ANNUAL REPORT ON THE FINANCES.

TREASURY DEPARTMENT, Washington, December 5, 1910.

SIR: I have the honor to make the following report:

ESTIMATES.

In submitting herewith the estimates of expenditures for the executive departments for the year beginning July 1, 1911, I wish to call attention, as I did last year, to the exceeding care on the part of the heads of departments with which these estimates have been compiled, under the immediate attention of the President. There could scarcely be more scrutiny given to the work of the estimates than was given last year and has been given this year by the President and the members of his Cabinet. And I am sure that they will be received by the Congress this year as they were last year for what they are—an exhaustive endeavor to reduce the requirements, not only in the gross but in every detail, to the lowest point consistent with proper administration. These estimates are, as a matter of course, subject to the revision of Congress, and it may well be that in their details they can be improved. I do not believe that the gross can be materially reduced.

The total ordinary estimates for 1912—the fiscal year beginning July 1, 1911—are \$630,494,013.12. The estimate for the Panama Canal is \$56,920,847.69, making the grand total \$687,414,860.81. The total appropriations for 1911—that is, for the current year—were \$721,313,900.48. The estimates for next year now submitted are, therefore, \$33,899,039.67 less than the appropriations for this year. The decrease of \$21,000,000 in the estimates for rivers and harbors and the reduction in the Interior Department of \$20,000,000, due to the appropriation last year of that amount for an issue of bonds for reclamation projects, have been offset in part by an increase of \$19,000,000 in the Panama Canal estimate and \$6,299,000 to meet the requirements of public building legislation. It leaves, therefore, over \$18,000,000 of savings in the executive departments proper, as compared with the appropriations for the current year.

The ordinary appropriations for 1910 were \$693,313,166.40; those for 1911 were \$683,458,900.48. The estimates now submitted for 1912 are \$630,494,013.12.

In the preceding paragraphs the ordinary estimates for 1912 have been compared with the appropriations for 1911. Compared with the original estimates for 1911, submitted to the Congress one year ago, these estimates are \$5,500,000 less, and they are almost \$17,000,000 less than the estimates ultimately reported to the Congress for the year 1911.

The large reduction in the estimated expenditures for 1912 for purposes of administration is to be added to the large reduction of last year. These figures make two successive years during which not only the former habitual large annual increase has been completely arrested but when estimates in largely reduced figures have been submitted to the Congress. There are these two factors to be considered in measuring the results of the movement of this administration toward economies. First, there is the saving of the regular annual increase by putting a complete period to it; and, secondly, the actual reductions made which take the place of the usual increases.

The estimates of receipts submitted herewith we are obliged to make without that exact or nearly exact basis with which we estimate expenditures. The revised estimated receipts for the current year—the year ending July 1, 1911—are \$6,000,000 more than the figures I submitted in December a year ago. This is about \$2,000,000 less than the amount of the increased revenues from tobacco due to the new taxes. The customs duties are estimated now \$25,000,000 less than before, while the internal-revenue receipts are estimated \$28,000,000 higher, exclusive of the corporation tax, which remains as it Three million dollars have been added to the estimated receipts from miscellaneous revenues. The decline in customs revenues leaves them still at the very high mark of \$320,000,000. The increase in appropriations over the estimates for the current year will make the expenditures larger than was estimated. It is now estimated that the ordinary surplus will be \$15,805,000 instead of \$35,931,000. the deficit with the Panama Canal disbursements will be \$29,595,000 instead of \$12,100,000. In preparing for submission to Congress at its meeting in December an estimate of receipts and expenditures for a period of a year commencing the July following, we are obliged to adopt as a basis our receipts and expenditures of the present incomplete year. Our figures, therefore, can only be approximate. appropriations of course have not been made, and can not, therefore, be used as a basis of calculation until a year later, when a new estimate is made.

This explanation applies not only to the revised estimates for the current year but will throw light upon the uncertainties of the estimated surpluses and deficits submitted for the year beginning next July. The estimated receipts for the next year are submitted at \$680,000,000, which is practically the same as the revised estimate of

receipts for the present year. Deducting our estimated expenditures from these estimated receipts (and assuming that the estimates will not in the gross be exceeded by the appropriations), the surplus of ordinary receipts over ordinary disbursements in 1912 will be \$49,505,986.88. But taking also into account the estimates for the Panama Canal the deficit for the next year will be \$7,414,860.81.

PANAMA CANAL BONDS.

The continuing deficit created by the Panama Canal expenditures is bringing us closer to the time when the indebtedness of the canal to the general fund will have to be paid, at least in part, by å sale of some of the Panama bonds authorized in the amount of \$290,569,000 in the act of August 5, 1909. These bonds may be issued at any rate of interest found necessary up to 3 per cent. They also carry the privilege of being used as a basis for national-bank circulation. It was not observed at the time of their authorization that the existing law as to the tax on circulation needed to be changed to provide a higher tax for circulation secured by these bonds in order that they might not have an advantage over the 2 per cent bonds.

In order to preserve only a parity between the 2 per cent and 3 per cent bonds, the tax on circulation secured by the 3 per cent bonds should be $1\frac{1}{2}$ per cent. If it should be preferred to make the tax in the case of the new bonds 2 per cent instead of $1\frac{1}{2}$ per cent in order to further insure their going into the hands of investors in case they are issued at 3 per cent, that might have its advantages. It would add an additional check against undue use of the new bonds as a basis for circulation.

If, on the other hand, authority were given to issue \$50,000,000 or \$100,000,000 3 per cent bonds without the circulation privilege, we should be able to gauge experimentally the rate at which the Government could borrow on an investment basis, and we should then be better able to formulate a financial policy for the future.

A new factor has entered into the matter of the Panama Canal bonds since the passage of the postal savings bank bill. It is possible that these bonds may find a market through this new bank. Thirty per cent of its total deposits may be invested in government bonds, and in addition the depositors may turn their funds into such bonds. It is, therefore, within the possibilities that none of these new Panama bonds will ever reach the open market; and it is possible they may never have circulation privileges attached to them, for it is expressly provided that bonds issued to depositors shall not have circulation privileges.

While these new facts diminish the importance of the new Panama bonds to the open market, the correction of the circulation tax remains very desirable.

BANKING AND CURRENCY.

The reform of the banking and currency system is still in the future. It is very regrettable that circumstances have made earlier consideration of this great and pressing subject impracticable; and short as the present session of Congress is to be, it would be a great step forward if this subject could at least arrive at some form of definiteness and concentration before Congress adjourns. It is not like a new matter. It has received very great and very widespread consideration for years; and especially during the last two or three years the economic authorities under the lead of the National Monetary Commission have been greatly occupied with its problems and factors. No public question has in the last three years received so much competent study as this has; and it would be quite wrong to feel there is need of further hesitation in taking action.

The whole financial history of our country is a long series of troubles and agitations. And now that we have in sight the establishment of a real and permanent banking and currency system that will be both safe and sane it makes one impatient to see it accomplished.

It is of the first consequence that this great economic question—important to all the people of this country, rich and poor alike—shall escape the deadly consequences of a partisan treatment. It is, therefore, to be hoped that it can come into Congress detached from political or sectional considerations.

As long as we continue under our present system we are liable to panics; and the vast devastations of panics reach Republicans and Democrats and all parts of the country alike. Panics are no longer necessary and no longer respectable. They are avoidable; but not under our system. Our system can fairly be called a panic-breeding system; whereas, every other great national banking and currency system is panic-preventing. It is for the Government to say whether it will have panics in the future or whether it will not. It is a mere matter of choice. We can continue to have panics or we can stop having panics, exactly as we prefer. It will not cost a penny to prevent them; and it has cost us untold millions and untold suffering every time we have had one.

We have no system of reserves. Our banking system destroys our reserves. It concentrates in New York what are pretended to be reserves and then forces the New York banks to lend and abolish them. Now, a reserve is necessary to the very idea of banking; but our system instead of building up a reserve destroys it as fast as it inclines to accumulate.

We have no way to increase our currency when it is needed, except under the Aldrich-Vreeland law, which will soon expire and which is only intended for emergencies. We have a currency which is forced up, whether we need it or not, to a certain measure of our 2 per cent bonds. But it can not get up any further; and it practically can not come down.

Nor, under our system, can ordinary transactions of business go forward uninterrupted in a time of stress and strain. And yet the final test of a banking and currency system is that the ordinary banking facilities needed by business shall be provided at all times and under all circumstances.

NATIONAL CURRENCY · ASSOCIATIONS.

During the past summer and autumn I have encouraged the national banks of the country to avail themselves of the provisions of the Aldrich-Vreeland bill to form national currency associations, giving themselves the opportunity without any delay to issue currency in case of need. Many of the banks of the country became interested in this policy, and now these associations have been formed in many parts of the country, including Washington, D. C.; Georgia, at Atlanta; Boston; New York City; Louisiana, at New Orleans; Philadelphia; Chicago; St. Paul and Minneapolis; Detroit; and St. Louis. Others are in process of formation.

NATIONAL BANKS.

The administration of our relations with the national banks has continued to show steady improvement. The Government is getting more and more of its rightful supervision and control of these banks; and is distinctly aiding the officials of the better banks and is as distinctly protecting the communities against the vicissitudes of the others. The body of bank examiners is being gradually overhauled. The reconstructed force is being educated and trained and the esprit de corps is becoming excellent. Politics has been practically eliminated from the office of the Comptroller of the Currency. He who enters that service leaves politics behind.

The developing and perfecting of these relations between the Government and the national banks can go on without reference to the impending banking and currency reform by Congress. Whether that reform should materialize soon or late does not concern the need of this better supervision and control. The banks will remain in any case, and the need of Treasury supervision and control will continue permanently. If, however, the general reform of our banking and currency system is not to be immediate some things which would be appropriate to the laws incorporating that reform ought, it seems to me, to be provided for at once.

National banks abroad.

For example, there is a clear need of American banks in foreign countries where American commerce needs banking facilities. The American banking system is therefore obliged to develop itself so as to perform this necessary international function. We are already doing a large trade with foreign countries, but we are to make this trade much larger, and especially in many countries where we now have little or no trade. Our trade must become much more general in the articles dealt in, and much more general in the markets we deal in.

Now, there can be no doubt that we shall never be internationally a full-fledged commercial nation until we have merchant ships of our own and foreign banks of our own—a free supply of ships of our own and a free supply of banks of our own. We should have banks at all ports that are important to our commerce. And, of course, there is no reason why we should not have them if we wish them. And if we are to have banks doing a foreign business, what banks are more entitled to the opportunity, or what banks are better fitted, owing to governmental supervision and control, to afford real and reliable facilities to our commerce than the national banks? Under present laws they can not engage in this necessary international undertaking because they are not allowed any kind of branches. there is no reason that I know of why Congress should not make the national banks competent to do this foreign business-for the question of home branch banking is not involved in it at all. There is no administrative difficulty in the way and there is no principle of banking or political economy in the way. And as this is an opportunity that could be and would be availed of immediately and is needed immediately, and as it is detachable from the question of general banking reform, I do not see why the Congress should not pass upon the matter now.

The larger scope of national banks.

Other questions of importance to the national banks, and which might very well be considered independently of general banking reform, might wait at least a reasonable time upon the fortunes of the general issue.

The national banks, compared with state banks, are much restricted. They started restricted. The men who started them did not mean really all they performed in the actual establishment of a great banking system. They builded better than they knew. We have in the national banking system a great institution and one whose usefulness is susceptible of great development. It carries, however, the marks of its imperfect inauguration. It is, in some

respects unnecessarily, tied hand and foot. It can not, as I have pointed out, do international banking; and it is restricted closely as to the kind of domestic banking it can do. It can not, on anything like an equal footing, do the business the savings banks do, useful as that function is. It can not do the business the trust companies do, though the trust companies can turn from their trust business to become competitors of the national banks in their own restricted field of commercial banking. But why a national bank should not do all kinds of legitimate banking it is hard to say. If trust business in itself is safe—and it is essentially as safe as a rock—there is no reason why a national bank should not do that work as well as a state bank. And if the business of trust companies is of importance to the nation, then it would certainly be no disadvantage to let it be conducted under the supervision and control of the Federal Government. And if it is important to the country to develop the savings bank business and to put it more and more on a footing of absolute security, then it might be very well to have a part of it at any rate under the supervision and control of the Federal Government.

RELATIONS OF THE DEPARTMENT WITH BUSINESS COMMUNITIES.

The relations of the Treasury Department with the business communities are still quite artificial, unbusinesslike and burdensome. Unbusinesslike, I say, because unlike any business done by anybody else, governmental or private. I beg to call the attention of the Congress to a few of these matters that clearly ought to be set right, and which could be set right after the briefest consideration, for everything involved in them is palpable. Take, for instance, the payment of revenue to the Government. Why should an archaic regulation be permitted to continue that requires these payments to be made in actual currency—and in only particular kinds of currency at that? There is no serious practical danger in taking a certified check. All of the similar business of the country is done by checks, many not even certified. The certified check is considered the highest form of payment. The Government probably would not lose a penny in a thousand years by making this change; and in making it, the immense convenience of large fractions of the business public would be conserved—and the convenience of the Government almost equally. We are already doing things in the subtreasury cities—and in other cities—to avoid some of this hardship. For some time now the Treasury Department has allowed banks in New York to deposit every day certain actual money at the subtreasury, and the collector of customs takes orders drawn by the cashiers of those banks up to the amount of the deposit, on the theory that as the money is on deposit at the subtreasury it is actually paid, in accordance with the law, to the collector. And I have recently extended

that privilege to all subtreasury cities. But in addition to such accommodation of the practical difficulties of customs payments it has long been true that internal revenues have, in some cases from actual necessity, been paid in checks at the risk of the collectors. That should be all wiped out, and certified checks of national banks should be universally received under such restrictions devised by this department as will completely safeguard the Government from all danger of loss.

GOLD CERTIFICATES FOR BULLION AND FOREIGN COIN.

At the last session of Congress I recommended that gold certificates be issued against foreign coin and bullion, but no favorable action was taken. As the law now stands gold certificates may be issued only against United States coin. The proposal that the Treasury be authorized to hold gold bullion and foreign gold coin as security for gold certificates offers several advantages. It would add to the facilities of our great financial centers as free markets for gold by furnishing a better opportunity for bankers and dealers in exchange to secure or dispose of gold bars and foreign gold coin than has existed hereto-In the leading financial centers of Europe the large financial institutions, such as the Bank of England, the Bank of France, and the Reichsbank, count as part of their reserves, along with the domestic coins, foreign gold coin and also gold bullion, and the change contemplated by this proposal is intended to bring our arrangements in these matters into line with the policies of other countries. advantage of the proposal, however, is in the reduction of unnecessary coinage operations in our mints.

During the last twenty years there has been imported into this country \$374,000,000 in foreign gold coin, and of this amount \$310,000,000 was deposited at the mints for recoinage. In the meantime \$766,000,000 of the United States gold coin has been exported. The \$310,000,000 of foreign gold coin was recoined at our mints at the expense of our Government, while more than double that amount of our own money was exported during the same period. The coinage of \$310,000,000 of foreign gold coin into American coin must have cost at least \$800,000, or \$40,000 per year.

We have now some \$940,000,000 in gold coin stored away in the various subtreasuries and mints, the greater part of which is a reserve against gold certificates that in all likelihood will never be presented for redemption in coin. In the majority of cases where gold certificates are presented in large quantities for redemption it is for the purpose of securing gold bars, yet we continue to coin each year nearly \$100,000,000 in gold at an annual cost of somewhere between \$200,000 and \$300,000. If gold certificates might be issued against this gold bullion the major part of this cost could be saved without in any way impairing the redeemability of the certificates, and at the same time

bankers and exchange dealers would be in a position to secure bars, which they prefer for purposes of export, with greater promptness and less expense. In view of the fact that America produces nearly \$100,000,000 in gold per year and that the inevitable drift of gold must be from America, it is peculiarly reasonable that a considerable part of the gold which we produce should not be transformed at once into coin.

The plan contemplated offers abundant safeguards against the excessive reduction of the deposits of United States gold coin held against the certificates, in requiring that the amount of gold bullion so held shall not at any time exceed one-third of the total amount of gold certificates at such time outstanding and in providing that the receipt of gold bullion and foreign gold coin shall always remain at the discretion of the Secretary of the Treasury.

POSTAL SAVINGS SYSTEM.

The preliminaries in the case of the postal savings system will very soon have been sufficiently considered and adopted to permit the system to be put into actual operation. The economic effects of this new bank upon the operations of the Treasury and upon the general finances of the nation will be observed with great interest.

SINKING FUND.

I beg to call the attention of the Congress to the matter of the sinking fund. The sinking-fund law has fallen into neglect. It should be revised to a point where it can be obeyed. It is impossible to carry out the law as it is, for the Treasury Department has not at present any funds with which to pay off its debt. Presumably, I should set aside 1 per cent of the debt; and Congress has made a permanent appropriation for this purpose, but it does not furnish the money with which to carry it out; and the sinking-fund law has been not exactly a dead letter but a dead-and-alive letter for nearly forty years. It is not pleasant to continue this present situation, and it is not necessary in the least that it should be continued. Very little legislation would make the matter right; and I commend to Congress the suggestion that it make the sinking-fund law conform with the actual facts of the Government's finances.

CUSTOMS SERVICE.

The improvement in the customs service has continued to receive a large amount of attention. The sugar frauds were found to be much further extended than was at first supposed. They were found to cover in one form or another nearly all of the sugars coming into the port of New York. The total recovery of unpaid duties mounted up

during the year from \$2,100,000, noted in my last annual report, to more than \$3,400,000. These recoveries were on account of false weights. Investigations have been made and are being made as to sugar importations at other ports, and this branch of the customs frauds has now been practically fathomed. Investigation of sampling, tares and polariscopic testing, as processes in the assessment of sugar duties, may produce further recoveries and are certain to lead to improved methods and increased revenues in the future, while the fraudulent abuse of drawbacks in exported products of sugar refineries will unquestionably be shown to have been practiced on a very large scale. The existence of such extraordinary frauds at the port of New York, involving corporations of the largest and most responsible kind and spreading over a considerable series of years, has been such a revelation as to throw doubts and suspicions over the entire customs field and to oblige us to investigate and overhaul in all directions. lowing the developments in the sugar frauds came the discovery of the large, constant frauds in the importations from many of the Mediterranean ports. The sugar cases and these Mediterranean cases reported to the Department of Justice led to many important prosecutions with great success; and there has been complete cooperation between the two departments throughout.

Passengers' baggage.

It became necessary from the outset to correct the palpable vices of the system controlling importations by steamship passengers. Unless the importations by passengers could be made honest, and unless the customs service could be made to prevent this conspicuous class of smuggling, it would be hopeless to attempt to set the rest of the business of the port upon a proper plane. If the Government should show indifference to a notorious instance like this and to the notorious demoralization of its service here where everyone saw it, it would be idle to go further. It was not simply that actual tourists were violating the law, but the irregularities of the service on the passenger docks and the example set by those tourists had made the Atlantic steamships open runways for profes-This whole situation had become demoralized sional smuggling. and was deteriorating the entire customs service in New York and more or less everywhere else. Genuine passengers and professional smugglers under the guise of genuine passengers were not only smuggling by means of false declarations, but they were bribing the officers. The situation was as bad, both morally and as a business proposition, as it could possibly be. Cheating the Government, making false statements and bribing officials was regarded as a joke. the notoriety of this corruption and its association with people holding

good positions in the community, did as much as any cause to produce the widespread dishonesty in dealing with the Government and the widespread corruption of the men upon whom the Government had to rely. So entirely oblivious were large numbers of our tourists to the moral considerations involved in these crimes that the attempt of the Government to reform the service and make it honorable and useful met with criticism and resentment exactly as if the Government and not the smugglers were committing the crimes. Of all the persons found out in smuggling or undervaluing, tourists are the only ones who have sought to excuse themselves. The inevitable, however, is coming to pass. American travelers are more and more realizing the indefensibleness of smuggling—its rank dishonesty and its extremely bad example and influence—and they are conforming in increasing numbers both to the law and to their obligations as citizens.

Great improvements have been made in this branch of the service: and the least of the advantages of the better administration is that we are annually collecting from passengers at the port of New York alone about four times as much duties as before. The percentage of increase is equally large at the port of Boston. Previously these collections were \$470,000 for the year and are now running at the rate of \$1,800,000 per year. A much larger advantage of this better administration is in the restraint that has been placed upon professional and nonprofessional smuggling through passengers' baggage, including the breaking up of the sleeper-trunk frauds. And greater than all other of these advantages is the increased morale throughout the service due to the introduction of improved methods, standards and organization in this influential and conspicuous branch of it. The personnel, standards and methods not only of the inspectors' service but equally those of the weighers and gaugers' service, where so much fraud had centered, have been greatly improved. And generally important advances have been made in the rehabilitation of the entire service in the offices of the collectors and surveyors of the port. Advances have been made, too, in the appraising department, especially in the work on the passenger docks. But much remoins to be done in this extremely important branch of the work. Various, I may even say numerous, import lines have been and are under investigation; and the amount of laxity and dishonesty that has crept into the import business through undervaluations is astonishing, not to say appalling; and is keeping the department greatly occupied and is requiring much assistance from the Department of Justice. The results and the outlook are nevertheless encouraging; and there is every prospect not only of clearing up and punishing the smuggling and undervaluation but of completing such a rehabilitation of the customs service, both in New York and throughout the country, as will reestablish the honorable and efficient character of the service itself and increase the very large sums—the many millions of dollars—which are already coming into the Treasury from improved operation.

$Appropriations \ for \ rewards.$

We are being greatly aided by success and by the increasing public impression that the Government is in earnest and means to complete its work. Persons are more and more disposed to offer help in the discovery of frauds; and in this connection I should like to call the attention of Congress to the handicap of the very small appropriation of \$25,000 for the payment of those within or without the department who render voluntary assistance. I should very much like to have this appropriation increased to at least \$100,000. And it would be of great assistance if the Secretary of the Treasury were permitted a larger discretion than the law at present allows with respect to payments to persons furnishing information from outside the department.

Politics reduced.

The progress made in the rehabilitation of the customs service at New York has been marked by a very decided elimination of the political and spoils influences to which I attributed, in my last report, much of the demoralization that was found there. It would not be true by any means to say that these injurious influences have been entirely removed, but the situation has been greatly improved. The seriousness of the case has been recognized on all hands; and the chief political authorities have recognized the impossibility of putting this service where it belongs without the elimination of political influences from its management and operation. decided progress at the port of New York has influenced, more or less, the customs service at large—leading to the impression that the standards being established there would sooner or later have to prevail at all the other ports. There has been this quite general recognition of a new epoch; and it has resulted in a closer and more exclusive interest on the part of the customs officials in the administration of their offices and a diminished interest in practical politics.

THE CLASSIFIED SERVICE.

Anyone, however, who comes close to the practical administration of the Federal Government—or of any other government—soon becomes aware that everything ultimate or final in the excellence of administration must wait upon the complete inclusion of all nonpolitical offices within the classified service, and that progress in the administration meanwhile will materially depend upon the broadening of that service. The frequent presidential extensions

of the classified service to include more and more of the positions within the control of the Executive—including the important extensions by President Taft—have practically exhausted the exclusive opportunities of the President, and enlargement will hereafter be a matter for the cooperation of Congress with the President. But there is no reason why the purely administrative offices which require confirmation should be differentiated in respect to the classified service from like offices that do not require confirmation. The Auditors of the Treasury Department, for example, as I said in my last report, ought on every account to be included in the classified service.

Deputy auditorships do not need to be classified. They ought to be abolished. They are unnecessary and a mere fifth wheel. The department does not include them this year in its estimates. Of course, it is the right of Congress to make these appropriations if it sees fit, and to continue these positions. But the money would be wasted.

And among the presidential offices which should be put first and at once in the classified service are those of assistant appraisers in the customs service. And until these assistant appraisers are so included and taken out of politics, it will be necessary to the introduction of absolutely necessary reforms in the appraising service to detach, by administrative act, every assistant appraiser from all touch and association with practical politics. Some authorities highly experienced in the work of appraising as now carried on are of the opinion that the assistant appraisers should be abolished—pulled up root and branch. These people are hopeless of any good coming out of them. I do not agree with this, however. I think the assistant appraisers are a very necessary part of the organization and that the remedy is to make them what they should be. And while they can be and will be temporarily made what they should be by administrative act there will be no permanent reform, where they are concerned, until Congress arranges to put them in the classified service.

IMPROVED CLASSIFIED SYSTEM.

It is not alone necessary, however, to include these purely administrative officials in the classified service; but the workings of the classified service system itself should be restudied and advanced, both as to the way in which people enter the service and as to the way in which they are promoted or demoted and generally managed after they are in. The system has been so honestly administered, and with such faithful and loyal intention, that it has met with general acceptance and favor. It can, however, be advanced; and the classified service can, in my judgment, be made still more useful.

CIVIL-SERVICE RETIREMENT.

I now beg to refer, as I did last year, to another requisite—another absolute requisite—of a satisfactory service. There is no practical way to put the government service properly on its feet without a fair and just method of civil-service retirement. This is not only a requisite; it is a prerequisite; and unless Congress shall give the Executive this necessary method of improving the service the country must accept a service that is not fully satisfactory and which can not be made fully satisfactory

Fortunately this retiring provision can be made—and this is mathematically demonstrable—without the expense of one dollar to the Government. The contributory system of retiring allowances is not only the only system that has any chance whatever of being adopted but it fortunately is the best system by far for the men and women of the service; and it is, therefore, the part of wisdom for all the friends of this movement to concentrate upon this method. course, there must be paid by the Government the retiring allowances until the contributions by the members of the service have become sufficient to take care of the payments; but these preliminary payments by the Government need not cost the Government anything whatever. All of the executive departments which have so far been consulted stand ready to carry out such a law without asking any addition whatever to their ordinary appropriations. The objection, therefore, that we might be introducing another pension roll, has no justification. It had complete justification as long as the straight pension was in contemplation. The contributory allowance, however, is an entirely different matter and eliminates this objection altogether. The Government, therefore, can without any expense to itself, and by the mere passing of a law, set this whole matter right. It is only necessary to mention two things about the contributory plan, as contrasted with the pension plan, to make clear its advantages to the people in the service. It could never be taken as an answer to a claim for increased pay. It is a contribution of their own and not a contribution of the Government, and it is in no sense an estoppel of any argument in favor of increased pay at any time during its operation. On the other hand, a straight pension paid by the Government would always be taken as an additional salary and would perpetually have a tendency to estop any argument for increased compensation. The other consideration is that under a pension system a man must not only live beyond the retiring age but he must continue always in the service until that period in order to receive any pension at all; whereas, under the contributory system, under all the accidents of life, he gets what belongs to him of the savings of the system. It is impossible not to regard a straight pension as a

part of the salary and if a man loses it altogether, owing to the accidents of life, he loses a part of his aggregate salary.

The Treasury Department is engaged in the work of increasing its efficiency and diminishing the relative expense of operation. It has made considerable progress but has not nearly reached the end. At least four hundred positions have been abolished. So far we have been able to take care of all of the displaced employees, except in the case of the mint at Philadelphia and in other offices outside of Washington and New York, where, in the nature of the case, there were no lopportunities for transfer. We have succeeded in transferring those who were displaced to places becoming vacant in the normal way; such vacancies having been allowed to accumulate by temporary appointments. Whether it will be possible to continue to take care in this way of the employees whose positions we are abolishing I do not know. But this is clear, that any successful effort to improve the administrative operations of a large department like the Treasury is immediately handicapped and might well be discouraged entirely by the absence of a just method of retirement. And even when it is possible to protect these displaced clerks from being thrown into the streets it is done, in many cases, in denial of the right of an office to efficient help. Working in these improvements brings constantly to mind the hopelessness of ever arriving at a complete state of efficiency without a way of retiring clerks in a just and humane manner. I have no doubt that this very discouraging feature has in the past stood in the way of many attempts to improve the efficiency and economize the expense of operation in the departments.

LIFE-SAVING SERVICE.

The opposition to the creation of a civil pension system generally is alone responsible for the refusal to yield to the widespread sentiment in favor of providing a retirement feature for the field force of the Life-Saving Service. We hesitate to supply an entering wedge. The specially hazardous nature of their undertaking entitles those men of the life-saving corps who perform meritorious service to an acknowledgment by the Government of an obligation that is not less binding, and ought not to be less generous, than that admitted to the Army and the Navy.

Convinced of the physical deterioration in the corps in consequence of the difficulty in attracting new material, and of the refusal of humane superior officers to discard men whose heroic achievements are the inspiration of their fellows, I sent an argument on the subject to the appropriate committees of Congress, on May 5, 1910, concluding with a plea for legislation in the interest of the men of this

service which would relieve them of the ever-present disheartening apprehension of ending their days in want. I now renew that appeal and quote from my letter the following paragraph:

Living in isolation, exposed to the severest storms, meeting by annual tests the inflexible demands of the department as to physical fitness, accepting a compulsory leave of absence from two to four months in every year without pay, doing deeds of daring always at the expense of comfort and very frequently of health or life, submitting to an immensely narrower sphere than their fellows, in these regards—in renunciation, in courage, in constancy—these men render service that is unapproachable, and they are neglected to a degree unsuspected by our people.

EFFICIENCY AND ECONOMY.

Among the changes in the Treasury Department in Washington is the elimination of the issue division of the Treasurer's office. The double printing of the Government notes, first in the Bureau of Engraving and Printing and again in the Treasury building, has in this way been stopped. Unnecessary countings of these notes have been in consequence cut out. Numerous and expensive counts of the distinctive note paper and the nondistinctive paper used for stamps have been done away with; and all this paper has been removed from the Treasury building to the Bureau of Engraving and Printing where it is used; and the amount of the stock has been reduced to the needs of manufacturing. A businesslike handling of all this paper has been established; and the printing, under the greatly improved methods suggested and carried out by the Director of the Bureau, is a large part of the completed improvement. We have established the cancellation at all of the subtreasuries of the notes sent from them to Washington for redemption; and they are now sent by registered mail as merchandise without value instead of being sent by express as money.

The office of the Auditor for the Post-Office Department has been greatly simplified and rendered greatly more efficient, at a largely reduced cost, by the active and efficient initiative and cooperation of the auditor. It is the intention to thoroughly investigate and similarly improve the other auditors' offices. These investigations are under way. Everything in an auditor's office, however, and in every other great government office, depends largely upon its chief. And unless the Auditors of the Treasury Department, pending their inclusion in the classified service, can be appointed on the ground of their fitness and without making political considerations primary, the auditing will continue to be very costly to the Government. If by getting the right man as auditor you can both have the work done with the promptness and effectiveness that helps many of the other operations of the Government and can save, say, \$100,000 a year, it is easy to see what an expensive thing it is every time you put the

wrong man in this right place. The inquiries so far made into the auditing offices have led our committee of Treasury experts to surmise, and to practically conclude, that to make the Government auditing all it should be, and to bring it all under one system, all the offices should be under the general management of one auditor-in-chief. But I shall be able to make recommendations when our inquiries are completed, generally considering the whole auditing system; and to include in these, I hope, suggestions for the close incorporation of all naval offices with this system.

Alterations in the Treasury building.

The alterations in the Treasury building authorized by Congress, which are now being carried out, will greatly aid the modernizing of our methods. We have already converted the top story from a dangerous fire risk and a largely useless and unsightly space into conditions of attractive and important occupation. Available space has been further increased by constructing and reconstructing spaces under the ground on three sides of the building for storage and for files. The eastern steps, which have been such a defect to that otherwise wonderful front, have been replaced by a street-level entrance for those working in the department. A new system of elevators is being installed at that point for proper convenience. Many adjustments are being introduced to enable the rearrangement and association of related offices for greater efficiency and greater protection. This rearrangement will become general throughout the building on approved principles of office organization. And a competent project of protection for the Treasury building will be carried in various ways to a completion that, strange to say, has not even been attempted before.

Chief clerk and disbursing clerk.

The reorganization of the chief clerk's office and its recall from duties that were not chief clerk's duties and which prevented the Treasury Department having a chief clerk at all, though it is almost the most necessary office in any department, are adding greatly to the facilities of the department and increasing its economies.

The consolidation of the disbursing offices is another change making for efficiency and economy.

Investigations by special committees

Formal investigations by selected small committees of Treasury experts under the direction of a general committee are carrying further the investigations we have been making throughout all the Washington offices; and we are beginning similar investigations

65872°-------2

outside of Washington. The outside expert accountants who have given so much valuable aid to the department have completed their work for the present.

We are making special examinations of various ports by specially selected committees from the special agents service. The custom-ary examination of the ports by the special agents force had generally lapsed, and in resuming these examinations they have been made much more elaborate.

Special agents.

The special agents force itself is one of the most important in the Government. It is of especial importance to the Secretary of the Treasury, as it constitutes his opportunity to keep independently informed with regard to the operations of the customs service. regret to say that this service, composed of special agents and customs agents, has not been of late years, and is not now, at a high state of efficiency; and notwithstanding considerable improvement during the last year, it stands in need of radical rehabilitation and of much development. There has recently been appointed to the head of this service the chief of the secret service who is now chief of both the special agents service and of the secret service with experienced assistants in each. These two services are not connected, of course; and the fact that one man is chief of both will, I think, produce favorable results. The special agents service is not a detective service, but there is constant need of secret-service work in the customs department, as the notorious fraud developments have made clear. Congress at the last session gave me permission to use three secretservice men in any part of the Treasury Department. I hope it will now go a step further and enable the Secretary of the Treasury to use any of the secret-service men within the limits of the Treasury Department. It is only necessary to realize the amount of smuggling and undervaluation in the customs service to see that the Treasury Department is in absolute need of every agency it has within its own department, to say the least. And as no harm can come from affording these facilities to the Secretary in whose department the secret service belongs, and as such great necessity exists for the use of this service by the Secretary of the Treasury outside of counterfeiting, I sincerely hope Congress will not refuse the privilege of using it wherever within the Treasury Department it may be required.

I also request that the limitation upon the number of special agents of the Treasury Department who can be stationed in Washington may be raised in order that in the reorganization of that force provision may be made for a standing committee of expert examiners formed out of the force itself, and to give greater pliability and adaptability to the service.

Extent of possible economies.

The popular impression as to the extent of possible economies in the administration of the executive departments is singularly exaggerated, and this misconception is very harmful. When the public expects that the Government can save \$300,000,000 a year, such small, laborious savings as can be made in the executive departments hardly seem worth while. And it is astonishing that under such circumstances interest in these comparatively small savings can be maintained. These savings can only be disappointing to the public who have such figures as \$300,000,000 in mind; and they can not receive any popular credit, for they can only seem to be small triflings with great things. And yet they can only be produced by laborious, painstaking, and persistent methods and devotion.

When it is the fact that the entire ordinary expenditures of the Government last year were less than \$660,000,000, and when a great part of those expenditures is not reducible at all, as, for example, the interest on the debt, and the pensions, one can readily see that there probably is not very much more than \$300,000,000 gross left on which to save \$300,000,000. Now, to effect a saving of \$300,000,000 when the whole expenditure amenable to any saving is \$300,000,000 is, of course, not easy. I appeal to the sense of proportion of Congress and the American people; for it is very important to have these impressions corrected in order that there may be some encouragement given to those men scattered through the departments who want to bring about all the improvement possible.

Superfluous custom-houses, mints and assay offices.

There can be very important savings undoubtedly. When you can save on a particular thing, or in a combination of things, \$100,000 a year, that is very well worth doing even if it is not a million or ten millions or a hundred millions; and there are plenty of ways of saving very considerable sums. One additional way in the Treasury Department would be by the elimination of a large number of customs ports that are of no use under the sun; and of some of the assay offices and mints that perform no service whatever. I shall submit to the committees of Congress a list of customs-houses that the Treasury Department would be much better off without.

The mint and assay service has been considerably relieved during the last year and a half, and very considerable savings have been effected. The Treasury Department is still, however, encumbered by an oversupply of these offices. Most of the assay offices are superfluous and even the three supposedly active mints at Philadelphia, Denver, and San Francisco can not be kept fully employed. The expense of the mint at New Orleans has been greatly cut down, and what is left of it is not justified.

Public buildings.

Savings in the matter of public buildings are beyond the control of the Treasury Department, except in so far as it can reduce the cost of operating the Supervising Architect's office-a subject which has been engaging the department's attention. The Supervising Architect's office, however, looks like a small matter in comparison with the amounts expended on public buildings. no means opposed to a liberal public building policy. I think it is quite right for the Government to occupy its own buildings whereever the need of an entire building exists—if they are of good enough architecture to build. And it is my hope to see during this administration another distinct advance in the artistic character of all the buildings, small and large, that the Government erects. The Government has the opportunity, and it has the duty, of aiding the architectural standards throughout the country. The artistic influence of a government building of high-class architecture is a great asset and should be conserved. This does not mean that all public buildings should be expensive. It certainly does not mean that a beautiful building is any more expensive than an ugly building. is the lines and proportions of a building—it is the knowledge that goes into its design—that makes for beauty and art. It is not the money. But while I take this interest in public building, I think these buildings should not be authorized except from consideration for the Government's needs. They ought not to be put up merely to gratify a community. I do not mean that the wishes of the people of a locality should not be consulted and I do not mean that they should not be pleased as far as it is possible to please them consistently with the Government's interest and the interest of good architecture. I do maintain, however, that the authorization of a public building should be made from the point of view of the Government and not from the point of view of a locality.

CENTRAL POWER PLANT.

The Congress has authorized the erection of four buildings along the eastern boundary line of the White Lot for the Departments of State, Justice, and Commerce and Labor, and the Bureau of Engraving and Printing. The aggregate limit of cost is \$10,000,000. The plans and specifications of the Bureau building are in the hands of professional estimators and will be released to competing contractors immediately; an architectural competition is being conducted in the case of the proposed homes for the three departments. Hence these four important building projects have been launched and the problem of supplying heat and power and light is pressing for solution.

I recommend to the Congress the establishment of a central power station at a point convenient to the present Bureau of Engraving and Printing. The practicability and economy of such a course have been determined. I am of the opinion that it is feasible and desirable, in making provision to serve the four projected buildings, to extend the service to such existing government buildings as may be supplied economically within the operating zone of the proposed power plant. It is estimated that the segregated heating and power plants in the dozen buildings of the executive group, adjacent to the White Lot and Mall, contain 85 boilers. These consume about 35,000 tons of coal annually and require the attention of 190 employees. The aggregate rating of the engines and other mechanisms is 3,500 horsepower. With the four new buildings in commission, it is probable that the equipment will increase 25 or 30 per cent.

It is possible by the concentration of the units of expense in a highly efficient plant, operated under competent direction, to secure unification of design and effect a material saving. At present there are heterogeneous requirements and installations, a heavy annual cost attending purchased lighting service, scattered locations of boilers throughout the independent buildings, resulting in the absence of continuous competent supervision, the transportation of fuel by stevedores, whereas it should be automatically delivered from cars to storage bins, the expense incident to the removal of ashes, and the occupancy by machinery and fuel of 600,000 cubic feet of valuable space in the department buildings. If the existing department buildings could enjoy practical freedom from smoke, noise and heat, and if the space now occupied by the machinery and fuel could be assigned to offices or converted into receptacles for archives, some rented buildings in the District of Columbia could be surrendered. I am of the opinion that the Congress could, with advantage, at once empower a department or a commission to design for the four department buildings a central power plant capable of indefinite progressive construction, and report to Congress an estimate of the amount required to extend the service to the existing buildings of the executive group.

MINOR INCREASES.

In considering efficiency and economy it must not be overlooked that these are not represented exclusively by reduction in appropriations. Economy and efficiency do not mean that in every case where there is a change the change shall be a reduction. There are undoubtedly many instances where the interests of the Government and the interests of efficiency in government require increases. It is true, in my judgment, that a large number of the salaries of the

people of such importance in the department that the effective work of the department must largely depend upon them should be raised. It is of extreme importance to the Government that it should constantly improve the individual rank and importance of the members of the permanent executive staff. The permanent staff of the Treasury Department deserves and needs men of high qualities and abilities, and to secure these men and retain them the salaries must be in some manner related to the qualities demanded. I feel the great importance of this consideration; and in the very midst and in the thickest atmosphere of the movement for reductions and economies, I feel that the interests of the Government are deeply involved in the question of a wise discrimination with respect to the salaries of these chief men.

THE BUDGET IDEA.

There was a promise in the air a year ago, to which I made reference in my annual report, of an organized coordination of appropriation bills among themselves, and of revenue estimates and other estimates with appropriation bills, and of an organized cooperation between the executive and the legislative departments, with a view to securing as far as possible the advantages other governments enjoy by reason of the budget system. I regret to say that the movement has not as yet gone far.

The expectation, therefore, that we were making progress toward such correlation of the separate appropriation bills as would make the appropriations of Congress practically one bill, has not yet been justified. Each executive department has held down or reduced its estimates under the direction or inspiration of the President, and phenomenal results on this line have been achieved. There has been, however, no permanent system of new control or new study of the relations of outgo and income established. That seemingly is impossible without full and established cooperation between the legislative and executive departments. As long as the system remains as it is, with the responsibilities for estimates and appropriations divided into as many atoms as there are executive departments and independent establishments and appropriating committees of Congress, there can be no permanent reform. The question of the expenditures of a great government like ours is altogether too large and too complex to be scientifically handled by anything but a thoroughly organized responsibility which shall represent both the legislative and executive departments. It would seem that there must be formed some kind of a budget board, or budget committee, representative of the two departments of government, which shall make the necessary studies and recommendations.

THE OLEOMARGARINE LAW.

There is a source of revenue awaiting the adoption of Congress and amounting to probably \$2,000,000 a year, which would be a mere incident to the correction of a serious moral and economic condition, brought about by the failure of the present oleomargarine law. That law imposes a tax of 10 cents a pound on oleomargarine artificially colored, and one-quarter of 1 cent a pound on oleomargarine not artificially colored. The primary object of the law was to protect butter from the competition of an article that would resemble butter and be sold for it, and not for what it was. The extraordinary tax of 10 cents a pound was meant to equalize the difference between the cost of oleomargarine and the cost of butter; so as to prevent the sale of colored oleomargarine. It was taken for granted that, under this law, all the oleomargarine would be produced without color and could not be sold for butter.

The result as a revenue measure has been that the Government has not received from the tax much more than it has cost to make an unsatisfactory attempt to enforce a law that could not be enforced except here and there. Practically all of the oleomargarine produced has paid tax as an uncolored product at one-quarter of 1 cent per pound; and a large portion of this, after being artifically colored by a very simple and inexpensive process, has been fraudulently sold as butter. The law has therefore failed completely to protect the butter makers. It has raised up for them, indeed, a greatly aggravated competition.

The failure of the law to do anything but harm to the butter interests is, however, by no means the worst it has done. Its worst offense is that it has engendered and encouraged a large and very widespread and growing fraudulent traffic. It encourages so easy a fraud, and one so extremely profitable, that the law is a constant invitation to large numbers of people to become dishonest. The moonshiner needs a plant that costs practically nothing; and the cost of the coloring matter is practically nothing. The labor required to color the oleomargarine is of the lightest.

It is the size of the temptation, due to the mistaken policy of the law in making these two taxes, that is significant. If, therefore, in accordance with the plan that is now so widely accepted, a tax of 2 cents should be placed on oleomargarine, colored or uncolored, with simple and easy provisions already well understood by which oleomargarine would be sold as oleomargarine and not as butter, Congress would convert an unprofitable revenue into a profitable one, destroy a fraudulent competition for the butter makers, give the willing consumer of oleomargarine a cheap and wholesome food product, and

clean out and disinfect a wide circle of business corruption for which this law of the Federal Government is directly responsible.

These views have grown from the experience of the Treasury Department alone, and have not had the consideration of the Administration.

PUBLIC-HEALTH SERVICE.

Whatever action may be taken by Congress now or hereafter with regard to the proposal of associating other bureaus of the Government with the Public Health and Marine-Hospital Service, it is quite clear that the usefulness of this service along the lines of sanitation and public health should be continuously developed. This service has been greatly developed under the encouragement of Congress and this development should not be interrupted. The service is in a condition to rapidly increase its usefulness and its value to the nation both on its research side and on the side of its administration. should be placed by Congress where it can compete for its personnel with the other institutions of the country which create such an active competition for the strong men in the professional lines it includes. It is of great consequence to the nation that this service should continue to be manned as ably as possible. These are considerations entirely detached from the question of the organization of a department of health, or the bringing together of various bureaus of the Government. The continuous important development of the present service would still be as necessary under a new association of bureaus as it is now; and development now would not in any way concern these other questions of organization.

REVENUE-CUTTER SCHOOL.

During the past summer the Treasury Department acquired possession of Fort Trumbull at New London, Conn., which the War Department had recently abandoned. The buildings are being transformed into a school of instruction for the Revenue-Cutter Service. The practice ship *Itasca* and fifty cadets have been transferred to the new station. This has enabled the department to gratify a cherished ambition of the service to enlarge and improve its facilities for instruction and extend its curriculum, and thus tone up its personnel. The long and creditable record of this well-disciplined service is secure in the hands of men of the right spirit, who are justly proud of the worthy traditions of the service.

CONTINGENT FUND.

The contingent fund which I asked for a year ago as giving sufficient freedom of action on the part of the Secretary of the Treasury to be consistent with the importance of his administrative duties, and which was granted by the Congress, has proved to be very useful to the service; and has enabled me to carry on improvements of importance that could not have been otherwise undertaken; and which have already produced savings that will be perpetual, repeating themselves annually.

BONDING OF OFFICIALS.

There will be proposals made to Congress for the revision of the bonding of certain financial officials, including the Treasurer and the assistant treasurers. The heads of these offices are heavily bonded, while no provision is made for the bonding of their subordinates in whose hands the money is. This is a subject worthy of the attention of Congress.

ASSAY OFFICE AT NEW YORK.

The assay office in New York, whose building is being enlarged and practically rebuilt, is undergoing a general revision and a general reorganization of its operation along effective business lines.

TARIFF BOARD.

The Tariff Board is more than justifying the expectations that were entertained of its usefulness and its ability. We have at last arrived at the possibility of a scientific treatment of tariff legislation. We have arrived where the interests of all concerned—those of the manufacturer, those of the merchant, those of the consumer, and those of the Government—can receive fair, scientific, competent, and non-partisan consideration on the basis of reliable facts and knowledge. The trustworthy assistance this board can afford will soon enable Congress, whenever it is ready to legislate on the tariff, to proceed confidently.

FINANCES.

I have the honor to now call attention to the following statements showing receipts, disbursements, estimates, and the condition of the Treasury:

RECEIPTS AND DISBURSEMENTS.

Fiscal year 1910.

(See details in tables, pp. 31-35.)

The receipts and disbursements of the Government in the fiscal year ended June 30, 1910, were as follows:

ORDINARY RECEIPTS.

.... \$333, 683, 445. 03

I respectfully call your attention to the two further divisions of this report, to-wit: The condensed annual reports of the various bureaus and divisions of the Treasury Department, and the tables accompanying the report on the finances.

Franklin MacVeagh,
Secretary

To the Speaker of the House of Representatives.

Digitized for FRASER

ABSTRACTS OF REPORTS OF BUREAUS AND DIVISIONS.

The following is a summary of the reports of bureaus and divisions of the Treasury Department for the fiscal year ended June 30, 1910, with the exception that the figures in relation to public moneys and loans and currency are brought to November 1:

TREASURER OF THE UNITED STATES.

At the beginning of the fiscal year 1910 the Treasury was embarrassed by the continued excess of ordinary disbursements over receipts, an unfavorable market for the sale of bonds by which to provide funds for the construction of the Panama Canal, and the delay in the revision of the tariff. Under such conditions, with a reduced working balance, the disbursements were limited to the immediate needs of the public service until the income should be increased by the operation of the new tariff when enacted.

The ordinary receipts, by warrants, and adjustments for moneys received but not covered by warrants in the year, were \$675,511,715.02, an increase of \$71,922,225.18 over those of 1909, while the ordinary disbursements were \$659,705,391.08, a decrease of \$2,619,053.69, as shown by like comparison. The net result of ordinary transactions was a surplus of \$15,806,323.94, as against a deficit of \$58,754,954.93 in the preceding year.

It was not deemed advisable at any time during the last fiscal year to offer for sale United States bonds under provisions of existing law on the Panama Canal account. It became necessary, therefore, to advance from the general fund in the Treasury \$33,911,673.37 for disbursement in the construction of that public work.

The total amount expended on the purchase and construction of the canal to the close of the fiscal year 1910 was \$204,096,342.07, of which \$87,309,594.83 was from the proceeds of sales of bonds. The balance of \$116,786,747.24 was advanced from the general fund in the Treasury and is reimbursable from proceeds of bonds not yet sold.

Under existing laws the total amount of bonds authorized for the Panama Canal is \$375,200,980, of which \$84,631,980 had been issued to the close of the fiscal year 1910, leaving \$290,569,000 unissued.

The cash receipts on account of the public debt during the last fiscal year were \$31,674,292.50 in lawful money of the United States to

retire national-bank notes; the disbursements on account of principal of matured loans and fractional currency were \$760,925, and for national-bank notes canceled and retired \$32,288,770.50, a total disbursement for the public debt of \$33,049,695.50. The net result was a total excess of disbursements of \$1,375,403. The interest-bearing debt on June 30, 1910, was \$913,317,490, and the annual interest charge thereon \$21,275,602.40.

The balance of public moneys in depositary banks at the beginning of the year to the credit of the general fund was \$60,427,525.69, against which there was an unpaid call of \$24,954,000, payable by July 31. This balance became \$38,065,058.79 by the close of August, after which the variations therein were unimportant to the close of the fiscal year, when the balance in such banks was \$40,631,589.58.

The trust funds at the close of the fiscal year 1910 aggregated \$1,355,725,869, a net increase of \$14,345,000 as compared with those of 1909. The gold coin increased \$10,185,000 and the silver dollars \$4,160,000. These funds are held for the redemption of the certificates and notes outstanding, for which they are respectively pledged.

The presentation of national-bank notes for redemption attained a maximum at \$502,498,994, equal to 70.98 per cent of the average amount of such notes outstanding during the year. Compared with 1909, there was an increase of \$40,976,792, or 8.88 per cent. The expenses incurred for such redemptions were \$434,093.10, which has been assessed on the banks at the rate of \$0.88066 per \$1,000 of notes redeemed.

The total monetary stock of the United States on June 30, 1910, was \$3,419,591,483, of which \$1,636,043,478 was gold. As compared with that of twelve months earlier, the net increase was \$13,263,129. The money in circulation on June 30, 1910, amounted to \$3,102,355,605, a per capita of \$34.33. The percentage of gold to total circulation was 44.91.

The notes and certificates of United States paper currency issued during the last fiscal year numbered 240,990,922 pieces of the total value of \$767,115,600. The redemptions were 216,173,273 pieces, of the value of \$752,620,600. The average cost of each piece of United States paper currency issued and redeemed is about 1.571 cents, and the annual cost of maintenance of the currency issued by the National Government averages about one-fifth of 1 per cent of the amount outstanding.

There is constant demand for small denominations of currency, which the Treasury can only partially supply through the process of redemption and reissue. The volume of gold certificates, restricted in denominations to \$10 and above, is greater than that of any other kind of paper money in circulation. Large amounts of this currency are sent to the Treasury for redemption, with requests for a part of

the returns in denominations of \$5. It appears, therefore, that there are good reasons for the issue of a \$5 gold certificate. Such an issue will enable the Treasury to respond more fully to the demands for small denominations of currency.

The United States bonds pledged as security for the circulating notes of the national banks took on a growth of \$26,285,810 during the past fiscal year, and at its close amounted to \$686,974,880. The bonds pledged to secure the public deposits in national banks amounted to \$51,774,700 on June 30, 1910.

The standard silver dollars in circulation on June 30, 1910, amounted to \$72,432,514, as against \$71,987,900 for the corresponding period in 1909. The amount of these coins shipped to depositors therefor at the expense of the consignee for transportation during the last fiscal year was \$14,384,734, as against like shipments of \$11,865,180 in 1909.

The amount of subsidiary silver coin shipped to depositors therefor at government expense for transportation during the fiscal year 1910 was \$43,977,039.70. The average rate for transportation was \$1.92 per \$1,000. In future, the distribution of these coins to depositors therefor will be at the expense of the consignee for transportation charges.

United States notes to the amount of \$11,695,012, and Treasury notes for \$9,880 were redeemed in gold from the reserve fund during the last fiscal year. The redeemed notes were immediately exchanged for gold, and the reserve was thus kept intact.

The Treasury holdings of gold amounted to \$1,045,165,485.24 at the close of the fiscal year 1910, and set apart for the respective uses it was held on the following accounts: Reserve fund, \$150,000,000; trust funds (for the redemption of gold certificates in actual circulation), \$802,754,199, and in general fund (belonging to Treasury), \$92,411,286.24. This is not the maximum holdings in our annals, however, but more than is held under single control elsewhere in the world.

The available balance in the Treasury at the beginning of the fiscal year was \$126,375,428.10. The excess of all disbursements over all receipts for the first half of the year reduced the balance to \$77,085,536.92 by January 25, 1910, but a reversal of such conditions in the later months carried the balance upward, and at the close of the year it was \$106,894,675.67, a net decrease of \$19,480,752.43 during the year.

District of Columbia.

The net expenditures on account of the District of Columbia for the fiscal year 1910, by warrants paid, were \$11,650,496.50.

The net revenues deposited in the Treasury by warrants on this account for the same period were \$7,409,693.33.

The amount of the funded debt retired during the year was \$622,050, reducing the annual interest charge by \$22,704.82.

The total issue of the 3.65 per cent bonds is limited by law to \$15,000,000, and of this sum \$14,997,300 has now been issued. The bonded debt outstanding June 30, 1910, consists of \$9,492,100 bonds bearing 3.65 per cent interest.

At the close of the fiscal year 1910 the 10 per cent guaranty fund retained from District contractors amounted to \$255,915.70, and is represented by \$175,210 in bonds purchased at the request and risk of the contractors and \$70,344.29 uninvested cash.

Detailed information in regard to the affairs of the District of Columbia will be found in the reports of the District Commissioners and the Treasurer of the United States, ex officio commissioner of the sinking fund of the District of Columbia.

COMPTROLLER OF THE CURRENCY.

Charters were issued during the fiscal year to 337 national banking associations, with authorized capital of \$30,115,000, and included in the number were 69 conversions of state banks, 65 reorganizations of state and private banks, and 203 associations of primary organization. In the same period 125 banks were closed, of which 120 were placed in voluntary liquidation by the shareholders. Generally these banks were placed in voluntary liquidation for the purpose of reorganizing or transferring their business to other national or state banks, as 54 banks were absorbed by or reorganized as state banks, 42 absorbed by other national banks, 5 reorganized as national banks. and 19 discontinued business. In the banks liquidated are included three associations, the corporate existence of which expired by limitation. Over one-third of the banks that liquidated were located in the States of Kansas, Oklahoma, and Texas, wherein state bank guaranty laws are in operation. Of the 9 banks that liquidated in the State of Kansas, 6 were succeeded by state institutions and 3 were absorbed by other national banks. In Texas 8 of the 16 liquidated banks were succeeded by state institutions, 5 were absorbed by other national banks, and 3 liquidated to discontinue business. the 19 banks liquidated in Oklahoma, 13 were succeeded by state banks, 3 were absorbed by national banks, and 3 discontinued business.

While receivers were appointed for 7 banks, there were but three failures during the year, the capital of the three at date of closing being \$250,000, and the aggregate liabilities to depositors and other creditors, exclusive of liability on circulation, \$1,166,019. Two of the 3 failed banks have paid dividends, one at the rate of 35 per cent and the other 60 per cent. In two instances receivers were discharged,

evidence being submitted of the ability of the banks to pay their creditors in full. In one of these cases the bank resumed business, and in the other voluntary liquidation was effected for the purpose of settling the bank's affairs. The two other receiverships were of banks heretofore placed in voluntary liquidation. In one instance it was deemed advisable to appoint a receiver for the purpose of enforcing a certain liability of the directors and forestall the appointment of a receiver by the state court; and in the other a receiver was appointed to enforce the stock liability by reason of the existence of an unsatisfied judgment.

On March 14, 1900, there were in active operation 3,617 national banks, and from that date to July 1, 1910, 4,539 associations, with capital of \$284,173,300, were authorized to begin business. this period, and under authority of the act of March 14, 1900, 2,907 banks, with capital of \$75,705,500, were authorized to begin business. These banks generally were incorporated with the minimum capitalnamely, \$25,000—but by reason of the organization of a few with capital exceeding that amount, but less than \$50,000, the average capital of the banks organized under this act was \$26,042. remaining banks organized during this period-namely, 1,632, with capital of \$208,467,800—were incorporated under the act of 1864. Further subdividing the organizations, it is shown that of the 4,539 banks chartered, 634, with capital of \$49.325,800, were conversions of state banks; 1,386, with capital of \$91,052,000, reorganizations of state and private banks; and 2,519, with capital of \$143,795,500, primary organizations. The aggregate capital of the converted and reorganized state and private banks equaled, approximately, the capital of the banks of primary organization.

On June 30, 1910, there were in existence 7,170 national banking associations, with authorized capital of \$1,000,070,135. During the life of the system 456 banks were organized under the act of 1863, 6,430 under the act of 1864, 10 under the act of 1870, and the remainder, 2,907, under the act of 1900, making 9,803 banks chartered under these various acts.

Including with the 515 banks for which receivers were appointed the number subsequently restored to solvency and permitted to resume business or liquidate, receiverships equal 5.2 per cent of the total number of national banks chartered. The percentage of voluntary liquidations is 21.8, and the banks in active operation represent 73.1 per cent of the total number chartered.

Comparing conditions on March 14, 1900, with those on June 30, 1910, it appears that there has been a net increase in the number of banks in operation of 3,553, and in authorized capital of \$383,762,040. The outstanding circulation of the banks increased during this period

from \$254,402,730 to \$713,430,733, or an increase of \$459,028,003. Circulation secured by bonds and by lawful money (the latter deposited by banks going into voluntary liquidation, those reducing their circulation, and on account of insolvent national banks) reached the maximum on April 30, 1910, when it amounted to \$713,461,586, but the maximum outstanding on the security of bonds alone was reached on June 30, 1910, when it amounted to \$685,517,013. During the current fiscal year, the bond-secured circulation increased \$25,843,605, or from \$659,673,408 to \$685,517,013. At the close of business on June 30 last the amount of circulation secured by deposits of lawful money was less by \$2,332,946 than at the close of the prior year, the result being a net increase during the year of circulation secured by bonds and by lawful money of \$23,510,659.

The number and capital of national banks organized since March 14, 1900, by states and geographical divisions, together with the number and paid-in capital stock of national banks on June 30, 1910, appear in the table following:

SUMMARY, BY STATES, GEOGRAPHICAL DIVISIONS, AND CLASSES, OF NATIONAL BANKS ORGANIZED FROM MARCH 14, 1900, TO JUNE 30, 1910, AND THE PAID-IN CAPITAL STOCK OF ALL REPORTING NATIONAL BANKS ON JUNE 30, 1910.

65872°--- FI 1910-----4

The number of banks and the bond and circulation accounts on March 14, 1900, and June 30, 1910, together with the increase between those periods, are shown in the accompanying table:

	Mar. 14, 1900.	June 30, 1909.	June 30, 1910.	Increase 1900 to 1910.	Increase 1909 to 1910.
Number of banks	\$616,308,095 \$244,611,570 \$216,374,795	6,955 \$947,726,775 \$660,689,070 \$659,673,408 \$30,246,666 \$689,920,074	7,170 \$1,000,070,135 \$686,974,880 \$685,517,013 \$27,913,720 \$713,430,733	3,553 \$383,762,040 \$442,363,310 \$469,142,218 a \$10,114,215 \$459,028,003	215 \$52,343,360 \$26,285,810 \$25,843,605 \$2,332,946 \$23,510,659

a Decrease.

In connection with the statistics hereinbefore submitted in relation to the organization, capital, and circulation of national banks since 1900, it is of interest to note the increase in the banking business generally, as evidenced by the reports of condition on February 13, 1900, the date of the call immediately preceding the legislation authorizing the incorporation of banks with a minimum capital of \$25,000, etc., and on June 30, 1910. The total assets of the banks increased during this period from \$4,674,910,713.09 to \$9,896,624,696.73; the loans from \$2,481,579,945.35 to \$5,430,159,186.75; paid-in capital stock from \$613,084,465 to \$989,567,114; the outstanding circulation from \$204,912,546 to \$675,632,565; and the volume of individual deposits from \$2,481,847,035.62 to \$5,287,216,312.20.

Comparing the returns of June 23, 1909, with those received for June 30, 1910, there was an increase in the number of reporting banks of 219; in loans and discounts, \$394,275,670.16. Investments in United States bonds increased to the extent of \$7,879,820. These increases in assets were attended with an increase in capital stock of \$52,563,078; surplus and other profits of \$54,332,774.04; circulation of \$34,320,283; and in individual deposits of \$388,639,616. The net increase in assets of the banks during the year is shown to have been \$424,892,033.37.

MINT SERVICE.

Deposits.

During the fiscal year ended June 30, 1910, the original deposits at the mints and assay offices contained 6,803,778 ounces of standard gold, of the value of \$126,767,970. Uncurrent domestic gold coin deposited for recoinage contained 193,669 standard ounces, the coining value of which was \$3,603,140 in new coin. The original deposits of silver contained 5,083,492 standard ounces, of which 2,551,151 were deposited for return in fine bars, the remainder being purchased in gold bullion. Uncurrent United States silver coin containing 609,802 standard ounces, having a value in new coin of \$758,696, was transferred from subtreasuries for recoinage.

Coinage.

During the fiscal year 1910 the domestic coinage manufactured by the mints at Philadelphia, San Francisco, and Denver aggregated 188,006,668 pieces, of the value of \$54,215,319. Of this amount, \$47,578,875 was gold and \$4,297,567 silver. The coinage of the 5-cent nickel pieces amounted to \$852,781.90 and the 1-cent bronze pieces amounted to \$1,486,095.29, making a total of minor coinage \$2,338,877.19, all of which has been duly accounted for, and the balance, after paying the expense of distribution, turned into the Treasury. The expense of distributing the minor coinage during the year was \$21,969.16, which amount was paid from the profits on such coinage.

No coinage was executed in the mint at New Orleans during the fiscal year 1910.

The mint at San Francisco coined for the government of the Philippine Islands during the fiscal year 1910, 7,574,758 pieces, consisting of 5,430,778.90 pesos in silver and 15,000 pesos in bronze 1-cent pieces.

There were manufactured in subsidiary silver coin during the year \$76,836.50, resulting from bullion from the melting of uncurrent coin transferred for recoinage, and \$4,220,730.75 were from bullion purchased under the provisions of section 3526, Revised Statutes.

Profits on subsidiary silver and minor coins.

The profits on the manufacture of subsidiary silver coin from purchased bullion during the year was \$2,468,685.09, and on the minor coinage \$1,875,505.38, all of which has been duly accounted for and paid into the Treasury.

Annual settlements.

The annual settlements made at the close of the fiscal year at the mints in Philadelphia, San Francisco, New Orleans, and Denver were satisfactory. The bullion and coin on hand in each of these institutions were weighed and counted, and the balances called for by the books found to be on hand. Owing to a contemplated change in the superintendency of the assay office at New York, the annual settlement of that institution was not made until July 31, 1910, when the bullion and coin on hand were weighed and counted and found to be correct.

Purchases.

Under the provisions of section 3526, Revised Statutes, there were purchased for the subsidiary silver coin during the year 2,336,256.76 fine ounces of silver at a cost of \$1,269,649.10, making the average price paid \$0.543 per ounce. The purchases consisted of silver con-

tained in gold deposits, mutilated silver coin, bar charges and fractions, and surplus bullion recovered by the operative officers. The total amount of silver purchased for the subsidiary silver coinage from July 1, 1906, to June 30, 1910, was 37,456,074.66 fine ounces, costing \$22,527,804.01, making the average price paid \$0.601. The balance of silver bullion on hand at the mints available for subsidiary silver coinage June 30, 1910, was 5,134,973.50 fine ounces, the coining value in subsidiary silver coin being \$7,098,632.80.

New York assay office.

The operations of the New York assay office are the same as those of the mints, with the exception that no coinage is executed. It is expected the new building for the refinery of the assay office at New York will be completed about the 1st of January, 1911, when the necessary machinery and appliances will be installed and parting and refining operations resumed. It will then be unnecessary to transport crude bullion to the mint at Philadelphia for refining, as is done at present.

Minor assay offices.

There are eight minor assay offices at which gold bullion is deposited and paid for as soon as the value is determined by melt and assay. The bullion is afterwards shipped by express to one of the coinage mints to be parted and refined and coined. The value of the gold deposits at the minor assay offices during the fiscal year 1910 amounted to \$18,629,287.19. The cost of maintaining these offices during the fiscal year (exclusive of transportation charges on bullion to the mints, which amounted to \$35,438.37) was \$123,767.45, while the earnings were \$37,980.51.

Earnings and expenditures.

The earnings and gains of the mint service during the fiscal year 1910 were as follows:

Charges for parting and refining	\$242, 249. 91
Charges for alloy	
Charges for assaying and stamping	23, 135. 8 9
Seigniorage on minor coinage	1, 914, 747. 88
Seigniorage on subsidiary coinage	2, 468, 685. 09
Seigniorage on recoinage of minor coins	2, 498. 35
Profits on medals and proof coins	3, 069. 99
Charges received for mounting, etc., medal fund account	249. 63
Charges for the manufacture of medals, etc	1, 979. 7 9
Deposit melting room grains and sweepings	26, 006. 88
Surplus bullion recovered by operative officers	40, 797. 53
Gain on bullion shipped to mints for coinage	4, 584. 98
Proceeds of sale of old material	3, 112. 49

Receipts from special assays of bullion ore	\$ 3, 434. 22
Receipts for manufacturing appliances for government and other insti-	
tutions	14, 142. 48
Charges received for coinage for Philippine government	60, 836. 81
Gain on light-weight United States gold coin for recoinage	220. 26
Bullion recovered from cleaning refinery pipes	1, 088. 45
Charges for treatment of deposit melting room sweeps	807. 88
Receipts from sale of by-products	41, 836. 82
Charges for the manufacture of proof gold and silver	98. 00
Amount received in excess of assay value of melter and refiner's sweeps	
sold	
Amount recovered on account of embezzlement	818. 77
Total earnings and gains	4, 869, 672. 54
The expenditures were as follows:	
The expenditures were as follows: Salaries of officers and clerks	\$225, 827. 67
Salaries of officers and clerks	
	788, 886. 19

Annual assay commission.

The commission designated by the President under the provisions of section 3547, Revised Statutes, to test the weight and fineness of the coins reserved at the different mints during the calendar year 1909 met at Philadelphia February 9, 1910, and reported that the coins examined complied with the law as to weight and fineness.

INTERNAL REVENUE.

The receipts from internal-revenue taxes for the fiscal year 1910, as shown by collectors' reports, were \$289,957,220.16, a net total increase of \$43,744,500.94 over the preceding fiscal year. This increase was from distilled spirits, tobacco, fermented liquors, oleomargarine, filled cheese, mixed flour, banks, bankers, miscellaneous, and special excise tax on corporations, as follows: Distilled spirits, \$13,161,277.42; tobacco, \$6,231,278.99; fermented liquors, \$3,115,877.12; oleomargarine, \$197,305.53; filled cheese, \$904.72; mixed flour, \$433.26; banks, bankers, etc., \$174.85; miscellaneous, \$79,175.33; special excise tax on corporations, \$20,959,783.74.

The total expenditures for the collection of the internal revenue, including expenses of the Internal Revenue Bureau in Washington, for the fiscal year 1910, were \$5,044,502.60. This does not include expenditures from the appropriation for "Withdrawal of denaturalized alcohol," which were \$131,048.25.

The cost of collecting \$1 of internal revenue was \$0.0174.

The following table is a comparative statement of receipts during the last two fiscal years. A more detailed statement will be found in the Annual Report of the Commissioner of Internal Revenue:

RECEIPTS FROM INTERNAL REVENUE IN 1909 AND 1910, AS SHOWN BY COLLECTORS' REPORTS.

	Fiscal ye	Fiscal year ended—		Decrease.
•	June 30, 1909.	June 30, 1910	Increase.	Decrease.
Distilled spirits	\$134,868,034.12	\$148,029,311.54	\$13, 161, 277, 42	
Manufactured tobacco	51,887,178.04		6,231,278.99	• • • • • • • • • • • • • • • • • • • •
Fermented liquors	57, 456, 411. 42		3,115,877.12 20,959,783.74	
Oleomargarine	902, 197. 31	1,099,502.84	197, 305, 53	
Filled cheese	1,942.61		904.72	
Mixed flour	2,618,04		433.26	
Adulterated butter	38, 450. 70			\$1,100.0
Process or renovated putter	122, 104. 73			610.0
Banks, bankers, etc		174.85		
Miscellaneous	933,722.23	b 1,012,897.56	79, 175. 33	
Total	246, 212, 719, 22	289, 957, 220, 16	43, 746, 210, 96	1,710.0

a Includes \$265,171.80 from sale of internal-revenue stamps affixed to Philippine products as provided for in the act of August 5, 1909.
δ Includes \$565,524.34 from playing-cards, \$434,705.95 from penalties, and \$12,667.27 from miscellaneous sources.

The total production of distilled spirits, exclusive of fruit brandies, was 156,237,526.4 taxable gallons, against 133,450,755.1 gallons in 1909, an increase of 22,786,771.3 gallons.

The production of fruit brandies increased 1,215,575.7 gallons.

During the fiscal year 1910, 906 distilleries of all kinds were operated, a decrease of 386.

The production of fermented liquors was 59,544,775 barrels, showing an increase of 3,180,415 barrels. There were removed from breweries for export free of tax 59,658 barrels.

BUREAU OF ENGRAVING AND PRINTING.

The amount appropriated by Congress for the Bureau of Engraving and Printing was \$3,860,154.80, and the repayments for services and materials furnished the several executive departments and bureaus were \$681,937.89, making the aggregate available for the work of the bureau during the year \$4,542,092.69. The expenditures were \$207,112.37 for salaries, \$1,637,792.36 for compensation of employees, \$1,834,784.57 for wages of plate printers and assistants,

and \$695,676.27 for materials and miscellaneous expenses, making an aggregate expenditure of \$4,375,365.57, and leaving unexpended \$166,727.12.

The work accomplished by the Bureau of Engraving and Printing during the fiscal year was greater than in any preceding year, the total number of sheets delivered being 252,710,864, or a net in crease of 13,305,141 sheets over the deliveries of the previous year. The deliveries comprised 58,803,600 sheets of United States notes and certificates, 26,000 sheets of registered bonds, 14,624,582 sheets of national-bank notes, 86,713,262 sheets of internal-revenue stamps, 345,000 sheets of customs stamps, 89,486,082 sheets of United States postage stamps, 283,879 sheets of postage stamps and postal cards for the Philippine Islands, 359,000 sheets of silver certificates and registered bonds for the Philippine Islands, 2,069,459 sheets of checks, drafts, etc., making an aggregate of 252,710,864 sheets. addition to these sheets delivered, miscellaneous work was executed to the value of \$112,716.82. The face value of all classes of securities, internal-revenue stamps, postage stamps, etc., delivered by the bureau amounted to \$1,956,000,433.

Compared with the deliveries in the previous fiscal year, there was an increase of 13.73 per cent in United States notes and certificates and bonds; 11.45 per cent in internal-revenue stamps; 3.24 per cent in postage stamps, and 1.79 per cent in checks, drafts, etc., and a decrease of 27.55 per cent in national-bank notes and 1 per cent in customs stamps, or a net increase of 5.56 per cent. The work of the fiscal year 1909 included, however, 13,100,961 sheets of emergency national currency, which was an extraordinary demand, and, eliminating this work, a comparison of all the work delivered in the fiscal year 1910 with the regular work delivered in the previous fiscal year shows a net increase of 11.67 per cent.

By the introduction of new machinery and improved methods of executing the work, such as the elimination of tints from internal-revenue stamps and reduction in size of those stamps, the bureau has heartily cooperated in the efforts of the department to reduce expenses, and has been able to show a reduction in the cost of its work approximating \$200,000 yearly.

SUPERVISING ARCHITECT.

The legislation of Congress concerning the construction of public buildings under the control of the department is being carried into effect by the office of the Supervising Architect, an average of ten buildings a month being placed on the market.

The act of June 25, 1910, provided for the acquisition of 140 sites for public buildings, the construction of 115 buildings on sites pre-

viously acquired, the purchase of 114 sites and the construction of buildings thereon, and the extension and remodeling of 24 existing public buildings. Preliminary steps have been taken to secure the sites authorized, and arrangements have been made to advertise for proposals. The acquisition of these sites will receive prompt attention.

The Supervising Architect is giving his attention to those buildings whose limits of cost were increased by the act of June 25, 1910, so that the needed betterments of such buildings may be placed under contract without delay.

During the last fiscal year the efforts to maintain the office of the Supervising Architect at the highest standard of efficiency have been continued. The new quarters for that office on the fourth floor of the Treasury building were occupied during the past winter, with a consequent addition of the area required for the proper transaction of its business.

The following statements show the construction and financial operations of the department with reference to public buildings under its control during the fiscal year ended June 30, 1910:

hospitals and quarantine stations	570
Drop Jamestown Exposition buildings (sold and removed)	
	569
Completed since (including Buffalo marine hospital)	61
In course of erection	118
Not commenced	425
Total	1, 173

In addition to the work shown by the above table, 14 extensions have been completed and 55 extensions placed under contract. There are 166 sites, authorized to be purchased or vested in the Government, for which no buildings are provided.

STATEMENTS OF APPROPRIATIONS FOR PUBLIC BUILDINGS, JULY 1, 1909, TO JUNE 30, 1910.

EXPENDITURES DURING THE FISCAL YEAR.

For sites and additional land	\$4,945,280.56

PUBLIC-HEALTH AND MARINE-HOSPITAL SERVICE.

The Surgeon-General reports the operations of the service through the following seven divisions of the bureau, viz: Scientific research and sanitation, foreign and insular quarantine, domestic (interstate) quarantine, sanitary reports and statistics, marine hospitals and relief, personnel and accounts, and miscellaneous. Each division is presided over by a medical officer. All officers and employees in the outside service are within the jurisdiction of one or the other of these divisions, whose operations are coordinated and brought under the direct supervision of the Surgeon-General by special bureau regulations.

Division of scientific research.

Hygienic laboratory.—The research work has included tuberculosis, with special reference to the blood and transmission of the disease by milk; typhoid fever and hookworm disease, the longevity of their causative agents and means necessary for their destruction in nature; typhus fever and its transmission by the body louse; pellagra; infantile paralysis; cancer in the lower animals; the "straw mattress disease;" immunity; the oxydases, with reference to their defensive action in the animal body; the influence of bleaching on the nutritive value of flour; therapeutic properties of the thyroid and suprarenal glands and their commercial preparations.

Examinations made include commercial disinfectants and embalming fluids, standards of each being recommended; pharmacopœial preparations; and 122 samples of water from the District of Columbia

Investigations included viruses, serums, and toxins used in the treatment of disease, and standard units were prepared for anti-diphtheric and antitetanic serums.

Other transactions include the identification of the animal parasites of man; studies of rabies and the administration of antirabic treatment to 59 persons, and transmission to state health authorities and to the Canal Zone of material for antirabic treatment.

Digests of Comments on the Pharmacopæia were published in two volumes, and in all thirteen bulletins were issued. The personnel of the laboratory numbered 52.

Through the division of scientific research, 26 establishments were inspected preliminary to the issue of licenses for the sale of viruses, serums, and toxins under the act of July 1, 1902. Thirteen of the establishments are foreign. Shipments of these products from abroad are held at ports of entry pending examination of samples.

Investigations of pellagra have been assigned to a commission of 7 scientists, 5 connected with the Hygienic Laboratory and 2 with the Government Hospital for the Insane.

Investigations of typhoid fever and its spread have been continued in the District of Columbia; at Omaha, Nebr.; Williamson, W. Va., and Chicago, Ill.

By request of the Post-Office Department a thorough investigation, with report, was made on mercury-vapor illumination as affecting vision.

A collective investigation has been made of the milk dispensaries in the United States and their utility in the prevention of infant mortality.

Leprosy investigation station, Hawaii.—The hospital at Molokai was opened for patients December 23, 1909. Laboratory and statistical studies will be continued, as heretofore, at the receiving station in Honolulu. The scientific investigations have been published in 5 bulletins during the year. A noteworthy event is the successful cultivation in artificial media of the bacillus of leprosy, the first success being obtained by Clegg, at Manila, now assistant director of this station. This achievement is a valuable advance in efforts to obtain a cure and preventive.

Division of foreign and insular quarantine.

At the 44 quarantine stations in the continental United States, 7,271 vessels, carrying 407,739 passengers and crews, were inspected, and 331 vessels were disinfected. Inspection has been maintained on the Mexican border.

National quarantine has been administered at 8 ports in the Philippine Islands, 8 in Hawaii, and 8 in Porto Rico.

Inspection of emigrants at Chinese and Japanese ports has been discontinued by request of the immigration authorities.

On account of cholera in Russia a medical officer has been on duty throughout the year at Libau, the only Russian port from which emigrants ship direct to the United States, and the American consular officers at Hamburg, Bremen, Antwerp, Rotterdam, and British ports were instructed, through the State Department, to enforce the Treasury regulations relating to disinfection of baggage and detention of passengers from Russia.

The title to the Mississippi River quarantine station was acquired during the year and improvements begun. A site for a quarantine station at Galveston has been secured and plans for construction are being prepared.

Revised quarantine regulations have been issued, the previous edition being that of 1903.

Medical inspection of immigrants.—During the fiscal year 1,280,957 were inspected, and 30,777 were certified for rejection on account of physical and mental defects. The figures do not, however, include examinations in the Philippines or at foreign ports. The inspections were conducted at 75 stations in the continental United States, Porto Rico, and Hawaii.

Personal examinations were made of 1,175 aliens in institutions throughout the United States, with a view to their deportation under the immigration laws.

Service officers, under supervision of the Commissioner of Immigration, have conducted the large hospital for immigrants at Ellis Island, where 8,649 patients were admitted to treatment, and also the hospital of the new immigrant station at Angel Island, San Francisco.

A revised "Book of Instructions for the Medical Inspection of Aliens" was issued, superseding the edition of 1903.

Division of domestic (interstate) quarantine.

Plague on the Pacific coast.—During the year there was no case of human or rat plague in San Francisco, but 115,900 rats were caught, 104,182 examined in the federal laboratory, 66,912 premises inspected, 967 buildings made rat proof, and 8,410 nuisances abated.

In Oakland there was one case of human plague in October, 1909, the infection being from a ground squirrel without the city. There was no case of rat plague; 32,926 rats were caught and examined in the laboratory, and 4,043 premises were inspected.

In Seattle there was no case of human plague; 56,184 rats were delivered to the service laboratory and 25,435 examined, 1 rat being found infected in February, 1910.

To prevent reinfection of San Francisco and Oakland, operations have been conducted in a zone around these cities to clear it of ground squirrels. Four cases of human plague from squirrels were reported during the year.

Investigations were made in 21 counties, and in 11 counties infected squirrels were found. In all, 118,355 squirrels were destroyed during the fiscal year, of which number 351 were infected.

Plague among ground squirrels in California is a menace to other States. Special measures have been adopted to ascertain accurately the extent of the infection, and, with cooperation of state and county authorities, to destroy all ground squirrels in infected regions and to prevent extension of the infection.

Typhoid among lake seamen.—Investigation is in progress of typhoid fever among lake seamen, to determine their influence in the spread of this disease, and if the vessels are sources of infection. Medical officers of the service at ports on the Great Lakes are instructed to report to the officer at Chicago all cases, with essential facts. A like investigation was made of seamen and vessels plying between Washington and Norfolk.

Division of sanitary reports and statistics.

Weekly Public Health Reports, in editions of 4,000 copies, were issued, giving current information concerning epidemics and sanitary conditions in the United States and foreign countries, together with statistical tables of mortality and morbidity.

A compilation has been made of the state laws relating to morhidity statistics.

Smallpox was reported from 41 States and the District of Columbia, with a total of 25,084 cases and 216 deaths, about the same number of cases as last year, but more than twice the number of deaths. The reports are not complete, some States having no adequate provision therefor. They show, however, an undue prevalence of a disease easily prevented

Division of marine hospitals and relief.

In the 22 marine hospitals owned by the Government and the 125 additional stations for relief of seamen of the merchant marine, there were treated during the year 51,443 patients, 14,270 in hospitals and

37,173 at dispensaries. The new marine hospital at Pittsburg was opened in September, 1910. At the sanatorium for consumptives at Fort Stanton, N. Mex., 360 patients were cared for during the year.

Physical examinations, exclusive of immigrants, were made of 4,571 persons connected with the Revenue-Cutter, Life-Saving, Steamboat-Inspection, Immigration, and Light-House services, the Coast and Geodetic Survey, and the Philippine Service.

Division of personnel and accounts.

Personnel.—The medical corps at the close of the year consisted of the Surgeon-General, 6 assistant surgeons-general, 34 surgeons, 66 passed assistant surgeons, and 21 assistant surgeons (128 commissioned medical officers), and 274 acting assistant surgeons, making a total of 402 medical officers. The total personnel of the service, including 46 pharmacists and 900 attendants, numbered 1,423.

Expenditures.—The appropriation for the ordinary maintenance of the service was \$1,266,750. The receipts from all sources, repayments for care of foreign seamen, etc., were \$17,694.44; the expenditures were \$1,163,484.73; estimated outstanding liabilities, \$25,020.47, leaving an estimated balance of \$95,939.24.

The amount available of the appropriation for preventing the introduction and spread of epidemic diseases at the beginning of the fiscal year was \$978,013.87. The expenditures were \$277,897.63, leaving a balance June 30, 1910, of \$700,116.24.

The appropriation for the maintenance of the quarantine service was \$400,000. The amount of repayments was \$1,343.52. The expenditures were \$390,919.58, which, deducting outstanding liabilities, leaves an estimated balance of \$4,485.28.

The amount available of the appropriation for national quarantine and sanitation at the beginning of the fiscal year was \$325,744.08; the expenditures were \$112,095.22, exclusive of \$100,000 transferred to the books of the Supervising Architect, leaving a balance June 30, 1910, of \$113,648.86.

The appropriation for the maintenance of the leprosy investigation station, Hawaii, was \$45,000. The expenditures were \$35,781.02, which, deducting outstanding liabilities, leaves an estimated balance of \$6,196.65.

Miscellaneous division.

Physical examinations of keepers and crews of the Life-Saving Service have been supervised and reviews made of the medical evidence submitted, with 461 claims for benefits under the act of March 4, 1882.

Service publications.—Three hundred and sixty-five thousand copies of the various bureau publications were distributed during the fiscal year, and a catalogue of all the service publications was issued.

During the year the mailing lists of the bureau were thoroughly evised in accordance with department instructions.

LIFE-SAVING SERVICE.

During the fiscal year ended June 30, 1910, a larger number of marine casualties occurred within the scope of the Life-Saving Service than has been witnessed by any previous year in the history of the establishment, a total of 1,463 vessels having been reported as involved in disaster. Of this number, 417 were documented, and 1,046 undocumented, the last-mentioned class including gasoline launches, sailboats, rowboats, etc. The documented vessels carried 3,648 persons, and were valued, with their cargoes, at \$10,989,095. Those of the undocumented class carried 3,013 persons, and were valued at \$891,470. Thirty-nine persons lost their lives from the vessels of the first-mentioned class, and 14 from those of the class last named. Forty-eight documented and 26 undocumented vessels were totally lost. There were succored at the various life-saving stations 664 persons involved in marine casualties, a total of one thousand one hundred and seventy-one days' relief being afforded. The important statistics relating to the work of the service for the year are shown in tabular form as follows, the figures presented being apportioned between the two classes of vessels referred to:

	Documented vessels.	Undocu- mented vessels.	Total.
Vessels involved. Vessels lost Persons on board Lives lost Days' succored at stations. Days' succor afforded. Value of vessels. Value of oargoes Total value of property involved. Value of property saved Value of property lost.	. 48 3,648 . 39 . 327 . 830 . \$7,866,870 . \$3,122,225	1,046 26 3,013 14 337 341 \$875,265 \$16,205 \$891,470 \$764,900 \$126,570	1,463 74 6,661 53 664 1,171 \$8,742,135 \$3,138,430 \$11,880,565 \$10,051,160 \$1,829,405

While the number of persons involved in casualties to vessels within the field of life-saving operations during the last fiscal year was less than the number similarly involved during 1909, the number of lives lost during 1910 exceeded that shown for the preceding year by 23. This increase was occasioned by a single disaster, the wreck of the schooner *Czarina*, near the entrance to Coos Bay, coast of Oregon, January 12, 1910, when 23 men out of a crew of 24 perished under circumstances that made rescue by any human agency impossible. But for this lamentable event the showing in the respect under notice would have been as favorable for 1910 as it was for 1909, which was the most gratifying in the annals of the life-saving establishment.

Comment was made in the report for 1909 upon the remarkable number of gasoline vessels included in the summary of casualty statistics for that year, the craft of-the kind mentioned that figured in the year's record of accidents being 41 per cent of the entire number of vessels involved in disaster. The record for 1910 in this regard is still more noteworthy, the 756 motor boats that suffered accident during that period constituting nearly 52 per cent of the entire number of vessels included in the year's list of disasters. Of these boats, 106 were documented, and 650 were small undocumented launches, such as generally frequent harbors and other sheltered waters. of the first-mentioned class carried 559 persons, and those last referred to had on board 2,188 persons, making the total number of individuals involved in accident to power craft 2,747, or 41 per cent of the entire number aboard vessels of all kinds suffering casualties. That these boats were engaged for the most part in the pursuit of pleasure rather than in commerce is evidenced by the fact that not more than one in seven carried cargo.

Of the 1,463 vessels included in the foregoing tabulation, 1,120, or more than three-fourths of the entire number suffering disaster, valued with their cargoes at \$4,055,070, were assisted solely by the crews of the service; 287 vessels, valued with their cargoes at \$6,124,160, received the assistance of the station crews working in conjunction with revenue cutters, wrecking vessels, tugs, etc.; 12 vessels, valued with their cargoes at \$215,110, were assisted by private agencies only; while 44 vessels, valued with their cargoes at \$1,486,225, had no assistance of any kind, having been able to get out of difficulty without outside aid.

In addition to the work of the life-saving crews set forth in the preceding paragraph, assistance of more or less importance was afforded by them to 135 documented and 322 undocumented vessels not included in the tabular classification of disasters, making in all 1,864 vessels that received aid from the life-saving establishment. Warnings were also given by the patrolmen and watchmen of the service to 243 vessels running into danger. The number of lives and the amount of property thus saved can not of course be stated. It may be mentioned, however, that 224 of the warnings were given at night, and that 142 of the vessels warned were steamers.

Besides what was accomplished by the service crews as salvors of life and property from shipwreck, they also performed considerable miscellaneous work in the neighborhoods of their stations, chiefly humanitarian in character. In the several classifications of service under this head are reported the rescue of 137 persons who had fallen from docks, piers, etc., or who were otherwise involved in situations of danger; the giving of medical and surgical attention to 60 persons who were sick or injured, and the succoring of 176 persons for periods

aggregating one hundred and ninety-five days; effective assistance at neighborhood fires involving 57 private dwellings, business structures, etc.; and the recovery in 82 instances of public and private property consisting of buoys, nets, mired teams, and automobiles, strayed domestic animals, etc.

The net expenditure for the maintenance of the service during the year was \$2,249,375.68.

The number of life-saving stations embraced within the establishment at the close of the year was 281, distributed as follows: 201 on the Atlantic and Gulf coasts, 61 on the coasts of the Great Lakes, and 19 on the Pacific coast. No additional stations were put in commission during the year, that mentioned in last year's report as being under construction at Lorain, Ohio, at the mouth of the Black River, being still incomplete. The station at the Isles of Shoals, off Postsmouth, N. H., for the construction of which contract was entered into last year, will soon be ready for occupancy. Proposals have been invited for the construction of the stations authorized to be established at Green Hill, R. I., and at Eagle Harbor, Mich. construction of a new station to replace the one destroyed at Galveston, Tex., in the great flood of 1900 is progressing satisfactorily, as is also work upon new structures to replace the Kitty Hawk and Chicamacomico stations, coast of North Carolina, which are old and no longer adequate to the needs of the service. Extensive repairs and improvements were made during the year to the stations at Old Harbor, Mass., Cleveland, Ohio, Manistee, Mich., and Kenosha, Wis., and minor improvements to various other stations.

The use of power propulsion in the self-righting and self-bailing lifeboats and in some of the surfboats of the service during the year has fully justified the high opinion expressed in the last annual report regarding the increased efficiency they have effected in life-saving endeavor. During the year 4 new 36-foot self-righting and selfbailing lifeboats, 15 new open surfboats, and 6 new self-bailing surfboats were put in service, those of the first-mentioned kind being equipped with 35 to 40 horsepower gasoline engines, and the surfboats with engines of 8 horsepower. Motors of 35 to 40 horsepower were also installed in 3 of the 34-foot self-righting and self-bailing lifeboats, and of 8 horsepower in 2 of the open surfboats already in use at the stations, making a total of 30 power boats that were added to the station equipment. Contract was also entered into during the year for the construction of 10 36-foot power lifeboats, and 20 self-bailing power surfboats. Several of these have been completed and others are nearing completion.

It is gratifying to note that the bill "to promote the efficiency of the Life-Saving Service," providing for the retirement of the men of the service incapacitated for duty, and for other benefits similar to those afforded to men engaged in hazardous employment in other branches of the public service, passed the Senate during the last session of Congress. The provisions of the bill are acceptable to those whom it is proposed to benefit, and its enactment into law would beyond question permanently place the service upon the highest plane of efficiency by enabling the enlistment and retention of the most capable men to be found for its station crews. The measure has the unqualified approval of the department, and the hope is entertained that the action of the Senate may early in the approaching session receive the concurrence of the House.

REVENUE-CUTTER SERVICE.

The following is a summary of the regular work of the Revenue-Cutter Service during the fiscal year 1910:

Lives saved (actually rescued) from drowning	25
Persons on board vessels assisted	1,801
Persons in distress taken on board and cared for	365
Vessels assisted	156
Vessels boarded and papers examined	18, 799
Vessels seized or reported for violation of law	647
Fines and penalties incurred by vessels reported	\$160, 569
Value of vessels assisted and their cargoes	\$10, 247, 535
Derelicts and obstructions to navigation removed or destroyed	28
Net expenditure:	
Appropriation for maintenance of the service, including appropria-	
tion for special repairs	\$2, 563, 000
Estimated unexpended balance	\$9, 761. 96

The duties of the service have been actively performed on all parts of the seacoast of the United States, both on the Atlantic and the Pacific oceans, and have extended, as usual, to the Great Lakes, Alaska, Porto Rico, and Hawaii. The cutters have continued their work in Bering Sea and other northern waters for the protection of the fur seals and the fisheries. On July 9, 1909, the Japanese schooner Tenyu Maru was seized for illegal sealing within territorial limits, and on June 28, 1910, the schooner Tokai Maru was taken into custody at Kalekta Bay for fishing in American waters in violation of the act of June 14, 1906. The sailing master and navigator of the Japanese schooner Koyei Maru, who proved to be a naturalized citizen of the United States, was arrested for unlawful sealing and was subsequently tried and convicted of the offense.

In the month of January, 1910, the cutter *Thetis*, with head-quarters at Honolulu, proceeded to various islands of the Hawaiian group, which had been set apart by executive order as a reserve and breeding ground for native birds, for the purpose of breaking up reported depredations at those places by alien plumage hunters.

65872°—гі 1910——5

The *Thetis* arrested on Laysan and Lisiansky islands 23 Japanese subjects engaged in the illicit killing of birds, and seized plumage in their possession valued at \$112,470.

Timely and valuable assistance was rendered to the natives of northern Alaska and to the government interests in that territory by the vessels of the service which made cruises into the Arctic Ocean.

There have been in commission during the year 26 cruising cutters, and 18 harbor vessels and launches which have performed boarding and other duties at the principal seaports. The regulations for the movements of vessels in the St. Marys River, prior to and after their passage through the locks of the canal at Sault Ste. Marie, and the enforcement of the anchorage laws at New York and Chicago have been strictly maintained.

Twelve officers have, under authority of the law on the subject, been attached to duty in connection with the Life-Saving Service.

Effective aid has been rendered to merchant vessels wherever found in distress. During the winter, which was severe, the service was particularly alert in carrying out the requirements of the law and regulations covering this important duty. The value of marine property assisted was considerable and the number of vessels to which timely relief was afforded was as large as that of the previous The Tahoma, in the midst of the winter (February 9, 1910), on short notice, sailed from Port Townsend for the Aleutian Islands, Alaska, a distance of 1,300 miles, and succeeded in rescuing 5 sailors who had been cast away from the wrecked steamer Farallon a month previously. They were found at the village of Afognak, and had suffered great hardships. The Bear, in October, 1909, conveyed from Nome to Seattle 136 destitute people. At the opening of navigation in Bering Sea the same year the Thetis picked up and saved the British steamer Puritan, which had stove her bow and lost the blades of her propeller in endeavoring to make her way through the She was towed into Nome by the cutter. The value of the vessel and her cargo, as given by the charterer, was \$225,000.

Twenty-eight dangerous derelicts and obstructions to navigation, some of which were very difficult to handle, were removed from the paths of commerce by vessels of the service. Two of these, the four-masted schooner Asbury Fountain and the three-masted schooner Sadie C. Sumner, were found at sea abandoned, and were towed to Norfolk, Va., the first named by the Onondaga and Mohawk, the other by the Seneca, and delivered to the owners. They were valued with their cargoes of lumber at \$102,000. It required six days of persevering and arduous effort to get the Sadie C. Sumner into port.

Notwithstanding the many and diverse duties of the Revenue-Cutter Service, strict attention is paid to keeping up efficiently its military organization and discipline. Naval drills and target practice with rapid-fire guns and small arms are conducted regularly.

Vessels.

Recommendation is renewed that the Woodbury, which is obsolete and unsuited to the proper performance of duties on the Maine coast, where she is stationed, be replaced as soon as practicable by a modern, well-equipped vessel. The Manhattan, at New York, engaged in enforcing the anchorage regulations which apply to the North and East rivers and the Kill van Kull, should also be replaced by a better vessel. A boarding vessel for Chicago is again urged on account of the great commercial and shipping interests of that port.

Control of regattas.

Attention is again called to the need of modifying the law in regard to patrolling the courses of regattas and marine parades, if the Revenue-Cutter Service is to continue to enforce regulations to promote the safety of life on those occasions. There is no reason why the control of regattas should not be directly under the jurisdiction of this service, leaving it only to the Department of Commerce and Labor to exact the penalties for violation of the navigation laws as circumstances may require. Under present conditions that department now prescribes regulations directing the movements of revenue cutters at such events, which, not being deemed in accordance with the intent of the law, this department of course can not recognize. Regulations for the purpose of carrying out the provisions of the law governing the patrol of the course of a yacht or boat race should be made by those who do the work, who are thoroughly familiar with it, and who must necessarily be governed at such times by the character of the race, the existing conditions, and the numerical strength both of the contestants and the patrol vessels. Directions for the guidance of revenue cutters on these occasions can not properly be formulated and issued by an office that presumably knows little or nothing of the actual exigencies attending such contests.

Service station at Dutch Harbor or Unalaska.

Owing to the fact that Dutch Harbor and Unalaska have been the base of operations of the Revenue-Cutter Service in northern waters for many years past, and are likely to continue to be for time to come, it is desirable that a permanent station be established at one of those places for the use of the service. This would provide facilities which would enable the service to do the best work in connection with the growth of Alaska, such as the enforcement of law and order in remote places in that territory, the supervision of and assistance to a constantly increasing commerce, the preservation of the fur seals, other fisheries and game, and the prevention of illegal acts by the crews of foreign vessels. Dutch Harbor would be the better location for this purpose, but if the Government could not acquire at reasonable cost the site at that place now owned and occupied by the North American Commercial Company, consisting of about 40 acres, with wharf, storehouses, and other buildings, a reservation could be had at Unalaska, about 1 mile to the southward, and various buildings now there repaired and put in proper condition for use. The commanding officer of the Bering Sea fleet the past season strongly recommends one of these courses, and states that the station could probably be maintained on the saving effected in the matter of fuel for the ships, as coal could then be purchased and stored by the service.

DIVISION OF LOANS AND CURRENCY.

There were no changes in the amount of the interest-bearing debt during the fiscal year ended June 30, 1910, as shown by the following statement:

Amount outstanding June 30, 1909	\$913, 317, 490
Amount outstanding June 30, 1910	913, 317, 490

The changes in the amounts of the several kinds of money in the United States outside the Treasury between November 1, 1909, and November 1, 1910, are shown in the following table:

COMPARATIVE	STATEMENT	SHOWING	мите Си	4 37 C FO C T3T	CEDATE A MEAN

Classes.	In circulation Nov. 1, 1909.	In circulation Nov. 1, 1910.	Decrease.	Increase.
Gold coin Standard silver dollars Subsidiary silver Gold certificates Silver certificates Treasury notes, act of July 14, 1890 United States notes National-bank notes	74,383,857 142,324,038 795,205,489 481,794,889 4,021,535	3,510,558 341,184,452	3,172,759 510,977 995,510	1,581,522
Total	3,124,679,057	706, 068, 406 3, 180, 084, 499	8,517,476	63,922,918

DIVISION OF PUBLIC MONEYS.

The monetary operations of the Government have been conducted through the Treasurer of the United States, nine subtreasury officers, the treasury of the Philippine Islands, the American Colonial Bank of Porto Rico, the Banco de la Habana, the National Bank of Cuba, and 1,378 national-bank depositaries.

The amount of public moneys held by the bank depositaries on June 30, 1910, including funds to the credit of the Treasurer's general account and United States disbursing officers, was \$52,209,585.73, a decrease since June 30, 1909, of \$19,453,215.55. On June 30, 1910, there were 414 regular depositaries and 964 temporary depositaries; 6 were designated during the fiscal year and 42 discontinued. On November 1, 1910, the number of depositaries was 1,372 and the amount of public moneys held by them was \$47,836,600.47.

DIVISION OF BOOKKEEPING AND WARRANTS.

The fiscal transactions of the year ended June 30, 1910, recorded in this division show results as follows:

The books of this division have carried open appropriation accounts during the year to the number of 6,000, which have been charged and credited with all warrant entries affecting the disbursements.

During the year approximately 7,500 active accounts of collecting and disbursing officers were carried in the current personal ledgers of the division, recording their transactions as to deposits of the public moneys and under disbursement advances.

A total of 153,762 receipt and pay warrants, aggregating \$3,304,085,196.83, was issued during the year. Of this number, 33,666 were for the receipt of moneys into the Treasury and 120,096 for disbursements from the Treasury.

Of the above sum, warrants representing \$1,870,232,429.36 were issued mainly for adjustment of naval appropriations under "General account of advances," and for public debt issues and redemptions not affecting the general fund of the Treasury, the moneys involved being held for the redemption of certificates and notes for which the funds are respectively pledged; and warrants in the amount of \$1,433,852,767.47, representing receipts of \$707,186,007.52 and disbursements of \$726,666,759.95, were credited and charged, respectively, to the general fund of the Treasury.

The following table exhibits the total of the receipts and disbursements for the year for the general fund, details of which are shown elsewhere in the statements and reports of the Secretary of the Treasury:

	Receipts.	Disbursements.	Excess of receipts (+) or of dis- bursements (-).
Ordinary Panama Canal Public debt. Total	\$675,511,715.02 31,674,292.50 707,186,007.52	\$659,705,391.08 33,911,673.37 33,049,695.50 726,666,759.95	+\$15,806,323.94 - 33,911,673.37 - 1,375,403.00 - 19,480,752.43

Showing a surplus of ordinary receipts over ordinary disbursements of \$15,806,323.94, while the total of all disbursements over all receipts was \$19,480,752.43, which excess of disbursements is more than accounted for by payments from the general fund of the Treasury during the year of \$33,911,673.37 for the Panama Canal instead of issuing bonds therefor.

State bonds and stocks owned by the United States.

The following statement shows the nonpaying state bonds and stocks, formerly in the Indian trust fund, now in the Treasury, belonging to the United States:

		. ,	
Tennessee	······································	335, 666.	$66\frac{2}{3}$
Total	·	490 000	002

A history of these state stocks and bonds is given in House Document No. 263, Fifty-fourth Congress, second session.

Territory of Hawaii.

The debt of Hawaii, assumed by the terms of the joint resolution of July 7, 1898, consisted of \$3,235,400 in interest-bearing bonds and \$764,570.31 in postal savings deposits. This indebtedness has been fully paid by the United States, except the sum of \$2,206.85 in postal savings, to be paid to the Territory of Hawaii under the provisions of the act of May 19, 1908 (35 Stat., 165).

The appropriation of \$1,000,000 provided by the Congress for the liquidation in part of awards made for property destroyed in suppressing the bubonic plague in the Territory in 1899 and 1900 has been practically expended. The First National Bank at Honolulu reports that 24 awards, amounting to \$1,730.51, are now outstanding

SECRET-SERVICE DIVISION.

The operations of the Secret Service during the year include a number of important cases, though the record as a whole suggests a gradual decrease of activity among the criminals who make the imitation of currency and coins their specialty. The arrests for violations of the counterfeiting laws numbered 316, as against 400 in the previous year. The counterfeit notes captured show a total of \$490,000, as against \$44,000 in 1909, but in the 1910 total there is included one case in which notes representing nearly a million pesos were seized. The greatest public service rendered by the division was doubtless the suppression of a dangerous and exceedingly active organization among the desperate class of Italians in New York. The leaders of this enterprise were responsible not alone for most of the counterfeiting among Italians, but directed an active black-

mailing campaign among their own people. It is reported by those familiar with conditions in the metropolis that there has been a decrease of fully 75 per cent in the so-called "blackhand" outrages since the arrest and conviction of nearly two score of these men in connection with a very extensive note-counterfeiting conspiracy An elaborately equipped plant in Boston fitted with powerful and expensive machinery of the highest grade, and having as its object the manufacture of counterfeit coin from high grade silver, was one of the prize captures of the year. A much more general cooperation on the part of the banks through the various national and state banking associations is reported in the effort to shorten the "life" of counterfeit notes by promptness in reporting their presentation and discouraging the practice of returning them to depositors.

DIVISION OF PRINTING AND STATIONERY.

Printing and binding.

The amount appropriated for printing and binding for the Treasury Department for the fiscal year 1910 was \$390,000, and of this amount \$383,780.50 was expended, as follows:

Onice of the Secretary:

A net balance of	• • • • • • • • •	19, 303. 00

A comparison of the net expenditures for 1909 and 1910 shows an increase of \$9,931.03 for 1910. This increase was caused by extra printing for the Internal-Revenue Service on account of the corporation tax, etc., and the general increase of business.

Stationery.

Amount appropriated for stationery for the department proper for the fiscal year 1910 was \$41,500. The expenditures on account of this appropriation amounted to \$39,231.90, which sum was divided between the bureaus, offices, and divisions of the department as follows:

Office of the Secretary: Secretary and Assistant Secretaries	\$704 46	
Chief Clerk and Superintendent	586. 94	
Disbursing Clerks	401. 39	
Division of Appointments	518.04

Increase	116, 382. 75

Economy has been practiced during the year in the expenditure of the moneys provided in the different appropriations under the control of this division, and improvement in the conduct of business has been instituted, under special direction of the Secretary.

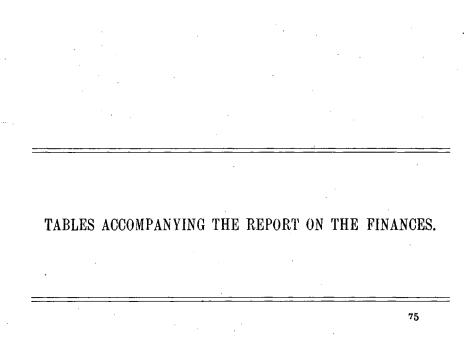

Attention is again called to the objectionable method of appropriating money for the purchase of stationery for this department and to the embarrassment occasioned thereby.

The present practice, which has existed for many years, is to appropriate a certain amount (\$45,000 being the amount for the present fiscal year) for the purchase of stationery for the department proper and its several bureaus, offices, and divisions in Washington, but in order to secure the benefits of the favorable department contract prices, the several outside Treasury services are supplied from this appropriation by means of a repay method, by which sixteen different appropriations reimburse the stationery appropriation, to the amount (this year) of \$77,150.85. This method is cumbersome, dilatory, and expensive, and serves no good purpose. operation contractors' bills for supplies furnished can not be paid as promptly as they ought to be on account of the delay experienced in obtaining repay credits. Repay accounts are not approved by the auditor in the absence of the receipts of consignees for supplies furnished to them, and these receipts, in many instances, are not received for weeks after shipment; consequently the fund from which bills are paid is but slowly replenished.

If a lump sum were appropriated for the whole service, as is done in the case of the printing and binding, the public business would be simplified and improved, and previous recommendations for legislation to that end are renewed.

An occurrence last year illustrates one of the objectionable features of the present system. A repay bill for supplies furnished to the customs service during the year, amounting to about \$1,500, could not be paid upon rendition, owing to a deficiency in the appropriation for that service, and its settlement is now awaiting a deficiency appropriation. Such embarrassing happenings as this would be avoided under a direct appropriation for the whole service.

a For packing boxes used in shipping revenue stamps to the Philippines.

LEGAL-TENDER NOTES.				<u> </u>			*
The act of February 25, 1862 (12 Statutes, 345), authorized the issue of \$150,000,000 United States notes, not bearing interest, payable to bearer at the Treasury of the United States, and of such denominations, not less than five dollars, as the Secretary of the Treasury might deem expedient, \$50,000,000 to be applied to the redemption of demand notes authorized by the act of July 17, 1861; these notes to be a legal tender in payment of all debts, public and private, within the United States, except duties on imports and interest on the public debt, and to be exchangeable for 6 per cent United States bonds. The act of July 11, 1862 (12 Statutes, 532), authorized an additional issue of \$150,000,000, of such denominations as the Secretary of the Treasury might deem expedient, but no such note should be for a fractional part of a dollar, and not more than \$35,000,000 of a lower denomination than five dollars; these notes to be a legal tender as before authorized. The act of March 3, 1863 (12 Statutes, 710), authorized an additional issue of \$150,000,000, of such denominations, not less than one dollar, as the Secretary of the Treasury might prescribe; which notes were made a legal tender as before authorized. The same act limited the time in which the	Indefinite	On demand	None	rar	450,000,000.00		346,681,016.00

Treasury notes might be exchanged for United States bonds to July 1, 1863. The amount of notes authorized by this act were to be in lieu of \$100,000,000 authorized by the resolution of January 17, 1863 (12 Statutes, 822). The act of May 31, 1878 (20 Statutes, 87), provides that no more of the United States legal-tender notes shall be canceled or retired, and that when any of said notes are redeemed or received into the Treasury under any law, from any source whatever, and shall belong to the United States, they shall not be retired, canceled, or destroyed, but shall be reissued and paid out again, and

kept in circulation The act of March 14, 1900, provides that United States notes, when presented to the Treasury for redemption, shall be redeemed in gold coin of the standard fixed in said act, and that in order to secure the prompt and certain redemption of such notes it shall be the duty of the Secretary of the Treasury to set apart in the Treasury a reserve fund of one hundred and fitty million dollars in gold coin and reserve fund of one hundred and fifty million dollars in gold coin and bullion, to be used for such redemption purposes only, and that whenever and as often as any of said notes shall be redeemed from said fund it shall be the duty of the Secretary of the Treasury to use said notes so redeemed to restore and maintain the reserve fund so established—first, by exchanging the notes so redeemed for any gold coin in the general fund of the Treasury; second, by accepting deposits of gold coin at the Treasury or at any subtreasury in exchange for such notes; third, by procuring gold coin by the use of said notes in accordance with the provisions of section 3700 of the Revised Statutes of the United States. The above-mentioned act also provides that if the Secretary of the Treasury is unable to restore and maintain the gold coin in the reserve fund by the forerestore and maintain the gold coin in the reserve fund by the foregoing methods, and the amount of such gold coin and bullion in said fund shall at any time fall below one hundred million dollars, it shall be his duty to restore the same to the maximum sum of one hundred and fifty million dollars by borrowing money on the credit of the United States, and for the debt so incurred to issue and sell coupon or registered bonds of the United States bearing interest at the rate of not exceeding three per centum per annum, payable quarterly, the bonds to be payable at the pleasure of the United States after one year from the date of their issue, and to be payable, principal and interest, in gold coin of the present standard value, the gold coin received from the sale of said bonds to be exchanged for an equal amount of the notes redeemed and held for exchange, and the Secretary of the Treasury may, in his discretion, use said notes in exchange for gold, or to purchase or redeem any bonds of the United States, or for any other lawful purpose the public interests may require, except that they shall not be used to meet deficiencies in the current revenues.

The act of March 4, 1907, section 2, provides that whenever and so long as the outstanding silver certificates of the denominations of one dollar, two dollars, and five dollars, issued under the provisions of section seven of an act entitled "An act to define and fix the standard of value, to maintain the parity of all forms of mone y issued or coined by the United States, to refund the public debt, and for other purposes," approved March fourteenth, nineteen hundred,

TABLE A .- STATEMENT OF THE OUTSTANDING PRINCIPAL OF THE PUBLIC DEBT, ETC. - Continued.

	Length of loan.	When redeem- able.	Rate of in- terest.	Price at which sold.	Amount authorized.	Amount issued.	Amount out- standing.
FUNDED LOAN OF 1881.							
The act of January 14, 1875 (18 Statutes, 296), authorizes the Secretary of the Treasury to use any surplus revenues from time to time in the Treasury not otherwise appropriated, and to issue, sell, dispose of, at not less than par, in coin, either of the description of bonds of the United States described in the act of July 14, 1870 (16 Statutes, 272), to the extent necessary for the redemption of fractional currency in silver coins of the denominations of ten, twenty-five, and fifty cents							
of standard value. The act of March 3, 1875 (18 Statutes, 466), directs the Secretary of the Treasury to issue bonds of the character and description set out in the act of July 14, 1870 (16 Statutes, 272), to James B. Eads, or his legal representatives, in payment at par of the warrants of the Secretary of War for the construction of jetties and auxiliary works to maintain a wide and deep channel between the South Pass of the Mississippi River and the Gulf of Mexico, unless Congress shall have previously provided for the payment of the same by the necessary						,	
appropriation of money. The act of July 14, 1870 (16 Statutes, 272), authorizes the issue of \$200,000,000 at 5 per centum, principal and interest payable in coin of the present standard value, at the pleasure of the United States Government, after ten years; these bonds to be exempt from the payment of all taxes or duties of the United States, as well as from taxation in any form by or under state, municipal, or local authority.	10 years	May 1, 1881	5 per cent	Par		\$517,994,150.00	\$22, 400. 0
Bonds and coupons payable at the Treasury of the United States. This act not to authorize an increase of the bonded debt of the United States. Bonds to be sold at not less than par in coin, and the proceeds to be applied to the redemption of outstanding 5-20's or to be exchanged for said 5-20's, par for par. Payment of these bonds, when due, to be made in order of dates and numbers, beginning with each class last dated and numbered. Interest to cease at						, .	
the end of three months from notice of intention to redeem. The act of January 20, 1871 (16 Statutes, 399), increases the amount of 5 per cents to \$500,000,000, provided the total amount of bonds issued shall not exceed the amount originally authorized, and authorizes the interest on any of these bonds to be paid quarterly. Place of December 17, 1873 (18 Statutes, 1), authorized the issue of an equal amount of bonds of the loan of 1858, which the holders					\$1,500,000,000		
thereof may, on or before February 1, 1874, elect to exchange for the bonds of this loan.

TREASURY NOTES OF 1890—Continued.							
one thousand dollars, as he may prescribe. That said notes shall be redeemable on demand, in coin, at the Treasury of the United States, or at the office of any assistant treasurer of the United States, and when so redeemed may be reissued; but no greater or less amount of such notes shall be outstanding at any time than the cost of the silver bullion and the standard silver dollars coined therefrom then held in the Treasury, purchased by such notes; and such Treasury notes shall be a legal tender in payment of all debts, public and pri-	o				٠.		
vate, except where otherwise expressly stipulated in the contract, and shall be receivable for customs, taxes, and all public dues, and when so received may be reissued; and such notes, when held by any national banking association, may be counted as a part of its lawful reserve. That upon demand of the holder of any of the Treasury notes provided for, the Secretary of the Treasury shall redeem the same in gold or silver coin, at his discretion, it being the established policy of the United States to maintain the two metals on a parity	,						
with each other upon the present legal ratio, or such ratio as may be provided by law. he act of November 1, 1893 (28 Stat., 4), repeals so much of the act of July 14, 1890, as directs the Secretary of the Treasury to purchase from time to time silver bullion to the aggregate amount of four million five hundred thousand ounces, or so much thereof as may be offered in each month, at the market price thereof; and to issue							
in payment for such purchases Treasury notes of the United States. The act of June 13, 1898 (30 Stat., 467), directs that all of the silver bullion in the Treasury purchased in accordance with the provisions of the act of July 14, 1890, shall be coined into standard silver dollars as rapidly as the public interests may require, to an amount of not less than one and one-half millions of dollars in each month,							
and that said dollars, when so coined, shall be used and applied in the manner and for the purposes named in said act. The act of March 14, 1900, provides that United States notes, and Treasury notes issued under the act of July 14, 1890, when presented to the Treasury for redemption, shall be redeemed in gold coin of the standard fixed by said act, and requires that the Secretary of the Treasury shall set apart in the Treasury a reserve fund of one hun-							
dred and fifty million dollars to be used for such redemption purposes only. It also provides that it shall be the duty of the Secretary of the Treasury, as fast as silver dollars are coined under the							

provisions of the acts of July 14, 1890, and June 13, 1898 from bullion purchased under the act of July 14, 1890, to retire and cancel an equal amount of Treasury notes whenever received into the Treasury, and upon such cancellation to issue silver certificates against the silver dollars so coined. PANAMA CANAL LOAN.						
The act of June 28, 1902 (32 Stat., 484, sec. 8), provides that the Secretary	10 years	After Aug. 1,	2 per cent\$103.164	7 9275 000 000 00	\$84,631,980.00	\$84,631,980.00

a Continued at 2 per cent.

Note 1.—Annual interest charge is computed on amount of outstanding principal at close of fiscal year and is exclusive of interest charge on Pacific Railway bonds.

Note 2.—The figures for July 1, 1879, were made up assuming pending funding operations to have been completed.

Note 3.—The temporary loan per act of July 11, 1862, is included in the 4 percents from 1862 to 1863, inclusive, with the exception of the amount outstanding August 31, 1865, this being the date at which the public debt reached its highest point. This loan bore interest from 4 per cent to 6 per cent, and was redeemable on ten days' notice after thirty days, but being constantly changing it has been considered more equitable to include the whole amount outstanding as bearing 4 per cent interest on an average for the year.

a Excess of disbursements.

Note.—The above figures are exclusive of disbursements for the Panama Canal, the first payments for which occurred in the fiscal year 1903.

Note.—The receipts and disbursements by months were made up from partial reports prior to July 1, 1908; and, being subject to change by subsequent concentration of accounts, did not agree with the totals by years. The latter are the actual results, as shown by complete returns.

TABLE H.—STATEMENT OF THE BALANCE IN THE GENERAL FUND OF THE TREASURY, INCLUDING THE GOLD RESERVE, BY CALENDAR YEARS FROM 1791 TO 1842, AND BY FISCAL YEARS FROM 1843 TO 1910.

a This statement is made from warrants paid by the Treasurer of the United States to Dec. 31, 1821, and by warrants issued after that date.

b The unavailable funds are not included from and after this date.

c The amount deposited with the States under act of June 23, 1836, having been taken out of the control of the Treasury Department by the act of Oct. 2, 1837, is not included from and after this date.

	ι		1				!

Note.—The disbursements are stated by warrants paid to June 30, 1866, and by warrants issued since that date.

The disbursements for postal deficiencies are grants by law from the Treasury, and differ from the fiscal year expenditures thereof shown by reports of the Auditor for the Post-Office Department.

Issues and redemptions of certificates and notes not affecting the cash in general fund are excluded from the public debt figures in this statement.

4 Only the annual excess of deposits over redemptions included in this column.

5 National-bank redemption fund herein includes only the annual excess of deposits on account of national-bank redemption fund since 1890.

TABLE I .- RECEIPTS AND DISBURSEMENTS OF THE UNITED STATES-Continued. RECAPITULATION OF DISBURSEMENTS BY FISCAL YEARS.

	Ordinary disbursements.									
Year.	Civil and miscel- laneous, exclusive of postal defi- ciencies.	War Department.	Navy Depart- ment.	Indians.	Pensions.	Interest on the public debt.	Total ordinary disbursements exclusive of postal defi- ciencies.

Note 1.—Specie payments were suspended from January 1, 1862, to January 1, 1879. During the greater part of that period gold and silver coins were not in circulation except on the Pacific coast, where, it is estimated, the specie circulation was generally about \$25,000,000. This estimated amount is the only coin included in the above statement from 1862 to 1875, inclusive.

Note 2.—In 1876 subsidiary silver again came into use, and is included in this statement, beginning

NOTE 2.—10 1876 Subsidiary Silver again came into use, and is included in this statement, occasing with that year.

Note 3.—The coinage of standard silver dollars began in 1878, under the act of February 28, 1878.

Note 4.—Specie payments were resumed January 1, 1879, and all gold and silver coins, as well as gold and silver bullion in the Treasury, are included in this statement from and after that date.

Note 5.—For redemption of outstanding certificates an exact equivalent in amount of the appropriate kinds of money is held in the Treasury, and is not included in the account of money held as assets of the Government.

Note 6.—This table represents the circulation of the United States as shown by the revised statements of the Treasury Denartment for June 30 of each of the years specified.

NOTE 6.—This table represents the circulation of the United States as shown by the revised statements of the Treasury Department for June 30 of each of the years specified.

NOTE 7.—The Director of the Mint made a revised estimate of the stock of gold coin, and, as a consequence of such revision, the estimated stock of gold in the United States and of gold coin in circulation has been reduced \$135,000,000 in the figures for 1907.

NOTE 8.—The Director of the Mint recently made a revised estimate of the stock of subsidiary silver coin, and as a consequence of such revision there has been a reduction of \$9,700,000.

NOTE 9.—The details of the foregoing table, showing the amount of each kind of money in circulation each year since 1860, are omitted; but they may be had upon application to the Secretary of the Treasury, Division of Loans and Currency, where a publication covering information on the subject has been prepared for distribution.

NOTE 10.—This table has been revised and shows slight changes from previous figures in many of the items.

the items.

a Based on warrants issued.

specific appropriations made for those purposes.

The expenses of collecting internal and customs revenue do not include the disbursements for salaries, etc., incident to auditing these accounts in the office of the Auditor for the Treasury Department.

d No data.

a Based on warrants issued.
b The cost of collecting the internal revenue embraces the following items: Salaries and expenses of the Internal-Revenue Service, including collectors, deputy collectors, clerks, etc., and including expenses incident to enforcing the provisions of law taxing oleomargarine: salaries and expenses of revenue agents, surveyors of distilleries, gaugers, storekeepers, and miscellaneous expenses; paper for internal-revenue stamps; expenses of detecting and punishing violations of internal-revenue laws; and expenses of collecting the corporation tax.
o The expenses of collecting the revenue from customs includes all sums drawn from the appropriation made by Congress for that purpose. The money is expended for salaries, rents, labor in weighing, gauging, and measuring imported merchandise, revenue boatmen, repairs, and other expenses incident to rented buildings, stationery, and the traveling expenses of special agents, but does not include disbursements for revenue cutters, fuel, lights, water, furniture, janitors, etc., for buildings owned by the Government, nor disbursements for erecting new buildings, all of which are paid for from specific appropriations made for those purposes.

eIncludes \$20,951,780.97 corporation tax.

APPENDIX.

REPORTS OF HEADS OF BUREAUS.

REPORT OF THE TREASURER.

TREASURY DEPARTMENT, OFFICE OF THE TREASURER, Washington, August 31, 1910.

SIR: The transactions of the Treasury of the United States for the fiscal year ended June 30, 1910, and its condition, at the close of the year, are presented in the following report.

ORDINARY RECEIPTS AND DISBURSEMENTS FOR 1909 AND 1910.

The ordinary receipts by warrants (and adjustments for moneys received but not covered by warrants), for the fiscal year 1910, were \$675,511,715.02, the maximum sum in the history of the Government. Compared with the preceding year there was an increase of \$71,922,225.18 in the receipts, while the ordinary disbursements were \$659,705,391.08, a decrease of \$2,619,053.69, which is the surprising feature of the year's transactions; the net result was a surplus of \$15,806,323.94.

The ordinary receipts and disbursements classified for the past two years are compared in the table following:

ORDINARY RECEIPTS AND DISBURSEMENTS FOR THE FISCAL YEARS 1909 AND 1910.

Total ordinary Net	662, 324, 444. 77	. 659,705,391.08	21,870,514.28	24, 489, 567. 97 2, 619, 053. 69
DeficitSurplus		15, 806, 323. 94		

From the foregoing table it will be observed that as compared with the preceding year there were increased receipts from customs of \$32,971,511.08, from internal revenue (ordinary) of \$22,769,094.89, from corporation tax (a new source of income) of \$20,951,780.97, and from the District of Columbia of \$51,942.84, while there were reductions in the receipts from public lands of \$1,344,770.29 and from mis-

cellaneous sources of \$4,051,134.47.

The disbursements on the various accounts show increases in some classes that are more than offset by reductions in others. The leading increase of disbursement was in the Navy Department of \$7,627,705.59, followed by that in Commerce and Labor of \$4,920,233.83, Treasury proper of \$4,226,037.32, Indians of \$2,809,-513.49, and smaller increased disbursements are recorded in diplomatic, Agriculture, Judiciary, internal revenue, and navy civil. The chief reduction of disbursement was in the postal deficiency of \$11,005,450. The War Department cost \$5,155,756.46 less than in The District of Columbia follows with a reducthe preceding year. tion of \$3,126,045.25. For interior civil \$2,900,251.51 less was spent. Disbursements for pensions fell off \$1,013,951.37; for customs, \$811,-756.46; for interest on the public debt, \$460,857.63; and for war civil \$15,499.29.

The net decrease was \$2,619,053.69, which was accomplished, perhaps in some instances, by postponing to a future day a part of the disbursements provided for by existing law.

As compared with the preceding two fiscal years in which there were net increased ordinary disbursements, in 1908 of \$69,397,261.60 and in 1909 of \$41,222,054.13, the showing distinctly emphasizes the fact that "the time is clearly ripe for wise and judicious savings in federal expenditures."

THE PANAMA CANAL.

Provision has been made for defraying the cost of construction of the Panama Canal from the proceeds of United States bonds issued and sold for the purpose, but it has not been deemed advisable to issue such bonds during the past fiscal year; therefore additional advances of \$33,911,673.37 were made for disbursements for the Panama Canal from the general fund. The total net balance expended out of the general fund of the Treasury to June 30, 1910, reimbursable from proceeds of bonds not yet sold, is \$116,786,747.24.

The proceeds of sales of bonds and the disbursements on account of the canal to the close of the fiscal year 1910 are set forth, by years. in the statement following:

RECEIPTS AND DISBURSEMENTS ON ACCOUNT OF THE PANAMA CANAL.

RECEIPTS AND DISBURSEMENTS ON ACCOUNT OF THE POST-OFFICE DEPARTMENT.

The receipts and disbursements on account of the Post-Office Department are under the exclusive control of the Postmaster-A statement of transactions relative thereto at the Treasury offices during the past year will be found on page 164 of this report.

TRANSACTIONS IN THE PUBLIC DEBT.

The cash receipts on account of the public debt during the past fiscal year were \$31,674,292.50 in lawful money of the United States to retire national-bank notes; the cash disbursements on account of principal of matured loans and fractional currency were \$760,925, and for national-bank notes canceled and retired \$32,288,770.50, a total disbursement for the public debt of \$33,049,695.50. The net cash result was an excess of disbursement of \$1,375,403. Other transactions related to the issue and redemption of the United States paper currency.

Comparison, by items, for the fiscal years 1909 and 1910 may be

seen in the subjoined table:

RECEIPTS AND DISBURSEMENTS ON ACCOUNT OF THE PUBLIC DEBT FOR 1909 AND 1910.

Notes and certificates redeemed: United States notes Treasury notes Cold certificates Silver certificates	132,940,000.00 767,000.00 261,892,000.00 326,796,000.00	129, 940, 000. 00 543, 000. 00 272, 843, 000. 00 349, 294, 600. 00	\$10,951,000.00 22,498,600.00	3,000,000.00 224,000.00
Total	.722, 395, 000. 00	752, 620, 600. 00	30, 225, 600. 00	
Aggregate	827, 391, 770. 00	785, 670, 295. 50		41,721,474.50
Excess of receipts	13, 473, 477. 71	13, 119, 597. 00		

In the foregoing table it will be observed that for the certificates issued an equal amount of the respective coins held in the general fund are transferred to and held in the trust funds for their redemption. The United States notes issued are offset by an equal amount of worn notes in kind canceled and retired, and for the Treasury notes canceled and retired a like amount of standard silver dollars is released from the trust funds and taken up in the general fund in their stead. Therefore, omitting the issues and redemptions of these obligations, the actual cash receipts and disbursements are as stated.

PUBLIC DEBT 1909 AND 1910.

There was no change made in the outstanding principal of the interest-bearing debt during the past fiscal year, at the close of which the total amount of the public debt, including certificates and Treasury notes, was \$2,652,665,838.04, as against \$2,639,546,241.04 twelve months earlier, an apparent increase of \$13,119,597. The items increased were: Gold certificates, \$10,335,000; silver certificates, \$4,703,000; while reductions were made in the following accounts: Matured loans, \$758,960; national-bank notes (redemption fund), \$614,478; fractional currency, \$1,965; and Treasury notes, \$543,000.

Comparison of the public debt is made, by items, for the fiscal years 1909 and 1910 in the table following:

Public Debt, 1909 and 1910.

MATURED BONDS NOT PRESENTED FOR REDEMPTION.

A material reduction was made in the amount of matured obligations outstanding during the fiscal year 1910. However, the attention of owners of such obligations is invited to the following statement of the matured loans not yet presented for redemption:

Loan.	Matured.	Amount outstand-ing.
Funded loan of 1891 Funded loan of 1891 continued at 2 per cent Loan of 1904 Funded loan of 1907. Refunding certificates. Total		

CHECKS ISSUED FOR INTEREST ON THE REGISTERED BONDS OF THE UNITED STATES.

The checks issued for interest on the registered bonds of the United States are mailed quarterly to the payees at the last address given, but owing to changes in location or death of the payees, a large number of such checks are not delivered and are returned to and filed in this office awaiting application therefor. Through persistent effort, by correspondence and otherwise, during the past fiscal year it has been possible to locate and to deliver to the rightful owners many of these checks. However, a great number of the checks, calling for several thousand dollars, remains on file.

RESERVE AND TRUST FUNDS.

The reserve of \$150,000,000 in gold required by the act of March 14, 1900, has been maintained at the fixed amount during the past fiscal year. This has been done by the exchange for gold coin each day of the United States notes and Treasury notes redeemed therefrom. During the fiscal year 1910 these redemptions and exchanges were, in United States notes, \$11,695,012, and in Treasury notes, \$9,880, making a total of \$11,704,892.

The trust funds at the close of the fiscal year 1910 aggregated \$1,355,725,869, a net increase of \$14,345,000 as compared with those of twelve months earlier. The gold coin increased \$10,185,000 and the silver dollars \$4,160,000. These funds are held for the redemption of the certificates and notes outstanding, for which they are respectively pledged. The transactions therein and the amount of

the funds at the close of the fiscal year were:

	Outstanding	Fiscal y	ear 1910.	Outstanding

AVAILABLE CASH BALANCE.

The efforts of the Department to meet the continuing outlay for construction of the Panama Canal from the ordinary receipts of the Government during the past fiscal year resulted in reducing the balance in the general fund in the Treasury by January 25, 1910, to \$77,085,536.92, the smallest amount held for many years. Improved financial conditions in the later months carried the balance upward, and at the close of the year it was \$106,894,675.67, a net decrease of \$19,480,752.43 as compared with that of the preceding year.

The monthly disbursements of the Government are of such magnitude that forethought prompts the accumulation of a working balance in available cash in the vaults of the Treasury of at least \$40,000,000. Such a balance should provide for emergencies in the event of an unfavorable change in financial conditions.

The balance in the Treasury at the end of each month from January, 1904, is stated in Table No. 31, page 201 of the appendix, and for July 1 in each year since 1900 in the annexed statement:

GOLD IN THE TREASURY.

The Treasury holdings of gold amounted to \$1,045,165,485.24 at the close of the fiscal year 1910, not the maximum in our annals, however, but more than is held under single control elsewhere in the world.

The total amount of gold in the Treasury on July 1 in each year from 1900, set apart for the respective uses, is recorded in the statement following:

BONDS HELD AS SECURITY FOR NATIONAL BANKS.

The United States bonds pledged as security for the circulating notes of national banks assumed a growth of \$26,285,810 during the past fiscal year, and at its close amounted to \$686,974,880. bonds pledged to secure the public deposits in national banks amounted to \$51,774,700 on June 30, 1910.

The transactions relative to deposits and withdrawals of bonds to secure circulation and deposits during the fiscal year 1910 may be

observed in the table following:

WITHDRAWAL OF BONDS TO SECURE CIRCULATION.

The act of March 4, 1907, limited the deposits of lawful money for the retirement of national-bank circulation to \$9,000,000 per month. This limit was not reached in any month during the last fiscal year, as may be seen in Table No. 62, page 233, of this report.

NATIONAL BANKS DESIGNATED AS DEPOSITARIES OF THE UNITED STATES.

The Secretary of the Treasury determines the number of such depositaries, the amount of public money required in each for the transaction of the public business, fixes the amount of balances they may hold, and requires the banks thus designated to give satisfactory security, by the deposit of United States bonds and otherwise, for the safe-keeping and prompt payment of the public money deposited with them, and for the faithful performance of their duties as financial agents of the Government. The regular depositaries receive and disburse the public moneys, and are required to pay interest at the rate of 1 per cent per annum on the average monthly amount of public deposits held in excess of the sum needed for the transaction of the public business, while the special depositaries hold only the moneys transferred to them from the Treasury. They pay interest at the same rate on the average monthly amount of public deposits held.

The number of national-bank depositaries at the close of the fiscal years 1909 and 1910 is given in the statement following:

	Regular.	Special.	Total.
Depositaries June 30, 1909. Depositaries June 30, 1910.	440	974	1,414

a The excess of public moneys in banks over the amount of bonds pledged therefor was caused by heavy deposits of corporation taxes late on the last day of June, the transfer of which could not be effected by the banks until the following day.

PUBLIC DEPOSITS IN NATIONAL BANKS.

The balance in banks to the credit of the general fund at the close of the fiscal year 1909 was \$60,427,525.69, against which the Secretary of the Treasury had on June 30, 1909, issued a call for the return to the Treasury of \$24,954,000. The regular depositaries were required to pay the amount demanded of them in equal parts on July 15 and 31, and the special depositaries the whole of the amount demanded of them on or before July 15. By the end of July the amount in banks to the credit of the general fund had been reduced to \$43,555,422.59. Additional payments into the Treasury during the month of August further reduced this amount and by the end of that month it became \$38,065,058.79. But slight variations were recorded in this balance during the following months, the tendency being downward to the close of April, when the balance to the credit of the

general fund was \$34,597,603.19.

To offset the drain upon the money in circulation in the District of Columbia due to the heavy tax payments in May and June, which are deposited directly in the Treasury, the Secretary of the Treasury deemed it advisable to deposit \$4,000,000 of public moneys in the local national banks, divided among the several banks in proportion to the total deposits therein; the deposits were made in four weekly installments beginning May 14 and were secured by bonds deposited with the Treasurer of the United States. Of the amount so placed, the depositaries were required to return to the Treasury 25 per cent on or before July 15, 25 per cent on or before August 15, and 10 per cent on or before the 15th of each following month, making the final deposit on or before January 14, 1911. The department reserved the right, however, to demand an earlier return of the money thus deposited if for any reason it should be deemed advisable. balance in banks to the credit of the general fund at the end of May was \$38,775,328.10. During the month of June the corporation tax levied by the new tariff law became payable and was collected in large amounts by the collectors of internal revenue near the end of that The collectors deposited their collections in banks and the banks transferred the amounts received in excess of the fixed balance to Treasury offices daily, though on the last day of the month, owing to the late hour at which the large amounts were deposited, transfers from some of the depositary banks could not be effected until the following day. At the close of the month of June the banks held to the credit of the general fund \$40,631,589.58, and to the credit of disbursing officers \$11,577,996.15, making a total of \$52,209,585.73.

UNAVAILABLE FUNDS.

The Treasurer of the United States has been relieved from further accountability for the public moneys deposited with the States under the act of June 23, 1836. The Sixty-first Congress, by act of June 25, 1910, authorized and directed the proper accounting officers of the Treasury Department to credit the general account of the Treasurer of the United States with the amount of the public moneys transferred to and deposited with the States under the provisions of an act of Congress approved June 23, 1836; provided, that the credit shall be

made in such manner as to debit the respective States chargeable therewith upon the personal account books of the department, until otherwise directed by Congress. Also, the Treasurer was relieved from further accountability for losses that occurred in subtreasury offices, heretofore reported and carried in unavailable funds, as follows:

Subtreasury United States:

Chicago, Ill., act of January 27, 1910	\$173,000
Boston, Mass., act of May 6, 1910	3,000
St. Louis, Mo., act of June 25, 1910	61, 500

The foregoing measures cleared the general account of the greater part of the unavailable funds heretofore reported. However, there is a number of items of such funds amounting to \$1,483,299.25 which have passed from the control of the Treasurer without fault or negligence on his part and from which he should be relieved.

In Senate Report No. 371—Forty-fourth Congress, first session—from the Finance Committee, submitted by the honorable chairman, Senator Sherman, on page 3 reference is made to this question of

unavailable funds, as follows:

All money in the Treasury, wherever it may be deposited or placed for disbursement or custody, is charged to the Treasurer of the United States. It is obvious, however, that this money may be lost without fault on the part of the Treasurer, by robbery, accident, defalcation of a subordinate officer, misconduct of depositaries having it in charge, or otherwise. Still, under the law, the Treasurer is responsible and is charged with these sums. Such a deficit would, in the accounts of a firm, be a simple plain entry in the profit and loss account by crediting cash and debiting the defaulter. But from the fact before stated that money can not be taken from the Treasury except by an appropriation, this course could not be pursued. An account called "unavailables" was created, which was charged with the amounts, and the Treasurer credited in his general account through the statement of an account by the accounting officers. This method of relieving the Treasurer is, your committee are informed, a practice which has grown up, and is not authorized by law, and for some years past has been prohibited by the Comptroller, and has been discontinued. It is plain that the Treasurer should be relieved from this responsibility, and that Congress should in some proper way provide by law for the dropping of these unavailable funds, by authorizing a credit to the Treasurer and a corresponding charge against the defaulting officer who fails to pay the money on demand.

An itemized statement of the unavailable funds will be found in Table No. 22, on page 180 of this report.

MONETARY STOCK.

According to the revised estimates the total monetary stock of the United States on June 30, 1910, was \$3,419,591,483, of which \$1,636,043,478 was gold. As compared with that of twelve months earlier there was a net increase of \$13,263,129 in the total stock, notwithstanding a reduction of \$9,700,000 was made in the revised estimate of the stock of subsidiary silver coin.

The aggregate monetary material, both metallic and paper, and the distribution of each component between the Treasury and the circulation, at the close of June, 1909 and 1910, are exhibited in the

following statement:

MONEY IN CIRCULATION.

The money in circulation at the close of the last fiscal year amounted to \$3,102,355,605, a decrease of \$3,885,052 as compared with that of the preceding year. Increased circulation is recorded in the volume of standard silver dollars, silver certificates, subsidiary silver coin, and national-bank notes, while reductions appear in the volume of gold coin and certificates, United States notes, and Treasury notes of 1890. The circulation per capita was \$34.33.

Comparison by kinds of money in circulation for the years since

1900 is presented in the table following:

Money in Circulation at the End of each Fiscal Year from 1900.

			Percent- age of				
Fiscal year.	Gold coin and gold cer- tificates.	United States notes and Treasury notes.	National- bank notes.	Silver coin and silver certificates.	Total.	Circu- lation per capita.	gold coin and cer- tificates to total circula- tion.

a Decrease.

CONDITION OF THE UNITED STATES PAPER CURRENCY.

The large amount of worn currency redeemed and replaced by new issues during the past fiscal year has improved the condition of the paper money in circulation. However, there is a constant and wide-spread interest at large which advocates a cleaner and more sanitary currency. The sentiment is a laudable one and should be attainable, because the expenditure, as per tables of cost, page 24, is but a trifle as compared with the beneficent results. The Government can well afford to replace its paper issues when unfit for circulation. It is suggested that recommendation be made for increasing the facilities for exchanging worn and defaced United States currency, and for sharing with the public the expenses incident thereto.

UNITED STATES NOTES.

The amount of United States notes issued and redeemed during the last fiscal year was \$129,940,000, a decrease of \$3,000,000 as compared with that of 1909. The demand for notes of the denomination of \$5 was supplied largely in United States notes; the fives outstanding were increased by \$26,825,705 and the twenties by \$3,247,720, while all other denominations were decreased.

The amounts issued and redeemed, by denominations, during the

fiscal year 1910 are recorded in the annexed table:

	•	Outstanding	Fiscal y	Outstanding	
Denomination.	•	June 30, 1909.	Issued.	Redeemed.	June 30, 1910.

TREASURY NOTES OF 1890.

The Treasury notes of 1890, under provisions of law, are disappearing. The total amount issued was \$155,931,002, and the amount outstanding at the close of the last fiscal year had been reduced to \$3,672,000, against which standard silver dollars in equal amount are held in the trust funds for their redemption when presented. The amount outstanding by denominations is stated in Table No. 33, page 205, of this report.

GOLD CERTIFICATES.

The people of the United States, except on the Pacific coast, do not care to handle large amounts of coin in their business transactions, hence they exercise the option offered under existing law of depositing the coin in the Treasury and receiving in its stead the certificates

which in recent years have become so popular in our circulation. The gold certificates are restricted in denominations to \$10 and above but there appears to be good reason for the issue of a \$5 gold certificate. The volume of gold certificates is greater than that of any other kind of paper money in circulation, therefore large amounts of this currency are sent to the Treasury for redemption with requests for a part of the returns in denominations of \$5. The total amount of gold certificates outstanding on June 30, 1910, was \$862,936,869, an increase of \$10,335,000 as compared with that of the preceding year.

The transactions in this currency during the fiscal year 1910 are

recorded, by denominations, in the table following:

Denomination.	Outstanding June 30, 1909.	Fiscal 3	Outstanding	
Denomination.		Issued.	Redeemed.	June 30, 1910.
Ten dollars. Twenty dollars. Fifty dollars. One hundred dollars. Five hundred dollars. One thousand dollars. Fivo thousand dollars. Total	852,601,869	283,178,000	272,843,000	862,936,869

SILVER CERTIFICATES.

Silver certificates are issued largely in denominations of \$1, \$2, and \$5, and are in great demand. The volume that may be issued is limited to the standard silver dollars available for the purpose. On June 30, 1910, the total stock of such dollars was \$564,605,508, of which \$72,432,514 were in circulation. The total amount of silver certificates outstanding at the close of the fiscal year 1910 was \$489,117,000, an increase of \$4,703,000 as compared with that of 1909.

The transactions in silver certificates, by denominations, during the last fiscal year are shown in the following table:

Denomination.	Outstand-	Fiscal y	Outstand-	
	ing June 30, 1909.	Issued.	Redeemed.	ing June 30, 1910.
One dollar. Two dollars Five dollars Ten dollars. Twenty dollars. Tity dollars. One hundred dollars Five hundred dollars. Total	484, 414, 000	353, 997, 600	349, 294, 600	489, 117, 000

CHANGES IN DENOMINATIONS.

The demand for small denominations of currency, \$5 and under, was incessant throughout the past fiscal year. The resources of the Treasury for the issue of such denominations were practically limited to the process of redemption and reissue in kind. For denominations of \$10 and above recourse was had to the gold coin against which gold certificates were issued.

COST OF PAPER CURRENCY.

Inquiries frequently reach the department relating to the cost of the paper currency issued directly by the Government. As a matter of information it may be stated that the paper used is made by a secret process under Treasury supervision by special contract, renewed every year. The Bureau of Engraving and Printing, a branch of the Department, designs, under the direction of the Secretary, engraves, and prints the notes and certificates complete. This currency is delivered to the Treasurer in packages of four thousand notes, the product of one thousand sheets of paper. Such a package is taken as the unit from which to reckon the cost.

With allowance for every item of expense attending the making, the issue and redemption of this paper currency, it appears that the average cost is as follows:

Total average expense of 4,000 notes issued	\$54. 04 8. 80
Aggregate average expense of issue and redemption	62. 84

From the foregoing it will be seen that the average cost for each note is 1.571 cents. Calculations based upon these average expenses of issue and redemption indicate results that will be very close to the actual cost of maintenance of the paper currency, and such cost for the fiscal years 1909 and 1910 may be studied from the details set forth in the annexed table:

TOTAL EXPENSES OF ISSUE AND REDEMPTION.

Fiscal year.	Number of pieces.	Cost per 1,000 pieces.	Total cost.

AVERAGE LIFE OF PAPER CURRENCY.

Experience shows that the average life of the paper currency is shortened by the increasing activities of paper money in the business transactions of the country This is especially noticeable in the

smaller denominations of silver certificates—\$1, \$2, and \$5. The average lifetime of each note, by kinds, may be seen in the statement following:

AVERAGE LIFE OF EACH NOTE AND CERTIFICATE IN YEARS.

Denominations.	United States notes.	Treasury notes.	Gold cer- tificates.	Silver certifi- cates.	National- bank notes.
One dollar. Two dollars. Five dollars. Ten dollars. Twenty dollars. Fifty dollars. Fifty dollars. Five hundred dollars. Five hundred dollars. One thousand dollars. Five thousand dollars. Ten thousand dollars. Ten thousand dollars.	3. 202 3. 582 3. 665 5. 889 6. 119 6. 069 3. 746 3. 974 . 326	1. 732 1. 863 2. 947 3. 702 3. 970 3. 697 3. 601	1, 512 3, 213 3, 553 3, 480 3, 307 3, 001 1, 721 1, 540	1, 152 1, 329 1, 930 3, 392 3, 904 3, 016 2, 767 1, 880 1, 414	4. 383 4. 499 3. 172 3. 024 3. 357 4. 116 3. 903 5. 218 3. 343
All denominations.	3. 515	2.188	2. 605	1.430	3. 228

The national-bank circulation owes its apparent advantage of longevity over other issues to the circumstance that the original plan of redemption was found to be practically inefficient. Since the inauguration of the present system of redemptions in the office of the Treasurer on July 1, 1874, these notes have been freely retired on becoming unserviceable, with a consequent shortening of their life, but the records of the earlier period still affect the calculation based on the whole history of the issue.

PAPER CURRENCY PREPARED FOR ISSUE AND AMOUNT ISSUED.

The increasing volume of the paper currency issued directly by the Government calls for the preparation of an adequate supply of the respective kinds and denominations authorized by law in advance of putting it into circulation. The pieces of currency issued during the fiscal year 1910 numbered 240,990,922 as against 235,210,400 prepared for issue.

Economy and prudence suggest the preparation of a greater volume to be held in reserve in order to supply demands for increased issues and to secure the best results in appearance and wear when put in circulation

The number of pieces and amount of paper currency prepared for issue and the amount issued since 1902 is recorded in the annexed table:

	Prepared for issue.			Paper currency issued.		
Fiscal year.	Number of notes and certificates.	Total value.	Average value.	Number of notes and certificates.	Total value.	A verage value.
1902. 1903. 1904. 1905. 1906. 1907. 1908. 1909.	136, 721, 000 148, 446, 000 159, 463, 000 157, 425, 000 178, 180, 000 197, 012, 000 206, 898, 000 235, 210, 400	\$591, 580, 000 617, 936, 000 762, 820, 000 510, 524, 000 602, 172, 000 679, 480, 000 858, 944, 000 637, 320, 000 809, 579, 600	\$4. 326 4. 162 4. 783 3. 285 3. 825 3. 813 4. 359 3. 080 3. 441	116, 697, 874 141, 235, 371 152, 908, 853 169, 259, 812 172, 930, 548 173, 093, 911 188, 999, 912 202, 746, 192 240, 990, 922	\$466, 908, 000 551, 038, 000 650, 026, 000 637, 540, 000 629, 826, 000 698, 273, 000 804, 326, 000 764, 510, 000 767, 115, 600	\$4.000 3.901 4.251 3.766 3.642 4.034 4.255 3.770 3.183

The number of pieces of paper currency issued during the fiscal year 1910 was 240,990,922, an increase of 38,244,730, or 18.8 per cent, as compared with that of 1909.

The issues of United States paper currency, by months, for the fiscal years 1909 and 1910 are stated in the table following:

United States Paper Currency Issued during the Fiscal Years 1909 and 1910.

	Fis	Fiscal year 1909.			Fiscal year 1910.

a Decrease.

REDEMPTIONS OF PAPER CURRENCY.

The redemptions follow within a short period the issues of government currency. The demand for small denominations and the growing activities of the currency in circulation, by which its life of usefulness is shortened, increased both the number of pieces and amount returned to the Treasury for redemption. During the fiscal year 1910 the number of pieces redeemed was 216,173,273, an increase of 21,665,704, or 11.1 per cent, over those of 1909.

The redemptions, by months, for the fiscal years 1909 and 1910 are

recorded in the subjoined table:

UNITED STATES PAPER CURRENCY REDEEMED DURING THE FISCAL YEARS 1909 AND

	Fis	Fiscal year 1909.			cal year 1910.

The method of handling the paper issues of the Government redeemed at subtreasury offices has undergone a change during the past year. It has been found practicable, by experiments at the subtreasury in New York, to cancel such redemptions at the office where made, and to ship the canceled notes and certificates to the Treasury by registered mail instead of by express as heretofore. The change will result in a large saving of expense on account of transportation. The subtreasury at New York is now operating under the new method and the practice will be extended to other subtreasuries in the near future.

STANDARD SILVER DOLLARS.

At the close of the fiscal year 1910 there were 72,432,514 standard silver dollars in actual circulation, while the Treasury held 492,172,994 of these coins, against which there were outstanding \$489,117,000 in silver certificates.

Many of these coins have been in use for more than thirty-two years and have become unfit for circulation, as is evidenced by the growing number of uncurrent pieces returned to the Treasury each fiscal year.

This condition seems to call for some action whereby such coins

may be made available to meet current demands.

Silver dollars are shipped to depositors therefor, but at the expense of the consignee. The transactions on this account, by months, during the fiscal years 1909 and 1910 are compared in the table following:

MOVEMENT OF STANDARD SILVER DOLLARS.

	Month.	•		1909.	1910.
uly				\$797,530	\$1,182,00

EXCHANGE OF STANDARD SILVER DOLLARS.

During the fiscal year 1910 there was presented at the Treasury offices for exchange \$21,386,833 in standard silver dollars, a decrease of \$2,101,771 as compared with like presentations in 1909. The exchanges of these coins exceeded the shipments in 1908 by \$12,213,856, in 1909 by \$11,623,424, and in 1910 by \$7,002,099.

The amounts presented at the Treasury offices for exchange during the past three fiscal years were:

	Fiscal year—			
Office.	1908.	1909.	1910.	
Washington Baltimore New York Philadelphia Boston Cincinnati Chicago St. Louis New Orleans San Francisco	1,168,360 5,820,240 3,619,804 1,360,430 5,781,908 10,372,210 6,707,808 4,199,950	\$771,113 842,650 3,595,592 2,594,168 755,770 2,971,280 2,596,442 2,718,820 2,053,000 1,229,769	\$469, 441 857, 210 3, 395, 695 2, 961, 326 705, 585 2, 501, 500 5, 333, 864 2, 527, 630 1, 698, 510 936, 072	
Total	43, 680, 767	23, 488, 604	21,386,833	

SUBSIDIARY SILVER COIN.

The general stock of subsidiary silver coin at the close of the last fiscal year was \$155,158,748, a decrease of \$4,249,798, as compared with that of twelve months earlier. The Treasury holdings were \$19,575,017, a decrease of \$7,501,731 as compared with that of 1909, while the amount in actual circulation was \$135,583,731, as against \$132,331,798 in 1909.

The amount shipped to depositors therefor, by months, during the past three fiscal years may be observed in the statement following:

	Fiscal year—			
Month.	1908.	1909.	1910.	
July August September October November December January February March April May. June	2,857,516.70 3,462,291.80 4,017,353.70 4,877,095.19 3,350,184.50 1,245,583.90 1,130,280.40 1,604,818.00 1,961,684.60 1,969,135.00 2,582,974.80	\$1, 977, 268. 80 3, 172, 594. 60 4, 460, 330. 40 4, 774, 580. 55 3, 868, 170. 40 3, 592, 593. 388. 00 1, 738, 173. 20 2, 521, 244. 30 2, 521, 244. 30 2, 744, 729. 20 314, 404. 20 36, 058, 567. 75	\$2, 982, 761. 4; 3, 737, 759. 4(5, 866, 250. 3; 5, 694, 439. 7(4, 532, 163. 0(4, 636, 027. 4(1, 711. 884. 2(2, 140, 215. 1(2, 924, 952. 2(2, 841, 488. 6(2, 915. 057. 2(3, 994, 041. 13) 43, 977, 039. 7(

The distribution of subsidiary silver coin to depositors therefor will be at the expense of the consignee for transportation charges, as Congress made no appropriation for such purpose for the ensuing fiscal year.

REDEMPTION OF SUBSIDIARY SILVER COIN.

Subsidiary silver coins are redeemable in the lawful money of the United States, and when so redeemed are again distributed either by shipments to depositors therefor or paid over the counter at Treasury offices in exchange for other kinds of money.

The amount of such coins redeemed at the treasury offices for the fiscal years 1908, 1909, and 1910 is recorded in the statement following:

	Fiscal year—			
Office.	1908.	1909.	1910.	
Washington Baltimore New York Philadelphia Boston Cincinnati Chicago St.Louis New Orleans San Francisco	18,126,042 6,235,714 2,450,010	\$2,821,085 2,746,760 21,550,856 6,950,945 2,214,065 2,884,430 6,400,673 5,327,242 2,845,940 2,577,684	\$2,638,173 3,007,090 25,280,283 7,419,780 2,576,060 2,675,914 6,426,720 6,043,795 3,117,001 2,779,645	
Total.	54,611,196	. 56,323,680	61,964,361	

MINOR COIN.

Minor coins are not included in the stated stock of money in the United States, though in general use in every section of the country. A new design for the bronze one-cent piece was adopted in April, 1909. On the obverse the head of Lincoln appears instead of the Indian head which this piece had borne since 1864. The distribution of this piece was commenced on August 2, 1909, and the demand for it has been heavy and continuous.

An addition of \$2,338,877.19 to the coinage was made during the last fiscal year, of which \$1,486,095.29 was in bronze cents and \$852,781.90 in nickel 5-cent pieces.

The amount of each denomination of minor coin outstanding at the close of the fiscal years 1909 and 1910 is given in the statement here:

	Outstanding Fiscal year 19		ear 1910.	Outstanding	
	June 30, 1909.	Coined.	Remelted.	June 30, 1910.	
Copper cents	\$1, 182, 344. 99 39, 926, 11		\$110. 86	\$1,182,234.13 39,926.11

MOVEMENT OF MINOR COIN.

The distribution of minor coin to depositors therefor during the last fiscal year was \$5,875,096.01, an increase of \$2,090,192.89 as compared with that of the preceding twelve months.

In future the distribution of minor coin to depositors therefor will be at the expense of the consignee for transportation, as Congress made no appropriation for such purposes for the ensuing fiscal year.

The shipments by offices for the fiscal years 1909 and 1910 are reported in the statement following:

	Fiscal ye	ar 1909.	Fiscal year 1910.	
Office.	Amount.	Expense of transportation.	Amount.	Expense of transportation.

REDEMPTION OF MINOR COIN.

Minor coins are redeemable in the lawful money of the United States, and the amount presented to Treasury offices for such redemption for the fiscal years 1909 and 1910 is recorded in the subjoined statement:

	Fiscal y	rear
	1909.	1910.

MONEY FOR MOVING THE CROPS.

The different sections of the country appear to be less dependent upon the money centers for cash to move the crops than in former years, and as a consequence there are fewer requests for Treasury coöperation in making transfers of funds from New York to other subtreasury cities. The following table gives the deposits in New York in all calendar years, when any were made, and the resultant payments in the several cities from 1906 to June 30, 1910:

Transaction.	Gold coin and certificates.	United States notes.	Silver dollars and certificates.	Total.

EXCHANGE FOR GOLD RECEIVED AT MINTS AND ASSAY OFFICES.

The facilities provided by the Treasury for marketing the new product of gold bullion attracts to the mints and assay offices the greater part of the output of our mines. Practically all imports of gold are deposited in the Treasury.

The amount of exchange given the several mints and assay offices to pay for local deposits of gold during the fiscal year 1910 is

recorded in the following statement:

		E	xchange on-	 .	
Mint or assay office.	New York.	Philadel- phia.	Chicago.	San Fran- cisco.	Total.
Mint, Carson Denver San Francisco	\$700,000 2,000,000 14,000,000			\$500,000	\$1,200,000 10,000,000 14,000,000

Total	24, 985, 000	450,000	8, 100, 000	500,000	34, 035, 000

It is the duty of the Government to receive and coin all gold bullion tendered under provisions of existing law. As there is no profit accruing from the transactions it becomes necessary, in the interest of good administration, to minimize the expense. Under present regulations the western mints and assay offices are provided with exchange on the subtreasury offices with which to pay for local deposits of gold bullion. This manner of payment favors the depositors of gold bullion at the expense of the Government. It is equivalent to paying the market price for their product at the place of delivery and of transporting the proceeds free of expense to the place where the money is wanted.

The gold bullion deposited at the assay offices is transferred to mints at the expense of the Government for transportation. Under the operations of the foregoing method the resources of the subtreasury offices are being gradually transferred to the western mints, and ultimately these funds will have to be moved bodily back to the subtreasuries at great expense for transportation. In fact, the Treasury is now confronted with the necessity of supplying the subtreasury in New York with gold coin to meet the demands against that office. This situation would seem to require attention and is now having

our consideration.

SHIPMENTS OF CURRENCY FROM WASHINGTON.

The Treasury in Washington shipped currency during the last fiscal year to the amount of \$623,231,326, an increase of \$51,850,779 as compared with that of the previous fiscal year. In 1909 the number of packages sent was 96,172, while in 1910 they numbered 105,047, an increase of 8,875.

The transactions during the past two fiscal years are compared in the statement following:

	Fiscal	Fiscal year 1909.		Fiscal year 1910.	
	Number of packages.	Amount.	Number of packages.	Amount.

REDEMPTIONS AND EXCHANGES.

The moneys received in the redemption and exchange account during the fiscal year 1910 amounted to \$1,455,468,567 and were equal to 46.9 per cent of the total money circulation of the country at the close of the year.

The kinds of money received and paid at Treasury offices on account of redemptions and exchanges is stated in the table following:

RECEIPTS.

	Kinds of money received by Treasury offices.

REDEMPTION OF NATIONAL BANK NOTES.

The national bank notes presented for redemption during the fiscal year amounted to \$502,498,994. This was \$40,976,792 more than was presented in the previous year. The amount received from the banks in New York City was \$234,110,000, or 47 per cent of the total. The average amount of notes outstanding during the year was \$707,919,327, of which 70.98 per cent was redeemed. Both the redemptions and the outstanding were the largest in the history of the national banking system. The inactivity in the business of the country following the monetary disturbance in the latter part of the calendar year 1907, appears to have been reflected in an increase of \$109,319,660, or 45.49 per cent, in the amount of bank notes redeemed in the fiscal year 1908, following an increase of \$73,027,955, or 12.39 per cent, in the average amount of notes outstanding. The disparity between the per cent of increase in the outstanding and the redemptions continued in the fiscal year 1909 when a further increase of only \$18,192,753, or 2.75 per cent, in circulation was accompanied by an increase of \$111,887,861, or 32 per cent, in redemptions. The increase continued in 1910, but the

difference between the circulation and redemptions was less than in the two previous years. This was probably due to a general improvement in business calling for a more active employment of the notes. The figures are given below.

THE AVERAGE OUTSTANDING CIRCULATION, THE REDEMPTIONS, AND THE INCREASE IN EACH SINCE 1907.

	A verage outstanding.			Redemptions

a Decrease.

The usual data as to the total number of notes redeemed and the redemptions by denominations, the average denomination outstanding, and the average denomination redeemed for the fiscal year are furnished in the following table. Comparison with similar data for the previous year shows an increase of more than 10 per cent in the redemptions of \$5 notes.

	·.	1909.	1910.
Total number of notes redeemed		47, 294, 777	52,706,869
Redemptions by denominations— 5's	percent	75.00	85.53
10's	do	69.34	70.39
20's 50's	do	64.00 54.40	63. 28 59. 10
100's	do	51. 17	59.10 59.10
Average denomination outstanding		\$10.11	\$10.07
Average denomination redeemed		\$9.71	\$9.48

In verifying the remittances of bank notes received for redemption there were found differences in count amounting to \$74,856 in favor of the owners and \$87,265 against the owners, and \$910 in counterfeit notes. The proceeds of the remittances, \$499,599,883, were paid for by the issue of \$171,238,565 in the Treasurer's checks on the various subtreasuries, by the shipment of \$250,279,311 in new United States currency and \$239,196 in coin, and of credits in accounts to the amount of \$77,842,811. As compared with the previous fiscal year the demand for checks in payment fell off from 48 per cent to 34 per cent; and the demand for new United States currency, practically all in small denominations, increased from 36 per cent to 50 per cent. This increase is noticeable as it is the largest rate per cent of payments made in currency since the fiscal year 1900.

The redeemed notes assorted by banks of issue and delivered

The redeemed notes assorted by banks of issue and delivered during the year amounted to \$493,849,153. Of this sum \$118,015,100, or 23.90 per cent, was fit for circulation and was forwarded to the respective banks of issue, and there was delivered to the Comptroller of the Currency for reissue \$343,545,282.50 and for retirement

\$32,288,770.50. The deposits received during the fiscal year on retirement account amounted to \$31,674,292.50. Of this sum \$17,332,312.50 was deposited by active banks under the provisions of law for reducing circulation and \$14,341,980 by insolvent and liquidating banks for retiring circulation or by active banks to replace an old series of notes by a new series under the requirement of the extension of charter, act of 1882. The deposits were \$13,947,447 less than in the previous year, due to the reduction of deposits by active banks for retiring circulation.

The table of percentage of outstanding national bank notes redeemed and assorted (No. 78 in the appendix) shows that the notes of banks in the New England States were redeemed in the fiscal year 1909 at the rate of 86.63 per cent of the outstanding, and those of banks in the Eastern States at the rate of 94.60 per cent, while the rate of redemption for all other sections of States was less than 72.85 per cent, the general average for the whole country. The States of Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, California, and Hawaii, taken singly, however, show redemptions in

excess of the general average.

Computing for all banks, twenty days is the average period required to assort and deliver redeemed notes and to get the 5 per cent fund reimbursed, and, consequently, whenever the daily rate of redemptions for twenty consecutive days equals or exceeds one-twentieth of the 5 per cent fund that fund becomes exhausted. In the past three years redemptions have increased to such an extent that the daily rate of one-twentieth, the maximum rate the fund will stand, is always largely exceeded in the month of January and is generally reached in the months of April, May, June, and July. The result is that in January the Treasury has to advance a large sum for the redemption of notes on the security of the notes, which advance is repaid during February and March when a sharp decrease in the rate of redemptions enables the agency to dispose of the January accumulations. The advances that have been required in the months of April, May, June, and July, have been nominal in amount and of short duration and probably do not require attention, but the situation in January is acute and calls for some remedy to prevent encroachment upon the general fund in the Treasury. As the notes are obligations of the banks and not of the Treasury, it is suggested that the banks be called on early in January of each year to make an additional deposit of 5 per cent of their circulation to be used to meet this unusual demand for redemption in that month. This additional deposit should not be any hardship, for the reason that the particular time the deposit is needed is one of inactive money—the temporary inactivity in money being the cause of the excessive redemptions. Prompt remittances would materially assist in the maintenance of the 5 per cent fund during periods of excessive redemptions, and the Treasurer calls attention to the fact that an immediate remittance on receipt of an advice of redemption is a requirement of the law.

The expenses incurred during the year amounting to \$434,093.10, exhibited in detail in table No. 75, have been assessed on the banks in proportion to their notes redeemed at the rate of \$0.88066 per

\$1,000.

SPURIOUS ISSUES DETECTED IN 1910.

There was a falling off in the nominal value of the counterfeit coins and paper currency detected at the Treasury and subtreasury offices during the past fiscal year.

Comparison, by items, for the past two fiscal years follows:

Kind.	1909.	1910.
United States notes	\$5,735.00	\$4,340.00

Total	13, 629. 14	10,979.20

SPECIAL TRUST FUNDS.

The transactions in the special trusts held by the Treasurer during the fiscal year 1910 were limited to two accounts, viz, Panama Railroad notes, and bonds for contractors of the District of Columbia.

The contract with the North American Commercial Company for taking fur seals in Alaska terminated June 30, 1910. The United States bonds held for that company at the close of the last fiscal year under special provisions of law have since been surrendered to the company.

The kinds of obligations and amounts held on each account are recorded in the statement following:

SPECIAL TRUST FUNDS IN THE CUSTODY OF THE TREASURER OF THE UNITED STATES AT THE CLOSE OF THE FISCAL YEAR 1910.

Total	5, 366, 642. 413	213, 151. 00	851, 684. 92	4, 728, 108. 493

In explanation of the foregoing special trusts it may be said that renewed interest is awakened in effecting a settlement with the States of Louisiana, North Carolina, and Tennessee for the unpaid matured bonds of those States belonging to the United States. It is believed that settlement of these unadjusted accounts will be reached in the near future.

The bonds held for the Manhattan Savings Institution are in trust for that institution as indemnity for certain stolen bonds, as provided by act of December 19, 1878 (20 Stat., 589), and will be held for such time as, in the judgment of the Secretary of the Treasury, will secure the Treasurer of the United States against loss.

Recommendation has been made to Congress for authority to return to the State of Louisiana the bonds of that State captured at Shreveport by the Union forces during the war of the rebellion, now held as

a special deposit for the Secretary of War.

The special trust held for the Secretary of the Treasury is composed of notes of the Panama Railroad Company drawing 4 per cent interest payable to the United States, and is security for money advanced for

the equipment and construction of said railroad.

The special trust held for the District of Columbia represents, first, the moneys retained from contractors under provisions of law and invested at the request and risk of said contractors; second, obligations that belong to the District of Columbia.

DISTRICT OF COLUMBIA.

The transactions of the Treasurer of the United States, ex-officio commissioner of the sinking fund of the District of Columbia, pertaining to the affairs of the District, are fully set forth in a separate report.

During the fiscal year 1910 the bonds of the funded debt retired amounted to \$622,050, resulting in the reduction of the annual

interest charge by \$22,704.82.

From July 1, 1878, to the close of the fiscal year 1910 the bonded debt was increased by the issue of 3.65 per cent bonds amounting to \$1,254,050, and decreased by the operation of the sinking funds and otherwise \$13,868,600, making a net reduction of \$12,614,550, and of the annual interest charge \$669,297.47. The interest-bearing bonds outstanding June 30, 1910, amounted to \$9,492,100, bearing 3.65 per cent interest.

The retentions from 47 District of Columbia contracts were canceled during the year by the return to the contractors of \$13,970 in

bonds and \$35,490 in cash.

At the close of the fiscal year 1910 the 10 per cent guaranty fund amounted to \$255,915.70 and was credited to 66 separate contracts, and is represented by \$175,210, in bonds purchased at the request and risk of the contractors and \$70,344.29 uninvested cash.

The unsigned 3.65 per cent bonds of the District of Columbia, amounting to \$11,308,450, are in the vaults of the Register of the

Treasury.

The securities of the District of Columbia in the care and custody of the Treasurer of the United States are enumerated on page 37 of this report.

LEGISLATION RECOMMENDED.

It is suggested that recommendation to Congress be made in such form as may be deemed advisable for legislation that will authorize favorable action on the following subjects:

1. Gold certificates for \$5.—There is necessity for increasing the resources of the Treasury for the issue of small denominations of currency. It is believed that the issue of gold certificates for \$5

65872°—FI 1910——11

http://fraser.stlouisfed.org/ Oderal Reserve Bank of St. Louis instead of restricting the issue as now to \$10 and above will enable the Department to respond to the demands for small denominations.

2. Gold certificates for gold bullion.—It appears desirable from an economical point of view to issue gold certificates upon deposits of gold bars, payable in gold coin, provided that the issue of such certificates does not exceed a reasonable per cent of the total volume of gold certificates.

The issue of such gold certificates should result in the saving of an appreciable part of the expenses attending coinage, and at the same time would permit us to have available at exporting points gold bars

always ready for export.

3. Recoinage of uncurrent silver dollars.—The accumulation of uncurrent silver dollars in the Treasury calls for some action whereby

such coins may be made available to meet current demands.

4. Relief to the Treasurer of the United States for unavailable funds now carried in his general account.—There still remain items of unavailable funds heretofore reported, Table No. 22, page 180, amounting to \$1,483,299.25, which have passed from the control of the Treasurer without fault or negligence on his part and from which he should be relieved.

- 5. Increased facilities for exchanging worn and defaced United States paper currency for new.—There is a constant and widespread interest which advocates a cleaner and more sanitary currency. The sentiment is a laudable one and should be attainable, because the expense is but a trifle as compared with the beneficent results. The Government can well afford to replace its paper issues when unfit for circulation.
- 6. Increase of the 5 per cent bank-note redemption fund.—Experience shows that the 5 per cent bank-note redemption fund is not adequate for the purposes intended. In January, April, May, June, and July the Treasury had to advance a large sum for the redemption of notes on the security of the notes. As the notes are not obligations of the Treasury the banks should be required to deposit a greater amount to provide for current redemptions.

The present incumbent assumed the duties of the office of Treasurer of the United States upon the termination of the administration of Hon. Charles H. Treat, November 1, 1909.

The transfer involved an examination of all moneys, securities, and other evidences of value which came into the direct charge of the Treasurer, amounting to \$1,260,134,946.88\frac{2}{3}, the maximum sum

so transferred in the history of our Government.

The examination was conducted in a very thorough manner, and on its completion the Department had, from the report of the committee in charge, the most satisfactory assurance that the funds transferred were absolutely correct. This result is perhaps the best comment on the zeal and ability which the staff, chiefs of division, and clerks of every grade in the office have exercised in the discharge of their responsible duties, and by which they have merited the confidence of the present Treasurer no less than that of his predecessors.

Respectfully submitted.

LEE McClung, Treasurer of the United States.

Hon, Franklin MacVeagh, Secretary of the Treasury.

APPENDIX TO REPORT OF THE TREASURER.

No. 1.—Receipts and Disbursements for the Fiscal Year 1910, as Shown by Warrants Issued.

REPORT OF THE DIRECTOR OF THE MINT.

TREASURY DEPARTMENT,
BUREAU OF THE MINT,
Washington, January 6, 1911.

Sir: In compliance with the provisions of section 343, Revised Statutes of the United States, the following report covering the operations of the mints and assay offices of the United States during the fiscal year ended June 30, 1910, being the thirty-eighth annual report of the Director of the Mint, is respectfully submitted:

VOLUME OF COINAGE.

The value of the coinage executed at the mints in the fiscal year ended June 30, 1910, was less than in the preceding year, and considerably below the value of the gold deposits. The gold deposits in the fiscal year 1909 amounted to \$142,124,941.59 and the gold coinage of that year was \$120,399,953.35. The gold deposits in the fiscal year 1910 amounted to \$126,767,967, and the gold coinage for the latter period was only \$47,578,875. The principal reason for not doing more coinage was that automatic weighing machines were under construction which were expected to materially reduce the cost of weighing the individual coins, and pending their completion gold bullion was allowed to accumulate.

AUTOMATIC MACHINES.

For a number of years the machine shop of the Philadelphia Mint had been at work developing an automatic weighing machine to do away with the hand weighing of each individual coin produced. The first machine was completed in 1907, was a success, and exhibited at the Jamestown Exposition. About that time, however, the experts who were engaged upon this machine were called upon to build a machine for the customs service, which they were successful in doing, but the task diverted them temporarily from the equipment of the mints. Four machines were completed by the end of 1908, and early in 1910 the Philadelphia machine shop began work upon four more. These machines have now been completed and are in use, three in

241

San Francisco, two in Denver, and three in Philadelphia. They are very satisfactory and have accomplished an important reduction in

the number of employees in the mints.

During the year an automatic feeding apparatus was placed upon all the coining presses in the Philadelphia Mint, accomplishing a considerable reduction in the number of employees required to operate the 21 presses in that institution. These feeds have also been introduced at Denver and San Francisco. Similar apparatus had previously been attached to the upsetting machines.

REDUCTION IN COINAGE OPERATIONS.

An important reduction in the amount of work for the mints to do has occurred in recent years by reason of the cessation in the coinage of silver dollars and the practical completion of the Philippine stock. The silver bullion purchased under the act of July 14, 1890, was exhausted in 1905, and the coinage of dollar pieces, which had been at the rate of 1,500,000 per month, ended with it. The record coinage for the mints is that of the fiscal year 1902, which amounted in value to \$228,202,151.55, not including 12,552,629 pesos in silver and a considerable minor coinage for the Philippines, and 2,730,000 pieces for foreign countries.

There were in operation in this record year only three mints, to wit, those at Philadelphia, New Orleans, and San Francisco. The opening of the new mint at Denver in 1905 came, therefore, almost simultaneously with an important reduction in the amount of coinage to be done and at a time, moreover, when new labor-saving machines and devices were about to seriously diminish the number of employees

required.

NEW ORLEANS MINT IDLE.

The result of all these influences has been to force a scaling down of operations in all of the mints and a suspension of coinage in the New Orleans Mint. The amount of gold which is available for coinage at New Orleans is small, and the total coinage of the country can be done materially cheaper at three mints and with three organizations than at four mints and with four complete complements of officers and employees. The amount of coinage which could be given to the New Orleans Mint under these conditions did not warrant the continuance of operations there, and they were suspended April 1, 1909, and a large reduction of the force made at that time. At various dates in 1910 further reductions were made, and there appearing to be no likelihood that the mint could advantageously resume operations in the near future, the estimates for 1911 have been made for the conduct of the institution as an assay office only. The appropriations asked total \$17,940, which compares with \$107,300 appropriated for the fiscal year 1911.

THE MINOR ASSAY OFFICES.

In the estimates submitted for 1912 the assay offices at Charlotte and St. Louis are dropped, for the reason that the volume of business handled is unimportant and that the few producers making use of them could without much inconvenience send their bullion direct to

the mints, thus saving the Treasury not only the cost of maintaining the offices, but the cost of transporting the bullion to a mint. larger part of the deposits at the St. Louis office come from Chicago and Cincinnati and the depositors could as well send them direct to

the Philadelphia Mint as to St. Louis.

When the policy of maintaining assay offices in the producing districts was entered upon, the gold production of the country was chiefly from placers and by the labor of individual miners working claims on their own account. The Government assay offices were designed to serve these mining communities by giving reliable assays and by melting the placer dust and nuggets into bars, which were returned to the depositor with the weight and fineness stamped upon them; that is to say, they performed in a simpler manner the func-tion of a mint. Later, the further step was taken, by way of increasing the service of these offices to the public, of buying the bullion at its coinage value, thus saving the miners from the exactions of the bullion buyer. This was done in 1878, and still later Congress inaugurated the policy of shipping the bullion to the mint at the expense of the Treasury instead of collecting the transportation charge from the depositor. This policy is still maintained.

It is apparent that the conditions surrounding the production of gold and which prompted the establishment of these assay offices have radically changed. At the time the offices at Denver, Helena, and Boise were established, not only was the production chiefly at the hands of individual miners who were obliged to dispose of their gold on the spot, but these localities were distant from a railway and the risks and cost of transportation were a serious handicap to the When these offices were established, the country was using inconvertible paper as currency, and it was deemed a wise public policy to encourage the production of the precious metals and the exploration and development of the districts an which these metals were known to exist. At the present time, however, our gold production is mainly by well-organized companies and from ores, which are commonly shipped to smelters or reduction works, and the product eventually reaches the offices of the mint service at some distance from the place of production. A large share of the receipts of these assay offices come to them by express, in many instances costing the shippers practically as much as would shipment direct to a mint. For example, a producer in Nevada, who ships bullion to the assay office at Salt Lake City, as a number of them do, might as well ship it direct to the San Francisco Mint, thus saving the Government the expense of transporting it from the assay office to a mint.

In view of these conditions Congress may well consider whether the service now rendered by these offices warrants the expenditure for

their maintenance.

GOLD CERTIFICATES AGAINST BULLION.

In the report of this bureau for the fiscal year 1902, the director called attention to the uselessness of coining all the gold bullion and foreign coin received at the mints, and again in the report for 1904 the embarrassment occasioned by the statutory requirement that so

much of the reserve fund must be kept in coin was pointed out. The paragraph in the 1902 report is as follows:

It is opportune here to call attention to the fact that the gold coinage of the country is now entering almost entirely into storage and that the cost of coinage is an unnecessary expense. The Treasury holds now about \$500,000,000 of coined gold, which is doubtless more than will be called for in a generation to come. Practically all of the current coinage is being deposited in the Treasury for certificates. When gold is required for export it is wanted in bars, while for domestic circulation the public prefers the Treasury certificates, which, with some modifications of the statutes, might as well be issued against bars.

The case is stronger now than then, for the amount of coined gold in the Treasury is more than double the sum held at that time.

In the report for 1904 I said:

There has never been any continued demand upon the Treasury for gold except for export, and a demand for export is always a demand for bars. The exporters prefer bars because the latter are always of full weight, while all coin that has been in circulation is to some extent abraded. During the six months from January 1, 1904, to July 1, 1904, the total presentations of United States legal-tender notes for redemption in gold amounted to only \$6,591,240, while in the same time the Treasury gave \$60,790,511 in gold bars in direct exchange for gold certificates. At times in the last year it has been difficult to meet the demand for bars as fast as it came, and some coin has doubtless been exported which would not have gone if bars had been available. It is clear that nothing is gained by compelling the mints to work bars up into coin while it is being taken for export because bars can not be had. And it is equally plain that the Treasury would not be weakened by carrying a larger proportion of its reserve in bars.

Practically the entire gold production of this continent is going into the vaults of the Treasury. This gold will never be wanted in the form of coin. It will be held as the basis of our monetary system, but the habits of our people are fixed, and it is certain that they will always prefer paper money for actual use. The only important demands upon the Treasury for gold have always been for bullion for export. With \$1,000,000,000 of coined gold in the Treasury it is perfectly safe to permit the issuance of gold certificates against bullion, allowing the Secretary of the Treasury to determine in his discretion when and how much shall be converted into coin. Such action will result in important economies in the mint service.

DEPOSITS OF GOLD BULLION.

The value of gold bullion contained in original deposits at the mints and assay offices during the fiscal year 1910 was \$126,767,967. The redeposits during the year, consisting of bullion transferred from one office to another and bars bearing the stamp of one of the mints or assay offices, amounted to \$35,519,671. The value of the gold bullion and uncurrent domestic and foreign coin received, including redeposits, amounted to \$165,890,779, which was the total of gold receipts.

REDEPOSITS OF GOLD BULLION.

The redeposits contained 1,909,182 standard ounces of gold of the value of \$35,519,671, fine bars representing 13,050 standard ounces (\$242,781), and unparted bars representing 1,884,257 standard ounces (\$35,055,942), as follows:

	Unparte	d bars depos	ited at—	Fine	bars deposited at—		
Bars manufactured at—	Philadel- phia.	San Fran- cisco.	Denver.	Philadel- phia.	New York.	San Fran- cisco.

Total	1,067,604	411,676	-404,947	12, 457	545	4	

There were redeposited at the Philadelphia Mint 11,876 standard ounces of gold "mint" bars, made at the assay office at St. Louis, resulting from deposits of uncurrent domestic coin. In addition to the above, there were 9 ounces of gold contained in unparted bars from the Charlotte office deposited at New York, and 20 ounces in unparted bars from the Helena office deposited at the Helena office.

DEPOSITS OF FOREIGN GOLD BULLION AND COIN.

Foreign gold bullion containing 847,200 standard ounces, of the value of \$15,761,852, and foreign gold coin containing 21,781 standard ounces, of the value of \$405,226, were deposited, and consisted of bullion and coin produced in the following-named countries:

	Crude l	bullion.	Refined bullion.		Coin.

DEPOSITS AND PURCHASES OF SILVER.

The deposits of silver received at the mints and assay offices during the fiscal year ended June 30, 1910, for return to depositors in fine or unparted bars, with the weight and fineness stamped thereon, aggregated 2,551,151.24 standard ounces. The United States assay office at New York received the greater part of these deposits.

The government of the Philippine Islands deposited at the United States mint, San Francisco, silver coin issued under the act of March 3, 1903, containing 1,546,284.86 standard ounces, for recoinage into coins of reduced weight and fineness, as authorized by the act of Type 22, 1906.

June 23, 1906.

The purchases and deposits of silver bullion at the mints and assay offices of the United States during the fiscal year 1910 were as follows:

Items.	Standard ounces.
Silver purchased. Silver parted from gold deposits and purchased. Uncurrent domestic coin for recoinage For return in fine bars. For Philippine coinage transferred for recoinage.	282, 485, 34 2, 313, 355, 55 607, 354, 47 2, 551, 151, 24 1, 546, 284, 86
Total	7,300,631.46

REDEPOSITS OF SILVER BULLION.

The redeposits contained 2,238,505 standard ounces of silver; fine bars representing 103,806 standard ounces; unparted bars representing 1,761,113 standard ounces; mint bars representing 373,586 standard ounces as follows:

	Unparte	d bars depos	Fine bars	Mint bars	
Made at—	Philadel- phia.	San Fran- cisco.	Denver.	deposited at New York.	deposited at Phila- delphia.

Other small unparted contained 12 standard ounces.

DEPOSITS OF FOREIGN SILVER BULLION AND SILVER COIN.

Foreign silver bullion containing 1,291,378 standard ounces of the coining value of \$1,502,695 and foreign silver coin containing 14,706 standard ounces of the value of \$17,113 were received from various countries as follows:

Countries.	Crude bullion.	Refined bullion.	Coin.

- Includes 461,686 fine ounces Hawaiian coin.
 Includes 148,788 fine ounces Philippine special assay coins.
 Includes 3,991 fine ounces Philippine special assay coins.
 Includes 3,647 fine ounces Hawaiian coin.
 Includes 3,845 fine ounces Philippine special assay coins.
 Includes 3,845 fine ounces Philippine special assay coins.
 Includes 3,895 fine ounces Philippine special assay coins.
 Includes 2,663 fine ounces Philippine special assay coins.
 Includes 3,680,791 fine ounces Philippine coins.
 Includes 3,411 fine ounces Philippine assay coins and 8,866,622 fine ounces Philippine coins for recoinage.
 Includes 5,739 fine ounces Philippine assay coins and 7,314,573 fine ounces Philippine coins for recoinage.

COINAGE OF THE UNITED STATES FOR THE FISCAL YEAR 1910.

The domestic coinage was as follows:

Description.	Pieces.	Value.
Gold	5,069,146 17,272,355 17,055,638 148,609,529	\$47,578,875.00 4,297,567.25 852,781.90 1,486,095.29
Total	188,006,668	54, 215, 319. 44

Of the subsidiary coinage made during the year \$76,836.50 were from uncurrent domestic coin received for recoinage and \$4,220,730.75 from silver purchased under the provisions of section 3526, Revised Statutes.

STANDARD SILVER DOLLARS USED IN SUBSIDIARY SILVER COINAGE.

There were purchased as bullion and melted at the mints and assay offices 961 mutilated silver dollars during the fiscal year 1910, which were used in the manufacture of subsidiary silver coin.

The following have been used since 1883:

Fiscal years.	Amount.	Fiscal years.	Amount.	Fiscal years.	Amount.	Fiscal years.	Amount.
1883	1,850 8,292	1891 1892 1893 1894 1895 1896 1897 1898	\$10,800 42,881 10,500 15,055 18,580 2,034 1,898 1,365	1899	\$1,734 1,341 1,786 1,893 1,777 1,304 2,298 909	1907	\$1,548 1,170 1,293 961 188,964

RECOINAGE OF UNCURRENT UNITED STATES COIN.

The table following shows the face value of abraded subsidiary coin transferred and purchased for recoinage, the amount of new coin made therefrom, and the loss since 1891:

Fiscal years.	Face value.	Value of new coin produced.	Loss.

PHILIPPINE COINAGE.

The following coinage was executed during the fiscal year 1910 at the United States mint, San Francisco, for the Philippine government:

,276,559 36,000 450,000 312,199	2,714,261.95 8,680.50 43,402.50 15,055.79
,500,000	2.781.400.74
	36,000 450,000 312,199

The total silver coinage to June 30, 1910, from coins received from the Philippine Islands for recoinage and from bullion purchased for such coinage was as follows:

Denomination.	lion, act	m new bul- s of Mar. 2, June 23, 1906.	coins rece	om Philippine gived for recoin- f June 23, 1906.	Total.		
	Pieces.	Fine ounces.	Pieces.	Fine ounces.	Pieces.	Fine ounces.	
Pesos. 50 centavo. 20 centavo 10 centavo Total.	93, 445 3, 342, 126 3, 666, 152 6, 077, 392 13, 179, 115	48, 068. 11 805, 870. 13 353, 600. 36 293, 082. 21 1, 500, 620. 81	41,402,559 2,100,000 2,735,000 4,030,000 50,267,559	21, 297, 476, 35 506, 362, 50 263, 790, 75 194, 346, 75	41,496,004 5,442,126 6,401,152 10,107,392 63,446,674	21, 345, 544, 46 1, 312, 232, 63 617, 391, 11 487, 428, 96 23, 762, 597, 16	

¹ Included in this amount is 11,237.93 fine ounces of coins reserved for assay.

(The balance of silver now on hand to the credit of the Philippine government is 0.27 of an ounce, fine.)

Under the act of Congress approved June 23, 1906, and the act of the Philippine Commission dated December 6, 1906, providing for the recoinage of Philippine silver coins issued under the act of March 2, 1903, into coins of a reduced weight and fineness, there were received at the mint, San Francisco, and melted for recoinage up to June 30, 1910, the following:

	Denomination.	Pieces.	Fine ounces.
50 centavo	inssiers	5,331,400 5,440,500	844, 564. 23 534, 328, 47
Total		41,755,898	22, 261, 976. 62

Of the coins manufactured for the Philippine government under the act of March 2, 1903, there were remaining in the Philippine Islands, June 30, 1910, the following coins:

Denomination.	Pieces.	Value in pesos.
Pesos. 50 centavo. 20 centavo. 10 centavo.	2,930,785 797,118 2,557,268 4,467,557	2, 930, 785. 00 398, 559. 00 511, 453. 60 446, 755. 70
Total	10, 752, 728	4, 287, 553. 30

The total coinage, including recoinage, made for the Philippine government under authority of the acts of March 2, 1903, and June 23, 1906, was as follows:

Denomination.	Made at United States mint, Philadelphia.	Made at United States mint, San Francisco.	Total.
Silver: Pesos. 50 centavo. 20 centavo. 10 centavo.	Pieces. 2, 806, 859 4, 317, 644 6, 618, 840 6, 618, 839	Pieces. 65, 713, 503 7, 253, 000 7, 780, 080 14, 846, 110	Pieces. 68, 520, 362 11, 570, 644 14, 398, 920 21, 464, 949

PURCHASE OF SILVER.

The table following shows the amount and cost of silver bullion purchased for subsidiary silver coinage during the fiscal year 1910:

Stock of silver bullion.	Standard ounces.	Cost.		
Purchased under section 3526, Revised Statutes, at mint Partings, charges, and fractions purchased Melted assay coins purchased. Mutilated coins purchased. Surplus bullion purchased.	2, 302, 409. 79 2, 486. 63 2, 112. 75	\$129, 556. 57 1, 134, 625. 02 1, 438. 11 974. 85 3, 054. 55		
Total	2, 595, 840. 89	1, 269, 649. 10		

BALANCES OF SILVER BULLION.

The balances of silver bullion on hand June 30, 1910, at the mints and assay offices of the United States for the coinage of subsidiary silver coins, and also for the coinage for the Philippine government, were as follows:

Items.	Standard ounces.	Cost.
For subsidiary silver coinage	5,725,679.35 .30	\$3,642,047.98 .27
Total	5,725,679.65	3,642,048.25

COURSE OF SILVER.

During the 12 months ended June 30, 1910, the fluctuations in the price of silver in the London market were greater than for the fiscal year ended June 30, 1909. The price ranged from $23\frac{1}{16}$ pence to $24\frac{15}{16}$ pence per ounce for silver 0.925 fine (British standard), equivalent in money of the United States at the former rate to \$0.50555 and at the last-named rate to \$0.54665 per ounce 1,000 fine; a variation of \$0.04110 per ounce. The average London price for the year was $23\frac{15}{16}$ pence, equivalent to \$0.52481 per ounce fine. The commercial ratio of silver to gold at the average price for the year was 1 to 39.39. The bullion value of the standard silver dollar was \$0.40590. The monthly fluctuations in the price of silver for the 12 months ended June 30, 1910, are shown in the following table:

HIGHEST, LOWEST, AND AVERAGE PRICE OF SILVER BULLION AND VALUE OF A FINE OUNCE EACH MONTH DURING THE FISCAL YEAR 1910.

APPROPRIATIONS.

The total appropriations for salaries, wages, and contingent expenses for the entire mint service, including \$100,000 for freight on bullion and coin between mints and assay offices, and \$36,770 for salaries and contingent expenses, Office of the Director of the Mint, for the fiscal year 1910 amounted to \$1,497,370. There is also a balance in the Treasury to the credit of the appropriation for "New machinery and appliances, mint at Philadelphia," of \$2,316.94, and to the credit of the appropriation for "New machinery and appliances, mint at Denver," of \$343.01.

The total expenditures during the year from these appropriations amounted to \$1,268,955.67, leaving a balance of \$231,074.28.

[.]¹ The reimbursements consist of payments made for coinage for other countries or for services rendered to other branches of the Government service.

EARNINGS AND EXPENDITURES OF THE REFINERIES OF THE COINAGE MINTS AND ASSAY OFFICE AT NEW YORK, FISCAL YEAR 1910.

The earnings on account of parting and refining bullion during the fiscal year ended June 30, 1910, all of which were deposited in the Treasury, amounted to \$323,590.57; the expenditures on the same account aggregated \$245,853.97; and the net earnings over expenditures \$77,736.60.

The earnings and expenditures of the several mints and the assay office at New York were as follows:

Institutions.	Charges collected.	Surplus bullion.	Receipts sale by-products.	Total receipts.	Expendi- tures.
Philadelphia San Francisco New Orleans Denver New York	67,654.12	\$24, 658. 85 1, 300. 30 4, 278. 93 6, 186. 15 3, 079. 61		8,039.11	\$70, 440. 31 79, 295. 16 2, 628. 72 30, 101. 49 63, 388. 29

LABORATORY OF THE BUREAU OF THE MINT.

From the coinage of the calendar year 1909 the assayer of this bureau tested 359 gold and 466 silver coins, all of which, with one exception, were found within the legal requirements as to weight and fineness.

In the gold coins the greatest deviation above standard (the legal limit being 0.001 above or below) was 0.0003, while the greatest

deviation below was 0.0011.

The greatest deviation of silver coins above standard (the limit being 0.003 above or below) was 0.0013, while the greatest deviation below was 0.0018.

The following table summarizes these assays:

. *	Philad	elphia.	San Fr	ancisco.	New C	rleans.	Der	ıver.	То	tal.
Fineness.	Gold.	Silver.	Gold.	Silver.	Gold.	Silver.	Gold.	Silver.	Gold.	Silver.
998, 2 998, 4 998, 5 998, 7 998, 7 999, 0 399, 1 999, 2 999, 2 999, 2 999, 2 999, 3 999, 4 999, 6 999, 6 999, 7 999, 8 999, 9 900, 0 900, 2 900, 2 900, 2 900, 2 900, 3 900, 4 900, 2 900, 2 900, 3 900, 2 900, 3 900, 2 900, 3 900, 2 900, 3 900, 2 900, 3 900, 2 900, 3 900, 3 900, 2 900, 3 900, 3	5 13 15 36 31 15 3 3	1 3 6 19 23 48 41 21 12 7		1 6 5 10 9 17 7 11 1 1 1 1	}	2		3 3 6 2	,	55 54 33 22 11
Total	122	185	151	66	6	25	80	24	359	30
Average fineness	899. 917	899. 423	899.623	900.056	899.966	899.900	899.837	900.070	899.777	899.668

In addition to the above there were examined 146 Philippine silver coins and 6 Costa Rican silver coins, all of which were within the legal requirements as to weight and fineness. Also 96 assays of miscellaneous gold were made in settlement of differences between the mints and the assay offices.

An extensive investigation was made into the question of the possibility of standard gold made from electrolytic gold segregating during the coinage operations, and investigations into the manufacture of cupels in the service and the determination of minute amounts of gold in refinery silver and coins were inaugurated.

PROCEEDINGS OF THE ASSAY COMMISSION, 1910.

The following-named gentlemen were designated as commissioners to test and examine the weight and fineness of the coins reserved at the several mints during the calendar year 1909, pursuant to the provisions of section 3547 of the Revised Statutes:

Hon. Julius C. Burrows, United States Senate; Hon. Carroll S. Page, United States Senate; Hon. William B. McKinley, House of

Representatives; Hon. William A. Ashbrook, House of Representatives; Dr. Edgar F. Smith, Philadelphia, Pa.; Dr. Edward H. Keiser, St. Louis, Mo.; Dr. Charles R. Sanger, Cambridge, Mass.; Hon. David Cunningham, Cadiz, Ohio; Mr. Archer M. Huntington, New York, N. Y.; Mr. Edgar T. Leche, New Orleans, La.; Mr. Fred More, Charleston, Ill.; Mr. Luther Drake, Omaha, Nebr.; Hon. D. A. McPherson, Deadwood, S. Dak.; Mr. James H. Manning, Albany, N. Y.; Dr. Edward D. Peters, Cambridge, Mass.; Dr. O. L. Shinn, Philadelphia, Pa.; Hon. Lawrence O. Murray, Washington, D. C.; Hon. John B. McPherson, Philadelphia, Pa.; Mr. H. G. Torrey, New York, N. Y.

The commission met at the mint at Philadelphia on February 9,

1910, and Hon. Carroll S. Page was elected chairman.

The following committees were appointed by the chairman with the approval of the commission:

Committee on counting.—Mr. Drake, chairman; Messrs. More and

Cunningham.

Committee on weighing.—Mr. Ashbrook, chairman; Messrs. Torrey, Manning, and McPherson.

Committee on assaying.—Mr. McKinley, chairman; Messrs. Peters,

Keiser, Shinn, and Leche.

The committee on counting reported that the packages containing the pieces reserved by the several mints for the trial of coins were delivered to them, and that they were compared with the transcripts kept by the Director of the Mint and found to be correct. After verification the coins were delivered to the committees on weighing and assaying.

The coins reserved by the mints for the purposes of the assay com-

mission were as follows:

Gold coins from the mint at Philadelphia, 1,437, of the value of \$9,545.

Silver coins from the mint at Philadelphia, 10,950, of the value of

Gold coins from the mint at San Francisco, 3,368, of the value of \$59,940.

Silver coins from the mint at San Francisco, 2,056, of the value of

Gold coins from the mint at New Orleans, 35, of the value of \$175. Silver coins from the mint at New Orleans, 1,964, of the value of \$435.

Gold coins from the mint at Denver, 3,600, of the value of \$19,410. Silver coins from the mint at Denver, 3,034, of the value of \$686.95.

The coins reserved on account of coinage executed for the Philippine Islands were as follows:

Mint at San Francisco:		
Pesos		3,789
50 centavo		
20 centavo		
10 centavo	***************************************	157

The committee on assaying reported receiving and making assays of coins reserved from the mints at Philadelphia, San Francisco, New Orleans, and Denver, representing the deliveries made by the coiners to the superintendents during the calendar year 1909.

The highest assay value of the gold coinage (the limit of tolerance being one one-thousandth) was at—

Philadelphia		00.3
San Francisco	90	00.3
Denver		00.1
New Orleans	89	99.9

The lowest assay value of the gold coinage (the limit of tolerance being one one-thousandth) was at—

Philadelphia	9 009
I madeipma	. 033.7
San Francisco.	8 PPR
Denver	. 000.0
Denver	. 899.8
New Orleans.	200 0
Trew Officans	. 099.9

The highest assay value of the silver coinage (the limit of tolerance being three one-thousandths) was at—

Philadelphia	900.7
San Francisco	900.7
Denver 1	
New Orleans	901.1

The lowest assay value of the silver coinage (the limit of tolerance being three one-thousandths) was at—

	•		
Philadelphia	 	 	 898.4
San Francisco			
Denver	 	 	 900. 2
New Orleans	 	 	 898.9

The highest assay value ¹ of the Philippine silver coinage was at—

San Francisco (pesos). 801.6
San Francisco (subsidiary). 749.4

The lowest assay value of the Philippine silver coinage was at-

San Francisco (pesos).	. 799	. 4
San Francisco (Subsidiary).	. 749	1.4

The committee also tested the quartation silver and found it free from gold, and the lead used in the assay of the gold bullion and found it free from gold and silver. The acid used in the humid assay of silver was found to be free from silver and also from chlorine.

The balances used were tested and found to be correct.

MINT OF THE UNITED STATES AT PHILADELPHIA.

The following table shows by weight and value the gold and silver deposited during the fiscal year 1910:

Metals.	Deposits.	Rede- posits.	Standard ounces.	Coinage values.
Gold	3,203 694	1,894 82	1, 295, 106. 556 2, 715, 651. 23	\$24, 095, 005. 64 3, 160, 030. 52
Total	3,897	1,976		27, 255, 036. 16

¹ By the act of June 23, 1906, the standard fineness of the Philippine peso was reduced to 800 and the subsidiary coins to 750 fine.

Of the above amount of gold bullion, 1,325.413 ounces standard are the surplus bullion recovered by the melter and refiner in his operations during the fiscal year 1910, and 66.876 ounces standard are the surplus bullion recovered by the coiner during the fiscal year 1910.

The following table shows the number of proof coins and medals

and their nominal value manufactured during the fiscal year:

	Articles.		Pieces.	Nominal value.
Gold medals. Silver medals. Bronze medals. Gold-proof coins. Silver-proof coins. Minor-proof coins.			149 491 18,848 665 1,866 8,550	\$5, 512. 57 922. 91 3, 734. 56 5, 336. 25 528. 70 256. 50
Total		• • • • • • • • • • • • • • • • • • • •	30, 569	16, 291. 49

MINOR COINAGE.

The coinage of minor coin during the fiscal year 1910 at the Philadelphia mint is shown in the following table:

Denominations.				
I-cent bronze.	\$1,442,415.29			
5-cent nickel.	852,781.90			

No blanks for minor coinage were purchased during the year. The amount of metal purchased for the manufacture of minor coinage was 988,121 avoirdupois pounds, at a cost of \$145,299.46.

The amount of uncurrent copper, nickel, and bronze coins transferred from the Treasury during the year for conversion into current coins, cost, and seigniorage are shown by the following table:

Old copper cents Nickel 1-cent coins Bronze 1-cent coins Bronze 2-cent coins Nickel 3-cent coins Nickel 5-cent coins	533.16 33,998.57 166.40
Total. Balance from last year. Cost of nickel added to 1-cent metal to convert into 5-cent alloy for recoinage into nickel 5-cent coin. Cost of tin and zinc added to old copper-cent metal to convert into bronze 1-cent alloy for recoinage into bronze 1-cent coin. Cost of metal of same alloy added to nickel 3-cent metal for recoinage into nickel 5-cent coin Seigniorage (gain by recoinage).	14.36 1.93 5.21
Total	
Coinage executed, nominal value: Bronze 1-cent coin	243, 429. 31 14, 028. 54
Total	

The seigniorage or gain on recoinage of minor coin was \$2,498.35, as against a loss of \$14,028.54, showing a net loss of \$11,530.19.

The seigniorage on the coinage of nickel and bronze coins coined from purchased metal was \$1,875,505.38, which, less a net loss of \$11,530.19 on the recoinage of minor coin and a wastage of the operative officers in the minor coinage operations of \$1,597.48, gives a net seigniorage on minor coin of \$1,862,377.71.

The total amount of the several types of minor coin manufactured at this mint from 1793, when the first coinage of copper cents was made, until June 30, 1910, aggregated \$56,114,471.71. There have been melted for recoinage \$5,228,912.44, leaving oustanding June

30, 1910, \$50,885,559.27, the product of this mint.

The several types and denominations of minor coin issued, manufactured by the mint at Philadelphia since its establishment, the amount remelted, and the amount outstanding June 30, 1910, are set forth in the following table:

MINOR COINS ISSUED, REMELTED, AND OUTSTANDING.

Denominations.	Coined.	Remelted.	Outstanding June 30, 1910.
Copper cents Copper half cents Copper-nickel cents Bronze cents Bronze 2-cent pieces Nickel 3-cent pieces Nickel 5-cent pieces	39, 926. 11 2,007, 720. 00 18 537, 095. 29 912, 020. 00 905, 768. 52	382, 456, 73 339, 834, 22	\$1,182,234.13 39,926.11 1,204,351.29 18,154,638.56 572,185.78 622,666.25 29,109,557.15
Total	56,114 471.71	5, 228, 912. 44	50, 885, 559. 27

Minor coins to the amount of \$2,758,799.03 have been distributed throughout the States and Territories of the United States during the fiscal year 1910—\$1,215,830.45 in nickel 5-cent pieces and \$1,542,968.58 in bronze 1-cent pieces.

The expenditure for the distribution of minor coin for the same

period was \$20,189.92.

ALL SEIGNIORAGE.

The seigniorage on the coinage of purchased metal for the fiscal year was \$3,575,885.92, as shown by the following table:

	Items.		Coined.	Seigniorage.
Subsidiary silver coins Minor coins			\$2,911,667.25 2,051,767.88	\$1,700,380.54 1,875,505.38
Total		, 	4, 963, 435. 13	3, 575, 885. 92

VISITORS.

A large number of visitors from all States of the Union and from foreign countries visited the mint during the year, 86,177 having been shown through the building by the several guides.

NUMBER OF EMPLOYEES.

The total number of employees in this mint at the close of the fiscal year was 360, distributed in the several departments as follows:

Department:	•	
General		
Assayer's Melter's and refiner's		 13
Melter's and refiner's		 61
Coiner's		 94
Engraver's		 9
		_
Total		 360

MELTER AND REFINER'S DEPARTMENT.

During the fiscal year the melter and refiner received from the superintendent gold bullion containing by assay 1,839,490.674 standard ounces, of the value of \$34,223,082.31, his legal allowance for wastage being 1,839.491 standard ounces, of the value of \$34,223.09.

He also received silver bullion containing by assay 6,825,648.72 standard ounces, of the value of \$7,942,573.06, his legal allowance for wastage being 10,238.47 standard ounces, of the value of \$11,913.85. He returned to the superintendent 1,840,816.087 standard ounces of gold and 6,822,418.53 standard ounces of silver.

He operated upon bullion as follows:

	Items.	•	Gold.	Silver.
Ingots			tandard ozs. 156, 328. 090 , 373, 409. 594	Standard ozs. 3,840,018.82 3,311,484.06
Total		1	,529,737.684	7, 151, 502. 88

The excess of silver operated upon over the amount charged during

the year is due to duplicate operations.

Upon the settlement of the melter and refiner's accounts June 30, 1910, there was found an apparent gain upon the gold bullion during the fiscal year of 1,325.413 standard ounces, and in the operations upon the silver bullion an apparent loss of 3,230.19 standard ounces.

The melts made aggregate as follows:

Melts.	Bars.	Ingots.	Anodes.	Deposits.	Special.	Total.
Gold	238 1,023	26 966	995	3, 240 579	254	4,753 2,568
. Total	1,261	. 992	995	3,819	254	7,321

During the fiscal year one silver melt was condemned.

NUMBER, WEIGHT, AND VALUE OF GOLD AND SILVER BARS FOR INDUSTRIAL USE.

Metal.	Bars.	Standard ounces.	Coinage value.
Gold	5, 115 8, 501	466, 761. 327 1, 819, 513. 87	\$8,683,931.70 2,117,252.50
Total	13,616	2,286,275.197	10, 801, 184. 20

During the year 145 barrels of sweeps were gathered, containing by assay 865.449 standard ounces of gold and 4,110.74 standard ounces of silver. There were 15 barrels of old sweeps reworked, containing by assay 147.228 standard ounces of gold and 641.39 standard ounces of silver.

The operations of the refinery were as follows:

Bullion.	Gold.	Silver.
Sent to refinery 4,742,461.56 gross ounces, containing by assay	Standard ozs. 1,372,113.076 1,372,458.612 950.982	Standard ozs. 3,311,484.06 3,305,016.26 4,481.24

¹ Apparent gain.

Silver bullion sent to the refinery upon which refining charges were collected contained by assay 2,647,553.49 standard ounces, and silver owned by the Government and returned to the refinery for parting purposes upon which no parting charges were collected contained by assay 663,930.57 standard ounces.

¹ Gold surplus.

During the fiscal year 1910 this department received from the superintendent 307,521.140 standard ounces of gold, of which 31,048.300 standard ounces were operated upon, from which there were produced 23,713.157 standard ounces of coin of the value of \$441,175, and delivered to the superintendent during the fiscal year prior to settlement.

There were also delivered to the superintendent prior to settlement 7,383.407 standard ounces of gold clippings and bars, and there were delivered at settlement 276,491.452 standard ounces of gold ingots, partly finished coin, sweeps, and bars. The entire operation showed a gain or surplus of 66.876 standard ounces, of the value of \$1,244.20.

The very small actual operation on gold involved practically no wastage, and a thorough cleaning up and the recovery of former

wastage contributed this surplus.

The percentage of coin produced to the amount of metal operated upon was 76.37. This high percentage was due to the fact that the operation was almost entirely upon "unfinished coin and good blanks," received in the redelivery from the superientendent after the settlement of June 30, 1909.

During the same period the coiner also received from the superintendent 4,174,142.49 standard ounces of silver, of which 3,936,902.10 standard ounces were operated upon, from which there were produced 2,340,252.55 standard ounces of coin of the value of \$2,911,667.25 in subsidiary silver coin and delivered to the superintendent during the fiscal year prior to settlement.

There were also delivered to the superintendent during the fiscal year prior to settlement 1,611,356.98 standard ounces of silver clippings and bars, and there were delivered at settlement 147,646.62

standard ounces of silver coin, and 74,572.49 standard ounces of ingots, unfinished coin, and sweeps. Upon the entire operation there was a wastage of 313.85 ounces of the value of \$161.60, being 7.52 per cent of the legal allowance.

The percentage of coin produced to the amount of metal operated

upon was 63.19 per cent.

There were also delivered to the coiner during the same period 5,552,420.20 ounces of nickel ingots, from which were produced 2,742,310.08 ounces of 5-cent pieces of the face value of \$852,781.90, upon which there was a wastage of 5,971.37 ounces.

The percentage of coin produced to the amount operated upon was

49.39 per cent.

There were also delivered to the coiner during the same period 27,049,502.90 ounces of copper-bronze ingots, from which there were produced 14,425,498.70 ounces of 1-cent coin of the face value of \$1,442,415.29, upon which there was a wastage of 54,989.90 ounces. The percentage of coin produced was 53.33.

The coinage executed during the year was:

ENGRAVER'S DEPARTMENT.

All the dies used in the coinage operations of all the mints of the United States are made in the engraving department at Philadelphia. The number of dies prepared for United States coinage last year was 2,626. In addition 65 dies were made for Philippine coinage, 24 for the Post Office Department, 20 for medals, and 84 master dies, hubs, and pattern dies.

Dies Furnished the Several Mints during the Fiscal Year Ended June 30, 1910.

Seventy-six thousands cupels were made and 80,000 leads cut, rolled, and weighed.

MINT OF THE UNITED STATES AT SAN FRANCISCO.

The following table shows by weight and value the gold and silver deposited during the fiscal year 1910:

Metals.	Deposits.	Rede- posits.	Standard ounces.	Coining value.
Gold		502	2, 279, 646, 826 1, 851, 448, 74	\$42, 412, 034. 02 2, 154, 413. 07
Total	8, 108	502		44, 566, 447.09

Of the above amount of gold bullion 2.660 standard ounces were surplus bullion recovered by the coiner and 2,547.05 standard ounces recovered by the melter and refiner, during the fiscal year 1910.

Of the above amount of silver bullion 1,543,938.45 standard ounces of Philippine coin were received for recoinage for the government

of the Philippine Islands.

During the year minor coinage metal was received for the coinage of United States bronze coin and the recoinage of minor coin into bronze coin for the Philippine Islands as follows:

Countries.	Recoinage.	Purchased.	Total.	Cost value.
Philippine Islands. United States. Total	Troy ozs. 311,724.50	Troy oz. 15, 225. 00 336, 539. 57 351, 764. 57	Troy oz. 326, 949. 50 336, 539. 57 663, 489. 07	\$9, 496. 24 3, 350. 96 12, 847. 20

During the fiscal year 1910 a power plant was installed for the purpose of generating the electric current needed for operating motor-

driven machinery and electric lighting.

The power plant consists of three turbo-generating units, switch-board, air compressor, cooling tower, jet condenser with accessories, superheaters, feed water heater, electric-driven fire pump, house pump, and boiler feed pump; new conduit system for electric wiring, hot and cold water tanks; water and air piping, covering, etc

hot and cold water tanks; water and air piping, covering, etc The generating sets consist of one 150 kilowatts generator direct connected to a four stage steam turbine, and two 100 kilowatts generators direct connected to two stage steam turbines, each hav-

ing a capacity of 25 per cent above their rating.

The switchboard is complete in every detail, having indicating and recording instruments connected with each department throughout the building.

The air compressor is used in connection with the water supply for the building and has a capacity of 68 cubic feet of free air per

minute.

The condenser is of the jet type, having a capacity to condense

4,200 pounds of steam per hour continuously.

The superheaters installed in each battery of boilers have a capacity to superheat 4,200 pounds of steam at 150 pounds gauge 100 degrees F.

The feed water heater is of the open type, designed to purify all the water supplied to the boilers and to heat the same to the proper

temperature.

The fire pump is of the two-stage type, direct connected to an electric motor, and has a capacity to deliver 300 gallons of water per minute against a head of 175 feet.

The house pump is of the triplex type, being driven by an electric motor. This pump has a capacity to deliver 75 gallons of water

against a head of 150 feet.

The boiler feed pump is of the triplex type, having 24 speeds, and is designed to deliver 12.5 gallons of water per minute.

VISITORS.

During the year 52,635 visitors were shown through the mint.

MINT OF THE UNITED STATES AT DENVER, COLO.

The standard weight and value of bullion received during the fiscal year was as follows:

Metals.	Deposits and pur- chases.	Rede- posits United States assay offices.	Standard ounces.	Coinage value.
Gold	3,546 595	551	1, 195, 622. 426 434, 764. 54	\$22, 244, 138. 15 505, 907. 82
Total	4, 141	551	1, 630, 386. 966	22,750,045.97

Shipments from refineries, cyanide and chlorination mills aggregating 483,561.481 standard ounces gold, of a coinage value of \$8,996,492.65, and 22,403.94 standard ounces silver, of a coinage value of \$26,070.06.

Domestic bullion, unrefined, totaled 302,795.065 standard ounces gold, of a coinage value of \$5,633,396.56, and 327,607.80 standard

ounces silver, of a coinage value of \$381,216.35.

Redeposits of United States assay offices carried 404,947.336 standard ounces gold, of a coinage value of \$7,533,903.93, and 80,061.90 standard ounces silver, of a coinage value of \$93,162.92.

During the year there were purchased gold and silver coins of a face value, respectively, of \$477.50 and \$34.50, and of a coinage value of

\$442.79 in gold, and \$34.58 in subsidiary silver.

There was but one change in the staff of operative officers during the year, Mr. Jabin B. Baldwin succeeding Mr. Harry Tarbell as coiner March 1, 1910.

Visitors to the number of 55,740 were looked after during the six

months of coining operations.

The number of officers and employees in the mint at the close of the fiscal year was as follows:

The surplus was recovered from unreported fractions of assays and from fractional gains in weights of deposits.

The ingot melting room was in operation six months only.

The sweeps cellar was operated for six months and treated 83,206 pounds of sweeps, and extracted therefrom 1,047.455 standard

ounces of gold and 1,799.37 standard ounces of silver, and the resulting mill tails contained 296.654 standard ounces of gold and 1,871.51 standard ounces of silver.

Refinery operations covering a period of eight months were as

follows:

	Gold a	ccount.	Silver a	eccount.
Metal.	Amount.	Total.	Amount.	Total.
Delivered to the refinery	Stand. oz.	Stand. oz. 1, 411, 433. 731	Stand. oz.	Stand. oz. 1,471,908.3
Returned at settlement in bars Returned at settlement in sweeps	32,965, 222	1,411,975.589	54,854.25 436.44	1,472,364.5
Surplus		541. 858		456. 2

The refinery earnings were as follows:

Ingot melts condemned: None. Remelts: Gold, 1; silver, none.

Coiner's Department.

There was no coinage executed at this mint during the first six

months of the fiscal year 1910.

From January 1, 1910, the coiner received and operated upon 1,758,337.70 standard ounces of gold. He delivered to the superintendent 1,252,977 standard ounces of gold coin, valued at \$23,311,200. The number of pieces coined aggregated 2,427,950. The percentage of coin produced from the amount operated upon was 71.26. The loss in the coinage operations was 42.99 standard ounces, being 4.89 per cent of the legal tolerance.

The only work in silver during the fiscal year was in delivering to the superintendent the coins that were left over from the previous fiscal year, amounting to 32,873.37 standard ounces, valued at

\$40,900, and aggregating 166,000 pieces.

In the process of cleaning up and reclaiming from sweeps, etc., there were recovered 27.32 standard ounces of silver. There being

no operations of any kind in silver, other than as stated above, this amount stands as a surplus during the fiscal year, but in reality it is a recovery from the previous year's operations.

The coinage was as follows:

	Items.		Pieces.	Value.
Total gold		 	2,427,950 166,000	\$23,311,200 40,900
Total coinage		 	2,593,950	23, 352, 100

ASSAY OFFICE OF THE UNITED STATES AT NEW YORK.

The report of the business of this office for the fiscal year 1910, is as follows:

Bullion received.	Deposits.	Re- deposits.	Standard ounces.	Coinage value.
Gold Silver	10,517 1,786	1 33	3, 103, 623, 674 2, 557, 913, 85	\$57,741,835.87 2,976,481.57
Total	12,303	34		60, 718, 317. 44

The gross weight of this bullion was 5,384,915.29 ounces, a decrease from last year of 2,213,069.70 ounces.

The value of the foreign gold bullion and coin deposited was

\$12,936,181.26, an increase over last year of \$1,385,131.33.

The value of the domestic gold bullion and coin deposited was \$44,805,754.61, a decrease from last year of \$3,378,537.12.

The source of domestic gold bullion and coin received were as follows:

From new production in United States and Territories. From private refineries. From jewelers' bars, plate, etc. From redeposited bullion. From United States gold coin of light weight.	34, 987, 869. 23 3, 934, 982. 79 10, 310. 23
Total	44, 805, 754, 61

This statement shows a decrease compared with last year in the amount of gold bullion received from private refineries of \$2,427,935.08, and an increase from gold coin of light weight of \$322,739.67.

There was received from the United States mint at Philadelphia, during the year, fine gold amounting to 55,419.062 standard ounces,

and fine silver amounting to 1,654,883.95 standard ounces.

Redeposited gold bullion consisted of 545.102 standard ounces gold contained in fine gold bars made at this office and 9.073 standard ounces contained in unparted bars made at the United States assay office, Charlotte, N. C.

As parting operations have not been resumed, the unparted bullion received during the year has been transferred to the United States Mint at Philadelphia, for treatment. Those shipments amounted to 2,418,038.48 ounces gross, containing 886,204.640 standard ounces of gold and 1,481,161.21 standard ounces of silver.

The amount of bullion delivered to the melter and refiner and by him returned to the superintendent during the fiscal year 1910, was as follows:

	Bullion.	Delivered to melter and refiner.	Returned by melter and refiner.		
Gold		Stand. oz. 3, 205, 474, 192 2, 651, 519, 47	Stand. oz. 2, 949, 692, 248 2, 529, 612, 19		

The grains and fluxes from the deposit melting room yielded

\$5,802.97, and the sweeps (52 barrels) \$5,110.27.

There was stamped during the year 56,099 gold bars and 14,016 In the previous years there were stamped 47,434 gold bars and 13,379 silver bars. Gold bars issued to depositors of bullion for domestic use, \$3,589,277.87. Gold bars exchanged for gold coin for domestic use, \$23,332,333.28. Total gold bars issued for use in the arts, etc., \$26,921,611.15, showing an increase of \$4,391,810.85 compared with last year.

The value of gold bars exchanged for gold coin for export was \$355,381.93, being a decrease compared with last year of \$17,035,514.33.

The income from the exchange of gold bars for gold coin was

\$11,940.49, and from special assays \$1,898.

The force employed in this office at the close of the year including the superintendent, assayer, and melter and refiner, numbered 75, distributed as follows:

General department	23
Assayer's department	
Melter and refiner's department	37
	-

No settlement was made at the close of the fiscal year, it being postponed one month and made coincident with the transfer from Mr. Kingsbery Foster, superintendent, up to the close of July, to Mr. Daniel P. Kingsford, who then succeeded him.

The surplus bullion turned over at that time, recovered by the melter and refiner during the 13 months ending July 31, 1910, contained 126.872 ounces of gold and 1,411.48 standard ounces of silver.

During the fiscal year the foundations for the new refinery have been completed and a large part of the framework erected.

For greater safety during this construction work \$10,000,000 in fine gold bars were transferred to the subtreasury for storage under

the seal of the superintendent.

All the operations of the office have been conducted under very difficult conditions during the year, every department being very much crowded and hampered by the changes and curtailment of space and light in the present building incident to the erection of the new refinery.

ASSAYER'S DEPARTMENT.

The following is the report of the operations in the assay depart-

ment during the fiscal year 1910:

There were assayed 10,517 melts of gold deposits, and 1,786 melts of silver deposits, a total of 12,303 melts, involving 61,505 assays. The fine gold and silver melts assayed were 375 and the fineness was

stamped upon 55,954 bars of gold and 6,475 bars of silver, a total of 62,429.

Special assays numbered 928, being largely articles of jewelry and

manufacturer's samples.

Assays were made on 134 barrels of sweeps and on 155 consolidated melts for shipment to the mint, with the usual incidental ones for the melter and refiner, etc.

All cupels used were made in this department.

MELTER AND REFINER'S DEPARTMENT.

The following is a statement of the business of this department during the fiscal year ended June 30, 1910:

Items.	Weight.	Gold.	Silver.
Settlement metal of June, 1909	3,114,623.236	Stand. oz. 101, 406. 808 3, 066, 361. 797 37, 261. 877 443. 710	Stand. oz. 92, 757. 55 212, 536. 64 2, 345, 377. 21 848. 07
Total	5, 589, 684. 466	3, 205, 474. 192	2, 651, 519. 47

The melter and refiner returned during the year the following bullion:

	Number	of bars.			
Kind of bars.	Gold. Silver.		Gold.	Silver.	
Fine Standard Mint Unparted In sweeps		6, 419 329 14, 157	Stand. oz. 2,011,113.772 51,904.776 886,204.640 469.060	Stand. oz. 674, 317. 94 373, 586.34 1, 481, 161. 21 546. 70	
Total. Balance due superintendent June 30, 1910, but not delivered. Total	55, 954	20, 905	2, 949, 692, 248 255, 781, 944 3, 205, 474, 192	2, 529, 612. 19 121, 907. 28 2, 651, 519. 47	

There were delivered to the superintendent 98 barrels of melter and refiner's sweeps, containing 469.060 ounces standard gold and 546.70 ounces standard silver.

The operations of the melter and refiner's melting room were as follows:

Items.	Gold.	Silver.
Sent to melters and refined by fluxes Unparted bars melted. Mixed deposits of gold coin melted	Stand. oz. 2, 251, 149, 211 297, 358, 761 52, 171, 451	Stand. oz. 355, 505. 44 232, 406. 18
Total	2, 600, 679, 423	587, 911. 62
Returned from melters: Tops, bars, etc., sweeps and other sources	58,764.409 2,542,003.046	7,051.22 581,987.50
Total	2, 600, 767, 455 88, 032	589, 038, 72 1, 127, 10
•		1

One hundred and twenty-six and eight hundred and seventy-two one-thousandths ounces standard gold and 1,411.48 ounces standard silver were returned in settlement of July 31, 1910, in excess of amounts debited to melter and refiner.

The apparent sources of above amounts in excess are as follows:

		Gold.		Silver.		
	Items.		Apparent gains.	Apparent losses.	Apparent gains.	Apparent losses.
Unparted bars Gold bars Silver bars			Stand. oz. 232. 371	Stand. oz. 78.392	Stand. oz. 590. 02	Stand. oz.
Assayer's account Shipments				27.107	288.44	114.3
			232.371 105.499	105. 499	1,525.78 114.30	114.3
Net total appar	rent gains	,	126. 872		1, 411. 48	

There was an allowance during 12 months of 162.323 ounces standard gold on small bars for which this department received no credit.

THE MINT AT NEW ORLEANS.

The following table shows by weight and value the gold and silver deposited during the fiscal year 1910:

	Metals.	•	Deposits.	Standard ounces.	Coining value.
Gold			836	47, 151. 035 94, 332. 21	\$877, 228. 56
Silver			 .45	94, 332. 21	109, 768. 39
Total			 881		986, 996. 95

Included therein are 192.521 standard ounces of gold and 1,515.89 standard ounces of silver surplus recovered by the melter and refiner in his operations during the 11 months ended May 31, 1910.

The greater portion of deposits of gold were from Mexico, Central and South America, and contained 40,288.749 standard ounces, of the value of \$749,558, while the deposits of domestic subsidiary coin transferred from the Treasury contained 61,412.90 standard ounces and those purchased over the counter contained 153.05 standard ounces, a total of 61,595.95 standard ounces of the value in new subsidiary coin of \$76,598.37.

The following table shows the country from which the bullion was received:

	Gold.		Silver.	
Countries.	Standard ounces.	Value.	Standard ounces.	Value.
Mexico. Nicaragua. Guatemala. Honduras Colombia.	1,405.475	\$324.59 711,442.27 26,148.37 10,955.40 687.49	5. 85 17, 646. 54 142. 62 189. 38 12. 77	\$6. 81 20, 534. 15 165. 95 220. 37 14. 86
Total	40, 288. 749	749, 558. 12	17,997.16	20, 942. 1

Assayer's Department.

The work of the assayer's department of the mint consisted chiefly of assay determinations for the value of gold and silver deposits, being 881 in number. There were also made 151 assays of mass melts, fine and grain bars. The balance of the work was in assaying samples of bullion, sweeps, and special bullion, making in all 1,099 assays as follows:

NUMBER OF DEPOSITS AND PURCHASESAND BARS RECEIVED AND ASSAYED DURING THE FISCAL YEAR ENDED JUNE 30, 1910.

Classification.	Gold.	Silver.	Total.
Deposits.	836	45	881

Sweeps. Special bullion assays	1 2		
Total	1,005	94	1,099

MELTER AND REFINER'S DEPARTMENT.

The amount of gold and silver received and operated upon by the melter and refiner from July 1, 1909, to the settlement of his accounts May 31, 1910, was as follows:

	Bullion.	Gold.	Silver.
Bullion receivedBullion returned		 Standard oz. 189, 291. 965 189, 484. 486	Standard oz. 171,651.55 173,167.44
Surplus recovered		192. 521	1,515.89

The refinery operated upon 31,545.985 standard ounces of gold and 73,329.05 standard ounces of silver, of which there was an apparent gain of 42.995 standard ounces of gold and 100.03 standard ounces of silver.

Silver bullion upon which charges were collected contained 17,148.88 standard ounces; silver bullion owned by the Government, upon which

there were no charges, contained 56,080.14 standard ounces.

There were 45.584 standard ounces of gold and 585.58 standard ounces of silver recovered from eight barrels of sweeps from the various workrooms of this department. There were also made 996 melts of bullion of all kinds.

Coiner's Department.

There were no operations in this department during the fiscal year.

OPERATIONS OF THE MINOR ASSAY OFFICES FOR THE FISCAL YEAR 1910.

Mint at Carson.—The deposits of bullion at this mint amounted to \$1,344,718.37, a reduction in the value of deposits from 1909, due to

the discontinuance of deposits by certain mines.

The earnings for 1910 amounted to \$6,432.05, exceeding those of 1909 by reason of a clean-up of slag, etc., while the expenditures for 1910 were \$14,950.35, or \$1,817.26 more than for 1909. The necessary operations required to handle the above bullion show a total of 5,629 assays. In addition there were 44 assays of ores and 14 assays of bullion.

Assay office at Boise.—The value of deposits during 1910 at this office amounted to \$821,347, being \$261,268.98 less than for 1909. This decrease is claimed to be due to the extremely cold weather, which prevented to a great extent mining operations.

The earnings for 1910 were \$3,110.55, being \$1,542.21 less than for 1909, while the expenditures for 1910 amounted to \$13,822.20 and

exceeded those of last year by \$511.96.

There were made, in addition to the regular assays required for the determination of the value of bullion for payment of deposits,

628 assays.

Assay office at Helena.—The value of the deposits received during 1910 amounted to \$2,013,632.58 and exceeded those of 1909 by 107,621.07, which apparently is due to the increased output of Montana bullion deposited at this office. The earnings for 1910 amounted to \$3,438.22, \$888.08 less than for 1909, while the expenditures were \$21,841.74, or \$594.82 less than in 1909.

There were 3,625 assays made at this office, which required the manufacture of 9,000 cupels. There were 40 mass melts made from 574 bars weighing 17,118.85 ounces and valued at \$272,560.95.

574 bars weighing 17,118.85 ounces and valued at \$272,560.95.

Assay office at Charlotte.—The deposits of bullion at this office amounted to \$89,231.66, a reduction of \$21,831.90 below the deposits of last year. The earnings for 1910 were \$911.78, against \$1,166.06 for 1909. The expenditures were \$4,212.04, being \$282.25 in excess of those for last year.

In addition to the regular assays for deposits 126 assays of ores

 ${f were\ made}.$

Assay office at St. Louis.—The deposits of bullion at this office during 1910 amounted to \$725,665.67 against \$554,588.53, the value of deposits for 1909, the increase of \$171,077.14 being due principally to the increased deposits made by private refineries at Chicago and Cincinnati. The earnings for 1910 were \$799.17, an increase of \$122.44 over the amount reported last year. The 1910 expenditures

were \$3,742.32, exceeding those of 1909 by \$35.67. In addition to the regular work of the office there were 25 assays of ores and 29

special assays of bullion.

Assay office at Deadwood.—The deposits received at this office were of the value of \$734,934.53, compared with \$1,329,965.43, reported for 1909. The reduction of \$595,030.90 is assumed to be due to the destruction by fire of a large milling plant. The earnings for the year 1910 amounted to \$2,385.17, a gain of \$12.29 over those of last year, while the expenditures amounted to \$7,629.17, or \$99.07 less than in 1909.

There were 416 assays made during the year for the determination of platinum, gold, silver, copper, lead, tin, and iron. Of these, 113 were made for the Forest Service and 18 for the General Land Office. There were required for this work 2,500 cupels, which were made in

this institution.

Assay office at Seattle.—The value of deposits at this office is reported as \$12,196,785.81, against \$19,314,127.29 for 1909, a reduction of \$7,117,341.48, which is accounted for by diminished deposits of bullion from Alaska as well as foreign crude and refined bullion.

The earnings for 1910 were \$19,394.66, being \$6,108.42 less than for 1909. The expenditures were \$42,498.51, against \$44,669.29 for

1909.

There were 2,133 deposits, requiring 4,800 assays, using in the

operations 12,000 cupels manufactured in this office.

There were 51 special assays of bullion and 112 assays of slag from the melting room. There were 64 assays for gold and silver and 29

assays for copper made for the Forestry Service.

The average fineness of the bullion deposited was $0.867\frac{1}{2}$ gold and 0.119 silver. For convenience in shipment to the mints for coinage, 1,551 bars, each under 400 ounces in weight and aggregating 72,527.87 ounces Troy, were remelted into 67 large bars.

The source of the bullion deposited during the fiscal year was as

follows:

		·	
Source.	Gold.	Silver.	Total coining value.
Alaska: Circle. Cooks Inlet. Copper River. Eagle. Innoko. Koyukuk. Nome Southeast Alaska. Assay office at Salt Lake.—The value of bullion deposited at this office amounted to \$904,156.37. The earnings for 1910 were \$1,508.91 and the expenditures \$15,071.12.

There were 333 deposits requiring assay and 5,000 cupels used in the operations of this institution, which were made on the premises. To facilitate shipment of bullion to the mint there were 265 bars, all under 300 ounces, massed into 13 larger bars, the total weight of which was 8,294.45 ounces.

OPERATIONS OF THE MELTER AND REFINERS AND THE COINERS FISCAL YEAR 1910.

The quantity of precious metals operated upon in the different departments of the mints and assay office at New York during the fiscal year 1910 aggregated 15,036.212 standard ounces of gold and 26,393.567 standard ounces of silver. The figures in the table following are the actual figures as obtained at the settlement of the accounts.

GOLD.

PERCENTAGE OF LOSS IN MELTING OF DEPOSITS, 1910.°

In the statement of percentages of loss appended hereto there is shown a wide difference of loss in melting similar grades of bullion deposited at the several offices connected with the service. This is accounted for by the crude condition in which many of the bars are presented.

Mints and assay offices.	Num- ber of de- posits.	Kings and bars.	Dust.	Re- torts.	Amal- gam unre- torted.	U.S. coin.	Mis- cella- neous.	Nug- gets.	Jew- elry.

		.001	3.000	5.210			1.320		

The percentage of loss in melting bars exchanged for coin was 0.284 and on return bars 9.240, occurring at the Denver Mint.

Unfinished coin.
 Operations on gold confined almost exclusively to unfinished coin.
 Operations suspended.

WASTAGE AND LOSS ON SALE OF SWEEPS AND GAINS FROM OPERATIONS.

The value of the precious metals wasted in the metallurgical and mechanical departments was \$5,676.09. A loss of \$4,912.75 occurred from the difference between the assay value of the bullion contained in sweeps sold and the amount received for the same, as described in the following table:

WASTAGE AND LOSS ON SALE OF SWEEPS.

	Mint at—					
Items.	Philadel-	San Fran- cisco.	New Orleans.	Denver.	office at New York.	Total.
Melter and refiner's gold wastage Melter and refiner's silver wastage	\$1,663.17	\$1,575.90				\$1,575.90 1,663.17

Total	2,657.01	5, 018. 19	766.07	1,137.37	1,010.20	10, 588. 84
Paid as follows: From contingent appropriation From parting and refining appro-	1,065.83	2,983.19	766.07	855.86		5, 670. 95
priation	1,591.18	2,035.00	,	281.51	1,010.20	4,917.89
Total	2,657.01	5,018.19	766.07	1,137.37	1,010.20	10, 588. 84

The wastage and loss on sale of sweeps amounted to \$10,588.84. Against these losses there were gains arising from the operations in bullion during the year aggregating \$116,543.30, as follows:

	Character of gains.		•	Fiscal year 1910.
recious metals recovered in fet gains on bullion shipped teceived in excess of assay v harges for treatment of depo and the bullion recovered fro alue of bullion recovered fro	operative officers. grains and sweeps. from assay offices to the mini alues of melter and refiner's s sit melting room sweeps. States gold coin for recoinage on cleaning refinery pipes after products.	s for coinage weeps sold		4,508.8 457.8 807.8 220.2

Deducting the incidental gains on bullion operated on from the value of the total wastages and losses on sale of sweeps, there has been a net gain in the operations of the mints during the fiscal year of \$105,954.46.

RECEIPTS AND DISPOSITION OF GOLD BULLION, FISCAL YEAR 1910.

The receipts of gold bullion at the mints and assay offices aggregated \$166,904,784.96, as shown by the following table:

			1		1
	Depo	sited.			
Institutions.	Deposits.	Uncurrent United States coin trans- ferred for recoinage.	Surplus bullion recovered.	Redeposited— Receipts from assay offices.	Total.
Philadelphia San Francisco New Orleans Denver New York Carson Helena Boise Charlotte St. Louis Deadwood Seattle Salt Lake City	34,750,377.94 873,228.57 14,704,274.40 57,741,835.87 1,302,626.74 1,938,916.67 797,997.72 88,387.51 723,929.92 676,095.98 12,090,312.16	\$2,213,740.31 1,292.65	5, 490. 80 3, 144. 87 335. 22 420. 25 190. 74	\$20,314,147.54 7,659,097.19 7,533,903.93 31,031,052.31	798, 417. 9 88, 578. 2 723, 976. 8 676, 465. 6

¹ Of this amount \$1,750 were in \$1 pieces.

Note.—The number of standard silver dollars coined to June 30, 1910, was 570,272,610, which added to the Hawaiian dollar coinage, 500,000, plus the number imported from the Philippine Islands, 150,000, and the number returned in Government transports from the Philippine Islands, 493,680, equals 571,416,290. Since July 1, 1898, the number of standard silver dollars exported in transports has been 2,495,000, and since 1893 the number melted has been 188,964 (see this report, p. 249); and the number of Hawaiian dollars melted to June 30, 1910, has been 454,818, a total disposition of 3,138,782, leaving in the United States on June 30, 1910, 568,277,508 standard silver dollars, and \$155,158,748 in subsidiary silver coins.

UNITED STATES GOLD COIN IN CANADA.

The holdings of United States gold coin in the treasury of the Dominion of Canada on December 31, 1909, was \$62,988,474.

The holdings of the charter banks (29 in number), on the same date aggregated \$17,364,362, or 63.24 per cent of their specie holdings. The total amount of United States gold coin in Canadian reserves on the foregoing date was therefore \$80,352,836.

GOLD AND SILVER USED IN INDUSTRIAL ARTS IN THE UNITED STATES DURING THE CALENDAR YEAR 1909.

Among the purveyors of gold and silver bars for use in the industrial arts the United States Mint at Philadelphia and the United States assay office at New York hold the foremost places; consequently, the larger portion of the material consumed in the arts is brought under Government notice and is a matter of public record.

The following table gives the value of the gold and the quantity of the silver bars issued by the Government institutions and private refineries during the calendar year 1909, with the class of material from which they were made:

Gold and Silver Bars Issued by the Government Institutions and Manufactured by Private Refineries for use in the Industrial Arts during the Calendar Year 1909.

i * - *	Value	e of gold issu	ed by-	Weight of silver issued by-		
Materials used.	Govern- ment insti- tutions.	Private refineries.	Total.	Govern- ment insti- tutions.	Private refineries.	Total.
Domestic bullion Foreign material United States coin Old jewelry, etc. Total	\$18,455,948 10,561,660 98 2,870,870 31,888,576	\$224, 255 207 364, 458 2, 015, 829 2, 604, 749	\$18,680,203 10,561,867 364,556 4,886,699 34,493,325	Fine ounces. 594,763 1,605,856 354,629 2,555,248	Fine ounces. 15,634,015 3,209,021 1,500 6,425,498 25,270,034	Fine ounces 16, 228, 778 4, 814, 877 1, 500 6, 780, 122 27, 825, 282

Estimating that the total amount of gold coin used in the arts during the calendar year 1909 has been \$3,500,000, and silver coin \$100,000, equivalent to 77,344 fine ounces, the total industrial consumption would be as follows:

Materials used.	Gold.	Silver.
Domestic bullion. Foreign material. United States coin. Old material. Total.	Value. \$18,680,203 10,561,867 3,500,000 4,886,699 37,628,769	Fine ounces. 16,228,778 4,814,877 77,344 6,780,127 27,901,126

In order to arrive at the net consumption in the industrial arts, there should be deducted from the foregoing totals the amount of old jewelry, plate, etc., included, and also the amount of the same class of material returned to coinage use. In the year 1909 these amounts aggregated \$7,380,560 in gold, and 6,941,962 fine ounces of silver, which leaves \$30,248,209 of gold and 20,959,164 fine ounces of silver as the net amount of new bullion devoted to industrial use.

The following table gives the amounts and the classification of gold and silver used in the industrial arts in the United States since 1880:

THE WORLD'S INDUSTRIAL CONSUMPTION OF THE PRECIOUS METALS IN 1909.

This bureau estimates the world's consumption of the precious metals in the arts during the calendar year 1909 as follows: Gold, of the value of \$142,506,100, equivalent to 6,893,733 ounces, fine; and silver, 104,838,200 ounces, fine, of the commercial value of \$54,515,864. In these estimates only new material is taken into account.

PRODUCT OF GOLD AND SILVER IN THE UNITED STATES IN 1909.

The detailed statistics of the product of gold and silver in the United States for the calendar year 1909 are presented in a special report to the Secretary of the Treasury.

The distribution of the product among producing States and Territories was as follows:

Approximate Distribution, by Producing States and Territories, of the Product of Gold and Silver in the United States for the Calendar Year 1909.

[As estimated by the Director of the Mint.]

WORLD'S COINAGE.

In the appendix will be found a table, revised from the latest information received, exhibiting the coinages of the various countries of the world during the calendar years 1907, 1908, and 1909.

The figures in the following table represent, as nearly as this bureau has been able to ascertain, the total value of, and the fine ounces consumed in, the gold and silver coinages executed in the world since 1873.

It must be borne in mind, however, that the total of these coinages does not correctly represent the amount of new gold and new silver made into coins during the year, for the reason that the coinages as reported include the value of domestic and foreign coins melted for recoinage, as well as old material, plate, etc., used in coinage.

In the circular letter of inquiry prepared at this bureau and sent to foreign Governments through the Department of State, asking for information on these subjects, it was especially requested that each country report the amount of such recoinages. This has been done in many instances, but not in all.

Coinage of Gold and Silver of the Mints of the World by Calendar Years since 1873.

VALUES OF FOREIGN COINS.

TREASURY DEPARTMENT, October 1, 1910.

In pursuance of the provisions of section 25 of the act of August 28, 1894, I hereby proclaim the following estimate by the Director of the Mint of the values of foreign coins to be the values of such coins in terms of the money of account of the United States, to be followed in estimating the value of all foreign merchandise exported to the United States on and after October 1, 1910, expressed in any of such metallic currencies.

A. PIATT ANDREW,

Acting Secretary.

VALUES OF FOREIGN COINS.

Country.	Standard.	Monetary unit.	Value in terms of United States gold dollar.	Coins.

MONETARY LEGISLATION.

CHAP. 25.—An Act Prescribing certain provisions and conditions under which bonds and certificates of indebtedness of the United States may be issued, and for other purposes.

·Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That any bonds and certificates of indebtedness of the United States hereafter issued shall be payable, principal and interest, in United States gold

coin of the present standard of value; and that such bonds may be issued in such denominations as may be prescribed by the Secretary of the Treasury.

SEC. 2. That any certificates of indebtedness hereafter issued shall be exempt from all taxes or duties of the United States, as well as from taxation in any form by or under State, municipal, or local authority; and that a sum not exceeding one-tenth of one per centum of the amount of any certificates of indebtedness issued is hereby appropriated, out of any money in the Treasury not otherwise appropriated, to pay the expenses of preparing, advertising, and issuing the same.

Sec. 3. That all acts or parts of acts inconsistent with the provisions of this act are

hereby repealed.

Approved, February 4, 1910.

CHAP. 240.—An Act To establish in the Department of the Interior a Bureau of Mines.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there is hereby established in the Department of the Interior a bureau, to be called the Bureau of Mines, and a director of said bureau, who shall be thoroughly equipped for the duties of said office by technical education and experience and who shall be appointed by the President, by and with the advice and consent of the Senate, and who shall receive a salary of six thousand dollars per annum; and there shall also be in the said bureau such experts and other employees as may from time to time be authorized by Congress.

SEC. 2. That it shall be the province and duty of said bureau and its director, under the direction of the Secretary of the Interior, to make diligent investigation of the methods of mining, especially in relation to the safety of miners, and the appliances best adapted to prevent accidents, the possible improvement of conditions under which mining operations are carried on, the treatment of ores and other mineral substances, the use of explosives and electricity, the prevention of accidents, and other inquiries and technologic investigations pertinent to said industries, and from time to time make such public reports of the work, investigations, and information obtained as the Secretary of said department may direct, with the recommendations of such bureau.

SEC. 3. That the Secretary of the Interior shall provide the said bureau with furnished offices in the city of Washington, with such books, records, stationery, and appliances, and such assistants, clerks, stenographers, typewriters, and other employees as may be necessary for the proper discharge of the duties imposed by this act upon such bureau, fixing the compensation of such clerks and employees within appropri-

ations made for that purpose.

SEC. 4. That the Secretary of the Interior is hereby authorized to transfer to the Bureau of Mines from the United States Geological Survey the supervision of the investigations of structural materials and the analyzing and testing of coals, lignites, and other mineral fuel substances and the investigation as to the causes of mine explosions; and the appropriations made for such investigations may be expended under the supervision of the Director of the Bureau of Mines in manner as if the same were so directed in the appropriation acts; and such investigations shall hereafter be within the province of the Bureau of Mines, and shall cease and determine under the organization of the United States Geological Survey; and such experts, employees, property, and equipment as are now employed or used by the Geological Survey in connection with the subjects herewith transferred to the Bureau of Mines are directed to be transferred to said bureau.

SEC. 5. That nothing in this act shall be construed as in any way granting to any officer or employee of the Bureau of Mines any right or authority in connection with the inspection or supervision of mines or metallurgical plants in any State

Sec. 6. This act shall take effect and be in force on and after the first day of July,

nineteen hundred and ten. Approved, May 16, 1910.

MONETARY STATISTICS OF FOREIGN COUNTRIES.

The statistics of the production and coinage of the precious metals, imports and exports of gold and silver, amount of bank and Government notes both covered and uncovered of the different foreign countries published annually in the reports of this bureau are obtained directly from the Governments of such countries by the representatives of the United States accredited to them.

A copy of the interrogatories covering the points on which information is sought from the Governments of foreign countries is sent yearly to the United States ambassadors and ministers through the Department of State, and the replies, in the form of reports, are forwarded directly to the Bureau of the Mint. The interrogatories sent are as

1. What was the amount of gold and silver coinage by denominations and number of pieces during the calendar year 1909 (new coinage and domestic and foreign

recoinage.

2 (a). Was any coinage executed at your mint for other Governments during the

year 1909? If so, state character and amount of same.

2 (b). Was any coinage executed at foreign mints for your Government? If so, state character and amount of same.

3. What was the estimated weight of fine gold and silver used in the industrial arts

during the calendar year 1909?

4. What was the total import of United States gold coin and what amount was deposited and melted at the mints during the year 1909? 5. What was the weight, expressed in kilograms, fine and the value of the gold and silver produced from the mines of the country during the calendar year 1909? Give

the product of the colonies of the country, naming them separately. 6. What, approximately, was the stock of gold and silver coin and bullion in the country on December 31, 1909? Give stock in public treasuries and banks and in

circulation, separately.

7. What was the amount of Government and bank notes outstanding at the end of the year 1909, and what amount was not covered by gold coin and bullion and legaltender silver coin held for their redemption?

8. Is gold at premium as compared with the actual currency of the country? If so,

what is the actual currency?

9. Were any laws passed during the year 1909 affecting the coinage, currency, or banking? If so, please forward copies of the same.

10. Is there a report published on the operations of the mint? If so, please forward a copy; also, a report of the Department of Mines.

11 (a). What was the import and export of gold during the calendar year 1909; the value of coin, bullion, and ore to be given separately and by countries?

11 (b). What was the import and export of silver during the calendar year 1909;

the value of coin, bullion, and ore to be given separately and by countries?

12. Please examine the appended description of the coins of your country, bring-

ing it down to date with corrections?

The foregoing report, covering the operations of the mints and assay offices of the United States for the fiscal year ended June 30, 1910, is respectfully submitted.

GEO. E. ROBERTS. Director of the Mint.

Hon. Franklin MacVeagh, Secretary of the Treasury.

No. 21.—PRODUCT OF GOLD AND SILVER IN THE WORLD SINCE 1860.

[The annual production of 1860 to 1872 is obtained from 5-year period estimates, compiled by Dr. Adolph Soetbeer. Since 1872 the estimates are those of the Bureau of the Mint.]

REPORT OF THE COMPTROLLER OF THE CURRENCY.

TREASURY DEPARTMENT, OFFICE OF THE COMPTROLLER OF THE CURRENCY, Washington, December 5, 1910.

SIR: In compliance with the requirements of section 333 of the Revised Statutes of the United States, the forty-eighth annual report of the operations of the Currency Bureau for the year ended October 31, 1910, is herewith submitted.

CONDITION OF NATIONAL BANKS.

The resources and liabilities of national banks in active operation at date of the periodical reports made to the Comptroller during the past year are shown in detail in the following table:

Abstract of Reports of Condition of National Banks in the United States from November 16, 1909, to September 1, 1910.

Since September 1, 1909, there has been a net increase in the number of national banks of 196 and in aggregate resources of \$252,227,-075.52. At date of first call during the report year, namely, November 16, 1909, there were 7,006 national banks with aggregate resources of \$9,591,394,662.73. On January 31, 1910, the resources had increased to \$9,730,518,635.37; on March 29, to \$9,841,924,345.97, reaching the maximum during the year on June 30 of \$9,896,624,-696.73. The September 1 call showed a decrease of \$70,443,244.37, or to \$9,826,181,452.36.

The banks' loans and discounts, representing over 55 per cent of their assets, amounting to \$5,128,882,351.18 on September 1, 1909, increased to the extent of \$19,905,243.52 by November 16 and by \$80,715,880.70 January 31, 1910. The greatest increase during the year was between January and March 29, the amount of increase being \$202,589,719.24, when the total amount of loans was \$5,432,093,194.64. By June 30 the loans had decreased slightly, but only

to the extent of \$1,934,007.89. On September 1, the date of the last report in the year, the loans reached the maximum for the year and for any prior date in the history of the national-banking system, namely, \$5,467,160,637.98.

The net increase in loans and discounts between September 1, 1909,

and September 1, 1910, was \$338,278,286.80.

In the reports of condition of national banks, loans and discounts are divided into five classes, namely: On demand, with one or more individual or firm names; paper secured by stocks, bonds, and other personal securities; on time with two or more names, single name without other security; on time, secured by stocks, bonds, and other personal securities, including mortgages or other liens on realty. On September 1, 1910, the single-name demand paper amounted to \$524,306,117; on demand, secured by stocks, etc., \$939,111,340; on time, two or more name paper, \$1,842,517,150; on time, single-name paper, \$1,068,278,898; on time, secured by bonds, etc., \$1,092,947,132.

The demand paper represents 26.8 per cent of the total; on time, two or more names, 33.7 per cent; on time, single name, 19.5 per cent;

and all other time loans, 20 per cent.

That the relative proportion of each class of loans is attended with very little change is evident from the accompanying comparative statement taken from the reports of dates September 23, 1908, September 1, 1909, and September 1, 1910:

	1908.				1910.	
Class.	Amount.	Per cent.	Amount.	Per cent.	Amount.	Per cent.
On demand, paper with one or more individual or firm names	\$3 95, 892, 695	8.3	\$441,529,690	8.6	\$524,306,117	9.6

UNITED STATES AND OTHER BONDS OWNED BY NATIONAL BANKS.

The banks' investments in United States bonds have increased from \$731,028,110 on September 1, 1909, to \$740,592,100 on September 1, 1910, a net increase of \$9,563,990. One-third of the

increase, or \$3,018,950, occurred between June 30 and September 1, 1910. Approximately 92 per cent of the government bonds held by the banks is in bonds on deposit as security for circulation and the remainder held by the Treasurer as security for deposits except the amount in the banks' vaults. On September 1, 1910, United States bonds on deposit to secure public deposits amounted to \$40,857,700 and those held in their vaults \$14,042,110. On September 1, 1909, the premium on United States bonds as shown by the banks' reports aggregated \$14,721,196.01, and had been reduced by September 1, 1910, to \$10,891,763.54.

Bonds, securities, etc., other than United States bonds, owned by the banks on September 1, 1910, aggregated \$865,054,855, less by \$51,325,445 than the amount held on September 1, 1909. Included in this class of assets on September 1, 1909, were \$17,991,758.47 bonds on deposit with the Treasurer to secure public deposits. On September 1, 1910, the amount of bonds deposited for this purpose

had been reduced to \$10,927,191.01.

In connection with the possible acceptance of bonds other than governments for additional circulation under authority of the act of May 30, 1908, the following comparative statement of the aggregate amount of bonds owned by the national banks on September 1, 1909 and 1910, is of interest:

	Septem	September 1			
Class.	1909.	1910.			
State, county, and municipal bonds. Railroad bonds. Other public service corporation bonds. All other bonds. Stocks (presumably taken for debt). Total	916,380,300	865,054,855			

In the appendix to the report of the Comptroller of the Currency will be found a table containing details relative to investments in assets of this character by national banks located in each of the reserve cities and States.

Exchanges for clearing house, amounting to \$329,725,534.43 on September 1, 1909, increased to \$407,440,258.24 on January 31, 1910, decreased to \$305,632,471.72 on March 29, increased to \$428,654,238.28 on June 30, and decreased to \$284,962,685.13 on September 1, 1910. The net decrease during the year was \$44,762,849.30.

Bills (circulating notes) of other national banks were held to the amount of \$40,204,902 on September 1, 1909, reaching the maximum of \$44,062,832 on March 29, 1910, and declined to \$41,547,840 on September 1, 1910, which was \$1,342,938 greater than on September 1, 1909.

The banks' holdings of legal tenders vary to a comparatively slight extent only. The holdings on September 1, 1909, amounting to \$187,693,960, declined to \$172,400,153, the minimum during the

year, on January 31, 1910. At the close of business on September 1, 1910, legal-tender notes were held amounting to \$179,058,491.

The amount of gold and silver in the vaults of the banks on September 1, 1909, was \$666,397,897.38; on November 16, \$628,834,658.94; on January 31, 1910, \$660,678,716.40; on March 29, \$661,799,771.93; on June 30, \$644,343,854.77; on September 1, 1910, \$672,626,546.13. The average amount of gold held by the banks, as shown by each of the reports, was \$504,694,219, and of silver \$151,086,071 or 76.96 per cent in gold and 23.04 per cent in silver.

LIABILITIES OF NATIONAL BANKS.

The aggregate liabilities of national banks reached their maximum prior to the panic of 1907 on May 20 of that year, when they amounted to \$8,476,500,000, a sum not reached until May 14, 1908, when they were reported at \$8,594,600,000. Each report from that date until June 30, 1910, shows a steady and material increase, the maximum being reached on the date last mentioned, when the total was reported as \$9,896,600,000. Between this date and September 1 there was a decrease in the banks' liabilities of \$70,243,000, the decrease being mainly in individual deposits.

The liabilities of banks, exclusive of the amounts due depositors, other creditors, and holders of circulating notes, represent approximately 20 per cent of the aggregate liabilities and consist of capital, surplus, and other undivided profits. On September 1, 1909, the paid-in capital amounted to \$944,642,067, the surplus fund

\$597,981,875.93, and other undivided profits \$203,756,438.40.

The capital steadily increased, as shown by each report during the year, to \$1,002,735,123.25 on September 1, 1910. This is the maximum amount of paid-in capital stock of national banks shown by any report during the existence of the system. The increase in capital was attended by approximately a corresponding increase in surplus, rising from \$597,981,725.93 on September 1, 1909, to \$648,268,369.97 on September 1, 1910. The undivided-profit account is more fluctuating and varied during the year from a minimum of \$199,342,048.39 on January 31 to a maximum of \$225,769,399.53 on September 1, 1910. The net increase in capital during the year—that is, between September 1, 1909, and September 1, 1910—was \$58,093,056.25, surplus \$50,286,449.04, and undivided profits \$22,012,961.13.

There has been relatively small fluctuation in the amount of United States deposits and deposits of United States disbursing officers during the year, though a net increase of \$1,455,617.36 is shown. These funds on September 1, 1909, amounted to \$48,704,883.27, and on September 1, 1910, to \$50,160,500.63. Bills payable reached the lowest point during the year on January 31, 1910, amounting at that time to \$27,718,183.71, and reaching the maximum, \$72,847,849.63, on September 1, 1910. The increase on the latter date, as compared with September 1, 1909, was \$36,618,871.34. The volume of notes and bills rediscounted was at its minimum and maximum on the same dates as bills payable, the extremes being \$6,356,123.10 and \$18,867,294.33. Comparing September 1, 1910, with the year prior, there is shown to have been a net increase in rediscounts of

\$4,787,122.72, and a net increase in bills payable and rediscounts of

\$41,505,994.06.

The individual deposits steadily increased during the year from \$5,009,893,079.79 on September 1, 1909, to \$5,287,216,312.20 on June 30, 1910, but between the latter date and September 1 there was a decrease of \$141,557,944.55, the amount on deposit at the latter date being \$5,145,658,367.65. Comparing the returns on September, 1909, with those of September, 1910, there is shown to have been a net increase in individual deposits of \$135,765,287.96.

Prior to March 29, 1910, while the individual deposits were classified in the reports made by the banks, the details were not incorporated in the abstracts. The expressed interest in this feature of the report was an inducement to the publication of the information in detail, and there is submitted herewith the amount of each class of individual deposits on March 29, June 30, and September 1, 1910.

		1910.

Beginning with the call of November 27, 1908, an effort was made to ascertain the extent to which so-called "savings deposits" are held by national banks, in view of the fact that a number of associations conduct savings departments and others carry deposits classed as "savings accounts," although not in a special department. It further appears that in savings deposits are included both time and demand certificates. The question as to what should be reported as savings deposits has been the occasion of considerable correspondence, but the conclusion was reached that it was a question to be determined by the bank upon the advice that "all deposits accepted with the understanding between the officers of the bank and the depositors that they were savings deposits" should be so reported. The same question was raised in connection with the preparation of blanks for use by the National Monetary Commission in obtaining returns from the banks under date of April 28, 1909. The schedule provided for reporting deposits included the item "savings deposits," and the latter were characterized by the commission as—

Deposits (a) which may be withdrawn on presentation of the pass book, or other similar form of receipts which permits successive deposits or withdrawals to be entered thereon; or (b) which at the option of the depositary may be withdrawn only at the expiration of a stated period after notice of intention to withdraw has been given; or (c) upon which no interest is allowed until the funds have remained on deposit for at least three months.

Beginning with the call of January 31, 1910, information was submitted with respect to the number of savings depositors, in addition to the amount of savings deposits.

65872°-----------------------23

While the following statement, relating to the number of savings depositors from January 31 to September 1, 1910, and amount of savings deposits from September 1, 1909, to September 1, 1910, indicates an increase in the volume of savings deposits in national banks, it is a question as to whether the apparent increase was not due to fuller returns rather than to an actual increase in deposits of this character. The number of banks reporting savings deposits increased from 2,010 on September 1, 1909, to 2,852 on September 1, 1910.

The number of reported savings depositors and amount of savings

deposits on the dates indicated are as follows:

Date.	Number of depositors.	Amount of deposits.
September 1, 1909. November 16, 1909. January 31, 1910. March 29, 1910 June 30, 1910 September 1, 1910.	1,865,085 2,069,141 2,087,583	\$376, 642, 615. 72 389, 406, 310. 52 524, 604, 578. 71 543, 133, 362. 15 580, 889, 677. 65 582, 472, 427. 33

RESERVE AND DEPOSITS.

The original law required the maintenance of a reserve on deposits in all respects, but an exception was made with respect to United States deposits in the act of May 30, 1908. In determining the amount of deposits on which reserve is required to be held there is first ascertained the net balance due to other banks, to which are added dividends unpaid, individual deposits, and deposits of United States disbursing officers. From this gross amount the following deductions are allowed: Checks on other banks in the same place, exchanges for clearing house, bills of other national banks, and amount due from the Treasurer of the United States. The resultant amount of these deductions represents the sum of the deposits upon which is based the required reserve; that is, 25 per cent for reserve city banks and 15 per cent for all other banks. The amount of the reserve being determined, there is deducted therefrom the 5 per cent redemption fund which the law authorizes to be counted as a The 25 per cent reserve required by central part of the reserve. reserve city banks must consist of lawful money in bank; in other reserve city banks at least 12½ per cent in bank, with a limit of 12½ per cent with approved agents in central reserve city banks. Banks located elsewhere than in reserve cities are required to maintain a reserve of 15 per cent, of which at least two-fifths, or 6 per cent, must be in cash in bank and three-fifths, or 9 per cent, may be on deposit with correspondents in central or other reserve city banks.

While occasionally a bank is deficient in the amount of reserve required, the aggregate requirement for all banks is rarely deficient. During the period covered by the six calls ended September 1, 1910, the central reserve city banks, on deposits aggregating \$1,500,000,000, held on four dates reserve in excess of the requirement ranging from \$2,700,000 to \$25,400,000, the maximum amount being held on September 1, 1910. On March 29, 1910, the average reserve in these banks was 24.92 per cent, a deficiency of \$1,245,567, and on

June 30, 1910, 24.96 per cent, a deficiency of \$614,823. The deposits in other reserve city banks during the same period averaged approximately \$1,700,000,000, and the percentage of reserve ranged from a minimum of 27.25 per cent on June 30, 1910, to a maximum of 29.05 per cent on September 1, 1909, the excess on the same dates being \$38,700,000 and \$69,500,000. On deposits averaging for the six calls approximately \$3,000,000,000, the country banks—that is, those located elsewhere than in reserve cities—held a reserve ranging from a minimum of 22.57 per cent on June 30, 1910, to a maximum of 24.58 per cent on September 1, 1909, the amount of reserve in excess of requirement for the same dates being \$227,800,000 and \$270,100,000, respectively, the average deposits slightly exceeding Based on the several calls from September 1, 1909, \$6,100,000,000. to September 1, 1910, for all banks in the country the reserve varied from a minimum of 24.44 per cent on June 30, 1910, to a maximum of 26.05 per cent on September 1, 1909, the excessive amount on the first date named being \$265,900,000 and on the last \$346,900,000. The foregoing percentages and excessive amounts are based on the aggregate amount of the following items: Cash on hand, due from reserve agents, and amounts held in the redemption fund. fining the statistics with respect to reserve held to cash in bank, redemption fund, and amount available with reserve agents, the latter not exceeding 50 per cent of the net reserve required in reserve city banks and 60 per cent in country banks, the lawful reserve held by other reserve city banks exceeded the requirement on every date, ranging from a minimum of 25.27 per cent on March 29, 1910, to a maximum of 25.65 per cent on September 1, 1909. On the same basis the reserve held by country banks varied from a minimum of 16.88 per cent on September 1, 1910, to a maximum of 17.08 per cent on September 1, 1909. Taking the country as a whole, the lawful money reserve exceeded 21 per cent on the date of each call by a fraction of 1 per cent, the minimum rate being 21.21 per cent on March 29, 1910, and the maximum of 21.67 per cent on September 1, 1909.

The entire reserve required to be held by central reserve city banks is in lawful money with the exception of the redemption fund, which averages approximately one-fourth of 1 per cent. In other reserve city banks the lawful money reserve slightly exceeds 51 per cent, the amount available with reserve agents 47 per cent, and the redemption fund slightly less than 2 per cent. The reserve held in lawful money by country banks averages 45 per cent of the total reserve held, the amount available with reserve agents averaging approximately 50 per cent, and the amount in redemption fund slightly in excess of 4 per cent. Taking the country as a whole, the lawful money in bank is approximately 64 per cent of the total reserve held, amount available with reserve agents 34 per cent, and the redemp-

tion fund 2 per cent.

Aggregating the deposits subject to reserve in all national banks and the items of reserve, it appears that the actual cash in bank—that is, specie and legal tenders—averaged 13.4 per cent on the dates of the reports from September 1, 1909, to September 1, 1910. The amounts available with reserve agents averaged 7.04 per cent and the redemption fund fifty-two one-hundredths of 1 per cent.

The percentages of legal and available reserve at date of each report for each class of banks beginning with November 16, 1909, are shown in the accompanying table:

Loans and discounts, United States bonds, and lawful money represent approximately 70 per cent of the aggregate resources of national banks, and a like proportion of liabilities is represented by capital, surplus and profits, and individual deposits. The relation of these items has varied but slightly during the past ten years, as will be observed by reference to the accompanying table:

Items.	1901.	1902.	1903.	1904.	1905.	1906	1907.	1908.	1909.	1910.

VIOLATIONS OF THE PROVISIONS OF THE NATIONAL-BANK ACT.

Subsequent to the compilation of statistics based upon reports of condition for each call, the reports are carefully examined for the purpose of ascertaining the extent to which the restrictions and limitations of the national bank act have been violated, and a record made of the number of such violations.

On June 22, 1906, section 5200 of the Revised Statutes, relating to the loan limit, was amended to permit of a loan to a single interest to the extent of 10 per cent of the capital and surplus, the aggregate, however, not to exceed in any case 30 per cent of the paid-in capital. On January 29, 1906, the number of banks reporting loans in excess of the lawful limit represented 56 per cent of the total number of banks reporting. On January 26, 1907, the percentage was reduced to 28.4, and on August 22 of that year to 20.5. Beginning with the call of February 14, 1908, and on the date of each subsequent report during that year, the percentage of violations varied from a maximum of 13.98 on September 23 to a minimum of 13.17 on November 27.

To the record relating to excessive loans has been added the percentage of banks violating the restrictions of law relating to loans on real estate, reserve, and money borrowed, beginning with February 5, 1909, and continuing to September 1, 1910, the details of

which are set forth in the following table:

Date.	Section 5137, real estate loans.	Section 5191, reserve.	Section 5200, excessive loans.	Section 5202, borrowed money.	Total.
February 5, 1909. April 28, 1909. June 23, 1909. September 1, 1909. November 16, 1909. January 31, 1910. March, 29, 1910. June 30, 1910. In July last the banks were notified that repetition of failure to forward reports of condition within the time prescribed by law would be followed by an imposition of the authorized fine of \$100 per day. Since the date in question fines have been collected for this offense from the following banks: The First National Bank of Greenwood, Miss., \$100, and the Farmers National Bank of Hamburg, Iowa, \$400.

AUTHORIZED AND PAID-IN CAPITAL AND CLASSIFICATION OF NATIONAL BANKS BY CAPITAL.

At the close of business on October 31, 1909, the authorized capital stock of national banking associations, as shown by the books of this bureau was \$964,621,925. Since that date there has been a gross addition of capital, by new organizations and existing banks increasing their capital, of \$82,225,010. During the same period there was a decrease in capital of \$30,949,800 by banks going into voluntary liquidation, those placed in the charge of receivers, and reductions of capital by going banks. These changes resulted in a net increase during the year of \$51,275,210, making the authorized capital of all national banks on October 31, 1910, \$1,015,897,135.

The number of banks and the paid-in capital stock of the associations, grouped by States and geographical divisions, the banks being divided according to capital stock, are shown in detail in the appendix to this report. The banks are divided into seven classes, beginning

with the minimum of \$25,000 and ending with a maximum of \$5,000,000 and over. As will be noted by reference to the following table, approximately 60 per cent of the banks are those with capital ranging from \$50,000 to \$250,000, and further that these banks represent 36.71 per cent of the capital of all banks. While slightly over one-fourth of the banks are those with capital of \$25,000, these banks represent but 4.79 per cent of the total national-bank capital. Banks with capital ranging from \$250,000 to \$25,000,000, while representing only 9.26 per cent of the total number of banks, the capital represented thereby is 57.11 per cent of the total.

sented thereby is 57.11 per cent of the total.

This classification of number and per cent of capital of national

banks is summarized in the following table:

		<u> </u>		
Class.	Number.	Per cent.	Capital.	Per cent.
CAPITAL.	: .		•	
\$25,000. Over \$25,000 and less than \$50,000	1,852 413	25.82 5.76	\$48,056,021 13,962,802	4.79 1.39

NATIONAL-BANK NOTES IN CIRCULATION.

At the close of business on December 3, 1907, the reported outstanding circulating notes of national banks exceeded for the first time \$600,000,000, the exact amount on that date being \$601,805,985, equaling approximately two-thirds of the paid-in capital stock of the banks. On September 1, 1909, the liabilities of the banks on account of circulation issued reached \$658,040,356, and on June 30, 1910, the reported issues were \$675,632,565, the maximum amount reported outstanding during the existence of the national banking system. By September 1 there was a decrease of \$810,712, the issues on that date being \$674,821,853, a net increase since September 1, 1909, of \$16,781,497.

In the appendix of the report of the Comptroller of the Currency will be found a table showing the amount and percentage of circulation outstanding, the capital stock, and aggregate assets of the banks at date of each report from October, 1863, to September 1, 1910, together with the amount of money in the United States on or about June 30 of each year and the percentage of bank circulation outstanding to the stock of money in the country. From this table it appears that in 1904 for the first time since 1885 the outstanding circulation exceeded 50 per cent of the paid-in capital stock of the banks. The minimum proportion during this period was 18.4 per cent, the date being July 9, 1891. On that date circulating notes formed but 7.3 per cent of the stock of currency in the country. In the fall of 1905 bank notes in circulation exceeded slightly 60 per cent of the banks' capital, but by November, 1909, reached 70 per cent, the highest proportion since April 23, 1880. At the close of business on September 1, 1910, the percentage of circulation to capital was 67.3. From 1867 to 1874 bank notes in circulation averaged approximately 40 per cent of the stock of currency in the country, the maximum, 43.7 per cent, being reached on

June 13, 1873, declining to the minimum in the history of the system in 1891, when it represented but 7.3 per cent of the aggregate stock.

The effect of the act of March 14, 1900, authorizing an increase of circulation to par of the bonds deposited and reducing the tax on circulation is shown in the gradual increase in the percentage of national-bank circulation to the stock of money in the country from 11.3 per cent on June 29, 1900, to 19.8 per cent on September 1, 1910.

The relative amount of circulation, stated in millions of dollars, issued by national banks in New York, Chicago, and St. Louis, and other reserve cities, and elsewhere in the country, at date of each report, from November 16, 1909, is shown in the following table:

OUTSTANDING CIRCULATION REPORTED BY THE BANKS ON THE DATES INDICATED.

	Date.	New York.	New York, Chicago, and St. Louis.	Other reserve cities.	All reserve cities.	Country.	Total.

NATIONAL-BANK CIRCULATION ISSUED, REDEEMED, AND OUTSTANDING.

Beginning with the first issue of national-bank currency, on December 21, 1863, and running to October 31, 1910, national-bank notes to the amount of \$5,000,244,105 have been issued and \$4,270,992,050 redeemed, leaving outstanding, exclusive of nonpresented fractions and gold notes, \$729,252,055. During the year circulating notes to the amount of \$417,941,890 were issued. Incomplete currency ready for issue to the banks was held in the vaults of the office at the close of business October 31, 1910, to the amount of \$663,290,240. Of the \$3,465,240 of gold bank notes issued all have been redeemed with the exception of \$74,679.50. The act of July 12, 1870, authorized the organization of banks to issue circulation redeemable in gold, but within about ten years from the date of the act all of these banks were closed or converted into currency banks.

On October 31, 1910, there were two national banks in the system, each having capital of \$25,000 and bonds on deposit as security for circulation to the amount of \$6,250, that had not issued circulating notes.

It will be recalled that the act of March 14, 1900, limited the amount of \$5 notes that might be issued by any association to one-third of the total amount issuable on the security of United States bonds. This legislation required all banks issuing fives only to order plates for the printing of notes of other denominations and necessitated the ordering of plates for higher denominations by banks desiring to issue fives. On March 14, 1900, the proportion of \$5 notes outstanding was 31.2 per cent of the total issues of national-bank notes. The proportion decreased to 13.6 per cent in 1904, but reached the maximum since 1900 on October 31, 1909, when it stood at 20.05 per cent. On October 31, 1910, the percentage of fives to total circulation was 18.57 per cent.

In the following table is shown the amount of circulation of each denomination outstanding on March 14, 1900, and on October 31, 1908, 1909, and 1910:

Denominations.a	Mar. 14, 1900.	Oct. 31, 1908.	Oct. 31, 1909.	Oct. 31, 1910.b
Ones. Twos. Fives. Tens Twenties Fifties One hundreds. Five hundreds One thousands. a Gold notes not included.

REDEMPTION OF CIRCULATION.

In the year ended October 31, 1910, national-bank notes were received for redemption to the amount of \$504,151,186, of which, however, \$104,991,200, being fit for circulation, were returned to the banks of issue, and the remainder delivered by the National Bank Redemption Agency to the Comptroller of the Currency for destruction.

In the following table is shown the amount of circulation received for redemption during each month from November, 1909, to October 31, 1910:

Date.	Amount.	Date.	Amount.
January, 1910 February, 1910	43,484,347 60,864,575 41,570,159 39,917,273	May, 1910. June, 1910. July, 1910. August, 1910. September, 1910. October, 1910.	44,894,723 45,504,817 39,504,676 32,366,779

As will be observed by reference to the following table, of the total receipts for redemption during the year, the sum of \$432,464,500 was received from the eight cities named. This amount represents nearly 86 per cent of the total receipts. From New York alone was received nearly 46 per cent of the total volume of notes received at the department for redemption during the year:

City.	Amount.	City.	Amount.
New York Chicago Boston. Philadelphia	68,051,000 36,900,000	St. Louis. Cincinnati Baltimore. New Orleans.	12,555,000 11,678,000

Expenses incurred in the redemption of national-bank notes during the fiscal year ended June 30, 1910, aggregated \$434,093.10, an average rate per thousand dollars redeemed of \$0.88066.

b Includes notes redeemed but not destroyed.

PROFIT ON NATIONAL-BANK CIRCULATION.

In computing the profit on the issuance of national-bank circulation it is assumed that the entire amount based on the bond deposit is in circulation and no deduction is made by reason of the fact that a reserve fund of 5 per cent on the issues is required to be maintained in the office of the Treasurer of the United States for the redemption of notes as presented at the department, as the redemption fund is permitted by law to be counted as a part of the bank's lawful reserve. In the calculation appearing in the appendix to this report, the profit is stated, based on the average net price of bonds, monthly, during the year ended October 31, 1910, and is computed separately on deposits of 2 per cent consols of 1930, the 4 per cent loan of 1925, and the 2 per cent Panama Canal loan. Money is assumed to be worth 6 per cent and the measure of profit is the difference between the net receipts from the circulation loaned at 6 per cent and interest that would be obtained on the cost of the bonds loaned at the same rate; in other words, from the interest received on the bonds at the rate provided therein, and the interest on circulation loaned at 6 per cent, are deducted the taxes on circulation, expense incident to the obtaining of circulation, i. e., plates, redemption charges, etc., together with the sinking fund and from the difference is deducted the interest on the cost of the bonds to show the profit.

During the year in question, 2 per cent consols of 1930 ranged in price from a minimum of 100.505 on November, 1909, to a maximum of 101.24 in September, 1910, and on the same dates the profit on circulation in excess of 6 per cent on the investment was 1.387 per cent and 1.313 per cent, respectively; that is to say, on the issue of \$100,000 of circulation on the security of 2 per cent consols of 1930, at a cost of 100.505, the profit on circulation in excess of 6 per cent on the investment, was \$1,349.39, and on bonds at a cost of 101.24

the profit was \$1,329.31.

The highest average net price of 4 per cent bonds was 116.693 in November, 1909, and the rate of profit on circulation secured by bonds of that class was 1.076 per cent. The lowest price on these bonds during the year was 114.875 during May, June, and July, the rate of profit being 1.225 per cent in May, 1.220 per cent in June, and 1.215 per cent in July. The rate of profit, however, reached the maximum of 1.233 per cent when the bonds in February were quoted at 114.932. The profit on circulation secured by the Panama Canal bonds is but nominally in excess of the profit on 2 per cent consols, although in November, 1909, when the Panama Canal bonds were quoted at 100.130, the rate of profit on circulation was greater than on any other class of bonds at any time during the year, being stated at 1.426 per cent.

UNITED STATES BONDS.

No change has taken place in the interest-bearing bonded debt of the United States since October 31, 1909, when it amounted to \$913,370,490. This debt is evidenced by \$646,250,150 two per cent consols of 1930, \$63,945,460 three per cent loan of 1908, \$118,489,900 four per cent loan of 1925, and \$84,631,980 two per cent Panama Canal loan. At the close of business on October 31, 1910, United States bonds to the amount of \$694,926,070 were on deposit with the Treasurer of the United States as security for national bank circula-

tion and \$38,137,200 as security for public deposits. On September 1, the date of the last report of condition, the banks held in their vaults United States bonds to the additional amount of \$14,042,110, making an aggregate investment by national banks in government securities of \$747,104,380, or nearly 82 per cent of the bonded debt of the Government. Of the \$733,062,270 United States bonds on deposit as security for circulation and public deposits, \$687,735,780, or approximately 94 per cent, are consols of 1930 and Panama Canal bonds bearing interest at the rate of 2 per cent.

The bonded debt, together with the amount of United States bonds on deposit to secure national-bank circulation and government deposits, including other bonds for the latter purpose, on October 31, 1910, are shown by classes and amounts in the following table:

INTEREST-BEARING BONDED DEBT OF THE UNITED STATES, AND BONDS ON DE-POSIT TO SECURE NATIONAL-BANK CIRCULATION AND GOVERNMENT DEPOSITS, OCTOBER 31, 1910.

Class.	Bonded debt.	Bonds on de- posit to secure circulation.	Bonds on de- posit to secure government deposits.

In connection with the bonded debt of the Government, and the investment therein by national banks, the following statement, based upon conditions at the close of each month from November 30, 1909, to October 31, 1910, will be examined with interest. In addition to the statistics in the table relating to capital, bonds, and circulation, there is shown the average monthly price of 2 per cent consols of 1930.

EARNINGS AND DIVIDENDS OF NATIONAL BANKS.

While the dividend periods of national banks vary, and under the law reports of earnings and dividends are required to be made to the Comptroller within ten days after the declaration of dividends, for statistical purposes the reports are abstracted for semiannual periods ending December 31 and June 30. In the appendix to this report appear the abstracts, by reserve cities and States, for the periods ended December 31, 1909, and June 30, 1910. Combining these two abstracts, for the purpose of showing results for the entire year, it appears that the average capital on which dividends were paid was \$963,457,549. The average surplus was \$630,159,719 and the gross earnings \$402,665,823.44, against which were charged losses and premiums aggregating \$38,714,082.62, or 9.6 per cent, and expenses of \$209,784,251.35, or 52.18 per cent. With these deductions the net earnings are shown to have been \$154,167,489.47, from which dividends were paid to the amount of \$105,898,622, or 10.99 per cent on the capital and 6.65 per cent on the capital and surplus. The net earnings were equivalent to 9.67 per cent of the capital and surplus.

The act requiring the submission of reports of earnings and dividends was not passed until 1869; hence the records begin with the year ended March 1, 1870, continuing to June 30, 1910, a period of forty-one years. The average annual net earnings of banks during this period are shown to have been \$71,956,096 and the average dividends \$54,198,299, or an average rate of 8.98 per cent on the capital stock. The aggregate net earnings for the forty-one years are stated at \$2,950,199,928 and the dividends at \$2,222,130,367.

EXPENSES OF NATIONAL BANKS.

Exclusive of the tax levied and collected by the Commissioner of Internal Revenue under the corporation tax law of August 5, 1909, statistics relative thereto in respect to national and other banks being unavailable, national banks paid to the Government during the fiscal year ended June 30, 1910, the sum of \$4,494,223.81, of which \$3,463,466.68 was the amount of tax on circulating notes, \$434,093.10 cost of redemption of notes by the Treasurer of the United States, \$524,039.03 examiners' fees, and \$72,625 cost of plates for the printing of circulation for new banks and for those the charters of which have been extended.

The banks were taxed on their capital and deposits up to June 1, 1883, and on capital for the period the war revenue act of 1898 was in force. The aggregate taxes paid on capital, surplus, and deposits were \$75,844,367.90. The tax on circulation from 1863 to June 30, 1910, amounted to \$111,281,797.76, making the aggregate tax paid to the Government by national banks on the items mentioned \$187,126,165.66. The cost of redemption of national-bank notes from 1874, the date of the establishment of the national bank redemption agency, to June 30, 1910, is shown to have been \$6,797,285.79. From 1883 to 1910 examiners' fees aggregated \$6,983,795.02 and the cost of plates for new and extended banks from 1883 to 1910 was \$1,244,155. Combining these various expenditures it appears that the national banks have paid to the Government the sum of \$202,151,401.47, of which $92\frac{1}{2}$ per cent represents the tax paid on circulation, capital, and deposits.

From the date of the organization of the Currency Bureau to June 30, 1910, the total expenses of the office are stated at \$13,277,537.34. This amount, however, does not include contingent expenses of the bureau not paid by the Comptroller, but from the general appropriation for contingent expenses of the Treasury Department. No separate account of these contingent expenses has been kept, but assuming that they equaled the amount specifically appropriated for the expenses of the bureau the aggregate would be only approximately \$26,500,000, or about 14 per cent of the receipts from the banks on account of tax on circulation, capital, and deposits.

ORGANIZATION OF NATIONAL BANKS.

Under section 5133 of the Revised Statutes the organization of national banking associations by any number of persons, not less than five, is authorized. This section provides that the incorporators shall enter into articles of association specifying in general terms the object for which the association is formed and a copy thereof forwarded to the Comptroller to be filed and preserved in his office. The following section provides for the execution of an organization certificate by those who have entered into articles of association. This certificate is required to be acknowledged before a judge of some court of record or a notary public and transmitted to the Comptroller. When these documents have been filed with the Comptroller the association becomes a body corporate, but with powers limited to transaction of business incidental to organization until the issuance of the Comptroller's certificate authorizing the association to begin the business of banking. The law further requires the collection and certification of payment of at least 50 per cent of the authorized capital stock and the deposit of a specified amount of United States registered interest-bearing bonds, and authorizes an examination for the purpose of determining the amount of money paid in on account of capital stock and whether all requirements of law in relation to organization have been met.

As the law, however, specifically confers upon the Comptroller discretion with respect to approval of the name selected for an association, the course of procedure under the established rules of the office is to require the submission of a formal application for authority to organize an association wherein is stated the title desired, location of the bank, the capital stock, the signatures of the applicants given, accompanied by advice in regard to the business and financial standing of the applicants, number of shares to be subscribed for, and the previous banking experience, if any, of the applicants. Indorsements are required with respect to the character and standing of the applicants, the population of the place at which it is proposed to organize the bank, and an expression of opinion with respect to prospects of success of the association if chartered and conservatively managed.

Prior to the disposition of an application a copy thereof is sent to the national-bank examiner, to the Member in Congress for the district in which the bank is to be located, and to the superintendent of the state banking department, with request for information with respect to the character and standing of the applicants, the existing demand for a bank at the locality, and an expression of opinion as to

whether success is probable.

Applications for authority to convert state banks into national banking associations are made by the directors, and each case of this character is investigated for the purpose of determining whether the bank has been conducted in conformity with law, its measure of success, and also as to the character of its assets and general business.

In view of the fact that bank stock is generally regarded as a very desirable investment the organization of banks, both national and state, has been very active during recent years, and it has been shown to be evident to both federal and state authorities that many banking institutions are organized, or organization attempted, without giving due consideration to their demand or their prospects of success. As far as possible the state authorities are now acting in harmony with the Comptroller in the upbuilding of banking conditions by preventing the organization of banks where the demand therefor is not apparent or where organization is attempted by those whose character and standing are questionable.

During the year ended October 31, 1910, 425 applications were received for authority to organize national banks, including applications to convert state banking institutions. Approval was granted in 315 cases and there were 74 rejections, the cause of the latter being, first, existence of ample banking facilities at the place; second, population and business too limited to warrant success; third, character of the applicants and of others interested. Rejections of applications to convert were based, primarily, upon information received to the effect that the management had been neither in conformity

with law nor successful.

Charters were issued during the year to 311 associations having aggregate authorized capital stock of \$30,760,000, and from the date of the passage of the national-bank act in 1863 to October 31, 1910, charters to the number of 9,883 were granted. At the close of the current year 7,218 banks were in active operation, 2,176 having been placed in voluntary liquidation and 489 in the charge of receivers for liquidation of their business in the interest of depositors and other creditors. Included in the total number of charters granted were 1,571 to institutions which were conversions of state banks. The capital of these converted banks at date of entrance into the national-

banking system was \$330,665,928.

Under the provisions of the act of March 14, 1900, national banks to the number of 2,953, with aggregate capital of \$76,930,500, were organized, the average capital being approximately \$26,000. Since the date of the act in question, 1,666 banks were organized under the law of 1864, their aggregate capital being \$214,912,800 and the individual capital \$50,000 or more. It further appears that 652 of the banks chartered in this period were conversions of state banks, their capital being \$51,445,800; 1,403 reorganizations of state or private banks, with aggregate capital of \$93,987,000; and 2,564 primary organizations, the capital represented being \$146,410,500. The total number of banks organized from March 14, 1900, to the end of the current year was 4,619 with aggregate capital of \$291,843,300, exceeding by 1,002 the number of banks in active operation on March 14, 1900. The average number of banks organized monthly from March 14, 1900, to October 31, 1907, was approximately 40; the average in 1908, 27; in 1909, 25; and in 1910, 26.

The classification and distribution, by States and geographical divisions, of national banks organized since the date of the passage of the act of 1900 are shown in the following table:

SUMMARY, BY STATES, GEOGRAPHICAL DIVISIONS, AND CLASSES, OF NATIONAL BANKS ORGANIZED FROM MARCH 14, 1900, TO OCTOBER 31, 1910, AND THE PAID-IN CAPITAL STOCK OF ALL REPORTING NATIONAL BANKS ON SEPTEMBER 1, 1910.

EXTENSION OF 'CHARTERS.

The act of July 12, 1882, authorizes the extension of corporate existence of a national banking association, upon the written consent of shareholders representing at least two-thirds of the stock. This written consent in the form of an amendment of the articles of association is required to be filed with the Comptroller at any time within two years prior to the expiration of the corporate life of a When the amendment is filed and found to be in conformity with law, a special examination is required for the purpose of ascertaining whether the bank is in a condition warranting extension. In 1902 a large number of banks had reached the end of their extended existence, and on April 12 of that year extension for a further period of twenty years was authorized by Congress, the course of procedure being practically the same as in the case of first extension. Under each act every national bank, the charter of which is extended, is required, if circulation is to be issued, to order and pay for a plate for the printing of notes of a design materially different from that theretofore employed, and within three years from date of extension to deposit lawful money to provide for the redemption of all circulation then outstanding that was issued prior to the extension of the charter. This latter requirement is regarded as placing an unnecessary burden upon the banks and in the Comptroller's recommendation to the National Monetary Commission relating to amendments of the national bank act the repeal of this provision was suggested.

Extensions of charter, under the act of 1882, have been granted to 2,979 banks, and under the act of 1902 to 993 banks. During the year ended October 31 the charters of 184 banks were extended for the first time and 24 for the second. In the year 1911 the charters of 110 banks will expire and may be extended under the act of 1882 and 73 under the act of 1902. In the appendix to this report will be found a list of all banks the charters of which will expire during the year ending October 31, 1911, and which may be extended under

the acts in question.

In connection with extensions of charter under the act of 1882 a number of banks the corporate existence of which expired prior thereto were compelled to liquidate and reorganize. Authority was contained in the act of July 12, 1882, to reorganize under the same title on condition that holders of stock in the expiring association should be entitled to preference in the allotment of shares of the new

association in proportion to the number of shares held by them, respectively, in the association the corporate existence of which had expired, but the office held at that time that authority to reorganize under the identical title did not carry with it the right to retain the original charter number. Prior to the passage of the act of 1902 authorizing second extensions of charter a number of banks organized in 1863, the charters of which expired prior to July 12, 1882, applied for and received authority, upon extension, to resume their original charter numbers. The first bank to receive this favorable consideration was The First National Bank of Philadelphia, which was the first national banking association to be chartered. The other banks that have been accorded the same consideration are the following, with their original charter numbers:

No.	Title.	No.	Title.
2	The First National Bank of New Haven, Conn. The First National Bank of Youngstown, Ohio. The First National Bank of Fremont, Ohio. The First National Bank of Cleveland, Ohio. The First National Bank of Fort Wayne, Ind.	17	The First National Bank of Richmond, Ind.

RATES FOR MONEY.

In connection with the loans and discounts of banks, hereinbefore referred to in detail, the following table relating to the range and average rates for money in the New York market during the year, as reported by the William B. Dana Company, shows that the rates generally were normal, with slight fluctuations, except in respect of call loans.

CLEARING-HOUSE TRANSACTIONS.

From Manager William Sherer of the New York Clearing House returns have been obtained in relation to the exchanges of clearing houses of the United States for the year ended September 30, 1910, compared in each instance with the returns for September 30, 1909. The number of exchanges relative to which data are submitted is 137, the volume of their business as represented by the exchanges for the current year being \$169,025,172,600, as compared with \$158,877,192,100 for 1909. With the exception of Cincinnati, Ohio, Houston, Tex., Greensburg, Pa., Freemont, Nebr., Franklin, Pa., Colorado Springs, Colo., and Vicksburg, Miss., a larger volume of business was transacted than during the prior year. The reduction of business in the cities named aggregated \$58,261,200, resulting in a net increase of all associations during the year of \$10,147,980,500. The exchanges of New York Clearing House Association represent

The exchanges of New York Clearing House Association represent approximately 60 per cent of the clearings of all associations in the country and in the current year reached \$102,553,959,100, an amount exceeding by \$3,296,296,700 the business for the year 1909, and was within \$1,200,140,901 of the maximum amount during the life of the New York Clearing House Association. The highest point was reached in the year ended September 30, 1906, and amounted to \$103,754,100,091. The membership of the New York association consists of 50 banks with aggregate capital of \$132,350,000.

The amount of balances used in the settlement of exchanges of the New York Clearing House in the last year was \$4,195,293,966.90, or 4.09 per cent of the exchanges. Gold to the extent of 88 per cent and legal tenders amounting to 12 per cent were used in settlement of balances. The clearing-house transactions of the assistant treasurer of the United States at New York for the year ended September 30, 1910, aggregate \$669,854,495.25, of which \$659,698,079.21 were exchanges received from the clearing house and \$10,156,416.04 balances received. During the same period exchanges delivered to the clearing house aggregated \$419,538,712.71, and the balances paid to the clearing house \$250,315,782.54.

UNITED STATES POSTAL SAVINGS LAW.

The act of Congress, approved June 25, 1910, authorizes the establishment of postal savings depository offices and creates a board of trustees, consisting of the Postmaster-General, the Secretary of the Treasury, and the Attorney-General, severally, acting ex officio, with power to designate such post-offices as it may select to be postal savings depository offices. This board has control, supervision, and administration of all postal savings offices and of the funds deposited therein by virtue of this act, and has authority to make all necessary and proper regulations for the receipt, transmittal, custody, deposit, investment, and repayment of such funds.

Any person, of the age of 10 years or over, may open an account, in his or her own name, in any postal savings depository, but no person can have more than one such account in his or her own right. Deposit accounts may be opened in the following ways: First, by the deposit of \$1 or a larger amount in multiples thereof; second, by purchasing for 10 cents a postal savings card and attaching thereto 10-cent postal savings stamps and depositing the card and stamps in the

amount of \$1, or any multiple thereof.

Additional deposits may be made in cash in amounts of \$1 or multiples thereof, or by card and 10-cent stamps in corresponding amounts, but no person is permitted to deposit more than \$100 in any one calendar month, and the balance to the credit of any person can never exceed \$500.

Interest at the rate of 2 per cent per annum will be allowed on all deposits, and any person may withdraw the whole or any part of his or her deposit, with accrued interest, upon demand and under such

regulations as the board of trustees may prescribe.

Of the postal savings bank funds, 5 per cent shall be deposited as a reserve with the Treasurer of the United States, who is the treasurer of the board of trustees. The remaining funds may be deposited in national or state banks at a rate of interest of not less than $2\frac{1}{4}$ per cent, and on the security of such public bonds or other securities supported by the taxing power as the board may approve. Not exceeding 30 per cent of the total funds may be used by the board in the purchase of bonds or other securities of the United States, except that by the direction of the President and only when in his judgment the general welfare and the interests of the United States so require the remaining 65 per cent may be withdrawn from the banks for investment in bonds or other securities of the United States.

Postal savings funds shall be deposited in solvent banks, whether organized under national or state laws, and subject to national or state supervision and examination, in operation at the locality of the postal savings depository office, if they are willing to accept the deposit, but the total deposit in any bank shall not exceed its capital and one-half of its surplus. In the absence of any bank in the locality fulfilling the requirements of the act and willing to accept the deposit, the money shall be deposited in the bank most convenient to such locality, and in the event there is no such bank in the State or Territory willing to receive the funds, then they shall be placed in the reserve fund with the treasurer of the board. Any deposit with

a bank may be withdrawn at the pleasure of the board.

Provision is made in the act for the conversion, under certain conditions, of deposits in postal savings depositories in the amount of \$20 or multiple thereof, into bonds of the United States bearing interest at the rate of 2½ per cent, payable semiannually.

The faith of the United States is pledged to the payment of any

deposit made in postal savings depository offices.

The trustees are engaged in the formation of plans in detail for the administration and operation of postal savings depositories and it is expected that the designated offices will be ready for the receipt of deposits by the first of the new year.

The following is a list of post-offices, so far designated, as postal

savings depositories:

NATIONAL CURRENCY ASSOCIATIONS.

In the annual report of the Comptroller of the Currency for 1908 the salient provisions were published of the act of May 30, 1908, providing for the formation of national currency associations and the issue of additional national-bank currency.

Under this act national currency associations may be formed by any number of national banks, not less than 10, with aggregate capital and surplus of at least \$5,000,000, and located in contiguous territory. No national bank, however, may be a member of a currency association unless it has an unimpaired capital and a surplus amounting to at least 20 per cent of its capital. It is further provided that to be entitled to issue additional currency a national bank, a member of a currency association, shall have circulation outstanding, secured by United States bonds, aggregating not less than 40 per cent of the capital stock. Additional circulation provided by this act may only be issued upon the recommendation of the Comptroller and approval of the Secretary of the Treasury. The maximum circulation issuable by a bank on United States bonds, and under authority of the act of May 30, 1908, is measured by the capital and surplus of the bank.

The officers of a currency association, on behalf of one of the bank members, may apply for authority to issue additional circulation to an amount not exceeding 75 per cent of the cash value of the securities or commercial paper deposited with the association, and upon deposit of state, city, town, county, or other municipal bonds of the character prescribed by the act may obtain for issue circulating notes to the extent of 90 per cent of the market value of the bonds deposited. The issue of additional circulation on commercial paper, however, is limited to 30 per cent of the unimpaired capital and surplus.

The act contemplates that no additional circulation shall be permitted to be issued unless, in the judgment of the Secretary of the Treasury, conditions in the country at large, or in a special locality, warrant such action, and under section 8 of the act it is made the duty of the Secretary of the Treasury to obtain information with reference to the value and character of securities authorized to be accepted, and from time to time to furnish information to national-banking associations as to such securities as would be acceptable

under the provisions of the act.

The act further provides for an issue of circulating notes and the incorporation of the statement upon their face that "they are secured by United States bonds or other securities," certified by the written or engraved signatures of the Treasurer and Register and by the imprint of the seal of the Treasury. They shall also express upon their face the promise of the association receiving the same to pay on demand, attested by the signature of the president or vice-president and cashier. Under this requirement, circulation has been prepared for every national banking association, and there is stored in the reserve vault of the bureau a stock of incomplete currency amounting to \$500,000,000. So far, no circulating notes, other than those secured by United States bonds, have been issued, but all incomplete currency shipped to a bank bears the legend quoted.

On June 30, 1910, the number of national banks reporting was 7,145, with paid-in capital of \$989,567,114 and surplus of \$644,857,482.82. Of these banks, 5,699 had circulation secured by United States bonds equal to or exceeding 40 per cent of the capital, and 1,415

circulation less than that proportion.

In less than thirty days after the passage of the emergency-currency act a national currency association was formed in the District of Columbia, of which all of the 11 banks in the District were members. The aggregate capital and surplus of the banks at that time were \$5,202,000 and \$3,942,000, respectively. The president of the association is Mr. William J. Flather of the Riggs National Bank of Washington, and the secretary, Mr. H. H. McKee, of the National Capital Bank of Washington.

On September 1, 1910, there were 12 national banks in the District of Columbia, having capital of \$6,052,000 and surplus of \$4,450,645.

While the formation of other currency associations was undertaken, none was perfected in a manner acceptable to the Secretary of the Treasury until the midsummer of 1910, by reason of what were regarded as insurmountable obstacles on the part of banks interested. These obstacles, however, were in a large measure overcome by a revised construction of the law.

Under date of September 16, 1910, the following rulings of the Treasury Department in regard to certain sections and phrases concerning the issue of additional circulation were approved:

I. WITHDRAWAL OF A BANK FROM A CURRENCY ASSOCIATION.

Any member of an association may withdraw therefrom providing—

1. That at the time of such withdrawal there shall be no unredeemed additional circulating notes issued to the association;

2. That the unanimous consent of the executive committee of the board of managers

of the association shall be obtained; and

3. That the Secretary of the Treasury of the United States shall approve.

II. REDEMPTION FUND FOR ADDITIONAL CIRCULATION.

Section 3 of the act of June 20, 1874, provides that a national bank must keep on deposit in the Treasury of the United States a sum equal to 5 per centum of such circulation as is provided for in that act. Section 6 of the act of May 30, 1908, provides that the banks shall keep on deposit in the Treasury of the United States an additional sum equal to 5 per centum of such additional circulation at any time outstanding. The department is of the opinion that the redemption fund to be deposited in the Treasury on account of additional circulation authorized by the act is not required to exceed 5 per centum of such additional circulation, and that Congress intended only to extend to the additional currency the original provisions for a 5 per cent redemption fund hitherto provided for the ordinary bond-secured circulation.

III. EXTENT OF TERRITORY TO BE COMPREHENDED BY A CURRENCY ASSOCIATION.

In regard to the extent of territory to be comprehended by a currency association, attention is called to the following provisions of the act of May 30, 1908:

1. That there shall not be more than one such association formed in any city. 2. That the member banks "shall be taken, as nearly as conveniently may be, from a territory composed of a State or part of a State, or contiguous parts of one or

more States.'

3. "That any national bank in such city or territory, * * * shall, upon its application to and upon the approval of the Secretary of the Treasury, be admitted to membership in a national currency association for that city or territory,"

These provisions are construed to mean (1) that the territory to be included in the currency association of a particular city must be at least coextensive with the limits of the city, and (2) that if the territory to be covered by an association has been fixed in the approved by-laws, all banks within that territory must, if properly qualified, be admitted to membership. In other words, if the by-laws stated that the membership in an association shall be composed of banks doing a business within a State, no national bank within the State would be excluded from membership, provided that it was otherwise qualified. On the other hand, if the by-laws limited membership to banks doing a business within a county, then only the national banks in that county would expect to attain membership.

IV. SECURITY FOR ADDITIONAL CIRCULATION.

Section 1 provides that the national currency associations may use as a basis for additional circulation "any securities, including commercial paper, held by a national banking association." The term "commercial paper" is thereafter defined to include "only notes representing actual commercial transactions, which when accepted by the association shall bear the names of at least two responsible parties and have not exceeding four months to run." These requirements will be satisfactorily met by single-name paper arising from actual commercial transactions if indorsed by the bank desiring additional currency.

Section 3 permits the issue of additional notes on the security of bonds of a municipality or district in the United States "whose net funded indebtedness does not exceed 10 per centum of the valuation of its taxable property, to be ascertained by

the last preceding valuation of property for the assessment of taxes."
(1) The phrase "net funded indebtedness" is held to mean the entire bonded debt of a municipality, less any bonds not yet sold, or any bonds repurchased and not canceled, as for sinking fund account.

(2) The phrase "valuation of its taxable property" is construed to mean the valuation of taxable property as estimated by the assessor. Where the law prescribes that the assessors shall estimate the value of all property subject to taxation at its actual value, and that the taxes shall be assessed at a fraction of such value, the valuation of taxable property is understood to mean the actual valuation as estimated by the assessors. Where, however, the law makes no distinctions between actual and taxable value of property, the "valuation of taxable property" is construed to mean the taxable value upon which the actual taxes are levied.

A. PIATT ANDREW, Acting Secretary.

Prior to the announcement of these rulings a national currency association was formed in the city of Philadelphia, with a membership of 28 banks; capital stock \$20,825,000 and surplus \$33,075,000. The date of the organization of this association was July 29. president of the association is Mr. Levi L. Rue, of the Philadelphia National Bank, and the secretary, Mr. H. W. Lewis, of the Farmers and Mechanics National Bank.

The number of national banks in Philadelphia on September 1, 1910, was 33, with a capital of \$22,405,000 and surplus of \$35,515,000.

On the same date of formation of the Philadelphia association 35 of the national banks in the city of New York organized "The National Currency Association of the City of New York," the capital of the banks represented being \$115,252,000 and surplus \$122,295,000.

On September 1 there were 39 national banks in the city of New York, with aggregate capital of \$119,900,000 and surplus of \$125,-The officers of the New York association are: President, A. B. Hepburn, of the Chase National, and secretary, Edward Town-

send, of the Importers and Traders National Bank.

On August 4 the National Currency Association of the State of Louisiana was formed, with a membership of 10 and with capital of \$6,100,000 and surplus \$3,840,000. All of the national banks in New Orleans are members of the association, together with 5 located elsewhere in the State. The total number of national banks in New Orleans and elsewhere in Louisiana on September 1 was 31, with capital of \$8,070,000 and surplus of \$4,957,365. The officers of the Louisiana association are: President, Charles Godchaux, of the Whitney Central National Bank of New Orleans, and secretary, A. Breton, of the German American National Bank of New Orleans.

The National Currency Association of the city of Boston was organized August 16, with a membership of 15, representing a capital of \$18,450,000 and surplus of \$15,650,000. The officers of the association are: President, Thomas P. Beall, of the Second National Bank of Boston, and secretary, A. W. Newell, of the Fourth National Bank. The capital and surplus of the 20 national banks in Boston on Sep-

tember 1 were \$22,950,000 and \$18,050,000, respectively.

On August 18 the National Currency Association of Georgia was formed. The membership of this association is 21, representing capital of \$6,356,000 and surplus of \$4,867,000. The officers of the association are: President, Robert J. Lowry, of the Lowry National Bank of Atlanta, and secretary, Joseph A. McCord, of the Third National Bank of Atlanta. The reserve city of Savannah has 1 representative in the association, the remaining members being nonreserve city banks.

On September 1 there were 113 national banks in the State of Georgia, with capital of \$13,253,580 and surplus of \$7,070,736.

The National Currency Association of St. Louis was formed on September 13, with a membership of 11, the capital and surplus of the banks represented being \$19,660,000 and \$12,145,000, respectively. But 7 of the 10 national banks in St. Louis are members of this association, the remaining members being banks located in towns adjacent to that city. The president of this association is C. H. Huttig, of the Third National, and the secretary, Wm. H. Hoxton, of the St. Louis Clearing House Association.

The National Currency Association of the City of Chicago was organized on October 14, with a membership of 11; capital \$41,250,000 and surplus \$22,350,000. The president of the association is George M. Reynolds, of the Continental and Commercial National Bank, and the secretary, William A. Heath, of the Live Stock Exchange National Bank. Every national bank in Chicago is

a member of this association.

The capital and surplus of the 11 national banks in Chicago on

September 1 were \$41,400,000 and \$22,188,000, respectively.
On October 31, 1910, the National Currency Association of The Twin Cities (St. Paul and Minneapolis, Minn.) was organized, with 14 members, representing \$10,650,000 capital and \$9,005,000 surplus. The membership of this association consists of all the national banks in St. Paul, 3 in Minneapolis, and 5 in other towns of that locality. The president of this association is J. W. Lusk, of the National German American Bank of St. Paul, and secretary, George C. Power, of the Second National Bank of St. Paul.

The National Currency Association of the city of Detroit was organized on September 27 with a membership of sixteen, the capital of the bank members being \$6,725,000 and their surplus \$2,940,000. All of the national banks in Detroit (4 in number), their capital and surplus being \$5,150,000 and \$1,850,000, respectively, are members of this association. The remaining members are banks located in other cities of the State adjacent to Detroit. The president of the association is Mr. John T. Shaw, of the First National Bank of Detroit, and the secretary, Mr. Richard P. Joy, of the National Bank of Commerce, of Detroit.

As of interest to others having in view the formation of national currency associations, there is submitted herewith a copy of the by-laws of the National Currency Association of the City of New York:

ARTICLE I.—MEMBERSHIP.

Section 1. Membership in this association shall consist of national banks doing a business within the boroughs of Manhattan, the Bronx, Queens, Brooklyn, and Richmond, of the city of New York, and Long Island.

SEC. 2. All applications for membership shall be in the form of a certified copy of a resolution of the directors of the applicant, filed with the secretary of the association. Such applications shall by him be referred at once to the committee on membership. The report of the committee on membership shall be presented to the board and shall be submitted to the Secretary of the Treasury of the United States with the recommendation of the board, and if approved by him the applicant shall thereupon become a member of the association.

Sec. 3. Any member of this association may withdraw therefrom, with the approval of the Secretary of the Treasury of the United States and the consent of the executive committee of the board of managers of the association, providing at the time of such withdrawal there shall be no unredeemed additional circulating notes issued to this

association.

ARTICLE II.-BOARD OF MANAGERS.

Section 1. Each member of this association shall file with the secretary of the association and with the Secretary of the Treasury a certified copy of a resolution of its board of directors, authorizing its president or any vice-president to act on the board as its representative, but no bank shall have more than one representative upon such board at any one time.

SEC. 2. (a) The annual meeting of the board shall be held at the office of the association on the second Tuesday of June in each year, for the purpose of receiving reports of officers and committees for the preceding year and for the election of officers

and the appointment of committees for the ensuing year.

(b) Special meetings of the board may be called at any time by the executive committee or the president, or vice-president, and shall be called by the president, vice-president, or secretary upon the request of five members of the association.

(c) Notice of each special meeting, stating the time and place, shall be given by the

secretary to each member of the association.

SEC. 3. A majority of the members of the board shall be necessary to constitute a quorum, but a less number may adjourn from time to time.

ARTICLE III.—EXPENSES OF THE ASSOCIATION.

Section 1. The expenses of the association shall be defrayed out of a fund to be raised by the board or executive committee from time to time by assessment upon the members in the proportion which their capital and surplus respectively bears to the aggregate capital and surplus of all the members of the association.

SEC. 2. The assessment and collection of such fund and its disbursement shall be

regulated and controlled by the board or the executive committee.

ARTICLE IV.—COMMITTEES.

Section 1. There shall be an executive committee, consisting of seven members of the board, of which the president and vice-president of the association shall be two members ex officio. The executive committee shall be appointed by the board at its annual meeting, and except in the matter of the election of officers and the making of by-laws, may exercise all the powers of the board when the latter is not in session, and shall, among other duties, pass upon all securities, including commercial paper, offered as a basis for additional circulation. Vacancies in the executive committee may be filled by the board from time to time.

Sec. 2. There shall be a committee on membership, consisting of five members of the board, of which the secretary shall be a member ex officio, appointed by the board at its regular annual meeting. Vacancies in this committee shall be filled by the board. The powers and duties of the committee on membership shall be such as are in these by-laws defined, with such additional powers and duties as may be

conferred from time to time by the board or the executive committee.

SEC. 3. There shall be a committee on nominations, consisting of five members of the board, to be appointed by the board or executive committee in advance of each annual meeting. It shall be the duty of the committee on nominations to present to the annual meeting of the board names for president, vice-president, secretary, and treasurer, and members of the executive and membership committees. Vacancies in such committees shall be filled by the board or by the executive committee.

ARTICLE V.—OFFICERS.

Section 1. The officers of the association shall be a president, vice-president, secretary, and treasurer, each of whom shall be elected by the board at its annual meeting and each of whom shall be a member of the board and hold office for one year, or until his successor is appointed.

SEC. 2. The officers shall perform the duties usually pertaining to their respective offices, subject to the supervision and direction of the board and executive committee.

ARTICLE VI.—SEAL.

Section 1. The seal of the association shall be circular in form, with the name of the association around the circumference thereof, and the word "Seal" and the figures "1910" in the center thereof.

ARTICLE VII.—AMENDMENTS.

Section 1. These by-laws may be amended by the board at any regular or special meeting, provided written notice of the proposed amendment has been given to each member of the association at least one week in advance of such meeting, subject to the approval of the Secretary of the Treasury of the United States.

APPLICATIONS FOR ADDITIONAL CIRCULATION.

Forms have been prepared by the department, to be used in applying for authority to issue additional circulation under the act of May 30, 1908, copies of which follow:

APPLICATION FROM A NATIONAL CURRENCY ASSOCIATION FOR THE ISSUE OF ADDITIONAL CIRCULATION. Office of the National Currency Association of -The Comptroller of the Currency. SIR: The National Currency Association of _____, hereby certifies that it has received, in trust for the United States, from the _____, National Bank , the following-described securities, the same being of the cash value of - dollars (\$----): and hereby applies for the issue to this association of the circulating notes of the said bank in the amount of -– dollars (\$— Respectfully, , Secretary. BANKS AND BANKING IN THE UNITED STATES.

The act of February 19, 1873, relating to the annual report of the Comptroller of the Currency contained a provision for the incorporation therein of information relative to the resources, liabilities, and condition of banks, banking companies, and savings banks organized under the laws of the several States and Territories, the information to be obtained from reports made by such institutions to the legislature or officers of the different States and where such reports can not be obtained the deficiency to be supplied from such other authentic sources as may be available. In reference to this requirement, the Comptroller in his report for 1873 stated that the deficiency of official reports is shown by the fact that he had been able to obtain information in respect of the condition of banking institutions in only 8 of the 37 States in the Union and the District of Columbia, and none at all from the 9 Territories. The available returns consisted of reports from the New England States, New York, New Jersey, and the District of Columbia. In the statements compiled from the returns the number of reporting institutions is not given, but it appears that the deposits in savings banks were \$669,324,917 and the aggregate assets of these institutions \$701,229,392. The number of depositor accounts was 1,109,995 and the average amount to the credit of each depositor in the savings banks in the New England States was The returns from the state banks, including savings banks having capital stock, stated capital aggregating \$42,705,834, deposits \$110,754,034, and aggregate resources of \$178,881,407.

The report of the Comptroller for 1876 contained what was regarded as the most complete history of the condition of banks in the United States from the foundation of the Government to that date. Included in the general history were statistics based upon information for the year covered by the report. Returns were received from 686 savings banks located in 12 States of the Union, the aggregate deposits amounting to \$892,785,553 and the aggregate assets to \$951,353,544. The number of depositors in institutions of this character was stated at 2,414,952, and the average deposit account \$369.69. Trust companies were in operation in 6 of the States and the capital of the 38 reporting institutions of this character was stated at \$21,535,490, deposits \$87,817,992, and aggregate assets \$127,646,179 Reports were also received from 633 state (commercial) banks having capital of \$80,425,634, deposits \$157,928,658, and aggregate assets The number of all state institutions reporting in of \$278,255,852. 1876 was 1,357, the capital stock \$101,961,124, deposits \$1,138,532,-

203, the total amount of assets \$1,357,255,575.

Prior to 1887 the office depended for official returns upon the various state banking departments, or other state officials having supervision over state banks and their returns, and to a limited extent upon information from managers of the clearing houses. In 1887, by reason of the fact that from many of the States it was impossible to obtain information in relation to the condition of banks therein the Comptroller inaugurated the plan of making a personal request for a report of condition from every bank located in such States. This plan has been pursued up to the present time, but the inquiries are now con-

fined, with a few exceptions to private banks and bankers doing business in States the laws of which do not require reports to be made by

them to any public official.

While the annual reports of the Comptroller have contained statistics relating to the various classes of State banking institutions relative from which reports were obtainable their value has been materially affected by reason of the lack of uniformity in dates of reports and in the classification of items of resources and liabilities.

Some two years since a committee of state bank superintendents formulated a plan for adoption by the state banking authorities generally providing for uniformity of bank reports and at the same time the question was considered of attempting to secure amendments to the state banking laws, where necessary, authorizing the superintendents of state banking departments to arrange for simultaneous reports from all banks in each State. To a limited extent, this authority exists and in a number of States reports are called for to time with one or more calls during each year made upon national banks by the

Comptroller of the Currency.

For some years past it has been the custom of the Comptroller, when he issues a call for reports from national banks to telegraph the advice to all state banking superintendents who desire the information, in order, if they deem it expedient, that they may call for reports from banks subject to their supervision for the same date. When these joint calls are made, however, there is no authentic assembling of the returns except when required by the Comptroller for his annual report to Congress. For years prior to 1909 the Comptroller secured information relative to the condition of banks other than national for his annual report from returns on the date of or nearest to that of his midsummer call on national banks and necessarily the returns covered a wide range of time. Frequently the latest obtainable data for banks in certain States related to conditions six to nine months previous to the selected date.

As the banking and other interests look to the Comptroller for statistical and general information relating to banking, and to enable him to satisfactorily comply with the demand, the state banking laws should be so amended as to permit of the cooperation along this

line between the federal and state banking departments.

Voluntarily, for the first time during the existence of the national banking system, cooperation with the Comptroller in respect of simultaneous returns by state bank superintendents and state banks and bankers, was effected for April 28, 1909, when practically corresponding reports were secured for the National Monetary Commission and the Comptroller from all national and from nearly 90 per cent of the state and private banks. The nonreporting banks were mainly those that were unincorporated—that is, private banks and The returns so obtained formed the basis for the most complete and therefore the most valuable statistics in relation to the banks in this country that were ever compiled.

In continuation of the work of 1909 the Comptroller caused to be prepared a special form of report corresponding very generally to that furnished to national banks and sent copies, with letter of request for submission of the information desired, to all banks in the country, either through the various state banking departments or to the banks direct, the request calling for a report at the close of business on June 30, 1910, the date upon which returns were subsequently called for from all national banks.

Reports were received on April 28, 1909, from 22,491 banks and banking institutions with total paid in capital of \$1,800,036,368, surplus fund and other undivided profits \$1,834,625,428.93, an amount exceeding by about \$34,500,000 the paid in capital stock. The individual deposits of banks were \$14,035,523,165.04, and their total assets \$21,095,054,420.72. The principal assets were as follows: Loans and discounts \$11,373,217,691.38, bonds, securities, etc., \$4,614,442,216.27, cash on hand \$1,452,014,676.34.

On June 30, 1910, reports were obtained relative to the condition

of 23,095 banks, a greater number by 604 than in 1909.

The value of the statistics submitted herewith is in a measure impaired by the refusal or neglect of a large number of incorporated banks in three of the Southern States and private banks in three Western States (Georgia, Alabama, Mississippi, Tennessee, Illinois, Michigan, and Iowa) to comply with the request for reports. one of the Eastern States (Pennsylvania) the figures relating to a number of banks that failed to report on June 30 were obtained from their official returns to the state banking department in the prior November.

The capital stock of all reporting banks on June 30, 1910, was \$1,879,943,887.99, an increase over 1909 of \$79,907,519.99. combined surplus and other undivided profits are shown to have been \$1,952,566,187.98, an increase over the prior year of \$117,940,759.05. Individual deposits on June 30, 1910, were \$15,283,396,254.35 or greater than in 1909 by \$1,247,873,089.31. The total assets of the banks increased to \$22,450,320,522.77, or a greater amount by \$1,355,-266,102.05 than in 1909.

Statements in detail relating to loans and discounts, bonds, securities, etc., cash in bank, and individual deposits, appear hereinafter, but there is submitted herewith a summary of the consolidated returns for April 28, 1909, and June 30, 1910, the increase or decrease in the various items being shown separately.

STATE, SAVINGS, PRIVATE BANKS, AND LOAN AND TRUST COMPANIES.

Summaries of the reports received for the current year from state, savings, private banks, and loan and trust companies show the condition on June 30, 1910, of 15,950 banks other than national. aggregate resources of the banks were \$12,553,695,826.04, an increase

65872°—FI 1910——25

of \$827,525,248.45 over the aggregate reported in 1909 by 15,598 banks. The returns include 12,166 commercial banks, 1,759 savings banks (of which 638 were of the mutual class; that is, without capital stock), 934 private banks, and 1,091 loan and trust companies. About 600 state and private banks, located chiefly in the Southern and Middle Western States, which furnished reports as of April 28, 1909, did not submit reports for the current year.

The capital of the state (commercial) banks as reported aggregates \$435,822,833.58; individual deposits, \$2,727,926,986.03, and aggregate resources, \$3,694,958,766.81. In 1909 the aggregate resources of this class of banks were \$3,338,669,134.19, thus showing an increase of \$356,289,632.62 over the amount reported in 1909. Savings banks reported to the number of 1,759, showing deposits aggregating \$4,070,486,246.70 and resources of \$4,481,871,444.90. Compared with 1909 the figures show an increase of \$357,080,536.90 in deposits and \$409,161,339.56 in aggregate resources. Only about 17 per cent of deposits in savings banks is held by stock savings banks.

Reports received from 1,091 loan and trust companies show aggregate resources of \$4,216,850,061.52 and individual deposits of \$3,073,-122,706.20 against 1,079 loan and trust companies with aggregate resources of \$4,068,534,982.65 and individual deposits of \$2,835,835,-180.79 in 1909, being an increase for the year of \$148,315,078.87 in

resources and \$237,287,525.41 in individual deposits.

Reports were obtained from only 934 private banks, with capital of \$18,899,561.74 and aggregate resources of \$160,015,552.81. In 1909 reports were received from 1,497 private banks and bankers, with capital of \$27,726,922 and aggregate resources of \$246,256,355.41. About 300 private banks and bankers, located chiefly in the Middle Western States, failed to comply with the comptroller's request for a report.

In connection with the general statistics relating to the condition of the banks, the following table showing the number of savings and other depositors in the banks of the country is of interest:

Number of Savings and Other Individual Depositors in Reporting Banks June 30, 1910.

Class of bank.	Number banks re- porting.	Savings depositors.	Other de- positors.	Total de- positors.

For the purpose of comparison, a table exhibiting the principal items of resources and liabilities of banks other than national in the years 1900, 1907, 1908, 1909, and 1910 is submitted herewith:

Consolidated Returns from State, Savings, Private Banks, and Loan and Trust Companies.

Items.	1900.	1907.	1908.	1909.	1910.
Loans	\$3,013,449,827 1,723,830,351 220,667,109 403,192,214	\$6,099,897,535 2,931,506,252 391,847,497 807,178,262	\$5,797,611,743 2,873,226,958 479,116,289 838,058,353		\$7,065,906,476.21 3,111,409,758.78 558,355,958.16 890,376,773.99
Surplus and un- divided profits Deposits (individ-	490,654,957	924,655,010	1,012,811,484	1,039,548,321.54	1,091,162,571.06
Resources	4,780,893,692 5,841,658,820	8,776,755,207 11,168,514,516	8,409,959,961 10,869,345,993	9,209,462,780.66 11,726,170,577.59	9,996,179,942.15 12,553,695,826.04

The foregoing statistics indicate that aggregate resources have more than doubled since 1900, the increase since that date amounting to \$6,712,037,006.04. For the current year the increase in resources amounts to \$827,525,248.45. During the decade ended June 30, 1910, capital stock of banks other than national increased by nearly 121 per cent, and surplus and profits appear to have increased in about the same ratio. Loans increased by 134 per cent, bonds by 80 per cent, individual deposits by 109 per cent, and aggregate resources by 115 per cent. The most notable increase is in cash holdings, the amount in banks of this class in 1910 being 153 per cent greater than was reported in 1900.

Combining the returns from national banks as of June 30, 1910, with those obtained from other banks of the same date makes a total of 23,095 reporting banks, with aggregate capital of \$1,879,943,887.99 and aggregate resources of \$22,450,320,522.77.

Summary of Reports from National, State, etc., Banks, as of June 30, 1910.

[Expressed in millions.]

		`	
Classification.	7,145 national banks.	15,950 state, etc., banks.	Total, 23,095 banks.

a Includes premiums on United States bonds.

The increases in the principal items of resources and liabilities of all reporting banks over the amounts shown in 1909 are, in round amounts, as follows: Resources, \$1,355,300,000; individual deposits, \$1,247,900,000; surplus and undivided profits, \$118,000,000; capital, \$80,000,000; bonds and securities, \$109,000,000; loans, \$1,148,600,000.

Cash on hand shows a decrease of \$28,200,000 from the amount reported in 1909.

reported in 1909

STATE BANKS.

Reports from state banks to the number of 12,166, show capital of \$435,822,833.58 and aggregate resources of \$3,694,958,766.81. Geographically the reporting state banks are located as follows: Nineteen in the New England States, 476 in the Eastern States, 3,328 in the Southern States, 3,924 in the Middle Western States, 3,433 in the Western States, 958 in the Pacific States, and 28 in the island possessions.

The returns from Maryland, Arkansas, and South Dakota include stock savings banks, those from California include 147 departmental and 36 branch banks, while private banks are included with the

returns from South Dakota and Hawaii.

A summary of the reports submitted shows loans amounting to \$2,406,466,674.48; investments in bonds and other securities, \$303,-624,801.49; cash on hand, \$240,580,836.12; capital, \$435,822,833.58; and surplus and undivided profits, \$253,249,947.12. Comparing the figures for 1909 with those for 1910 there has been an increase of \$356,289,632.62 in the aggregate resources, \$19,762,933.58 in capital, and \$260,968,320.27 in deposits.

Missouri has the largest number of state (commercial) banks, namely, 1,038, followed by Kansas, with 827; Oklahoma, 680; Nebraska, 648; and Minnesota, 632. New York has the largest amount of capital invested in this class of banks, namely, \$34,148,000, California being second, with \$32,426,762.83; Missouri third, with \$29,334,010; and Illinois fourth, with \$22,638,300. New York state banks have also the largest volume of aggregate resources, namely, \$617,416,371, those of Missouri being second, with \$237,445,750.15; Michigan third, with \$234,872,109.07; and Pennsylvania fourth, with \$198,734,501.55.

SAVINGS BANKS OF THE UNITED STATES.

Special interest attaches to the reports of operation and condition of savings banks, their deposits being chiefly the accumulations of wage-earners. The present year's reports from these institutions indicate material increases in savings deposits in the aggregate and in the average account.

Savings-bank reports to the number of 1,759 have been received, of which 638 are from mutual institutions and 1,121 from stock savings banks, the latter being operated for the benefit of both the shareholder and depositor. The principal items of resources and liabilities of savings banks, both mutual and stock, are as follows:

Loans	\$2, 294, 417, 426. 79
Bonds, etc	1, 797, 111, 826. 05
Deposits	4, 070, 486, 246, 70
Aggregate resources	4, 481, 871, 444. 9 0

MUTUAL SAVINGS BANKS.

All of the mutual savings banks, with the exception of 21, are located in the New England and Eastern States. The exceptions are as follows: One in West Virginia, 3 in Ohio, 5 in Indiana, 3 in Wisconsin, 8 in Minnesota, and 1 in California. The total resources of mutual savings banks on June 30, 1910, was \$3,652,449,198.40. On April 28, 1909, the resources of these institutions aggregated

\$3,394,926,005.39, the gain since that date being \$257,523,193.01. During the year deposits have increased from \$3,144,584,874.66 to \$3,360,563,842.79, or an increase of \$215,978,968.13. The loans and mortgages in 1909 aggregated \$1,590,270,437.31, while on June 30, 1910, the loans, including mortgages, aggregated \$1,727,170,989.56, the increase being \$136,900,552.25. The loans as reported are classified as follows:

On demand, unsecured by collateral. On demand, secured by collateral. On time, with two or more names, unsecured by collateral. On time, single-name paper, unsecured by collateral. On time, secured by collateral. Secured by real estate mortgages, etc., or other liens on realty. Mortgages owned. Not classified. Overdrafts, secured. Overdrafts, unsecured.	47, 872, 737. 31 3, 336, 559. 55 97, 344, 141. 23 550, 935, 126. 64 976, 042, 325. 30 5, 688, 687. 07 6, 494. 04
---	--

The investments by mutual savings banks in bonds and other securities in 1909 aggregated \$1,599,532,371.94. Investments of this character in 1910 were \$1,676,149,419.80, scheduled as follows:

. 1, 727, 170, 989, 56

United States bondsState, county, and municipal bondsRailroad bondsOther stocks and bonds, including railroad and bank stocks	714, 821, 480. 08 757, 494, 315, 53
Total	1, 676, 149, 419. 80

Cash in the 638 reporting mutual savings banks on June 30, 1910, amounted to \$24,463,401.28, against \$14,630,248.47 in 1909, a gain of \$9,833,152.81. Of the \$3,360,000,000 deposits in mutual savings banks approximately \$1,527,000,000 are in banks located in the State of New York and over \$761,000,000, or about 23 per cent of such deposits, are in Massachusetts savings banks. Depositors in the mutual savings banks number 7,481,649, divided geographically as follows: 3,331,135 in the New England States, 3,832,438 in the Eastern States, 5,630 in the Southern States (West Virginia only), 232,864 in the Middle Western States, and 79,582 in the Pacific States (California only). There are 2,886,910 depositors in mutual savings banks of New York State, and 2,078,953 in Massachusetts savings banks. The next largest number of savings depositors is 570,065 in Connecticut.

The average rate of interest paid to depositors in mutual savings banks is 3.92 per cent. The average rate in the New England States is 3.85 per cent, in the Eastern States 3.69 per cent, in the Southern States 4.50 per cent, in the Middle Western States 3.82 per cent, and in the Pacific States 3.75 per cent. The highest rate of interest, 4.50 per cent, is paid by the one mutual savings bank in West Virginia. An average of 4 per cent is paid by the mutual savings banks in Delaware and Wisconsin. The lowest average paid by mutual savings banks is in Pennsylvania, namely, 3.47 per cent.

STOCK SAVINGS BANKS.

Stock savings banks to the number of 1,121 furnished reports as of June 30, 1910. These institutions are located as follows: Eight in

New Hampshire known as guaranty savings banks, 15 in the Eastern States, 149 in the Southern States, 734 in the Middle Western States, 59 in the Western States, and 156 in the Pacific States. Reports from Maryland and South Dakota stock savings banks have been included, as officially compiled, with commercial state banks; the few reporting stock savings banks of Arkansas appearing to be commercial concerns have been included with commercial banks of that State. Of the total number of stock savings banks reporting, 663 are located in the State of Iowa. Stock savings bank capital is reported at \$68,320,822.30, against \$59,506,420 in 1909. The loans aggregate \$567,246,437.23; investments in bonds, securities, etc., \$120,962,406.25; cash in bank \$26,416,938.95; and aggregate resources, \$829,422,246.50. All of these items show substantial increases over the amounts reported for 1909. Individual deposits reported at \$568,820,835.14 in 1909 have increased to \$709,922,403.91 for 1910, and resources from \$677,784,099.95 to \$829,422,246.50—gains of \$141,101,568.77 and \$151,638,146.55, respectively.

Depositors in the stock savings banks actual and estimated, as of June 30, 1910, numbered 1,661,259, located as follows: 16,818 in the New England States, 93,024 in the Eastern States, 275,275 in the Southern States, 793,970 in the Middle Western States, 62,965 in the Western States, and 419,207 in the Pacific States. Iowa and California lead in the number of depositors in stock savings banks, namely, 428,777 in the former and 340,590 in the latter State. Ohio is third in number of depositors in this class of institutions, with

228,631, and Michigan fourth with 104,431.

A large number of banks throughout the country which transact a strictly commercial banking business have the word "savings" incorporated in their title. Care has been taken to exclude the

reports of such banks from this compilation.

The average rate of interest paid to depositors in stock savings banks is 3.56 per cent. Geographically stated, 3.44 per cent is the average rate paid by such institutions in the New England States, 3.21 per cent in the Eastern States, 3.76 per cent in the Southern States, 3.40 per cent in the Middle Western States, 3.65 per cent in the Western States, and 3.91 per cent in the Pacific States. The highest average rate is 4.50 per cent paid by the stock savings banks of New Mexico, and the lowest rate, 2.93 per cent, is paid by the stock savings banks in the District of Columbia.

ALL SAVINGS BANKS.

The number of depositors in all savings banks reporting has increased since 1900 from 6,107,083 to 9,142,908. The average account for the period mentioned has increased from \$401.10 to \$445.20. For the current year the number of depositors has increased over the number reported in 1909 by 311,045 and the deposits by \$357,080,536. The average deposit account has increased from \$420.45 to \$445.20, a gain of \$24.75. The average deposit account in savings banks of the New England States remains practically the same as in 1909, being \$396 against \$395.97 in 1909. The average account in the Eastern States has increased from \$463.99 in 1909 to \$488.96 in 1910. In the Southern States the average account has increased from \$236.14 to \$250.15; in the Middle Western States from \$339.86

to \$366.41. In the Western States the average savings account in 1909 was \$240.19. For the present year it is shown to be only \$206.08. This is due to lack of reports from a number of savings 1909 was \$240.19. banks in that section. The average savings account in the Pacific States has increased from \$561.63 to \$733.46, by reason of the fact that a greater number of reports were received than in 1909. per cent of depositors in savings banks are reported by banks in the New England and Eastern States, there being 3,347,953 savings-bank depositors in the New England States, and 3,925,462 in the Eastern Next in order are the Middle Western States with 1,026,-834, Pacific States with 498,789, Southern States with 280,905, and Western States with 62,965. There are 2,886,910 savings-bank depositors in New York and 2,078,953 in Massachusetts; the State having the next largest number of savings-bank depositors is Connecticut with 570,065, Iowa following with 428,777.

a Population estimated at 90,363,000, June 30, 1910.

In the figures for 1896 to 1908, inclusive, but not subsequently, are the number of depositors and amount of deposits in the state banks of Illinois, having savings departments, but not the number of such banks, by reason of the fact that general reports from these institutions are incorporated in state bank returns.

PRIVATE BANKS.

Owing to the fact that many private bankers neglected to furnish a report, the returns from private banks of the country are not as complete as desired. It is estimated that there are over 4,000 private

banking concerns in the country.

Of the private banks, reports have been received from 934, as of June 30, 1910. The capital of these reporting banks aggregates \$18,899,561.74, surplus and profits \$9,701,990.61, individual deposits \$124,644,003.22, loans and discounts \$108,449,464.30, investments in bonds, securities, etc., \$10,409,581.40, cash on hand \$6,764,890.90, and aggregate resources of \$160,015,552.81. On April 28, 1909, returns were submitted from 1,497 private banks, with capital of \$27,726,922 and aggregate resources of \$246,256,355.41. There is a large number of private banking concerns in the Middle Western States, many of which failed to comply with the request for a report, notably those in the State of Illinois; 420 private banks of that State made reports as of April 28, 1909, but for the current year only 200 such institutions furnished statements.

LOAN AND TRUST COMPANIES.

Reports received from 1,091 loan and trust companies show aggregate resources of \$4,216,850.061.52, against 1,079, with aggregate resources of \$4,068,534,982.65, which reported in 1909. Of the institutions of this character, 505 with aggregate resources of \$2,-657,262,821.48 are in operation in the Eastern States, 242 with aggregate resources of \$877,839,921.16 in the Middle Western States, and 158 with aggregate resources of \$532,567,450.20 in the New From the Southern States 129 loan and trust com-England States. panies reported, with aggregate resources of \$80,213,774.49, from the Western States 32 with aggregate resources of \$33,325,798.54, and from the Pacific States 25 with aggregate resources of \$35,640,295.65. Pennsylvania appears to have the largest number of loan and trust companies, 304 such institutions, with aggregate resources of \$716,469,325.97, being in operation in that State; included with these figures, however, are reports of 54 Pennsylvania trust companies as of November 6, 1909, later reports from which were not The loans and discounts of the reporting loan and obtainable. trust companies aggregate \$2,256,572,910.64; investments in bonds, securities, etc., \$1,000,263,549.84; cash on hand, \$260,129,890.91; capital, \$367,333,556.37; surplus and profits, \$498,166,835.50; and individual deposits, \$3,073,122,706.20. Comparing these statistics with those submitted for 1909, loans show an increase of \$191,906,-406.50; investments in bonds, securities, etc., \$10,074,239.60; cash on hand, \$5,681,980.75; capital, \$4,570,333.37; surplus and profits, \$4,784,642.38; and individual deposits, \$237,287,525.41. In 1900 reporting loan and trust companies held 14.2 per cent of the individual deposits of all banks; in 1907, 15.7 per cent; in 1908, 14.6 per cent; in 1909, 20.2 per cent; and in 1910, 20.1 per cent.

BANKS AND BANKING IN THE DISTRICT OF COLUMBIA.

In the District of Columbia there are 51 financial institutions, including 12 national banks, 5 trust companies, 15 state banks stated to be operated as saving banks, and 19 building and loan associations. The aggregate capital of the banks and trust companies on June 30, 1910, was \$15,661,420; the individual deposits \$72,575,118, including \$13,214,546 share capital or deposits in building and loan associations.

The number, capital, individual deposits, and aggregate amount of resources of each class of financial institutions doing business in the District of Columbia on June 30, 1910, are shown in the following table:

Class.	Number.	Capital.	Individual deposits.	Aggregate resources.
National banks. Trust companies. Savings banks. Building and loan associations.	. 5	8,000,000 1,609,420	\$23, 126, 085 24, 358, 631 11, 875, 856 a13, 214, 546	\$49, 165, 920 37, 457, 540 14, 528, 395 15, 250, 731

a Share payments.

STATE AND PRIVATE BANK FAILURES.

To the statistics heretofore presented in the Comptroller's reports relating to the failures of state and private banks are added those for the year ended June 30, 1910, as reported by the Bradstreet Com-

mercial Agency.

The number of failures of banks of this character during the current year was 28, the total assets amounting to \$14,496,610 and the liabilities to \$18,182,592. Included in the list are 9 state banks with assets of \$8,170,494 and liabilities of \$9,111,326; 1 savings bank, with assets of \$52,000 and liabilities of \$63,000; 6 trust companies, with assets of \$3,072,000 and liabilities of \$2,216,000; 12 private banks, with assets of \$3,202,116 and liabilities of \$6,792,266.

Adding the failures of the current year to those reported for the period running from 1864 to 1909, a total of 2,042 failures is shown, the aggregate assets at date of failure being \$526,291,242.58 and the

liabilities \$625,952,597.27.

Subsequent to 1896 statistics are wanting relating to the settlement of the affairs of failed state and private banks, making it impossible to state the amount and rate per cent of dividends paid to creditors. From 1864 to 1896 the dividends averaged approximately 45 per cent of the claims as represented by the reported liabilities.

Information obtained relating to the failures of state and private banks, from 1864 to June 30, 1910, are shown in the accompanying

table:

Number of Failures, Capital, Assets, Liabilities, and Dividends Paid by State and Private Banks that Failed in each Year from 1864 to 1910.

INDIVIDUAL DEPOSITS IN ALL BANKS.

Individual deposits in all reporting banks in 1900, in round amount, aggregated \$7,238,900,000. For the current year deposits aggregate \$15,283,300,000—an increase of \$8,044,400,000, or over 111 per cent. The increase for the current year over the amount reported in 1909

is \$1,247,800,000, or about 9 per cent. The following table shows the amount and per cent of individual deposits held by the several classes of banks in 1900, 1909, and 1910:

Classification.	190	0.	190	9.	1910.	
Classification.	Amount.	Per cent.	Amount.	Per cent.	Amount.	Per cent.
State banks	96. 2	17. 5 33. 0 1. 3 14. 2 34. 0	Millions. \$2,466.9 3,713.4 193.3 2,835.9 4,826.0	17. 6 26. 4 1. 4 20. 2 34. 4	Millions. \$2,727.9 4,070.4 124.6 3,073.2 5,287.2	17. 9 26. 6 . 8 20. 1 34. 6
Total	7, 238. 9	100.0	14, 035. 5	100.0	15, 283. 3	100.0

From the foregoing it will be noted that the proportion of deposits held by national banks is 34.6 per cent; by savings banks, 26.6 per cent; by loan and trust companies, 20.1 per cent; by state banks, 17.9 per cent; and by private banks less than 1 per cent. Compared with 1900, national banks have slightly gained in relative percentage of deposits. The proportion held by savings banks has fallen from 33 per cent to 26.6 per cent during the same period. The proportion of deposits held by state banks has increased from 17.5 per cent to 17.9 per cent, and loan and trust companies from 14.2 to 20.1 per cent.

The following table shows the distribution of deposits, by geographical sections, on April 28, 1909, and June 30, 1910, together

with the amount and per cent of increase:

	Individual deposits.						
Geographical division.	1909.	1910.	Increase.	Per cent of increase.			
New England States Eastern States Southern States Middle Western States Western States Pacific States Islands	1,059.2 3,196.2 700.2	Millions. \$2,214.3 6,539.1 1,109.9 3,568.7 768.3 1,043.8 39.2	Millions. \$108.1 491.4 50.7 372.5 68.1 146.7 10.3	4. 88 7. 51 . 46 10. 40 . 89 14. 05 26. 28			

From the foregoing table it appears that during the year deposits in the banks of the island possessions increased by 26.28 per cent. The highest percentage of increase in the United States was in the Pacific States, 14.05 per cent being added to the amount reported in 1909. The next highest increase in order is shown in the Middle Western States, 10.40 per cent. The lowest rate of increase appears to be in the Southern States, which is accounted for in a measure by incomplete returns from a number of States in that section.

The following comparative statement shows the increase in population, individual deposits, and money in circulation for 1908, 1909, and 1910:

	1908.	1000			Increase, 1909.		1010	Increase, 1910.	
		1909.	Amount.	Per cent.	1910.	Amount.	Per cent.		
Population Deposits (individual) Money in circulation	Millions. 87. 4 \$12,784. 5 \$3,038. 0	Millions. 88. 9 \$14,035. 5 \$3,106. 2	Millions. 1.5 \$1,251.0 \$68.2	1. 72 9. 78 2. 24	Millions. 90. 3 \$15,283. 3 \$3,102. 3	Millions. 1. 4 \$1,247. 8 a \$3. 9	1. 55 8. 89 4. 13		

a Decrease.

From the foregoing it appears that during the year ended June 30, 1910, while the population, as estimated, increased 1.55 per cent, the volume of individual deposits increased by 8.89 per cent; but the figures for money in circulation shows a decrease of 0.13 per cent.

CLASSIFICATION OF INDIVIDUAL DEPOSITS.

Information submitted by the banks on June 30, 1910, with respect to deposits has been carefully compiled and the result shows that 42 per cent of the deposits in banks other than national are demand liabilities, while 90 per cent of the deposits in national banks are subject to demand. Including nonclassified deposits with deposits subject to check, it appears that 70 per cent of deposits in private banks are subject to demand, about 70 per cent in loan and trust companies, 64 per cent in state banks, and about 26 per cent in stock savings banks.

The average of deposits subject to demand in all banks is about 59 per cent. In the following table is shown the classification of deposits in banks other than national, in national banks, and in all banks on

June 30, 1910:

CLASSIFICATION OF DEPOSITS IN BANKS OF THE UNITED STATES.

Classification.	15,950 state, etc., banks.	7,145 national banks.	Total, 23,095 banks.
Individual deposits subject to check	\$3,587,756,107.81 4,866,842,682.11	\$4,236,249,832.72 (a)	\$7,824,005,940.53 4,866,842,682.11

 $[\]alpha$ \$580,889,677.65 savings deposits are included with individual deposits, demand or time certificates of deposits.

CLASSIFICATION OF LOANS AND DISCOUNTS.

Loans and discounts in the banks of the United States as shown by reports of condition as of June 30, 1910, aggregate roundly \$12,521,000,000. Of this amount \$5,455,000,000 are in national banks and \$7,066,000,000 in banks other than national. Loans in

state banks aggregate \$2,406,000,000; in loan and trust companies, \$2,257,000,000; in mutual savings banks, \$1,727,000,000; in stock savings banks, \$567,000,000, and in private banks, \$108,000,000. About \$6,812,000,000, or nearly 55 per cent of loans, are secured by collateral. In the following table is shown a classification of the loans and discounts in banks other than national, in national banks, and in all banks:

CLASSIFICATION OF LOANS AND DISCOUNTS IN BANKS OF THE UNITED STATES.

INVESTMENTS IN BONDS, SECURITIES, ETC.

The special report from the banks obtained by the Comptroller in April, 1909, contained among other interesting data, information in detail as to the character of investments in bonds, securities, etc. The information for the current year in respect to such investments is practically as comprehensive as that for the prior year.

In 1909 the aggregate investments in bonds, stocks, and other securities held by all reporting banks was \$4,614,400,000. From reports for June 30, 1910, it is shown that such investments had increased to \$4,723,400,000, or a gain of \$109,000,000. The classification by amounts and percentages of investments held by the banks in 1909 and 1910 is as follows:

	190	9.	191	0.
Classification.	Amount.	Per cent.	Amount.	Per cent.

 [□] Includes \$683,990,000 United States bonds deposited with the Treasurer of the United States to secure circulation and \$41,191,870 to secure United States deposits.
 ▷ Includes \$13,230,813.97 other bonds to secure United States deposits.
 ○ Premium on United States bonds.

It appears that over 41 per cent of securities held by the banks are in railroad and other public-service corporation bonds; 23 per cent in state, county, and municipal bonds; 16 per cent in United States bonds; 8 per cent in bonds not classified; 6 per cent in stocks, while the remainder, about 5 per cent, is made up of miscellaneous securities, warrants, etc.

Railroad and other public-service corporation bonds appear to predominate in the investments of all banks except in private and Mutual savings banks have over one-half of their national banks. bond investments in railroad and other public-service corporation bonds, or about \$845,000,000, loan and trust companies have about \$472,000,000, or 47 per cent of their investments in this class of bonds, state banks have about \$114,000,000, or 37 per cent of their investments in the same class of bonds, stock savings banks have about \$59,000,000, or nearly one-half of their investments, in this class of securities, while private banks have in this class of investments only about \$1,700,000. There are only about \$35,800,000 United States bonds in banks other than national, while \$737.600.000 are held by national banks. Of the \$1,116,200,000 investments in state, county, and municipal bonds, \$714,800,000 are in mutual savings banks,

\$162,000,000 in national banks, \$144,500,000 in loan and trust companies, \$63,900,000 in state banks, \$28,700,000 in stock savings banks, and \$2,300,000 in private banks. Mutual savings banks hold \$23,500,000 United States bonds, stock savings banks \$8,500,000, state banks \$2,100,000, loan and trust companies \$1,300,000, and private banks about \$400,000.

Stocks held to the amount of \$166,100,000 are reported by loan and trust companies, \$39,400,000 by mutual savings banks, \$37,600,000 by national banks, \$29,800,000 by state banks, \$7,700,000 by stock savings banks, \$2,800,000 by private banks, or a total holding of

\$283,400,000.

INTEREST RATES.

Information in relation to interest rates charged on loans and paid on deposits has been obtained from over 19,500 banks and is summarized in the following table:

•		te of inter-	Average rate of interest paid on indi- vidual deposits.

MONEY IN BANKS.

As shown by reports of April 28, 1909, the banks of the country had cash on hand to the amount of \$1,452,014,676.34. On June 30, 1910, the amount in reporting banks aggregated \$1,423,808,814.38, a decrease of \$28,205,861.96. About three-fifths of the cash holdings of the banks of the country are in the national banks, as will be seen from the following table showing the amount of coin and other money held by all reporting banks:

CLASSIFICATION OF CASH IN BANKS, JUNE 30, 1910.

a Public money in national-bank depositaries to the credit of the Treasurer of the United States not included.

The general stock of money in the United States at the close of the fiscal year ended June 30, 1910, stated roundly, was \$3,419,500,000. Of this amount \$317,200,000 was in the Treasury as assets; \$1,414,600,000, or 41.37 per cent, in reporting banks: and

b Money in banks of island possessions not included. cCompiled from special reports, April 28, 1909.

\$1,687,700,000, or 49.36 per cent, outside of Treasury and banks; that is to say, in circulation among the people. The amount reported in circulation, exclusive of coin and other money in the Treasury as assets, is \$3,102,300,000, or \$34.33 per capita, being \$3,900,000 less than the amount reported in 1909, and 60 cents less per capita.

GROWTH OF BANKING IN THE UNITED STATES.

The following condensed statement gives the principal items of resources and liabilities of state, savings, private banks, loan and trust companies, and national banks from 1864 to 1910, and shows the growth of banking in the country for the past forty-seven years:

PRINCIPAL ITEMS OF RESOURCES AND LIABILITIES OF STATE, SAVINGS, AND PRIVATE (COMPILED FROM REPORTS TO THE

a Reports April 28, 1909, and June 30, 1910, respectively.
 b Estimated on basis of data submitted by private banks

During the past decade the growth in the number and volume of business of the banking institutions of the country has been especially marked. In 1900 the total number of banks in operation was estimated at 13,977, with capital of \$1,150,728,675. For the present year the number has increased to 27,263 banks, with aggregate capital of \$1,957,138,888. The national banks have increased since 1900 from 3,732, with aggregate capital of \$621,536,461, to 7,145 on June 30, 1910, with aggregate capital of \$989,567,114; other reporting banks from 6,650, with aggregate capital of \$403,192,214 in 1900 to 15,950, with aggregate capital of \$890,376,774. In 1900 the nonreporting banks were estimated at 3,595, with capital of \$126,000,000. For the present year banks nonreporting are estimated at 4,168, with capital of \$77,195,000.

BANKING POWER OF THE UNITED STATES.

The following table shows for 1910 the banking power of the United States, including the island possessions, as indicated by the volume of capital, surplus, deposits, and circulation:

	Number.	Capital.	Surplus, etc.	Deposits.	Circulation.	Total.
National banks State, etc., banks.	7,145 15,950	\$989,567,114 890,376,774	\$861, 403, 608 1,091,072,210	a\$5,341,757,662 9,996,179,942	\$675, 632, 565	\$7,868,360,949 12,553,695,826

BANKS AND BANKING IN THE ISLAND POSSESSIONS.

PHILIPPINES.

Reports as of June 30, 1910, have been furnished this office by the War Department for the following institutions: Hongkong and Shanghai Banking Corporation at Manila, with branch at Iloilo; Chartered Bank of India, Australia, and China at Manila, with branch at Cebu; International Banking Corporation at Manila, with branch at Cebu; Banco Espanol Filipino at Manila; Sucursal Del Banco Espanol at Iloilo, and the Savings Bank at Manila. The principal items of resources and liabilities of these nine banking institutions are:

Resources.	Amount.	Liabilities	Amount.
Loans and discounts Bonds, securities, etc. Banking house. Furniture and fixtures. Other real estate owned Due from banks and bankers. Checks and other cash items. Cash on hand. Other resources.	742, 476. 46 187, 926. 91 29, 215. 24 346, 343. 46 1, 689, 386. 72 64, 732. 06 3, 489, 754. 21	Capital paid in Surplus. Undivided profits. Dividends unpaid. Reserved for taxes Due to banks and bankers. Deposits. Bills payable. Notes and bills discounted. All other liabilities.	\$1,630,418.14 149,176.57 279,645.32 48,224.75 31,193.20.00 13,871,094.40 17,591.38 984,931.25 4,689,581.96
Total	23,869,177.04	Total	23,869,177.04

a Includes government deposits.

Number of banks and amounts estimated upon statements from reporting private banks.

Comparing the foregoing with returns for the corresponding period in 1909, there is shown to have been an increase in resources of \$2,274,906.76.

HAWAII.

Ten banking institutions other than national in Hawaii submitted returns as of June 30, 1910. The principal items of resources and liabilities are:

Resources.	Amount.	Liabilities.	Amount.
Loans and discounts Bonds, securities, etc Banking house. Furniture and fixtures Other real estate owned Due from banks. Checks and other cash items. Cash on hand All other resources.	3, 127, 123. 12 140, 862. 04 54, 399. 26 188, 509. 42 1, 196. 132. 60 31, 837. 86 2, 475, 694. 77	Capital paid in Surplus Undivided profits Dividends unpaid Due to banks Deposits Bills payable All other liabilitles	\$2,033,170.00 662,619.92 258,573.36 5,815.00 81,009.40 12,789,742.59 11,246.59 36,227.02
Total:	15, 878, 403. 88	Total	15, 878, 403. 88

There are also four national banking associations in operation in Hawaii, with aggregate resources on June 30, 1910, of \$3,184,456.64, making the combined resources of the two classes of banks \$19,062,860.52. Combined the principal items of resources and liabilities of the 14 banks, including the four national associations, are as follows:

Loans	\$9,570,872
Bonds, securities, etc	4, 118, 613
Due from banks	1, 220, 413
Cash on hand	
Capital	
Surplus and undivided profits	
Due to banks.	188, 434
Individual deposits	14, 095, 348
United States deposits	658, 728
Aggregate resources	19,062,860

PORTO RICO.

Reports as of June 30, 1910, were received from one national and nine other banking institutions in Porto Rico. The principal items of resources and liabilities of the nine banks other than national in operation in the island were on that date as follows:

Resources.	Amount.	Liabilities.	Amount.
Loans Bonds, securities, etc Banking house Furniture and fixtures Other real estate owned Due from banks Checks and other cash items Cash on hand All other resources	2, 239, 751. 93 150, 006. 00 26, 782. 58 205, 005. 22 2, 128, 719. 11 1, 093, 392. 40 2, 684, 828. 57		\$1,378,145.95 639,078.95 286,164.45 -9,020.51 294,289.61 11,024,750.45 1,873,825.64
Total	15, 505, 275. 56	Total	15, 505, 275. 56

The following is a consolidated statement of the principal items of resources and liabilities of all reporting banks as of June 30, 1910:

Loans	\$6,936,313.69
Bonds, securities, etc	2, 487, 691. 93
Due from banks	2, 287, 691, 93
Cash on hand	2, 715, 304, 94
Capital	1, 478, 145. 95
Surplus and undivided profits	
Due to banks	294, 289. 61
Deposits	11, 343, 017. 44
Aggregate resources	16, 047, 354. 24

The one national bank in operation in Porto Rico had on June 30, 1910, aggregate resources of \$542,078.68, making the combined resources of all reporting banks of the island, as shown above, \$16,047,354.24, being nearly \$3,000,000 more than was reported in 1909.

BUILDING AND LOAN ASSOCIATIONS.

Statistics relating to all local building and loan associations in the United States for the year 1909-10, incorporated in the annual report of the secretary of the United States League, evidence the existence of 5,713 associations of this character, with total assets of \$856,332,719 and a membership of 2,016,651. As compared with the returns for the prior year there is shown to have been an increase in assets of \$72,156,966 and in membership of 96,394. It appears from the statistics compiled by the secretary that the average amount due each member in all of the building and loan associations has increased from \$367.22 in 1901 to \$424.63 in 1909. The average is but \$20.57 less than the average deposit in savings banks of the United States.

In the tables following are shown, by States, the number of building and loan associations, their membership, total assets, and changes in assets and membership during the year, together with a statement of the receipts and disbursements of the associations for the year ended December 31, 1909.

BUILDING AND LOAN ASSOCIATIONS OF THE DISTRICT OF COLUMBIA.

In compliance with the requirements of the act of March 4, 1909, the building and loan associations in operation in the District of Columbia submitted reports of their condition, with statements relating to their receipts and disbursements, for the periods ended December 31, 1909, and June 30, 1910. At the close of the first semiannual period there were in operation 22 associations, with assets of \$14,928,176.81, the receipts for that period being stated at \$4,813,399.41.

For the six months ended June 30, 1910, reports were received from but 19 associations, as two of those theretofore in existence were placed in liquidation and one in the charge of a receiver. The assets of the 19 associations on June 30 are shown to have been \$15,250,731.52 and the receipts for the six months \$5,251,731.77. The plan of association of the 19 institutions reporting on June 30 is as follows: Permanent, 10; serial, 8, and terminating, 1.

The total number of shares issued by these associations is stated at 381,083½, and there were in force on July 1, 128,292 shares. The membership of the associations is stated at 29,233, of whom 7,390 are borrowing and 21,843 nonborrowing members. The installment payments of one association are \$2 per month, of one other \$2.50, and of the remaining 17, \$1.

The individual reports and the abstracts for each of the semiannual

periods are incorporated in the appendix to this report.

SCHOOL SAVINGS BANKS.

The report for the year ended January 1, 1910, compiled by Mr. J. H. Thiry, of Long Island City, N. Y., relating to school savings banks, includes information in relation to these banks in Canada, Porto Rico, South Australia, and Western Australia with those of the United States.

The school savings bank system is stated to be in operation in 1,168 schools, wherein are conducted 8,515 banks. The number of pupils in these schools is stated at 632,665 and the number of depositing pupils 203,458. From the date of the introduction of the system the total amount deposited by these school children aggregated \$5,051,644.60, of which \$4,180,948.59 has been withdrawn, leaving the balance to their credit on January 1, 1910, \$870,696.01.

By deducting the figures for schools located outside of this country the statistics for school savings banks in the United States show 7,065 banks located in 530 houses, and 160,488 depositors with an aggregate balance to their credit on January 1, 1910, of \$721,732.18.

FOREIGN BANKS OF ISSUE.

The following table shows the principal items of assets and liabilities of the banks of issue in the countries named for the dates indicated:

STATEMENT IN POUNDS STERLING OF THE PRINCIPAL ITEMS OF ASSETS AND LIABILITIES OF FOREIGN BANKS OF ISSUE.

SAVINGS BANKS IN FOREIGN COUNTRIES.

23,735,000 227,000 92,802,000

10,379,000 897,000 4,756,000

33,295,000 2,339,000

The accompanying tables relating to the form of organization and statistics relative to savings banks, including postal savings institutions, in foreign countries were compiled for this report by the Bureau of Statistics, Department of Commerce and Labor, the data being taken from latest official reports of the respective countries. The population of the countries in which these institutions are located is stated at 632,985,000; the number of depositors in savings banks, 101,169,832, and deposits in these institutions \$10,033,989,560.

To the data compiled by the Bureau of Statistics have been added corresponding information relating to savings banks in the United States, for June 30, 1910, shown elsewhere in detail. The aggregate population of all countries relative to which information has been

Motes in circulation...

Deposits.....

85,976,000 30,525,000 obtained in respect to savings banks is stated at 730,948,000; the number of depositors in savings banks 110,362,740, the total volume of deposits \$14,105,315,429, and the average deposit account \$127.88. The average deposit account in foreign countries was \$99.18, that in the United States being \$445.20. Approximately one-twelfth of the depositors in all savings banks of the world are depositors in savings banks in the United States. The deposits in savings banks in the United States amount to nearly 30 per cent of the deposits in all savings banks of the world. Based upon the stated population of foreign countries, the average deposit per inhabitant is shown to be \$15.85. In the United States the average deposit is \$45.04 and the average for all countries \$19.29. The table relating to postal savings banks presents conditions existing in 1898 and 1908 with respect to the number of depositors, amount of deposits, and average deposit There is not an exact uniformity in dates, but the exceptions are stated in the footnote to the table.

The number of postal-bank depositors increased from 22,130,414 in 1898 to 43,180,903 in 1908, and the deposits from \$1,300,276,860 to \$2,227,927,502. The average postal savings account in 1898 was \$58.75, whereas in 1908 it was but \$51.59, the percentage of increase in depositors being greater than the percentage of increase in deposits.

The tables in question follow.

SAVINGS BANKS, INCLUDING POSTAL SAVINGS BANKS: NUMBER OF DEPOSITORS, AMOUNT OF DEPOSITS, AVERAGE DEPOSITS PER DEPOSIT ACCOUNT AND PER INHABITANT, BY SPECIFIED COUNTRIES.

The figures of population are for the nearest date to which the statistics of savings banks relate.

Belgium.—Data for the state-controlled "Caises Generale d'Epargne," including savings banks related at the state-controlled "Caises Generale d'Epargne," including savings depositories at post-offices. In addition, reports are given for 3 municipal and 5 private savings banks. On December 31, 1908, the former had 16,783 depositors, credited with \$1,939,668 of deposits, and the latter 27,844 depositors, with \$8,486,439 of deposits. The amount of deposits in government savings banks in the Belgian Kongo at the end of 1908 is stated officially as \$605,772.

Denmark.—Exclusive of 1,688 deposits of \$164,209 in savings banks in Faroe Islands. Exclusive of data for savings departments of ordinary banks, which comprised 145,719 accounts credited with \$28,679,196 on March 31, 1908.

Germany.—At the end of the fiscal year 1907-8 the total savings banks deposits in Germany had increased to \$3,305,606,000. This amount includes \$2,170,680,018 to the credit

of 11.484,139 depositors in the Prussian savings banks. Roumania.—Figures for the "Case de economie."

Russia.—Includes 41,361 depositors in school savings depositories, credited with \$110,200. The above total is exclusive of \$146,338,000 worth of securities held by the savings

banks to the credit of depositors.

Spain.—The peseta has been converted at the rate of 17.14 cents. Data taken from "España Economica y Financiera," September 25, 1909. Switzerland.—Preliminary statement furnished by the Swiss Federal Statistical Bureau under date of September 30, 1909, for 372 savings banks.

United Kingdom.—Figures for trustee savings banks relate to the year ending November 20; figures for post-office savings banks to December 31. Exclusive of government stock held for depositors, which at the end of the year amounted to \$105,311,644 in the post-office savings banks and to \$12,170,795 in the trustees' savings banks.

British India.—Exclusive of population of the feudatory States.

Canada.—Exclusive of data for special private savings banks, which on June 30, 1910, held deposits amounting to \$32,156,708. This total does not include the savings deposits in chartered banks ("Deposits payable after notice or on a fixed day") which on June 30, 1910, amounted to \$534,432,054.

Comparative Statement Relative to Number of Depositors, Amount of Deposits, and Average Deposit in Postal Savings Banks in 1898 a and ON DATE OF LATEST RETURNS.

α The earlier figures are for 1898 with the following exceptions: Belgium, Russia, Dutch East Indies, Formosa, Tunis, and Orange River Colony, 1899; Egypt, 1902; Federated Malay States (government savings banks), 1904; Dutch Guiana, 1904; Curaçao and Rhodesia, 1905; Philippines, June 30, 1907; Canada, June 30, 1900.

δ 1908 returns with the following exceptions: Curaçao, 1907; Belgium, Netherlands, United Kingdom, Federated Malay States, Dutch East Indies, and Tunis, December 31, 1909; British India and Japan, March 31, 1909; Italy, Victoria, Queensland, and Western Australia, June 30, 1909; Canada and Philippine Islands, June 30, 1910.

ε It has been thought proper to include among the postal savings banks also those savings banks in the Australian States which prior to the transfer of the state post-offices to the federal government were operated by the respective state post-offices. All these banks continue at present to be operated as government savings banks.

65872°--- FI 1910--

INSOLVENT NATIONAL BANKS.

In the year ended October 31, 1910, the following-named national banks were closed and placed in charge of receivers:

	Char- Date of au-		-		Circulation.			
of bank. nu	ter num- ber.	thority to commence business.	Date of closing.	Capital stock.	Issued.	Re- deemed.	Out- standing.

tyville, Beattyville, Ky	7751	May 19,1905	Oct. 15,1910	25,000	25,000		25,000	
Total (7 banks)				975,000	241,250	133,785	107,465	

As will be observed from the foregoing statement, while 7 banks were placed in charge of receivers during the year, there were in fact but 4 failures, as 1 association was restored to solvency and 2 were banks which had been placed in voluntary liquidation some years since and were placed in the charge of receivers for the purpose of settling matters

that could not be satisfactorily adjusted otherwise.

The final settlement of the affairs of 18 insolvent national banks was effected during the year. The capital of the banks in question at the date of failure aggregated \$1,555,000, the assets coming into the custody of the receivers amounting to \$12,494,806. tions from assets and on account of shareholders' liability aggregated The liabilities of the banks to depositors and other \$8.352,274. creditors as shown by claims proved were \$7,378,095 on which dividends were paid to the amount of \$6,340,582, or at the rate of 85.94 per cent. Including with dividends paid the offsets that were allowed and loans paid, depositors and other creditors received on an average 89.88 per cent. The cost of administration of these trusts is stated at \$438,741, an amount representing 3.5 per cent of the assets and 5.3 per cent of the total collections.

From the date of the first failure in 1865 to October 31, 1910, 514 national banking associations have been placed in the charge of receivers of which, however, 25 were restored to solvency. The nominal value of assets administered upon by the receivers aggregated \$341,805,971, from which was collected \$169,975,721. Collections from assessments upon shareholders to make good in part deficiency in assets were effected to the amount of \$21,588,010,

making the total cash receipts by the receivers, \$191,563,731.

b Formerly in voluntary liquidation.

The collections were disposed of mainly as follows: Dividends paid \$135,233,169, loans paid and other disbursements \$38,552,673, legal expenses, receivers' salaries and other incidental expenses \$13,721,949.

The capital of all insolvent banks at date of failure was \$84,370,920, and the amount of assessment levied thereon \$45,532,240. The circulation of these banks at the time of closing was \$26,308,672.

The affairs of 434 insolvent banks had been settled up to the close of the year. The assets administered upon aggregated \$296,406,777, and the capital was \$70,105,920. Collections from assets are shown to have been \$147,176,649, and from the assessment upon shareholders \$19,498,142, making total collections \$166,674,791, from which on claims proved of \$154,741,488, dividends were paid to the amount of \$117,905,597. The average rate of dividend paid on claims proved was 76.20 per cent, but including offsets allowed, loans paid, and other disbursements with dividends, creditors received on an average 82.64 per cent. Expenses of administration of these 434 trusts—that is, receivers' salaries, legal and other incidental expenses, amounted to \$12,144,016, a sum equal to 4.10 per cent of the nominal value of the assets and 7.39 per cent of the total collections from assets and shareholders.

The outstanding circulation of these banks at the date of failure aggregated \$22,415,209, for the security of the redemption of which United States bonds of the par value of \$25,078,400 were held by the Treasurer of the United States, which, on being disposed of for \$26,016,133, added \$3,600,924, to the funds available for the pay-

ment of dividends.

On the average shareholders were assessed approximately 58 per cent on their holdings, the collections thereon being only about 50 per cent. The amount realized on the assessments was nearly 28 per cent of the par value of the capital stock of these insolvent national banks.

At the close of the year there were still 55 insolvent national banks in the charge of receivers, their capital being \$7,805,000, circulation outstanding \$3,893,463. The assets of these banks aggregated \$45,399,194, from which \$22,799,072 has been collected, and from which dividends have been paid to the amount of \$17,327,572.

During the current year 56 dividends have been paid to the creditors of 39 insolvent banks, the total disbursements being \$3,386,773.38.

In the following table is summarized the condition of all insolvent national banks; the condition of banks closed and still in charge of receivers being shown separately:

Summary of Reports of Receivers of Insolvent National Banks, 1865 to October 31, 1910.

	Closed re- ceiverships, 459.a	Active re- ceiverships, 55.	Total, 514.

a Includes 25 banks restored to solvency.

With the exception of banks that have become insolvent as a result of defalcations or other dishonesty, failures have been almost wholly due to incompetent or reckless management and persistent violations of the banking law and the practices governing conservative banking. As a matter of fact a large percentage of the banks that have failed should have gone into voluntary liquidation before they reached conditions precipitating failure.

It is the present Comptroller's earnest purpose to get out of the national banking system every bank which is managed in such a careless, reckless, speculative, or incompetent manner as to endanger the safety of its depositors. A bank that is the subject of constant criticisms for persistent and flagrant violations of law and is managed in such a reckless, careless, and incompetent manner as to necessitate frequent examinations should go out of business and leave the field to more competent and conservative bankers; that is, the bank should go into voluntary liquidation as soon as it is demonstrated to a reasonable certainty that it can not be continued successfully or the officers and directors can not or will not manage its affairs in accordance with law and safe banking practices.

b Capital stock of 25 banks restored to solvency.

When an examiner finds a bank in a serious condition, his report and conclusions based thereon are submitted to the officers and the entire board of directors, with advice that one of the following courses of procedure must be adopted:

First. That the bank, in accordance with the suggestion submitted, will be immediately placed in a satisfactory condition by the officers and directors in charge. Second. That if the officers and directors in charge are unable to place the bank in

Second. That if the officers and directors in charge are unable to place the bank in a satisfactory condition that it will be placed under an entirely new management.

Third. Where neither of the foregoing suggestions can be complied with the officer

Third. Where neither of the foregoing suggestions can be complied with the officers and directors are urged to place the bank in voluntary liquidation, and if they refuse to recommend that such action be taken by the shareholders, the condition of the bank is brought to the attention of a representative committee of shareholders.

The advantages of voluntary liquidation, as stated to the officers, directors, and committee of shareholders, are that depositors will be paid in full; the shareholders will have an opportunity to save a part of their original investment; the double liability on capital-stock holdings will be averted, and the possibility of failure avoided.

The limited number of receiverships, as compared with the large number of voluntary liquidations during the past year is due, in a measure, to the action of the office through the examiners in securing the liquidation of certain banks, the ultimate failure of which was only

avoided by that course of procedure.

LAWRENCE O. MURRAY, Comptroller of the Currency.

The Speaker of the House of Representatives.

REPORT OF THE REGISTER OF THE TREASURY.

TREASURY DEPARTMENT, OFFICE OF THE REGISTER, Washington, D. C., August 8, 1910.

Sir: I have the honor to make the following report of the business transacted in this office during the fiscal year ended June 30, 1910: The duties of the Register of the Treasury are thus defined: Signs and issues all bonds of the United States, including the Panama Canal loan, the District of Columbia, the sundry loans of the Philippine Islands and the City of Manila, and transmits to the Treasurer of the United States schedules showing the name of every individual, corporation, etc., holding registered bonds and entitled to receive interest thereon. He receives, examines, and registers coupon bonds exchanged for registered bonds or redeemed, and registered bonds transferred and finally redeemed. He receives, examines, arranges, and registers the upper halves of all redeemed United States notes, gold certificates, silver certificates, and Treasury notes; fractional currency notes, detached interest coupons, interest checks on registered bonds, and all other United States securities redeemed and He is represented on the committee having in charge the destruction, by maceration, of certain of the United States securities, etc., mentioned herein. Also all customs, internal-revenue, and postage stamps condemned for imperfections and destroyed. He signs all the correspondence of the office. The work is performed in two divisions, as follows:

DIVISION OF LOANS.

This division has charge of the interest-bearing debt of the United States. To this has been added the care of loans authorized by Congress for the Panama Canal, the District of Columbia, the Govern-

ment of the Philippine Islands, and the City of Manila.

The principal duties of this division are as follows: The receipt of new coupon and registered bonds after they have been printed by the Bureau of Engraving and Printing, together with the custody of the same; the preparation of registered and coupon bonds for issue, including the inscription of the names of the owners on registered bonds, and signing the same; writing the letter which accompanies each package or lot; preparing the receipt to be signed by consignees, and delivering the bonds for transmittal. Full records are kept, first, of all issues of bonds; second, of the transfer of registered bonds from one owner to another, and third, of canceled bonds which have been either purchased or refunded, or have been redeemed at maturity. Accounts in detail are opened with each holder of registered bonds.

The assignments of all registered bonds, whether presented for transfer to other parties or for redemption, are carefully examined. The assignments of much the larger part of the values involved are made by attorneys, executors, administrators, guardians, and representatives of banks and other corporations, and it is necessary that the papers showing the authority of such agents shall be examined, indexed, and filed for instant reference. In every such transaction it is also necessary to see that the powers exercised by the attorney or representative are included among those granted by his principal.

Quarterly schedules are prepared for the payment of interest on all United States registered bonds, including those of the Panama Canal loans, on the four Philippine issues, and on the three issues of City of Manila sewer and water bonds. The schedules on the 3.65 per cent bonds of the District of Columbia are prepared semiannually. The schedules show the amount of registered bonds standing in the name of every owner at the date of the dividend on each loan, the amount due at each date of payment, together with the address to which the Treasurer of the United States is to forward checks for interest.

It has always been the practice to have the interest schedules printed quarterly or semiannually, as might be necessary. In consequence the Public Printer was compelled to keep a great many heavy forms of type standing from year to year, and the question of cost of printing became a serious one. Some months since it was deemed best to consider a change in the method of declaring dividends, or rather in the method of preparing schedules for certification to the Treasurer of the United States. The checks for interest on all United States and other registered bonds dealt with by this

office are drawn by the Treasurer of the United States.

Heretofore it has been the custom to certify to the Treasurer the printed schedules mentioned above, containing the name, post-office address, amount of principal, and interest in each case. at present thirteen loans held in charge by this office, and in consequence twelve schedules were printed four times a year, and one (District of Columbia 3.65 per cent) twice a year. The problem given this office and that of the Treasurer of the United States was to devise a method by which the checks could be drawn and the printed schedules be eliminated from the transaction. The problem has been successfully solved. The card system has been resorted to, and now, instead of certifying entire schedules as heretofore, only changes in accounts are now certified, and as the Treasurer's cards and those of this office are precisely identical as to name, address, and amount of interest due each payee, the new system works smoothly, expeditiously, and accurately, and there is no delay in either office in the preparation of the checks for distribution at the proper interest periods.

Aside from eliminating the cost of printing, the new arrangement is highly satisfactory to this office, as it enables it to at all times know where the bonds are located. The following analytical table shows how the bonds of all the loans are held, and also shows the amounts held by national banks in the various States to secure circulation and deposits. This table is interesting, owing to the fact that never before has it been possible to give an analysis of this

character.

PHILIPPINE ISLANDS AND CITY OF MANILA BONDS.

On August 1, 1909, a third series of bonds of the Philippine Islands on account of public improvements, amounting to \$1,500,000, was issued. These bonds are redeemable after August 1, 1919, and payable August 1, 1939.

There are now seven issues of bonds on account of the Philippine

Islands, viz:

Philippine loan, public improvements, th	\$7,000,000 ree series 5,000,000 4,000,000
Total	16 000 000

 Potal
 16,000,000

As stated in my previous report, by an arrangement entered into between the Secretary of the Treasury and the Secretary of War, the issues and transfers of the bonds of the Philippine Islands and the City of Manila, under the act of Congress of July 1, 1902, are all made

by this office and the records are kept here.

The following table shows the principal facts in regard to the schedules prepared in this division during the last fiscal year whereby the Treasurer of the United States was authorized to draw checks for the payment of interest on registered bonds on the loans of the United States, the Panama Canal, the Philippine Islands, and the District of Columbia:

The following summary of dividends declared by this division during the last ten years shows that during that period the Treasurer of the United States has been authorized by this office to draw 1,808,081 checks for the payment of interest, amounting to \$206,156,685.24½, exclusive of checks drawn in prepayment of interest:

Number and Amount of Interest Checks Declared During the Last Ten Years.

Year.	Number of checks.	Amount pay- able.
1900–1901 1901–2 1902–3 1903–4 1904–5 1905–6 1906–7 1907–8 1908–9	232, 603 220, 278 203, 105 195, 861 184, 263 156, 025 126, 661	\$25,713,756,47,23,301,615,72,19,323,870,40,21,091,301,65,21,047,761,45,20,868,921,25,17,604,221,45,19,603,046,35,20,220,541,00,17,381,649,50
1909-10		206, 156, 685. 24

Interest was prepaid on registered bonds of various loans during the fiscal years 1899-1900, 1902-3, and 1906-7, and in order to ascertain the total amount of interest paid on registered bonds it is necessary to add the amounts of such prepayments to those given in the above table. The prepayments were made by the Treasurer of the United States on presentation of the bonds and such fact stamped on the bonds. Schedules were then prepared in this office which gave in detail a description of the bonds on which interest had been prepaid.

The following table shows the number and amount of unissued bonds of each loan, class, and denomination, on hand June 30, 1910:

Unissued Bonds on Hand in the Office of the Register of the Treasury at the Close of Business June 30, 1910.

SPANISH INDEMNITY CERTIFICATES.

Under the treaty of February 17, 1834, the sum of \$599,850.16 was awarded to certain citizens of the United States as due from the Kingdom of Spain, and at periods of about a year apart the sum of \$28,500 has been received during many years from Spain and divided pro rata among the holders of this stock.

Early in 1908 the sum of \$570,000 was received from the Spanish Government in liquidation of the debt, and the holders of the certificates agreed to receive this amount to be divided pro rata among

them in full payment.

At the present time certificates representing a nominal value of \$595,629.95 have been received for payment, the proportional allotment for which was \$565,989.80. There remain eight unsettled accounts of this indebtedness.

PACKAGES RECEIVED AND SENT.

During the fiscal year this office received by registered mail 2,062 packages, containing bonds to the amount of \$24,889,030. It sent out by registered mail 3,252 packages, containing bonds amounting to \$35,132,317. This does not represent the volume of work performed by the division, as a great number of cases, aggregating millions, are left at the office for transfer by individuals and attorneys in person, to say nothing of the large number of cases delivered by the Treasurer of the United States and the Comptroller of the Currency.

DIVISION OF NOTES, COUPONS, AND CURRENCY.

This division receives, counts, arranges, registers, examines, and files for future reference all redeemed, exchanged, and transferred coupon bonds, paid coupons, interest checks, and all United States interest-bearing securities, such as Treasury notes, 7-30 notes, and compound-interest notes, and gold and other certificates payable to order. It also makes the final count and examination of the upper halves of all redeemed United States currency prior to its final destruction. This division represents the Register on the various committees

having in charge the examination and counting of customs, internalrevenue, and postage stamps condemned for imperfections, burnt and mutilated notes sent in for exchange and redemption, and witnessing the final destruction of the above by the process of maceration.

COUPON BONDS.

During the year there were received, counted, entered in blotters, transferred to numerical registers, examined, and scheduled 12,682 coupon bonds, with 377,578 coupons attached, amounting to \$5,796,970, which, added to the coupon bonds on file at the beginning of the year, give an aggregate of 2,611,403 coupon bonds, with 96,737,546 coupons attached, amounting to \$1,490,638,670, filed in this division at the close of the fiscal year ended June 30, 1910.

At intervals within the year some time was profitably employed in the examination of entries of 73,750 bonds to properly note the numbers and denominations of 440,023 coupons of corresponding numbers

detached from the bonds before issue.

COUPON BONDS RECEIVED, COUNTED, ENTERED IN BLOTTERS, TRANSFERRED TO NUMERICAL REGISTERS, EXAMINED, AND SCHEDULED DURING THE YEAR.

COUPONS.

The number of redeemed detached coupons received during the year was 455,407, amounting to \$1,708,313.58; the number counted to verify schedules, 455,407; the number arranged numerically, 455,407; the number entered in numerical registers, 409,629; the number examined to verify registration, 397,862; the number scheduled by loans, dates, and denominations, 862,261, and the number strapped with wire for final filing, 552,296. The preparation of lists of outstanding coupons of all the old matured loans of the Government consumed some time during the course of the year—a work deemed necessary to complete the records and to further increase the facilities for furnishing information on call. At the close of the year there were on file in this division 115,463.852 coupons, amounting to \$1,290,277,497.83.

INTEREST CHECKS.

The number of paid interest checks received during the 'year was 119,867, amounting to \$19,837,722.38; the number counted and arranged numerically, 119,867; the number registered, 148,474, and the number compared with the numerical registers, 155,141.

In connection with this branch of the work, a large amount of miscellaneous labor is performed each year, which can not be given in itemized or tabulated form, and which is made necessary in order to put the records and files in proper shape to meet all the exacting requirements of the public service.

At the close of the year there were on file in this division 6,550,593

checks, amounting to \$1,033,779,149.09.

CURRENCY.

During the year this division received, counted, examined, entered in journals and ledgers, and prepared for destruction 15,014,542 United States notes, amounting to \$114,523,000; 70,541 Treasury notes of 1890, amounting to \$503,800; 173,068,474 silver certificates, amounting to \$315,388,600; 6,915,851 gold certificates payable to bearer, amounting to \$153,785,000; 9,006 fractional currency notes, amounting to \$1,965; 60 4 per cent refunding certificates payable to bearer, amounting to \$600, and 6 three-year 6 per cent compound-interest notes, amounting to \$60; aggregating in total number of notes and certificates 195,078,480 and in total amount of the same \$584,203,025.

In addition, as shown in the following table, the corresponding force of counters in the office of the Treasurer of the United States counted and examined certain New York remittances of currency not received in this office, as follows: 2,156,734 United States notes, amounting to \$15,417,000; 5,517 Treasury notes of 1890, amounting to \$39,200; 17,905,286 silver certificates, amounting to \$33,906,000, and 1,029,333 gold certificates payable to bearer, amounting to \$19,783,000; aggregating in total number of notes and certificates 21,096,870 and in total amount \$69,145,200. This, added to the count of this office, makes a grand total of 216,175,350 notes and certificates, amounting to \$653,348,225, counted, examined, and destroyed during the fiscal year.

DIFFERENT CLASSES OF NOTES RECEIVED AND DESTROYED DURING THE YEAR, BY DENOMINATION AND AMOUNT, AND TOTAL REDEMPTION AND DESTRUCTION OF THE SAME, BY DENOMINATION AND AMOUNT, TO JUNE 30, 1910.

GOLD CERTIFICATES.

During the year, of the gold certificates of the act of July 12, 1882, series of 1888, payable to order, there were received, examined, registered, and filed four certificates of \$5,000 denomination, amounting to \$20,000. Of the issue of gold certificates of the act of March 14, 1900, series of 1900, payable to order, there were received, examined,

registered, and filed 8,626 certificates of the denomination of \$10,000,

amounting to \$86,260,000.

Gold certificates of the act of July 12, 1882, series of 1882, payable to bearer, are destroyed after redemption. The amount received and destroyed is shown in the tables of destruction of the currency on pages 447 and 451.

The following table shows the outstanding amounts of the various old matured coupon bonds and other miscellaneous securities issued before, during, and since the civil war of 1861–1865, as shown by the record books of this division, in which are kept an individual record of these securities as issued by the Government by loans, numbers, and denominations.

The great importance of this record in detail to protect the interests of the Government, must be apparent in the fact that on account of the long delay of payment of these outstanding liabilities, it is a safeguard against any possible fraudulent claims for any portion of the amounts outstanding, although they may be supported by the most plausible proof.

Issue, Redemption, and Outstanding of Various Old Issues of the Government at the Close of the Year.

FILES.

The work of overhauling, rearranging, relabeling, and cataloguing the files of this division has continued from time to time within the year, affording great relief from the overcrowded and congested condition of the files of former years.

The rooms allotted for the storage of these redeemed vouchers are conveniently located and readily accessible, so that under the present conditions, from the millions on file any individual voucher can be withdrawn for inspection on the shortest notice.

I am pleased to report that the business of the office is up to date so far as it is possible for it to be.

Respectfully submitted.

W. T. VERNON, Register.

The SECRETARY OF THE TREASURY.

REPORT OF THE COMMISSIONER OF INTERNAL REVENUE.

TREASURY DEPARTMENT, OFFICE OF COMMISSIONER OF INTERNAL REVENUE, Washington, D. C., November 1, 1910.

Sir: I have the honor to make report of the work of the Bureau of Internal Revenue for the fiscal year ended June 30, 1910, accompanied with a statement of the receipts from the several sources of internal revenue for the months of July, August, and September of the current fiscal year.

RECEIPTS.

The total receipts of this bureau for the past fiscal year amounted to \$289,957,220.16. Of this total there was collected from ordinary sources \$268,997,436.42, an increase of \$22,784,717.20 over the previous fiscal year, and from the corporation tax there was collected \$20,959,783.74, making the total increase over the collections of the previous fiscal year \$43,744,500.94. The collections exceeded the estimates of November, 1909, \$21,957,220.16.

The receipts for the first three months of the current fiscal year as compared with the first three months of the fiscal year 1910 show an increase in revenue from ordinary sources amounting to \$6,489,366.03 and there has been collected in addition from corporation tax \$5,-

912,486.52, making a total increase of \$12,401,852.55.

Based on this rate of increase, I estimate that the collections for the present fiscal year will approximate \$308,000,000, of which \$283,000,000 will be collected from ordinary sources and \$25,000,000 from corporation tax.^a

I estimate that the collections for the fiscal year ending June 30,

1912, will approximate \$308,000,000.

The objects of internal taxation producing the largest amounts of internal revenue during the past fiscal year are distilled spirits, \$141,523,554.06; fermented liquors, \$59,485,116.82; tobacco, \$58,118,457.03, and corporation tax, \$20,959,783.74.

RECEIPTS IN LARGE TAX-PAYING DISTRICTS.

The leading States in the payment of internal-revenue tax are Illinois, \$49,165,272.73; New York, \$36,157,326.39; Kentucky, \$32,260,278.47; Indiana, \$28,885,024.02; Pennsylvania, \$25,982,844.76, and Ohio, \$20,982,844.76.

a It is estimated that the tax assessed against the corporations on account of business transacted during the calendar year ending December 31, 1910, will approximate \$28,000,000. On account of the fact, however, that under the law the collection of a portion of this tax may be projected into the ensuing fiscal year it is impossible to estimate the amount of collections from this source prior to July 1, 1911. The figures are based on the experience of the past year, but are liable to wide variation.

Among the States paying the smallest amounts are Mississippi, New Mexico, North Dakota, Vermont, and Wyoming.

Of the 66 collection districts subject to internal-revenue laws the fifth district of Illinois reported the largest collection—\$29,419,080.

In 1909 the total production of distilled spirits was 139,891,613 In 1910, 163,893,960 gallons, an increase of 24,002,347 gal-In 1909, 116,650,165 gallons of tax-paid spirits were withdrawn; in 1910, 128,657,776 gallons, an increase of 12,007,611 gallons. has also been an increase in the amount of tobacco and snuff manufactured, an increase in the production of beer, and a large increase in the production of oleomargarine.

The four States having the largest production of distilled spirits during the past fiscal year are Illinois, 38,027,381 gallons; Kentucky, 36,735,235 gallons; Indiana, 25,873,720 gallons; California, 9,377,373

gallons.

The three collection districts having the largest output of distilled spirits are fifth Illinois, 28,480,595 gallons; fifth Kentucky, 17,-280,173 gallons; seventh Indiana, 16,082,912 gallons.

During the fiscal year ended June 30, 1910, there were tax paid for bottling in bond 8,985,759.4 tax gallons, as compared with 6,365,839 tax gallons tax paid during the previous fiscal year, an increase of 2.619,920.4 tax gallons.

The four States which produced the largest quantity of fermented liquors are New York, 13,097,340 barrels; Pennsylvania, 7,664,141 barrels; Illinois, 6,024,884 barrels; Wisconsin, 4,816,387 barrels.

The two districts which produced the largest quantity of fermented liquors are third district, New York, 5,170,773 barrels; first district.

Illinois, 5,156,814 barrels.

The four States producing the greatest number of cigars weighing more than 3 pounds per thousand, and the production of each during the year, are as follows: Pennsylvania, 1,774,858,617; New York, 1,151,682,078; Ohio, 659,649,735; New Jersey, 519,309,215.

The two districts showing the largest production of cigars are the Pennsylvania, 673,438,383, and the first Pennsylvania, ninth

667,262,321.

The States showing the greatest production of little cigars (weighing less than 3 pounds per thousand) are: Virginia, 388,345,960; Maryland, 296,397,930; New York, 184,697,249.

The greatest production of little cigars by districts is as follows: Maryland, 296,397,930; Sixth Virginia, 203,397,760; Second Virginia,

184,948,200; first Pennsylvania, 168,768,580.

The States of New York, Virginia, Louisiana, Pennsylvania, California, and Massachusetts, in the order named, show the greatest production of cigarettes weighing less than 3 pounds per thousand: New York, 4,351,000,245; Virginia, 1,679,450,650; Louisiana, Pennsylvania, 116,575,675; California, 89,424,060; 502,794,320; Massachusetts, 48,852,882.

The three districts showing the greatest production of little cigarettes are the second New York, which produced 1,831,111,620, the second Virginia, which produced 1,673,630,150, and the third New

York, which produced 1,485,999,735.

New York State produced the greatest number of large cigarettes, showing a production of 17,191,610, of which number 12,121,510 were manufactured in the third district and 5,021,600 in the second district.

The States of North Carolina, Missouri, Ohio, Kentucky, Virginia, and New Jersey, in the order named, were the largest producers of both chewing and smoking tobacco, the quantity produced being as follows: North Carolina, 82,447,899 pounds; Missouri, 74,747,932 pounds; Ohio, 46,453,711 pounds; Kentucky, 44,937,819 pounds;

Virginia, 28,970,620 pounds; New Jersey, 28,179,726 pounds.

The districts producing the largest quantity were: First Missouri, 74,566,186 pounds; fifth North Carolina, 44,381,908 pounds; first Ohio, 43,583,387 pounds; fifth Kentucky, 39,488,051

fourth North Carolina, 38,065,991 pounds.

The four States yielding the largest amount of corporation tax are: New York, \$3,756,833.38; Pennsylvania, \$3,244,923.80; Illinois, \$2,111,865.57; Ohio, \$1,500,127.10.

The districts in which the largest collections of corporation tax were made are Second New York, \$2,424,831.02; first Illinois, \$1,956,-316.55; twenty-third Pennsylvania, \$1,646,461.88; first Pennsylvania, \$1,361,427.78.

COST OF COLLECTING THE INTERNAL REVENUES.

The cost of collecting the internal revenues for the past fiscal year was 1.74 per cent. The cost of collection during the fiscal year 1909 was 2.02 per cent. The average cost since the creation of the bureau is 2.66 per cent.

The cost of collection for the past fiscal year, distributed approximately among the different items of appropriation, was as follows:

Salaries and expenses of collectors of internal revenue, 1910	78, 263. 67
revenue, 1910	2, 353, 660. 45 88, 446. 19 112, 568. 30 321, 967. 94 20, 708. 20
Total amount expended	5, 044, 502, 60

Expenditures from appropriation "Withdrawal of denaturalized alcohol."—The expenditures from the appropriation for "Withdrawal of denaturalized alcohol" were as follows:

Salaries and expenses of agents and inspectors	\$67, 214. 79
Salaries and expenses of 13 deputy collectors	16, 770. 15
Salaries of 10 storekeepers a	
Salaries of 3 gaugers b	
Salaries of office force.	28, 958. 04
Office traveling expenses.	299.05
Laboratory supplies	
Total amount expended	131 048, 25

a Where alcohol was produced at a distillery and only a portion of the product was denatured and the distillery was of that class where a storekeeper was assigned to perform all the work in connection with the entry and withdrawal of alcohol and denaturing the same, payment of salary and expenses was made from the appropriation for "Salaries and expenses of agents and subordinate officers of internal revenue."

b Where there was not a sufficient amount of alcohol denatured at one distillery to employ the entire time of one gauger in such work, the compensation and expenses of such gauger were paid from the appropriation for "Salaries and expenses of agents

and subordinate officers of internal revenue."

ESTIMATED EXPENSES FOR NEXT FISCAL YEAR.

I estimate the expenses of the Internal-Revenue Service for the fiscal year ending June 30, 1912, as follows:

Office of Commissioner of Internal Revenue: For salaries of officers, clerks, and subordinate officers.	\$354, 290
Salaries and expenses of collectors of internal revenue: For salaries and	- ,
expenses of collectors of internal revenue, and deputy collectors, and surveyors, and clerks, messengers, and janitors in internal-revenue	
offices. Salaries and expenses of agents and subordinate officers of internal revenue:	2, 150, 000
For salaries and expenses of 40 revenue agents provided for by law and	
fees and expenses of gaugers, salaries and expenses of storekeepers and	0 505 000
storekeeper-gaugers ^a	2, 525, 000
side of the District of Columbia, telephone service, and other miscellane-	
ous expenses incident to the collection of internal revenue	100,000
including freight	80,000
Punishment for violation of internal-revenue laws: For detecting and bringing to trial and punishment persons guilty of violating the internal-	
revenue laws or conniving at the same, including payments for infor-	
mation and detection of such violations	150,000
Refunding internal-revenue collections: To enable the Secretary of the Treasury to refund money covered into Treasury as internal-revenue	
Treasury to refund money covered into Treasury as internal-revenue collections under the provisions of the act approved May 27, 1908	30,000
Expenses of collecting the corporation tax: For expenses of collecting the corporation tax authorized by the act approved August 5, 1909, "To	
provide revenue, equalize duties, and encourage the industries of the	
United States, and for other purposes"	100,000
iting, and properly caring for the returns of all corporations, required	
by section 38 of the act approved August 5, 1909	25,000
Total	5, 514, 290
Salaries, office of Commissioner of Internal Revenue (reimbursable): For	, ,
salaries of two stamp agents and one counter	3, 400

SALARIES.

I have the honor to recommend that Congress appropriate for the fiscal year ending June 30, 1912, the sum of \$354,290^b as salaries for the following officers, clerks, and employees in this bureau:

, , ,	
1 Commissioner of Internal Revenue.	\$6,000
2 deputy commissioners, at \$4,000 each	8,000
1 chief chemist	3,000
1 chemist	2,500
2 first assistant chemists, at \$1,800 each	3,600
I second assistant chemist	1,600
1 third assistant chemist	1,400
6 heads of divisions, at \$2,500 each	15,000
3 heads of divisions, at \$2,250 each	6,750
1 superintendent of stamp vault	2,000

^a Ninety thousand dollars included in this estimate is for the purpose of granting leave of absence, with pay, and traveling expenses, when under assignment, to storekeepers, storekeeper-gaugers, and gaugers.

b This estimate includes the amount of \$18,240 from which the following were formerly paid from the appropriation for "Withdrawal of denaturalized alcohol:" I chief chemist, 1 first assistant chemist, 1 clerk of class 4, 1 clerk of class 3, 4 clerks of class 2, 3 clerks of class 1, and 1 messenger.

1 private secretary. 4 clerks of class 5. 29 clerks of class 4. 25 clerks of class 3. 41 clerks of class 2. 40 clerks of class 1. 32 clerks, at \$1,000 each. 40 clerks, at \$900 each.	8,000 52,200 40,000 57,400 48,000 32,000 36,000
40 clerks, at \$900 each. 4 messengers, at \$840 each. 21 assistant messengers, at \$720 each. 16 laborers, at \$660 each.	3, 360 15, 120

I also recommend the appropriation of the sum of \$3,400 as salaries of two stamp agents, one at \$1,600, one at \$900, and one counter at \$900, the same to be reimbursed by the stamp manufacturers, as provided by the act of August 5, 1882.

SCALE OF SALARIES OF COLLECTORS.

The recommendations made for the salaries of collectors are based upon an estimate of their probable collections according to the following scale, with the qualifications that if the actual collections vary from the amounts estimated the salaries will be readjusted at the end of the fiscal year:

For collection of—	Salary.	For collection of—	Salary.
\$25,000 or less \$25,001 to \$37,500 \$37,501 to \$50,000 \$50,001 to \$75,000 \$75,001 to \$100,000 \$100,001 to \$125,000 \$125,001 to \$175,000 \$175,001 to \$225,000 \$225,001 to \$275,000 \$225,001 to \$275,000 \$325,001 to \$325,000	2, 125 2, 250 2, 375 2, 500 2, 625 2, 750 2, 875	\$375,001 to \$425,000 \$425,001 to \$475,000 \$475,001 to \$550,000 \$550,001 to \$565,000 \$625,001 to \$700,000 \$700,001 to \$775,000 \$775,001 to \$850,000 \$850,001 to \$925,000 \$850,001 to \$999,999 \$1,000,000 and upward.	3,500 3,625 3,750 3,875 4,000 4,125 4,250 4,375

In addition to the salary based upon the above-mentioned scale, the collector shall receive a commission of one-half of 1 per cent on tax-paid spirit stamps, and may receive additional compensation on account of territorial extent, as provided by law, provided the gross compensation does not exceed \$4,500. (See sec. 3148 as amended and sec. 3314, Rev. Stat.)

OFFICIAL FORCE.

At the close of the fiscal year ended June 30, 1910, 258 officers, clerks, messengers, and laborers were employed in this bureau, and the aggregate amount paid during the year for their salaries was \$321,967.94, which does not include office force paid from the appropriation for "Withdrawal of denaturalized alcohol," from which was paid \$28,958.04, covering salaries of 23 employees.

The force connected with this bureau during the fiscal year which ended June 30, 1910, in the various districts throughout the United

States, as reorganized under the executive order of May 21, 1887, was 66 collectors, who received per-annum salaries and commissions as follows:

Number.	Salary.	Number.	Salary.
0	\$4,500.00 4,406.92 4,375.44 4,252.12 4,198.49 3,893.43 3,875.00 3,820.33 3,750.00	1	\$3,739.44 3,625.56 3,625.00 3,375.00 3,138.03 3,125.44 3,125.00

There were also employed 1,186 deputy collectors, who received per-annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
7	\$2,500 2,400 2,200 1,900 1,800 1,700 1,600 1,500 1,450 1,450 1,350 1,350	1. 291	\$1,250 1,200 1,150 1,100 1,050 1,000 900 800 750 720 700 600	9	\$500 480 400 360 300 200 180 100 60

There were also employed in the offices of the different collectors 131 clerks, who received per-annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
2. 3. 6. 13. 12. 1.	\$1,700 1,600 1,500 1,400 1,300 1,250	38	\$1,200 1,150 1,100 1,050 1,000 900	8	\$800 720 700 600

Also 12 messengers and 2 janitors, who received per-annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
1	\$900 840 720	1 7	\$700 600 450	2	\$300

STOREKEEPERS, GAUGERS, ETC.

There were also employed 161 gaugers who received fees not to exceed \$5 per day, 54 storekeepers whose pay did not exceed \$4 per day, and 1,958 storekeeper-gaugers whose pay ranged from \$2 to \$5 per day, and 6 distillery surveyors at \$2.50 per day. All the employees above enumerated were paid only when actually employed.

OBJECTS OF TAXATION.

DISTILLED SPIRITS.

While the enactment of state-wide prohibitory laws in some States and of local-option laws in other States has greatly reduced the number of distilleries of the smaller classes, and in some districts has reduced the number of rectifiers and wholesale and retail liquor dealers, the production and withdrawal for consumption of distilled spirits has greatly increased during the past fiscal year, as the following comparative statement of production of distilled spirits from materials other than fruit during the fiscal years ended June 30, 1897, to June 30, 1910, inclusive, shows.

Fiscal year of production ended-	Tax gallons.	Fiscal year of production ended-	Tax gallons.
June 30, 1897	62, 465, 647. 8	June 30, 1904	134,311,952.0
June 30, 1898		June 30, 1905	147, 810, 794. 3
June 30, 1899	97,066,554.7	June 30, 1906	145,666,125.1
June 30, 1900	105, 484, 699. 8	June 30, 1907	
June 30, 1901	124, 520, 599. 8	June 30, 1908	
June 30, 1902		June 30, 1909	
June 30, 1903	141, 776, 202, 1	June 30, 1910	156, 237, 526, 4

During the fiscal years 1898 to 1907 the production of distilled spirits each year was much in excess of the withdrawals for all purposes, resulting in a stock in distillery and general bonded warehouses at the end of the fiscal year 1907 of 245,438,816 original gauge gallons, being an increase over a similar stock held in bond at the expiration of the fiscal year ended June 30, 1898, of 112,452,549.3 original gauge gallons. The stock in bond June 30, 1910, was 233,508,674.6 original gauge gallons, and the withdrawals for all purposes during the fiscal year ended June 30, 1910, were in excess of the production during said year of 4,367,240.6 original gauge gallons.

The tax-paid withdrawals of spirits distilled from material other than fruits during the fiscal years ended June 30, 1897, to June 30, 1910, inclusive, were as follows:

1897 1898 1899 1900 1901 1902	68, 661, 038. 5 78, 246, 032. 9 83, 694, 338. 1 93, 391, 827. 8 99, 191, 721. 5 103, 304, 981. 5	1905 1906 1907 1908 1909	116,033,305.6 115,994,857.5 122,617,943.1 134,031,066.7 119,703,594.4 114,693,578.2
1903	112, 788, 168, 0	1910	126, 384, 726, 7

From the foregoing it will be observed that the withdrawals on payment of tax from bonded warehouses during the period from 1897 to 1907 increased approximately 100 per cent, and that there was a decrease in tax-paid withdrawals for the fiscal years ended June 30, 1908, and June 30, 1909, as compared with the previous years' withdrawals, of 14,327,472.3 and 5,010,016.2 tax gallons, respectively, and an increase for the year 1910 over 1909 of 11,421,148.5 tax gallons.

During the year there were operated 444 grain distilleries, 16 molasses distilleries, and 446 distilleries engaged in the production of

brandy from fruit. This was a decrease of 386 distilleries.

On December 24, 1909, President Taft rendered his decision in the prolonged controversy as to what is whisky. New internal-revenue regulations governing the marking and branding of distilled spirits were prepared and issued in conformity with this ruling, to be effective on and after July 1, 1910. On June 28, 1910, however, a temporary restraining order was entered by consent between the Department of Justice and the parties at interest in the United States District Court for the Eastern District of Louisiana, and in accordance with advice from the Department of Justice the provisions of the regulations referred to were amended as far as was necessary to conform therewith.

During the past fiscal year the bureau adopted stricter methods in dealing with the manufacture and use by rectifiers of certain products of sugar fermentation known as "base wine," with results very

gratifying from the revenue standpoint.

The insistence of the enforcement of the statutes governing rectifiers has also resulted in practically preventing the placing on the market of non-tax paid spirits by a class of persons who had been permitted to qualify as rectifiers and extract from the staves of empty spirit packages the alcohol remaining therein. This business had assumed considerable proportions and the amount of revenue lost thereby was quite large.

The volume of business at rectifying houses has increased substantially over that of the previous fiscal year, as shown by the quantity

dumped for rectification and rectified.

Practically no serious frauds were discovered during the year in connection with sweet-mash distilleries. Frauds in connection with the smaller sour-mash distilleries, however, continued with little sign of diminution, but the increased efficiency of the inspection force and the increased use of the Chemistry Division, together with a more definite line of demarkation between the two classes of distilleries and certain improved methods of supervision of these distilleries, will, it is believed, to a large extent eliminate the opportunity for frauds at these plants and give the bureau the same control over distilleries of this class that it now has over the sweet-mash distilleries.

FRUIT DISTILLERIES.

It has developed that there is a need of better supervision of fruit-brandy distilleries. During the year considerable frauds were detected at certain of these distilleries, often by chemical analyses showing the illicit use of sugar. The bureau has now under consideration certain changes in regulations and certain improvements in the method of supervising these establishments by which it is believed fraud will be effectually checked, while legitimate manufacturers will be able to operate without unnecessary restraint.

FERMENTED LIQUORS.

The production of fermented liquors during the year was 59,544,775 barrels, as against 56,364,360 barrels the previous year. The number of breweries operated was 1,568, as against 1,622 the previous year.

No serious frauds in connection with fermented liquors were dis-

covered during the year.

The bureau has under consideration the determination of the status of certain manufacturers of a product known as "near beer," which product contains less than one-half of 1 per cent of alcohol. Under the ruling at present in force in this bureau manufacturers of this product are exempted from special tax, the product itself is exempted from the barrel tax, and dealers therein are required to pay no special taxes. Field investigations are now under way and the matter of properly determining the status of such manufacturers and their product, and dealers therein, will be reopened and reheard.

TOBACCO.

The receipts from taxes on manufactured tobacco, snuff, cigars, and cigarettes for the fiscal year ended June 30, 1910, amounted to \$58,118,457.03, an increase of \$6,231,278.99. This increase was along

the entire line of tobacco products subject to taxation.

Under the tariff act of August 5, 1909, the rate of taxation of manufactured tobacco, snuff, cigarettes, and little cigars was considerably increased, effective July 1, 1910. New regulations and a complete new issue of stamps were gotten out in order to carry this legislation into effect.

On account of certain tax exemptions provided for under this act a new class of leaf-tobacco dealers was created who are permitted to sell leaf tobacco free of tax. Sufficient time has not yet elapsed to determine how this legislation will affect the receipts from the taxa-

tion of tobacco products.

During the past fiscal year there were no very important violations of law discovered among manufacturers of tobacco products, but there were a great many minor offenses, confined almost exclusively to small manufacturers of cigars and cigarettes. On account of the impossibility of accurately following and checking the use of individual stamps, detection of these offenses is very difficult. The bureau has now under consideration the adoption of some process, by perforation or otherwise, to properly identify the individual stamps so that their re-use can more easily be detected.

There were in operation during the calendar year 1909 (the latest information available) 22,912 cigar factories and 572 cigarette factories, this being an increase of 44 cigar factories and 21 cigarette

factories over the previous year.

PHILIPPINE TOBACCO PRODUCTS.

Under section 5 of the tariff act of August 5, 1909, and the opinion of the Attorney-General under date of November 12, 1909, the Bureau of Internal Revenue provided for the collection of internal-revenue taxes on the tobacco, cigars, and cigarettes imported into the United States from the Philippine Islands and accounting for such collections as a separate fund to be turned over to the government of the Philippine Islands. Under this act this bureau collected on tobacco products imported from the Philippine Islands, as a separate account to be turned over to the Philippine Islands treasury in accordance with the opinion of the Attorney-General, the sum of

\$265,171.80. Thirty-six thousand and sixty-six dollars and thirty-six cents of this sum was received by collectors of internal revenue in the United States, and \$229,105.44 from stamps sold through the regularly designated stamp agent in the Philippine Islands and affixed

there in order to facilitate shipments.

Complaints were received at this office from the tobacco trade generally, protesting against the use of an official label attached to tobacco products imported from the Philippine Islands, which label purported to be a government guarantee of the grade of cigars, the sanitary conditions of the factories where the same were made, and of the operatives producing such products. It was very difficult to convince the tobacco manufacturers of the country that the Treasury Department had no jurisdiction over this matter, but that it was a matter to be dealt with solely by the War Department and the insular government. In spite of all the publicity that has been possible to give to this fact, the receipt of complaints, oral and written, in regard to the use of this label, even in its modified form, is of very frequent occurrence.

SPECIAL EXCISE TAX ON CORPORATIONS.

Attention was called in the report for the fiscal year 1909 to the enactment of the special excise tax on corporations, found in paragraph 38 of the tariff act of August 5, 1909. The work of preparing and having printed the necessary forms, regulations, returns, etc., was completed in good time, and the necessary field and office work of listing the corporations, etc., was done in like manner throughout all the collection districts. Special commendation is due to the employees of this bureau engaged in this work, and to collectors and their forces throughout the country. The amount of detail work involved in the preparation for the first year's collection was very great, and employees of this bureau and collectors and their forces throughout the country worked in a most cheerful and enthusiastic manner day and night, Sundays and holidays included, in order to complete the work within the limits prescribed by the statute. comparative ease with which this tax has been collected is largely due to the thorough and conscientious manner in which this preparatory work was performed.

On the original lists there appeared the names of something over 400,000 corporations, but the records of many States had not been kept in such a manner as to show which companies had completed their organizations and which not, or which had subsequently gone out of business, and in many cases insufficient data was secured to show which corporations were exempted under the provisions of the statute. Upon final revision of the lists it was found that 262,490 corporations were liable to the provisions of this tax. The canvassing of districts by revenue officers, now in progress, may slightly

change these figures.

The total collections from this source to October 1, 1910, have been \$26,872,270.26, of which \$20,959,783.74 was collected during the

fiscal year 1910, and \$5,912,486.52 subsequent to that date.

Legal proceedings have been instituted against a small number of corporations which to this date have refused to file the proper return, or having filed the proper return refused to pay the assessment thereon. There was some delay on the part of corporations in making the returns, due to the belief on the part of some that Congress would take action looking to a postponement of the collection of the tax, and the further belief on the part of others that the failure of the Supreme Court to pass on the cases instituted to determine the constitutionality of the tax might in some way postpone collection. The penalties collected for the fiscal year on this account, approximating \$123,000, are therefore believed to be abnormal. Upon the whole, the tax has been collected with as little difficulty or friction as has been occasioned by the collection of any internal-revenue tax.

OLEOMARGARINE.

During the fiscal year ended June 30, 1910, there was produced 135,685,289 pounds of oleomargarine free from artificial coloration and 6,176,991 pounds of the product artificially colored, or a total of 141,862,282 pounds, as against a total of 92,282,815 pounds during the previous fiscal year, showing an increase of 49,112,775 pounds in the uncolored and 466,690 pounds in the colored, making a total increase of 49,579,465 pounds over the former year. The withdrawals tax paid amounted to 135,159,429 pounds of uncolored and 3,416,286 pounds of the colored product, or a total of 138,575,715 pounds, as against 89,497,278 pounds for the fiscal year ended June 30, 1909, being a total increase of 49,078,437 pounds over that year.

These figures show that the production and withdrawals taxpaid of oleomargarine during the fiscal year 1910 were the largest since the inception of the original law imposing a tax upon the regular sale and manufacture of this product. During the fiscal year 1902, the banner year under the old law, there was produced 126,316,427 pounds, and withdrawn taxpaid 123,126,636 pounds. From the revenue standpoint, however, the results for the past year are disappointing; the tax collected for the fiscal year 1910 amounting to \$689,856.42, an increase of only \$50,996.09 over the fiscal year 1909, while under the old law in 1902 there was collected on a smaller production the sum of \$2,462,532.72. The small increase in tax collections during the fiscal year 1910 as compared with those for the fiscal year 1909 is due to the decreased amount of oleomargarine taxpaid at the rate of 10 cents per pound.

Exports of the colored product showed an increase of 317,302 pounds, while there was a decrease of 15,383 pounds in the uncolored, or a net increase of 301,919 pounds in the exportations for the fiscal

year ended June 30, 1910, over the former year.

A great increase is shown in the number of retail dealers during the year, there having been issued 2,761 special-tax stamps covering the sale of the artificially colored and 42,029 for the sale of the uncolored product, making a total of 44,790 retail dealers as against a total of 25,040 for both classes during the fiscal year 1909.

During 1910, 40 wholesale dealers paid special tax to engage in the sale of colored oleomargarine and 577 for the uncolored, a total of 617, an increase of 213 dealers in these classes as compared with the

previous year.

There was no let up in the activity of officers in the field in detecting and investigating violations of this law, but it is probable that those discovered represent but a small portion of the offenses com-

mitted and remaining undetected. A total of 2,754 violations of the various sections of the law and regulations were reported, involving 166 cases of illicit manufacture or attempts to evade payment of the 10 cents per pound tax on the artificially colored product. There were 95 violations by wholesale dealers and 2,493 by retail dealers, consisting principally of failure to pay special taxes; packing contrary to law; failure to mark and brand the product sold; failure to destroy stamps on empty packages; and removal of stamps, marks, and brands from original packages. A large number of prosecutions have been instituted throughout the country. There have been some convictions and a number of indictments are pending at this time.

In addition to sentences of imprisonment in a number of cases, a total of \$80,428.53 was recovered through fines, compromises, and

assessments of special and stamp taxes.

Attention was called in the report of 1909 to the defects in the oleomargarine statutes as construed by the United States courts. The existence of these defects has been even more markedly demonstrated during the fiscal year just closed. It would appear that if this law is to be satisfactorily administered, either as a revenue measure or as a measure to protect the public in its purchases, remedial legislation is absolutely essential. Various representatives of the internal-revenue service attended the extended hearings before a committee of Congress at the last session and testified in detail as to the existing defects. It is respectfully requested that Congress be urged to pass at the present session a law which can be better enforced.

ADULTERATED BUTTER.

During the past fiscal year there were 133 cases reported against manufacturers of butter for putting adulterated butter, as defined by the act of May 9, 1902, on the market, and there were also 13 cases involving wholesale dealers and 43 cases involving retail dealers in these violations. There was collected from this source during the fiscal year 1910 the sum of \$37,350.70, as against a total of \$38,450.70 for the fiscal year 1909.

RENOVATED BUTTER.

There was a slight increase in the production of renovated butter during 1910 over that of 1909, and a small decrease in the withdrawals tax paid. Violations of the law relating to renovated butter were very few and of little consequence.

FILLED CHEESE.

A small increase is shown in the operations in filled cheese during the year 1910 as against the fiscal year 1909. All of the product manufactured and tax paid was exported from this country.

MIXED FLOUR.

Operations in mixed flour show an increase for the year ended June 30, 1910. As a revenue measure this law is of little value, the collections thereunder being practically nothing, but for the purpose of preventing adulteration of flour it has apparently been entirely suc-

cessful, as no violations of this character have been discovered. All the product manufactured, tax paid, and marketed as mixed flour consists of compounds or prepared blends of cereals for certain special culinary purposes and not for use as ordinary flour.

DENATURED ALCOHOL.

The withdrawal of distilled spirits free of tax for denaturation showed during the year a considerable increase, 10,598,749.2 gallons having been withdrawn for this purpose during the fiscal year 1910, as compared with 7,971,636.4 gallons for the fiscal year 1909. No industrial distilleries are in operation, however, and no considerable amount of denatured alcohol has been used for purposes other than in connection with certain lines of manufacturing. It appeared, therefore, unnecessary to keep up a separate organization for the supervision of this business, and Congress was requested to provide for a small number of employees on the regular roll, which was done, and the appropriation of \$200,000 per annum that had heretofore been made to carry on this work was not continued.

The use of denatured alcohol in manufacturing will, it is believed, continue to increase, and should manufacturers succeed in reducing the price of this product to a point where it can successfully compete with petroleum products its use would undoubtedly be enormously

extended.

CHEMISTRY.

The efficiency of the bureau in its work in connection with distilled spirits (including denatured alcohol), fermented liquors, oleomargarine, and various butter products, has been greatly improved by the extension of the work of the Division of Chemistry. During the year 7,670 samples from field officers were received and analyzed. In addition thereto, considerable experimental work in connection with distilled spirits, fermented liquors, wines, and other alcoholic beverages has been done, particular attention having been paid to analyses of patent medicines and preparations containing alcohol to determine whether or not such preparations are sufficiently medicated to render them unfit for beverages.

The chemists employed in this bureau are called upon as witnesses in United States courts in all parts of the country to testify for the Government as chemical experts, and district attorneys generally throughout the country have spoken in very commendatory terms

of their service in this regard.

CLAIMS.

During the fiscal year ended June 30, 1910, there were received 6,901 claims of all kinds, aggregating in value \$1,837,743.90. During the same period 6,023 claims were acted upon, leaving pending July 1, 1910, 2,226 claims, the greater part of which are held awaiting evidence or completion in other respects, or are held pending decision of the Supreme Court on questions of law involved.

There were on hand at the close of the fiscal year 1910, 842 claims for the refunding of legacy taxes, amounting to \$4,677,915.31. Practically all of these were held awaiting decisions of the Supreme

65872°—FI 1910——30

Court under the principles of law announced in Tilghman v. Eidman and Union Trust v. Westus & Allen.

No legacy claims have been allowed except for the refunding of taxes upon remainder interest falling clearly under the decision of the Supreme Court in the *Vanderbilt case*. The allowance in this class of cases amounted to but \$65,692, covering in whole or part 61 claims, the rejected balances of which amounted to \$65,000. In addition thereto there were 35 claims rejected in toto, amounting in round numbers to about \$80,000.

All legacy tax claims now pending are held for final decisions of the Supreme Court, interpreting the principles announced in the

cases aforesaid.

Claims pending under the Tilghman doctrine, not barred by the statute of limitation, amount to \$1,137,580. These claims will all be disposed of favorably to the Government in accordance with the decision of the Supreme Court in Hertz v. Woodman, decided May 31, 1910. The remainder of legacy tax claims are held awaiting a decision of the Supreme Court as to the legality of tax on estates for life and years, which decision is expected sometime during present fiscal year. These claims aggregate a little more than \$2,700,000.

There have been received in connection with the special excise tax on corporations, imposed by section 38 of the act of August 5, 1909, 2,022 claims for abatement of the assessment and 782 claims for refunding amounts paid. Up to October 1, 1910, 1,856 abatement claims had been acted upon, leaving 236 to be considered, and 665 refunding claims had been acted upon, leaving outstanding 117.

LAW DIVISION.

On July 1, 1909, there were pending 303 civil cases and 4,376 criminal cases growing out of internal-revenue laws. During the year there were instituted 100 civil and 4,019 criminal proceedings. On June 30, 1910, there were pending 255 civil and 4,040 criminal cases, 148 civil and 4,355 criminal cases having been disposed of. In addition to the court cases handled, numerous reports of violations from officers in the field were received and examined and during the fiscal year 1910 5,180 compromise cases growing out of such violations in this or previous years were acted upon.

The total number of seizures reported during the last fiscal year

was 3,184, as compared with 2,725 during the year previous.

The number of cases of destruction of stills and distilling apparatus reported for the six months ended June 30, 1910, was 1,061, as compared with 721 for the previous six months. Most of these cases were in the States of Georgia, Alabama, and North and South Carolina.

All of the various legacy-tax cases growing out of the War Revenue Act of 1898 have now been decided, except those cases involving the question of the legality of the tax on estates for life and years. A test case is now pending in the Supreme Court and an early decision is hoped for.

A new compilation of the internal-revenue laws is in course of

preparation and will be isued as soon as practicable.

STAMPS.

During the fiscal year 1910, 3,166,987,749 internal-revenue stamps of the value of \$290,337,675.70 were delivered to collectors of internal revenue. This was an increase of 17 per cent in number and upward of 10 per cent in value, as compared with the previous fiscal

year.

This increase was in a degree due to the changes in the rate of tax on tobacco, snuff, and cigarettes under the act of August 5, 1909, effective July 1, 1910, which resulted in large shipments during the months of June and July of stamps of both the old and new series of the classes affected. This act increased the rate of tax on tobacco and snuff from 6 cents per pound to 8 cents per pound. It also made a rate of \$1.25 per thousand on cigarettes in lieu of the 54 cents and \$1.08 tax formerly levied and increased the rate on large cigarettes from \$3 to \$3.60 per thousand. The tax on small cigars was fixed at 75 cents per thousand instead of 54 cents.

The new law also increased the number of denominations of tobacco stamps from 9 to 22 and of snuff stamps from 11 to 22 and authorized stamps for fives and tens cigars \$3 per thousand and stamps for fives, eights, and fifteens cigarettes and small cigars. The 13 and 33 ounce packages for tobacco and snuff were discontinued, and the stamps for those classes now progress by one-quarter ounces, running from one-half to 16 ounces, the fractional ounces stopping at 33-ounce

stamps.

Under an agreement entered into by the Secretary of the Treasury and the Postmaster-General the Internal-Revenue Bureau is now forwarding all its stamps in registry pouches direct from the stamp vault to the various collectors and stamp deputy collectors of internal revenue throughout the country, covering some 116 points of destination. While this service has entailed additional labor, not only upon this bureau but in the collectors' offices, the work has been done in a thoroughly satisfactory manner and will no doubt prove to be a step in the line of wise and economical administration. During the first three months of the fiscal year 1911, 39,155 packages of stamps, averaging approximately 16 pounds to the package, were thus forwarded by registered mail. This was an increase of 4,933 packages over the corresponding period of the fiscal year 1910.

REVENUE AGENTS.

The activity of the revenue agents and other officers in the field during the past fiscal year is worthy of high commendation. There were reported during the fiscal year 5,100 violations of internal-revenue laws, as compared with 4,039 violations in the year before, and the total number of seizures reported during the past fiscal year was 3,184, as compared with 2,725 during the year previous.

ILLICIT DISTILLING.

All of the agents force available for raiding has been used during the year in detecting illicit distilling, which practice has increased steadily, especially in those states where state-wide prohibitory laws have been enacted. During the fiscal year 1910 there were seized and destroyed 1,911 distilleries, as compared with 1,743 for the fiscal year 1909. In raiding these distilleries last year one officer was killed, 3 seriously wounded, and there were a number of minor casualties. Most cases of illicit distilling are found in the states of Alabama, Georgia, North and South Carolina.

RECOMMENDATIONS.

(1) Considerable complaint has been received from the collectors and officers of internal revenue throughout the country on account of the fact that their compensation is not as great as that received by officials holding similar positions in the customs service or in the postal service. An examination would indicate that this complaint is well founded. It is recommended that a careful investigation be made of this matter and, if found to be correct, that Congress should be asked to reclassify the salaries of collectors so that a collector of internal revenue whose receipts exceed \$1,000,000 should be paid \$6,000; that the minimum salary paid a collector be \$3,000; that all fees and allowances for territorial extent or otherwise be abolished, and that the salaries for collectors ranging between the minimum and maximum be based on the same proportionate scale in accordance with the scale of collectors as at present.

It is recommended that the chief deputy in each collector's office be paid an amount not to exceed 50 per cent of the amount received by the collector. It is recommended that the cashier in the office of each collector be paid an annual compensation not to exceed 40 per cent of the amount received by the collector. The lack of a fixedscale of compensation in offices of these grades is a source of annoyance and is believed to be detrimental to the best interests of the

service.

OTHER THAN TAX-PAID SPIRIT STAMPS.

(2) Enormous quantities of stamps are used by rectifiers, whole-sale liquor dealers, and distillers for which no charge whatever is made. In addition to furnishing the stamps free of cost, the Government assumes all the expense of their transportation and distribution, the gauging and stamping of rectifiers' packages, and the issue, recording, and handling of wholesale liquor dealers' and transfer stamps. The actual cost to the Government in connection with these classes of stamps is no inconsiderable item. Attention has been called in previous reports of this bureau to this burden placed on the Government, and recommendations have been made for legislation requiring the payment of a small sum per stamp by the users of the same, sufficient at least to meet the cost of printing, handling, and affixing, and the gauging of spirits at rectifying establishments. After a careful examination of the matter I am of the opinion that a charge of 10 cents each would be sufficient to meet these expenses and leave a small margin in excess.

By reference to the annual report for 1905 the statement will be found which shows the relative number of these classes of stamps used at that time, and it is safe to say that the number being used at this time is largely in excess of that for 1905. I therefore recom-

mend that legislation be requested placing a charge of 10 cents each

on stamps for distilled spirits other than tax paid.

(3) Attention has heretofore been called to the difficulty in administration of the oleomargarine law owing to defects in the statute, and especially the impossibility of the enforcement of the collection of the dual rate of tax.

To remedy existing evils developed in attempts to enforce the provisions of the act of August 2, 1886, as amended by the act of May 9, 1902, it is recommended that legislation be requested for the enactment of a law taxing oleomargarine at a single rate. It is practically impossible to collect the higher rate of 10 cents per pound when oleomargarine of a different class is taxed at one-fourth cent per pound. The inducement for fraud in the classification of the

product results in great loss to the Government.

(4) Under existing law internal-revenue agents are not empowered to administer oaths. In the execution of their duties it is often necessary to procure sworn statements of individuals for use as evidence in the prosecution of frauds. Not being authorized to administer oaths, the revenue agent must call for the services of a deputy collector of internal revenue, or take the person before some other officer endowed with power to administer oaths. This process causes loss of time and expense, and frequently defeats the purposes of the investigation.

I would therefore recommend that Congress be requested to amend section 3165, Revised Statutes, so as to include revenue agents and inspectors among the officers authorized to administer oaths in mat-

ters relating to the execution of internal-revenue laws.

(5) Outage or wantage.—Section 50, act August 28, 1894, as amended, contains a tabulated statement known as the Carlisle tables, setting forth the maximum amount at various ages that can be allowed on any package of distilled spirits held in bond. The records of this office show that the amounts allowed are not in accord with the actual wantage due to evaporation in warehouses under modern methods of aging spirits. Due largely to this statement of facts, the offense of equalization has been very prevalent. I am of opinion that that section should be revised and amended and a new table of allowances compiled in accordance with the actual losses sustained by evaporation or causes without the neglect of the owner of the spirits, as disclosed by the records of the past fifteen years.

(6) Substitute officers.—Under section 3153, as amended by act August 15, 1876, storekeepers, storekeeper-gaugers, and gaugers are appointed in accordance with civil service regulations by the Secretary of the Treasury upon the recommendation of the collector of the district in which they are to be employed. The number of these officers needed in each district in which distilling and warehousing of distilled spirits is done, fluctuates considerably. Under section 1, act March 3, 1885 (appropriation act for 1886), a collector is authorized to carry on his roll surplus officers not to exceed 15 per cent of the number employed. Owing to the necessity for this excess of officers and the regulation of this department that the work shall be distributed among all the officers as equitably as possible, and of the further fact that these officers are paid on a per diem basis only when under actual assignment, it is very difficult for a collector to avoid in

some cases working hardship and laying himself open to the charge of injustice or partiality in making assignments or continuing particular officers at work for longer periods than other officers. To avoid this trouble in the future, I have the honor to recommend that the method of employing these officers be changed so that instead of being appointed a storekeeper, storekeeper-gauger, or gauger, the officer shall first be appointed a substitute, and no more regular officers be appointed until the number of officers in each district shall have been reduced to the needs of the service, and that all temporary or emergency work be performed by such substitute officers. In this way the complaints of injustice and partiality will be largely avoided, the officers will become experienced in their duties before being put on regular assignments, and a collector will have opportunity to weed out persons who will not become efficient. I am of opinion that the change suggested is badly needed, and I have the honor to request that the necessary legislation be recommended for enactment.

Respectfully,

ROYAL E. CABELL, Commissioner of Internal Revenue.

Hon. Franklin MacVeagh, Secretary of the Treasury.

Note.—For details of the report of the Commissioner of Internal Revenue, see his annual report.
