# ANNUAL REPORT ON THE FINANCES.

TREASURY DEPARTMENT, Washington, December 1, 1913.

SIR: The Secretary of the Treasury has the honor to make the following report:

### FINANCIAL AID TO DAYTON, OHIO.

In the latter part of March, 1913, a great storm swept over the Ohio Valley, causing disastrous floods, from which the city of Dayton, Ohio, became a special sufferer. So serious were the losses, that, as the waters began to recede, the banks in that city were afraid to reopen their doors because of the temporary impairment of confidence—subsequently happily dissipated—in the recuperative powers of the city and in the ability of the banks to meet the extraordinary demands which might be made upon them.

On the 4th of April, 1913, a telegram was received from the chairman of the Citizens' Relief Committee, asking that a representative of the Department "be sent right away to see about financing our banking institutions," etc. A national-bank examiner was immediately dispatched to Dayton, and within twenty-four hours after his arrival, and upon his recommendation, the Department designated every national bank in the city of Dayton as a Government depositary, and announced that it would deposit in said national banks \$2,000,000 of Government funds, to be secured by State, municipal, or other local bonds acceptable to the Secretary of the Treasury. The effect of this action was to restore confidence at once. The banks reopened their doors, and instead of the anticipated need of \$2,000,000, the Treasury was called on for only \$182,000.

#### \$500,000,000 EMERGENCY CURRENCY ANNOUNCEMENT.

A special session of Congress convened on April 7, 1913, and immediately began to consider the important questions of tariff and currency reform. The vast economic changes involved in these two important questions had the natural effect of causing in many quarters apprehension as to the possible effects of the anticipated legislation. A feeling of unrest began to pervade business circles. This

16726°—FI 1913—1

Digitized for FRASER http://fraser.stlouisfed.org/ Federal Reserve Bank of St. Louis 1

was accentuated by a certain propaganda of pessimism which, whether designedly or not, produced a condition of extreme nervousness and tension. In the early part of June this assumed a serious aspect. Complaints began to reach the Department from many parts of the country that credits were being restricted, and that it was increasingly difficult to secure funds for the normal needs of legitimate business. To what extent these reports were justified there was no exact means of ascertaining, but the general conditions indicated a more or less acute state of affairs. In order to relieve anxiety and to let the business interests of the country understand that there was no occasion for unreasonable restriction of credits, and to destroy apprehension based upon unjustifiable fears, and to assure the country that the means were at hand to cope successfully with any situation that might arise, the Secretary announced that there was actually on hand in the Treasury and ready for immediate delivery to any and every bank complying with the requirements of the law, five hundred million dollars (\$500,000,000) in new national-bank note currency, which the Secretary said he would not hesitate to issue under the provisions of the Aldrich-Vreeland Act of May 30, 1908, to banks making application therefor in accordance with the terms of that act. The relief occasioned by this announcement was instantaneous. Confidence of the banks in their ability to meet the demands of their customers was largely restored and the unfavorable symptoms promptly disappeared. So completely effective was this action that none of the five hundred million dollars (\$500,000,000) of currency was applied for by the banks.

#### CROP-MOVING DEPOSITS.

Toward the latter part of July symptoms of uneasiness began to reappear. There was much talk about the difficulty of moving the fall crops and the annual apprehension on this score began to stalk about the country with more than usual vigor. It is a characteristic of our imperfect and unsatisfactory banking system that the very prosperity of the country becomes, at times, a menace, because of the apprehended inability of the banks to meet the seasonal demand for the large amounts of money required to move a bounteous harvest. Conditions were again becoming acute when the Secretary determined to deposit from twenty-five millions to fifty millions of dollars of Government funds in the national banks in those parts of the country where the necessity for funds to move the crops existed. The Secretary announced that, as security for such deposits, highclass commercial paper would be accepted at 65 per cent of its face value, bearing the indorsement of the depositary bank. This was an unprecedented step, because commercial paper had never before been accepted as security for Government deposits. It was, however, a necessary and highly beneficial step, because it enabled the banks to obtain the required funds upon the pledge of available paper already in their vaults. If the banks had been obliged to secure these deposits with Government bonds or other fixed investments, the relief would not have been effective, because many of the banks would have been compelled to use the deposits for the purchase of the bonds required by the Government as security.

In order to distribute intelligently the crop-moving deposits, three conventions of bankers were held at the Treasury Department in Washington during August, 1913, the first composed of bankers from the South and Southwestern States; the second composed of bankers from the Middle Western and Northwestern States; the third composed of bankers from the Pacific Coast and Rocky Mountain States. It was not necessary to extend aid to the Eastern States, although the Department was ready to do so if it had been required.

It was essential that the action of the Department should be nonpartisan and nonpolitical; the crops of Republicans, Democrats, Progressives, and all other classes of the people, had to be moved, and the earnest desire of the Department was to have the benefits of this action diffused as widely and impartially as possible. The clearing-house associations in each of the cities invited to participate in the conferences were asked, therefore, to name the delegates. A most interesting and intelligent body of men assembled in Washington and discussed with the Secretary and Assistant Secretary Williams (in charge of the fiscal bureaus) the needs of their several communities and sections. As a result, allotment of these funds was made upon the basis of the testimony of their several representatives, as follows:

South and Southwest	\$22, 550, 000	
Middle and Northwest	19,000,000	
Pacific Coast and Rocky Mountain	4, 950, 000	۰.
Total	46, 500, 000	;

The Department, having no machinery for the investigation of local credits, was obliged to rely upon the banks in the larger cities as instrumentalities for the distribution of Government funds to the banks in the smaller communities. In the discussions at Washington, the representatives of the banks were urged to pass the Government funds on to their country correspondents upon reasonable terms. The Secretary is gratified to be able to say that in most instances this was done upon a basis that seemed fair to all concerned.

The effect of this action was highly beneficial. Confidence was restored. The readiness of the Government to meet every reasonable need of the banks for the legitimate purposes of crop moving had the happy effect, so the Department is informed, of causing much hoarded money to be deposited in the banks. This increased their ability to take care of their customers, and caused a decided relaxation in the demands of country correspondents for accommodation, which, prior to the announcement of the Secretary, had been much greater than usual, because the small banks were attempting, very naturally, to impound all the funds they could get to make them safe against the anticipated stringency. The moment it became known that the Government stood ready to assist, the tension was relieved, business resumed a normal aspect, and the fall movement of crops, trade, and commerce proceeded upon an easier and safer basis than for many years past.

It is interesting to note that of the fifty million dollars which the Department offered to place in the banks for crop-moving purposes, only \$34,661,000 had been called for up to November 25, 1913. These funds will be gradually repaid to the Treasury beginning in January, 1914.

#### CURRENCY LEGISLATION.

The psychological and practical value of these incidents can not be overestimated. They demonstrate clearly that any improvement in our financial system which will permanently establish confidence will in itself be an immense gain, and if that improved financial system assures the opportunity to secure at all times the necessary funds and credits to meet the expanding and legitimate needs of the commerce and industry of the country, it will be an achievement of enduring benefit.

These incidents also show conclusively the enormous value of an altruistic governmental agency in the financial affairs of the country. So long as the Government has the power to intervene in a beneficent and unselfish way, the danger of panics and of unjust practices will be largely, if not wholly, destroyed. This is one of the chief objects sought in the proposed reformation and reorganization of our banking and currency system. The people of the country are to be congratulated upon the early prospect of sound legislation on this vitally important subject. Should the Congress enact the fundamentals of the pending measure, it is believed that permanent protection will be provided against recurring commercial crises and that adequate facilities will be created for that legitimate and sound expansion of credits so vital to the prosperity of our great and growing country.

It has been, and will continue to be, the policy and purpose of the Secretary to exercise all the powers of the Department for the protection of the public and the legitimate business interests of the country.

#### SECRETARY OF THE TREASURY.

#### INTEREST ON GOVERNMENT DEPOSITS.

Prior to 1908 interest had never been required on Government deposits. After the act of 1908 interest at the rate of 1 per cent per annum was collected on so-called "inactive accounts" in national banks. By "inactive accounts" is meant a special deposit (usually \$1,000) which remains fixed or stationary in amount. The aggregate of such accounts on the 1st day of June, 1913, was \$1,286,500, and the entire amount of interest collected by the Government thereon during the preceding period of about five years was approximately \$715,000.

On April 30, 1913, the Secretary announced that beginning June 1, 1913, all Government depositaries, active as well as inactive, would be required to pay interest at the rate of 2 per cent per annum on Government funds. Only 9 of the total number of national banks holding Government deposits refused to pay interest under the new regulation.

Hundreds of applications were received from other banks seeking Government deposits on the new terms, many of which were granted. The Government has not had the slightest difficulty in placing its deposits at 2 per cent interest.

On the 1st of November, 1913, the total amount of Government funds on deposit in national banks was reported at \$98,334,917.36, which, if this average balance should be retained, would add to the net revenues of the Government approximately two million dollars (\$2,000,000) per annum.

A careful calculation has been made of the amount of public money on deposit in national banks throughout the country for the 16 years preceding the 4th of March, 1913, namely, from 1897 to 1913, and it has been found that if the present policy of charging 2 per cent interest on such deposits had been established in 1897, the Government would have received during that 16-year period **a** total of about \$30,610,381.

#### INCOME TAX.

The passage of the income-tax law on the 3d of October, 1913, placed new duties and great responsibilities on the Treasury Department. This law went into effect immediately with the proviso that collections at the source should begin on the 1st day of November, 1913. Only 28 days, therefore, were allowed the Department within which to prepare regulations covering the collection of the tax at the source. Many intricate and difficult problems are involved in the initiation of a new law so far-reaching in its effects and so complicated in its operations. The Department, however, took vigorous hold of the matter, and on October 25 issued the first of the series of

necessary regulations, namely, those governing the collection of the tax, at the source, on coupon and registered interest payments on bonded debts of corporations, etc. Supplementary regulations are being issued from time to time, relating to other features and phases of the law. The additional organization required for the administration of this law is being created as rapidly as possible. A certain amount of confusion and inconvenience at the beginning is unavoidable, but every effort of the Department will be exerted fairly and justly to interpret, elucidate, and administer the law in a reasonable spirit.

It is estimated that there are 425,000 individuals subject to the income tax. The number of corporations making returns to the Department for the calendar year 1912 was 305,336, but of these, 244,220 claimed no income or a net income of less than \$5,000 and were, therefore, not subject to taxation. Under the new law, all corporations having any net earnings whatever are subject to the payment of an income tax, whether their earnings be more or less than \$5,000. It is expected, therefore, that approximately 150,000 corporations which have heretofore been exempt will now be required to pay an income tax.

#### CUSTOMS SERVICE.

The principal achievement of the Customs Service in the fiscal year 1913 was the reorganization of that service under the Executive order dated March 3, 1913, in pursuance of the authority granted in the act of Congress approved April 23, 1912.

Prior to this reorganization there were 126 customs districts and 38 independent ports. The limits of many districts were not clearly defined, and some of the districts overlapped, while large portions of territory were not included within any customs district. By the reorganization, the entire country was included in 49 customs districts, each with clearly defined limits, and all ports were included in one or another of these districts and subjected to the control and supervision of the collector appointed for the district.

The system of compensating collectors of customs through fees, storage charges, and other emoluments was abolished, and all collectors were placed on a salary basis payable by the Government, all fees collected being required to be deposited and accounted for to the credit of the United States.

By the reorganization, the right of certain collectors of customs to sell blank forms at 10 cents each, solely for their own account and benefit, was taken away. Prior to the reorganization, those having business with the customhouses where this practice was permitted

found it expedient to purchase their forms from collectors at a price ten or more times their actual value. Such forms are, under the reorganization, being sold at 1 cent each, and the proceeds are deposited to the credit of the Treasury.

The reorganization as it actually went into effect on July 1, 1913, was, on a basis of expense, \$356,000 annually less than the prior organization.

During the latter part of the fiscal year 1913, when revision of the tariff was under consideration by Congress, this Department closely followed the legislation as formulated, in order to be in the best position properly to administer the law when enacted, and cooperated with the various committees of Congress by furnishing such expert advice as it was able to command through its various officers and employees familiar with tariff legislation and the administration of the customs laws.

The tariff act, materially reducing the rates of duty, went into effect on October 4, 1913, without any delays or inconvenience to business, other than the slight delay occasioned by the large volume of warehouse withdrawals, due to the congestion of merchandise which had been stored in bonded warehouses pending the passage of the new act, and the natural rush to withdraw the same immediately after the act became effective. While the new act will be simpler of application than the act of 1909, the present indications are that the volume of imports will largely increase, and that the change from specific to ad valorem rates will require considerable adjustment in the customs force to meet the new conditions. The measure has not been in force for a sufficient length of time to make possible an accurate estimate of its ultimate revenue-producing powers.

#### Convention of customs collectors.

In view of the reorganization and consolidation of the customs service, and of the new tariff act, it seemed advisable to call a convention of the collectors of customs in all parts of the country, including Hawaii and Porto Rico, for the purpose of devising new methods for increasing efficiency, reducing expenses, and eliminating useless and unnecessary processes, as well as to diffuse a uniform and common understanding of the requirements of the new law, to reimpress collectors of customs with the importance of their duties, and to establish more effective means of cooperation in the common work. This convention, the first of its kind ever held, was eminently successful. The interchange of views, and the consideration of the problems involved, will result in the elimination of useless efforts, a

saving in expenditures, and the standardizing of the work and rates of compensation paid for similar services at the various ports of entry.

#### CHANGE IN THE MANNER OF HANDLING AND DISBURSING PUBLIC FUNDS.

On the 9th of January, 1913, former Secretary MacVeagh issued Department Circular No. 5, which inaugurated a radical change in the manner of handling and disbursing the public funds. The objects to be accomplished were announced as follows:

For the purpose of bringing the ordinary fiscal transactions of the Federal Government more nearly into harmony with present business practices, it has been determined that the daily receipts of the Government shall be placed with the national-bank depositaries to the credit of the Treasurer of the United States. Disbursements will be made by warrant or check drawn on the Treasurer, but payable by national-bank depositaries, as well as by the Treasurer and subtreasuries.

The new system of accounting went into operation on February 1, 1913, and, as usual in such changes, complications, confusion, and delays attended its introduction, causing some embarrassment, but gradually the difficulties at first encountered are disappearing, and the system appears to respond to the public requirements, and to be accomplishing the purposes for which it was devised.

#### PUBLIC HEALTH SERVICE.

The attention of the Congress is invited to the report of the Surgeon General upon the operations of the Public Health Service. The importance of this service can not be overestimated. It is daily growing in usefulness. Through the Public Health Service we are securing real conservation of our human resources, the first of all of our natural resources. Conservation of our material natural resources will be enhanced and simplified if conservation of our human natural resources is of the right sort. A vigorous, virile, and healthful race is of superlative importance. By a wise enlargement of the functions and a rational extension of the facilities of the Public Health Service through constantly generous, but not prodigal, appropriations this vital end may be achieved.

#### NEW REVENUE CUTTERS.

The Congress is respectfully urged to grant the necessary authority and appropriation for the prompt construction of four new revenue cutters. The service is being seriously crippled for lack of these ships. The necessity for them is imperative.

Digitized for FRASER http://fraser.stlouisfed.org/

#### COAST GUARD.

Suggestions frequently have been made for the consolidation of the Revenue-Cutter Service and the Life-Saving Service into one organization, to be known as the "Coast Guard," for the purpose of increasing the efficiency of these two kindred branches of the Government, each of which is engaged in highly important humanitarian work in time of peace. The Life-Saving Service will by this means secure a military status and will become a first naval reserve in time of war. Attention is invited to the remarks of the Captain Commandant of the Revenue-Cutter Service on this subject, which are incorporated in the abstracts of reports of bureaus and divisions attached to this report. The Secretary is of the firm belief that the organization of a Coast Guard, as proposed, would be a wise act and constructive administration of the best sort. Unless this is done the personnel of the Life-Saving Service will deteriorate, and there will be increasing difficulty in maintaining the service at a reasonable point of efficiency. The humanitarian achievements alone of the combined Revenue-Cutter and Life-Saving Services, as evidenced by 4,423 human lives rescued from peril in the year 1913, justifies, if it does not require, the earnest and powerful support of the Congress. On the material side, the amount of property saved, or to which assistance was rendered, in the year 1913 alone, was \$16,659,545. Material considerations combine with the humanitarian to emphasize the necessity for maintaining and improving this splendid service-a service unapproached in its unique and useful functions by that of any other nation in the world.

#### ICE PATROL.

During the months of April, May, and June last, the ice region in the North Atlantic Ocean was patrolled by the revenue cutters *Seneca* and *Miami*, and warnings of the location of dangerous icebergs and floes were sent out by radio to the east and west bound trans-Atlantic steamships. The duty was performed at the urgent solicitation of the maritime associations at the principal seaports on the Atlantic Coast. It is now nearly two years since the loss of the *Titanic*, and during both ice seasons since that lamentable affair the patrol has been maintained practically by the United States Government alone.

This patrol should be discontinued, and the important maritime nations should unite in defining lanes of travel across the North Atlantic, so as to avoid all danger of icebergs during the months of April, May, and June of each year, and compel the steamship companies to observe them. This would result in increasing, to some

extent, the time of ocean passage during these three months, but it would, on the other hand, insure immunity from the dangers of icebergs during this season. The steamship companies should not be permitted to jeopardize needlessly human life for the purpose of shortening the trans-Atlantic journey by a few hours and saving a comparatively few dollars; but if they are, then they should be compelled to maintain an effective ice patrol at their own cost. Failing this, it would appear equitable that each of the maritime nations concerned should, in the future, perform its share of this duty if it be determined to maintain this patrol. This matter is to be brought to the attention of the International Conference on Safety at Sea, now in session at London, by the American delegate representing this Department.

#### SAVING OF LIFE AND PROPERTY ON INTERIOR NAVIGABLE RIVERS AND WATERS.

The annual overflowing of the Ohio and Mississippi Rivers and their tributaries, the great loss of life and property incident thereto, and the necessity, as evidenced last year, of sending from the Great Lakes and the Atlantic ports skilled men and life-saving apparatus to aid in saving lives in the inundated regions, present a legitimate field for the operations of the Revenue-Cutter Service. Three typical light-draft river steamers should be constructed and equipped as revenue cutters; each of these craft provided with not less than 4 powerful motor lifeboats, and with such other life-saving appliances as may be necessary for work along the rivers. During the flood seasons, these cutters should be directed to follow the crest of the flood from Pittsburgh down to the mouth of the Mississippi, and there is but little doubt that their services would be of great value in rescuing lives and property, and in distributing food and clothing to marooned people. During flood times surgeons could be detailed to the cutters to render medical aid where needed. When floods are not raging, the 3 cutters could be very efficiently used in patrol of these inland waters for the enforcement of the navigation and motor-boat laws, and in rendering aid to vessels in distress.

Headquarters should be established at Louisville or Cincinnati on the Ohio, at St. Louis on the Upper Mississippi, and at Helena, Ark., or Vicksburg, Miss., on the Lower Mississippi.

Cutters of this type can be constructed and properly equipped for \$80,000 each, or a total of \$240,000 for the three. The annual cost of maintenance would be approximately \$80,000 for the 3 cutters, a small sum to expend for the saving of life and property when compared with the vast sums annually lost through these floods.

#### PANAMA CANAL.

Transactions in the finances of the Government during the fiscal year favored the maintenance of an adequate working balance in the Treasury, and it was therefore unnecessary to sell additional bonds for the construction of the Panama Canal. Expenditures on the waterway during the year, amounting to \$41,741,258.03, were paid out of the general fund of the Treasury. The total net balance so expended from the general fund to June 30, 1913, reimbursable from the proceeds of bonds not yet sold, was \$179,627,617.07.

#### PUBLIC BUILDINGS COMMISSION.

The public buildings act, approved March 4, 1913, provided for a commission, with the Secretary of the Treasury as chairman, which shall "present to Congress a connected scheme, involving annual appropriations for the construction and completion of public buildings heretofore authorized within a reasonable time, and shall frame a standard or standards by which the size and cost of public buildings shall, as far as practicable, be determined, and shall report as to the adaptability in size, accommodations, and cost of buildings hitherto authorized to the requirements of the communities in which they are to be located, and also whether the existing appropriations should be increased or diminished to meet such requirements."

This commission has been organized and its work is well under way. A careful and thorough investigation of this important subject, in all of its phases, has been undertaken, and promises to produce excellent results. The report of the commission will, if possible, be transmitted to the Congress before the close of the fiscal year.

#### CENTRAL HEATING AND POWER PLANT.

The sundry civil act, approved June 23, 1913, authorizes the construction of a central heating and power plant and places the direction of this very important project in the hands of this Department. This plant will furnish heat, light, and power for the old and new buildings of the Bureau of Engraving and Printing, the buildings of the Department of Agriculture, the Treasury Building, the White House and the buildings on its grounds, the State, War and Navy Building, the Winder Building, the Mills Building, the Court of Claims Building, the new and old buildings for the National Museum, the Smithsonian Building, the Army Medical Museum Building, the Fish Commission Building, the Washington Monument, the District Building, the Post Office Department Building, and the buildings,

when constructed, for the Departments of State, Justice, Commerce, and Labor.

At the time this plant is completed, it will undoubtedly be required to serve the new Interior Department office building authorized to be constructed on the site at Eighteenth and F Streets, the Lincoln Memorial, and any similar buildings or structures which may be authorized in the interim.

The Department is now preparing to carry into effect the provisions of the existing legislation and arrange for the construction of this plant.

#### CONTINGENT FUND.

The "Contingent fund for the Secretary of the Treasury" for the current fiscal year is \$20,000. This sum is wholly inadequate to do the effective work which can and ought to be done in the public interest. The activities of the Treasury Department are so great and varied, and are increasing so much with the rapid growth of the country and with the new duties and responsibilities imposed upon the Department—such, for instance, as the new income-tax law that the Secretary should at all times have a sufficient fund to enable him to make effective investigations in any part of the country that will enable him to improve the administrative methods of the Department, to eradicate abuses, and to protect the public interest. It is earnestly hoped that the Congress will grant an appropriation of \$50,000 for the contingent fund.

#### FINANCES.

The following statements showing receipts, disbursements, estimates, and the condition of the Treasury are submitted:

#### RECEIPTS AND DISBURSEMENTS.

Fiscal year 1913.

The receipts and disbursements of the Government during the fiscal year ended June 30, 1913, were as follows:

(See details on pp. 18 to 23.)

#### GENERAL FUND.

#### POSTAL SERVICE.

Exclusive of Post Office Department proper, which is included in "civil establishment."

ŝ	Postal revenue receipts Postal service paid from postal revenues of the year	\$266, 619, 525. 65 262, 108, 874. <b>74</b>
	Excess of postal receipts	4, 510, 650. 91
	Grants from the Treasury were made during the year for deficien- cies in the postal revenues of prior years amounting to	1, 027, 368. 79
	= United States Notes (Gre <b>e</b> nbacks).	

Issues to replace worn and mutilated notes	163, 000, 000. 00
Worn and mutilated notes retired	163, 000, 000. 00

The redemptions during the year of the notes unfit for circulation necessitated the issue of a like amount thereof to maintain the outstanding aggregate of the notes as required by law.

#### GOLD RESERVE FUND.

Balance in reserve fund June 30, 1912	\$150, 000, 000. 00
Balance in reserve fund June 30, 1913	150, 000, 000. 00

The redemptions of notes for gold from the reserve fund during the year were: United States notes, \$67,850,957, and Treasury notes of 1890, \$67,830, a total of \$67,918,787.

As the redeemed notes were exchanged each day for gold in the general fund, the reserve was maintained at the fixed sum of \$150,000,000 required by law.

#### TRUST FUNDS.

Reserved against outstanding gold and silver certificates and Treasury notes of 1890. Issues:

Gold certificates issued Silver certificates issued		
Total set aside in trust funds	•••••	\$872, 682, 000. 00
Redemptions:	407 0 40 000 00

#### ESTIMATES.

The ordinary receipts for the fiscal year 1914 are estimated at \$736,000,000 and the ordinary disbursements at \$701,900,000, showing an estimated surplus of ordinary receipts over ordinary disbursements of \$34,100,000 for the year ending June 30, 1914. Payments which may be made for the Panama Canal during the year from the general fund, in the estimated sum of \$41,000,000, would, however, absorb the excess of ordinary receipts and show an excess of disbursements of \$6,900,000.

With a new tariff and income tax law in operation under the act of Congress approved October 3, 1913, it is evident that the annual revenues to be received under its provisions can not be approximated for the fiscal year ending June 30, 1915, as closely as would be the case if comparisons could be made with the operations of this law for three-quarters of a preceding year. However, it is estimated that, for the fiscal year 1915, the ordinary receipts of the Government will be \$728,000,000.

The estimates for the ordinary and extraordinary appropriations for 1915 payable from the general fund of the Treasury, as submitted by the several executive departments and offices, are \$714,684,675.02, which would indicate on the basis of estimated receipts an excess of ordinary receipts over ordinary expenditures of \$13,315,324.98, but as the appropriations for public works can not be expended in full during the year, it is estimated that the charge upon the general fund for 1915 for ordinary purposes will not exceed \$702,000,000, and that the ordinary receipts will therefore probably exceed the ordinary expenditures by the sum of \$26,000,000.

The estimated expenditures for the Panama Canal to be paid from the general fund without sales of bonds are estimated at \$26,326,985, and the excess of ordinary receipts should therefore practically meet the payments which may be made for the canal under the appropriations as submitted for the year 1915.

Detailed estimates for the fiscal years 1914 and 1915 follow:

Fiscal year 1914.

The ordinary receipts of the Government for the current fiscal year are estimated upon the basis of existing laws as follows:

From customs		\$270,000,	000
From internal revenue:			
Ordinary	\$312,000,000	•	
Corporation excise tax	8,000,000		•
Income tax		¥	
Corporations	33, 000, 000		
Individuals	54,000,000		
			~ ~ ~

407,000,000

SECRETARY OF THE TREASURY.	SECRETARY	0F	$\mathbf{THE}$	TREASURY.
----------------------------	-----------	----	----------------	-----------

From sales of public lands From miscellaneous sources	-, ,
- Total estimated ordinary receipts	736,000,000

The disbursements for the same period are estimated as

follows:

For the civil establishment.       \$177,000,         For the War Department.       170,000,         For the Navy Department.       136,000,         For the Indian Service.       21,000,         For pensions       175,000,	000 000 000 000	
For interest on the public debt. 22,900,	000	
Total estimated ordinary disbursements		701, 900, 000
Estimated surplus of ordinary receipts For Panama Canal: Estimated disbursements to be made from the g eral fund of the Treasury during the year without sales of bonds.	gen-	34, 100, 000 41, 000, 000
An excess of disbursements, including the Panama Canal, of.		6, 900, 000

Public debt: Redemptions of the public debt, including transactions in deposits and redemptions of the public debt, including transactions in account under the act of July 14, 1890, which, for the year ended June 30, 1913, aggregated the net sum of \$2,720,600, are excluded from the estimates, as payments on these accounts will probably be approximately offset by receipts from postal savings bonds.

### POSTAL SERVICE.

The Post Office Department estimates the probable expenditures for the postal service for the fiscal year 1914 at approximately \$285,500,000, and believes that if the business conditions of the country continue normal the postal revenues will probably equal the expenditures.

## Fiscal year 1915.

It is estimated that upon the basis of existing laws the ordinary receipts for the fiscal year 1915 will be:

From customs	\$249,000,000
From internal revenue:	
Ordinary \$315, 000, 000	
Income tax—	
Corporations	
Individuals	
•	
From sales of public lands	3,000,000
From miscellaneous sources	56, 00 <b>0, 0</b> 00

The estimates of appropriations for the fiscal year 1915, as submitted by the executive departments and offices, are as follows:

### POSTAL SERVICE.

The Post Office Department estimates the probable expenditures for the postal service for the year 1915 at approximately \$307,000,000, and believes that if the business conditions of the country continue normal the postal revenues will probably equal the expenditures.

### ESTIMATES FOR 1915 AND APPROPRIATIONS FOR 1914.

Comparison of the estimates for 1915, with the appropriations for 1914, shows an increase in the 1915 estimates of \$12,842,061.29, including the Panama Canal, as exhibited in the tables following:

#### Statement of estimates of appropriations for 1915, increased over appropriations for 1914.

### ABSTRACTS OF REPORTS OF BUREAUS AND DIVISIONS.

The following is a summary of the reports of bureaus and divisions of the Treasury Department for the fiscal year ended June 30, 1913, with the exception that the figures in relation to public moneys and loans and currency are brought to November 1:

### TREASURER OF THE UNITED STATES.

The ordinary revenues, by warrants, and adjustments for moneys received but not covered by warrants in the year were \$724,111,-229.84, an increase of \$32,332,764.47 over those of 1912, while the ordinary disbursements were \$682,770,705.51, an increase of \$28,216,-742.04, as shown by similar comparison. The net result of ordinary transactions was a surplus of \$41,340,524.33.

The balance in the general fund June 30, 1913, was \$165,960,984.79, which was less by \$1,191,494.20 than the balance on June 30, 1912. The working balance in the vaults of the Treasury was \$71,052,925.96.

Transactions in the governmental finances during the fiscal year favored the maintenance of an adequate working balance in the Treasury; therefore it was not deemed advisable to offer for sale additional bonds of the Panama Canal loan. The expenses incurred in the construction of the canal during the year, amounting to \$41,741,-258.03, were paid out of the general fund of the Treasury, and the total net balance so expended to June 30, 1913, reimbursable from the proceeds of bonds not yet sold, was \$179,627,617.07.

Postal savings bonds, authorized by the act of June 25, 1910, were issued during the year to the amount of \$1,929,840, while the deposits of lawful money of the United States, under the act of July 14, 1890, to retire national-bank notes were \$21,471,010, making a total of \$23,400,850 in actual cash received on account of the public debt proper. The cash disbursements on account of the principal of matured loans and fractional currency were \$102,575, and for national bank notes canceled and retired \$24,089,035.50, a total disbursement for the public debt of \$24,191,610.50. The net result was an excess of disbursements of \$790,760.50.

The trust funds, consisting of gold and silver dollars, held for redemption of the certificates and notes for which they are respectively pledged, amounted to \$1,573,157,169 at the close of the last fiscal year, an increase of \$48,621,800 as compared with that of 1912.

The redemptions from the reserve fund during the fiscal year 1913 were, in United States notes, \$67,850,957, and in Treasury notes of 1890, \$67,830, making a total of \$67,918,787. The redeemed notes were restored to the general fund in exchange for gold, and the reserve thereby maintained at the fixed amount of \$150,000,000. There was

no apparent disposition on the part of holders of United States notes to use them in withdrawing gold coin from the Treasury. The transactions in the reserve fund represent more truly exchanges to secure an accommodation in denominations of currency.

Gold continues to accumulate in the Treasury, and the holdings on June 30, 1913, amounted to \$1,262,361,035.87, of which \$1,011,245,-007.44 was in coin. Set apart for the respective uses, it was held on the following accounts: Reserve fund, \$150,000,000; trust funds (for redemption of gold certificates in actual circulation), \$1,003,997,709; and in general fund (belonging to the Treasury), \$108,363,326.87. The imports of gold during the year were \$69,194,025, the exports \$77,762,622, and the net excess of exports \$8,568,597.

The United States bonds pledged to secure bank circulation increased \$16,035,510 during the fiscal year and amounted to \$740,-529,250 on June 30, 1913. The securities pledged for public deposits in national banks amounted to \$61,646,300. Under the provisions of the act of June 25, 1910, establishing the Postal Savings System, the Treasurer of the United States held in trust, as security for postal savings, bonds and securities amounting to \$63,851,061.42 on June 30, 1913

National-bank notes presented for redemption during the fiscal year 1913 amounted to \$675,889,000, or 90.01 per cent of the average circulation outstanding. Of the total received, 47.62 per cent was sent by banks in New York City. The largest amount presented during a month was \$79,753,664 in January, and the smallest, \$41,816,565, in September. The national-bank notes assorted and delivered during the year amounted to \$669,405,645.50, of which \$218,884,750 were returned to the respective banks of issue for further circulation. Redemptions of national-bank notes during the year have been in excess of the 5 per cent fund in all months except portions of December and January, and the Treasury advanced payment out of the general fund as the notes were received. The largest overdraft at one time was \$23,914,635.44 on January 18, 1913. The expenses incurred for redemptions of national-bank notes during the year amounted to \$517,842.93 and have been assessed upon the banks in proportion to their notes redeemed at the rate of \$0.77293 per \$1,000.

At the close of the fiscal year 1913 the general stock of money in the United States amounted to \$3,720,070,016, an increase of \$71,199,366 as compared with that of 12 months earlier. Gold took on a growth of \$52,573,418, the silver coins advanced in volume by \$4,872,034, and national-bank notes furnished \$14,022,914 of the total increase. Treasury notes to the amount of \$269,000 were canceled and retired. The money in circulation increased in volume by \$79,225,356 and amounted to \$3,363,738,449 on June 30, 1913. The circulation per capita was \$34.56 and the share of gold to whole circulation 47.93 per cent.

The notes and certificates of United States paper currency issued during the fiscal year numbered 318,264,407 pieces, of the total value of \$1,035,462,000. The redemptions were 291,131,640 pieces, of the total value of \$987,060,200. The pieces outstanding number 354.461.922, of the total value of \$1.920.618.185. There is great demand for denominations of \$5 and under, and the burden of supplying these denominations falls upon the Treasury. The department has employed all its resources to respond to the needs of business. Through the process of redeeming the larger denominations of United States paper currency and issuing smaller denominations in lieu thereof, the Treasury has been enabled to supply the greater part of the demand for such bills. The denominations of gold certificates are restricted to \$10 and above, but as the department is limited in its resources for the issue of currency of small denominations it becomes more apparent each year that a \$5 gold certificate is an absolute necessity. Large amounts of gold certificates are returned to the Treasury daily for redemption, usually accompanied with a request for the return of a part of the proceeds in denominations of \$5. If the department was clothed with authority to issue a \$5 gold certificate, it would be in condition to respond to all demands for denominations of \$5 and under. The average cost of each piece of United States paper currency issued and redeemed is about 1.526 cents, and the annual cost of maintenance of the currency issued by the National Government averages slightly more than one-fifth of 1 per cent of the amount outstanding.

Shipments of gold, silver, and minor coins to depositors therefor, at the expense of the consignee for transportation, during the fiscal year were: Gold coin, \$11,513,233.50; standard silver dollars, \$12,560,078; subsidiary silver coin, \$22,767,796.80; and minor coin, \$5,391,313.92.

The shipments of currency from the Treasury in Washington to the subtreasuries and to the banks during the fiscal year 1913 amounted to \$882,677,335, against \$761,847,077 during the preceding year.

The balance of public moneys on deposit in national banks at the beginning of the fiscal year 1913 amounted to \$48,506,185.77. The working balance in the Treasury offices at the same time was \$98,742,425.40, an amount largely in excess of the actual requirements of the department for the transaction of the public business. As there was no necessity for withdrawing the public deposits from national banks, there was but slight change in the total balances of public moneys therein during the first half of the fiscal year.

On January 9, 1913, the Secretary of the Treasury (Mr. MacVeagh) issued Department Circular No. 5, which inaugurated a radical change in the manner of handling and disbursing the public funds. It provided, first, that on and after February 1, 1913, every deposit of

16726°—fi 1913—3

funds to the official credit of a disbursing officer (except those stationed in the Philippine Islands) should be made with the Treasurer of the United States; second, all moneys standing to the official credit of disbursing officers with assistant treasurers and active designated depositary banks at the close of business January 31, 1913. should be transferred to like credit of such disbursing officers with the Treasurer of the United States, through the medium of the general account of the Treasurer of the United States; third, all Treasury Department warrants, Post Office Department warrants, disbursing officers' checks, checks in payment of interest on the public debt, and Secretary's special deposit checks should be drawn on the Treasurer of the United States. It contemplated that each assistant treasurer and each active depositary bank should pay the warrants and checks enumerated in the foregoing when drawn on the Treasurer of the United States and presented in due course of business; the warrants and checks so paid to be scheduled daily, charged in the regular transcript of the general account as a transfer of funds, and forwarded to the Treasurer of the United States. It made necessary a more extended use of national banks as Government depositaries, and required an adjustment of the balances then in such depositaries with a view of making a broader distribution of the public funds. At the close of January, immediately preceding the beginning of operations under the new system of accounting, the public deposits in banks amounted to \$46,580,888.59. At the close of the fiscal year on June 30, 1913, the total balance of public moneys held by banks was \$76,263,615.06.

# District of Columbia.

The net expenditures on account of the District of Columbia for the fiscal year 1913 by warrants paid were \$12,841,210.79. The net revenues deposited in the Treasury by warrants on this account for the same period were \$8,827,580.69.

The amount of the funded debt retired during the year was \$647,700, reducing the annual interest charge by \$23,641.05.

The total issue of the 3.65 per cent bonds is limited by law to \$15,000,000, and of this sum \$14,997,300 has been issued, of which \$7,386,450 has been redeemed. The bonded debt outstanding June 30, 1913, consisted of \$7,610,850 in bonds bearing 3.65 per cent interest.

At the close of the fiscal year 1913 the 10 per cent guaranty fund retained from District of Columbia contractors amounted to \$252,-808.18, and was represented by \$157,010 in bonds, purchased at the request and risk of contractors, and \$90,143.35 uninvested cash.

Detailed information in regard to the affairs of the District of Columbia will be found in the reports of the District Commissioners and the Treasurer of the United States, ex officio commissioner of the sinking fund of the District of Columbia.

### COMPTROLLER OF THE CURRENCY.

At the close of the fiscal year ended June 30, 1913, there were in active operation 7,492 national banks, with authorized capital of \$1,063,986,175; bonds to secure circulation, \$740,529,250; circulation outstanding on bonds, \$737,065,050; and circulation secured by deposit of lawful money. \$22,092,856, or a total of \$759,157,906.

Since the national-banking system was first established charters have been issued to 10.415 banks. Of the banks chartered, 2.420 have left the system by voluntary liquidation and 503 failed and affairs liquidated through instrumentality of receivers. During the fiscal year the Comptroller of the Currency issued charters to 196 national banks, with authorized capital aggregating \$15,195,000, which number included 48 conversions of State banks, 50 reorganizations of State and private banks, and 98 primary organizations. In the same period 98 national banks discontinued business, of which 94 were placed in voluntary liquidation by their stockholders and 4 failed and were placed in charge of receivers. In addition a receiver was appointed for one bank that had been previously placed in voluntary liquidation by its shareholders. Of the banks placed in voluntary liquidation, 43 were either absorbed by or reorganized as State banks, 39 were taken over by national banks, 8 were reorganized as national banks, and 4 discontinued business. In the number of banks liquidated are included 4 associations the corporate existence of which expired by limitation. The 5 banks for which receivers were appointed during the year had capital at the date of closing aggregating \$750,000, and the liabilities to depositors and other general creditors amounted to \$3,469,546.59. Three of the 5 banks that failed paid dividends to creditors as follows: One, 50 per cent; one, 25 per cent; and one, 20 per cent.

From the date of the passage of the national-bank act, February 25, 1863, to June 3, 1864, the date on which it was repealed, there were 456 national banks chartered, of which 226 are still in active operation. Under the act of 1864 charters were granted to 6,677 associations, under the gold bank act of 1870 to 10, and under the act of 1900 to 3,272.

The act of March 14, 1900, authorized the incorporation of national banks with minimum capital of \$25,000, and permitted the issue of circulation to the par value of bonds deposited, and reduced the tax on circulating notes. On that date there were in operation 3,617 national banks, and since that date to July 1, 1913, 5,151 national banks, with aggregate capital of \$329,248,300, have been authorized to begin business, of which number 3,272 banks, with aggregate capital of \$85,270,500, were chartered under authority of the act of March 14, 1900, with individual capital of less than \$50,000. The

majority of these banks incorporated with the minimum capital of \$25,000, the average capital of the banks of this class being \$26,060. The remaining banks organized during the period mentioned, 1,879 in number, with capital of \$243,977,800, were incorporated under the act of 1864.

A comparison of conditions on March 14, 1900, with those of June 30, 1913, shows the net increase in the number of banks in operation to be 3,875, and in authorized capital \$447,678,080. Outstanding circulation of the banks has increased during that period from \$254,402,730 to \$759,157,906—an increase of \$504,755,176. During the fiscal year 1913 the bond-secured circulation increased \$16,640,940, or from \$720,424,110 to \$737,065,050. The amount of circulation secured by the deposit of lawful money was, at the close of business on June 30 last, \$2,618,026 less than the amount on June 30 of the prior year. The total increase during the year of circulation secured by bonds and by lawful money amounted to \$14,022,914.

The percentage of national banks closed or which are being closed by receivers is 4.8; the percentage of voluntary liquidations is 23.3. The banks in active operation represent 71.9 per cent of the total number chartered.

The number and capital of national banks organized since March 14, 1900, by State and geographical divisions, together with the number and paid-in capital stock of national banks on June 4, 1913, appear in the following table:

It is of interest to note, in connection with the statistics submitted relative to the organization, capital, and circulation of national banks since 1900, the increase in the banking business generally, as evidenced by the reports of condition for February 13, 1900, the date of the call immediately preceding the legislation authorizing the incorporation of banks with a minimum capital of \$25,000, etc., and those for June 4, 1913. Total assets of banks increased from \$4,674,910,713.09 to \$11,036,919,757.04; loans from \$2,481,579,945.35 to \$6,143,028,132.94; paid-in capital stock from \$613,084,465 to \$1,056,919,792; outstanding circulation from \$204,912,546 to \$722,125,024; and individual deposits from \$2,481,847,035.62 to \$5,953,461,551.12.

Comparison of the returns for June 14, 1912, with those for June 4, 1913, shows an increase in the number of reporting banks on the latter date of 101, and in loans and discounts \$189,123,701.09. Specie held decreased \$32,688,060.36, while the holdings of legal-tender notes increased \$1,467,806. Investment in United States bonds, including premium, increased \$12,005,220.17. Over 92 per cent of the United States bonds owned or held by national banks is on deposit with the Treasurer of the United States to secure circulation. The increase in other bonds, securities, etc., was \$16,402,583.99. Of the liabilities of the banks, capital stock increased during the past year \$23,349,117; surplus and undivided profits, \$37,920,240.46; individual deposits, \$128,000,387.76; and aggregate resources, \$175,155,879.89.

The number and capital of State banks converted, reorganized banks, and banks of primary organization since March 14, 1900, classified by capital stock, are shown in the following table:

Classification.	Coi	nversions.	Reor	ganizations.		nary organi- ations.	Total.

### MINT SERVICE.

## Operations of the mints.

The three coinage mints at Philadelphia, Denver, and San Francisco, and nine assay offices, located at New York, Charlotte, New Orleans, Deadwood, Helena, Seattle, Boise, Salt Lake City, and Carson City, were in operation during the fiscal year,

The original deposits of gold at all of the offices of the mint service during the year amounted to \$161,131,878.30. The total coinage of the year amounted to \$37,496,529.70, of which \$30,058,227.50 was gold, \$3,448,199.75 was silver, \$2,861,768.55 was nickel, and \$1,128,333.90 was bronze.

The purchases of silver during the year amounted to 1,779,992.99 ounces, costing \$1,086,347.87, at an average cost of 61 cents per fine ounce. The seigniorage on subsidiary silver coins during the year amounted to \$1,618,475.17, and the seigniorage on the minor coin amounted to \$3,584,520.03, all of which was duly accounted for and turned into the Treasury.

The mint at Philadelphia during the year also coined 803,348 pieces of silver for the Government of Costa Rica, and the mint at San Francisco coined 2,638,820 pieces of silver and 5,001,000 bronze pieces for the Philippine Islands government.

## Appropriations, earnings, and expenditures.

The total appropriations available for the mint service during the last fiscal year were 1,243,355.43, and, together with reimbursements within the service and by other Government services, aggregated 1,287,613.04. The actual expenditures amounted to 1,171,600.77. The earnings and gains realized by the Treasury from the mint service, including seigniorage and the expenditures and losses on the same account, are shown by the following statement:

### Earnings and expenditures, fiscal year 1913.

<sup>1</sup> Includes freight on shipments of coin and bullion between mints and assay offices.

## Charlotte office closed.

The assay office at Charlotte, N. C., was closed at the end of the fiscal year and the equipment distributed to other offices or sold at auction. The Charlotte office was originally established as a branch mint by act of Congress approved March 3, 1835. This action was prompted by the fact that in the year 1834 approximately \$900,000 worth of gold was received at the Philadelphia Mint from the southern Appalachian region. The first coinage was done in 1837, and coinage operations were continued until the outbreak of the Civil War. The total coinage of the institution was \$5,059,188. In 1867 the institution was reopened as an assay office, and operations were continued until June 30, 1913, when, Congress having made no further provision for its support, it was definitely closed. The deposits at the office in recent years have been very small.

### Production and consumption of gold and silver.

The production of gold in the United States for the calendar year 1912 is estimated by the Bureau of the Mint, in conjunction with the Geological Survey, at 4,520,719 fine ounces, of the value of \$93,451,500, and the production of silver is estimated at 63,766,800 fine ounces, of the commercial value of \$39,197,500. The industrial consumption of new gold in the United States during the year is estimated at \$35,870,552. The industrial consumption of silver for the year is estimated at 22,644,821 fine ounces.

## INTERNAL REVENUE.

The receipts from internal-revenue taxes for the fiscal year 1913, as shown by collectors' reports, were \$344,424,453.85, a net increase of \$22,808,559.16 over the preceding fiscal year. The principal items comprising such increase were as follows: Distilled spirits, \$7,487,854.77; manufactured tobacco, including cigars, cigarettes, and snuff, \$6,199,273.15; fermented liquors, \$2,998,219.09; special excise tax on corporations, \$6,423,040.03.

The total expenditures for the collection of the internal revenue for the fiscal year 1913 were \$5,489,654.61. This included expenditures from the appropriation "Expenses of collecting the corporation tax," which were \$143,995.77, but did not include payments from the appropriation "Refunding internal-revenue collections," amounting to \$23,513.19, as they were in no sense an expense.

The cost of collecting \$1 of internal revenue was \$0.0159.

Receipts from internal revenue, 1912 and 1913.

<sup>1</sup> Includes \$319,100.64 from sale of internal-revenue stamps affixed to Philippine products, as provided for in the act of Aug. 5, 1909. <sup>2</sup> Includes \$655,283.10 from playing cards; \$401,910.26 from penalties; and \$9,560.87 from miscellaneous sources.

The total production of distilled spirits, exclusive of fruit brandies, was 185,353,383.1 taxable gallons, against 178,249,985 gallons in 1912, an increase of 7,103,398.1 gallons.

The production of fruit brandies was 8,252,874.8 taxable gallons, against 9,321,823.5 gallons in 1912, a decrease of 1,068,948.7 gallons. During the fiscal year 1913, 870 distilleries of all kinds were operated, an increase of 49.

The production of fermented liquors was 65,324,876 barrels, an increase over the previous fiscal year of 3,148,182 barrels. There were removed from breweries for export free of tax 79,332 barrels.

## The income-tax law.

A distinct change in the method of providing revenue for the expenses of the Federal Government has been instituted by section 2 of the act of October 3, 1913, which provides for a tax to be levied, assessed, collected, and paid annually upon the net income of every citizen of the United States, whether residing at home or abroad, and upon the net income of every person residing in the United States, though not a citizen thereof, and upon the net income from all property owned and of every business, trade, or profession carried on in the United States by persons residing elsewhere, and a like tax upon domestic corporations and foreign corporations doing business in the United States.

In the year 1861 an income-tax law was enacted for the purpose of increasing the revenues of the Government during the period of the War between the States, but this law was distinctly a war measure and was repealed in 1871.

On August 28, 1894, in response to a general sentiment throughout the United States, an income-tax law was again enacted, which was however, of short duration, the Supreme Court of the United States deciding that that act was unconstitutional before the first annual tax under its provisions had been collected.

The sentiment for an income tax, however, was not abated, and in the first session of the Sixty-first Congress a resolution was passed proposing an amendment to the Constitution of the United States, which amendment would permit the levying of an income tax on the people of the United States. This amendment was submitted to the States for ratification and was ratified by the necessary threefourths of the legislatures of the several States, and the amendment to the Constitution of the United States was announced by the Secretary of State on February 25, 1913.

In pursuance of this amendment to the Constitution an incometax law was enacted October 3, 1913, providing for collections at the source beginning November 1, 1913, and the Treasury Department immediately began preparation for its administration through the office of the Commissioner of Internal Revenue.

The law being new in character and some of its provisions little understood by the people, particularly those relating to the withholding of the tax at the source, which provisions became effective on November 1, 1913, less than a month after the enactment of the law, the department exerted every effort to place its interpretation of the law before the taxpayers; and the first regulations, which were those relative to the withholding of the tax at the source on coupon and registered interest payments on bonded and other similar indebtedness of corporations, joint-stock companies or associations, and insurance companies, were issued October 25, 1913, and were followed on October 31, 1913, by the regulations relative to the withholding of the tax at the source on salaries, rents, and other fixed and determinable annual income in excess of \$3,000.

The tax on individuals is calculated on the calendar year, and the regulations and forms for the returns of income of individuals and corporations will be issued in ample time to enable the taxpayers to make their returns of annual net income within the period prescribed by law, that is, on or before March 1, 1914, except in the case of corporations which may have chosen, in the manner prescribed by law, to make their returns for their fiscal years instead of the calendar year.

Less confusion than was expected has been experienced thus early in the operations of the law and each day's added experience indicates that the law, while complicated, will admit of interpretation, and that a proper administration of it can be established within a reasonable period of time.

## Recommendations.

Several of the following recommendations for statutory changes have been made from year to year in the various annual reports, but inasmuch as the need of the legislation referred to is very great, I have the honor again to include some of those recommendations, with certain others, as follows:

1. Denatured alcohol.—To impose a nominal tax—say 1 cent per proof gallon—on all alcohol withdrawn for denaturation, which tax would yield a return approximately equal to the amount that should be appropriated to properly take care of the work.

2. Tobacco.—That section 3360 of the Revised Statutes be amended to require every dealer in leaf tobacco to give bond, make a true inventory of stock annually on the 1st day of January in each year, and to render a report of his transactions quarterly, monthly, or for such periods as the Commissioner of Internal Revenue may prescribe; section 35, act of August 5, 1909, so as to require retail dealers in leaf tobacco to give bond; section 26, act of October 1, 1890, so as to require registry of manufacturers of cigars, manufacturers of tobacco, dealers in leaf tobacco, retail dealers in leaf tobacco, and peddlers of tobacco only on commencing business and not annually on the 1st day of July in each year, as at present.

3. Oleomargarine.—Considerable comment has been indulged in as to the matter of the production of illicit spirits and the consequent loss of taxes to the Government on that account, and while it is true that the Government sustains quite a loss on this account, it is not to be compared with the loss that may be and has been sustained in the illicit traffic in oleomargarine.

In any of the three or four large cities in the country the Government, unless the illicit traffic in the manufacture and sale of oleomargarine is controlled, will lose more taxes from this source alone than would be lost in the way of taxes on distilled spirits illicitly produced in all the Southern States.

This condition of affairs with respect to the illicit traffic in oleomargarine is brought about wholly and solely by the difference in the rate of tax on that commodity. The tax on oleomargarine free from artificial coloration is one-quarter cent per pound, while the tax on oleomargarine that contains artificial coloration is 10 cents per pound. The illicit dealer in oleomargarine can, by the use of artificial coloration, which is inexpensive, manipulate a thousand pounds of uncolored oleomargarine upon which the tax of one-quarter cent per pound has been paid and produce an article upon which the tax of 10 cents per pound should be paid, thereby defrauding the Government of  $9\frac{3}{4}$  cents on each pound thus illicitly produced, amounting to \$97.50 on the thousand pounds thus manipulated.

An illicit distillery, in order to defraud the Government out of that amount of tax, would have to produce in the neighborhood of 89 gallons of proof spirits, which would require, under the most favorable circumstances, 72 hours' fermentation before the distiller could produce any spirits. In three days the illicit oleomargarine dealer can manipulate, by adding artificial coloring matter to uncolored oleomargarine, anywhere from 1,000 to 3,000 pounds, thereby defrauding the Government of  $9\frac{3}{4}$  cents on each pound so manipulated.

The present oleomargarine law is not satisfactory, either from an administrative or revenue standpoint, and should be so amended as to remedy it in both respects.

A law imposing a flat tax of a nominal rate without any differentiation based upon coloration, with provision for individual stamped or original packages of certain sizes adequately marked and branded, and safeguarded by imposing penalties for infractions, would be easier of enforcement and yield greater revenue than the present law, and with less expense to the Government.

4. Adulterated butter.—Practically all cases involving manufacture and sale of adulterated butter were based on a moisture content of 16 per cent or more.

This law, which was evidently intended to prevent the manufacture and sale of butter adulterated within the common meaning of the term, has, because of its definition and drastic provisions, brought about very unfortunate conditions through its enforcement. It has increased the work of the officers in the field and in the administrative office without any appreciable revenue, and at the same time has imposed hardships upon many who produced and sold butter which was afterwards found to contain abnormal moisture, thereby involving themselves, as well as dealers handling the product, in liabilities to the heavy special taxes imposed by the law.

# White phosphorus matches.

Regulations were promulgated on May 10, 1913, to carry into effect the provisions of the act of April 9, 1912, relating to the tax on "white phosphorus" matches. These regulations were effective on July 1, 1913, with respect to filing of notices, bonds, monthly returns, etc., effective on January 1, 1915, as to the payment of the tax. It is not expected that much revenue will be derived from this source, as the tax of 2 cents per 100 matches will practically be prohibitory.

## BUREAU OF ENGRAVING AND PRINTING.

The appropriations by Congress for this work amounted to \$3,-687,206.39, and the repayments received for services and materials furnished the several executive departments and bureaus were \$859,200.99, the aggregate available for the work during the year having been \$4,546,407.38. The expenditures were \$210,174.15 for salaries, \$1,695,811.32 for compensation of employees, of which \$2,250 was for employees detailed to other branches of the public service and not reimbursed; \$1,880,314.75 for wages of plate printers and assistants; and \$663,431.92 for materials and miscellaneous expenses, making an aggregate expenditure of \$4,449,732.14.

The work executed by the Bureau of Engraving and Printing during the fiscal year was 9.4 per cent more than in the preceding year, while its expenditures increased only 3.35 per cent. The total number of sheets delivered was 287,192,192, an increase of 24,763,453 over the previous year. The deliveries comprised 76,797,500 sheets of United States notes and certificates; 34,869 sheets of United States bonds; 12,508,747 sheets of national-bank notes; 79,472,550 sheets of internal-revenue stamps; 255,300 sheets of customs stamps; 100,490,096 sheets of United States postage stamps; 14,223,835 sheets of United States parcel-post stamps; 218,868 sheets of Philippine postage stamps; 354,600 sheets of silver certificates, documentary and internal-revenue stamps, postal cards, and checks on Treasurer for the Philippine Islands; and 2,835,827 sheets of checks, drafts, commissions, etc. In addition to these sheets delivered, miscellaneous work was executed to the value of \$93,552.52. The face value of all classes of securities, internal-revenue stamps, postage stamps, etc., delivered by the bureau amounted to \$2,060,409,515.

Compared with the deliveries in the fiscal year 1912, there was an increase of 1.73 per cent in United States notes, certificates, and bonds, 6.65 per cent in national-bank notes, 5.45 per cent in internal-revenue stamps, 43.06 per cent in customs stamps, 18.91 per cent in postage stamps, and 7.04 per cent in checks, drafts, etc.

## Improved machinery.

By authority of the act approved August 24, 1912, during the year the printing of checks was transferred from hand-roller plate printing presses to offset presses at an annual saving of \$30,000, and the printing of one-fifth of the backs of paper money was transferred from the hand presses to electric-power plate presses at a saving of \$90,000. On July 1, 1913, the number of power presses engaged in printing backs was increased from 16 to 30.

### Money laundering.

Eleven machines for cleansing paper money were installed in the offices of the Treasurer of the United States and of several assistant treasurers, in the belief that the reuse of the laundered notes would result in considerable economy due to the reduction in the number of new notes necessary to be issued, but indications now are that the anticipated results will only be partly realized.

### New building.

The new building to house the Engraving and Printing Bureau is nearly completed and some portions of the work of that bureau are expected to be commenced therein by February 1, 1914.

It is estimated that the use of the old bureau building by the auditors of the department, instead of renting buildings, will result in annual saving to the Government of \$35,750.

### SPECIAL AGENTS' DIVISION.

The Special Agents' Division of the Treasury Department has during the past year examined and reported upon the personnel and the administrative methods of 23 customs districts and recommended many changes to increase efficiency and reduce expense.

Its investigations of undervaluations and wrongful classifications of imported merchandise led to additional and increased revenue and recovery of withheld duties amounting to approximately \$800,000. A large portion of this sum was paid directly into the Treasury in compromise of civil claims for withheld duties upon past entries, notably at the port of New York, where such specific recoveries reached the sum of \$274,004.17 As a result of the work of the service fines and penalties for violations of the customs and navigation laws were imposed, aggregating \$74,692.70.

In addition thereto 205 seizures were made of merchandise, valued at \$273,648.95, and 171 arrests, 94 of which were for violation of the customs laws and 77 for the violation of the opium laws, were made. Eighty civil suits were instituted, involving claims on behalf of the Government for \$127,947.71.

The work of the service has been largely increased in some respects which do not permit of a financial showing of results. Under the Panama Canal act a wide range of merchandise is entered free of duty for the construction, repair, and equipment of vessels built in the United States. Investigations throughout the United States have been made by the various agents to insure that merchandise so entered actually becomes incorporated in the ship for which intended as a part of its structure, repair, or equipment.

Of equal if not greater importance is the drawback work of the agents. Rates for the payment of drawback upon the exportation of manufactured articles made from imported materials are established upon the basis of investigations made by the special agents' service. Such investigations require close analyses of industrial processes, frequently intricate and involved, at times including relative quantities of imported and domestic material and wastes involved therein. Modern industrial organization, bringing into conjunction many formerly distinct activities, has rendered this work more difficult and also more necessary because of the enormous sums involved.

The enforcement of the opium laws has been an active part of the work of the agents of this division. Their effectiveness in this regard could be greatly increased by strengthening the laws prohibiting the importation and manufacture of smoking opium, for which purpose a number of bills have been submitted and to which I respectfully invite the attention of Congress.

### OFFICE OF THE SUPERVISING ARCHITECT.

The work in the Supervising Architect's office during the past fiscal year has been carried on in accordance with policies previously established.

The year ending June 30, 1913, was the first completed fiscal year following the material reduction in the force in the office of the Supervising Architect in October, 1911. Through the elimination of unnecessary routine, this reduced force has accomplished a proportionately larger output of construction work than was accomplished during the preceding fiscal years. The experience of the

year just closed, however, shows that the force, as reorganized, is not properly balanced, and does not handle the present output in the most efficient manner.

The public buildings act, approved March 4, 1913, created a commission to present to Congress a connected scheme of annual appropriations for the construction and completion of public buildings already authorized, to frame a standard for the determination of the size and cost of buildings, etc. In view of the existence of this commission, and the probability that Congress will take action upon the report which it will submit, no recommendations are made at this time concerning the work of the office of the Supervising Architect.

The work authorized in the omnibus public buildings act of 1910, and not under contract, together with the work authorized in the act of 1913, placed in this office a very large volume of work at the close of the fiscal year ending June 30, 1913.

The tabulations given below show in summarized form the status of projects authorized by Congress and the financial operations of the office.

#### PUBLIC HEALTH SERVICE.

The Surgeon General reports the operations of the service through the seven administrative divisions of the bureau as follows:

### Division of Scientific Research.

The scientific investigations authorized by law have been carried on during the year as facilities would permit. While the work has increased, both in the laboratories and in the field, the providing of funds on June 23, 1913, to enforce the act of August 14, 1912, authorizing larger investigations of the diseases of man and matters pertaining to the public health, marks a new era in this direction.

Comprehensive investigations of trachoma, pellagra, malaria, tuberculosis, typhoid fever, and other diseases, pollution of navigable waters, sanitary administration, school sanitation, and hygiene of occupation are accordingly being planned and executed.

In accordance with an act of Congress approved August 24, 1912, an extensive investigation was made of contagious and infectious diseases among the Indians. Fourteen officers were engaged in the work, 25 States were visited. and a total of 39,231 Indians examined. All the data which were collected, and which showed a high prevalence of trachoma and tuberculosis among this class of the population, were analyzed and embodied in a report which was submitted to Congress January 23, 1913, and published as Senate Document 1038, Sixty-second Congress, third session.

The investigations of pellagra have been continued at the marine hospital at Savannah and elsewhere during the year. This complex problem will require enlarged systematic studies, and with the funds available measures are being developed to carry them on. The general prevalence of the disease has been outlined and it has been shown to be on the increase.

Systematic studies of malaria, begun at the marine hospital at Mobile and elsewhere, have been continued to ascertain the prevalence of the disease and to stimulate measures for its prevention, a preliminary survey of the State of Alabama having been made and the results published. This survey is being extended to other States and intensive studies are being conducted in heavily infected districts to determine the index of infection and the influence of quinine as a prophylactic.

On account of the announcements of discoveries of alleged cures for tuberculosis and their bearing on the public health, important investigations of them have been undertaken. Studies of the Friedmann treatment were sufficiently advanced by May 16, 1913, to justify a report that the observations made up to that time did not warrant the confidence in the remedy which had been inspired by widespread publicity. This investigation is being continued, as are also studies of other preparations claimed as cures.

The demonstration of the undue prevalence of trachoma among the Indians and among the mountaineers of Kentucky has necessitated the undertaking of surveys to ascertain the prevalence of the disease among school children in California, Minnesota, Tennessee, Virginia, and West Virginia, and clinics have been established in two counties of Kentucky to demonstrate the eradicability of the infection from among infected populations.

The widespread prevalence of poliomyelitis (infantile paralysis) necessitated the continuation of epidemiologic studies of this disease in Arkansas, New York, and Texas, and laboratory studies in Washington. Studies of typhus fever were also conducted.

The investigations of typhoid fever which have been a prominent part of the research work of the service since 1906 were continued. Epidemics were investigated at Fort Dodge, Iowa, other Iowa and Illinois towns, and Roanoke, Va., and systematic studies of the disease conducted in the rural communities of the last-named State.

Pollution of navigable waters.—The sanitary surveys of interstate and international waters were continued. A preliminary survey of the lower Missouri watershed was completed and the results published. Cooperation was rendered the International Joint Commission in its investigations of the boundary waters between the United States and Canada, and systematic investigations are now being made of the pollution of the Ohio and Potomac Rivers to the end that measures may be devised for its control.

In the enforcement of the act of July 1, 1902, regulating the propagation and sale of biologic products, 25 establishments were inspected, 111 relicensed, and 6 licensed for the first time, while the issue of licenses to the remaining establishments was under consideration at the end of the fiscal year.

The Eleventh Annual Conference of State and Territorial Health Authorities with the Public Health Service was held in Minneapolis, Minn., June 16, 1913. The service was also represented at a number of important meetings of scientific and public health associations, and assisted the officers of the International Congress of Hygiene and Demography in promoting the interests of the congress and exhibit which were held in Washington September 23–28, 1912.

Hygienic Laboratory.—The work of this research institution has progressed as space and available facilities would permit. Special studies were made of typhus fever, cholera, and infantile paralysis. Other experimental work in the laboratory related to disinfectants, standardization of drugs, and examinations of public health specimens. The studies of the nutritive value of pasteurized and raw milk were continued.

Supplies of antityphoid vaccine and antirabic treatments have been prepared, the former for use of beneficiaries of the service and during epidemics, and the latter for issue to State health authorities and for administration at the laboratory to persons bitten by rabid animals.

The increasing importance of this institution as an agency in public health work necessitates provision for an additional building and for an increase of the laboratory staff.

Leprosy investigation station.—The investigations of leprosy in Hawaii have been continued at the receiving station at Kalihi and the leprosy settlement on Molokai. As adviser to the Territorial authorities, the director of this station has rendered important service in the improvement of sanitation, especially in respect to the suppression of mosquitoes in and around Honolulu.

In order that the research work shall be properly developed, it should be supported by adequate funds, and the personnel to carry it on should be increased.

## Division of Foreign and Insular Quarantine and Immigration.

Quarantine operations during the year have been active under two general headings, one being the work of eradicating rats from vessels and the other being special precautions against the introduction of yellow fever from Mexican ports into the ports of the United States.

In connection with rat-eradicative work, 1,737 vessels have been fumigated at Federal quarantine stations during the fiscal year just ended. This does not include the number of vessels fumigated by State and local quarantine authorities in compliance with our national quarantine policy. Anticipating the appearance of yellow fever in or near certain of the coast cities of Mexico (bordering upon the Mexican Gulf), the usual quarantine measures against the introduction of this disease into the United States were instituted early in the season. The subsequent appearance of yellow fever in certain localities in Mexico has justified these precautionary measures. Neither plague nor cholera has in itself caused special quarantine activity during the year.

The bubonic plague was eradicated both from the ports of Habana, Cuba, and San Juan, Porto Rico.

At the 50 quarantine stations on the continental United States, 7,821 vessels, carrying 599,955 passengers and crews, were inspected and 113 vessels were disinfected. In addition to these, as mentioned above, 1,737 vessels were fumigated for rat or mosquito destruction. National quarantine has been administered as usual at 8 ports in the Philippine Islands, 8 in Porto Rico, and 7 in Hawaii. Officers have been stationed in the American consulates of the principal ports of Italy and Mexico and in Asiatic ports to enforce the Treasury foreign quarantine regulations. Inspection has been maintained as usual on the Mexican border.

The quarantine stations are at present in a very satisfactory condition as to equipment and preparedness.

Medical inspection of immigrants.—During the fiscal year 1,574,371 aliens were inspected and 38,558 were certified for rejection on account of physical or mental defects. Inspections were conducted at 80 stations in the United States, Hawaii, and in the Philippines. Service officers, under the supervision of commissioners of immigration, have conducted the large immigrant hospitals at Ellis Island, N. Y., and Angel Island, Cal. The staff of medical officers and the corps of attendants at the Ellis Island immigration station have been added to during the year.

The following comparison of work done during the fiscal year just passed and the fiscal year ended June 30, 1912, is interesting. During

the last-mentioned period 726,040 immigrants arrived at the port of New York During the fiscal year just closed 1,044,057 immigrants arrived. The total rejections at that port for the fiscal year ended June 30, 1912, were 17,067 as compared with 22,733 for the fiscal year just ended, 150 mental defectives having been certified during the fiscal year 1912 as compared with 661 for the fiscal year 1913. This increase of activity in the medical inspection of aliens entering the United States is not confined to New York, but is evident at all the other immigration stations. At the Ellis Island hospital during the year past 10,165 patients were admitted for treatment, the daily average of patients in hospital being 229.

## Division of Domestic (Interstate) Quarantine.

Plague-suppressive measures in California and near-by States were carried out during the fiscal year in accordance with the plan which was outlined in the last annual report of the Surgeon General.

In San Francisco the work of destroying rats was continued, more than 90,000 having been collected and forwarded to the Federal laboratory for bacteriological examination. Throughout the year 1913 no rats were reported plague infected or suspicious of plague.

During the fiscal year particular attention has been given to ratguarding of ships engaged in trans-Atlantic and Pacific trade and calling at San Francisco. The regulations of the department in this regard have been strictly enforced.

Operations in Oakland and Berkeley have consisted solely of the trapping of rats for the purpose of determining whether plague infection had appeared, as plague infection has existed for some time among the ground squirrels that infest the rural districts surrounding these cities. Rats to the number of 40,000 were collected and sent to the laboratory for examination. No plague infection was found.

The squirrel-free zone around the cities bordering upon San Francisco Bay was maintained throughout the year. Whereas in previous years plague infection had been demonstrated among the squirrels upon this zone, careful hunting has failed to discover any infection during the year just passed, though infection has been found in contiguous territory.

But one case of human plague occurred during the fiscal year 1913. The patient died June 13, 1913. As infected squirrels had been found in the immediate vicinity and no rats were discoverable about her residence, it is believed that the infection was obtained from ground squirrels.

On June 17, 1912, the presence of bubonic plague was reported in San Juan, P. R. Officers were ordered to Porto Rico for the pur-

pose of suppressing the epidemic. This work has been accomplished, and these officers will be withdrawn very shortly.

On the request of the secretary of the Department of Public Health of Montana an officer was directed to proceed to Montana for the purpose of taking charge of the eradication of Rocky Mountain spotted fever, a disease which is widely distributed throughout the Pacific States and which exists in virulent form in the Bitter Root Valley of Montana. The disease has been successfully combatted in the latter region.

The occurrence of two cases of leprosy in persons who had resided in Michigan for some years brings again to general attention the need for a definite policy which will act uniformly throughout the country for the control and segregation of lepers.

The Surgeon General was directed to cooperate with State and local health officers of Ohio and Indiana during the disastrous floods which occurred in the spring of 1913. He not only directed his own officers in the field, but aided the local authorities with timely advice on sanitation.

On request of the Secretary of the Interior an officer was detailed to investigate sanitary conditions in Alaska and to make reports and recommendations thereon.

Amendments to article 3 of the Interstate Quarantine Regulations have been made relating to the common drinking cup, the common towel, and pure drinking water and ice for passengers in interstate traffic. These regulations have met with very general acceptance and have resulted in a marked improvement in sanitary conditions on interstate carriers.

In order that there might be a standard from which to judge of the purity of water and ice supplied passengers, a commission has been appointed, consisting of eminent scientists, together with officers of the Public Health Service, for the purpose of determining a standard of purity for drinking water. This commission is still at work, and its report is expected at an early date.

A great forward step has been made in protecting the health of passengers traveling on common carriers in interstate traffic. In addition to amendments to the Interstate Quarantine Regulations inspection reports from service officers traveling on official duty as to sanitary conditions on trains and vessels have been regularly received. When poor sanitary conditions are observed, notification of such conditions is rendered to the officials of the railroad or steamship line. In practically all such cases officials bave shown a ready willingness to cooperate effectively in remedial measures.

In accordance with Executive order of May 12, 1912, detailed sanitary inspections of Government buildings in Washington are regularly made and a permanent record kept of sanitary conditions in each room in such buildings.

### Division of Sanitary Reports and Statistics.

Pursuant to acts of Congress approved February 15, 1893, and August 14, 1912, the Public Health Reports have been issued weekly during the year. They have supplied quarantine officers, health officers, and other sanitarians with current information of the prevalence of diseases dangerous to the public health and of the measures being adopted by State and local health officers to prevent their spread through the adoption of sanitary laws or regulations. The Public Health Reports have also contained information on other related subjects for the use of health authorities in the protection of the health of the people.

To prevent the spread of disease in interstate traffic or from one locality to another it is necessary to have current information of the prevalence of disease and the occurrence of epidemics. This information is secured through the reporting of cases of disease, a subject concerning which many States have enacted laws. For the control of disease in its broader sense and the protection of the lives and conservation of the health of the people it is desirable that uniform and effective requirements be adopted by the several States. This matter has been a subject of careful consideration during the year, and at the Eleventh Annual Conference of State and Territorial Health Officers with the Public Health Service on June 16, 1913, a model State law on morbidity reports was adopted. This law should be enacted by the several States as soon as practicable.

State and municipal laws for the control and prevention of disease have been collated and studied that the department might at all times be informed of the measures being taken by State and local authorities for the prevention of the spread of disease. These laws have been published that municipal and State authorities might keep informed regarding the measures taken by other States and cities and the trend of practical sanitation as shown by the adoption of legislation.

## Division of Marine Hospitals and Relief.

During the fiscal year 1913, 50,604 patients received treatment, 14,097 being treated in hospital and 36,507 as dispensary or out patients. The hospital patients received a total of 405,944 days' treatment. The service operated 23 marine hospitals, owned by the

Digitized for FRASER http://fraser.stlouisfed.org/ Ecdoral Posonyo Bank of St. Louis Government, and maintained 125 other relief stations, where seamen were given hospital and dispensary treatment.

At the sanatorium for consumptive beneficiaries, located at Fort Stanton, N. Mex., 314 patients were cared for during the year. Of these, 121 were discharged, 47 died at the sanatorium, and 146 remained under treatment at the close of the year.

Aid was extended to other branches of the Government in the physical examination of 9,971 persons, of whom 381 were rejected. In addition, 744 merchant seamen were examined to determine their fitness for shipment on American vessels, of whom 20 were rejected; also 15 foreign seamen, of whom 7 were rejected.

Owing to the small amount of relief work done, the relief station at Morgan City, La., was closed during the year.

## Division of Personnel and Accounts.

Commissioned and other officers.—The commissioned medical officers at the close of the fiscal year numbered 144, as follows: The Surgeon General, 10 senior surgeons, 63 surgeons, 40 passed assistant surgeons, and 30 assistant surgeons. The acting assistant surgeons numbered 226, making, all told, 370 medical officers. The total personnel of the service, including 46 pharmacists, 1,028 attendants, and 68 other employees, numbered 1,512.

*Expenditures.*—The appropriations for the ordinary maintenance of the service were \$1,721,817.50. The receipts from all sources, repayments for care of foreign seamen, etc., were \$14,118.77. The expenditures were \$1,674,004.65; estimated outstanding liabilities, \$16,907.07, leaving an estimated balance of \$45,024.55.

The amount available of the appropriation for preventing the introduction and spread of epidemic diseases at the beginning of the fiscal year was \$89,621.73. During the year an appropriation of \$200,000 was made. The expenditures were \$244,502.45, leaving a balance June 30, 1913, of \$45,119.28, less estimated outstanding liabilities, \$6,596.40.

The appropriations for the maintenance of the quarantine service were \$169,000. The amount of repayments was \$1,298.44. The expenditures were \$157,646.51, which, deducting outstanding liabilities, leaves an estimated balance of \$2,035.58.

The amount available of the appropriation for national quarantine and sanitation at the beginning of the fiscal year was \$58,803.95; the expenditures were \$34,533.86, leaving a balance June 30, 1913, of \$24,270.09, less estimated outstanding liabilities \$1,472.08.

## Miscellaneous Division.

Publications.—Bureau publications aggregating 555,087 were distributed during the calendar year ended June 30, 1913. Requests for publications of the service are steadily increasing.

Life-Saving Service claims.—During the year, 450 claims for benefits under the act of March 4, 1882, by keepers and surfmen of the Life-Saving Service have been passed upon by the officer in charge of this division, based upon the medical evidence submitted. Physical examinations of keepers and surfmen of said service have been continued.

## Recommendations.

An increase in the number of commissioned medical officers of the Public Health Service is one of its most urgent needs. Requests for the assistance and advice of experts in the management of epidemics of contagious diseases, in work of sanitation, and to address meetings both of public health organizations and of citizens, have been received from State and local health officers in far greater number than in any previous year of the history of the service. Every effort has been made to meet these requests for cooperation, but in many cases the lack of available officers has prevented the bureau's compliance.

An additional building should be provided for the use of the Hygienic Laboratory in Washington. The work of the laboratory has grown apace with the increase in public health interest and activity throughout the country, and additional duties recently imposed by statute in connection with the investigation of diseases of man, pollution of navigable streams, and problems involved in the sanitation of interstate carriers, render additional accommodations necessary for the work.

Larger editions of service publications, and particularly those of a less technical nature, should be provided for. One of the most important of the bureau's publications is the Weekly Public Health Reports, which contains current information relative to the prevalence and distribution of diseases throughout the United States and the entire world. It is believed that the circulation of this publication should be enlarged to include every health officer and physician actively interested in public health work throughout the country.

One of the essential factors in the conduct of public health work is a thorough knowledge of the occurrence, prevalence, and distribution of disease. It is apparent that to eradicate or to prevent the spread of disease, information must first be had as to where it is present. Provision should be made whereby the Public Health Service can be kept currently informed regarding the prevalence of disease throughout the country. Its information of this nature is largely dependent upon the voluntary cooperation of State and local health authorities. While this cooperation is in many instances all that could be desired, in some others reports are not promptly received. In the estimates for the fiscal year 1915 an appropriation has been requested with which to insure prompt and regular receipt of such information by the employment of persons already in the service of health organiza-

Digitized for FRASER http://fraser.stlouisfed.org/ tions, whose duty it would be to furnish accurate and prompt transcriptions of all morbidity statistics collected by these agencies.

The continuation of the appropriation "For field investigations of public health matters," provided by Congress for the fiscal year 1914, is of greatest importance. With the establishment of this fund it has been possible for the service to undertake work that has long been deferred. The investigation of the pollution of navigable waters, particularly those which are interstate in character, is clearly the function of the Federal health agency, while studies of the causes and conditions influencing the spread of disease are of benefit to the country at large, regardless of the locality in which they are conducted.

### LIFE-SAVING SERVICE.

The number of documented vessels sustaining disaster during the last fiscal year within the field of operations of the Life-Saving Service was 552. They carried 5,787 persons, of whom 73 were lost. The estimated value of the vessels was \$12,128,070, and of their cargoes \$2,529,170, making a total value of \$14,657,240. Of this amount, \$1,721,215 represented the estimated value of the property lost.

There were also involved in casualty during the year 1,191 undocumented vessels—those of less than 5 tons' burden—such as small launches, sailboats, rowboats, etc. These were valued at \$965,910 and the loss they sustained is estimated at \$41,935. There were on board 3,254 persons, 14 of whom perished.

Shelter and subsistence were afforded at the service stations to 437 persons who were victims of shipwreck and of boating accidents. These were furnished a total of 756 days' relief.

The foregoing data and other information of importance relating to the year's work of the life-saving corps are presented for ready reference in tabular form as follows, the figures pertaining to each class of vessels (documented and undocumented) being given separately:

	Documented vessels.	Undocu- mented vessels.	Total.
Number of vessels involved Vessels totally lost. Persons on board Lives lost. Days' succor af stations. Days' succor afforded. Value of vessels involved. Value of cargoes. Total value of property involved. Value of property saved. Value of property lost.	40 5, 787 73 223 505 \$12, 128, 070 \$2, 529, 170 \$14, 657, 240	1, 191 29 3, 254 14 214 251 \$952, 310 \$13, 600 \$965, 910 \$923, 975 \$41, 935	1,743 69 9,041 87 437 756 \$13,080,380 \$2,542,770 \$15,623,150 \$13,860,000 \$1,763,150

The number of casualties, as shown in the foregoing statement, exceeds that reported for any previous year within the history of the establishment. The value of imperiled property was greater, also, than ever before except for the year 1909. Notwithstanding this, a lower percentage of property loss is not to be found in any former annual summary of service operations. It has been equaled only twice, namely, in 1896 and 1898. The value of property endangered, however, during the first of these two years was approximately \$3,000,000 less, and during the last-mentioned year \$8,000,000 less, than was imperiled during 1913.

The loss of life within the last year was also exceptionally large, exceeding that of any previous year since the season of 1877-78. It is also widely at variance with the average annual record of fatality since the introduction of the present life-saving system in 1871. which has been 33. This unusual record was due to two disasters which took place upon the Pacific coast: One, the wreck of the steamer Rosecrans, January 7, 1913, off the entrance to the Columbia River, with the loss of 33 of the 36 persons she carried; the other, the destruction of the German bark  $\hat{Mimi}$ , April 6, 1913, near the mouth of the Nehalem River, Oregon, with the loss of 16 of the 20 persons on board. In neither of these instances could those who perished have been saved by any human agency. It should be stated, moreover, that all of the life-saving crews present at these wrecks performed valiant service, those engaged at the disaster first mentioned losing two powerful motor lifeboats while making desperate and, happily, successful efforts to rescue two sailors, all that remained alive on board when the rescuers appeared after a search of several hours made for the vessel in an impenetrable fog. The work of the corps upon this occasion was marked by incidents of heroism and devotion to duty that have never been surpassed. It evoked the highest encomiums of press and public, and was specially recognized by the passage of resolutions of commendation by the Legislature of the State of Oregon and the adoption of similar resolutions by various city governments and commercial organizations. Recognition by the National Government was extended to each man who participated in the work in the form of a gold medal, bestowed under authority of the act of June 20, 1874. It is appropriate to state in this connection that none of the instances of loss of life during the year was due to the failure of the corps to perform their full duty.

## Sources of assistance to vessels.

Of the 1,743 vessels included in the tabular statement, 1,364, or 78 per cent, valued with their cargoes at \$6,032,935, and carrying 5,168 persons, were assisted only by the crews of the service; 307, valued with their cargoes at \$7,785,205 and having on board 3,270 persons, were assisted by the service corps, working in conjunction with revenue cutters, wrecking vessels, etc.; 33, valued with their cargoes at \$1,353,455, and carrying 376 persons, were assisted only by private agencies; while 39, valued with their cargoes at \$451,555, and carrying 227 persons, got out of danger unassisted or suffered destruction before assistance could reach them.

In addition to the services performed by the corps as already set forth, aid was extended to 288 vessels finding themselves in divers situations of need of assistance, though not in immediate danger. The assistance thus afforded consisted largely of emergency piloting, carrying persons to and fro between ship and shore, caring for sick and injured officers and seamen, etc.

Warning signals were given also to 182 vessels running into danger. Of these, 117 were steamers. On 147 occasions these warnings were given in the night. Of course no figures can be furnished showing the value of the vessels so warned or the number of persons they carried. It may be assumed, nevertheless, that the signals were instrumental in preventing the loss of much property and perhaps loss of life as well.

The net expenditure for the maintenance of the service during the year was \$2,204,074.50.

#### Flood service in the Middle West.

The spring of 1913 will be long remembered for its record of casualties due to storm and flood. The effects of high water, felt generally in Ohio and Indiana, extended also to portions of West Virginia, Kentucky, Illinois, Missouri, Tennessee, and other States farther south bordering upon the Mississippi River.

Under personal instructions of the Secretary, given when the news first reached Washington that life was in jeopardy in certain sections of the inundated territory, a number of life-saving crews, with the necessary boats and equipment, was placed at the disposal of State officers and others having charge of relief work. Seven crews in all performed flood service, namely, from the Louisville (Ky.), Cleveland and Lorain (Ohio), Michigan City (Ind.), and Jackson Park, Old Chicago, and Evanston (Ill.) stations. Their work took them to Dayton, Ohio; Covington and Dayton, Ky.; Fort Wayne, Peru, and Terre Haute, Ind.; and Cairo, Ill. The crews of the Cleveland, Lorain, and Louisville stations also rendered valuable assistance to victims of flood in their home cities. The seven crews rescued and succored while in the performance of flood duty a total of 3,509 persons, besides saving personal property, consisting mostly of live stock, to the value of \$30,000. A special report describing in detail the operations of the corps in the flooded districts is contained in House Document No. 94, Sixty-third Congress, first session.

## Power boats for rescue and salvage work.

From the field continue to come demands for power craft to replace certain of the larger types of service boats propelled by oars. This demand is being met as rapidly as appropriations will allow. At the close of the year 68 self-righting and self-bailing power lifeboats and 58 Beebe-McLellan self-bailing power surfboats (126 boats in all) were in use at the stations, 19 of the type last described having been put in commission during the year. Of the lifeboats, 28 are of the 36-foot length and 40 of the 34-foot length.

The marked growth of late years in the work of the service does not necessarily indicate a corresponding increase in the number of casualties to vessels along our coasts, but rather the ability of the corps, with their improved boats, to cover more territory than formerly. Of the 4,096 endangered persons taken ashore or to other places of safety by the life-saving crews during the year, 2,748 were transported in the power boats of the service.

## Miscellaneous services of station crews.

A considerable amount of miscellaneous work, unassociated with casualties to vessels, was performed by the station crews during the year. The service of this description of the most importance was as follows: The rescue of 106 bathers and swimmers and persons otherwise endangered; first-aid treatment given to 96 sick and injured persons; shelter and subsistence provided to 116 persons overtaken on the beaches by inclement weather; the saving, upon 157 occasions, of various articles of property, such as automobiles, horse-drawn vehicles, fishnets, lumber, livestock, aeroplanes, balloons, money, etc., caught in mire and quicksands, endangered by floods and high tides, lost, stolen, etc.; and assistance given in 47 instances at fires involving public and private buildings and other structures and forests.

### Establishment, rebuilding, and improvement of stations.

The stations of the establishment number 285, one station having been completed and manned during the year at Eagle Harbor, Mich. Their distribution is as follows: 203 on the Atlantic and Gulf coasts, 63 on the Great Lakes (including 1 at the Falls of the Ohio River, Louisville, Ky.), and 19 on the Pacific coast.

Reference was made last year to contracts entered into for rebuilding the Blue Point, Moriches, and Rockaway stations, on the coast of Long Island. This work was completed within the year, as was also the rebuilding of the station at Rockaway Point, on the same coast, and the station at City Point, Mass., to replace structures that were old and unsuited to present-day needs. The rebuilding of the station at Brazos, Tex., destroyed by hurricane October 16, 1912, was also completed during the year.

Contract was entered into for rebuilding stations at Nags Head and Poyners Hill, N. C., and for extensive improvements to the stations at Point Allerton, Mass., Ocean City, Md., and Burnt Island, Me. This work has all been completed, as has also the work of repair and construction mentioned in last year's report as having been begun at Cobb Island, Va. The rebuilding of the station at Cape Fear, N. C., begun within the year, is still under way.

# Retirement pay for the life-saving corps.

Retirement pay for the life-saving corps has been so repeatedly recommended in former reports and the crying need of such a provision of law so fully set forth that further adversion to the subject seems but a waste of words. It is felt to be a duty, however, to continue to speak.

The life-saving establishment enjoys a justly earned reputation for efficiency, but it may be truthfully said that its prestige has been held in the face of a steady deterioration of its personnel only because the improvement of its matériel—its boats and apparatus has not been hampered by the difficulties that have been encountered in keeping its stations properly manned.

While improved life-saving appliances have thus far largely offset the lowered physical standard and morale of the corps, due to the inability of the service to attract and hold able recruits, modern equipment and up-to-date methods can not much longer overbalance the deficiencies of a host of old and in many instances physically unsound men whom it is necessary to reenlist from year to year in order that the station crews may not be shorthanded.

Men of the sort the service needs have no incentive nowadays to enter an employment that takes the best they can give of youth, health, and zeal in an arduous and oftentimes hazardous routine of duty, then casts them aside like driftwood. The records show that many of those who do enlist leave the establishment after short periods of service, preferring to follow private pursuits in which, if their earnings are less certain, the chances for getting ahead appear to them to be better.

Years ago, when wages in the business world were not so high as at present and the cost of living was less, the young men reared on the coast looked to the Life-Saving Service as their natural field of work. In short, it offered them a career such as suited their train ing and preparation for life.

For more than a decade, however, the service has ceased to attract the class of men best suited to its peculiar demands. In preference to joining the corps they are migrating to the larger cities and becoming police officers, members of fire companies, street-car conductors, and motormen, etc. Strong of body as a rule, they have no difficulty in getting work in the city. Moreover, their changed environment enables them to give their families advantages not to be secured in isolated localities, and they frequently find themselves so situated that they may complacently regard the future, seeing before them that incentive to fidelity that the Life-Saving Service has been unable to hold out, namely, retirement for age or disability.

A bill in the interest of the corps is now pending in the Senate. It is believed that it will overcome the objections raised against former bills of the kind, in that it proposes to remove the life-saving crews from their present civilian status and place them under a new bureau to be known as the Coast Guard, said bureau to include the present Life-Saving Service and Revenue-Cutter Service. This bill provides for the rank and file of the life-saving establishment and for certain of its officers the same retirement and other benefits now enjoyed by the officers and enlisted men of the Revenue-Cutter Service.

As the work of the two services is similar, so far as relates to the saving of life and property from shipwreck, and as the personnel of the two bureaus are in constant cooperation in that line of endeavor, the joining of the two services, as proposed, and the granting of equal benefits to the officers and employees of each alike would seem to be a step in the interest of efficient and economical administration and deserving of the favorable consideration of Congress.

#### REVENUE-CUTTER SERVICE.

The following is a summary of the results of the operations of the Revenue-Cutter Service during the fiscal year 1913:

Lives saved or persons rescued from peril	327
Persons on board vessels assisted	2,755
Persons in distress taken on board and cared for	264
Vessels boarded and papers examined	25,079
Vessels seized or reported for violation of law	850
Fines and penalties incurred by vessels reported	\$180, 470. 00
Regattas and marine parades patrolled in accordance with law	39
Vessels to which assistance was rendered	179
Derelicts and obstructions to navigation removed or destroyed	31
Value of vessels assisted (including cargoes)	\$10, 607, 710. 00
Value of derelicts recovered and delivered to owners	\$18, 900. 00
Appropriation for 1913, including appropriation for repairs	2, 474, 857.00
Net expenditure for maintenance of the service, including repairs	\$2, 471, 532. 51
Estimated unexpended balance	\$3, 324. 49

To accomplish this there have been 25 cruising cutters and 18 harbor vessels and launches actively employed during the year.

The winter season of 1912-13 was of unusual mildness compared with the severe weather of the previous winter; but the occurrence of several gales along the coast, together with accidents to shipping from other causes, called forth the usual vigilance and activity of the fleet of revenue cutters, and the result of these operations of the service during the past fiscal year shows that \$10,626,610 worth of property has been saved from the perils of the sea and that there have been 327 lives saved or persons rescued from danger. As the total cost for the maintenance of the service during that period was \$2,471,532.51, the year's efforts represents a conservation of \$4.29 for each dollar thus invested by the Government.

Notwithstanding the unusually mild weather conditions of the past winter season, the vessels forming the patrolling fleet were kept busily cruising along the coast to aid ships in distress. The vicissitudes which beset seafaring men are of such an unending variety that even when fair weather prevails accidents of one kind or another occur frequently, and usually at the most unexpected time. Hence it is that the officers and men attached to these winter-cruising cutters are under a constant tension, not knowing at what moment their services may be called for in the saving of life and property. During the past winter season the patrol was so vigilant that there is no instance on record where a call for help went unheeded.

Of the 179 cases of assistance rendered during the fiscal year no two were exactly alike, and all are of interest to show the variety of dangers encountered by seafarers. The following are conspicuous examples of the aid furnished by the cutters and will in a manner illustrate the diversity of the assistance given to vessels in distress:

From October 21 to 26, 1912, the Seminole saved from destruction the steamship Berkshire, which was on fire off the coast of North Carolina. This steamer was loaded with a valuable cargo of highly inflammable materials, such as cotton, resin, pine tar, turpentine, etc., and it was only after the most persistent efforts on the part of the cutter that the fire was brought under control and finally extinguished. On the second day of the fire an accumulation of gases in the hold caused an explosion, which blew off the hatch covers and caused a panic among the passengers. This also was subdued by the officers and the crew of the Seminole, and the 21 passengers were then taken on board the cutter and later transferred in small boats to the Cape Lookout Life-Saving Station. The Berkshire and her cargo were valued at a half million dollars.

While the new revenue cutter *Miami* was en route to her future headquarters at Key West, Fla., on the afternoon of November 5, 1912, off Hillsdale Light, on the east coast of Florida, she sighted the lumber-laden three-masted schooner S. *M. Bentley*, waterlogged and helpless. Perched on the top of her cabin 12 people could be dis-

16726°—fi 1913—-5

cerned through the glasses. These proved to be eight members of the crew and the wife and three small children of the master of the schooner. A 10-inch hawser was sent to the wrecked vessel by means of the line-throwing gun, and the wreck taken in tow. The surfboat was then sent alongside, and after considerable difficulty the woman and children were taken off and brought on board the cutter for safety. For over 24 hours the shipwrecked people had had nothing to eat but raw ham, and just as the *Miami* reached them they had succeeded in starting a fire and were boiling some potatoes which they had picked up from the sea. Fresh provisions and water were furnished the men on the schooner, who remained on board to steer the disabled craft, while the cutter towed the vessel in safety to Key West, Fla.

In December, 1912, word reached the Treasury Department that the freight schooner *Rouse Simmons*, laden with Christmas trees for the approaching holidays, had left a small port in northern Michigan bound for Chicago and that at the time was a month overdue. The season of navigation on the Great Lakes had drawn to an end, nearly all the lighthouses had been closed and buoys removed, ice was forming and fog and snowstorms prevailed, and it was feared the missing vessel had been lost. There was a hope, however, that she might have blown ashore in some out-of-the-way place, and the cutters *Tuscarora* and *Mackinac* were directed to investigate. A thorough search was made of Lake Michigan and of the small islands in the northern part of that lake, but not a vestige of the vessel could be found. It is presumed the unfortunate craft foundered with all hands on board, thus adding another chapter to the great mysteries of the sea.

The somewhat unusual experience of a vessel needing assistance twice in less than a month occurred in the instance of the steamship *Alcazar*, from Trinidad, West Indies, laden with logwood, which was found by the *Seminole* off Cape Lookout Shoals Light Vessel, abandoned, on December 25, 1912. This steamer was badly listed to port, about  $45^{\circ}$ , and was down by the head. It was necessary to tow her stern first, and it was only after extreme difficulties on account of the yawing from side to side that she was finally towed in safety to Lookout Bight and there anchored. On January 5, 1913, the same steamer was driven ashore in Lookout Bight and was floated by the efforts of the *Seminole*, which cutter put officers on board to act as customs inspectors while the dutiable cargo was being removed.

After a three days' search, aided by radiograms from passing steamers, the Onondaga succeeded in locating the three-masted schooner Bessie Whiting, which during a severe gale off Cape Hatteras on January 4, 1913, had lost her mainsail and flying jib, had her main gaff broken, and the seams opened in the stern and amidships. On January 6 the Onondaga picked her up 20 miles northeast of Cape Charles Light Vessel and towed her to Hampton Roads, Va. During the gale one of the schooner's crew, while trying to steer the vessel, was thrown overboard by the steering wheel and lost; another who took his place had been seriously injured by the wheel, and arrangements were made by means of a radiogram from the Onondaga to give the injured man immediate treatment upon arrival off Old Point Comfort by the hospital ship Chase, anchored at that place.

On the morning of January 10, 1913, the Woodbury received word that the steamer Monhegan, with engine disabled and distress signals flying, was anchored off Middle Ledge on the rock-bound coast of Maine, and was gradually being forced toward the reef by the gale of wind then prevailing. The cutter went immediately to her assistance and succeeded in getting a line to the ill-fated steamer, which, with her crew and passengers—numbering 21 souls—had about abandoned hope of rescue. Although the Woodbury is a cutter now over 50 years old and had only a temporary steering gear, she succeeded in towing the disabled craft at a rate of 3 knots an hour to a place of safety. The master of the Monhegan stated in a letter to the commanding officer of the cutter that "through your assistance the Monhegan was saved from certain destruction."

## Removal of derelicts.

The duty of searching for and removing derelicts and other menaces to navigation has been continued throughout the year, with the result that 26 of these obstructions have been removed or destroyed, and 5 derelicts, representing a value of \$18,900, were recovered and restored to their owners.

Reference was made in the last annual report to the fact that, at the request of the War Department, sunken obstructions to navigation were removed by the Revenue-Cutter Service. Jurisdiction over such obstructions is vested by law in the War Department, and hitherto delays have been occasioned in removing these from the paths of commerce, owing to the official correspondence necessary between the Engineer Corps of the War Department and the Revenue-Cutter Service, whereby the cutters could receive specific authority to act as agents of the Secretary of War for the removal of the obstructions. After conferences with the War Department officials, a set of regulations was agreed upon and promulgated under date of April 2, 1913, which secured close cooperation in these matters, and provided for the prompt action of the commanding officer of any revenue cutter in the removal of sunken obstructions without preliminary correspondence.

### Ice patrol.

The loss of the *Titanic* by collision with an iceberg on April 16, 1912, called the attention of the maritime world to the necessity for providing some systematic means of giving to the trans-Atlantic steamers approaching the regions traversed by the ice in the spring and summer months timely warning as to the exact location of dangerous bergs and fields of ice. The United States Government, always among the first in humanitarian enterprises, maintained an efficient ice patrol by means of two scout cruisers of the Navy during the months of May and June, 1912. No naval vessels were available for this duty during the spring months of the current year, and therefore, at the earnest solicitation of the large maritime exchanges of this country, two revenue cutters, the *Seneca* and *Miami*, were detailed by the Secretary of the Treasury for the patrol of the ice regions.

Using the port of Halifax, Nova Scotia, as a base for coal and supplies, these two vessels made alternate cruises of 15 days in the ice danger zone and maintained a continuous patrol during the months of April, May, and June, 1913. At the end of this period the reports from the vessels indicated that the icebergs and ice floes had ceased to be a menace to the trans-Atlantic steamer lanes, and the patrol was discontinued for the season as no longer necessary.

## Protection of the fur seal.

During the months of July, August, and September, 1912, and again in May and June, 1913, an efficient patrol of the Bering Sea and North Pacific Ocean was maintained for the purpose of enforcing the provisions of law and the convention entered into by the United States, Great Britain, Russia, and Japan for the preservation of the fur seal and the sea otter. The cutters employed in 1912 were the *McCulloch, Tahoma*, and *Manning*, and for the season of 1913 the *Tahoma, Manning*, and *Unalga* were detailed for this duty.

## Enforcement of navigation, anchorage, and other laws.

Twenty-five thousand and seventy-nine vessels were boarded and examined during the year in enforcing the navigation and motor-boat laws. Of these, 850 were reported for violation of law, involving fines in the total sum of \$180,470. Practically the same number of vessels were boarded in 1913 as in 1912, and the fact that but 850 were found violating the law in 1913, as against 1,208 in 1912, is gratifying evidence of an increasing regard for the requirements of the law on the part of the owners and the masters of vessels.

The duty of enforcing the law and regulations governing the anchorage of vessels in the harbors of New York and Chicago and the Kennebec River has continued during the year. The *Manhattan* and *Guide* were assigned to this work in New York Harbor and the launch *Patrol* in Chicago. The establishment of definite anchorage areas in these crowded harbors has added materially to the safety of navigation and greatly facilitated traffic in these waters, and the recommendation of last year is renewed, namely, that similar laws governing the anchorage of vessels be enacted for all the large seaports.

The important duty of regulating the movements of vessels through the St. Marys River, Mich., has been continued, requiring the use of the third-class cutter *Mackinac* and two launches. In addition, three lookout stations have been maintained at important points in the river to observe and regulate the speed of passing vessels, and during the past year it has been necessary to establish a fourth station, at Brush Point. All of the commerce between Lake Superior and the lower lakes, aggregating 72,472,676 tons for the season of 1912, must pass through the St. Mary's River and the connecting canal systems. During the season of 1912 the total number of vessels passing through the locks was 19,691, and the greatest number passing through in one day was 124—on September 24, 1912. There was at no time a congestion approaching a blockade, except from ice, on December 12 and 13, and the number of vessels delayed at that time was small.

At the request of the Secretary of Commerce, vessels or officers were detailed in 39 instances to enforce the regulations for the safety of life during regattas or marine parades.

## Proposed consolidation of the Revenue-Cutter and Life-Saving Services as the "Coast Guard."

There exist in the Treasury Department two distinct organizations, the Revenue-Cutter Service and the Life-Saving Service, whose main functions are practically identical, i. e., the saving of life and property from the perils of the sea.

The magnitude of these two services and the net results of their operations in rescue work may be summarized as follows:

REVENUE-CUTTER	SERVICE.
----------------	----------

Number of ships:	
Seagoing	. 25
Harbor tugs and launches	
Total	. 44
Authorized personnel (commissioned officers, warrant officers, and en	-
listed men)	
Annual cost of maintenance (1913).	. \$2, 471, 532
Lives rescued from peril (1913)	
Value of vessels and cargoes assisted (1913)	\$10, 626, 610

#### REPORT ON THE FINANCES.

#### LIFE-SAVING SERVICE.

Number of stations	279
Authorized personnel (superintendents, keepers, surfmen)	2, 255
Annual cost of maintenance (1913)	\$2, 246, 306
Lives rescued from peril (1913)	4,096
Value of vessels and cargoes assisted (1913)	\$6, 032, 935

#### History.

The Revenue-Cutter Service was founded in 1790, and was the first regularly organized armed maritime service of the Government. It has taken a conspicuous part in every maritime war in which this country has been engaged, and its military status has been fixed by Congress. Its officers and men have the benefits of retirement, military titles, courts-martial, and they rank with officers of the Army and Navy.

The Life-Saving Service was originated in the Revenue-Cutter Service and for several years after its inception was operated under its direction. It became a separately organized service in 1878, but since that time officers of the Revenue-Cutter Service have been detailed as the inspectors and drill masters of the Life-Saving Service.

#### Coast Guard.

It is proposed to unite these two services under one administrative head into an organization to be known as the Coast Guard, which, while continuing its present humanitarian functions in time of peace, will have a military status, and become a first naval reserve in time of war. The principal advantages to be derived from this consolidation will be:

• (a) Increased efficiency in the saving of life and property by closer cooperation between the *sea* life-savers and the *coast* life-savers.

(b) Simplification of the administrative functions.

(c) A retired list for the highly deserving men of the Life-Saving Service, whose hazardous duties from the modern viewpoint of the public entitle them to this consideration on the part of the Government.

(d) The creation of a first naval reserve of approximately 4,100 trained and experienced men, which simply by an Executive order will be immediately transferred to the naval forces of the Government either in war or peace, whenever the exigency requiring such action may arise.

### Existing conditions.

To attract competent men in any branch of human endeavor the pay and emoluments offered must be commensurate with the work to be performed and the risks to health and life which must be incurred. The rates of pay in the Life-Saving Service can not with

Digitized for FRASER http://fraser.stlouisfed.org/ justice be fixed solely with reference to the actual work performed, for in a hazardous calling of this kind there must be considered the ever-present risk of injury, the possible loss of life, and the necessity for providing for the declining years when the human physique becomes, through advancing age, incapable of standing the strains incident to such a strenuous occupation. Prior to 1908, owing to the small pay and lack of a retired list, the ranks of the Life-Saving Service became much depleted. Congress by act of March 26, 1908, sought to remedy this condition by a slight raise of pay for keepers and surfmen. For a brief time some improvement was apparent, but at present the conditions are even worse than before.

Good men are continually leaving the service because they are able to earn a greater income in civil pursuits, and the Life-Saving Service offers no advantage to offset this difference in pay. These conditions make it more and more difficult to secure even sufficient applicants for current vacancies, and it is necessary to employ temporary men, picked up by the keepers from such material as can be obtained from among the unemployed in their vicinity. These men are too frequently of the ne'er-do-well, shiftless, and incompetent type, unable or unwilling to qualify for regular enlistment; men who will remain in the service for comparatively short periods, necessitating frequent changes and the consequent training of new men. Their influence in the crews is bad and it is difficult to hold them amenable to discipline, in consequence of which the efficiency of the stations is inevitably lower, and the extra work and responsibility thrown on the keeper and the regular members of the crew are sources of discontent and friction. The presence of such untrained men in the boats adds greatly to the perils of the rescue work at wrecks, often endangering both the lives of the crew and of those whom it is sought to save. In many of the life-saving stations the best qualified and most reliable men are those who have reached such an age as to place them beyond the probability of being able to secure other regular employment, and who are retained in the service solely for the reason that they, even in their advanced years, are better than such new men as can be obtained with the small inducements offered.

During the past fiscal year about 11½ per cent of the total force have either been discharged for physical disability or declined to continue in the service under existing conditions. In several of the districts it appears to be impossible to secure sufficient men to fill the current vacancies, and in one district particularly there are 58 vacancies and not a man on the eligible list. It is believed that the organization of the Coast Guard as proposed will remedy the existing evils and save this highly meritorious branch of the public service from decadence. The experience of the Revenue-Cutter Service bears out this belief, as since the enactment of legislation giving its officers and men the benefits of retirement this arm of the Government has increased its efficiency more than fourfold.

## Cost.

Naturally such an increase in efficiency must result in an increased cost of maintenance, but the advantages gained will be greatly in excess of such increased cost, and reference is again made to the experience of the Revenue-Cutter Service in support of this assertion. For example, during the four fiscal years 1898 to 1901 (prior to the enactment of any remedial legislation) statistics show that for each dollar invested in that service it was instrumental in saving \$2.39 worth of marine property. For the corresponding period of the next decade, 1908 to 1911, after Congress had given the service a retired list and increased pay, an investment of \$1 saved \$4.43 of the floating property belonging to the public.

The Senate of the United States on two occasions by a unanimous vote has passed a bill giving the Life-Saving Service a retired list as a separate organization, but the contemplated legislation has on both occasions failed in the House of Representatives, owing to the reluctance of that body to grant a retired list to a branch of the *civil* force of the Government. The increased cost, as estimated, on account of the requirements of that bill, would have been approximately \$450,000.

The legislation as proposed for the formation of the Coast Guard would, on account of the *military* status it gives to the Life-Saving Service, in all probability, remove the objection heretofore made by the House, and the net increased cost over existing conditions would be only \$397,700.

## Special cruises.

In September last the new revenue cutter Unalga, built at Newport News, Va., and destined for service in Alaskan waters, was dispatched to her headquarters, via the Suez Canal. This route to the Pacific coast was selected rather than the shorter one via Cape Horn for the reason that the excessive price of coal along the shorter route made the total cost of fuel less over the longer route. November 10, 1912, shortly after she had left Port Said, instructions were cabled to the American consular agency at Suez to intercept the vessel by radio and transmit orders for the Unalga to return to Port Said and await further orders. This interruption of the voyage was made at the request of the State Department, owing to the fact that an unsettled state of affairs existed in Turkey, and there was no United States naval vessel in those waters. Subsequent orders were cabled to the commanding officer to report by radio to the American ambassador at Constantinople and, if the latter deemed it advisable, to proceed to such ports in Turkey as he might designate. The cutter remained at Port Said in constant readiness to answer any call from the ambassador until December 16, 1912, when the arrival of the U. S. cruiser *Montana* in those waters made the presence of the *Unalga* no longer necessary, and she was directed to resume her voyage. The vessel finally arrived at Port Townsend, Wash., March 23, 1913, and began immediate preparations to take up her duties in connection with the Bering Sea patrol for the enforcement of the sealing convention.

The *Thetis* made several cruises to Lysianski, Necker, and Bird Islands, and French Frigate Shoals, transporting to and from these remote insular possessions in the Pacific Ocean a party of scientists and Government agents sent out from the Department of Agriculture for the purpose of obtaining information relating to, and taking steps to conserve, the bird life on these reservations.

At the request of the Department of Justice the *Thetis* was again placed at the disposal of the "floating court" in the spring of 1913, and was assigned the duty of transporting the United States District Court and its attachés to remote places in southern and southwestern Alaska, in order to minimize the expense of administering the law in these out-of-the-way places.

The Bear was dispatched to precede the fleet of merchant vessels bound to Nome at the opening of navigation in the spring of 1912 in order to safeguard navigation by developing the extent and condition of the ice fields and keeping the approaching steamers advised by radio of dangerous areas. This vessel carried to northern Alaska, at the request of the Postmaster General, the large accumulation of winter mail, aggregating 12 tons. After the ice had passed out of the Bering Sea and open navigation was assured, the cutter made her annual cruise through the Arctic Ocean to Point Barrow, visiting all the villages and Government schoolhouses in those remote districts, assisting shipping, and overlooking Government interests in general. The Department of Justice appoints one officer of the Bear a United States commissioner and another officer a deputy United States marshal in order that court may be held in minor cases, and thus avoid the considerable expense of transporting such minor offenders to Nome for trial. After the cruise through the Arctic was completed, the Bear returned to the Bering Sea and remained in the vicinity of Nome until the close of navigation in November, 1912, to render such assistance as might be needed to vessels during those stormy months.

#### New vessels and repairs.

The new cutters Unalga and Miami have during the year taken up their duties on the stations for which they were constructed, the former with headquarters at Juneau, Alaska, and the latter at Key West, Fla. The old cutters Rush and Forward have, in accordance

with the requirements of law, been condemned, advertised for sale, sold to the highest bidder in each instance, and stricken from the list.

During the year the old practice ship *Chase* has also been stricken from the list. This vessel, a bark-rigged sailing craft, was used for many years as a school of instruction for the line cadets of the service, and nearly all the present line officers on the active list have secured their preliminary training on this vessel. She had, however, outlived her usefulness as a practice ship, and by direction of the Secretary of the Treasury was altered into a quarantine vessel and transferred to the Public Health Service, under which branch of the Treasury Department she is now performing service at Fortress Monroe, Va. No other changes in the list of vessels have occurred during the year.

Attention is again invited to the urgent necessity of providing new ships to supply the pressing needs of the service. Unfortunately a bill to provide four new vessels to replace the Perry, Woodbury, Manhattan, and Winona, although receiving the unanimous approval of the House Committee on Interstate and Foreign Commerce, failed of passage at the last session of Congress. The bill has since been reintroduced during the present session of Congress, and, as the necessity for these new vessels is even greater than it was a year ago, it is earnestly hoped that the bill will be passed at the earliest possible In order to expedite the construction of these vessels, so time. badly needed, plans and specifications for the new craft are now being prepared by the technical officers having charge of such work. The Woodbury, Manhattan, and Winona are in such condition that. it is extremely difficult to keep them up in such a state as to enable them to perform any service. The Perry, as previously reported, was lost in the Bering Sea during the summer of 1910, and her absence makes it almost impossible to perform efficiently the duties required of the service on the Pacific coast.

Current repairs to the vessels of the service have been made as the necessities for them became apparent and, in addition thereto, extensive repairs have been made to the Manning, Calumet, and Morrill. The former vessel was reboilered and additional bunkers added. The main engine was altered to the end that a greater ratio of expansion might be obtained. By these improvements the steaming radius of this vessel has been nearly doubled, a most desirable feature for the Bering Sea cruising, and this too without reducing the maximum speed of the cutter. The Calumet was provided with a new boiler and at the same time fitted with oil-fuel burning apparatus. The entire absence of smoke incident to this change and her readiness to respond to hurry calls makes this fuel an ideal one for vessels on boarding duty. The Morrill was given a thorough overhauling, including new decks, new house, new masts, and the installation of radio apparatus.

Many of the older vessels of the service need extensive repairs to both hull and machinery, but the appropriation allowed annually (only \$175,000 for the entire service) makes it impossible to provide these repairs on more than two or three vessels each year and at the same time keep up the current repairs of a minor nature. It is hoped during the current fiscal year to make repairs to the *McCulloch* similar to those made to the *Manning* during the last year. Such repairs alone cost upward of \$60,000 for one vessel, a considerable proportion of the total allotment for the entire service, but the gains in the economy of operation and the efficiency consequent to the greatly enlarged steaming radius make the investment an excellent one.

### Service depot in Alaska.

It is recommended that a permanent depot be established either at Dutch Harbor or Unalaska, Alaska, as a base for the operations of the service in northern waters. For many years past one or the other of these places, located about 1 mile apart, has been used as a temporary base for the Bering Sea patrol fleet and other vessels in Alaskan waters; in fact, owing to their geographical location and their safe harbors they are the only ports that can be used for this purpose. As the growing importance of Alaska, the increase in its shipping, and the duty of enforcing the convention for the prevention of pelagic sealing will require such a supply base for years to come, either of these two ports must continue to be so used, and in the interest of economy the Government should have its own station at one of these places for the storage of necessary fuel and supplies.

At the present time coal for the fleet must be purchased practically without competition, since there is but one concern at each of these ports from which fuel can be obtained. During the past 2 years coal has cost at Unalaska \$12 a ton and fresh meat 30 cents a pound. The average amounts of these items purchased annually are 4,500 tons of coal and 30,000 pounds of fresh meat. Good coal can be purchased at the mines and delivered at Unalaska for about \$7 a ton. Allowing \$1 for handling, it will be seen that a saving of \$4 a ton, or \$18,000 annually, would be effected in the matter of coal alone if the Government had its own station at Dutch Harbor or Unalaska.

There are other Government vessels belonging to other departments which are obliged to coal at Unalaska, and the total saving to the Government annually in the cost of coal would not be less than \$20,000.

Dutch Harbor would be the better location, because of its larger harbor, but if the Government could not acquire at a reasonable cost the site at that place, now owned by the North American Commercial Co., consisting of about 40 acres, with wharf, storehouses, and other buildings, a reservation could be had at Unalaska, about 1 mile to the southward, and the wharves and buildings now occupied by the Alaska Commercial Co. could be purchased and put in proper condition.

# Saving of life and property on interior navigable waters.

In view of the beneficial results of the activities of the Revenue-Cutter Service in the saving of life and property along the Atlantic, Gulf, and Pacific coasts and on the Great Lakes, the question naturally arises why these benefits should not be extended to the inhabitants and shipping interests along the navigable waters in the great Middle West and Southwest.

The annual overflowing of the Ohio and Mississippi Rivers and their tributaries, the great loss of life and property incident thereto, and the necessity, as evidenced last year, of sending from the Great Lakes and the Atlantic ports skilled men and life-saving apparatus to aid in saving lives in the inundated regions, presents a legitimate field for the operations of the Revenue-Cutter Service. Three typical light-draft river steamers should be constructed and equipped as revenue cutters; each of these craft provided with not less than four powerful motor lifeboats and equipped with such other life-saving appliances as may be necessary for work along the rivers. During the flood seasons these cutters should be directed to follow the crest of the flood from Pittsburgh down to the mouth of the Mississippi. and there is but little doubt that their services would be of great value in rescuing lives and property and in distributing food and clothing to marooned people. During flood times surgeons could be detailed to the cutters to render medical aid where needed. During the periods when floods are not raging, the three cutters could be very efficiently used in patrolling these inland waters for the enforcement of the navigation and motor-boat laws and in rendering aid to vessels in distress.

Headquarters should be assigned to these cutters at Louisville or Cincinnati on the Ohio, at St. Louis on the upper Mississippi, and at Helena, Ark., or Vicksburg, Miss., on the lower Mississippi.

Cutters of this type can be constructed and properly equipped for \$80,000 each, or a total of \$240,000 for the three. The annual cost of maintenance would be approximately \$80,000 for the three cutters, a small sum to expend for the saving of life and property when compared with the vast sums annually lost through these floods.

This matter is earnestly submitted for consideration.

# Appointment of cadets.

Some relief from the critical situation regarding the recruiting of its commissioned personnel, which confronted the service during the past year, was afforded by a clause in the sundry civil bill for the fiscal year 1914, which provided for the appointment of 7 cadets dur-

ing the current year. Even with these 7 appointments, there still exist 7 vacancies which can not be filled at the present time. It is therefore earnestly recommended that 7 additional cadetships be authorized for the fiscal year 1915, making a total of 14 cadets and cadet engineers for that year. It is also urged that in 1916 permanent authorization be made for 21 cadets and cadet engineers. The record of the past shows that 7 cadets is the average number needed each year to fill vacancies, and as three years is the maximum period of probation for cadets, there should be 21 cadets and cadet engineers under instruction all the time to provide for the vacancies which occur in the authorized personnel of 242 officers of all grades.

# Inadequate appropriations.

Reference was made in the last annual report to the fact that notwithstanding the constantly increasing duties required of the Revenue-Cutter Service, the appropriations for the maintenance of the service during the past two or three years have been reduced. In 1911, a horizontal cut of \$100,000 was made, to be followed by a still further reduction of \$28,000 for the fiscal year 1913, and this despite the almost universal advance in the cost of fuel, rations, and supplies. The statement was made in the last annual report that this condition would inevitably force an application to Congress for a deficiency appropriation, and it has been found necessary to obtain deficiency funds on two occasions in order to carry the service through the last fiscal year. In addition to this, and despite the fact that substantial economies were effected by purchasing supplies through the Navy contracts, other methods had to be adopted to keep the expenditures within the limit of the sums appropriated. Therefore, the crews of certain cutters on the Atlantic coast were reduced and the activities of these vessels restricted during the months of May and June. These expedients are not in the true interests of economy, as they actually cripple the service by preventing the efficient performance of its legitimate functions. For the current fiscal year an increase of \$40,000 over that of the appropriation for 1913 was allowed, but even with this increase the authorized appropriation is much less than the total amount for which carefully prepared estimates were submitted, and in all probability the expedients resorted to last year will have to be repeated before the close of the current fiscal year. It is therefore earnestly requested that Congress be urged to allot a sufficient amount for the maintenance during the next fiscal year, to the end that the service may be able to perform the duties required of it.

#### REPORT ON THE FINANCES.

#### DIVISION OF LOANS AND CURRENCY.

## Public-debt transactions.

Changes in interest-bearing debt of the United States:

Amount outstanding June 30, 1912.	\$963, 776, 770
Postal savings bonds, third series, dated July 1, 1912	854, 860
Postal savings bonds, fourth series, dated Jan. 1, 1913	1, 074, 980
Amount outstanding June 30, 1913.	965, 706, 610

## Interest on registered bonds.

Interest amounting to \$20,996,243.50 on registered bonds of the United States became due, involving the issuance of 129,487 interest checks.

Transfers, exchanges, and redemptions.

Amount transferred and exchanged\$108, 624, 140Amount redeemed (matured debt on which interest had ceased)57, 560

Insular and District of Columbia loans.

The following table shows the changes in these loans:

· · ·	Philippine Islands.	Porto Rico.	District of Columbia.
Amount outstanding June 30, 1912 Increase Decrease.		\$425,000 1,100,000	\$8, 258, 600 647, 750
Amount outstanding June 30, 1913	16, 125, 000	1, 525, 000	7, 610, 850

Interest on the above loans amounting to \$949,840.25 became due and was certified to the Treasurer for payment.

### Circulation.

The changes in the amounts of the several kinds of money in the United States outside the Treasury between November 1, 1912, and November 1, 1913, are shown in the table following:

Comparative statement showing the changes in circulation.

(),,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,	In circu	In circulation—		<b>T</b>
Classes.	Nov. 1, 1912.	Nov. 1, 1913.	Decrease.	Increase.
Gold coin Standard silver dollars. Subsidiary silver. Gold certificates. Silver certificates. Treasury notes, act of July 14, 1890 United States notes. National-bank notes.	73,599,090 151,580,472 943,545,429 481,749,136		\$1,669,405 242,013	\$3,863,99 413,06 8,905,71 77,906,45 967,97

<sup>1</sup> As shown by reports to Comptroller of the Currency dated Aug. 9, 1913.

#### DIVISION OF PUBLIC MONEYS.

The monetary operations of the Government have been conducted through the Treasurer of the United States, 9 subtreasury offices, the treasury of the Philippine Islands, the American Colonial Bank of Porto Rico, and 1,575 national bank depositaries.

#### REPORT ON THE FINANCES.

The amount of public moneys held by the bank depositaries on June 30, 1913, including funds to the credit of the Treasurer's general account and United States disbursing officers, was \$76,263,615.06, an increase since June 30, 1912, of \$27,757,429.29. On June 30, 1913, there were 850 regular depositaries and 691 temporary depositaries; 218 were designated during the year and 34 discontinued. On November 1, 1913, the number was 1,621, and the amount of public moneys held by them was \$98,069,011.43.

#### DIVISION OF BOOKKEEPING AND WARRANTS.

The fiscal transactions recorded in this division during the year ended June 30, 1913, were as follows:

The books of the division have carried open receipt and appropriation accounts during the year to the number of 7,500, which have been charged and credited with all warrant entries affecting the receipts and disbursements.

Approximately 7,600 active accounts of collecting and disbursing officers were carried in the current personal ledgers of the division, recording their transactions as to deposits of public moneys and expenditures made from moneys advanced to them.

The method formerly used of recording receipt and pay warrants in permanent registers in manuscript has been replaced by a system of loose-leaf registers, typewritten records therefor in quadruplicate being produced at one writing, one copy for this division and separate copies for similar records in the offices of the Comptroller of the Treasury and the Treasurer of the United States, where books in manuscript have heretofore been kept. Additional copies of the paywarrant schedules are also furnished the Auditor for the Treasury Department for information in stating the quarterly accounts of the Treasurer of the United States, and the original sheets of receipt and repay warrants are furnished the several auditors for their use in settling the accounts of fiscal officers.

A total of 113,716 receipt and pay warrants, aggregating \$3,926,-923,553.16, was issued during the year. Of this number 30,952 were for the receipt of moneys into the Treasury, and 82,764 for disbursements from the Treasury.

Of the above sum, warrants in the amount of \$1,496,215,653.88, representing receipts of \$747,512,079.84 and disbursements of \$748,703,574.04, including public-debt items, were credited and charged respectively to the general fund of the Treasury; warrants representing \$2,022,742,200 were issued for public-debt receipts and redemptions not affecting the general fund of the Treasury, the moneys involved being held for the redemption of certificates and notes for which the funds are respectively pledged; and warrants rep-

resenting \$407,965,699.28 were issued for adjustment of appropriation accounts, largely for the naval "General account of advances."

The following table exhibits the totals of the receipts and disbursements of the year for the general fund, details of which are shown on pages 18 to 23.

	Receipts.	Disbursements.	Excess of receipts (+) or of dis- bursements (-).
Ordinary. Panama Canal Public debt.	\$724, 111, 229. 84 23, 400, 850. 00	\$682, 770, 705. 51 41, 741, 258. 03 24, 191, 610. 50	+\$41,340,524.33 - 41,741,258.03 - 790,760.50
Total	747, 512, 079. 84	748, 703, 574. 04	- 1, 191, 494. 20

This shows a surplus of ordinary receipts over ordinary disbursements of \$41,340,524.33 and an excess of all disbursements over all receipts of \$1,191,494.20, taking into account public debt transactions and payments from the general fund of the Treasury during the year of \$41,741,258.03 for the Panama Canal without sales of bonds.

State bonds and stocks owned by the United States.

The following statement shows the nonpaying State bonds and stocks, formerly in the Indian trust fund, now in the Treasury, belonging to the United States:

	Principal.	Interest coupons due and unpaid.
Louisiana. North Carolina. Tennessee.	\$37,000.00 58,000.00 335,666.663	\$17, 220.00 88, 140.00 157, 830.51
Total	430, 666. 66 <del>3</del>	263, 190. 51

A history of these State stocks and bonds is given in House Document No. 263, Fifty-fourth Congress, second session.

#### SECRET-SERVICE DIVISION.

There were 6 counterfeit-note issues during the year, which shows a marked decrease compared with 1912, when there were 24; of these 6 but 1 was at all dangerous. The total representative values of notes and coins captured during the year was \$42,000, as against \$39,000 for 1912. There were 365 arrests, against 324 in 1912.

The note raiser was unusually active, 58 of the 67 persons charged with violating sections 148 and 151 of the Penal Code being note raisers or passers of raised notes. The Pacific coast suffered most from the operations of these offenders, but since the arrest in January

16726° -- FI 1913-----6

#### REPORT ON THE FINANCES.

of 1 of the principal offenders and 15 confederates at San Francisco, Cal., and Portland, Oreg., that section of the country has experienced relief in this respect. While coin counterfeiters represent more than 60 per cent of the total arrests and there was an increase in the amount of counterfeit coins captured during the year, the "coiner" is apparently abandoning the more difficult and expensive method of striking his coins from dies in favor of the easier and cheaper molding process. There were 16 dies captured during the year, as against  $25\frac{1}{2}$  in 1912, while 184 molds were seized, compared with 119 the previous year.

#### DIVISION OF PRINTING AND STATIONERY.

## Printing and binding.

The appropriations, expenditures, and unexpended balances for the fiscal years 1911, 1912, and 1913, were as follows:

Year	Appropri- ated.	Expended.	Unex- pended balance.
1911	\$350,000	\$332, 827	\$17, 173
1912	360,000	328, 303	31, 697
1913	340,000	294, 403	45, 597

The above discloses a gradual reduction in expenditures on account of printing and binding. In 1911 there was an expenditure of \$332,827; in 1912, \$328,303; and in 1913, \$294,403. The number of requisitions on the Public Printer was also correspondingly reduced. In 1911 there were 7,327; in 1912, 5,947; while in 1913 there were but 5,147. The foregoing reduction resulted from a careful supervision of the work and in no way interfered with the efficiency of the service.

The amounts expended for printing and binding by bureaus, offices, and divisions during the fiscal year 1913 were as follows:

Office of the Secretary:

Secretary and Assistant Secretaries	\$10, 114. 82
Chief clerk and superintendent	506.95
Disbursing clerk	364.05
Division of Appointments	612.98

### Stationery.

Three hundred and thirty-six principal items of stationery were ordered and issued during the year, based on 2,563 requisitions from 34 bureaus, offices, and divisions of the department in Washington and 9 outside Treasury services, including among others the Customs, Internal Revenue, Subtreasury, Life-Saving, and Public Health Services. Envelopes to the number of 15,194,000 were required to supply the needs of the service during the year.

Statements showing the appropriation and stock accounts for the fiscal year 1913 and a comparison of the issues for the years 1912 and 1913 follow:

### Check paper.

The appropriation for the purchase of paper to be used in printing checks for the use of the disbursing officers of the Government was \$9,000. The authorized expenditures from this appropriation during the year were \$8,830.64, leaving a balance of \$169.36.

Acting on the recommendation of the Chief of the Division of Printing and Stationery, the administration of the appropriation for check paper was transferred to the Bureau of Engraving and Printing, to take effect July 1, 1913.

#### Postage.

The appropriation for postage to prepay matter addressed to Postal Union countries and for postage for the Treasury Department for the fiscal year 1913 was \$1,000. Expenditures from the appropriation amounted to \$961.53, with a resulting balance of \$38.47.

### Materials for bookbinder.

The expenditures from the appropriation of \$250 for materials for the department bookbinder for the fiscal year 1913 amounted to \$247.93, leaving a balance on hand of \$2.07.

## Duplicating work.

During the year 918 requisitions were made for duplicating forms in the duplicating section of the division. This plant is used for duplicating circulars, small forms, etc., on which quick delivery is necessary. In addition to this feature, the plant has proved quite an economy, saving the cost of printing at the Government Printing Office which would otherwise have been required.

## Department advertising.

The number of authorizations for advertising issued to newspapers and periodicals during the year was 3,234, and vouchers for the same were examined and certified to the auditor for settlement. The expenditure for advertising was approximately \$18,500. It was in large part for soliciting bids for the purchase of building sites and for the erection of public buildings and their equipment and maintenance, though a portion of it was for supplies for the Revenue-Cutter, Life-Saving, and Public Health Services, and the notices of seizures, unclaimed goods, and sales authorized to be made by collectors of customs and internal revenue in connection therewith.

### Addressing machines.

The addressing machines operated in the division for the benefit of the department have proved both useful and economical. On these machines were addressed during the year many thousands of envelopes. They are especially useful and convenient in hurried work and in emergencies, as in the case of bank calls by the Comptroller of the Currency, the date and hour of which are unknown except to the comptroller, and in connection with the issuance of hurried and important financial statements by the Secretary.

LEGAL-TENDER NOTES.			:	1			
he act of February 25, 1862 (12 Statutes, 346), authorized the issue of \$150,000,000 United States notes, not bearing interest, payable to bearer at the Treasury of the United States, and of such denomi- nations, not less than five dollars, as the Secretary of the Treasury might deem expedient, \$50,000,000 to be applied to the redemption of demand notes authorized by the act of July 17, 1861; these notes to be a legal tender in payment of all debts, public and private, within the United States, except duties on imports and interest on the public debt, and to be exchangeable for 6 per cent United States bonds. The act of July 11, 1862 (12 Statutes, 552), authorized an additional issue of \$150,000,000, of such denominations as the Sec- retary of the Treasury might deem expedient, but no such note should be for a fractional part of a dollar, and not more than \$35,000,000 of a lower denomination than five dollars; these notes to be a legal tender as before authorized. The act of March 3, 1863 (12 Statutes, 710), authorized an additional issue of \$150,000,000, of such denominations, not less than one dollar, as the Secretary of the Treasury might prescribe; which notes were made a legal tender as before authorized. Treasury notes might be exchanged for United States bonds to July 1, 1863. The amount of notes authorized by this act were to be in lieu of \$100,000,000 authorized by the resolution of January 17, 1863 (12 Statutes, 822). The act of May 31, 1878 (20 Statutes, 87), provides that no more of the United States legal-tender notes shall be canceled or retired, and that when any of said notes are redeemed or received into the Treasury under any law, from any source whatever, and shall belong to the United States, they shall not be retired, canceled, or destroyed, but shall be reissued and paid out again, and kept in circulation.

The act of March 14, 1900, provides that United States notes, when presented to the Treasury for redemption, shall be redeemed in gold coin of the standard fixed in said act, and that in order to secure the prompt and certain redemption of such notes it shall be the duty of the Secretary of the Treasury to set apart in the Treasury a reserve fund of one hundred and fifty million dollars in gold coin and bullion, to be used for such redemption purposes only, and that whenever and as often as any of said notes shall be redeemed from said fund it shall be the duty of the Secretary of the Treasury to use said notes so redeemed to restore and maintain the reserve fund so established—first, by exchanging the notes so redeemed for any gold coin in the general fund of the Treasury; second, by accepting deposits of gold coin at the Treasury or at any subtreasury in exchange for such notes; third, by procuring gold coin by the use of said notes in accordance with the provisions of section 3700 of the Revised Statutes of the United States. The above-mentioned act also provides that if the Secretary of the Treasury is unable to restore and maintain the gold coin in the reserve fund by the fore-going methods, and the amount of such gold coin and bullion in said fund shall at any time fall below one hundred million dollars, it shall be his duty to restore the same to the maximum sum of one hundred and fifty million dollars by borrowing money on the credit of the United States, and for the debt so incurred to issue and sell coupon or registered bonds of the United States bearing interest at the rate of not exceeding three per centum per annum, payable quarterly, the bonds to be payable at the pleasure of the United States after one year from the date of their issue, and to be payable, principal and interest, in gold coin of the present standard value, the gold coin received from the sale of said bonds to be exchanged for an equal amount of the notes redeemed and held for exchange, and the Secretary of the Treasury may, in his discretion, use said notes in exchange for gold, or to purchase or redeem any bonds of the United States, or for any other lawful purpose the public interests may require, except that they shall not be used to meet deficiencies in the current revenues.

The act of March 4, 1907, section 2, provides that whenever and so long as the outstanding silver certificates of the denominations of one dollar, two dollars, and five dollars, issued under the provisions of section seven of an act entitled "An act to define and fix the standard of value, to maintain the parity of all forms of money issued or coined by the United States, to refund the public debt, and for other purposes," approved March fourteenth, nineteen hundred,

at not less than par, in coin, either of the description of bonds of the United States described in the act of July 14, 1870 (16 Statutes, 272), for the purpose of redeeming, on and after January 1, 1879, in coin, at the office of the assistant treasurer of the United States in New York, the outstanding United States legal-tender notes when presented in sums of not less than fifty dollars.							
GOLD CERTIFICATES.							
The act of March 3, 1863 (12 Stat., 711), authorizes the Secretary of the Treasury to receive deposits of gold coin and bullion in sums of not less than twenty dollars, and to issue certificates therefor in denominations of not less than twenty dollars each; the coin and bullion deposited for or representing the certificates to be retained in the Treasury for the payment of the same on demand. The cer- tificates so issued to be received at par in payment of interest on the public debt and for duties on imports. The act of July 12, 1882 (22 Statutes, 165), provides that the Secretary of the Treasury shall sus- pend the issue of gold certificates whenever the amount of gold coin and gold bullion in the Treasury reserved for the redemption of United States notes fails below one hundred millions of dollars. The act of March 14, 1900, as amended by the act of March 4, 1907, authorizes and directs the Secretary of the Treasury to receive de- posits of gold certificates therefor in denominations of not less than then dollars, and the coin so deposited shall be retained in the Treasury and held for the payment of such certificates to be re- ceived for customs, taxes, and all public dues, and when so received may be reissued, and when held by any national banking associ- ation may be counted as a part of its lawful reserve. The act also provides that whenever and so long as the gold coin held in the reserve fund in the Treasury for the redemption of United States notes and Treasury notes shall fall and remain below one hundred million dollars, the authority to issue certificates as herein provided shall be suspended; and also, that whenever and so long as the gold coin held in the reserve fund of the Treasury shall exceed as there in provided shall be suspended; and also, that whenever and so long as the gold coin held in the reserve fund of the Treasury shall exceed as there in provided shall be suspended; and also, that whenever and so long as the gold coin held in the reserve fund of the Treasury shall exceed as ther	Indefinite	On demand	None	Par	Indefinite		\$1,086, <b>947,169</b> .0

TABLE A -Statement of the outstanding principal of the public debt, etc.-Continued.

The act of March 2, 1911 (36 Stat., 965, sec. 1), provides that the Secretary of the Treasury may, in his discretion, receive, with the assistant treasurer in New York and the assistant treasurer in San Francisco, deposits of foreign gold coin at their bullion value in amounts of not less than one thousand dollars in value and issue gold certificates therefor of the description herein authorized; and also provides that the Secretary of the Treasury may, in his discretion, receive, with the Treasurer or any assistant treasurer of the United States, deposits of gold bullion bearing the stamp of the coinage mints of the United States, or the assay office in New York, certifying their weight, fineness, and value, in amounts of not less than one thousand dollars in value, and issue gold certificates therefor of the description herein authorized. But the amount of gold bullion and foreign coin so held shall not at any time exceed one-third of the total amount of gold certificates at such time outstanding. And section fifty-one hundred and ninety-three of the Revised Statutes of the United States is hered prepaded.

#### SILVER CERTIFICATES.

The act of February 28, 1878 (20 Statutes, 26, sec. 3), provides that any holder of the coin authorized by this act may deposit the same the Treasurer or any assistant treasurer of the United States in sums not less than ten dollars and receive therefor certificates of not less than ten dollars each, corresponding with the denominations of the United States notes. The coin deposited for or representing the certificates shall be retained in the Treasury for the payment of the same on demand. Said certificates shall be receivable for customs, taxes, and all public dues, and, when so received for customs, taxes, and all public dues, and, when so received the dollars; said certificates to be receivable, redeemable, and payable in like manner and for like purposes asis provided for by the act of February 28, 1878.

The act of March 14, 1900, provides that it shall be the duty of the Secretary of the Treasury, as fast as silver dollars are coined under the provisions of the acts of July 14, 1890, and June 13, 1898, from bullion purchased under the act of July 14, 1890, to retire and cancel an equal amount of Treasury notes whenever received into the Treasury, and upon the cancellation of Treasury notes, silver cer-

tificates shall be issued against the silver dollars so coined. The act also provides that silver certificates shall be issued only of denominations of ten dollars and under, exceep that not exceeding in the aggregate ten per centum of the total volume of said certificates, in the discretion of the Secretary of the Treasury, may be issued in denominations of twenty dollars, fifty dollars, and one hundred dollars; and silver certificates of higher denomination than ten dollars; except as therein provided, shall, whenever received at the Treasury or redeemed, be retired and canceled, and certificates of denominations of two dollars or less shall be substituted therefor, and after such substitution, in whole or in part.

paid, and this order followed until all the bonds are paid. Interest to cease three months after any call made by the Government to							
redeem. TREASURY NOTES OF 1890.							
The act of July 14, 1890 (26 Statutes, 289), directs the Secretary of the							\$2,660,000
Treasury to purchase, from time to time, silver bullion to the aggre- gate amount of four million five hundred thousand ounces, or so much thereof as may be offered, in each month, at the market price thereof, not exceeding one dollar for three hundred and seventy-one	- •						
and twenty-five hundredths grains of pure silver, and to issue in pay- ment for such purchases of silver bullion Treasury notes of the United States, to be prepared by the Secretary of the Treasury, in such form and of such denominations, not less than one dollar nor more than					÷	· ·	
one thousand dollars, as he may prescribe. That said notes shall be redeemable on demand, in coin, at the Treasury of the United States, or at the office of any assistant treasurer of the United States, and when so redeemed may be reissued; but no greater or less amount of		· .					
such notes shall be outstanding at any time than the cost of the sil- ver bullion and the standard silver dollars coined therefrom then held in the Treasury, purchased by such notes; and such Treasury notes shall be a legal tender in payment of all debts, public and pri-	-				•		
vate, except where otherwise expressly stipulated in the contract, and shall be receivable for customs, taxes, and all public dues, and when so received may be reissued; and such notes, when held by any national banking association, may be counted as a part of its lawful							· -
reserve. That upon demand of the holder of any of the Treasury notes provided for, the Secretary of the Treasury shall redeem the same in gold or silver coin, at his discretion, it being the established			·			•	
policy of the United States to maintain the two metals on a parity with each other upon the present legal ratio, or such ratio as may be provided by law. The act of November 1, 1893 (28 Stat., 4), repeals so much of the act of							
July 14, 1890, as directs the Secretary of the Treasury to purchase from time to time silver bullion to the aggregate amount of four million five hundred thousand ounces, or so much thereof as may							
be offered in each month, at the market price thereof, and to issue in payment for such purchases Treasury notes of the United States. The act of June 13, 1898 (30 Stat., 467), directs that all of the silver bullion in the Treasury purchased in accordance with the provi- sions of the act of July 14, 1890, shall be coined into standard silver							
FRActions as rapidly as the public interests may require, to an amount studies than one and one-half millions of dollars in each month, stlouist that said dollars, when so coined, shall be used and applied in

Federal Reserve Bank of St. Louis

the manner and for the purposes named in said act. The act of March 14, 1900, provides that United States notes, and Treasury notes issued under the act of July 14, 1890, when presented to the Treasury for redemption, shall be redeemed in gold coin of the standard fixed by said act, and requires that the Secretary of the Treasury shall set apart in the Treasury a reserve fund of one hundred and fifty million dollars to be used for such redemption purposes only. It also provides that it shall be the duty of the Secretary of the Treasury as fast as silver dollars are coined under the provisions of the acts of July 14, 1890, and June 13, 1898, from bullion purchased under the act of July 14, 1890, the tire and cancel an equal amount of Treasury notes whenever received into the Treasury, and upon such cancellation to issue silver certificates against the silver dollars so coined.

#### PANAMA CANAL LOAN.

The act of June 28, 1902 (32 Stat., 484, sec. 8), provides that the Secretary of the Treasury is hereby authorized to borrow on the credit of the United States from time to time as the proceeds may be required to defray expenditures authorized by this act (such proceeds when received to be used only for the purpose of meeting such expenditures), the sum of one hundred and thirty million dollars, or so much thereof as may be necessary, and to prepare and issue therefor coupon or registered bonds of the United States in such form as he may prescribe, and in denominations of twenty dollars or some multiple of that sum redeemable in gold coin at the pleasure of the United States after ten years from the date of their issue, and payable thirty years from such date, and bearing interest payable quarterly in gold coin at the rate of two per centum per annum; and the bonds herein authorized shall be exempt from all taxes or duties of the United States, as well as from taxation in any form by or under State, municipal, or local authority: Provided, That said bonds may be disposed of by the Secretary of the Treasury at not less than par, under such regulations as he may prescribe, giving to all citizens of the United States an equal opportunity to subscribe therefor, but no commissions shall be allowed or paid thereon; and a sum not exceeding one-tenth of one per centum of the amount of the bonds herein authorized is hereby appropriated, out of any money in the Treasury not otherwise appropriated, to pay the expense of preparing, advertising, and issuing the same; and the act of December 21, 1905 (34 Stat., 5, sec. 1), provides that the two per cent bonds of the United States authorized by section eight of the act entitled "An act to provide for the construction of a canal connecting the waters of the Atlantic and Pacific oceans," approved June twenty-eighth, nineteen hundred and two, shall have all the rights and privileges accorded by law to other two per cent bonds of the United States, and every national banking association having on deposit, as provided by law, such bonds issued under the provisions of said section eight of said act approved June twenty-eighth, nineteen hundred and two, to secure its circulating notes, shall pay to the Treasurer of the United States, in the months of January and July, a tax of one-fourth of one percent each half year upon the average amount of such of its notes in circulation as a based upon the

for the issue of circulating notes to national banks; and the bonds containing such provision shall not be receivable for that purpose.

#### POSTAL SAVINGS BONDS.

The act of June 25, 1910 (36 Stat., 817, sec. 10) provides that any depositor in 20 a postal savings depository may surrender his deposit, or any part a postal savings depository may surrender ins deposit, or any part thereof, in sums of twenty dollars, forty dollars, sixty dollars, eighty dollars, one hundred dollars, and multiples of one hundred dollars and five hundred dollars, and receive in lieu of such surrendered deposits, under such regulations as may be established by the board of trustees, the amount of the surrendered deposits in United States coupon or regis-tered bonds of the denominations of twenty dollars, forty dollars, sixty dollars, eighty dollars, one hundred dollars, and five hundred dollars. which bonds shall bear interest at the rate of two and one-half per centum which bonds shall bear interest at the rate of two and one-hall per centum per annum, payable semiannually, and be redeemable at the pleasure of the United States after one year from the date of their issue and payable twenty years from such date, and both principal and interest shall be payable in United States gold coin of the present standard of value: *Pro-vided*, That the bonds herein authorized shall be issued only (first) when there are outstanding bonds of the United States subject to call, in which case the proceeds of the bonds shall be applied to the redemption at par ofoutstanding bonds of the United States subject to call; and (second) at times when under authority of law other than that contained in this act the Government desires to issue bonds for the purpose of replenishing the Treasury, in which case the issue of bonds under authority of this Act shall be in lieu of the issue of a like amount of bonds issuable under authority thority of law other than that contained in this Act: Provided further, That the bonds authorized by this Actshall beissued by the Secretary of the Treasury under such regulations as he may prescribe: And provided further, That the authority contained in section nine of this Act for the investment of postal savings funds in United States bonds shall include the authority to invest in the bonds herein authorized whenever such bonds may be lawfully issued: And provided further, That the bonds herein authorized shall be exempt from all taxes or duties of the United States as well as from taxation in any form by or under State, municipal, or local authority: And provided further. That no bonds authorized by this Act shall be receivable by the Treasurer of the United States as se-curity for the issue of circulating notes by national banking associations.

#### NATIONAL-BANK NOTES (REDEMPTION ACCOUNT).

The act of July 14, 1890 (26 Stat., 289), provides that balances standing with the Treasurer of the United States to the respective credits of national banks for deposits made to redeem the circulating notes of such banks, and all deposits thereafter received for like purpose, shall be covered into the Treasury as a miscellaneous receipt, and the Treasurer of the United States shall redeem from the general cash in the Treasury the circulating notes of said banks which may come into his possession subject to redemption, \* \* and the balance remaining of the deposits so covered shall, at the close of each month, be reported on the monthly public-debt statement as debt of the United States bearing no interest.

	<u> </u>		

<sup>1</sup> Continued at 2 per cent.

<sup>2</sup> Postal savings bonds, 2½ per cent.

Note 1.—Annual interest charge is computed on amount of outstanding principal at close of fiscal year and is exclusive of interest charge on Pacific Railway bonds. Note 2.—The figures for July 1, 1879, were made up assuming pending funding operations to have been completed. Note 3.—The temporary loan per act of July 11, 1862, is included in the 4 per cents from 1862 to 1868, inclusive, with the exception of the amount outstanding Aug. 31, 1865, this being the date at which the public debt reached its highest point. This loan bore interest from 4 per cent to 6 per cent, and was redeemable on 10 days' notice after 30 days, but being constantly changing it has been considered more equitable to include the whole amount outstanding as bearing 4 per cent interest on an average for the year.

<sup>1</sup> Estimated July 1.

NOTE.—The ordinary receipts and disbursements and per capita on receipts for 1891 were erro-neously stated by the Register of the Treasury in his reports for 1891, 1892, and 1893. (See Finance Reports for those years, pp. 845, 767, and 906.)

TABLE G.—Statement showing the ordinary receipts and disbursements of the Government by months; the legal-tender notes, net gold, and available cash in the Treasury at the end of each month; the monthly redemption of legal-tender notes in gold and the imports and exports of gold, from July, 1896, to June, 1913, inclusive.

Month.	Ordinary receipts, exclusive of postal.	Ordinary disburse- ments, exclu- sive of postal, principal of debt, and premium.	Surplus receipts.	Net gold in Treasury.	Balance in general fund, including net gold.	Imports of gold.	Exports of gold.

TABLE G.—Statement showing the ordinary receipts and disbursements of the Government by months, etc.—Continued.

<sup>1</sup> Excess of disbursements.

Note.—The above figures are exclusive of disbursements for the Panama Canal, the first payments for which occurred in the fiscal year 1903. Note.—The receipts and disbursements by months were made up from the partial reports prior to July 1, 1908; and, being subject to change by subsequent concentration of accounts, did not agree with the totals by years. The latter are the actual results, as shown by complete returns.

<sup>1</sup>Only the annual excess of deposits over redemptions included in this column.
 <sup>2</sup>National-bank redemption fund herein includes only the annual excess of deposits on account of national-bank redemption fund since 1890.
 <sup>3</sup>Includes deposits of \$17,641,634, for principal of bonds, only \$2,035,700 of which were actually issued in 1911; the balance was issued in the fiscal year 1912.

Note.—The disbursements are stated by warrants paid to June 30, 1866, and by warrants issued since that date. The disbursements for postal deficiencies are grants by law from the Treasury, and differ from the fiscal year expenditures thereof shown by reports of the Auditor for the Post-Office Department. Issues and redemptions of certificates and notes not affecting the cash in general fund are excluded from the public debt figures in this statement.

### TABLE I.—Receipts and disbursements of the United States—Continued.

### RECAPITULATION OF DISBURSEMENTS BY FISCAL YEARS.

· i			Ordin	nary disbursements	i.		
Year.	Civil and miscel- laneous, exclusive of postal defi- ciencles.	War Department.	Navy Depart- ment.	Indians.	Pensions.	Interest on the public debt.	Total ordinary disbursements, exclusive of postal defi- ciencies.

#### TABLE J.—Statement of the coin and paper circulation of the United States from 1860 to 1913, inclusive, with amount of circulation per capita.

NOTE 1.—Specie payments were suspended from January 1, 1862, to January 1, 1879. During the greater part of that period gold and silver coins were not in circulation except on the Pacific coast, where, it is estimated, the specie circulation was generally about \$25,000,000. This estimated amount is the only coin included in the above statement from 1862 to 1875, inclusive. NOTE 2.—In 1876 subsidiary silver again came into use, and is included in this statement, beginning

Note 2.—In 13/6 subsidiary silver again came into use, and is included in this statement, beginning with that year. Note 3.—The coinage of standard silver dollars began in 1878, under the act of February 28, 1878. Note 4.—Specie payments were resumed January 1, 1879, and all gold and silver coins, as well as gold and silver bullion in the Treasury, are included in this statement from and after that date. Note 5.—For redemption of outstanding certificates an exact equivalent in amount of the appro-priate kinds of money is held in the Treasury, and is not included in the account of money held as

priate kinds of money is held in the Treasury, and is not included in the account of money held as assets of the Government. NoTE 6.—This table represents the circulation of the United States as shown by the revised state-ments of the Treasury Department for June 30 of each of the years specified. NOTE 7.—The Director of the Mint made a revised estimate of the stock of gold coin, and, as a consequence of such revision, the estimated stock of gold in the United States and of gold coin in circulation has been reduced \$135,000,000 in the figures for 1907. NOTE 8.—The Director of the Mint in 1910 made a revised estimate of the stock of subsidiary silver coln, and, as a consequence of such revision, there was a reduction of \$9,700,000. NOTE 9.—The details of the foregoing table, showing the amount of each kind of money in circula-tion each year since 1860, are omitted; but they may be had upon application to the Secretary of the Treasury, Division of Loans and Currency, where a publication covering information on the subject has been prepared for distribution.

<sup>1</sup> Based on warrants issued during the year.

<sup>1</sup> Based on warrants issued during the year. <sup>9</sup> The cost of collecting the internal revenue embraces the following items: Salaries and expenses of the Internal-Revenue Service, including collectors, deputy collectors, clerks, etc., and including expenses incident to enforcing the provisions of law taxing oleomargarine; salaries and expenses of revenue agents, surveyors of distilleries, gaugers, storekeepers, and miscellaneous expenses; paper for internal-revenue stamps; expenses of detecting and punishing violations of internal-revenue laws; and expenses of collecting the eroprotation tax. <sup>8</sup> The expenses of collecting the revenue from customs includes all sums drawn from the appropria-tion made by Congress for that purpose. (See details on p. 134.) The money is expended for salaries, rents, labor in weighing, gauging, and measuring imported merchandise, revenue boatmen, repairs, and other expenses incident to rented buildings, stationery, and the traveling expenses of special agents, but does not include disbursements for revenue cutters, fuel, lights, water, furniture, janitors, etc., for buildings owned by the Government, nor disbursements for recting new buildings, all of which are paid for from specific appropriations made for those purposes. The expenses of collecting internal and customs revenue do not include the disbursements for salaries, etc., incident to auditing these accounts in the office of the Auditor for the Treasury Department.

Department. • No data.

TABLE	M.—Statement	showing the	aggregate	receipts,	expenses,	average number	• of	per-
	sons empl	oyed, and cos	st to collect	internal	revenue-	Continued.	•	-

mount of e above stated..... 4 837, 453. 85 Expenses not included in above.....

<sup>1</sup> The fourth California was consolidated with the first California; twelfth Pennsylvania with the ninth Pennsylvania; South Carolina district with the fourth North Carolina; and fourth Texas with the the third Texas, in effect Oct. 1, 1912. <sup>2</sup> Included in the district in which consolidated. <sup>3</sup> Includes average number of storekeepers, storekeeper-gaugers, and gaugers employed not formerly included in the table.

included in this table.

Included in this table. <sup>4</sup> These expenses include salaries and expenses of internal-revenue agents and inspectors, salaries of the officers, clerks, and employees in the office of the Commissioner of Internal Revenue, amounts expended in detecting and punishing violations of internal-revenue laws, cost of paper for internal-revenue stamps, and certain miscellaneous expenses, but which can not be apportioned among the several collection dis-tricts. Amounts paid from the appropriation "Refunding Internal-Revenue Collections," which aggre-gated \$23,513.19, do not appear anywhere in above statements, as they are in no sense an expense. <sup>6</sup> Based upon amounts actually paid. These expenses differ slightly from those shown on page 131, which are based upon warrants issued.

Net				

199

The total ordinary receipts are, at \$724,111,229.84, the largest in our history, and this increase occurs by growth in all of the sources except the sale of lands. The net increase was \$32,332,764.47.

There was a reduction of expenditures in the civil and miscellaneous of \$2,995,315.87, and the Naval Establishment spent \$2,329,093.75 less than in the preceding 12 months. Increased expenditures are recorded by the Military Establishment of \$11,592,030.93; in the Indian Service of \$171,319.10; interest on the public debt of \$282,-807.60, and in pensions of \$21,494,994.03, which indicates the nation's liberality to its defenders. The net growth of expenditures for the year was \$28,216,742.04.

#### THE PANAMA CANAL.

The excess of income over outgo in the governmental finances during the past fiscal year has maintained an adequate balance in the Treasury for the ordinary operations, as well as the special activities now under way; therefore it was not deemed advisable by the Secretary of the Treasury to offer for sale additional bonds of the Panama Canal loan. The expenses incurred in the construction of that great work during the year, amounting to \$41,741,258.03, were paid out of the general fund of the Treasury, and the total net balance so expended to June 30, 1913, reimbursable from the proceeds of bonds not yet sold, is \$179,627,617.07.

The proceeds of sales of bonds and the disbursements on account of the canal to the close of the fiscal year 1913 are set forth by years in the table following:

Receipts and disbursements on account	: ot	the	Panama	Canal.
---------------------------------------	------	-----	--------	--------

RECEIPTS AND DISBURSEMENTS ON ACCOUNT OF THE POST OFFICE DEPARTMENT.

The receipts on account of the Post Office Department during the fiscal year were \$278,107,699.11, and the disbursements \$271,001,-697.41. Of these amounts \$188,232,180.97, or more than two-thirds, was received and disbursed directly by postmasters without being deposited in the Treasury. Such disbursements are authorized by existing law, and are accounted for under the provisions of section 406 of the Revised Statutes of the United States. Advances were made from the Treasury to meet deficiencies in the postal revenues of \$3,027,368.79 during the year, of which \$2,000,000 was repaid in the month of January.

The Post Office Department warrants issued by the Postmaster General, which heretofore have been drawn on the assistant treasurers

#### TREASURER.

of the United States at Chicago, New York, and San Francisco, by agreement of the Postmaster General were embraced in Department Circular No. 5, and since February 1, 1913, have been drawn on the Treasurer of the United States; they are payable by any assistant treasurer or regular national-bank depositary of the United States.

A statement of the transactions relating to the account for the service of the Post Office Department with the Treasury during the fiscal year 1913 will be found on page 237.

### TRANSACTIONS IN THE PUBLIC DEBT.

Postal-savings bonds, authorized by the act of June 25, 1910, were issued during the fiscal year 1913 to the amount of \$1,929,840. The deposits of lawful money of the United States, under the act of July 14, 1890, to retire national-bank notes were \$21,471,010, which, with the deposits for the postal-savings bonds, makes a total of \$23,400,850in actual cash received on account of the public debt, while the cash disbursements on account of the principal of matured loans and fractional currency were \$102,575 and for national-bank notes canceled and retired \$24,089,035.50, a total disbursement for the public debt of \$24,191,610.50. The net result was an excess of disbursements of \$790,760.50.

The transactions relating to the replacing or retiring of the worn and mutilated paper currency issued under the direct authority of the Government are included in the account of the public debt.

The details for the past two years may be observed in the table following.

Receipts and disbursements on account of the public debt for 1912 and 1913.

In a study of the foregoing table it will be observed that the United States notes issued and credited in the general account as a receipt are offset by an equal amount of worn or unfit notes in kind withdrawn therefrom, canceled, and retired, which is in accordance with the provisions of the act of May 31, 1878. In explanation of the manner of issuing and redeeming gold certificates, silver certificates, and Treasury notes of 1890, it may be said that for certificates issued and credited in the general account an equal amount of the respective kinds of money held in the general account is transferred therefrom to, and retained in, the trust funds for their redemption; for gold certificates, silver certificates, and Treasury notes withdrawn from the general fund, canceled, and retired, a like amount of the respective coins is released from the trust funds and brought into the general fund in their stead.

## **PUBLIC DEBT, 1912 AND 1913.**

At the close of the fiscal year 1913 the outstanding principal of the interest-bearing debt was \$965,706,610, an increase of \$1,929,840 as compared with that of 1912. The increase was caused by the issue of postal-savings bonds.

The debt bearing no interest amounted to \$377,341,134.66, a decrease of \$2,720,600.50.

The certificates and notes issued on deposits of coin and bullion (trust funds, act of March 14, 1900) increased \$48,401,800, and amounted to \$1,572,937,169 at the close of the fiscal year June 30, 1913.

Comparison of the public debt is made, by items, for the fiscal years 1912 and 1913 in the following statement:

	Rate.	When payable.	Outstanding June 30, 1912.	Outstanding June 30, 1913.

#### Public debt, 1912 and 1913.

202

#### TREASURER.

# PAYMENT OF INTEREST ON THE REGISTERED BONDS OF THE UNITED STATES.

For interest on registered bonds of the United States, due June 1, 1912, and thereafter, checks have been prepared and mailed from the office of the Secretary of the Treasury. Such checks bear a certificate as to the principal of bonds registered in the name of the payee, over the facsimile signature of the Chief of the Division of Loans and Currency; they also bear the facsimile signature of the Secretary of the Treasury, and are countersigned by a clerk in his office. These checks were embraced in Department Circular No. 5, and since February 1, 1913, have been drawn on the Treasurer of the United States, but are payable by any assistant treasurer or regular national-bank depositary of the United States, and the amount so disbursed is included in the requisition for reimbursement made by the Treasurer at the end of the month. The paid checks are sent to the Register of the Treasury for an administrative examination, who in turn forwards them to the Auditor for the Treasury Department.

#### RESERVE AND TRUST FUNDS.

The redemptions from the reserve fund during the past fiscal year were, in United States notes, \$67,850,957, and in Treasury notes \$67,830, making a total of \$67,918,787. Under the provisions of the act of March 14, 1900, the redeemed notes were exchanged for gold coin each day, and thereby the reserve was maintained at the fixed amount of \$150,000,000. There was no apparent disposition on the part of the holders of United States notes to use them in withdrawing gold coin from the Treasury. The transactions in the reserve fund represent more truly exchanges to secure an accommodation in denominations of currency.

At the close of the fiscal year 1913 the trust funds amounted to \$1,572,937,169, of which \$887,471,847 was in gold coin, \$199,255,322 in gold bullion, and \$486,210,000 in standard silver dollars.

There was an increase during the year of \$46,669,800 in the gold held against the outstanding gold certificates, and of \$1,732,000 in the silver dollars held against outstanding Treasury notes of 1890 and silver certificates.

	Outstanding	Fiscal y	Outstanding	
۰	June 30, 1912.	Issued.	Redeemed.	June 30, 1913.
Gold certificates	\$1,040,057,369 481,549,000 2,929,000	\$468, 510, 000 403, 952, 000	\$421, 840, 200 401, 951, 000 269, 000	\$1,086,727,169 483,550,000 2,660,000
Total	1, 524, 535, 369	872, 462, 000	824,060,200	1, 572, 937, 169

The transactions in trust-fund obligations during the fiscal year 1913 are recorded in the statement following:

The foregoing statement does not include \$220,000 in gold certificates, series of 1900, that had been issued but not reported in time to be taken up in the public debt statement for June.

#### REPORT ON THE FINANCES.

#### STATEMENT OF THE TREASURY OF THE UNITED STATES.

At the close of the fiscal year 1913, from the revised figures of the several funds, the holdings of moneys in the Treasury amounted to \$2,014,140,698.25 and was set apart as follows:

#### RESERVE FUND.

Gold coin and bullion...... \$150,000,000

#### GENERAL FUND-CASH IN THE VAULTS.

After setting out from the assets of the Treasury the appropriate kinds of money to meet the requirements of the reserve and trust funds, the balances of each kind of money held belong to the general fund of the Treasury, from which, however, must be deducted the current liabilities.

The items composing the general fund are subdivided; the first part shows the amount of each kind of available cash actually held in the vaults of the Treasury offices, the demands against the same, and the working balance in such offices; the second part shows the amounts of public moneys in national banks and other depositaries to the credit of the Treasurer of the United States and of disbursing officers, the demands against the same, and the net balance in such depositaries subject to draft; the third part shows the cash items held in Treasury offices, but which, under provisions of law, are of limited tender or unavailable for payment.

limited tender or unavailable for payment. The assets in the general fund in the Treasury on June 30, 1913, and the demand liabilities outstanding on that date were as follows:

### AVAILABLE CASH BALANCE.

At the close of the fiscal year 1913 the available cash in the general fund was 165,960,984.79, a decrease of 1,191,494.20 as compared with that of 12 months earlier. This decrease is verified by the following transactions, which include the net results in all accounts of receipts and disbursements shown on previous pages of this report:

Available cash balance June 30, 1912... ..... \$167, 152, 478.99 ..... Digitized for FRASER http://fraser.stlouisfed.org/ Federal Reserve Bank of St. Louis 205

The working balance in the vaults of the Treasury at the close of the year was \$71,052,925.96.

It will be seen from the foregoing figures that if an emergency should arise calling for an increase of Government deposits in depositary banks the Secretary of the Treasury is in position to give prompt and effective relief to the business situation.

The balance in the Treasury at the end of each month from January, 1907, is stated in Table No. 19, page 261, and for July 1 in each year since 1906 in the subjoined statement:

Available cash balance (including the reserve fund) on the dates named.

<u> </u>	Available cash balance.

#### GOLD IN THE TREASURY.

The gold in the Treasury at the close of the fiscal year 1913 amounted to \$1,262,361,035.87, of which \$1,011,245,007.87 was in coin.

Under the provisions of the act of March 2, 1911, gold certificates are issued against gold bullion and foreign coin deposited in the Treasury. These certificates differ in no particular from those issued against United States gold coin and are payable in such coin. The intent and effect of the act are not to limit the free coinage of gold. The mints continue to receive all the gold that is offered, and it enters into circulation either in coin or in gold certificates. The effect is simply to allow the Treasury to carry a portion of the reserves in bullion, thus saving cost of coinage.

The amount of new gold coins of current coinage shipped to depositors therefor at the expense of the consignee for transportation charges during the fiscal year was \$11,513,233.50. This is one of theannual demands made upon the Treasury and is due principally to the popularity of these coins for Christmas gifts, Easter offerings, birthday presents, and like purposes. The total amount of gold in the Treasury on July 1 in each year

The total amount of gold in the Treasury on July 1 in each year from 1906, set apart for the respective uses, is recorded in the statement following.

The gold imported during the fiscal year amounted to \$69,194,025, while the exports of the precious metal aggregated \$77,762,622, and notwithstanding this drain there was a net increase of \$54,896,771.65 in the amount held in the Treasury as compared with that of 12 months earlier.

### BONDS HELD AS SECURITY FOR NATIONAL BANKS.

The Treasurer held in trust, at the close of the fiscal year 1913, United States bonds to the amount of \$740,529,250 as security for the circulating notes of national banks. The securities pledged for public deposits in the depositary banks amounted to \$61,646,300. The kinds of bonds in the custody of the Treasurer of the United States and the changes therein during the fiscal year 1913 are recorded in the subjoined table:

#### BONDS HELD AS SECURITY FOR POSTAL SAVINGS FUNDS.

At the close of the fiscal year 1913 the Treasurer of the United States held in trust, under the provisions of the act of June 25, 1910, bonds and securities amounting to \$63,851,061.42, as security for postal savings funds deposited in designated depositaries.

The kinds of securities held and the changes therein during the year are recorded in the statement following:

<sup>1</sup> Various.

The following-described securities, at the respective values herein fixed, will be accepted by the board of trustees as security for postal-savings deposits, viz: (a) Bonds of the United States, of the Philippine Islands, of the District of Columbia,

and of Porto Rico, will be accepted at their par value.

(b) Bonds of any State of the United States and of the Territory of Hawaii will be accepted at their market value, but if such market value is above par, they will be accepted at their par value.

(c) Bonds of any city in the United States having a population of over 30,000, as shown by the latest annual report of the Bureau of the Census, entitled "Official Sta-tistics of Cities having a Population of over Thirty Thousand," which has been in existence for a period of 10 years, which for a period of 10 years previously has not defaulted in the payment of any part of either principal or interest of any funded debt authorized to be contracted by it, and whose *net funded indebtedness* does not exceed 10 per cont of the unduction of its taxable preparity to be accepted by the latest period. 10 per cent of the valuation of its taxable property, to be ascertained by the last pre-ceding valuation for the assessment of taxes, will be accepted at 90 per cent of their market value, but if such market value is above par, they will be accepted at 90 per cent of their par value.

(d) Bonds of any other city, town, county, or other legally constituted municipality or district in the United States, which has been in existence for a period of 10 years, which for a period of 10 years previously has not defaulted in the payment of any part of either principal or interest of any funded debt authorized to be contracted by it, and whose *net funded indebtedness* does not exceed 10 per cent of the valuation of its taxable property, to be ascertained by the last preceding valuation for the assessment of taxes, will be accepted at 75 per cent of their market value, but if such market value

is above, par, they will be accepted at 75 per cent of their par value. The term "net funded indebtedness," for the purposes of paragraphs (c) and (d), is hereby defined to be the difference between the legal gross indebtedness of a city, town, county, or other municipality (including the amount of any school district or other bonds which depend for their redemption upon taxes levied upon property within the municipality) and the aggregate of the following items:

(1) The total of all sinking funds accumulated for the redemption of such gross indebtedness, except sinking funds applicable to bonds hereafter described in this section.

(2) The amount of outstanding bonds or other debt obligations made payable from current revenues.

(3) The amount of outstanding bonds issued for the purpose of providing the inhabit-ants of a municipality with public utilities, including the supplying of water or the construction of subways and tunnels for railways: *Provided*, That evidence is submitted showing that the income from such utilities is sufficient for maintenance, for payment of interest on such bonds, and for the accumulation of a sinking fund for their

redemption. (4) The amount of outstanding improvement bonds, issued under laws which provide for the levying of special assessments against abutting property in sufficient amounts to insure the payment of interest on the bonds and the redemption thereof: *Provided*, That such bonds are direct obligations of the municipality and included in the gross indebtedness of the municipality.

The board of trustees reserves the right to reclassify the securities acceptable for deposits and to change the valuation at which they will be accepted. Under no circumstances will securities of other classes than those above named be accepted.

### POSTAL SAVINGS BONDS AND INVESTMENTS THEREIN.

The trustees of the Postal Savings System, under a general authority conferred upon them in the postal savings law, have arranged to take over at par any of the postal savings bonds that depositors may wish to turn back.

Under the arrangement outlined in the foregoing the Treasurer of the United States held on June 30, 1913, \$117,460 in postal savings bonds, representing investments made by the board of trustees, Postal Savings System. The first investment in these bonds was made on December 9, 1911, when they were quoted in the open market at  $92\frac{1}{2}$  cents on the dollar. All of such bonds held by the Treasurer are registered in the name of the board of trustees.

### WITHDRAWAL OF BOND'S TO SECURE CIRCULATION.

Under the provisions of the act of March 4, 1907, the deposits of lawful money to retire national bank notes was limited to \$9,000,000 per month, but this limit was not reached in any month during the past fiscal year. The national bank notes outstanding took on a growth of \$14,022,914 during the fiscal year and amounted to \$759,157,906 on June 30, 1913, which apparently indicates that there was an active demand for money throughout the country, and under such conditions there was no disposition on the part of the national banks to contract the volume of their circulating notes. The deposits of lawful money and the amount of bank circulation

outstanding may be studied in the monthly statement following:

Month.	Deposits of lawful money.	National- bank notes outstanding.	Month.	Deposits of lawful money.	National- bank notes outstanding.

16726°---FI 1913-----14

### NATIONAL BANKS DESIGNATED AS DEPOSITARIES OF THE UNITED - STATES.

The Secretary of the Treasury determines the number of such depositaries and the amount of public money required in each for the transaction of the public business, fixes the amount of balances they may hold, and requires the banks thus designated to give satisfactory security, by the deposit of United States bonds and otherwise, for the safe-keeping and prompt payment of the public money deposited with them, and for the faithful performance of their duties as financial agents of the Government. The regular depositaries receive and disburse the public moneys, while the special depositaries hold only the moneys transferred to them from the Treasury. All of the depositaries are required to pay interest at the rate of 2 per cent per annum from and after June 1, 1913, on the average monthly amount of public deposits held.

The number of national-bank depositaries at the close of the fiscal years 1912 and 1913 may be observed in the statement following:

· · ·	Regular.	Special.	Total.
Depositaries June 30, 1912	424	929	1,353
Depositaries June 30, 1913	850	685	1,535

At the close of the fiscal year 1913 there were 1,535 depositary banks and the total amount of public moneys held therein was \$76,263,615.06, which was secured by bonds pledged therefor with the Treasurer of the United States.

### PUBLIC DEPOSITS IN NATIONAL BANKS.

At the close of the fiscal year 1912 the balance in depositary banks to the credit of the general fund was \$37,953,488.51, and to the credit of disbursing officers \$10,552,697.26, making a total of \$48,506,185.77.

The working balance in the Treasury offices at the beginning of the fiscal year 1913 was \$98,742,425.40, an amount largely in excess of the actual requirements of the department for the transaction of the public business. As there was no necessity for withdrawing the public deposits from national banks, there was but slight change in the total holdings of the depositary banks during the first half of the fiscal year.

On January 9, 1913, the Secretary of the Treasury (Mr. MacVeagh), issued Department Circular No. 5, which inaugurated a radical change in the manner of handling and disbursing the public funds. It provided, first, that on and after February 1, 1913, every deposit of funds to the official credit of a disbursing officer (except those stationed in the Philippine Islands) shall be made with the Treasurer of the United States; second, all moneys standing to the official credit of disbursing officers with assistant treasurers and active designated depositary banks at the close of business January 31, 1913, shall be transferred to like credit of such disbursing officers with the Treasurer of the United States, through the medium of the

Federal Reserve Bank of St. Louis

general account of the Treasurer of the United States; third, all Treasury Department warrants, Post Office Department warrants, disbursing officers' checks, checks in payment of interest on the public debt, and Secretary's special deposit checks shall be drawn on the Treasurer of the United States.

It contemplated that each assistant treasurer and each active designated depositary bank shall pay the warrants and checks enumerated in the foregoing when drawn on the Treasurer of the United States and presented in due course of business; the warrants and checks so paid to be scheduled daily, charged in the regular transcripts of the general account as a transfer of funds, and forwarded to the Treasurer of the United States. It made necessary a more extended use of national banks as Government depositaries, and required an adjustment of the balances then in such depositaries with a view of making a broader distribution of the public funds.

At the end of January, immediately preceding the beginning of operations under the new system of accounting, the balance in banks to the credit of the general fund was \$33,426,832.85, and to the credit of disbursing officers \$13,154,055.74.

Complying with the instructions given for operations under the new system of accounting, large amounts standing to the credit of disbursing officers on the books of depositary banks were transferred to like credit with the Treasurer of the United States through the medium of the general account, and as a result the balance in banks to the credit of the general fund became \$44,423,609.19 by the close of February, while the amount standing to the credit of disbursing officers (principally court funds and postmasters' balances) was reduced to \$4,644,873.51, making a total holding of \$49,068,482.70.

As the warrants and checks issued on Government account drift to commercial centers, the depositary banks therein were called upon to make payment of these obligations in greater amount than had formerly been the practice; consequently there was necessity for some increase of balances in the depositary banks located in such centers, and the amounts required for the purpose were withdrawn from depositary banks in localities where the funds were not required for such disbursements. The adjustment of balances in banks to meet the changed conditions was continued during the months of March and April without increasing the public deposits therein to any great extent.

On April 30, 1913, the Secretary of the Treasury gave notice that on and after June 1, 1913, all depositary banks would be required to pay interest at the rate of 2 per cent per annum on the average monthly amount of public funds held by them, such interest to be paid semiannally January 1 and July 1 of each year. The depositary banks were requested to advise the department at once whether they desired to continue as depositaries under this new regulation as to the payment of interest, and if they wished to retain the full amount now on deposit or only a portion of the public funds which they are authorized to hold. Less than a dozen of the 1,500 depositaries declined to retain the deposits and pay interest thereon, and a few others requested that the public moneys therein be reduced.

The Secretary also stated that, under section 5153 of the Revised Statutes, national banks which have been or may be designated as

- and a second

Government depositaries, instead of placing with the Treasurer as security for deposits as heretofore bonds exclusively of the United States or of the provincial Governments for the full amount of their deposits, will hereafter be allowed to secure 70 per cent of such deposits with Government bonds of the above classes and the remaining 30 per cent at the election of the depositary bank, either with similar Government bonds at par or with high-class State, city, and county bonds, acceptable to the Secretary of the Treasury, to be taken as security at 75 per cent of their market value, but not to exceed par.

With the banks paying interest on Government deposits the Secretary is justified in keeping larger balances in the national banks, thereby increasing the volume of money in circulation, and to that extent reducing the amount locked up in the Treasury. The free balance in the general fund at this time being in excess of the immediate requirements of the department the Secretary has authorized the transfer from the Treasury to national bank depositaries in diffeaent sections of the country of \$10,000,000.

To offset the drain upon the money in circulation in the District of Columbia due to the collection of taxes in the month of May and the deposit of the money in the Treasury of the United States, the Secretary of the Treasury on May 6 directed that the public deposits in the national banks of the District of Columbia be increased by \$4,000,000, the transfers to be made in four equal installments on May 15, 26, June 5 and 16, and to be divided among the several banks in proportion to the total deposits therein, and to be secured by bonds deposited with the Treasurer of the United States. Of the amount so placed, the depositary banks were required to return to the Treasury 20 per cent on or before July 15, 1913, 20 per cent on or before August 15, 1913, 10 per cent on or before September 15, 1913, and a like sum on or before the 15th of each succeeding month, making the final payment on or before February 14, 1914. The department reserved the right to demand an earlier return of the money deposited if for any reason it should be deemed advisable. Interest at the rate of 2 per cent per annum is required on this deposit.

At the end of May, 1913, the balance in banks to the credit of the general fund was \$46,825,967.40 and to the credit of disbursing officers \$5,488,284.91, making a total of \$52,314,252.31.

The greater part of the corporation tax is paid in June (the last month of the fiscal year); therefore the income and outgo of public moneys through the depositary banks is greater in this month than in other months of the year. The collectors of internal revenue received payments of this tax until a late hour on the last day of the fiscal year and as a result the collections were deposited in banks, in many instances, after banking hours, and transfers thereof to Treasury offices could not be effected until the succeeding business day.

At the close of the fiscal year on June 30, 1913, the balance in banks to the credit of the general fund was \$69,746,133.15, and to the credit of disbursing officers \$6,517,481.91, making a total of \$76,263,615.06.

#### GENERAL ACCOUNT OF THE TREASURER OF THE UNITED STATES.

The Treasurer receives and keeps the moneys of the United States and disburses the same upon warrants drawn by the Secretary of the Treasury, countersigned by the Comptroller of the Treasury, and not otherwise. He takes receipts for all moneys paid by him and gives receipts for all moneys received by him; and all receipts for moneys received by him are indorsed upon warrants signed by the Secretary of the Treasury, without which warrant, so signed, no acknowledgment for money received into the Public Treasury is valid. He renders his accounts quarterly, or oftener if required, and at all times submits to the Secretary of the Treasury and the Comptroller of the Treasury, or either of them, the inspection of the moneys in his hands.

As a matter of information, it may be said that all public moneys paid into any subtreasury office, national bank depositary, or other depositary, are placed to the credit of the Treasurer of the United States and held subject to his draft. The public moneys in the hands of any depositary of public moneys may be transferred to the Treasury of the United States or may be transferred from one depositary to any other depositary, as the safety of the public moneys and the convenience of the public service shall require.

The public moneys in any subtreasury, mint, or other depositary are subject to special examination and count whenever it is deemed advisable by the Secretary of the Treasury. Such examinations of the moneys in the subtreasuries are frequently made by committees representing the Secretary and the Treasurer. Annual examinations of the public moneys in mints are made by committees selected by the Director of the Mint, but as these moneys are a part of the general account it is suggested that the Treasurer of the United States should have a representative on all such committees.

Under the operations of department circular No. 5, an immense volume of accounting was transferred to the office of the Treasurer, requiring a large addition to the clerical force for the performance of the duties. All credits to disbursing officers are now placed on the books of the Treasurer, and such disbursing officers conduct their business with the Treasurer of the United States only. There are about 4,000 accounts with balances, of which more than 1,900 are very active. The checks handled daily on these accounts number approximately 30,000, and the regulations require monthly statements of transactions in each account to be rendered to the respective disbursing officers.

#### MONETARY STOCK.

The figures annexed give the data for a comparison of the monetary stock of the country at the close of June, 1912 and 1913. The gold coin and bullion show an increase in the fiscal year 1913 of \$52,573,418. The silver coins advanced in volume by \$4,872,034. United States notes remained under the law unchanged. Treasury notes fell off \$269,000. National-bank notes received an increment of \$14,022,914. The net increase during the fiscal year was \$71,199,366.

RATIO OF GOLD TO THE TOTAL STOCK OF MONEY.

The annual growth in the volume of gold as compared with the total stock of money since July 1, 1906, may be observed in the table following:

Ratio of gold to total stock of money from July 1, 1906.

[From the revised statements of the Treasury Department.]

Dates.	Total stock of money.	Gold.	Per cent.
July 1, 1906. July 1, 1907. July 1, 1908. July 1, 1908. July 1, 1909. July 1, 1910. July 1, 1911. July 1, 1912. ### MONEY IN CIRCULATION.

The money in circulation has again broken the record of previous years and attained a maximum at \$3,363,738,449 on June 30, 1913. The increase during the last fiscal year was \$79,225,356, of which \$58,238,737 was in gold coin and gold certificates. The circulation per capita was \$34.56.

It will be observed that the volume of national-bank notes in circulation took on a growth of \$10,611,977 as compared with that of 12 months earlier. It has been asserted by financial students that this increase in bank notes at a time of low-money rates would inevitably have a tendency to produce exports of gold. If such results be expected, it will be of interest to learn what proportion of the total circulation the national-bank notes represent as compared with the gold, silver, and United States notes. This is shown in the statement following:

	July 1—			
	1906	1909	1911	1913
Gold coin and certificates	Per cent. 43.30	45.53	47.28	Per cent. 47.93
Silver coin and certificates. United States notes. Treasury notes of 1890. National-bank notes.	10 54	21.96 11.08 21.43	20.67 10.65 21.40	20.68 10.11 21.28
Total	100.00	100.00	100.00	100.00

The most noticeable movement shown by this comparison is the great increase in the gold circulation.

The kinds of money in circulation, the circulation per capita, and the percentage of gold coin and certificates to the total circulation may be studied from the subjoined table:

			Percent- age of				
Fiscal years.	Gold coin and gold cer- tificates.	United States notes and Treasury notes.	National- bank notes.	Silver coin and silver. certificates.	Total.	Circu- lation per capita.	gold coin and cer- tificates to total circula- tion.

Money in circulation at the end of each fiscal year from 1906.

## CIRCULATION AND POPULATION.

The population of the United States, it is estimated, has increased over 12,000,000 since July 1, 1906, and the money in circulation for the same period has taken on a growth of more than \$630,000,000. The per capita circulation grew in the meantime from \$32.32 to \$34.56. It is apparent from the increasing growth in the amount of money in circulation that it is equal to if not in excess of the legitimate demand therefor. The extension of habitation into remote districts, multiplication of lines of traffic, and the development of industrial activities are some of the requirements that must be provided for by an annual increase of money in circulation.

Statistics relative to the money in circulation and the population, by years, may be studied in the annexed table:

Fiscal years.	Money in circulation.	Population.	Circulation per capita.	Per cent of increase of popula- tion per year.	Per cent of increase of circula- tion per capita per year.

### <sup>1</sup> Decrease.

### CONDITION OF THE UNITED STATES PAPER CURRENCY.

The total stock of paper currency in the United States amounted to \$2,678,776,091 at the close of the last fiscal year, of which the National Government issued \$1,919,618,185, or 71.7 per cent, and the national banks \$759,157,906, or 28.3 per cent. The pieces outstanding of the denominations of \$5 and under number 327,008,021, of which the Government issued 297,831,944, or 90 per cent, and the national banks 29,176,077, or 9.9 per cent.

During the fiscal year 1913 the Government issued 318,264,407 pieces of paper currency of the total value of \$1,035,462,000, while 291,131,640 pieces of worn and unfit paper money of the total value of \$987,060,200 were redeemed and retired.

National banks are precluded from issuing \$1 and \$2 notes, and the issue of \$5 notes is limited to one-third in amount of the total circulation of the banks. Experience shows that a large number of the banks are reluctant to issue \$5 notes. If the option of one-third in \$5 bills had been taken by all national banks the normal supply of such bank bills on June 30, 1913, would have been \$253,052,635 instead of the amount reported, viz, \$143,751,670.

National-bank notes are not available for "reserves," and for this reason large amounts of such circulation are returned to the Treasury by the banks for redemption in order to replenish their "reserves." The expense of transportation to the Treasury in such cases is borne by the bank of issue, while the return of the proceeds is at the expense of the owner of the notes. The owners of Government paper currency sent to the Treasury for redemption have to pay the transportation charges both ways, and the payment of these charges under contract rates gives rise to a burden that does not bear equally upon the banks and other business interests in the different sections of the country, as for instance, the contract rates from Chicago, St. Louis, and Boston to Washington are 20 cents per \$1,000, while such rates from Savannah, Charleston, Richmond, and other southern cities to Washington are 60 cents per \$1,000.

It would be a wise and popular measure for the Government to bear the expense of transporting its unfit currency to the Treasury for redemption; and it can well afford to do this, for by the use of the registered mail, with the insurance feature attached, it would give equal opportunities to the people of all sections and reduce the expense. Banking institutions in all parts of the country are resorting to this method of transportation with satisfactory results. There can be no objection to the same use of the registered mail by the Government.

It is apparent that there is necessity for legislation that will equalize the expense of redemption between the different sections of the country. This may be accomplished through a more extended use of the registered mail, and in this connection the Treasurer renews the suggestion of his predecessor that recommendation be made to Congress for legislation that will remove the limit on the weight of a package which may be sent through the registered mail of the United States and that will authorize the transportation of moneys to and from the Treasury or between Treasury offices by registered mail, insured.

Laundering machines for cleaning United States paper money received for redemption, and rendering such currency fit for further circulation, have been installed in the Treasury at Washington and the subtreasuries at New York, Boston, Philadelphia, and Chicago. In planning work for these machines it was anticipated that the subtreasuries at Baltimore, St. Louis, Cincinnati, and New Orleans would furnish from 15,000 to 20,000 notes each daily, but actual results demonstrated the fact that these offices could supply only an average of about 4,000 notes each per day. In the Treasury at Washington there was lack of employees to properly handle this work, so that the product of the machines has been confined to such material as could be readily furnished, being silver certificates of the denominations of \$1, \$2, and \$5, and approximately 150,000 notes are now cleaned daily at the Treasury and the subtreasuries. It is expected that the number of pieces will be increased to at least 200,000 in a short time.

It is not contended that the washed notes are equal to or will give as much service as new notes, but it is believed that the life of usefulness of the laundered notes will be prolonged at a very small expense.

### UNITED STATES NOTES.

The principal issue of United States paper money is officially called United States notes. These are the well-known "greenbacks" or "legal tenders," the first issue of which was authorized by the act of February 25, 1862. The total amount authorized was \$450,000,000,

and the highest amount outstanding at any time was \$449,338,902, on January 30, 1864.

Under the operations of enactments by Congress authorizing the canceling and retiring of these notes as they were received in the Treasury, the amount outstanding had been reduced more than \$100,000,000 when the process was finally stopped by the act of May 31, 1878, which required the notes to be reissued when redeemed. At that time the amount outstanding was \$346,681,016 and it has not been changed since.

The United States notes issued and redeemed during the last fiscal year were \$163,000,000, an amount that has not been exceeded in any year since the close of the War of the Rebellion. The demand for small denominations of currency is at all times urgent. The growth in the volume of United States notes of the denomination of \$5 outstanding is the result of the efforts made by the department to supply the demand through the process of redemption and reissue—that is to say, by substituting the smaller denomination for the higher. denominations redeemed and retired.

The amounts issued and redeemed by denominations during the fiscal year 1913 are recorded in the annexed table:

	Outstanding	Fiscal y	Outstanding	
Denominations.	June 30, 1912.	Issued.	Redeemed.	June 30, 1913

Net	346,681,016	163,000,000	163,000,000	346,681,016

### TREASURY NOTES OF 1890.

The Treasury notes of 1890 are slowly disappearing under the provisions of the act of March 14, 1900. The total amount of these notes issued for the purchase of silver bullion to November 1, 1893, the date of the repeal of the act, was \$155,931,002. The amount redeemed and retired during the fiscal year 1913 was \$269,000, and the amount outstanding at the close of the year was \$2,660,000, against which standard silver dollars in equal amount are held in the trust funds for their redemption when presented.

The amount outstanding, by denominations, on June 30 for the past seven years is stated in Table No. 21, page 264.

### GOLD CERTIFICATES.

The gold certificates continue to advance in volume year by year and to add strength to our circulation. There is no limit to the volume that may be issued for gold coin and bullion presented at the Treasury offices. The amount outstanding at the close of the last fiscal

Digitized for FRASER http://fraser.stlouisfed.org/

year was \$1,086,727,169, an increase of \$46,669,800 as compared with that of the previous year. The denominations of these certificates are restricted to \$10 and above, but as the department is limited in its resources for the issue of currency of small denominations it becomes more apparent each year that a \$5 gold certificate is an absolute necessity. Large amounts of gold certificates are returned to the Treasury daily for redemption usually accompanied with a request for the return of a part of the proceeds in denominations of \$5. If the department were clothed with authority to issue a \$5 gold certificate, it would be in condition to respond to all demands for denominations of \$5 and under.

The gold certificates issued and redeemed, by denominations, during the fiscal year 1913 are stated in the table following:

Durantization	Outstanding	Fiscal	Outstanding		
Denominations.	June 30, 1912.	Issued.	Redeemed.	June 30, 1913.	
Ten dollars. Twenty dollars. Filty dollars. Five hundred dollars. Five hundred dollars. One thousand dollars. Five thousand dollars. Ten thousand dollars. Ten thousand dollars.	256, 496, 964 55, 053, 055 80, 127, 550 18, 239, 000	\$179,360,000 103,680,000 19,400,000 24,400,000 4,100,000 10,500,000 10,000,000 117,070,000 468,510,000	\$117, 389, 190 82, 625, 760 15, 727, 800 20, 377, 950 4, 039, 500 12, 320, 000 28, 290, 000 141, 070, 000 421, 840, 200	\$288, 406, 110 277, 551, 204 58, 725, 255 84, 149, 600 18, 299, 500 64, 945, 500 76, 730, 000 217, 920, 000 1, 086, 727, 169	

### SILVER CERTIFICATES.

The volume of silver certificates outstanding increased during the fiscal year from \$481,549,000 to \$483,550,000, and this growth was in denominations of \$1, \$2, and \$5.

The resources of the department for the issue of silver certificates of the smaller denominations, which are in great demand, is limited to the free silver dollars in the Treasury, however this resource is augmented through the process of redemption and reissue. The silver certificates of the denominations of \$10 and above as they are redeemed are reissued in denominations of \$5 and under.

The transactions in silver certificates, by denominations, during the last fiscal year are shown in the following table:

Denemination	Outstanding	Fiscal y	Outstanding	
Denominations.	June 30, 1912. Issued.		Redeemed.	June 30, 1913.
One dollar. Two dollars. Five dollars. Ten dollars. Twenty dollars. Fifty dollars. One hundred dollars. Five hundred dollars. Five hundred dollars. Total	481, 549, 000	403, 952, 000	401,951,000	483, 550, 000

### CHANGES IN DENOMINATIONS.

Experience in all recent years makes clear that the supply of small notes is hardly equal to the demand. No rule can be set up by theory of the proper ratio of the several denominations to each other. The needs of business must be recognized and obeyed. Those needs make constant demand for small bills as instruments of local trade. The burden of supplying the smaller denominations required falls upon the Treasury, and it has employed all its resources to respond to the conditions. Through the process of redeeming the larger denominations of United States currency and issuing smaller denominations in lieu thereof the Treasury has been enabled to supply the greater part of the demand for such bills.

The total amount of United States paper currency of each denomination issued, redeemed, and outstanding at the close of the fiscal year 1913 is recorded in the annexed statement:

Danaminatina	Outstanding	Fiscal ye	Outstanding	
Denominations.	June 30, 1912.	Issued.	Redeemed.	June 30, 1913.

### PIECES OF UNITED STATES PAPER CURRENCY OUTSTANDING.

The demand for small denominations of paper currency, which is supplied through the process of redeeming the larger denominations and issuing smaller denominations in lieu thereof, causes a steady increase in the number of pieces of United States paper currency outstanding. This increase may be observed from a comparative monthly statement thereof for the fiscal years 1912 and 1913, as follows:

	Fiscal year 1	912, outstanding.	Fiscal year 1913, outstanding.		
Months.	Number of pieces.	Total value.	Number of pieces.	Total value.	
July August September October November December January. February March April. ederal Reserve Bank of St. Louis

# PAPER CURRENCY, BY DENOMINATIONS, OUTSTANDING JUNE 30, 1913.

The amount of each kind of paper currency outstanding, by denominations, may be studied in the monthly statement for June, 1913:

				·····		
Denomination.	United States notes.	Treasury notes of 1890.	National-bank notes.	Gold certifi- cates.	Silver cer- tificates.	Total.

### RATIO OF SMALL DENOMINATIONS TO ALL PAPER CURRENCY.

The ratio of denominations of \$10 and less to the total paper currency, by fiscal years since 1906, is recorded in the statement following:

		Denominations of \$10 and less.					
Dates.	Total paper currency.	One dollar.	Two dollars.	Five dollars.	Ten dollars.	Total.	
July 1, 1906 July 1, 1907 July 1, 1908 July 1, 1909 July 1, 1910 July 1, 1910 July 1, 1911 July 1, 1912 July 1, 1913	2, 111, 659, 575 2, 345, 130, 802 2, 375, 261, 959 2, 419, 600, 310 2, 538, 656, 263	Per cent. 5.31 5.24 4.92 5.33 5.93 6.02 6.25 6.76	Per cent. 2.51 2.69 2.46 2.44 2.54 2.45 2.46 2.53	Per cent. 19. 67 19. 48 20. 79 19. 84 20. 62 20. 39 20. 55 20. 82	Per cent. 27. 43 25. 84 26. 00 25. 77 26. 53 26. 28 26. 33 27. 15	Per cl. 54. 93 53. 26 54. 19 53. 40 55. 62 55. 16 55. 65 57. 28	

### COST OF PAPER CURRENCY.

The paper currency issued by the United States is said to be superior to that of any other nation in the world. The quality of the material used and the artistic work of the engraver give us a product that presents almost insurmountable obstacles to those who would profit by false imitations. Inquiries often reach the department relating to the production and the cost of the paper currency.

As a matter of information it may be stated that the paper used is made by a secret process under Treasury supervision by annual con-

### REPORT ON THE FINANCES.

tract under competitive bids. The Bureau of Engraving and Printing, a branch of the department, designs, under the direction of the Secretary, engraves, and prints the notes and certificates complete. This currency is delivered to the Treasurer in packages of 4,000 notes, the product of 1,000 sheets of paper. Such a package is taken as the unit from which to reckon the cost.

With the allowance for every item of expense attending the making, the issue, and the redemption of this paper currency, it appears that the average cost is as follows:

Total average expense of 4,000 notes issued	\$52.50
Total average expense of 4,000 notes redeemed	8.54
· · · · ·	

From the foregoing it may be readily ascertained that the average cost for each note is 1.526 cents. Calculations based upon these average expenses of issue and redemption indicate results that will be very close to the actual cost of maintenance of the paper currency, and such cost for the fiscal years 1912 and 1913 may be studied from the details set forth in the annexed table:

### Total expenses of issue and redemption.

	Fiscal years.	Number of pieces.	Cost per 1,000 pieces.	Total cost.
Issued Redeemed	1912.	 290, 809, 347 273, 426, 336	\$13. 125 2. 135	\$3, 816, 872. 68 583, 765. 23
Total	· · · · · · · · · · · · · · · · · · · ·	 		4,400,637 91
Issued Redeemed	1913.	 318, 264, 407 291, 131, 640	13. 125 2. 135	4,177,220.34 621,566.05
Total	· · · · · · · · · · · · · · · · · · ·	 		4, 798, 786. 39

United States paper currency outstanding and cost of maintenance.

	Amount out-	Cost of maintenance.		
Viscal years.	standing.	Amount.	Per cent.	
1912 1913	\$1,871,216,385 1,919,618,185	\$4, 400, 637. 91 4, 798, 786. 39	0. 235 . 249	

In this connection attention is invited to the saving of abrasion on the gold and silver coins held in the Treasury against outstanding certificates and notes, which to all intents and purposes is an offsetting item against the cost of the paper currency issued directly by the Government, though not so treated in the foregoing calculations.

### AVERAGE LIFE OF PAPER CURRENCY.

The large amounts of the various kinds of currency presented for redemption, and its condition, lead to the conclusion that the service of our paper money is materially shortened by the increasing activities of such currency in the channels of trade. This is especially noticeable in the smaller denominations, \$5 and under.

Denominations.	United States notes.	Treasury notes.	Gold certifi- cates.	Silver certifi- cates.	National- bank notes.

All denominations.	3.32	2. 20	2.36	1. 31	2.8

The average lifetime of each note, in years by kinds, may be studied in the subjoined statement:

### PAPER CURRENCY PREPARED FOR ISSUE AND AMOUNT ISSUED.

The growth in business activities, and the tendency toward the use of small denominations are gradually increasing the pieces of United States paper currency in circulation, which numbered 354,461,922 on June 30, 1913, of the total value of \$1,920,618,185. The Government issues the greater part of the paper currency required; therefore it is incumbent upon the Treasury to maintain this great number of pieces and to provide for the annual growth of the smaller denominations so much in demand in the channels of trade. Experience and forethought prompt the preparation of an adequate volume of paper currency of the kinds and denominations authorized by law in advance of putting same into circulation. The reserve vault should be well stocked with such paper, and it should be retained there until it is thoroughly seasoned before it is issued. Heretofore but little progress has been made in accumulating a sufficient reserve of such bills, but it is believed that with the improved facilities now in operation the output in future will be ample for this purpose.

The number of pieces and amount of paper currency prepared for issue and the amount issued since 1906 are recorded in the table here:

	Prepared for issue.			Paper currency issued.

United States paper currency issued during the fiscal years 1912 and 1913.

SUPPLY OF UNITED STATES PAPER CURRENCY HELD IN RESERVE.

For the past two or three years practically the whole output of small denominations was required for issue; consequently but little progress was made in storing up an adequate supply of notes and certificates fitted for good service.

A comparison by number of pieces of each denomination and total value of the United States paper currency held in the reserve vault at the close of the fiscal years 1912 and 1913 may be observed in the following statement:

	Held Ju	ne 30, 1912.	Held June 30, 1913.

Total	34,987,937	440, 640, 000	23, 911, 530	308, 894, 00

### REDEMPTIONS OF PAPER CURRENCY.

The redemptions of currency have steadily increased and are now nearly equal to the issues. There were 291,131,640 pieces of United States paper currency redeemed during the last fiscal year, an increase of 17,705,304 pieces; or 6.47 per cent, over those of the preceding 12 months. The pieces redeemed were 322,293 greater than those issued in 1912.

The transactions, by months, for the past two fiscal years are recorded in the table following:

	Fiscal year 1912.			, Fiscal year 1913.			
Months.	Number of notes and certificates.	Total value.	A verage value of notes and certifi- cates.	Number of notes and certificates.	Total value.	A verage value of notes and certifi- cates.

United States paper currency redeemed during the fiscal years 1912 and 1913:

#### STANDARD SILVER DOLLARS.

The stock of standard silver dollars at the close of the fiscal year 1913 was \$565,613,263, of which \$72,127,193 were in circulation, and \$493,486,070 were held in the Treasury, against which silver certificates to the amount of \$483,550,000 were outstanding. There is some demand for these silver dollars, which are shipped to depositors therefor at the expense of the consignee for transportation charges. The amount so distributed during the last fiscal year was \$12,560,078, an increase of \$718,204 as compared with such shipments in 1912.

The shipments, by offices, for the past three fiscal years are set out in the statement following:

		Fiscal year-

### SUBSIDIARY SILVER COIN.

The general stock of subsidiary silver coin in the United States at the close of the fiscal year 1913 was \$175,195,996, an increase of \$4,607,791, as compared with that of 1912. The amount in circulation was \$154,458,070, and there were held as assets in the Treasury \$20,737,926. The amount of these coins shipped to depositors therefor in 1913 was \$22,767,796.80, as against like shipments of \$21,476,-457.40 in 1912, an increase of \$1,291,339.40.

The subsidiary silver coins are redeemable in the lawful money of the United States, and under the operation of this provision of law there is usually an accumulation of these coins in the Treasury offices from January to June, but after this period the seasonable movement begins and great quantities are distributed, either to depositors therefor by express, at the expense of the consignee for transportation charges, or are paid over the counter at subtreasuries in exchange for other kinds of money.

The amount shipped to depositors therefor, by offices, during the past three fiscal years is recorded in the subjoined table:

	Fiscal year—			
Offices.	1911	1912	1913

### MINOR COIN.

These token coins form no part of the stated stock of money in the country, but the demand for them attest their popularity in the channels of trade. They are redeemable in the lawful money of the United States when presented in sums or multiples of \$20 to the Treasurer or any Assistant Treasurer.

The net addition made to the outstanding during the last fiscal year was \$4,106,794.86, of which \$1,056,814.12 was in bronze cents and \$3,050,724.55 in nickel 5-cent pieces, while the older coins decreased \$743.81.

The amount of each denomination of minor coin outstanding at the close of the fiscal years 1912 and 1913 may be studied in the statement following.

	Outstanding	Fiscal yea	r 1913.	Outstanding	
	June 30, 1912.	Issued.	Remelted.	June 30, 1913.	
Copper cents. Copper half cents. Copper nickel cents. Bronze 1-cent pieces. Bronze 2-cent pieces. Nickel 3-cent pieces. Nickel 3-cent pieces.	$\begin{array}{c}1,203,758.56\\20,106,972.29\\.571,759.68\\657,837.53\end{array}$	\$1,078,292.60 3,162,824.60	$215.00 \\ 21,478.48 \\ 133.00$	\$1, 182, 000, 22 39, 926, 11 1, 203, 543, 56 21, 163, 786, 41 571, 626, 68 657, 501, 53 34, 475, 189, 60

TRANSFERS OF FUNDS FOR DEPOSITS MADE IN NEW YORK.

The cooperation of the Treasury is frequently requested by banking institutions in the transfer of large amounts of money between subtreasury cities, through the medium of the general account, to be used in the movement of crops or to meet other demands of business. These requests are granted when such transfers are not incompatible with the public interest.

The following table gives the deposits in New York in calendar years and the resultant payments in the several cities from 1908 to June 30, 1913:

Transactions.	Gold coin and certificates.	United States notes.	Silver dollars and certificates.	Total.
1908—Receipts	\$4,025,779.00	\$108,000.00	\$100,000.00	\$4,233,779.00

### USE OF ORDER GOLD CERTIFICATES FOR EXCHANGE ON NEW YORK.

Previous to February 1, 1910, the banks in San Francisco, under provisions of existing law, exchanged gold coin at the Subtreasury for demand gold certificates of large denominations, which they sent by registered mail to their correspondents in New York, thus effecting a transfer of funds at small cost to the banks. The demand gold certificates were shipped from Washington to San Francisco by express at the rate of \$1.75 per \$1,000, while order gold certificates (incomplete) were sent by express in packages of \$5,000,000 at a total coast of only \$15.

In order to eliminate the expense of transporting demand certificates to San Francisco, and at the same time to grant to the banks in that city their rights under the law to deposit gold coin in exchange for gold certificates, it was deemed advisable to issue to said banks order gold certificates, series of 1900, and to make them payable by the assistant treasurer of the United States, New York. Under this plan an actual saving of expense was effected even if it should later become necessary to transport the gold coin so deposited to New York, because the transportation charge on gold coin from San Francisco to New York is less than the charge on demand gold certificates from Washington to San Francisco. However, there is usually a "return movement" at certain seasons of the year, during which it becomes desirable on the part of banks to make deposits of funds in New York, and to have payments made therefor in gold coin at the Subtreasury in San Francisco.

The transactions, semiannually, since February, 1910, are recorded in the statement following:

Period.	Order gold certificates issued in San Francisco and redeemed in New York.	Deposits in New York for which pay- ments were made in San Francisco.
1910-February to June, inclusive. July to December, inclusive.	600,000	\$2,650,000 4,260,000
		3, 500, 000 8, 250, 000
July to December, inclusive. July to December, inclusive. July to December, inclusive. July to December, inclusive.	5,200,000	10, 418, 566 6, 929, 239 1, 988, 958
Aggregate	20, 550, 000	37,996,763

It will be observed that the deposits made in New York on account of the return movement are \$17,446,763 in excess of the payments made for gold-certificates issued at San Francisco. This method of using the order certificates is in the interest of good administration, and has made it possible to discontinue the shipments of demand gold certificates from Washington to San Francisco, with a resultant saving of transportation charges.

### REPORT ON THE FINANCES.

### DEPOSITS OF GOLD BULLION AT MINTS AND ASSAY OFFICES IN THE FISCAL YEARS 1912 AND 1913.

Under the provisions of an act of Congress approved March 2, 1911, the new product of our gold mines and all imports of gold may be deposited in the mints and assay offices, for which the full value thereof will be paid, either in coin or by check on the Treasurer of the United States, and against the gold so deposited and paid for, the Secretary of the Treasury may, in his discretion, issue gold certificates.

The new product of the mines or original deposits of gold bullion at the mints and assay offices during the fiscal years 1912 and 1913 may be observed in the statement following:

Office.	1912	1913
Philadelphia	\$1,619,039.16	
San Francisco Denver	20, 330, 523. 60	
New York New Orleans		65,612,158.65 897,328.15
Carson. Helena	997, 917. 63	724,853.3
Boise Charlotte	870, 145. 44	1,008,940.29
DeadwoodSeattle		7, 290, 951. 5 4, 951, 640. 5
Salt Lake City	1, 122, 600. 67	595, 520. 36
Total	148, 425, 111. 74	159, 277, 471. 32

#### SHIPMENTS OF CURRENCY FROM WASHINGTON.

During the fiscal year 1913 the currency distributed from the Treasury in Washington to the subtreasuries and to banks amounted to \$882,677,335, against \$761,847,077 during the preceding 12 months. In 1912, 17,822 packages were sent by registered mail and 97,596 by express, while in 1913, 18,971 went by registered mail and 106,073 by express.

The transactions during the past two fiscal years are compared in the statement following:

	Fiscal year 1912.		Fiscal year 1913.	
	Number of packages.	Amount.	Number of packages.	Amount.
Total by express	97, 596 17, 822	\$758,634,665 3,212,412	106,073 18,971	\$878,703,859 3,973,476
Aggregate	115,418	761, 847, 077	125,044	882,677,335

### RECOINAGE IN THE FISCAL YEAR 1913.

Gold coins presented for payment or deposit on any account at the Treasury offices are weighed in, and the pieces that are too light for further circulation are segregated for transmission to the mint. The subsidiary silver coins and minor coins received are assorted, and the pieces that are unfit for circulation are set aside for similar disposition. The gold coins sent to the mint for recoinage during the fiscal year 1913 amounted to \$912,799, the silver coins to \$407,075, and the minor coins to \$134,284.

Digitized for FRASER http://fraser.stlouisfed.org/

### TRÉASURÉR.

The face value in each case, and the loss in gold, silver, and minor coin, respectively, are set forth for the past two fiscal years in the subjoined table:

	Fiscal year 1912.		Fiscal ye	ar 1913.

Aggregate	3, 253, 909. 27	58, 356. 28	1,454,158.00	41,659.0

### REDEMPTION OF NATIONAL-BANK NOTES.

There has been a constant increase in redemptions of national-bank notes for a number of years past and during the fiscal year 1913 the amount presented was \$675,889,000, 90.01 per cent of the average circulation outstanding, and was \$25,934,289 more than the largest amount previously received during a year, which was in 1912. Of the total received, 47.62 per cent was sent by banks in New York City. The number of remittances was 46,703, and these contained 69,832,398 The average value of notes presented was \$9.62, while that of notes. the outstanding was \$10.20. Of the average amount of \$5 notes outstanding, 104.26 per cent was redeemed; of the \$10 notes, 93.28 per cent; of the \$20 notes, 80.18 per cent; of the \$50 notes, 73.53 per cent; and of the \$100 notes, 61.80 per cent. The receipts for the first six months of the fiscal year, July to December, were 44.74 per cent of the total, and those for the last six months, January to June, 55.26 per The largest amount presented during a month was \$79,753,664 cent. in January, and the smallest \$41,816,565 in September.

Payment was made for notes received as follows: By Treasurer's checks to the amount of \$230,238,151, by remittances of \$352,869,976 in new United States currency, by remittances of \$122,710 in gold, silver, and minor coin, and by credit of \$89,891,431 in various accounts.

Notes assorted and delivered during the year amounted to \$669,-405,645.50. Of this sum \$218,884,750 was fit for use and was forwarded by express to banks of issue in 143,257 packages; the remainder was unfit for use and was delivered to the Comptroller of the Currency, \$426,431,860 for destruction and reissue, in 218,754 packages, and \$24,089,035.50 for destruction and retirement, in 13,277 packages.

Owing to heavy redemptions the amount of notes on hand exceeded the balance in the 5 per cent fund, except during portions of the months of December and January, and the Treasury advanced

#### REPORT ON THE FINANCES.

payment out of the general fund as the notes were received. The largest amount advanced at one time was \$23,914,635.44, on January 18, 1913. As the redemptions were greater during 1913 than 1912, the condition during 1913 was an improvement over that of the previous year, when the 5 per cent fund was at no time equal to the demands made upon it, and the largest advance at one time was \$3,000,000 more than on the above date.

The expenses of redemption, amounting to \$517,842.93, have been assessed upon the banks in proportion to their notes redeemed at the rate of \$0.77293 per \$1,000.

#### SPURIOUS ISSUES DETECTED IN 1913.

The counterfeit coins and paper currency detected at the Treasury during the past fiscal year were \$1,569.20 less in face value than in the 12 months preceding.

Comparison, by items, for the past three fiscal years follows:

Kinds.	1911	1912	1913
United States notes	\$3, 796.00	\$3,934.00	\$2,641.0
Treasury notes of 1890	74.00	27.00	54.00
Gold certificates	150,00	20.00	470.00
Silver certificates	723.00	850.00	1,308,00
National-bank notes	3,978.00	3,279,00	2, 106, 00
Gold coin	333.00	324.00	462.50
Silver coin	3,075,00	3, 118, 45	3,063,3
Minor coin	385.61	157.81	403.36
Fractional currency	153.30	106.85	189.70
Compound-interest notes	200.00	500.00	50.00
Total.	12,867.91	12, 317, 11	10,747.9

#### SPECIAL TRUST FUNDS.

The Treasurer of the United States is custodian of several special trusts, consisting of bonds and other obligations, which are held under provisions of law or by direction of the Secretary of the Treasury.

The kinds of bonds or obligations held on each account and transactions therein during the past fiscal year are recorded in the subjoined statement:

<b>TT</b> 1.1 <b>T</b> 0.0	Fiscal y	<b>T 11 T</b> 40

Digitized for FRASER http://fraser.stlouisfed.org/

The General Assembly of the State of Louisiana in July, 1912, passed a joint resolution proposing an amendment to the constitution of the State, authorizing the board of liquidation of the State debt to create a sinking fund and to provide for the payment in full out of the first surplus accruing in the sinking fund the amount of principal and interest due on the bonds of the State, the face value of which aggregates \$37,000, and which are held by the United States as trustee for certain Indian funds. This proposition was submitted to the qualified electors of the State and was ratified by them at the general election on November 5, 1912.

The State of North Carolina has authorized and appointed commissioners to take under consideration a plan for settling the indebtedness of that State to the United States, but Congress postponed, action on a measure providing for representatives on the part of the Government.

Commissioners representing the Government and the State of Tennessee, under provisions of law, have now under consideration a plan for settling with that State. It is apparent that some progress has been made toward a settlement with the three States named in the foregoing for the unpaid matured bonds of those States belonging to the United States.

The bonds held for the Manhattan Savings Institution are in trust for that institution as indemnity for certain stolen bonds, as provided by act of December 19, 1878 (20 Stat., 589), and will be held for such time as, in the judgment of the Secretary of the Treasury, will secure the Treasurer of the United States against loss.

Recommendation has been made to Congress for authority to return to the State of Louisiana the bonds of that State captured at Shreveport by the Union forces during the War of the Rebellion, now held as a special deposit by the Secretary of War.

The special trust held for the Secretary of the Treasury is composed of notes of the Panama Railroad Co. drawing 4 per cent interest payable to the United States, and is security for money advanced for the equipment and construction of said railroad.

The special trust held for the District of Columbia represents, first, the moneys retained from contractors under provisions of law and invested at the request and risk of said contractors, and, second, obligations that belong to the District of Columbia.

The special trust held for the board of trustees, Postal Savings System, consists wholly of postal savings bonds, representing investments made by said board, as described on page 209.

### DISTRICT OF COLUMBIA.

The transactions of the Treasurer of the United States, ex officio commissioner of the sinking fund of the District of Columbia, pertaining to the affairs of the District are fully set forth in a separate report.

During the fiscal year 1913 the funded debt retired amounted to \$647,700, resulting in the reduction of the annual interest charge by \$23,641.05.

On July 1, 1878, when the Treasurer was charged with the duties of the late commissioners of the sinking fund of the District of Colum-

bia, the bonded debt was \$22,106,650; since that date 3.65 per cent bonds have been issued, amounting to \$1,254,050, making a total debt of \$23,360,700. This sum has been decreased by the operation of the sinking fund and otherwise \$15,749,850, leaving outstanding July 1, 1913, \$7,610,850 of bonds bearing 3.65 per cent interest.

The annual interest charge on July 1, 1878, was \$1,015,759.12 and on July 1, 1913, \$277,796.02, showing a reduction of \$737,963.10.

The retentions from 30 contracts with the District of Columbia were canceled during the year by the return to the contractors of \$44,020 in bonds and \$24,307.70 in cash.

At the close of the fiscal year the 10 per cent guaranty fund held for account of contracts amounted to \$252,808.18 and is represented by \$157,010 in bonds purchased at the request and risk of contractors and \$90,143.35 uninvested cash.

The securities of the District in the care and custody of the Treasurer are:

Bonds for account of contractors Chesapeake & Ohio Canal bonds Board of audit certificates	84, 285. 00
Total	261, 429. 72

### LEGISLATION RECOMMENDED.

It is suggested that recommendation to Congress be made in such form as may be deemed advisable for legislation that will authorize favorable action on the following subjects:

1. Gold certificates for \$5.—There is necessity for increasing the resources of the Treasury for the issue of small denominations of currency. It is believed that the issue of gold certificates for \$5 instead of restricting the issue as now to \$10 and above will enable the department to respond to the demands for small denominations.

2. Increased facilities for exchanging worn and defaced United States paper currency for new.—There is a constant and widespread interest which advocates a cleaner and more sanitary currency. The sentiment is a laudable one and should be attainable, because the expense is but a trifle as compared with the beneficent results. The Government can well afford to replace its paper issues when unfit for circulation.

3. Increase of the 5 per cent bank-note redemption fund.—Experience shows that the 5 per cent redemption fund is not adequate for the purposes intended. For the greater part of the last fiscal year the Treasury had to advance money for the redemption of bank notes = on the security of the notes themselves. As the notes are not obligations of the Treasury, the banks should be required to deposit a greater amount to provide for current redemptions.

4. Restriction on amount of \$5 bank notes.—It appears that national banks located in commercial centers are not disposed to issue the full amount of \$5 notes authorized by law, while the banks located in the interior or outlying sections of the country would largely increase the amount of their \$5 notes but for the limitation by statute. Therefore it is believed that the repeal or modification of the provision limiting

<sup>1</sup> Of which \$650 was received and sent to the office of the Secretary for transfer, but was not placed in the custody of the Treasurer until July 1, 1913.

Digitized for FRASER http://fraser.stlouisfed.org/

the \$5 notes to one-third in amount of the circulating notes of national banks would be the means of increasing the amount of such notes in circulation, and would accordingly reduce the demand upon the Treasury for United States paper currency of small denominations.

5. Removing limit on weight of registered package.—It is believed that the removal of the limit on the weight of a package which may be sent through the registered mail of the United States would facilitate a greater use of this method of transportation; and if followed by an enactment that will authorize the transportation of paper currency to and from the Treasury or between Treasury offices by registered mail insured, it would be in the interest of economical administration.

Upon the termination of the administration of Hon. Carmi A. Thompson, March 31, 1913, the duties of the office of Treasurer of the United States devolved upon the present incumbent.

The transfer involved an examination of the moneys, securities, and other evidences of value that came into the Treasurer's immediate charge, amounting to \$1,426,422,051.483. The examination was concluded April 8, 1913, and the report of the committee in charge gave the most satisfactory assurance that the funds transferred were absolutely correct and in agreement with the accounts.

This result is undoubtedly the best comment on the zeal and active interest which the staff, chiefs of divisions, clerks of every grade, and every person employed in the office have taken in the performance of their responsible duties.

Respectfully,

JOHN BURKE, Treasurer.

Hon. WILLIAM G. MCADOO, Secretary of the Treasury. 235

## REPORT OF THE DIRECTOR OF THE MINT.

## TREASURY DEPARTMENT, BUREAU OF THE MINT,

Washington, D. C., January 10, 1914.

SIR: In compliance with the provisions of section 345, Revised Statutes of the United States, I am submitting herewith a report covering the operations of the mints and assay offices of the United States for the fiscal year ended June 30, 1913, being the forty-first annual report of the Director of the Mint. I am also submitting for publication in connection therewith the annual report of this bureau upon the production and consumption of the precious metals in the United States for the calendar year 1912.

## MINT SERVICE.

#### OPERATIONS OF THE MINTS.

The three coinage mints at Philadelphia, Denver, and San Francisco were in operation during the fiscal year, and nine assay offices, located at New York, Charlotte, New Orleans, Deadwood, Helena, Seattle, Boise, Salt Lake City, and Carson.

The original deposits of gold at all of the offices of the Mint Service during the year amounted to \$161,131,878.30. The total coinage of the year amounted to \$37,496,529.70, of which \$30,058,227.50 was gold, \$3,448,199.75 was silver, \$2,861,768.55 was nickel, and \$1,128,333.90 was bronze.

The purchases of silver during the year amounted to 1,779,992.99 ounces, costing \$1,086,347.87, at an average cost of 61 cents per ounce. The seigniorage on subsidiary silver coins during the year amounted to \$1,618,475.17, and the seigniorage on the minor coin amounted to \$3,548,520.03, all of which was duly accounted for and turned into the Treasury.

The mint at Philadelphia during the year also coined 803,348 pieces of silver for the Government of Costa Rica, and the mint at San Francisco coined 2,638,820 pieces of silver and 5,001,000 bronze pieces for the Philippine Islands government.

#### PHILADELPHIA MINT.

The Philadelphia Mint has been in operation throughout the year, excepting the period required for the annual settlement. A new minor coinage plant has been put into partial operation during the year. Heretofore the minor coin ingots have been made of approximately the same size as the ingots of gold and silver and rolled in the same mills. The new ingots are 23 inches long, 44 inches wide, and

301

three-fourths of an inch thick, and will be rolled in 16-inch mills installed for this purpose. The capacity of the mint for minor coins is greatly increased. Particulars are given elsewhere in this report.

Continuous experiments with oil-burning furnaces have been under way at this mint for the last two years, but the results have not been entirely satisfactory. The increase in the price of gasoline during the year has been so great that after a calculation of costs it was found advantageous to go back to the use of illuminating gas for melting purposes.

## SAN FRANCISCO MINT.

A change of superintendents has occurred at this mint since the close of the fiscal year, Thaddeus W. H. Shanahan succeeding Mr. Frank A. Leach. The latter originally served between August, 1897, and November, 1907, becoming Director of the Mint at the latter date. Having resigned the latter position in 1909, he was reappointed in August, 1912, as superintendent of the mint, to fill the vacancy caused by the death of Edward Sweeney.

A complete settlement of the accounts and count of funds was had, which was completed November 12, 1913. In making the count, vaults believed to contain in the aggregate \$61,395,000 in silver dollars, which had not been disturbed for more than 30 years, were opened, the bags emptied, and the contents examined and weighed. Five bags were found to have been tampered with, 18 coins in all having been abstracted and iron washers substituted therefor. This pilfering was undoubtedly done at the time the coins were originally sacked, as the vaults have been continuously under seal. The original sacking was done in 1880, 1881, and 1882. Aside from these discrepancies, all bullion and moneys were accounted for and duly delivered to the incoming superintendent.

#### DENVER MINT.

A change in superintendents at this institution has been made since the close of the fiscal year, Thomas Annear succeeding Frank M. Downer, who had held the position since September 3, 1902. Under his administration, in 1906, the institution was reorganized from simply an assay office to a coinage mint. Upon settlement everything was found in order, and the bullion and coin charged to the institution, amounting to \$499,695,091.90, was turned over to the incoming superintendent.

In the detailed report upon the operations of this mint will be found an account of successful experiments in the refinery by which an important economy has been developed in the electrolytic process. At the close of the fiscal year B. P. Wirth, who has been in charge of this refinery almost from the opening of the mint, was transferred and promoted to the position of superintendent of the melting and refining department of the New York assay office.

#### ASSAY OFFICE AT CHARLOTTE CLOSED.

The United States assay office at Charlotte, N. C., was closed finally on June 30, 1913, Congress having failed to make provision for its support beyond that date. Such pieces of equipment as were valuable for further use were shipped to other institutions of the

service and the remainder of the furniture and outfit was sold at auction on the premises and the proceeds turned into the Treasury.

In recent years the receipts of bullion at the Charlotte office have been insufficient to warrant its continuance, amounting in the last fiscal year to only \$29,428.30.

The Charlotte assay office was originally established as a coinage mint in an act approved March 3, 1835, which also established branch mints at New Orleans, La., and Dahlonega, Ga. The mints at Charlotte and Dahlonega were designed to serve the gold-producing districts of the southern Appalachian region, which at that time comprised the only gold-mining territory in the United States. New Orleans was an important commercial port, and the mint there was expected to operate upon foreign coin and bullion.

From 1804 to 1823 small deposits of native gold aggregating in three years \$47,000 had been received at the Philadelphia Mint from North Carolina. The receipts from this State gradually increased, and in 1829 they amounted to \$134,000, and there was also \$2,500 from Virginia and \$3,500 from South Carolina. In 1830 Georgia entered the list of gold-producing States with an output of \$212,000, and the yield of the four States aggregated \$466,000. In 1831 Alabama and Tennessee each made a small showing and in 1834 the southern Appalachian region made its best output, approximately \$900,000. In the following year the act providing for the three new branch mints was passed.

In November, 1835, Levi Woodbury, Secretary of the Treasury, was notified by Samuel McComb, who had been appointed to select a site for the Charlotte branch, that he had purchased from William Carson and F. L. Smith a full square containing near 4 acres of land for \$1,500.

Proposals for the erection of the building were advertised for in the Charlotte Journal, Washington Globe, Richmond Inquirer, and the North Carolina Standard. The contract was awarded to Perry & Ligon, of Raleigh, N. C., on October 15, 1835, at \$29,800, to be completed January 1, 1837. The cost of the machinery, to be furnished by the Director of the Mint at Philadelphia, was estimated at \$15,000. Coleman, Sellers & Sons, Philadelphia, furnished the steam engine, shaft, etc., for \$8,297, while Merrick, Agnew & Tyler furnished coining presses, draw benches, etc., for \$6,690. This equipment was shipped to Charlotte in April, 1837. Considerable difficulty occurred in transporting the heavy machinery to Charlotte, and the steam engine was not set up until the middle of August.

John H. Wheeler, of North Carolina, was appointed as the first superintendent. J. H. Gibbon and John R. Bolton, of Pennsylvania, were appointed assayer and coiner, respectively. In December, 1837, the Secretary of the Treasury was advised that the deposits of gold had amounted to \$130,600 and the coinage to \$84,165. The dies for this coinage were made at the Philadelphia Mint, and in transmitting them the Director of the Mint urged Col. Wheeler, the superintendent, to hasten the coinage, and mentioned that although the dies are dated 1838, there was no objection to using them in 1837. The reason given for haste was that the equipment might be tested and particularly the operation of the coinage press by steam power, which was regarded as in some degree experimental. The application of

steam power to coinage was first made in this country at the Philadelphia Mint in 1836.

On the night of July 27, 1844, it was nearly destroyed by fire, which occurred in the coining room, and nearly consumed the entire building. The machinery was seriously injured but the records being stored in the vault, were not injured. Mr. Caldwell, the superintendent, reported that evidently the fire was the work of a thief, as his living apartments had been entered and articles stolen.

The present building was authorized by act of March 3, 1845, and was completed at a cost of \$31,572.97, and occupied in 1846, and used for coinage purposes until May 20, 1861, when North Carolina entered the Confederacy and operations were suspended. The building was used during the Civil War as a Confederate hospital.

Total..... 4,405,135 544,915.00 109,138 5,059,188.00

The coinage made at Charlotte was as follows:

<sup>1</sup> Mint burned July 27, 1844.

<sup>2</sup> Operations suspended May 20, 1861.

In 1867 the assay office at Charlotte was reestablished by act of Congress dated March 19, and was maintained as such until the close of the fiscal year 1913.

The mint at Dahlonega was never reopened after the Civil War. Coinage operations were resumed at New Orleans after the war, but were suspended and the coining machinery removed in 1910.

#### ASSAY OFFICE AT NEW YORK.

The New York assay office has handled more bullion and made more assays during the past year than ever before, and the work has been done under many difficulties, the chief of which have been due to insufficient appropriations. The receipts of the office are steadily increasing and the amount of jewelers' gold and silver bars issued is constantly increasing, all making more work. The closing of the refinery in the Philadelphia Mint and opening of the new electrolytic

Digitized for FRASER http://fraser.stlouisfed.org/ refinery in the New York office has greatly increased the expenses. The earnings of the office from charges on bullion for treatment and for the manufacture of bars have correspondingly increased, but these earnings go directly into the Treasury and are not available for the payment of expenses.

These earnings for the last three fiscal years were as follows:

	Fiscal year.	-	Amount.
1910–11. 1911–12. 1912–13.			\$95, 940. 62 110, 256. 16 166, 641. 53

The total expenditures of this office for the fiscal year 1913 were \$191,773.47, so that it does not fall far short of reimbursing the Treasury for all expenditures in its behalf. As the larger part of the receipts consists of refined gold, which under the law is almost free from charges, the proportion of earnings to expenditures is very high.

It is earnestly represented that the increased estimates submitted for this office should be allowed in full.

The office is still crowded into the rear building intended to accommodate only the melting and refining departments. The rooms are inadequate for the entire office force and are unsuitable for transactions with the public. It is very much hoped that the new building planned for the Wall Street front may be pushed forward for early occupancy.

#### WESTERN ASSAY OFFICES.

The appropriations for the fiscal year 1914 for the assay offices at Deadwood, Helena, Salt Lake City, Boise and Carson were finally agreed to in conference between the two houses of Congress on the morning of March 4, 1913, after a protracted struggle between the House of Representatives, favoring the abolition of these offices, and the Senate, desiring to retain them. By the agreement the appropriations were cut below the cost of maintaining the offices on an efficient basis, and the appropriation for the transportation of bullion from the assay offices to the mints was cut far below the amount required for this purpose if all of these offices are to be kept open on the usual terms. The department has had no alternative but to cease receiving bullion at these offices, except upon the condition that the bullion would be transported to the mints at the expense of the depositors. This condition has been complied with to some extent, but the deposits at all of the minor offices have fallen off in consequence.

If these offices are to be maintained at all, the appropriations should be sufficient for the employment of competent assayers and helpers to safely and promptly care for the bullion. The assayers are authorized to buy all of the gold bullion offered and to draw checks on the Treasury of the United States in payment therefor. This is an important responsibility and should only be trusted with men of technical ability and substantial character. The estimates submitted for the fiscal year 1914 are made upon the lowest possible basis consistent with the proper administration of these offices.

16726°—FI 1913—20

## EMPLOYEES AND EXPENDITURES OF THE MINT SERVICE, 1893-1913.

The number of employees in the entire mint service on the 1st day of July, 1913, was less by 25 than on the 1st day of July, 1912. In this connection it will be interesting to note that the number of employees in the service is now considerably less than it was 20 years ago, although more offices are maintained and the volume of business is much larger. The number of persons on the pay rolls at each institution in 1893, 1912, and in 1913 are given below:

Institution.	July 1, 1893.	July 1, 1912.	July 1, 1913.
Philadelphia San Francisco Denver New Orleans Carson New York Helena Boise St. Louis Charlotte Deadwood Seattle	16 107 31 67 13 10 3 3 3	333 124 93 14 8 89 8 10 	329 115 93 14 5 92 6 5 5
Bureau.		6 14	· 4 14
Total	829	. 726	701

The amount of business handled in each of the two years 1893 and 1913 is shown by the following figures:

Item.	1893	1913
Gold deposits. Operating expenditures. Income from charges, by-products, etc. Net operating expenditures. Gold bars made for the arts. Gold bars made for certificate reserve. Colnage: Value. Pieces. Bullion treated in refineries: Fine ounces.	\$43, 685, 179 97, 280, 875	\$161, 131, 878 \$1, 175, 750 \$482, 317 \$693, 433 \$101, 677, 121 \$37, 539, 375 195, 070, 039 11, 501, 736

The only falling off shown by operations in 1913 from 1893 was in the value of the gold coinage, which was due to the law of 1911, allowing gold bars to be carried in the certificate reserve. The number of pieces coined in 1913 was twice as many as in 1893, owing to the increased demand for the small coins. It should be added that in 1893 the one and five cent blanks were purchased of outside manufacturers, while in 1913 all coins were made in the mints complete from the ingots. It should also be said that the wage scale averaged higher in 1913 than in 1893.

These results were due for the most part to the introduction of improved equipment, much of it automatic machinery, and practically all of it developed within the mint service and built by the mint mechanics.

## DIRECTOR OF THE MINT.

#### GOLD CERTIFICATE BARS.

At the close of the fiscal year refined gold bars, duly stamped with their weight, fineness, and value, in accordance with the provisions of the act of Congress approved March 2, 1911, providing for the issue of gold certificates against gold bullion and foreign gold coin, were held at the several mints and the assay office at New York as follows:

 San Francisco Mint.
 \$44, 887, 579. 12

 Denver Mint.
 16, 085, 408. 79

 New York assay office.
 44, 887, 558. 45

 Total
 105, 860, 54€. 36

#### ESTIMATES FOR THE FISCAL YEAR 1915.

The total of estimates for the mint service for the fiscal year 1915, including the bureau office in Washington, is \$1,217,830, which compares with estimates of \$1,222,270 for the fiscal year 1914 and appropriations for the latter year of \$1,154,130.

As already stated above, the appropriations for the support of several of the assay offices during the current year are too small to allow of their being conducted in a proper manner. Either the appropriations should be increased or the offices should be abolished.

In making comparison between appropriations since the fiscal year 1912 with appropriations for prior years it should be understood that in former years the earnings from charges upon bullion were directly available for use in payment of expenses, thus supplementing the annual appropriations, while since 1912 all charges upon bullion have been paid into the general fund of the Treasury as a miscellaneous receipt. The charges during the fiscal year 1913, thus applicable under former practice to current expenses, amounted to \$356,079.24.

#### APPROPRIATIONS FOR 1913.

The amounts appropriated for conducting the mint service during the fiscal year 1913 totaled \$1,230,002.08, to which should be added the reimbursements for work done for the Philippine and Costa Rican Governments and for United States Government institutions, amounting to \$44,277.11; also unexpended balances of permanent appropriations amounting to \$13,353.35; this gives the total amount available for use during the fiscal year 1913, \$1,287,632.54.

The expenditures from above funds (including the reimbursements noted) total \$1,171,964.39, to which a few minor unsettled bills may be added.

The unexpended balance totals \$120,372.10, from which should be deducted deficiencies totaling \$4,703.95, giving net unexpended balances of \$115,668.15. Of the unexpended balances \$12,700.13 (permanent appropriation balances) continues to be available until used, and the remainder, \$107,671.97, reverts to the surplus fund of the Treasury.

The deficiencies occurred at the New York assay office and the Denver Mint and were occasioned, principally, by losses of precious metals in refinery operations. In prior years such losses were paid from the earnings; but, beginning with the fiscal year 1913, are now payable from our annual appropriations. Details, by institutions, are shown in the following tabulated statement:

Appropriations, reimbursements, expenditures, and balances, all offices, fiscal year 1913.

#### PARTING AND REFINING FUND.

The balance in the parting and refining fund, which, prior to the fiscal year 1913, formed a permanent indefinite appropriation for the expense of parting and refining bullion, was on June 30, 1913, \$694,804.11. Against this there is a known encumbrance of \$3,000. The remainder, \$691,804.11, is to be covered into the Treasury as a miscellaneous receipt on June 30, 1914.

The expenses of parting and refining bullion are now paid from our regular annual appropriations.

## CONSOLIDATED INCOME AND EXPENDITURES.

A complete statement of the income and expenditures of the Treasury on account of the mint service, including seigniorage on the silver and minor coins, is shown in the statement following.

EXPENDITURES.		EARNINGS.	
Compensation of employees: Mints and Assay Offices— Salaries appropriation		Deductions on bullion deposits:       \$199,406.6         Meiting charges.       39,775.8         Assaying and stamping charges.       24,219.4         Alloy charges.       15,291.3         Fine-bar charges.       36,005.1	4 5

#### DIRECTOR OF THE MINT.

## DEPOSITS OF GOLD BULLION.

The value of all gold bullion contained in original deposits at the mints and assay offices during the fiscal year 1913 was \$161,131,878. The redeposits during the year, consisting of bullion transferred from one office to another, and bars bearing the stamp of one of the mints or assay offices, amounted to \$27,937,471. The value of the gold bullion and uncurrent domestic and foreign coin received, including redeposits, amounted to \$189,069,349, which was the total of gold receipts at all offices.

Statements which show the classification of deposits, the source of domestic bullion by States and Territories, and the receipts at the several offices of the service appear in tabular form in this volume elsewhere.

#### DEPOSITS OF FOREIGN GOLD BULLION AND COIN.

Foreign gold bullion containing 1,547,317 fine ounces, of the value of \$31,985,879, and foreign gold coin containing 132,172 fine ounces, of the value of \$2,732,228, were deposited, and consisted of bullion and coin produced in the following-named countries:

	Crude	bullion.	Refine	d bullion.	Coin.	
Country.	Fine ounces.	Coining value.	Fine ounces.	Coining value.	Fine ounces.	Coining value.
British Columbia Northwest Territory Ontario and Quebec	51, 235 545 126, 761 903	\$1,059,121 11,266 2,620,382	9, 802	\$202, 624

Total	437, 664	9,047,316	1, 109, 653	22, 938, 562	132, 172	2, 732, 228

#### DEPOSITS AND PURCHASES OF SILVER.

The deposits of silver at the mints and assay offices during the fiscal year ended June 30, 1913, for return to depositors in fine or unparted bars, with the weight and fineness stamped thereon, aggregated 2,238,284.41 fine ounces. The United States assay office at New York received the greater part of these deposits.

The Government of the Philippine Islands deposited at the United States mint at San Francisco silver coins issued under the act of March 2, 1903, containing 342,054 fine ounces, for recoinage into coins of reduced weight and fineness as authorized by the act of June 23, 1906.

The purchases and deposits of silver bullion at the mints and assay offices of the United States during the fiscal year 1913 were as follows:

يند م ا	Items.	Fine ounces.	Cost.
Commercial bar Unrefined depos	s purchased . its, partings, charges, and fractions	 1,287,791.07 488,652.62 1,764.56	\$787,041.0 297,166.1 1,072.2

The approximate amount of copper used in the above coinages was 619.142 tons, of which 5.539 tons were used in alloying gold and 9.502 tons in alloying silver, while 604.101 tons were used in minor coinage.

In addition to the regular coinage there were manufactured at the mint at Philadelphia silver coins for the Government of Costa Rica, as follows:

Denomination.	Pieces.	Value.	Value in United States subsidiary coin.	Silver con- sumed in coinage.
Silver: 10 centavos 5 centavos	267,783 535,565	Colons. 26,778.30 26,778.25	\$21, 422. 63 21, 422. 62	Fine ozs. 15,496.59 15,496.59
Total	803, 348	53, 556. 55	42,845.25	30, 993. 1

For the government of the Philippine Islands the mint at San Francisco manufactured silver and bronze coins as follows:

, Denomination.	Pieces.	Value.	Value in United States subsidiary coin.	Metal con- sumed in coinage.
Silver: Pesos	385,000 743,565 1,510,255	Pesos. 385,000.00 148,713.00 151,025.50	\$270, 167. 23 99, 158. 50 104, 460. 05	Fine ozs. 195, 432. 22 71, 728. 78 75, 563. 79

Minor coinage metals were purchased, during the fiscal year, for Philippine coinage for delivery at San Francisco Mint:

Metal.	Ounces,	Cost.
Copper Tin	874, 708. 33 29, 895. 83 30, 245. 83	\$10, 076. 64 1, 048. 37 134. 60
Total	934, 849. 99	11,259.61

# PURCHASE OF MINOR COINAGE BLANKS.

There were purchased during the year 499.40 pounds of prepared nickel blanks at a cost of \$149.82; and 1,368.79 pounds of prepared bronze blanks at a cost of \$273.76, for delivery at the Philadelphia Mint.

## DISTRIBUTION OF MINOR COINS.

The amount of minor coins distributed was \$4,139,066.40, and the expenses for distribution, including cost of bags, twine, seals, and tags, were \$24,992.95, as follows:

Denomination.	From Phil- adelphia.	From San Francisco.	From Denver.	Total.	
5-cent nickels 1-cent bronze	\$2, 433, 954. 25 878, 427, 42	\$77, 152. 90 53, 967. 24	\$557, 146. 75 138. 417. 84	\$3, 068, 253, 90 1, 070, 812, 50

Minor coinage issued, melted, and amount outstanding.

The uncurrent minor coins melted at the mint at Denver are not necessarily of the former coinage of that particular mint.

## PHILIPPINE COINAGE.

The following coinage was executed during the fiscal year 1913 at the United States mint at San Francisco for the Philippine Islands Government:

Denomination.	Pieces.	Consumed in coinage.
Silver: Pesos 20 centavos 10 centavos Total silver	385,000 743,565 1,510,255 2,638,820	Fine ounces. 195, 432. 22 71, 728. 78 75, 563. 79 342, 724. 79
Bronze: 1 centavo	5,001,000	<i>Troy ounces.</i> 833,500.00

The total silver coinage to June 30, 1913, from coins received from Philippine Islands for recoinage and from bullion purchased for such coinage was as follows:

Denomination.		a new bullion, ar. 2, 1903, and 1906		om Philippine ived for recoin- of June 23, 1906.	Total.		
Pesos 50 centavos 20 centavos 10 centavos Total	3,342,126	Fine ounces. 48,068.11 805,870.13 333,600.36 293,082.21 1,500,620.81	Pieces. 42, 915, 059 2, 136, 000 4, 014, 324 5, 565, 255 54, 630, 638	Fine ounces. 22, 124, 705.00 534, 382.25 411, 240.02 289, 171.75	Pieces. 43,008,504 5,478,126 7,680,476 11,642,647 67,809,753	Fine ounces. 22, 172, 773. 11 1, 340, 252. 38 764, 840. 38 582, 253. 96 24, 860, 119. 83	

<sup>1</sup> Included in this amount is 12,542.29 fine ounces of coins reserved for assay.

# WORK OF THE GOVERNMENT REFINERIES.

Bullion was operated upon by the refineries connected with the mints at San Francisco and Denver and the assay office at New York, during the fiscal year 1913, as follows:

<b>•</b>	Sent to r	efinery.	。 Returned from refinery.

MINT OF THE UNITED STATES AT PHILADELPHIA.

This mint was in operation throughout the year.

#### PROOF COINS AND MEDALS.

The following table shows the number of proof coins and medals and their nominal value manufactured during the fiscal year:

Articles.	Pieces.	Nominal value.
Gold medals. Silver medals. Bronze medals. Gold proof coins. Silver proof coins. Minor proof coins. Total.	574 7.751	\$7, 375. 20 1, 384. 70 3, 463. 49 2, 860. 00 221. 00 120. 36 15, 424. 75

#### THE STATE OF THE NUMISMATIC COLLECTION.

Although for the fiscal year just past the numismatic collection has not had the usual small appropriation for the purchase of historical coins and medals, yet the increase of the number of specimens in the collection has not fallen much short of the normal aggregate of accessions in late years. And if the cost and historical value of the coins acquired the past year be taken into consideration the cabinet has fared unusually well.

These favorable results in a year that opened so inauspiciously are directly due to the action of the officials of the Treasury Department in placing with the cashier of the mint a considerable number of gold coins which commanded a premium among collectors. The most of these pieces were disposed of and the premium received used for the purchase of coins and medals. A few of the eagles are still in hand. Persons interested in the welfare of the cabinet of coins, and there are many who are interested in it, will feel grateful to the officials who made this continued growth possible by a wise use of a number of coins which eventually would have slowly dribbled into private possession at face value.

A cause of no little gratification has been the sale of the large catalogue of the collection published in 1912. Numismatic publications are of such narrow appeal that the sale of even the customary small editions is generally very slow. The ready exhaustion, therefore, of the first edition of this unpretentious catalogue followed by the sale of nearly all of the second edition is more than was expected.

There has been prepared during the past year a small guide book for the collection, a pamphlet of little more than a hundred pages. This guide is sold at 10 cents. It was prepared with a view of meeting the demands of visitors as their desires have been ascertained by the interest they manifested and the questions they asked. The guide can be mailed for 2 cents postage.

#### MACHINE SHOP.

In addition to the regular repairs and upkeep of the machinery and appliances, the following new work was done for this mint: 4 tumbling barrels of washing machine; 3 scrap cutters; metal work of 2 coinreviewing machines; 5 sets of old-style nickel molds; 1 six-foot balance for transfer weigh room; 2 twenty-five horsepower rolling mills changed to fifty horsepower; 1 six-inch lever shear; 4 beds and punches for cutting 6 bronze planchets; 4 beds and punches for cutting 5 nickel planchets; 2 centrifugal coin-drying machines installed in minor coinage plant; 8 collars for dime coinage; 588 collars for nickel coinage; 103 collars for bronze coinage; 4 sectional collars for eagle coinage; and 2 sectional collars for double-eagle coinage. There are also 2 automatic weighing machines under construction in the shop, about 50 per cent of the work on which is completed.

During the same period the following work was done in the shops for the various mints and assay offices: Mint of the United States at San Francisco, Cal.: Special screws for

Mint of the United States at San Francisco, Cal.: Special screws for automatic weighing machine; 30 collars for nickel coinage; 10 collars for bronze coinage; 10 collars for dime coinage; 5 collars for halfeagle coinage; and 15 collars for Philippine coinage.

Mint of the United States at Denver, Colo.: 12 collars for bronze coinage; 30 collars for nickel coinage; 1 set of double-eagle dressing tools for milling machine; 25 center-knife edges and 50 end-knife edges for automatic weighing machines; 20 beams complete for automatic weighing machines; 25 basket traps for automatic weighing machines; 25 basket backs for automatic weighing machines; and 25 kickers for automatic weighing machines.

United States assay office at New York, N. Y.: 1 bullion-clipping machine; 1 pair of long couplings for vertical rolling mill; 8 silver disks for Smithsonian Institution; 30 silver disks for Geological Survey; and 22 silver disks for Bureau of Engraving and Printing.

There have been designed and built 4 rotary ball-bearing turntables and 44 ingot molds. The turntables are made up of 2 six-foot cast-The bottom disk is the ball race, which carries 146 oneiron disks. inch diameter hardened steel balls. The top disk has a cone which fits the bottom race. On the top disk are mounted 11 ingot molds equally spaced on a four-foot six-inch circle in an upright position. The molds will produce either a nickel or bronze ingot 24 inches long, 41 inches wide, three-quarters of an inch thick. The back half, or, in other words, the plain part of the mold, is bolted fast to the table, and the half that carries the ingot swings down to an angle of 45° on two trunnion bearings which are bolted to the table. The locking device for clamping the mold while the ingot is being poured is four links connected to the stationary part of the mold with a loose bolt. The other end of the link carries two eccentric pressure bars which clamp on three lugs equally spaced on the mold. The one end of each link carries an eccentric bushing which can be adjusted to take up any expansion or contraction. This principle eliminates all handling and lifting of the mold.

#### CARPENTER SHOP.

Besides the general repairs and upkeep of the machinery and appliances, the following work was done by the chief carpenter and his assistants during the year:

The tar or mastic applied to the roof to stop leaks would not adhere to the glazed tiles and formed regular water pockets. This was all removed, the roof painted and covered with painted muslin, and the joints filled up with plastic cement, which proved very satisfactory. The same method was applied as new leaks appeared.

Eleven ventilating monitors were built on the northwest terrace roof to give light and ventilation to the basement, in which the new minor-coinage plant is installed. Three of these monitors, which were crushed by falling stone when the building was struck by lightning, were rebuilt.

The room on the second floor formerly occupied by the electrician was fitted up as a telephone exchange. The partitions between this and the counting room were lined with beaver board to deaden the sound of the noise made by the counters, which proved very satisfactory. A new wardrobe for the operator was built.

The new minor-coinage plant was equipped with all necessary water and acid tubs, vats, and tanks, 20 extra large copper-lined strip cars, switchboards, etc.

Two new coin-reviewing machines were built and some very important improvements made on them. The same improvements were made on the six older machines.

One counting hopper and eleven counting boards, of the following denominations, were made for the subtreasury at St. Louis, Mo.: Two 1-cent boards, two 5-cent boards, two dime boards, two quarterdollar boards, two half-dollar boards, and one 1-dollar board. All patterns for new machinery, etc., were made in this department.

Digitized for FRASER http://fraser.stlouisfed.org/ Federal Reserve Bank of St. Louis 

## SEWING ROOM.

The sewing room, besides making the necessary repairs to flags, awnings, window shades, rugs, machine belts, etc., manufactured for this mint 957 pairs asbestos mitts; 1,496 pairs fire mitts; 5,222 aprons, sleeves, and miscellaneous articles, and 122,450 coin bags received from contractor were marked.

There were also manufactured for the New York assay office 656 pairs canvas mitts, 194 pairs asbestos mitts, and 22,500 anode bags. For the mint at San Francisco, 206 pairs fire mitts, 118 pairs

asbestos mitts. For the assay office at Deadwood, 4 pairs asbestos mitts.

For the assay office at Boise, 12 pairs asbestos mitts.

For the assay office at Helena, 12 pairs asbestos mitts.

### ASSAYING DEPARTMENT.

## MELTING AND REFINING DEPARTMENT.

During the fiscal year 660 gold-ingot melts were made, making a total charge to the melting pot of 2,066,745.994 fine ounces. There was 1 melt condemned. Out of this quantity of bullion melted, the loss found at settlement amounted to 26.421 fine ounces, or 1.27 per cent of legal allowance based on actual charge.

It has been the custom here for years past to make gold-ingot melts to the full capacity of the No. 70 crucible, which amounts to approxi-mately 6,000 ounces gross of standard metal. We find, however, if our basis of coinage metal is not electrolytic gold but uncurrent coin, and fine gold lower in fineness than 998, that, owing to impurities, segregation troubles this department greatly on these large melts, and great difficulty is experienced in getting an ingot melt of uniform composition. In order not to reduce our melting capacity or increase labor, we decided to melt the same amount of metal per pot, but stir the charge twice, treating it as two melts. In other words, when full pot is ready for dipping, use plunger 100 strokes and dip half out of pot, giving this half a number; then again using plunger on second half 100 times and giving this second half of the melt a number. Τn this way a smaller volume is expected to be uniform and is more easily mixed, and results prove the benefit of this method in reducing the ounces remelted.

In silver there were 325 melts made, none condemned, making a total charge to melting pots of 1,013,263.95 fine ounces. Upon settlement of the accounts of this department a gain in silver of 355.46 ounces was found, which in no way removes the fact that a loss of 87 ounces in melting was suffered.

During the fiscal year this department received from the superintendent bullion containing 1,993,067.302 fine ounces in gold, the coinage value being \$41,200,357.57. The silver contents of bullion received contained 1,818,499.04 fine ounces, of the coinage value of \$2,513,909.14.

The melts made aggregate as follows:

Melts.	Bars.	Ingots.	Remelts.	Con- demned.	Good ingots.
Gold Silver Bronze Cupro nickel Total	23 34  57	640 280 3,519 4,123 8,562	86 1 	1  1	Ounces. 1, 935, 752. 905 986, 410. 35 11, 978, 490. 60 12, 127, 186. 30 27, 027, 840. 155

16726°-F1 1913--21

### REPORT ON THE FINANCES.

During a nine days' run, including overtime to 10 p.m., from March 20 to 29, inclusive, working three gangs of men, 10 sets of molds, 12 and 13 furnaces, 12 men to gang, the results in melting cupro nickel were as follows:

	Number of—		Weight of in-
Date.	Melts.	Ingots.	gots made.
Mar. 20	$ \begin{array}{c} 61\\ 61\\ 61\\ 61\\ 61\\ 56\\ 64\\ 59\\ 64\\ \end{array} $	2, 829 2, 810 2, 837 2, 843 2, 835 2, 611 2, 918 2, 777 2, 925	Ounces, 192, 150, 60 190, 686, 40 192, 387, 30 192, 704, 50 192, 386, 50 176, 120, 00 197, 108, 60 187, 710, 60 197, 192, 40
Total	548	25, 385	1, 718, 446. 90
Daily average	60.9	2,820.5	190, 938. 54

The total amount of ingots poured (25,385) in this time amounts to the large weight of 59 tons.

### Sweeps cellar operations.

In treating the broken crucibles, burned out refractories, and drosses from the minor coinage melting operations, the larger material is put through the crusher, then it is fed, together with the smaller refuse, into the Ellspass mill and crushed in the wet way. The more or less large pellets remaining upon the pan of the mill are saved; the resulting fine material, or tailings, is thrown away.

The value of the metals saved by thus treating these waste materials was upward of \$800. The cost to recover same in labor, power, and maintenance was not half this amount.

Since the refinery operations have been discontinued here and the bulk of the old equipment sent to New York, we have found it greatly to our advantage to separate the precious-metal operations from that of the minor coinage metals by using for gold and silver ingot purposes the furnaces left vacant by the closing of our refinery. These five furnaces are connected to a settling chamber, and this room being far removed from our regular melting room, and being of ample size, gives convenient facilities for handling this branch of ingot making without any risk of contaminating the precious metals.

Digitized for FRASER http://fraser.stlouisfed.org/

The first installation of the new large molds on turntable for bronzeingot making has been put in successful operation. This change enables us to cast a melt of 3,200 ounces into ingots (24 by  $4\frac{1}{5}$  by  $\frac{3}{4}$  inches) in four minutes. It is proposed that one turntable, holding 11 molds, will serve two furnaces, with two melters pouring together and three men manipulating molds and ingots, as follows: Two melters pour simultaneously, table then turned until next mold is in position for filling; first helper opens up mold and releases ingot, second helper picks up ingot, conveys it to pickling and cooling tanks, while third helper removes pellets and slivers and greases, closes, and clamps mold. As a heat can be taken off this way in 5 minutes, an actual saving of 10 minutes is effected on each melt, or 50 minutes in a day's work per furnace, which can be utilized toward getting These ingots in bronze weigh 23 pounds, or more metal melted. about six times what our small ingot weighs, making 10 to a heat, in place of 60 of the smaller ingots. The filing is slightly heavier than on the small ingots, but in linear measure is 40 feet, as against 120. The topping is done on heavy shears made in mint machine shop and placed in position on melting-room floor this fiscal year. This large shearing machine is a valuable acquisition, for it is no little trouble to top the large ingots and shear copper bars and zinc slabs to any size desired. Four such turntables are soon to be put in place on meltingroom floor; these will serve the present coinage requirements for large ingots.

This department has been on the lookout for an oil-burning furnace for the past two years, and this fiscal year tested four different makes, with a view of recommending the equipment that together showed low fuel cost per 1,000 pounds of metal melted with practical and suitable furnace details for our special requirements. The results of our tests showed a wide variation in fuel consumption, running from \$4.77 per 1,000 pounds of cupro nickel melted up to \$10. This is based on oil at 9 cents per gallon, an extremely high price, but the cost to us at this time in 6-barrel lots.

The furnace showing lowest oil consumption per 1,000 pounds of metal melted was of the pit type, and upon our melting-room floor stood too high and rendered dipping extremely difficult. Not one of these furnaces fulfilled our requirements, and up to date no recommendation has been made. A modified furnace is still awaiting a test, which we hope to run as soon as a little let-up can be indulged in. In the meantime, due to poor and inconstant results with our present furnaces on account of high price and low quality gasoline, we made some tests using city gas as fuel. We found that our present furnaces with but little alteration could be adapted to this illuminating-gas fuel, and by using same show a saving over gasoline fuel and secure uniform melting periods for our different metals, which constancy and convenience appealed so strongly to us as to warrant a recommendation that city gas fuel be used. This recommendation being approved, we are now in the position of being promised a fuel entirely satisfactory, in so far as convenience, sufficient heat units, and suitability for our melting-room requirements are concerned. On the other hand, oil fuel is cheaper, though the life of furnace parts is shorter and punishment to melters much greater; how much cheaper, and if better, when everything is considered, we hope to determine next year.

## REPORT ON THE FINANCES.

# Minor coinage metal operations.

### COINING DEPARTMENT.

From July 1, 1912, to August 23, 1912, when settlement was made with the coiner, whose office was abolished by act of Congress and in lieu thereof the office of superintendent of the coining department created, the coiner received from the superintendent and operated upon 322,233.810 standard ounces of gold, from which there was produced 205,593.750 standard ounces of coin, of the value of \$3,825,-000, or 486,000 pieces, which was delivered to the superintendent during this part of the fiscal year. Prior to this settlement there was returned to the superintendent 90,591.912 standard ounces of gold in clippings, condemned coin, and bars, and there was delivered in settlement 26,048.010 standard ounces in coin and blanks. The entire operation showed a loss of 5.444 standard ounces, of the value of \$101.28, being 3.37 per cent of the legal allowance. The percentage of coin produced to the amount operated upon was 66.83.

During this same period, from July 1, 1912, to August 23, 1912, the coiner also received from the superintendent and operated upon 1,229,270.65 standard ounces of silver, from which there was produced 502,896.96 standard ounces of coin, of the value of \$626,000 in subsidiary silver coin, or 3,450,000 pieces. Prior to the coiner's settlement of August 23, 1912, he returned to the superintendent 227,779.57 standard ounces of clippings, condemned coin, and bars, and delivered at settlement 498,576.76 standard ounces finished, unfinished, and condemned coin. Upon the entire operation there was a wastage of 17.41 standard ounces of the value of \$9.40, being 1.41 per cent of the legal allowance. The percentage of coin produced to the amount operated upon was 76.02.

The coiner also received from the superintendent during the same period, from July 1, 1912, to August 23, 1912, 3,059,415.80 standard ounces of bronze ingots, of which 2,935,905.20 standard ounces were operated upon, from which there was produced 1,327,408.25 standard ounces of 1-cent pieces, of the face value of \$132,700, or 13,327,000 pieces, upon which there was a wastage of 874.35 standard ounces of the value of \$10.23, being 29.74 per cent of the legal allowance as allowed on silver. There was returned to the superintendent prior to the coiner's settlement August 23, 1912, 1,058,085.50 standard ounces in clippings, condemned coin, and blanks, and there was delivered in settlement 673,047.70 standard ounces in ingots, strips, and condemned coin. The percentage of coin produced to the amount of metal operated upon was 45.21.

In addition to the gold and silver received for coinage, the coiner received from the superintendent 294.422 standard ounces of fine gold for medals, of which 47.999 standard ounces were used in the manufacture of medals. This amount and 167.147 standard ounces in clippings were delivered to the superintendent prior to settlement, and 78.970 standard ounces were delivered at settlement. The coiner also received from the superintendent during the same period 873.27 standard ounces of fine silver. Of this amount 301.77 standard ounces were used in the manufacture of medals, which, with 305.04 standard ounces in clippings, were delivered to the superintendent prior to settlement and 266.41 standard ounces delivered at settlement. The slight loss in gold and silver is included in the wastage in the manufacture of gold and silver coin.

The gold, silver, and minor coinage for this period of the fiscal year, July 1, 1912, to August 23, 1912, amounted to \$4,583,700, or 5,268,000 pieces. The net wastage in coining this amount was \$120.91.

Receipts and deliveries by the coiner, July 1 to Aug. 23, 1912.

From August 24, 1912, to June 30, 1913, the coining department received from the superintendent 1,736,813.980 fine ounces of gold for coinage, which was operated upon and from which there was produced 766,899.881 fine ounces of coin, of the value of \$15,853,227.50, or 2,583,405 pieces, and 964,351.001 fine ounces in clippings, condemned coin, blanks, and bars delivered to the superintendent during this portion of the fiscal year prior to settlement, and there was delivered in settlement 5,553.256 fine ounces in condemned coin, blanks, bars, and sweeps. The entire operation showed a wastage of 8.845 fine ounces, of the value of \$182.84. The percentage of coin to the amount of metal operated on was 44.15. The percentage of the legal allowance was 1.60.

During the same period the coining department also received from the superintendent for coinage 1,430,828.87 fine ounces of silver, of which 1,429,555.91 fine ounces were operated upon, and from which there was produced 947,255.37 fine ounces of coin, of the value of \$1,310,199.75, or 5,458,705 pieces in subsidiary silver coin, and 30,993.18 fine ounces of silver coin, of the value of \$42,845.25 in United States subsidiary coin, or 803,348 pieces for the Government of Costa Rica, 451,231.43 ounces in clippings, condemned coin, and bars were returned to the superintendent prior to settlement and 1,342.20 fine ounces in ingots, condemned coin, and blanks were delivered at settlement. Upon the entire operation there was a wastage of 4.64 fine ounces, of the value of \$2.84, being 0.43 per cent of the legal allowance. The percentage of coin produced to the amount operated upon was 68.43.

There was also delivered to this department during the same period 13,586,385.90 ounces of nickel ingots and 7,283 ounces of Scovill blanks, from which there was produced from the metal operated upon 7,027,438.50 ounces of 5-cent pieces, of the face value of \$2,186,368.55, or 43,727,371 pieces. Of this amount \$154,329.25, or 3,086,585 pieces, were the old design, and \$2,032,039.30, or 40,640,786 pieces, of the new buffalo design, all of which and 6,416,424.20 ounces of clippings, condemned coin, and blanks were delivered to the superintendent prior to settlement. There was also delivered at settlement 136,244 ounces in ingots, coin, and blanks. On the entire operation there was a wastage of 13,562.20 ounces, of the value of \$175.87. The percentage of the legal allowance, based on the silver allowance, was 99.76. The percentage of coin produced from amount of metal operated upon was 51.77.

This department during the same period received 13,353,939.50 ounces of bronze in ingots and blanks, and 19,961.54 ounces in Scovill blanks, from which there was produced from the metal operated upon 8,242,710.30 ounces of 1-cent coin, of the face value of \$824,783.90, or 82,478,290 pieces. This amount, together with 5,120,527.10 ounces in clippings, condemned coin, and blanks, were delivered prior to settlement. The amount returned at settlement was, ingots 6,632.70 ounces, condemned coin and blanks, 177.60 ounces. The wastage on this operation amounted to 3,853.34 ounces, of the value of \$49.97. The percentage of wastage was 28.88. The percentage of good coin produced to amount operated upon was 67.38.

In addition to the bullion received for coinage, the following shows the amount used in the manufacture of medals:

Of the 754.574 fine ounces of gold received from the superintendent 286.839 fine ounces were used in the manufacture of medals, which, together with 300.836 fine ounces in clippings were delivered prior to settlement and 167.896 fine ounces returned in settlement.

The amount of fine silver received was 2,167.63 ounces, of which 843.37 fine ounces were used in the manufacture of medals, and that amount, with 1,021.90 fine ounces of clippings, were delivered prior to settlement and 304.41 ounces returned in settlement.

The slight gain in gold and silver is included in the loss in gold and silver coinage.

On this large operation, including coin and medals, the wastage amounted to the very low figure of \$411.52.

Total amount of domestic coin for fiscal year ended June 30, 1913.

### IMPROVEMENTS.

Reference has already been made in last year's report to the minorcoin plant. It was well under way at that time. It has since been completed and is now in operation.

328

Two large 16-inch rolls are breaking down and finishing bronze and nickel. The ingots used are 23 inches long, 41 inches wide, and three-fourths of an inch thick. A copper ingot will produce 2,200 blanks and the nickel ingot about 1,500 blanks. Two cutting presses, each running 170 revolutions per minute, are used in cutting bronze and nickel blanks. When cutting these blanks six pieces of the former and five of the latter are punched at each stroke, making respectively 1,020 and 850 pieces per minute. Up-to-date cleaning and annealing machinery, consisting of rotary annealing furnaces, tumbling barrels, and centrifugal dryers prepare the blanks for stamping. In addition to the rotary annealing furnaces two strip annealing furnaces have been added and gas is used to operate these furnaces. The object of this plant is to keep the workings of the base metal isolated as much as possible from those of the precious metals and also to turn out the minor coin more rapidly and at less expense. Owing to the increasing demand for minor coin we will be . compelled to enlarge this plant in the near future by installing two additional rolls and more cutting presses. At times we could use the rolls in our regular rolling room, when not working on gold or silver, but to do so when working the precious metals would be defeating the principal object for which this minor-coin plant was created.

During the past year we have made and placed in operation two reviewing machines similar to those now in use for reviewing coined money. These machines, being much faster and more accurate, will replace the old-style selecting tables.

The only annoying feature we had to contend with during the past year was a very inferior quality and irregular flow of gas for annealing. This appears to have been due to a low grade of naphtha and a much heavier tax on the gas plant. The trouble has been overcome by installing city gas. We find that, owing to the increased price in gasoline, we can buy city gas cheaper than we can make our own supply.

At present the workings are equally balanced, having sufficient facilities for operating the product of one department with the other without any delay or annoyance. It will be our aim to keep up this well-balanced system, thereby reducing the cost of production to the lowest figure.

All gold and silver now used in the operation of coinage is calculated at 1,000 fine instead of 900 standard as heretofore. The figures in the above report from August 23, 1912, are 1,000 fine ounces.

The only blanks now adjusted are the double eagle and eagle; all other denominations, except dimes and the minor coin, are weighted after coinage. Five automatic weighing machines are doing this work.

Our system for keeping the daily records of the metal in operation, recently introduced, is giving entire satisfaction. A tabulated statement of the metal passing from one department to the other during the day is kept. This shows the amount of finished and unfinished metal, together with the wastage or loss at the close of each day's workings.

### ENGRAVING DEPARTMENT.

All the dies used in coining operations in all of the mints are made in the engraving department at Philadelphia. The embossedenvelope dies used by contractors supplying envelopes for the Post Office Department and postal savings bank are also made here; also dies for Army and Navy and other authorized public medals. The mint is reimbursed for the actual expenditures for labor and materials on these medal accounts.

The number of dies prepared for United States coinage last year was 2,640. In addition, 175 dies were made for Philippine coinage, 30 for the Post Office Department, 9 for medals, and 36 master dies and hubs; in all 2,890, as follows:

Philadel- phia.	San Fran- cisco.	Denver.	Total.

### NUMBER OF EMPLOYEES.

The total number of employees in this mint at the close of the fiscal year was 327, distributed in the several departments as follows:

General. Assayer's. Melting and refining. Coining. Engraver's.	$\frac{12}{47}$
Total	327

#### VISITORS.

A large number of visitors from all States of the Union and from foreign countries visited the mint during the year, 86,278 having been shown through the building by the several guides.

## MINT OF THE UNITED STATES AT SAN FRANCISCO.

This mint was in operation throughout the fiscal year.

MINOR COINAGE.

Minor coins to the amount of \$131,120.14 have been distributed during the year, as follows:

During the above-mentioned period bronze 1-centavo pieces have been coined for the Government of the Philippine Islands from new metal deposited and from old Spanish copper coins received for recoinage, as follows:

Items.	Value.
1-centavos, from— Metal deposited. Minor coins for recoinage.	₱135,233.00 59,061.12
Total	194, 294. 12

#### SEIGNIORAGE.

The seigniorage on the coinage of purchased metal for the fiscal year was \$417,045.19, as shown by the following table:

Items.	Coined.	Seigniorage.
Subsidiary silver coins	\$412,000.00 142,600.00 61,040.00	\$227, 791. 87 136, 129. 75 53, 123. 57

The reports covering the workings of the operative departments for the fiscal year ended June 30, 1913, which follow, show the wastage and surplus for the year. The wastage and surplus so shown will be a part of the wastage and surplus taken up in the bullion accounts at such time as the settlement is made.

# MELTING AND REFINING DEPARTMENT.

The melter and refiner received, operated upon, and delivered gold and silver bullion and minor-coinage metal during the fiscal year 1913, as follows:

#### MINT OF THE UNITED STATES AT DENVER.

This mint was in operation during the entire fiscal year, the coinage being of the denominations of double eagles, half dollars, nickels, and bronze cents.

The particulars as to bullion deposits and coinage will be found in tables numbered 1 and 3, and in the general coinage statement, numbered 22.

## IMPORTANT REFINERY CHANGE.

In the spring of 1913 there was installed in the refinery of this institution a novel special induction potential regulator, embodying the ideas of the foreman of the refinery, Mr. B. P. Wirth, who was seconded in perfecting his plans by Mr. White, chief electrician of the mint. The new equipment consists of the following items:

One special induction potential regulator, single-phase, 60-cycle, oil-immersed primary 2,200, secondary potential 36-volt, maximum secondary current 1,300 amperes, complete, with all necessary oil.

One complete switchboard panel, including wiring, having mounted thereon the following:

One single-phase, 60-cycle, 2-wire watt-hour meter to read direct the current used through the above induction regulator.

One 2,000 to 100 volt potential transformer.

One 2,000-volt series transformer, proper ratio. One Type H automatic oil circuit breaker with inverse time-limit attachment.

One low-tension switchboard on which are mounted the following:

One voltmeter, maximum scale 30 volts.

One ammeter, scale 1,500 amperes.

One series transformer, ratio 1,500 to 5.

One double-pole, single-throw, 1,600-ampere time switch.

One electrolytic lightning arrester, 2,200 volts, single-phase, 60-cycle, complete, with oil, electrolyte, and horn gaps, for outdoor mounting.

The cost of the above, delivered at the mint, was \$1,374.

About the middle of March the general use of the pulsating current in the gold cells in the refinery was commenced. The alternating

## REPORT ON THE FINANCES.

current is delivered through a 39-kilowatt induction regulator, with 200 volts on the primary circuit, and a capacity of 36 volts, 1,300 amperes, on the secondary circuit. A direct-current voltage of 1.2 per cell and an alternating-current voltage (maximum) of 1.8 per cell is used; current density, 65 amperes per square foot. The electrolyte contains 60 grams of gold per liter, and from 4 to 7 per cent hydrochloric acid; temperature, 65° C.

### NOTABLE BENEFITS.

The benefits of this new system, as applied to the character of bullion received at this mint, can be best shown by a comparison with the operations under the former, or direct-current, system. The refinery has been in operation (in this fiscal year) since October 1, 1912, a period of seven months; the months of October, November, and December, 1912, and January and February, 1913 (which shall hereafter be referred to as the "five months''), the refinery operated under the old system. In March the change was made, and in that month the refinery was operated under both systems, and in April the new system was used exclusively; so, in making comparisons, the month of March will be omitted and the first five months under the direct-current system used, and the average of those months compared with the month of April under the pulsating-current system.

Under the old method there could not be "made up" many gold anode melts, because there was not received enough high-grade bullion to permit it; so, in October, after four months' shutdown of the refinery, 25 were made; in November, 9; in December, 12; in January, 10; and in February, 7; total for the five months, 63 melts, weighing 387,333.32 ounces; while in April, without any change in the character of the deposits, under the new system 44 gold anode melts were made, weighing 236,778.77 ounces, and many more could have been made had they been needed.

During the "five months" the gold anodes amounted to 18.6 per cent of the total amount of bullion operated upon in the refinery, while during the month of April the gold anodes comprised 58.5 per cent of the total operated upon. The radical difference is due to the reduced necessary fineness of the gold anodes.

In the "five months" there were produced 731,669.949 ounces of fine gold and recovered from the slimes (and scrap gold contained therein) 125,821.3 fine ounces; that is, the gold in the slimes equaled in amount 17.19 per cent of the fine gold deposited on the cathodes. In the month of April there were produced 224,161.16 ounces of fine gold and recovered from the slimes (and scrap gold therein) 25,496.89 ounces of fine gold, so that in this month the gold recovered from the slimes equaled in amount 11.37 per cent of the gold deposited on the cathodes, and the average fineness of the fine gold under each system was 0.9995 plus.

Further, in the "five months" acids were used as follows: Hydrochloric, 28,184 pounds, and nitric, 28,023 pounds, an average per month, respectively, of 5,637 and 5,605 pounds. In April, 12,954 pounds of hydrochloric acid were used, an increase above the average of 7,317 pounds, costing \$109.75, and 1,041 pounds of nitric acid, a

decrease below the average of 4,564 pounds, which would have cost

\$422.17, thus making a net saving in acid for April of \$312.42. Further, the cost of operating the refinery for the "five months" was \$23,332.94 (including in each month \$414.41 as one-ninth shutdown cost), being an average of \$4,665.58, and the cost for April (including said \$414.41) was \$4,478.38.

Further, the production of fine gold for the "five months" was 731,669.949 ounces, an average of 146,333.989 ounces per month, and the production of fine gold in April was 224,161.16 ounces, being an increase over the average of said "five months" of 53 per cent.

Further, in the "five months" there were sent to the refinery 244 silver anode melts, weighing 1,319,761.9 ounces, an average per month of 263,952.38 ounces, and in the month of April there were sent 20 silver anode melts, weighing 104,047.6 ounces; and in the "five months" there were used 139,718.97 ounces of mint fine silver bars in making up the said silver anode melts, which were absolutely necessary on account of the comparatively small amount of silver deposits received at this mint. However, in April, no mint fine silver was used, and also one-half of the silver cells were cut out of operation.

## LOWER GRADES BULLION DIRECTLY THROUGH GOLD CELLS.

The most important benefit derived from the operation of this new regulator and transformer lies in the fact that it is possible to treat directly through the gold cells bullion of a much less fineness in gold than it was possible to so treat with the direct current only. Formerly bullion of a less fineness than 900 could not be successfully treated in the gold cells, while the regular bullion, running as low as 800 parts gold, is successfully treated. This table exhibits the fineness of all of the bullion received at this institution, including both the deposits and redeposits, for the months of January, February, and March, 1913, as follows:

	Gross
·	ounces.
Below 700 fine	
From 700 to 800 fine	
From 800 to 850 fine	77,759.48
From 850 to 900 fine	80, 514.79
From 900 to 925 fine	43,757.30
From 925 to 950 fine	24,611.66
From 950 to 999 fine	44, 417. 23
•	
Total	670, 264. 75

From an examination of this table it will be readily seen that a large percentage of the bullion received at this institution runs less than 900 in gold; in fact, 83 per cent of it runs less than that figure, and but 17 per cent 900 or more.

The number of silver cells in operation in the refinery have been reduced one-half. Heretofore it has been necessary to rely very largely on the output of the silver cells for bullion of a proper fineness in gold to use in the gold cells. The number of silver cells now in operation will just about take care of receipts of bullion that must necessarily be put through that system. It will also be noted that it is no longer necessary to re-treat mint fine silver in the silver cells, as was formerly the case.

16726°-FI 1913-22

### ANODE MELT OF LOW FINENESS.

The anode melt of the lowest gold fineness treated in April was No. 125; the make-up of that melt was as follows:

Itoms	Gross	Fineness.	
Items.	weight.	Gold.	Silver.
One bar from the Seattle office Do Do One Goldfield Consolidated bar One Homestake bar from Deadwood office	995.07 841.12 852.78	819. 0 820. 2 881. 2 780. 0 768. 0	177. 2 173. 2 115. 0 116. 2 216. 0

The resulting anodes ran 804.7 gold, 171.6 silver. Especial attention is directed to the large amount of silver in the melt.

Gold anode melt No. 1 of this fiscal year, which was treated directly through the gold cells through the old system, ran 921.2 gold, 52 silver.

This equipment and its operation has, without doubt, fulfilled in every respect our expectations. It has increased the output at a reduced cost per ounce. It more than paid for itself during the six weeks it was in operation, from the middle of March to the 1st of May.

### ASSAY DEPARTMENT.

The operations of this department during the fiscal year 1913 were as follows:

		Melts operated on.		
Items.	Gold.	Silver.	Total.	
Deposits	3,094 1,248	629	3,723

VISITORS AND MINT FORCE.

During the year 64,312 visitors witnessed the coining operations from the balconies.

On June 30 there were 94 officers and employees of this mint, divided as follows among the departments:

General	49
Assav	9
Coining	14
Melting and refining	22

## UNITED STATES ASSAY OFFICE AT NEW YORK.

This assay office and refinery were in operation throughout the year, and the records show that the business transacted continued to increase.

On account of the delay in erecting the new building on Wall Street, the clerical force and the assay department are still in the refinery building, and the employees deserve credit for the manner in which they have performed their duties in crowded and unsuitable conditions.

During the year 485,691.188 fine ounces of gold and 428,628.51 fine ounces of silver were transferred to the mint at Philadelphia.

Gold bars were issued to depositors for domestic use in payment for bullion for \$3,873,693.93, and gold bars were exchanged for gold coin for domestic use in the arts, etc., for \$30,196,829.92, showing a total increase of \$5,320,361.80 compared with the previous year.

Gold bars were exchanged for gold coin for export for \$41,363,473.89, showing an increase of \$21,238,568.04.

The income received for the exchange of gold bars for gold coin amounted to \$31,888.42, an increase of \$11,323.97.

There were stamped during the year 75,104 bars of fine gold, an increase of 11,292 bars, and 16,018 bars of fine silver, an increase of 3,145 bars.

The total number of deposits received was 13,324, an increase of 659, and 171 redeposits were received from New Orleans and Charlotte, being an increase of 58.

There was received from the sale of platinum and palladium \$60,472.29.

# MELTING AND REFINING DEPARTMENT.

The melter and refiner received, operated upon, and delivered gold and silver bullion during the fiscal year 1913 as follows:

Receipts and deliveries by the superintendent of melting and refining.

Items.	Gold account.	Silver account.
Receipts:	Fine ounces.	Fine ounces.

By-products of refinery, United States assay office at New York, fiscal year 1913.

Classification.	Weight.	Value.
Sponge platinum		\$59, 712, 09 760, 20 60, 472, 29

Silver bullion sent to the refinery upon which refining charges were collected contained by assay 2,299,853.78 fine ounces, and silver owned by the Government returned to the refinery for parting purposes upon which no parting charges were collected contained by assay 103,678.08 fine ounces.

All copper recovered during that year is unrefined and in the form of settlement bars and slabs, weighing in gross 22,484.90 ounces, and containing 366.486 ounces of fine gold and 458.32 ounces of fine silver.

### ASSAYER'S DEPARTMENT.

During the fiscal year 1913 there were made a total of 109,925 assays upon 40,388 samples, divided as follows:

Items.	Samples.	Assays.
Deposits. Refinery Specials.	5,944	89, 864 14, 050 6, 011

Average cost per assay was \$0.237.

The deposit samples came from 11,258 melts of gold and 2,237 melts of silver, the refinery samples from 344 melts of fine gold, 594 melts of fine silver, gold and silver anodes, sweeps, and other refinery assays, and the specials from 665 deposits of small samples for the determination of gold and silver fineness. Many of these specials were articles of jewelry and manufacturer's samples, some of them being used for the enforcement of the law relating to the manufacture and sale of jewelry, etc., marked with karat fineness. Others were samples from the Mint Bureau, and there were also many made in a careful investigation of the relative accuracy of humid assays for silver in gold bullion by cadmium-sodium chloride and cadmiumsulpho cyanate methods, the results of which were embodied in reports to the Director of the Mint.

The refinery operations this year, including metal that had accumulated during the suspension of refining, resulted in sweeps containing noticeable amounts of platinum, and the platinum contained was therefore reported, thus decreasing the usual losses in the sale of sweeps.

The large amount of current work (the gold deposits being greater in number than in any previous year) required the constant effort of the force to complete with promptness and accuracy, but special attention has been given to the correct determination of silver in gold bullion by humid assay and to the assay of fine gold from the refinery and in deposits made into certificate bars.

About 95,000 cupels were made, and the silver disks used in alloying the assays for parting were rolled and cut in the department. The fine gold, fine silver, and standard bars made were all stamped with the assay fineness.

The number of officers and employees at this assay office at the . close of the fiscal year was as follows:

General department Assayer's department Melter and refiner's department	 15
Total	 90

# THE ASSAY OFFICE OF THE UNITED STATES AT SEATTLE, WASH.

The total number of deposits of gold dust and bullion received during the fiscal year was 1,558 weighing 239,557.528 fine ounces of the value of \$5,006,750.25.

The origin of these deposits is shown below:

The average fineness of the bullion deposited was as follows: Gold, 831.8; silver, 137.2.

For convenience in shipping to the mint for coinage, 1,252 bars, each under 400 ounces in weight and aggregating 65,437.80 ounces Troy, were melted into 72 large bars.

A summary of the work done in the assaying department during the year is as follows:

Quartation silver manufactured	ounces	450
Cupels manufactured		7,500
Bullion assays made	do 6	3,000
Ore assays made for gold and silver		
Ore assays made for base metals		
Assays of slag, etc., from melting room	do	250
Special bullion assays made	do	27
Mutilated domestic coins tested (gold)	d <b>o</b>	58

There were 19 persons, male, employed at the close of the fiscal year.

## ASSAY OFFICES AT CHARLOTTE, DEADWOOD, HELENA, BOISE, SALT LAKE CITY, NEW ORLEANS, AND CARSON.

These offices were open throughout the year as usual for deposit of bullion.

## LIFE OF COINAGE DIES.

Average number of pieces struck per die at the coinage mints during the calendar year 1913:

# OPERATIONS OF THE MELTER AND REFINERS AND THE COINERS, FISCAL YEAR 1913.

The quantity of metals operated upon in the different departments of the mints and assay office at New York during the fiscal year 1913 aggregated 13,001,515 fine ounces of gold and 12,210,488 fine ounces of silver. There were also operated upon at the coinage mints 68,718,751 ounces of minor coinage metal. The figures in the table following are the actual figures as obtained at the settlements of the accounts:

SILVER.

# WASTAGE AND LOSS ON SALE OF SWEEPS AND GAINS FROM OPERATIONS.

The value of the precious metals wasted in the metallurgical and mechanical departments was \$17,744.86. A loss of \$7,032.61 occurred from the difference between the assay value of the bullion contained in sweeps sold and the amount received for the same, as described in the following table:

		Mint at—			
Items.	Philadel- phia.	San Fran- cisco.	Denver.	Assay of- fice at New York.	Total.
Gold wastage of melting and refining department. Silver wastage of melting and refining department Gold wastage of coining department. Silver wastage of coining department. Loss on sale of sweeps.	284.12 12.24	\$98.50 1,213.10	\$548.38 35.18 232.36 1,652.91	\$13, 702. 74 1, 443. 22 3, 933. 56	\$15, 575. 69 1, 506. 77 319. 30 343. 10 7, 032. 61
Total	1,917.52	1, 311. 60	2, 468. 83	19, 079. 52	24,777.47
Paid as follows: From contingent appropriation From parting and refining appropriation	1, 917. 52	1, 311. 60	2, 468. 83	16, 968. 10 2, 111. 42	22, 666. 05 2, 111. 42
Total	1,917.52	1, 311. 60	2, 468. 83	19,079.52	24, 777. 47

The gains from operations in bullion during the fiscal year 1913 amounted to \$115,180.02, as follows:

Character of gains.	Amount.
Surplus bullion recovered by the operative officers Value of deposit melting room grains and sweeps Net gains on bullion shipped from assay offices to mints for coinage Gain on light weight-gold coin purchased for recoinage Receipts from the sale of by-products.	739. 27 66. 71
Total	115, 180. 02

Deducting the wastage and loss, \$33,144.14, from the gains, \$115,180.02, gives a net gain from bullion operation during the fiscal year 1913 of \$82,035.88.

### LABORATORY OF THE BUREAU OF THE MINT.

From the coinage of the calendar year 1912 the assayer of this bureau tested 170 gold and 378 silver coins, all of which were found within the legal requirements as to weight and fineness.

In the gold coins the greatest deviation above standard (the legal limit being 1 point above or below) was 0.5 and below, 0.6.

The greatest deviation of silver coins above standard (the legal limit being 3 points above or below) was 1.3 and below, 1.3.

The following table summarizes these assays:

Besides the coins tabulated above, two coins from the Philadelphia Mint on repeated assays showed wide variations, but within the limits above stated, in the composition of the metal within the coin. Twenty additional assays were made on this lot. There were also examined 32 Philippine silver coins from the San Francisco Mint, which were found to be within the legal requirements as to weight and fineness.

#### PROCEEDINGS OF THE ASSAY COMMISSION, 1913.

The following-named gentlemen were designated as commissioners to test and examine the weight and fineness of the coins reserved at the several mints during the calendar year 1912 pursuant to the provisions of section 3547 of the Revised Statutes.

Dr. R. C. Benner, Pittsburgh, Pa.; Mr. Judson Brenner, De Kalb, Ill.; Hon. Theo. Davidson, Asheville, N. C.; Mr. George M. Eckels, Chicago, Ill.; Mr. L. A. Fischer, Bureau of Standards, Washington, D. C.; Mr. Charles R. Fitzpatrick, Warrenton, Ga.; Mr. William F. Gibson, St. Anthony, Idaho; Mr. A. J. Hazeltine, Warren, Pa.; Hon. James H. Manning, Albany, N. Y.; Mr. W. H. Starr, Decatur, Ill.; Mr. Robert A. Roos, San Francisco, Cal.; Dr. Owen Louis Shinn, Philadelphia, Pa.; Mr. Albert L. Smith, Helena, Mont.; Mr. Joseph W. Smith, Philadelphia, Pa.; Mr. Ambrose Swasey, Cleveland, Ohio; Mr. George Vaux, jr., Bryn Mawr, Pa.; Col. Richard J. Woods, Sioux Falls, S. Dak.; Mr. Addison B. Colvin, Glens Falls, N. Y.

The commission met at the mint at Philadelphia on February 12, 1913, and Hon. James H. Manning was elected chairman.

The following committees were appointed by the chairman with the approval of the commission:

Committee on counting.—Mr. Hazeltine, chairman; Messrs. Eckels, Gibson, J. W. Smith, Starr, and Fitzpatrick.

Committee on weighing.—Mr. Fischer, chairman; Messrs. Brenner and Vaux.

Committee on assaying.-Dr. Shinn, chairman; Messrs. Comings, Davidson, A. L. Smith, and Swasey.

The committee on counting reported that the packages containing the pieces reserved by the several mints for the trial of coins were delivered to them, and that they were compared with the transcripts kept by the Director of the Mint and found to be correct. After verification the coins were delivered to the committees on weighing and assaying.

The coins reserved by the mints for the purposes of the assay commission were as follows:

Tastitutions		Gold.		Silver.	
Institutions.	Pieces.	Value.	Pieces.	Value.	
Philadelphia Denver.	1,969	\$12,657.50	12,668 7,031	\$1,910.10 1,163.50	
San Francisco: United States coin Philippine Islands coin	692	4,960.00	2, 749 1, 222	602.00	

The committee on weighing reported that the working standards of the mint were compared with the standards in the possession of the mint which were certified to by the Bureau of Standards, test No. 9502, September 15, 1911. The 10-ounce and the 20-ounce weights were found to be correct to within 1 part in 250,000; the 30-ounce and 40-ounce weights were found to be correct to within 1 part in 150,000. The other weights, both larger and smaller, were all found to be correct to within 1 part in 100,000. The peso, 50centavo, 20-centavo, and 10-centavo weights used in testing the Philippine coins were tested by comparison with the standards of the mint which had been verified by the Bureau of Standards, and the deviations from the statutory standard weights of the coins examined were all within the legal limit of tolerance.

The committee on assaying reported receiving and making assays of coins reserved from the mints at Philadelphia, San Francisco, and Denver, representing the deliveries made by the coiners to the superintendents during the calendar year 1912.

The highest assay value of the gold coinage at the different mints (the limit of tolerance being one one-thousandth) is at-

The lowest assay value of the gold coinage at the different mints (the limit of tolerance being one one-thousandth) is at-· Philadelphia.....

San Francisco.....

The highest assay value of the silver coinage at the different mints (the limit of tolerance being three one-thousandths) is at-

Philadelphia	900.9
San Francisco	901.1
Denver	

The lowest assay value of the silver coinage at the different mints (the limit of tolerance being three one-thousandths) is at-

Philadelphia	
San Francisco	

The highest assay value of the Philippine silver coinage is at— 

The lowest assay value of the Philippine silver coinage is at-

The committee also tested the quartation silver and found it free from gold, and the lead used in the assay of the gold bullion and found it free from gold and silver. The acid used in the humid assay of silver was found to be free from silver and also from chlorine.

The balances used were tested and found to be correct.

The committee therefore deem the assays exhibited in the accompanying schedules to be entirely trustworthy.

#### COMMITTEE ON RESOLUTIONS.

Mr. Eckels, chairman, submitted the report of the committee on resolutions, which was unanimously adopted, as follows:

Whereas the interest in the national coin collection in the mint at Philadelphia is

rapidly increasing because of its educational and historical value; and Whereas the collection is annually visited by thousands who are anxious to secure a souvenir of the mint; and

Whereas in the near future the United States will consummate one of the greatest engineering projects of the world's history in completing the canal across the Isthmus of Panama: Now, therefore be it *Resolved*, First. That the annual assay commission of 1913 hereby renews the rec-

ommendations of prior commissions with reference to the maintenance and increase of the national coin collection at the Philadelphia Mint.

Second. That the commission recommends that an official souvenir mint medal of typical and characteristic design be struck, to be sold at a moderate price, and that the proceeds from such sales be devoted exclusively to the extension of the collection under the supervision of the Secretary of the Treasury. Third. That the commission further recommends that a suitable medal be struck to

commemorate the opening of the Panama Canal. Be it further Resolved, That the thanks of the commission be heartily tendered to Hon. George E. Roberts, Director of the Mint, Mr. J. W. Sheetz, and to the various officials and employees of the mint for their uniform courtesies extended during the session.

Respectfully submitted.

GEORGE M. ECKELS, Chairman. JUDSON BRENNER.

### MOVEMENT OF GOLD FROM THE PORT OF NEW YORK.

The superintendent of the United States assay office at New York has prepared the following table, giving exports of gold through the port of New York:

#### RECOINAGE OF UNCURRENT UNITED STATES SILVER COIN.

The table following shows the face value of abraded subsidiary coin transferred and purchased for recoinage, the amount of new coin made therefrom, and the loss since 1891:

Fiscal years.	Face value.	Value of new coin produced.	Loss.
1891         1892         1893         1893         1894         1895         1896         1897         1898         1899         1900         1901         1902         1903         1904         1905         1906         1907         1908         1909         1910         1911         1912         1913	$\begin{array}{c} \$910, 046. \ 69\\ 7, 118, 602. \ 78\\ 7, 618, 198. 25\\ 7, 184, 472. 17\\ 4, 361, 761. 36\\ 4, 627, 141. 46\\ 3, 197, 998. 50\\ 6, 109, 772. 32\\ 8, 584, 304. 26\\ 5, 832, 280. 69\\ 3, 333, 437. 06\\ 3, 008, 747. 98\\ 2, 282, 384. 90\\ 1, 964, 476. 11\\ 1, 414, 963. 30\\ 977, 321. 23\\ 814, 361. 57\\ 583, 538. 44\\ 678, 457. 94\\ 414, 035. 30\\ \end{array}$	$\begin{array}{c} \$861, 680. 41 \\ 6, 937, 886. 02 \\ 7, 381, 289. 58 \\ 6, 924, 753. 05 \\ 4, 161, 820. 73 \\ 4, 377, 258. 04 \\ 5, 820, 159. 16 \\ 8, 098, 485. 18 \\ 4, 950, 088. 96 \\ 3, 613, 021. 59 \\ 3, 141, 548. 04 \\ 2, 829, 890. 12. 59 \\ 3, 141, 548. 04 \\ 2, 829, 890. 14, 548. 18 \\ 1, 339, 219. 24 \\ 1, 322, 834. 21 \\ 1, 056, 691. 94 \\ 912, 300. 40 \\ 758, 695. 55 \\ 544, 539. 09 \\ 634, 101. 94 \\ 388, 026. 37 \\ \end{array}$	\$48, 366. 28 180, 716. 76 236, 908. 67 259, 719. 12 199, 940. 63 249, 883. 06 149, 136. 86 289, 613. 16 485, 819. 08 310, 981. 39 219, 259. 10 191, 889. 02 178, 857. 27 172, 280. 69 125, 256. 87 99, 129. 63 77, 357. 61 76, 290. 12 55, 666. 02 35, 566. 02 35, 56. 00 26, 008. 93
Total	77, 128, 539. 32	73,354,082.87	3,774,456.15

The loss on the recoinage of \$1,863,637.50 in worn and uncurrent gold coins was \$16,757.58 and the net loss on the recoinage of \$414,035.30 in worn and uncurrent silver coins was \$26,008.93.

The Treasury was reimbursed from the appropriation for that purpose the following losses on uncurrent coin transferred during the fiscal year 1913 for recoinage:

Uncurrent gold coins	\$148.43
Uncurrent silver coins	26,000.75
Uncurrent minor coins	8,170.36
Total	34, 319, 54

#### UNITED STATES GOLD IN CANADA.

The holdings of United States gold coin in the treasury of the Dominion of Canada on December 31, 1912, was \$98,648,736.50. The holdings of United States gold coin of the chartered banks (25 in number) on the same date aggregated \$19,210,327. The total amount of United States gold coin in Canadian reserves

on the foregoing date was, therefore, \$117,859,063.50.

Monetary systems and approximate stock of money in the aggregate

NOTE.—The blank spaces in this table signify that no satisfactory information is available. In some in-stances the amount of gold in banks and public treasuries is carried out as the total stock in the country, although an unknown amount is in circulation. The case of Italy is an example of this. The per capita circulation is based upon known amounts only. All estimates for stock of money in circulation must be accepted with reserve.

8,480,700

5, 408, 300 3, 042, 400

1,016,900

1 "Specie " includes subsidiary coin in banks. \* Estimates for the United Kingdom prior to 1910 were for coin only; these figures include \$100,000,000 for bullion in banks.

<sup>4</sup> Based on estimate of active rupee circulation by Accountant General of India in 1908.
 <sup>4</sup> Includes Straits Settlements, Malay States, and Johore.
 <sup>5</sup> United States paper currency is legal tender and constitutes a considerable proportion of the circulation

<sup>6</sup> Based upon a calculation by Messrs. P. Arminjon and B. Michel in 1908, who then estimated the stock of gold at 33,000,000 to 41,000,000 Egyptian pounds. The mean of these figures was adopted. Since then the net imports of Egypt, by customs records, have been \$50,000,000, but the 1908 estimate has been changed only to the extent of the increase in bank holdings. It does not seem probable that Egypt can have absorbed the amount of gold indicated by the customs records.
<sup>7</sup> Estimate of A. De Foville, 1909.
<sup>8</sup> The figures for the stock of gold in Germany are based upon an estimate by Dr. Arnold, a director of the Reichsbank, of 3,000,000,000 marks in German coin in the country at the end of 1910. At the close of 1912 the Reichsbank held \$80,254,820 in bullion and foreign coin.
<sup>9</sup> This paper currency has been reduced to a gold basis at 100 pesos to the United States dollar.
<sup>10</sup> Except Costa Rica and British Honduras (gold standard countries).

5

### MONETARY STOCKS.

The foregoing table is offered with the usual words of explanation and caution. The footnotes should be carefully observed. The information is sought through the diplomatic representatives of the United States at foreign capitals.

The figures for stock of money in banks and treasuries are usually from official sources, although for some of the smaller countries it is sometimes necessary to resort to financial journals. The figures for the amount of money in circulation are of uncertain value, but the best obtainable and thought to be worth giving.

The changes in the table from year to year are not always changes in fact, but sometimes corrections; thus for several years no figures have been given for the gold stock of Germany outside the Reichsbank, but this year an estimate is indicated based upon one by Dr. Arnold.

The figures for the stock of gold in banks and treasuries are greater by \$240,000,000 than for the preceding year, the largest gains being by the United States, Russia, and Argentina.

#### GOLD MOVEMENT TO INDIA.

The movement of gold to India continues to be a matter of worldwide importance and interest. During the last three British fiscal years, ending March 31, the net imports of gold coin and bullion, plus the Indian production, have been approximately as follows:

1910–11	\$88, 517, 513
1911–12.	133, 560, 027
1912–13.	132, 977, 746

It appears that India has taken during the last two years about 28 per cent of the world's production of gold. For the current fiscal year, however, trade conditions have not been so favorable to India and the movement is less.

The above importations came in about equal amounts from London, Egypt, and Australia. The movement from Egypt takes place annually after the crop-moving season in that country is over. Every year there is a larger movement of sovereigns from London to Egypt to move the cotton crop; when this is over and the coin is released the situation is favorable for moving a portion of the supply on to India, one-half of the journey being done.

The proportion of gold bullion in the imports has remained about the same during these three years, the increase being in sovereigns, which by all accounts are entering more and more into the commercial transactions of the people. An extract elsewhere from the report of the Comptroller of the Currency Department of the Indian Government discusses this subject.

There is much evidence that modern economic ideas are making headway in the great population of India. The people are learning to use banks and to invest in the shares of joint stock companies, and as the advantages of such disposition of surplus funds becomes apparent the old hoarding habit is slowly abandoned.

The long-established custom of hoarding the precious metals in the form of personal ornaments has an economic explanation in the Hindu inheritance laws, which do not permit property to descend to the female members of a family. They may, however, retain their personal ornaments.

### GOLD AND PRICES.

That there is a relationship between the supply of gold and the prices of commodities scarcely admits of controversy, but there are so many other factors in price making that great practical difficulty attends upon any effort to identify and estimate the particular effect of the changes that occur from time to time in the output of gold.

The production of gold in the world has been practically stationary for the last five years, and industrial consumption plus the movement to India have taken approximately one-half of the output. The remainder has been sufficient to allow of important annual additions to monetary stocks, and in some countries, notably the United States, it can scarcely be questioned that these additions have been related to a long-continued period of enterprise and credit expansion.

The most persuasive statement of the affirmative theory is that, however many influences may have participated in making the present price level, the level could not have been made as high as it is without the enlarged supply of gold. If the gold supply has anything to do with prices, this proposition can hardly be controverted, and if anyone is disposed to deny the quantitative theory in toto, he should consider what results would ensue from the discovery of a cheap process of artificially producing gold. Will anybody contend that such a discovery would have no effect upon monetary or industrial conditions? On the other hand, the dramatic effect of the phenomenal increase in the production of gold, coincident with the general rise of prices, has fixed attention upon this factor and given it, possibly, an undue importance. Other and very important influences have undoubtedly contributed to the movement.

It is evident that an increasing production of gold has a direct effect in swelling bank reserves. The new gold flows into the banks, not only for safekeeping but to create balances against which the mine owners may draw to meet operating expenses. Even for the best fields, approximately 75 per cent of the credits so created must be used for this purpose. But, unlike bank credits created by other industrial operations, these credits, accompanied by an equal amount of new gold, enlarge in a much greater degree the ability of the banks to make loans. The entire gold-producing industry of the world may not, as an industry, be more than self-supporting, but when the product in the form of money enters bank reserves, it may as the basis of credit create purchasing power to several times its own value. One way or another the new supplies of credit will force their way

One way or another the new supplies of credit will force their way into use. They make capital available for new undertakings and for the enlargement of old ones, and in this era of industrial activity and change there is practically no end of promising opportunities for investment. There are many countries, both old and new, with vast undeveloped resources appealing for capital. Competent authorities have estimated that as much as \$3,500,000,000 of foreign capital has been invested in Canada in the last dozen years in constructive work. Probably \$800,000,000 has been similarly invested in Brazil in the last ten years. And these are new countries with comparatively small populations. The sums so invested in the United States, of course, have been very much greater than in these two put together.

The entire organization and equipment of the industrial world is constantly undergoing change. The alterations in power equipments alone, resulting from improvements in the steam engine, the development of internal combustion, and the various applications of electricity, call for enormous amounts of capital, or, for what amounts to the same thing, credit accommodations. Modern industrial equipment, like the modern battleship, does not wear out, but is forced out by the pressure of the ever-coming new and superior substitutes. This entire movement is stimulated by increasing bank reserves. There is a familiar tendency in the business world to alternating periods of expansion and contraction, the former running its course until credit is strained, when reaction sets in and is more or less protracted according to the degree in which credit may have been overused. But with constantly increasing bank reserves the periods of expansion are longer maintained and the periods of reaction are sooner overcome.

The growing importance of stock and produce exchanges and the vast multiplication of corporate securities have been important factors in the expansion of credits, and therefore had an effect upon prices. In the last analyses it is effective demand that influences prices, and the demand is usually financed by credit, which in turn must have some relation to the gold reserves. But the great supply of dividend-paying stocks and bonds now in the possession of the public affords a most convenient facility by means of which loans may be obtained. No doubt there is a great deal more borrowing for miscellaneous investments upon the securities of a corporation whose issues are widely distributed than there was upon the credit of the same business before it was incorporated or while the ownership was in few hands. Perhaps it is not too much to say that in times of prosperity, when the spirit of money-making is infectious, it is difficult for the average man to keep good collateral in his own box while many inviting opportunities for investment pass by.

It will naturally be said, however, that if the present rise of prices is due to an extraordinary demand for commodities and labor, to be used in construction and for improved equipment, there should be results in the way of an increased production of commodities at lower costs, and that these results in turn should show in lower prices.

This is a perfectly logical conclusion, and the only answer that can be made is that unless the world has been wasting its savings in unprofitable investments or population has become unduly congested where the cost of living is necessarily high, a reaction in the course of prices should soon appear.

A study of all price tables will show that the level of prices under review has been carried up by the rise in articles of food and raw materials. Manufactures have either not risen at all or have risen by a lower percentage than the raw materials and labor which have entered into them. The greatest rise of all in the last 15 years in the United States has been in lumber, but it is not necessary to resort to the gold hypothesis for an explanation in this casc. All of the products of timber have been going higher because near-by supplies were being exhausted. And so all of the products of the soil have been going higher because the cheap, easily tilled prairie lands of this country have been occupied, while our population continues to increase. Meats are dearer for the obvious reason that cattle can

no longer be pastured free on the public domain; the great ranches and herds have been broken up, and for some years the supply of meat animals in the United States has not been increasing. In all price tables these products of the farms and forests and public lands are very important factors.

For a long time, during the period of land settlement in the United States, when it cost but little to open new farms, the prices of farm products were so low as to afford very small compensation to the producers. The desire to own land, which was expected ultimately to increase in value, was the chief inducement for the opening of new farms, and it was sufficient to keep the price of products down close to the bare labor cost, upon most farms, of producing them. With the cheap and easily tilled lands occupied, there was a slowing down in agricultural expansion. Since then development in agriculture has not kept pace with progress in manufactures or transportation.

Since the Baring crisis in 1890, caused by overfree investments in Argentine railways, there has been no extensive railway construction opening up large areas of cheap lands until the Canadian construction began a few years ago. And while there has been an important movement of farmers into the Canadian Northwest the results of the development expenditures have only begun to make themselves felt. It is, however, true that wheat, the principal crop of Canada, is one of the farm staples that has made the smallest advance.

The expenditures of capital upon the railways of the United States during the last 15 years have been enormous, but they have been mainly directed to the improvement of the existing lines and not to the opening of new territory, as in the decade from 1881 to 1890. The roads have been straightened, grades have been reduced, additional tracks have been provided, heavier rails have been laid, new and stronger bridges have been built; and along with these betterments upon the roadways have come more powerful and more economical locomotives, and freight cars of much greater capacity. These improvements have called for a vast amount of labor and materials and have had an important influence upon wages and prices. They have undoubtedly been very effective for the purpose for which they were made, to wit, an economy in labor and power in the operation of the lines. Judged by the higher efficiency obtained, these outlays were well worth making, but the rising prices of timber, ties, and various supplies, and the higher wages required of the companies by reason of the higher cost to their employees of food and clothing, have apparently more than offset all the gains accomplished by reconstruction and improved equipment.

And the situation of the railways is illustrative of what has occurred throughout the industries. In all lines heavy investments of capital have been made for the purpose of reducing labor costs, and results have been obtained which would have naturally appeared in lower prices if the higher costs of raw materials and of the food and clothing of the operatives had not intervened and overbalanced them. Indeed, it would require nothing less than a revolution in the methods of industry to offset in importance a rise of 50 per cent in the cost of the food staples and of such common commodities as cotton, hides, and lumber.

According to the tables of the United States Bureau of Labor, the average of prices of farm products during the year 1912 was 171.3 per cent of the average for the 10 years 1890–1899, while the average of all the commodities included in its tables was but 133.6 of the same base. It is evident that the commodities other than farm products increased by a less percentage than 133.6, and it is easy to believe that the rise of 171.3 in farm products, which include not only food but the raw materials of clothing, was the main factor in the rise of other commodities.

The percentages of increase in certain raw commodities and of merchantable products related thereto, as they appear in the tables of the United States Bureau of Labor for the year 1912, are given below:

Average wholesale prices for the year 1912.

#### [1890 - 1899 = 100.]

#### WORLD PRICES.

The British Board of Trade has issued a special report upon rents, prices, and wages in 1912, and in this report includes a comparative showing of the rise of prices of food since 1900 in 11 foreign countries and several of its own colonies. In this table the figures for each country are all reduced to percentages of the price level of 1900.

The figures for several countries, including the United States, for 1912 were not available when the report was closed. The close correspondence between the figures for the United States and Canada is worthy of note and, of course, was to be expected:

Index numbers of changes in the level of food prices since the year 1900 in the United Kingdom and certain foreign countries and British dominions oversea.

#### VALUES OF FOREIGN COINS.

The following values calculated by the Director of the Mint were proclaimed by the Secretary of the Treasury under the provisions of section 25 of the act of August 27, 1894, as the basis for estimating the value of foreign merchandise exported to the United States during the quarter beginning October 1, 1913:

Country.	Legal stand- ard.	Monetary unit.	Value in terms of U. S.	Remarks. <sup>1</sup>
			money.	
Argentina	Gold	Peso	\$0.9647	Currency: Depreciated paper, convertible at 44 per cent of face value.
Austria-Hungary Belgium	Gold and sil- ver.	Crown. Franc	. 203 . 193	Member of Latin Union; gold is the actual standard.
Bolivia		Boliviano	. 389	121 bolivianos equal 1 pound
Brazil	do	Milreis	. 546	sterling. Currency: Government paper, convertible at \$0.3242 to the
British colonies in Australasia and Africa.	đo	Pound sterling	4.8665	milreis.
Canada Central American States:	do	Dollar	1.000	
Costa Rica	do do	Colon Dollar	. 465 1. 000	
Guatemala	)	· ·	1	Currency: Inconvertible paper; exchange rate, 16 to 18 pesos equal \$1.
Honduras	1			Currency: Bank notes; exchange
Nicaragua	Silver	Peso	. 435	rate Mar. 20, 1912, \$0.415. Currency: Inconvertible paper; exchange rate, 16 <sup>‡</sup> to 17 pesos equal \$1.
Salvador				Currency: Convertible into sil- ver on demand.
Chile	' Gold	do	. 365	Currency: Inconvertible paper; exchange rate approximately \$0.2061.
China	Silver	Amoy Canton Chefoo Foochow Ha i k w a n (customs). Hankow Xanking Nanking Nanking Nanking Nanking Naking Shanghai. Swatow Takau Tientsin Y uan Hongkong British Dollar	$\begin{array}{c} .682\\ .697\\ .660\\ .726\\ \end{array}$	
Colombia		Dollar	1.000	Currency: Inconvertible paper; exchange rate approximately \$102 paper to \$1 gold.
Denmark Ecuador	do  do	Crown Sucre	. 268 . 487	

Values of foreign coins.

<sup>1</sup> The exchange rates shown under this heading are recent quotations and given as an indication of the values of currencies which are fluctuating in their relation to the legal standard. They are not to take the place of the consular certificate where it is available.

<sup>1</sup> \$5,286, charged off by a bank, subsequently restored.

In reviewing the condition of national banks as shown by the periodical returns it is of interest to note the general situation, particularly in respect of the public debt, the interest charge thereon, operations of the clearing houses, prices for money, foreign trade as

. .

represented by imports and exports, including transactions in the precious metals, and the returns to shareholders in dividends on their bank stock.

The indebtedness of the Government, less cash in the Treasury, on June 30, 1913, was \$1,028,344,055, of which \$965,706,610 was interestbearing, the annual interest charge being \$22,835,330, averaging 2.36 per cent. The circulating medium, consisting of specie, legal tenders, and national-bank notes, was \$3,720,070,016, of which \$356,331,567 is the amount held in the United States Treasury, the remainder, \$3,363,738,449, being in circulation. Based on the estimated population of continental United States on June 30, the per capita of money in circulation was \$34.56. Of the amount in circulation, 46.2 per cent is included in the assets of national, State, and private banks, leaving 53.8 per cent with the public at large.

The transactions of the clearing houses of the United States, as represented by the volume of clearings, reached \$173,765,288,000, exceeding the operations of the prior year by \$5,564,362,000.

Foreign commerce in merchandise aggregated \$4,278,862,383, the exports amounting to \$2,465,884,149, the imports to \$1,812,978,235, or less by \$652,905,915 than the volume of exports. Foreign trade for the year exceeded the volume in 1912 by \$421,275,040. In addition to the trade in merchandise, gold was exported to the amount of \$77,762,622, or \$8,568,597 in excess of the imports. Silver exports amounted to \$71,614,311, or \$30,345,795.in excess of the imports. Thus the exports of gold and silver combined exceeded the imports of these metals for the year by \$38,914,392.

Money has been firm generally and in the New York market rates for both time loans and commercial paper ruled higher than in any year since 1907.

Based on capital and surplus, the gross earnings of national banks during the year were greater by over 2 per cent than during the prior year. While there has been a notable depreciation in the market value of standard and other securities, necessitating a cut in the undivided profit account of the banks, shareholders of national banks received dividends at the average rate of 11.4 per cent as against an average of 11.01 per cent for the prior five years.

In connection with information relative to the operation of national banks, elsewhere in this report are submitted statistics relating to the condition of some 18,500 State and private banks from which returns were received for June last. The capital of national and other banking institutions is shown to amount to \$2,096,800,000, of which slightly more than one-half is the capital of national banks. Of individual deposits aggregating \$17,475,700,000, national banks held approximately one-third, and of the total assets, stated at \$25,712,100,000, approximately two-fifths are those of national banks.

In the introductory table of this report is shown the condition of national banks as represented by their assets and liabilities in detail at date of each return from November 26, 1912, to August 9, 1913. The number of banks reporting increased during the period in question from 7,420 to 7,488. While the aggregate amount of assets reached the maximum—\$11,185,599,266—on February 4, the returns on April 4 show a decline of \$103,624,933, a further decline of \$45,054,576 by June 4, and \$160,067,413 by August 9. Hence

16726°-FI 1913---26

between February 4 and August 9 there was a decrease in assets of \$308,746,922.

Loans and discounts standing at 6,058,982,029 in November, 1912, increased to 6,178,096,379 on April 4 of the current year, decreased to 6,143,028,132 on June 4, but rose to 6,168,555,525 on August 9.

United States bonds on deposit to secure circulation were lowest at the beginning of the year, viz, \$728,482,810, and at the maximum, \$735,809,330 at the close of the year, a net increase of \$7,-326,520. Including with bonds to secure circulation, those pledged as security for public deposits and those held in bank, the investment of national banks in United States bonds increased from \$782,-385,270 in November, 1912, to \$790,023,283 at the close of the year, the total investment in securities of this character showing an increase of \$7,638,013. These amounts are exclusive of the premiums on the bonds, which at the beginning of the year were stated at \$7,059,551, and at the close of the year at \$6,605,248.

Investments in bonds and securities other than those issued by the Government amounted in November, 1912, to \$1,069,971,558, a slight increase being shown at the date of each subsequent call to August 9, when the amount reported was \$1,095,906,346, an increase during the period of \$25,934,788.

Specie and other lawful money in bank was at the minimum in November, 1912, amounting on that date to \$859,098,737, with an increase to the high point of \$933,417,231 on February 4. Between this date and the April call there was a drop of some \$45,000,000, or to \$888,283,735. The banks recovered in lawful money between the last-named date and June 4 over \$25,000,000, the amount held on the latter date being \$913,982,640. On August 9 the cash holdings had fallen to \$899,169,374, or \$34,300,000 less than in February, but \$4,000,000 more than at the date of the corresponding returns in 1912.

Paid-in capital stock increased from \$1,045,092,580 in November, 1912, to \$1,056,919,792 in June, 1913, but on the August call had declined to \$1,056,345,786, but the net increase for the year was \$11,253,206. Capital and surplus combined showed a steady increase from \$1,747,092,413 to \$1,781,679,415, the increase, roundly stated, being \$34,600,000. Combining net undivided profits with capital and surplus, funds representing shareholders' interest in the banks, it is noted that these funds increased during the year approximately \$26,000,000, or from \$2,015,099,668 in November, 1912, to \$2,041,228,571 at the close of the current year.

Individual deposits reached the maximum on February 4, amounting on that date to \$5,985,432,295, but declined at the close of the year to \$5,761,338,731, a decrease of \$224,093,564.

United States deposits, including disbursing officers' accounts and postal savings deposits, showed an increase at date of each report during the year, beginning at \$61,935,937 and closing with \$77,094,619, the net increase being approximately \$15,000,000.

the net increase being approximately \$15,000,000. Rediscounts and bills payable, amounting to \$71,881,568 in November, 1912, declined to \$51,447,598 on February 4, the low point during the year; increased to \$56,532,538 in April, to \$72,906,-775 in June, and to \$109,106,570 in August.

What is characterized as banking power, that is capital, surplus, and other profits, deposits and circulation of national banks, based on the periodical reports for the year, averaged \$8,748,026,626, or \$1,177,234 per bank.

## LOANS AND DISCOUNTS OF NATIONAL BANKS.

In connection with periodical statements relating to the assets and liabilities of national banks, each report states in detail the amount and character of loans. The variations in proportions are not notable. Statistics herewith presented are based upon returns for comparable dates in June during the past three years. As will be noted, the paper is divided into two general classes, demand and time, and the former subdivided into paper with one or more individual or firm names, and paper secured by stocks, bonds, and other collateral. Time paper is shown in three classes: first, that with two or more individual or firm names; single name (one person or firm), without other security; and third, paper secured by stocks and bonds and other personal security, including liens on real estate. From June 7, 1911, to June 4, 1913, the volume of loans increased from \$5,610,838,787 to \$6,143,028,133. On June 4 last 25.8 per cent of the banks' loans was demand, and 74.2 per cent time paper. Of this class 33.1 per cent represents time paper with two or more individual or firm names, the single name time paper being 20.5 per cent, and time paper secured by stocks, bonds, etc., 20.6 per cent.

In the following table are shown the changes in amounts and percentages of the various classes of paper in June 1911, 1912, and 1913:

·	June 7, 191	u.	June 14, 191	12.	June 4, 1913.

#### LOANS MATURING IN 90 DAYS OR LESS.

In addition to the usual information submitted by national banks in relation to the amount and character of their loans, national banks were requested to segregate and report the amount of their loans maturing in 90 days or less, from August 9, 1913. The information desired was given by 7,096 of the 7,488 banks in operation on that date. Of the total volume of loans of the reporting banks, stated at 6,022,406,597, the paper running for 90 days or less aggregated 3,428,055,157, or 56.92 per cent. Of this short-time paper,  $18\frac{1}{2}$  per cent is on demand.

In the following statement is shown the amount of demand paper, together with time paper of each class maturing in 90 days from the date in question:

Classes.	Loans matur- ing in 90 days or less.
A. On demand (one or more names) B. On demand, secured by stocks, bonds, etc C. On time (two or more names). D. On time, single name, without other security. E. On time, secured by stocks, bonds, etc F. Secured by real-estate mortgages, etc.	\$252, 144, 881 384, 583, 183 1, 294, 695, 469 773, 791, 174 701, 409, 037 21, 431, 413
Total	· · · · · · · · · · · · · · · · · · ·
Total	6,022,406,597

For the purposes of comparison with the foregoing general statement, there is submitted herewith information relating to the amount of each character of paper maturing in 90 days from August 9, and the aggregate of all other paper reported by national banks in each of the three central reserve cities, in other reserve cities, and by country banks:

	New Y 36 bar		Chicago, 9 banks.		St. Louis, 7 banks.	Central re- serve cities, 52 banks.

Loans maturing in 90 days or less from August 9, 1913.

#### RESERVES OF NATIONAL BANKS.

Under the provisions of the act of May 30, 1908, national banks are exempted from maintaining a reserve against United States deposits, which are held to include not only deposits made by direction of the Secretary of the Treasury, but deposits of United States disbursing officers and postal savings funds, that is, all Government accounts upon which interest is paid. In computing the reserve required and held, to the net amount due to national and other banks is added dividends unpaid and individual deposits, and from the gross amount so obtained the following deductions are made: Checks on other banks in the same place, exchanges for clearing houses, and national-The remainder is the amount upon which the required bank notes. 25 or 15 per cent reserve is determined. The 5 per cent redemption fund is then deducted, leaving the net reserve required to be held. Under the law, national banks located in the central reserve cities are required to maintain a reserve of 25 per cent, all of which must be held in bank. The same percentage of reserve is required for other reserve city banks, but one-half of the amount required may The be deposited with correspondents, in the central reserve cities. country bank requirement is 15 per cent, of which two-fifths must be in bank, and three-fifths may be with correspondents in central or other reserve city banks.

On November 26, 1912, against deposits subject to reserve requirements aggregating \$7,034,844,399, banks held reserves of \$1,431,275,-556, or 20.35 per cent, the aggregate reserve held being \$31,000,000 in excess of the legal requirement. Deposits subject to reserve in

the three central reserve city banks were \$1,521,666,703, reserve required \$380,416,675, reserve held \$371,135,255, the average for the three cities being 24.39 per cent. On the same date deposits of other reserve city banks totaled \$1,927,292,934; the reserve required \$481,823,233, and the reserve held \$471,759,700, or 24.48 per cent. The average for central and all other reserve city banks was 24.44 The country banks' deposits on the same date were per cent. \$3,585,884,760; reserve required \$537,882,714, and the amount held \$588,380,600, or 16.41 per cent. On February 4 the central reserve city banks' reserve averaged 25.58 per cent, other reserve city banks 25.09 per cent, making an average for the two classes 25.31 per cent. The reserve for the country banks was 16.45 per cent, and the average for all reporting banks 20.91 per cent. On April 4 the reserve in central reserve city banks averaged 24.33 per cent, that of other reserve city banks 24.75 per cent, with an average for all reserve city banks of 24.56 per cent. On the same date the country banks held reserve at an average rate of 16.42 per cent, and all banks 20.44 per cent. The average reserve of the central reserve city banks was at the maximum, 26.12 per cent, on June 4, while the average for other reserve city banks was 24.83 per cent. The country banks' average rate had increased to 16.62 per cent, while The that of all banks was 20.95 per cent. The report for August 9, the last of the year, shows that while the average rate for central reserve cities was 25.41, that of New York was 26.42 per cent, against 22.92 and 22.93 per cent, respectively, for Chicago and St. Louis. In other reserve city banks the average was 25.27 per cent, and the average for all reserve city banks 25.33 per cent. The average rate in country banks dropped to 16.23 per cent. Deposits in all banks on this date were \$7,096,690,068, the reserve required \$1,414,601,768, and the amount held \$1,470,487,279, or 20.72 per cent.

While the law only permits a specific percentage of a bank's reserve to be maintained elsewhere than in its own vaults, the excessive credits, not taken into consideration in computing the reserve held, placed the banks in a better condition to meet liabilities than would appear from the foregoing references to the percentages of reserves held upon the dates indicated. With that condition in view, there is submitted herewith a statement based upon the returns for the five calls, showing the percentage of legal reserve as well as the percentage available at date of each report in each and all classes of banks:

	Nov. 26, 1912.		Feb. 4, 1913.		Apr. 4, 1913.		3. June 4, 1913.		Aug. 9, 1913.

#### CHANGES IN LOANS, BONDS, CASH, AND DEPOSITS.

In addition to the general résumé relating to the condition of the banks of the country at date of various returns during the year, it is of interest to note the changes in the principal assets and the individual deposits in banks, and for that purpose there is submitted herewith a statement by geographical divisions, showing the amount of loans, bond investments, cash in bank, and individual deposits, together with the averages for the year.

The table in question follows:

Changes in volume of principal assets and in deposits, by geographical divisions, 1912-13.

Divisions and dates.	Loans.	Bonds, etc.	Cash and cash items,	Individual deposits.

ederal Reserve Bank of St. Louis

Information comparable with the foregoing but classified to show the fluctuations in banks in central reserve and other reserve cities in the country appears in the table following. It will be noted that the deposits in the central reserve cities were at the maximum on February 4, 1913, and at the low point on August 9, falling from \$1,030,956,000 in February to \$900,260,000 in August. The low point in cash holdings was reached by other reserve city banks in August, while their deposits were at the maximum on June 4. Individual deposits in country banks were at the high point on April 4, and lowest during the period in question on November 26, 1912, while the cash holdings were highest on June 4 and lowest on August The average individual deposits in the central reserve city banks, 9. based on the five reports of the year, were \$982,607,000, and the average amount of cash and cash items \$567,648,000. The average deposits in other reserve city banks were \$1,403,843,000, and the cash and cash items \$331,827,000, while the average deposits in country banks were \$3,536,265,000, and their average holdings of cash and cash items \$324,298,000.

Loans, bonds, cash, and individual deposits of national banks at date of each call from Nov. 26, 1912, to Aug. 9, 1913, inclusive, in central reserve cities, and other reserve cities, and the country, together with the average for each section, 1912–13.

[In thousands of dollars.]

#### SAVINGS DEPOSITORS AND DEPOSITS IN NATIONAL BANKS.

By reason of the strong competition for deposits and incidentally the payment of higher rates of interest on savings than on other accounts on the part of trust companies and other State banking institutions, the establishment of savings departments or the payment of interest on savings accounts by national banks has notably increased until at the present time about 45 per cent of the banks have taken that action, as shown by the reports relating to the number and volume of savings accounts.

The number of savings depositors or savings deposit accounts increased from 2,773,684 on November 26, 1912, to 3,020,831 on August 9, 1913, and funds to the credit of these depositors from \$776,481,362 in November, 1912, to \$824,476,995 in June last, although by August 9 there was a decline, as in the case of other deposits, when the amount of these accounts had fallen to \$820,639,410. Notwithstanding this decline in volume there was a net increase during the year in savings accounts of \$44,158,049. The average amount of savings deposits, based on the five returns for the year, is shown to have been \$808,964,471, representing approximately 13.66 per cent of the average of all individual deposits. The average savings account is estimated at \$265.

Based on the August 9 returns, the greatest amount, as well as the highest percentage of savings deposits, was held by national banks located in the Eastern States. In this section 17.76 per cent of all deposits are savings. The percentage in the banks in the Southern States is 15.38, Middle Western States 13.20, the New England States 12.21, and the Pacific States, including Hawaii, 11.02.

The number of savings depositors, amount of savings deposits, together with the average savings account based on the reports for the current year, are shown in the following table:

Number of savings depositors and amount of savings deposits in national banks.

Date.	 Number of report- ing banks.	Number reporting savings deposits.	Number of depositors.	Amount of deposits.	Average deposit.
Nov. 26. 1912. Feb. 4, 1913. Apr. 4, 1913. June 4, 1913. #### CLASSIFICATION OF NATIONAL BANKS BY CAPITAL STOCK.

In another part of this report there is a table in which national banks are classified according to capital stock and by States and geographical divisions. The banks are divided into the following classes: Those of \$25,000, over \$25,000 and less than \$50,000, \$50,000 and less than \$100,000, \$100,000 and less than \$250,000, \$250,000 and less than \$1,000,000, \$1,000,000 and less than \$5,000,000, and \$5,000,000 and over. The classification in question is based upon the returns for August 9 and includes 7,488 banks. There are a limited number of banks with capital of over \$25,000 and less than \$50,000, and although all banks with capital of less than \$50,000 represent 32.34 per cent in number, the capital represented is but 6.07 per cent of the aggregate. Banks with capital from \$50,000 and over but less than \$250,000 number 4,383, or 58.54 per cent, while the capital represented by these banks is 36.10 of the aggregate. There are 665 banks with capital ranging from \$250,000 and over but less than \$5,000,000. In number these banks represent 8.88 per cent and in capital 41.26 per cent of the total capital. There are 18 banks with capital of \$5,000,000 or over, less than one-fourth of 1

per cent of the banks in operation, but representing 16.57 per cent of the aggregate capital.

Number of national banks, classified by capital (paid in), on Aug. 9, 1913.

Class.	Number.	Per cent.	Amount.	Per cent.
\$25,000 Over \$25,000 and less than \$50,000 \$50,000 and less than \$100,000 \$20,000 and less than \$100,000 \$250,000 and less than \$1,000,000 \$1,000,000 and less than \$1,000,000. \$1,000,000 and over	385 2,339 2,044 506	$27.20 \\ 5.14 \\ 31.24 \\ 27.30 \\ 6.76 \\ 2.12 \\ .24$	\$51, 082, 061 12, 978, 450 125, 199, 220 256, 198, 125 201, 882, 230 234, 005, 700 175, 000, 000	4. 84 1. 23 11. 85 24. 25 19. 11 22. 15 16. 57
Grand total	7,488	100.00	1,056,345,786	100.00

RELATION OF CAPITAL TO DEPOSITS, ETC., OF NATIONAL BANKS.

The capital of the banks in relation to individual deposits, to loans, and to aggregate resources, as well as the relation of capital and other profits to individual deposits, and the amount of specie and legal tenders to individual deposits, are shown in the following tables for comparable dates in the years 1910 to 1913, inclusive. As will be noted the relation of the various items changes but slightly from year to year.

The table in question follows:

Items.	1910	1911	1912	1913
Capital to individual deposits Capital to loans Capital to aggregate resources	\$1.00 to \$5.13 1.00 to 5.45 1.00 to 9.80	\$1.00 to \$5.35 1.00 to 5.52 1.00 to 10.12	\$1.00 to \$5.63 1.00 to 5.77 1.00 to 10.48	\$1.00 to \$5.45 1.00 to 5.84 1.00 to 10.30
Capital and surplus and other profits to individual deposits	1.00 to 2.74	1.00 to 10.12	1.00 to 10.43	1.00 to 2.82
deposits	1.00 to 6.04	1.00 to 6.14	1.00 to 6.58	1.00 to 6.41

#### BOND AND OTHER SIMILAR INVESTMENTS BY NATIONAL BANKS.

Excluding premium on United States bonds, stated at \$6,876,636, the national banks' investments in United States bonds and other similar securities represented 17 per cent of the aggregate assets as shown by the returns for the call of June 4 last. The total of these investments is \$1,882,812,145, the increase from the amount held on the corresponding date in 1912 being \$1,853,825,171. Investments in United States bonds aggregated \$788,626,560, of which \$735,-226,870 was held by the Treasurer of the United States as security for circulation and \$47,061,690 as security for public deposits. In addition the banks hold unpledged United States bonds to the amount of \$6,338,000. The next important investment is in railroad bonds, which amount to \$345,204,195. Other public service corporation bonds are listed in the sum of \$197,459,668, while the investment in State, county, and municipal bonds totals \$175,345,382.

As will be noted by reference to the table following, showing in detail the investments of the banks in bonds and other securities, \$1,094,185,585 is the total of these securities, exclusive of United States bonds.

The table follows:

• Class.	<b>June 14, 19</b> 12.	June 4, 1913.
State, county, and municipal bonds. Railroad bonds. Other public service corporation bonds. All other bonds. Stocks (presumably taken for debt). Warrants, claims, judgments, etc. Various securities with the 'Treasury as security for public deposits. Foreign Government bonds. Other foreign bonds and securities.	354, 321, 271 195, 452, 530 223, 500, 814 43, 097, 143 37, 884, 505 31, 163, 415	\$175, 345, 382 345, 204, 195 197, 459, 668 220, 120, 541 52, 085, 149 38, 902, 358 43, 597, 930 17, 960, 704 3, 509, 658
Total bonds other than United States	1,077,783,001	1,094,185,585
United States bonds to secure circulation United States bonds to secure United States deposits United States bonds on hand		735, 226, 870 47, 061, 690 6, 338, 000
Total United States bonds	776, 042, 170	788, 626, 560
Total bonds of all classes 1	1, 853, 825, 171	1, 882, 812, 145

<sup>1</sup> Premium on United States bonds amounting to \$6,876,636.89 not included.

#### PRODUCTIVITY OF LOANS AND BOND INVESTMENTS.

As the income of banks is obtained almost wholly from interest on loans and the return upon bonds and other securities, a statement is submitted herewith indicating the percentage of gross earnings of the banks as reported for the year ended June 30 to the volume of loans and investments reported by the banks on August 9, the next succeeding call. As will be noted, computations are made for each geographical division of the country. The total amount representing loans and investments is shown to be \$8,061,090,393, and the gross earnings of the banks \$499,252,336, or 6.19 per cent. The highest percentage returned is that obtained by the banks in the western division, viz, 8.33, and the lowest the Eastern States, 5.62. The rate in the New England States is 5.88.

In the accompanying table is shown the amount of loans, other investments, gross earnings of the banks, and the percentage of gross earnings to total investments for each geographical division:

Divisions.	Loans.	Bonds, etc.	Total invest- ment.	Gross earnings.	Per cent of gross earnings to total invest- ment.
New England States Eastern States Southern States Middle Western States Western States Pacific States Hawaii	\$496, 139, 607 2, 276, 923, 907 812, 345, 233 1, 745, 709, 787 406, 426, 525 429, 232, 861 1, 777, 605	\$169, 419, 358 830, 234, 713 201, 756, 237 447, 345, 080 100, 777, 797 142, 009, 779 991, 904	\$665, 558, 965 3, 107, 158, 620 1, 014, 101, 470 2, 193, 054, 867 507, 204, 322 571, 242, 640 2, 769, 509	\$39, 167, 912 174, 578, 785 70, 878, 537 133, 234, 332 42, 236, 192 38, 977, 549 179, 029	5. 88 5. 62 6. 99 6. 08 8. 33 6. 82 6. 46

#### PERCENTAGE OF PRINCIPAL ITEMS OF ASSETS AND LIABILITIES OF NATIONAL BANKS.

Based upon conditions for a series of years it appears that approximately 70 per cent of the banks' assets are represented by loans and discounts, United States bonds, and lawful money, and a like percentage of liabilities by capital, surplus and other profits, and individual

0

deposits. As will be noted by reference to the table following, loans and discounts represent 56.9 per cent, United States bonds 7.3 per cent, lawful money in bank 8.3 per cent of the total assets, and that the capital represents 9.7 per cent, surplus and profit 9.1 per cent, and individual deposits 53 per cent of the liabilities, as shown by the returns on August 9:

Items.	1904	1905	1906	1907	1908	1909	1910	1911	1912	1913

DEVELOPMENT IN NATIONAL BANKING.

The development of national banking is graphically portrayed in the accompanying table relating to the combined capital and surplus, the individual deposits, deposits of every character, circulation reported outstanding, loans and discounts, and lawful money in bank. The table in question covers the years beginning February 6, 1903, and closing August 9, 1913. Without an exception, the combined capital and surplus of the banks steadily increased from call to call during this period, the net increase being \$699,300,000, or from \$1,082,400,000 to \$1,781,700,000. The increase in capital and surplus was attended by a notable increase in circulation from \$335,-200,000 in February, 1903, to \$627,600,000 in February, 1908. It will be noted that between May, 1907, and February, 1908, circulation increased approximately \$80,000,000, a material portion of which was issued as a result of the efforts of the Treasury Department to meet extraordinary demands for currency during the panic by increasing public deposits with the banks, contingent upon their increasing their note issues. By November, 1908, however, the banks retired a portion of their issues, the reduction during that period amounting to  $\sim$ 228,300,000. Early in 1909 2 per cent consols declined to  $101\frac{1}{4}$ , and at the close of that year were held at from par to 102. This same range prevailed during 1911 and 1912. The market price of these bonds was at or above par up to July, 1913, when there was a drop to 97.09. The average net price in October last was 96.63. As the price of bonds declines the profit on the issue of circulation secured o thereby increases. It was thus inevitable that the banks would increase their circulating-note issues, and the returns show that between the fall of 1908 and August, 1913, the increase was, roundly, \$25,200,000.

Normal increases are shown with seasonal fluctuations in the volume of individual deposits and of aggregate deposits upon which the reserve required is determined. The increase of individual deposits in this ten-year period was from \$3,159,500,000 to \$5,761,300,000, and aggregate deposits from \$4,580,900,000 to \$7,948,600,000.

Loans and discounts approximating in volume individual deposits, while indicating seasonal fluctuations as in the case of deposits, show generally increases from report to report, the increase during this period being from \$3,386,600,000 to \$6,186,900,000. While, as stated, the volume of individual deposits and loans and discounts generally bear the same relative proportion to aggregate liabilities and assets, respectively, a notable exception appears in the returns for August last, on which date the loans and discounts exceeded the deposits by \$425,600,000, and while the proportion of individual deposits to aggregate liabilities is about normal, the proportion of loans and discounts to assets was greater than at any other time during this tenyear period, the percentage being 56.9, against the previous high point of 56.1, in 1907.

This over-expanded condition, however, was relieved by the action of the Secretary of the Treasury in increasing the deposits of public moneys with depositary banks to the extent of about \$34,000,000, mainly in the aid of crop movements. Between August 9 and October 31 the banks' liabilities to the Government increased from \$57,304,000 to \$98,069,000.

As will be noted, the proportion of specie and legal tenders to individual deposits under normal conditions fluctuates between 15 and 19 per cent. In the fall of 1906 the proportion fell to 14.43 per cent, but was above that point at every subsequent report, although the percentage in November, 1912, was but 14.45, and in April, 1913, In June and August, 1913, the percentages were 15.35 and espectively. The percentage of lawful money to aggregate 14.88. 15.61, respectively. deposits ranged generally from 11 per cent to about 13 per cent, but it will be noted that there was a drop to ten and a fraction in the fall of 1906 and spring of 1907, and again in November, 1912, and April, 1913. In June and August of the last-named year the proportions were 11.22 per cent and 11.31 per cent, respectively. With the exception of the returns for September, 1906, when the percentage dropped to 13.99, the proportion of lawful money to loans and discounts exceeded 14 per cent, occasionally but rarely reaching 18 per cent. The table referred to is submitted herewith.

Capital and surplus, individual deposits, aggregate deposits, amount of circulation outstanding, loans and discounts (including overdrafts), specie and legal tenders, together with the percentage of specie and legal tenders to individual deposits, all deposits, and to loans and discounts of national banks, as shown by their returns for each call from February, 1903; to August, 1913.

[Amounts in millions of dollars.]

Aggregate deposits include: Due to other national banks, due to State banks and bankers, due to trust companies and savings banks, due to approved reserve agents, dividends unpaid, individual deposits, United States deposits, postal savings deposits, deposits of United States disbursing officers.

# 416

#### BONDED DEBT OF THE UNITED STATES AND NATIONAL-BANK HOLDINGS.

At the close of the year ended October 31, 1913, the bonded debt of the United States available as security for national-bank circulation was as follows: Consols of 1930 (twos) \$646,250,150, loan of 1908 (threes) \$63,945,460, loan of 1925 (fours) \$118,489,900, Panama Canal loans of 1906 and 1908 (twos) \$84,631,980. The bonds unavailable as security for circulation are the Panama Canal loan (threes) issued to the amount of \$50,000,000 and postal savings bond (two-and-a-halfs), of which five series have been issued aggregating \$3,506,000. Of the bonds available as security for circulation, there are on deposit \$743,513,990. In addition to the bonds deposited as security for circulation the Treasury holds like securities to the amount of \$23,604,100 as security for public deposits. As the Treasury holds in the aggregate \$113,218,833 in bonds of various classes and commercial paper as security for public deposits, it appears that \$89,614,733 is the amount of securities held in addition to United States bonds. The latest returns show that the national banks' investments in United States bonds represent 80 per cent of the bonded debt of the United States.

The Government bonded debt in detail, together with the amount and kinds of Government bonds on deposit to secure circulation and Government deposits, the issues of postal savings bonds, and various other bonds, etc., held as security for public deposits, are shown in the following table:

Interest-bearing bonded debt of the United States and bonds	on deposi	t to secure national-
bank circulation and Government deposits,	Oct. 31,	<i>1913</i> .

Class.	Bonded debt.	Bonds on deposit to secure circulation.	Bonds on deposit to secure Government deposits.

Total	966, 823, 490	743, 513, 990	113, 218, 833

DEPOSITS AND WITHDRAWALS OF BONDS DURING THE YEAR.

The aggregate amount of bonds received for deposit as security for circulation, exclusive of deposits in substitution for a like amount withdrawn, was \$40,241,510, of which \$2,748,840 was deposited by banks chartered in the year and \$37,492,670 by other banks for the purpose of increasing their circulation. Bonds to the amount of \$20,-767,990 were withdrawn by banks upon the deposit of lawful money

16726°—FI 1913—27

for the purpose of retiring a corresponding amount of circulation. The withdrawal of bonds by reason of liquidations amounted to \$6,104,330, and of the bonds on deposit by insolvent banks \$120,000 were withdrawn and disposed of as provided by law, thus making the total withdrawals \$26,992,320, or an excess of deposit over withdrawal of bonds of \$13,249,190.

The transactions during each month of the year are shown in the accompanying table:

Statement relative to the amount of United States bonds deposited as security for circulation by banks chartered and by those increasing their circulation, together with amount of bonds withdrawn by banks reducing circulation and by those closed, during each month ended Oct. 31, 1913.

Date.	Bonds de- posited by hanks chartered during the year.	Bonds de- posited by banks increasing circulation.	Bonds withdrawn by banks reducing circulation.	Bonds withdrawn by banks in liquida- tion.	Bonds with- drawn, banks in insol- vency.

EARNINGS AND DIVIDENDS OF NATIONAL BANKS.

To the shareholders of national banks from a dividend standpoint the year ended June 30, 1913, was quite satisfactory, as from net earnings totaling \$160,980,084 dividends were paid to the amount of \$119,906,050, or at the rate of 11.4 per cent, as against an average rate of 11.01 per cent for the prior five years, and only twenty-six hundredths of 1 per cent less than the average for 1912. The net earnings exceeded those for 1912 by \$11,923,481, although the amount of dividends paid was less by \$394,822. Dividends based on capital and surplus averaged 6.75 per cent for the year, while the net earnings to capital and surplus were 9.06 per cent.

On capital of \$1,051,720,675 and on capital and surplus combined of \$1,776,992,857, the banks' gross earnings were \$499,252,336, against which losses and premiums were written off to the amount of \$53,756,372, together with expenses and taxes of \$284,515,880. Upon comparison with corresponding returns for 1912 it is seen that the gross earnings, based on capital and surplus, have increased a fraction in excess of 2 per cent, and the net earnings approximately one-half of 1 per cent.

In the accompanying table will be found data relating to the amount and per cent of dividends paid by national banks in each geographical division, together with the amount of capital and surplus of banks reporting their earnings, and the relative proportion of surplus to capital. As will be noted, the highest dividend rate (15.08 per cent) was paid by the banks in the western division, and that the lowest, exclusive of Hawaii, was paid by banks in the New England States, viz, 8.61 per cent. The surplus of the banks approximated 70 per cent of their capital, ranging in continental divisions from the minimum of 47.77 per cent in the western division to the maximum of 103.61 per cent in the eastern.

The table in question follows:

Capital,	surplus,	amount	and p	er cent	of	divider	ıds pa	id by	national	banks	in	each
• •		geographi	cal div	ision fo	$r^{t}$	he year	enđed	Juñe	, <i>1913</i> .

Following the abstracts of reports of earnings and dividends of national banks for the current year, appearing in the appendix is a condensed statement relating to the capital, surplus, and earnings and dividends for each year from 1869 to 1913, inclusive, together with the amount of aggregate earnings and dividends for the 44 years, from which it will be noted that upon the average capital and surplus of \$633,132,322 and \$265,033,657, respectively, the annual earnings averaged \$76,664,139 and the dividends \$58,568,695. The percentage of earnings to capital and surplus was 8.65, dividends, 6.52, and dividends to capital alone, 9.25. The entire net earnings as reported were \$3,417,222,128 and the dividends \$2,577,022,602, the latter amount being equivalent to 245 per cent of the capital as reported on June 30, 1913.

#### NATIONAL-BANK SHAREHOLDERS.

The number of national banks, the amount of capital, the number of shareholders and the average number of shares owned by each shareholder on July 7, 1913, are shown in the following table. A very few National banks converted from State banks have shares of stock of a par value of less or more than \$100, but in preparing this table all shares of stock are regarded as having a par value of \$100; that is, a shareholder owning two shares of stock in a national bank, the par value being \$50, is assumed to be the owner of one share of the par value of \$100.

It will be observed that the average number of shares held by each shareholder is greater in the Western States than in the Eastern and greater in the reserve cities than in the country banks, the lowest average being in the State of Delaware, where it is 8.6 and the highest average in the city of St. Paul, where it is 164.3.

The average number of shares owned by each shareholder in New York City is 63.4, and in Chicago is 112.7. The total number of shareholders is 432,920 and the average holding 24.4 shares.

Number of national banks, capital, number of shareholders, and average number of shares owned by each shareholder in the various States and reserve cities on July 7, 1913.

#### NATIONAL BANK NOTES IN CIRCULATION.

Monthly statements issued by the Treasury Department relating to the volume of national-bank circulation outstanding include not only the issues to active national banks on the security of Government bonds, but also the amount outstanding for which lawful money has been deposited to provide for its redemption by banks closed either by voluntary liquidation or insolvency, and banks that have deposited lawful money for the retirement of a portion of their cir-

culation and withdrawn the corresponding amount of bonds. The amount so reported is necessarily materially in excess of the amount shown in the periodical returns from the national banks, and as a matter of fact the latter is less than the amount which they are entitled to issue as security on bonds deposited by reason of the fact that an appreciable percentage of the notes received from the department by the banks is not paid out. Notes so retained do not appear as a liability of the banks, and to the extent held reduce the tax on circulation to which they are liable under law. In the bank reports for August last bonds on deposit as security for circulation were listed to the amount of \$735,589,370, of which \$11,130,021 were held in bank, leaving \$724,459,849 as the amount outstanding.

In the appendix to the Report of the Comptroller of the Currency appears a table relating to the reported capital, aggregate assets, circulation outstanding at date of each return made by the banks from 1863 to 1913, together with the stock of money in the United States on or about June 30 of each year, these figures being supplemented by computations with respect to the percentage of circulation to capital, assets, and money in the United States. The low point with respect to the percentage of circulation to capital since 1888, when it averaged about 25 per cent, was reached in 1891, in the midsummer of that year standing at 18.4. There was a gradual rise from this low point to. approximately 33 per cent just prior to the passage of the act of 1900 authorizing the issue of circulation to the par value of bonds deposited and reducing the tax on notes secured by bonds bearing interest at the rate of 2 per cent. The act in question stimulated investments in Government bonds and the circulation outstanding gradually increased until at the present time it approximates 70 per cent of the amount issuable, the latter being limited to the paid-in capital stock of the banks on security of the corresponding amount of United States bonds.

The issue of currency by national banks located in the reserve cities and elsewhere, as shown by the periodical returns made during the current year, is shown in the following table:

Date.	New York.	New York, Chicago, and St. Louis.	Other reserve cities.	All reserve cities.	Country.	Total.

#### CAPITAL STOCK, BONDS, AND CIRCULATION.

At the close of the report year, October 31, 1913, there were in existence 7,514 national banks with authorized capital of \$1,068,-534,175; bonds on deposit as security for circulation, \$743,513,990; circulation issued to the banks secured by bonds, \$740,063,776. In addition to circulation issued on security of bonds, there is outstanding

\$18,835,933 secured by deposits of lawful money by banks that have been liquidated or failed and by banks reducing their circulation, hence the total national-bank circulation outstanding is \$758,899,709. As will be noted from the table following, there was a net increase during the year of 88 in the number of reporting banks, \$15,478,750 in the amount of paid-in capital stock, of \$12,147,310 in bonds on deposit to secure circulation, of \$11,548,491 in circulation secured by bonds, and \$8,713,933 in the total amount of circulation outstanding.

In the following table information appears relating to the number of banks, their capital, bonds on deposit, circulation outstanding secured by bonds and by lawful money, together with the average price of 2-per cent consols of 1930 at the end of each month from November, 1912, to October, 1913.

Capital, bonds on deposit to secure circulation, circulation outstanding.

<sup>1</sup> Includes \$74,339 gold bank notes.

# CIRCULATION ISSUED, REDEEMED, AND OUTSTANDING.

Subsequent to the resumption of specie payments no circulating notes were authorized to be issued by banks of less denominations than \$5, although prior thereto \$1 notes to the amount of \$23,169,677 and \$2 notes to the amount of \$15,495,038 had been issued. Of these two denominations, however, all have been redeemed with the exception of \$343,587 of \$1 notes and \$164,312 of \$2 notes. All notes issued since 1879 were of the denominations of \$5, \$10, \$20, \$50, \$100, \$500, and \$1,000, but no \$500 notes have been issued since 1885 and no \$1,000 notes since 1884. The total amount of \$500 notes issued was \$11,947,000, of which \$87,000 has not been returned for redemption. The issue of \$1,000 notes was \$7,379,000, and of this denomination 23 of the notes are still outstanding. The total amount of all denominations issued from 1863 to 1913 was \$6,385,-153,375 and the redemptions \$5,624,828,976. During the current year the amount of currency issued to newly organized banks, to those increasing their issues, and on account of redemptions was \$462,578,550.

At the close of the year ended October 31, 1912, national-bank currency in the vaults of this office amounted to \$539,164,590 and

during the current year \$522,031,400 was received from the Bureau of Engraving and Printing. In addition to the \$462,578,550 issued to banks during the year, notes of liquidating and insolvent banks to the amount of \$17,831,330 were withdrawn from the vaults and canceled, leaving the vault balance October 31, 1913, \$580,786,110, which is approximately \$50,000,000 in excess of the amount required to be maintained under the act of May 30, 1908.

While the legislation of 1900 and the general progress of the country since that date resulted in the increase in the number of reporting national banks from 3,631 to 7,488, and their capital stock from \$617,051,000 to \$1,056,000,000, there was a more notable increase in the volume of national-bank circulation. On March 14, 1900, the outstanding circulation secured by bonds was \$216,022,075 and the amount secured by deposit of lawful money \$38,044,155, making the aggregate \$254,026,230. At the close of the current report year the outstanding issues secured by bonds amounted to \$740,063,880, secured by deposits of lawful money \$18,761,594, or a total, exclusive of gold bank notes to the amount of \$74,339, of \$758,825,474.

In the following table is shown the amount of circulation of each denomination outstanding on March 14, 1900, and October 31, 1913:

Denominations.	Mar. 14, 1900.	Oct. 31, 1913.

<sup>1</sup> Exclusive of \$74,339 gold bank notes.

#### NATIONAL-BANK REDEMPTION AGENCY RECEIPTS AND REDEMPTIONS.

While the law does not exempt a national bank from the redemption of its own notes when presented at the counter, by reason of the legislation contained in the act of June 20, 1874, requiring every bank to maintain a redemption fund equal to 5 per cent of its outstanding issues with the Treasurer of the United States, practically all national-bank circulation is redeemed at the Treasury Department through the National Bank Redemption Agency.

By reason of the nonavailability of national-bank notes as reserve a material proportion of receipts at the National Bank Redemption Agency is in nearly as good condition as when originally placed in circulation. Under the law notes in that condition, while redeemed by being charged to the issuing bank's redemption fund, are immediately returned to the bank of issue, and only notes worn and mutilated are delivered to the Comptroller of the Currency for destruction and subsequent issue of a corresponding amount of new notes. In the year ended October 31 last the receipts of the national-bank redemption agency aggregated \$683,431,000, the monthly average being \$56,952,583 and the average for each secular day \$2,183,500. Of the total receipts, notes to the amount of \$218,275,150 were fit for circulation and return to the banks of issue, leaving \$465,155,850 as the amount turned over to the Comptroller of the Currency for destruction.

Of the total receipts for redemption \$578,759,400 were received from eight of the principal cities of the country, the amount received from New York alone being nearly one-half of the total receipts.

The law provides that the expenses incident to the redemption of national-bank notes shall be borne by the issuing banks, and the expense for the current year is shown to have been \$517,842.93, an average cost per \$1,000 of \$0.773.

In the following statement is shown the volume of redemptions per month from November, 1912, to October, 1913:

# EXPENSES OF BANKS INCIDENT TO THE ISSUE OF CIRCULATION AND EXPENSES OF THE CURRENCY BUREAU.

Expenses of national banks in connection with the issue of circulation during the year ended June 30, 1913, were \$4,377,945.22, of which the semiannual tax on circulation was \$3,804,762.29, cost of redemption of notes \$517,842.93, plates for new banks and those extending their charters and duplicates of original plates \$55,340. (Assessments for the examination of national banks during the year were paid to the amount of \$556,210.) By reason of the fact that collections of the corporation tax from national banks are not separated from the tax paid by State banks and other financial institutions, it is impossible to state with exactitude the amount paid by national banks, but, based on the reported net earnings, the tax paid is estimated for the calendar year 1912 at \$1,283,000. Assuming the

approximate correctness of this estimate, the taxes paid to the Government by national banks during the past year were \$5,087,762.29.

Expenses of the Currency Bureau for the year ended June 30 last for special dies, plates, printing, etc., and for salaries, excluding salaries reimbursed by national banks, were \$692,192.64. Expenses of the bureau from the date of organization in 1863, excluding contingent expenses not paid by the comptroller but from the general appropriation for contingent expenses of the Treasury Department, no separate account of which is kept, totaled \$14,736,080.97.

Taxes paid by national banks to the United States on capital and deposits to July 1, 1883, on capital and surplus under act of 1898, and on circulation to June 30, 1913, amounted to \$198,188,278.69. Adding to this amount the estimated amount of collections under the corporation-tax act for the years 1909 to 1912, inclusive, estimated at \$4,951,000, it appears that the total taxes paid to the Government by national banks aggregate \$203,139,278.69.

Tables showing in detail the taxes paid by national banks under each tax act will be found in the appendix to the Report of the Comptroller of the Currency.

# PROFIT ON NATIONAL-BANK CIRCULATION.

By reason of the depreciation in the market price of Government bonds the profit on the issue of national-bank circulation was materially greater at the close than at the beginning of the current year. In the computation of profit made by the actuary of the department money is assumed to be worth 6 per cent, hence the gross receipts include the interest on the bonds and interest at 6 per cent on circulation issued on the security of the bonds. From the gross receipts are deducted taxes, expenses, and the amount necessary to be set aside to create a sinking fund to offset the premiums paid for the bonds, to determine the net receipts, and from the latter amount is deducted interest at the rate of 6 per cent on the cost of the bonds, which indicates the measure of profit on the issue of circulation in excess of interest on the bond cost at 6 per cent. In November, 1912, the net price of 2 per cent consols of 1930 was \$101.22, and the profit on circulation 1.308 per cent. In October, 1913, the price of these bonds was \$96.635 and the profit on circulation 1.821 per cent. Panama Canal bonds of 1916-1936 in November, 1912, were priced at \$101.201, and the profit on circulation secured by these bonds, 1.326 per cent. In October, 1913, the price of these bonds was \$96.606 and the profit on circulation 1.772 per cent. The 4 per cent bonds of 1925 were priced at 114 in November, 1912, and the profit on circulation was at the rate of 1.154. In October, 1913, the price was 109.877 and the percentage of profit on circulation 1.575.

In the appendix to the Report of the Comptroller of the Currency will be found the actuary's computations of the profit on circulation based on a deposit of \$100,000 consols of 1930, bonds of 1925, and Panama Canal bonds of 1916–1936 at the average net price monthly for bonds during the year ended October 31, 1913.

#### ORGANIZATION OF NATIONAL BANKS.

Within the year ended October 31, 1913, 243 applications for authority to organize national banks were received, of which 190 were approved, 4 rejected, and the remainder either abandoned or held pending the submission of further information.

Of the 10,457 banks chartered during the existence of the national banking system, 172, with authorized capital of \$10,175,000, were chartered during the current year. There are in existence, of the total number chartered, 7,514 banks, 2,437 having been placed in voluntary liquidation and 506 in the charge of receivers. State banks to the number of 1,729, with capital at date of change of \$339,955,928, were converted into national banks from 1863 to 1913.

In addition to the capital of banks organized during the year, there was an increase in capital of banks organized prior thereto of \$20,260,000, making the gross increase for the year \$30,435,000, but by reason of reductions of capital, voluntary liquidations, and failures the net increase was but \$14,838,740, the authorized capital stock of all banks at the close of the year standing at \$1,068,534,175.

Since March 14, 1900, charters have been granted to 5,193 associations, with authorized capital of \$330,938,300, of which 3,304, with aggregate capital of \$86,110,500, were organized under the act of that date with individual capital of \$25,000 generally, although a limited number of banks were organized with capital in excess of \$25,000 but less than \$50,000. The average capital, however, of banks of this class was slightly in excess of \$26,000. During the same period 1,889 were organized under the act of 1864, the aggregate capitalization being \$244,827,800 and the individual capital \$50,000 or over. Further classifying these banks, it appears that 810 were conversions of State banks, capital \$60,735,800; 1,568 reorganizations of State or private banks, capital \$109,892,000; and 2,815, with capital of \$160,310,500 primary organizations.

In the following table will be found a classification of banks organized from March 14, 1900, to October 31, 1913, based upon capital stock, together with the number of banks and their reported capital on August 9, 1913, by States and geographical divisions.

Summary, by States, geographical divisions, and classes, of national banks organized from Mar. 14, 1900, to Oct. 31, 1913, and the paid-in capital stock of all reporting national banks on Aug. 9, 1913.

#### EXTENSIONS AND EXPIRATIONS OF CHARTERS.

Charters are granted to national banks for a period of 20 years from the date of the execution of the organization certificate. In the year ended October 31 last 80 banks reached the termination of their existence, and their charters were extended for an additional period of 20 years under authority of the act of July 12, 1882. In the same year charters of 26 banks extended under the act of 1882 were extended for a further period of 20 years under the act of April 12,

# REPORT ON THE FINANCES.

1902. The total number of extensions of charters under the act of 1882 was 3,268 and under the act of 1902, 1,167. In the coming year the charters of 39 banks will expire for the first time and 36 for the second. A list of banks interested in the extensions during the year ending October 31, 1914, will be found in the appendix to the Report of the Comptroller of the Currency.

# CHANGES OF TITLE OF NATIONAL BANKS.

Under the law any national bank, upon authorization by shareholders representing two-thirds of the stock, and with the approval of the Comptroller of the Currency, may change its corporate title. Sixteen changes of this character occurred during the past year, a list of the banks interested being submitted herewith.

# VOLUNTARY LIQUIDATION OF NATIONAL BANKS.

Section 5220 of the Revised Statutes provides that any national bank may be placed in voluntary liquidation by shareholders representing at least two-thirds of the stock. Meetings of shareholders for this purpose are called in conformity with the requirements of the articles of association, at which meeting, in addition to adopting a resolution for the liquidation of the bank, provisions are made either for immediate liquidation of the assets where practicable, settlement with creditors and shareholders, or the appointment of a liquidating agent to settle the affairs of the bank as speedily as possible in the interest of both creditors and shareholders.

The liquidations during the past year numbered 81, the capital involved \$14,571,010. Of these banks 9, with capital of \$3,350,000, were absorbed by other national banks; 17, with capital of \$5,625,000, consolidated with other national banks; 17, with capital of \$2,115,010, were absorbed by State banks and trust companies; 27, with capital of \$1,901,000, liquidated and reorganized as State banks; 3, with capi-

# 430

tal of \$280,000, for the purpose of reorganizing as national banks; 1, with capital of \$50,000, the corporate existence of which expired by limitation, was succeeded by a new national bank; and 2, with capital of \$125,000, the corporate existence of which expired by limitation, were succeeded by State banks. Five banks, with combined capital of \$1,125,000, liquidated for the purpose of discontinuing business.

In the appendix to the Report of the Comptroller of the Currency will be found a list of national banks liquidated from November 1, 1912, to October 31, 1913, showing date of liquidation, capital, circulation issued, and the amount of circulation still outstanding.

# NATIONAL CURRENCY ASSOCIATIONS ORGANIZED.

Notwithstanding the fact that the act of May 30, 1908, relating in part to the establishment of national currency associations, will expire by limitation on June 30, 1914, two associations were formed in the past year, viz, the National Currency Association of Louisville, with 15 bank members, the capital and surplus being \$6,795,000 and \$3,178,000, respectively; and the National Currency Association of San Francisco, with 10 members, capital of \$28,500,000 and surplus of \$16,670,000. Up to the close of the report year there had been formed 20 associations, representing 339 banks, \$365,084,710 capital, and \$311,300,510 surplus.

While the number of banks forming these associations is but  $4\frac{1}{2}$  per cent of the number reporting on August 9, their capital represents nearly 35 per cent of the capital of all banks.

While, as stated elsewhere, the comptroller's vaults contain the stock of bank notes required by the act of 1908, no notes have been issued on security other than United States bonds.

The title, membership, capital, and surplus of each association are shown in the following table:

Associations.	Number of banks.	Capital.	Surplus.
National Currency Association of Washington, D. C	12 33 27 10 13 28 28 20 10 10 10 10 10 10 10 10 10 10 10 10 10	\$6,602,000 117,052,000 20,975,000 6,100,000 26,700,000 8,195,000 42,900,000 19,510,000 13,050,000 6,525,000 11,840,710 17,630,000 4,260,000 5,700,000 4,650,000 6,925,000 6,925,000	\$5,067,000 129,025,000 37,740,000 19,450,000 6,651,000 26,400,000 9,095,000 11,065,000 3,490,000 3,960,000 8,020,010 9,004,000 9,004,000 3,652,500 5,055,000 3,178,000 16,670,000

#### CLEARING-HOUSE EXCHANGES.

Through the courtesy of the manager of the New York Clearing House Association statistics and general information have been secured relating to the transactions of 162 clearing houses of the country for the year ending September 30, 1913. The volume of exchanges cleared created a new record, and reached \$173,765,288,000, an increase of \$5,564,362,000 over the prior year. Of the aggregate, the New York association cleared \$98,121,520,000, or nearly 56½ per cent of the total. In only three years of its existence have the clearings in New York exceeded this sum, viz, in 1906, when they amounted to \$103,754,900,000, in 1909 to \$99,257,662,000, and in 1910 to \$102,553,959,000.

Second to New York in 1913 was Chicago, with clearings of \$16,018,176,000; Philadelphia and Boston following with \$8,543,472,000 and \$8,326,228,000, respectively. St. Louis cleared \$4,122,115,000. In Baltimore, San Francisco, Kansas City, and Pittsburgh the clearings were less than three billions of dollars, ranging from \$2,011,447,000 in Baltimore to \$2,951,861,000 in Pittsburgh. In the cities clearing over one billion and less than two billion are Cincinnati, Minneapolis, Cleveland, New Orleans, Detroit, and Los Angeles. The transactions of all other houses range downward from approximately \$895,000,000.

With the exception of Boston, Cincinnati, and New Orleans the associations clearing over one billion show a larger volume of transactions during the prior year.

Sixty-four banks, with capital of \$179,900,000, compose the New York Clearing House Association, a reduction for the year of one member, but an increase in capital of \$5,625,000. In the New York association are 31 national banks, 17 State banks, and 15 trust companies. There are 25 banks and trust companies in the city and vicinity not members of the association which make their exchanges through banks which are members, in accordance with constitutional provisions.

The clearings for the year for the New York association required the payment of balances in cash to the amount of \$5,144,130,385, or 5.24 per cent of the total transactions, gold being used to the extent of 52 per cent and other currency to the extent of 48 per cent. The average daily clearings amounted to \$323,833,400, and the balances to \$16,977,328. This association has been in existence 60 years, and during that period its transactions aggregated \$2,419,273,696,082; balances paid, \$112,668,492,956; average daily clearings, \$131,948,388; balances, \$6,144,996. The average balance to clearings during the life of the New York association was 4.65 per cent.

In the year ended September 30 last the clearing house transactions of the Assistant Treasurer of the United States at New York were as follows: Exchanges received from the clearing houses, \$679,617,548.61; exchanges delivered to the clearing houses, \$746,383,010.84. The balances received from and paid to the clearing houses were \$139,021,273.95 and \$72,255,811.72, respectively, or an excess of credit balances of \$66,765,462.23.

The volume of transactions of each of the 15 associations of the country with clearings in excess of \$1,000,000,000, and the aggregate

clearings of all other associations for the last two years are shown in the following table:

#### RATES FOR MONEY.

Through the courtesy of the William B. Dana Co. information has been obtained in relation to the range and average rates for money in the New York market monthly from November, 1912, to October, 1913. The range and average monthly rates on call loans, as well as the range for time loans and commercial paper, were materially higher than during the corresponding prior 12 months, as will be noted by reference to the table following and corresponding data appearing in the comptroller's report of 1912.

The report in question follows:

Range and average rates for money in the New York market, year ended Oct. 31, 1913.

Character of loans.	19	912	1913				
	November.	December.	January.	February.	March.	April.

REPORTS OF CONDITION OF BANKS IN THE UNITED STATES.

The Comptroller of the Currency is required, under the provisions of section 333 of the Revised Statutes of the United States, to incorporate in his annual report to Congress a statement exhibiting under appropriate heads the resources and liabilities and condition of the banks, banking companies, and savings banks organized under the laws of the several States and Territories, the statute providing that the information shall be obtained from reports made to legislatures or officers of the different States and Territories or from such authentic sources as may be available.

Beginning with 1909, the annual statements received from banks outside of the national system have conformed in general as to details of assets and liabilities with the reports made by the national banks. Individual statements for a date concurrent with the June call on national banks, beginning with that year, have been furnished by State and private banks through the courtesy and assistance of the State bank superintendents. Prior to 1909 statements for State banks were furnished to the comptroller for varying dates and without uniformity in the form of the reports, many valuable details, such as classification of cash, bonds, and deposits, being wanting.

The statements used in this compilation are of date June 4, 1913, with the exception of State banks for Pennsylvania, May 1; Alabama, June 9; Tennessee, June 30; Iowa, June 28; and the island possessions, June 30.

Abstracts of reports of condition for each class of banks, arranged by States, will be found in the appendix to the Report of the Comptroller of the Currency. The summary referred to follows.

Summary of reports of condition from 25,993 banks in the United States and island possessions (including national, State, savings, and private banks and loan and trust companies), showing their condition at the close of business June 4, 1913.

The foregoing summary of reports shows resources aggregating \$25,712,163,599. Loans and discounts aggregated \$14,626,772,664; bonds, securities, etc., \$5,407,219,379; cash in bank, \$1,560,709,447; capital, \$2,096,849,861; surplus, \$1,676,625,895; undivided profits, \$573,213,465; individual deposits, \$17,475,764,134. The banks reported postal savings deposits aggregating \$25,242,015; and the United States deposits, including disbursing officers' accounts, reported by national banks were \$49,725,039.

While there has been a marked increase in capital stock during the year, the increase being 4 per cent, against 3 per cent shown for the prior year, the statistics indicate that the volume of business has increased in much less proportion, resources showing an increase of 2.9 per cent against 6 per cent, and deposits 2.6 per cent against 7 per cent. During the year there has been a reduction of over \$12,200,000 in the cash holdings of the banks.

The increase or decrease during the year is shown in the following table exhibiting loans, aggregate resources, capital, deposits, etc., of national and other reporting banks on June 4, 1913, and on June 14, 1912.

		1913	1912.	Increase, 1913 over 1912 (798 banks).

1 Includes mortgages owned.

The foregoing statistics show that the aggregate resources of the banks have increased from \$21,095,054,420 in 1909, to \$25,712,163,599 for the present year; a gain of \$4,617,109,179, or about 22 per cent. The increase in aggregate bank resources during the past year has been \$725,520,825, or 2.90 per cent. The statistics for 1912 showed an increase in resources over the prior year, in round amounts, of \$1,355,000,000; in 1911 the increase was \$1,181,000,000; in 1910, \$1,355,000,000; in 1909, \$1,512,000,000. Individual deposits since 1909 have increased from \$14,035,523,165 to \$17,475,764,134, a gain

of \$3,440,240,969, or 24 per cent. The increase in deposits during the past year has been \$451,696,528, or 2.65 per cent.

For the purpose of comparison the number of reporting banks, aggregate loans, resources, capital and deposits for the fiscal years 1907 to 1913, inclusive, are shown in the following table:

Year.	Num- ber of banks.	Loans.	Resources.	Capital.	Individual deposits.
1907.	19, 746	\$10,763.9	\$19, 645. 0	\$1,690.8	\$13,099.6
1908.	21, 346	10,437.9	19, 583. 4	1,757.1	12,784.5

[In millions of dollars.]

# THE GROWTH OF BANKING IN THE UNITED STATES.

The first bank of any importance ever organized in this country was the Bank of North America, organized in Philadelphia with a capital of \$400,000, which was chartered by Congress December 31, 1781. This bank operated under a national charter for a few years only and then became a State bank by obtaining a charter from the Commonwealth of Pennsylvania. In 1791 the Bank of the United States was incorporated by Congress for a period of 20 years with a capital of \$10,000,000. The charter of this bank expired in 1811. A statement of its condition for January, 1809, and January, 1811, follows:

Resources and liabilities of the first Bank of the United States.

# COMPTROLLER OF THE CURRENCY.

In 1816 the second Bank of the United States was chartered by Congress for a period of 20 years. This bank began operations in the midst of the panic of 1817. Its charter was not renewed by Congress, but a reorganization was effected by means of the authority of the Legislature of the State of Pennsylvania. In 1841 the bank assigned, but its affairs were not finally liquidated until 1856. Liabilities to depositors and note holders were paid in full with interest; the shareholders, however, received nothing on their investment in the stock. The following is a statement of the principal items of resources and liabilities for 1817, five-year periods to 1837, for 1839, and 1840:

Resources	ana	iraorirtres,	secona	Bank of	the	United States,

Information relating to banking in the earliest days of the country is very meager, but some interesting data gathered from reliable sources are published in the annual reports of the Comptroller of the Currency. In the appendix to his report is a table which gives the number of colonial and State banks, together with the principal items of resources and liabilities, in the United States, from 1784 to 1833. In 1784 the 3 banks from which reports have been compiled had capital of about \$2,100,000, circulation \$2,000,000, and specie \$10,000,000. In 1800 reports from 28 banks showed capital of \$21,300,000, circulation \$10,500,000, and specie \$17,500,000. In 1820 there were 307 banks with capital of \$102,100,000, circulation \$40,600,000, deposits \$31,200,000, and specie \$16,700,000. In 1830, 329 banks had \$110,100,000 capital, \$48,400,000 circulation, \$39,-500,000 deposits, \$14,500,000 specie, and \$159,800,000 in loans.

A statement of the resources and liabilities of the banks of the country in detail, from 1834 to 1863, will also be found in the appendix. From the table in question it appears that in 1834 there were 506 State banks in operation in the country with capital of \$200,-000,000, circulation \$94,800,000, and deposits \$75,600,000. In 1840 the number of State banks had increased to 901 with capital of \$358,400,000, circulation \$106,900,000, and deposits \$75,600,000. In 1850 reports show only 824 banks with capital of \$217,300,000, circulation \$131,300,000, and deposits \$109,500,000. In 1862, the year prior to the inauguration of the national banking system, there appears to have been 1,492 banks in operation, the capital of these banks being \$418,100,000, circulation \$183,700,000, and deposits \$296,300,000; the loans aggregated \$646,600,000, investments in stocks \$99,000,000, specie funds \$27,800,000, and notes of other banks \$25,200,000.

#### REPORT ON THE FINANCES.

While banking statistics for years prior to 1863 are more or less incomplete and the data relating to State banks between 1863 and 1873 not official, a statement showing the growth of banking since the establishment of the Government, with respect to the number of banks, capital, circulation, and deposits, will be of interest. The following statement shows the number of banks, their capital, circulation, and deposits from 1784 to 1860 (for years showing the most complete data), and for five-year periods from 1863 to 1913:

Number of banks, their capital, circulation, and deposits, 1784, 1794, 1804, 1815, 1820 to 1860 (10-year periods), 1863 to 1918 (5-year periods).

[Amounts in millions of dollars.]

<sup>1</sup> Includes State bank circulation.
 <sup>2</sup> Includes deposits of United States disbursing officers.

Note.—Since 1873 the Comptroller of the Currency has collected and published statistics of State banks but complete data for compiling these statistics for a number of years thereafter were available only for those States in which the banks were required to report to some State official. For recent years the sta-tistics are practically complete.

#### GROWTH OF BANKING IN RECENT YEARS.

The table following shows the growth of banks in the United States, including the island possessions, as indicated by the number of banks, capital stock, and individual deposits for four-year periods from 1900, the number of nonreporting banks, their capital and deposits being estimated from data obtained from reliable sources:

		Capit	al.	Individual deposits.

<sup>1</sup> Exclusive of postal savings deposits.

Since 1900 the number of banks in operation in the country has increased by over 109 per cent, and their volume of business, as indicated by their deposits, shows an increase of over 133 per cent. In 1900 the total number of banks in operation (data for nonreporting banks being estimated) was stated at 13,977, with capital of \$1,150,728,675, individual deposits \$7,688,986,450. The nonreporting banks in 1900 were estimated at 3,595, in 1904 at 3,994, in 1908 at 3,654, in 1912 at 3,800, and in 1913 at 3,261.

For the current year (again estimating nonreporting banks) the number has increased to 29,254, with aggregate capital of \$2,161,-849,861 and individual deposits of \$17,935,764,134. In 1900 the capital of the 3,732 national banks was 54 per cent of the capital of all reporting banks and their individual deposits were about 32 per cent of the total. In June, 1913, the capital of 7,473 national banks was only 48.89 per cent of that of all banks, but their individual de-

# REPORT ON THE FINANCES.

posits had increased to 33.2 per cent. In 1900 the capital stock of national banks in round amounts aggregated \$621,000,000, and of all other banks \$529,000,000. For the current year the capital stock of national banks aggregates \$1,056,900,000, and that of all other reporting and nonreporting banks \$1,104,900,000. The figures show that national banks during the last 13 years have increased their capital by 70 per cent, while that of all other banks increased their volume of business, as measured by individual deposits, by a much larger percentage than did the other banks, the gain during this period being 142 per cent for nationals and 129 per cent for other banks.

# BANKING POWER OF THE UNITED STATES.

The banking power of the United States in 1913, as represented by capital, surplus and other profits, deposits and circulation of national and other reporting banks, together with the estimated amount of funds of this character in nonreporting banks, is \$23,181,545,433, against \$22,548,706,835 in 1912. The increase for the year was \$632,838,598, or 2.8 per cent, or about one-half of the percentage of increase in 1912 over 1911, when it was stated at 5.69 per cent. Since 1900, when it was reported at \$10,685,000,000, the banking power has increased over 117 per cent. The details are set forth in the following table:

	Num- ber.	Capital.	Surplus and profits.	Deposits.	Circulation.	Total.
National banks State, etc., banks Nonreporting banks	7,473 18,520 3,261		1,261,091,605	<sup>12</sup> \$6,021,848,465 <sup>3</sup> 11,528,882,723 460,000,000		\$8, 789, 641, 036 13, 829, 904, 397 562, 000, 000

Condensed statement of resources and liabilities of all reporting banks of the United States on June 4, 1913-Continued.

<sup>1</sup> Other liabilities include: National-bank circulation, \$722,125,024; dividends unpaid, \$3,590,839.76; bills payable, \$157,401,457.90; notes and bills rediscounted, \$28,617,628.20; and miscellaneous, \$318,777,158.61. Digitized for FRASER

http://fraser.stlouisfed.org/

Federal Reserve Bank of St. Louis

REPORT NO THE FINANCES.

In the foregoing table is shown the distribution of banks among the geographical sections in the following order: 8,696 in the Middle Western States, 6,341 in the Southern States, 5,112 in the Western States, 2,921 in the Eastern States, 1,812 in the Pacific States, 1,081 in the New England States, and 30 in the island possessions. From the Middle Western States 313 more banks reported than in 1912, from the Southern States 272 more, from the Western States 109, from the Pacific States 91, and from the Eastern States 20. A decrease of 2 banks is shown in the number reporting from the New England States and of 5 from the island possessions. Comparing the aggregate resources of the banks in the several sections, the Eastern States are first with \$10,425,000,000, Middle Western States second with \$6,438,000,000, the New England States third with \$3,158,000,-000, the Southern States fourth with \$2,520,000,000, the Pacific States fifth with \$1,823,000,000, and the Western States sixth with \$1,281,-000,000, the resources of the island possessions being reported at \$65,000,000. The increase in bank resources during the year was most marked in the Middle Western States, amounting to \$287,000,-000, or 4.7 per cent. The increase in the Southern States was \$184,-000,000, or 7.9 per cent; in the Western States, \$101,000,000, or 8.7 per cent; in the Pacific States, \$96,000,000, or 5.6 per cent; in the New England States, \$81,000,000, or 2.6 per cent; while in the Eastern States there was a decrease of \$16,000,000 and in the island possessions, \$10,000,000. The large decrease indicated in the island possessions is chiefly due to the fact that returns from the Hawaiian Islands are incomplete.

# CLASSIFICATION OF LOANS AND DISCOUNTS IN ALL BANKS.

Loans and discounts in the banks of the United States, as shown by reports of condition for 1913, aggregate roundly \$14,626,700,000. Of this amount \$6,162,000,000 is in national banks and \$8,464,700,000 in banks other than national. Of the total loans the sum of \$3,547,-700,000 is reported as secured by real estate; \$4,512,700,000 by collateral other than real estate; \$6,507,800,000 are unclassified loans, and \$58,500,000 overdrafts.

The classification of loans of banks other than national and of national banks compiled from reports of condition as of June 4, 1913, is set forth in the following table:

Classification.	Number of banks.	Secured by real estate (includ- ing mort- gages owned).	Secured by col- lateral other than real estate.	All other loans.	Over- drafts.	Total.
State banks Mutual savings banks Stock savings banks. Loan and trust companies Private banks	1,355	Millions. \$555.6 1,815.6 488.2 576.3 35.2	Millions. \$692.1 149.5 113.5 1,374.3 14.9	Millions. \$1,467.4 73.8 184.0 813.0 71.8	Millions. \$31.5 1.9 3.7 2.4	Millions. \$2,746.7 2,038.9 787.5 2,767.3 124.3
Total National banks	18,520 7,473	3,470.9 76.8	2,344.3 2,168.4	2,610.0 3,897.8	39.5 19.0	8,464.7 6,162.0
Grand total	25,993	3,547.7	4,512.7	6,507.8	58.5	14,626.7

Loans and discounts.

16726°—fi 1913—-29

From the foregoing statement it appears that about 24 per cent of the total loans are secured by real estate or other liens on realty, the proportion of loans secured by real estate for each class of banks being as follows: 89 per cent for mutual savings banks; 62 per cent for stock savings banks; 28 per cent for private banks; 20 per cent for State banks; 21 per cent for loan and trust companies; and slightly less than 14 per cent for national banks.

#### INVESTMENTS OF ALL BANKS IN BONDS AND OTHER SECURITIES.

Investments in bonds, securities, etc., of all banks, as shown by reports of condition for June 4, 1913, aggregated \$5,407,200,000, against \$5,358,900,000 in 1912, the increase being \$48,300,000. The classification by amounts and percentages of investments held in 1912 and 1913 is as follows:

	19:	12	1913	
Classification.	Amount.	Per cent.	Amount.	Per cent.
United States bonds State, county, and municipal bonds Railroad bonds. Bonds of other public-service corporations Other bonds, stocks, and securities	1,273.5 1,631.6	15.4 23.8 30.4 11.3 19.1	Millions. \$825.2 1,240.0 1,530.2 721.3 1,090.5	15.2 22.9 28.3 13.4 20.2
Total	5,358.9	100.0	5,407.2	100.0

From the foregoing table it will be noted that 28.3 per cent of the investments of banks reporting in 1913 is in railroad bonds, against 30.4 per cent in 1912; 13.4 per cent in bonds of other public-service corporations, against 11.3 per cent in 1912; 15.2 per cent in United States bonds, against 15.4 per cent in 1912. The percentage of State, county, and municipal bonds is 22.9 per cent, against 23.8 per cent in 1912; and the unclassified bonds, stocks, and securities is 20.2 per cent, as against 19.1 per cent in 1912.

In the following table is shown the various classes of bonds, stocks, and other securities held by the several classes of banks on June 4, 1913:

Classification of investments in bonds, etc., held by banks of the United States on June 4, 1913. [Expressed in millions.]

Classification.	State banks.	Mutual savings banks.	Stock savings banks.	Private banks.	Loan and trust com- panies.	National banks.	All banks.
United States bonds State, county, and municipal	\$3.3	\$18.1	\$5.1	\$0.3	\$2.8	1 \$795.5	\$825.2
bonds Railroad bonds	89.0 65.5	809.4 796.2	50.7 25.3	1.9 .6	113.5 297.3	$175.3 \\ 345.2$	1,239.9 1,530.2

450

It thus appears that of the \$825,200,000 United States bonds owned by the banks, \$795,500,000 are held by national and \$29,700,000 by all other banks-\$18,100,000 of the latter amount being owned by mutual savings banks. It will also be noted that during the year there has been a net gain of \$1,900,000 in United States bonds held by the banks. The national banks during the year have increased their holdings of United States bonds by \$12,000,000, while there has been a decrease in the holdings of all other banks of \$10,100,000. State banks held \$1,100,000 less United States bonds than in 1912; mutual savings banks \$1,800,000 less; stock savings banks \$4,000,000 less; loan and trust companies, \$3,200,000 less. Of the total investments in bonds, stocks, etc., 35 per cent is held by national banks, 33 per cent by mutual savings banks, and 22 per cent by loan and trust companies, the balance, 10 per cent, being the combined holdings of State banks, stock savings banks, and private banks. Fifty-three per cent of the investments of loan and trust companies consists of railroad and other public-service corporation bonds, and 49 per cent of the bonds held by mutual savings banks are of the same character, as also 41 per cent of the investments of stock savings banks, 33 per cent of State bank investments, 29 per cent of national bank investments, and 21 per cent of private bank investments. Forty-four per cent of the investments of mutual savings banks consists of State, county, and municipal bonds, the proportion of investments in this class of bonds by the other banks being 34 per cent for stock savings banks, 25 per cent for State banks, 9 per cent for loan and trust companies, 9 per cent for national banks, and 19 per cent for private banks.

#### MONEY IN BANKS.

During the current year there has been a decrease of \$12,244,032.38 in the cash holdings of all reporting banks. On June 14, 1912, the cash held by the banks aggregated \$1,572,953,479.43; on June 4, 1913, it was reported at \$1,560,709,447.05. There was a decrease, roundly, of \$27,000,000 in the cash holdings of the national banks, but an increase of \$14,800,000 in the holdings of all other banks. Of the total amount held by the banks on June 4, 1913, \$969,100,000 was in national and \$591,600,000 in other reporting banks. The proportion of cash to individual deposits in national banks was therefore shown to be 16.3 per cent, that for all other commercial banks, 7.4 per cent, and including the mutual savings banks, 5.1 per cent. Owing to the difference in the reserve requirement of national

Owing to the difference in the reserve requirement of national banks and those operating under State laws it is not practicable to make a satisfactory comparable statement of the reserve held by national and by State banks, but it may be of interest to show here the percentage of cash holdings to demand liabilities held by national and by other commercial banks. The national banks held individual deposits subject to check together with demand certificates of deposit on June 4, 1913, aggregating \$4,603,400,000, and the cash held (including legal tender, specie, and bills of other banks) was 21 per cent of this amount. All other commercial banks held cash aggregating \$574,500,000 and their individual deposits subject to check, together with the estimated amount of demand certificates of deposit (which are not separately stated) were \$4,560,000,000, the cash holdings therefore being 12.6 per cent. If the amount due to banks is included with other demand deposits, the percentage of cash holdings for national banks will be 14.4, and for all other commercial banks 11.4.

Coin and other money held by national banks, by other reporting banks, and by all reporting banks, are shown in the following table:

Classification.	7,473 national banks.	18,520 State, etc., banks.	25,993 reporting banks.

<sup>1</sup> Public money in national-bank depositaries to the credit of the Treasurer of the United States not included.

<sup>2</sup> Money in banks of island possessions not included.

The general stock of money in the United States at the close of the fiscal year ended June 30, 1913, was \$3,720,000,000, or \$71,200,000 more than was reported in 1912. Of the total stock of money, \$356,300,000,

#### COMPTROLLER OF THE CURRENCY.

or 9.58 per cent, was in the Treasury as assets, \$1,552,300,000, or 41.73 per cent, in reporting banks in the United States, and \$1,811,-400,000, or 48.69, outside the Treasury and banks; that is, in circulation among the people. The amount reported in circulation, exclusive of coin and other money in the Treasury as assets, is \$3,363,700,000, or \$34.56 per capita, being \$79,200,000 more than the amount reported in 1912.

# INDIVIDUAL DEPOSITS IN ALL BANKS IN THE UNITED STATES.

Individual deposits in all reporting banks on June 14, 1912, aggregated \$17,024,000,000; for the current year these deposits aggregate \$17,475,700,000, being an increase of \$451,700,000, or 2.6 per cent. The percentage of increase in 1912 over 1911 was 7 per cent. Of the aggregate deposits in all reporting banks on June 4 last, national banks held 34.1 per cent; savings banks, 27.1 per cent; loan and trust companies, 20.4 per cent; state banks, 17.6 per cent; and private banks, 0.8 per cent. The following table shows the amount and per cent of individual deposits held by the several classes of banks in 1911, 1912, and 1913:

	191	1	191	1912 1913		3

<sup>1</sup> Decrease.

It will be noted that the highest percentage of increase in deposits during the past year, 10.79, is shown for the Western States. In 1912 the highest percentage of increase was 10.22 for the Pacific States. The percentage of increase in deposits during the current year for the other sections is as follows: Southern States 7.50, Pacific States 5.99, Middle Western States 5.58, New England States 2.78. In the Eastern States there is shown to have been a decrease of 1.35 per cent and also a decrease of 19.62 per cent for the island possessions, partly due to incomplete returns from Hawaii and Porto Rico. The largest volume of increase was in the Middle Western States, or \$228,200,000, followed by the Southern States with \$103,100,000, the Western States with \$84,900,000, the Pacific States with \$71,400,-000, and the New England States \$68,000,000. For the Eastern States a decrease of \$95,600,000 is shown, and for the island possessions a decrease of \$8,300,000.

Since 1909 individual deposits held by the banks have increased 24.51 per cent. The highest percentage of increase for the four years is shown for the Pacific States, the gain in deposits for that section being 40.82 per cent; next in order are the Southern States with an increase of 39.47 per cent, the Middle Western States with 35.03 per cent, the Western States with 24.46 per cent, the New England States with 19.38 per cent, the island possessions with 17.65 per cent, and the Eastern States with 15.73 per cent. In the following table is shown the classification of individual deposits in national banks, in banks other than national, and in all reporting banks on June 4, 1913:

Classification.	7,473 national banks.	18,520 State, etc., banks.	Total, 25,993 banks.
Individual deposits subject to check Savings deposits. Total	5,953,461,551.12	11, 522, 302, 583. 69	17, 475, 764, 134. 81

Classification of individual deposits in national and other banks.

It will be noted that of the \$17,475,700,000 on deposit in all reporting banks, \$6,972,000,000, or nearly 40 per cent, consists of savings deposits, \$2,037,200,000 are certificates of deposits (time and demand), and \$8,240,900,000 are commercial deposits that are subject to check without notice.

#### SAVINGS DEPOSITS IN ALL BANKS.

Savings deposits are supposed to represent chiefly the accumulations of wage earners and other people of moderate means, and by reason of this fact statistics relating to such deposits are of special interest. Savings deposits in all banks of the country increased from \$6,496,-192,707 in June, 1912, to \$6,972,069,227 in June last, the increase during the year being \$475,876,520, or over 7 per cent. The aggregate deposits in all banks on June 4, 1913, roundly stated, were \$17,475,790,000; of this amount \$6,972,000,000, as stated, was savings deposits, exclusive of \$211,445,687 held by savings banks

subject to check without notice. Statistics showing the number of savings depositors in all banks for the current year are not available, but the information obtained upon this subject in 1911 showed that there were on June 7 of that year over 17,600,000 savings accounts on the books of the various banks of the country. For the purpose of comparison the following table is presented relative to the classification of deposits in each class of banks as shown by reports of condition as of June 4, 1913:

Classification.	Number of banks.	po	ndividual de- sits subject to heck without notice.	Savings deposits or deposits in interest or savings department.	Certificates of deposit.

Classification of deposits in each class of banks as of June 4, 1913.

1 United States deposits not included.

A statement showing the aggregate amount of savings deposits held by banks in each State and geographical division, with the per capita, will be found incorporated with the table of resources and liabilities on another page.

By referring to the table in question it will be noted that the largest amount of savings deposits are held by banks in the State of New York, \$1,910,600,000, followed by Massachusetts with \$877,-300,000, Pennsylvania with \$669,800,000, and California with \$453,500,000. Other large amounts are \$346,800,000 in the savings department of the banks of Illinois, \$324,400,000 in the Ohio banks, The total savings and \$318,900,000 in the Connecticut banks. deposits in the banks of Massachusetts are more than one-third of the total individual deposits of the banks of the New England States, and the savings deposits in the banks of New York represent over 27 per cent of the individual deposits in all banks of the Eastern States. In the Southern States the Virginia banks hold the largest amount of savings deposits, or \$47,000,000, Louisiana being next with \$31,400,000, Georgia third with \$30,800,000, and South Carolina fourth with \$26,900,000. In the Middle Western States, as before indicated, Illinois is first with \$346,800,000, Ohio second with

\$324,400,000, and Michigan third with \$250,100,000. In the Western States Colorado is first with \$23,600,000 savings deposits, Nebraska is second with \$18,900 000, and Montana third with \$13,400,000. In the Pacific States, California, as before indicated, is first with \$453,-500,000, Washington second with \$51,200,000, and Utah third with \$21,800,000. The amount of savings deposits per capita for the United States is \$71 and for each geographical section is as follows: New England States, \$245; Eastern States, \$134; Pacific States, \$91; Middle Western States, \$50; Southern States, \$10; Western States, The gain during the year in the per capita amount of savings **\$**9. deposits was as follows: \$7 for the New England States, \$5 for the Eastern States, \$9 for the Pacific States, \$4 for the Middle Western States, 69 cents for the Southern States, and 75 cents for the Western States, or \$3 for the United States.

# STATE, SAVINGS, AND PRIVATE BANKS AND LOAN AND TRUST COMPANIES.

Summaries of the reports received for the current year from State, savings, and private banks, and loan and trust companies show the condition on June 4, 1913, of 18,520 banks other than national, or 697 more than reported in 1912. The aggregate resources of these banks are \$14,675,243,842.44. In 1912, 17,823 banks other than national made reports showing aggregate resources of \$14,124,878,-897.03. The increase in resources for the year is therefore shown to be \$550,364,945.41. The returns for the current year include 14,011 commercial banks, 623 mutual savings banks, 1,355 stock savings banks, 1,016 private banks, and 1,515 loan and trust com-panies. The returns for each class of banks, with the exception of private banks, are practically complete.

The statistics for 38 States have been prepared from official returns as of June 4, 1913, with the exception, as to date, of those from Pennsylvania, May 1; Alabama, June 9; Tennessee, June 30; Iowa, June 28; and the island possessions, June 30. These returns were supplemented as to details of resources and liabilities by reports submitted by individual banks.

A summary of the reports of condition of the banks other than national is submitted herewith:

Summary of reports of condition of 18,520 State, savings, and private banks and loan and trust companies in the United States on June 4, 1913.

#### STATE BANKS.

Reports from State banks (commercial banks) to the number of 14,011 have been received, showing capital of \$483,103,779.15 and aggregate resources of \$4,143,052,802.86. In 1912 reports were received from 13,381 State banks with capital of \$459,067,206.81 and aggregate resources of \$3,897,770,826.71. The increase during the year is shown to be 630 in the number of banks, \$24,036,572.34 in capital, and \$245,281,976.15 in aggregate resources. A summary of the reports submitted by the State banks shows in round amounts loans aggregating \$2,746,600,000, investments in bonds, securities, etc., \$351,400,000, cash on hand \$246,200,000, capital \$483,100,000, surplus and undivided profits \$285,100,000, and individual deposits \$3,081,000,000. Of the loans, \$555,100,000 are reported as secured by real estate, including mortgages owned, and \$692,000,000 as secured by collateral other than real estate, \$1,467,400,000 being unclassified loans and \$31,500,000 overdrafts. The investments in bonds, securities, etc., consist of \$3,350,000 United States bonds, \$88,973,000 State, county, and municipal bonds, \$65,501,000 railroad bonds, \$52,854,000 bonds of other public-service corporations, while \$140,817,000 are unclassified. The individual deposits were classi-Deposits subject to check without notice fied as follows: \$1,740,100,000, savings deposits \$636,900,000, certificates of deposit \$656,700,000, certified checks and cashiers' checks outstanding \$47,100,000, and postal savings deposits \$1,800,000.

### SAVINGS BANKS.

There has been a marked increase in deposit balances of savings banks during the past year as well as in the number of depositors, the increase being largely in excess of the gain in 1912 over 1911.

In 1912 reports were received from 1,922 savings banks; for the present year reports to the number of 1,978 have been tabulated, 623 being from mutual institutions and 1,355 from stock savings banks the latter class transacting both a savings and a commercial bank business. Deposits in these banks aggregate \$4,727,403,950.79 and the depositors number 10,766,936, the average deposit account being

\$439.07. The 1,922 savings banks reporting in June, 1912, had deposits aggregating \$4,451,818,522.88 to the credit of 10,010,304 depositors, the average deposit account being \$444.72. It is therefore shown that there has been an increase during the year of 56 in the number of banks reporting, 756,632 in the number of depositors, and \$275,585,427.91 in the amount of deposits, while the average deposit account has decreased by \$5.65. In 1912 the increase in deposits over 1911 was \$239,234,924; the increase in the number of deposits in 1913 was 6.2, and in depositors 7.5; the increase in 1912 over 1911 was 5.6 per cent in deposits and 2.2 per cent in depositors. The average deposit account, however, has fallen from \$444.72 in 1912 to \$439.07 in 1913.

The following table shows the number of savings depositors, aggregate savings deposits, and average amount due depositors in savings banks in each State on June 14, 1912, and June 4, 1913. These figures do not include the amount of savings deposits in savings departments of the State banks of Illinois, as this information is shown in the statement for commercial banks in another table.

Number of savings depositors, aggregate savings deposits, and average amount due to each depositor in savings banks (mutual and stock savings) in each State on June 4, 1913-Continued.

Nore 1.—The compilation for 1912 includes statements, as of June 14, from 630 mutual savings banks and 1,292 stock savings banks. Many of the stock savings banks receive commercial deposits, and included with the figures for such banks for 1912 are \$175,177.48.36 reported as subject to check without notice to the credit of 412,512 depositors. Savings bank reports from Maryland, as of June 29, Georgia, May 29, and Kentucky, May 18. Depositors in the following number of banks for the States named have been estimated: 1 in North Carolina, 1 in Nebraska, 2 in Mississippi, 2 in Tannessee, 4 in Georgia, 6 in Ken-tucky, and 131 in Lowa. Deposits includes 282,355.16 as "dividends unpaid" by stock savings banks. Nore 2.—The compilation for 1913 includes statements, as of June 4, from 623 mutual savings banks and 1,355 stock savings banks. Many of the stock savings banks receive commercial deposits and included with the figures for such banks for 1913 are \$139,357,070.69 reported as subject to check without notice to the credit of 494,377 depositors. Savings bank reports from Wirginia include 5 trust and savings banks; from Georgia 3 savings and trust companies; from Kentucky 6 trust and savings banks. Figures for Iowa are from official statement, as of June 28; statistics for California include figures for savings departments for commercial banks, but not the number of such departmental banks. Depositors for the following number of banks for the States named have been estimated: 1 in North Carolina, 1 in Nebraska, 1 in Colorado, 1 in New Mexico, 1 in Newada, 2 in Maryland, 2 in Virginia, 2 in Michigan, 3 in Alabama, 3 in Louisiana, 3 in Kanasa, 3 in Washington, 4 in West Virginia, 6 in Mississippi, and 76 in Jowa. Statistics of Michi-gan include those banks which transact chiefly a savings bank business, there being over 150 so-called savings banks in Michigan which are in fact commercial banks.

The growth of savings banks in the United States from 1820 to 1913, as evidenced by the amount of deposits, number of depositors, average deposit account, and the average per capita in census years from 1820 to 1890, and annually thereafter, is shown in the table following.

# REPORT ON THE FINANCES.

Number of savings banks in the United States, number of depositors, amount of savings deposits, average amount due each depositor in the years 1820, 1825, 1830, 1835, 1840, and 1845 to 1913, and average per capita in the United States in the years given.

1 Population estimated at 97,337,000.

In the figures for 1896 to 1908, inclusive, but not subsequently, are the number of depositors and amount of deposits in the State banks of Illinois having savings departments, but not the number of such banks, by reason of the fact that general returns from these institutions are incorporated in State bank returns. The savings deposits in savings departments of Illinois State banks and trust companies were reported officially on June 4 last at \$292,933,683.

The increase in aggregate deposits in savings banks since 1909, has been \$1,014,000,000, or over 27 per cent, the deposits in 1909 stated roundly being \$3,713,000,000 and for the present year \$4,727,000,000. During the same period the number of depositors has increased 1,935,073, or 22 per cent. The percentage of increase in the deposits during the past year was 6.2 and in depositors 7.5. The percentage of increase during each of four years preceding 1913 has been as follows: In 1909, 1.4 per cent in deposits and 1.4 per cent in depositors; 1910, 9.6 per cent in deposits and 3.5 per cent in depositors; 1911, 3.5 per cent in deposits and 7.1 per cent in depositors; 1912, 5.7 per cent in deposits and 2.2 per cent in depositors.

#### MUTUAL SAVINGS BANKS.

Reports were received as of June 4, 1913, from 623 mutual savings banks with \$3,769,555,330.59 deposits credited to 8,101,238 depositors, the average deposit account being \$465.31. In June, 1912, reports were received from 630 mutual savings banks with deposits of \$3,608,657,828.11 credited to 7,851,377 depositors, the average deposit account being \$459.62. There has been a decrease of 7 in the number of banks reporting but an increase in deposits during the year aggregating \$160,897,502.48, and an increase of 249,861 in the number of depositors. In 1912 the increase over 1911 was \$148,082,756 in deposits and 160,404 in the number of depositors.

Mutual savings banks are confined chiefly to the manufacturing centers of the New England and Eastern States, there being only 23 institutions of this character reporting from other sections of the country, namely, 1 in West Virginia, 4 in Ohio, 5 in Indiana, 4 in Wisconsin, 8 in Minnesota, and 1 in California. The increase in deposits in mutual savings banks during the past year has been most marked in the Middle Western States where the percentage of increase was nearly 9 per cent, the increase in the New England States and the Eastern States being but 4 per cent.

The resources of the mutual savings banks aggregated \$4,104,639,-651 invested, as follows: Loans, \$2,038,915,500, of which \$1,815,-585,610 are secured by real estate and \$149,547,486 by other collateral security. The investments in bonds, securities, etc., aggregate \$1,818,633,823 and include, in round amounts, United States bonds, \$18,100,000; State, county, and municipal bonds, \$809,400,000; railroad bonds, \$796,200,000; bonds of other public-service corporations, \$99,500,000; and unclassified bonds, etc., \$95,400,000. The amount invested in banking house, furniture, and fixtures is \$39,200,000, and in other real estate \$11,800,000. The amount due from banks is reported at \$155,600,000, and checks, cash items, etc., amount to \$900,000. Cash in banks was reported at \$17,100,000 and resources not classified \$22,300,000. The surplus of mutual savings banks aggregates \$269,700,000, undivided profits \$60,400,000, individual deposits \$3,769,500,000, and unclassified liabilities \$4,800,000. The total num-

ber of savings depositors is 8,098,967 and all other depositors 2,271. Of the 623 mutual savings banks, 404 are located in the New England States. These banks have deposits aggregating \$1,483,127,489 and 3,554,537 depositors. In the Eastern States there are 196 mutual savings banks with deposits of \$2,128,458,093 and 4,197,425 depositors; 140 of these banks with deposits of \$1,700,063,766 and 3,114,240 depositors are located in the State of New York. There is but one mutual savings bank in the Southern States, that being located in West · Virginia, with deposits of \$1,491,968 and 5,817 depositors. The Middle Western States have 21 mutual savings banks in operation with deposits aggregating \$102,724,681 and 258,180 depositors. California has one mutual savings bank with deposits aggregating \$53,753,098 and 85,279 depositors. Depositors in the California mutual savings bank have the largest average deposit account, namely, \$630.32; in New York the average is \$545.90, followed by Rhode Island with \$544.93, Ohio with \$526.59, and Connecticut with \$497.02.

The following table shows the number of depositors in mutual savings banks with aggregate savings deposits and the average amount due depositors in the States indicated on June 14, 1912, and June 4, 1913:

			1912	1913 .

Number of mutual savings banks, number of depositors, aggregate deposits, and average deposit account, by States, June 14, 1912, and June 4, 1913.

<sup>1</sup> Reports from 2 banks received Dec. 3, too late to include in this table. <sup>2</sup> Reports as of June 29. <sup>3</sup> July 5.

464

The average rate of interest paid depositors in mutual savings banks in 1913 was 3.94 per cent, against 3.90 per cent in 1912 and 3.95 per cent in 1911. The highest rate is paid by the West Virginia bank, 4.5 per cent, and the lowest average by the banks in Minnesota, 3.57 per cent. An average rate of 4 per cent is paid depositors in mutual savings banks in Rhode Island, Delaware, and Indiana. The average rate paid by the mutual savings banks in the New England States is 3.90 per cent, in the Eastern States 3.71 per cent, in the Middle Western States 3.84 per cent, and by the one bank in California 3.75 per cent.

#### STOCK SAVINGS BANKS.

Stock savings banks to the number of 1,355 furnished reports as of June 4, 1913. A large number of so-called savings banks transact chiefly a commercial business and carry very few savings accounts. In those States where savings-bank reports are not separately compiled by the State banking departments but classified with commercial banks, care has been exercised in eliminating from the classification made by this office all so-called savings banks which are chiefly banks of discount and deposit, transacting only a minimum of savings-bank business. Some difficulty is experienced in making the classification uniform throughout, but this difficulty can not be entirely overcome until the State banking department of every State shall make a separate classification of the reports for this class of banks.

The reporting stock savings banks are located as follows: Nine in New Hampshire, known as guaranty savings banks; 47 in the Eastern States, 192 in the Southern States, 870 in the Middle Western States, 58 in the Western States, and 179 in the Pacific States. There are a large number of so-called savings banks in Michigan, but only 27, indicating by their reports that they transact a minimum amount of commercial bank business, are included in this classification; and while a large number of commercial banks in Ohio use the word "savings" in their title, for the same reason only 63 in that State have been classified with savings banks. In California a large number of banks are known as departmental banks, which make separate reports to the banking department of that State for each class of business; that is, for their commercial, trust, and savings bank departments. The figures for California therefore include the resources and liabilities of savings banks and savings departments of other banks.

The capital stock of the 1,355 reporting stock savings banks amounts to \$\$4,837,733.59, against \$76,871,811.79 for 1,292 banks reporting last year. The increase is therefore shown to be 63 in the number of banks and \$7,965,921.80 in capital. Their loans aggregate \$787,543,252.98 and are classified in round amounts as follows: Secured by real estate, \$488,100,000; secured by collateral other than real estate, \$113,400,000; all other loans, including overdrafts, \$185,900,000. Investments in bonds, securities, etc., including premiums, are as follows: United States bonds, \$5,100,000; State, county, and municipal bonds, \$50,700,000; railroad bonds, \$25,300,000; bonds of other public service corporations, \$35,700,000; and unclassified stocks, bonds, etc., \$29,600,000.

In addition to the foregoing summary, the reports show cash in bank amounting to \$35,600,000, and amount due from banks

16726°----FI 1913-------30

\$103,600,000. Banking house, furniture and fixtures, and other real estate owned aggregate \$36,900,000, and the surplus and undivided profits \$60,100,000.

The depositors in stock savings banks number 2,665,698, of which 2,171,321 are savings depositors and 494,377 have commercial accounts. In arriving at the number of depositors, those in 88 banks have been estimated. The average rate of interest paid to depositors in stock savings banks ranges from 3.12 per cent to 3.70 per cent, the lower rate being for deposits not subject to restrictions as to withdrawal. In 1912 the percentages were 3.03 to 3.64. The average rate paid on savings deposits by the stock savings banks (guaranty) reporting from the New England States is 3.44 per cent, for the Eastern States the average is 3.52 per cent, for the Southern States 3.84 per cent, for the Middle Western States 3.46 per cent, for the Western States 3.95 per cent, and for the Pacific States 4.02 per cent. The highest average rate of interest paid on savings deposits is 4.50 per cent, by the banks in North Dakota and Wyoming; the lowest average rate, 3.04 per cent, is paid by stock savings banks in Wisconsin.

## PRIVATE BANKS.

There are over 3,500 private banking concerns and brokerage houses in the country, but less than one-half of this number furnished reports for statistical purposes. Private banks appear to be most numerous in the Middle Western States, and over 76 per cent of those reporting are located in that section. Reports were received from 777 private banks in the Middle Western States, 77 from the Southern States, 75 from the Western States, 58 from the Eastern States, and 29 from the Pacific States. States from which the largest number reported were: Ilhnois, 235; Indiana, 197; and Ohio, 152.

In regard to the private banks of Ohio, the department of banks and banking of that State compiled for the first time, but too late to include in this report, a statement from 213 private banks with aggregate resources of \$45,615,930.07. The resources of the 152 private banks of Ohio, which furnished reports to this office, aggregated \$29,809,368.61. The reports from the private banks of New York are also incomplete, only 21 banks with aggregate resources of \$4,625,734 reported this year, against 50 banks with aggregate resources of \$14,799,754 reporting last year.

The capital of the 1,016 private banks from which reports were obtained aggregates \$19,601,717.94. For 1912 reports were obtained from 1,110 private banks with capital of \$22,348,040.33.

The principal items of resources and liabilities of the reporting private banks were as follows: Loans and discounts, \$124,282,694.59; bonds, securities, etc., \$9,845,121.57; due from banks, \$26,763,368.40; cash on hand, \$7,238,552.87; total resources, \$182,785,398.17. The capital stock was reported at \$19,601,717.94, surplus \$7,925,-570.48, undivided profits \$3,362,365.36, and individual deposits \$143,457,229.32.

#### LOAN AND TRUST COMPANIES.

In compiling the statistics for loan and trust companies, as far as possible, those concerns which are trust companies in name only banks transacting no trust business—have been excluded from the summary which follows, but are included with the statistics for commercial banks. From these figures it appears that loan and trust companies have acquired banking resources amounting to over \$5,100,000,000, or about one-half the resources of national banks.

Reports as of June 4, 1913, with the exception of those from Maine as of April 26, Pennsylvania May 1, and Nevada November 26 (1912), were received from 1,515 loan and trust companies with aggregate resources of \$5,123,920,197.46. In 1912 reports were received from 1,410 loan and trust companies, with aggregate resources of \$5,107,444,382.27; the increase therefore has been 105 in the number of companies reporting and \$16,475,815.19 in aggregate resources. The capital stock is reported at \$452,386,839.07, against \$418,985,771.77 in 1912.

The number of loan and trust companies with aggregate capital stock, stated in round amounts, are located as follows: In the Eastern States 513, with capital of \$220,300,000; Middle Western States 352, with capital of \$108,000,000; Southern States 318, with capital of \$57,700,000; New England States 195, with capital of \$44,500,000; Western States 69, with capital of \$6,700,000; and Pacific States 68, with capital of \$14,900,000. The loans and discounts of loan and trust companies aggregate \$2,767,346,174.33, classified in round amounts as follows: Secured by real estate, \$576,300,000; by collateral other than real estate, \$1,374,300,000; all other loans, including overdrafts, \$816,600,000. Investments in bonds, securities, etc., including premiums aggregating \$1,191,000,000 are classified as follows: United States bonds, \$2,770,000; State, county, and municipal bonds, \$113,500,000; railroad bonds, \$297,300,000; bonds of other publicservice corporations, \$334,200,000; other bonds, stocks, etc., \$443,-000,000. The amount reported as due from banks was \$553,000,000; invested in banking house, furniture, and fixtures, \$133,000,000; other real estate owned, \$33,000,000; and cash on hand, \$285,000,000. Loan and trust companies had surplus amounting to \$445,200,000 and undivided profits of \$129,000,000. Individual deposits subject to check were reported at \$2,244,000,000, savings deposits \$970,000,000, certificates of deposit \$323,000,000, and certified and cashiers' checks \$32,000,000.

Comparing the foregoing statistics with those submitted in 1912 loans show an increase of \$56,100,000, cash on hand \$3,233,000, capital \$33,401,000, surplus and profits \$13,628,000, while investments in bonds and securities show a decrease of \$21,100,000, and individual deposits a decrease of \$103,200,000.

# BANKS AND BANKING IN THE DISTRICT OF COLUMBIA.

The act of June 25, 1906, places under the supervision of the Comptroller of the Currency, in addition to national banks and the loan and trust companies organized under authority of the act of 1890, all other banking institutions organized under authority of any act of Congress to do business in the District of Columbia or organized by virtue of the laws of any of the States of the Union and having an office or banking house located within the District of Columbia where deposits or savings are received. The supervision in question extends to the requirements applicable to national banks with respect to

reports of condition, earnings and dividends, and examinations. It is further provided that the comptroller shall have the power, when in his opinion it is necessary, to take possession of any such banking institution for the reason and in the manner and to the same extent as is provided in the laws of the United States with respect to national banks.

There are 56 banking institutions in the District of Columbia, consisting of 12 national banks, 7 trust companies, 17 savings banks, and 20 building and loan associations. The aggregate capital of all these institutions on August 9, 1913, was \$19,268,851, an increase during the year of \$3,246,975. The total individual deposits were \$86,514,014 and the aggregate resources \$142,517,552. The increase in individual deposits during the year was \$4,296,554 and in aggregate resources \$13,079,643.

The number, capital, individual deposits, and aggregate resources of each class of financial institutions doing business in the District of Columbia on August 9, 1913, are shown in the following table:

Classification.	Num- ber.	Capital.	Individual deposits.	Aggregate resources.
National banks. Loan and trust companies Savings banks. Building and loan associations.	12 7 17 20	11,250,000	\$27, 378, 249 32, 422, 023 10, 260, 698 116, 453, 044	\$60, 331, 889 50, 891, 044 12, 856, 325 18, 438, 294

#### <sup>1</sup> Share payments.

#### BANKS AND BANKING IN THE ISLAND POSSESSIONS.

Banking institutions reporting from the island possessions numbered 30, 4 of which are national associations located in Hawaii. The number of reports received from banks other than national from Hawaii was 9, from Porto Rico 6, and from the Philippines 11. Α number of banks in Hawaii and Porto Rico which reported in 1912 failed to furnish a report of condition for this compilation. The bank resources of Porto Rico, Hawaii, and the Philippines aggregate \$65,483,060.74. The capital of the 30 banks from which reports were received aggregates \$6,539,968.40, loans \$33,863,229.21, investments in bonds, securities, etc., \$5,385,121.56, amount due from other banks and branches \$10,155,267.51, cash on hand \$8,363,080.17. Surplus and undivided profits amount to \$2,753,131.75, amount due to other banks and branches \$12,599,307.27, individual deposits \$33,994,355.33, United States deposits \$419,664.71, and postal savings deposits \$17.500.

#### PHILIPPINES.

Through the courtesy of the Bureau of Insular Affairs, United States War Department, reports of condition as of June 30, 1913, have been received from the following-named banks in operation in the Philippine Islands: Hongkong & Shanghai Banking Corporation, at Manila; Hongkong & Shanghai Banking Corporation, at Iloilo; Chartered Bank of India, Australia, and China, at Manila; Chartered

Digitized for FRASER http://fraser.stlouisfed.org/ Federal Reserve Bank of St. Louis

#### 468

Bank of India, Australia, and China, at Iloilo; Chartered Bank of India, Australia, and China, at Cebu; Bank of the Philippine Islands, at Manila; Bank of the Philippine Islands (branch), at Zamboanga; Bank of the Philippine Islands (special branch), at Jolo; Bank of Philippine Islands, at Iloilo; International Banking Corporation, at Manila; and International Banking Corporation, at Cebu.

The principal items of resources of these 11 banking institutions are as follows: Loans and discounts, \$18,125,662.09; bonds, securities, etc., \$689,390.49; due from banks and bankers, \$3,710,812.98; cash on hand, \$3,607,236.30; all other resources, \$5,903,301.01; total resources, \$32,036,402.87. The liabilities are as follows: Capital stock, \$2,750,000; surplus and undivided profits, \$1,283,079.92; individual deposits, \$11,741,536.30; postal saving deposits, \$17,500; due to banks and bankers, \$8,572,814.59; all other liabilities, \$7,671,472.06.

## HAWAII.

Returns as of June 30 have been received from nine banking institutions other than national banks in operation in the island Territory of Hawaii, namely: First Bank of Hilo; Bank of Honolulu; Bishop Trust Co., of Honolulu; First Trust Co., of Hilo; Guardian Trust Co., of Honolulu; Trent Trust Co., of Honolulu; Bishop & Co., of Honolulu; Bank of Hawaii, Lihue branch; Yokohama Specie Bank, Honolulu branch. A summary of the principal items of resources and liabilities as of June 30, 1913, for the nine banks above named is as follows: Loans and discounts, \$6,917,101.08; bonds, securities, etc., \$1,881,206.08; banking house, furniture, and fixtures, \$135,764.08; other real estate owned, \$82,936.62; due from banks, \$790,167.12; checks and cash items, \$155,074.44; cash on hand, \$1,995,472; other resources, \$325,974.39; total resources, \$12,283,695.81. Liabilities: Capital stock, \$2,132,500; surplus, \$125,-790.77; undivided profits, \$251,429.45; due to banks, \$283,798.84; individual deposits, \$9,437,273.50; bills payable, \$15,190.21; other liabilities, \$37,713.04; total liabilities, \$12,283,695.81. In 1912 the total resources and liabilities of the banks other than national reporting from Hawaii aggregated \$19,579,365.85. The decrease for the present year is caused by the failure of one or more territorial banks to furnish reports to this office.

The principal items of resources and liabilities as of June 30, 1913, for the nine reporting territorial banks combined with statistics as of June 4, 1913, for the four national banks show an aggregate banking power for Hawaii as follows: Loans, \$8,729,657.16; bonds, securities, etc., \$2,873,364.22; due from banks, \$1,069,606.99; cash on hand, \$2,535,261.19; capital, \$2,742,500; surplus and undivided profits, \$700,179.46; due to banks, \$479,289.79; individual deposits, \$11,313,718.56; aggregate resources, \$16,015,313.27.

#### PORTO RICO.

In 1912 reports were received from 11 banking institutions in operation in the island of Porto Rico. For the present year only six banks furnished reports of condition for the use of this office. These

banks were: Agency of the Bank of Nova Scotia, at San Juan; American Colonial Bank of Porto Rico at San Juan; Banco Commercial de Puerto Rico, at San Juan; Banco Popular de Economias y Prestamos, San Juan; Banco Territorial y Agricola de Puerto Rico, San Juan; and Royal Bank of Canada, San Juan.

A summary of the resources and liabilities of these banking institutions as of June 30, 1913, is as follows: Loans, \$7,007,909.96; bonds, securities, etc., \$1,822,366.85; due from banks and bankers, \$5,374,-847.54; cash on hand, \$2,220,582.68; other resources, \$1,005,637.57; total resources, \$17,431,344.60. Liabilities: Capital stock, \$1,047,-468.40; surplus and undivided profits, \$769,872.37; individual deposits, \$10,939,100.47; due to banks and bankers, \$3,547,202.89; all other liabilities, \$1,127,700.47; total liabilities, \$17,431,344.60.

Banks which furnished reports in 1912 but failed to forward a report for the current year are: Caja de Economias y Prestamos, San Juan; Credito y Ahorra Ponceno, at Ponce; Caja Popular de Ahorros y Prestamos, at San German; Caja de Economias y Prestamos at Cabo Roja; and Credito y Ahorro Popular, at Yauco.

#### STATE AND PRIVATE BANK FAILURES.

Through the courtesy of the Bradstreet Commercial Agency information is obtainable with respect to the number of banks of each class closed and the amount of assets and liabilities at the date of closing, but no statistics are at command in relation to the settlement of the affairs of insolvent State and private banks.

In the year ended June 30, 1913, 40 banks of this character were closed, the nominal assets at the date of failure being \$6,182,295 and the liabilities \$7,520,527. Included in the list of failures are 18 State banks with assets of \$1,362,983 and liabilities of \$1,866,480, 4 savings banks with assets of \$564,000 and liabilities of \$680,000, 3 trust companies with assets of \$3,409,300 and liabilities of \$3,419,860, and 15 private banks with assets of \$846,012 and liabilities of \$1,554,187.

For the period beginning with 1864 and terminating in 1896 as a result of special efforts information was obtained in relation to the settlement of the affairs of State and private banks closed during that time, from which it would appear that creditors received on an average of approximately 45 per cent on their claims. Since 1896 no statistics have been secured relating to the settlement of the affairs of banks of this character, but there have been reported from year to year the number of failures with assets and liabilities at the date of failure, which are summarized in the table following.

### COMPTROLLER OF THE CURRENCY.

		· · · · · · · · · · · · · · · · · · ·

Number of failures, capital, assets, liabilities, and dividends paid by State and private banks that failed in each year from 1864 to 1913.

# For the purpose of comparison there is submitted herewith a statement relating to failures, by years and classes of banks:

Number, assets, and liabilities of State banks, savings banks, loan and trust companies, and private banks which failed, by years, from June 30, 1892, to June 30, 1913.

#### COMPTROLLER OF THE CURRENCY.

#### BUILDING AND LOAN ASSOCIATIONS IN THE DISTRICT OF COLUMBIA.

Building and loan associations in operation in the District of Columbia, which were placed under the supervision of the Comptroller of the Currency by the act of March 4, 1909, have shown a steady increase in business from that date as indicated by the volume of loans, installment payments on shares, and aggregate resources, as shown in the following table:

Years.	Number of asso- ciations.	Loans.	Installments on shares.	Aggregate resources.
June 30, 1909 June 30, 1910 June 30, 1910 June 30, 1911 June 30, 1912 June 30, 1913	19 19 20	\$13,511,587 14,415,832 14,965,220 16,004,760 17,398,010	\$11, 996, 357 13, 213, 644 13, 324, 217 14, 529, 977 16, 453, 044	\$14, 393, 927 15, 250, 731 16, 017, 465 17, 160, 293 18, 438, 294

These institutions are required to make semiannual reports and are subject to periodical examinations. The total number of shares issued by these associations is stated at 367,407, of which 142,368 were in force on June 30, 1913. The membership is reported at 33,756, of whom 8,537 are borrowing and 25,219 nonborrowing members. Installment payments are for one association \$2.50 per month, two \$2, one \$1.50, and the remaining \$1 per share.

#### BUILDING AND LOAN ASSOCIATIONS IN THE UNITED STATES.

Statistics relating to the building and loan associations in the United States for the year 1912 have been obtained through the courtesy of Mr. H. F. Cellarius, secretary of the United States League of Local Building and Loan Associations.

There were in 1912 in the United States 6,273 associations, with a total membership of 2,516,936, and having assets amounting to \$1,137,600,648. The total resources increased \$106,913,617, or a little over 10 per cent for the year, and the membership increased 184,107, or a little less than 8 per cent, during the same period. The average amount due each member is \$451.98, an increase of \$10.17 per member for the year.

The following table shows, by States, the number of associations, total membership, and total assets for States in which accurate statistics are compiled by the State authorities. The data for other States are consolidated under the heading, "Other States," and the figures given are estimated.

States.	Number of asso- ciations.	Total member- ship.	Total assets.	Increase in assets.	Increase in mem- bership.

<sup>1</sup> Including \$4,734,478 State associations now doing business as locals. <sup>2</sup> Decrease. <sup>3</sup> Estimated.

#### RECEIPTS AND DISBURSEMENTS.

The receipts for the year 1912 aggregated \$779,479,200, an increase over the previous year of \$71,294,068, or 10.6 per cent. The weekly dues increased \$28,461,854, or 12.1 per cent; paid-up stock, \$2,657,922, being 11.2 per cent; deposits, \$3,832,888, being 5.8 per cent; interest, 5,824,868, being 9.5 per cent. Premium receipts were \$169,258 less than in 1911. The mortgage loans made last year were \$15,880,888 in excess of those of the previous year, or 5.6 per cent; stock withdrawals increased \$21,371,168, or 10.9 per cent; paid-up stock withdrawals were \$5,015,546 more than in 1911, being an increase of 26.3 per cent, while deposits increased \$4,490,544, or 7.8 per cent. The ratio of expenses to receipts was a fraction under 1 per cent. In detail the receipts and disbursements for the year were as follows:

Receipts, 1912.	Amount.	Disbursements, 1912.	Amount.
Cash on hand Jan. 1, 1912 Weekly dues. Paid-up stock Deposits. Loans repaid Interest. Premium Fines. Pass books and initiation. Borrowed money. Real estate sold. Miscellaneous receipts. #### SCHOOL SAVINGS BANKS.

Through the courtesy of Mrs. S. L. Oberholtzer, who has undertaken the work of collecting statistics relating to this class of banks, the Comptroller is enabled to present the latest statistical data showing the growth of the school savings bank system in this country. Much interest is now being manifested in this method of accumulating small savings, and recently the American Bankers' Association provided for a school savings section, in charge of a capable secretary, for the purpose of studying the growth of this movement and compiling statistics relating thereto.

From reports received and compiled it appears that there are about 1,200 schools in 201 cities and towns having school savings banks. The pupils registered at these schools number 1,492,789, and the number of pupils with savings accounts are 210,320. The total amount deposited was \$4,305,018.83, withdrawn \$3,143,551.22, the balance on deposit being \$1,161,467.61.

The following is a summary of reports from school savings banks, arranged by States and geographical divisions:

•	Number	Number o	fscholars.	To	al.	Balance
	of cities.	On regis- ter.	Deposi- tors.	Deposited.	Withdrawn.	due depositors.

School savings banks of the United States on or about Jan. 1, 1913.

<sup>1</sup> Figures for 3 cities as of Jan. 1, 1912.

The statistics in detail relating to school savings banks will be found in the appendix to the report of the Comptroller of the Currency; while incomplete, only about 75 per cent of the number in operation reporting, they show the extent to which the savings of school children has grown.

### SAVINGS BANKS IN FOREIGN COUNTRIES.

The Comptroller is indebted to the Bureau of Foreign and Domestic Commerce, Department of Commerce, for the latest available statistics in relation to the number of depositors and the volume of deposits in the various classes of savings banks in foreign countries.

The first table following is a consolidated statement relating to all foreign savings banks and the second is confined to postal savings banks, showing the returns for the current year and 10 years prior. Aswill be noted, the United Kingdom, the country in which the postal savings bank system had its first practical origin, leads all other countries in the volume of deposits and the number of depositors. The tables in question follow

The tables in question follow.

<sup>1</sup> The figures of population are for the nearest date to which the statistics of savings banks relate. <sup>2</sup> Exclusive of 1,892 deposits of \$194,893 in savings banks in Farce Islands, and of data for savings departments of ordinary banks, which comprised 160,127 accounts, credited with \$33,027,713 on Mar. 31, 1911. <sup>8</sup> Exclusive of Brunswick.

No separate data available for private and communal savings banks since 1909. The ordinary banks, savings banks, and land-credit banks of Hungary held 1.896.654 savings accounts credited with \$781,477,529 on Dec. 31, 1911. • Figures for the Casa d'Economie.

Includes 38,958 depositors in school savings depositories, credited with \$105,060. The above total is exclusive of \$162,185,345 worth of securities held by the savings banks to the credit of depositors.

<sup>7</sup> The peseta has been converted at the rate of 18.1 cents. Data taken from "España Económica y Financiera," May 31, 1913. Exclusive of data for savings departments of com-mercial banks, which comprised 136,648 accounts credited with \$30,500,114 on Dec. 31, 1912.

Exclusive of Government stock held for depositors, which, at the end of the year, amounted to \$126,907,896 in the postal savings banks and to \$13,163,196 in the trustee savings banks.

<sup>9</sup> Exclusive of the population of the feudatory States.
 <sup>10</sup> Exclusive of data for special private savings banks which, on June 30, 1913, held deposits amounting to \$39,440,559. The above total does not include the savings deposits in chartered banks ("Deposits payable after notice or on a fixed day"), which, on June 30, 1913, amounted to \$622,928,969.

0

# Comparative statement relative to number of depositors, amount of deposits, and average deposit in postal savings banks.

[Compiled by the Bureau of Foreign and Domestic Commerce, Department of Commerce, from official data of the respective countries.]

<sup>1</sup> Earlier reports not available. <sup>2</sup> It has been thought proper to include among the postal savings banks also those savings banks in the Australian States which prior to the transfer of the State post offices to the Federal Government were operated by the respective State post offices. All these banks continue at present to be operated as Gov-ernment savings banks.

#### INSOLVENT NATIONAL BANKS.

During the year ended October 31, 1913, six national banks, with an aggregate capital stock of \$4,350,000, were placed in the charge of receivers appointed by the comptroller. The First-Second National Bank of Pittsburgh, Pa., which was closed on July 7, 1913, had a capital stock of \$3,400,000, and in point of gross assets is the largest national bank placed in the charge of a receiver in the history of the national banking system.

In the accompanying table will be found a list of the banks closed during the year ended October 31, 1913, showing date that each bank was authorized to commence business, date of the appointment of the receiver, the capital stock and the circulation issued, redeemed, and outstanding of each bank listed.

<sup>1</sup> Formerly in voluntary liquidation.

From 1865, the date of the first failure of a national bank, to October 31, 1913, 531 national banks have been placed in the charge of receivers. Twenty-five of these were, however, restored to solvency and permitted to reopen.

The capital of such failed banks aggregates \$90,950,920. The book or nominal value of assets administered by receivers under the supervision of this office was \$391,063,051. The total cash realized from the liquidation of these assets aggregates \$190,098,517. In addition to this amount there has been realized from assessments of \$46,194,540 levied against stockholders the sum of \$22,322,747, making total cash collections from all sources \$212,421,264, which has been distributed as follows:

In dividends to creditors on claims proved amounting to \$203,414,650 the sum of In payment of loans and other disbursements discharging liabilities of	\$141, 990, 760
the bank other than those of the general creditors	40, 808, 647
receiverships In payment of receivers' salaries and other expenses of receiverships There has been returned to shareholders in rebates on assessments levied.	5, 187, 764 9, 247, 875 3, 444, 256
Leaving a balance in the hands of the comptroller and the receivers of	11, 741, 955
Total	212, 421, 264

There are still in the charge of the receivers 45 insolvent national banks, the assets of which have a book or nominal value of \$82,124,646. In process of liquidation up to October 31, 1913, the receivers have realized from these assets in cash \$36,287,270 and have collected from the shareholders on account of assessments levied against them to cover deficiencies in assets the sum of \$1,923,583, making total collections from all sources in the liquidation of current or active receiverships the sum of \$38,210,853, which amount has been distributed as follows:

Dividends to creditors Loans paid and other disbursements discharging liabilities of the bank	\$18, 660, 176
other than those of the general creditors Legal expenses	
Receivers' salaries and all other expenses of administration Returned to shareholders on account of rebates on assessments	989, 046
Leaving a balance in the hands of the comptroller and with the receivers of.	,
Total	38, 210, 853

This large undistributed balance consists primarily of the amount in the hands of the comptroller to the credit of the First-Second National Bank of Pittsburgh, Pa. The distribution of this amount is being arranged for as heretofore stated.

Collections from assets of the 486 national banks, the affairs of which have been finally closed, were \$153,811,247 and from assessments levied against shareholders, \$20,399,164, making total collections of \$174,210,411, from which on claims proved aggregating \$161,168,878 dividends were paid to the amount of \$123,330,591. The average rate of dividends paid on claims proved was 76.52 per cent, but including offsets allowed, loans paid, and other disbursements with dividends creditors received on an average 82.87 per cent. Expenses of administration of these 486 trusts-that is, receivers' salaries, legal and other incidental expenses-amounted to \$12,877,314, a sum equal to 4.17 per cent of the nominal value of assets and 7.39 per cent of the total collections from assets and from shareholders. The outstanding circulation of these banks at the date of failure was \$23,731,707, secured by bonds on deposit in the Treasury of the face value of \$25,855,400. Assessments against shareholders averaged 53.1 per cent of their holdings, the collections therefrom being 48.4 per cent of the assessments levied.

In the current year 25 dividends were paid to creditors of 19 insolvent banks, the total distribution being \$1,468,448.83.

In the table following is summarized the condition of all insolvent national banks, the condition of the closed and active receiverships being shown separately.

COMPTROLLER OF THE CURRENCY.

Issue, redemption, and outstanding of various loans issued by the United States and District of Columbia to June 30, 1913—Continued.

Note.—The Office of the Register of the Treasury is the last to receive the redeemed securities of the Government and therefore the amounts reported as "redeemed" will be less than the actual redemptions by the amounts in transit and the amounts reported as "outstanding" correspondingly increased.

During the year there were received, recorded, and filed 484,129 redeemed securities, amounting to \$9,618,266.64, making a total of 19,215,991 redeemed securities, amounting to \$5,227,973,241.73 on file at the close of the fiscal year, as shown by the following table:

Total number and amount of redeemed securities on file in this division June 30, 1913.

The Secretary of the Treasury.

J. C. NAPIER, Register.

# **REPORT OF THE COMMISSIONER OF INTERNAL REVENUE.**

# TREASURY DEPARTMENT,

OFFICE OF COMMISSIONER OF INTERNAL REVENUE, Washington, D. C., November 1, 1913.

SIR: I have the honor to make the following report of the work of the Bureau of Internal Revenue during the fiscal year ended June 30, 1913.

Included in this report is a statement of receipts from the several sources of internal revenue for the months of July, August; and September of the current fiscal year.

## ACCOUNTS AND STATISTICS.

The total receipts of the bureau for the past fiscal year amounted to \$344,424,453.85. Of this total there was collected from ordinary sources \$309,418,154.01, an increase of \$16,385,519.13, and from the special excise tax on corporations there was collected \$35,006,299.84, an increase of \$6,423,040.03, making a total increase over the collections of the fiscal year ended June 30, 1912, of \$22,808,559.16. The collections for the past fiscal year exceeded the best record of former fiscal years, namely, 1911, by \$21,898,154.12.

The receipts from ordinary sources for the first three months of the fiscal year 1914 were \$79,257,887.58, as compared with \$76,161,-408.35 for the first three months of the fiscal year 1913, an increase of 33,096,479.23. Corporation tax collected for the first three months of the fiscal year 1914 amounts to 23,358,177.76, as compared with 1,880,379.82 collected during the first three months of the fiscal year 1913, an increase of \$477,797.94, thus making an increase in total collections from all sources for the first three months of the current fiscal year over the same period of the previous fiscal year of 33,574,277.17.

I estimate the collections for fiscal year 1914 at \$407,000,000, distributed as follows: Collections, exclusive of the corporation excise tax and income tax, \$312,000,000; corporation excise tax, \$8,000,000; income tax—corporations, \$33,000,000; individuals, \$54,000,000, a total of \$87,000,000.

I estimate the collections for fiscal year 1915 at \$420,000,000, distributed as follows: Collections exclusive of the income tax, \$315,000,000; income tax—corporations, \$40,000,000; individuals, \$65,000,000, a total of \$105,000,000.

The objects of internal taxation producing the largest amounts of internal revenue during the past fiscal year are distilled spirits, exclusive of special taxes, \$157,542,061.75; fermented liquors, exclusive of special taxes, \$65,245,544.40; manufactured tobacco, \$76,789,424.75,

including \$319,100.64 from sale of internal-revenue stamps affixed to Philippine products, and special excise tax on corporations, \$35,006,299.84, from each of which sources there was a substantial increase over the previous fiscal year.

## RECEIPTS IN LARGE TAX-PAYING STATES AND COLLECTION DISTRICTS.

The States in which the largest collections of internal-revenue taxes were made during the fiscal year 1913 are Illinois, \$58,302,601.36; New York, \$47,250,446.34; Kentucky, \$35,200,906.44; Indiana, \$31,623,505.62; Pennsylvania, \$28,959,530.66; Ohio, \$25,169,957.10.

\$31,623,505.62; Pennsylvania, \$28,959,530.66; Ohio, \$25,169,957.10. Among the States in which the smallest collections were made are Idaho, Mississippi, Nevada, New Mexico, North Dakota, Vermont, and Wyoming.

Of the collection districts, the fifth Illinois reported the largest collections, namely, \$34,000,994.53.

The fiscal year 1913 witnessed a record production and a record withdrawal of distilled spirits, a substantial increase in the production of fermented liquors, an increase in the amount of tobacco and snuff manufactured, also in the number of large cigars, and a phenomenal increase in small cigarettes, a considerable increase in the production of oleomargarine, and a very large increase in corporation tax assessments and collections.

In the fiscal year 1912, the total production of distilled spirits was 187,571,808 gallons; in 1913, 193,606,258 gallons, an increase of 6,034,450 gallons. In the fiscal year 1912, 135,826,789 gallons of tax-paid spirits were withdrawn; in 1913, 143,220,056 gallons, an increase of 7,393,267 gallons.

The three States having the largest production of distilled spirits during the past fiscal year are Illinois, 43,964,336 gallons; Kentucky, 43,404,840; Indiana, 28,552,316 gallons.

The three collection districts having the largest output of distilled spirits are the fifth Illinois, 33,643,181 gallons; fifth Kentucky, 22,178,363 gallons; seventh Indiana, 18,658,162 gallons.

During the fiscal year 1913 there were tax paid for bottling in bond 10,626,633 taxable gallons as compared with 9,752,486 taxable gallons tax paid during the previous fiscal year, an increase of 874,147 taxable gallons.

The five States which produced the largest quantity of fermented liquors are New York, 13,956,878 barrels; Pennsylvania, 7,959,509 barrels; Illinois, 6,656,823 barrels; Wisconsin, 5,171,179 barrels; Ohio, 5,150,187 barrels.

The three collection districts which produced the largest quantity of fermented liquors are first Illinois, 5,601,469 barrels; third New York, 5,525,088 barrels; first Wisconsin, 4,329,696 barrels.

The four States producing the greatest number of cigars weighing more than 3 pounds per thousand and the production of each during the calendar year 1912 are as follows:

Pennsylvania 1, 962, 460, 574	
New York 1, 150, 684, 740	
Ohio	
New Jersey 499, 343, 142	

The two districts showing the largest production of cigars are the ninth Pennsylvania, 848,493,441, and the first Pennsylvania, 748,555,111.

The States showing the greatest production of little cigars (weighing not more than 3 pounds per thousand) are:

Maryland	521, 646, 210
Pennsylvania	244, 610, 690
Virginia	132, 660, 630
	,,,,

The greatest production by districts is as follows:

Maryland	521, 646, 210
First Pennsylvania	243, 734, 840
Sixth Virginia	128, 312, 980
Fifth New Jersey	76, 427, 940
	,,

The States of New York, Virginia, North Carolina, Louisiana, California, and Pennsylvania, in the order named, show the greatest production of cigarettes weighing not more than 3 pounds per thousand.

New York	 7, 085, 728, 676
Virginia	 2, 586, 596, 180
North Carolina	 1, 547, 268, 500
Louisiana	 677, 391, 115
California	 161, 224, 510
Pennsylvania	 109, 479, 475
	-, -, -, -, -

The three districts showing the greatest production of little cigarettes are the second Virginia, which produced 2,578,487,780, the first New York, which produced 2,491,654,128, and the third New York, which produced 2,332,179,923.

New York produced the greatest number of large cigarettes, showing a production of 14,282,640, of which number 10,599,130 were manufactured in the third district and 3,588,760 in the second district.

The States of North Carolina, Missouri, Ohio, Kentucky, New Jersey, and Michigan, in the order named, are the States reporting the largest manufacture of both chewing and smoking tobacco, the quantity manufactured being as follows:

North Carolina	96, 546, 019
Missouri	
Ohio	
Kentucky	
New Jersey	
Michigan	25, 578, 282

The districts producing the largest quantity are:

First Missouri	73, 086, 059
Fifth North Carolina.	61, 835, 494
Fifth New Jersey	
Fourth North Carolina	34, 710, 525
First Ohio	

The districts in which the largest amounts of corporation tax were collected are second New York, \$5,399,380.57; first Illinois, \$3,205,075.93; first Pennsylvania, \$2,320,779.77; twenty-third Pennsylvania, \$2,042,976.55; third Massachusetts, \$1,752,199.05. The four States showing the largest collections from this source are New York, \$8,189,784.23; Pennsylvania, \$4,725,150.93; Illinois, \$3,470,-053.31; Ohio, \$2,212,287.45.

## COST OF COLLECTING INTERNAL-REVENUE TAXES.

The cost of collecting the internal revenue for the fiscal year was approximately \$15.94 per \$1,000, or 1.59 per cent. The cost of collection the previous year was \$17.14 per \$1,000, or 1.71 per cent. In 1911, the fiscal year in which the largest sum was collected prior to the fiscal year 1913, the cost of collection was \$16.80 per \$1,000, or 1.68 per cent.

The average cost of collection since the establishment of the bureau is \$25.54 per \$1,000, or 2.55 per cent.

The cost of collection for the past fiscal year, distributed approximately among the different items of appropriation, was as follows:

Salaries and expenses of collectors of internal revenue	
revenue	2, 616, 307. 17 79, 321. 10 137, 385. 45 143, 995. 77 27, 030. 67 345, 519. 51

Total amount expended...... 5, 484, 654. 61

NOTE.—Not included in this total are bills approximating \$5,000, covering expenses of deputy collectors in excess of allowances, transportation requests, miscellaneous items, etc., not yet adjusted.

The amount expended from the appropriation "Refunding internalrevenue collections" is \$23,513.19. This amount is not considered as a part of the expense incident to the collection of internal revenue, so is not included in expenses enumerated above.

## ESTIMATED EXPENSES FOR NEXT FISCAL YEAR.

I estimate the expenses of the Internal-Revenue Service for the fiscal year ending June 30, 1915, as follows:

Office of Commissioner of Internal Revenue: For salaries of officers, clerks, and subordinate officers	\$372,040
Salaries and expenses of collectors of internal revenue: For salaries and expenses of collectors of internal revenue, and deputy collectors, and surveyors, and clerks, messengers, and janitors in internal-revenue offices.	9 150 000
Salaries and expenses of agents and subordinate officers of internal rev- enue: For salaries and expenses of 40 revenue agents provided for by law, and fees and expenses of gaugers, salaries and expenses of store-	2, 150, 000
keepers and storekeeper-gaugers Miscellaneous expenses, Internal-Revenue Service: For rent of offices out- side of the District of Columbia, telephone service, and other miscella-	2, 625, 000
neous expenses incident to the collection of internal revenue Paper for internal-revenue stamps: For paper for internal-revenue stamps,	90, 000
including freight.	90, 000
Punishment for violation of internal-revenue laws: For detecting and bring- ing to trial and punishment persons guilty of violating the internal- revenue laws or conniving at the same, including payments for informa- tion and detection of such violations.	200, 000
Refunding internal-revenue collections: To enable the Secretary of the Treasury to refund money covered into Treasury as internal-revenue	,
collections under the provisions of the act approved May 27, 1908 Collecting the income tax: For expenses of assessing and collecting the income tax as provided in paragraph N, section 2, of an act entitled "An act to reduce tariff duties and to provide revenue for the Govern-	50, 000
ment, and for other purposes," approved Oct. 3, 1913	1, 500, 000
Total	7,077,040
Salaries, office of Commissioner of Internal Revenue (reimbursable): For salaries of two stamp agents and one counter	3, 400

### SALARIES.

I have the honor to recommend that Congress appropriate for the fiscal year ending June 30, 1915, the sum of \$372,040 as salaries for the following officers, clerks, and employees of this bureau:

	<b>0</b>	
1	Commissioner of Internal Revenue	\$6,000
. 1	deputy commissioner	4,000
1	deputy commissioner	3, 600
1	chief chemist	3,000
1	chemist	2,500
2	first assistant chemists, at \$1,800 each	3, 600
1	second assistant chemist	1, 600
1	third assistant chemist	1, 400
9	heads of division, at \$2,500 each	22,500
1	superintendent of stamp vault	2,000
	clerks, at \$2,000 each	10,000
1	private secretary	1, 800
- 33	clerks of class 4	59, 400
29	clerks of class 3	46, 400
41	clerks of class 2	57, 400
40	clerks of class 1	48,000
32	clerks, at \$1,000 each	32,000
42	clerks, at \$900 each	37, 800
4	messengers, at \$840 each	3, 360
	assistant messengers, at \$720 each	15, 120
16	laborers, at \$660 each	10,560
	-	
283	Total	372,040

I also recommend the appropriation of the sum of \$3,400 as salaries of two stamp agents, one at \$1,600, one at \$900, and one counter at \$900, the same to be reimbursed by the stamp manufacturers, as provided by the act of August 5, 1882.

## SCALE OF SALARIES OF COLLECTORS.

The recommendations made for the salaries of collectors are based upon an estimate of their probable collections according to the following scale, with the qualification that if the actual collections vary from the amounts estimated the salaries will be readjusted at the end of the fiscal year:

For collection of—	Salary.	For collection of	Salary.
\$25,000 or less           \$25,001 to \$37,500           \$37,501 to \$50,000           \$50,001 to \$100,000           \$100,001 to \$125,000           \$101,001 to \$125,000           \$102,001 to \$175,000           \$25,001 to \$175,000           \$25,001 to \$175,000           \$25,001 to \$225,000           \$275,001 to \$225,000           \$275,001 to \$225,000           \$275,001 to \$325,000           \$275,001 to \$325,000           \$325,001 to \$375,000	2,125 2,250 2,375 2,500 2,625 2,750 2,875 3,000 3,125	\$375,001 to \$425,000 \$425,001 to \$475,000 \$475,001 to \$477,000 \$550,001 to \$625,000 \$502,001 to \$700,000 \$700,001 to \$775,000 \$775,001 to \$850,000 \$850,001 to \$892,000 \$2025,001 to \$999,999 \$1,000,000 and upward	3,500 3,625 3,750 3,875 4,000 4,125 4,250

In addition to the salary based upon the above-mentioned scale, each collector is entitled to receive a commission of one-half of 1 per cent on tax-paid spirit stamps, and may receive additional compensation on account of territorial extent, as provided by law, provided the gross compensation does not exceed \$4,500. (See sec. 3148 as amended and sec. 3314, Rev. Stat.)

16726°---FI 1913------32

## REPORT ON THE FINANCES.

The force connected with this bureau during the fiscal year ended June 30, 1913, in the various collection districts as reorganized under the executive orders of May 21, 1887, and September 16, 23, and 30, 1912, was 63 collectors, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
1 1 1	4,378.91 4,359.29 4,156.41	1	3,878.79 3,875.82 3,875.00	1 1 1 1	3 375 00

NOTE.—Four districts, fourth California, twelfth Pennsylvania, South Carolina, and fourth Texas, were consolidated with other districts on October 1, 1912. The salaries of the collectors for these districts for three months were as follows: Fourth California, \$1,031.25; twelfth Pennsylvania, \$1,125; South Carolina, \$343.75; and fourth Texas, \$815.92.

There were employed 1,231 deputy collectors who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
14 12 18 18 18 18 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10 10	\$2,500 2,400 2,200 1,900 1,800 1,700 1,600 1,500 1,459 1,400 1,350 1,300	2 289	\$1,250 1,200 1,150 1,100 1,000 1,000 850 820 800 750 720 700	26	\$600 500 480 450 400 360 300 240 200 180 100 60 55

Note.—Of this number 72 were paid from the appropriation "Expenses of collecting the corporation tax."

There were also employed in the offices of the different collectors 126 clerks, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
1 1 5 4 15	1,700 1,600 1,500	13 1	$1,250 \\ 1,200 \\ 1,150$	16 12 7	\$1,000 900 800

Note.-Of this number 1 was paid from the appropriation "Expenses of collecting the corporation tax."

Also 12 messengers and 1 janitor, who received per annum salaries as follows:

Number.	Salary.	• Number.	Salary.	Number.	Salary.
1 1 2	.\$900 840 800	6 1	\$720 600 550	1	\$300

## FIELD FORCE.

During the first three months of the fiscal year there were 67 collectors and during the last nine months there were 63 collectors. There were 1,231 deputy collectors, 40 internal-revenue agents on the regular roll, and 18 internal-revenue agents and inspectors on the corporation-tax roll, 127 gaugers, who received fees not to exceed \$5 per day, 47 storekeepers whose pay did not exceed \$4 per day, and 2,051 storekeeper-gaugers whose pay ranged from \$3 to \$5 per day, and 7 distillery surveyors at \$2.50 per day.

The gaugers, storekeepers, etc., were paid only when actually employed.

## OBJECTS OF TAXATION.

## DISTILLED SPIRITS.

During the past fiscal year there were produced from materials other than fruit, 185,353,383.1 taxable gallons of distilled spirits, or 7,103,398.1 gallons in excess of the quantity of like spirits produced during the fiscal year 1912.

There was also a corresponding increase in this class of spirits removed from bonded warehouses during the last year on payment of tax, the quantity so withdrawn (140,289,424.8 taxable gallons) exceeding that of the previous year by 7,030,277.2 gallons. The quantity remaining in distillery and general bonded warehouses, June 30, 1913, was 276,784,540 taxable gallons, or 12,998,708.2 gallons in excess of the quantity so held at the close of the fiscal year 1912.

From the following statement, showing the production and taxpaid withdrawal of spirits during each of the past 15 years, and the quantity held in bond at the close of each year, it will be seen that the transactions during the last year exceeded those of any previous year, and are nearly double that reported for the year 1899:

Fiscal year.	Produced.	Withdrawn (tax-paid).	Remaining in warehouse.
1899	$\begin{matrix} 134,311,952.0\\147,810,794.3\\145,666,125.1\\168,573,913.2\\126,989,740.1\\133,450,755.1\\156,237,526.4\\175,402,395.5\end{matrix}$	Gallons. 83,694,338.1 93,391,827.8 99,191,721.5 103,304,981.5 112,788,168.0 116,033,305.6 115,994,857.5 122,617,943.1 134,031,066.7 119,703,594.4 114,693,578.2 126,384,726.7 132,058,636.5 133,259,147.6 140,289,424.8	Gallons. 136, 841, 378. 9 152, 733, 138. 0 168, 742, 430. 5 188, 350, 778. 1 195, 135, 925. 8 215, 557, 323. 6 226, 735, 828. 8 245, 438, 816. 0 235, 026, 128. 2 229, 141, 434. 0 233, 508, 674. 6 249, 279, 346. 6 263, 785, 831. 8 276, 784, 540. 0

While the stock of spirits held in warehouses at the close of the year 1913 was somewhat increased by the large production during the year, the quantity so held, as to which the bonded period will expire during the next four years, aggregates 32,835,769.4 gallons only. These spirits, now eligible for bottling in bond, average for the four years mentioned, a little over 8,000,000 gallons annually; and; as the quantity bottled in bond during the past year, on payment of tax or for export, was 10,681,047 gallons, it is evident that no large overstock of spirits of this class is now carried in bond.

## REPORT ON THE FINANCES.

The following table shows the quantity of spirits of various ages remaining in bonded warehouses at the close of the fiscal years 1912 and 1913:

	Remaining in warehouse.		
Age of spirits.	1912	1913	
Less than 1 year old. More than 1 and not more than 2. More than 2 and not more than 3. More than 3 and not more than 4.	Gallons. 78, 275, 597. 8 67, 691, 159. 1 48, 732, 995. 0 31, 497, 831. 0	Gallons. 79, 379, 521. 1 65, 918, 099. 6 58, 983, 168. 9 39, 667, 981. 0	
Less than 4 years old	226, 197, 582. 9	243, 948, 770.6	
More than 4 and not more than 5. More than 5 and not more than 6. More than 6 and not more than 7. More than 7.	13,832,886.2	18, 156, 715. 9 5, 460, 797. 0 6, 202, 547. 2 3, 015, 709. 3	
More than 4 years and eligible for bottling	37, 588, 487. 8	32, 835, 769. 4	
Total in bond	263, 785, 831. 8	276, 784, 540. 0	

### DENATURED ALCOHOL.

During the past fiscal year there was denatured, free of tax, 9,831,658.54 wine gallons of alcohol and rum, as against 8,094,515 gallons denatured during the preceding year, or an increase of 1,737,143.54 wine gallons.

The following statement shows the quantity of such spirits denatured during each of the fiscal years since the enactment of the denatured alcohol law of June 7, 1906:

	Number of dena- turing ware- houses.	Completely de- natured.	Specially de- natured.	Total.		
Fiscal year.				Wine gallons.	Proof gallons.	
1907 1908 1909 1910 1911 1912 1913	8 12 12 12 14 14 14 21	Wine gallons. 1, 397, 861. 16 1, 812, 122. 38 2, 370, 839. 70 3, 076, 924. 55 3, 374, 019. 92 4, 161, 268. 56 5, 223, 240. 78	Wine gallons. 382, 415, 19 1, 509, 329, 35 2, 185, 579, 15 3, 002, 102, 85 3, 507, 109, 94 3, 933, 246, 44 4, 608, 417, 76	$\begin{array}{c} 1,780,276.35\\ 3,321,451.73\\ 4,556,418.85\\ 6,079,027.10\\ 6,881,129.86\\ 8,094,515.00\\ 9,831,658.54\end{array}$	3,084,950.8 5,640,331.2 7,967,736.4 10,605,870.7 11,682,887.9 13,955,903.8 16,953,552.8	
Total	<i>.</i>	21, 416, 277. 05	19, 128, 200. 38	40, 544, 477. 43	69, 891, 233. <b>6</b>	

As shown by the foregoing statement there has been a very noticeable and nearly uniform annual increase in the demand for this class of spirits; and, as will be noted, the quantity specially denatured about equals the quantity of completely denatured alcohol which, under existing regulations, may be sold and used without restriction for general purposes, such as for fuel, light, and power. The use of specially (incompletely) denatured alcohol, however, is permitted only in the manufacture of certain articles or preparations under regulations which require careful supervision on the part of the revenue officers. Up to the present time some 20 formulas for specially denatured alcohol have been approved for different lines of

Digitized for FRASER http://fraser.stlouisfed.org/ Federal Reserve Bank of St. Louis

# 500

manufacture, and the quantity denatured under each of these formulas is given in a statement to be found on page 69 of this report. As shown in that statement the greater portion of the spirits so denatured is used in the manufacture of a class of articles and preparations as to which little, if any, reduction is made in the retail price on account of the exemption from tax of the alcohol so used. In view of the fact that the manufacturer in such cases, and not the public, is getting the benefit of this tax exemption, and as no inconsiderable expense is annually incurred by the Government in supervising the manufacture and use of such alcohol, I have to renew the recommendation made by my predecessor on page 12 of his report for the fiscal year 1912, that a nominal tax of, say, 1 cent per proof gallon, sufficient to cover the expense of such supervision, be imposed on this class of spirits.

Under existing law relating to the use of wine spirits free of tax in the fortification of sweet wine, a charge of 3 cents per proof gallon on the spirits so used is collected for the purpose of defraying the expense of the Government in supervising the use of such spirits, and the imposition of the tax or charge above recommended for a like purpose would seem both reasonable and proper under the circumstances stated.

### INDUSTRIAL DISTILLERIES.

With a view to encouraging the establishment of small distilleries for the manufacture of alcohol from waste products, the amendatory act of March 2, 1907, provides for the establishment of distilleries, having a daily capacity not exceeding 100 proof gallons, for the production of alcohol "from any substance whatever for denaturation only."

By regulations authorized by that act, distilleries of this class are exempt from most of the requirements imposed by law on other distilleries; but notwithstanding these very liberal regulations no distilleries of this class, designated in the regulations as "industrial distilleries," have so far been established, and doubtless for reasons set forth on page 7 of my predecessor's report for the fiscal year 1907. Provision, however, is now made in section IV (subsection 2) of the tariff act of October 3, 1913, for the establishment after January 1 next by farmers or associations of farmers, or others, of distilleries for the manufacture of alcohol free of tax for denaturation only, "out of any of the products of farms, fruit orchards, or of any substance whatever;" also for the establishment of "central distillery and denaturing plants" to which the alcohol so produced at these smaller distilleries (if not of sufficient proof strength, and not denatured on the distillery premises), may be transferred, redistilled, and redenatured under regulations and upon the execution of such notice and bond as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may prescribe. Under the privilege thus granted alcohol may hereafter be produced without restriction either as to the quantity or proof, thereby enabling inexperienced persons to operate small distilleries at a comparatively small cost.

Regulations governing the registry and operation of such distilleries and central denaturing plants will soon be issued, and in localities where such central plants are located, it is probable that farmers having sufficient waste farm products and having occasion to use denatured alcohol in any considerable quantity for farm purposes will avail themselves of this privilege. But it is, of course, difficult at this time to estimate even approximately the number of stills that will be so established and operated or the quantity of denatured alcohol that will be so produced.

## DISTILLERIES.

During the fiscal year ended June 30, 1913, there were operated for the production of distilled spirits 398 grain distilleries, 22 molasses distilleries, and 450 fruit distilleries, a total of 870, an increase of 49 as compared with the fiscal year ended June 30, 1912.

During the year the systematic examination and close supervision of establishments engaged in the manufacture, rectification, and sale of distilled spirits heretofore employed have been continued, together with the scientific instruction of field and distillery officers.

### FERMENTED LIQUORS.

The production of fermented liquors during the fiscal year ended June 30, 1913, was 65,324,876 barrels, being an increase of 3,148,182 barrels over the production of the previous fiscal year.

The number of breweries operated during the year was 1,446, a decrease of 15 as compared with the fiscal year 1912. Pipe lines were employed for conveying fermented liquors to the bottling premises at 296 of the breweries operated.

### TOBACCO.

The receipts from the tax on manufactured tobacco, snuff, cigars, and cigarettes for the fiscal year ended June 30, 1913, amounted to \$76,789,424.75, an increase over the collections from this source during the fiscal year ended June 30, 1912, of \$6,199,273.15.

There were in operation during the calendar year 1912, 20,555 cigar factories and 469 cigarette factories, this being a decrease of 710 cigar factories and 9 cigarette factories. There were also registered 2,727 establishments producing manufactured tobacco, 76 producing snuff, 4,407 dealers in leaf tobacco, and 833 retail dealers in leaf tobacco in the United States.

Reports of retail dealers in leaf tobacco continue to show only a very limited sale of unmanufactured leaf tobacco.

It is again recommended that such legislation be enacted as will require every dealer in leaf tobacco to give a bond, the minimum penalty of which will be not less than \$100, the penal sum of the bond to be increased according to the extent of the business proposed to be done and fixed by the collector of the district with right of appeal by the dealer to the Commissioner of Internal Revenue in respect to the amount of said bond. Each dealer in leaf tobacco should be required by law to make a true inventory of stock annually on the 1st day of January in each year and the Commissioner of Internal Revenue empowered to call upon dealers in leaf tobacco to show cause against assessment for tax on tobacco not accounted for and to make such assessments where explanations are not found satisfactory. Each dealer in leaf tobacco quarterly or monthly

or for such periods as the Commissioner of Internal Revenue shall prescribe.

To lax laws relative to dealers in leaf tobacco is attributed the escape of considerable tobacco from tax payment. Registry with the collector for the district is now the only requisite before commencing business. A leaf dealer carrying a considerable quantity of tobacco on his books may disappear, as a number of them have each year, leaving no trace of the tobacco, and as no bond is now required of them, thousands of pounds of tobacco are not accounted for, the greater part being manufactured into cigars, which find their way to consumers without being tax paid.

It is again recommended that manufacturers of cigars, manufacturers of tobacco, dealers in leaf tobacco and retail dealers in leaf tobacco be required to register only on commencing business and not annually thereafter on the 1st day of July of each year. This will relieve collectors of internal revenue of considerable unnecessary labor and will effect a considerable saving in printing and stationery.

The question of the liability to tax of cigars known as "smokers" furnished to, or taken by, employees of manufacturers of cigars was decided by placing on the statute books the act approved February 10, 1913, amending section 3392 of the Revised Statutes as follows:

That each employee of a manufacturer of cigars shall be permitted to use, for personal consumption and for experimental purposes, not to exceed 21 cigars per week, without the manufacturer of cigars being required to pack the same in boxes, or to stamp or pay any internal revenue tax thereon, such exemption to be allowed under such rules and regulations as the Secretary of the Treasury may prescribe.

Regulations have been issued in pursuance of this law and printed as Treasury Decision No. 1875.

The phenomenal increase in the number of cigarettes manufactured and removed tax paid during the fiscal year ended June 30, 1912, noted in the last annual report, has been more than maintained during the fiscal year ended June 30, 1913, for which receipts from the sale of stamps show the tax payment of 14,276,771,160 cigarettes, weighing not more than 3 pounds per thousand, an increase of 3,055,146,176 cigarettes over the previous fiscal year.

# SPECIAL EXCISE TAX ON CORPORATIONS.

The collections of the special excise tax on corporations during the fiscal year ended June 30, 1913, amounted to \$35,006,299.84, making the aggregate collections from this source for the four years the special excise tax law has been in existence \$118,060,868.39. The total amount of corporation taxes assessed during the fiscal year ended June 30, 1913, including the 50 per cent additions to the tax because of failure or refusal of corporations to file their annual returns of net income on or before the first day of March was \$36,208,839.12, which is \$7,291,333.18 in excess of the year 1911, and is \$6,776,583.69 in excess of the highest corporation tax assessed during any previous fiscal year.

Of the total amount assessed during the past fiscal year, \$3,320,958.78 represents taxes assessed for the calendar years 1909, 1910, and 1911, the amounts due being ascertained through the investigation of revenue agents and inspectors and the adjustment of returns in this office from printed reports of the results of the operations of corporations, insurance companies, etc. The corporation taxes assessed for the calendar year 1912 on the basis of the net income shown on the returns as filed exceeded the assessments for the previous year by \$3,970,374.40, indicating either a year of increased business of corporations or an increase in the number of corporations doing business and having a net income in excess of \$5,000.

The excess of assessments for the fiscal year ended June 30, 1913, over previous years is considered to be from both of these sources. No separate statistics showing comparative returns from the same corporations are compiled, but a record of the yearly return of each corporation is kept for reference in guiding the work of verifying the reports of corporations.

The largest increases in the assessments occurred in the districts of second New York, first Illinois, twenty-third Pennsylvania, and first Pennsylvania. Other large industrial centers show increases, while 10 districts show decreases, but the total decreases amounted to but \$159,997.77, and of this amount \$72,512.93 occurred in the fisrt district of Wisconsin.

The 50 per cent addition to the tax assessed because of the failure of corporations, etc., to file their returns of annual net income within the period prescribed by law amounted to \$43,267.66, the smallest amount since the law has been in operation, the assessments on this account being \$90,518.88 for 1912 and \$323,221.20 for 1911.

The total number of corporations filing returns for the calendar year 1912 is 305,336, an increase of 16,984 over the calendar year 1911, the percentage of increase being 5.89.

The growth in the number of corporations in the United States is indicated by the number of returns made by those engaged in business for profit, which for the year 1909 was 262,490; for 1910, 270,202; for 1911, 288,352; for 1912, 305,336.

The 305,336 corporations rendering returns for the calendar year 1912 report a capital stock of \$61,738,227,730.54. They report bonded and other indebtedness of \$34,749,516,353.63, and an aggregate net income of \$3,832,150,410.92. The increase in capital stock in 1912 over 1911 is \$1,671,088,805.12, while the amount of bonded and other indebtedness shows an increase of \$2,585,978,392.23. The net income reported shows an increase of \$618,443,163.10.

The 33,234 corporations listed in class A, which embraces all incorporated financial institutions and insurance companies, report an aggregate net income equivalent to 15.89 per cent on the capital stock reported. Included in this list, however, are many insurance companies which have no or only a nominal capital stock.

The 25,585 corporations listed in class B, which embraces all public service corporations, such as transportation companies, heating and lighting companies, report an aggregate net income equivalent to 4.46 per cent on the capital stock reported.

The 96,122 corporations in class C, which embraces industrial and manufacturing concerns, report a net income equivalent to 6.29 per cent on the capital stock reported.

The 67,325 corporations in class D, which embraces all mercantile corporations not otherwise classed as producers or manufacturers, report a net income equivalent to 10.34 per cent on the capital stock reported. The 83,070 corporations in class E, which includes such miscellaneous corporations as are not otherwise classed, report a net income equivalent to 4.5 per cent on the capital stock reported.

The total number of returns filed for 1912 was 305,336, while the number of corporations having a net income in excess of \$5,000 was 61,116, or 20.01 per cent. The percentage of such corporations differ in accordance with the class. In class A, 12,185, or 36.69 per cent of the corporations making returns, report net incomes of \$5,000 or over; in class B, 4,751, or 18.56 per cent; in class C, 21,429, or 22.29 per cent; in class D, 13,834, or 20.54 per cent; and in class E, 8,917, or 10.73 per cent.

Attention is called to the decrease in the amount of capital stock of corporations in Class C in the second district of New York, amounting to \$1,376,265,330.70. Class C is composed of industrial and manufacturing corporations, such as mining, lumber, and coke companies, mills of all kinds, all manufacturers, etc. The greatest decrease occurs in the capital stock of mining corporations, many of which ceased to exist or are not doing business. Some of these mining enterprises which ceased to do business during the past year were entirely legitimate and failed through the lack of realization of the hopes of the promoters in the development of mining properties. Others of these defunct mining corporations were probably never more than prospective mining enterprises and did not get beyond the stage of placing their stock upon the market for sale.

The work of investigating the returns of annual net income of corporations to ascertain whether the return had been properly made—that is, whether all income required by law to be included in the return of annual net income had been so included and that the deductions from gross income did not include any sums other than those allowed by law—has been prosecuted with such vigor as was possible with the limited force at the command of the commissioner for this purpose.

The additional assessments arising through the investigations of agents and the work of adjustment of returns of annual net income in the office of the commissioner resulted in additional assessments for the year 1909, 1910, and 1911, of \$3,320,958.78, of which amount \$1,392,336.05 belonged to the year 1911. The investigations have been going on more actively the past six months and the work has been carried into several new centers of population, so that every important mining, industrial, and financial district in the United States has received some attention, as has also many of the less important centers, With an adequate number of agents who are properly fitted to carry out the work of verifying the returns of annual net income of corporations, not only will additional tax be secured but the general work of educating the corporations as to their duties and the requirements of the Government as to the ascertainment of annual net income in accordance with the rules laid down, in the law will be carried on with more celerity. "It is realized that this work will be under the income-tax law next year and with the likelihood that there will be little change for many years to come in the system of obtaining revenue from this source, it is believed that every effort should be put forth in every possible manner to

require corporations to make absolutely accurate returns of annual net income, not only for one year but for every year, and failure to make accurate returns of annual net income will be carefully inquired into, to ascertain whether there was any intent, in such cases, to evade the tax. The law providing for a special excise tax on corporations has now been on the statute books more than four years, and it is believed that that is a sufficient length of time to have every corporation fully informed as to the requirements of the law, and that they should, therefore, be held to strict accountability for any failure to comply with any of the provisions of the law and the regulations with respect to making their returns of annual net income.

The amount of back taxes for 1911 (\$1,392,336.05) assessed in 1912 is greater than would ordinarily be the case and is attributable to the following circumstances. On January 9, 1912, a disastrous fire occurred in a large office building in the city of New York, in which the records of many corporations were lost and it was impossible for such corporations to make complete returns of annual net income within the period prescribed by law until the records could be rehabilitated from other sources. Tentative returns were, therefore, filed and permission was given the corporations to file amended returns as soon as sufficient data could be again assembled and accurate returns of annual net income be made. The corporations affected were not able to complete this work until after the close of the fiscal year, so that when assessment was made the amounts were assessed and collected during the fiscal year ended June 30, 1913, and credited to back taxes collected. Ordinarily, back taxes collected refer to taxes ascertained to be due the Government from the investigations of revenue agents, while the amounts referred to above arose in an entirely different way and had the effect, as stated, of increasing to an abnormal amount the back taxes assessed for the fiscal year ended June 30, 1911.

The constant inquiries being made by the Government into the returns of annual net income of corporations disclose many instances of faulty accounting, and many investigations have resulted in the corporation being placed upon a financial footing more sound and more secure by reason of the fact that the officers of the corporation were brought to realize that their method of accounting was entirely inadequate and the resulting adoption of modern accounting.

In various instances the investigations of the Bureau of Internal Revenue caused corporations to call in public accountants for the purpose of ascertaining just what was the status of the financial condition of the corporation, and these examinations frequently resulted in conclusions most astounding to the officers of the corporations affected. The conditions revealed were sometimes unpleasant to the officers of the corporation, but however unpleasant a knowledge of the facts might be, a realization of actual conditions was beneficial, and half the cure of the trouble. In this particular the investigations referred to have been of very great service to many corporations. Although much remains to be accomplished, it is considered that the results of the administration of the law providing for the special excise tax on corporations show satisfactory progression.

#### OLEOMARGARINE.

The fiscal year ended June 30, 1913, established the highest record of operations in oleomargarine since the enactment of the original law, August 2, 1886, with a total production of 138,707,426 pounds of uncolored and 6,520,436 pounds of colored oleomargarine, or a total of 145,227,862 pounds of both classes, as against 122,365,414 pounds of the uncolored and 6,235,639 pounds of the colored, making a total of 128,601,053 pounds of these two classes during the fiscal year 1912, or an increase of 16,342,012 pounds of the uncolored and 284,797 pounds of the colored, making a total net increase of 16,626,809 pounds over the previous year.

The fiscal year 1910 shows the next highest record of production, with a total of 141,862,280 pounds of both classes, which is 3,365,582 pounds less than that produced in 1913.

Withdrawals tax paid during 1913 amounted to 138,242,848 pounds at one-fourth cent and 4,090,658 pounds at 10 cents per pound, or a total of 142,333,506 pounds as compared with 121,945,038 pounds at onefourth cent and 3,174,331 pounds at 10 cents, making a total of 125,119,369 pounds at both rates during 1912, an increase of 16,297,810 pounds of uncolored and 916,327 pounds of the colored; a total net increase of 17,214,137 pounds tax paid during the fiscal year 1913.

A decrease of 46,474 pounds of uncolored and 626,149 pounds of colored product is shown in the withdrawals free of tax for export during 1913.

The total collections from all oleomargarine sources during 1913 amounted to \$1,259,987.67 as against \$1,128,707.25 during 1912, being an increase of \$131,280.42. Of these collections for 1913, \$16,750 was from special taxes of manufacturers; \$21,048 from retail dealers in colored product; \$291,645.08 from retail dealers in uncolored; \$3,340 from wholesale dealers in colored; \$162,575.25 from wholesale dealers in uncolored product; and \$417,165.38 from stamp tax at 10 cents and \$347,463.96 stamp tax at one-fourth cent per pound.

A slight decrease is reported in the number of violations during 1913, there being a total of 1,745 cases as against 1,779 in 1912. These violations involve 1,375 persons and consist of 78 cases of illicit manufacture through addition of artificial coloration to the uncolored product; 46 violations by wholesale dealers for failure to pay tax, keep Government record, or render returns, and 1,251 cases against retail dealers for infractions of the various sections of the law governing the sale of the product by them.

Prosecutions were instituted against 17 illicit manufacturers, 7 wholesale dealers, and 29 retail dealers, or a total of 53 cases, which resulted in the conviction of 6 illicit manufacturers, 1 wholesale and 3 retail dealers. The other 43 cases, with those pending at the beginning of the year, are still before the courts. The remainder were settled by compromise or dropped upon recommendation of the officers. A total of \$1,969.24 was collected from fines imposed by the courts; \$110,610.52 by compromise, in addition to which \$62,383.26 on account of special taxes and \$122,999.69 stamp taxes were assessed on account of these violations.

The present oleomargarine law is not satisfactory either from an administrative or revenue standpoint, and should be so amended as to remedy it in both respects.

Considerable comment has, in the past, been made in the matter of the production of illicit spirits and the consequent loss to the Government of taxes on that product, and while it is true that the Government sustains quite a loss on this account, it is not to be compared with the loss that may be and has been sustained in the illicit traffic in oleomargarine. In any of the three or four large cities of the country, the Government, unless the illicit traffic in the manufacture and sale of oleomargarine is controlled, will lose more taxes from this source than would be lost in the way of taxes on distilled spirits illicitly produced in all the Southern States.

A law imposing a flat tax of a nominal rate without any differentiation based upon coloration with provision for individual stamped or original packages of certain sizes adequately marked and branded, and safeguarded by the proper penalties, would, in my opinion, be easier of enforcement and yield greater revenues than the present law and with less expense to the Government.

#### ADULTERATED BUTTER.

During 1913 there were reported 105 cases of the manufacture of adulterated butter; 9 wholesale and 3 retail dealers in this product, a total of 117 arising under the act of May 9, 1902, which involved the collection of special and stamp taxes amounting to \$54,189.72, an increase of \$8,087.32 in collections from this source during the fiscal year 1913.

Practically all of these cases grew out of the manufacture and sale of butter containing moisture of 16 per cent or more.

This law, which was apparently intended to prevent the manufacture and sale of butter adulterated within the common meaning of the term, has because of its definitions and drastic provisions brought about very unfortunate conditions through its enforcement. It has increased the work of officers in the field and this bureau without any appreciable revenues and at the same time has imposed hardships upon many who produced and sold butter which was afterwards found to contain abnormal moisture, thereby involving themselves as well as dealers handling the product in liabilities to the heavy special taxes provided by the law. In many instances of small manufacturers the collection of these taxes has been so oppressive as to practically cause their bankruptcy.

### RENOVATED BUTTER.

A decrease is shown in the production and withdrawal taxpaid of renovated butter during the fiscal year ended June 30, 1913. There were 38,354,762 pounds produced and 38,285,114 pounds withdrawn taxpaid, as against 46,387,398 pounds produced and 46,413,895 pounds taxpaid during 1912, this being a decrease of 8,032,636 pounds and 8,128,781 pounds in these items.

### LABORATORY WORK.

Oleomargarine.—While no large cases were developed during the year, considerable work was done in completing the work on the so-called "sulphur" cases. Judged by the number of samples, "moon-shining" is probably on the decrease. During this period the sys-

tem has been established of obtaining monthly samples of all the ingredients used at each factory and subjecting them to a careful chemical examination. Such work is always burdensome to the men taking the samples and those analyzing them, because seemingly no results are accomplished, but time should prove the wisdom of the system.

Butter.—The number of samples of butter submitted, suspected of containing an excessive amount of water (16 per cent and over) runs rather constant from year to year. The work this year has been particularly heavy by reason of preparing several cases for trial, an adverse decision in the eighth circuit forcing the office to defend vigorously the correctness of the position of the Government in establishing 16 per cent of water as an abnormal quantity in butter.

lishing 16 per cent of water as an abnormal quantity in butter. Distilled spirits.—The samples analyzed consisted of suspected samples and known genuine samples obtained from distillery warehouses for purposes of comparing with the suspected illegal samples. There was probably less substitution by the use of neutral spirits colored with caramel than ever before, undoubtedly due to the ease with which such fraud can be detected chemically. In lieu of this practice, "quick-aged" goods, which have developed a color, and the chemical constituents or congeners of which are developed to some extent as in genuine straight whisky, are used for substitution. The same situation exists in the sophistication of bottled-in-bond goods on the "bar;" instead of using artificially-colored spirits, aged whiskies of inferior quality are used for refilling. The chemical work is thus rendered all the more difficult, but particularly difficult is it for the field men to decide what samples to send in for analysis.

Fermented beverages.—Most of the samples analyzed are of the socalled "near beer" type, the label being no guarantee that the product contains less than 0.5 per cent alcohol. Cases have been found where two bottles bore similar labels, but one had a green cap and one a yellow cap, the green cap, for example, belonging to the true 0.5 per cent untaxable preparation, the one distinguished by the yellow cap being a standard beer of 3.5 per cent alcohol. For this type of liquor there is nothing to do but to take samples continually for analysis.

Medicinal preparations.—Flagrant violations of the internal-revenue statutes by the so-called patent-medicine manufacturers are becoming rare; at least to this extent has good been done in reducing the number of highly alcoholic fake medicines on the market. While to the minds of many people a number of the preparations passed by the office would appear not to be medicines, yet they had to be passed because they did contain a United States Pharmacopæia dose of a legitimate medicinal ingredient. This is another class of samples difficult for the field officer to decide when to submit for analysis.

Brandy mashes.—This work has decreased considerably during the past year, due undoubtedly to a more vigorous chemical and field supervision.

Distillery beer.—The samples of distillery beer were submitted by the agents on their own volition or on request of this office. The laboratory has charge of the fermentation report contained in Form 88, and when the different figures do not harmonize samples of beer are requested. A direct increase of yield can be shown as a result of

this supervision, amounting in one distillery to at least 1,000 gallons a month.

*Opium.*—Much of the opium work is done with the cooperation of the customs officers. A better chemical knowledge of the differences in composition between smoking opium produced abroad and that illicitly manufactured in this country has resulted in the successful prosecution of many cases of illicit manufacture.

The difficult part of the work of the laboratory is that as the chemists become more expert in their work, the adulterators or sophisticators become correspondingly expert in their chosen line. The result is that each year more time has to be spent in analyzing samples of known origin.

CLAIMS.

At the beginning of the fiscal year ended June 30, 1913, there were pending 540 claims of all kinds, amounting to \$1,206,335.99. There were received during the year 9,097 claims, aggregating \$5,507,815.42. During the year 8,137 claims were disposed of, amounting to \$4,589,111.12, leaving on hand July 1, 1913, 1,500 claims of all kinds aggregating \$2,125,040.29.

Of the refunding claims pending July 1, 1913, 502 claims, amounting to \$945,223.25, are claims of lessor corporations for refund of excise taxes, these claims being predicated upon the decision of the Supreme Court in the so-called "Minehill" case. Of the total tax refunded during the year, \$148,777.83 was tax upon legacies and distributive shares, the major part of which was refunded under the act of July 27, 1912. There was also refunded under special acts of Congress \$61,521.92 paid for documentary stamps affixed to foreign bills of exchange and bills of lading. Under the act of March 3, 1913, there were refunded 50 per cent additional excise taxes aggregating \$27,605.53.

### LITIGATION AND LEGISLATION.

### LITIGATION.

On July 1, 1912, there were pending 633 civil cases and 4,125 criminal cases growing out of violations of the internal-revenue laws. During the year there were instituted 803 civil cases and 4,104 criminal cases. Eight hundred civil cases and 4,434 criminal cases were disposed of during the year, and the number of civil cases pending June 30, 1913, was 636, and of criminal cases 3,795, as shown by reports received from the Department of Justice.

In addition to the court cases handled, a large number of reports of violations of law from officers in the field were received and examined, and during the fiscal year 12,781 compromise cases, growing out of such violations in this or previous years, were received as against 36,646 in the fiscal year 1912.

In explanation of this apparently marked falling off in the number of compromise cases received as compared with 1912, it may be stated that during the last month of the fiscal year 1911 several thousand offers in compromise were received, which, owing to limited force, it was impossible to dispose of or even record. These offers were, therefore, carried over and taken up during the fiscal year 1912 as received during that year. For the past year, however, all work of this character has been current.

The total number of reports of seizures received, examined, and recorded during the fiscal year was 3,023 as compared with 3,095 during the year previous.

### COURT DECISIONS.

A number of important cases, involving questions under the internal-revenue laws, were decided in the courts during the past year.

The United States Supreme Court, in the case of McCoach, collector, v. Minehill and Schuylkill Haven Raitroad Company, rendered a decision April 7, 1913, against the United States, holding that a railroad corporation, which has leased its property for a term of years and parted with its control and management, but which maintains its corporate organization and collects rentals from the lessee company and distributes the same among its stockholders, is not "engaged in business" within the meaning of the corporation tax act of 1909, and is not liable for taxes thereunder, notwithstanding the lease provides for recovery of the property in case of default. (228 U. S., 295; T. D. 1847.) A large number of cases pending in the courts, in which the same question was involved, were held awaiting this decision. These have been or will be disposed of on the basis of that decision.

In the cases of Jordan, collector, v. Roche and Jordan, collector, v. Ross, relative to tax on bay rum from Porto Rico imported prior to the act of February 4, 1909, the court rendered a decision in favor of the Government, which disposes of cases held awaiting that decision.

The following test cases on corporation-tax questions are now pending in the Supreme Court:

United States v. Frederick W. Whitridge, receiver, etc. Question of receiver making return.

United States, petitioner, v. Adrian H. Joline and Douglass Robinson, receivers. Same question.

Stratton's Independence, Ltd., v. Howbert, collector. Question of depreciation.

Decisions favorable to the Government have been rendered in the following cases:

In the United States Circuit Court of Appeals for the Third Circuit, General Inspection and Loading Company v. United States, affirming two previous decisions of the United States District Court for the District of New Jersey; Second Circuit, United States Fidelity and Guaranty Company v. United States, suit on distiller's bond; Fourth Circuit, Wood et al. v. United States, indictment of distiller.

In the United States District Court, Western District of Washington, Pacific Building and Loan Association v. Hartson, collector, relative to liability of building and loan associations to corporation tax; Western District of Ohio, Ohio Creamery and Supply Company v. Rodway, collector, adulterated butter case; Southern District of New York, United States v. Surprise Five, Ten, and Nineteen Cent Store, corporation tax case; Eastern District of New York, Nathan Straus v. Abrast Realty Company. The last-named was a suit by a director and stockholder against the corporation and the treasurer to enjoin payment of the special excise tax to the collector. Held that the action could not be sustained.

## REPORT ON THE FINANCES.

The case of the Mutual Benefit Life Insurance Company v. Herold, collector, involving questions relative to tax on life insurance companies, was decided against the United States in the United States District Court, District of New Jersey, and in the Circuit Court of Appeals, and is to be taken to the Supreme Court.

### LEGACY TAX CASES.

The old legacy tax cases arising under the act of June 13, 1898, have mostly been disposed of. There is one still pending in the United States Supreme Court, viz., McCoach, Collector, v. Pratt, legacy tax on annuities.

### DELINQUENT CORPORATIONS.

The number of cases against corporations which failed to make return of net income for the calendar year ended December 31, 1911, was 26,761, practically all of which have been disposed of either by acceptance of offers in compromise or by dismissal for cause shown. The reports of delinquent corporations for the calendar year ended December 31, 1912, are not yet complete, and therefore the figures can not be given.

Multiplicity of suits is to be avoided, if possible. It is not the policy of this office to involve parties in litigation for failing to make return if the offense was technical only without first giving them an opportunity to settle their controversies with the Government by compromise. However, where the delinquent corporation has been notified of its privilege to make an offer in compromise, but refuses or neglects, and has sufficient assets from which a judgment would be collectible, there is no option except to report it to the United States attorney, as the law requires.

### OLD JUDGMENTS.

Satisfactory progress has been made during the past fiscal year in effecting final disposition of old judgments, many of which have been outstanding for a period of 30 or 40 years.

The total amount received in compromise of judgments under section 3469, Revised Statutes during the fiscal year ended June 30, 1913, aggregated the sum of \$6,876.56.

#### LEGISLATION.

Legislation was passed during the last year affecting internal revenue as follows:

An act extending the time for the repayment of certain war-revenue taxes erroneously collected. Approved July 27, 1912. Time for filing claims for refund of legacy taxes extended to January 1, 1914. (T. D. 1802.)

An act amending section 3392, Revised Statutes of the United States, as amended by section 32 of the act of August 5, 1909, authorizing not to exceed 21 tax-free cigars per week for personal consumption of each employee of a cigar manufacturer. Approved February 10, 1913.

An act to provide for refund or abatement under certain conditions of penalty taxes imposed by section 38 of the act of August 5, 1909, known as the special excise corporation-tax law. Approved March 3, 1913. (T. D. 1838)

An act to amend section 3186, Revised Statutes of the United States. Approved March 4, 1913. (Lien for unpaid taxes. T. D. 1841.)

## STAMPS.

During this fiscal year 3,866,661,646 internal-revenue stamps of all classes and denominations were shipped to collectors of internal revenue. Of this number, 3,859,501,446 represented a face value of \$321,493,589.55. There was an increase of 283,482,022 in the number, and an increase of \$5,010,602.43 in the face value of stamps delivered to collectors during the year. Stamps having no face value were delivered to the number of 7,160,200. These included stamps for rectified spirits, wholesale liquor dealers' packages, distillery warehouse stamps, etc.

### REVENUE AGENTS.

The revenue agents and field officers who have been assigned to duty under their direction during the past fiscal year have maintained the high standard that has prevailed in the past, and are deserving of high commendation.

Illicit distilling continued with a slight abatement. During the past fiscal year there were seized and destroyed 2,375 illicit distilleries, as against 2,466 during the preceding year.

leries, as against 2,466 during the preceding year. Bootlegging is principally carried on in States operating under the local prohibition laws and appears to be one of the hard propositions to solve by internal-revenue officers. The bootlegger is at no time stationary, but moves from place to place, offering and selling his illicit wares. It is impossible, owing to the limited number of revenue officers in the field, to break up this practice, and without the hearty cooperation of the local and State authorities, it is believed that the conditions will grow no better.

## RECOMMENDATIONS.

Several recommendations for statutory changes have been made from year to year in the various annual reports, but inasmuch as the need of the legislation referred to is very great, I have the honor again to include some of those recommendations, with certain others, as follows:

1. Denatured alcohol.—To impose a nominal tax—say, 1 cent per proof gallon—on all alcohol withdrawn for denaturation, which tax would yield a return approximately equal to the amount that should be appropriated to properly take care of the work.

2. Tobacco.—The recommendation is here renewed that section 3360 of the Revised Statutes be amended to require every dealer in leaf tobacco to give bond, make a true inventory of stock annually on the 1st day of January in each year, and to render a report of his transactions quarterly, monthly, or for such periods as the Commissioner of Internal Revenue may prescribe. Section 35, act of August 5, 1909, should also be amended so as to require retail dealers in leaf

16726°—FI 1913—33

tobacco to give bond, and section 26, act of October 1, 1890, to require registry of manufacturers of cigars, manufacturers of tobacco, dealers in leaf tobacco, retail dealers in leaf tobacco, and peddlers of tobacco only on commencing business and not annually on the 1st day of July in each year, as at present.

3. Oleomargarine.—A complete revision of the oleomargarine statutes is strongly recommended, imposing a flat tax of a nominal rate without any differentiation based upon coloration, etc. This matter has been discussed in detail under the heading "Oleomargarine." (See p. 15, supra.)

4. Adulterated butter.—A complete revision of the laws relating to the manufacture and sale of adulterated butter, making a change from the moisture test to a butter-fat test. (See p. 508, supra.)

Respectfully,

W. H. OSBORN, Commissioner of Internal Revenue.

# Hon. W. G. McAdoo, Secretary of the Treasury.

Note.--For details of the report of the Commissioner of Internal Revenue, see his annual report.
