$ 107,563,304$ in excess of the redemptions during the year 1908. The expenses incident to the redemption of national-bank circulation during the fiscal year ended June 30, 1909 , were $\$ 396,743.15$, or $\$ 0.79762$ per $\$ 1,000$.

Receipts of currency for redemption by months are shown in the following table:

| Month. | Amount. | Month: | Amount. |
| :---: | :---: | :---: | :---: |
| 1908. | $\$ 27,801,458$$34,874,210$ | April................ | $\begin{array}{r} \$ 46,125,141 \\ 48,247,752 \end{array}$ |
| November. December. |  |  |  |
|  |  | May. | $\begin{aligned} & 47,935,059 \\ & 46,403,870 \end{aligned}$ |
|  |  |  |  |
| January... . . . . 1909. |  | July... | $\begin{aligned} & 36,939,830 \\ & 31,890,067 \\ & 31,759,154 \end{aligned}$ |
| February | 37,227,225 | September |  |
| March.... | 42, 637, 791 | October... |  |

As will be noted from the following statement, over 85 per cent of the circulation received for redemption came from the eight cities indicated and nearly 49 per cent from the city of New York:

RECEIPTS FOR REDEMPTION FROM THE CITIES NAMED.

PROFIT ON NATIONAL-BANK CLRCULATION.
By reason of the depreciation in the market price of government bonds during the past year the computed profit on the issue of na-tional-bank circulation has increased to a slight extent. The average net price of 2 per cent consols in November, 1908, was 103.752, showing a profit on circulation on that basis of 1.084 per cent. In October, 1909, the market price has fallen to 101.052, when the profit on circulation increased to 1.334 . Panama Canal bonds declined from 102.328 in November, 1908, to 100.595 in October, 1909, the rate of profit at the higher quotation being 1.236 per cent and at the lower 1.384. The market price of the 4 per cent loan of 1925 declined during the year from 120.840 to 117.320 , and the profit on circulation secured by these bonds increased from 0.768 to 1.211 per cent.

In estimating the profit on the issue of national-bank circulation, there are deducted from the receipts, consisting of the interest on bonds and interest on circulation at 6 per cent, the taxes; expenses; and sinking fund, to ascertain the net receipts. The difference between the net receipts and interest on the cost of bonds at 6 per cent is the measure of profit. As an illustration, $\$ 100,000$ consols of 1930 cost $\$ 101,052$ in October, 1909. The interest on the bonds and 6 per cent on $\$ 100,000$ circulation give the gross receipts as $\$ 8,000$. Deducting from the gross receipts taxes of $\$ 500$, expenses $\$ 62.50$, and sinking fund of $\$ 26.50$, gives the total deduction $\$ 589$. The difference between the receipts and deductions-that is, taxes, etc.-leaves $\$ 7,411$ as the net receipts. Interest on the cost of bonds at 6 per cent produces $\$ 6,063.02$. Deducting the interest on the cost of bonds from the net receipts shows the net profit on the issue of $\$ 100,000$ circulation as $\$ 1,347.98$, or 1.334 per cent.

## EARNINGS AND DIVIDENDS OF NATIONAL BANKS.

Abstracts of reports of earnings and dividends of national banks for the six months ended January 1 and July 1, 1909, are published in the appendix of this report. Combining the returns for the two periods in question, it is shown that the average capital was $\$ 919,143,825$ and the surplus was $\$ 585,407,483.46$. The gross earnings of the banks during the year were $\$ 348,674,355.11$, from which losses and premiums were charged off to the amount of $\$ 40,453,705.87$, being 11.6 per cent of the gross earnings, and $\$ 177,034,899.72$ expenses and taxes, equaling 50.54 per cent. The resulting net earnings are shown to have been $\$ 131,185,749.5$, from which dividends were paid
amounting to $\$ 92,993,449.76$. The ratio of net earnings to capital and surplus is 8.72 ; dividends to capital and surplus, 6.18; and dividends to capital 10.12 .

Records relating to the amount of earnings and dividends annually during the forty years ended July 1, 1909, show that the average net earnings have been $\$ 69,877,835$ and dividends $\$ 52,885,467$, or 8.89 per cent on the capital. .The aggregate net earnings for this period were $\$ 2,795,113,397$, and dividends paid $\$ 2,115,418,691$, an amount equaling approximately three and one-third times that of the average capital stock.

## EXPENSES OF NATIONAL BANKS.

Excluding interest on government deposits provided by the act of May 30, 1908, and corporation taxes authorized by the tariff act of 1909, national banks have paid to the Government in taxes on capital and deposits to June 30,1883 , on capital under the war-revenue act of 1898, and on circulation to June 30, 1909, the sum of $\$ 183,-$ $662,698.98$. The total expenses of the office of the Comptroller of the Currency from 1863 to June 30,1909 , for which appropriations were made, were $\$ 12,516,385.36$. It is estimated that contingent expenses not paid by the Comptroller, but from the general appropriation for contingent expenses of the department, including an estimated amount properly chargeable to the cost of operation of the bureau, equal the amount specifically appropriated, which would give the estimated approximate cost of operation during the existence of the system of $\$ 25,000,000$. In addition to taxes paid on capital, deposits, and circulation, the banks have paid $\$ 6,363,192.69$, the expenses of redeeming their notes; $\$ 1,171,530$ for plates from which circulating notes are printed; and, from 1883 to 1909 inclusive, $\$ 6 ; 459,755.99$ in fees for examinations. The expenses of the banks for the last fiscal year were as follows: Tax on circulation, $\$ 3,190$,543.04 ; cost of redemption of notes, $\$ 396,743.15$; assessment for plates, $\$ 42,275$; examiners' fees, $\$ 510,928.07$, making a total of $\$ 4,140,489.26$.

The expenses of the office of the Comptroller of the Currency for the last fiscal year, excluding salaries reimbursed by national banks, were $\$ 1,074,106.63$, or $\$ 547,035.52$ in excess of the expenses of the fiscal year ended June 30, 1908. The increase in salaries was only $\$ 2,127.34$, while the increase in the cost of dies, plates, etc., was $\$ 544,908.18$. This large increase was mainly due to the legislation of May 30, 1908, relating to the engraving of bank plates and the printing therefrom of the extraordinary amount of circulating notes to meet a possible emergency.

## ORGANIZATION OF NATIONAL BANKS.

Section 5133 of the Revised Statutes, formerly section 5 of the act of June 3, 1864, provides for the organization of national-banking associations by any number of natural persons not less than 5 . The law confers authority upon the Comptroller of the Currency to approve the corporate title of an association and also to withhold his certificate authorizing an association to begin business when, as the result of special examination or otherwise, it is ascertained that the association has been organized for purposes other than those con-
templated by the act. It is further provided that no banks shall be organized with capital less than $\$ 100,000$ unless sanctioned by the Secretary of the Treasury. To avoid formation of associations for ulterior purposes or by those lacking the qualifications necessary to successful conduct of the banking business, or in a place the population and business of which are insufficient to warrant the establishment of a national bank, the Comptroller, upon receipt of an application to organize, causes a special investigation to be made, the results of which determine the favorable or unfavorable action. Since the beginning of the current calendar year, out of approximately 370 applications filed for authority to organize national banks, over 50 were rejected, mainly for the reasons hereinbefore stated.

The expansion of the national banking system along normal, safe, and conservative lines is unquestionably desirable, but the organization of a bank is not warranted in a community where there is no reason for its existence; that is, where sufficient business would not naturally come to warrant success, or where the board of directors will not be composed of men of business ability equal to the best to be found in the community, or where the organization is attempted by promoters who, by public and private means, create a false impression that a bank is needed and that success is assured by merely obtaining subscriptions to the capital stock.

From the date of the establishment of the national-banking system in 1863 to October 31, 1909, charters were granted to 9,572 nationalbanking associations, of which 2,063 have been placed in voluntary liquidation and 484 failed. The number of banks in operation at the close of the year was 7,025 . Included in the 9,572 associations chartered are 1,503 banks, with original capital of $\$ 320,755,928$, which were conversions of state banks.

Since March 14, 1900, the date of the act authorizing the organization of banks with capital of $\$ 25,000$, charters have been granted to 4,308 associations, with capital of $\$ 261,083,300$, a number greater by 691 than the number of banks in existence on the date of the passage of the act in question. The number of banks organized during this period includes 2,768 , with capital of $\$ 72,105,500$, which were organized under the act of March 14, 1900, and 1,540, with capital of $\$ 188,977,800$, organized under the act of 1864 with individual capital of $\$ 50,000$ or over. By a further subdivision of these banks it is shown that 2,384 , with capital of $\$ 130,960,500$, were banks of primary organization; 1,340 , with capital of $\$ 88,587,000$, organizations to succeed state and private banks, and 584, with capital of $\$ 41,535,800$, were conversions of state banks.

In the current report year, charters were granted to 309 associations with authorized capital stock of $\$ 22,830,000$. The average number of banks organized monthly from March 14, 1900, to October 31,1907 , was approximately 40 ; the average in 1908, 27 ; and in 1909, 25 and a fraction.
As an indication of the character and distribution by States and geographical divisions, of national banks organized since the passage of the act in 1900, the following table is submitted:

Summary, by States, Geographical Divisions, and Classes, of National Banes Organized from March 14, 1900, to October 31, 1909, and tee Paid-in Capital Stoce of all Reporting National Banes on September 1, 1909.

Summarỳ, by States, Geograpeical Divisions, and Classes, of National Banks Organized from March 14, 1900, to October 31, 1909, and the Paid-in Capital Stock of all Reporting National Banes on September 1, 1909 -Continued.

Number and capital of national banks, by classes, organized since March 14, 1900, number of national banks organized in each month and year since that date, together with the number and classification of organizations during the past year, are shown in the following tables:

## EXTENSION OF CORPORATE EXISTENCE OF NATIONAL BANKS.

The act of 1864 fixes the corporate life of a national banking association at twenty years. Under date of July 12, 1882, the act was passed authorizing extensions for an additional period of twenty years, and second extensions were authorized by the act of April 12, 1902. From 1882 to October 31, 1909, first extension of charters were granted to 2,795 banks and under the act of 1902 to 969 banks. During the past year 130 charters were extended for the first time and 1 for the second. During 1910 the charters of 190 banks may be extended for the first time and 24 for the second. For the information of banks interested there is given in the appendix to the report of the Comptroller of the Currency a list of all associations the charters of which will expire during the year ending October 31, 1910.

## CHANGES IN TITLES OF NATIONAL BAN゙K゙S.

In the year ended October 31, 1909, there were nine changes of corporate titles of national banking associations, the banks concerned, the new and old titles, with date of approval of the changes, being shown in the following table:

| No. | Title and location. | Date. |
| :---: | :---: | :---: |
|  |  | 1908. |
| 953 | "The New Castle National Bank," New Castle, Me., to "The New Castle National Bank of Damariscotta," Me. | Nov. 16 |
|  |  | 1909 |
| 8136 5296 | "The Logan National Bank," Logan, W. Va., to "The First National Bank of Logan".. | Jan. 15 |
| 5296 | "The First National State Bank of Sheridan," Ind., to "The First National Bank of Sheridan" | Jan. 20 |
| 6425 | "The Consolidated National Bank of New York," N. Y., to "The National Reserve Bank of the City of New York" | Mar. |
| 9174 | "The London Paris National Bank of San Francisco," Cai., to "The Anglo \& London Paris National Bank of San Francisco' |  |
| 8026 | "The National Bank of Rochester," N. Y, "to "Lincoln Nationai Bañk of Rochester". | Apr. 7 |

| . 6964 | "The Lackawanna National Bank of West Seneca," N. Y., to "Lackawanna National Bank," Lackawanna, N. Y | Aug. 2 |
| 6408 | "The New Haven National,Bank," New Haven, Pa., to "The Union National Bank of Connellsville," Pa. |  |

## VOLUNTARY LIQUIDATIONS.

Under section 5220 of the Revised Statutes, a national banking association may be placed in voluntary liquidation at any time prior to. the expiration of its corporate existence, under authority therefor of a resolution adopted by shareholders representing at least twothirds of the capital stock. During the current year 149 associations, with $\$ 14,225,850$ capital stock, were closed voluntarily, of which 25 , with capital of $\$ 6,935,850$, were absorbed by other national banking associations; 14 , with capital of $\$ 2,175,000$, were absorbed by state banks or trust companies; 83 , with capital of $\$ 3,610,000$, liquidated to reorganize as state banks; 2, with capital of $\$ 300,000$, the corporate existence of which expired by limitation, were succeeded by new national banking associations; and 25, with capital of $\$ 1,205,000$, closed to discontinue business. The following is a list of banks placed in voluntary liquidation during the year ended October 31; 1909; the names, where known, of succeeding banks, in cases of succession, being also given:

National Banks Placed in Liquidation.

| Name and location of bank and of succeeding bank. | Date of closing. | Date of authority to commence business. | Capital stock. | Circulation. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

SPECIAL REPORT OF CONDITION OF BANKS IN THE UNITED STATES.
Through the courtesy and assistance of the National Monetary Commission the Comptroller is enabled to present for the first time in the history of banking in this country uniform statistics relative to the condition of banks of all classes on the same date.

Individual reports as of April 28, 1909, for the use of the commission in their investigation of the monetary situation were obtained by the Comptroller through the cooperation of state officials from practically every bank in the United States operating under state charters and from a larger percentage of private banks and bankers than heretofore.

Compilation of these special reports has been made under the direction of Prof. A. Piatt Andrew (now Director of the Mint), expert adviser to the commission, as an aid to the commission's investigations and later for publication in their report to Congress now in course of preparation. The statistics as tabulated for use of the commission will comprise the most complete and comprehensive data relating to the banking institutions of this country ever before printed.

In 1908 reports were received and tabulated from 21,346 banks of all classes with aggregate resources of $\$ 19,583,410,393$. Summary of reports received and tabulated by the National Monetary Commission includes 22,491 banks with aggregate resources of $\$ 21,095,054,420$. The increase over 1908 is 1,145 in the number of banks and $\$ 1,511,644,027$ in the total resources.

In the request for reports the cashier was advised to indicate on his report the class of bank. The classification, as made by the individual bankers, has been followed generally in the compilation, the exceptions being in cases where the term "state" checked off on the report undoubtedly intended to mean an "incorporated" bank, the title and character of business exhibited indicating a stock savings bank or trust company.

Abstracts of reports of condition of each class of banks, arranged by States and reserve cities, appear in the appendix to the report of the Comptroller of the Currency. A summary of reports of all reporting banks is presented hèrewith.

Summary of the Special Reports Obtained for and Compiled by the National Monetary Commission from 22,491 Banks of the United States and Island Possessions (Including National, State, Savings, and Private Banks and Loan and Trust Companies), Showing their Condition at the Close of Business on April 28, 1909.

STATE, SAVINGS, AND PRIVATE BANKS, AND LOAN AND TRUST COMPANIES.

Summarizing the reports obtained as of April 28, 1909, it is shown that there were in operation on that date 15,598 banks other than national with aggregate resources of $\$ 11,726,170,577$, indicating an increase of 1,076 in the number of banks and $\$ 856,724,584$ over the amount of resources reported in the previous year. The returns include 11,319 state banks, 1,703 savings banks ( 642 of which were of the mutual class, that is, those without capital stock), 1,497 private banks, and 1,079 loan and trust companies.

Capital stock of the state banks aggregates $\$ 416,059,900$, individual deposits $\$ 2,466,958,665$, and all resources $\$ 3,338,669,134$. Savings bank reports to the number of 1,703 show deposits aggregating $\$ 3,713,405,709$ and resources $\$ 4,072,710,105$. The 1,079 loan and trust company reports show aggregate resources of $\$ 4,068,534,982$ and deposits of $\$ 2,835,835,180$. Bankers' directories published at the beginning of the current year give the names of 4,325 private banks in operation, but a large majority of such banks, so called, are firms whose business is confined chiefly to brokerage and exchange. Private bank reports were obtained from 1,497 concerns, with capital of $\$ 27,726,922$, individual deposits of $\$ 193,263,224$, and aggregate resources of $\$ 246,256,355$.

In order to ascertain the number of depositors in savings banks as of April 28, 1909, for use of the National Monetary Commission and for incorporation in this report, the Comptroller mailed to all savings banks, both of the mutual and stock savings classes, a special request for information as to the amount of deposits and the number of depositors as shown by the books of the banks on the date named. Later, at the suggestion of the commission, it was determined to extend this inquiry to all banks, and a similar request was made of all other banks which made reports of conditions as of April 28, 1909, asking for information relating to the amount and character of deposits held and the number of depositors for each class of banks as of June 30, 1909, together with the average per cent of interest paid on each class of deposits and the minimum sum upon which interest is allowed. Out of the total of 22,491 banks which submitted reports of condition as of April 28, 18,245 banks submitted this supplementary report.

Supplementary returns, while not so complete as could be desired, furnish interesting data. The number of depositors shown must be understood as deposit accounts. It is not possible to determine the number of individual depositors, as many business men have accounts with two or more banks, and individual depositors ${ }^{\circ}$ in not a few instances keep two classes of accounts in the same bank. The banks reporting had 25,645,604 depositors or deposit accounts, and aggregate deposits of $\$ 13,595,599,850$. The sum of $\$ 5,678,735,379$ represents savings and time deposits credited to $14,894,696$ depositors, all other deposits, exclusive of bank deposits, amounting to $\$ 7,916,864,471$, to the credit of $10,750,908$ depositors. It further appears that the average interest paid by the banks was 3.55 per cent on savings accounts and 3.10 on other accounts. The average rate of interest paid by national banks on savings accounts was 3.34 ; by state banks, 3.71 per cent; mutual savings, 3.85 per cent; stock
savings, 3.60 per cent; private banks and loan and trust companies paying the same average rate, 3.43 per cent. National banks to the number of 4,075 reported 2.97 per cent as the average rate of interest paid on accounts other than savings and 2,517 reported no interest paid on such accounts. Of the state banks furnishing supplemental reports, 4,016 report an average of 3.34 per cent paid on accounts other than savings and 2,560 report no interest paid on such accounts; 1,682 gave no information on this subject. Four hundred and five private banks report 3.08 per cent paid on nonsavings accounts, 321 report no interest paid, and $267^{\circ}$ gave no information. Of the loan and trust companies 613 paid 2.34 per cent on nonsavings accounts, 169 paid no interest, and 80 gave no information. Of the commercial banks reporting, 3,620 reported a minimum deposit of $\$ 1$ or less upon which interest is allowed; 1,219 reported a minimum deposit of over $\$ 1$ and up to $\$ 5 ; 317$ allowed interest on amounts of $\$ 10$ and over $\$ 5 ; 229$ on amounts of $\$ 25$ and over $\$ 10 ; 293$ on amounts of $\$ 50$ and over $\$ 25 ; 593$ on amounts of $\$ 100$ and over $\$ 50 ; 128$ on amounts of $\$ 250$ and over $\$ 100 ; 456$ on amounts of $\$ 500$ and over $\$ 250 ; 1,173$ allowed no interest on accounts under $\$ 500$; and 8,677 gave no information on this subject.

In the following table is the summarized reports of condition as of April 28, 1909, obtained from state banks, savings banks, private banks, and loan and trust companies.

Regources and Lifbilities of State, Savings, Private Banks, and Loan and Trust Companies in the United States, including the Island Possessions, on April 28, 1909.a
[Compiled from returns obtained for the National Monetary Commission.]

[^20]For the purpose of comparison a table exhibiting the principal items of resources and liabilities of banks other than national in the years, 1900, 1906, 1907, 1908, 1909, is submitted herewith.

Consolddated Returns from State, Savings, Private Banks, and Loan and Trust Companies.

| Items. | 1900. | 1906. | 1907. | 1908. | 1909. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Loans. | \$3, 013, 449, 827 | \$5, 656, 832, 201 | \$6, 099, 897, 535 | \$5,797,611,743 | a86, 385, 522, 766. 61 |
| Bonds. | 1,723, 830, 351 | 2,790, 159, 501 | 2, 931, 006,252 | 2,873, 226,958 | 3, 009, 480, 709. 72 |
| Cash. | 220,667,109 | 334, 938, 185 | 391, 847, 497 | 479, 116,289 | 525, 237, 773. 25 |
| Capital. | 403, 192, 214 | 739, 163, 401 | 807, 178, 262 | 838,058. 353 | 866,056, 465.00 |
| Surplus and undivided profits..... | 490,654,957 | 893,679,524 | 924,655,010 | 1,012, 811,484 | 1.039, 548, 321.54 |
| Deposits............. | 4,780, 893,692 | 8,159, 894, 029 | 8,776,755, 207 | 8, 409, 959,961 | 9, 209, 462, 780.66 |
| Resources. | 5, 841,658, 820 | 10, 363, 350,846 | 11, 168, 514, 516 | 10, 869, 345, 993 | 11, 726, 170, 577.59 |

The foregoing statistics indicate that aggregate resources have more than doubled since 1900, the increase since that date being $\$ 5,884,511,757$. In 1907 the increase over 1906 was $\$ 805,163,670$, while the figures for 1908 show a decrease of $\$ 299,168,523$ as compared with those of 1907.

Combining the returns from national banks as of April 28, 1909, with those obtained from other banks for the same date, gives a total of 22,491 reporting banks with aggregate capital of $\$ 1,800,036,368$ and aggregate resources of $\$ 21,095,054,420$.

Summary of Reports from National, State, etc., Banes, as of April 28, 1909.
[Expressed in millions.]

| Classification. | $\begin{gathered} \text { 6,893 } \\ \text { national } \\ \text { banks. } \end{gathered}$ | 15,598 state, etc., banks. | Total, 22,491 banks. |
| :---: | :---: | :---: | :---: |
| Loans | 84,987. 7 | \$6, 385. 5 | a $\$ 11,373.2$ |
| United States bonds | 740.2 | 52.6 | 792.8 |
| All other bonds and securities | 864.8 | 2,956.8 | 3,821.6 |
| Cash (fucluding national-bank notes) | 926.8 | 525.2 | 1, 452.0 |
| Capital stock. | 934.0 | 866.0 | 1,800.0 |

| Aggregate resources. | 9,368.9 | 11, 726. 1 | 21, 095.0 |

a Includes mortgages owned.
The increase in the aggregate resources of all reporting banks over the resources for the year 1908 is $\$ 1,511,600,000$. It will also be observed that banks other than national have over 55 per cent of the aggregate resources of all reporting banks; over 65 per cent of individual deposits; and over 56 per cent of the aggregate loans. Of the surplus and profits, 55 per cent is credited to this class of banks, while they have only about 48 per cent of the capital and 36 per cent of the cash holdings of all banks.

Individual deposits in all reporting banks are $\$ 14,035,500,000$, and estimating the deposits in 3,021 nonreporting banks at about $\$ 389,700,000$ the individual deposits in all banking institutions of the country are approximately $\$ 14,425,000,000$. The amount of cash in the vaults of the banks of the United States and island possessions has increased from $\$ 1,368,300,000$ in 1908 to $\$ 1,452,000,000$
in 1909; $\$ 83,700,000$ representing the addition to the cash holdings of the banks during the year, as against an increase of about \$254,600,000 for the year ended June 30, 1908. The banking power of the United States in 1909 as measured by capital, surplus and other profits, deposits and circulation of national and other reporting banks, together with the estimated amount of funds of this character in the nonreporting banks, is shown to be approximately $\$ 18,850,000,000$, an increase of over 266 per cent since 1890 , when Mulhall estimated the banking power of the United States at $\$ 5,150,000,000$.
Since 1900 the growth in the banking institutions of the country has been noteworthy both as to the number of banks organized and the volume of business transacted. In 1900 the total number of banks in operation as estimated was 13,977 , with capital of $\$ 1,150$,728,675 and individual deposits aggregating $\$ 7,688,986,450$. For the present year the number (including nonreporting banks) has increased to 25,512 , with capital aggregating $\$ 1,855,987,368$ and individual deposits $\$ 14,425,223,164$.

National banks have increased since 1900 from 3,732, with aggregate capital of $\$ 621,536,461$, to 6,893 , with aggregate capital of $\$ 933,979,903$ on April 28, 1909. Other reporting banks have increased from 6,650, with aggregate capital of $\$ 403,192,214$ in 1900 to 15,598 , with aggregate capital of $\$ 866,056,465$ in 1909. In 1900 the nonreporting banks were 3,595 in number, with capital of $\$ 126,000,000$; for the present year the number of banks not reporting is estimated at 3,021 , with capital of $\$ 55,951,000$. In 1900 national banks had 54 per cent of the capital and about 32 per cent of the individual deposits. For the current year the statistics show that national banks have a little more than 50 per cent of the capital and 33 per cent of the deposits of all of the banks of the country.

## STATE BANKS.

Reports obtained from state banks represent practically all of this class of banks in operation, only 193 small banks failing to submit returns. The summaries of reports received by the Comptroller from a number of the state officials in 1908, classified as state banks, included in many instances loan and trust companies and savings banks. In the compilation for the present year the reports from the latter named institutions are placed in the class of banks where they undoubtedly belong. In view of this fact it is made to appear that the growth in state banks has not been material, and it is difficult to make proper comparison with the figures published for 1908. State banks to the number of 11,319 , with aggregate capital of $\$ 416,059,900$ and resources of $\$ 3,338,669,134$, submitted reports for the current year. Of this number 381 banks, with capital of $\$ 90,264,195$ and aggregate resources of $\$ 1,104,392,901$, are located in the reserve cities. Geographically the state banks are located as follows: Nineteen in the New England States; 387 in the Eastern States; 3,312 in the Southern.States; 3,717 in the Middle Western States; 3,026 in the Western States; 831 in the Pacific States; and27 in the island possessions. The returns for 1908 from Texas and California included trust companies and those from South Dakota and Utah, private banks, figures for these two classes of banks being
eliminated from the compilation of returns relating to state banks in the States named for the current year. The State reporting the largest number of "state" banks is Missouri, with 964 ; Kansas being second, with 757 banks; Nebraska third, with 625 banks; Minnesota fourth, with 623 banks; and Oklahoma fifth, with 608 banks. In resources the 199 state banks of New York, with $\$ 593,200,692$, lead all other States in that respect. Missouri state banks are second in order, with $\$ 217,627,439$; California state banks third, with $\$ 199,113,503$; and Michigan state banks fourth, with $\$ 197,817,012$. New York has also the largest amount of capital invested in this class of banks, $\$ 34,573,000$; California being second, with $\$ 32,264,576$; Missouri ranking third, with $\$ 27,332,860$, and Illinois fourth, with $\$ 24,958,300$. The figures submitted in 1908 for Illinois as compiled by the state auditor included the capital stock of trust companies. Tables in the appendix to the report of the Comptroller of the Currency contain complete details relating to state banks, arranged by States and reserve cities.

## SAVINGS BANKS OF THE UNITED STATES.

Peculiar interest attaches to statistics relating to savings institutions inasmuch as they are the repositories of the accumulations of wage-earners mainly and an index to thrift. The functions of these institutions are essentially different from those of commercial banks, as savings banks are part of a system the aim of which is the safe and profitable investment of the funds of those who are not so situated as to invest their own money, and in this respect a mutual savings institution is the property of its depositors. Savings-bank reports to the number of 1,703 have been received, of which 642 are from mutual institutions and 1,061 from stock savings banks, the latter being operated for the benefit of both shareholders and depositors. The deposits in the savings banks aggregate $\$ 3,713,405,709$ and the number of depositors $8,831,863$, exclusive of savings depositors in state banks of Illinois, which are eliminated from these figures for the reason that savings depositors in that State are included in a separate table showing depositors in state banks of the country. Including 641,634 depositors with deposits of $\$ 204,908,505$ in savings departments of Illinois state banks and trust companies savings bank depositors for the country will aggregate 9,473,497, and savings deposits $\$ 3,918,314,214$. Of the 1,703 savings banks reporting as of April 28, 1909, 1,540 furnished a supplemental report showing savings deposits aggregating $\$ 3,633,942,072$ credited to $8,617,213$ depositors. The number of depositors in the 163 banks which failed to furnish information in regard to the number of depositors has been carefully estimated on the basis of returns of reporting banks.
The principal items of resources and liabilities of savings banks, both mutual and stock, on June 30, 1908, and April 28, 1909, are as follows:

| Classification. | June 30, 1908. | April 28, 1909. |
| :---: | :---: | :---: |
| Loans (including mortgages owned). | \$1,872, 098, 690 | \$2, 033, 268,601 |
| Bonds... | 1,586, 939, 788 | 1, 713, 270, 914 |
| Deposits. | 3, 479, 192, 891 | 3, 713, 405, 710 |
| Aggregate resources. | 3, 809, 533, 152 | 4, 072, 710, 105 |

In connection with the foregoing statement it should be noted that deposits in savings departments of 6 state banks of New Hampshire are included with statistics for state banks, and the returns from 29 trust companies of Vermont heretofore included with mutual savings banks are incorporated for the current year with the returns from trust companies.

## MUTUAL SAVINGS BANKS.

All the mutual savings banks are located in the New England and Eastern States, with the following exceptions: One in West Virginia, 3 in Ohio, 5 in Indiana, 3 in Wisconsin, 10 in Minnesota, and 1 in California. The number of reporting institutions is 642 , while the number reporting in 1908 was 676 . For the current year reports from 8 guaranty savings banks of New Hampshire and 29 trust companies of Vermont, heretofore included with reports relating to mutual savings banks, have been excluded from the returns relative to such banks. The aggregate resources of the mutual savings banks on April 28, 1909, were $\$ 3,394,926,005$. The aggregate resources for 1908, which, as stated, included the reports now eliminated, were $\$ 3,331,737,125$. The loans and mortgages in 1909 are stated at $\$ 1,590,181,366$, not including overdrafts amounting to $\$ 89,070$. The loans secured by real estate or other collateral aggregate $\$ 1,528$,949,012 , and those unsecured by collateral $\$ 61,232,353$, the total amount classified as reported being shown in the following table:

| ans on demand, secured by collateral. | \$34, 602, 357.91 |
| :---: | :---: |
| Loans on time, secured by collateral. | 131, 228, 863.72 |
| Loans secured by real-estate mortgages, or | 301, 022, 328.96 |
| Mortgages owned | 1, 062, 095, 462.40 |

The investments by mutual savings banks in bonds and other securities in 1908 aggregated $\$ 1,512,940,551$. Investments of this character in 1909 were $\$ 1,599,532,371$, scheduled as follows:

The mutual savings banks hold more than 22 per cent of the aggregate individual deposits of all the banks of the country, and over 26 per cent of the total deposits are in the two classes of savings banks. Over one-half of the deposits in mutual savings banks, or $\$ 1,595,162,768$, are held by 31 banks in the city of New York and 75 banks located in 11 other reserve cities, namely, Boston, Albany, Brooklyn, Philadelphia, Pittsburg, Baltimore, Cleveland, Milwaukee, Minneapolis, St. Paul, and San Francisco. New York City alone holds nearly one-half of the amount to the credit of depositors in mutual savings banks in the cities named, $\$ 743,858,253$ being on deposit in mutual savings banks in that city on April 28, 1909. Deposits in Brooklyn savings banks aggregated $\$ 216,267,834$ and in Boston savings banks $\$ 208,443,392$.

Of the 642 mutual savings banks reporting, 627 furnished a supplemental report giving information relative to the number of depositors, etc., on April 28, 1909. From a compilation of these supplemental reports it appears that the 627 banks in question had 7,204,579 depositors with savings accounts aggregating $\$ 3,138,763,704$. These figures include 106 banks located in the reserve cities mentioned, with $\$ 1,599,608,984$ deposits and $3,379,038$ depositors. The reports show also that there were $1,335,256$ depositors in the mutual savings institutions in the city of New York, 612,516 in those of Boston, 447,768 in Brooklyn, 382,088 in Philadelphia, and the remaining 601,410 in the other cities named. Interest to the amount of $\$ 114,899,550$ was paid on deposits by mutual savings banks during the current year.

## STOCK SAVINGS BANKS.

- Stock savings banks to the number of 1,061 made reports, their capital stock being $\$ 59,506,420$, individual deposits $\$ 568,820,835$, loans $\$ 442,998,163$ (including mortgages owned), investments in bonds, stocks, etc., $\$ 113,738,542$, cash in bank $\$ 18,066,773$, aggregate resources $\$ 677,784,099$. All of these items show large increases over the amounts reported for 1908 , which is due chiefly to the fact that many of the savings banks included in the statements compiled were not separated from state banks in former tabulations prepared by state bank officials. The foregoing figures include those relative to 92 stock savings banks located in the various reserve cities with aggregate resources of $\$ 275,270,899$.

The supplemental statements furnished by 913 banks of this class show deposits held amounting to $\$ 495,178,367$ credited to $1,412,634$ depositors, and interest to the amount of $\$ 15,027,311$ paid on deposits during the past year. Eighty-three of the stock savings banks making supplemental reports are located in the reserve cities, their aggregate deposits being $\$ 206,803,323$ credited to 505,885 depositors, the amount of interest paid to these depositors during the past year being $\$ 6,548,557$.

## MUTUAL AND STOCK SAVINGS J3ANKS.

The number of depositors in all savings banks reporting, exclusive of those having accounts in savings departments of state banks in Illinois, has increased since 1900 from $5,898,0911$ to $8,831,863$ and the average deposit from $\$ 404.33$ to $\$ 420.45$. In 1908 the number of depositors, excluding those in Illinois from the calculation, was
$8,088,066$ and the average deposit account $\$ 430.16$. For the current year, owing to the greater number of stock savings bank returns incorporated in the table, the number of depositors has increased by 743,797 but the average deposit account appears to have decreased by $\$ 9.71$.

In the following comparative statement is indicated the number of depositors, amount of deposits, and the average savings deposit in savings banks in the States named for the years 1908 and 1909. Included in the statistics for the year 1908 are deposits in savings departments of many banks in operation in the State of Illinois, for the reason that the auditor of public accounts of that State, in his periodical statements, reports separately such deposits from deposits subject to check. The statistics for 1909, however, do not include these deposits in view of the fact that reports upon the number of depositors have been received and compiled for the several classes of banks and the Illinois savings depositors are shown in the table relating to state-bank depositors. Compared with 1908 there has been a gain of 250 in the numberof reporting banks and of $\$ 234,212,818$ in the amount of deposits, excluding savings department depositors. and deposits reported in 1908 from Illinois state banks. The supplemental reports obtained from 339 state banks and trust companies of Illinois having savings departments show savings deposits of $\$ 204,908,505$ and 641,634 depositors on June 30, 1909. The number of depositors has been estimated for 163 savings banks which made reports as to the amount of deposits held, but failed to give the number of depositors.

a Partially estimated.
$b$ Included in abstract of State banks having savings departments. Reports obtained for the National Monetary Commission show that 339 State banks and trust companies of Illinois with $\$ 204,908,505$ savings deposits had 641,634 depositors on June 30, 1909.

It will be noted by reference to the foregoing table that $7,024,476$, or nearly 80 per cent of all depositors in savings banks are reported by banks in the New England and Eastern States, and a little more than 81 per cent of deposits in this class of banks is held by savings banks in these two geographical sections. There are 902,676 depositors with $\$ 306,785,344$ deposits reported by savings banks of the Middle Western States, 491,770 depositors with $\$ 266,195,044$ deposits in banks of the Pacific States, 344,632 depositors with $\$ 81,369,104$ deposits in savings banks of the Southern States. There are 2,760,343 savings-bank depositors in New York, 1,783,024 of which have accounts on the books of New York City and Brooklyn savings banks.

Massachusetts savings banks reported $2,002,010$ depositors, of whom over one-third are depositors in banks in the city of Boston.

The next largest number of depositors in savings banks is reported by Pennsylvania banks, the number in that State being 452,487; California savings banks following with 443,334 , the city of San Francisco banks reporting 184,582 of this number.

The growth of savings banks in the United.States from 1820 to 1909 as evidenced by the amount of deposits, number of depositors, average deposit account, and average per capita in census years from 1820 to 1890 and annually thereafter is shown in the following table. The figures given, with the exception of those for 1909, include the number of depositors and amount of deposits in the state banks of Illinois having savings departments, but not the number of such banks by reason of the fact that reports from these institutions are incorporated with the state bank returns. For the current year the returns from Illinois are eliminated from this statement.

Number of Savings Banks in the United States, Number of Depositors, Amount of Savings Deposits, Average Amount due each Depositor in the Years 1820, 1825, 1830, 1835, 1840, and 1845 to 1909, and Average per Capita in the United States in the Years Given.

a Not including 339 state banks and trust companies of Illinois with $8204,908,505$ saving deposits credited to 641,634 savings depositors. Including Illinois savings deposits and depositors the average due each depositor is $\$ 413.60$ and average per capita $\$ 44.06$.

6 Population estimated at $88,926,000$, J une 30, 1909.

## PRIVA'CE BANKS.

Private banks to the number of 4,325 are listed in bankers' directories for March, 1909; over one-half of this number perhaps includes firms whose business is confined to brokerage and exchange and can not properly be classed as commercial banks. In 1908 reports from 1,007 private banks with capital of $\$ 21,122,836$ and aggregate resources of $\$ 161,541,480$ were received and tabulated. For the present year 1,497 private banking institutions furnished reports as of April 28, 1909. From the returns submitted it appears that the aggregate capital is $\$ 27,726,922$, surplus and profits $\$ 15,728,243$, deposits $\$ 193,263,224$, cash on hand $\$ 11,053,706.52$, loans and discounts, including overdrafts, $\$ 165,918,988$, aggregate resources $\$ 246,256,355$. It appears that on June 30, 1909, there were 130,865 depositors with savings or time accounts aggregating $\$ 32,444,592$ and 307,669 with accounts other than savings aggregating $\$ 90,721,745$. In the appendix to the report of the Comptroller of the Currency is an abstract of reports of condition of private banks arranged by States and reserve cities, together with a comparative statement of resources and liabilities for each year from 1905 to 1908.

## LOAN AND TRUST COMPANIES.

Summäries of bank reports received in 1908 from a number of States include returns from loan and trust companies with those from state banks. In view of this fact the increase in the number of loan and trust companies reporting for 1909 appears to be unusually large. The number of these companies furnishing special reports for 1909 is 1,079, against 842 incorporated in the returns submitted in 1908. Resources reported by these institutions as of April 28, 1909, aggre-
gate $\$ 4,068,534,982$. Three hundred and five of these companies with resources aggregating $\$ 3,048,457,789$ are located in the central reserve cities of New York, Chicago, and St. Louis and in 35 other reserve cities. The largest number of trust companies is located in Pennsylvania, reports having been obtained from 278 in that State, but the 85 trust companies located in New York hold about 32 per cent of the resources of all reporting trust companies. The paid in capital stock of trust companies amount to $\$ 362,763,223$, surplus and profits $\$ 493,382,193$, individual deposits $\$ 2,835,835,180$, the loans aggregate $\$ 2,064,666,503$, divided as follows: On real estate, including mortgages owned, $\$ 377,318,280$, loans on other collateral $\$ 1,222,-$ 881,129 , loans unsecured by collateral $\$ 460,550,859$, overdrafts secured $\$ 2,049,455$, overdrafts unsecured $\$ 1,866,779$. The investments include $\$ 3,222,380$ United States bonds, $\$ 155,647,931$ State, county, and municipal bonds, $\$ 362,404,241$ railroad bonds, and $\$ 468,914,756$ other stocks, bonds, and securities. The amount due from other banks is $\$ 578,243,506$, and the cash on hand $\$ 254,447,910$. From the supplemental report furnished by 862 trust companies it appears that there were $1,965,333$ depositors credited with $\$ 657$,697,417 savings and time deposits, together with 1,283,686 depositors having nonsavings deposits to the amount of $\$ 2,147,717,733$. There are 247 loan and trust companies located in the reserve cities heretofore mentioned having $1 ; 008,192$ savings depositors, $\$ 347,822,283$ savings deposits, and 647,590 depositors with $\$ 1,742,010,086$ nonsavings accounts.

In 1900 reporting loan and trust companies held 14.2 per cent of the individual deposits in all banks, in 1907, 15.7 per cent; in 1908, 14.6 per cent; and in 1909, 20.2 per cent.

## CAPITAL STOCK OF NATIONAL AND OTHER BANKS.

A consolidation of the reports obtained show that the aggregate amount of paid-in capital stock of the banks of the United States including island possessions is $\$ 1,800,036,368$, an increase of about $2 \frac{1}{2}$ per cent for the year and over 75 per cent above the amount reported on June 30, 1900. The amount invested in capital of banks located in the Eastern States is $\$ 581,370,131$; in the Middle Western States, $\$ 509,622,221$; in the Southern States, $\$ 297,137,727$; in the Pacific States, $\$ 149,279,601$; in the New England States, $\$ 138,499,518$; in the Western States, $\$ 118,075,127$; and in the island possessions, $\$ 6,052,043$. New York has over $\$ 263,000,000$ invested in bank capital, a larger amount than any other State, Pennsylvania being next with $\$ 229,000,000$, Illinois third with $\$ 122,000,000$, and Ohio fourth with $\$ 101,000,000$. In the New England States Massachusetts is first with $\$ 72,000,000$, Connecticut second with $\$ 25,000,000$, and Rhode Island third with $\$ 14,000,000$. In the Southern States Texas is first with $\$ 57,000,000$, Kentucky second with $\$ 36,000,000$, Georgia third with $\$ 31,000,000$. Of the Middle Western States, Illinois is first with $\$ 122,000,000$, Ohio second with $\$ 101,000,000$, Missouri third with $\$ 79,000,000$. Of the Western States Kansas is first with $\$ 26,000,000$, Nebraska second with $\$ 25,000,000$, Oklahoma third with $\$ 19,000,000$. Of the Pacific States California is first with $\$ 96,000,000$, Washington second with $\$ 20,000 ; 000$, Oregon third with
$\$ 11,000,000$. In the island possessions $\$ 3,000,000$ capital is invested in the banks of Hawaii, $\$ 1,454,302$ in Porto Rico, and $\$ 1,532,664$ in the Philippines.
average rates of interest paid by savings and other banks.
In connection with general information obtained, returns were secured from savings and other banks, as heretofore stated, relating to the amount of interest-bearing deposits and rates of interest paid. thereon.

The 627 reporting mutual savings banks paid interest during the last year at an average rate of 3.85 per cent and 913 stock savings banks at the rate of 3.60 per cent. In 1908 the average rate paid by both classes of savings banks was 3.62 per cent. The average rate paid during the current year by mutual savings banks in the New England States was 3.89 per cent, the minimum, 3.55 per cent, being the average rate in New Hampshire, and the maximum, 3.96 per cent, in Massachusetts and Connecticut. The average rate in the Eastern States was 3.76 per cent. Pennsylvania shows the lowest average rate, namely, 3.32 per cent, and Delaware the highest, 4 per cent. Very generally the savings banks in New York pay 4 per cent, but the average is shown to be 3.90 per cent. There are a limited number of mutual savings banks in Ohio, Indiana, Wisconsin, and Minnesota, the average rate of interest paid varying from 3.60 per cent in Minnesota to 4.25 per cent in Wisconsin, the average for this section being 3.79 per cent. The average rate in California, the only State in the Pacific Division having a mutual savings bank, is 4 per cent. The average rates paid by stock savings banks in the various geographical divisions are as follows: New England States, 3.50 per cent; Eastern States, 2.98 per cent; Southern States, 3.68 per cent; Middle Western States, 3.60 per cent; Western States, 3.63 per cent; Pacific States, 3.64 per cent.

The average rate of interest paid by 862 reporting trust companies on savings accounts was 3.43 per cent, but from information received it appears that 613 companies pay an average rate of 2.34 per cent on other accounts.

Reports from 4,691 State banks show that interest at the average rate of 3.71 per cent is paid on savings accounts, and reports from 4,016 banks, the payment of interest on other accounts at an average rate of 3.34 .

Nine hundred and ninety-three private bank reports show the average rate on savings accounts as 3.43 per cent, a limited number paying an average of 3.08 per cent on other accounts.

Savings accounts are reported as being carried by 3,515 national banks, the average rate of interest being 3.34 per cent. Interest at the average rate of 2.97 is paid on other accounts by 4,075 national banks and reports from 2,517 associations state that no interest is paid.

Information in detail in relation to the rates of interest paid on savings accounts by reporting banks is shown in the following table:

Average Rate of Interest Paid by Mutual and Stock Savings Banks in 1908 and 1909, and by other Banks and Banking Institutions on Savings Deposits in 1909.

From the foregoing table it will be observed that the deposits, including government deposits, held by the banks of the country, aggregate $\$ 14,105,924,984$. Excluding government deposits, the individual deposits aggregate $\$ 14,035,523,165$. The individual deposits reported for 1908 were $\$ 12,784,511,169$, thus showing a gain of $\$ 1,251,011,996$ in 1909 over 1908. In round amounts the national banks hold $\$ 4,826,000,000$ individual deposits, savings banks $\$ 3,713$,000,000 , loan and trust companies $\$ 2,835,000,000$, state banks $\$ 2,466,000,000$, and private banks $\$ 193,000,000$. Geographically, the individual deposits reported by banks in the Eastern States aggregate $\$ 6,047,000,000$, in the New England States $\$ 2,106,000,000$, in the Middle Western States $\$ 3,196,000,000$, in the Southern States $\$ 1,059,000,000$, in the Pacific States $\$ 897,000,000$, in the Western States $\$ 700,000,000$, and in the island possessions $\$ 28,000,000$.

National banks of the Middle Western States hold the largest amount of government deposits- $\$ 20,563,000$-those of the Eastern States hold $\$ 15,992,000$, of the Western States $\$ 8,311,000$, of the Pacific States $\$ 7,814,000$, of New England States $\$ 3,480,000$, and national banks of the island possessions $\$ 331,455$. The total government deposits held by the national banks on April 28, were $\$ 70,401,818$. The figures for United States deposits include deposits of United States disbursing officers, amounting to $\$ 12,620,562$.

From a further examination of the table it will be noted that the amount of savings deposits held by all the banks of the country is $\$ 4,926,161,555$. Of this amount $\$ 3,506,603,926$ was in savings banks, $\$ 576,783,099$ in loan and trust companies, $\$ 451,349,051$ in state banks, $\$ 376,052,530$ in national banks, and $\$ 15,372,946$ in private banks. The largest amount of deposits under the classifications shown for April 28, 1909, is individual deposits subject to check aggregating $\$ 6,956,502,690, \$ 3,514,726,043$ being on the books of the national banks and the remainder, $\$ 3,441,776,644$, of all other banks. Demand certificates to the amount of $\$ 625,189,163$ in all reporting banks include $\$ 378,690,002$ in national banks and $\$ 246,-$ 499,161 in all other banks. Time deposits, including time certificates of deposits, aggregate $\$ 1,211,831,194, \$ 844,818,608$ of this amount being reported by banks other than national and $\$ 367,012,586$ by national banks. Certified checks to the extent of $\$ 116,575,530$ and $\$ 73,003,690$ in cashiers' checks were reported by national banks and $\$ 60,428,688$ certified checks and $\$ 21,007,935$ cashiers' checks, etc., by all other banks. Banks other than national reported $\$ 44,422,717$ unclassified deposits.

The information secured relative to deposits is of especial interest at this time, when the adequacy of present means for the custody of the people's savings is under discussion. It is shown in the foregoing table that deposits amounting to over $\$ 4,926,000,000$, or 35 per cent, of the total individual deposits in all banks are savings deposits, and in addition over $\$ 1,211,000,000$ are time deposits. The individual deposits subject to check aggregate over $\$ 6,956,500,000$, demand certificates of deposit over $\$ 625,000,000$, and the aggregate of other minor classifications is over $\$ 315,900,000$.

As fluctuations of deposits in the banks of the country from year to year indicate in a large measure economic conditions, it is of interest to note that since June 30, 1900, individual deposits in
reporting banks have increased over 93 per cent, the amount of deposits on that date being $\$ 7,238,986,450$. The highest per cent of annual increase since 1900 was in 1901, the gain in deposits for the fiscal year ending June 30, 1901, being over 16 per cent. Reports for the year ended June 30, 1905, show an increase of over 13 per cent. The next highest increase is shown in the reports submitted as of April 28, 1909, the gain in deposits over amount reported for 1908 being more than 9 per cent. Deposit accounts from June 30, 1907, to the corresponding date in 1908 declined nearly $2 \frac{1}{2}$ per cent, this reduction being caused by the monetary crisis in the fall of 1907. The following table shows the percentage of gain for each year over the preceding year:

| Year. | Per cent. | Year. | Per cent. |
| :---: | :---: | :---: | :---: |
| 1901. | 16.8 | 1906. | 7. 6 |
| 1902. | 7.6 | 1907. | 7. 2 |
| 1903. | 4.9 | 1908 | a 2.4 |
| 1904. | 4.4 | 1909. | 9. 7 |

The following table shows the amount and per cent of deposits held by the several classes of banks in 1900, 1908, and 1909:

| Classification. | 1900. |  | 1908. |  | 1909. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Amount. | Per cent. | Amount. | Per cent. | A mount. | Percent. |
|  | Millions. |  | Millions. |  | Millions. |  |
| State banks. | 81,266. 7 | 17.5 | \$2,937. 1 | 23.0 | \$2, 466.9 | 17.6 |
| Savings banks. | 2,389.7 | 33.0 | 3,479.2 | 27.2 | 3,713.4 | 26.4 |
| Private banks. | - 96.2 | 1.3 | 126.7 | 1.0 | 193.3 | 1.4 |
| Loan and trust companies | 1,028.2 | 14.2 | 1,867.0 | 14.6 | 2,835.9 | 20.2 |
| National banks.. | 2,458.1. | 34.0 | 4,374.5 | 34.2 | 4,826.0 | 34.4 |
| Total. | 7,238.9 | 100.0 | 12,784.5 | 100.0 | 14,035. 5 | 100.0 |

From the foregoing it will be seen that national banks have been steadily gaining in the proportion of individual deposits held by all banks, the 34 per cent held in 1900 rising to 34.2 per cent in 1908 and to 34.4 per cent in the present year. Savings banks, which held 33 per cent of individual deposits in 1900, now hold only 26.4 per cent, while loan and trust companies, reported as holding 14.2 per cent of the deposit accounts of individuals in 1900, now hold 20.2 per cent of such deposits in all reporting banks. The proportion held by state and private banks has increased but slightly since 1900, but the figures indicate that about $5 \frac{1}{2}$ per cent of total deposits has shifted from state banks to loan and trust companies since June 30, 1908, caused chiefly by the fact that a different classification has been made in the current statistics and that the data relating to state banks in 1908 included many trust company reports, which are now included in their proper class.

The following table shows the amount of individual deposits in national and other reporting banks by geographical divisions on or
about June 30, 1908, and on April 28, 1909, together with the amount and per cent of increase:

|  | Individual deposits. |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| - Geographical division. | 1908. | 1909. | Increase. | Per cent of increase. |
|  | Millions. | Millions. | Millions. |  |
| New England States. | \$1,987.1 | \$2,106.2 | \$119. 1 | 5. 99 |
| Eastern States. | 5,427.9 | 6,047. 7 | 619.8 | 11.41 |
| Southern States. | 913.8 | 1,059. 2 | 145.4 | 15.91 |
| Middle Western States. | 3,003. 6 | 3,196. 2 | 192.6 | 6.41 |
| Western States. | 591.9 | 700.2 | 108.3 | 18.21 |
| Pacific States.. | 839.7 | 897.1 | 57.4 | 6.83 |
| Islands....... | 20.5 | 28.9 | 8.4 | 40.97 |
|  | 12,784. 5 | 14, 035.5 | 1,251. 0 | 9.78 |

While the figures published in 1908 show a decrease in individual deposits in every section except in the New England States from the amounts reported in 1907, the returns for 1909 show an average increase of 9.78 per cent over the preceding year for the whole country. Outside of the island possessions, where an increase of 40.97 per cent is shown, the largest per cent of increase is in the Western States-18.21. The Southern. States show an increase of 15.91 per cent, the Eastern States an increase of 11.41 per cent, the Pacific States 6.83 per cent, the Middle Western States 6.41 per cent, and the New England States 5.99 per cent. The following comparative statement shows the increase in population, individual deposits, and money in circulation in the United States, exclusive of the island possessions, for 1907, 1908, and 1909:

|  | 1907. | 1908. | Increase 1907 to 1908. |  | 1909. | Increase 1908 to 1909. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Amount. | Per cent. |  | Amount. | Per cent. |
|  |  | Millions. | Millions. |  |  | Millions. |  |
| Population........... | $86.0$ | 87.4 | 1.4 | 1.63 | 88.9 | 1.5 | 1.72 |
| Deposits (individual). | 813,077.3 | \$12,764.0 | a \$313.3 | a 2.39 | \$14,006. 6 | \$1,242.6 | 9.73 |
| Money in circulation.. | 82,773.0 | \$3,038.0 | \$265.0 | 9.55 | \$3,106.2 | \$68.2 | 2.24 |

a Decrease.
In connection with deposits in national banks the following comparative statement is of interest, showing on or about July 1, 1896, 1900, 1908, and April 8, 1909, the amount of their individual deposits, the average deposit account, the number of depositors, estimated for 1900 and 1908, and number of shareholders in 1896, together with the estimated number in 1900, 1908, and 1909:

$\sigma_{0}$ Of the deposit accounts reported on June 30,1909 , by 6,592 national banks, $1,965,096$ were savings and 5,753,329 nonsavings accounts.

## MONEY IN BANKS OF THE UNITED STATES.

On April 28, 1909, the amount of reported cash on hand was $\$ 1,452,014,676$ against $\$ 1,368,329,683$ in 1908, a gain of about $\$ 83,700,000$. In 1908 the gain in cash over 1907 was more than $\$ 254,000,000$. Over 63 per cent of the cash holdings of the banks of the country is in national banks, as will be seen from the following table, showing the amount of coin and other money in the United States on April 28, 1909, held by national and other banks, including those in the island possessions:

Gold and other Money held by National Banks and all other Reporting Banks and Bankers, on April 28, 1909.

| Classification. | National banks $(6,893)$. | $\text { All other banks } \begin{gathered} (15,598) . \end{gathered}$ | Total all banks. $(22,491)$. |
| :---: | :---: | :---: | :---: |
| Gold coin | 3151, 366, 529. 53 | \$75, 499, 867. 50 | \$226, 866, 397.03 |
| Gold certificates $a$ | 375, 668, 480.00 | 207, 039, 340.00 | 582, 707, 820.00 |
| Silver dollars | 11, 869, 927.00 | 10,697, 159.00 | 22,567,086. 00 |
| Silver certlficates | 124, 348, 526.00 | $55,260,744.00$ | 179,609, 270.00 |
| Subsidiary and minor coins $b$ | 19, 212, 159.29 | 13,699, 181. 22 | 32,911, 340.51 |

|  | 926,776, 902.82 | 525, 237, 773. 52 | 1,452, 014,676. 34 |

a Includes gold treasury certificates to order and clearing-house certificates, section 5192. $b$ Includes fractional paper currency, nickels, and cents.

The returns for 1909 are more complete as to details of cash holdings than those submitted for 1908. The unclassified specie and cash reported in 1908 amounted to over $\$ 303,000,000$, while for the present year practically all cash held appears to have been properly segregated in the reports, as only about $\$ 22,000,000$ is not classified. It will be noted that about 56 per cent of the cash consists of gold coin and gold certificates, $\$ 226,866,397$ being gold coin and $\$ 582,707$,820 gold certificates. Fourteen per cent of the cash holdings consists of silver and silver certificates, 18 per cent of legal-tender notes; 8 per cent of national-bank notes, and 4 per cent of unclassified cash and minor coins.

The following table shows the cash holdings of banks in 1908 and 1909 and the amount of increase by geographical divisions:

| Geographical division. | Cash holdings. |  |  |
| :---: | :---: | :---: | :---: |
|  | 1908. | 1909. | Increase. |
|  | Millions. | Millions. | Millions. |
| New England States. | 876.2 | \$88.3 | \$12.1 |
| Eastern States.. | 656.6 | 716.2 | 59.6 |
| Southern States. | 95.8 | 105.8 | 10.0 |
| Middle Western States | 367.0 | 373.4 | 6.4 |
| Western States. | 67.0 | 71.0 | 4.0 |
| Pacific States. | -100.3 | 89.6 | a 10.7 |
| Islands. | 5.4 | 7.7 | 2.3 |
| Total. | 1,368.3 | 1,452.0 | b83. 7 |

On April 28, 1909, banks in the New England States held, in round amount, actual cash in the sum of $\$ 88,300,000$; those in the Eastern States, $\$ 716,200,000$; in the Southern States, $\$ 105,800,000$; in the Middle Western States, $\$ 373,400,000$; in the Western States, $\$ 71,000$,000 ; in the Pacific States, $\$ 89,600,000$, and the banks of the island possessions, $\$ 7,700,000$. The net increase in the cash holdings during the year, as stated, is $\$ 83,700,000$, every section showing an increase with the exception of the Pacific States, where there was an apparent decrease of $\$ 10,700,000$. The banks of the Eastern States gained $\$ 59,600,000$; those of the New England States $\$ 12,100,000$; the Southern States $\$ 10,000,000$; the Middle Western States, $\$ 6,400,000$; the Western States $\$ 4,000,000$, and the island possessions, $\$ 2,300,000$.

The geographical distribution of money in the banks of the United States in 1900, 1907, 1908, and 1909 is shown in the following table:

Geographical Distribution of Money in the Banks of the United States in $1900,1907,1908$, AND 1909.

| Division. | 1900. |  | 1907. |  | 1908. |  | 1909. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Amount. | $\begin{aligned} & \text { Per } \\ & \text { cent. } \end{aligned}$ | A mount. | $\begin{aligned} & \text { Per } \\ & \text { cent. } \end{aligned}$ | Amount. | $\begin{aligned} & \text { Per } \\ & \text { cent. } \end{aligned}$ | Amount. | Per cent. |
|  | Millions. |  | Millions. |  | Millions. |  | Millions. |  |
| New England States. | \$61.9 | 8.25 | \$63.5 | 5. 74 | \$76. 2 | 5. 59 | \$88. 3 | 6.11 |
| Eastern States. | 369.1 | 49.22 | 519.2 | 46.92 | 656.5 | 48.17 | 716.2 | 49.59 |
| Southern States. | 47.8 | 6.37 | 87.2 | 7.88 | 95.8 | 7.03 | 105.8 | 7.33 |
| Middle Western States | 195.2 | 26.03 | 305.8 | 27.64 | 367.0 | 26.93 | 373.4 | 25. 85 |
| Western States. | 31.8 | 4.25 | 55.2 | 4. 98 | 67.1 | 4.93 | 71.0 | 4.92 |
| Pacific States. | 44.1 | 5.88 | 75.6 | 6.83 | 100.3 | 7.35 | 89.6 | 6.20 |
| Total | 749.9 | 100.00 | 1,106. 5 | 100.00 | 1,362.9 | 100.00 | 1,444.3 | 100.00 |

In noting the geographical distribution of cash holdings it will be observed that nearly 50 per cent of the aggregate is in banks of the Eastern States. The cash holdings of banks in that section in 1909 was 49.59 per cent, against 48.17 per cent in 1908, 46.92 per cent in 1907, and a fraction more than the percentage of 49.22 per cent shown in 1900. The proportion of cash held by the banks of the Middle Western States was 25.85 per cent. Banks in this section in 1908 held 26.93 per cent of the total cash holdings, in 1907, 27.64 per cent, and in 1900, 26.03 per cent. The banks of the Southern States held 7.33 per cent, against 7.03 in 1908 and 7.88 per cent in 1907. The banks of the Pacific States hold 6.20 per cent, against 7.35 per cent in 1908 and 6.83 per cent in 1907; those of the New England States hold 6.11 per cent, against 5.59 per cent in 1908 and 5.74 per cent in 1907. The banks in the Western States hold 4.92 per cent; in 1907 and 1908 the percentages of cash holdings of banks in this section were 4.99 per cent and 4.93 per cent, respectively.

In the appendix to the Report of the Comptroller of the Currency will be found a table showing the amount of gold coin, gold certificates, silver dollars, silver certificates, legal-tender notes, national bank notes, subsidiary and minor coins held by banks in each State and geographical section. The State with banks having the largest holding of gold coin is California, $\$ 33,859,900$ being reported on hand on April 28, 1909; there was over $\$ 19,800,000$ gold coin in Pennsylvania banks on that date, $\$ 17,489,000$ in Illinois banks, $\$ 16,368,000$ in New York banks, $\$ 12,089,000$ in Washington banks, $\$ 10,970,000$
in Oregon, $\$ 10,715,000$ in Ohio, and $\$ 10,031,000$ in Missouri banks. In the banks of New York $\$ 356,000,000$ was held in gold certificates, in the Illinois banks $\$ 46,000,000$, and in the banks of Pennsylvania $\$ 43,000,000$ was reported.

The State having the largest amount of silver dollars in banks is Texas, $\$ 1,938,000$; Pennsylvania banks are next in order, with $\$ 1,676,000$; Ohio banks third, with $\$ 1,280,000$; Illinois banks fourth, with $\$ 1,188,000$; and Missouri banks fifth, with $\$ 1,159,000$.

The largest amount of silver certificates in the banks of any one State is reported by the banks of New York, $\$ 67,584,000$; Illinois comes. next with $\$ 25,143,000$, followed, by Pennsylvania with $\$ 18,621,000$, Massachusetts with $\$ 14,410,000$, and Missouri with $\$ 10,269,000$. The banks of New York also hold the largest amount of legal-tender notes, $\$ 90,388,000$ being in the vaults of banks in that State; $\$ 43,435,000$ was in Illinois banks, $\$ 22,445,000$ in Pennsylvania banks, $\$ 12,647,000$ in Ohio banks, and $\$ 11,218,000$ in Massachusetts banks. The holdings of national bank notes also appear to have been the largest in New York banks, namely, $\$ 19,752,000$. Over $\$ 11,627,000$ in national bank notes was held by Pennsylvania banks, $\$ 11,166,000$ by Illinois banks, $\$ 8,311,000$ by Ohio banks, and $\$ 5,204,000$ by Massachusetts banks. The largest amount of national bank notes held in any geographical section, $\$ 38,886,000$, was in the Middle Western States banks, the amount held by banks in the Eastern States being $\$ 34,756,000$. Of subsidiary and minor coins the banks of New York held $\$ 4,716,344$, Pennsylvania $\$ 3,244,761$, illinois $\$ 1,798,389$, and Texas $\$ 1,735,929$.

The following table gives the composition of cash holdings arranged by geographical divisions:

Cash in all Reporting Bangs.

| Geographical divisious. | Gold coin. | Gold certificates. | Silver dollars. |  | Silver certificates. | Subsidiary and minor coin. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| New Eugland States | \$9,970,604. 22 | \$30, 431, 800 | \$522,536 |  | \$18, 456, 977 | \$2, 673,949.15 |

In connection with the foregoing statistics, the following statement showing the deposits and cash holdings of the several classes of reporting banks on April 28, 1909, together with the percentage of cash to deposits in 1908 and 1909, is of interest:

Individual Deposits and Cash Holdings of the Several Classes of Banks, April 28, 1909.

| Classification. | Individual deposits. | Cash on hand. | Ratio of cash to deposits. |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | 1908. |  | 1909. |  |
| National banks. | Millions. 84, 826. 1 | $\begin{gathered} \text { Millions. } \\ \$ 926.8 \end{gathered}$ | Per cent. | $\begin{array}{r} \text { Per cent. } \\ 20.33 \end{array}$ | Per cent. | Per cent. $19.20$ |
| State banks.. | 2,466.9 | 227.0 | 10.51 |  | 9.20 |  |
| Savings banks. | 3,713.4 | 32.7 | 1.25 | 5.70 | . 88 | 5.70 |
| Private banks............. | 193.3 $2,835.8$ | 11.1 254.4 | 6.71 6.34 | 5.7 | 5.74 <br> 8.97 |  |
| Total. | 14, 035.5 | 1,452.0 |  | 10.70 |  | 10.34 |

On April 28, 1909, the proportion of cash holdings of all banks to deposits was 10.34 per cent; in 1908, 10.70 per cent; and in 1907, 8.50 per cent. The average proportion of cash to individual deposits held by national banks (exclusive of all government deposits and bank balances) was 19.20 per cent against 20.33 per cent in 1908 and 16.70 per cent in 1907. The average cash holdings to individual deposits held by all other banks was 5.70 per cent in 1909, being exactly the same percentage reported in 1908. In 1907 the percentage was 5.60. In 1909 the proportion for the state banks was 9.20 per cent, for private banks 5.74 per cent, for loan and trust companies 8.97 per cent, and for savings banks less than 1 per cent.

In the following table is shown the distribution of money in the United States, giving the amount in the Treasury as assets, in reporting banks, and elsewhere in 1892 to 1909:

a Public money in national-bank depositaries to the credit of the Treasurer of the United States not included.
${ }^{b}$ Money in banks of island possessions not included.
c Compiled from special reports, April 28, 1909.
In this connection it should be stated that the data relating to the stock of money and amount held in the Treasury have been used as of June 30 for the reason that the figures for this date have been carefully revised by the Treasurer's office and are used in all annual publications of the department. The amount of money on May 1, the day nearest the date of the special reports obtained from the banks, remains the same, but the money in the Treasury as assets on that date was $\$ 8,700,000$ greater than on June 30, as shown in the table. By using the details of figures showing monetary stock on May 1 the per cent of money in the Treasury will be 9.06 , the amount not in the Treasury or banks 48.50 , or $\$ 1,652,300,000$ instead of $\$ 1,661,900,000$, and the per capita of money not in the Treasury or banks \$18.54 instead of $\$ 18.68$. The amount in circulation will also be reduced to $\$ 3,096,600,000$ from $\$ 3,106,200,000$.

The general stock of money in the United States at the close of the year ended October 31, 1909, was $\$ 3,427,889,113$, an increase during the year of $\$ 46,809,379$. As shown in the following table, the stock of gold decreased to the extent of $\$ 644,613$, and Treasury notes of 1890 to the extent of $\$ 671,000$. National-bank notes increased to the extent of $\$ 38,096,564$, silver certificates by $\$ 9,340,521$, and standard silver dollars by $\$ 687,907$.

Comparative Statement Relative to Circulation at close of Business November 2, 1908, and November 1, 1909, with Changes during the Interval.

From the foregoing it appears that the total loans and discounts in all reporting banks of the United States on April 28, 1909, were $\$ 9,994,516,126$, and including mortgages owned, the total is $\$ 11,373,217,691$. About 57 per cent of the loans of all banks is secured by collateral, including real estate. About $\$ 1,939,000,000$ of secured loans are on demand and also $\$ 660,000,000$ of the unsecured loans. Over $\$ 2,539,000,000$ of time loans are on paper with two or more names and $\$ 1,351,000,000$ is on single name paper. About $\$ 269,000,000$ of the loans reported were not classified. Of the $\$ 69,000,000$ reported as overdrafts, $\$ 29,000,000$ are secured. Loans on real estate reported as "mortgages owned" aggregate $\$ 1,378,-$ 000,000 . The demand loans amount to over 22 per cent of the aggregate, the real estate loans about the same proportion, all other loans being 56 per cent of the total.

The following table shows the amount of loans in national and other reporting banks by geographical divisions on or about June 30, 1908, and on April 28, 1909, together with the amount and per cent of increase:

| Geographical division. | Loans. |  |  |  |

From this statement it appears that the banks of the country have increased their loans since 1908 by $\$ 935,200,000$ or from $\$ 10,-$ $438,000,000$ in 1908 to $\$ 11,373,200,000$ in 1909. In 1908 the banks of the Eastern States reported loans to the amount of $\$ 4,104,300,000$ while in 1909 the amount was $\$ 4,531,400,000$, an increase of $\$ 427,-$ 100,000 , or 10.40 per cent. Loans of banks in the Middle Western States increased from $\$ 2,693,000,000$ in 1908 to $\$ 2,963,300,000$ in 1909, thus showing a gain of $\$ 270,000,000$, or 10.02 per cent. In the Southern States loans reported by the banks in 1908 aggregating $\$ 1,039,900,000$ have increased to $\$ 1,127,200,000$, a gain of $\$ 87,300,000$, or 8.39 per cent. The banks of the Western States increased their loans by $\$ 77,800,000$, or 15.29 per cent, the amount reported from that section in 1908 being $\$ 508,700,000$ and in $1909, \$ 586,500,000$. There was a gain during the year in loans made by the banks located in the New England States of 2.96 per cent, the amount of loans in that section in 1908 aggregating $\$ 1,384,900,000$ and in 1909, $\$ 1,425,-$ 900,000 . The banks of the Pacific States show a gain of $\$ 28,300,000$, or -4.11 per cent; the loans reported in 1908 amounting to $\$ 687,400$,000 and in $1909 \$ 715,700,000$. The banks of the island possessions reported loans amounting to $\$ 23,200,000$, a gain of $\$ 3,700,000$ over the amount reported in 1908. The largest percentage of increase in loans negotiated by banks of the United States was in the Western States, over 15 per cent, the gain in loans in the Eastern and Middle Western States being a little more than 10 per cent in each section. The statistics show a gain in loans of 18.97 per cent over the returns for 1908 from banks in the island possessions.

[^22]
## BANK RESOURCES.

The resources of all reporting banks on April 28, 1909, aggregated $\$ 21,095,054,420$, and the average per capita $\$ 215.37$. In 1908 the aggregate was $\$ 19,583,410,393$, indicating a gain in 1909 of $\$ 1,511,-$ 644,027.
A table in the appendix to the report of the Comptroller of the Currency shows the average per capita resources of each class of banks, state and national, and the per capita of all banks arranged by States and geographical sections. The average per capita of bank resources in the United States exclusive of the island possessions is $\$ 237.24$, a gain of $\$ 13.09$ during the year, the average per capita being $\$ 224.15$ in 1908.

Geographically stated, the largest gain was in the Eastern States, where the per capita increased from $\$ 428.22$ in 1908 to $\$ 450.19$ in 1909, a gain of $\$ 21.97$. Next in order of increase are the Western States, with $\$ 18.43$, or from $\$ 142.92$ in 1908 to $\$ 161.35$ in 1909 ; the New England States being third, with an increase of $\$ 18.04$, or from $\$ 415.57$ to $\$ 433.61$. The per capita gain of the Pacific States was $\$ 13.36$, or from $\$ 334.41$ in 1908 to $\$ 347.77$ in the present year. The increase in the Middle Western States was $\$ 9.87$; or from $\$ 180.77$ to $\$ 190.64$. The increase in the Southern States was the lowest, or from $\$ 65.30$ to $\$ 71.19$, a gain of only $\$ 5.89$. States showing a decrease were West Virginia, $\$ 0.44$, Alabama $\$ 1.82$, and Ohio $\$ 4.52$. The State of New York has the largest per capita bank resources, or $\$ 676.07$, Massachusetts is next with $\$ 517.25$, Nevada being third with $\$ 512.72$, California fourth with $\$ 486.70$, and Rhode Island fifth with \$457.12.

Besides the five States named having the largest per capita bank resources, West Virginia is first in the Southern States with $\$ 112.66$, Louisiana second with $\$ 96.62$, Texas third with $\$ 90.68$, and Virginia fourth with $\$ 88.61$. In the Middle Western States Illinois is first with $\$ 24.0 .39$, Missouri second with $\$ 215.50$, Iowa third with $\$ 214.78$, Ohio fourth with $\$ 203.66$. In the Western States Colorado is first with $\$ 250.65$, Nebraska second with $\$ 214.92$, followed by Montana and Wyoming with $\$ 207.72$ and $\$ 207.26$, respectively. In addition to Nevada and California in the Pacific States already referred to, the per capita resources of Washington banks is $\$ 296.23$ and of Oregon $\$ 225.52$. Of the island possessions, Hawaii is first with \$71.99, Porto Rico second with $\$ 11.24$, and the Philippines, with a population estimated at $8,000,000, \$ 2.69$.

The population of the United States as estimated by the actuary of the treasury, exclusive of the island possessions, at $88,716,000$ on June 1, 1909, has been used in making the above calculations.

## GROWTH OF BANKING IN THE UNITED STATES.

In the appendix to the report of the Comptroller of the Currency appears a table giving the number of colonial and state banks with the principal items of resources and liabilities in the years indicated from 1774 to 1833. In 1784 the 3 existing banks had combined capital of $\$ 2,100,000$, circulation $\$ 2,000,000$, and specie $\$ 10,000,000$. In 1800 the 28 banks show capital $\$ 21,300,000$, circulation $\$ 10,500,000$, specie $\$ 17,500,000$, and in 1820 there were 307 banks with capital of $\$ 102,100,000$, circulation $\$ 40,600,000$, deposits $\$ 31,200,000$, specie $\$ 16,700,000$. In 1830,329 banks had $\$ 110,100,000$ capital, $\$ 48,400,000$ circulation, $\$ 39,500,000$ deposits, $\$ 14,500,000$ in specie, and $\$ 159,-$ 800,000 in loans. The resources and liabilities of the banks of the country in detail from 1834 to 1863 are shown in the appendix.

The following condensed statement gives the principal items of resources and liabilities of state, savings, private banks, loan and trust companies, and national banks from 1864 to 1909, and shows the growth of banking in the country for the past forty-six years. For the current year statistics showing the same items separately for banks located in the reserve cities are incorporated in the table.

Principal Items of Resources and Liablities of State, Savings, and Private (Compiled from Reports to the

$a$ Includes government deposits.
$b$ Number of banks and amounts estimated.

STATE AND PRIVATE BANK FAILURES.
In 1896 the Comptroller of the Currency obtained data from national bank examiners secured by them from receivers, assignees, etc., of state banks relating to the amount of capital, liabilities, nominal assets, and dividends paid by insolvent state and private banks during the years 1864 to 1896, inclusive. In this period the failures reported were stated at 1,234 , capital $\$ 53,632,259$, liabilities, $\$ 220,-$ $629,988.27$, assets $\$ 214,312,190.58$, and dividends paid $\$ 100,088,726.95$, or approximately 45 per cent. Since 1896 the only information obtained by this office in relation to failure of banks of this character is that secured from the Bradstreet Commercial Agency and relates only to the number of failures, together with the amount of liabilities and nominal assets. Incorporating the returns from 1897 to 1909, inclusive, with those received for the years 1864 to 1896 , the number of failures is shown to have been 2,014 , liabilities $\$ 607,770,005.27$, and nominal assets $\$ 511,794,632.58$.

In the following table is summarized the information secured, covering the period beginning with 1864 and ended on June 30, 1909:

Number of Failures, Capital, Assets, Liabilities, and Dividends Padd by State and Private Bangs that Failed in each Year from 1864 to 1909.

| Year. | Number of failures. | Capital. | Nominal assets. | Liabilities. | Dividends paid. |

For the year ended June 30, 1909, the Bradstreet Company reports the failure of 60 state and private banks, with aggregate liabilities of $\$ 25,190,156$, and nominal assets of $\$ 15,760,177$. The failures include 19 state banks, with liabilities of $\$ 3,286,418 ; 2$ savings banks, liabilities $\$ 105,000 ; 6$ trust companies, liabilities $\$ 5,412,037$; and 33 private banks, liabilities $\$ 16,386,701$. As will be noted, the number of failures of private banks represents 55 per cent of the total number of failures, with over 65 per cent of the aggregate liabilities.
In the appendix to the report of the Comptroller of the Currency appears a table relating to failures of banks of these classes by years, 1892 to 1909, in each State and geographical division, which is summarized in the following table:

Nomber, Assets, and Liabilities of State Banks, Sayings Banks, Loan and Trust Companies, And Private Banks which Failed, by Years, from June 30, 1892, to June 30 , 1909, inclusive.
[In the amounts 000 omitted.]

BANKS AND BANKING IN THE DISTRICT OF COLUMBIA.
As stated elsewhere, building and loan associations in the District of Columbia have been placed under the supervision of the Comptroller of the Currency by an amendment of the Code of the District of Columbia, which went into effect during the past year. There are 22 of these associations, their share capital or deposits amounting to $\$ 12,370,986$ and aggregate resources to $\$ 14,393,927$. There are 11 national banks in the District, one having been organized during the past year. No increase has taken place in the number of trust companies, 5 being in operation, and there are 12 institutions entitled "savings banks," all of which, with one exception, are conducting commercial as well as savings bank business. Eleven of these institutions are operating under charter obtained from adjoining States, only one having been organized under District laws as a savings bank, but without the power of a bank of discount.

In the following table, based on September 1 returns from national banks, trust companies, savings banks, and June 30, 1909, returns from building and loan associations, are shown the number of banks and banking institutions in the District of Columbia, the amount of their capital stock, individual deposits, and aggregate resources. It will be observed that there are 50 institutions in operation, with capital of $\$ 14,747,485$; individual deposits (including share payments by members of the building and loan associations), $\mathbb{\$ 7 1 , 4 5 1 , 1 5 2 \text { ; and }}$ aggregate assets, $\$ 113,704,068$ :

| Class. | Number. | Capital. | Individual deposits. | Aggregate assets. |
| :---: | :---: | :---: | :---: | :---: |
| National banks | 11 | \$5,552,000 | \$22,555,540 | \$47,990,333 |

| Savings banks.. | 12 | 1,195,485 | 11,597, 031 | 13, 474, 770 |
| Building and loan associations | 22 | 1,195, | a 12, 370,986 | 14, 393,927 |
| Total | 50 | 14,747, 485 | 71,451, 152 | 113,704, 068 |

## oa Share payments.

BUILDING AND LOAN ASSOCIATIONS IN THE DISTRICT OF COLUMBLA.
On March 4, 1909, an act was approved amending section 691, subchapter 7, of the Code of the District of Columbia, relating to building and loan associations, the amendment authorizing the Comptroller of the Currency, whenever he may deem it useful, to cause an examination to be made into the condition of any building and loan association incorporated under the provisions of the code, as well as any other building and loan association located or doing business in the District of Columbia. Every such association is required to make to the Comptroller at least one report during each year. The amendment confers upon the Comptroller the power to take possession of any company or association whenever, in his judgment, it is insolvent or is knowingly violating the laws under which it is incorporated, and to liquidate such association in the manner provided in the laws of the United States in respect of national banks. On and after July 1, 1909, a strict compliance with the provisions of the code in question was required. To section 691 was added a new section, known as $691-\mathrm{A}$, providing that any building association,
incorporated or unincorporated, organized and existing under the laws of any State or Territory, except the District of Columbia, to do or now doing a building association business, or otherwise operating as a building association, shall be subject to all the provisions of section 691, and, further, that any such association or corporation shall at all times keep on deposit with the Comptroller in money or stocks, bonds, or mortgages or other securities, to be approved by that officer, not less than 10 per cent of its capital and surplus, as security for depositors and creditors and as a guaranty for the faithful performance of its contracts.

Prior to July 1, 1909, the foreign building and loan associations in the District discontinued business or removed from the District.

On June 30 there were in operation in the District 22 local building and loan associations, of which only 5 were incorporated. The plan of ten of the associations is reported as permanent, 10 as serial, and 2 terminating. All associations require monthly payments on shares, 19 of which provide for monthly payments of $\$ 1$, two of $\$ 2$, and one of $\$ 2.50$. The number of shares in force is 98,946 , the number of nonborrowing members 20,143, and the number of borrowing members 6,982 . The report shows that the uniform rate of interest charged borrowers is 6 per cent.
From the reports received it is shown that the liabilities of the associations on account of regular installments paid, installments anticipated, paid-up stock, and installments due are $\$ 12,370,985.77$; that the profits, divided and credited, are $\$ 329,559.34$, and undivided profits $\$ 1,107,363.51$. The assets aggregate $\$ 14,393,927.21$, of which loans on real estate amount to $\$ 13,438,737.28$, on stock pledged $\$ 72,-$ 850.06, real estate owned $\$ 541,934.43$, and cash with treasurers and secretaries $\$ 225,241.86$.

The condition of the associations in the District on June 30, as shown by their assets and liabilities and receipts and disbursements, is shown in the accompanying statement:

| Assets. | Amount. | Liabilities. | Amount. |
| :---: | :---: | :---: | :---: |

Receipts and Disbursements.

## bUILDING AND LOAN ASSOCIATIONS IN THE UNITED STATES.

Secretary H. F. Cellarius, of the United States League of Local Building and Loan Associations, has furnished this office with a comparative statement relative to the building and loan associations for the years 1907-8 and 1908-9. From the report received it is noted that on January 1, 1909, there were in operation 5,629 of these associations, with total membership of $1,959,579$, and assets of $\$ 796,-$ 998,819 . Compared with the prior year there has been an increase in membership of 82,612 , and a net increase in assets of $\$ 51,005,421$.

As will be noted by reference to the accompanying statement, 1,015 of the associations are located in States not named, due doubtless to the fact that the number in each of the States not listed is comparatively small.

Number of Associations, Membership, and Assets of Building and Loan Associations in the United States January 1, 1909.

| States. | Number of associations. | $\left\lvert\, \begin{gathered} \text { Total } \\ \text { member- } \\ \text { ship. } \end{gathered}\right.$ | Total assets. | Increase in assets. | Decrease in assets. | Increase in membership. | Decrease in nembership. |

SCHOOL SAVINGS BANKS.
Statistics relating to school savings banks compiled by Mr. J. H. Thiry, who in 1885 introduced the system at Long Island City, N. Y., have been submitted for the year ended January 1, 1909.

It appears that school savings banks are in operation in 114 cities of 25 States, that there are 6,765 banks in 1,163 schools, the number of registered pupils being 554,716 and the number of depositors 186,828. From 1885 to January 1, 1909, deposits of these banks aggregated $\$ 4,609,431.35$, withdrawals $\$ 3,864,526.62$, leaving a balance of $\$ 744,904.73$. The average credit per depositor is shown to be $\$ 3.98$. The deposit balance on January 1,1908 , was $\$ 759,646.09$, or $\$ 14,741.36$ greater than 1909. The number of depositors in 1908 was 178,817 and the average deposit $\$ 4.25$. It should be stated that statistics in question include returns from school savings banks in Canada and in South and West Australia.

## BANKS AND BANKING IN THE ISLAND POSSESSIONS.

## Philipfines.

Banking in the Philippine Islands is conducted by the followingnamed institutions: Banco Espanol Filipino, at Manila, with branch at Iloilo; Chartered Bank of India, Australia, and China, with branch at Cebu; Hongkong and Shanghai Banking Corporation, at Manila, with branch at Iloilo; International Banking Corporation, at Manila, with branch at Cebu; Monte de Piedad and Savings Bank of Manila; Philippine Postal Savings Bank.

In addition to the foregoing there is in operation the Manila Building and Loan Association and the Agricultural Bank. Returns from the latter, however, have not been received.

The following is a statement of the principal items of assets and liabilities of the banks, exclusive of the Agricultural Bank and the Manila Building and Loan Association.

ASSETS.

Comparing the foregoing with the returns for the corresponding period in 1908, there is shown to have been an increase in assets of \$1,321,784.

The Philippine postal savings bank system had on June 30, 1909, 251 banks, with 8,782 accounts, an increase during the year of 3,393 accounts and $\$ 208,482$ in deposits. The assets and liabilities of the postal banks on June 30 were as follows:

ASSETS.

The number of depositors of each nationality on May 31, 1909, was as follows:
Americans ..... 3,351
Filipinos ..... 4, 771
Europeans ..... 213
Asiatics ..... 181

In addition there were 56 accounts represented by deposits by societies.

The act providing for the establishment of the Agricultural Bank went into effect on July 1, 1908, the legislature under date of June 13, 1908, having appropriated $1,000,000$ pesos as the capital. The Chief of the Insular Division of the War Department advises that no information has been received so far in relation to the extent of the transactions of this bank.

The Manila Building and Loan Association, incorporated July 12, 1904, had a membership on July 30, 1909, of 596, the number of shares in force being 5,240. Payments on the shares are at the rate of $\$ 1$ per month. The assets and liabilities of the association, as shown by the June statement, are as follows:

ASSETS.
Loans on real estate...................................................................... 98,342
Loans on stock pledged................................................................. 13,505
Real estate..................................................................... 2,850
Furniture, etc..................................................................................... 422
Total assets................................................................... . . 115, 120
LIABILITIES.

Profits, divided and undivided............................................................... 10,711
All other liabilities............................................................................... 22, 500

## Hawail.

Of the 10 banks other than the 4 national banks operating in the Territory of Hawaii only 6 submitted reports as of April 28, 1909. Statements from those not reporting were compiled from bankers' directories in order to show the approximate banking resources of the Territory, the statistics being necessarily incomplete as to details. The capital of the 10 banks other than national as compiled aggregates $\$ 2,455,077$, individual deposits, $\$ 8,982,731$; resources, $\$ 12,746,-$ 860. Returns received from Hawaii in 1908 were so meager that a comparative statement will be of no value.

A consolidation of the reports from 4 national and 10 other banks in Hawaii shows the principal items of resources and liabilities to be as follows:

## Porto Rico.

Through the courtesy of Mr. B. R. Dix, acting treasurer of Porto Rico, this office has been placed in possession of a statement showing the condition of the banks in Porto Rico as of June 30, 1909. There are in the island nine banking institutions, one of which is a national bank. The authorized capital stock of these banks is
$\$ 1,453,530$, of which $\$ 638,000$ has been paid in. The statement prepared includes the Banco de Puerto Rico, Banco Territorial y Agricola, American Colonial Bank of Porto Rico, Credito y Ahorro Ponceño, Caja de Economias y Prestamos San German, Banco Popular San Juan, Union Bank of Halifax, Royal Bank of Canada, and First National Bank of Porto Rico.
The principal items of resources and liabilities of the 9 reporting banks are as follows:

| Loans. | \$5, 111, 390 |
| :---: | :---: |
| Bonds and stocks. | 2, 130, 473 |
| Cash | 2, 280, 727 |
| Paid-in capital stock | 878, 315 |
| Surplus. | 563, 233 |
| Deposits | 7,860,658 |
| Notes issued. | 600,000 |
| Aggregate reso | 13, 075, 715 |

The amount of savings deposits in banking institutions of Porto Rico, and rates of interest paid thereon, as of June 30, 1909, are shown in the following table:

| Banking institution. | Rate of interest. | Savings deposits. |
| :---: | :---: | :---: |
|  | Per cent. |  |
| American Colonial Bank | 3 | \$58, 498.58 |
| Banco Territorial y Agricola. | 6 | 145, 383. 29 |
| Royal Bank of Canada. | 3 | 42,872.86 |
| Union Bank of Halifax. | 4 | 114, 023.39 |
| Credito y Ahorro Ponceño. | 4 | 138,220.99 |
| Caja de İconomias y Prestamos, San German | 6 | 89,132. 57 |
| Banco Popular de Economias y Prestamos, San Juan | 6 | 121, 937.95 |

## FOREIGN BANKS OF ISSUE.

Elsewhere in this report appear statistics and general information relative to national-bank issues and the stock of money in the United States. In connection therewith and in view of the general interest attaching to the subject of bank circulation, the following table has been compiled from statements published in the London Economist during the past year with reference to the principal items of resources and liabilities of the leading foreign banks of issue.
The Bank of France being the sole bank of issue in that country, the volume of its outstanding circulation is largely in excess of that of any other of the banks listed. On November 5, 1908, the outstanding notes of this bank amounted to $£ 201,100,000$, and by January 7, 1909, increased to $£ 209,200,000$. From that date there was a steady decline to $£ 204,800,000$ on May 6, an increase on June 3 to $£ 207,500,000$, and a decline to $£ 201,000,000$ on September 2. On the 7th of the following month the issues had increased to £207,100,000.

The fluctuations in the issues of the Imperial Bank of Germany are more marked, the low points $£ 70,100,000$ and $£ 72,400,000$ being reached on March 8 and June 9, respectively. The greatest amounts outstanding, as shown by the statements in question were $£ 88,600,000$ on January 7, $£ 85,000,000$ on April $7, £ 94,300,000$ on July 2, and $£ 92,900,000$ on .October 7 .

The outstanding issues of the Bank of England varied but slightly during the year, the minimum amount, on November 5, 1908, being $£ 29,000,000$, and the maximum, $£ 30,200,000$, on July 8 and August 5. The outstanding issues of the Bank of Russia fluctuated from a minimum of $£ 105,600,000$ on May 6, 1909, to a maximum of $£ 126,700,000$ on October 6, and the issues of the Austro-Hungarian Bank, from a minimum of $£ 78,100,000$ on March 6, to a maximum of $£ 85,200,000$ on October 15. The fluctuations of the outstanding notes of the Netherlands Bank have been from a minimum of $£ 22,400,000$, March 6 , to a maximum of $£ 24,300,000$ on May 8. During the fall and winter months the notes issued by the Bank of Italy reached their maximum, $£ 57,200,000$ on August 10, and dropped to a minimum of $£ 51,000,000$ on June 10. The fluctuations in the issues of the banks of Norway, Denmark, Switzerland, Spain, and Belgium are shown to have been very limited in amount during the year in question. The issues of the Bank of Sweden fluctuated somewhat and ranged during the year from a minimum of $£ 9,500,000$ on February 6 to a maximum of $£ 11,200,000$ on October 2.

The table in question follows:

NATIONAL BANK OF BELGIUM

$a$ Coin and bullion.

## SAVINGS BANKS OF THE WORLD.

To the Bureau of Statistics, Department of Commerce and Labor, the Comptroller is indebted for the data in the accompanying tables representing the latest available information relating to all foreign savings banks, whether under private, municipal, or government control. As will be noted, the earliest returns in the first table are for December 31, 1906, and the latest for June 30, 1909. The sta-
tistics in question cover returns from 19 countries and 17 dependencies, the aggregate population of which is stated at $816,112,498$, the number of depositors listed being $95,524,331$, the deposits $\$ 9,710,-$ 936,635 , and the average deposit account $\$ 101.66$. The largest number of depositors and the greatest amount of deposits are in Germany, namely, $18,658,460$ and $\$ 3,191,882,000$, respectively. Six of the countries in the list, namely, Germany, Japan, France, United Kingdom, Russia, and Austria, have over 70 per cent of the number of depositors and approximately 72 per cent of the deposits.

The second table is a chronological history of postal savings banks, covering generally the period of the last decade; and from this table a third has been compiled, showing the growth in the number of depositors and the amount of deposits from 1897, or the earliest available date, to 1907, except as indicated. During this period the number of depositors in postal savings banks has increased approximately 100 per cent, or from $20,182,887$ to $40,320,303$; the increase in deposits is approximately 75 per cent, or from $\$ 1,138$, 441,944 to $\$ 1,989,299,815$, or an increase of $\$ 851,000,000$. The average deposit account has fallen from $\$ 56.41$ to $\$ 49.33$. While the number of depositors in postal savings banks is 42 per cent of the number in all foreign savings banks, the deposits are only slightly in excess of 20 per cent. In the countries and dependencies having postal savings banks, the United Kingdom leads in the number of depositors and amount of deposits-that is, $11,018,251$ and $\$ 781$,794,533 , respectively. In Japan there are 8,013,193 depositors; in Italy, $5,108,802$; France, $5,034,998 ;$ Belgium, 2,106,237; Austria, $2,064,403$; Russia, 1,788,990; Netherlands, $1,401,670$; and British India, 1,262,763. Canadian postal savings banks have but 155,895 depositors, but their deposits amount to $\$ 45,190,484$, making the average deposit account $\$ 289.88$, by far the largest average account in postal savings banks in any country:

With statistics relating to foreign savings banks, corresponding information from savings banks in the United States has been incorporated. - The number of depositors in savings banks in the United States on April 28, 1909, was 8,831,863; deposits to their credit $\$ 3,713,405,709$, and the average account $\$ 420.45$. The estimated population of the United States on May 1, 1909, was $88,687,000$, which gives the average deposit in savings banks per capita of population at $\$ 41.87$. The number of depositors in savings banks in this country is approximately 8.5 per cent of the number in savings banks in the world, the proportion of deposits being 27.7 per cent. From the accompanying table it will also be noted that the combined savings-bank deposits in the United Kingdom, Germany, France, Austria, and the United States represent 75 per cent of the amount of deposits in the savings banks of the world.

Tables relating to all foreign savings banks and to postal savings banks, separately, are submitted herewith.

Savings Banks, Including Postal Savings Banks, Number of Depositors, Amount of Deposits, and Average Deposits per Deposit Account and per Ingabitant, by Specified Countries.
[Compiled by the Bureau of Statistics, Department of Commerce and Labor, from official reports of the respective countries.]

a The figures of population are for the period to which the statistics of savings banks relate.
o Figures for private savings banks relate to end of calendar year 1906; figures for postal savings banks relate to end of 1907. Inclusive of deposits in so-called "cheque departments" of Austrian postal savings banks.
c Data for the state-controlled "Caisse Generale d'Epargñe" including savings deposits with post-offices. In addition reports are given for three municipal and five private savings banks. On Dec. 31, 1907, the former had 16,554 depositors, credited with $\$ 1,895,310$ of deposits, and the latter 27,261 depositors, with 87,992,165 of deposits.
d Exclusive of 1,597 deposits, of $\$ 147,354$, in savings banks in Faroe Islands. Includes data for savings departments of ordinary banks, which included 141,097 accounts credited with $\$ 33,991,526$ on Mar. $31,1907$.
eAt the end of the fiscal year 1907-8 the total savings bank deposits in Germany had increased to $\$ 3,305,606.000$. This amount includes $\$ 2,170,680,018$ deposits to the credit of $11,484,139$ depositors in the Prussian savings banks.
fxclusive of data for the "Societá Ordinarie di credito" and "Societá Cooperative di credito," which held savings deposits to the amount of $\$ 137 ; 013,066$ under date of Dec. 31, 1906 .
$g$ Figures for private savings banks relate to the end of the calendar year 1906; figures for the postal savings banks relate to Mar. 31, 1908.
$h$ Figures for private savings banks relate to the end of the calendar year 1906; figures for the postal savings banks relate to Mar. 31, 1907.
${ }^{i}$ Figures for private savings banks relate to the end of the calendar year 1906; figures for the postal savings banks relate to the end of 1907 .
iFigures for the "Case de economie" only.
kThe "peseta" has been converted at the rate of 17.14 cents. Data taken from "España Economicay Financiera," Sept. 25, 1909 .
${ }^{2} \mathrm{Preliminary}$ statement furnished loy the Swiss Federal Statistical Bureau under date of Sept. 30, 1909, for 372 savings banks.
$m$ Figures for trustee savings banks relate to the year ending Nov. 20; figures for postal savings banks, to Dec. 31. Exclusive of government stock held for depositors, which at the end of the year amounted to $£ 20,628,985$ in the post-office savings banks, and to $£ 2,4: 5,962$ in the trustees' savings banks.
$\boldsymbol{n}$ Exclusive of population of the Feudatory States.

Savings Banks, Including Postal Savings Banks, Number of Depositors, Amount of Deposits, and Average Deposits per Deposit Account and per Infabitant, by Specified Countries-Continued.

## BANK DEPOSITORS GUARANTY LAWS.

Following the action of Oklahoma, the legislatures of the States of Kansas, Nebraska, and Texas enacted laws providing for the guaranty of deposits in banks. Subsequent to the passage of the Olvahoma law the question was raised as to the right of national banks in that State to take advantage of its provisions, and the opinion of the Attorney-General of the United States to the effect that they could not lawfully do so, rendered under date of July 28, 1908, was published in full in the report of the Comptroller of the Currency for the year 1908. Practically the same questions were presented in connection with the Kansas bank-deposit law, and under date of April 6, 1909, Attorney-General Wickersham, following citations from the act in question and decisions of the courts in pertinent cases, concluded as follows:

Answering specifically the question which is submitted for my consideration, viz, "Have national banks in the State of Kansas the right, under section 13 of the act referred to, to participate in the assessments and benefits of the bank depositors'
guaranty fund of the State of Kansas, upon the same terms and conditions as apply to State banks?" I would respectfully state that, in my opinion, they have not such right, and only an act of Congress can confer such powers upon national banks.

The question as to the constitutionality of the Oklahoma guaranty law has been appealed to the Supreme Court of the United States.

In the circuit court of the United States for the district of Nebraska, in the case of the First State Bank of Holstein et al. v. Ashton C. Shallenberger, Governor of the State et al., decree was rendered on October 16, enjoining the enforcement of the Nebraska bank depositors' guaranty act. The court held that-
The Nebraska act of March 25, 1909 (Laws Nebr., 1909, ch. 10, p. 66), which prohibits individuals from engaging in the banking business unless they do so through the agency of a corporation, and which also conditions the right to engage in that business in that form upon the making of enforced contributions from time to time to a depositors' guaranty fund to be employed in the payment of the claims of depositors of any bank which shall become insolvent, is in conflict with section 1 of the fourteenth amendment of the Constitution of the United States, which provides:
"No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property without due process of law," and is in conflict with section 3 of article 1 of the constitution of Nebraska, which declares:
"No person shall be deprived of life, liberty, or property without due process of law," and therefore is void.
The provisions of the Nebraska act of March 25, 1909, supra, which prohibits individuals from engaging in the banking business, unless they do so through the agency of a corporation, and also condition the right to engage in that business in that form upon the making of enforced contribution from time to time to a depositors' guaranty fund to be employed in the payment of the claims of depositors of any bank which shall become insolvent, were the inducement to the passage of that act, and as those provisions, so coupled together, are void, the entire act is thereby rendered invalid.
Subsequent to the promulgation of the opinion of the AttorneyGeneral, holding that national banks have not the right to participate in the assessments and benefits authorized by state laws providing for the guaranty of depositors, the question was raised as to the power of a national bank to enter into a contract with an insurance cormpany guaranteeing the solvency of the bank. The question was referred to the Attorney-General, and under date of May 7, 1909, the following opinion was rendered:
SIR: Replying to yours of the 29th ultimo, in which, at the request of the Comptroller of the Currency, you ask for an opinion as to the power of a national bank to enter into a contract with an insurance company guaranteeing the solvency of the bank, and transmitting to me a form of policy which is proposed to be issued by an iusurance company proposed to be organized, I beg to say that, as a general principle, I have no doubt that it is entirely within the powers of a national bank to contract for the insurance of its assets against loss. The form of the proposed policy submitted in your letter is somewhat peculiar. It purports to insure to the bank the payment of "a sum of money sufficient to indemnify the bank for any and all losses suffered by it by reason of theft, embezzlement, losses in realizing upon loans and investments, shrinkage in value of assets or otherwise, in an amount equal to but not exceeding the net excess of its obligations, other than by reason of the stock of the bank, over the total aggregate value of the assets of the bank thus reduced by such losses; provided that there shall be included in the assets of the bank all net sums which have been realized by reason of the additional liability of the stockholders of the bank"
Such contract is, in effect, an agreement to pay to the bank any deficiency in its assets upon ultimate realization necessary to enable it to pay all of its liabilities of every kind. The policy is to run for a period of three months, but to be renewable thereafter for periods of three months each with the consent of the insurance company, and at such premiums as the insurance company may fix at least one month before the expiration of the then current term of the insurance, the premium in every case to be a percentage of the average indebtedness of the bank during the period covered by such renewal, with the provision that if such rate shall be in excess of one-sixteenth
of 1 per cent upon such average indebtedness, then and in such event the insurance company shall be liable to account to the bank for the application of such premium paid by the bank in excess of one-sixteenth of 1 per cent-
"which excess shall be applicable only to the payment of actual losses incurred by the company by reason of claims under this and similar policies, and any excess over such extra claims shall be divided pro rata among the banks paying such extra rate of premium as a participation in the profits during which period such extra rate of premium has been paid."

It is somewhat uncertain precisely what this paragraph means and what its effect may be. It seems to me to be objectionable as committing the bank to a profitsharing feature, which might be contended to entail a corresponding liability for losses; and, as the attorney for the promoters of the proposed insurance company informs me that this is not regarded as an essential part of the plan, I should advise that it had better be eliminated from the policy.

Another provision contained in the policy subjects the bank to a periodical examination by the examiners of the insurance company without notice and at such times as the company may elect, one of such examinations to be within each period of six months covered by the policy and all renewals thereof. This period is probably inadvertently placed at six months, as the policy is proposed to be written for periods of three months only. Aside from that, I very much question the legality of this clause, or at least its enforceability. Section 5241 of the Revised Statutes provides that-
"No association shall be subject to any visitorial powers other than such as are authorized by this title, or are vested in the courts of justice."

While this statute does not prohibit the bank from permitting an examination of its books, in my opinion it does operate to prohibit it from obligating itself to permit such examination; and if the covenant to insure can be considered as in any respect dependent upon this agreement to permit examinations, it might be vitiated by the unlawful provision. I should advise that the clause be reframed so as to make it clear that the agreement to insure is not dependent upon the failure to permit the examination, although it might be stipulated that in case, at any time, the examiner of the company should not be allowed access to the books of the bank for the purpose of making an examination the company should have the option, upon reasonable notice, to terminate the contract.

In my opinion, therefore, it is a matter for the discretion of the directors and officers of a bank to determine whether or not they will enter into any such contract in any given instance, this discretion to be exercised in view of the solvency and general financial condition of the company making the insurance and the reasonableness of the rate of premium; and the form of the policy being modified to conform to the foregoing suggestions, I see no legal reason why a bank may not enter into it.

Respectfully,

George W. Wickersham, Attorney-General.

The Secretary of the Treasury.

## INSOLVENT NA'TIONAL BANKS.

In the year ended October 31, 1909, the following-named national banks were closed and placed in charge of receivers:

a Restorcd to solvency and resumed business.
The capital of the 14 banks placed in charge of receivers during the year aggregated $\$ 1,093,500$. Five of the banks in question, with aggregate capital of $\$ 325,000$, were placed in solvent condition and authorized to resume business. The assets of the 9 insolvent banks at date of failure were $\$ 2,899,023$; claims proved, $\$ 1,693,472$, on which dividends were paid to the amount of $\$ 477,813$. Two of the banks in the list paid their creditors in full, both principal and interest; 1 paid 50 per cent, 1,25 per cent, and 5 no dividends so far. The causes of failures were as follows: Three as the result of defalcation by officers; 2, fraudulent management and injudicious banking; 1, fraudulent management, excessive loans to officers, directors, and others; 2, injudicious banking, and 1 wrecked by the cashier.

Seventeen receiverships were closed during the year, the capital of the banks at date of failure being $\$ 3,688,500$, and their assets $\$ 21,178,991$. Collections from assets and shareholders were $\$ 10,998,520$. The claims proved against these trusts aggregated $\$ 10,747,070$, on which dividends were paid to the amount of $\$ 8,128,175$, or 75.71 per cent. Liabilities settled by offsets, the payment of loans, etc., aggregated $\$ 4,814,055$. Including dividends, offsets, and loans paid, creditors received on an average 82.29 per cent. Assets to the nominal value of $\$ 1,431,307$ were returned to shareholders. The expenses of administration of these 17 trusts-that is, receivers' salaries, legal expenses, etc.-were $\$ 390,846$.

From the date of the first failure in 1865 to October 31, 1909, receivers were appointed for 508 national banking associations, including 24 restored to solvency, of which 4 failed for the second time, the total number of receiverships representing 5.3 per cent of the number of national banks chartered during the existence of the system. It should be stated, however, that with the elimination of receiverships terminated as result of restorations to solvency the net loss to the system by insolvency was only 484 banks, or 5.04 per cent.

The affairs of 416 insolvent banks have been fully liquidated. The nominal value of the assets of these banks was $\$ 283,611,827$, from which $\$ 139,435,344$ was collected and $\$ 22,646,178$ applied as offsets. The nominal value of assets returned to shareholders was $\$ 13,476,481$, and of the remaining assets $\$ 3,683,994$. The amount of losses on assets compounded, etc., were $\$ 104,369,830$. The assessment on shareholders, amounting to $\$ 39,606,640$, produced $\$ 18,884$,876, making aggregate collections from shareholders and assets \$158,320,220 . These collections were disposed of as follows: On claims proved, amounting to $\$ 147,363,378$, dividends were paid to the amount of $\$ 111,563,299$ or 75.71 per cent. Including offsets allowed, loans paid and other disbursements, with dividends, creditors received on the average 82.29 per cent. Receivers' salaries and other expenses of these trusts amounted to $\$ 7,459,560$, to which should be added legal expenses of $\$ 4,245,250$, the aggregate of which is equivalent to 4.13 per cent of the nominal value of the assets and 7.39 per cent of the aggregate collections. There was returned to the shareholders in cash $\$ 2,855,251$, the balance held by the Comptroller being $\$ 27,680$.

Circulating notes of these banks outstanding at date of failure aggregated $\$ 21,228,613$, secured by bonds of the par value of $\$ 23,917,150$, from which was realized $\$ 24,811,757$, or $\$ 3,583,144$ in excess of the circulation for which the bonds were pledged, and which amount was added to collections from other assets from which dividends were paid. The assessment on shareholders was approximately 60 per cent of their holdings, on which only about one-half was paid. In other words, the assessment on capital stock produced nearly 28 per cent of the par value of the aggregate capital of these insolvent associations.

At the close of the year 68 insolvent national banks were in charge of receivers, the nominal value of their assets being $\$ 54,114576$. So far collections from assets and shareholders have been $\$ 29,634,651$. Claims proved are shown at $\$ 31,917,575$, on which dividends have been paid to the amount of $\$ 20,200,122$, or 63.29 per cent. Including with dividends paid, offsets allowed, loans paid, and other disbursements, creditors have received on an average 72.33 per cent. It is presumed that upon final liquidation these 68 trusts will return to creditors dividends equal at least to those paid by the trusts which have been finally closed.

## AMENDMENTS TO THE NATIONAL-BANK ACT.

Section 333 of the Revised Statutes relating to the annual report to be made to Congress by the Comptroller of the Currency, provides in part for the submission of amendments to the laws relative to banking, by which the system may be improved and the security of the holders of its notes and other creditors may be increased.
No amendments to the national-bank act have been effected since May 30, 1908, and the only legislation subsequent to that date affecting national banks is that contained in the tariff act of 1909, wherein provision is made for a corporation tax.
The act of May 30, 1908, provides in part for the establishment of the National Monetary Commission, and at the December, 1908, meeting of the commission suggestions were submitted for consideration in connection with proposed amendments to the banking and currency laws.

> Lawrence O. Murray, Comptroller of the Currency.

## The Speaker of the House of Representatives.

## REPORT OF THE REGISTER OF THE TREASURY.

Treasury Department, Office of the Register, Washington, D. C., September 17, 1909.

Sir: I have the honor to make the following report of the business transacted in this office during the fiscal year ended June 30, 1909:
The duties of the Register of the Treasury are thus defined: * * * Signs and issues all bonds of the United States, including the Panama Canal loan, the District of Columbia, the sundry loans of the Philippine Islands and the City of Manila, and transmits to the Treasurer of the United States schedules showing the name of every individual, corporation, etc., holding registered bonds and entitled to receive interest thereon. He receives, examines, and registers coupon bonds exchanged for registered bonds or redeemed, and registered bonds transferred and finally redeemed. He receives, examines, arranges, and registers the upper halves of all redeemed United States notes, gold certificates, silver certificates, and Treasury notes; fractional currency notes, detached interest coupons, interest checks on registered bonds, and all other United States securities redeemed and destroyed. He is represented on the committee having in charge the destruction, by maceration, of certain of the United States securities, etc., mentioned herein. Also all customs, internal-revenue, and postage stamps condemned for imperfections and destroyed. He signs all the correspondence of the office. The work is performed in two divisions, as follows:

## DIVISION OF LOANS.

As its chief duty, this division has charge of the interest-bearing debt of the United States. To this has been added the care of loans authorized by Congress for the Panama Canal, the District of Columbia, the Government of the Philippine Islands, and the City of Manila. .

The principal duties of this division are as follows: The receipt of new coupon and registered bonds after they have been printed by the Bureau of Engraving and Printing, together with the custody of the same; the preparation of registered and coupon bonds for issue, including the inscription of the names of the owners on registered bonds, and signing the same; writing the letter which accompanies each package or lot; preparing the receipt to be signed by consignees, and delivering the bonds for transmittal. Full records are kept, first, of all issues of bonds; second, of the transfer of registered bonds from one owner to another; and third, of canceled bonds which have
been either purchased or refunded, or have been redeemed at maturity. Accounts in detail are opened with each holder of registered bonds.

The assignments of all registered bonds, whether presented for transfer to other parties or for redemption, are carefully examined. The assignments of much the larger part of the values involved are made by attorneys, executors, administrators, guardians, and representatives of banks and other corporations, and it is necessary that the papers showing the authority of such agents shall be examined, indexed, and filed for instant reference. In every such transaction it is also necessary to see that the powers exercised by the attorney or representative are included among those granted by his principal.

Quarterly schedules are prepared for the payment of interest on all United States registered bonds, including those of the Panama Canal loan, on the three Philippine issues, and on the three issues of City of Manila sewer and water bonds. The schedules show the amount of registered bonds standing in the name of every owner at the date of the dividend on each loan, the amount due at each date of payment, together with the address to which the Treasurer of the United States is to forward checks for interest.

The following table shows the number and amount of new bonds prepared by the Bureau of Engraving and Printing which were received during the year:

New Bonds Regerved During the Year ended June 30, 1909.

## PANAMA CANAL LOAN.

Prior to the fiscal year 1907-8 there were two issues of bonds of the Panama Canal loan in 2 per cent bonds under the act of June 28, 1902, viz, one under the circular of July 2, 1906, was issued between August 1 and September 15, 1906, amounting to $\$ 30,000,000$, and a second under the circular of November 18, 1907, amounting to $\$ 24,631,980$.

Both of these issues are dated August 1, 1906, are redeemable after August 1, 1916, and are payable August 1, 1936.

On November 18, 1908, the Secretary of the Treasury issued a circular offering an additional $\$ 30,000,000$ of this loan dated November 1,1908 , redeemable after November 1, 1918, and payable November 1, 1938.

These bonds were issued from December 12, $1908^{\circ}$ to February 1, 1909, making a total of $\$ 84,631,980$.
On May 1, 1909, the last interest period of this loan during the fiscal year, of the registered bonds of the series of 1906, there was held by-
Treasurer of the United States in trust for national banks ............... $\$ 53,073,420$
Individual holders, including corporations 1,527, 060

Total
54, 600, 480

Series of 1908.

As stated in my previous report, by an arrangement entered into between the Secretary of the Treasury and the Secretary of War, the issues and transfers of the bonds of the Philippine Islands and the City of Manila, under the act of Congress of July 1, 1902, are all made by this office and the records are kept here. At each dividend period two certified copies of the schedules for the payment of interest are delivered to the Bureau of Insular Affairs, War Department, one copy to be retained by the bureau and one for the use of the Auditor for the Philippine Islands at Manila in auditing the accounts of payments under this authority.

## PHILIPPINE ISLANDS AND CITY OP MANILA BONDS.

On April 1, 1909, a third series of sewer and water bonds, for account of the City of Manila, and amounting to $\$ 1,000,000$, was issued. These bonds are redeemable after January 2, 1918, and are payable January 2, 1938.

There are six issues of bonds on account of the Philippine Islands, viz:

| Philippine loan, land p | \$7,000,000 |
| :---: | :---: |
| Philippine loan, public improvements, two series. | 3, 500, 000 |
| City of Manila, sewer and water loan, three series. | 4, $000,000$. |
| Tota |  |

THREE PER CENT CERTIFICATES OF INDEBTEDNESS.
Under date of November 20, 1907, there were issued, in accordance with section 32, act approved June $13,1898, \$ 15,436,500$, in 3 per cent certificates of indebtedness, which were payable in gold coin one year from date. The whole amount of this loan was issued to the Treasurer of the United States in trust for various national banks.

Of the total amount, $\$ 1,250,000$ were redeemed during the fiscal year 1907-8, and the remainder during the fiscal year 1908-9, at or prior to maturity.

The following table shows the principal facts in regard to the schedules prepared in this division during the last fiscal year whereby the Treasurer of the United States was authorized to draw checks for the payment of interest on registered bonds on the loans of the United States, the Panama Canal, and the Philippine Islands.

The following summary of dividends declared by this division during the last ten years shows that during that period the Treasurer of the United States has been authorized by this office to draw 1,962,490 checks for the payment of interest, amounting to $\$ 217,956,704.69 \frac{1}{2}$, exclusive of checks drawn in prepayment of interest:

Number and Amount of Interest Checes Declared During the Last Ten Years.

Interest was prepaid on registered bonds of various loans during the fiscal years 1899-1900, 1902-3, and 1906-7, and in order to ascertain the total amount of interest paid on registered bonds it would be necessary to add the amounts of such prepayments to those given in the above table. The prepayments were made by the Treasurer of the United States on presentation of the bonds and such fact stamped on the bonds. Schedules were then prepared in this office which gave in detail a description of the bonds on which interest had been prepaid, and the greatest care and watchfulness was required until the period was past for which prepayments had been made to avoid duplicate payments.

During the year the following-described coupon bonds of the District of Columbia which had been paid by the Treasurer of the United. States were recorded on the books of the office. They were originally issued by the District of Columbia when under a territorial form of government:

District of Columbia Coupon Bonds Redeemed During the Year Ended June 30, 1909.

| Loan. | Number of bonds. | Amount. |
| :---: | :---: | :---: |
| Permanent improvement loan, 6 per cent. Twenty-year funded loan of 1892, 6 per cent Thirty-jear funded loan of 1902, 6 per cent. . | 2 3 6 | $\$ 200$ 600 1,900 |
| Total.. | 11 | 2,700 |

## PACKAGES RECEIVED AND SENT.

During the year there were received by registered mail 2,179 packages, containing bonds valued at $\$ 34,748,790$... During the same period there were transmitted from this office by registered mail 3,618 packages, containing bonds valued at $\$ 58,587,773$.

An analysis of the various loans, looking to the determination as to by whom the bonds issued by this office were held at the close of the fiscal year, shows that a very small portion of these bonds are in the hands of foreign investors. Indeed, aside from the bonds held by foreign insurance companies there is practically no portion of the public debt, either of the United States or the Philippine Islands, in the hands of foreigners. So far as the bonds held by foreign insurance companies are concerned, it may be said in explanation, that these bonds are all on deposit with and under the practical control of the insurance commissioners of the various States, being held by them in trust for the foreign companies as security for the carrying out on the part of these companies of the compacts entered into by the said companies and the persons or corporations with whom they do business in the various States of the Union.

Bonds are held by foreign insurance companies as follows:
Loan of 1908-1918, 3 per cent.............................................. $\$ 235,000$
Loan of 1925, 4 per cent......................................................................... 3,013,000
Consols of 1930, 2 per cent. . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 1, 292, 500
District of Columbia, fifty-year funded loan of 1924, 3.65 per cent.......... 516,000
making a total of $\$ 5,056,500$ out of $\$ 12,033,250$ held by insurance companies, as shown by the table following.

| Loan. | Banks. | Insurance companies. | Associations, etc. | Trustees, estates, etc. | Lodges. | Foreign. | Individuals. | Treasurer United States in trust. | Outstanding. |

## DIVISION OF NOTES, COUPONS, AND CURRENCY.

This division receives, counts, arranges, registers, examines, and files for future reference all redeemed, exchanged, and transferred coupon bonds, paid coupons, interest checks, and all United States interest-bearing securities, such as Treasury notes, 7-30 notes, and compound-interest notes, and gold and other certificates payable to order. It also makes the final count and examination of the upper halves of all redeemed United States currency prior to its final destruction. This division represents the Register on the various committees having in charge the examination and counting of customs, internal-revenue, and postage stamps condemned for imperfections, burnt and mutilated notes sent in for exchange and redemption, and witnessing the final destruction of the above by the process of maceration.

The statements that follow cover all branches of the business assigned to this division, and give in tabulated form the exact condition of the records at the close of the year.

In the order of arrangement of the leading statements a summary of their contents, with explanatory notes, is submitted, giving some account of the methods and manner of handling the work of the division, with a brief account of necessary work performed at intervals during the year, which could not be itemized or given in tables.

During the year there were received 47,174 coupon bonds, with coupons attached, amounting to $\$ 19,129,580$.
There were counted, entered in blotters, and transferred to numerical registers, scheduled in duplicate, and filed 40,893 coupon bonds, with 192,694 coupons attached, amounting to $\$ 16,282,010$, which, added to the coupon bonds on file at the beginning of the year, give an aggregate of $2,598,721$ coupon bonds with $96,359,968$ coupons attached, amounting to $\$ 1,484,841,700$, filed in this division at the close of the fiscal year ended June 30, 1909. There were transferred from blotters to numerical registers 38,397 bonds under the respective numbers of exchange, transfer, or redemption.

The destruction of coupon bonds of the loans of the Government ceased in 1880, there having been destroyed by process of maceration to that time, as shown in the statement of destructions, $2,363,085$ coupon bonds with $76,842,069$ coupons attached, amounting to \$1,421,687,450.

The total number of redeemed detached coupons received during the year was 450,328 , amounting to $\$ 1,646,412.16$; the number counted to verify schedules; 450,328 ; arranged numerically, 705,491 ; entered in numerical registers, 775,979 ; compared with numerical registers, 710,624 ; scheduled by loans, dates, and denominations, 685,834 , and entered in ledgers, 164,196 . At the close of the year there were on file in this division 115,008,445 redeemed coupons, amounting to $\$ 1,288,569,184.25$. Having in view the safety and security of this class of redeemed securities-as the pressure of business would permit during the year-the old and rotten rubber bands strapped around packages containing 1,394,468 coupons were replaced with fine copper wire, making secure for all time the correct numerical order of the coupons according to loans, dates, and denominations.

Of the gold certificates of the act of July 12, 1882, series of 1888, payable to order, there were received, examined, registered, and filed 13 certificates of $\$ 5,000$ and 12 certificates of $\$ 10,000$ denomination, respectively, amounting to $\$ 185,000$. Of the issue of gold certificates of the act of March 14, 1900, series of 1900, all of denomination $\$ 10,000$ and payable to order, there were received, examined, registered, and filed 10,342 certificates, amounting to $\$ 103,420,000$.

Gold certificates of the act of July 12, 1882, series of 1882, payable to bearer, are destroyed after redemption. The number and amount of these certificates redeemed are shown in the tabulated statements of the currency section of this division on pages 505 and 509 .

The total number of checks issued for the payment of interest on the registered bonds of the United States, the Panama Canal loan, and the District of Columbia received during the year was 125,730, amounting to $\$ 19,408,012.93$; the number counted and arranged numerically, 125,730 ; the number registered, 118,890 , and the number examined and filed, 112,223.

The system adopted for registering and filing checks in this division is most complete and satisfactory in all its details, being made so accessible by. filing and labeling the checks according to reports and dates received, in convenient packages containing an average number of 1,000 checks each, and placed on shelves made expressly to fit the size and shape of the packages, that any individual check from the millions on hand can be found at a moment's notice to meet all requirements of daily calls for information.

At the close of the year there were on file $6,430,726$ checks, amounting to $\$ 1,013,941,426.71$, issued for the payment of interest on registered bonds from 1861 to 1909.
In the currency section of this division there were received 194,510,006 upper half-notes and certificates of various issues, amounting to $\$ 620,417,807$, which, after having been recounted and reexamined and all errors reported and corrected, were canceled and destroyed by maceration at the Bureau of Engraving and Printing in the presence of official witnesses. The records show a large increase in receipts in the fiscal year just ended, and consequently a correspondingly large increase in the labor of those employed in the work, the receipts of the fiscal year ended June 30, 1908, being 172,179,110 upper half-notes and certificates of various issues, and the receipts of the year just closed 194,510,006, an increase of $22,330,896$ upper half-notes and certificates.

The redeemed currency is received daily, and being current work and closely connected with the corresponding work in the offices of the Secretary of the Treasury and Treasurer of the United States, it is required that the recount and reexamination be made and completed at the close of each day's receipts, or, in other words, kept up-to-date. With this steadily increasing volume of work each year, it is apparent that more room will be needed in the very near future in order to properly and efficiently discharge the important duties devolving upon this branch of the service.

At present the force employed on this work is closely confined to very limited quarters, wholly undesirable from a hygienic point of view on account of the crowded condition of the room and greatly wanting in sufficient space to properly perform the labor required.

The records of the issue, redemption, and outstanding of various coupon bonds of the old loans show there are still outstanding $\$ 450,050$ of these loans beginning with issues before the civil war and including bonds issued during the war to the date of the maturity of the 5 per cent loan of 1904 .
The outstanding amounts of other old issues on which the interest has ceased many yeārs ago are as follows:

Seven-thirty Treasury notes of 1861,1864 , and $1865, \$ 129,800$; certificates of indebtedness, acts of March 1 and 17, 1862, and March 3, 1863, $\$ 3,000 ; 3$ per cent certificates, acts of March 2, 1867, and July 25, 1868, $\$ 5,000$; 4 per cent refunding certificates, act of February 26, 1879, $\$ 17,860$; gold certificates, act of March 3, 1863, $\$ 99,980$; oneyear Treasury notes of 1863 , act of March 3, 1863, $\$ 30,360$; two-year Treasury notes of 1863 , act of March 3, 1863, $\$ 26,850$; compoundinterest notes of 1863 and 1864, $\$ 159,600$; old demand notes, acts of July 17 and August $5,1861, \$ 53,282.50$, and fractional-currency notes, act of July 17, 1862, etc., $\$ 15,236,725.61$.
During the year there were received, recorded, and filed in this division 627,325 redeemed vouchers, amounting to $\$ 140,942,115.09$, making a total of $128,406,326$ redeemed vouchers, amounting to $\$ 8,754,505,346.23$, on file at the close of the year.

W. T. Vernon, Register.

## The Secretary of tee Treasury.

## REPORT OF THE COMMISSIONER OF INTERNAL REVENUE.

## Treasury Department, Office of Commissioner of Internal Revenue, Washington, D. C., November 1, 1909.

SIR: I have the honor to make report of the work of the Bureau of Internal Revenue for the fiscal year ended June 30, 1909, accompanied also with a statement of the receipts from the several sources of internal revenue for the months of July, August, and September of the current fiscal year.

## RECEIPTS

The receipts of this bureau for the past fiscal year were $\$ 246,212,719.22$, a decrease of $\$ 5,453,230.82$ from the collections of the preceding year.

The receipts for the first three months of the current year show an increase in collections of $\$ 2,955 ; 657.45$ as compared with the same months of the past fiscal year.

It is estimated that receipts from corporations in 1910 will amount to $\$ 15,000,000$, and from all other sources to $\$ 253,000,000$, making a total of $\$ 268,000,000$. It is also estimated that the receipts from corporations in 1911 will amount to $\$ 25,000,000$, and from all other sources to $\$ 255,000,000$, making a total of $\$ 280,000,000$.

The objects of internal-revenue taxation producing the largest amount of revenue are distilled spirits, fermented liquors, and tobacco.

During the past fiscal year there was collected on distilled spirits $\$ 128,315,181.45$; on fermented liquors $\$ 56,303,496.68$; on tobacco \$51,887,178.04.

## RECEIPTS IN LARGE TAX-PAYING STATES AND DISTRICTS.

The leading States ${ }^{\circ}$ in the payment of internal-revenue taxes for the past year are Illinois, $\$ 43,441,771.11$; New York, $\$ 28,637,349.37$; Kentucky, $\$ 28,130,420.34$; Indiana, $\$ 25,224,816.81$; Pennsylvania, \$20,886,066.67; Ohio, \$18,907,081.44.

Among the States paying the smallest amounts are Mississippi, New Mexico, North Dakota, Vermont, and Wyoming.

Of the 65 collection districts subject to internal-revenue laws, the fifth district of Illinois reported the largest collection, $\$ 28,671,699.22$.

In 1908 the total production of distilled spirits was $133,889,563$ gallons; in 1909, 139,891,613. In 1908, in round numbers, $121,400,000$ gallons of tax-paid spirits were withdrawn; in 1909, 116,650,165. There has been an increase in the amount of tobacco and snuff manufactured and a decrease in the production of beer.

The four States having the largest production of distilled spirits during the past fiscal year are Illinois, $37,793,376$ gallons; Indiana,

21,916,486 gallons; Kentucky, 27,524,275 gallons; Ohio, 9,119,611 gallons. The two collection districts having the largest output of distilled spirits are the fifth district of Illinois, 28,812,978 gallons, and sevienth district of Indiana, $13,063,280$ gallons.

The production of distilled spirits from materials other than fruit during the fiscall years ended June 30, 1897, to June 30, 1909, inclusive, was. as follows:

| Fiscal year of production ended- | Tax gallons. |
| :---: | :---: |
| June 30, 1897. | 62, 465, 647.8 |
| June 30, 1898 | 80, 762, 213.4 |
| June 30, 1899. | 97, 066, 554.7 |

| June 30, 1906. | 145, 666, 125.1 |
| June 30, 1907. | 168, 573, 913. 2 |
| June 30, 1908. | 126, 989, 740.1 |
| June 30, 1909 | 133, 450, 755. I |

During the fiscal years 1898 to 1907 the production of distilled spirits each year was much in excess of the withdrawals for all purposes, resulting in a stock in distillery and general bonded warehouses at the end of the fiscal year 1907 of $245,438,816$ original gauge gallons, being an increase over a similar stock held in bond at the expiration of the fiscal year ended June 30, 1898, of 112,452,549.3 original-gauge gallons. The stock in bond June 30, 1909, was $229,141,434$ original gauge gallons, and the withdrawals for all purposes during the fiscal year ended June 30, 1909, were in excess of the production during said year $5,884,694.2$ original gauge gallons.

The tax-paid withdrawals of spirits distilled from material other than fruits during the fiscal years ended June 30, 1897, to June 30, 1909, inclusive, were as follows:

| Fiscal year ended June 30- | Tax gallons. |
| :---: | :---: |
| 1898. | 78,246, 032.9 |
| 1899. | 83, 694, 338.1 |
| 1900. | 93, 391, 827.8 |
| 1901 | 99, 191, 721. 5 |
| 1902. | 103, 304, 981.5 |
| 1903. | 112, 788, 168.0 |
| 1904 | 116, 033, 305.6 |
| 1905. | 115, 994, 857. 5 |
| 1906. | 122, 617, 943. 1 |
| 1907 | 134, 031, 066.7 |
| 1908. | 119, 703, 594.4 |
| 1909. | 114, 693, 578.2 |

From the foregoing it will be observed that the withdrawals on payment of tax from bonded warehouses during the period from 1897 to 1907 increased approximately 100 per cent, and that there was a decrease in tax-paid withdrawals for the fiscal years ended June 30, 1908, and June 30, 1909, as compared with the previous years' withdrawals of $14,327,472.3$ and $5,010,016.2$ tax gallons, respectively.

There were tax-paid for bottling in bond during the fiscal year ended June 30 , 1909, $6,365,839$ tax gallons, as compared with
$4,794,358$ tax gallons tax-paid during the previous fiscal year, an increase of 1,571,481 tax gallons.

The four States which made the largest quantity of fermented liquors are New York, 12,573,773 barrels; Pennsylvania, 7,050,262 barrels; Illinois, $5,525,473$ barrels; Wisconsin, 4,600,931 barrels. The two districts which produced the largest quantity of fermented liquors are the third district of New York, 4,997,515 barrels, and the first district of Illinois, $4,725,363$ barrels.
The four States producing the greatest number of cigars weighing more than 3 pounds per thousand, and the production of each during the year, are as follows:

| Pennsylvania.. | 755, 862, 278 |
| :---: | :---: |
| Ohew O | 1,181 |
| New Jersey | ${ }_{422,122,675}^{649}$ |

The two districts showing the largest production of cigars are the ninth Pennsylvania, 712,277,371, and first Pennsylvania, 601,116,405.

The States showing the greatest production of little cigars (weighing less than 3 pounds per thousand) are:

| Virginia | 431, 312,870 |
| :---: | :---: |
| Maryland | 291, 012, 830 |
| New York | 184, 651,020 |
| The greatest |  |
| Maryland | 291, 012, 830 |
| Sixth Virginia | 219, 062,370 |
| Sirst Pennsylvania | 2160, 310,000 |

The States of New York, Virginia, Louisiana, California, Pennsylvania, and Massachusetts, in the order named, show the greatest production of cigarettes weighing less than 3 pounds per thousand.

| New York. | 3, 619, 256, 714 |
| :---: | :---: |
| Virginia. | 1, 333, 949, 090 |
| Louisiana | 481, 737, 980 |
| Californi | 104, 81.6, 300 |
| Pennsylvania. | 101, 689, 310 |
| Massachusetts. | 47, 398, 650 |

The three districts showing the greatest production of little cigarettes are the second New York, which produced 1,676,546,251, the second Virginia, which produced $1,330,952,590$, and third New York, which produced $1,199,838,303$.

New York State produced the greatest number of large cigarettes, showing a production of $16,002,102$, of which number $10,997,962$ were manufactured in the third district and 4,943,640 in the second district.

The States of North Carolina, Missouri, Ohio, Kentucky, New Jersey, and Virginia, in the order named, were the largest producers of both chewing and smoking tobacco, the quantity produced being as follows:

North Carolina.............................................................................. 76, 826, 981
Missouri.............................................................................. $72,781,381$
Ohio.............................................................................. 42, 444, 899
Kentucky.................................................................... 41, 844, 775
New Jersey..................................................................... $27,230,568$
Virginia........................................................................... $26,365,509$
13518-FI 1909-- 33

The districts producing the largest quantity were:

| First Missouri | 72, 550, 788 |
| :---: | :---: |
| Fifth North Carolina. | 38,705,601 |
| Fourth North Carolina | 38, 121, 380 |
| First Ohio. | 37, 506, 359 |
| Fifth Kentucky | 35, 955, 763 |

COST OF COLLECTING THE INTERNAL REVENUES.
The cost of collecting the internal revenues for the past fiscal year was 2.02 per cent.
The average cost since the creation of the bureau is 2.69 per cent.

## SPECIAL CORPORATION EXCISE TAX.

The tariff act of August 5, 1909, provides for the collection of a special excise tax on all corporations, joint-stock companies, or associations organized for profit under the laws of the United States, or any State or Territory thereof, or organized under the laws of any foreign country if doing business within the United States. The execution of this portion of the tariff law is imposed upon the Bureau of Internal Revenue under the direction of the Secretary of the Treasury.

For the purpose of properly administering this law'a blank form of return to be made by the corporations, joint-stock companies, or associations, and regulations relating to the law and to the making of the return, are in course of preparation, the work being under the personal direction of the Secretary of the Treasury. Good progress is being made, and regulations and blanks will be ready for distribution to corporations by the various collectors of internal revenue in time for the proper preparation of returns for the present calendar year. Each return is required to be in the hands of the collector of the district in which is located the principal place of business of the corporation making the return on or before the 1st day of March, 1910. The proper amount of the tax for the preceding calendar year is to be assessed against each corporation on or before the 1st day of June, and the amount of tax assessed is collectible on or before June 30, 1910.

It is estimated that there will have been collected from this source by July 1, 1910, the sum of $\$ 15,000,000$, and that an additional sum of $\$ 10,000,000$, collectible for the calendar year from January 1, 1909, to December 31, 1909, will be collected subsequent to July 1, 1910, making the estimate for the total amount of collection for the fiscal year 1910 the sum of $\$ 25,000,000$.

## RECEIPIS FOR FIRST THREE MONTHS, CURRENT FISCAL YEAR.

The following table shows the receipts from the several objects of taxation for the first three months of the fiscal years ending June 30, 1909 and 1910. A comparison of the receipts for the two periods is also given.

| Objects of taxation. | Amount of tax paid during first three months of fiscal year- |  | Increase. | Decrease. |
| :---: | :---: | :---: | :---: | :---: |
|  | 1909. | 1910. |  |  |
| PROCESS OR RENOVATED BUTTER. |  |  |  |  |
| 1'rocess or renovated butter, manufactured or sold, etc. | \$22, 991. 60 | \$34, 340.95 | 811, 349. 35 |  |
| (special tax). | 850.00 | 1,516.67 | 666.67 |  |
| Total. | 23,841. 60 | 35,857. 62 | 12,016.02 | ............. |
|  |  |  |  |  |
| Filled cheese. |  | 571.98 | 571.98 |  |
| Mixed flour. | 934. 90 | 1,058. 50 | - 123.60 |  |
| Playing cards | 88, 395.34 | 101,054. 46 | 12, 659.12 |  |
| Penaltios..................................... | 102, 226.31 | 115, 652.72 | 13, 426.41 |  |
| Collections not otherwise herein provided for. | 12,268.19 | 7,832. 44 |  | \$4,435.75 |
| - Total. | 203, 824. 74 | 226, 170. 10 | 22, 345.36 |  |
| Aggregate receipts. . . . . . . . . . . . . . . . . . | 62,220, 970. 76 | 65, 176, 628.21 | 2,955,657. 45 | \% |

## COST OF COLLECTION.

The cost of collection for the fiscal year, distributed among the different items of appropriation, was approximately as follows:
Salaries and expenses of collectors of internal revenue, $1909 \ldots \ldots \ldots . \$ 2,026,946.55$
Miscellaneous expenses, Internal-Revenue Service, 1909 72, 108. 34
Salaries and expenses of agents and subordinate officers of internal revenue, 1909

2, 325,822. 20
Paper-for internal-revenue stamps, 1909. 77, 841. 57

Salaries, office of Commissioner of Internal Revenue, 1909................ 324, 295.05
Refunding internal-revenue collections
25, 061. 31
Total amount expended $4,975,238.75$
Expenditures from appropriation "Withdrawal of denaturalized alcohol."-The expenditures from the appropriation for "Withdrawal of denaturalized alcohol" were as follows:

| Salaries and expenses of agents and inspectors | \$126, 422.59 |
| :---: | :---: |
| Salaries and expenses of 16 deputy collectors. | 20, 822. 32 |
| Salaries of 8 storekeepers ${ }^{\text {a }}$. | 9,197.00 |
| Salaries of 4 gaugers ${ }^{6}$ | 5,450.00 |
| Salaries of office force. | 34,834. 82 |
| Office traveling expenses. | 1,507. 70 |
| Laboratory supplies. | 167. 41 |
| Total amount expended. | 198, 401. 84 |

$a$ Where alcohol was produced at a distillery and only a portion of the product was denatured and the distillery was of that class where a storekeeper was assigned to perform all the work in connection with the entry and withdrawal of alcohol and denaturing the same, payment of salary and expenses was made from the appropriation for "Salaries and expenses of agents and subordinate officers of internal revenue."
$b$ Where there was not a sufficient amount of alcohol denatured at one distillery to employ the entire time of one gauger in such work, the compensation and expenses of such gauger were paid from the appropriation for "Salaries and expenses of agent and subordinate officers of internal revenue."

## ESTIMATED EXPENSES FOR NEXT FISCAL YEAR.

## I estimate the expenses of the Internal-Revenue Service for the

 fiscal year ending June 30, 1911, as follows:

## SALARIES.

I have the honor to recommend that Congress appropriate for the fiscal year ending June 30, 1911, the sum of $\$ 347,640$ as salaries for the following officers, clerks, and employees in this bureau:
1 Commissioner of Internal Revenue ..... \$6,000
1 deputy commissioner ..... 4, 000
1 deputy commissioner ..... 3, 600
1 chief chemist ..... 3, 000
1 chemist ..... 2, 500
2 first assistant chemists, at \$1,800 each ..... 3, 600
1 second assistant chemist ..... 1, 600
1 third assistant chemist ..... 1., 400
1 fourth assistant chemist ..... 1, 200
3 heads of division, at $\$ 2,500$ each ..... 7,500
6 heads of division, at $\$ 2,250$ each ..... 13, 500
1 superintendent of stamp vault ..... 2, 000
1-private secretary ..... 1, 800
29 clerks of class 4 ..... 52, 200
26 clerks of class 3 ..... 4], 600
40 clerks of class 2 ..... 56, 000
39 clerks of class 1 ..... 46,800
31 clerks, at $\$ 1,000$ each ..... 31,000
44 clerks, at $\$ 900$ each ..... 39, 600
3 messengers, at $\$ 840$ each ..... 2,520
19 assistant messengers, at $\$ 720$ each ..... 13, 680
19 laborers, at $\$ 660$ each ..... 12, 540

I also recommend the appropriation of the sum of $\$ 3,400$ as salaries of two stamp agents, one at $\$ 1,600$, one at $\$ 900$, and one counter, at $\$ 900$, the same to be reimbursed by the stamp manufacturers, as provided by the act of August 5, 1882.

SCALE OF SALARIES OF COLLECTORS.
The recommendations made for the salaries of collectors are based upon an estimate of their probable collections according to the following scale, with the qualifications that if the actual collections vary from the amounts estimated the salaries will be readjusted at the end of the fiscal year:

| For collection of- | Salary. | For collection of- | Salary. |
| :---: | :---: | :---: | :---: |
| \$25,000 or less. | \$2,000 | \$375,001 to \$425,000. | 83,375 |
| \$25,001 to \$37,500 | 2, 125 | \$425,001 to \$475,000. | 3,500 |
| \$37,501 to $\$ 50,060$ | 2, 250 | \$475,001 to \$550,000. | 3,625 |
| \$50,001 to $\$ 75,000$. | 2,375 | \$550,001 to \$625,000. | 3,750 |
| \$75,001 to \$100,000. | 2,500 | \$025,001 to \$700,000. | 3,875 |
| 8100,001 to \$125,000. | 2,625 | \$700,001 to \$775,000. | 4,000 |
| \$125,001 to $\$ 175,000$ | 2,750 | \$775,001 to \$850,000. | 4,125 |
| \$175,001 to \$225,000 | 2,875 | \$850,001 to \$925,000. | 4,250 |
| \$225,001 to \$275,000 | 3,000 | \$925,001 to \$999,999. | 4,375 |
| \$275,001 to $\$ 325,000$. | 3, 125 | \$1,000,000 and upward. | 4,500 |
| \$325,001 to $\$ 375,000$. | 3,250 |  |  |

In addition to the salary based upon the above-mentioned scale, the collector shall receive a commission of one-half of 1 per cent on tax-paid spirit stamps, and may receive additional compensation on account of territorial extent, as provided by law, provided the gross compensation does not exceed $\$ 4,500$. (See sec. 3148 as amended and sec. 3314, Revised Statutes.)

OFFICIAL FORCE.
At the close of the fiscal year ended June 30, 1909, 259 officers, clerks, messengers, and laborers were employed in this bureau, and the aggregate amount paid during the year for their salaries was $\$ 324,295.05$, which does not include office force paid from the appropriation for "Withdrawal of denaturalized alcohol," from which was paid $\$ 34,834.82$, covering salaries of 26 employees.

The force connected with this bureau during the fiscal year which ended June 30, 1909, in the various districts throughout the United States, as reorganized under the executive order of May 21, 1887, was 65 collectors, who received per annum salaries and commissions as follows:

There were also employed $1,1.54$ deputy collectors, who received per annum salaries as follows:

| Number. | Salary. | Number. | Salary. | Number. | Salary. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 8. | \$2,500 | 1. | \$1,250 | 35. | \$600 |
| 134 | 2,400 2 2 |  | 1, 200 |  | 500 |
| 4. | 1,900 | 143 | 1,100 | 5. | 400 |
| 32. | 1,800 | 1. | 1,050 | 1. | 360 |
| 11. | 1,700 | 133. | 1,000 | 29. | 300 |
| 28. | 1,600 | 61. | 900 |  | 200 |
| 44. | 1,500 | 1. | 840 | 1. | 180 |
| 5. | 1,450 | 16. | 800 |  | 100 |
| 163. | 1,400 1,350 | ${ }_{8} 8$. | 750 |  | 60 |
|  | 1,300 |  | 700 |  |  |

There were also employed in the offices of the different collectors 134 clerks, who received per annum salaries as follows:

| Number. | Salary. | Number. | Salary. | Number. | Salary. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 2. | \$1,700 | 37. | \$1,200 |  | 8800 |
| 3 | 1,600 |  | 1,150 |  |  |
| ${ }_{4}^{4}$ | 1,500 | 1. | 1,050 |  | 700 |
| 12. | 1,300 | 18. | 1,000 |  |  |
| 1. | 1,250 |  | 900 |  |  |

Also 12 messengers and 2 janitors, who received per annum salaries as follows:

STOREKEEPERS, GAUGERS, ETC:
There were also employed 171 gaugers who received fees not to exceed $\$ 5$ per day, 65 storekeepers whose pay did not exceed $\$ 4$ per day, and 1,933 storekeeper-gaugers whose pay ranged from $\$ 2$ to $\$ 5$ per day. All the employees above enumerated were paid only when actually emploved.

## INTERNAL-REVENUE RECEIPTS DURING THE LAST TWO FISCAL YEARS.

Comparative Statement showing the Receipts from the Several Objects of Internal Taxation in the United States durina the Fiscal Years ended June 30, 1908 and 1909.

Respectfully,

> Royal E. Cabell, Commissioner of Internal Revenue.

Hon. Franklin MacVeagh, Secretary of the Treasury.

## 0

[^0]:    a Exclusive of $\$ 150,000$ gold certificates issued June 30, 1909, but not covered by warrant until after the close of the fiscal year.

[^1]:    ${ }^{a}$ This expenditure was reimbursed by $\$ 7,532.06$.

[^2]:    Total
    43, 721. 07

[^3]:    * Disbursements in excess of receipts

[^4]:    The disbursements for postal deficiencies are grants by law from the Treasury, and differ from the fiscal year expenditures thereof shown by reports of the Auditor for the Post-Office Department.

    Issues of certificates and notes not affecting the cash in general fund are excluded from the public debt figures in this statement.

[^5]:    Attention is again invited to the necessity for legislation that will clear the accounts kept in this office of unavailable funds and relieve the Treasurer of the United States from further accountability for amounts which have passed from his control without fault or negligence on his part. This subject has been called to the attention of Congress by many of my predecessors and has received some consideration by committees in the Senate and House of Representatives, but the desired legislation has not been enacted.

    In the Forty-fourth Congress, first session, the Committee on Finance in the Senate submitted a report (No. 371 ) in which, on page 3, reference is made to this question of unavailable moneys as follows:
    "All money in the Treasury, wherever it may be deposited or placed for disbursement or custody, is charged to the Treasurer of the United States. It is obvious, how-

[^6]:    a Decrease,

[^7]:    a Decrease.

[^8]:    Note.-Refinery operationssuspended at the assay officeat New York during reconstruction of building.

[^9]:    a Includes $\$ 7,159.55$, manufacturing medals for departments; $\$ 816.96$, miscellaneous work for Treasury Department; $\$ 2,758.34$, miscellaneous work for other institutions of mint service; $\$ 294.72$, otber miscellaneous work.

    - bIncludes $\$ 181,442.09$ for Philippine coinage; $\$ 75.99$, miscellaneous work for other departments.
    c Includes $\$ 132.70$, miscellaneous work for other departments.

[^10]:    ${ }^{a}$ This paper was read at the Seventh International'Congress of Applied Chemistry, London, May 27 to June 2, 1909; also at the Spokane meeting of the American Institute of Mining Engineers in September, 1909.
    ${ }^{b}$ The actual accuracy of chemical analysis, Trans. A. I. M. E., xxvi, 370 (1896); Jour. Am. Chem. Soc., vol. xviii, No. 9, p. 808 (Sept., 1896).
