## ANNUAL REPORT ON THE FINANCES.

Treasury Department,<br>Washington, December 4, 1916.

SIR: I have the honor to make the following report:
During the past year the prosperity which set in so strongly during the fiscal year 1915 has grown in strength and volume and is now widely diffused throughout the United States. Fundamental economic conditions have never been more sound. In all lines of industry efficiency of organization and production have reached the highest point in the country's history. General confidence in the future, healthful enterprise and development have been marked characteristics of the year.

The financial strength of the United States-the greatest in our history-gives us a commanding position in world finance. We have been transformed from a debtor into a creditor nation. On November 1, 1916, the stock of gold coin and bullion in the United States was estimated at $\$ 2,700,136,976$, an increase of $\$ 714,597,804$ in the past 16 months. This is the largest stock of gold ever held in the United States or in any other country of the world. Through the operations of the Federal Reserve System and with our abundant supply of gold as a basis, the credit resources of the United States have become more than sufficient for home demand, and we have been able to finance our great domestic and foreign trade without strain and to extend vast amounts of credit to other nations throughout the world.

THE FEDERAL RESERVE SYSTEM.
The experience of the past two years has brought into strong relief the value of the Federal Reserve System. It is not too much to say that our great prosperity could not exist without it. The usefulness of the system has been broadened recently by the amendatory. act of September 7, 1916, which renders it more attractive to member banks and increases the scope and services of the Federal reserve banks. Due to the transference of vault and other reserves to Federal reserve banks, authorized by the original act and the amendatory act, the resources of said banks are now more than $\$ 650,000,000$, while the
total reserves held are over $\$ 400,000,000$, and, in addition, more than $\$ 230,000,000$ is held by Federal reserve agents as special security against Federal reserve notes. About one-fourth of the country's stock of gold is thus mobilized in the hands of the Federal reserve banks and agents.

The increasing strength and efficiency of the Federal reserve banks have enabled them to enlarge their direct service to the business community through the introduction of a definite and comprehensive system for the par clearance of checks throughout the country.

Rates of discount at Federal reserve banks have continued low throughout the year, and most of their open-market paper, consisting largely of acceptances growing out of foreign trade, has been taken below a $2 \frac{1}{2}$ per cent basis. Rates of interest throughout the country have been reduced and stabilized with great advantage to the business of the country.

It would have been impossible to finance our vast domestic and foreign trade without the facilities provided by the Federal Reserve System. Not only has it met the normal and extraordinary needs of business, but it has established confidence securely. Business has been able to go forward without apprehension and the several crises which the country has faced in its international relations during the past two years have been accompanied by no disturbances and have caused not even a tremor in the financial world. The crops of 1915 and 1916 were financed without difficulty and to the great advantage of the iarmers, and the industrial troubles which at one time seemed imminent, because of the threatened railway strike last summer, were not accompanied by the slightest financial uneasiness. Happily the country has been at peace and business and enterprise have had the largest opportunity for favorable development under the most auspicious conditions.

If we make intelligent use of our great power and exceptional financial resources, we can cope successfully with any conditions the future may develop.

## THE FEDERAL FARM LOAN ACT.

The farmers of the United States have suffered more than any other class of our people from a lack of essential credits, both short and long time, to carry on their business properly. Until the passage of the Federal reserve act on December 23, 1913, it was extremely difficult for the farmer to finance his requirements for producing, harvesting and marketing his crops, and for maturing or fattening his live stock for market. The Federal reserve act expressly recognized agricultural or farmers' paper and put it on an equality with the best commercial paper--giving it, in fact, an advantage over commercial paper by making agricultural paper of six months' ma-
turity, or less, eligible for rediscount by Federal reserve banks, while commercial paper with a maturity longer than 90 days is ineligible for rediscount by Federal reserve banks.

What has been accomplished by this provision of the Federal reserve act is this: The six months' note of the farmer, given for any of the purposes described, is now among the most liquid of the assets of a national bank. Therefore, properly secured farm paper should be as much in demand as properly secured commercial paper, and the rate of interest on the one should not be relatively higher than the rate of interest on the other. Nor should there be any lack of available credit for the farmer under the Federal Reserve System, because the local banks may now lend to the farmer in excess of their cash resources by rediscounting or selling to the Federal reserve bank of their district eligible farm paper-thus constantly replenishing their resources and thereby enabling them to meet the legitimate demands that may be made upon them. It is by this means that we have secured, under the Federal reserve act, an elastic system of credit and currency which is automatically responsive to the needs of business and agriculture. As evidence of the value of this provision of the Federal reserve act, it is estimated that during the fiscal year ended June 30,1916 , about one-half of all the paper rediscounted by the member banks with the 12 Federal reserve banks of the country was agricultural paper.

The Federal reserve act also conferred upon national banks a power they had never before possessed, namely, to make loans on farm mortgages not exceeding five years in length. This makes it possible for the national banks of the United States to lend over $\$ 500,000,000$ on such short-term farm mortgages. Reports to the Comptroller of the Currency show that on June 30,1916 , the national banks of the country had lent $\$ 45,737,000$ to farmers on mortgages of this character.

While the Federal reserve act admirably met the needs of the farmer for short-time credits for the various purposes of agriculture and for farm mortgages not exceeding five-year maturities, it did not and could not provide for the long-time amortization farm loans which are so bady needed for the development of the farming industry of the country. Therefore it was that on July 17, 1916, the Federal farm loan law was enacted, establishing a bureau in the Treasury Department under the charge of the Federal Farm Loan Board. The act provides for a board of five members, of which the Secretary of the Treasury is a member ex officio and chairman, and the remaining four members are appointed by the President by and with the advice and consent of the Senate. The President appointed George W. Norris, of Philadelphia, Pa.; Herbert Quick, of Berkeley Springs, W. Va.; William S. A. Smith, of Sioux City, Iowa; and Charles E. Lobdell, of Great Bend, Kans., members of the board and designated

Mr. Norris as Farm Loan Commissioner for the period of one year. These gentlemen qualified and took office on August 6, 1916, and selected W. W. Flannagan, of Montclair, N. J., as secretary. Permanent quarters have been assigned to the board in the Treasury Department building.

The board is directed by the act to divide the country into 12 districts and to locate in each a Federal land bank. Each bank is to have a capital stock of $\$ 750,000$. The stock is to be offered first to the public. The Government will subscribe all or any part of the stock which may not be taken by the public.

Soon after its organization the board commenced holding public hearings in the different States for the purpose of securing the fullest possible information to enable it to determine intelligently the boundaries of the 12 Federal land bank districts and the location of a Federal land bank in each district. At the time of writing this report (Nov. 11, 1916) hearings have been held in the following States:

| Maine, | Oregon. | New Jersey, |
| :--- | :--- | :--- |
| New Hampshire, | California, | Pennsylvania, |
| Connecticut, | Nevada, | Maryland, |
| Massachusetts, | Utah, | Virginia, |
| New York, | Wyoming, | North Carolina, |
| Michigan, | Colorado, | South Carolina, |
| Wisconsin, | Kansas, | Florida, |
| Iowa, | Missouri, | Georgia, |
| South Dakota, | Nebraska, | Alabama, |
| Minnesota, | Illinois, | Louisiana, |
| North Dakota, | Indiana, | Mississippi, |
| Montana, | Kentucky, | Tennessee. |
| Washington, | Ohio, |  |

These hearings will be continued until all parts of the United States have been visited by the board. A comprehensive and careful study of the farm loan needs of the country is being made, and it is expected that the board will be able to render its decision as to the boundaries of the districts and the locations of the banks, and to establish the banks themselves in the early part of the year 1917.

The Federal farm loan act creates a system under which the farmers of the country will be able to borrow money on farm mortgages at low rates of interest and on long time, namely, from 5 to 40 years, and by means of small annual installments to retire or repay the entire principal and interest within the period of the loan. Thus the Federal reserve act and the Federal farm loan act have covered the entire field of farm credits, the former by providing the shorttime loans needed by the farmer and the latter by furnishing the long-time amortization loans which are essential to the full and free
development of agriculture, in so far as credit is necessary to such development.
The hearings already held by the Federal Farm Loan Board have shown conclusively the necessity for this form of long-time agricultural credit; they have shown that agricultural development and productivity have been hampered and restricted for lack of such credits; they have shown that the farmer has been the victim not alone of high but of extortionate rates of interest in almost every part of the country, and that he has been helpless in the face of these conditions; they have shown that the want of long-time farm credits at low rates of interest have constantly increased the evils of farm tenancy by making it difficult, if not impossible, for men of small means to become farm owners; they have shown that small farmers who want to borrow $\$ 1,000$ or less on farm mortgages are unable to borrow on any terms, as there are few, if any, institutions or lenders who will take small loans of this character.

Under the Federal farm loan act these handicaps will be removed and long-time farm credits, ranging from 5 to 40 years, will be available throughout the country at low rates of interest, not exceeding 6 per cent, and these credits will be as accessible to the small farmer as to the big farmer and on equal terms. It seems quite probable that when the Federal land banks are in full operation loans may be made on properly secured farm mortgages, under the act, at not more than $4 \frac{1}{2}$ per cent interest per annum, with an additional payment on account of the principal of not exceeding 1 per cent per annum. On this basis the farmer will be able to borrow money on properly secured farm mortgages at $5 \frac{1}{2}$ per cent per annum, which will cover not only the interest on the loan but a 1 per cent annual amortization payment, and in 35 years completely extinguish the principal of his loan. It is impossible to estimate the beneficial effects this new system of farm credits will have upon the development of the farming industry, the prosperity of the farmer, and the general prosperity of the entire country.

The Federal Farm Loan Board will, under the provisions of the act, file in due season an annual report to the Congress.
(The text of the Federal farm loan act is attached as an exhibit to this report.)

## BANKS.

The deposits of the 7,589 national banks of the United States on September 12, 1916, reached the unprecedented total of $\$ 11,362$,341,000 , and on the same date their actual cash holdings amounted to $\$ 845,185,000$. The 12 Federal reserve banks held $\$ 329,253,000$ in cash on November 12, 1915, whirh amount was largely increased during the year, being $\$ 414,148,000$ on November $10,1916$.

The circulation of the national banks secured by the deposit of United States bonds with the Treasurer of the United States decreased from $\$ 722,754,924$ to $\$ 679,650,913$ during the year ended November 1, 1916. This decrease of $\$ 43,104,011$ was due principally, if not exclusively, to the purchase of bonds available as security for circulation by the Federal reserve banks under the provisions of the Federal reserve act.

Bank clearings are one of the most sensitive and reliable indications of business conditions. The totals of clearings for the last six fiscal years are given in the following table:

| ly 1, 1910, | \$157, 664, 101, 000 |
| :---: | :---: |
| July 1, 1911, to June 30, 1912 | 166, 081, 127, 000 |
| July 1, 1912, to June 30, 1913 | 174, 211, 066, 000 |
| July 1, 1913, to June 30, 1914 | 169, 040, 562, 000 |
| July 1, 1914, to June 30, 1915 | 152, 891, 985,000 |
| July 1, 1915, to June 30, 1916 | 224, 338, 270,000 |

## GOVERNMENT FUNDS AND FEDERAL RESERVE BANKS.

By virtue of the authority of the Federal reserve act I designated the 12 Federal reserve banks Government depositaries and fiscal agents, effective January 1, 1916, and discontinued the nationalbank depositaries in the Federal reserve cities, except one or in some cases two in each city which were retained as depositaries for postoffice and court moneys. It is a question whether or not such post-office and court moneys constitute Government funds in the sense that the term is used in the Federal reserve act authorizing the deposit of public funds in the Federal reserve banks. Nearly $\$ 7,000,000$ was deposited in these banks at the outset and the Government's balance with them increased until on July 8, 1916, the books of the Treasurer showed that the reserve banks held $\$ 114$,$930,023.03$. A large part of this consisted of income-tax collections. due June 30, but this balance has been reduced largely since that date in the normal course of the Government's operations.

CONVERSION OF UNITED STATES BONDS.
During the year $\$ 56,648,902.50$ was received from national banks for retirement of circulation under the act of July 14, 1890, and was, in accordance with the provisions of that act, credited as public-debt receipts; retirement or redemption to the amount of $\$ 24,633,010.50$ was made and was charged as public-debt disbursements. The large amount deposited for retirement was largely the result of purchases by the Federal reserve banks of 2 per cent United States bonds carrying the circulation privilege from the national banks under the provisions of the Federal reserve act. On February 28, 1916, I notified the Federal Reserve Board that under section 18 of the Federal

[^0]reserve act I would issue to the Federal reserve banks 30 -year 3 per cent gold bonds and 1-year 3 per cent gold notes, both without the circulation privilege, in exchange for an amount not exceeding $\$ 30,000,000$ United Ștates 2 per cent bonds so purchased, an obligation to be accepted from the Federal reserve banks binding them to purchase an equal amount of the 1-year notes for gold at maturity. The 1st days of January, April, July, and October were set as the conversion dates corresponding to the interest periods for the 2 per cent consols of 1930. I subsequently notified the Federal Reserve Board that the Federal reserve banks would be required to convert their securities in the relative amounts of the new issues indicated by the law, i. e., practically 50 per cent in the 1 -year notes and 50 per cent in the 30 -year bonds. The whole of the $\$ 30,000,000$ has been converted, $\$ 15,761,0003$ per cent bonds and $\$ 14,239,000$ 1 -year Treasury notes being issued in exchange therefor.

INTEREST ON GOVERNMENT DEPOSITS IN NATIONAL-BANIK DEPOSITARIES.
During the year 1916 no deposits for crop-moving purposes were made, nor were they necessary in view of the large credit facilities provided by the Federal Reserve System, which has proven sufficient to meet the demands of agriculture and business. This accounts in part for the decrease in the amount of interest received from Government depositaries as compared with the previous year. Besides this the balances in the national-bank depositaries were reduced because of the transfer of funds to the Federal reserve banks. Nevertheless the interest collected on deposits of public funds for the fiscal year 1916 and covered into the Treasury as a miscellaneous receipt amounted to $\$ 791,671.45$. The amount of interest received on public deposits for the past six fiscal years is as follows:

The increase in the amount of interest collected since 1913 is due to the fact that beginning with June of that year interest has been charged upon all public deposits, except those in Federal reserve banks, at the rate of 2 per cent per annum.

> NEW COINAGE.

The designs for the subsidiary silver coins now in use were prepared over 25 years ago. During the fiscal year 1916 new designs
for the dime, quarter dollar, and half dollar were adopted, which, for the first time in the history of our coinage, are different for each denomination. Members of the Commission of Fine Arts were conferred with and noted sculptors were commissioned to prepare and submit models. More than 50 designs were submitted, from which three sets were chosen. The dime is now in general circulation. It is expected that the half and quarter dollars will be in circulation before the holiday season.

The designs of the new coins have been highly praised by those having expert knowledge of such matters. The designs for the dime and half dollar are the work of Mr. Adolph Weinman; the quarter dollar that of Mr. Hermon A. MacNeil.

## WAR RISK INSURANCE.

The Bureau of War Risk Insurance commenced operations September 2, 1914, immediately after the outbreak of the European war. It was created to assist commerce in American vessels and to grant war risk, but not maritime, insurance on the hulls of or cargoes in American vessels.
From the commencement of its business to November 17, 1916, the bureau has written 1,684 policies, covering total insurance of $\$ 163$,595,687 . There have been incurred losses to date of $\$ 833,924.60$, from which salvage of $\$ 59,055.87$ has been received. This makes the net losses to date $\$ 774,868.73$, and leaves a surplus of premiums received over losses of $\$ 2,367,657.23$.

The amount appropriated for the expenses of the bureau in the original act was $\$ 100,000$. The bureau has been operated economically and the total expenses of organizing, printing, stationery, and the salaries of its force from September 2, 1914, to November 17, 1916 , amounted to $\$ 39,113.70$. On November 17, 1916, the net amount at risk was $\$ 14,610,345$.

## SUMMART.

| Number of policies issued Sept. 2, 1914-No | 1,684 |
| :---: | :---: |
| Total amount insured | \$163, 595, 687.00 |
| Total amount at risk | 14, 610, 345.00 |
| Known losses to date. | 833, 924.60 |
| Salvage received. | 59, 055.87 |
|  |  |
|  |  |
| Surplus premiums on 1 | 2, 367, 657.23 |

The Bureau of War Risk Insurance expires by limitation of law on September 2,1917 , having received an extension of one year from the Congress. I earnestly recommend its extension for another year, or until September 2, 1918. If this should not be done and the Congress should not be in session when this act expires (Sept. 2, 1917) it will be impossible to continue the war risk insurance business,
and if the war in Europe should be in progress at that time, the inability to grant war risk insurance on American vessels and cargoes in American vessels will seriously injure the business and commerce of the country. This is a risk we ought not to take, and I earnestly recommend that the Congress extend the act for another year.

THE PAN AMERICAN FINANCIAL CONFERENCE AND THE INTERNATIONAL HIGH COMMISSION.
As noted in my annual report for 1915, the International High Commission is a body of 20 national sections constituted by the First Pan American Financial Conference, held in Washington, May, 1915, by virtue of the diplomatic and consular appropriation bill, approved March 4, 1915. It was created to adjust and harmonize the principles and procedure of commercial law and fiscal administrative regulations in the American Republics, and to seek a satisfactory solution for such legal problems as present themselves in the field of commerce and public finance. Each section consists of nine jurists or financiers under the chairmanship of the minister of finance. The entire direction of the commission's work is intrusted to a central executive council of three members. At its meeting in Buenos Aires, April 3 to 12, 1916, the commission designated Washington as its headquarters for the next two years, thus making the executive offlcials of the United States section the central executive council. These officers are: The Secretary of the Treasury, president; Hon. John Bassett Moore, vice president; and Dr. L. S. Rowe, secretary general.

Acting upon the suggestion made in my annual report for 1915, the Congress appropriated in the act approved February 7, 1916, $\$ 40,000$ for the maintenance of the United States section of the International High Commission, and authorized the section to cooperate with the other sections of the commission in taking action upon the recommendations of the First Pan American Financial Conference. This cooperation was to take the form, first, of attendance at the meeting of the commission at Buenos Aires, and, second, to take such steps as should be recommended at that meeting. The appropriation was to be expended under the direction of the Secretary of the Treasury and to remain available until expended. Of the total $\$ 18,068.82$ has been expended, and the remainder is being expended in carrying on the work.

The meeting of the commission at Buenos Aires will be the subject of a separate report by the United States section of the commission, and consequently there is no occasion to dwell upon its work at this time. It is sufficient to point out that it perfected its organization and adopted a series of practical resolutions, to be carried out under the direction of the central executive council.

The commission has sought to deal with practical questions in a practical manner. The work that it is doing may be described as of two kinds. With questions of public finance and commercial law it is itself working out and submitting constructive proposals. In the other subjects it is trying to bring about more hearty and persistent cooperation and more effective coordination of effort and resources on the part of those agencies, public and private, within whose province these other subjects fall. The tangible results achieved in the first year's operation of the office of the commission warrant the belief that the method selected for dealing with these problems has been the correct one and gives great promise of success.

Through the creation of the commission the ratification of various technical conventions prepared at earlier Pan American conferences has been greatly hastened and facilitated. The Republic of Costa Rica ratified the patent, trade-mark, and pecuniary claims conventions directly following the meeting of the commission, and other ratifications may be expected shortly. It is exceedingly important that these conventions be ratified because they will assure adequate protection to industrial and literary property and settle disputed claims between governments and alien creditors.

The commission has devised a plan under which commercial travelers may operate freely in all countries signatory to a proposed international treaty on the subject. The various State and municipal fees would be consolidated into one national fee, and the samples carried by commercial travelers would be dispatched more promptly. Both the financial conference and the high commission have laid much stress upon the importance of facilitating the work of these indispensable factors of modern commercial intercourse; and as a result of a resolution adopted at Buenos Aires the Argentine Government is now discussing a legislative measure providing for the federalization of provincial license fees.

The commission has also prepared for consideration a tentative treaty draft providing for the assumption by all signatory powers of an obligation to regard as inviolable an international gold clearance fund which would serve as the basis for international exchange transactions. Thus the physical transfer of gold would be obviated in large measure. The use of dollar exchange would be stimulated by such a system. Closely related with this subject is another point upon which the commission reports a marked advance, viz, an international money of account. This subject has been debated for many years in American conferences. This unit, agreed upon April 10, 1916, will be calculated to have a weight of .33437 grammes and a fineness of .900 , or just one-fifth of our own dollar.
The cause of uniform law on commercial paper has been promoted by the commission. Latin America is now committed to the uniform Hague rules on bills of exchange, and measures are being
taken to secure legislative action thereon. Thus the legal theories valid in this hemisphere will be reduced from a half dozen to two. Moreover, several Republics of commercial importance are now studying our Federal bills-of-lading act and our uniform State act on warehouse receipts as the basis for domestic legislation. Other subjects in commercial law are likewise being studied by the commission with a view to suggesting desirable modifications in existing law.
A natural corollary to the commission's interest in commercial law has been the interest of the United States section in Federal legislation of an advanced character on these subjects. The fullest support was given to the movement in favor of a Federal bills-oflading act-a movement which for many years had been indorsed by various associations. By the passage of the Federal bills-of-lading act, which goes into effect on January 1, 1917, the Congress has recognized the necessity of safeguarding our foreign commerce by assuring the validity and negotiability of its instruments.
Uniformity of fiscal regulations has been one of the chief interests of this commission. A method has been under advisement for putting into effect a series of resolutions dealing with the classification of merchandise both for statistical and for tariff purposes and with the question of consular documents and regulations. The commission indorsed the uniform statistical classification of Brussels, which would enable customs statistics to be compared with a maximum of accuracy and a minimum of labor and uncertainty. A complete and reliable key to all classification terminology in official use in the American Republics is to be undertaken; this volume, in compact form and in the commercial languages of America, will involve much patient labor, but will be of inestimable value. While the commission realizes that each country must settle for itself questions of tariff rates, it is exceedingly important to the whole commercial world that each country state its rates and schedules in familiar forms in order that uniform statistics may be available to other nations.

The commission earnestly hopes that the numerous postal interests of the American Republics will be coordinated and protected through the establishment of a permanent American postal union. In 1911 a South American Postal Congress was held at Montevideo, and the commission urged the holding of a second congress, this time Pan American, for the purpose of organizing a permanent postal union at Montevideo. Such a body would act as an international clearing house for all postal matters, would draft postal conventions, and would probably bring about universal 2 -cent postage in this hemisphere in a short time.

The commission has lent its cordial support to the movement for the arbitration of commercial disputes between the members of chambers of commerce in Latin America and in the United States. Such agreements will assure certainty of prompt examination and adjustment of disputes, followed by public registration of the decisions, and by thus squarely affecting the credit and standing of the parties to the controversy will secure acceptance of all reasonable awards.

For the first time in any international conference in the world's history an attempt was made to work out a complete, constructive, and cooperative policy of governmental action in the entire field of communications-water, rail, and telegraphic. The value of the commission's recommendations in this connection lies in the fact that they coordinate in a general and comprehensive manner the communication needs of the American Republics. As to shipping, the commission followed the course of the first Pan American Financial Conference and urged that action be taken by the Government of the United States to create an international merchant marine, proffering the support of the other American Governments in the carrying out of this task. That they had faith in the efficacy of this method of overcoming the grave disadvantages of economic dependence upon Europe may be seen from the fact that several LatinAmerican Governments have since considered definite measures themselves looking to the creation of national merchant marines. As to railway communication, the commission recommended that the work begun by the Pan American Railway Committee be vitalized and vigorously prosecuted, so as to complete the surveys and estimates required for the intercontinental railway and the other international railroads, which, if not a part of this system, serve to foster commercial relations. As to telegraphic communication, the commission favored the organization of an international telegraph service wherever possible on the basis of the European system of transmission and terminal rates, and urged the extension of telegraphic lines.

The work of the International High Commission has been in complete cooperation and harmony with the State Department, whose effective assistance is contributing greatly to the efforts of the commission. The energies of the commission are devoted to financial and commercial problems and do not trench upon the field of diplomacy. The 19 Latin-American Republics which have become interested in the commission have cooperated most heartily, and I am confidant that the national sections appointed by the LatinAmerican nations and the United States constitute a new and effective piece of international machinery for the furtherance of commercial and financial relations not covered by diplomatic agencies, which will result in stimulating and improving in a marked degree
trade and friendly relations between the various countries of the Western Hemisphere.

At the meeting of the International High Commission at Buenos Aires, April 3 to 13, 1916, the following resolution was unanimously adopted:

[^1]The selection of Washington as the place for the meeting of the Pan American Financial Conference in 1917 was renewed evidence of the good will and friendship of Latin America for the United States. It is proposed that this conference shall consist, as before, of the ministers of finance of the various countries and two other members to be appointed by their respective Governments. I earnestly hope that the Congress will extend again the hospitality of the United States to the Latin-American nations by appropriating for the conference of 1917 an amount equal to that appropriated for the financial conference of 1915 , namely, $\$ 50,000$, for the purpose of entertaining our Latin-American guests on that occasion. I can not overstate the value of these conferences in bringing about a better understanding and promoting in this practical manner friendly relations and enlarging trade and commerce with our southern neighbors.

## CUSTOMS.

For the fiscal year ending June 30, 1916, the receipts from customs amounted to $\$ 213,185,845.63$, an increase over the aggregate receipts for the preceding fiscal year of $\$ 3,399,173.42$. The imports for this fiscal year amounted to $\$ 2,197,883,510$, which is an increase over the preceding fiscal year of approximately $\$ 484,000,000$. The value of the exports for this period was $\$ 4,333,658,865$, an increase in exports over the previous year of $\$ 2,768,589,340$.

The conditions which led to the abrupt falling off in customs duties of the previous year still continue. The European conflict has involved the nations of continental Europe from which come a large part of the dutiable imports and for this reason the customs receipts have been substantially curtailed. Before the breaking out of the European war the amount of the collections indicated clearly that under normal conditions the present tariff will produce all the
revenue which it was estimated to produce at the time it was drawn, and since the war the receipts under the tariff bill have been all that could be expected under the present conditions.

In some directions the activities of the Customs Service, on account of the falling off of dutiable imports, have decreased as compared with the conditions prior to the war. While the amount of revenue collected has decreased, both imports and exports have increased in volume. Both this increased commerce and the maintenance of the neutrality of the United States have brought additional responsibilities to the service.

The increase in drawback has also added to the work of the department. In the past year there was paid in drawback upen the exportation of goods manufactured in whole or in part from imported dutiable materials the sum of $\$ 15,370,945$. This is an increase of over 100 per cent of the amount paid during the fiscal year 1915, when the amount of drawback was $\$ 7,403,686$. This increase in the amount of drawback paid follows from the increase in the industrial activities of the country, the increase in value of the imports being in great part due to the increased importations of raw materials for manufacture in the export trade.

The expense of collecting the revenue from customs for the fiscal year 1916 amounted to $\$ 9,813,085$, notwithstanding the increase in the activities of the Customs Service and the added work incident to the enforcement of the seamen's act. This indicates an actual saving as compared with the previous year of $\$ 117,176$, a decrease from the expenses of conducting the service in 1914 of $\$ 628,093$, and in 1913 of $\$ 1,118,349$. This decrease in cost was made possible by improved methods and by the installation of modern devices of performing office work. The expenditures for the purchase of such improved devices in this year prevented a further reduction in operating cost.

The total number of employees during the fiscal year has decreased from 7,079 to 6,881 . The average compensation of the employees during the same period has increased $\$ 26$ per capita, from $\$ 1,311$ to $\$ 1,337$. The department has adopted the policy of not dismissing efficient employees solely because their services were not needed. To avoid dismissals the force has been shifted, in order that decreases in the force might be effected through vacancies which would occur by death, resignation, or removal. Discrepancies have existed in compensation paid for the same service in different parts of the country, and it is the policy of the department to try as much as possible to standardize the compensation paid in the various districts, with due regard to the local conditions. Increases in compensation during the year amounted to $\$ 175,000$, distributed to deserving employees throughout the Customs Service, which amounted to a net increase per capita of $\$ 26$. Despite this increase there was a net decrease in operation during the year of $\$ 117,176$.

The Customs Service maintains an efficiency board for advice and assistance to the department in working out its problems. Düring the past year this board has visited 11 customs districts and has made recommendations to customs officers in those districts to standardize and increase the efficiency of the service. When these recommendations are made operative in full, it is expected that substantial economies will be effected.

The system for the exchange of information relating to the value and classification of imported merchandise, through what is known as the "classification and valuation reports" (C. V. R.), has been greatly improved. This is accomplished by having the various appraising officers forward daily to the appraiser at the port of New York data taken by them from invoices, price lists, and catalogues received, accompanied by samples when practicable. These reports - are compared with each other and with the records and data at the port of New York, and information is sent out to the various appraisers of changes in market prices and advances in values. Any transactions indicating fraudulent undervaluations are made the subject of special investigation. This has resulted in securing an almost perfect uniformity in the valuations and classifications of the same merchandise at the various ports and furnishes added means for the detection of fraudulent undervaluations.
The customs regulations have been revised for the first time since 1908, and the new volume has been issued as "Customs Regulations. of 1915." The entire work was performed by employees in the Customs Service, detailed for that purpose, without any extra cost to the Government. This has saved the special appropriation which, in the past, has been made by the Congress to revise these regulations.

The Division of Special Agents has been consolidated with the Division of Customs. This consolidation accomplished a direct saving in operating expenses of $\$ 11,020$ per annum. Experience of nine months under the new system has demonstrated that the work formerly done in both divisions can be performed more efficiently and with better cooperation under one head.
The annual meeting of customs officers was held in October, 1915. These conferences permit discussion of problems of the Customs: Service, resulting in better understanding among the employees and in bringing forth many valuable suggestions for the improvement of the service. At the last conference the following resolutions were adopted:
(1) That section 3 of the act of February 13, 1911, be so amended as to permit bonds to be taken in a penal sum less than $\$ 50,000$ for the issuance of special licenses and permits for the immediate unlading of vessels at night.
$i^{*}$ Such bonds are required by statute to be given in the sum of $\$ 50,000$, whether the vessel be large or small and whether the cargo be of great or little value. Experience has shown that the possibility of incurring a liability on these bonds is remote, and it would be in the interest of commerce to permit the bonds to be taken in such an amount as would protect the Government, which would in almost every instance be less than $\$ 50,000$.
(2) That section 2857, Revised Statutes, be repealed. This section in effect requires an importer to give a bond for the production of a triplicate invoice in the event that, through a change of the destination of the merchandise, a triplicate invoice is not received at the time of entry, although the importer may be possessed of the duplicate invoice. In such cases, the triplicate invoice has been forwarded by the consul before whom it was certified to the port of destination named in the invoice. Under the regulations, when such merchandise is entered at another port, the triplicate invoice is secured from the collector of customs at the original port of destination. The statute requires the giving of unnecessary bonds by importers, and both they and the customs officers should be relieved from this red tape.
(3) That the act of June 10, 1880 (21 Stat., 173), relating to the forwarding of merchandise under entry for immediate transportation from the port of arrival to the port of destination, be so amended as to permit such entries to be taken at any time within one year after arrival, instead of limiting the time to 10 days after the unlading of the merchandise. The conference was unanimously of the opinion that there is no good reason for placing such a 10 -day limit upon the time within which merchandise may be so forwarded. The act of June 10,1880 , is inapplicable to present conditions in many respects, and its thorough revision is recommended in the interest of commerce and for the purpose of eliminating unnecessarily cumbersome procedure in the customhouse.
(4) That sections 3038, 3039, and 3048, Revised Statutes, be repealed. These statutes prescribe the manner of the payment of drawback upon the exportation of merchandise. Under the procedure provided, a "debenture certificate" is first issued; that certificate may be surrendered at the end of 30 days and a check given by the customs officer in payment thereof. What purpose was ever served by the procedure is problematical. At the present time no purpose appears to be served other than requiring double work in the issuance of the debenture certificate and the subsequent issuance of a check for the same transaction.

My annual report for the year 1915 contains a recommendation for an amendment of sections 2899 and 2901, Revised Statutes, and the repeal of sections $1790,2693,2775,2777$, and 2782 . I recommend the adoption of the resolutions passed at the collectors? conference
in 1915 and renew the recommendations made in my annual report for 1915.

## INTERNAL REVENUE.

The receipts of the Bureau of Internal Revenue for the fiscal year ended June 30, 1916, based on collectors' reports, amounted to $\$ 512$,$723,287.77$, the greatest in the history of the department, showing an increase of $\$ 97,042,263.91$ over the previous year. This unprecedented amount was collected at the low cost of $\$ 7,199,163.32$, or 1.4 per cent.

Every source but one from which a large amount of internalrevenue taxes is collected shows decided gains over the previous year. Taxes from distilled spirits increased $\$ 13,385,692.80$; from manufactured tobacco, snuff, cigars, and cigarettes, $\$ 7,853,337.28$; from the corporation income tax, $\$ 17,828,189.17$; and from the individual income tax, $\$ 26,897,432.54$. The receipts from the tax on fermented liquors (exclusive of the additional tax of 50 cents a barrel imposed under the act of October 22, 1914), however, register. a decrease of $\$ 1,155,327.35$, this being the only source from which a large amount of revenue is received that shows a loss. The increase in the income tax, individual and corporation, from $\$ 80,201,758.86$ in 1915 , to $\$ 124,937,252.61$, a difference of $\$ 44,735$,493.75 , or over 55 per cent, indicates a high degree of prosperity generally distributed, and is the most striking feature of the year's collections. The net increase in ordinary internal-revenue receipts of $\$ 52,306,770.16$ results to the extent of $\$ 32,209,175.84$ from taxes collected under the so-called emergency revenue act, which became a law on October 22, 1914, was extended by joint resolution on December 17, 1915, and was consequently in effect all of 1916 and only part of 1915.

During the last three years a vigorous campaign has been carried on against frauds on the revenue. Frauds running back many years have been uncovered, many of the guilty parties have been prosecuted and convicted and millions of dollars have been turned into the Treasury. The amount of revenue which the United States Government has lost, as revealed by the investigations conducted by the department during the past three years, makes transactions of the "Whisky Ring" look like petty larceny. Frauds amounting to more than $\$ 50,000,000$ have been uncovered and $\$ 22,509,576$ has been recovered by the Government on account of such frauds and on account of back taxes that have been evaded. This is $\$ 2,700,000$ greater than the entire cost of the Internal Revenue Service for these three years.

## Narcotic law.

On June 30, 1916, the Harrison narcotic law had been in effect 16 months, and the operation of the law has given the department

$$
62010^{\circ}-\mathrm{FI} 1916-2
$$

a better view of the conditions to be met. There are several serious defects in the law and there is urgent need of remedial legislation.

During the year approximately 23,754 violations of this act were reported, and there were pending 460 cases against registered and 216 cases against unregistered persons in which no action has been taken up to this time. The Supreme Court on June 12, 1916, handed down a decision in the case of United States $v$. Jin Fuey Moy, arising under section 8 of the act, in which it was held that the charge of unlawful possession of any of the proscribed drugs denounced in said section did not apply to persons not required to be registered under section 1, but only to those classes specified in that section.

This decision makes the enforcement of this law more difficult and handicaps the efforts of the department to suppress the traffic in drugs by irresponsible persons. It also emphasizes the urgent need of a thorough revision of this act if the object of Congress for the control of the drug evil in this country is to be accomplished.
Before the Supreme Court decision was rendered a large number of persons had been tried, convicted and sentenced to pay fines or serve terms of imprisonment, or both, for violation of section 8, because of unlawful possession of the proscribed drugs, and it became necessary to take immediate steps for their relief. Where sentences had been imposed the persons were released from prison, but there was no authority of law to refund fines paid. It will be necessary, therefore, for the Congress to make an appropriation for this purpose.

The situation resulting from this decision makes additional legislation imperative if the welfare of the country and of those afflicted by the drug evil is to be protected. Therefore it is again recommended that this act be amended or revised to provide-

First. A tax on the drugs with provision for original stamped packages, limiting the dealing in and dispensing of and from such packages to those registered under the law, and making the absence of the stamp from any package evidence of nonpayment of the tax and violation of the law, excepi packages put up upon prescriptions issued for medical purposes by registered practitioners.

Second. That the registration be limited under the act to persons lawfully engaged in selling, dispensing, administering, or prescribing the drugs.

Third. That the writing of prescriptions, keeping of records, and altering or forging of same be more fully covered by the statute, with adequate provision for punishment of offenses denounced.

Fourth. That all the general provisions of the internal-revenue statutes relating to seizures, forfeitures, etc., be made applicable to the drugs taxed and the, persons upon whom special taxes are imposed.

I also recommend that the Congress appropriate the necessary amount of money for repayment of fines imposed by the courts upon persons convicted of unlawful possession under section 8 , and urge that provision be made for the treatment by the Government, through some designated agency, of persons addicted to the use of drugs, where such treatment is necessary. To cut off suddenly the supply of drugs without curing the addict of his cravings or making any provision for the amelioration of his sufferings is not only inhumane but encourages evasions of the law.

## PUBLIC HEALTH SERVICE.

The Public Health Service has conducted its work with customary efficiency and benefit to the country. It is one of the most useful arms of the public service and is performing work of greater importance each year. In the field of rural sanitation alone there is opportunity for inestimable service to the rural communities of the United States. I desire to renew and respectfully to urge that the recommendations contained in my report for the year 1915 be adopted. I respect-: fully call attention of the Congress to the report of the Surgeon General, and express my approval of the recommendations contained therein.

## The poliomyelitis situation.

About June 17, 1916, a serious epidemic of infantile paralysis (acute anterior poliomyelitis) broke out in the cities of New York and Brooklyn. It was evident in the first days of July that this epidemic would gravely menace other parts of the country. By October 3 the number of cases had exceeded 9,000 and the deaths 2,300 . Since that date the epidemic has practically subsided.

While in New York City on July 6 I called on Mayor Mitchel and offered the assistance and cooperation of the United States Public Health Service. This offer was promptly accepted and steps were taken immediately by the Public Health Service to make investigations of an epidemiologic and laboratory nature. In addition, the department took steps to aid local authorities in other places in necessary measures of protection through a notification system established in New York. The work was thus developed along two lines:
(1) Organizing a system of notification to the health authorities of other States of the departure from New York of persons under 16 years of age. Thirty-six public health officers were assigned to this duty. A plan of cooperation was arranged with the transportation lines whereby passage was denied to children attempting to leave the city without the certificates issued by the Public Health Service.
(2) Making epidemiological and laboratory studies of the possible transmission of the disease through carriers.

Work on both of these problems was begun at once. The need for additional funds for purposes of control was recognized, and on the recommendation of the Secretary appropriations of $\$ 135,000$ were made by the Congress to enable the Public Health Service to employ the required officers and take such preventive measures as the situation demanded. A conference was held in Washington on August 17, attended by the health authorities of a large number of States and cities, at which the measures already taken by the Public Health Service were indorsed and a series of resolutions adopted outlining the respective fields of action of Federal, State, and local authorities in preventing interstate and intrastate spread of the disease.
On the subsidence of the epidemic the system of notification in force in New York City was discontinued in October, jts purpose having been accomplished. During the time of its operation about 80,000 health certificates to traveling children were issued.

The New York epidemic furnished an opportunity to the United States Public Health Service to continue studies of infantile paralysis which had been begun previously. In order to utilize the large amount of available material, 15 officers and the necessary attendants were assigned to these studies.

On aecount of the gravity of the problems presented by this epidemic and the possibility of its recurrence next year, I have directed the Public Health Service to prosecute vigorously the scientific investigations already begun. Sufficient appropriations should be made for this vitally important work, which may have to be continued for a considerable period of time before definite results are obtained. Funds should also be made available to meet future epidemic emergencies. These needs have been taken into account in reasonable degree in the estimates submitted to the Congress. It is my opinion that the Federal Government should spare no effort or expense to discover the cause of this mysterious and deadly disease which has claimed so many victims and given rise to so many obscure scientific problems.

## Government employees afficted with tuberculosis.

In the first session of the Sixty-third Congress a bill was introduced at my suggestion providing for the admission to the United States Public Health Sanatorium for Tuberculosis at Fort Stanton, N. Mex., of a limited number of employees of the executive departs ments and independent bureaus of the Government in Washington who may contract tuberculosis while so employed. I take this opportunity of again urging that this legislation be enacted and that a reasonable appropriation be made for the transportation of such patients to Fort Stanton and for their care, maintenance, and treatment while in the sanatorium.

PUBLIC BUILDINGS.
May I respectfully say that as a result of my study of the publicbuilding question for the past three years and my experience gained in the administration of the laws relating to the designing, construction, and operation of public buildings through the Supervising Architect's Office, I am convinced that the methods pursued by the Congress for the past 15 years of providing Federal buildings through so-called omnibus public-building bills have resulted in the construction of many public buildings in small towns and localities where they are not needed, and at a cost which is clearly unjustified by any actual requirements of the communities in which they are erected. The conclusion is irresistible that authorizations for public buildings in these small communities are too frequently dictated by local reasons and without regard to the best interests of the Government.

In the past two decades the Congress has authorized and appropriated approximately $\$ 180,000,000$ for public buildings, and the major part of this great sum has been expended on costly structures in small localities where neither the Government business nor the convenience of the people justified their construction, and while the initial cost of these buildings represents a large waste of public funds, this is not the worst of it. The most serious aspect is ${ }^{\rho}$ this: The annual' operation and maintenance of these buildings impose on the Treasury a permanent and constantly increasing burden.
There are now more than 1,000 Federal buildings to be operated and maintained, and this number is being increased at the rate of a new building every fourth day in the year. Meanwhile, the cities and larger towns have outgrown their Government buildings and nearly every populous center in the United States is to-day acutely in need of additional space to meet the demands of greatly increased and constantly increasing Government business. To such an extent has the Government business outgrown the old structures in the cities that the rentals for outside space now amount approximately. to $\$ 3,000,000$ annually. This capitalized at 3 per cent represents $\$ 100,000,000$, and is doubtless the amount required to provide the facilities sorely needed for the prompt, efficient, and economical conduct of the public business in the great centers and large cities of the country.

Common sense and business judgment would seem to demand that structures for the transaction of Government business should be authorized only in localities where they are imperatively needed, and that buildings should not be erected where no public necessity can be shown. This result could be accomplished by divorcing the public-buildings question from all local or political considerations
and authorizing no public buildings until a thorough and intelligent investigation of each proposed building or project has been made by this department and a full report thereon has been submitted to the Congress. If such reports were followed by the introduction and passage of separate measures to cover each proposed building project, the abuses and evils of the omnibus-bill method would be eradicated.

## Progress of the work.

So long as the practice continues of authorizing at one time the construction of public buildings in such numbers as to be vastly in excess of the capacity of the department to dispose of them promptly there will be dissatisfaction. If, however, the accumulation of projects resulting from this method of legislation is disposed of as rapidly as may be possible with the facilities provided therefor by the Congress, there can be no just ground for criticizing the department or the Supervising Architect's Office because of the delay which must necessarily ensue in handling the work.

Judged by the output of the Supervising Architect's Office during the period covered by this report, and comparing that output with the output in years when the technical force of that office was much larger than at present, it is apparent that exceptional progress has been made, both in getting buildings under contract and in securing the completion of buildings already under contract. These results have been accomplished by the Supervising Architect's Office in the face of adverse conditions beyond its control, and in spite of the failure of the Congress to provide a small additional force to balance its technical divisions to equalize its output.

During the period covered by this report satisfactory progress has been made in disposing of the accumulation of public-building work which resulted from the enactment of the 1913 omnibus public-building act, although at that time there remained a very large number of buildings to be constructed under previous authorizations.
The output of the Supervising Architect's Office during the past fiscal year was:

96
Completed during the same period:

101
In other words, the output shows an average rate of a building placed under contract in less than every four calendar days and a building completed ready for occupancy in the same average period.

Except as to the listed extension and remodeling projects the foregoing does not include the numerous contracts, large and small, entered into for the proper maintenance and repair of occupied public buildings, now numbering over 1,000 .

## Economies.

During the fiscal year ended June 30, 1916, unexpended balances on completed building work, aggregating $\$ 391,404.66$, were covered into the Treasury.
The aggregate sum available for the principal contracts for publicbuilding work let during the year was $\$ 14,232,605.83$. The contracts let did not include all expenditures necessary for completion, but conservative reservations indicate that the total cost will approximate $\$ 12,100,000$, thus resulting in a saving equal to the cost of fortytwo $\$ 50,000$ post-office buildings.

## Standardization.

Noteworthy progress in standardization has been made. A type of building has been designed for a post office which, with minor modifications to meet local conditions, can be utilized during the fiscal year 1917-in over 30 communities.

## New Patent Office building.

No action has been taken under the authority contained in section 17 of the omnibus public-building act approved March 4, 1913, for the preparation of plans and estimates for "a building to accommodate the Patent Office of the United States," for the reason that the limit set for the cost of such work, viz, $\$ 5,000$, is insufficient for the purpose, and the additional amount estimated for the purpose was not appropriated. The department is ready, whenever the necessary appropriation is provided, to proceed promptly with this work, as it can be carried forward independently of and without interference with the regular building program of the Supervising Architect's Office.

## National archives building.

In conformity with the provisions of section 21 of the omnibus public-building act approved March 4, 1913, designs and estimates have been prepared for a national archives building, and have been submitted for the approval of the commission created by said act.

## Interior Department office building.

The contract for the Department of Interior office building was let during the period covered by this report, and work is progressing at a rate indicating the probability of its completion within the time stipulated therefor, and well within the limit of cost fixed by the Congress.

## Government buildings in Washington.

It becomes increasingly evident with the passing of each year that the additional buildings, departmental and otherwise, required in the city of Washington for the proper conduct of the Government's business ought to be constructed. The real estate for the most important of the departmental buildings was bought years ago. Not only is the Government carrying these expensive lands at a large annual cost, but it is paying high rentals for insufficient and unsatisfactory quarters in private buildings throughout the city. There is a loss of efficiency and a lack of economy in conducting the Government's business in these circumstances. Moreover, the erection of the necessary Government buildings in Washington will greatly beautify the city, while more satisfactorily serving the actual necessities of the Government. I earnestly recommend that the Congress give consideration to these important projects and grant the necessary authority to begin worlk upon them.

COAST GUARD.
The organization of the Coast Guard has been completed. New regulations to govern the service have been prepared and promulgated and arrangements have been made whereby the operation of the Coast Guard may be promptly transferred to the Navy Department in time of war or whenever the President shall so direct.

## Ice patrol to promote safety at sea.

Two Coast Guard cutters have continued the patrol of the ice regions in the North Atlantic, in accordance with the terms of the International Convention for Safety at Sea, which was approved by the Senate December 16, 1914. The total cost of the patrol for 1915 was $\$ 69,236.39$, and up to September 1, 1916, the proportionate amounts due the United States in accordance with article 7 of the convention have been received from Belgium, Canada, Denmark, Great Britain, Italy, Norway, Russia, and Sweden. Through the usual diplomatic channels the several powers will be advised of the sums due from them to defray the cost of the patrol for 1916.

## New ships.

In addition to the new cutters recommended in last year's report, it will be necessary to provide three new cutters during the next fiscal year. The 35 -year old Thetis, formerly stationed at Honolulu. having become unfit for further use, has been condemned and sold
to the highest bidder. This important station is thus left without the services of a Coast Guard cutter, and it is recommended that authority be given to construct a new vessel at a cost of $\$ 400,000$. The Morrill, stationed at Detroit, Mich., is now over 27 years old and entirely incapable of performing efficient service on the Great Lakes. The vast amount of commerce on these great inland seas makes it imperative that a suitable cutter be maintained there. I therefore ask for authority to construct a new cutter to replace the Morrill at an estimated cost of $\$ 350,000$. The vicinity of Cape Hatteras, as well known, is one of the most dangerous stretches of coast along our entire seaboard. More marine disasters occur and more derelicts originate on this section of the coast than on any other. The Seminole, stationed at Wilmington, N. C., covers the coast from Hatteras south to Charleston; the Onondaga, stationed at Norfolk, Va., covers the coast from Hatteras north to the capes of the Chesapeake, but frequently these two vessels alone are unable to cope with the amount of rescue work the Coast Guard is called upon to perform in those waters. It is therefore urged that a new cutter be authorized for this vicinity at a cost of $\$ 350,000$ and stationed at Beaufort, N. C., to operate off Cape Hatteras, and to carry on derelict work along the Atlantic coast generally.

## Coastal communications.

There can be no question as to the absolute necessity for adequate means of communication between and with Coast Guard stations along our coasts, both for saving life and property and to aid in the national defense. Present facilities are entirely inadequate, and I heartily concur in the recommendation of the Captain Commandant that the communication service of the Coast Guard be put in an efficient condition along the lines suggested.

## Pay of seamen.

It is becoming increasingly difficult to enlist sufficient men to man properly the various cutters of the Coast Guard because of the low rates of pay in the Coast Guard as compared with the existing rate of pay in the merchant marine for like services. Between the years 1863 and 1908 the law authorized the Secretary of the Treasury to fix the pay of the enlisted force on the cutters at rates not to exceed those paid for like services in the merchant marine, and the practical operation of this law was most satisfactory. In 1908 a law was passed increasing the rates of pay of the enlisted force of the Coast Guard 20 per cent, and the law officers have held that the rates thus fixed can not be changed by administrative act. Meanwlile the pay of the
men in the merchant service has advanced, and in the past two years has increased to a considerable extent. Since the Coast Guard must obtain its seamen in competition with the merchant marine, it is earnestly recommended that the Congress either increase the present rates of pay in the Coast Guard or reenact section 2754 of the Revised Statutes, which latter action would enable the Secretary to increase the rates of pay of enlisted men to meet the wages paid in the merchant marine for like services. Action in this important matter is imperative.

## Aviation.

The provision in the naval appropriation act approved August 29, 1916, authorizing aviation facilities for the Coast Guard, was very gratifying to this department. One of the chief functions of this service is the saving of life and property from the perils of the sea. It is obvious, therefore, that nothing should be left undone that will contribute to the complete fulfillment of this purpose, and the Coast Guard should be able to avail itself of every reasonable and practicable means which has this end in view. Aviation has now advanced to such a stage that air craft can be advantageously used to supplement the present equipment of the Coast Guard in saving life from shipwreck and searching for derelicts, and as the service must operate as a part of the Navy during national emergencies the aviation equipment and personnel of the Coast Guard can not fail to be of value as a military asset in any plan of national defense that may be adopted by the Navy. Unfortunately in the closing hours of the last session the Congress failed to provide the necessary funds in the general deficiency bill to carry out the requirements of law for aviation in the Coast Guard. I therefore strongly recommend that ample funds be provided in the first deficiency appropriation bill that may be passed at this session of the Congress.

WAR RELIEF WORK.
The accounts of many of the officials who were charged with this work have not yet been received and settled. Over 11,500 obligations, aggregating $\$ 666,633.40$, have been received by the Treasurer of the United States, and on October 25, 1916, $\$ 343,070.99$ had been collected. Many of the obligations remaining unpaid will never be collected, for in some instances it has been impossible to locate the signers, others are unable to pay, some are dead, and a few have refused to reimburse the Government for funds advanced to them in their distress. Nevertheless, the work of collecting these obligations is proceeding in the office of the Treasurer with a fair degree of success. From January 1 to October 11, 1916, \$40,033.53 was collected at a cost of $\$ 5,2-10.88$, notwithstanding the fact that the Treas-
urer's office is not equipped, and therefore has poor facilities, as a collection agency.

## RETIREMENT OF CIVIL SERVICE EMPLOYEES.

The need for an adequate civil service retirement law is becoming more imperative each year. The Treasury Department bears upon its rolls a large number of aged employees whose efficiency is gradually waning. The introduction of new and improved methods of performing the constantly increasing volume of work in the department has served to emphasize the need for making some provision for the older employee who is unable to keep step with progress. It does not seem humane or fair to discontinue arbitrarily the services of superannuated employees who have given their entire energies and spent the best years of their lives in the service of the Government. To do so would in most cases leave the employees without any source of income and result in serious hardship. To reduce aged employees does not entirely meet the needs of the case, as it leaves the employees still on the rolls of the department.

I believe that the enactment of an equitable retirement law for superannuated and disabled employees of the civil service in the Treasury Department would result in actual economies and increased efficiency in the handling of the business of the department, and I therefore recommend this subject to the Congress for its serious consideration.

## ROCK CREEK AND POTOMAC PARKWAY COMMISSION.

The Congress has authorized a total expenditure of $\$ 1,300,000$ to acquire the land necessary to connect Zoological Park and Potomac Park in order to carry out the project of opening up Rock Creek Valley for the beautifying of Washington, and has made an appropriation of $\$ 50,000$ to get the work under way. The project is under the charge of a commission composed of the Secretary of the Treasury, the Secretary of War, and the Secretary of Agriculture, who are pushing it as rapidly as possible. It has made a report to the Congress describing the land which, in its opinion, should be acquired, which report was approved by the act of July 1, 1916. The commission is engaged in private negotiations with the owners-many of whom have indicated their willingness to dispose of land at reasonable prices-with a view to securing the completion of the entire project without unnecessary delay. Every effort is being made to insure the artistic development of the entire parlsway scheme, and in this connection the Commission of Fine Arts has been freely consulted. The lands in the entire parkway will comprise an area of about 162 acres, 42 per cent of which is already
owned by the United States. Its length is about $2 \frac{1}{2}$ miles, and its final development will give 'Washington a beautiful park, comparable to any like undertaking in any city of the world.

## SECTION OF SURETY BONDS.

Under the act of Congress of March 23, 1910 (36 Stat., p. 241), amending an act of August 13, 1894 (28 Stat., pp. 279-280), the jurisdiction of the Attorney General over surety companies was transferred to the Secretary of the Treasury. On July 16, 1914 (38 Stat., p. 468), the Section of Surety Bonds, which had previously been a part of the Division of Appointments, was created as a separate and distinct part of the work of the Secretary's office. The section as now organized is rendering valuable service to the various departments, and has been directly responsible for saving large sums of money to the Government in connection with its bonding business. The act of March 23, 1910, should be amended so as to extend the supervision of the Secretary of the Treasury over surety companies doing business with the Government, and thereby secure a larger measure of protection for the Government with respect to its bonds than is now possible under existing law.

## GENERAL SUPPLY COMMITTEE.

A comparison of market prices as of January 1, 1916, with the contract prices for articles and supplies for the Government which were negotiated through the General Supply Committee for the fiscal year 1916 discloses a saving of more than $\$ 700,000$ on supplies purchased during that fiscal year. This is an excellent result considering the unsettled market conditions controlling many articles and classes of supplies during the year.
The continued existence of the General Supply Committee, through which the Secretary of the Treasury negotiates contracts for all common supplies of the Government, is amply and fully justified. This centralized and systematized method of negotiating such coniracts, instead of permitting the various purchasing officers of the different departments and governmental establishments to enter into contracts for supplies without relation to one another, has resulted in great economy of labor and money. During the past year a material improvement has been made in many of the specifications. The schedule now covers more than 20,000 items in actual use. The manner in which many difficult questions arising in connection with the recommendations for awards have been handled by the committee and the assistance it has rendered in securing compliance with contracts on account of unsettled market conditions deserve commendation.

It is clear that further economy and improved service would result if the duties of the General Supply Committee were enlarged so as to include the direct purchasing of supplies. Under the present law there is no authority for the exercise of such powers. The activity of the Secretary of the Treasury through the medium of the committee stops with the execution and enforcement of contracts. I hope that steps 'will be taken to remedy this situation by consolidating under one head not only the contractual functions incident to the purchasing of supplies but also the actual purchasing thereof. This would necessarily involve a warehousing system. This is the plan followed by the leading successful industrial concerns of the country in the purchase of their supplies, and until the Government adopts this system it will not secure the greatest return for the money expended. The present organization of the General Supply Committee is a great improvement, but until legislation is enacted broadening the scope of the committee as herein suggested the Government will be unable to secure its supplies at the most advantageous prices.

SINKING FUND.
Attention is called to the views expressed in my report for the year 1915 (p.46), as follows:
The sinking-fund acts should be revised. Either an actual fund should be established, with definite and specific appropriation made therefor, together with specific provisions for the administration of the fund, or else the existing acts should be repealed and the Secretary directed to purchase and retire interest-bearing obligations of the United States whenever the same may be acquired advantageously and the condition of the Treasury will warrant such action.

Similar recommendations were made by my predecessor in the annual report for the year 1911.
It is probable that the present laws on the subject were passed and later continued in force under the belief that they would aid in strengthening the public credit through the period of refunding the Civil War debt and the return to a coin basis. Such reasons are now without any force whatever and no pledge of a portion of any specific revenue, as under the existing sinking-fund law, is either necessary or advisable as a support to public credit, nor is any such assurance or guarantee needed that the interest-bearing obligations of the United States will be discharged when due.

The existing sinking-fund law has been on the statute books for more than 50 years, having been enacted in February, 1862, but it
was impracticable to set up a sinking-fund account during the Civil War period because the Government was then borrowing money and issuing bonds therefor. No portion of the debt could therefore be purchased and retired for the account. It was not until the year 1869 that the account was set up under the law of 1862. Since 1869 purchases and redemptions of the debt for retirement thereof have been made annually when practicable.

On February 21, 1916, in accordance with a request therefor, the views of this department were transmitted to the Committee on Finance of the United States Senate respecting Senate bill 55, Sixtyfourth Congress, first session, "A bill to authorize the Secretary of the Treasury to use at his discretion surplus moneys in the Treasury in the purchase or redemption of the outstanding interest-bearing obligations of the United States," intended to accomplish the desired revision of the laws relating to the sinking fund. This bill was favorably reported in Senate report No. 289, passed the Senate April 24, 1916, and is now pending before the Committee on Ways and Means of the House of Representatives.

I earnestly recommend that said Senate bill 55 be enacted into law during the comming session of the Congress.

The general fund of the Treasury was charged during the fiscal year 1916 with $\$ 17,503,728.07$ for Panama Canal account without the sale of bonds. Of this sum $\$ 9,239,563.69$ for construction work is reimbursable from proceeds of bonds when sold. The difference, $\$ 8,264,164.38$, for fortifications. and miscellaneous accounts, is by law not to be so reimbursed. The total amount expended for the canal from the general fund to June 30, 1916, reimbursable from proceeds of bonds not yet sold, was $\$ 228,711,200.17$.

## CONTINGENT FUND.

I respectfully request that the Congress appropriate for the fiscal year 1918 the sum of $\$ 15,000$ as a contingent fund for the Secretary of the Treasury, a like amount having been appropriated for the fiscal year 1917.

CONDITION OF THE TREASURY.
On June 30, 1916, the balance in the Treasury of the United States (exclusive of credits to disbursing officers) was $\$ 178,491,415.58$, as against a balance (excluding credits to disbursing officers) on June 30,1915 , of $\$ 104,170,105.78$, showing an increase for the year of
$\$ 74,321,309.80$. This was the largest balance in the Treasury at the close of any fiscal year since June 30, 1908.

The ordinary revenues of the year were $\$ 779,664,552.49$, an increase of $\$ 87,180,107.37$ as compared with 1915. Internal-revenue receipts ${ }^{\circ}$ for the year increased $\$ 97,032,382.78$ and customs receipts increased $\$ 3,399,173.42$. Miscellaneous receipts, including those from land sales, showed a decrease of $\$ 13,251,448.83$.

The ordinary disbursements for the year were $\$ 724,492,998.90$, being $\$ 5,610,592.90$ less than for 1915 . Disbursements on account of the Panama Canal for the year, amounting to $\$ 17,503,728.07$, were paid out of the general fund. The total amount of disbursements on this account for the three fiscal years ending June 30, 1916, is $\$ 81,517,712.05$, all of which has been paid from the general fund and none of which has been reimbursed by the issue of bonds. The total amount expended for the canal from the general fund to June 30,1916 , reimbursable from the proceeds of bonds not yet sold, is \$228,711,200.17.

The estimate of receipts and disbursements for the fiscal year 1917 (p. 48 of this report) shows that although the current receipts will be insufficient fully to meet the current expenditures, there will, nevertheless, be a surplus in the general fund at the end of the fiscal year, amounting to $\$ 114,937,995.43$, including unencumbered disbursing officers' credits-that is, this sum represents the estimated balance in the Treasury June 30, 1917, free of all current obligations, the entire amount being available for the future expenditures of the Government. This is upon the basis of maintaining the troops upon the Mexican border until the 31st of December, 1916, and paying the entire cost thereof out of current revenues. Should the troops be kept on the border for the remainder of the fiscal year 1917 it would be necessary to reimburse the Treasury for expenditures on this account by the sale of Panama bonds or by additional revenue legislation.

The estimate of receipts and disbursements for the fiscal year 1918 (p. 49 of this report) shows that the existing laws will not provide sufficient revenues to take care of the unusual expenses of the Government due, for the most part, to the large expenditures required by the Army and Navy for preparedness, estimated for that year at $\$ 367,194,000$. I respectfully urge upon the attention of the Congress the necessity for passing such measures as will provide additional revenues to meet the situation.

## FINANCES

The following statements showing receipts, disbursements, estimates, and the condition of the Treasury are submitted:

## Receipts and Disbursements.

Fiscal year 1916.
The receipts and disbursements of the Government during the fiscal year ended June 30, 1916, were as follows:

> (See details on pp. 38 to 44 .)
> - General Fund.

| Receipts into the general fund, including various trust-fund receipts, but excluding postal revenues: |  |  |
| :---: | :---: | :---: |
| Customs. |  | \$213, 185, 845.63 |
| Internal revenue- |  |  |
| Ordinary | \$303, 486, 474.04 |  |
| Emergency revenue | 84, 278, 302. 13 |  |
| Corporation income tax. | $56,993,657.98$ |  |
| Individual income tax. | 67, 943, 594. 63 |  |
|  |  | 512, 702, 028.78 |
| Sales of public lands. |  | 1,887,661. 80 |
| Miscellaneous. |  | 51, 889, 016.28 |
| Total ordinary receipts. |  | 779,664,552.49 |

Disbursements from the general fund for current expenses and capital outlays, including various trust-fund disbursements, but excluding postal service paid from postal revenues and Panama Canal disbursements:

For civil establishment-
Legislative establishment.................... $\$ 13,848,007.16$
Executive proper............................... . $395,940.11$

## Postal Service.

Exclusive of Post Office Department proper, which is included in "civil establishment."
Postal revenue receipts
$\$ 312,057,688.83$
Postal service paid from postal revenues 306, 228, 452. 76

Excess of receipts.
$5,829,236.07$
United States Notes (Greenbacks).
Issues to replace worn and mutilated notes............................ $\$ 170,000,000.00$
Worn and mutilated notes retired........................................... $170,000,000.00$

The redemptions during the year of the notes unfit for circulation necessitated the issue of a like amount thereof to maintain the outstanding aggregate of the notes as required by law.

## Gold Reserve Fund.

Balance in reserve fund June 30, 1915................................ \$152, 977, 036. 63
Balance in reserve fund June 30, 1916
$152,979,025.63$
The redemptions of notes for gold from the reserve fund during the year were: United States notes, $\$ 70,684,405$, and Treasury notes of $1890, \$ 2,000$, a total of $\$ 70,686,405$.

As the redeemed notes were exchanged each day for gold in the general fund, the reserve was maintained at the fixed sum required by law, including $\$ 2,979,025.63$ tax on additional circulation received under act of May 30, 1908.

## Trust Funds.

(Held for the redemption of the notes and certificates for which they are respectively pledged.)

## Condition of the Treasury June 30, 1916.

The public debt of the United States at the close of the fiscal year 1916 is set forth in detail, as follows:

| Interest-bearing debt: |  |  |
| :---: | :---: | :---: |
| Loan of 1925, 4 per cent. | \$118, 489, 900.00 | , |
| Loan of 1908-1918, 3 per cent. | $63,945,460.00$ |  |
| Consols of 1930, 2 per cent. | $636,259,550.00$ | \$971, 562, 590.00 |
| Panama Canal loan, 2 per cent. | 84, 331, 980.00 |  |
| Panama Canal loan, 3 per cent. | $50,000,000.00$ |  |
| Postal savings bonds, $2 \frac{1}{2}$ per cent. | $8,245,100.00$. |  |
| Conversion bonds, 3 per cent. | $5,900,600.00$ |  |

Detailed estimates for the fiscal years 1917 and 1918 follow:
Fiscal year 191\%.
The receipts and disbursements of the Government for the current fiscal year are estimated upon the basis of existing laws, as follows:

RECEIPTS.
Ordinary receipts:
From customs
$\$ 230,000.000$
From internal revenue-
Ordinary
$\$ 319,000,000$
Emergency revenue and receipts from mu.nition manufacturers' and estate taxes_ 124,000,000

## Income tax-

Corporations
$133,000,000$
Individuals
111, 750, 000
From sales of public lands
From miscellaneous sources
2, 000, 000
56, 000, 000
Total estimated ordinary receipts
975, 750, 000
Panama Canal:
Estimated receipts from tolls, etc_-_-_-_-_-_ $\$ 6,500,000$.
Public debt:
Estimated deposits for issue of postal savings

DISBURSEMENTS:
For civil establishment :

Farm loan banks-subscription to capital stock_-_-.....- $9,000,000$

Navy Department proper
966, 000
Interior Department proper
$33,000,000$

For War Department:
Military Establishment, including $\$ 126,396,000$

| For Navy Department (including $\$ 87,700,000$ for prepareduess) : Naval Establishment, exclusive of building program $\qquad$ $\$ 159,965,000$ |  |
| :---: | :---: |
| Navy building program, new_---------------66,586,000 |  |
| Navy building program, prior years_-..--.---- $28,369,000$ |  |
|  | \$254, 920, 000 |
| For Indian Service | 30, 000, 000 |
| For pensions | 158; 063, 000 |
| For interest on the public deb | 23, 300,000 |
| Total estimated ordinary disbursements | 1, 058, 126, 000 |
| Panama Canal: |  |
| Disbursements for the canal from the general fund of the Treasury $\qquad$ | 20,000, 000 |
| Public debt: |  |
| Estimated retirements of national-bank notes in excess of deposits therefor $\qquad$ | 10,000, 000 |
|  | 50, 000 |
| Grand total estimated disbursements_ | ,088, 176, 000 |

Estimated excess of ordinary disbursements over ordinary re-"。 $82,376,000$
Estimated excess of total disbursements over total receipts, Panama Canal disbursements from the general fund included, fiscal year 1917 $\qquad$ $103,926,000$

## POSTAL SERVICE.

The Post Office Department estimates that under existing laws the postal revenues for the fiscal year 1917 will probably be $\$ 324,500,000$, with expenditures for the Postal Service for the same period of approximately $\$ 320,500,000$.

## Fiscal year 1918.

It is estimated that upon the basis of existing laws the receipts and diṣbursements for the fiscal year 1918 will be: .

```
                                    RECEIPTS.
Ordinary receipts:
```

```
    From internal revenue-
```

```
        Emergency revenue and receipts from mu-
            nition manufacturers' and estate taxes_ 145, 800,000
        Income tax:
            Corporations _-_------------------- 133,000,000
            Individuals_---------------------------- 111, 750,000
            From sales of public lands
                2,000,000
            From miscellaneous sources _--_---_------------------------54,000,000
            Total estimated ordinary receipts
                                    995,550,000
```

Estimated deficit in general fund June 30, 1918
$185,583,004.57$
Note.-On account of the untried revenue laws relating to taxation of inheritances and war munitions, and the uncertainty as to the actual expenditures that may be made on account of the large program for preparedness, it is very difficult to estimate with accuracy the receipts and expenditures for the fiscal years ending June 30, 1917, and June 30, 1918, particularly for the latter year. These figures contain no estimate for the shipping act or nitrate plants, bonds having been authorized therefor.

$$

## EXHIBIT.

## THE FEDERAL FARM LOAN ACT.

An Act To provide capital for agricultural development, tó create standard forms of investment based upon farm mortgage, to equalize rates of interest upon farm loans, to furnish a market for United States bonds, to create Government depositaries and financial agents for the United States, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the short title of this Act shall be "The Federal Farm Loan Act." Its administration shall be under the direction and control of the Federal Farm Loan Board hereinafter created.

## DEFINITIONS

Sec. 2. That wherever the term "first mortgage" is used in this Act it shall be held to include such classes of first liens on farm lands as shall be approved by the Federal Farm Loan Board, and the credit instruments secured thereby. The term "farm loan bonds" shall be held to include all bonds secured by collateral deposited with a farm loan registrar under the terms of this Act; they shall be distinguished by the addition of the words "Federal," or "joint stock," as the case may be.

## FEDERAL FARM LOAN BOARD.

Sec. 3. That there shall be established at the seat of government in the Department of the Treasury a bureau charged with the execu tion of this Act and of all Acts amendatory thereof, to be known as the Federal Farm Loan Bureau, under the general supervision of a Federal Farm Loan Board.

Said Federal Farm Loan Board shall consist of five members, including the Secretary of the Treasury, who shall be a member and chairman ex officio, and four members to be appointed by the President of the United States, by and with the advice and consent of the Senate. Of the four members to be appointed by the President, not more than two shall be appointed from one political party, and all four of said members shall be citizens of the United States and shall devote their entire time to the business of the Federal Farm Loan Board; they shall receive an annual salary of $\$ 10,000$ payable monthly, together with actual necessary traveling expenses.

One of the members to be appointed by the President shall be designated by him to serve for two years, one for four years, one for six years, and one for eight years, and thereafter each member so appointed shall serve for a term of eight years, unless sooner removed for cause by the President. One of the members shall be designated by the President as the Farm Loan Commissioner, who shall be the active executive officer of said board. Each member of the Federal Farm Loan Board shall within fifteen days after notice of his appointment take and subscribe to the oath of office.

The first meeting of the Federal Farm Loan Board shall be held in Washington as soon as may be after the passage of this Act, at a date and place to be fixed by the Secretary of the Treasury.
No member of the Federal Farm Loan Board shall, during his continuance in office, be an officer or director of any other institution, association, or partnership engaged in banking, or in the business of making land mortgage loans or selling land mortgages. Before entering upon his duties as a member of the Federal Farm Loan Board each member shall certify under oath to the President that he is eligible under this section.
The President shall have the power, by and with the advice and consent of the Senate, to fill any vacancy occurring in the membership of the Federal Farm Loan Board; if such vacancy shall be filled during the recess of the Senate a commission shall be granted which shall expire at the end of the next session.

The Federal Farm Loan Board shall appoint a farm loan registrar in each land bank district to receive applications for issues of farm loan bonds and to perform such other services as are prescribed by this Act. It shall also appoint one or more land bank appraisers for each land bank district and as many land bank examiners as it shall deem necessary. Farm loan registrars, land bank appraisers, and land bank examiners appointed under this section shall be public officials and shall, during their continuance in office, have no connection with or interest in any other institution, association, or partnership engaged in banking or in the business of making land mortgage loans or selling land mortgages: Provided, That this limitation shall not apply to persons employed by the board temporarily to do special work.

The salaries and expenses of the Federal Farm Loan Board, and of farm loan registrars and examiners authorized under this section, shall be paid by the United States. Land bank appraisers shall receive such compensation as the Federal Farm Loan Board shall fix, and shall be paid by the Federal land banks and the joint stock land banks which they serve, in such proportion and in such manner as the Federal Farm Loan Board shall order.

The Federal Farm Loan 'Board shall be authorized and empowered to employ such attorneys, experts, assistants, clerks, laborers, and other employees as it may deem necessary to conduct the business of said board. All salaries and fees authorized in this section and not otherwise provided for shall be fixed in advance by said board and shall be paid in the same manner as the salaries of the Federal Farm Loan Board. All such attorneys, experts, assistants, clerks, laborers, and other employees, and all registrars, examiners, and appraisers shall be appointed without regard to the provisions of the Act of January sixteenth, eighteen hundred and eighty-three (volume twenty-two, United States Statutes at Large, page four hundred and three), and amendments thereto, or any rule or regulation made in pursuance thereof: Provided, That nothing herein shall prevent the President from placing said employees in the classified service.

Every Federal land bank shall semiannually submit to the Federal Farm Loan Board a schedule showing the salaries or rates of compensation paid to its officers and employees.

The Federal Farm Loan Board shall annually make a full report of its operations to the Speaker of the House of Representatives, who shall cause the same to be printed for the information of the Congress.

The Federal Farm Loan Board shall from time to time require examinations and reports of condition of all land banks established under the provisions of this Act and shall publish consolidated statements of the results thereof. It shall cause to be made appraisals of farm lands as provided by this Act, and shall prepare and publish amortization tables which shall be used by national farm loan associations and land banks organized under this Act.
The Federal Farm Loan Board shall prescribe a form for the statement of condition of national farm loan associations and land banks under its supervision, which shall be filled out quarterly by each such association or bank and transmitted to said board.

It shall be the duty of the Federal Farm Loan Board to prepare from time to time builletins setting forth the principal features of this Act and through the Department of Agriculture or otherwise to distribute the same, particularly to the press, to agricultural journals, and to farmers' organizations; to prepare and distribute in the same manner circulars setting forth the principles and advantages of amortized farm loans and the protection afforded debtors under this Act, instructing farmers how to organize and conduct farm loan associations, and advising investors of the merits and advantages of farm loan bonds; and to disseminate in its discretion information for the further instruction of farmers regarding the methods and principles of cooperative credit and organization. Said board is hereby authorized to use a reasonable portion of the organization fund provided in section thirtythree of this Act for the objects specified in this paragraph, and is instructed to lay before the Congress at each session its recommendations for further appropriations to carry out said objects.

FEDERAL LAND BANKS.
Sec. 4. That as soon as practicable the Federal Farm Loan Board shall divide the continental United States, excluding Alaska, into twelve districts, which shall be known as Federal land bank districts, and may be designated by number. Said districts shall be apportioned with due regard to the farm loan needs of the country, but no such district shall contain a fractional part of any State. The boundaries thereof may be readjusted from time to time in the discretion of said board.

The Federal Farm Loan Board shall establish in each Federal land bank district a Federal land bank, with its principal office located in such city within the district as said board shall designate. Each Federal land bank shall include in its title the name of the city in which it is located. Subject to the approval of the Federal Farm Loan Board, any Federal land bank may establish branches within the land bank district

Each Federal land bank shall be temporarily managed by five directors appointed by the Federal Farm Loan Board. Said directors shall be citizens of the United States and residents of the district, They shall each give a surety bond, the premium on which shall be paid from the funds of the bank. They shall receive such compensation as the Federal Farm Loan Board shall fix. They shall choose from their number, by majority vote, a president, a vice president, a
secretary and a treasurer. They áre further authorized and empowered to employ such attorneys, experts, assistants, clerks, laborers, and other employees as they may deem necessary, and to fix their compensation, subject to the approval of the Federal Farm Loan Board.

Said temporary directors shall, under their hands, forthwith make an organization certificate, which shall specifically state:

First. The name assumed by such bank.
Second. The district within which its operations are to be carried on, and the particular city in which its principal office is to be located.

Third. The amount of capital stock and the number of shares into which the same is to be divided: Provided, That every Federal land bank organized under this Act shall by its articles of association permit an increase of its capital stock from time to time for the purpose of providing for the issue of shares to national farm loan associations and stockholders who may secure loans through agents of Federal land banks in accordance with the provisions of this Act.

Fourth. The fact that the certificate is made to enable such persons to avail themselves of the advantages of this Act. The organization certificate shall be acknowledged before a judge or clerk of some court of record or notary public, and shall be, together with the acknowledgment thereof, authenticated by the seal of such court or notary, transmitted to the Farm Loan Commissioner, who shall record and carefully preserve the same in his office, where it shall be at all times open to public inspection.

The Federal Farm Loan Board is authorized to direct such changes in or additions to any such organization certificate, not inconsistent with this Act, as it may deem necessary or expedient.

Upon duly making and filing such organization certificate the bank shall become, as from the date of the execution of its organization certificate, a body corporate, and as such, and in the name designated in the organization certificate, it shall have power-

First. To adopt and use a corporate seal.
Second. To have succession until it is dissolved by Act of Congress or under the provisions of this Act.

Third. To make contracts.
Fourth. To sue and be sued, complain, interplead, and defend, in any court of law or equity, as fully as natural persons.

Fifth. To elect or appoint directors, and by its board of directors to elect a president and a vice president, appoint a secretary and a treasurer and other officers and employees, define their duties, require bonds of them, and fix the penalty thereof; by action of its board of directors dismiss such officers and employees, or any of them, at pleasure and appoint others to fill their places.

Sixth. To prescribe, by its board of directors, subject to the supervision and regulation of the Federal Farm Loan Board, by-laws not inconsistent with law, regulating the manner in which its stock shall be transferred, its directors elected, its officers elected or appointed, its property transferred, its general business conducted, and the privileges granted to it by law exercised and enjoyed.

- Seventh. To exercise, by its board of directors or duly authorized officers or agents, subject to law, all such incidental powers as shall be necessary to carry on the business herein described.

After the subscriptions to stock in any Federal land bank by national farm loan associations, hereinafter authorized, shall have reached the sum of $\$ 100,000$, the officers and directors of said land bank shall be chosen as herein provided and shall, upon becoming duly qualified, take over the management of said land bank from the temporary officers selected under this section.
The board of directors of every Federal land bank shall be selected as hereinafter specified and shall consist of nine members, each holding office for three years. Six of said directors shall be known as local directors, and shall be chosen by and be representative of national farm loan associations; and the remaining three directors shall be known as district directors, and shall be appointed by the Federal Farm Loan Board and represent the public interest.

At least two months before each election the Farm Loan Commissioner shall notify each national farm loan association in writing that such election is to be held, giving the number of directors to be elected for its district, and requesting each association to nominate one candidate for each director to be elected. Within ten days of the receipt of such notice each association shall forward its nominations to said Farm Loan Commissioner. Said commissioner shall prepare a list of candidates for local directors consisting of the twenty persons securing the highest number of votes from national farm loan associations making such nominations.

At least one month before said election said Farm Loan Commissioner shall mail to each national farm loan association the list of candidates. The directors of each national farm loan association shall cast the vote of said association for as many candidates on said list. as there are vacancies to be filled, and shall forward said vote to the Farm Loan Commissioner within ten days after said list of candidates is received by them. The candidates receiving the highest number of votes shall be elected as local directors. In case of a tie the Farm Loan Commissioner shall determine the choice.

The Federal Farm Lioan Board shall designate one of the district directors to serve for three years and to act as chairman of the board of directors. It shall designate one of said directors to serve for a term of two years and one to serve for a term of one year. After the first appointments each district director shall be appointed for a term of three years.
At the first regular meeting of the board of directors of each Federal land bank it shall be the duty of the local directors to designate two of the local directors whose term of office shall expire in one year from the data of such meeting, two whose term of office shall expire in two years from said date, and two whose term of office shall expire in three years from said date. Thereafter every local director of a Federal land bank chosen as hereinbefore provided shall hold office for a term of three years. Vacancies that may occur in the board of directors shall be filled for the unexpired term in the manner provided for the original selection of such directors.

Directors of Federal land banks shall have been for at least two years residents of the district for which they are appointed or elected, and at least one district director shall be experienced in practical farming and actually engaged at the time of his appointment in farming operations within the district. No director of a Federal land bank shall, during his continuance in office. act as an officer, director, or
employee of any other institution, association, or partnership engaged in banking or in the business of making or selling land mortgage loans.

Directors of Federal land banks shall receive, in addition to any compensation otherwise provided, a reasonable allowance for necessary expenses in attending meetings of their respective boards, to be paid by the respective Federal land banks. Any compensation that may be provided by boards of directors of Federal land banks for directors, officers, or employees shall be subject to the approval of the Federal Farm Loan Board.

## CAPITAL STOCK OF FEDERAL LANS BANKS.

Sec. 5. That every Federal land bank shall have, before beginning business, a subscribed capital of not less than $\$ 750,000$. The Federal Farm Loan Board is authorized to prescribe the times and conditions of the payment of subscriptions to capital stock, to reject any subscription in its discretion, and to require subscribers to furnish adequate security for the payment thereof.

The capital stock of each Federal land bank shall be divided into shares of $\$ 5$ each, and may be subscribed for and held by any individual, firm, or corporation, or by the Government of any State or of the United States.

Stock held by national farm loan associations shall not be transferred or hypothecated, and the certificates therefor shall so state.

Stock owned by the Government of the United States in Federal land banks shall receive no dividends, but all other stock shall share in dividend distributions without preference. Each national farm loan association and the Government of the United States shall be entitled to one vote for each share of stock held by it in deciding all questions at meetings of shareholders, and no other shareholder shall be permitted to vote. Stock owned by the United States shall be voted by the Farm Loan Commissioner, as directed by the Federal Farm Loan Board.

It shall be the duty of the Federal Farm Loan Board, as soon as practicable after the passage of this Act, to open books of subscription for the capital stock of a Federal land bank in each Federal land bank district. If within thirty days after the opening of said books any part of the minimum capitalization of $\$ 750,000$ herein prescribed for Federal land banks shall remain unsubscribed, it shall be the duty of the Secretary of the Treasury to subscribe the balance thereof on behalf of the United States, said subscription to be subject to call in whole or in part by the board of directors of said land bank upon thirty days' notice with the approval of the Federal Farm Loan Board; and the Secretary of the Treasury is hereby authorized and directed to take out shares corresponding to the unsubscribed balance as called, and to pay for the same out of any moneys in the Treasury not otherwise appropriated. Thereafter no stock shall be issued except as hereinafter provided.

After the subscriptions to capital stock by national farm loan associations shall amount to $\$ 750,000$ in any Federal land bank, said bank shall apply semiannually to the payment and retirement of the shares of stock which were issued to represent the subscriptions to the original capital twenty-five per centum of all sums thereafter sub-
scribed to capital stock until all such original capital stock is retired at par.

At least twenty-five per centum of that part of the capital of any Federal land bank for which stock is outstanding in the name of national farm loan associations shall be held in quick assets, and may consist of cash in the vaults of said land bank, or in deposits in member banks of the Federal reserve system, or in readily marketable securities which are approved under rules and regulations of the Federal Farm Loan Board: Provided, That not less than five per centum of such capital shall be invested in United States Government bonds.

## GOVERNMENT DEPOSITARIES.

Sec. 6. That all Federal land banks and joint stock land banks organized under this Act, when designated for that purpose by the Secretary of the Treasury, shall be depositaries of public money; except receipts from customs, under such regulations as may be prescribed by said Secretary; and they may also be employed as financial agents of the Government; and they shall perform all such reasonable duties, as depositaries of public money and financial agents of the Government, as may be required of them. And the Secretary of the Treasury shall require of the Federal land banks and joint stock land banks thus designated satisfactory security, by the deposit of United States bonds or otherwise, for the safekeeping and prompt payment of the public money deposited with them, and for the faithful performance of their duties as financial agents of the Government. No Government funds deposited under the provisions of this section shall be invested in mortgage loans or farm loan bonds.

## NATIONAL FARM LOAN ASSOCIATIONS.

Sec. 7. That corporations, to be known as national farm loan associations, may be organized by persons desiring to borrow money on farm mortgage security under the terms of this Act. Such persons shall enter into articles of association which shall specify in general terms the object for which the association is formed and the territory within which its operations are to be carried on, and which may contain any other provision, not inconsistent with law, which the association may see fit to adopt for the regulation of its business and the conduct of its affairs. Said articles shall be signed by the persons uniting to form the association, and a copy thereof shall be forwarded to the Federal land bank for the district, to be filed and preserved in its office.

Every national farm loan association shall elect, in the manner prescribed for the election of directors of national banking associations, a board of not less than five directors, who shall hold office for the same period as directors of national banking associations. It shall be the duty of said board of directors to choose in such manner as they may prefer a secretary-treasurer, who shall receive such compensation as said board of directors shall determine. The board of directors shall elect a president, a vice president, and a loan committee of three members.

The directors and all officers except the secretary-treasurer shall serve without compensation, unless the payment of salaries to them shall be approved by the Federal Farm Loan Board. All officers and directors except the secretary-treasurer shall, during their term of office, be bona fide residents of the territory within which the association is authorized to do business, and shall be shareholders of the association.

It shall be the duty of the secretary-treasurer of every national farm loan association to act as custodian of its funds and to deposit the same in such bank as the board of directors may designate, to pay over to borrowers all sums received for their account from the Federal land bank upon first mortgage as in this Act prescribed, and to meet all other obligations of the association, subject to the orders of the board of directors and in accordance with the by-laws of the association. It shall be the duty of the secretary-treasurer, acting under the direction of the national farm loan association, to collect, receipt for, and transmit to the. Federal land bank payments of interest, amortization installments, or principal arising out of loans made through the association. ${ }^{\circ}$ He shall be the custodian of the securities, records, papers, certificates of stock, and all documents relating to or bearing upon the conduct of the affairs of the association. He shall furnish a suitable surety bond to be prescribed and approved by the Federal Farm Loan Board for the proper performance of the duties imposed upon him under this Act, which shall cover prompt collection and transmission of funds. He shall make a quarterly report to the Federal Farm Loan Board upon forms to be provided for that purpose. Upon request from said board said secretary-treasurer shall furnish information regarding the condition of the national farm loan association for which he is acting, and he shall carry out all duly authorized orders of said board. He shall assure himself from time to time that the loans made through the national farm loan association of which he is an officer are applied to the purposes set forth in the application of the borrower as approved, and shall forthwith report to the land bank of the district any failure of any borrower to comply with the terms of his application or mortgage. He shall also ascertain and report to said bank the amount of any delinquent taxes on land mortgaged to said bank and the name of the delinquent.
The reasonable expenses of the secretary-treasurer, the loan committee, and other officers and agents of national farm loan associations, and the salary of the secretary-treasurer, shall be paid from the general funds of the association, and the board of directors is authorized to set aside such sums as it shall deem requisite for that purpose and for other expenses of said association. When no such funds are available, the board of directors may levy an assessment on members in proportion to the amount of stock held by each, which may be repaid as soon as funds are available, or it may secure an advance from the Federal land bank of the district; to be repaid with interest at the rate of six per centum per annum, from dividends belonging to said association. Said Federal land bank is hereby authorized to make such advance and to deduct such repayment.

Ten or more natural persons who are the owners, or about to become the owners, of farm land qualified as security for a mortgage loan under section twelve of this Act, may unite to form a national
farm loan association. They shall organize subject to the requirements and the conditions specified in this section and in section four of this Act, so far as the same may be applicable: Provided, That the board of directors may consist of five members only, and instead of a secretary and a treasurer there shall be a secretary-treasurer, who need not be a shareholder of the association.

When the articles of association are forwarded to the Federal land bank of the district as provided in this section, they shall be accompanied by the written report of the loan committee as required in section ten of this Act, and by an affidavit stating that each of the subscribers is the owner, or is about to become the owner, of farm land qualified under section twelve of this Act as the basis of a mortgage loan; that the loan desired by each person is not more than $\$ 10,000$, nor less than $\$ 100$, and that the aggregate of the desired loans is not less than $\$ 20,000$; that said affidavit is accompanied by a subscription to stock in the Federal land bank equal to five per centum of the aggregate sum desired on mortgage loans; and that a temporary organization of said association has been formed by the election of a board of directors, a loan committee, and a secretarytreasurer who subscribes to said affidavit, giving his residence and post office address.

Upon receipt of such articles of association, with the accompanying affidavit and stock subscription, the directors of said Federal land bank shall send an appraiser to investigate the solvency and character of the applicants and the value of their lands, and shall then determine Whether in their judgment a charter should be granted to such association. They shall forward such articles of association and the accompanying affidavit to the Federal Farm Loan Board with their recommendation. If said recommendation is unfavorable; the charter shall be refused.

If said recommendation is favorable, the Federal Farm Loan Board shall thereupon grant a charter to the applicants therefor, designating the territory in which such association may make loans, and shall forward said charter to said applicants through said Federal land bank: Provided, That said Federal Farm Loan Board may for good cause shown in any case refuse to grant a charter.
Upon receipt of its charter such national farm loan association shall be authorized and empowered to receive from the Federal land bank of the district sums to be loaned to its members under the terms and conditions of this Act.

Whenever any national farm loan association shall desire to secure for any member a loan on first mortgage from the Federal land bank of its district it shall subscribe for capital stock of said land bank to the amount of five per centum of such loan, such subscription to be paid in cash upon the granting of the loan by said land bank. Such capital stock shall be held by said land bank as collateral security for the payment of said loan, but said association shall be paid any dividends accruing and payable on said capital stock while it is outstanding. Such stock may, in the discretion of the directors, and with the approval of the Federal Farm Loan Board, be paid off at par and retired, and it shall be so paid off and retired upon full payment of the mortgage loan. In such case the national farm loan association shall pay off at par and retire the corresponding shares of its stock which were issued when said land bank stock was issued.

$$
62015^{\circ}-\mathrm{FI} 1916-5
$$

The capital stock of a Federal land bank shall not be reduced to an amount less than five per centum of the principal of the outstanding farm loan bonds issued by it.

## CAPITAL STOCK OF NATIONAL FARM LOAN ASSOCIATIONS.

Sec. 8. That the shares in national farm loan associations shall be of the par value of $\$ 5$ each.

Every shareholder shall be entitled to one vote on each share of stock held by him at all elections of directors and in deciding all questions at meetings of shareholders: Provided, That the maximum number of votes which may be cast by any one shareholder shall be twenty.

No persons but borrowers on farm land mortgages shall be members or shareholders of national farm loan associations. Any person desiring to borrow on farm land mortgage through a national farm loan association shall make application for membership and shall subscribe for shares of stock in such farm loan association to an amount equal to five per centum of the face of the desired loan, said subscription to be paid in cash upon the granting of the loan. If the application for membership is accepted and the loan is granted, the applicant shall, upon full payment therefor, become the owner of one share of capital stnck in said loan association for each $\$ 100$ of the face of his loan, or any major fractional part thereof. Said capital stock shall be paid off at par and retired upon full payment of said loan. Said capital stock shall be held by said association as collateral security for the payment of said loan, but said borrower shall be paid any dividends accruing and payable on said capital stock while it is outstanding.

Every national farm loan association formed under this Act shall by its articles of association provide for an increase of its capital stock from time to time for the purpose of securing additional loans for its members and providing for the issue of shares to borrowers in accordance with the provisions of this Act. Such increases shall be included in the quarterly reports to the Federal Farm Loan Board.

NATIONAL FARM LOAN ASSOCIATIONS.-SPECIAL PROVISIONS.
Sec. 9. That any person whose application for membership is accepted by a national farm loan association shall be entitled to borrow money on farm land mortgage upon filing his application in accordance with section eight and otherwise complying with the terms of this Act whenever the Federal land bank of the district has funds available for that purpose, unless said land bank or the Federal Farm Loan Board shall, in its discretion, otherwise determine.

Any person desiring to secure a loan through a national farm loaw association under the provisions of this Act may, at his option, borrow from the Federal land bank through such association the sum necessary to pay for shares of stock subscribed for by him in the national farm loan association, such sum to be made a part of the face of the loan and paid off in amortization payments: Provided, however, That such addition to the loan shall not be permitted to increase said loan above the limitation imposed in subsection fifth of section twelve.

Subject to rules and regulations prescribed by the Federal Farm Loan Board, any national farm loan association shall be entitled to retain as a commission from each interest payment on 'any loan indorsed by it an amount to be determined by said board not to exceed one-eighth of one per centum semiannually upon the unpaid principal of said loan, any amounts so retained as commissions to be deducted from dividends payable to such farm loan association by the Federal land bank, and to make application to the land bank of the district for loans not exceeding in the aggregate one-fourth of its total stock holdings in said land bank. The Federal land banks shall have power to make such loans to associations applying therefor and to charge interest at a rate not exceeding six per centum per annum.

Shareholders of every national farm loan association shall be held individually responsible, equally and ratably, and not one for another, for all contracts, debts, and engagements of such association to the extent of the amount of stock owned by them at the par value thereof, in addition to the amount paid in and represented by their shares.

After a charter has been granted to a national farm loan association, any natural person who is the owner, or about to become the owner, of farm land qualified under section twelve of this Act as the basis of a mortgage loan, and who desires to borrow on a mortgage of such farm land, may become a member of the association by a two-thirds vote of the directors upon subscribing for one share of the capital stock of such association for each $\$ 100$ of the face of his proposed loan or any major fractional part thereof. He shall at the same time file with the secretary-treasurer his application for a mortgage loan, giving the particulars required by section twelve of this Act.

## APPRAISAL。

Sec. 10. That whenever an application for a mortgage loan is made to a national farm loan association, it shall be first referred to the loan committee provided for in section seven of this Act. Said loan committee shall examine the land which is offered as security for the desired loan and shall make a detailed written report signed by all three members, giving the appraisal of said land as determined by them, and such other information as may be required by rules and regulations to be prescribed by the Federal Farm Loan Board. No loan shall be approved by the directors unless said loan committee agrees upon a favorable report.

The written report of said loan committee shall be submitted to the Federal land bank, together with the application for the loan, and the directors of said land bank shall examine said written report when they pass upon the loan application which it accompanies, but they shall not be bound by said appraisal.

- Before any mortgage loan is made by any Federal land bank, or joint stock land bank, it shall refer the application and written report of the loan committee to one or more of the land bank appraisersappointed under the authority of section three of this Act, and such appraiser or appraisers shall investigate and make a written report upon the land offered as security for said loan. No such loan shall be made by said land bank unless said written report is favorable.

Forms for appraisal reports for farm loan associations and land banks shall be prescribed by the Federal Farm Loan Board.

Land bank appraisers shall make such examinations and appraisals and conduct such investigations, concerning farm loan bonds and first mortgages, as the Federal Farm Loan Board shall direct.
'No borrower under this Act shall be eligible as an appraiser under this section, but borrowers may act as members of a loan committee in any case where they are not personally interested in the loan under consideration. When any member of a loan committee or of a board of directors is interested, directly or indirectly, in a loan, a majority of the board of directors of any national farm loan association shall appoint a substitute to act in his place in passing upon such loan.

POWERS OF NATIONAL FARM LOAN ASSOCLATIONS.
Sec. 11. That every national farm loan association shall have power:

First. To indorse, and thereby become liable for the payment of, mortgages taken from its shareholders by the Federal land bank of its district.

Second. To receive from the Federal land bank of its district funds advanced by said land bank, and to deliver said funds to its shareholders on receipt of first mortgages qualified under section twelve of this Act.

Third. To acquire and dispose of such property, real or personal, as may be necessary or convenient for the transaction of its business.

Fourth.' To issue certificates against deposits of current funds bearing interest for not longer than one year at not to exceed four per centum per annum after six days from date, convertible into farm loan bonds when presented at the Federal land bank of the district in the amount of $\$ 25$ or any multiple thereof. Such deposits, when received, shall be forthwith transmitted to said land bank, and be invested by it in the purchase of farm loan bonds issued by a Federal land bank or in first mortgages as defined by this Act.

## RESTRICTIONS ON LOANS BASED ON FIRST MORTGAGES.

Sec. 12. That no Federal land bank organized under this Act shall make loans except upon the following terms and conditions:

First. Said loans shall be secured by duly recorded first mortgages on farm land within the land bank district in which the bank is situated.

Second. Every such mortgage shall contain an agreement providing for the repayment of the loan on an amortization plan by means of a fixed number of annual or semiannual installments sufficient to cover, first, a charge on the loan, at a rate not exceeding the interest rate in the last series of farm loan bonds issued by the land bank making the loan; second, a charge for administration and profits at a rate not exceeding one per centum per annum on the unpaid principal, said two rates combined constituting the interest rate on the mortgage; and, third, such amounts to be applied on the principal as will extinguish the debt within an agreed period, not less than five years nor more than forty years: Provided, That after five years from the date upon which a loan is made additional payments in sums of $\$ 25$ or any
multiple thereof for the reduction of the principal, or the payment of the entire principal, may be made on any regular installment date under the rules and regulations of the Federal Farm Loan Board: And provided further, That before the first issue of farm loan bonds by any land bank the interest rate on mortgages may be determined in the discretion of said land bank subject to the provisions and limitations of this Act.
Third. No loan on mortgage shall be made under this Act at a rate of interest exceeding six per centum per annum, exclusive of amortization payments.

Fourth. Such loans may be made for the following purposes and for no other:
(a) To provide for the purchase of land for agricultural uses.
(b) To provide for the purchase of equipment, fertilizers and live stock necessary for the proper and reasonable operation of the mortgaged farm; the term "equipment" to be defined by the Federal Farm Loan Board.
(c). To provide buildings and for the improvement of farm lands; the term "improvement" to be defined by the Federal Farm Loan Board.
(d) To liquidate indebtedness of the owner of the land mortgaged, existing at the time of the organization of the first national farm loan association established in or for the county in which the land mortgaged is situated, or indebtedness subsequently incurred for purposes mentioned in this section.

Fifth. No such loan shall exceed fifty per centum of the value of the land mortgaged and twenty per centum of the value of the permanent, insured improvements thereon, said value to be ascertained by appraisal, as provided in section ten of this Act. In making said appraisal the value of the land for agricultural purposes shall be the basis of appraisal and the earning power of said land shall be a principal factor.

A reappraisal may be permitted at any time in the discretion of the Federal land bank, and such additional loan may be granted as such reappraisal will warrant under the provisions of this paragraph. Whenever the amount of the loan applied for exceeds the amount that may be loaned under the appraisal as herein limited, such loan may be granted to the amount permitted under the terms of this paragraph without requiring a new application or appraisal.

Sixth. No such loan shall be made to any person who is not at the time, or shortly to become, engaged in the cultivation of the farm mortgaged. In case of the sale of the mortgaged land, the Federal land bank may permit said mortgage and the stock interests of the vendor to be assumed by the purchaser. In case of the death of the mortgagor, his heir or heirs, or his legal representative or representatives, shall have the option, within sixty days of such death, to assume the mortgage and stock interests of the deceased.
Seventh. The amount of loans to any one borrower shall in no case exceed a maximum of $\$ 10,000$, nor shall any loan be for a less sum than $\$ 100$.
Eighth. Every applicant for a loan under the terms of this Act shall make application on a form to be prescribed for that purpose by the Federal Farm Loan Board, and such applicant shall state the objects
to which the proceeds of said loan are to be applied, and shall afford such other information as may be required.
Ninth. Every borrower shall pay simple interest on defaulted payments at the rate of eight per centum per annum, and by express covenant in his mortgage deed shall undertake to pay when due all taxes, liens, judgments, or assessments which may be lawfully assessed against the land mortgaged. Taxes, liens, judgments, or assessments not paid when due, and paid by the mortgagee, shall become a part of the mortgage debt and shall bear simple interest at the rate of eight per centum per annum. Every borrower shall undertake to keep insured to the satisfaction of the Federal Farm Loan Board all buildings the value of which was a factor in determining the amount of the loan. Insurance shall be made payable to the mortgagee as its interest may appear at time of loss, and, at the option of the mortgagor and subject to general regulations of the Federal Farm Loan Board, sums so received may be used to pay for reconstruction of the buildings destroyed.
Tenth. Every borrower who shall be granted a loan under the provisions of this Act shall enter into an agreement, in form and under conditions to be prescribed by the Federal Farm Loan Board, that if the whole or any portion of his loan shall be expended for purposes other than those specified in his original application, or if the borrower shall be in default in respect to any condition or covenant of the mortgage, the whole of said loan shall, at the option of the mortgagee, become due and payable forthwith: Provided, That the borrower may use part of said loan to pay for his stock in the farm loan association, and the land bank holding such mortgage may permit said loan to be used for any purpose specified in subsection fourth of this section.

Eleventh. That no loan or the mortgage securing the same shall be impaired or invalidated by reason of the exercise of any power by any Federal land bank or national farm loan association in excess of the powers herein granted or any limitations thereon.

Funds transmitted to fạrm loan associations by Federal land banks to be loaned to its members shall be in current funds, or farm loan bonds, at the option of the borrower.

## POWERS OF FEDERAL LAND BANKS.

Sec. 13. That every Federal land bank shall have power, subject to the limitations and requirements of this Act-

First. To issue, subject to the approval of the Federal Farm Loan Board, and to sell farm loan bonds of the kinds authorized in this Act, to buy the same for its own account, and to retire the same at or before maturity.
Second. To invest such funds as may be in its possession in the purchase of qualified first mortgages on farm lands situated within the Federal land bank district within which it is organized or for which -it is acting.

Third. To receive and to deposit in trust with the farm loan registrar for the district, to be by him held as collateral security for farm loan bonds, first mortgages upon farm land qualified under section twelve of this Act, and to empower national farm loan associations, or duly authorized agents, to collect and immediately pay over to said land banks the dues, interest, amortization installments and other
sums payable under the terms, conditions, and covenants of the mortgages and of the bonds secured thereby.

Fourth. To acquire and dispose of-
(a) Such property, real or personal, as may be necessary or convenient for the transaction of its business, which, however, may be in part leased to others for revenue purposes.
(b) Parcels of land acquired in satisfaction of debts or purchased at sales under judgments, decrees, or mortgages held by it. But no such bank shall hold title and possession of any real estate purchased or acquired to secure any debt due to it, for a longer period than five years, except with the special approval of the Federal Farm Loan Board in writing.

Fifth. To deposit its securities, and its current funds subject to check, with any member bank of the Federal Reserve System, and to receive interest on the same as may be agreed.

Sixth. To accept doposits of securities or of current funds from national farm loan associations holding its shares, but to pay no interest on such deposits.

Seventh. To borrow money, to give security therefor, and to pay interest thereon.

Eighth. To buy and sell United States bonds.
Ninth. To charge applicants for loans and borrowers, under rules and regulations promulgated by the Federal Farm Loan Board, reasonable fees not exceeding the actual cost of appraisal and determination of title. Legal fees and recording charges imposed by law in the State where the land to be mortgaged is located may also be included in the preliminary costs of negotiating mortgage loans. The borrower may pay such fees and charges or he may arrange with the Federal land bank making the loan to advance the same, in which case said expenses shall be made a part of the face of the loan and paid off in amortization payments. Such addition to the loan shall not be permitted to increase said loan above the limitations provided in section twelve.

## RESTRICTIONS ON FEDERAL LAND BANKS.

Sec. 14. That no Federal land bank shall have power-
First. To accept deposits of current funds payable upon demand except from its own stockholders, or to transact any banking or other business not expressly authorized by the provisions of this Act.

Second. To loan on first mortgage except through national farm loan associations as provided in section seven and section eight of thisoAct, or through agents as provided in section fifteen.

Third. To accept any mortgages on real estate except first mortgages created subject to all limitations imposed by section twelve of this Act, and those taken as additional security for existing loans.

Fourth. To issue or obligate itself for outstanding farm loan bonds in excess of twenty times the amount of its capital and surplus, or to receive from any national farm loan association additional mortgages when the principal remaining unpaid upon mortgages already received from such association shall exceed twenty times the amount of its capital stock owned by such association.

Fifth. To demand or receive, under any form or pretense, any commission or charge not specifically authorized in this Act.

## agents of federal land banks.

Sec. 15. That whenever, after this Act shall have been in effect one year, it shall appear to the Federal Farm Loan Buard that national farm loan associations have not been formed, and are not likely to be formed, in any locality, because of peculiar local conditions, said board may, in its discretion, authorize Federal land banks to make loans on farm lands through agents approved by said board.
Such loans shall be subject to the same conditions and restrictions as if the same were made through national farm loan associations, and each borrower shall contribute five per centum of the amount of his loan to the capital of the Federal land bank, and shall become the owner of as much capital stock of the land bank as such contribution shall warrant.

- No agent other than a duly incorporated bank, trust company, mortgage company, or savings institution, chartered by the State in which it has its principal office, shall be employed under the provisions of this section.

Federal land banks may pay to such agents the actual expense of appraising the land offered as security for a loan, examining and certifying the title thereof, and making, executing, and recording the mortgage papers; and in addition may allow said agents not to exceed one-half of one per centum per annum upon the unpaid principal of said loan, such commission to be deducted from dividends payable to the borrower on his stock in the Federal land bank.

Actual expenses paid to agents under the provisions of this section shall be added to the face of the loan and paid off in amortization payments subject to the limitations provided in subsection ninth of section thirteen of this Act.

Said agents, when required by the Federal land banks, shall collect and forward to such banks without charge all interest and amortization payments on loans indorsed by them.
. Any agent negotiating any such loan shall indorse the same and become liable for the payment thereof, and for any default by the mortgagor, on the same terms and under the same penalties as if the loan had been originally made by said agent as principal and sold by said agent to said land bank, but the aggregate of the unpaid principal of mortgage loans received from any such agent shall not exceed ten times its capital and surplus.
If at any time the district represented by any agent under the provisions of this section shall, in the judgment of the Federal Farm Loan Board, be adequately served by national farm loan associations, no further loans shall be negotiated therein by agents under this section.

## JOINT STOCK LAND BANKS.

Sec. 16. That corporations, to be known as joint stock land banks, for carrying on the business of lending on farm mortgage security and issuing farm loan bonds, may be formed by any number of natural persons not less than ten. They shall be organized subject to the requirements and under the conditions set forth in section four of this Act, so far as the same may be applicable: Provided, That the
board of directors of every joint stock land bank shall consist of not less than five members.
. Shareholders of every joint stock land bank organized under this Act shall be held individually responsible, equally and ratably, and not one for another, for all contracts, debts, and engagements of such bank to the extent of the amount of stock owned by them at the par value thereof, in addition to the amount paid in and represented by their shares.

Except as otherwise provided, joint stock land banks shall have the powers of, and be subject to all the restrictions and conditions imposed on, Federal land banks by this Act, so far as such restrictions and conditions are applicable: Provided, however, That the Government of the United States shall not purchase or subscribe for any of the capital stock of any such bank; and each shareholder of any such bank shall have the same voting privileges as holders of shares in national banking associations.

No joint stock land bank shall have power to issue or obligate itself for outstanding farm loan bonds in excess of fifteen times the amount of its capital and surplus, or to receive deposits or to transact any banking or other business not expressly authorized by the provisions of this Act.

No joint stock land bank shall be authorized to do business until capital stock to the amount of at least $\$ 250,000$ has been subscribed, one-half thereof paid in cash and the balance subject to call by the board of directors, and a charter has been issued to it by the Federal Farm Loan Board.

No joint stock land bank shall issue any bonds until after the capital stock is entirely paid up.
Farm loan bonds. issued by joint stock land banks shall be so engraved as to be readily distinguished in form and color from farm loan bonds issued by Federal land banks, and shall otherwise bear such distinguishing marks as the Federal Farm Loan Board shall direct.
Joint stock land banks shall not be subject to the provisions of subsection (b) of section seventeen of this Act as to interest rates on mortgage loans or farm loan bonds, nor to the provisions of subsections first, fourth, sixth, seventh, and tenth of section twelve as to restrictions on mortgage loans: Provided, however, That no loans shall be made which are not secured by first mortgages on farm lands within the State in which such joint stock land bank has its principal office, or within some one State contiguous to such State. Such joint stock land banks shall be subject to all other restrictions on mortgage loans imposed on Federal land banks in section twelve of this Act.

Joint stock land banks shall in no case charge a rate of interest on farm loans exceeding by more than one per centum the rate of interest established for the last series of farm loan bonds issued by them.
Joint stock land banks shall in no case demand or receive, under any form or pretense, any commission or charge not specifically authorized in this Act.

Each joint stock land bank organized under this Act shall have authority to issue bonds based upon mortgages taken by it in accordance. with the terms of this Act. Such bonds shall be in form pre-
scribed by the Federal Farm Loan Board, and it shall be stated in such bonds that such bank is organized under section sixteen of this Act, is under Federal supervision, and operates under the provisions of this Act.

## POWERS OF FEDERAL FARM LOAN BOARD.

Sec. 17. That the Federal Farm Loan Board shall have power-
(a) To organize and charter Federal land banks, and to charter national farm loan associations and joint stock land banks subject to the provisions of this Act, and in its discretion to authorize them to increase their capital stock.
(b) To review and alter at its discretion the rate of interest to be charged by Federal land banks for loans made by them under the provisions of this Act, said rates to be uniform so far as practicable.
(c) To grant or refuse to Federal land banks, or joint stock land banks, authority to make any specific issue of farm loan bonds.
(d) To make rules and regulations respecting the charges made to borrowers on loans under this Act for expenses in appraisal, determination of title, and recording.
(e) To require reports and statements of condition and to make examinations of all banks or associations doing business under the provisions of this Act.
(f) To prescribe the form and terms of farm loan bonds, and the form, terms, and penal sums of all surety bonds required under this Act and of such other surety bonds as they shall deem necessary, such surety bonds to cover financial loss as well as faithful performance of duty.
(g) To require Federal land banks to pay forthwith to any Federal land bank their equitable proportion of any sums advanced by said land bank to pay the coupons of any other land bank, basing said required payments on the amount of farm loan bonds issued by each land bank and actually outstanding at the time of such requirement.
(h) To suspend or to remove for cause any district director or any registrar, appraiser, examiner, or other official appointed by said board under authority of section three of this Act, the cause of such suspension or removal to be communicated forthwith in writing by the Federal Farm Loan Board to the person suspended or removed, and in case of a district director to the proper Federal land bank.
(i) To exercise general supervisory authority over the Federal land banks, the national farm loan associations, and the joint stock land banks herein provided for.
(j) To exercise such incidental powers as shall be necessary or requisite to fulfill its duties and carry out the purposes of this Act.

## APPLICATIONS FOR FARM LOAN BONDS.

Sec. 18. That any Federal land bank, or joint stock land bank, which shall have voted to issue farm loan bonds under this Act, shall make written application to the Federal Farm Loan Board, through the farm loan registrar of the district, for approval of such issue. With said application said land bank shall tender to said farm loan registrar as collateral security first mortgages on farm lands qualified under the provisions of section twelve, section fifteèn, or section sixteen of this Act, or United States Government bonds, not less in
aggregate amount than the sum of the bonds proposed to be issued Said bank shall furnish with such mortgages a schedule containing a description thereof and such further information as may be prescribed by the Federal Farm Loan Board.
Upon receipt of such application said farm loan registrar shall verify said schedule and shall transmit said application and said schedule to the Federal Farm Loan Board, giving such further information pertaining thereto as he may possess. The Federal Farm Loan Board shall forthwith cause to be made such investigation and appraisement of the securities tendered as it shall deem wise, and it shall grant in whole or in part, or reject entirely, such application.

The Federal Farm Loan Board shall promptly transmit its decision as to any issue of farm loan bonds to the land bank applying for the same and to the farm loan registrar of the district. Said registrar shall furnish, in writing, such information regarding any issue of farm loan bonds as the Federal Farm Loan Board may at any time require.

No issue of farm loan bonds shall be authorized unless the Federal Farm Loan Board shall approve such issue in writing.

ISSUE OF FARM LOAN BONDS.
Sec. 19. That whenever any farm loan registrar shall receive from the Federal Farm Loan Board notice that it has approved any issue of farm loan bonds under the provisions of section eighteen he shall forthwith take such steps as may be necéssary, in accordance with the provisions of this Act, to insure the prompt execution of said bonds and the delivery of the same to the land bank applying therefor.

Whenever the Federal Farm Loan Board shall reject entirely any application for an issue of farm loan bonds, the first mortgages and bonds tendered to the farm loan registrar as collateral security therefor shall be forthwith returned to said land bank by him.

Whenever the Federal Farm Loan Board shall approve an issue of farm loan bonds, the farm loan registrar having the custody of the first mortgages and bonds tendered as collateral security for such issue of bonds shall retain in his custody those first mortgages and bonds which are to be held as collateral security, and shall return to the bank owning the same any of said mortgages and bonds which are not to be held by him as collateral security. The land bank which is to issue said farm loan bonds shall transfer to said registrar, by assignment, in trust, all first mortgages and bonds which are to be held by said registrar as collateral security, said assignment providing for the right of redemption at any time by payment as provided in this Act and reserving the right of substitution of other mortgages qualified under sections twelve, fifteen, and sixteen of this Act. Said mortgages and bonds shall be deposited in such deposit vault or bank as the Federal Farm Loan Board shall approve, subject to the control of said registrar and in his name as trustee for the bank issuing the farm loan bonds and for the prospective holders of said farm loan bonds.

No mortgage shall be accepted by a farm loan registrar from a land bank as part of an offering to secure an issue of farm loan bonds, either originally or by substitution, except first mortgages made subject
to the conditions prescribed in said sections twelve, fifteen, and sixteen.

It shall be the duty of each farm loan registrar to see that the farm loan bonds delivered by him and outstanding do not exceed the amount of collateral security pledged therefor. Such registrar may, in his discretion, temporarily accept, in place of mortgages withdrawn, United States Government bonds or cash.

The Federal Farm Loan Board may, at any time, call upon any land bank for additional security to protect the bonds issued by it.

## FORM OF FARM LOAN BONDS.

Sec. 20. That bonds provided for in this Act shall be issued in denominations of $\$ 25, \$ 50, \$ 100, \$ 500$, and $\$ 1,000$; they shall run for specified minimum and maximum periods, subject to payment and retirement, at the option of the land bank, at any time after five years from the date of their issue. They shall have interest coupons attached, payable semiannually, and shall be issued in series of not less than $\$ 50,000$, the amount and terms to be fixed by the Federal Farm Loan Board. They shall bear a rate of interest not to exceed five per centum per annum.

The Federal Farm Loan Board shall prescribe rules and regulations concerning the circumstances 'and manner in which farm loan bonds shall be paid and retired under the provisions of this Act.

Farm loan bonds shall be delivered through the registrar of the district to the bank applying for the same.

- In order to furnish farm loan bonds for delivery at the Federal land banks and joint stock land banks, the Secretary of the Treasury is hereby authorized to prepare suitable bonds in such form, subject to the provisions of this Act, as the Federal Farm Loan Board may approve, such bonds when prepared to be held in the Treasury subject to delivery upon order of the Federal Farm Loan Board. The engraved plates, dies, bed-pieces, and so forth, executed in connection therewith shall remain in the custody of the Secretary of the Treasury. Any expenses incurred in the preparation, custody, and delivery of such farm loan bonds shall be paid by the Secretary of the Treasury from any funds in the Treasury not otherwise appropriated: Provided, however, That the Secretary shall be reimbursed for such expenditures by the Federal Farm Loan Board through assessment upon the farm land banks in proportion to the work executed. They may be exchanged into registered bonds of any amount, and reexchanged into coupon bonds, at the option of the holder, under rules and regulations to be prescribed by the Federal Farm Loan Board.

## SPECLAL PROVISIONS OF FARM LOAN BONDS.

Sec. 21. That each land bank shall be bound in all respects by the acts of its officers in signing and issuing farm loan bonds, and by the acts of the Federal Farm Loan Board in authorizing their issue.

Every Federal land bank issuing farm loan bonds shall be primarily liable therefor, and shall also be liable, upon presentation of farm loan bond coupons, for interest payments due upon ally farm loan bonds issued by other Federal land banks and remaining unpaid in consequence of the default of such other land banks; and every
such bank shall likewise be liable for such portion of the principal of farm loan bonds so issued as shall not be paid after the assets of any such other land banks shall have been liquidated and distributed: Provided, That such losses, if any, either of interest or of principal, shall be assessed by the Federal Farm Loan Board against solvent land banks liable therefor in proportion to the amount of farm loan bonds which each may have outstanding at the time of such assessment.

Every Federal land bank shall by appropriate action of its board of directors, duly recorded in its minutes, obligate itself to become liable on farm loan bonds as provided in this section.

Every farm loan bond issued by a Federal land bank shall be signed by its president and attested by its secretary, and shall contain in the face thereof a certificate signed by the Farm Loan Commissioner to the effect that it is issued under the authority of the Federal Farm Loan Act, has the approval in form and issue of the Federal Farm Loan Board, and is legal and regular in all respects; that it is not taxable by National, State, municipal, or local authority; that it is issued against collateral security of United States Government bonds, or indorsed first mortgages on farm lands, at least equal in amount to the bonds issued; and that all Federal land banks are liable for the payment of each bond.

## APPLICATION OF AMORTIZATION AND INTEREST PAYMENTS.

SEc. 22. That whenever any Federal land bank, or joint stock land bank, shall receive any interest, amortization or other payments upon any first mortgage or bond pledged as collateral security for the issue of farm loan bonds, it shall forthwith notify the farm loan registrar of the items so received. Said registrar shall forthwith cause such payment to be duly credited upon the mortgage entitled to such credit. Whenever any such mortgage is paid in full, said registrar shall cause the same to be canceled and delivered to the proper land bank, which shall promptly satisfy and discharge the lien of record and transmit such canceled mortgage to the original maker thereof, or his heirs, administrators, executors, or assigns.

Upon written application by any Federal land bank, or joint stock land bank, to the farm loan registrar, it may be permitted, in the discretion of said registrar, to withdraw any mortgages or bonds pledged as collateral security under this Act, and to substitute therefor other similar mortgages or United States Government bonds not less in amount than the mortgages or bonds desired to be withdrawn.

Whenever any farm loan bonds, or coupons or interest payments of such bonds, are due under their terms, they shall be payable at the land bank by which they were issued, in gold or lawful money, and upon payment shall be duly canceled by said bank. At the discretion of the Federal Farm Loan Board, payment of any farm loan bond or coupon or interest payment may, however, be authorized to be made at any Federal land bank, any joint stock land bank, or any other bank, under rules and regulations to be prescribed by the Federal Farm Loan Board.

When any land bank shall surrender to the proper farm loan registrar any farm loan bonds of any series, canceled or uncanceled, said land bank shall be entitled to withdraw first mortgages and bonds
pledged as collateral security for any of said series of farm loan bonds to an amount equal to the farm loan bonds so surrendered, and it shall be the duty of said registrar to permit and direct the delivery of such mortgages and bonds to such land bank.
Interest payments on hypothecated first mortgages shall be at the disposal of the land bank pledging the same, and shall be available for the payment of coupons and the interest of farm loan bonds as they become due.

Whenever any bond matures, or the interest on any registered bond is due, or the coupon on any coupon bond matures, and the same shall be presented for payment as provided in this Act, the full face value thereof shall be paid to the holder.

Amortization and other payments on the principal of first mortgages held by a farm loan registrar as collateral security for the issue of farm loan bonds shall constitute a trust fund in the hands of the Federal land bank or joint stock land bank receiving the same, and shall be applied or employed as follows:
In the case of a Federal land bank-
(a) To pay off farm loan bonds issued by said bank as they mature.
(b) To purchase at or below par farm loan bonds issued by said bank or by any other Federal land bank.
(c) To loan on first mortgages on farm lands within the land bank district, qualified under this Act as collateral security for an issue of farm loan bonds.
(d) To purchase United States Government bonds.

In the case of a joint stock land båk-
(a) To pay off farm loan bonds issued by said bank as they mature.
(b) To purchase at or below par farm loan bonds.
(c) To loan on first mortgages qualified under section sixteen of this Act.
(d) To purchase United States Government bonds.

The farm loan bonds, first mortgages, United States Government bonds, or cash constituting the trust fund aforesaid, shall be forthwith deposited with the farm loan registrar as substituted collateral security in place of the sums paid on the principal of indorsed mortgages held by him in trust.
Every Federal land bank, or joint stock land bank, shall notify the farm loan registrar of the disposition of all payments made on the principal of mortgages held as collateral security for an issue of farm loan bonds, and said registrar is authorized, at his discretion, to order any of such payments, or the proceeds thereof, wherever deposited or however invested, to be immediately transferred to his account as trustee aforesaid.

## RESERVES AND DIVIDENDS OF LAND BANKS.

Sec. 23. That every Federal land bank, and every joint stock land bank, shall semiannually carry to reserve account twenty-five per centum of its net earnings until said reserve account shall show a credit balance equal to twenty per centum of the outstanding capital stock of said land bank. Whenever said reserve shall have been impaired, said balance of twenty per centum shall be fully restored before any dividends are paid. After said reserve has reached the sum of twenty per centum of the outstanding capital stock, five per
centum of the net earmings shall be annually added thereto. For the period of two years from the date when any default occurs in the payment of the interest, amortization installments, or principal on any first mortgage, by both mortgagor and indorser, the amount so defaulted shall be carried to a suspense account," and at the end of the two-year period specified, unless collected, shall be debited to reserve account.

After deducting the twenty-five per centum or the five per centum hereinbefore directed to be deducted for credit to reserve account, any Federal land bank or joint stock land bank may declare a dividend to shareholders of the whole or any part of the balance of its net earnings. The reserves of land banks shall be invested in accordance with rules and regulations to be prescribed by the Federal Farm Loan Board.

## RESERVE AND DIVIDENDS OF NATIONAL FARM LOAN ASSOCIATIONS.

Sec. 24. That every national farm loan association shall, out of its net earnings, semiannually carry to reserve account a sum not less than ten per centum of such net earnings until said reserve account shall show a credit balance equal to twenty per centum of the outstanding capital stock of said association.
Whenever said reserve shall have been impaired, said credit balance of twenty per centum shall be fully restored before any dividends are paid. After said reserve has reached said sum of twenty per centum, two per centum of the net earnings shall be annually added thereto.

After deducting the ten per centum or the two per centum hereinbefore directed to be credited to reserve account, said association may, at its discretion, declare a dividend to shareholders of the whole or any part of the balance of said net earnings.
The reserves of farm loan associations shall be invested in accordance with rules and regulations to be prescribed by the Federal Farm Loan Board.

Whenever any farm loan association shall be voluntarily liquidated a sum equal to its reserve account as herein required shall be paid to and become the property of the Federal land bank in which such loan association may be a shareholder.

## DEFAULTED LOANS.

Sec. 25. That if there shall be default under the terms of any indorsed first mortgage held by a-Federal land bank under the provisions of this Act, the national farm loan association or agent through which said mortgage was received by said Federal land bank shall be notified of said default. Said association or agent may thereupon be required, within thirty days after such notice, to make good said default, either by payment of the amount unpaid thereon in cash, or by the substitution of an equal amount of farm loan bonds issued by said land bank, with all unmatured coupons attached.

Sec. 26. That every Federal land bank and every national farm loan association, including the capital and reserve or surplus therein and the income derived therefrom, shall be exempt from Federal, State, municipal, and local taxation, except taxes upon real estate held, purchased, or taken by said bank or association under the provisions of section eleven and section thirteen of this Act. First mortgages executed to Federal land banks, or to joint stock land banks, and farm loan bonds issued under the provisions of this Act, shall be deemed and held to be instrumentalities of the Government of the United States, and as such they and the income derived therefrom shall be exempt from Federal, State, municipal; and local taxation.

Nothing herein shall prevent the shares in any joint stock land bank from being included in the valuation of the personal property of the owner or holder of such shares, in assessing taxes imposed by authority of the State within which the bank is located; but such assessment and taxation shall be in manner and subject to the conditions and limitations contained in section fifty-two hundred and nineteen of the Revised Statutes with reference to the shares of national banking associations.

Nothing herein shall be construed to exempt the real property of Federal and joint stock land bänks and national farm loan associations from either State, county, or municipal taxes, to the same extent, according to its value, as other real property is taxed.

## INVESTMENT IN FARM LOAN BONDS.

Sec. 27. That farm loan bonds issued under the provisions of this Act by Federal land banks or joint stock land banks shall be a lawful investment for all fiduciary and trust funds, and may be accepted as security for all public deposits.

Any member bank of the Federal Reserve System may buy and sell farm loan bonds issued under the authority of this Act.

Any Federal reserve bank may buy and sell farm loan bonds issued under this Act to the same extent and subject to the same limitations placed upon the purchase and sale by said banks of State, county, district, and municipal bonds under subsection (b) of section fourteen of the Federal Reserve Act approved December twenty-third, nineteen hundred and thirteen.

## EXAMINATIONS.

Sec. 28. That the Federal Farm Loan Board shall appoint as many land bank examiners as in its judgment may be required to make careful examinations of the banks and associations permitted to do business under this Act.

Said examiners shall be subject to the same requirements, responsibilities and penalties as are applicable to national bank examiners under the national bank Act, the Federal Reserve Act and other provisions of law. Whenever directed by the Federal Farm Loan Board, said examiners shall examine the condition of any national farm loan association and report the same to the Farm Loan Com-
missioner. They shall examine and report the sondition of every Federal land bank and joint stock land bank at least twice each year.

Said examiners shall receive salaries to be fixed by the Federal Farm Loan Board.

## DISSOLUTION AND APPOINTMENT OF RECEIVERS.

Sec. 29. That upon receiving satisfactory evidence that any national farm loan association has failed to meet its outstanding obligations of any description the Federal Farm Loan Board may forthwith declare such association insolvent and appoint a receiver and require of him such bond and security as it deems proper: Provided, That no national farm loan association shall be declared insolvent by said board until the total amount of defaults of current interest and amortization installments on loans indorsed by national farm loan associations shall amount to at least $\$ 150,000$ in the Federal land bank district, unless such association shall have been in default for a period of two years. Such receiver, under the direction of the Federal Farm Loan Board, shall take possession of the books, records, and assets of every description of such association, collect all debts, dues, and claims belonging to it, and, with the approval of the Federal Farm Loan Board, or upon the order of a court of record of competent jurisdiction, may sell or compound all bad or doubtful debts, and, on a like approval or order, may sell all the real and personal property of such association, on such terms as the Federal Farm Loan Board or said court shall direct.

Such receiver shall pay over all money so collected to the Treasurer of the United States, subject to the order of the Federal Farm Loan Board, and also make report to said board of all his acts and proceedings. The Secretary of the Treasury shall have authority to deposit at interest any money so received.

Upon default of any obligation, Federal land banks and joint stock land banks may be declared insolvent and placed in the hands of a receiver by the Federal Farm Loan Board, and proceedings shall thereupon be ${ }^{\circ}$ had in accordance with the provisions of this section regarding national farm loan associations.
If any national farm loan association shall be declared insolvent and a receiver shall be appointed therefor by the Federal Farm Loan Board, the stock held by it in the Federal land bank of its district shall be canceled without impairment of its liability and all payments on such stock, with accrued dividends, if any, since the date of the last dividend shall be first applied to all debts of the insolvent farm loan association to the Federal land bank and the balance, if any, shall be paid to the receiver of said farm loan association: Provided, That in estimating said debts contingent liabilities incurred by national farm loan associations under the provisions of this Act on account of default of principal or interest of indorsed mortgages. shall be estimated and included as a debt, and said contingent liabilities shall be determined by agreement between the receiver and the Federal land bank of the district, subject to the approval of the Federal Farm Loan Board, and if said receiver and said land bantr can not agree, then by the decision of the Farm Loan Commissioner, and the amount thus ascertained shall be deducted in accordance

$$
62015^{\circ}-\mathrm{rx} \mathrm{1916}-6
$$

with ${ }^{\lambda}$ the provisions of this section from the amount otherwise due said national farm loan association for said canceled stock. Whenever the capital stock of a Federal land bank shall be reduced, the board of directors shall cause to be executed a certificate to the Federal Farm Loan Board, showing such reduction of capital stock, and, if said reduction shall be due to the insolvency of a national farm loan association, the amount repaid to such association.

No national farm loan association, Federal land bank or joint stock land bank shall go into voluntary liquidation without the written consent of the Federal Farm Loan Board, but national farm loan associations may consolidate under rules and regulations promulgated by the Federal Farm Loan Board.

## STATE LEGISLATION.

Sec. 30. That it shall be the duty of the Farm Loan Commissioner to make examination of the laws of every State of the United States and to inform the Federal Farm Loan Board as rapidly as may be whether in his judgment the laws of each State relating to the conveying and recording of land titles, and the foreclosure of mortgages or other instruments securing loans, as well as providing homestead and other exemptions and granting the power to waive such exemptions as respects first mortgages, are such as to assure the holder thereof adequate safeguards against loss in the event of default on loans secured by any such mortgages.

Pending the making of such examination in the case of any State, the Federal Farm Loan Board may declare first mortgages on farm lands situated within such State ineligible as the basis for an issue of farm loan bonds; and if said examination shall show that the laws of any such State afford insufficient protection to the holder of first mortgages of the kinds provided in this Act, said Federal Farm Loan Board may declare said first mortgages on land situated in such State ineligible during the continuance of the laws in question. In making his examination of the laws of the several States and forming his conclusions thereon said. Farm Loan Commissioner may call upon the office of the Attorney General of the United States for any needed legal advice or assistance, or may employ special counsel in any State where he considers such action necessary.

At the request of the Executive of any State the Federal Farm Loan Board shall prepare a statement setting forth in what respects the requirements of said board can not be complied with under the existing laws of such State.

## PENALTIES.

Sec. 31. That any applicant for a loan under this Act who shall knowingly make any false statement in his application for such loan, and any member of a loan committee or any appraiser provided for in this Act who shall willfully overvalue any land offered as security for loans under this Act, shall be punished by a fine of not exceeding . $\$ 5,000$, or by imprisonment not exceeding one year, or both. Any examiner appointed under this Act who shall accept a loan or gratuity from any land bank or national farm loan association examined by him, or from any person connected with any such bank or asso-
ciation in any capacity, shall be punished by a fine of not exceeding $\$ 5,000$, or by imprisonment not exceeding one year, or both, and may be fined a further sum equal to the money so loaned or gratuity given, and shall forever thereafter be disqualified from holding office as an examiner under the provisions of this Act. No examiner, while holding such office, shall perform any other service for compensation for any bank or banking or loan association, or for any person connected therewith in any capacity.

Any person who shall falsely make, forge, or counterfeit, or cause or procure to be falsely made, forged, or counterfeited, or willingly aid or assist in falsely making, forging, or counterfeiting any bond, coupon, or paper in imitation of, or purporting to be in imitation of, the bonds or coupons issued by any land bank or national farm loan association, now or hereafter authorized and acting under the laws of the United States; or any person who shall pass, utter, or publish, or attempt to pass, utter, or publish any false, forged, or counterfeited bond, coupon, or paper purporting to be issued by any such bank or association, knowing the same to be falsely made, forged, or counterfeited; or whoever shall falsely alter, or cause or procure to be falsely altered, or shall willingly aid or assist in falsely altering any such bond, coupon, or paper, or shall pass, utter, or publish as true any falsely altered or spurious bond, coupon, or paper issued, or purporting to have been issued, by any such bank or association, knowing the same to be falsely altered or spurious, shall be punished by a fine of not exceeding $\$ 5,000$ or by imprisonment not exceeding five years, or both.

Other than the usual salary or director's fee paid to any officer, director, or employee of a national farm loan association, a Federal land bank, or a joint stock land bank, and other than a reasonable fee paid by such association or bank to any officer, director, attorney, or employee for services rendered, no officer, director, attorney, or employee of an association or bank organized under this Act shall be a beneficiary of or receive, directly or indirectly, any fee, commission, gift, or other consideration for or in connection with any transaction or business of such association or bank. No land bank or national farm loan association organized under this Act shall charge or receive any fee, commission, bonus, gift, or other consideration not herein specifically authorized. No examiner, public or private, shall disclose the names of borrowers to other than the proper officers of a national farm loan association or land bank without first having obtained express permission in writing from the Farm Loan Commissioner or from the board of directors of such association or bank, except when ordered to do so by a court of competent jurisdiction or by direction of the Congress of the United States, or of either House thereof, or any committee of Congress or of either House duly authorized. Any person violating any provision of this paragraph shall be punished by a fine of not exceeding $\$ 5,000$ or by imprisonment not exceeding one year, or both.

Any person connected in any capacity with any national farm loan association, Federal land bank, or joint stock land bank, who ombezzles, abstracts, or willfully misapplies any moneys, funds, or credits thereof, or who without authority from the directors draws any order, assigns any note, bond, draft, mortgage, judgment, or decree thereof, or who makes any false entry in any book, report, or statement of
such association or land bank with intent in either case to defraud such institution or any other company, body politic or corporate, or any individual person, or to decelve any officer of a national farm loan association or land bank or any agent appointed to examine into the affairs of any such association or bank, and every person who with like intent aids or abets any officer, clerk, or agent in any violation of this section, shall be punished by a fine of not exceeding $\$ 5,000$ or by imprisonment not exceeding five years, or both.

Any person who shall deceive, defraud, or impose upon, or who shall attempt to deceive, defraud, or impose upon, any person, firm, or corporation by making any false pretense or representation regarding the character, issue, security, or terms of any farm loan bond, or coupon, issued under the terms of this Act; or by falsely pretending or representing that any. farm loan bond, or coupon, issued under the terms of this Act by one class of land banks is a farm loan bond, or coupon, issued by another class of banks; or by falsely pretending or representing that any farm loan bond, or coupon, issued under the terms of this Act, or anything contained in said farm loan bond, or coupon, is anything other than, or different from, what it purports to be on the face of said bond or coupon, shall be fined not exceeding $\$ 500$ or imprisoned not exceeding one year, or both.

The Secretary of the Treasury is hereby authorized to direct and use the Secret Service Division of the Treasury Department to detect, arrest, and deliver into custody of the United States marshal having jurisdiction, any person or persons violating any of the provisions of this section.

## GOVERNMENT DEPOSITS.

Sec. 32. That the Secretary of the Treasury is authorized, in his discretion, upon the request of the Federal Farm Loan Board, to make deposits for the temporary use of any Federal land bank, out of any money in the Treasury not otherwise appropriated. Such Federal land bank shall issue to the Secretary of the Treasury a certificate of indebtedness for any such deposit, bearing a. rate of interest not to exceed the current rate charged for other Government deposits, to .be secured by farm loan bonds or other collateral, to the satisfaction of the Secretary of the Treasury. Any such certificate shall be redeemed and paid by such land bank at the discretion of the Secretary of the Treasury. The aggregate of all sums so deposited by the Secretary of the Treasury shall not exceed the sum of $\$ 6,000,000$ at any one time.

## ORGANIZATION EXPENSES.

Sec. 33. That the sum of $\$ 100,000$, or so much thereof as may be necessary, is hereby appropriated, out of any money in the Treasury not otherwise appropriated, to be expended under the direction of the Federal Farm Loan Board, for the purpose of carrying into effect the provisions of this Act, including the rent and equipment of necessary offices.

## LIMITATION OF COURT DECISIONS.

SEc. 34. That if any clause, sentence, paragraph, or part of this Act shall for any reason be adjudged by any court of competent jurisdiction to be invalid, such judgment shall not affect, impair, or invalidate the remainder of this Act, but shall be confined in its operation to the clause, sentence, paragraph, or part thêreof directly involved in the controversy in which such judgment shall have been rendered.

## REPEALING CLAUSE.

Sec. 35. That all Acts or parts of Acts inconsistent with this Act are hereby repealed, and this Act shall take effect upon its passage. The right to amend, alter, or repeal this Act is hereby expressly reserved.
Approved, July 17, 1916.

## ABSTRACTS OF REPORTS OF BUREAUS AND DIVISIONS.

## ABSTRACTS OF REPORTS OF BUREAUS AND DIVISIONS.

The following is a summary of the reports of bureaus and divisions of the Treasury Department for the fiscal year ended June 30, 1916, with the exception that the figures in relation to public moneys are brought down to November 1, 1916.

## TREASURER OF THE UNITED STATES.

The ordinary revenues for the fiscal year 1916 were $\$ 779,664,552.49$, an increase of $\$ 87,180,107.37$ as compared with those of 1915; the increased receipts from customs, internal revenue (ordinary), emergency revenue, and corporation and individual income tax were $\$ 100,817,822.70$, while decreased receipts are recorded in sales of public lands and from miscellaneous sources amounting to $\$ 13,637,715.33$.

The total ordinary disbursements were $\$ 724,492,998.90$, which by classified comparison with 1915 shows an increase on account of the Naval Establishment of $\$ 13,193,771.80$, while decreased disbursements are recorded in the civil and miscellaneous accounts, the Military Establishment; the Indian Service, pensions, and interest on the public debt amounting to $\$ 18,804,364.70$, so that the net result on ordinary expenditures was a decrease of $\$ 5,610,592.90$. The surplus on ordinary transactions for the year was $\$ 55,171,553.59$.

The receipts from the Panama Canal during the fiscal year 1916 were $\$ 2,869,995.28$, while the expenses incurred amounted to $\$ 17,503,728.07$. The net excess of disbursements was $\$ 14,633,732.79$, which was paid out of the general fund of the Treasury.

Deposits for postal savings bonds, authorized by the act of June 25, 。 1910, were racsived during the fiscal year to the amount of $\$ 1,803,500$. Under the provisions of the act of July 14, 1890, deposits of lawful money of the United States to retire national-bank notes were received amounting to $\$ 56,648,902.50$, which, with the deposits for postal savings bonds, aggregate $\$ 58,452,402.50$ in actual cash received on account of the public debt, while the cash disbursements on account of the principal of matured loans and fractional currency were $\$ 35,903$ and for national-bank notes canceled and retired $\$ 24,633,010.50$, a total disbursement for the debt of $\$ 24,668,913.50$. The net result was an excess of receipts of $\$ 33,783,489$.

On June 30, 1916, the balance in the general fund, including $\$ 55,129,185.82$ to the credit of disbursing officers, was $\$ 235,925,945.68$.

The redemptions from the reserve fund during the fiscal year were, in United States notes $\$ 70,684,405$, and in Treasury notes $\$ 2,000$, making a total of $\$ 70,686,405$. The transactions were more in the nature of exchanges than a desire of the holders of these notes for gold. The redeemed notes were, under the provisions of the act of March 14, 1900, immediately exchanged for gold, and thereby the reserve was maintained in volume and character.

The gold in the Treasury at the close of the fiscal year 1916 amounted to $\$ 1,803,493,932.83$, an increase of $\$ 420,533,943.65$ as compared with like holdings in 1915. Set apart for the respective uses, it was held on the following accounts: Reserve fund, $\$ 152,979,025.63$; trust funds (for redemption of gold certificates in actual circulation), $\$ 1,565,400,289$; and in general fund (belonging to the Treasury), $\$ 85,114,618.20$.

The imports of gold during the year were $\$ 494,009,301$, the exports $\$ 90,249,548$, and the net excess of imports, $\$ 403,759,753$.

The currency distributed from the Treasury in Washington to the subtreasuries and to banks during the fiscal year 1916 amounted_to $\$ 1,093,748,025$, against $\$ 836,961,227$ during the preceding 12 months.

The Secretary of the Treasury on November 24, 1915, designated the Federal reserve banks as depositaries and fiscal agents of the United States under section 15 of the Federal reserve act, effective on and after January 1, 1916, and until revoked. The deposits of all officers of the Government in Federal reserve cities, including Brooklyn and St. Paul, have since that date been made with the Federal reserve banks, with the exception of post-office funds and the deposits to the credit of United States courts and their officers. The Federal reserve banks have cashed Government warrants and checks drawn on the Treasurer of the United States in the same manner as nationalbank depositaries. The amounts held by the national-bank depositaries in the Federal reserve cities at the close of business December 31, 1915, to the credit of the Treasurer of the United States were transferred to the Federal reserve banks in those cities, and the national-bank depositaries were discontinued, except as to such depositaries holding post-office and court funds. The balance of public moneys on deposit in the Federal reserve banks at the close of the fiscal year 1916 was $\$ 113,480,576$.

The balance of public moneys on deposit in national-bank depositaries at the close of the fiscal year 1916 was $\$ 39,520,201.80$.

The gold settlement fund inaugurated and established by the Federal Reserve Board in May, 1915, under the provisions of section 16 of the Federal reserve act, has been of great service in settling balances arising out of transactions among the 12 Federal reserve banks. The fund is in the custody of and operated under the direction of the Federal Reserve Board with the cooperation of the Treas-
ury Department. The amount deposited in the fund during the last fiscal year was $\$ 224,970,000$. If the Treasury finds it necessary to ship from one point to another funds to make payment on account of the said settlement fund, the Federal Reserve Board will refund any expenses incurred in making such shipments.

At the close of the fiscal year 1916 the general stock of money in the United States amounted to $\$ 4,482,859,133$, an increase of $\$ 493,402,947$ as compared with that of the preceding year. The growth in gold was $\$ 464,167,033$, in silver $\$ 3,426,897$, in Federal reserve notes $\$ 91,907,950$, and in Federal reserve bank notes (a new kind of money issued during the year) $\$ 9,000,000$, while the national-bank notes decreased $\$ 75,098,933$. There was no change in the United States notes. The money in circulation increased in volume by $\$ 454,878,188$ and amounted to $\$ 4,024,097,762$ on June 30,1916 . The circulation per capita was $\$ 39.28$ and the share of gold to whole circulation 50.97 per cent.

The notes and certificates of United States paper currency issued during the fiscal year numbered $358,838,465$ pieces, of the total value of $\$ 1,510,334,000$. The redemptions were $310,343,348$ pieces, of the total value of $\$ 993,220,100$. The pieces outstanding number $382,848,473$, of the total value of $\$ 2,578,690,685$. The average cost of each piece of United States paper currency issued and redeemed is about 1.526 cents, and the annual cost of maintenance of the currency issued by the National Government averages slightly more than one-fifth of 1 per cent of the amount outstanding.

During the fiscal year 1916 nationai-bank notes amounting to $\$ 522,923,441$ were presented for redemption. This sum was 68 per cent of the average circulation outstanding. Of the notes received at the Treasury $\$ 86,938,900$ were fit for use and were returned to the banks of issue for further circulation. The expenses incurred for redemption of national-bank notes during the year have been assessed upon the banks in proportion to their notes redeemed and was at the rate of $\$ 0.817229$ per $\$ 1,000$.

Federal reserve notes amounting to $\$ 41,065,305$ were presented for redemption during the fiscal year 1916 , of which $\$ 14,410,600$ were fit for use and were returned to banks and agents for further circulation. There being only 12 Federal reserve banks, their notes can be assorted with more facility than national-bank notes, and this condition appears to warrant a difference in rates to bring about an equitable distribution of expense; therefore the rate charged Federal reserve banks on notes redeemed in the ordinary course of business was $\$ 0.41880208$ per $\$ 1,000$.

The United States bonds pledged to secure bank circulation amounted to $\$ 690,440,930$ on June 30,1916 , a decrease of $\$ 45,583,260$ as compared with those of the preceding year. United States
bonds and other securities amounting to $\$ 42,674,350$ were held to secure public deposits in national banks. Under the provisions of the act of June 25, 1910, establishing the Postal Savings System, the Treasurer of the United States held in trust, as security for deposits in postal savings depositaries, bonds and securities amounting to $\$ 111,399,577.40$ on June $30,1916$.

Silver dollars were shipped to depositors therefor at the expense of the consignee for transportation as usual during the fiscal year. The stock of such coins is $\$ 568,270,319$, of which $\$ 501,855,387$ are held in the Treasury for the redemption of outstanding Treasury notes and silver certificates, leaving in circulation $\$ 66,414,932$ at the close of the fiscal year 1916. The stock of subsidiary silver coin is $\$ 188,858,483$, of which $\$ 17,449,437$ was held in the Treasury and the balance, $\$ 171,418,046$, was in circulation on June 30, 1916.

The trust funds, gold and silver coins held to redeem outstanding notes and certificates, increased $\$ 387,987,402$, and amounted to $\$ 2,057,409,391$ at the close of the fiscal year. The increase in gold was $\$ 391,691,300$, while the silver decreased $\$ 3,703,898$.

## District of Columbia.

The amount of the funded debt retired during the fiscal year 1916 was $\$ 338,100$, while additional United States bonds have been purchased and are held for this fund.

The total issue of District of Columbia bonds was $\$ 14,997,300$, and of this amount $\$ 8,817,400$ has been redeemed, leaving the outstanding funded debt only $\$ 6,179,900$, while there is held in trust against this amount $\$ 689,000$ United States bonds.

At the close of the fiscal year 1916 the 10 per cent guaranty fund retained from District of Columbia contractors amounted to $\$ 254,-$ 652.69, and is represented by $\$ 72,498.93$ cash and United States and District of Columbia bonds aggregating $\$ 176,250$ and costing \$182,153.76.

Detailed information in regard to the affairs of the District of Columbia will be found in the reports of the District Commissioners and the Treasurer of the United States, ex officio commissioner of the District of Columbia sinking fund.

## COMPTROLLER OF THE CURRENCY.

On June 30, 1916, there were 7,588 national banks in operation, having an authorized capital of $\$ 1,070,858,375$ and total circulation outstanding of $\$ 744,174,660$, of which $\$ 686,583,635$ was secured by United States bonds and $\$ 57,591,025$ by deposits of lawful money in retirement account.

Charters for 10,869 national banks have been issued since the beginning of the national-banking system in 1863. Of this number,

2,739 banks voluntarily liquidated and 542 failed and were placed in charge of receivers. National-bank charters were issued to 117 associations during the 12 months ending June 30, 1916, which number includes 45 conversions of State banks, 13 reorganizations of State and private banks, and 59 primary organizations. The capital of the banks chartered during the year aggregated $\$ 7,505,000$.

From December 23, 1913, the date of the passage of the Federal reserve act, to June $30,1916,400$ banks, having an aggregate capital of $\$ 31,544,500$, were chartered. Of these banks, 262 , with a capital of $\$ 6,899,500$, were chartered with capital less than $\$ 50,000$ each, and 138 , with a capital of $\$ 24,645,000$, the individual capital being $\$ 50,000$ or more.
For the four years prior to the passage of the Federal reserve act the average number of conversions to the total number of banks chartered was 37.4 per cent, reorganizations 14.4 per cent, and primary organizations 48.2 per cent. Since that date the conversions have been 42 per cent, reorganizations 22 per cent, and primary organizations 36 per cent. .
Of the banks chartered during the fiscal year 1916, 87, with aggregate capital of $\$ 2,280,000$, or an average capital of about $\$ 26,000$, were organized with capital of less, than $\$ 50,000$, and 30 , with an aggregate capital of $\$ 5,225,000$, an average capital of approximately $\$ 175,000$, but none less than $\$ 50,000$. It may be of interest to note that 87 of the 117 banks organized during this year did not take out circulation at the time of organization.

In the last fiscal year 145 national banks were closed voluntarily or otherwise, of which 13 (excluding the 2 restored to solvency) failed and were placed in-charge of receivers and 132 were closed by voluntary liquidation. The net number of liquidations and failures, họwever, was 143, as 2 banks which failed in the previous year were restored to solvency.

Of the banks placed in voluntary liquidation, 75, with an aggregate capital of $\$ 6,703,000$, were absorbed by or reorganized as State banks; 45, with an aggregate capital of $\$ 9,660,000$, were consolidated with other national banks; and 12, with an aggregate capital of $\$ 1,190,000$, discontinued business.

The capital of the 15 banks (including the two restored to solvency) for which receivers were appointed during the last fiscal year aggregated $\$ 935,000$, while the liabilities to depositors and other creditors, at date of suspension, amounted to $\$ 3,838,414.88$. Seven of the 15 banks placed in charge of receivers paid dividends as follows during the year: One 100 per cent, one 50 per cent, one 45 per cent, one 40 per cent, one $33 \frac{1}{3}$ per cent, one 25 per cent, one 10 per cent, while two, with capital aggregating $\$ 80,000$ and liabilities to depositors and other general creditors amounting to $\$ 821,039.65$, and two which had
been placed in charge of receivers prior to July 1, 1915, with capital of $\$ 75,000$ and liabilities to depositors and other general creditors amounting to $\$ 456,569.66$, were permitted to resume business, having been restored to solvency by their shareholders.

From February 25, 1863, the date of the passage of the nationalbank act, to June 3, 1864, the date on which the law was reenacted and amended, 456 national banks were chartered, and of this number 221 are still in operation. Under the act of 1864 charters were granted to 6,828 associations; under the gold-bank act of 1870 to 10 banks; and under the act of 1900 to 3,575 banks; or a total of 10,869 charters issued to July 1, 1916. The percentage of national banks closed, or which are being closed by receivers, is 5 , and the percentage of voluntary liquidations is 25.2. The banks in active operation represent 69.8 per cent of the total number chartered.

The act of March 14, 1900, authorized the incorporation of national banks with minimum capital of $\$ 25,000$, permitted the issue of circulation to the par value of bonds deposited, and reduced the tax on circulating notes where secured by 2 per cent bonds. On that date 3,617 national banks were in operation, and from that date to July 1, 1916, there were 5,605 national banks, with capital aggregating $\$ 362,907,800$, authorized to begin business, of which $3,57.5$, with capital aggregating $\$ 93,235,000$, were chartered under the act of March 14, 1900, with individual capital of less than $\$ 50,000$. The average capital of this class of banks is $\$ 26,080 . \because$ The great majority of these banks are being incorporated, however, with the minimum capital of $\$ 25,000$. The remaining banks organized during the period, numbering 2,030 , with capital of $\$ 269,672,800$, an average of about $\$ 132,000$, were incorporated under the act of 1864.

Comparing conditions on March 14, 1900, with those of June 30, 1916, a net increase of 3,971 is shown in the number of active national banks and an increase in authorized capital of $\$ 454,550,280$. During that period the outstanding circulation increased from $\$ 254,402,730$ to $\$ 744,174,660$, or a net increase of $\$ 489,771,930$.

The bond-secured circulation during the fiscal year 1916 decreased $\$ 38,729,506$, or from $\$ 725,313,141$ to $\$ 686,583,635$. The amount of circulation secured by the deposit of lawful money decreased $\$ 35,649,866$. The total decrease during the year of circulation secured by bonds and lawful money amounted to $\$ 75,098,933$.

The number and capital of national banks organized since March 14, 1900, by State and geographical divisions, together with the number and paid-in capital stock of the banks on June 30, 1916, appear in the following table:

Summary, by States, geographical divisions, and classes, of national banks organized from Mar. 14, 1900, to June 30, 1916, and the paid-in capital stock of all reporting national banks on June 30, 1916.

1 Includes miscellaneous securities deposited under the act of May 30, 1908, as amended Decernber 23, 1913, and August 4, 1914, for one national bank in Pennsylvania that was found to be insolvent and was placed in charge of a receiver.

In connection with the statistics submitted relative to the organization, capital, and circulation of national banks since 1900, it is interesting to note the increase in the banking business generally, as evidenced by the reports of condition of February 13, 1900, the date of the call immediately preceding the legislation authorizing the incorporation of banks with a minimum capital of $\$ 25,000$, etc., and those for June 30, 1916. The total assets of banks increased from $\$ 4,674,910,713.09$ to $\$ 13,926,868,000$, loans from $\$ 2,481,579,945.35$ to $\$ 7,679,167,000$, paid-in capital stock from $\$ 613,084,465$ to $\$ 1,066,049$,000 , outstanding circulation from $\$ 204,912,546$ to $\$ 676,116,000$, and individual deposits from $\$ 2,481,847,035.62$ to $\$ 8,143,048,000$, which

$$
62015^{\circ}-\mathrm{FI} 1916-7
$$

latter amount includes $\$ 99,436,000$ United States and postal savings deposits.

Comparison of returns for June 23, 1915, with those of June 30, 1916, shows a decrease in the number of reporting banks on the latter date of 26 and an increase in loans and discounts of $\$ 1,019,-$ 196,000. Specie held decreased $\$ 38,062,000$ and legal-tender notes increased $\$ 6,284,000$. Investments in United States bonds, including premiums, decreased $\$ 52,249,000$. The increase in other bonds, securities, etc., was $\$ 337,704,000$, and stocks decreased $\$ 864,000$. Of the liabilities of the banks, capital stock decreased during the past year $\$ 2,470,000$, surplus and undivided profits increased $\$ 395,000$, individual deposits, exclusive of United States and postal savings deposits, increased $\$ 1,522,716,000$. The aggregate resources increased in the sum of $\$ 2,131,183,000$.

The number and capital of State banks converted, reorganized banks, and banks of primary organization since March 14, 1900, classified by capital stock, are shown in the following table:

| Classification. | Conversions. |  | Reorganizations. |  | Primary organizations. |  | Total. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | No. | Capital. | No. | Capital. | No. | Capital. | No. | Capital. |
| Capital less than \$50,000. | 575 | \$15, 282,500 | 1,040 | \$27, 537,000 | 1,960 | \$50, 415,500 | 3,575 | \$93, 235,000 |
| Capital \$50,000 or over... | 403 | 57, 427, 800 | 622 | 94, 225,000 | 1,005 | 118,020,000 | 2,030 | 269,672,800 |
| Total | 978 | 72, 710, 300 | 1,662 | 121, 762,000 | 2,965 | 168, 435, 500 | 5,605 | 362,907, 800 |

The number of banks and the bond and circulation accounts on March 14, 1900, and June 30, 1916, together with the increase between these periods, are shown in the accompanying table:

|  | Mar. 14, 1900. | June 30, 1915. | June 30, 1916. | $\begin{gathered} \text { Increase } \\ 1900 \text { to } \\ 1916 . \end{gathered}$ | $\begin{aligned} & \text { Decrease } \\ & 1915 \text { to } \\ & 1916 . \end{aligned}$ |

[^4]
## MINT SERVICE.

Operations of the mints.
The following Mint Service institutions were operated during the fiscal year 1916: Coinage mints at Philadelphia, San Francisco, and Denver; assay office at New York, which has a large trade in bars of fine gold and silver; mints at New Orleans and Carson City conducted as assay offices and assay offices at Seattle, Boise, Helena, Salt Lake City, and Deadwood, these being bullion-purchasing agencies for the large institutions. Refineries were operated at the New York, Denver, and San Francisco institutions.
The value of the gold acquired by the Government at the mints and assay offioes during the fiscal year 1916 was $\$ 508,083,262.92$, the large increase over last year being due principally to the heavy importations of-foreign bullion and coin; gold deposited by the Cuban Government to be made into Cuban coin was of value $\$ 1,323,291.98$; United States gold coin received for recoinage was of value $\$ 1,959,695.71$; transfers of gold between Mint Service offices totaled \$58,261,256.84; making an aggregate of gold handled by the Mint Service during the fiscal year 1916 of $\$ 569,627,507.45$.

Silver purchased during the fiscal year 1916 totaled $6,545,161.96$ fine ounces, costing $\$ 3,348,642.49$, at an average price of 51 cents pér fine ounce; the silver received and repaid to the depositors thereof in bars bearing the Government stamp totaled $3,362,233.24$ fine ounces; the silver deposited by foreign Governments to be worked into coin totaled $2,233,346.96$ fine ounces; the United States silver coin receired for recoinage totaled $566,469.45$ fine ounces, with recoinage value of $\$ 783,092.35$; the Philippine silver coins received for recoinage totaled 138,067.48 fine ounces; the transfers of silver between Mint Service offices totaled $815,800.16$ fine ounces, making an aggregate quantity of silver handled by the Mint Service during the fiscal year 1916 of $13,661,079.25$ fine ounces. The large increase over last year of silver purchased was due to open-market purchases for subsidiary coinage early in the fiscal year when the prioe of silver was unusually low.

The United States coinage for the fiscal year 1916 amounted to $\$ 37,209,062.82$, of which $\$ 31,077,40$ S was gold, $\$ 3,328,882.50$ was silver, $\$ 1,790,468.15$ wās nickel, and $\$ 1,012,303.17$ was bronze. This amount includes $\$ 19,534$ in $\$ 1$ gold pieces struck at the San Francisco Mint for the Panama-Pacifio Intérnational Exposition.

There were also coined at the Philadelphia Mint 3,092,890 gold pieces, $11,574,450$ silver pieces, and $25,912,150$ nickel pieces for Cuba; 852,663 silver pieces for Colombia; 1,000,000 silver pieces for Ecuador; $1,000,000$ nickel pieces for Salvador; 2,000,000 nickel
pieces for Venezuela; 100,000 gold planchets and 500,829 silver planchets for Peru. The mint at San Francisco ooined for the Philippine Islands $1,435,000$ silver pieces and $5,500,000$ bronze pieces.

The seigniorage on United States coinage executed totaled $\$ 4,046,740.26$, of which $\$ 1,650,774.94$ was on subsidiary silver coins and $\$ 2,395,965.32$ was on minor coins.

Stock of coin and bullion in the Dnited States.
On June 30, 1916, the estimated stock of domestio coin in the United States was $\$ 2,403,210,953$, of which $\$ 1,646,050,150$ was gold, $\$ 568,270,515$ was silver dollars, and $\$ 188,890.288$ was subsidiary silver coin.
The stock of gold bullion in the mints and assay offices on the same date was valued at $\$ 804,466,177.70$, an increase over last year of $\$ 437,541,008.45$, and the stock of silver bullion was $10,835,173.88$ fine ounces, an increase over last year of $3,529,339.72$ fine ounces.

## Production of gold and silver.

The production of the precious metals in the United States during the calendar year 1915 was as follows: Gold, $\$ 101,035,700$, and silver, $74,961,075$ fine ounces.

## Industrial arts.

The amount of gold consumed in the industrial arts during the calendar year 1915 was $\$ 35,376,739$, of which $\$ 27,156,219$ was new material. Silver consumed amounted to $29,891,271$ fine ounces, of which $22,889,400$ fine ounces was new material.

## Imports of gold coin.

The not imports of United States gold coin for the fiscal year 1916 were $\$ 14,609,3.60$.

Appropriations, expenses, and income.
The appropriated amounts available for the Mint Service use during the fiscal year 1916 totaled $\$ 1,175,786.88$, reimbursements to appropriations for services rendered amounted to $\$ 248,037.69$, making an available total of $\$ 1,423,824.57$.

The expenses chargeable to appropriations were $\$ 1,217,731.89$, those chargeable to income $\$ 10,297.17$; total, $\$ 1,228,029.06$.

The income realized by the Treasury from the Mint Service totaled $\$ 4,985,174.89$, of which $\$ 4,046,740.26$ was seigniorage:

\section*{INTERNAL REVENUE.}

The receipts from internal-revenue taxes for the fiscal year 1916, as shown by हollectors' reports, were as follows:
Ordinary receipts, including the emergency revenue................. \$387, 786, 035.16
Income-tax receipts.................................................... 124, 937, 252. 61
Total............................................................ \(512,723,287.77\)
Net increase over 1915.................................................. 97, 042,263.91
The ordinary receipts for 1916 , including the emergency revenue (act of Oct. 22, 1914, which was extended to and including Dec. 31, 1916, by joint resolution appröved Dec. 17, 1915), show a net increase of \(\$ 52,306,770.16\) for the year.

The ordinary receipts, excluding the emergency revenue, show. increases from the following sources:
Distilled spirits. . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . \(\$ 13,385,692.80\)
Manufactured tobacco, snuff, cigars, and cigarettes................... 7, 853,337. 28
Miscellaneous............................................................ 13,891.59
Total.............................................................. 21, 252,921.67
Less decrease in receipts from fermented liquors..................... 1, 155, 327. 35
Net increase in this comparison......................................... 20,097, 594. 32
The emergency revenue, collocted during the fiscal year 1916 under the several general classifications as designated in the act, was as follows:
\begin{tabular}{|c|c|}
\hline Wines, champagne, liqueurs, cordials, etc & , 631, 529. 98 \\
\hline Grape brandy used in fortification of sweet wis & 491, 202.91 \\
\hline Fermented liquors (additional 50 cents per barrel) & 29,311, 164.50 \\
\hline Special taxes relating to manufacture and sale of cigarettes. & 2,739,853. 05 \\
\hline Special tâxes, including bankers, brokers, theater & 6, 908, 108. 21 \\
\hline Schedule A (documentary stamps, etc.). & 38, 110, 282. 49 \\
\hline Schedule B (perfumery, cosmetics, etc.) & 4,086, 160.99 \\
\hline & \\
\hline
\end{tabular}

The income-tax receipts from corporations aggregated \(\$ 56,972\),720.88 as compared with \(\$ 39,144,531.71\) collected during the fiscal ycar 1915. There was also collected \(\$ 20,937.10\) on account of income tax on railroads in Alaska as compared with \(\$ 11,065.06\) collected in 1915. During the month of July, 1916, \(\$ 3,740,853.06\) was collected from corporations, nearly all of which was upon assessments made during the fiscal year just closed. This amount, while due and payable last fiscal year, will now, owing to date of its payment, be included with the collections for the fiscal year 1917.

The income-tax receipts from individuals aggregated \(\$ 67,943,594.63\), or \(\$ 26,897,432.54\) in excess of the amount collected during the pre- \({ }^{\text {o }}\) ceding year. There was collected \(\$ 4,280,478.89\) during July, 1916,
which likewise practically represents and is included in assessments made during the fiscal year ended June 30, 1916.

The total expenditures of the Internal-Revenue Service during the fiscal year 1916 amounted to \(\$ 7,199,163.32\). This does not include expenditures amounting to \(\$ 43,337.68\) made from the appropriation "Refunding internal-revenue collections," as such payments were in no sense an expense incident to the cost of collection.

The cost of collecting \(\$ 1 \cdot\) of internal revenue was \(\$ 0.014\).
Receipts from internal revenue, 1915 and 1916.

\footnotetext{
1 Includes \(\$ 2,631,529.98\) from wines, champagne, liqueurs, cordials, etc., and \(\$ 491,202.91\) from grape brandy used in fortification of sweet wines (act of Oct. 22, 1914, as extended Dec. 17, 1915).
\({ }^{2}\) Includes \(\$ 259,097.63\) from sale of internal-revenue stamps affixed to Philippine products (act of Aug. 5, 1909) and \(\$ 2,739,853.05\) from special taxes relating to manulacture and sale of cigars, cigarettes, and tobacco (act of Oct 22, 1914, as extended Dec. 17, 1915).
\({ }^{8}\) Includes \(\$ 29,311,164.50\) from the additional tax ( 50 cents per barrel) on fermented liquors (act of Oct. 22, 1914, as extended Dec. 17, 1915).
4 Includes \(\$ 819,654.20\) from playing cards; \(\$ 175\) from opium manufactured for smoking purposes; \(\$ 244,897.07\) from manufacturers, importers, or distributors of opium, etc. (act of Dec. 17; 1914); and \$480,477.22 from accepted offers in compromise, unassessed penalties, interest, etc.
© Collected under an act approved July 18, 1914.
}

\section*{Distilled spirits.}

During the past fiscal year there were produced from material other than fruit \(249,123,921.8\) taxable gallons of spirits, an increase of \(116,989,769.6\) gallons as compared with the production of like spirits during the fiscal year 1915. This increase, consisting mainly of alcohol and other high-proof spirits, was in a large measure due to the unusual demand for this class of spirits for export and for de\({ }^{\circ}\) naturation.

The quantity of spirits removed in bond, free of tax, for abovementioned purposes during the last two fiscal years was:
\begin{tabular}{ll|c|c|c|c|c}
\hline
\end{tabular}

The production of fruit brandies during the fiscal year 1916 was \(4,159,351.6\) gallons, as against \(8,521,951\) gallons in 1915; a decrease of \(4,362,599.4\) gallons. : During the fiscal year 1916; 605 distilleries of all kinds were operated, a decrease of 30 as compared with the preceding year.

\section*{Fortified wines.}

There were fortified during the fiscal year 1916, \(6,284,003.5\) gallons of wine and the records of the office show that the quantity of brandy used for this purpose amounted to \(1,257,399\) taxable gallons. The quantity of wines so fortified during that year was far below the quantity ( \(14,681,924.5\) gallons) of like wines fortified during the preceding year.

By the act of June 7, 1906, a charge of 3 cents per gallon was assessed on brandy used in fortifying wines, and up to the passageof the emergency revenue act of October 22, 1914, imposing a tax of 55 cents per gallon on the brandy so used, the wines fortified during that period averaged about \(16,000,000\) gallons annually. The noticeable decrease in the quantity of wines fortified during the past year was doubtless due to the comparatively high rate of tax imposed on the brandy used.

\section*{Fermented liquors.}

The production of fermented liquors during the fiscal year 1916 was \(58,633,624\) barrels, as against \(59,808,210\) barrels for 1915 , a decrease of \(1,174,586\) barrels. In 1916, \(58,564,508\) barrels of fermented liquors were withdrawn tax paid for consumption and 69,116 barrels exported (in bond) free of tax, while in 1915, 59,746,701 barrels were tax paid and 61,509 barrels exported.

Exportation of tobacco, etc.
The quantity of manufactured tobacco exported, free of tax, during the fiscal year 1916 was \(4,926,559\) pounds, or an increase of \(1,028,639\) pounds exported during the preceding fiscal year. The numbers of cigars and cigarettes exported, free of tax, during the fiscal year 1916, were 728,625 and \(94,224,000\), respectively, or an increase of 395,525 cigars and \(63,997,910\) cigarettes as compared with the year 1915 .

\section*{Dealers in leaf tobacco, etc.}

In previous reports attention was called to the weakness of the statutes relating to the business of dealers in leaf tobacco. The recommendation heretofore made is again renewed-that section 3360 of the Revised Statutes should be amended so as to require every dealer in leaf tobacco to give a bond, the penalty of which should be fixed by the collector according to the amount of business to be done; to make a true inventory of stock on hand on January 1 of each year, and to render monthly report of his transactions to the collector for the district within 10 days after the close of the month. The commissioner should be given authority to make assessments for tax on tobacco not properly accounted for by leaf dealers. It is also again recommended that section 26 of the act of October 1, 1890, be amended so as to require registry of manufacturers of cigars, manufacturers of tobacco, dealers in leaf tobacco, and peddlers of tobacco on commencement of business only and not on July 1 of each year, as required when special taxes on these classes of persons are not in force.

\section*{Adulterated butter.}

A considerable increase in the number of violations of the act of May 9, 1902, known as the adulterated-butter law, is reported for the fiscal year ended June 30, 1916, as compared with the preceding fiscal year. The greater portion of these violations consisted in the manufacture and sale of creamery butter containing 16 per cent or more of moisture which had been accidentally or unintentionally incorporated therein by the producers, and in all such cases where these facts were shown prosecutions were not instituted, but the cases 'were -dropped upon payment of the special and stamp taxes imposed by the law or by compromise where the manufacturers were financially unable to pay the taxes reported due.

A new class of violations of this act was discovered in considerable numbers in some of the large cities during the past year, and in every such case prosecution was instituted in addition to assessment of special and stamp taxes imposed by the law. This new class consisted of dealers in butter who purchased the product from creameries and added thereto water ranging from 30 to 50 per cent and afterward sold it as creamery butter. This illicit business gave every indication of assuming large proportions until sweeping investigations were made and criminal actions pressed and the offenders convicted. These drastic steps, it is confidently believed, will effectually stamp out this form of fraud upon the public wherever it may develop.

It is again recommended that the act of May 9, 1902, be amended and that some definite standard of moisture or butter-fat content be
fixed by the statute for the different classes of butter defined by the act of August 2, 1886, as amended by this latter act.

The present law imposes entirely too heavy penalties upon manufacturers of butter who unknowingly and unintentionally place upon the market butter containing 16 per cent or more of moisture, and likewise upon dealers who innocently purchase and sell such product, but in any revision adequate penalties should be provided for the class of violators above described.

\section*{Oleomargarine.}

Investigations of violations of the oleomargarine law were continued during the fiscal year ended June 30, 1916, and while the cases discovered were not of the same importance as those reported during the two preceding fiscal years, the results accomplished during the past year were of great value in the protection both of the revenues and to the public against frauds.

A majority of the cases reported during 1916 involved illicit manufacturers, who purchased the white product, added artificial coloration thereto and afterward disposed of it, in many instances as creamery butter, in evasion of the stamp tax of 10 cents per pound due on the goods and special tax as manufacturer and dealer.

In all of these cases where the facts showed willful violation indictments were secured, and up to the close of the fiscal year a number of prosecutions were completed, resulting in convictions and sentences of heavy fines or terms of imprisonment, or both, being imposed by the court.

The prosecutions pending at the close of the fiscal year 1915 in three of the large cases discovered during 1914 were vigorously pressed the past year and the most important one brought to trial, and all of the principals were convicted and sentenced to pay fines and serve terms in prison. By reason of the various legal technicalities, prosecutions in the other two cases have been delayed and are yet pending.

A summary of the results of investigations made during the last year shows a large decrease in the number of violations discovered, which might be taken as an indication that the requirements of this law are being more scrupulously observed becàuse of the vigorous enforcement during the past three years, but it is evident that as long as the double rate of taxation remains in force frauds upon the revenues and the public will continue, despite the efforts made to suppress them.

A thorough and careful revision of this law to make it in fact a revenue measure and at the same time provide the strongest possible remedies for protection against fraud is again recommended for your consideration.

\section*{Narcotic law.}

At the close of the fiscal year ended June 30, 1916, the act of December 17, 1914, known as the "Harrison narcotic law," had been in effect 16 months, and observations of the operation of the law during that period have given the administrative officers of the department a better view of the conditions which the act apparently was intended to remedy, and also of several serious defects in the law and the urgent need of remedial legislátion.

The results of the enforcement of this act for the 12 months ended June 30, 1916, emphasize the need for amendatory legislation and confirm the views and recommendations set forth in the annual report for 1915.

During the fiscal year ended June 30, 1916, approximately 18,000 violations of this act were reported, which included those of a technical nature and also violations of the regulations issued under authority of the daw, and a large number of the violations were by persons registered in accordance with the provisions of the law. All of the cases involving only technical or unintentional violation of the law and regulations were dropped without criminal action upon satisfactory evidence that there was no intent to evade the provisions of the act, and those cases of a more serious nature where the evidence did not clearly show unintentional violation but the circumstances justified some leniency were settled by compromise, prosecutions bèing instituted and pressed only in cases of willful and flagrant violation.

At the close of the fiscal year 1916 there were pending. 397 cases against registered and 201 cases against unregistered persons in which no action had been taken up to that time. The Supreme Court on June 12; 1916, handed down a decision in the case of United States v. Jin Fuey Moy, arising under section 8 of the act, in which it was held that the charge of unlawful possession of any of the proscribed drugs denounced in said section did not apply to persons not registered under section 1, but only to those classes specified in said section.

This decision, unfortunately, makes more difficult the enforcement of this law in such manner as to produce the most beneficial results, and also handicaps the efforts of the department for a suppression. of the traffic in drugs by persons not eligible for registration. It als \(\dot{\circ}\) emphasizes the urgent need of a thorough revision of this act to effectuate the object of Congress for the suppression of the drug evil in this country.

Before this decision was rendered a large number of persons had been tried, convicted, and sentenced to pay fines or serve terms of imprisonment, or both, for violation of section 8 because of unlawful possession of the proscribed drugs, and it was necessary to take
immediate steps for their relief, and in all these cases pending at the time of the decision the persons have since been released from prison; but as there was no authority of law nor money available for refundment of the fines paid, it will be necessary for Congress to make the necessary appropriation for this action to be taken.

This situation renders imperative legislation to amend and strengthen this law, if the welfare of the country and of those afflicted by the drug evil is to be protected and justice given those who have heretofore been convicted and paid fines for a violation of the law which the Supreme Court decided they had not violated.

Therefore it is again recommended that this act be amended or revised to provide -

First. A tax on the drugs, with provision for original stamped packages, limiting the dealing in and dispensing of and from such packages to those registered under the law, and making the absence of the stamp from any package evidence of nonpayment of the tax and violation of the law, except packages put up upon prescriptions issued for medical purposes by registered practitioners, and also to make the possession of an original stamped package by any person not registered evidence of failure to pay special tax and of violation of the law.

Second. That the registration be limited under the act to persons lawfully engaged in selling; dispensing; administering, or prescribing the drugs, and that the writing of prescriptions, keeping of records, and altering or forging of same be more fully covered by the statute with adequate provision for punishment of offenses denounced.

Third. That all the general provisions of the internal-revenue statutes relating to seizures, forfeitures, etc., be made applicable to the drugs taxed and the persons upon whom special taxes are imposed.

It is recommended that Congress appropriate the necessary amount for repayment of fines imposed by the courts upon persons convicted of unlawful possession under section 8.

It is further urged that Congress provide for the treatment by the Government, through some designated agency, of persons addicted to the use of drugs, where such treatment is necessary and the person afflicted desires this aid.

\section*{Income tax.}

For the fiscal year ended June 30 , 1916, the total receipts from the personal income tax were \(\$ 67,943,594.63\), an increase of \(\$ 26,897,432.54\) over the preceding year. Of this increase \(\$ 1,878,777.84\) represents the amount assessed upon reports of revenue agents. The increase is more than. 65 per cent over the collections of the previous year.

The total receipts from the corporation income tax for the fiscal year ended June 30, 1916, excluding \(\$ 20,937.10\) collected under the
act of July 18, 1914, as income tax on railroads in Alaska (38 Stat., 517 ), were \(\$ 56,972,720.88\), an increase of \(\$ 17,828,189.17\). The amount of additional taxes assessed against corporations on the basis of revenue agents' reports was \(\$ 5,808,393.65\). The total collections represent an increase of more than 45 per cent over the previous year.
The total receipts of income tax for the fiscal year ended June 30, 1916, exclusive of the income tax on railroads in Alaska, were \(\$ 124,916,315.51\).

The increases in the tax were general throughout the United States and indicate' that the unprecedented prosperity of the country is general and not local.

Since the incidence of the special excise tax on corporations and the income tax the greatest amount collected from corporations in any one year prior to the fiscal year ended June 30, 1916, was \(\$ 43,127,739.89\). The collections for the fiscal year just closed were \(\$ 13,844,980.99\) more, or nearly 32 per cent.

These figures indicate a pcriod of unparalleled prosperity, because it will be remembered that while the net earnings of corporations have increased so tremendously at the same time the eager demand for labor and wide scope of employment have resulted in numerous increases in wages, which necessarily increased the cost of operations.

The Bureau of Internal Revenue is constantly striving to increase its efficiency in the collection of this tax, and the results of the past year would indicate that its"efforts are meeting with a considerable degree of success.

The immediate need of the Internal-Revenue Service is an increased clerical force in the bureau to enable it to cope with the constantly increasing amount of work. In the corporation division the work of auditing is much in arrears, and unless relief is afforded in an adequate measure the situation can not but become more complicated from year to year. Comment is hereinafter made upon the effect this delay in auditing returns has upon the patience of the taxpayer.

The amount of correspondence growing out of the audit of returns and the reports of investigations made by agents and the number of hearings held by the Commissioner of Internal Revenue to consider and pass upon difficult and intricate accounting and legal questions arising in connection with the administration of the income-tax law are such as to tax the present capacity of the bureau, and the request for additional clerical assistance is especially called to your attention.

In the report for the fiscal year ended June 30, 1915, it was stated that-

\footnotetext{
Many inaccurate returns are made, some deliberately and some ignorantly, and there are, without doubt, wholesale evasions of the law throughout the country. The remedy for this is to clarify and strengthen the law where needed and to provide a
}
larger and more effective field force for the investigation and checking up of the incometax returns and for the discovery of those who are liable for the tax and have failed to make returns.

In the new revenue law enacted under date of 1916, many changes were made in the income-tax law which surely will result in a better understanding and better working of the law, and it is confidently believed that they will result in a closer collection of the amount of tax due and greatly lessen controversies with taxpayers.

A provision for a larger field force has also been made, and this addition to the force and the increased efficiency of the force already employed will not only result in the discovery of much tax not included in the returns but will also result in more correct returns being made by those corporations and individuals who have been visited by an internal-revenue agent, inspector, or deputy collector.

The statement made in the annual report referred to above that it was certain that the Government was losing through inaccurate returns and evasions of the law a sum many times greater than the cost of the field force to investigate and check up the returns and bring to account those who are failing to make returns as required by law has been verified by the results of the investigations of the past year, during which \(\$ 7,683,275.70\) was added to the tax through the investigations of the revenue agents' force. This is important, but it is believed that the amount of tax recovered represents only a part of the good derived from the services of this field force, because, as stated above, every examination made results in a better return the following year.

While the field force has increased in efficiency, the work of investigation is far in arrears of the needs, and until an adequate force is provided which will enable the Commissioner of Internal Revenue to audit and investigate each return of annual net income within a reasonable time after such return has been rendered to the Government, it will not be considered that this phase of the collection of the income tax will have been placed upon a proper basis.
During the fiscal year ended June 30, 1916, 93,067 transcript cards, representing 20,995 corporations (each transcript card represents the return for one year), were examined, the investigations resulting in the assessment of \(\$ 5,808,393.65\) additional tax. The number of transcript cards remaining in the hands of agents at the close of the fiscal year was 60,195 . About 30,000 more transcript cards will be added to these by the time the audit of the 1914 returns is completed.

The Commissioner of Internal Revenue estimates that the above, with the additional cases growing out of the audit of the 1915 corporation returns, will furnish employment for the whole of the present income-tax field force for a period of two years and six months, even if the additional force provided for should be sufficient to make the required investigations of individual returns.

During the fiscal year ended June 30, 1916, 14,406 personal transcript cards were reported on by the field force, and 28,332 transcript cards remained in the hands of such force awaiting examination. It is estimated that to this number will be added 14,760 transcripts from the unaudited returns for the calendar year 1914.

The lack of an adequate field force to investigate all cases which the annual office audit indicates should be examined results in the examinations being confined in some measure to the larger corporations and those individuals known or believed to be possessed of great wealth. But other returns should be verified also, and the lack of a proper system of information at the source makes such verification imperative if evasions are to be properly discouraged. The percentage of cost of these investigations as compared with the results in actual taxes recovered is large if this element only is considered, but the natural increase in the tax resulting from better returns after visits from internal-revenue officers is probably greater than the taxes assessed upon the reports of revenue agents. The absolute certainty that taxes evaded in one year will surely be discovered in a later year and must then be paid with penalties incurred will be one of the strongest safeguards of the tax.

Considerable complaint has been received by the Commissioner of Internal Revenue that agents are at this late date making investigations of returns for all years since 1909, the complaint being that the lapse of so many years with the consequent changes in officers of corporations makes the verification of the earlier years inconvenient, uncertain, and annoying and in numerous instances throws the burden of any additional taxes assessed by reason of such examination upon an entirely different set of stockholders. The cure for this is, of course, an office and field force sufficient to make annual audits and examinations within the year subsequent to the filing of the returns.

In the cases of individuals the delay in making investigations will undoubtedly result in further complications in cases of the death of taxpayers and the settlement of their affairs and distribution of their property prior to the visit of the examining officer.

\section*{United States cotton futures act.}

The execution of the act of August 18, 1914, called the "cotton futures act," has been carried on as usual, notwithstanding the decision by Judge Hough, of the Southern District of New York, that the act was unconstitutional because it originated in the Senate (Hübbard \(\dot{v}\). Lowe, collector). The act making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1917 (act of Aug. 11, 1916), contains a similar measure which was introduced in the House of Representatives after the adverse decision referred to. The case in the Supreme Court was dismissed.

The emergency revenue act of October 22, 1914, which was to have expired December 31, 1914, was extended by a joint resolution approved December 17, 1915, and continued in full force and effect until and including December 31, 1916.

\section*{Repeal of the emergency revenue act of October 22, 1914.}

The act to increase the revenue and for other purposes, approved September 8, 1916, effective September 9, 1916, repeals the emergency revenue act of October 22, 1914, and joint resolution of December 17, 1915, except sections 3 and 4 (special taxes), which remain in force until January 1, 1917. It amends the income-tax law by doubling the normal tax and making reclassification of rates for additional tax, and modifying some of the administrative measures, without disturbing the fundamental features of the previous law. It levies an estate tax, or tax on the transfer of net estates of persons dying after September 8, 1916, and a munition manufacturer's tax. Certain of the special taxes provided in the e̊mergency revenue act of October 22, 1914, are reenacted. A special excise tax measured by the fair value of the capital stock is imposed on corporations for doing business.

\section*{Worl of revenue agents.}

During the last three years gigantic frauds against the revenue and evasions or omissions of tax have been uncovered, and evaded taxes approximating \(\$ 50,000,000\) have been discovered. Of this amount \(\$ 22,509,576.47\) was assessed, representing approximately \(\$ 2,700,000\) more than was expended during the three years for the operation of the Internal-Revenue Service. The unpaid taxes reported for assessment and collection were distributed as follows:
\begin{tabular}{|c|c|}
\hline Corporation taxes & \$11, 326, 125.82 \\
\hline Individual income taxes & \(5,006,696.92\) \\
\hline Offers in compromise. & 984,791. 41 \\
\hline Distilled spirits, tobacco, and miscellaneous taxes & 4, 241, 555. 45 \\
\hline Collections on account of oleomargarine frauds & \(950,406.87\) \\
\hline Total. & 22, 509, 576. 47 \\
\hline
\end{tabular}

One extensive whisky conspiracy operating for many years in more than a dozen States was discovered and 11 conspirators have been convicted and are serving prison sentences.

In one oleomargarine conspiracy 34 offenders in a single city were convicted or plead guilty and sentensed to terms of imprisonment and to pay fines aggregating \(\$ 138,000\).
\[
62015^{\circ}-\text { FI 1916- } 8
\]

One investigation of tobacco frauds, extending over three States, resulted in the seizure of 236 factories of the offenders.

BUREAU OF ENGRAVING AND PRINTING.
There were engraved, printed, and delivered by the Bureau of Engraving and Printing \(300,711,800\) sheets of securities, postage stamps, etc., for the use of this and other departments, a decrease of \(6,922,534\) sheets as compared with the preceding year.

The decrease in the output is principally due to the use by the Comptroller of the Currency in filling orders from banks for nationalbank notes of emergency national-bank notes instead of having printings made by this bureau, and partly due to the unusually large number of national-bank and Federal reserve notes, of new revenue stamps, and of opium stamps and orders furnished in the preceding year.
The deliveries were \(90,000,000\) sheets of United States notes and certificates; 11,500 sheets of United States bonds; 6,331,274 sheets of national-bank notes; 796,000 sheets of Federal reserve bank currency; 6,522,000 sheets of Federal reserve notes; \(83,767,833\) sheets of internal-revenue stamps, 229,500 sheets of customs stamps; 109,653,858 sheets of United States postage stamps; 46,756 sheets of United States parcel-post stamps; 239,668 sheets of Philippine postage stamps; 597,550 sheets of silver certificates, bank notes, national-bank circulating notes, registered bonds, checks, documentary and internal-revenue stamps, and postal cards for the Philippine Islands; and \(2,515,861\) sheets of checks, drafts, and miscellaneous. In addition to these sheets delivered, miscellaneous work was executed to the value of \(\$ 82,093.61\). The face value of all classes of securities, internal-revenue stamps, postage stamps, etc., furnished by this bureau amounted to \(\$ 2,997,382,581.04\).

Compared by classes with the work executed in the previous fiscal year, there was an increase of 26.54 per cent in United States notes, certificates, and bonds; and 0.66 per cent in United States postage stamps; and a decrease of 62.11 per cent in national-bank and Federal reserve notes; 4.86 per cent in internal-revenue stamps; 11.97 per cent in customs stamps; and 1.62 per cent in checks, drafts, and miscellaneous.

Appropriations made by Congress for the operation of the bureau amounted to \(\$ 4,058,460\), and the bureau was reimbursed for services and materials furnished the several executive departments and bureaus to the amount of \(\$ 1,073,067.20\), the aggregate available for the work during the year having been \(\$ 5,131,527.20\). The expenditures were \(\$ 236,398.43\) for salaries, of which \(\$ 900\) was for one em-
ployee detailed to another branch of the department and not reimbursed; \(\$ 8,400\) for custody of dies, rolls, and plates; \(\$ 1,840,096.56\) for compensation of employees, of which \(\$ 2,500\) was for one employee detailed to another branch of the department and not reimbursed; \(\$ 1,944,668.80\) for wages of plate printers and assistants; and \(\$ 1,036,484.93\) for materials and miscellaneous expenses, making a total expenditure of \(\$ 5,066,048.72\), and leaving unexpended \(\$ 65,478.48\).

\section*{CUSTOMS.}

While there was a decrease in the number of entries of merchandise taken during this fiscal year of approximately 129,000 from the number of entries during the fiscal year 1915, there was an increase in all other customhouse transactions. The decrease in the number of entries was chiefly due to a change in practice under which a number of consignments arriving by rail at ports on the Canadian and Mexican borders may be consolidated in one entry instead of requiring a separate entry for each consignment. This change was made for the mutual benefit of importers and of the customs officers, substituting as it does one document for the many theretofore required.

The aggregate receipts from customs for the fiscal year 1916 amounted to \(\$ 213,185 ; 845.63\), an increase of \(\$ 3,399,173.42\) over the aggregate receipts for the preceding fiscal year. The value of imports for the fiscal year amounted to \(\$ 2,197,883,510\), an increase of approximately \(\$ 484,000,000\) over the preceding fiscal year, while the value of the exports increased from \(\$ 2,768,589,340\) in 1915 to \(\$ 4,-\) \(333,658,865\) in 1916. The amount of drawback paid upon the exportation of goods in whole or in part from imported dutiable materials amounted to \(\$ 15,370,945\), as against \(\$ 7,403,686\) during the fiscal year 1915, an increase of over 100 per cent. These increases are concurrent with the widespread increase in industrial activities and the accompanying prosperity of the country during the past year, the increase in the amount of drawback paid being proportionate to the increase in our foreign exports and the increase in the value of the imports being largely due to the increased importation of raw materials for manufacture in the export trade.

While the continuation of the European war has decreased the activities of the Customs Service in some lines, as compared with conditions prior to the war, because of the falling off in dutiable imports from the countries engaged in the war, it has increased the activities and responsibilities of that service in a number of other ways.' While the amounts collected decreased, the volume of imports and exports increased. Much time and attention has been devoted to the maintenance of the neutrality of the United States. To this end customs
officers have been charged with the duty, under the direction of the Treasury Department, of preventing any belligerent from using our ports as a base for hostile operations; of preventing the equipment or outfitting of vessels in our ports for hostile purposes; of preventing the shipment of goods under false manifests; and the supervision of the vessels interned in our ports.

Since the beginning of the war the following ,vessels of war have arrived in American ports and have been interned: Prinz Eitel Friedrich, cruiser, and Kronprinz Withelm, cruiser, interned at Norfolk, Va.; Geier, gunboat; and Locksun, naval transport, interned at Honolulu; and submarine \(K-D 3\) interned at San Juan.

In addition, the following merchant vessels of German and Austrian nationality have remained in ports of the United States since the beginning of the war:
\begin{tabular}{|c|c|c|c|}

\end{tabular}

Many reports and rumors relating to the violation of our neutrality by or through these vessels have been investigated, and while found
in every caso to have been without foundation of fact, a great deal of work has thus devolved upon the Customs Service.

The year was marked by the arrival at the port of Norfolk-Newport News of the steamship Appam, captured on the high seas and claimed to have been brought into port as a prize, and the arrival at the port of Baltimore of the Deutschland, the first submarine merchant vessel ever to enter any United States port.

The only violations of the neutrality statutes in any way successful consisted of the shipment of merchandise under false manifests, and these, it is gratifying to report, were detected and successfully prosecuted, with the result that attempts to evade the statutes in such matters have practically ceased.
Considerable embarrassment has been oaused, both to importers and to the Customs Service, by delays in the receipt of invoices and bills of lading necessary to make entry of imported merchandise. The situation has been relieved as far as possible by the Customs Service by granting extensions of time within which entries of imported merchandise are required to be made by permitting importers to open and examine cases of merchandise on the piers in order to make up invoices therefor and by accepting entries without the production of bills of lading upon bonds being given for the subsequent production of such documents.

During the fiscal year the customs regulations were revised and issued as the Customs Regulations of 1915. This was the first revision of the regulations since 1908, and the work was performed by employees of the Customs Service and Customs Division detailed for that purpose, without any extra cost to the Government. This is mentioned for the reason that it has been customary in the past to have a special appropriation made by Congress for the purpose of revising these regulations. There was also prepared in the Customs Division an alphabetical index-digest of the decisions of the Treasury Department, the Board of United States General Appraisers, and the United States Court of Customs Appeals, rendered from 1908 to 1916, without any extra cost; and copy has also been prepared by employees of the naval office at New York for a revision, to January 1, 1916, of the index-digest known as "Compilation of Customs Laws and Digest of Decisions Thereunder.". This was also done without any extra cost to the Government, through utilizing the services of employees whose work had been reduced to a minimum because of conditions resulting from the European war.

The method of tabulating statistics by mechanical means has been improved and advanced toward perfection. While the now system has not as yet greatly reduced the time required for the compilation
of statistics, approximately double the volume of work has been handled within the same time as formerly.

During the year the Division of Special Agents was consolidated with the Division of Customs. This consolidation was accompanied by a direct saving in operating expense of \(\$ 11,020\) per annum, and nine months of actual experience under the consolidation has demonstrated that the work formerly done in both divisions can be performed efficiently in one division.

Committees of the efficiency board have visited the customs districts of Michigan, Rochester, southern California, San Francisso, Oregon, Washington, Eagle Pass, Laredo, Philadelphia, El Paso, and Arizona, and have made recommendations to the customs officers in those districts looking to the standardization of the processes used, with a view to increasing the efficiency of the service, with its resultant economy. These visits have had the effect in nearly every instance of increased efficiency and reduction in cost, not only.without friction but with the greatest of good will and hearty cooperation between the committees, the customs officers, and the department.

Notwithstanding the increase in the activities of the Customs Service and the added work incident to the enforcement of the seamen's act, approved March 4, 1915, there was an actual reduction in the operating cost of the Customs Service in this fiscal year as compared with the preceding fiscal year of \(\$ 117,176\). This decrease in cost was due to the adoption of improved methods and the installation of the most modern devices for the performance of office work, and were it not for the considerable expenditures made during the fiscal year for such improved devices the operating cost would have been further reduced. These expenditures were, however, well made; as they will not require replacement for a number of years, and it is often the case that a few persons with proper equipment can efficiently conduct an office requiring double that number without suoh equipment.

During the fiscal year the total number of employees decreased from 7,079 to 6,881 , while the average compensation per capita of such employees increased during the same period from \(\$ 1,311\) to \(\$ 1,337\), or \(\$ 26\) per capita.
In the operations looking to an increase in efficiency and a reduction in cost, the rule has been generally followed that efficient employees should not be dismissed solely because their services were rendered unnecessary by the adoption of improved methods. It is not the fault of these men that the customs organization has grown in a somewhat haphazard manner for over 100 years, resulting in the use of cumbersome methods, almost endless duplication of effort, unscientific organization, and obsolete equipment. Many of the men affected by the change in methods have families dependent
upon them, and it is not considered humane to dismiss them summarily because of the introduction of new methods; but as vacancies occurred the force has been shifted, sometimes involving transfers from one district to another, in order that the new methods might be adopted and the operating force decreased as vacancies occurred through death, resignations, and removals for cause. These operations have been carried on with a view to an actual increase in the efficiency of the service, with the resultant economy, rather than with the narrow view of making a mere paper saving of money. Therefore, the opportunity has been taken to standardize so far as was possible the compensations paid in the various districts for the same service, having due regard to the differing conditions in the various districts. Great discrepancies have existed in the compensations paid for the same services in different parts of the country, in many instances the difference being fully 100 per cent. This has resulted in much dissatisfaction in those districts which considered themselves underpaid and therefore discriminated against, and efficiency was difficult to secure because of this deep feeling of dissatisfaction. Therefore, of the savings made a considerable amount was used in the upward standardization in the compensations, resulting in a net increase in the compensations paid per capita in the customs service of \(\$ 26\), the aggregate increases in compensation during the year amounting to approximately \(\$ 179,000\).

The system for the exchange of information relating to the value and classification of imported merchandise, through what is known as the "classification and valuation reports" (C. V. R.) has been greatly improved. This is done by having the various appraising officers forward daily to the appraiser at the port of New York data taken by them from invoices, price lists, and catalogues received, accompanied by samples, when practicable. These reports, when received in the appraiser's stores at New York are compared with ceach other and with the records and data at that port, and information is sent out to the various appraisers of changes in market prices and advances in values. Any transactions indicating fraudulent undervaluations are made the subject of special investigation. This has resulted in securing an almost perfect uniformity in the valuations and classifications of the same merchandise at the various ports and furnishes added means for the detection of fraudulent undervaluations.

The year was marked by the close, on December 1, 1915, of the Panama-Pacific International Exposition held at San Francisco. A branch customs office was established at the exposition grounds. The total customs receipts of the exposition were \(\$ 171,777\), and although an appropriation of \(\$ 200,000\) was made for the conduct of the Customs Service at this exposition, the expenditure there-
from amounted to only \(\$ 118,397\), the receipts thus being \(\$ 53,380\) more than the expenditures.

A reflex of the improvements made in the transaction of the routine business at customhouses will be found in a comparison of the cost to the Treasury Department's appropriation for printing and binding of the books, blanks, and stationery used by the Customs Service for the past five years, which is as follows:

Fiscal year ended June 30-

This great reduction in cost is due to the substitution of loose-leaf binders and simple records for the expensive and cumbersome ones formerly in use and the elimination of the numerous duplications of the same record formerly kept in customhouses.

At the last conference of customs officers held in October, 1915, the following recommendations were made for changes in the legislation relating to the operations of the Customs Service, in which the chief of the Division of Customs concurs:
(1) That section 3 of the act of February 13, 1911, be so amended as to permit bonds to be taken in a penal sum less than \(\$ 50,000\) for the issuance of special licenses and permits for the immediate unlading of vessels at night.

Such bonds are required by statute to be given in the sum of \(\$ 50,000\), whether the vessel be large or small and whether the cargo be of great or of little value. Actual experience has shown that the possibility of incurring a liability on these bonds is remote and it would be in the interest of commerce to permit the bonds to be taken in such an amount as would protect the interests of the Government, which would in almost every instance be less than \(\$ 50,000\).
(2) That section 2857, Revised Statutes, be repealed. This section in effect requires an importer to give a bond for the production of a triplicate invoice in the event that through a change of the destination of the merchandise a triplicate invoice is not received at the time of entry, although the importer may be possessed of the duplicate invoice. In such cases the triplicate invoice has been forwarded by the consul before whom it was certified to the port of destination named in the invoice. Under the regulations when such merchandise is entered at another port the triplicate invoice is secured from the collector of customs at the original port of destination. 'The statute requires the giving of unnecessary bonds by importers, and
both they and the customs officers should be relieved from this red tape.
(3) That the act of June 10, 1880 (21 Stat., 173), relating to the forwarding of merchandise under entry for immediate transportation from the port of arrival to the port of destination, be so amended as to permit such entries to be taken at any time within one year after arrival, instead of limiting the time to 10 days after the unlading of the merchandise. The conference was unanimously of the opinion that there is no good reason for placing such a 10 -day limit upon the time within which merchandise may be so forwarded, and - in this connection it may be stated that the said act of June 10, 1880, is inapplicable to present conditions in many respects, and its thorough revision is recommended, both in the interests of commerce and for the purpose of eliminating unnecessarily cumbersome procedure at the customhouse.
(4) That sections 3038, 3039, and 3048, Revised Statutes, be repealed. These statutes prescribe the manner of the payment of drawback upon the exportation of merchandise. Under the procedure provided a "debenture certificate" is first issued. That certificate may be surrendered at the end of 30 days and a check given by the customs officer in payment thereof. What purpose was ever served by the procedure is problematical. At the present time no purpose appears to be served other than requiring double work in the issuance of the debenture certificate and the subsequent issuance of a check for the same transaction.

Attention is again invited to the recommendations made in the annual report for the fiscal year 1915 for an amendment of sections 2899 and 2901 of the Revised Statutes and the repeal of sections \(1790,2693,2777,2782\), and 2775 . The adoption of these recommendations will simplify the procedure, eliminate red tape, and per-mit-a further reduction in operating expenses.

In pursuance of a recommendation of the last conference of collectors of customs, each collector has submitted a narrative report of the conditions of the service in his district. The collector for the district of Washington recommends that the entire Customs Service should be reorganized to conform to the organization of the district of Washington, in which there is but one presidential officer, who is the direct representative of the department, and to whom \(\leqslant\) all other officers are subordinate.

\section*{OFFICE OF THE SUPERVISING ARCHITECT:}

The following statements show in general the projects authorized by Congress and in detail the financial operations of the Office of the Supervising Architect for the fiscal year ended June 30, 1916:

\section*{buildings.}
New buildings completed (occupied or ready for occupancy) at the close of the fiscal year ended June 30, 1915 ..... 913
Purchased complèted (Galveston, Tex., appraiṣers' stores) ..... 1
Number of marine hospitals and quarantine stations. ..... 54
New buildings completed during the,fiscal year ended June 30, 1916 ..... 95
Net total number of buildings (completed) under the control of the Treasury Department June 30, 1916 ..... 1, 063
The above includes one building (Boonville, Mo.), which, though completedduring the fiscal year 1915, was not so reported until too late to be includedin the report for that year.
Buildings placed under contract during the fiscal year ended June 30, 1916. ..... 88
Buildings placed under contract prior to the commencement of the fiscal year 1916, and not completed June 30, 1916 ..... 21
109
-Awarded and completed during the fiscal year 1916 (Covington, Tenn.) ..... 1
Contracts for new buildings in force July.1, 1916 ..... 108
Total number of buildings completed and in course of erection June 30, 1916 ..... 1, 171
Buildings authorized prior to act of Mar. 4, 1913, not under contract June 30, 1916 ..... 20
Buildings authorized in act of Mar. 4 and June 23, 1913, not under contract June 30, 1916. ..... 248
Building authorized in act of Mar. 4, 1915 (Forsyth, Ga.) ..... 1
Tetal ..... 269
Total buildings completed, in course of erection, or authorized (not including extensions) ..... 1,440
EXTENSIONS.
Extensions completed (occupied or ready for occupancy) during the fiscal year ended June 30, 1916 ..... 6
Extensions placed under contract during the fiscal year ended June 30, 1916. ..... 5
Extensions placed under contract prior to July 1; 1915, not completed June 30,1916 ..... 3
Contracts for extensions in force July 1, 1916 ..... 8
Extensions authorized prior to act of Mar, 4, 1913, not under contract June 30, 1916 ..... 4
Extensions authorized in act of Mar. 4, 1913, not under contract June 30, 1916. ..... 16
Extension authorized Aug. 1, 1914 (New Orleans, La., customhouse) ..... 1
Extensions not under contract ..... 21
SECRETARY OF THE TREASURY. ..... 123
RECAPITULATION.
Contracts completed during the fiscal year ended June 30, 1916:
New buildings. ..... 94
Extensions ..... 7
Total ..... 101
Contracts awarded during the fiscal year ended June 30, 1916:
New buildings. ..... 88
Extensions ..... 5
Total ..... 93
Contracts awarded prior to July 1, 1915, not completed June 30, 1916:
New buildings. ..... 21
Extensions ..... 3
Total ..... 24
Contracts in force July 1, 1916, regardless of date of award:
New buildings. ..... 108
Extensions ..... 8
Total. ..... 116
The above statement does not include the following:
Major miscellaneous contracts awarded from July 1, 1915, to June 30, 1916 ..... 19
Miscellaneous projects placed under contract during the fiscal year 1916, all of which required the preparation of specifications, and in many instances drawings, and which involved in some instances contract liabilities as high as \(\$ 20,000\), approximately ..... 1, 553
Statement of appropriations made during fiscal year ended June 30, 1916, and summary of acts carrying appropriations for the fiscal year 1916.
The further urgent deficiency act, approved February 28, 1916,carried appropriations as follows:
For sites only ..... \(\$ 100,000\)
For sites and buildings. ..... 256, 050
For buildings only ..... 3, 047, 500
For extensions. ..... 125,000
Total. ..... \(\$ 3,528,550\)
For repairs and preservation ..... \(\$ 25,000\)
For vaults and safes. ..... 10, 000
For operating force ..... 100,000
For operating supplies. ..... 35,000
Total ..... \(\$ 170,000\)
Grand total ..... 3,698, 550

\section*{Summary of acts carrying appropriations for the fiscal year 1917.}

The legislative act approved May 10, 1916, carried an appropriation for "Salaries, Office of Supervising Architect," in amount \(\$ 221,800\).

The sundry civil appropriation act, carrying appropriations for the fiscal year 1917, not having been approved until after the close of the fiscal year 1916, or July 1, 1916, does not appear in this report. It will appear in the annual report for the fiscal year ending June 30, 1917.

Statement of appropriations for public buildings, July 1, 1915, to June 30, 1916.
EXPENDITURES DURING THE FISCAL YEAR.

For sites and additional land..................................................... 858, 759.00
For construction of new buildings........................................ 7, 507, 497. 65
For extensions to buildings............................................................. 743, 022.44
For special repairs to buildings.................................................. 97, 1.65.53
For rent of buildings.............................................................. \(38,593.35\)
For repairs and preservation.................................................... 677, 220. 08
For mechanical equipment. \(\therefore\)................................................. \(410,467.80\)

For operating supplies..................................................... 1, 651,020. 77
For general expenses......................................................... \(550,659.58\)
For furniture and repairs of same..................................................... 833, 933. 04
For operating force......................................................... 2, 849, 802.69

Total ..... \(636,971.60\)

\section*{PUBLIC HEALTH SERVICE.}

Operations of the Public Health Service during the fiscal year have been conducted through its several administrative divisions and are summarized by the Surgeon General as follows:

\section*{Division of Scientific Research.}

Further expansion was shown in the work conducted under this division during the year. Every effort was made to increase the usefulness to the public generally of the field and laboratory studies of matters relating to health, which may be classified under the headings of diseases of man; rural sanitation, school hygiene, industrial sanitation, including occupational diseases; sanitary organization and administration; pollution of navigable streams and coastal waters; disposal of sewage; treatment of industrial wastes; and viruses, serums, toxins, and analogous products.

Diseases of man.-Among the diseases studied during the year special attention has been given to diphtheria, filariasis, hookworm disease, leprosy, malaria, miner's consumption, pèllagra, rabies, scarlet fever, spotted fever, trachoma, trichinosis, tuberculosis, typhoid fever, and typhus fever.

Filariasis.-The study of filariasis has been conducted in the Southern States, and in infected communities the extent of the infection has been brought to the attention of the authorities, together with measures for its prevention.

Malaria.-Investigations of malaria have been conducted during the year throughout the South and in some northern States along the following lines: Surveys, demonstration work, educational measures, research in field and laboratory, special studies as to impounded water, hemoglobinuria, and rice culture in relation to the disease.

Important discoveries have been made in regard to the infectibility, incubation period, transmission of infection, blood diet, hibernation, length of flight, and breeding places of Anopheles mosquitoes of various species, showing among other things that the \(A\). quadrimaculatus is the species most concerned in the transmission of malaria in the Southern States. Information secured has been used in advising local authorities in the localities surveyed with regard to the eradication and prevention of the disease and suppression of mosquito-breeding places.

Since 1912, 20,462 persons have been examined, of which 2,561 , or 12.51 per cent, were found to harbor the parasite of malaria. In one city where demonstration work has been carried out the incidence of disease has been reduced in two years from 13.75 per cent to 3.5 per cent.

Pellagra.-During the year the service has studied the value of diet in the prevention of pellagra in Mississippi, South Carolina, and Georgia. Of 242 forner pellagrins given a well-balanced diet but one had a recurrence of the disease, although there was a recurrence in 47 per cent of the 32 control cases. In an experimental study of the possibility of producing pellagra in the human subject by means of a faulty diet, the disease developed in 6 out of 11 volunteers.

A field study was undertaken in 7 cotton-mill villages in Spartanburg, Oconee, and Chester Counties, S. C., to obtain data relating to family income, availability of food supply, seasonal variation in food supply, and the relation of these to pellagra incidence. Field studies of pellagra prevalence were also made in Alabama, Arkansas, Louisiana, North Carolina, and Texas.

In addition, clinical and laboratory investigations of pellagra have been conducted at the service pellagra hospital at Spartanburg, S. C., consisting of dietary treatment of 151 patients and 40 outpatients at the hospital and of a few other patients at their homes, studies of the composition of food in pellagrous and nonpellagrous families, studies of metabolism in pollagra, including the chemical composition of the blood, urine, and gastric contents of patients, the treatment of patients with vitamine preparations, and feeding experiments of wheat and corn products to animals.

Trachoma.-Five small trachoma hospitals have been in operation during the past year in the States of Kentucky, Virginia, and West Virginia, the work being done in cooperation with State and local authorities. A total of 7,970 persons were treated during the year, of which 1,880 were admitted to hospital. Preventive measures have been carried out with the hospitals as centers. Field clinics have been found of advantage both in giving instruction to physicians as to operating on trachoma cases and in educating the public in the prevention of the disease and in general health matters.
'A survey of school children in Arkansas found trachoma present in 1.1 per cent of the boys and 1 per cent of the girls in rural schools, and in 0.2 per cent of the boys and 0.3 per cent of the girls in city schools.

Industrial sanitation.-With the transfer of industrial sanitation headquarters to Pittsburgh, Pa., in July, 1915, increased emphasis was placed upon this subject by the service.

A study was made of the effects of gas-heated appliances upon the air of workshops in the garment industry of New York City. Studies of the hygienic aspects of illumination in relation to occupation and to vision of workers were continued, photometric surveys being made of the Treasury Building, the Bureau of Engraving and Printing, and the Government Printing Office in Washington, nearly 1,000 records of visual examinations being obtained.

The service has cooperated with the Industrial Commission of Wisconsin in making an investigation of the health conditions surrounding the employment of women in that State.

A study is being made in Pittsburgh of the effects of occupation in the steel industry upon the health of workers, including physical examinations, the collection of social and economic data, a survey of places of employment, and studies of certain \({ }^{\circ}\) processes and operations. In addition, the service has completed an investigation, in cooperation with the Bureau of Mines, of the existing hygienic conditions in places of employment in the metallurgical plants of the Pittsburgh district. Also in cooperation with the Bureau of Mines, miner's consumption in southwestern Missouri has been intensively studied and a similar investigation in the Butte, Mont., district commenced.
The service is cooperating with the Massachusetts Child Labor Committee and the Massachusetts State Board of Labor and Industries in a study of the influence of occupation on persons during adolescence. During the last fiscal year an inspection was made of 679 male minors employed in the cotton industry of the State. Studies of health insurance, begun with the Commission on Industrial Relations, have been continued independently.
- Facilities for carrying on industrial sanitation investigations should be increased.

Sanitation of convict camps.-Cooperative studies of convict camps were continued during the year. A demonstration camp in Fulton County, Ga., has been supervised from a public health standpoint.

Public health administration.- In response to an increasing number of requests for surveys of public health organization and administration, such studies were made in the States of Florida, Nebraska, Nevada, and North Dakota, and in the cities of Richmond, Ind., Youngstown, Ohio, Columbia, S. C., and Winston-Salem, N. C. Detailed. reports and specific recommendations were published or submitted to the authorities.
School hygiene:-The scope of the school hygiene investigations has been broadened to include researches in mental hygiene. Field investigations have been conducted in New Castle County, Del., in \({ }_{0}\) Frederick County, Md., and throughout the STate of Arkansas. Ninety'-one schools were surveyed. The physical status of over 5,000 and the mental status of over 22,000 school children was determined. The work has been confined largely to rural districts, where improved school sanitation has been found to be less general than in cities.
Rural sanitation.-Because of a special appropriation of \(\$ 25,000\), available during the past spring, the service has been able to enlarge its intensive investigations to promote the advancement of rural sanitation. The response met by the officers assigned to this work has been most cordial, and the improvement in sanitation in the
communities surveyed and in other communities where the methods employed by the service have been partially adopted has been marked. It is evident that increased appropriations are necessary to enable the service to extend this highly important work for the improvement of rural health.

Rural sanitation studies were completed during the year in Anne Arundel County, Md., Walker County, Ala., Orange County, N. C., Wilson County, Kans., "and Dallas County, Iowa. In addition to the 20,000 homes in these counties reported visited during the fiscal year \(1915,20,000\) móre visits or revisits were made in the same counties in the last fiscal year. Work has been commenced in four other counties-Tuscaloosa, Ala., Floyd, Ga., Green ville, S. C., and Obion, Tenn. Up to the end of the fiscal year over 20,000 residences had been visited, data collected, and advice offered when requested in regard to sanitary defects which had been observed.
Leprosy investigation station.-Studies of leprosy have been continued during the year in Hawaii, six papers reporting technical studies in the disease having been published and three others prepared for publication.

Hygienic Laboratory.-The technical studies of the service are conducted for the most part at the Hygienic Laboratory, which also gives assistance to investigation in the field. During the past year these technical studies were of an increasingly varied nature, relating to pellagra, Rocky Mountain spotted fever, scarlet fever, diphtheria, hookworm disease, trichinosis, nematodes in fishes, zoological nomenclature, vitamines, standardization and toxicity of drugs, effects of cocaine substitutes, toxicity of certain metals, determination of nitrates in sewage filter effluents, diffusion of dissolved oxygen through water, the fauna of sludge, disinfectants and the theory of disinfection, muscicides and other fly-destroying agencies, factors concerned in rate of heat loss from the human body, determination of minute quantities of antimony, and measurement of dilute hydro-cyanic-acid gas in air.

Compilations have been made of laws and regulations relating to poisons and habit-forming drugs, work has been done relating to the next revision of the United States Pharmacopœia and the National Formulary, material for the digest of comments has been prepared, and assistance has been given to the council on pharmacy and chemistry of the American Medical Association. Cooperation with other branches of the Government has been continuous.

The past fiscal year was marked by a great increase in the number of specimens submitted to the laboratory for examination, the total number being 3,365 . The laboratory has sent to State health authorities 1,738 complete treatments for rabies. Other routine work \(62015^{\circ}\)-FI 1916- 9
of a chemical and bacteriological nature has been carried out, as in the past.

Viruses, serums, etc.-In connection with the enforcement of the law governing the sale of viruses, serums, etc., 55 inspections of establishments have been made and 5,187 samples of products examined: Forty-two establishments (27 American and 15 foreign) held licenses at the end of the fiscal year. Studies have been commenced looking to securing an efficient potency standard for antityphoid vaccine.
Pollution of streams.-The exhaustive survey of pollution of the Ohio River and its watershed was continued during the year. In addition, surveys of stream pollution were conducted at certain Atlantic coast watersheds and the water supplies of Fort Thomas and Lexington, Ky., and Florence, Ala., were studied.

Coastal waters.-The field investigations of the pollution of coastal waters were extended during the year to include the important shellfish areas of Delaware Bay and its tributaries, lower New York, Raritan, and Jamaica Bays, New Haven Harbor and vicinity, and the Atlantic coast from the Virginia capes to New York, as well as a reexamination of certain areas in Chesapeake Bay and tributaries. These investigations consisted in the examination of large numbers of samples of shellfish and water, float and current studies, and sanitary surveys of adjacent areas.

Laboratory work is being conducted with regard to the'self and artificial purification of oysters and the disappearance rate in sea water and shellfish of \(B\). typhosus and \(B\). coli.

Sewage disposal.-As in the past, a number of sewage experimental plants have been operated to determine improved methods of sewage disposal in small communities and aboard trains and steamships. Certain surveys of privy conditions, including sanitary surveys of Hopewell, Va., and Jackson, Ky., were made during the year.

Industrial wastes.-Studies of industrial wastes, including tannery wastes, strawboard wastes, cannery wastes, and creamery wastes are being continued.

Educational lectures, etc.-On request of sanitary and civic associations, hundreds of educational lectures have been delivered in practically all sections of the country.

In addition to the scientific bulletins reporting the laboratory and field investigations, a number of popular publications have been prepared for use in the field and given as wide a circulation as practicable.

\section*{Division of Foreign and Insular Quarantine and Immigration.}

During the fiscal year the operations of the Public Health Service at United States quarantine stations included as in former years the enforcement of the quarantine laws and regulations providing measures to be taken for the prevention of the introduction of the various quarantinable diseases into the United States.

This service function was augmented during the year by the opening of the quarantine station at Galveston, Tex. Congress appropriated \(\$ 150,000\) for the purpose of purchasing the Boston quarantine station and equipment on Gallop's Island, and at the present time the service controls and administers all quarantine stations of importance on the mainland of the United States with the exception of Baltimore and New York. The city of Baltimore has signified its desire to transfer the quarantine station at that port from the city to the Federal Gorernment. The New York quarantine station is now administered by an officer of the Public Health Service on leave, being appointed for such purpose by the Governor of New York.

The National Government owns and operates 56 quarantine stations on the mainland of the United States, and in the Philippines, Hawaiian Islands, and Porto Rico 26 stations are administered by medical officers of the Public Health Service. In addition, there are stationed at foreign ports 17 medical officers for the purpose of further supervising the enforcement of the quarantine regulations applicablo to vessels at ports of departure when bound for ports in this country. These officers also exercise an advisory capacity in the examination of intending immigrants, and thereby often prevent needless expense to immigrants whose condition would operate to their mandatory exclusion from this country.

At the mainland quarantine stations of the UnitedStates there were inspected 12,120 vessels and 853,073 passengers and crews. For the destruction of rats and mosquitoes in the treatment of vessels infected with disease, there were fumigated 1,794 vessels.

Several unusual conditions operated as an added menace to the sanitary condition of this country and increased the duties and responsibilities of the officers on duty at the quarantine stations. An alarming increase of typhus fever occurred in northern Mexico, in Mexican cities located on the border of the United States. Conditions in the Republic of Mexico further added to the difficulties of sanitation in that country, and prevented the securing of information as to actual sanitary conditions.

In addition to the typhus epidemic a very considerable spread of dengue occurred, and in the latter part of the year yellow fever was reported from various communities having direct communication with United States ports. The utmost precautions were therefore
observed to prevent the introduction of yellow fever into the United States. Means were found, however, to facilitate shipping from some of these ports by the requirement of loading at sea and nonintercourse between vessels and the shore, medical officers of the Public Health Service being stationed at the various Mexican ports on the Gulf for the purpose of supervising precautionary measures. Two cases of yellow fever were discovered at New Orleans quarantine station on a vessel from Progreso, the vessel and personnel being given proper treatment for preventing the introduction of the disease into New Orleans.

Yellow fever was reported as epidemic in Porto Rico by medical officers of the Army, but the chief quarantine officer of Porto Rico considered the disease dengue, and his diagnosis was corroborated by a special commission of experts.

A very considerable epidemic of smallpox occurred in Porto Rico during the year. An epidemic of cholera has spread throughout all countries of the Orient, and its ravages were severe in Germany, Austria, and Russia. Some cases were reported from Italy and Greece.

Plague has occurred in numerous ports having commercial relations with the United States, prevailing practically at all ports of the Orient, with the exception of the Philippine Islands; in various parts of South America; in Cuba, the Azores, and in various Mediterranean ports. The widespread prevalence of this infection has necessitated the strictest supervision of incoming vessels. As a result of fumigation plague infection was found to exist on a vessel that had been six months out of a port of India, by way of European ports.

The problem of preventing the overland spread of typhus fever from Mexico to the United States has been a very difficult one, as, on account of the long line of border, illegal entry is of rather frequent occurrence, and the restrictions imposed at the port of entry have a tendency to encourage clandestine crossing. Main reliance has been placed on the treatment of incoming travelers and their personal effects for the purpose of destroying all vermin.

It is very important, however, that the quarantine facilities on the border shall be considerably enlarged, as they are at present inadequate. Plans with this object in view have already been partially carried into effect, with a Public Health Service officer in charge of all quarantine activity on the Mexican border.

Considerable attention has been given to improved methods of destroying rats on vessels by the employment of hydrocyanic-acid gas. This agent, on account of its superior diffusive qualities, has been found to be more effective than sulphur fumes, which have been used for years past, and very much cheaper than the process of fumigation by carbon monoxide. The main advantage in the use of cyanide
gas, however, has been the expediting of vessels passing through quarantine, the period of detention of a vessel when fumigated with cyanide gas being approximately two hours, as compared with 12 to 18 hours formerly required when sulphur was used. A very considerable amount of experimental work has been done by officers of the Public Health Service along the lines of cyanide-gas fumigation, and several publications have beed issued containing the results of this work.

Medical inspection of immigrants.-During the fiscal year ended June 30, 1916, 478,527 immigrants were examined by medical officers of the service for the purpose of detecting such physical or mental defects as might operate to exclude them from the United States under the provisions of the immigration law.

The number of officers assigned to medical inspection has fluctuated during the year, but on an average 90 officers were engaged exclusively in this duty. The examination of immigrants, however, is performed to a greater or less degree by many officers stationed at marine hospitals and quarantine stations and by service representatives stationed at the American consulates at foreign ports.

Owing to the reduced number of incoming immigrants, it has been found possible to adopt more intensive methods for examining immigrants, with the result that there has been a material increase in the number of aliens discovered to be mentally defective. Mental examinations requira specially trained officers and preferably those who can devote their time exclusively to this kind of work. The requirements of the service have been such as to prevent the detailing of the full number of officers desired for this purpose, but the policy has been to increase as far as possible the number of officers specially trained in the examination for determining mental defectives.

\section*{Division of Domestic Quarantine.}

The usual operations for the prevention of the interstate spread of disease have \({ }^{\circ}\) been continued throughout the year.

Rocky Mountain spotted fever.--Rocky Mountain spotted fever, an infection transmitted through the bite of infected wood ticks, has been combated as heretofore and regulations have been prescribed which it is hoped will limit the disease to territory already infected.

Poliomyelitis (infantile paralysis).-At the close of the fiscal year an extensive outbreak of poliomyelitis developed in New York City and an extension of the disease to contiguous areas occurred. In an effort to limit this extension an inspection and notification system of all children under 16 years of age leaving New York City was established, the health authorities at the points of destination receiving immediate notification of the coming of all persons of this class. At the present writing this system is still in force.

Bubonic plague.-Plague-preventive operations have been continued at New Orleans, La., Seattle, Wash., and environs, San Francisco, Cal., and in other sections of the last-mentioned State. No human case of plague has developed in New Orleans since September 8, 1915, but the infection has by no means been eradicated among rodents, indicating that danger still exists and requiring the continuation of rat extermination, the rat proofing of docks, warehouses, and other buildings and such remaining measures as appear applicable. Among the ground squirrels of California plague infection still persists, the incidence of the infection for 1916 showing a material increase over that of the previous year, but being only one-tenth of that for 1913. Before definitely and permanently discontinuing the work in those counties where infected squirrels could not be found, intensive hunting operations on a large scale were conducted over a wide area, resulting in a yield of rodents three times as great as the number destroyed in 1915. At the termination of the fiscal year all plague-preventive measures in the city of San Francisco were transferred to the city government, no plague-infected rodent having been discovered for several years, and the expense of further operations will be borne by the municipal government.

Interstate quarantine regulations.-A revision of the interstate quarantine regulations was promulgated by the Secretary of the Treasury under date of January 15, 1916. The promulgation of the requirements as approved marks not only a most important step in the prevention of the interstate spread of disease, but materially raises the standard of cleanliness of common carriers, improves sanitary conditions, and protects the drinking water and food supplied to the traveling public.

Educational work.-The educational work of the Division of Domestic Quarantine has been considerably broadened during the year. Increased use is constantly being made of the stereopticon loan library, more than 20,000 slides having been loaned to health officers, social workers, and others since the date of the last annual report. Numerous requests are also received for motion-picture films on health topics, but compliance with these requests in a majority of cases has been impossible owing to lack of material. A noticeably increasing tendency on the part of the public press to publish articles relating to health subjects recently has been manifested, and this tendency, as heretofore, has been furthered by providing for distribution to the press timely articles relating to health matters. It is believed that this constitutes one of the most valuable methods for the prevention of disease. Other educational activities have been by means of exhibits conducted at the Panama-Pacific International Exposition, on the Government "safety first" train, and in other
places. In cooperation with the Bureau of Education the educational, sanitary, and relief measures afforded the natives of Alaska have been continued as heretofore.

\section*{Division of Sanitary Reports and Statistics.}

Prevalence of disease in the United States.-Pursuant to the responsibilities imposed by Congress in the act approved February 15, 1893, every effort has been made to keep currently informed of the prevalence and geographic distribution of the preventable diseases throughout the United States. Not only has advantage been taken of existing sources of information and the records available in health departments of States, cities, counties, and townships, but, in accordance with the established policy of the department, an attempt has been made to increase the available information through the education of health officers and practicing physicians to its importance. Continuous effort has been made to cause more widespread recognition of the fact that no health department, State or local, can effectively prevent or control disease without knowledge of when, where, and under what conditions cases are occurring. Health departments are rapidly coming to realize that it is necessary that they have exact and current information of the prevalence of diseases if their efforts at control are to be at all effective. As a result the extent of the territory in which records of the current prevalence of disease are available is rapidly increasing. It is becoming recognized as a truth that efficient health administration and accurate information of the prevalence of disease go hand in hand and are inseparable.
The available data relating to the prevalence of disease have been currently published in the Public Health Reports for the information of health officials throughout the country.

During the latter part of the year poliomyelitis, or infantile paralysis, became epidemic in New York City and adjacent territory. Because of the great dread in which the disease is generally held and also that all possible measures might be taken to prevent its spread, it was especially important that the occurrence of cases should be promptly known. Officers of the Public Health Service and health officers throughout the country have kept the bureau informed by telegraph. The information thus obtained made it possible to watch the gradual extension of the disease and gave the confidence and assurance that accompany definite information.

A registration area for disease.-The conference of State and Territorial health authorities with the Public Health Service, held in Washington in May, 1916, adopted a formal resolution recommending the establishment of a registration area for disease-that is, that those States be designated in which the accuracy of reports of disease come
up to a given standard. The establishment of such a registration area implies the more careful recording of data regarding the prevalence of disease and its more careful compilation and analysis, and would be a most important and progressive step. The responsibility for the compilation and analysis of the data from such an area would fall mainly upon the Public Health Service. While the work would be considerable, this would be more than compensated by the great value of the resulting information.

Public health laws and court decisions.--The current publication of public health laws, ordinances; and regulations of States and cities has been continued, and two more volumes have been added to the compilations of such enactments.

The decisions of the Federal and higher State courts on matters which pertain to public health have been published currently in the Public Health Reports. During the year a digest and compilation was issued of the decisions which had been published.

Many requests are received from State and city health authorities for copies of laws, ordinances, and regulations adapted to meet special conditions or for assistance in drafting such measures. These requests have been complied with.

The question of correlating and making public health legislation uniform, in so far as possible, is an important one, and especially so because of the large number of State legislative bodies and the innumerable local authorities having the power of enacting ordinances and regulations. Every effort has been made to accomplish this purpose and to give advice and render assistance in the drafting of laws and regulations, and, in so far as possible, cause the enactment of legislation which is consistent and uniform and reflects the most advanced knowledge.

Public Health Reports.-The Public Health Reports have been issued weekly and distributed to sanitarians and health officials. They have been used as the medium for keeping the health officials currently advised of the prevalence of communicable diseases throughout the United States, the nature of the sanitary laws and regulations being currently enacted, and the trend of public health administration and practices.

Educational pamphlets intended for general distribution have been issued as supplements to the Public Health Reports. The great demand for these supplements indicates their usefulness.

\section*{Division of Marine Hospitals and Relief.}

During the fiscal year 1916, 68,398 patients received treatment as beneficiaries of the service, an increase of 12,616 over the preceding fiscal year. Of this number, 17,464 were treated in hospitals and 50,934 were treated as dispensary or out-patients. The hospital
patients received a total of 475,439 days' treatment. During the year the service operated 22 marine hospitals, all of which are owned by the Government, and maintained 125 other relief stations where. medical relief was furnished patients.

At the tuberculosis sanatorium of the service located at Fort Stanton, N. Mex., 346 patients were cared for during the year. Of these, 109 were discharged, 40 died at the sanatorium, and 197 remained under treatment at the close of the year.

Aid was extended to other branches of the Government in the physical examination of 6,454 persons, of whom 883 were rejected. In addition, 28,054 merchant seamen were physically examined to determine their fitness for service on American vessels, of whom 3,208 were rejected, and 245 foreign seamen were examined, of whom 25 were rejected.

\section*{Division of Personnel and Accounts.}

Commissioned and other officers.-The commissioned medical officers at the close of the fiscal year numbered 187, as follows: The Surgeon General, 1 assistant surgeon general at large, 13 senior surgeons, 72 surgeons, 37 passed assistant surgeons, and 63 assistant surgeons. The acting assistant surgeons numbered 250 , in addition to 5 acting assistant surgeons appointed for duty in the physical examination of applicants for enlistment or reenlistment in the United States Coast Guard. Physicians are also employed for the medical relief of superintendents, keepers, and surfmen near life-saving stations, and at places where the services of medical officers of the Public Health Service are not available, to the number of 63 , making a total of 505 medical officers. The total personnel of the service, including 50 pharmacists, 1,420 attendants, and 156 other employees, numbered 2,131.

Expenditures.-The appropriations for the ordinary maintenance of the Public Health Service were \(\$ 2,002,106\). The receipts from all sources, repayments for care of foreign seamen, etc., were \(\$ 22,067.58\). The expenditures, including outstanding liabilities, were \(\$ 1,953,995.09\), leaving an estimated balance of \(\$ 70,178.49\).

The appropriation for preventing the introduction and spread of epidemic diseases was \(\$ 500,000\). The repayments were \(\$ 1,014.40\). The expenditures, including outstanding liabilities, were \(\$ 470,115.59\), leaving an estimated balance of \(\$ 30,898.81\).

The appropriation for the maintenance of the quarantine service was \(\$ 155,000\). The amount of repayments was \(\$ 3,279.71\). The expenditures were \(\$ 152,843.67\), including outstanding liabilities, leaving an estimated balance of \(\$ 5,436.04\).

The appropriation for field investigation of public health matters was \(\$ 200,000\). The repayments were \(\$ 46.85\). The expenditures,
including estimated outstanding liabilities, were \(\$ 193,012.84\), leaving an estimated balance of \(\$ 7,034.01\).

The appropriation for interstate quarantine service was \(\$ 15,000\). The expenditures were \(\$ 14,998.53\), including outstanding liabilities, leaving an estimated balance of \(\$ 1.47\).

The appropriation for special studies of pellagra was \(\$ 40,000\). The expenditures were \(\$ 36,342.62\), including outstanding liabilities, leaving an estimated balance of \(\$ 3,657.38\).

The appropriation for studies of rural sanitation was \(\$ 25,000\). The expenditures were \(\$ 24,935.57\), including outstanding liabilities, leav-* ing an estimated balance of \(\$ 64.43\).

\section*{Miscellaneous Division.}

Publications.-The fiscal year 1916 witnessed a still further increase in the quantity of literature of the Public Health Service distributed throughout the country. During the year there were issued 132 publications, dealing with many phases of public health and sanitation. The number of copies issued was approximately \(2,241,225\), exclusive of a very considerable quantity printed and sold by the Public Printer.
Because of the expansion of service activities, with the consequent increase in the demand for public health documents, the editions of service publications were soon exhausted, and it therefore became necessary in many instances to refer applicants to the Public Printer, from whom copies could be purchased.

Library.-During the year many valuable additions were made to the bureau library through the purchase and donation of works dealing with medicine, public health, and kindred subjects. The bureau was also kept currently advised of the advance in scientific and public health subjects by subscription to 42 journals.

\section*{Recommendations.}

Pellagra prevention.-The remarkable results following scientific studies of public health matters during the year show the wisdom of fostering such endeavor. It is safe to say that the results obtained from one line of study alone, i. e., pellagra, have been of many times greater value than the entire appropriations for studies of public health matters. There is need of extending these studies of pellagra to demonstrate not only the public health but the economic inportance of the disease in communities badly affected.
Rural sanitation.-Another important recent undertaking of the Public Health Service has been the studies of sanitary conditions generally in rural counties. The marked betterment which has followed the completion of these studies in all the counties where they have been undertaken is möst gratifying. The health of the rural
population is a national asset of the greatest value, and adequate provision should be made for extending this work to at least one or two representative counties in every State of the Union. In order to advance sanitation it is essential that local health organization shall be developed. It is by studies of this character that the Government can best promote this object and contribute to the control of typhoid fever, malaria, and other diseases of high incidence in rural communities.

Industrial hygiene.-For a number of years studies of sanitary conditions in certain industries have been carried out by the Public Health Service. Such investigations as have been recently conducted in New York, Massachusetts, Ohio, Pennsylvania, and Wisconsin have been generally recognized as a factor in determining sanitary defects in the industries studied, and suggesting remedial measures for their correction here and elsewhere. The system of carrying out these studies in cooperation with the State and local authorities should be continued. There are many problems connected with industrial sanitation which await solution, and being of national importance should be investigated by the Federal Government. Facilities available for this work should therefore be increased in order to take up new studies for which plans have already been formed.

Biologic products.-A small appropriation was made available during the past year for the control of the manufacture and sale of biologic products. This appropriation, however, is not sufficient to maintain a constant and efficient supervision over this class of products. Such supervision is necessary in order to insure their safety and protect the health of the many users of these preparations.

National quarantine.-In the annual report of the Secretary of the Treasury for the fiscal year 1915 attention was drawn to the importance of making complete the national quarantine system by the acquisition of the few remaining quarantine stations under State or local control. During the past year Congress has appropriated \(\$ 150,000\) for the purchase of the Boston station, which has been conducted under a lease from the city of Boston"since June 1, 1915. This leaves but two important stations that are not under Federal control, i. e., those located at New York and at Baltimore. The city council of Baltimore has recently signified its desire to transfer the quarantine function at that port to the National Government, and at its last session the Legislature of the State of New York passed a resolution authorizing the appointment by the governor of a commission to negotiate for the transfer of the quarantine establishment on Staten Island. At the present time an officer of the Public Health Service, on leave, is serving as health officer of the port of New York under appointment from the governor.

The line of defense against the invasion of the so-called epidemic diseases should be made complete at the earliest practicable date. Conditions in Europe have been detrimental to sanitation, and at no time in recent years have plague, cholera, and typhus fever prevailed to the extent that they do to-day. With the close of the war will come a quickening of commercial intercourse with foreign nations and an increased tide of immigration, necessitating the strictest vigilance in the administration of maritime quarantine.

Since the passage of the national quarantine act of February 15, 1893, maritime quarantine has been recognized as a national function. Between that time and 1915 quarantine stations at 67 different places were transferred from State or local to Federal control. The advantages of a uniform system of Federal quarantine are numerous and have been set forth at length in former reports of the Secretary of the Treasury. They may be briefly summarized as follows: Enforcement of regulations and preventive measures in a uniform manner; economy in administration; availability of a large and mobile corps of specially trained quarantine officers, whose experience in quarantinable diseases and knowledge thereof has been increased by duty in foreign countries and insular possessions where such diseases mainly prevail; increased facilities for cooperation by other branches of the Government, especially the immigration and customs services; availability to the Public Health Service of sanitary reports from consular representatives in foreign countries; the ability of the Government to better observe the obligations of international sanitary treaties, and to demand reciprocal action on the part of foreign signatories to such treaties.

National care of lepers.-In the reports of the Secretary of the Treasury for 1914 and 1915 special attention was drawn to the ques-. tion of the care of lepers by the National Government, and the necessity for a general policy for the control and segregation of sufferers from this disease. A bill (H. R. 193) "To provide for the care and treatment of persons afflicted with leprosy and to prevent the spread of leprosy in the United States" was passed by the House of Representatives on May 4, 1916. A similar bill (S. 4086) has been favorably reported to the Senate by the Committee on Public Health and National Quarantine of that body. It is believed that this important public health measure should be enacted into law at the earliest practicable time.

Hygienic Laboratory.-It is desired to renew the recommendation, made for several years past, that a new building be provided for the use of the Hygienic Laboratory. The scope and importance of the work of this institution have expanded with the development of the Public Health Service. It is here that the technical studies of the service are for the most part conducted. The increase in work and
personnel has resulted in a condition of crowding that seriously interferes with the conduct of accurate scientific work, and it is hoped that an additional building, which it is estimated will cost \(\$ 175,000\), will be provided by Congress.

Publications.-The demand for publications on health subjects continues to increase, and although considerably more than \(2,000,000\) copies of various publications were distributed during the past year, many requests were of necessity declined, owing to the limited size of editions. It is recommended that the printing appropriation for the Treasury Department be increased in order that this demand may be filled.

Bureau personnel.-The rapidly growing work of the service in the field has steadily increased the administrative work of the bureau. Additions to the clerical force have been provided from time to time, but they have not been sufficient to keep pace with the increasing volume of supervisory and routine work. Overtime work has been necessary on numerous occasions, and the granting of leaves of absence which employees have justly earned at times presents a difficult problem. It is hoped that provision for additional employees will be made in accordance with the estimates submitted.

COAST GUARD.
The Captain Commandant summarizes the operations of the service as follows:
Lives saved or persons rescued from peril. ..... 1, 216
Persons on board vessels assisted ..... 15, 742
Persons in distress cared for ..... 483
Vessels boarded and papers examined ..... 30, 510
Vessels seized or reported for violation of law ..... 615
Fines and penalties incurred by vessels reported ..... \$251, 820
Regattas and marine parades patrolled in accordance with law ..... 36
Instances of lives saved and vessels assisted. ..... 1, 453
Instances of miscellaneous assistance ..... 2, 021
Derelicts and obstructions to navigation removed or destroyed ..... 30
Value of vessels assisted (including cargoes) ..... \(\$ 10,509,655\)
Value of derelicts recovered and delivered to owners ..... \(\$ 128,900\)
Appropriations for 1916, including repairs to cutters ..... \(\$ 5,418,641.06\)
Net expenditure for maintenance of the service, including repairs to cutters and stations ..... \(\$ 5,215,711.34\)
Estimated unexpended balance. ..... \(\$ 202,929.72\)Through the agency of the Coast Guard cutters and stations thelives of 1,216 persons were actually saved during the fiscal yearended June 30, 1916. There were 1,453 instances of service whichinvolved the saving of life or the salving of property imperiled. As-sistance was given in various ways to 15,742 persons on board ves-sels. It can not, of course, be stated or even estimated what pro-portion of the latter number would have lost their lives had it not
been for the timely aid rendered by the Coast Guard, but it is reasonable to assume, considering the attendant circumstances in many of the instances, that the loss of life would have been considerably augmented. During the year 30 derelicts, constituting a serious menace to navigation, were destroyed or otherwise removed from the paths of commerce by the cutters.

The equipment of the Coast Guard comprises 23 cruising cutters, 24 harbor cutters, and 279 stations.
The total appraised value of property saved from immediate jeopardy was \(\$ 10,638,555\). The cost of maintaining the service for the year was \(\$ 5,215,711.34\).

The Androscoggin has been continued on the duty of rendering medical and surgical aid to the crews of American fishermen engaged in deep-sea fishing. During the year 10 separate cruises were made to the fishing banks, and 149 cases of sickness were treated. In the performance of this duty the Androscoggin cruised a distance of 9,538 miles, and at all times the services of the cutter were available for the protection of American fishermen in their rights, and to advise them in order that they might avoid any action which might interfere with international agreements concerning fishing.

In addition to the general enforcement of customs laws by all vessels and stations of the Coast Guard there are harbor cutters and launches detailed especially for customs service at the ports of Boston, New York, Philadelphia, Baltimore, Savannah, Pensacola, Mobile, New Orleans, San Francisco, and Seattle, 12 craft in all.

In cooperation with the War Department the Coast Guard has continued the supervision of the anchorage and movements of vessels at the ports of New York and Chicago and on the St. Marys River, Mich. In addition, the commanding officer of the cutter Acushnet has been designated as supervisor of the new anchorage ground established by the Secretary of War in Nantucket and Vineyard Sound, Mass.

The continuance of the war in Europe made it necessary, as during the preceding year, to assign several of the cutters on various occasions to enforce the neutrality laws of the country. This resulted in the withdrawal of the vessels so assigned from their regular duties at such times, because in order to enforce neutrality laws effectively the service must be continuous. Owing to the limited number of cruising cutters and the fact that no relief vessels are available, it becomes necessary to discontinue certain of the regular duties of the cutters when their services are required in the enforcement of laws which demand their undivided attention. With a spare vessel each for the Atlantic and Pacific coasts the performance of this important duty could, in most instances, be undertaken without seriously interfering with the regular business of the cruising cutters.

In the interest of the public safety, and as required by law, all the important regattas and marine parades held throughout the country on frequented waters, to the number of 36 , were patrolled by Coast Guard cutters.

For the purpose of enforcing the laws governing navigation; motor boats, and customs there were boarded and examined during the year 30,510 vessels. This is a substantial increase over the number of vessels boarded and examined in each of the preceding two years of the Coast Guard organization. Of the vessels examined, 615 were reported for violation of the laws, involving fines of \(\$ 251,820\).

At the request of the Department of Commerce, certain officers of the Coast Guard were designated as examiners to assist the Steam-boat-Inspection Service in carrying out the provisions of the "Seaman's act" in connection with lifeboat men. From November, 1915, to the end of the fiscal year 16,028 applicants were examined. Of that number 11,408 were certificated as lifeboat men and 4,620 rejected.

The patrol of the Bering Sea and North Pacific Ocean to enforce the provisions of law and the convention of 1911, entered into by the United States, Great Britain, Russia, and Japan, for the protection of the fur seal, has been continued. No violations of the sealing treaty were discovered. The Bear made the usual cruise through the Bering Sea and Arctic Ocean for the purpose of affording protection to the Government interests in distant parts of Alaska. As in former years, the Department of Justice requested the use of a cutter to transport the United States court to places in southwestern Alaska for the purpose of facilitating the administration of justice. The McCulloch, being assigned to this duty, received on board at Valdez on July 9 the United States judge and the necessary court officials and proceeded to the various places indicated by the Department of Justice, returning to Valdez with the floating court August 20, 1915. The Thetis made a special cruise to Bird, Laysan, Lisiansky, Ocean, and Midway Islands in January and February, 1916, to inspect the bird reservations on behalf of the Department of Agriculture. No evidences of poaching were found, and it is concluded that the previous cruises of cutters to those islands have had the effect of discouraging the further incursions of bird marauders.

As in the past three years, the international ice observation and ice patrol service was performed by vessels of the Coast Guard. The Seneca was detached from the New York division in the early part of February and made two cruises to the vicinity of the Grand Banks on ice-observation duty. In March the Tampa was sent from Key West to New York to fit out for this duty, and in the early part of April joined the Seneca in maintaining a continuous ice patrol until July 3. Each vessel made three ice patrol cruises of 15 days dura-
tion, not including the time consumed in making the run between Halifax and the ice region. Once every day during these cruises bulletins giving information concerning ice conditions were broadcasted for the benefit of trans-Atlantic steamers, and ice information was given at any time to any ship requesting the same. Each day, also, a radiogram defining the ice danger zone was dispatched to the branch hydrographic office at New York City for the general information of shipping.

On August 16, 1915, the Gulf coast was visited by a hurricane of unusual violence and the coast of Texas suffered most severely. During the height of the storm the Coast Guard stations at Velasco, San Luis, and Galveston were destroyed, together with practically all their equipment. As a direct result two surfmen at Velasco and four at San Luis lost their lives, The loss of members of the families of the crews and refugees who sought shelter at the stations brought the total casualties at these stations up to 21. In the urgent deficiency act approved February 28, 1916, Congress appropriated \(\$ 67,000\) to replace the stations and equipment. Plans were at once prepared and the work of rehabilitation is now proceeding with all possible dispatch.

\section*{Administrative measures.}

During the past year the organization of the Coast Guard was completed and regulations prepared and promulgated. Mr. Sumner I. Kimball, General Superintendent, was retired, and the offices of general superintendent and assistant general superintendent were discontinued. An Executive order has been promulgated, defining the status of the Coast Guard when operating as a part of the Navy under the provisions of law.

During the year 70 general courts and 120 minor courts were convened, being a decrease of 44 as compared with the previous year. The probation system for offenders, which was inaugurated in 1910, has proved very efficacious, and excellent results have continued to obtain.

During the year 20 cadets and cadet engineers have been under instruction at the Coast Guard Academy at New London, Conn. Three cadet engineers completed the prescribed course and were commissioned. Competitive examinations were held in June to select the new class, and it is expected to appoint 9 cadets and 1 cadet engineer.

The practice of assigning medical officers of the Public Health Service to cruising cutters has been continued so far as the available personnel of that service would permit. Ten cutters have been provided with surgeons, and it is hoped that during the ensuing fiscal year it may be possible to assign surgeons to all other cruising cutters.

One of the chief functions, if not the primary function, of the Coast Guard is the saving of life and property from the perils of the sea. It is therefore obvious that nothing should be left undone that will contribute to the complete fulfillment of this purpose. The service should be able to avail itself of every reasonable and practicable means which has this end in view. Aviation has now advanced to such a stage that aircraft can be very advantageously used in connection with the saving of life from shipwreck and for searching for derelicts. Anticipating that the Coast Guard must adopt this new method of life saving as soon as practicable, three junior officers have been assigned to undergo training at naval aviation and private schools in order to form the nucleus of a force trained for this purpose. The desirability of providing stations, equipment, and personnel has been presented to Congress and appropriate bills are now pending in the National Legislature for those purposes.

The facilities afforded by the Coast Guard depot at Arundel Cove, Md., have been utilized to a very considerable extent during the past year. Extensive repairs have been completed to the Comanche, and the rebuilding of the Algonquin has proceeded satisfactorily. Minor repairs have been made to the Apache, Guthrie, Wissahickon, Pamlico, Itasca, and several smaller craft. With the view of increasing the facilities and usefulness of the depot a technical board has been in session during the year for the purpose of examining into and recommending measures for modernizing the entire equipment and putting the power plant in a more efficient and satisfactory condition. As a result, progress has already been made in the introduction of electricity for furnishing light and power necessary to carry on the work.

The new station at Mackinac Island, Mich., was completed during the year, and a site has been secured for the new station to be established at Siuslaw River, Oreg. A suitable site has been determined upon for the new station authorized at Duxbury Reef, Cal., and the necessary steps are now being taken to secure title. The stations at Point of Woods, N. Y., and Cape Fear, N. C., have been rebuilt; at Rockaway, N. Y., and Sandy Hook, N. J., the buildings have been removed to new sites; at Quoddy Head, Me., Damiscove Island, Me., Chatham, Mass., Monomoy, Mass., Fishers Island, N. Y., and Portsmouth, N. C., the launching facilities have been extensively improved. The rebuilding of the stations in Texas to replace those destroyed by the hurricane of August 16, 1915, is now under way. The station at Coos Bay, Oreg., and the boathouse at Fort Point, Cal., have been rebuilt. On the Great Lakes two stations have been rebuilt. Contracts have been awarded for extensive repairs to 10 other stations. Two new self-bailing motor lifeboats and seven self-bailing motor surfboats have been completed and placed in service. The old cutter Thetis, stationed at Honolulu, having outlived her usefulness and
\[
62015^{\circ}-\text { FI } 1916-10
\]
become unfit for the further uses of the Coast Guard, was condemned and sold to the highest bidder. The New Inlet station on the coast of North Carolina has been discontinued, the interest of humanity and commerce no longer requiring its existence.

\section*{Recommendations.}

New cutter at Detroit, Mich.-The Morrill, which has headquarters at this port and is assigned to the important duties of patrolling the waters of Lakes Ontario, Erie, St. Clair, and Huron and rendering aid to vessels in distress, has outlived her usefulness. Built in 1889, she is now 27 years old, and is too antiquated and entirely inadequate in size and power effectively to perform the duties required of a cruising cutter. It is interesting to note, in this connection, that since the Morrill was constructed the average size of merchant vessels which she is.called upon to assist has more than doubled. The tonnage of vessels passing by Detroit each year is greater than at any other point in the United States, if not in the world, and a modern and more powerful cutter is urgently needed on this station. It is therefore recommended that Congress be requested to appropriate \(\$ 350,000\) for the construction of a new cruising cutter to replace the Morrill.

New cutter at Honolulu, Hawaii.-As elsewhere stated in this report, it has been found necessary to condemn and dispose of the old cuitter Thetis, formerly stationed at Honolulu. This leaves no vessel available for duty in connection with patrolling the waters of the Hawaiian group and the outlying Midway and Laysan Islands of the Pacific. Assistance to vessels in distress in the vicinity of the important shipping center of Honolulu, the enforcement of neutrality and navigation laws, and the other duties of the Coast Guard must of necessity be neglected if provision is not made for a new vessel to carry on this work. It is therefore recommended that Congress be asked for an appropriation of \(\$ 400,000\) to provide a cutter for replacing the Thetis.

New cutter at Beaufort, N. C.-The vicinity of Cape Hatteras is, as is well known, one of the most dangerous localities in American waters, and a great many vessels annually meet disaster there. It might well be termed the birthplace of derelicts, 10 years of experience with the systematic destruction of derelicts having shown that the majority of these floating menaces to navigation originate within a radius of 50 miles of Hatteras. On the occasion of severe blows there are sometimes from 5 to 10 mishaps to passing vessels within a period of a day or two. Calls for help are sent out broadcast, but can not be answered promptly-sometimes not at all-as the only two available cutters for service in that locality are the Onondaga, stationed at Norfolk, Va., and the Seminole, with headquarters at Wilmington,
N. C. In such times both these vessels have much more assistance work than they can attend to, and there is urgent need for another vessel in that vicinity. It is therefore recommended that a new cutter be authorized for duty around Cape Hatteras, with headquarters at Beaufort, N. C. This is the closest port to the cape, and prompt assistance can be rendered from that port as a base of operations. It is estimated that an efficient vessel for these duties will cost \(\$ 350,000\).

Radio equipment.-Owing to lack of funds, it has been impossible to install modern radio sets on 10 of the cruising cutters, and these vessels are therefore still equipped with the apparatus originally installed years ago. This apparatus is obsolete and inefficient, and in consequence these vessels are seriously handicapped in the performance of their emergent duties. Notwithstanding the fact that an act of Congress requires the installation of auxiliary radio apparatus on seagoing merchant vessels, nine of the cruising cutters are not so provided, because of the lack of funds. It is recommended that Congress be requested to provide additional appropriations in order that these serious deficiencies may be remedied.

Telephone lines.-There are in the Coast Guard 1,500 miles of telephone lines and cables extending intermittently along the coasts of the United States. This system of communication is very important to the Coast Guard in the saving of life and property, and to be efficient it should be practically continuous and, wherever possible, connected with the lines of commercial companies in the vicinity. The whole system should be extended so that all Coast Guard stations, prominent lighthouses, and other advantageous lookout points along the seacoast may be connected. There are 23 Coast Guard stations situated at isolated points which have no wire connections whatever, and the operations of the service are impaired by this lack of means of communication. While the expenditures incident to placing the Coast Guard lines in efficient condition are fully warranted through the saving of life and property along the coast in times of peace, the fact must not be overlooked that the necessary funds would be well expended if only for purposes of national defense. The same equipment and trained personnel will be available for instant use as a coastal communication system in time of national emergency. The great length of our seacoast makes it imperative that we should be prepared with a highly efficient system of coastal communication, and fortunately the necessary facilities for this purpose are alike of value to the people both in peace and war.

Commuted rations.--The warrant officers and enlisted men of the Coast Guard are entitled under the law to be subsisted by the Government. On cruising cutters rations in kind are issued to the enlisted men through the medium of the general mess. Warrant officers,
however, in lieu of rations in kind, receive a money allowance which is supposed to represent the value of the ration, and with this allowance they are expected to defray the cost of subsistence. Many years ago the commuted ration was fixed at 30 cents per day, this amount representing a fair average cost of the ration at that time. As the average cost of rations for the fiscal years 1916, 1915, 1914, and 1913 was \(\$ 0.483, \$ 0.475, \$ 0.483\), and \(\$ 0.432\), respectively, it is very evident that the present allowance of 30 cents a day is totally inadequate. It is, therefore, earnestly recommended that Congress be requested to increase the allowance for a commuted ration from 30 cents to 45 cents.

Pay of enlisted men.-From the year 1863 until 1908 the wages of petty officers and seamen of the former Revenue Cutter Service were fixed so as to meet the fluctuating rates in the merchant service. The act of April 16, 1908, granted an increase of 20 per cent over the then existing rates. It was held by the Comptroller of the Treasury that this act fixed the rates of pay in all grades. The advance of wages of seafaring men since that time has been so great that the rates now paid enlisted men of the Coast Guard are so far below existing merchant rates that the service is unable to enlist a sufficient number of men to man the cutters, and in consequence the activities of the service are seriously hampered. It is, therefore, earnestly recommended that Congress be asked tó reenact section 2754, Revised Statutes, to the end that it may be possible again to fix the rates for the warrant and enlisted personnel of the Coast Guard so as to more nearly correspond with those prevailing in the merchant marine for like services.

Clerical force.-The placing of the Coast Guard upon a military basis necessitates the keeping of accurate service records and the medical history of 4,300 officers and men. This has brought much additional work upon the clerical force at headquarters. The work of accounting in connection with the pay of the personnel of the Coast Guard is also considerably increased, due to the fact that the Coast Guard act provides longevity pay and retirement for the entire warrant and enlisted personnel. The warrant and enlisted personnel of the Revenue Cutter Service only were receiving longevity pay prior to the passage of the above act. This provision of the law increases the number of rates of pay for the personnel of the former Life Saving Service from 6 to 28 . The work of accounting is also increased by reason of the fact that while there is only one appropriation for the Coast Guard, that appropriation is divided into 12 subheads, and for administrative reasons an account must be kept for each of these subheads: To properly care for the above increased work three additional clerks are needed, and it is requested that Congress be asked to appropriate the necessary funds. The Captain

Commandant is now required to perform the duties which formerly devolved upon the general superintendent of the Life Saving Servioe and the commandant of the Revenue Cutter Service, acting separately, and is much in need of assistance in disposing of the many details to which he must necessarily give his personal attention. Under present conditions he can obtain this assistance only by taking a clerk from his regular duties in some section of his office, which, of course, hampers the work of that section. This is most unsatisfactory, and it is recommended that a private secretary be provided for the Captain Commandant.

Commissioned personnel.-The difficulty of filling vacancies in the engineer corps through the present method of appointing and training cadet engineers has greatly inoreased during the past year. It has now reached such an acute stage that it is necessary to adopt other means at the earliest possible time. The best method seems to be that of amalgamation of the line and engineer corps, without any increase in the total number of officers now authorized by law, and this procedure is recommended. This should include provisions that officers now in the grades of captain of engineers and first lieutenant of engineers when transferred should perform engineering duty only; to appoint only line cadets, they to receive instruction in both line and engineering duties; that in the junior grades of second lieutenant and third lieutenant, all commissioned officers hereafter may be assigned to either line or engineering duty; that after officers have passed through the grade of second lieutenant, a certain number, depending upon the necessities of the service, should specialize in engineering duty only. If existing law be thus amended it is confidently believed that all vacancies hereafter may be filled promptly and that the efficiency of the service will be greatly enhanced.

\section*{division of public moneys.}

The monetary operations of the Government have been conducted through the Treasurer of the United States, 9 assistant treasurers of the United States, the treasurer of the Philippine Islands, the American Colonial Bank of Porto Rico, 12 Federal reserve banks, and 1,368 national-bank depositaries.

The 12 Federal reserve banks were designated as depositaries of public moneys and as fiscal agents of the United States, to take effect January 1, 1916.
The amount of public moneys held by the bank depositaries on June 30, 1916, including the public funds to the credit of the Treas-
urer's general account, United States disbursing officers, and money in transit was \(\$ 178,536,175.57\), an increase of \(\$ 85,205,648.68\) since June 30, 1915.

On June 30, 1916, there were' 774 regular depositaries, including the Federal reserve banks, and 607 temporary depositaries; 26 were designated during the year and 264 were discontinued.

On November 1, 1916, the total number of depositaries, including the Federal reserve banks, was 1,375 and the amount held by them was \(\$ 69,112,968.16\).

\section*{DIVISION OF BOOKKEEPING AND WARRANTS.}

The fiscal transactions recorded upon the books of this division during the fiscal year ended June 30, 1916, were as follows:

Receipt accounts-customs, internal revenue, public lands; miscellaneous, Panama Canal receipts from tolls, etc., and public debt receipts-to the number of 880, and appropriation accounts for all executive departments, other Government establishments, and the District of Columbia to the number of 6,600 , have been credited and charged, respectively, with all warrant entries affecting the receipts and disbursements, and the results exhibited in the annual reports of the department.

Seven thousand four hundred and fifty active accounts of collecting and disbursing officers of the Government were carried in the fiscal officers' ledgers of the division, recording their transactions as to collections and deposits of public moneys, and of expenditures made from moneys advanced to them.

Warrants issued during the fiscal year 1916.

Appropriation warrants have also been issued to the number of 478, crediting detailed appropriation accounts with amounts provided by law for disbursement.

Warrants in the amount of \(\$ 1,607 ; 652,590.74\), representing receipts of \(\$ 840,986,950.27\) and net disbursements of \(\$ 766,665,640.47\), including Panama Canal and public debt transactions, less bond exchanges of \(\$ 10,290,600\) not affecting the general fund balance, were credited and charged, respectively, to the general fund of the Treasury. Warrants representing \(\$ 418,935,397.06\) were issued for adjustment of appropriation accounts, largely for the detailed naval accounts against
"general account of advances," without affecting the general fund. Warrants representing \(\$ 820,117,102.88\) were issued during the first four months of the year for receipts and redemptions of certificates and notes not entering into the general-fund account, the moneys involved being held for redemption of the certificates and notes for which the funds are respectively pledged. Beginning November 1, 1915, these transactions were adjusted without the issue of warrants therefor.

The following table exhibits the totals of the receipts and disbursements of the year for the general fund:
\begin{tabular}{|c|c|c|c|}
\hline & Receipts. & Disbursements. & Excess of receipts ( + ) or of disbursements ( - ). \\
\hline Ordinary & \$779, 664, 552.49 & \$724, 492,998.90 & +\$55, 171, 553.59 \\
\hline Panama Canal. & 2, 869, 995. 28 & 17, 503, 728.07 & \(-14,633,732.79\) \\
\hline Public debt. & 58, 452, 402.50 & 24, 668, 913.50 & \(+33,783,489.00\) \\
\hline Total. & 840,986, 950. 27 & 766, 665, 640. 47 & + 74,321,309.80 \\
\hline
\end{tabular}

This shows an excess of ordinary receipts over ordinary disbursements of \(\$ 55,171,553.59\), and an excess of all receipts over all disbursements of \(\$ 74,321,309.80\), taking into account public debt transactions and payments from the general fund of the Treasury during the year of \(\$ 17,503,728.07\) for the Panama Canal without sales of bonds, offset in part by receipts from Panama Canal tolls, etc., of \(\$ 2 ; 869,995.28\).

\section*{The general fund.}

State bonds and stocks owned by the United States.
The following statement shows the nonpaying State bonds and stocks, formerly in the Indian trust fund, now in the Treasury, belonging to the United States:
\begin{tabular}{|c|c|c|}
\hline , & Principal. & Interest coupons due and unpaid. \\
\hline Louisiana. & \$37,000.00 & \$17,220.00 \\
\hline North Caroli & \(58,000.00\) & 88, 140.00 \\
\hline Tennesseo. & 335, \(666.66{ }^{2}\) & 157, 830.51 \\
\hline Total. & 430,666.663 & 263,190. 51 \\
\hline
\end{tabular}

A history of these State stocks and bonds is given in House Document No. 263, Fifty-fourth Congress, second session.

SECRET-SERVICE DIVISION.
Four hundred and seventeen persons were arrested during the year for violating the counterfeiting and other laws relating to the Treasury Department. California contributed the greatest number of arrests. The expositions at San Francisco and San Diego no doubt were responsible for this increased activity.

Twenty-one new counterfeit-note issues were discovered in circulation, only three of which, however, were circulated to any extent, the others being quickly suppressed by the arrest of the makers and the seizure of the "plants."
Counterfeit notes, amounting to \(\$ 44,827.98\), were captured or confiscated, and unauthorized issues of Mexican currency aggregating \(1,096,949\) pesos were seized.

Twenty-three thousand seven hundred and one dollars and eightyfive cents in counterfeit coins, 210 note plates, \(24 \frac{1}{2}\) sets of dies, and \(241 \frac{1}{2}\) coin molds were seized.

Agents of the division were from time to time detailed to investigate violations of the laws relating to customs and internal-revenue frauds, thefts of Government property, forgery of Government checks, fraudulent claims, and other Treasury matters. One of these cases resulted in the arrest of the men who burglarized the vault in the internal-revenue office at St. Paul, Minn., and the recovery to the Government of more than half a million dollars worth of documentary stamps.

The field agents of the service are commended for their loyalty and industry,' and acknowledgment is made of the hearty cooperation of local officers throughout the country.

\section*{DIVISION OF PRINTING AND STATIONERY. \\ Printing and binding.}

The expenditures for printing and binding for all the offices and bureaus of the Treasury Department during the fiscal year 1916 totaled \(\$ 385,049.88\), as against \(\$ 408,186.35\) for the previous year, showing a net decrease of \(\$ 23,136.47\). The subjoined table shows the cost charged to each of the various.offices and bureaus, together with the respective increases and decreases in each.

Appropriations, expenditures, and reimbursements for printing and binding.

\section*{Postage.}

The appropriation for the fiscal year 1916 for postage to prepay matter addressed to postal union countries and for postage for the Treasury Department was \(\$ 1,000\), which sum was entirely expended.

Materials for bookbinder.
The appropriation for the fiscal year 1916 for materials for the Treasury Department bookbinder was \(\$ 250\). Of this amount \(\$ 243.81\) was expended, leaving a balance on hand of \$6.19.

\section*{Department advertising.}

The amount expended for department advertising during the fiscal year 1916 was \(\$ 10,455\), against \(\$ 11,185\) for the previous fiscal year, showing a decrease of \(\$ 730\). There were 2,682 authorizations for advertising, which is a reduction of 79 over the fiscal year 1915.

\section*{SECTION OF SURETY BONDS.}

During the calendar year 1914, 17,904 bonds were passed through the Section of Surety Bonds, showing an increase for the year 1915 of 3,200 bonds. The penalties of the bonds recorded during the year 1914 aggregated \(\$ 239,128,162\), while during the year 1915 the aggre-
gate penalties were \(\$ 247,104,818\), an increase of \(\$ 7,976,656\). The foregoing statement of bonds recorded does not include the large number of bonds accepted by collectors and deputy collectors of customs at the various ports and subports of entry.

During the fiscal year the work of the section has been materially increased by reason of the fact that 8 surety companies have ceased to write fidelity and surety business and the labor has devolved upon the section of securing termination evidence of liability under Government bonds executed or reinsured by these companies. During the year 2 additional companies were authorized to do business with the Government. At the present time there are 24 authorized companies doing business with the Government either as insuring or strictly as reinsuring companies, with the aggregate capital and surplus of approximately \(\$ 50,000,000\).

The work of the section is now carried on by five clerks and an assistant messenger, with an aggregate pay roll of \(\$ 7,720\).

It is believed that a reorganization of the force should be made, owing to the increasing volume of business and in order to promote deserving employees, and with that end in view the proposed estimates for the ensuing fiscal year have been submitted upon the basis of \(\$ 10,220\), or a net increase of \(\$ 2,500\).

During the fiscal year it has become necessary to make examinations of the financial conditions of companies applying for authority to do business with the Government. These examinations have been made under the present regulations at the expense of the surety companies themselves, but a specific appropriation should be made by Congress to enable the Secretary of the Treasury to enforce the provisions of section 4 of an act of Congress approved March 23, 1910 (36 Stat., p. 241), providing that the Secretary may institute inquiry as to the solvency of surety companies with a view to requiring additional security should it become necessary as the result of such investigation. While the Secretary is empowered under the act of Congress cited to institute such inquiries, Congress has made no provision by way of an appropriation to enable the Secretary to institute such inquiries, the necessity for which is becoming more apparent from day to day, as will be shown by the number of surety companies which have been compelled to retire from the surety business frequently as the result of examinations made by insurance departments showing the complete loss of all surplus and serious impairment of capital.

The Secretary of the Treasury should have under his control an appropriation which would permit him to make examinations before certifying to the continuing solvency of surety companies, especially in those cases where there is strong reason to suspect that the companies are underestimating their liabilities.

Regulations have been issued by the Treasury Department fixing a limit to the liability which any surety company might assume as sole surety on any single risk running to the Government, so far as bonds accepted by the bond-approving officers of the Treasury Department were concerned, and prescribing the general conditions under which business with these companies should be conducted, so far as the Treasury Department was concerned. These regulations were promulgated in department circular No. 54, issued under date of September 21, 1910, providing that a surety company would not be accepted on any single risk where the penalty of the bond was in excess of 10 per cent of its paid-up capital and surplus, as determined by an audit of the quarterly financial statements of the company as rendered to this department.

This regulation in its final form has been adopted by all of the executive departments of the Government and is in full operation. The regulation has been productive of beneficial results, and is generally approved by the companies themselves, and it is believed should be enacted into law. The enactment of a law limiting the liability of a company to 10 per cent of its capital and surplus on any single risk, whether running to the Government or in the nature of a private contract, is justified by the fact that 13 States have already enacted such a limitation. The acts of August 13, 1894 (28 Stat., pp. 279-280) as amended by the act of March 23, 1910 (36 Stat., p. 241) should be still further amended, with a view to fixing such limit of liability, and giving to the Secretary of the Treasury the right to prescribe the necessary regulations for the enforcement of the law. The following language is suggested, which, if adopted by Congress and enacted into law, will cover the situation:
"That hereafter no corporate surety company authorized to do business with the Government shall expose itself to a loss on any one risk or hazard for any one principal in excess of the amount of ten per cent of its paid-up capital and surplus, as fixed by the Secretary of the Treasury, unless such excess is adequately protected under such regulations as the Secretary of the Treasury may prescribe."

Other Secretaries of the Treasury have recemmended legislation with a view to terminating the liability of the sureties on a bond in regard to any future transactions after a new bond has been executed at the end of four years, as required by law, for the same class of disbursements.

The necessity for such legislation has been carefully considered and approved by the Attorney General, in an opinion addressed to the Secretary of the Treasury under date of October 17, 1906. Several bills have been introduced at various times in Congress with a view to carrying out this recommendation, and the following language has
\[
62015^{\circ}-\text { FI } 1916-11
\]
been approved by the Attorney General as entirely appropriate, and the most effective way of accomplishing the purpose in view:

That when a new bond has been given and accepted and approved under the provisions of section five of the act of March second, eighteen hundred and ninety-five (28 Stats., p. 808), requiring bonds to be renewed every four years, or oftener if it shall be deemed necessary, the surety or sureties on the prior bond shall be released from responsibility for all acts or defaults of the principal on the prior bond which may be done or committed subsequent to the date of acceptance and approval of said new bond by the proper head of the department, or other officer, saving only liability on account of the default or failure of the principal to account properly for any money or property in his possession or custody prior to or at the time of the acceptance and approval of such new bond as aforesaid.

\section*{OFFICE OF THE DISBURSING CLERK.}

The following table shows the amount of work performed during the fiscal year 1911 (the first year of the present organization) and during the fiscal year 1916, with the percentage of increase in each class of work in five years:

\end{tabular}

The present organization of the office dates from July 1, 1910, on which day the work formerly performed by four disbursing clerks in the Treasury Department was taken over by the new organization. Each year since the reorganization there has been a marked increase in the work as compared with the previous year, due to assigning new. work to the office from time to time and to the steady increase in the work of certain bureaus and offices, particularly the Supervising Architect's Office. It is estimated that for each occupied building this office pays 100 vouchers a year. As about 90 new buildings are completed and occupied each year the annual increase in the number of vouchers paid as compared with the preceding year is about 9,000 on public buildings alone.

The office makes disbursements for all salaries and expenses of the Treasury Department in the District of Columbia (except the Bureau of Engraving and Printing) and the greater part of the salaries and expenses outside the District of Columbia under the Coast Guard, the Public Health Service, the Supervising Architect's Office (including the construction, operation, maintenance, and repairs of all public buildings under the control of the Treasury Department), the Comptroller of the Currency, the Secret Service, special agents of the Customs and Internal Revenue Services, contingent expenses Independent Treasury, and the Division of Loans and Currency.- The office also receives and accounts for moneys due the United States on account of rents of sites for public buildings, sales of Government property, etc., under the offices of the Chief Clerk, Supervising Architect, Surgeon General Public Health Service, and Captain Commandant Coast Guard.

During the year, under a separate designation and \({ }^{\circ}\) in a separate account, disbursements were made under the appropriation "Relief, protection, and transportation of American citizens in Europe," as follows:

> Amount disbursed \(\$ 6,541.22\)
> Number of checks issued................................. . . . . . . . . . . . . . 145
> Number of vouchers and pay rolls paid......................... 35

So far as can be ascertained the volume of business transacted by this office is greater than that of any other disbursing officer of the Government. Notwithstanding its enormous volume the work has been current at all times and public creditors have been paid promptly and without any serious error.

The personnel of the office consists of 1 disbursing clerk, 1 deputy disbursing clerk, 10 clerks, and 1 messenger, at a total annual salary cost of \(\$ 21,790\), or less than one-tenth of 1 per cent of the amount disbursed.

Table A.-Statement of the outstanding principal of the public debt, etc.-Continued.
LOAN OF JULY AND AUGUST, 1861.
The act of July 17, 1861 (12 Statutes, 259 ), authorized the issue of
\(\$ 250,000,000\) bonds, with interest at not exceeding 7 per centum per
annum, redeemable after twenty years. The act of August 5,1861
(12 Statutes, 316), authorized the issue of bonds, with interest at 6 per
centum per annum, payable after twenty jears from date, in ex-
change for \(7-30\) notes issued under the act of July 17, 1861.

\section*{LOAN OF JULY AND AUGUST, 1861.}

Continued at \(3 \frac{1}{4}\) per cent interest, and redeemable at the pleasure of the Government.
OLD DEMAND NOTES.

Acts of February 25,1862 (12 Statutes, 345); March 3, 1864 (13 Stastutes, 13); and Jamuary 28, 1865 (13 Statutes, 425).

LEGAL-TENDER NOTES.
The act of February 25, 1862 (12 Statutes, 345), authorized the issue of \(\$ 150,000,000\) United States notes, not bearing interest, payable to bearer at the Treasury of the United States, and of such denomimight deem expedient, \(\$ 50,000,000\) to be applied to the redemption of demand notes authorized by the act of July 17, 1861; these notes to be a legal tender in payment of all debts, public and private, within the United States, except duties on imports and interest on the public debt, and to be exchangeable for 6 per cent United States bonds. The act of July 11, 1862 (12 Statutcs, 532 ), authorized an additional issue of \(\$ 150,000,000\), of such denominations as the Secretary of the Treasury might deem expedient, but no such note \(\$ 35,000,000\) of a lower denomination than five dollars; these notes to be a legal tender as before authorized. The act of March 3, 1863 (12 Statutes, 710 ), authorized an additional issue of \(\$ 150,000,000\), of such denominations, not less than one dollar, as the secretary of the Treasury might prescribe; which notes were made a legal tender as before authorized. The same act limited the time in which the

Treasury notes might be exchanged for United States bonds to July* 1,1863 . The amount of notes authorized by this act were to be in lieu of \(\$ 100,000,000\) authorized by the resolution of January 17, 1863 that no more of the United States legal-tender notes shall be canceled or retired, and that when any of said notes are redeemed or received into the Treasury under any law, from any source whatever, and shall belong to the United States, they shall not be retired, canceled, or destroyed, butshall be reissued and paid out again, and kept in circulation.
The act of March 14, 1900, provides that United States notes, when presented to the Treasury for redemption, shall be redeemed in gold coin of the standard fixed in said act, and that in order to secure the prompt and certain redemption of such notes it shall be the reserve fund of one hundred and fifty million dollars in gold coin and bullion, to be used for such redemption purposes only, and that whenever and as often as any of said notes shall be redeemed from said fund it shall be the duty of the Secretary of the Treasury to use said notes so redeemed to restore and maintain the reserve fund so established-first, by exchanging the notes so redeemed for any gold coin in the general fund of the Treasury; second, by accepting deposits of gold coin at the Treasury or at any subtreasury in exchange for such notes; third, by procuring gold coin by the use of Revised Statutes of the United States. The above-mentioned act also provides that if the Secretary of the Treasury is unable to restore and maintain the gold coin in the reserve fund by the foregoing methods, and the amount of such gold coin and bullion in said fund shall at any time fall below one hundred million dollars, it shall be his duty to restore the same to the maximum sum of one hundred and fifty million dollars by borrowing money on the credit of the United States, and for the debt so incurred to issue and sell coupon or registered bonds of the United States bearing interest at the rate of not exceeding three per centum per annum, payable States after one year from the date of their issue, and to be payable, principal and interest, in gold coin of the present standard value, the gold coin received from the sale of said bonds to be exchanged for an equal amount of the notes redeemed and held for exchange, and the Secretary of the Treasury may, in his discretion, use said notes in exchange for gold, or to purchase or redeem any bonds of the United States, or for any other lawful purpose the public interests may require, except that they shall not be used to meet deficiencies in the current revenues
The act of March 4, 1907, section 2, provides that whenever and so long as the outstanding silver certificates of the denominations of of section, seven of an act entitled "An act to define and fix the standard of value, to maintain the parity of all forms of money issued or coined by the United States, to refund the public debt, and

paid, and this order followed until all tbe bonds are paid. Interest to cease three months after any call made by the Government to redeem.

\section*{TREASURY NOTES OF 1890.}

The act of July 14, 1890 (26 Statutes, 289), directs the Secretary of the Treasury to purchase, from tirue to time, silver bullion to the aggregate amount of four million five hundred thousand ounces, or so much thereof as may be offered, in each month, at the market price thereof, not exceeding one dollar for three hundred and seventy-one ment for such purchases of silver bullion Treasury notes of the United States, to be prepared by the Secretary of the Treasury, in such form and of such denominations, not less than one dollar nor more than one thousand dollars, as he may prescribe. That said notes shall be redeemable on demand, in coin, at the Treasury of the united states, or at the office of any assistant treasurer of the United States, and when so redeemed may be reissued; but no greater or less amount of such notes shall be outstanding at any time than the cost of the silver bullion and the standard silver dollars coined therefrom then held in the Treasury, purchased by such notes; and such Treasury vate, except where otherwise expressiy stipulated in the contract. and shall be receivable for customs, taxes, and all public dues, and when so received may be reissued; and such notes, when held by any national banking association, may be counted as a part of its lawful reserve. That upon demand of the holder of any of the Treasury notes provided for, the Secretary of the Treasury shall redeem the same in gold or silver coin, at his discretion, it being the established policy of the United States to maintain the two metals on a parity provided by law upon the present legal ratio, or such provided by law
Tuly 14,1890 , as direr 1893 ( 28 Stat., 4), repeals so much of the act of from time to time silver bullion to the aggregate amount of four million five hundred thousand ounces, or so much thereof as may be offered in each month, at the market price thereof, and to issue in payment for such purchases Treasury notes of the United States. The act of June 13,1898 ( 30 Stat., 467), directs that all of the silver bullion in the Treasury purchased in accordance with the provisions or the act of not less than one and one-half millions of dollars in each month and that said dollars, when so coined, shall be used and applied in
he manner and for the purposes named in said act. The act of March 14, 1900, provides that United States notes, and Treasury notes issued under the act of July 14, 1890, when presented to the standard fixed by said act, and requires that the Secretary of the Treasury shall set apart in the Treasury a reserve fund of one hundred and fifty million dollars to be used for such redemption pur poses only. It also provides that it shall be the duty of the Secretary of the Treasury, as fast as silver dollars are coined under the provisions of the acts of July 14, 1890, and June 13, 1898, from bullion purchased under the act of duly 14, 1890, to retire and cancel an y, and upon such cancellation to issue silver certificates against the silver dollars so coined.

\section*{PANAMA CANAL LOAN.}

The act of June 28, 1902 (32 Stat., 484, sec. 8), provides that the Secretary of the Treasury is hereby authorized to borrow on the credit of the United States from time to time as the proceeds may be required to defray expenditures authorized by this act (such proceeds when rehe sum of onehundred and thirty million dollars orsomuch thereo as may be necessary, and to prepare and issue therefor coupon or reg istered bonds of the United States in such form as he may prescribe, and in denominations of twenty dollarsorsome multiple of thatsum, redeemable in gold coin at the pleasure of the United States after ten fears from the date of their issue, and payable thirty years from such date, and bearing interest payable quarterly in gold coin at the rat of two per centum per annum; and the bonds herein authorized shall be exempt from all taxes or duties of the United States, as well as from Provided, That faid bonds or understate, municipal, or local authority: Treasury at not less than par, under such regulations as he may prescribe, giving to all citizens of the United States an equal opportunity to subscribe therefor, but no commissions shall be allowed or paid thereon; and a sum not exceeding one-tenth of one per centum o he amount of the bonds herein authorized is hereby appropriated out of any money in the Treasury not otherwise appropriated, to pay the expense of preparing, advertising, and issuing the same; and the act of December 21, 1905 (34 Stat., 5, sec. 1) provides that the two per cent bonds of the United States authorized by section eight of the act ng the "An of the Atlantic and Pacific Oceans," approved Jun wenty-eighth nineteen hundred and two shall have all the right and privileges accorded by law to other two per cent bonds of the United States, and every national banking association having on deposit, as provided by law, such bonds issued under the provisions of said section eight of said act approved June twenty-eighth, nineteen hundred and two, to secure its circulating notes, shall pay to the Treasurer of the United States, in the months of January and July, a tax of one-fourth of one per centeach half year upon the average amount of such of its notes in circulation as are based upon the

\section*{2 Postal savings bonds, \(2 \frac{1}{2}\) per cent.}

Note 1.-Annual interest charge is computed on amount of outstanding principal at close of fiscal year and is exclusive of interest charge on Pacific Railway bonds. NOTE 2.-The figures for July 1, 1879, were made up assuming pending funding operations to have been completed
Note 3.-The temporary loan per act of July 11, 1862, is included in the 4 percents from 1862 to 1868, inclusive, with the exception of the amount outstanding Aug. 31 , 1865 , this being the date at which the public debt reached its highest point. This loan bore interest from 4 per cent to 6 per cent, and was redeemable on 10 days notice al

Table D.-Statement of the issue and redemption of loans and Treasury notes and of deposits and redemptions in national-bank note account for the fiscal year ended June 30, 1916.

\section*{\({ }^{1}\) Estimated July 1.}

Note.-The ordinary receipts and disbursements and per capita on receipts for 1891 were erroneously stated by the Register of the Treasury in his reports for 1891, 1892, and 1893. (See Finance Reports for those years, pp. 845, 767, and 906.)

Table G.-Statement showing the ordinary receipts and disbursements of the Government by months; the legal-tender notes, net gold, and available cash in the Treasury at the end of each month; the monthly redemption of legal-tender notes in gold and the imports and exports of gold, from July, 1896, to June, 1916, inclusive.

Table G.-Statement showing the ordinary receipts and disbursements of the Government by months, etc.-Continued.

1 Includes deposits of \(\$ 17,641,634\), for principal of bonds, only \(\$ 2,035,700\) of which were actually issued in 1911 ; the balance was issued in the fiscal year 1912 .
2 Receipts from tolls, etc. (included in miscellanoous reeipts in 1915 ).
\({ }^{2}\) Receipts from tolls, etc. (included in miscellaneous reeeipts in 1915).
Note.-The disbursements are stated by warrants paid to June 30 , 1866, and by warrants issued since that date.
The disbursements for postal deficincies are grants by law from the Treasury, and differ from the fiscal gear expenditures thereof shown by reports of the Auditor for the Post Office Department.

Issues and redemptions of certificates and notes not affecting the cash in general fund are excluded from the public debt figures in this statement.
Under section 18 of the Federal reserve act of December 23, 1913, \(\$ 5,900,6003\) per cent conversion bonds and \(84,390,0003\) per cent one-year Treasury notes were issued in exchange for \(\$ 9,990,6002\) per cent consols of 1930 and \(\$ 300,0002\) per cent Panama Canal bonds without affecting the cash in the Treasury.

\end{tabular}

Note.-The internal revenue receipts are based on covering warrants issued therefor, and differ slightly from amounts reported to the Commissioner of Internal Revenue by collectors.

\section*{\({ }^{1}\) Based on warrants issued during the year.}
\({ }^{2}\) The cost of collecting the internal revenue embraces the following items: Salaries and expenses of the Internal-Revenue Service, including collectors, deputy collectors, clerks, etc., and including expenses incident to enforcing the provisions of law taxing oleomargarine; salaries and expenses of revenue agents, surveyors of distilleries, gaugers, storekeepers, and miscellaneous expenses; paper for internal-revenue stamps; expenses of detecting and punishing violations of internal-revenue laws; and expenses of collecting the corporation and income tax.
\({ }^{8}\) The expenses of collecting the revenue from customs includes all sums drawn from the appropriation made by Congress for that purpose. (See details, Table N.; The money is expended for salaries, rents, labor in weighing, gauging, and measuring imported merchandise, revenue boarmen, repairs, and other expenses incident to rented buildings, stationery, and the traveling expenses of special agents, but does not include disbursements for revenue cutters, fuel, lights, water, furniture, janitors, etc., for buildings owned by the Government, nor disbursements for erecting new buildings, all of which are paid for from specific appropriations made for those purposes.

The expenses of collecting internal and customs revenue do not include disbursements for salaries, etc., incident to auditing accounts in the office of Auditor for Treasury Department.
- No data.

Note 1.-Revised figures for June 30 of each year used in above table.
Note 2-Specie payments were suspended from January 1,1862, to
Note 2.-Specie payments were suspended from January 1, 1862, to January 1, 1879, during the greater part of which period gold and silver coins were not in circulation except on the Pacific coast, where, it is estiraated, the specie circulation was generally about \(\$ 25,000,000\). In 1876 subsidiary silver again came into use. The coinage of standard silver dollars was resumed in 1878 and again discontinued during the fiscal year 1905. First issue of Federal reserve notes in fiscal year 1915.

Note 3.-For redemption of outstanding certificates an exact equivalent in gold coin or bullion or standard silver dollars is held in the Treasury, and is not included in the account of money held as assets of the Treasury. During the fiscal year 1915 there is included with the Treasury assets the amount of money held by Federal reserve banks and Federal reserve agents against issues of Federal reserve notes.

Note 4.-In 1907 the Director of the Mint reduced his estimate of the stock of gold coin in the United States by \(\$ 135,000,000\), and in 1910 reduced his estimate of the stock of subsidiary silver coin in the United States by \(\$ 9,700,000\).

Table M.-Statement showing the aggregate receipts, expenses, average numbier of persons employed, and cost to collect internal revenue, fiscal year 1916.

\hline Deacit. & 37,019, 140.68 & & & \\
\hline
\end{tabular}

Note.-The receipts of tolls, etc., on Panama Canal account of \(\$ 4,130,215.15\) in 1915 and \(\$ 2,869,995.28\) in 1916 are not included in the above statement.

From the foregoing statement it will be observed that increased receipts are recorded from customs, internal revenue (ordinary), emergency revenue, corporation and individual income tax, and the District of Columbia, while there were decreased receipts from sales of public lands and miscellaneous sources; the net increase from all ordinary sources for the year was \(\$ 87,180,107.37\).

The total ordinary disbursements were \(\$ 724,492,998.90\), which by comparison with the previous year shows a net decrease in the total of civil and miscellaneous accounts, the Military Establishment, the Indian Service, pensions, and interest on the public debt, while the Naval Establishment spent more than during the preceding 12 months. The net result on ordinary disbursements was a decrease of \(\$ 5,610,592.90\) as compared with those of 1915 . The surplus on ordinary transactions for the year was \(\$ 55,171,553.59\).
The increasing activities of the Government, and the larger program of national defense and preparedness, will undoubtedly carry the expenditures upward by leaps and bounds, but the resources and wealth of the country are so great and increasing so rapidly that the needs of the Government to meet these growing expenditures can readily be met by wisely tapping new sources of income.

The total ordinary receipts and disbursements for the past 12 years may be studied in the annexed table:
\begin{tabular}{|c|c|c|c|c|c|}
\hline , & Fiscal year. & Receipts. & Disbursements. & Surplus. & Deficit. \\
\hline 1905 & & \$544, 606, 758.62 & \$563, 360, 093.62 & & \$18,753, 335.00 \\

\hline
\end{tabular}

THE PANAMA CANAL.
The receipts from the Panama Canal during the fiscal year 1916 were \(\$ 2,869,995.28\), while the expenses incurred amounted to \(\$ 17,503,-\) 728.07. The net excess of disbursements was \(\$ 14,633,732.79\), which was paid out of the general fund of the Treasury.

The amount expended on account of the canal and the proceeds from sales of bonds to the close of the fiscal year 1916 may be studied in the statement following:

Receipts and disbursements on account of the Panama Canal.
\begin{tabular}{|c|c|c|c|c|}

\end{tabular}

RECEIPTS AND DISBURSEMENTS ON ACCOUNT OF THE POST OFFICE DEPARTMENT.

The Postmaster General has exclusive control of the receipts and disbursements of the Post Office Department. During the fiscal year 1916, the postal receipts were \(\$ 382,035,506.26\), and the disbursements \(\$ 369,763,320.17\); of the receipts stated, \(\$ 220,046,279.83\) were received and disbursed directly by postmasters without being deposited in the Treasury. Such disbursements are authorized by existing law and are accounted for under the provisions of section 406 of the Revised Statutes of the United States. All Post Office Department warrants are issued by the Postmaster General on the Treasurer of the United States, and under department regulations they are also payable by any assistant treasurer, Federal reserve bank, or regular national-bank depositary of the United States.

A statement of the transactions relating to the account for the service of the Post Office Department with the Treasury during the fiscal year 1916 is set forth on page 298 of this report.

\section*{TRANSACTIONS IN THE PUBLIC DEBT.}

Under the provisions of the act of June 25, 1910, deposits for postal savings bonds were received during the fiscal year 1916 to the amount of \(\$ 1,803,500\). Deposits of lawful money of the United States to retire national-bank notes, under the provisions of the act of July 14,1890 , were received amounting to \(\$ 56,648,902.50\), which, with the deposits for postal savings bonds, makes a total of \(\$ 58,452,402.50\) in actual cash received on account of the public debt proper, while the cash disbursements for the principal of matured loans and fractional currency were \(\$ 35,903\), and for national-bank notes canceled and retired \(\$ 24,633,010.50\), a total disbursement for the public debt of
\(\$ 24,668,913.50\). The net result was an excess of receipts of \$33,783,489.

A comparison by items for the past two fiscal years is made in the annexed table:

Receipts and disbursements on account of the public debt for 1915 and 1916.
\begin{tabular}{|c|c|c|c|c|}
\hline Account. & 1915. & 1916. & Increase. & Decreasc. \\
\hline RECEIPTS. & & & & \\

\begin{array}{r}
\$ 933,540.00 \\
21,553,415.00
\end{array}
\] & \[
\begin{aligned}
& \$ 1,803,500.00 \\
& 56,648,902.50
\end{aligned}
\] & \[
\begin{array}{r}
-\$ 869,960.00 \\
35,095,487.50
\end{array}
\] & \\
\hline Total & 22, 486, 955.00 & 58,452, 402. 50 & 35, 965, 447. 50 & \\
\hline United States bonds retired & & \(34,160.00\) & & \$11,140.00 \\
\hline Fractional currency retired. & 2,233.00 & 1,743. 00 & & 490.00 \\
\hline National-bank notes retired & 17, 205, 958.00 & 24, 633, 010.50 & 7, 427, 052. 50 & \\
\hline Total. & 17,253, 491. 00 & 24, 668, 913. 50 & 7, 415, 422.50 & \\
\hline Excess of receipts. & 5, 233, 164.00 & 33, 783, 489.00 & & \\
\hline
\end{tabular}

In addition to the foregoing other transactions in the public debt were made under the provisions of section 18 of the act of December 23, 1913, which authorizes exchanges for United States 2 per cent gold bonds bearing the circulation privilege, but against which no circulation is outstanding, 1 -year gold notes of the United States, bearing interest at the rate of 3 per cent per annum, and 30 -year 3 per cent United States gold bonds. There were received for exchange bonds as follows:
\begin{tabular}{|c|c|}
\hline Consols of 1930 & \$9, 990, 600 \\
\hline Panama Canal bonds (1916-1936) & 175, 000 \\
\hline Panama Canal bonds (1918-1938) & 125, 000 \\
\hline
\end{tabular}
\(10,290,600\)
For which there were issued in exchange at par bonds as follows:
\begin{tabular}{|c|c|}
\hline Conversion bonds. & \$5,900, 600 \\
\hline 1-year Treasury notes. & 4, 390, 000 \\
\hline & 10, 290, 600 \\
\hline
\end{tabular}

\section*{UNITED STATES PAPER CURRENCY ISSUED AND REDEEMED.}

In previous years the transactions relating to the paper currency issued under the direct authority of the Government have been included in the account of the public debt; but since there is no increase or decrease of available cash involyed in the process of issue and redemption, it has been deemed advisable to set out separately such transactions.

The amount of each kind issued and redeemed during the fiscal year 1916 is stated in the table following.
\begin{tabular}{|c|c|c|c|c|c|}
\hline \multirow[t]{2}{*}{, -} & \multirow[b]{2}{*}{United States notes.} & \multicolumn{3}{|c|}{Trust-fund obligations.} & \multirow[b]{2}{*}{Total.} \\
\hline & & Treasury notes of 1890. & Gold certificates. & Silver certificates. & \\
\hline \multirow[t]{2}{*}{Outstanding June 30, \(1915 \ldots . . . . . . .\).
Issued during fiscal year \(1916 . . . .\).} & \$346,681,016 & \$2, 254,000 & \$1, 218,182,769 & \$493, 459,000 & \$2,060,576, 785 \\
\hline & 170,000,000 & & 899, 000,000 & 441, 444,000 & 1,510, 444, 000 \\
\hline \multirow[b]{2}{*}{Redeemed during fiscal year 1916....} & 516,681,016 & 2,254,000 & 2,117, 182,769 & 934, 903,000 & 3,571,020,785 \\
\hline & 170,000,000 & 151,000 & 387, 617, 100 & 435,452,000 & 993, 220,100 \\
\hline \multirow[t]{2}{*}{Outstanding June 30, 1916. . . . . . . . . . . Less amount held in Treasury} & 346,681,016 & 2, 103,000 & 1,729, 565,669 & 499, 451, 000 & 2,577, 800,685 \\
\hline & 4,961, 469 & 4,835 & 164, 165, 380 & 9,540,063 & 178,671,747 \\
\hline Net amount in circulation & 341,719,547. & 2,098, 165 & 1,565, 400, 289 & 489,910,937 & 2,399, 128,938 \\
\hline
\end{tabular}

In a study of the foregoing table it will be observed that the United States notes issued and credited in the general account as a receipt are offset by an equal amount of worn or unfit notes in kind withdrawn therefrom, canceled, and retired, which is in accordance with the provisions of the act of May 31, 1878. In explanation of the manner of issuing and redeeming gold certificates, silver certificates, and Treasury notes of 1890 , it may be said that for certificates issued and credited in the general account an equal amount of the respective kinds of money held in the general account is transferred therefrom to, and retained in the trust funds for their redemption; for gold certificates, silver certificates, and Treasury notes withdrawn from the general fund, canceled, and retired, a like amount of the respective coins is released from the trust funds and brought into the general fund in their stead.

\section*{THE PUBLIC DEBT, 1915. AND 1916.}

At the close of the fiscal year 1916 the principal of the interestbearing debt was \(\$ 971,562,590\), an increase of \(\$ 1,803,500\).

The debt bearing no interest amounted to \(\$ 406,562,003.16\), an increase of \(\$ 32,079,989\), caused principally by the deposit of lawful money of the United States for retirement of national-bank notes (act of July 14, 1890) in excess of disbursement for such notes.
The public debt, by items, for the fiscal years 1915 and 1916 is compared in the statement following:
\begin{tabular}{|c|c|c|c|c|}
\hline Title of loan. & Rate. & When payable. & Outstanding June 30; 1915. & Outstanding June 30, 1916. \\
\hline Interest-bearing debt: & Percent. & & & \\

\hline
\end{tabular}
\begin{tabular}{|c|c|c|c|c|}
\hline Title of loan. & Rate. & When payable. & Outstanding June 30, 1915. & Outstanding June 30, 1916. \\
\hline Debt bearing no interest: & Percent. & & & \\
\hline Matured loans..... & & On demand. & 81,507, 260.26 & \$1, 473, 100.26 \\
\hline United States notes & & . . . . do & 346, 681, 016.00 & 346, 681, 5316.00 \\
\hline National-bank notes. & & do & 19,390, 345.50 & 51, 506, 237.50 \\
\hline Fractional currency & & do & 6,850,239.90 & 6, 848, 496.90 \\
\hline Total. & & & 374, 482, 014.16 & 406,562,003.16 \\
\hline Aggregate. & & & 1, 344,241, 104.16 & , 378, 124, 593..16 \\
\hline
\end{tabular}

Note.-It will be observed that two new classes of obligations, "Conversion bonds" and "1-year Treasury notes" were added during the fiscal year, and arnounts therein appear as outstanding June 30, 1916. These obligations were authorized by the Federal reserve act, and the growth thereof is offset by a decrease in other classes, viz, consols of 1930, and Panama Canal loan ( 2 per cent).

\section*{PAYMENT OF INTEREST ON THE REGISTERED BONDS OF THE UNITED STATES.}

The interest on registered bonds of the United States is paid by checks prepared and mailed from the office of the Secretary of the Treasury. Such checks bear a certificate as to the principal of bonds registered in the name of the payee, over the facsimile signature of the Chief of the Division of Loans and Currency; they also bear the facsimile signature of the Secretary of the Treasury, and are countersigned by a clerk in his office. These checks are drawn on the Treasurer of the United States, but are payable by any assistant treasurer, Federal reserve bank, or regular national bank depositary of the United States, and the amount so disbursed is included in the requisition for reimbursement made by the Treasurer at the end of each month. The paid checks are sent to the Register of the Treasury for an administrative examination, who in turn forwards them to the Auditor for the Treasury Department. There were 134,566 checks drawn during the fiscal year 1916, amounting to \(\$ 21,391,802,69\).

\section*{THE RESERVE FUND.}

The redemptions from the reserve fund during the fiscal year 1916, were, in United States notes, \(\$ 70,684,405\), and in Treasury notes of \(1890 \$ 2,000\), making a total of \(\$ 70,686,405\). The transactions were more in the nature of exchanges than a desire of the holders of these notes for gold. The redeemed notes were, under the provisions of the act of March 14, 1900, immediately exchanged for gold, and thereby the reserve was maintained in volume and character.

STATEMENT OF THE TREASURY OF THE UNITED STATES.
The Treasury holdings of moneys at the close of the fiscal year 1916 amounted to \(\$ 2,543,269,887.72\), and from the revised figures of the several funds it was set apart as follows:

Gold coin and bullion
\(\$ 152,979,025.63\)

\hline
\end{tabular}

The items composing the general fund are subdivided; the first part shows the amount of each kind of available cash actually held in the vaults of Treasury offices, after setting out from the assets the appropriate kinds of money to meet the requirements of the reserve and trust funds, followed by the amounts of public moneys in Federal reserve banks, national banks, and other depositaries to the credit of the Treasurer of the United States and of disbursing officers; the second part shows the current demands against the same, and finally the net balance in the general fund.

The assets in the general fund in the Treasury on June 30, 1916, and the demand liabilities outstanding on that date, were as follows:
\begin{tabular}{|c|c|}
\hline In Treasury offices: & \\
\hline Gold coin. & \$85, 114, 618. 20 \\
\hline Standard silver dollars & \(9,846,285.00\) \\
\hline United States notes & 4, 961, 469.00 \\
\hline Federal reserve notes. & 3, 067, 665.00 \\
\hline Federal reserve bank note & 38,005.00 \\
\hline National-bank notes. & 2,712,909.00 \\
\hline Certified checks on banks & 11, 715.85 \\
\hline Subsidiary silver coin & 17, 440, 436. 84 \\
\hline Minor coin. & 905, 003. 86 \\
\hline Silver bullion (at cost) & 6, 050, 811. 53 \\
\hline Unclassified (unassorted currency, etc.) & 385, 260. 69 \\
\hline In Federal reserve banks & \[
\begin{aligned}
& \$ 130,534,179.97 \\

\hline
\end{tabular}

\section*{AVAILABLE CASH BALANCE.}

The available cash balance in the general fund subject to warrant at the close of the fiscal year 1916 was \(\$ 178,491,415.58\), an increase of \(\$ 74,321,309.80\), as compared with that of 12 months earlier. This increase is verified by the net results in all accounts of receipts and disbursements shown on previous pages of this report, which are brought together here:
Available cash balance June 30, 1915
\(\$ 104,170,105.78\)
Add:
Excess of ordinary receipts over disbursements
for 1916 (see p. 262)
\(\$ 55,171,553.59\)
Excess of public debt receipts over disbursements for 1916 (see p. 264)
\(33,783,489.00\)

The balance in the Treasury at the end of each month from January, 1910, is stated in Table No. 19, page 324 of the appendix, and for July 1 in each year since 1906 in the following statement:

Available cash balance (including the reserve fund) on the dates named.

GOLD IN THE TREASURY.
There has been a great influx of gold into the country during the fiscal year 1916, and as a result the Treasury holdings of the precious metal at the close of the year amounted to \(\$ 1,803,493,932.83\), an increase of \(\$ 420,533,943.65\) as compared with that of 1915. The imports of gold during the fiscal year were \(\$ 494,009,301\), the exports \(\$ 90,249,548\), and the excess of imports \(\$ 403,759,753\).

The total amount of gold in the Treasury on July 1 in each year from 1906, set apart for the respective uses, is set forth in the statement following:

Gold in the Treasury.
\begin{tabular}{|c|c|c|c|c|}
\hline Dates. & Reserve. & For certificates in circulation. & General fund (belonging to Treasury). & Total. \\
\hline July 1, 1906. & \$150, 000, 000.00 & \$516, \(561,849.00\) & \$140, 489, 841.30 & \$807, 051, 690.30 \\
\hline July 1, 1907. & 150,000, 000.00 & 600, 072, 299.00 & 154, 619, 431. 14 & 904, 691, 730. 14 \\
\hline July 1, 1908. & 150,000,000. 00 & 782, 976, 619.00 & 71, 912, 063. 18 & 1, 004, 888, 682.18 \\

\hline July 1, 1915 & 152, 977, 036. 63 & 1,135, 213, 619.00 & 94, 769, 333.55 & 1,382, 959, 989. 18 \\
\hline July 1, 1916. & 152, 979, 025.63 & 1,565, 400, 289.00 & \(85,114,618.20\) & 1, 803, 493, 932. 83 \\
\hline
\end{tabular}

BONDS FELD AS SECURITY FOR NATIONAL BANKS.
At the close of the fiscal year 1916 the Treasury held in trust United States bonds to the amount of \(\$ 690,440,930\) as security for the circulating notes of national banks, a decrease of \(\$ 45,583,260\) as compared with that of 12 months earlier. The securities pledged for the safe-keeping of public deposits in the depositary banks amounted to \(\$ 42,674,350\).

The kinds of bonds in the custody of the Treasurer of the United States and the changes therein during the fiscal year 1916 are recorded in the annexed table:
Bonds held for national banks, close of June, 1915 and 1916, and changes during 1916.

1 Various.

\section*{BONDS HELD AS SECURITY FOR POSTAL SAVINGS FUNDS.}

The Treasurer of the United States, under the provisions of the act of June 25, 1910, held in trust at the close of the fiscal year 1916 bonds and securities amounting to \(\$ 111,399,577.40\) as security for postal savings funds deposited in 5,634 designated depositaries.

The kinds of securities held and the changes therein during the year may be studied in the table following:
Bonds held as security for postal savings funds, close of June, 1915 and 1916, and changes during 1916.

\footnotetext{
1 Various.
}

The board of trustees of the Postal Savings System will accept as security for postal savings deposits, at the respective values herein fixed, negotiable interest-bearing bonds or securities of the following classes, viz:
(a) Bonds of the United States, of the Philippine Islands, of the District of Columbia, and of Porto Rico, will be accepted at their par value.
(b) Bonds of any State of the United States and of the Territory of Hawaii will be accepted at their market value; but if such market value is above par they will be accepted at their par value.
(c) Bonds of any city in the United States having a population of over 30,000 , as shown by the latest annual report of the Bureau of Census, entitled "Official Statistics of Cities having a Population of over Thirty Thousand," which has been in existence for a period of 10 years, which for a period of 10 years previously has not defaulted in the payment of any part of either principal or interest of any funded debt authorized to be contracted by it, and whose net funded indebtedness does not exceed 10 per cent of the valuation of its taxable property, to be ascertained by the last preceding valuation for the assessment of taxes, will be accepted at 90 per cent of their market value, but if such market value is above par, they will be accepted at 90 per cent of their par value.
(d) Bonds of any other city, town, county, or other legally constituted municipality or district in the United States, which has been in existence for a period of 10 years, which for a period of 10 years previously has not defaulted in the payment of any part of either principal or interest of any funded debt authorized to be contracted by it, and whose net funded indebtedness does not exceed 10 per cent of the valuation of its taxable property, to be ascertained by the last preceding valuation for the assessment of taxes, will be accepted at 75 per cent of their market value, but if such market value is above par, they will be accepted at 75 per cent of their par value.

Bónds of the several classes described in paragraphs (b), (c), and (d), to be acceptable as security, shall be the general obligations of the States, Territories, counties, cities, towns, or other political divisions by or in behalf of which they are issued, and payable, either directly or ultimately, without limitation to a special fund, from the proceeds of taxes levied upon all the taxable real and personal property within the territorial limits of such political divisions.

The term "net funded indebtedness," for the purposes of paragraphs (c) and (d), is hereby defined to be the difference between the legal gross indebtedness of a city, town, county, or other municipality (including the amount of any school district or other bonds which depend for their redemption upon taxes levied upon property within the municipality) and the aggregate of the following items:
(1) The total of all sinking funds accumulated for the redemption of such gross indebtedness, except sinking funds applicable to bonds hereafter described in this section.
(2) The amount of outstanding bonds or other debt obligations made payable from current revenues.
(3) The amount of outstanding bonds issued for the purpose of providing the inhabitants of a municipality with public utilities, including the supplying of water or the construction of subways and
tunnels for railways: Provided, That evidence is submitted showing that the income from such utilities is sufficient for maintenance, for payment of interest on such bonds, and for the accumulation of a sinking fund for their redemption.
(4) The amount of outstanding improvement bonds, issued under laws which provide for the levying of special assessments against abutting property in sufficient amounts to insure the payment of interest on the bonds and the redemption thereof: Provided, That such bonds are direct obligations of the municipality and included in the gross indebtedness of the municipality.

Obligations of the general class embracing what are commonly, known as "revenue bonds," "temporary bonds," " temporary notes,", "certificates of indebtedness," "warrants," and the like obligations, whether issued in anticipation of the collection of taxes, assessments, or other revenues, or of the sale of bonds or other obligations, or for similar purposes, will not be accepted as security for postal savings deposits: Provided, That, in applying this regulation, consideration will be given to the legal status of the obligations submitted rather than to the nomenclature employed in designating such obligations.

Bonds which in all other respects are found to be legally acceptable as security under the postal savings act and these regulations will be construed, as a matter of law, to conform to those provisious of section 8, paragraphs (c) and (d), respectively, which relate to term of existence and nondefault, under the following conditions:
(1) Bonds issued by or in behalf of any city, town, county, or other legally constituted municipality or district in the United States which was, subsequently to the issuance of such bonds, consolidated with, or merged into, an existing political division which meets the requirements of these regulations, will be deemed to be the bonds of such political division: Provided, That such bonds were assumed by such political division under statutes and appropriate proceedings the effect of which is to make such bonds general obligations of such assuming political division, and payable, either directly or ultimately, without limitation to a special fund, from the proceeds of taxes levied upon all the taxable real and personal property within its territorial limits.
(2) Bonds issued by or in behalf of any city, town, county, or other legally constituted municipality or district in the United States which was, subsequently to the issuance of such bonds, wholly succeeded by a newly organized political division, whose term of existence, added to that of such original political division, or of any other political division so succeeded, is equal to a period of 10 years, will be deemed to be bonds of such succeeding political division: Provided, That during such period none of such political divisions shall have defaulted in the payment of any part of either principal or interest of any funded debt authorized to be contracted by it: And provided further, That such bonds were assumed by such new political division under statutes and appropriate proceedings the effect of which is to make such bonds general obligations of such assuming political division, and payable, either directly or ultimately without limitation to a special fund, from the proceeds of taxes levied upon all the taxable real and personal property within its territorial limits.
(3) Bonds issued by or in behaff of any city, town, county, or other legally constituted municipality or district in the United States which, prior to such issuance, became the successor of one or more, or was
formed by the consolidation or merger of two or more, preexisting political divisions, the term of existence of one or more of which, added to that of such succeeding or consolidated political division, is equal to a period of 10 years, will be deemed to be bonds of a political division which has been in existence for a period of 10 years: Provided, That during such period, none of such original, succeeding, or consolidated political divisions shall have defaulted in the payment of any part of either principal or interest of any funded debt authorized to be contracted by it.

The board of trustees reserves the right to reclassify the securities acceptable for deposits and to change the valuation at which they will be accepted. Under no circumstances will securities of other classes than those above named be accepted.

\section*{POSTAL-SAVINGS BONDS AND INVESTMENTS THEREIN.}

The trustees of the Postal-Savings System, under a general authority in the postal-savings law, have arranged to take over at par any of the postal-savings bonds that depositors may wish to turn back.

The first investment in these bonds was made on December 9, 1911, when they were quoted in the open market at \(92 \frac{1}{2}\) cents on the dollar. Under the arrangement made by the trustees they have taken over at par all of the bonds offered by the depositors, and at the close of the fiscal year 1916 the Treasurer of the United States held \(\$ 1,558,500\) of such bonds, which are registered in the name of the board of trustees.

\section*{WITHDRAWAL OF BONDS TO SECURE CIRCULATION.}

Under the provisions of the act of March 4, 1907, the deposits of lawful money of the United States to retire national-bank notes is limited to \(\$ 9,000,000\) per month, but this limitation is not applicable to the additional circulation issued under the act of May 30, 1908.

During the fiscal year 1916 the Federal reserve banks purchased large amounts of the United States bonds pledged to secure the circulation of national banks, thus necessitating unusual deposits of lawful money for the retirement of such circulation. The deposits on the several accounts during the past year may be observed in the statement following:

\footnotetext{
Money deposited in the Treasury each month of the fiscal year 1916 for the redemption of notes of national banks failed, in liquidation, and reducing circulation; also the amount of national-bank notes outstanding.

\end{tabular}

NATIONAL BANKS DESIGNATED AS DEPOSITARIES OF THE UNITED STATES.

The Secretary of the Treasury determines the number of such depositaries and the amount of public money required in each for the transaction of the public business, fixes the amount of balances they may hold, and requires the banks thus designated to give satisfactory security, by the deposit of United States bonds and otherwise, for the safe-keeping and prompt payment of the public money deposited with them, and for the faithful performance of their duties as financial agents of the Government. The regular depositaries receive and disburse the public moneys, while the special depositaries hold only the moneys transferred to them from the Treasury. All of the national-bank depositaries are required to pay interest at the rate of 2 per cent per annum on the average monthly amount of public deposits held.

The number of national-bank depositaries at the close of the fiscal years 1915 and 1916 are here stated:
\begin{tabular}{|c|c|c|c|}
\hline & Regular. & Special. & Total. \\
\hline Depositaries Jume 30, 1915. & 848 & 643 & 1,491 \\
\hline Depositaries June 30, 1916. & 761 & 608 & 1,369 \\
\hline
\end{tabular}

The above statement does not include the 12 Federal reserve banks which were designated as depositaries of public moneys during the past year.

\section*{PUBLIC DEPOSITS IN NATIONAL BANKS.}

The balance of public moneys in depositary banks at the close of the fiscal year 1915, from revised returns, to the credit of the general fund was \(\$ 53,454,547.87\) and to the credit of postmasters and judicial officers \(\$ 6,484,611.32\), making a total of \(\$ 59,939,159.19\).

During the months of July and August the balance in depositary banks gradually declined and by the close of the latter month the balance to the credit of the general fund was \(\$ 43,180,813.45\).

The British Government and its allies in August, 1915, placed cotton on the contraband list, which gave ground for serious apprehension as to the cotton situation in the South. In order to allay the anxiety that was produced by such conditions it was imperative that the people of the cotton-growing States should have immediate assurance that sufficient funds would be available to enable them not only to harvest their crops but to carry them for a reasonable length of time, so that they could be marketed in a gradual and orderly manner. The support of the Government alone would give confidence, and following out the policy established by the department in the fall of 1913 and 1914 of making Government deposits in banks in the great crop-producing States of the West, Northwest, and South, for the purpose of facilitating the movement and marketing of the crops, the Secretary of the Treasury announced on August 23, 1915, that he would, if necessary, deposit \(\$ 30,000,000\) in gold in the Federal reserve banks at Atlanta, Dallas, and Richmond in order that these banks might have increased resources to rediscount loans
made by national banks or member banks on cotton secured by warehouse receipts. This action contributed to the immediate restoration of confidence, and prevented demoralization in market conditions. Deposits of \(\$ 5,000,000\) each were made in the Federal reserve banks at Atlanta, Dallas, and Richmond on September 8, and it was not found necessary to make further deposits for the purpose.

At the close of September the balance.in depositary banks, including the Federal reserve banks, to the credit of the general fund was \(\$ 55,639,471.01\), and to the credit of postmasters, judicial officers, etc., \(\$ 5,289,728.69\); making a total of \(\$ 60,929,199.70\).

During the months of October, November, and December there were but slight changes in the amount of public moneys held in banks. On November 24 the Secretary of the Treasury designated all of the Federal reserve banks as depositaries and fiscal agents of the United'States, effective on and after January 1, 1916, and directed that the amounts held by the national-bank depositaries in the Federal reserve cities at the close of business December 31, 1915, to the credit of the Treasurer of the United States should be transferred to the Federal reserve banks in those cities. The transfers were promptly made and the national-bank depositaries in such cities were discontinued except as to those depositaries holding post-office and court funds.

At the close of January, 1916, the public deposits in banks were as follows:
\begin{tabular}{|c|c|c|}
\hline Depositaries. & To credit of general fund. & To credit of postmasters and courts. \\
\hline Federal reserve banks. & \$27, 159, 666.32 & \\
\hline National banks . & 31, \(589,857.81\) & \$5, 287, 457.68 \\
\hline
\end{tabular}

At the close of April the balance to the credit of the general fund in the Federal reserve banks had grown to \(\$ 39,609,850.39\); the amount to like credit in national banks was \(\$ 32,561,365.37\) and to the credit of postmasters and judicial officers \(\$ 5,503,763.72\), making a total in the depositaries of \(\$ 77,674,979.48\).

To offset the drain upon the money in circulation in the District of Columbia due to the collection of taxes in the month of May and the deposit of the money in the Treasury of the United States, the Secretary of the Treasury on May 9 directed that the public deposits in the national banks of the District of Columbia be increased, as in previous years, by \(\$ 3,139,000\), the transfers to be made in four installments, as follows: Twenty-five per cent May 15, and a like amount May 25, June 5, and 15, 1916, and to be divided among the several banks in proportion to the total deposits therein, and to be secured by bonds deposited with the Treasurer of the United States. Of the amounts so placed, the depositary banks were required to return to the Treasury 20 per cent on or before July 15, 1916, 20 per cent on or before August 15, 1916, 10 per cent on or befors September 15, 1916, and a like sum on or before the 15th of each succeeding month, making the final payment on or before February 15, 1917. The department reserved the right to demand an earlier
return of the money deposited if for any reason it should be deemed advisable. Interest at the rate of 2 per cent per annum is required on this deposit.

At the close of May the balance in the Federal reserve banks to the credit of the general fund was \(\$ 46,626,431.57\); the amount to like credit in national banks was \(\$ 33,708,169.84\); and to credit of postmasters and judicial officers, \(\$ 5,515,501.62\), making a total in the depositaries of \(\$ 85,850,103.03\).

The greater part of the corporation income tax and individual income tax is paid in June (the last month of the fiscal year); therefore the income and outgo of public moneys through the depositaries is greater in this month than in other months of the year. The collectors of internal revenue received payments of these taxes until a late hour on the last day of the fiscal year, and as a result the collections were deposited in banks, in many instances after banking hours, and transfers thereof to Treasury offices could not be effected until the succeeding business day. At the close of the month of June, 1916, the Federal reserve banks held to the credit of the general fund \(\$ 113,480,576\); the amount to like credit in national banks was \(\$ 32,255,429.17\), and to credit of postmasters and judicial officers \(\$ 7,264,772.63\), making a total in the depositaries of \(\$ 153,000,777.80\).

\section*{GENERAL ACCOUNT OF TEE TREASURER OF THE UNITED STATES.}

The Treasurer receives and keeps the moneys of the United States and disburses the same upon warrants drawn by the Secretary of the Treasury, countersigned by the Comptroller of the Treasury, and not otherwise. He takes receipts for all moneys paid by him and gives receipts for all moneys received by him; and all receipts for moneys received by him are indorsed upon warrants signed by the Secretary of the Treasury, without which warrant, so signed, no acknowledgment for money received into the Public Treasury is valid. He renders his accounts quarterly, or oftener if required, and at all times submits to the Secretary of the Treasury and the Comptroller of the Treasury, or either of them, the inspection of the moneys in his hands.

As a matter of information, it may be said that all public moneys paid into any subtreasury office, national-bank depositary, or other depositary, are placed to the credit of the Treasurer of the United States and held subject to his draft. The public moneys in the hands of any depositary of public moneys may be transferred to the Treasury of the United States or may be transferred from one depositary to any other depositary, as the safety of the public moneys and the convenience of the public service shall require.

The public moneys in any subtreasury, mint, or other depositary are subject to special examination and count whenever it is deemed advisable by the Secretary of the Treasury. Such examinations of 'the moneys in the subtreasuries are frequently made by committees representing the Secretary and the Treasurer. Annual examinations of the public moneys in mints are made by committees selected by the Director of the Mint, but as these moneys are a part of the general account it is suggested that the Treasurer of the United States should have a representative on all such committees.

\section*{FEDERAL RESERVE BANKS.}

The Secretary of the Treasury on November 24, 1916, designated the Federal reserve banks as depositaries and fiscal agents of the United States under section 15 of the Federal reserve act, effective on and after January 1, 1916, and until revoked. The deposits of all officers of the Government in Federal reserve cities, including Brooklyn and St. Paul, have since that date been made with the Federal reserve banks, with the exception of post-office funds and the deposits to the credit of United States courts and their officers. The Federal reserve banks have cashed Government warrants and checks drawn on the Treasurer of the United States in the same manner as nationalbank depositaries.

The amounts held by the national-bank depositaries in the Federal reserve cities at the close of business December 31, 1915, to the credit of the Treasurer of the United States were transferred to the Federal reserve banks in those cities, and the national-bank depositaries were discontinued except as to such depositaries holding post-office and court funds.

Section 16 of the Federal reserve act authorized the Federal Reserve Board, in its discretion, to exercise the functions of a clearing house for the Federal reserve banks. In the exercise of this authority said board on May 8, 1915, devised and announced a plan for the establishment and maintenance of a gold fund for the settlement of balances arising out of transactions among the 12 Federal reserve banks, to be operated under the direction of the Federal Reserve Board with the cooperation of the Treasury Department. Each Federal reserve bank was required to deposit not later than May 24, 1915, with the Treasurer or the nearest subtreasury, for credit to the account of the gold settlement fund, \(\$ 1,000,000\) in gold, gold certificates, or gold order certificates, which the Treasurer transferred through the medium of the general account to Washington, and in payment thereof issued gold certificates, series of 1900 , drawn to the order of the Federal Reserve Board.

The total transactions in the gold settlement fund to June 30, 1916, were as follows:
\begin{tabular}{|c|c|c|}
\hline & Deposited. & Withdrawn. \\
\hline From May 20, 1915, to June 30, 1915. & \$31,840,000 & \\
\hline From July 1, 1915, to Dec. 31, 1915. & 128,360,000 & \$25,580,000 \\
\hline From Jan. 1, 1916, to June 30, 1916. & 96,610,000 & 75, 720,000 \\
\hline Total. & 256,810,000 & 101, 300,000 \\
\hline
\end{tabular}

If the Treasury finds it necessary to ship funds from one point to another to make payment on account of the said gold settlement fund the Federal Reserve Board will refund any expenses incurred in making such shipments.

\section*{MONETARY STOCK.}

The net increase in the monetary stock of the country during the fiscal year 1916 was \(\$ 493,402,947\). The growth in gold was \(\$ 464,167,033\); in silver, \(\$ 3,426,897\); in Federal reserve notes, \(\$ 91,907,950\); and in Federal reserve bank notes (a new kind of money issued during the year), \(\$ 9,000,000\), while the national-bank notes decreased \(\$ 75,098,933\).

The amount of each kind of money included in the general stock is given in the statement following (this statement represents the monetary stock of the United States as shown by the revised statements for June 30, 1915 and 1916):
\begin{tabular}{|c|c|c|c|}
\hline Kinds. & In Treasury, mints, and Federalreserve banks. & In circulation. & Total stock. \\

\hline July 1, 1915. & 3,989, 456, 186 & 1,985, 539, 172 & 49.76 \\
\hline July 1, 1916. & \(4,482,859,133\) & 2, 449, 706, 205 & 54. 64 \\
\hline
\end{tabular}

\section*{MONEY IN CIRCULATION.}

1
The money in circulation at the close of the fiscal year 1916 amounted to \(\$ 4,024,097,762\), an increase of \(\$ 454,878,188\) as compared with that of 12 months earlier. The growth in the element of gold (coin and certificates) was remarkable, being \(\$ 388,091,123\).

The kinds of money in circulation, the circulation per capita, and the percentage of gold coin and certificates to the total circulation may be studied from the following table:

Money in circulation at the end of each fiscal year from 1906.
\begin{tabular}{|c|c|c|c|c|c|c|c|}
\hline \multirow[b]{2}{*}{Fiscal years.} & \multicolumn{5}{|c|}{Money in circulation.} & \multirow[b]{2}{*}{Circulation per capita.} & \multirow[b]{2}{*}{Percentage of gold coin and certificates to total circulation.} \\

\hline
\end{tabular}
\({ }^{1}\) Including Federal reserve bank notes.

\section*{CIRCULATION AND POPULATION.}

Statistics relative to the money in circulation and the population, by years, may be studied in the annexed table:

Increase in population and in circulation per capita.

CONDITION OF THE UNITED STATES PAPER CURRENCY.
At the close of the fiscal year 1916 the stock of paper currency in the United States amounted to \(\$ 3,507,033,795\), of which the Government issued directly \(\$ 2,577,690,685\), and the banks \(\$ 929,343,110\). The smaller denominations of \(\$ 1, \$ 2\), and \(\$ 5\) are in great demand, and the total amount of such denominations outstanding June 30, 1916, was \(\$ 873,470,473\), of which the Government issued \(\$ 699,056,192\) and the banks \(\$ 174,414,281\). National banks are precluded from issuing \(\$ 1\) and \(\$ 2\) notes, and the issue of \(\$ 5\) notes is limited to one-third in amount of the total circulation of such banks. The Federal reserve banks issue denominations of \(\$ 5\) and above to \(\$ 100\); therefore it can be readily seen that the burden of supplying the greater part of the smaller denominations required must be borne by the Government.

National-bank notes are not available for reserves, and for this reason large amounts of such circulation are returned to the Treasury by the banks for redemption in order to replenish their reserves. The expense of transportation of the unfit notes to the Treasury in such cases is borne by the bank of issue, while the return of the proceeds is at the expense of the owner of the notes. The owners of Government paper currency sent to the Treasury for redemption have to pay the transportation charges both ways. Heretofore the payment of these charges under contract rates gave rise to a burden that did not bear equally upon the banks and other business interests in the different sections of the country, but a change was made in the manner of making shipments from the Treasury, effective August 16, 1915, and now all shipments are made by mail instead of by express; the shipments are registered and insured. The new plan is proving economical not only to the Government but also to the banks on practically all shipments.

\section*{UNITED STATES NOTES.}

The United States notes are the well-known "greenbacks" or "legal tenders," the first issue of which was authorized by the act of February 25, 1862. The total amount authorized was \(\$ 450,000,000\), and the highest amount outstanding at any time was \(\$ 449,338,902\) on January 30, 1864.

Under the operations of enactments by Congress authorizing the canceling and retiring of these notes as they were received in the Treasiry, the amount outstanding had been reduced more than \(\$ 100,000,000\) when the process was finally stopped by the act of May 31,1878 , which required the notes to be reissued when redeemed. At that time the amount outstanding was \(\$ 346,681,016\), and it has not been changed since, though \(\$ 546,466,414\) of these notes have been redeemed in gold under the provisions of the act of January 15, 1875 (resumption act), and paid out again, a proceéding which was properly designated as "the endless chajn." The act of March 14, 1900, modified the operations of the resumption act by requiring that the notes redeemed shall not be paid out again until exchanged for gold, and under this act \(\$ 495,459,128\) of the notes have been redeemed in and exchanged for gold, making a total of \(\$ 1,041,925,542\) in gold that has been paid in redemption of United States notes since January 1, 1879, and yet, in spite of these payments, the volume outstanding remains the same as on May 31, 1878.

The United States notes issued and redeemed during the last fiscal year were \(\$ 170,000,000\), and the transactions resulted in a noticeable growth in the volume of notes of the denomination of \(\$ 5\) outstanding.

The amounts issued and redeemed, by denominations, during the fiscal year 1916 are set out in the table following:
\begin{tabular}{|c|c|c|c|c|}
\hline \multirow{2}{*}{Denominations.} & \multirow[b]{2}{*}{Outstanding June 30, 1915.} & \multicolumn{2}{|l|}{Fiscal year 1916.} & \multirow[b]{2}{*}{Outstanding June 30, 1916.} \\

\hline
\end{tabular}

TREASURY NOTES OF 1890.
The issue of Treasury notes of 1890 for the purchase of silver bullion began on August 19, 1890, and from that date to November 1, 1893 (the date of the repeal of the purchasing clause of the act), the Government had purchased \(168,674,682.53\) fine ounces, at a cost of \(\$ 155,931,002\), for which Treasury notes had been paid.

The amount of Treasury notes redeemed in gold up to the close of the fiscal year 1916 was \(\$ 110,714,364\). Treasury notes redeemed in standard silver dollars are canceled and retired in accordance with the requirements of the act of 1890 , and to the close of the year \(\$ 84,556,867\) had been so redeemed and retired. Sections 5 and 8 of the act of March 14, 1900, also provide for the cancellation and retirement of Treasury notes to an amount equal to the coinage of standard silver dollars and subsidiary silver coin from the bullion purchased with such notes. The cancellation of notes on account of coinage since March 14, 1900 , was \(\$ 69,271,135\), so that there remained outstanding June 30 , 1916, but \(\$ 2,103,000\), offset by an equal amount of standard silver dollars held in the trust funds for their redemption when presented. The amount of each denomination issued, redeemed, and outstanding may be studied in Table No. 21 on page 327 of this report.

\section*{GOLD CERTIFICATES.}

The actual use of gold coin as a circulating medium is not looked upon with favor by the people of the United States, except on the Pacific coast, but in its stead they encourage and exercise the option offered under existing law of depositing the coin in the Treasury and receiving therefor the popular gold certificates, which are issued in denominations from \(\$ 10\) up to \(\$ 10,000\), and furnish the larger denominations required in banking transactions and in the channels of trade.

The volume of gold certificates is greater than that of any other kind of paper money in circulation. The gold deposited in the Treasury for these certificates is held as a trust fund for their redemption when presented at Treasury offices and is used for no other purpose. The total amount of gold certificates outstanding on June 30, 1916, was \(\$ 1,729,565,669\), of which there were held in the Treasury \(\$ 164,165,380\), leaving in actual circulation \(\$ 1,565,400,289\), an increase of \(\$ 430,436,670\) as compared with that of 12 months earlier.

The transactions in this currency during the fiscal year 1916 are recorded by denominations in the table following:
\begin{tabular}{|c|c|c|c|c|}
\hline \multirow{2}{*}{Denominations.} & \multirow[b]{2}{*}{\begin{tabular}{l}

\end{tabular}

\section*{SLLVER CERTIFICATES.}

Silver certificates of the denominations of \(\$ 10\) and above were authorized by the act of February 28, 1878. The act of August 4, 1886 , authorized the denominations of \(\$ 1, \$ 2\), and \(\$ 5\). The act of March 14, 1900, provided that thereafter the issue of silver certificates should be limited to the denominations of \(\$ 10\) and under, except that 10 per cent of the total volume of such certificates, in the discretion of the Secretary of the Treasury, may be issued in denominations of \(\$ 20, \$ 50\), and \(\$ 100\).

The total amount of silver certificates outstanding at the close of the fiscal year 1916 was \(\$ 499,451,000\), an increase of \(\$ 5,992,000\) as compared with that of 1915.

The silver certificates issued and redeemed, by denominations, during the last fiscal year may be studied in the table following:
\begin{tabular}{|c|c|c|c|c|}
\hline \multirow[b]{2}{*}{, Denominations.} & \multirow[b]{2}{*}{\begin{tabular}{l}

\section*{CHANGES IN DENOMINATIONS.}

The needs of business make constant demand for small notes as instruments of local trade. The extension of habitation into remote districts, multiplication of lines of traffic, and the development of industrial activities are some of the requirements that must be provided for by an annual increase of the smaller denominations of paper money in circulation. The demand for such bills is generally urgent during the first half of the fiscal year, but from January to July the smaller denominations are returned in great numbers to the Treasury for redemption with requests for larger denominations in return. The resources of the Treasury for the issue of paper money of the smaller denominations are practically limited to the presentation of the higher denominations which are redeemed and retired and are replaced by the smaller bills.
The changes effected in the total amount of United States paper currency of each denomination outstanding at the close of the fiscal year 1916 may be observed in the table following:
\begin{tabular}{|c|c|c|c|c|}
\hline \multirow{2}{*}{Denominations.} & \multirow{2}{*}{\begin{tabular}{l}
Outstanding \\
June 30, 1915.
\end{tabular}} & \multicolumn{2}{|l|}{Fiscal year 1916.} & \multirow[t]{2}{*}{Outstanding June 30, 1916.} \\

\section*{RATIO OF SMALL DENOMINATIONS TO ALL PAPER CURRENCY.}

The ratio of denominations of \(\$ 10\) and less to the total paper currency, by fiscal years since 1906, is recorded in the statement following:
\begin{tabular}{|c|c|c|c|c|c|c|}
\hline \multirow[b]{2}{*}{Dates.} & \multirow[b]{2}{*}{Total paper currency.} & \multicolumn{5}{|c|}{Denominations of \(\$ 10\) and less.} \\
\hline & & \$1 & \$2 & \$5 & \$10 & Total. \\
\hline & & Per cent. & Per cent. & Per cent. & Per cent. & Per cent. \\
\hline July 1, 1906. & \$1,953,712, 245 & 5.31 & 2.51 & 19.67 & 27.43 & 54.93 \\
\hline July 1, 1907. & 2,111, 659, 575 & 5. 24 & 2. 69 & 19.48 & 25. 84 & 53.26 \\
\hline July 1, 1908. & 2, 345, 130, 802 & 4.92 & 2.46 & 20.79 & 26.00 & 54.19 \\
\hline July 1, 1909. & 2,375,261, 959 & 5.33 & 2.44 & 19.84 & 25.77 & 53.40 \\
\hline July 1, 1910. & 2, 419, 600, 310 & 5.93 & 2. 54 & 20.62 & 26. 53 & 55.62 \\
\hline July 1, 1911. & 2,538, 656. 263 & 6.02 & 2.45 & 20.39 & 26. 28 & 55. 16 \\
\hline July 1, 1912. & 2, 619, 224, 099 & 6.25 & 2.46 & 20.55 & 26. 33 & 55.65 \\
\hline July 1, 1913. & 2, 681, 085, 911 & 6.76 & 2. 53 & 20.82 & 27.15 & 57.28 \\
\hline July 1, 1914. & 2,674, 792,964 & 6.81 & 2.45 & 20.56 & 27.28 & 57.11 \\
\hline July 1, 1915. & 2, 967, 299, 808 & 5.97 & 2.07 & 18.69 & 24. 63 & 51.38 \\
\hline July 1, 1916. & 3,509, 208, 565 & 5.86 & 1. 92 & 17.09 & 22.73 & 47.62 \\
\hline
\end{tabular}

\section*{COST OF PAPER CURRENCY.}

Inquiries often reach the department relating to the production and cost of the paper currency.

As a matter of information it may be stated that the paper used is made by a secret process under Treasury supervision by annual contract under competitive bids. The Bureau of Engraving and Printing, a branch of the department, designs, under the direction of the Secretary, engraves, and prints the notes and certificates complete. This currency is delivered to the Treasurer in packages of 4,000 notes, the product of 1,000 sheets of paper. Such a package is taken as the unit from which to reckon the cost.

With the allowance for every item of expense attending the making, the issue, and the redemption of this paper currency, it appears that the average cost is as follows:
Total average expense of 4,000 notes issued....................................... \(\$ 52.50\)
Total average expense of 4,000 notes redeemed................................ 8.54
Aggregate average expense of issue and redemption. . . ................ 61.04
It appears from the foregoing that the average cost for each note is about 1.526 cents. Calculations based upon these average expenses of issue and redemption indicate results that will be very close to the actual cost of maintenance of the paper currency, and such cost for the fiscal years 1915 and 1916 may be studied from the details set forth in the subjoined statement:

Total expense of issue and redemption.

United States paper currency outstanding and cost of maintenance.

In this connection attention is invited to the saving of abrasion on the gold and silver coins held in the Treasury against outstanding certificates and notes, which to al! intents and purposes is an offsetting item against the cost of the paper currency issued directly by the Government, though not so treated in the foregoing calculations.

\section*{average life of paper currency.}

The average lifetime of the pieces of paper money outstanding is undoubtedly shortened by the increasing activities of such currency in the channels of trade. This is particularly noticeable in the current issue of the smaller denominations, \(\$ 5\) and under.

The average length of service, in years, of the different kinds and denominations of paper currency may be studied in the table following:

Estimated length of service of paper currency.
\begin{tabular}{|c|c|c|c|c|c|}
\hline Denominations. & United States notes. & Treasury notes. & Gold certificates. & Silver certificates. & Nationalbank notes. \\
\hline One dollar. & 3.15 & 1.77 & & 1.01 & 4.47 \\
\hline Two dollars. & 3.25 & 1.89 & & 1.18 & 4.54 \\
\hline Five dollars. & 2.62 & 2.98 & & 1.86 & 2.53 \\
\hline Ten dollars. & 3.55 & 3.75 & 1. 88 & 3.34 & 2.35 \\
\hline Twenty dollars & 5.97 & 4.03 & 3.20 & 3.87 & 2.77 \\
\hline Firty dollars. & 6.15 & 3.76 & 3.53 & 2.69 & 3.32 \\
\hline One hundred dollars. & 6.16 & 3.65 & 3.65 & 2.80 & 3.63 \\
\hline Five hundred dollars & 3.82 & & 3,58 & 1.89 & 5.11 \\
\hline One thousand dollars. & 4.24 & 1.92 & 3.32 & 1.42 & 3.33 \\
\hline Five thousand dollars. & . 32 & & 2.09 & & \\
\hline Ten thousand dollars. & . 16 & & 1.67 & & \\
\hline All denominations. & 3.16 & 2. 22 & 2. 43 & 1.23 & 2.57 \\
\hline
\end{tabular}

The greater longevity of the Government issues of the denominations of \(\$ 10, \$ 20, \$ 50\), and \(\$ 100\) is due to the fact that these notes are held from year to year in bank reserves.

\section*{paper Currency prepared for issue and amount issued.}

The pieces of United States paper currency outstanding at the close of the fiscal year 1916 numbered \(382,848,473\), of the total value of \(\$ 2,578,690,685\). The Treasury has to maintain this great number of pieces and also to provide for the annual growth of such denominations as may be in demand. It is incumbent upon the Treasury to foresee the wants of the people in the way of a circulating medium and always to be ready to meet any demand that may properly be made. Experience and forethought prompt the preparation of an adequate volume of paper currency of the kinds and denominations authorized by law in advance of putting it in circulation. The reserve vaulit should be well stocked with such currency in order that it may be properly seasoned before it is paid out. With the improved facilities now in operation it is believed that the output in future will be ample for this purpose.

The paper currency prepared for issue and the amount issued during each fiscal year from 1906 may be studied from the subjoined table:
\begin{tabular}{|c|c|c|c|c|c|c|}
\hline \multirow[b]{2}{*}{Fiscal years.} & \multicolumn{3}{|c|}{Prepared for issue.} & \multicolumn{3}{|c|}{Paper currency issued.'} \\
\hline & Number of notes and certificates. & Total value. & Average value. & Number of notes and certificates. & Total value. & A verage value. \\
\hline 1906. & 157, 425,000 & \$602, 172,000 & \$3.825 & 172,930,548 & \$629, 826, 000 & \$3.642 \\
\hline 1907. & 178, 180,000 & 679,480, 000 & 3. 813 & 173, 093, 911 & 698, 273,000 & 4.034 \\
\hline 1908. & 197,012,000 & 858,944,000 & 4.359 & 188, 999, 912 & 804,326,000 & 4.255 \\
\hline 1909. & 206, 898, 000 & 637,320,000 & 3.080 & 202, 746, 192 & 764, 510,000 & 3. 770 \\

\section*{REDEMPTIONS OF PAPER CURRENCY.}

There were \(310,343,348\) pieces of United States paper currency redeemed during the fiscal year 1916, an increase of \(10,887,363\) pieces as compared with those of 12 months earlier. The pieces redeemed were \(48,495,117\) less than those issued and the amount was \(\$ 517,-\) 113,900 less than the amount issued during the year.
A comparison, by months, for the fiscal years 1915 and 1916 may be studied from the annexed table:

United States paper currency redeemed during the fiscal years 1915 and 1916.

\section*{STANDARD SILVER DOLLARS.}

The standard silver dollars are shipped to depositors therefor at the expense of the consignee for transportation charges when there is demand for the same. Such shipments average about \(\$ 12,800,000\) annually, but the silver dollars remain in circulation only a short time. The stock of standard silver dollars in the United States at the close of the fiscal year 1916 was \(\$ 568,270,319\), of which \(\$ 66,414,932\) were in circulation, and \(\$ 501,855,387\) were held in the Treasury, against which Treasury notes and silver certificates to the amount of \(\$ 492,009,102\) were outstanding.

\section*{SUBSIDIARY SILVER COIN.}

The subsidiary silver coin in circulation at the close of the fiscal year 1916 was \(\$ 171,418,046\), an increase of \(\$ 12,152,091\), as compared with that of the preceding year. The amount of these coins shipped to depositors therefor average about \(\$ 22,000,000\) annually, and such shipments are made at the expense of the consignee for transportation charges.
The subsidiary silver coins are redeemable in lawful money of the United States by the Treasurer or any assistant treasurer, and such coins are paid over the counter of Treasury offices in exchange for other kinds of money.

\section*{MINOR COIN.}

The current minor coins are the bronze 1 -cent pieces and the nickel 5 -cent pieces. These coins are in great demand, and are shipped to depositors therefor at the expense of the consignee for transportation charges, and they are paid over the counter at Treasury offices in exchange for other kinds of money. They are redeemable in the lawful money of the United States when presented in sums or multiples of \(\$ 20\) to the Treasurer or any assistant treasurer of the United States.

The amount of each denomination of minor coin outstanding at the close of the fiscal years 1915 and 1916 is set out in the statement following:
\begin{tabular}{|c|c|c|c|c|}
\hline \multirow{3}{*}{Denominations.} & \multirow[b]{3}{*}{Outstanding June 30,1915.} & \multicolumn{2}{|l|}{Fiscal year 1916.} & \multirow[b]{3}{*}{\begin{tabular}{l}

\end{tabular}

USE OF ORDER GOLD CERTIFICATES FOR EXCFANGE ON.NEW YORK.
Previous to February 1, 1910, the banks in San Francisco, under provisions of existing law, exchanged gold coin at the subtreasury for demand gold certificates of large denominations, which they sent by registered mail to their correspondents in New York, thus effecting a transfer of funds at small cost to the banks. The demand gold certificates were shipped from Washington to San Francisco by express at the rate of \(\$ 1.75\) per \(\$ 1,000\), while order gold certificates (incomplete) were sent by express in packages of \(\$ 5,000,000\) at a total cost of \(\$ 15\).
In order to eliminate the expense of transporting demand certificates to San Francisco, and at the same time to grant to the banks in that city their rights under the law to deposit gold coin in exchange for gold certificates, it was deemed advisable to issue to said banks order gold certificates, series of 1900 , and to make them payable by the assistant treasurer of the United States, New York.

The transactions, semiannually, since February, 1910, are recorded in the statement following:
\begin{tabular}{|c|c|c|}
\hline Period. & Order gold certificates issued in San Francisco and redeemed in New York. & Deposits in New York for which payments were made in San Francisco. \\
\hline \begin{tabular}{l}
1910-February to June, inclusive. \\
July to December, inclusive.
\end{tabular} & \[
\begin{array}{r}
\$ 3,750,000 \\
600,000
\end{array}
\] & \[
\begin{array}{r}
\$ 2,650,000 \\
4,260,000
\end{array}
\] \\
\hline 1911-January to June, inclusive. & 5,100, 000 & 3, 500,000 \\
\hline July to December, inclusive & 5,10,00 & 8, 250,000 \\
\hline 1912-January to June, inclusive. & 3,000, 000 & 10,418, 566 \\
\hline July to December, inclusive & 5, 200, 000 & 6, 929, 239 \\
\hline 1913-January to June, inclusive. & 2, 2000,000 & 1, 988, 958 \\
\hline July to December, inclusive & 1, 400,000 & 8,850,000 \\
\hline 1914-January to June, inclusive. & 1, 200, 000 & 7, 115,000 \\
\hline 1915-July to December, inclusive & 3, 870, 000 & 3, 438,000 \\
\hline 1915-January to June, inclusive & 7, 260,000 & 259, 140 \\
\hline Aggregate & 34, 280,000 & 57,658,903 \\
\hline
\end{tabular}

It will be observed that the deposits made in New York on account of the return movement are \(\$ 23,378,903\) in excess of the payments made for gold certificates issued at San Francisco. This method of using the order certificates is in the interest of good administration and has made it possible to discontinue the shipments of demand gold certificates from Washington to San Francisco, with a resultant saving of transportation charges. There has been no demand for the issue of order gold certificates at San Francisco payable by the assistant treasurer of the United States at New York since the establishment of the Federal reserve bank at San Francisco.

\section*{DEPOSITS OF GOLD BULLION AT MINTS AND ASSAY OFFICES IN THE FISCAL YEARS 1915 AND 1916.}

The facilities provided by the Treasury for marketing the new product of gold bullion attracts to the mints and assay offices the greater part of the output of our mines. Under the provisions of an act of Congress approved March 2, 1911, the product of our gold mines and all imports. of gold may be deposited in the mints and assay offices, for which the full value thereof will be paid, either in coin or by check on the Treasurer of the United States, and against the gold so deposited and paid for the Secretary of the Treasury may, in his discretion, issue gold certificates.

The deposits of gold bullion at the mints and assay offices during the fiscal years 1915 and 1916 may be studied in the annexed statements:
\begin{tabular}{|c|c|c|c|}
\hline & Office. & 1915 & 1916 \\

\end{tabular}

\section*{SHIPMENTS OF CURRENCY FROM WASHINGTON.}

The currency distributed from the Treasury in Washington to the subtreasuries and to the banks during the fiscal year 1916 amounted to \(\$ 1,093,748,025\), as against \(\$ 836,961,227\) during the preceding 12 months.

Comparison of the transactions during the past two years is made in the subjoined statement:
\begin{tabular}{|c|c|c|c|c|c|}

\hline
\end{tabular}

\section*{RECOINAGE.IN THE FISCAL YEAR 1916.}

Gold coins presented for payment or deposit on any account at the Treasury offices are weighed and such coins as are below the limit of tolerance, viz, one-half of 1 per cent abrasion fgr 20 years' wear, are discounted at the rate of 4 cents per grain for each grain below the standard weight of the coin. This regulation protects the Government from loss by unnatural abrasion or the "sweating process" practiced by dishonest persons. Coins that are too light for further circulation are segregated for transmission to the mint. The subsidiary silver coins and minor coins received are assorted but are not discounted for natural abrasion; when worn so as to be unfit for circulation they are recoined.

The face value, by denominations and kinds, and the loss on the recoinage during the past two fiscal years is compared in the statement following:
\begin{tabular}{|c|c|c|c|c|}

\end{tabular}

In addition to the above the following Hawaian coins were recoined: Dollars, \(\$ 41\); half "dollars, 824 ; quarter dollars, \(\$ 16.2 j\); and dimes, \(\$ 2.90\); total, \(\$ 84.15\).

\section*{REDEMPIION OF FEDERAL RESERVE AND NATIONAL-BANK NOTES.}

During the fiscal year 1916 currency amounting to \(\$ 564,876,993\) was presented to the National Bank Redemption Agency for redemption, of which \(\$ 522,923,441\) was in national-bank notes, \(\$ 41,065,305\) Federal reserve notes, \(\$ 21,005\) Feederal reserve bank notes, and \(\$ 867,242\) United States currency. The nationals amounted to 68 per cent of the average circulation outstanding. Of the amount presented, 37.46 per cent came from banks located in New York City. The number of packages was 39,516 , containing \(57,802,275\) notes. The largest sum received during a month was \(\$ 61,824,457\) in January, 1916, and the smallest \(\$ 39,353,751\) in September, 1915.

Payment for notes redeemed was made as follows: By Treasurer's checks, \(\$ 34,137,303\); by remittances of new United States currency, \(\$ 418,381,906\); and gold, silver, and minor coin, \(\$ 19,500\); and by credit of \(\$ 107,437,422\) in various accounts.

The notes assorted amounted to \(\$ 564,071,758\) and were delivered as follows:
National-bank notes:

> Fit for use returned to banks of issue ( 16.56 per cent)
> \$86, 938, 900
> Unfit for use delivered to the Comptroller of the Currency for-
> Destruction and reissue ( 67.03 per cent)
> 351, 812, 445
> Destruction and retirement ( 16.41 per cent)..................... 86, 151, 363
> 524, 902, 708

Federal reserve notes:
Fit for use returned to banks and agents ( 36.79 per cent)............ \(14,410,600\)
Unfit for use delivered to the Comptroller of the Currency for destruction ( 63.21 per cent)

24, 758, 450
\({ }^{`} 39,169,050\)
Federal reserve notes unfit for use to the amount of \(\$ 24,486,000\), mostly cut in halves before shipment, were sent to the agency by the issuing banks during the year for credit of their respective Federal reserve agents. As no payment was made by the Treasury in redemption of these notes, the agency did not report them as a cash receipt, but they were counted and verified and then delivered to the Comptroller of the Currency for credit of the Federal reserve agents, who reimbursed their banks out of the gold and lawful money deposited with them for the retirement of such notes.

The expenses of redemption, amounting to \(\$ 450,150.22\), have been assessed upon the national and Federal reserve banks, the rate charged national banks being \(\$ 0.817229\) per \(\$ 1,000\) redeemed, while the rate charged Federal reserve banks on notes redeemed in the ordinary course of business was \(\$ 0.41880208\), and on notes of their own issue sent in by such banks \(\$ 0.1952307\). There being only 12 Federal reserve banks, their notes can be assorted with more facility than national-bank notes, and this condition appears to warrant a difference in rates to bring about an equitable distribution of expense.

\section*{SPURIOUS ISSUES DETECTED IN 1916.}

The Treasury offices receive daily large amounts of currency of the various kinds in circulation, and it is carefully examined for the purpose of detecting raised notes, counterfeits, etc. The diligence of the experts detected of spurious issues only \(\$ 12,473.71\) in nominal value in all kinds during the fiscal year 1916.

\section*{SPECIAL TRUST FUNDS.}

There are several special trusts, consisting of bonds and other obligations, of which the Treasurer of the United States is custodian under provisions of law or by direction of the Secretary of the

\section*{Treasury.}

\hline
\end{tabular}

The State of North Carolina has authorized and appointed commissioners to take under consideration a plan for settling the indebtedness of that State to the United. States, but Congress postponed action on a measure providing for representatives on the part of the Government.

Commissioners representing the Government and the State of Tennessee, under provisions of law, have now under consideration a plan for settling with that State. It is apparent that some progress has been made toward a settlement with the two States named in the foregoing for the unpaid matured bonds of those States belonging to the United States.

The bonds held for the Manhattan Savings Institution are in trust for that institution as indemnity for certain stolen bonds, as provided by act of December 19, 1878, (20 Stat., 589), and will be held for such time as, in the judgment of the Secretary of the Treasury, will secure the Treasurer of the United States against loss.

Recommendation has been made to Congress for authority to return to the State of Louisiana the bonds of that State captured at Shreveport by the Union forces during the War of the Rebellion, now held as a special deposit by the Secretary of War.

The special trust held for the Secretary of the Treasury is composed of notes of the Panama Railroad Co., drawing 4 per cent interest, payable to the United States, and is security for money advanced for the equipment and construction of said railroad.

The special trust held for the District of Columbia represents, first, investments on account of the sinking fund; second, the moneys retained from contractors under provisions of law and invested at the request and risk of said contractors; and, third, obligations that belong to the District of Columbia.

The special trust held for the board of trustees, Postal Savings System, consists wholly of postal savings bonds, representing investments made by said board, as described on page 273 of this report.

\section*{DISTRICT OF COLUMBIA.}

The transactions of the Treasurer of the United States, ex officio commissioner of the sinking fund of the District of Columbia, are fully set forth in a separate statement.

During the fiscal year 1916 the funded debt retired amounted to \(\$ 338,100\), and there was purchased for this furd \(\$ 394,000\) in United States bonds.

When the Treasurer of the United States was charged with the duties of the District of Columbia sinking fund office, on July 1, 1878, the bonded debt amounted to \(\$ 22,106,650\), with an annual interest charge of \(\$ 1,01.5,759.12\). This bonded debt has been reduced to \(\$ 0,179,900\), with an annual interest charge of but \(\$ 225,566.35\), and against this there is held in trust \(\$ 689,000\) in United States interest bearing bonds.

The balance held on account of the Tistrict of Columbia contractors' guaranty fund on July 1, 1915, was \(\$ 231,069.10\); the receipts during the past fiscal year have been \(\$ 93,974.51\), ard the disbursements \(\$ 70,390.92\), leaving a balance of \(\$ 254,652.69\), which amount is held in United States and District of Columbia bonds costing \(\$ 182,153.76\), and cash, \(\$ 72,498.93\).

The old securities of the District of Columbia held in the care and custody of the Treasurer are:
Chesapeake \& Ohio Canal bonds............................................ \(\$ 84,285.00\)
Board of audit certificates..................................................... 20,134.72
Total
104, 419. 72

\section*{LEGISLATION RECOMMENDED.}

It is suggested that recommendation to Congress be made in such form as may be deemed advisable for legislation that will authorize favorable action on the following:

Restriction on amount of \(\$ 5\) bank notes.-It appears that national banks located in commercial centers are not disposed to issue the full amount of \(\$ 5\) notes authorized by law, while the banks located in the interior or outlying sections of the country would largely increase the amount of their \(\$ 5\) notes but for the limitation by statute. Therefore it is believed that the repeal or modification of the provision limiting the \(\$ 5\) notes to one-third in amount of the circulating notes of national banks would be the means of increasing the amount of such notes in circulation, and would accordingly reduce the demand upon the Treasury for United States paper currency of small denominations.

The transactions of the Treasury during the past year, by their magnitude, have called for unusual exertions on the part of the administrative and clerical force. In particular, the labor of receiving and forwarding currency has been made very heavy by the unusual demands for shipments or the exchange of one kind of money for another. All business that has come to the office has been attended to with promptness.

In conclusion, the Treasurer desires to express his acknowledgment of the faithfulness and ability with which those associated with him have performed their responsible duties.

Respectfully,
John Burke, Treasurer.

\author{
Hon. William G. McAdoo, Secretary of the Treasury.
}

\section*{REPOŔT OF THE DIRECTOR OF THE MINT.}

\section*{Treasury Department, \\ Bureau of the Mint, Washington, D. C., July 15, 1916.}

Sir: In compliance with the provisions of section 345, Revised Statutes of the United States, I have the honor to submit herewith a report covering the operations of the mints and assay offices of the United States for the fiscal year ended June 30, 1916, being the fortyfourth annual report of the Director of the Mint. There is also submitted for publication in connection therewith the annual report of this bureau upon the production and consumption of the precious metals in the United States for the calendar year 1915.

\section*{OPERATIONS OF THE MINTS AND ASSAY OFFICES.}

By far the most notable achievement of the mint service during the fiscal year 1916 was the selection, with your approval, of new designs for the dime, quarter-dollar, and half-dollar pieces. For the first time in the history of our coinage there are separate designs for each of the three denominations, and their beauty and quality, from a numismatic standpoint, have been highly praised by all having expert knowledge of such matters to whom they have been shown. The striking of these coins for general circulation will doubtless be well underway by the coming of the Christmas holiday season.

The process of selecting the new designs (authority under sec. 3510 of the U. S. Rev. Stats., approved Sept. 26, 1890) began in January last, when, with your permission, I conferred with the members of the Commission of Fine Arts. Noted sculptors were commissioned to prepare a number of sketch models, and from more than 50 submitted 3 sets were chosen. It is a pleasure to note that the models which you and I selected were also the choice of the members of the Commission of Fine Arts?

The dime and half dollar are the work of Mr. Adolph A. Weinman; the quarter that of Mr. Hermon A. MacNeil. The design of the half dollar bears a full-length figure of Liberty, the folds of the Stars and Stripes flying to the breeze as a background, progressing in full stride toward the dawn of a new day, carrying branches of laurel and oak, symbolical of civil and military glory. The hand of the figure is outstretched in bestowal of the spirit of liberty.

The reverse of the half dollar shows an eagle perched high upon a mountain crag, his wings unfolded, fearless in spirit and conscious of his power. Springing from a rift in the rock is a sapling of mountain pine, symbolical of America.

The design of the 25 -cent piece is intended to typify in a measure the awakening interest of the country to its own protection.

The law specifies that on the obverse of the coin not only the word. "Liberty" but a representation of Liberty shall be shown. In the new design Liberty is shown as a full-length figure, front view, with head turned toward the left, stepping forward to the gateway of the country, and on the wall are inscribed the words"In God We Trust," which words also appear on the new half dollar, mentioned above. The left arm of the figure of Liberty is upraised, bearing the shield in the attitude of protection, from which the covering is being drawn. The right hand bears the olive branch of peace. On the field above the head is inscribed the word "Liberty," and on the step under her feet "1916." The reverse of this coin necessitates by law a representation of the American eagle, and is here shown in full flight, with wings extended, sweeping across the coin. Inscription: "United States of America" and "E Pluribus Unum" and "Quarter Dollar" below. Connecting the lettering above on outer circle are thirteen stars.

The design of the dime, owing to the smallness of the coin, has been held quite simple. The obverse shows a head of Liberty with winged cap. The head is firm and simple in form, the profile forceful. The reverse shows a design of the bundle of rods, with battle-ax, known. as "Fasces," and symbolical of unity, wherein lies the Nation's. strength. Surrounding the fasces is a full-foilaged branch of olive, symbolical of peace.
I beg to suggest the advisability of recommending to Congress the passage of an act authorizing the coinage of a copper and nickel \(2 \frac{1}{2}\)-cent piece. Inquiry, prompted by requests contained in letters from many parts of the country, discloses a real demand for it. When you consider that we have no coin between the 1 -cent piece and the 5 -cent piece and that many an article worth more than a cent and less than 5 cents sells for the latter price because of the lack of an intermediate monetary unit of value, the economic importance of it will be readily seen. Articles which now sell for 15 cents each or two for a quarter would sell for \(12 \frac{1}{2}\) cents. Popular shops, such as the 5 and 10 cent stores, would undoubtedly place articles now selling two for 5 cents on sale at \(2 \frac{1}{2}\) cents each; and it is not at all unlikely that street car companies would carry children of school age for \(2 \frac{1}{2}\). cents. There is much interesting data available on this subject, and I respectfully request that you give it careful consideration.

I beg further to recommend that you ask Congress to provide a permanent indefinite appropriation for the purchase of copper to alloy the gold and silver coinage. All other metals entering into our coinage are provided, in accordance with law, from public moneys, and such metals constitute a part of the Treasury cash. Purchase of alloy metal for gold and siiver coinage is not specifically provided. for by law, therefore it must be purchased from the contingent (general) appropriation of the mint which is required to make the coin. The probable demand for coin, with consequent needs for alloy, can not be gauged with any degree of accuracy; and indefinite provision for alloy would remove one of the sources of embarrassment incident. to making estimates and keeping within amounts appropriated. Such an appropriation is provided to cover the difference between. face value and recoinage value of worn and uncurrent silver coin.

A third recommendation is that the assay office at Salt Lake City, Utah, be discontinued. The deposits of bullion there are so few and small, and the size of the office force so inadequate for business of

1. Obverse of Silver Half Dollar; 2. Reverse of same.
3. Obverse of Silver Quarter Dollar; 4. Reverse of same
5. Obverse of Silver Dime; 6. Reverse of same.
7. Obverse of McKinley Memorial Gold Dollar; 8. Reverse of same.

Federal Reserve Bank of St. Louis
serious proportions should it be offered, that I can see no need of maintaining it.

The following mint service institutions were operated during the fiscal year 1916: Coinage mints at Philadelphia, San Francisco, and Denver; assay office at New York, which has a large trade in bars of fine gold and silver; mints at New Orleaus and Carson City, conducted as assay offices, and assay offices at Seattle, Boise, Helena, Salt Lake City, and Deadwood, these being bullion-purchasing agencies for the large institutions. Refineries were operated at the New York, Denver, and San Francisco institutions.

The value of the gold acquired by the Government at the mints and assay offices during the fiscal year 1916 was \(\$ 508,083,262.92\), the large increase over last year being due principally to the heavy importations of foreign bullion and coin. Gold deposited by the Cuban Government to be made into Cuban coin was of value \(\$ 1,323,291.98\); United States gold coin received for recoinage was of value \(\$ 1,959,695.71\); transfers of gold between mint service offices totaled \(\$ 58,261,256.84\), making an aggregate of gold handled by the mint service during the fiscal year 1916 of \(\$ 569,627,507.45\).

Silver purchased during the fiscal year 1916 totaled 6,545,161.96 fine ounces, costing \(\$ 3,348,642.49\), at an average price of 51 cents per fine ounce; the silver received and repaid to the depositors thereof in bars bearing the Government stamp totaled \(3,362,233.24\) fine ounces; the silver deposited by foreign governments to be worked into coin totaled \(2,233,346.96\) fine ounces; the United States silver coin received for recoinage totaled \(566,469.45\) fine ounces, with recoinage value of \(\$ 783,092.35\); the Philippine silver coins received for recoinage totaled \(138,067.48\) fine ounces; the transfers of silver between mint service offices totaled \(815,800.16\) fine ounces, making an aggregate quantity of silver handled by the mint service during the fiscal year 1916 of \(13,661,079.25\) fine ounces. The large increase over last year of silver purchased was due to open-market purchases for subsidiary coinage early in the fiscal year, when the price of silver was unusually low.

The United States coinage for the fiscal year 1916 amounted to \(\$ 37,209,062.83\), of which \(\$ 31,077,409\) was gold, \(\$ 3,328,882.50\) was silver, \(\$ 1,790,468.15\) was nickel, and \(\$ 1,012,303.17\) was bronze. This amount includes \(\$ 19,534\) in \(\$ 1\) gold pieces struck at the San Francisco Mint for the Panama-Pacific International Exposition.
There were also coined at the Philadelphia Mint \(3,092,890\) gold pieces, \(11,574,450\) silver pieces, and \(25,912,150\) nickel pieces for Cuba; 852,663 silver pieces for Colombia; \(1,000,000\) silver pieces for Ecuador; \(1,000,000\) nickel pieces for Salvador; \(2,000,000\) nickel pieces for Venezuela; 100,000 gold planchets and 500,829 silver planchets for Peru. The mint at San Francisco coined for the Philippine Islands \(1,435,000\) silver pieces and \(5,500,000\) bronze pieces.

The seigniorage on United States coinage executed totaled \(\$ 4,046,740.26\), of which \(\$ 1,650,774.94\) was on subsidiary silver coins and \(\$ 2,395,965.32\) was on minor coins.

\section*{STOCK OF COIN AND BULLION IN THE UNITED STATES.}

On June 30, 1916, the estimated stock of domestic coin in the United States was \(\$ 2,403,210,953\), of which \(\$ 1,646,050,150\) was gold, \(\$ 568,270,515\) was in silver dollars, and \(\$ 188,890,288\) was in subsidiary silver coin.

The stock of gold bullion in the mints and assay offices on the same date was valued at \(\$ 804,466,177.70\), an increase over last year of \(\$ 437,541,008.45\), and the stock of silver bullion was \(10,835,173.88\) fine ounces, an increase over last year of \(3,529,339.72\) fine ounces.

\section*{PRODUCTION OF GOLD AND SILVER.}

The production of the precious metals in the United States during the calendar year 1915 was as follows: Gold, \(\$ 101,035,700\), and silver, \(74,961,075\) fine ounces.

\section*{INDUSTRIAL ARTS.}

The amount of gold consumed in the industrial arts during the calendar year 1915 was \(\$ 35,376,739\), of which \(\$ 27,156,219\) was new material. Silver consumed amounted to \(29,891,271\) fine ounces, of which \(22,889,400\) fine ounces was new material.

IMPORTS OF GOLD COIN.
The net imports of United States gold coin for the fiscal year 1916 were \(\$ 14,609,360\).

\section*{ESTIMATES FOR THE FISCAL YEAR 1918.}

The total of estimates for the mint service for the fiscal year 1918, including the office of the Director in Washington, is \(\$ 1,250,990\), which compares with estimates of \(\$ 1,160,480\) for the fiscal year 1917 and appropriations for the latter year of \(\$ 1,147,980\).

\section*{APPROPRIATIONS, EXPENSES AND INCOME. -}

The appropriated amounts available for the mint service use during the fiscal year totaled \(\$ 1,175,786.88\), reimbursements to appropriations for services rendered amounted to \(\$ 248,037.69\), making an available total of \(\$ 1,423,824.57\).

The expenses chargeable to appropriations were \(\$ 1,217,731.89\), those chargeable to income \(\$ 10,297.17\), total \(\$ 1,228,029.06\).

The income realized by the Treasury from the mint service totaled \(\$ 4,985,174.89\), of which \(\$ 4,046,740.26\) was seigniorage.

Income and expenses are itemized below:

INCOME
Earnings:
Credited to appropriations-
Charges on foreign coinage executed \(\$ 233,676.33\)
Charges for manufacture of special medals.

\hline Total coinage. & 39,188,000 & 1,643,960.00 & 154, 523, 524 & 37, 209,062.82 \\
\hline
\end{tabular}
\({ }^{1}\) Coined for Panama-Pacific International Exposition Co., act approved Jan. 16, 1915.
The approximate amount of copper used in the above coinages was 728 tons, of which 8 tons were used in alloying gold, 14 tons in alloying silver, 219 tons for nickel, and 487 tons for bronze coinages.

The mints of the United States during the fiscal year 1916 manufactured in addition to the domestic coinage, \(52,367,153\) pieces of metallic money and 600,829 planchets for other Governments as follows:
mint at peiladelphila.

MINT AT SAN FRANCISCO.
\begin{tabular}{|c|c|c|c|}

\end{tabular}

\section*{MINT OF THE UNITED STATES AT PHILADELPHIA.}

The mint was operated throughout the fiscal year. There were received 6,173 deposits of gold and 4,900 deposits of silver, as shown by the following:
\begin{tabular}{|c|c|c|c|c|}
\hline \multirow{2}{*}{Items.} & \multicolumn{2}{|c|}{Grold.} & \multicolumn{2}{|c|}{Silver.} \\
\hline & Fine ounces. & Value. & Fine ounces. & Value. \\
\hline Deposits. & 2,348,698. 552 & \$48, 551, 908.02 & 6, 050, 125. 46 & \$3, 531, 109. 53 \\
\hline Redeposits. & 2,094, 802.371 & 43, 303, 408. 21 & 490, 026.32 & 265,622. 19 \\
\hline Total. & 4, 443, 500.923 & 91, 855, 316.23 & 6,540, 151.78 & 3,796,731. 72 \\
\hline
\end{tabular}

ASSAYING DEPARTMENT.
The operations of this department during the fiscal year 1916 were as follows:

\section*{The number of assays made was as follows:}
\begin{tabular}{|c|c|c|c|}
\hline Deposits. & 44, 719 & Assay commission. & 107 \\
\hline Ingots & 9,660 & Quartermaster's Departm & 30 \\
\hline Silver purchases & 5,220 & New York bars. & 576 \\
\hline Miscellaneous. & 714 & Superintendent's bars. & 400 \\
\hline Coiner's bars. & 202 & Bullion samples and ores. & 67 \\
\hline Melter's bars. & 1, 374 & Nickel and bronze assays. & 22 \\
\hline Mint Bureau. & 1,061
54 & & ,811 \\
\hline
\end{tabular}

In addition to the above, 518 ounces of proof gold and 820 ounces of proof silver were made.

Of the 1,139 melts of gold ingots made in the melting department, 115 were returned for remelting, although within the standard fineness required by law, to be thoroughly mixed; 3 were condemned, being outside of the standard. Of the 2,382 melts of silver ingots, 3 were returned for remelting and 3 were condemned.
\begin{tabular}{|c|c|}
\hline \multicolumn{2}{|l|}{\multirow[t]{2}{*}{Fineness of gold ingots passed: 9003}} \\
\hline & 900.3 \\
\hline 97 melts at. & 900.2 \\
\hline 138 melts at. & 900.1 \\
\hline 402 melts at. & 900 \\
\hline 160 melts at. & 899.9 \\
\hline 155 melts at. & 899.8 \\
\hline 40 melts at. & 899.7 \\
\hline 10 meltsat. & 899.6 \\
\hline \(\overline{1,021}\) & \\
\hline
\end{tabular}

In addition to the above 18 melts of gold ingots \(916 \frac{2}{3}\) fine were made for a coinage for Peru.

\section*{MELTING AND REFINING DEPARTMENT.}

During the fiscal year this department received from the superintendent bullion containing \(4,628,211.940\) fine ounces in gold, the coinage value of which being \(\$ 95,673,631.83\). The amount of silver received was \(10,828,915.37\) fine ounces, the subsidiary value being \(\$ 14 ; 969,988.41\) : Upon settlement of the accounts of this department there was found a surplus of both gold and silver. In the gold account the surplus amounted to 49.657 fine ounces, the coinage value being \(\$ 1,026.50\). The silver surplus amounted to \(1,708.99\) fine ounces, the subsidiary coinage value being \(\$ 2,362.52\).

The number of ingot melts made and amount of metal sent to the melting rooms is shown by table given below:

Ingot melts made.

Sweep cellar operations.
\begin{tabular}{|c|c|c|c|c|}
\hline Department. & Number barrels. & Net weight. & Gold. & Silver. \\
\hline & 85 & Pounds.
44,792 & Fine azs. & Fine ozs. \\
\hline Superintendent's... & 17 & 44,792
8,740 & 332.046
152.046 & 121.27 \\
\hline Coinjing. & 6 & 3,410 & 39.782 & 149.18 \\
\hline 'Total. & 108 & 56,942 & 325. 538 & 1, 008.52 \\
\hline
\end{tabular}

Troy ounces.

This past fiscal year has been one of unusual activity for the melting department. Overtime has been the rule rather than the exception, and this, beginning in March, clearly shows how unusual the demands for coin must have been. The actual weight of the gold going into the melting pot for ingots amounted to \(4,474,353.698\) ounces.
The apparent loss on this amount of metal was \(3,173.461\) fine ounces, whioh by reason of recoveries in grains, sweeps bars, sweeps, etc., amounting to \(2,467.451\) ounces, showed an actual loss in operation of 706.010 fine ounces, which figures a loss of 1.5 ounces per 1,000 operated upon, a usual and conservative figure.

In silver with an operation of \(8,775,596.36\) ounces sent to the melting room; the actual loss amounted to \(1,772.33\) ounces; this is 2 ounces per 1,000 operated upon.

The crucible situation, with abnormally high prices and poorer quality, is acute,dua to the scarcity of German clay; but it does seem that now is the time to forever get away from crucibles for minor coin metal melting. During this coming year we hope to be able to make solid homogeneous and malleable bars in an open-hearth type of furnace.

COINING DEPARTMENT.
During the fiscal year the coining department received from the superintendent \(3,783,947.421\) fine ounces of gold for coinage, of which \(3,738,479.151\) was operated upon and from which there was produced \(1,697,300\) pieces in double eagles, eagles, half eagles, and quarter eagles of the value \(\$ 11,007,375\), amounting to \(532,481.766\) fine ounces of gold.

For the Governments of Cuba and Peru there was operated upon \(1,085,312.569\) fine ounces of gold from which was produced \(3,192,890\) pieces of coin and blanks of the value of \(\$ 22,435,401.90\). This and 2,082,290.617 fine ounces in clippings, condemned coin, and blanks, sweeps, and bars were delivered prior to settlement, and there was delivered in settlement \(83,804.233\) fine ounces in ingots, unfinished coin, and blanks. The entire operation showed a wastage of 59.357 fine ounces of the value of \(\$ 1,227.02\), being 3.175 per cent of the legal allowance. The percentage of coin to the amount operated upon was 43.33 .

There was also received during the same period for coinage \(8,472,880.80\) fine ounces of silver of which \(8,158,467.06\) fine ounces were operated upon and from which there was produced \(9,239,350\) pieces of half dollars, quarter dollars, and dimes of the value of \(\$ 1,501,382.50\) which contained \(1,086,125.30\) ounces of fine silver. For the Governments of Cuba, Colombia, Ecuador, and Peru \(13,927,942\) pieces of coin and blanks of the value of \(\$ 4,622,290.61\) in United States subsidiary coin containing 3,405,625.16 fine ounces of silver, together with \(3,777,458.02\) fine ounces in clippings, condemned coin, blanks, sweeps and bars were delivered prior to settlement, and 203,140.81 fine ounces in ingots, coin, unfinished coin, and bars were delivered at settlement. Upon this operation there was a wastage of 529.08 fine ounces of the value of \(\$ 256.08\), being 6.484 per cent of the legal allowance. The percentage of coin to the amount operated upon was 55 .

This department received during the year 15,191,607.30 troy ounces of nickel and operated upon 15,140,877.10 ounces, from which
there was produced \(31,310,363\) pieces of domestic coin of the value of \(\$ 1,565,518.15\) in United States 5 -cent pieces containing 5,028,352.31 troy ounces.
For the Governments of Cuba, Salvador, and Venezuela 28,912,150 pieces of 5,2 , and 1 centavos, and 5 centimos of the face value of \(\$ 584,695\), containing \(3,033,387.06\) troy ounces, all of which and 7,010,606.40 troy ounces of clippings, condemned coin, and blanks, were delivered prior to settlement. There was also delivered at settlement 108,302.30 troy ounces in ingots, coin, and unfinished coin. On the entire operation there was a wastage of \(10,959.23\) ounces of the value of \(\$ 221.55\). The percentage of wastage based on that of silver, was 72.38. The percentage of good coin produced to amount operated upon was 68.93 .

The amount of bronze received by this department during the year was \(12,928,802.40\) troy ounces. The amount operated on was 11,882,405.40, from which was produced \(66,821,317\) 1-cent pieces of the value of \(\$ 668,213.17\). To produce this amount required \(6,674,993.12\) troy ounces. This, together with \(4,991,304.70\) in clippings and condemned coin and blanks, was returned prior to settlement. The amount returned at settlement was \(1,254,309.10\) troy ounces in ingots, coin, and unfinished coin. The wastage on this operation amounted to \(8,195.48\) ounces of the value of \(\$ 123.89\). The percentage of wastage on a silver basis was 68.97. The percentage of good coin produced to the amount operated upon was 56.35 .

In addition to the bullion received for coinage, \(2,974.404\) ounces of fine gold was received for use in the manufacture of medals, of which \(1,277.885\) fine ounces were used, which, together with \(1,695.418\) fine ounces in clippings and filings, were returned prior to settlement. The wastage was 1.121 fine ounces. The amount of silver received was \(2,638.68\) ounces, of which \(1,069.21\) fine ounces were used in the manufacture of medals, and that amount, with \(1,571.90\) ounces in clippings and filings, were returned prior to settlement. There was a gain of 2.43 ounces. The slight gain and loss in gold and silver is included in the loss in the coinage of gold and silver coin.

\section*{PROOF COINS AND MEDALS.}

The following table shows the number of proof coins and medals and their nominal value sold during the fiscal year:
\begin{tabular}{|c|c|c|c|}
\hline 1 & Articles. & Pieces. & Nominal
value. \\
\hline Gold medals. & & 425 & \$27,655. 55 \\
\hline Silver medals. & & 1,045 & 1, 536.81 \\
\hline Bronze medals. & & 39,613 & 7,278.97 \\
\hline Gold proof coins.. & & 175 & - 1,506.25 \\
\hline Silver proof coins. & & 1,242 & 2, 066.59 \\
\hline Minor proof coins & & 1,793 & 143.14 \\
\hline Total. & & 44,293 & 40,187.31 \\
\hline
\end{tabular}

ENGRAVING DEPARTMENT.
All the dies used in coining operations in all the mints are made in the engraving department at Philadelphia. The embossedenvelope dies used by contractors supplying stamped envelopes for
the Post Office Department and postal savings bank are also made here; also dies for Army and Navy and other authorized public medals. The mint is reimbursed for the actual expenditures for labor and materials on these medal accounts.

The number of dies prepared for United States coinage last year, including 7 for the McKinley Memorial gold dollar, was 2,515. In addition 225 were made for Philippine coinage, 33 for the Government of Colombia, 1,435 for the Government of Cuba, 75 for the Government of Ecuador, 84 for the Government of Venezuela, 202 for the Post Office Department, 35 for medals, and 85 master dies and hubs; in all, 4,689, as follows:
\begin{tabular}{|c|c|c|c|c|}

\section*{THE STATE OF THE NUMISMATIC COLLECTION.}

The accessions to the numismatic collection for the fiscal year which ended June 30, 1916, amounted to 209 specimens, of which 178 were coins and 31 were medals. These acquisitions in respect to metals and period of origin are distributed as follows:

As to periods:
Coins-
\[
\begin{aligned}
& \text { Antique } \\
& \text { Modern. } \\
& 89 \\
& \text { Oriental } \\
& \text { All specimens acquired were modern. }
\end{aligned}
\]

For the last two years an unusually large proportion of the small purchase fund has been expended for antique coins, with a view of securing for exhibition a more representative collection of those important monuments. For while the coins of Greece and Rome form the most valuable group in the collection, considered from an educational point of yiew as well as of a general interest in the unusual, yet from lack of funds and for other reasons the collection of ancient coins was not developed so well as the modern in the early history of the cabinet. It is therefore a small and fragmentary collection of the commoner issues. To build up that group to what the proper interest of the average visitor requires will make it necessary to expend for ancient coins a rather disproportionate amount of the purchase fund for some years to come; for antique coins in good state of preservation are generally costly. This statement will explain certain facts in the above analysis of the year's acquisitions.
There has been added to our equipment during the past year a commodius cabinet of 280 drawers of various depths, made in the carpenter shop of the mint.

Gifts to the collection were made during the year by the following persons and firms:

Mr. F. A. Canfield, Dover, N. J.: Bronze and nickel coins of Bolivia.

Joseph K. Davison's Sons, Philadelphia: Various medals.
Dr. G. F. Kunz, New York: Medals of Joseph Murphy.
George T. Morgan, Philadelphia Mint: Medals of Schiller and of Archbishop Prendergast.

Dr. A. A. Norris, Philadelphia Mint: Coins of the Denver Mint and medals.

Mr. Ambrose Swasey, Cleveland, Ohio: Portrait plaque of himself. Whitehead \& Hoag Co., Newark, N. J.: Various medals.
President Arthur Williams, American Museum of Safety and Sanitation, New.York: Award medals of the museum.

\section*{machine shop.}

In addition to the regular repairs and upkeep of machinery and appliances, new work, consisting of two upsetting machines with automatic hopper feeds for bronze and nickel blanks, bottle shaker boxes for the assay department, weights, balances, automatic hopper feeds for coining presses, 10 sets of sectional coin collars for gold
coins, 226 coin collars \({ }^{\circ}\) for subsidiary silver and minor coin, was completed, and there is now under construction, about 30 per cent completed, an automatic weighing machine, 2 rolling mills for finishing strips for minor coinage, 3 cutting presses and 2 coin-reviewing machines for this institution. Work has also been performed for other institutions and other countries, consisting of coin collars for the United States and Philippine coinage; 1 automatic weighing machine, about 60 per cent completed, for the mint at San Francisco; punches, beds, collars, and drifts for the Governments of Cuba, Venezuela, Peru, and Colombia. A four-beam automatic weighing machine, now about 30 per cent completed, is also in process of manufacture for the Cuban Government.

\section*{EMPLOYEES.}

The total number of employees in this institution at the close of the fiscal year was 353 , distributed in the several departments as follows:

VISITORS.
A large number of visitors from all States of the Union and from foreign countries visited the mint during the year, 77,278 having been shown through the building by the guides.

\section*{mint of the united states at san francisco.}

Attention was called in last year's report to the substitution of oil fuel for city gas in the melting department of the mint. The 11 oil-burning melting furnaces now installed have proved very satisfactory. During the year 888 fires were operated on a consumption of 532.65 barrels of oil, at a cost of \(\$ 354.21\). To have operated the same number of fires with city gas would have required \(3,764,753\) cubic feet, costing \(\$ 2,238.18\). This shows a saving for the year of \(\$ 1,883.97\). The cost of repairs to the oil furnaces is no greater than it was when gas was used. A cylindrical lining with a modified burner has been tried out with pleasing results as to the life of lining and melting speed. It is the intention to adopt this form of lining and burner as soon as practicable.

An important item to this mint is the reduced cost of electric current. For the past six years the mint has purchased current on a sliding scale based on the maximum current demand, the average cost per kilowatt hour being about \(\$ 0.0223\). Last year competition was obtained, and a flat rate of \(\$ 0.02\) per kilowatt hour was obtained. This year competition was more keen, resulting in a rate for the coming year of \(\$ 0.014\) per kilowatt hour.

The heary receipts of bullion during the past year resulted in an overcrowding of the storage vaults of the institution. The building of a new vault has remedied this difficulty, and storage capacity has now been provided.

During the year the mint received 16,543 gold and silver deposits and 41 redeposits from the Carson Mint, containing \(5,283,196.997\) fine ounces of gold of the value of \(\$ 109,213,374.71\), and \(2,346,857.25\) fine ounces of silver at a subsidiary coinage value of \(\$ 3,244,316.20\). The receipts this year show an increase over last year of 1,200 deposits at an increased value of \(\$ 38,545,540.42\). The details covering classification of bullion and source of origin are set out in the tables appearing in another part of this report.

The receipts of gold bullion were as follows:
\begin{tabular}{|c|c|}
\hline Deposits. & \$108, 891, 409. 62 \\
\hline Surplus bullion recovered & 12,007. 29 \\
\hline Redeposits, proof, etc & 309, 957.80 \\
\hline
\end{tabular}

The disposition of the gold bullion was as follows:
\begin{tabular}{|c|c|}
\hline Coinage. & \$20,070,034.00 \\
\hline Fine bars so & 7,769, 705.60 \\
\hline Fine bars paid depositor & 4,737. 23 \\
\hline Sold in sweeps & 7,013. 77 \\
\hline Total. & 27, 851,490.65 \\
\hline Balanc & \\
\hline Balance on June 30, 1915, as per report. & \$208, \(022,911.84\) \\
\hline Receipts, fiscal jear 1916, per above. & 109,213, 374.71 \\
\hline Total....a & 317,236, 286. 55 \\
\hline Disbursements, fiscal year 1916, as abo & 27,851,490.65 \\
\hline Ledger balance, June 30, 1916.. & 289,384, 795.90 \\
\hline
\end{tabular}

BARS MANUFACTURED DURING TEE YEAR.
During the fiscal year a brisk demand was met for small gold bars for export, and in addition to making 2,633 certificate bars, this mint made 8,665 merchant bars, making a total of 11,298 gold bars manufactured. The greater part of the merchant bars were composed of 10 -ounce and 40 -ounce bars. In addition to the foregoing, 538 silver bars were made for payment to depositors of silver bullion. The fine weight and value of the bars manufactured during the year is as follows:
\begin{tabular}{|c|c|c|}
\hline Item. & Fine ounces. & Value. \\
\hline \multicolumn{3}{|l|}{Gold:} \\
\hline Certificates. & 2,935, 838.888 & \$60,689, 175.96 \\
\hline Merchant. & 375,859.507 & 7,769, 705.60 \\
\hline For payment to depositors & 229.167 & 4,737.28 \\
\hline Total gold bars... & 3,311,927.562 & 68,463,618.84 \\
\hline Silver: For payment to depositors. & \(563,335.86\) & 321, 830.76 \\
\hline
\end{tabular}

The gold-certificate bars on hand June 30, 1916, amounted to \(\$ 215,859,972.42\).

The purchase of minor-coinage metals during the year for the manufacture of United States coin was, copper, \(52,641.02\) troy ounces, at a cost of \(\$ 496.32\).

During the fiscal year minor coin was distributed to the amount of \(\$ 141,247.20\), at a cost of \(\$ 88.48\).

\section*{ASSAY DEPARTMENT.}

The operations of this department for the fiscal year 1916 were as follows:
\begin{tabular}{|c|c|c|c|c|c|c|c|}

\(62015^{\circ}\)-FI 1916- 25

There was returned from the refinery by-products consisting of \(3,609.67\) pounds of copper, 74.23 troy ounces of platinum, and 4.76 troy ounces of osmiridium. The earnings of the refinery were \(\$ 44,387.90\), of which \(\$ 37,275.46\) was charges collected, and \(\$ 7, \underline{1} 12.44\) was the estimated value of the by-products recovered.

During the year 75,763 visitors were shown through the mint by the guides. On June 30, 1916, there were 119 officers and employees in the mint as follows:

Colning department61
20
Melting and rofining department. ..... 27
Assaying department. ..... 11
Total ..... 119

\section*{MINT OF THE UNITED STATES AT DENVER.}

The coinage department of this institution operated throughout the year to its full capacity on subsidiary silver and minor coin, most of which was shipped to eastern points.

The coinage capacity of gold and silver has been limited to the amount that could be weighed. By the addition of two new weighing machines, built in the shops of this institution, the output can now be doubled.

\section*{ASSAY DEPARTMENT.}

During the fiscal year 1916 the operations of the assay department were as follows:

The deposits represent 5,123 melts of gold and silver; redeposits, 1,324 melts; refinery samples, 246 melts of fine gold and 333 melts of fine silver, 88 melts of gold anodes, and 587 melts of silver anodes; 631 experimental anode melts; and 46 settlement melts, the remainder being miscellaneous samples for special assays.

\footnotetext{
Meported assays made................................................................................. 53,031
Cupels made...................................................................................................60,915
Pieces of lead cut and rolled.
60,915
}

Reported finenesses of the refined and ingot gold and silver melts during the fiscal year 1916.

All lead used was cast into ingots from pig lead; alloy silver and copper made into disks were cast into ingots, rolled and cut to the required weight. Computations for checking the gold and silver values were made in the department.

During the year 65,124 visitors witnessed the coining operations from the balconies. On June 30 there were 93 officers and employees of this mint, divided as follows among the departments: General, 42 ; assay, 9 ; coining, 19 ; melting and refining, 23.

\section*{UNITED STATES ASSAY OFFICE AT NEW YORK.}

The New York assay office handled an unprecedented volume of business during the year under high pressure and adverse physical conditions.

The total value of deposits that have passed through the office during the year was \(\$ 323,372,395.50\). This is an increase of \(\$ 256,813,943.05\) over the total deposits for the previous year.

The total number of deposits received, running in value from \(\$ 100\) to \(\$ 40,000,000\) per deposit, was 17,370 , an increase of 2,233 over the previous year.
The total number of assays made for the year amounted to 153,004 , on 53,939 samples, an increase of 25,358 over the previous year.
Notwithstanding the fact that there were very few exportations of gold there was an increase of \(\$ 6,084,420.52\) in the value of gold-bars exchanged for gold coin. Gold bars exchanged for domestic use showed an increase over last year of \(\$ 9,889,303.67\).
There was transferred to the mint of the United States at Philadelphia \(1,924,744.924\) fine ounces of gold bullion and \(464,126.81\) fiñe ounces of silver bullion.

In addition to this extraordinary increase in the regular business of the office we have, on account of lack of space in our own vaults, moved and stacked with our own force over \(\$ 209,000,000\) to vaults courteously placed at our disposal by the officials of the subtreasury.

The total revenues of the office for the year have amounted to \(\$ 608,824.28\), an increase of \(\$ 357,447.28\) over the previous year.
The total appropriations made for the support of the institution for the year amounted to \(\$ 219,100\), leaving a surplus of \(\$ 389,724.28\), plus any unexpended balances, to be turned into the Treasury of the United States.

The working force was increased by 1 temporary appointment in the assayer's department at \(\$ 3.50\) per diem and by 13 helpers in the deposit melting room and melting and refining department at \(\$ 3.50\) each per day. These were all appointed during the last half of the year, their services being available for an average period of about three months in the fiscal year.

While \(\$ 273,125,077.98\) of foreign gold has been received I wish to emphasize that the increase of 2,233 in the number of deposits, and the increase of \(\$ 9,889,303.67\) in domestic gold bars exchanged, represents the normal domestic growth of the business of the office. I wish also to emphasize that the receipt of these large foreign deposits has in no wise affected the manner or the time in which the smaller regular deposits have been handled. These depositors have been taken care of in their regular order and with no delay. The larger deposits have been handled as rapidly as the physical limitations of the office would permit and in a manner satisfactory to the depositors.

\section*{MELTING AND REFINING DEPARTMENT.}

Notwithstanding the demands made upon this department, by reason of the great volume of deposits, in melting original deposits that ordinarily would be melted in the deposit melting room, the refinery during the year operated on crude bullion containing \(4,115,831.516\) fine ounces of gold and \(3,122,974.04\) fine ounces of silver.

The refinery melting room, in addition to the melting necessary to handle this amount of crude bullion, melted \(3,933,323.87\) ounces of foreign coin and \(1,531,293.66\) ounces of foreign fine gold original deposits which, under ordinary circumstances, would have been melted in the deposit melting room.

In addition to this work this department furnished the necessary help for the stamping and transfer of 31,729 coin and fine gold bars valued at \(\$ 209,000,281.65\) to the borrowed vaults in the subtreasury.

The total number of bars of all kinds made was 121,117.
At the same time experiments of great value to the service have been carried on in the recovery and refining of platinum. A new method of refining this metal has been devised by the superintendent of the department which practically removes all impurities from the metal and puts it in form for manufacture into crucibles and other ware used in various Government departments. A considerable number of such articles have been manufactured by this office and furnished to the other departments of the Government during the year.

\section*{ASSAY DEPARTMENT.}

The operations of this department have again increased to such an extent that during the fiscal year it has been almost impossible to keep up with the great volume of current local deposits and at the same time expeditiously complete the assays upon the enormous amount of coin and bullion imported.
It has been possible to do this only by the assistance of men occasionally detailed from the refinery and by the willing service given by the force which has worked to the utmost early and late. In the latter part of the year the belp of one temporary appointee was
obtained. There were made 153,004 assays upon 53,939 samples, divided as follows:
\begin{tabular}{|c|c|c|c|}
\hline Item. & Samples. & Assays. & Reports. \\
\hline Deposits.. & 45,920 & 130, 061 & 17,380 \\
\hline Redeposits: & 784 & 2, 606 & 446 \\
\hline Refinery & 6,220 & 16, 304 & 2,496 \\
\hline Specials............... & 985 & 3,964 & 464 \\
\hline Mint Bureau and sundry . & 30 & - 69 & - 55 \\
\hline Total. & 53,939 & 153, 004 & 20,841 \\
\hline
\end{tabular}

The deposits and redeposits represent 17,097 melts of gold and silver, the refinery samples 380 melts of fine gold, 528 melts of fine silver, 343 melts of gold anodes, and 972 melts of silver anodes, the remainder being miscellaneous refinery samples and settlement melts.
The special assays represent the customary articles of jewelry, manufacturers' samples, etc., for which the United States assay is désired, and, as usual, some were for testimony in legal proceedings for the enforcement of statutes relating to the representation of karat fineness.

The average cost per assay, from the beginning of the new cost system, was less than 20 cents, not including general overhead charges. All cupels used, about 125,000 , were made and the silver disks used in parting were cut and rolled to the required weights.

All the fine gold and silver bars manufactured were stamped with the assay fineness. The calculations required for checking the values and charges of all deposits were made in the department and the equipment maintained in the condition necessary for accurate work. Changes have been made in the pyrometers used in the assay cupel furnaces, which have much improved them. The cold junctions of the thermocouples have been transferred by the use of compensating leads, so that the temperature can be maintained fairly uniform, anḍ they are giving more accurate and satisfactory service.

The increase over last year in the work performed amounts to very nearly 20 per cent in number of assays, while the values determined show a much greater increase, due to the number of large melts.

DEPOSIT MELTING ROOM.
There was melted in this room during the year gold bullion containing 1,213,842.522 fine ounces, \(3,431,928.571\) fine ounces of foreign gold coin and silver bullion containing 3,155,669.04 fine ounces.
cashier's office.
Gold bars were issued to depositors for domestic use in payment for bullion for \(\$ 3,274,879.62\), and gold bars were exchanged for gold coin for domestic use for \(\$ 34,082,880.24\), an increase of \(\$ 9,889,303.67\) over last year.

Gold bars were exchanged for gold coin for export for \(\$ 7,214,883.62\).
The charges collected on gold bars exchanged for gold coin amounted to \(\$ 21,536.70\), an increase of \(\$ 5,029.28\).

\section*{GAIN FROM OPERATIONS AND COLLECTION OF CHARGES.}

The net gain from operations, including receipts from the sale of by-products, value of by-products on hand, and surplus bullion recovered by operative officers, amounted to \(\$ 388,967.70\). The total revenue from charges collected was \(\$ 219,856.58\), making the total above cited of \(\$ 608,824.28\).

OFFICERS AND EMPLOYEES.
The number of officers and employees at this office at the close of the fiscal year was as follows:
General department......................................................................... 53
Assay department ............................................................................................ 17

Total............................................................................... 103
an increase of 14 men over last year.
It may be noted that while the value of deposits received during this year was five times that received during the previous year, and the revenues paid into the Treasury almost three times that received during the previous year, and almost three times the total appropriations made for the office, the only addition to the working force was these 14 men , for an average of three months of the year. This was accomplished only by making demands upon the men which can not be indefinitely continued. Safety of operation will require that sufficient new men be appointed from time to time, as the necessities of the work require, and sufficient appropriation should be made at the next session of Congress to provide for this.

NECESSITY FOR NEW BUILDING.
The work of the office has been hampered by the lack of space, especially by lack of vault space. We are unable to promptly open and weigh the large deposits now constantly received because of lack of working vault space in which to store it prior to melting. This results in delay in payment of advances and consequent loss to the depositor. We have been able to handle these deposits at -all only by the courtesy of the assistant treasurer in charge of the subtreasury next door. At present we have in that building three borrowed vaults entirely filled and am now rapidly filling the only remaining space available there. It is only a question of time until this refuge. is exhausted. The plans already drawn for the new building, for which appropriation has already been made and for the construction of which funds are now available, provide adequate and convenient vault space for all future needs of the office.

\section*{UNITED STATES ASSAY OFFICE, SEATTLE, WASH.}

Gold dust and bullion received during the fiscal year, 1916.-Number of deposits received, 2,435 ; weight in troy ounces, 603,158.54: weight in avoirdupois tons, 20.7; coining value, \(\$ 10,436,515.65\).

\({ }^{1}\) Includes transportation of bullion and coin between mints and assay offices.
OPERATIONS OF THE MELTER AND REFINERS AND THE COINERS, FISCAL YEAR 1916.
The quantity of metals operated upon in the different departments of the mints and assay office at New York during the fiscal year ended June 30, 1916, aggregated 23,432,296.958 fine ounces of gold and \(27,434,524.84\) fine ounces of silver. There were also operated upon at the coinage mints \(65,699,644.27\) ounces of minor coinage metal. The figures in the table following are based on the actual figures obtained at the settlements of the accounts.

Legal limits of wastage on the whole amount delivered by the superintendent to operative officers, as prescribed in section 3542, Revised Statutes, is as follows: Melter and refiner-gold, 0.001 ; silver, 0.0015 . Coiner-Gold, 0.0005 ; silver, 0.001 .

\section*{WASTAGE AND LOSS ON SALE OF SWEEPS.}

The value of metals wasted in the operative departments during the fiscal year ended June 30, 1916, was \(\$ 5,931.57\). A loss of \(\$ 3,470.05\) occurred from the difference between the assay value of the bullion contained in sweeps sold and the amount received for the same; details are given below:
\begin{tabular}{|c|c|c|c|c|c|}

\section*{LABORATORY OF THE BUREAU OF THE MINT.}

From the coinage of the calendar year 1915 the assayer of this bureau tested 178 gold and 212 silver coins, all of which were found within the legal requirements as to weight and fineness.
In the gold coins the greatest deviation above standard in fineness (the legal limit being 1 above or below) was 0.4 , while the greatest deviation below was 0.5 .

The greatest deviation in fineness of silver coins above standard (the limit being three above or below) was 2.2, while the greatest deviation below was 1.5.
The following table and statement summarizes these assays:
\begin{tabular}{|c|c|c|c|c|c|c|c|c|}

Eighteen San Francisco Exposition coins were examined at the Philadelphia Mint during the absence of the bureau assayer at settlement. Six Philippine coins were examined, all of which were within the legal requirements. The examination of minor coins was continued and 4,219 were examined. The assaying of certificate bar samples was continued throughout the year. The investigation of cupels, during which about 10,000 used cupels were assayed, was completed during the year.

PROCEEDINGS OF THE ASSAY COMMISSION, 1916.
The following-named gentlemen were designated by the President as commissioners to examine and test the weight and fineness of the coins reserved at the several mints during the calendar year 1915, pursuant to the provisions of section 3547 of the Revised Statutes of the United States:

Hón. James H. Moyle, Salt Lake City, Utah; Hon. George E. Roberts, New York City; Mr. Thomas Arthur, Billings, Mont.; Mr. Kenyon B. Conger, Irvington, N. Y.; Mr. Benjamin J. Rosenthal, Chicago, Ill.; Dr. J. M. Henderson, Columbus, Ohio; Mr. H. O. Granberg, Oshkosh, Wis.; Mr. Charles Hasler, Olney, Ill.; Prof. James L. Howe, Washington and Lee University, Lexington, Va.; Dr. Franklin E. Tuttle, State University, Lexington, Ky.; Hon. Harry L. Day, Wallace, Idaho; Mr. L. A. Fischer, Bureau of Standards, Washington, D. C.; Dr. F. W. Clark, United States Geological Survey, Washington, D. C.; Hon. C. C. Dill, member of Committee on Coinage, Weights, and Measures, House of Representatives, Washington, D. C.; Hon. James A. Bryan, Newbern, N. C.; Prof. Andrew C. Lawson, University of California, Berkeley, Cal.; Hon. John Skelton Williams, Comptroller of, the Currency (ex-officio); Mr. George R. Comings, United States Assay Office, New York (ex officio).

The commission met at the mint at Philadelphia Wednesday, February 9, 1916, and Hon. John Skelton Williams was elected chairman.

The following committees were appointed by the chairman, with the approval of the commission:

Committee on còunting.-Hon. James H. Moyle, chairman; Messrs. Hasler, Granberg, and Rosenthal.

Committee on weighing.-Mr. L. A. Fischer, chairman; Messrs. Dill, Howe, and Henderson.

Committee on assaying.-Mr. George E. Roberts, chairman; Messrs. Comings, Clark, Lawson, and Tuttle.

Committee on resolutions.-Hon. C. C. Dill, chairman; Messrs. Clark and Moyle.

The committee on counting reported that the packages containing the pieces reserved by the mints at Philadelphia, San Francisco, and Denver for the annual trial of coins, in accordance with section 3539 of the Revised Statutes, were delivered to the committee by the super intendent of the mint at Philadelphia and compared with the records kept by the Director of the Mint, packages from each mint for each month's coinage and containing all denominations coined having been selected, accurately counted, and found to be correct. The verification of the packages being completed, they were delivered to the committees on weighing and assaying. In the reports of those committees will be found an account of the disposition of these coins.

The table following gives the packages verified by the committee on counting, being the total number of coins reserved by the several mints:

The committee on weighing reported that they had examined certain sample coins selected at random from those reserved for the annual trial by the Assay Commission. The weighings, as usual, were made on the Troemner balance provided for the purpose by the mint. It was carefully examined as to the equality of the arms and as to its sensibility, both of which were found to be satisfactory.

The weights employed for testing the United States coins, from the dime to the double eagle, were a set of coin weights furnished by the Director of the Bureau of Standards, with a certificate giving the variation in mass from the standards fixed by law.

The weights used for testing the \(\$ 50\) Panama-Pacific International Exposition coins and the Philippine coins were a set of grain weights belonging to the Philadelphia Mint, which were checked by the committee by comparison with the coin weights referred to above. All weighings of coins were made to the nearest one-hundredth grain.

Solely for the purpose of checking the adjustment of the working standards of the mint, the following intèrcomparisons were made:

500 ounces \(=400\) ounces +100 ounces +0.0012 ounce; 500 ounces \(=\) 300 ounces +200 ounces +0.0010 ounce; 400 ounces \(=300\) ounces + 100 ounces -0.0012 ounce; 300 ounces \(=200\) ounces +100 ounces + 0.0010 ounce; 200 ounces \(=100\) ounces +50 ounces +40 ounces +10 ounces -0.0001 ounce; 200 ounces \(=100\) ounces +50 ounces +30 ounces +20 ounces +0.0003 ounce; 100 ounces \(=50\) ounces +40 ounces +10 ounces -0.0002 ounce; 50 ounces \(=30\) ounces +20 ounces +0.0000 ounce; 30 ounces \(=20\) ounces +10 ounces -0.0001 ounce; 20 ounces \(=10\) ounces +5 ounces +3 ounces +2 ounces -0.0001 ounce; 10 ounces \(=5\) ounces +3 ounces +2 ounces +0.0000 ounce.

The committee on assaying reported that they had taken samples from the coins reserved from the United States mints at Philadelphia, San Francisco, and Denver for assay.

The results of the assays made of the individual coins and of the same in mass are given in the following schedules. From these it will be seen that-
The highest assays upon the gold coinage of the different mints (the limit of tolerance being one one-thousandth) are at-

\footnotetext{
Philadelphia.

The highest assays upon the silver coinage of the different mints (the limit of tolerance being three one-thousandths) are at-
Philadelphia. ..... 900.2
San Francisco. ..... 900.9The lowest assays upon the silver coinage of the different mints(the limit of tolerance being three one-thousandths) are at-
Philadelphia. ..... 898.6
San Francisco8989The highest assay upon the Philippine silver coinage is at-San Francisco (subsidiary)751.5
The lowest assay upon the Philippine silver coinage is at-
San Francisco (subsidiary) ..... 750.7

The committee has tested the quartation silver and found it to be, for assay purposes, free from gold. The acid used in the humid assay of silver was found to be free from chlorine.

The balances used were tested and found to be correct.
The committee therefore deem the assays exhibited in the above schedules to be entirely trustworthy:

The following report, submitted by the Committee on Resolutions, was unanimously adopted:
Whereas the Annual Assay Commission appointed by the President of the United States to examine and test the weight and fineness of the gold and silver coins reserved by the different mints of the United States has held its meeting in the city of Philadelphia on February 9 and 10, 1916; and
Whereas the commission has about completed its labors, the committee on resolutions begs leave to offer the following resolutions:
First. That the commission renews the recommendation of prior commissions with reference to the maintenance and increase of the national coin collection of the mint at Philadelphia.

Second. That in the opinion of the commission, in order to facilitate this work, an official souvenir mint medal, of typical and characteristic design, should be struck off, and a descriptive booklet of the mint published, to be sold at a moderate price to visitors at the mint; that the proceeds from such sales be devoted exclusively, under the supervision of the Secretary of the Treasury, to the extension of this national collection of coins and medals at the Philadelphia Mint, as aforesaid.

Third. That in the opinion of the commission there should be an annual appropriation by Congress of \(\$ 2,000\) for the purpose of extending this collection, as aforesaid.

Fourth. That a letter be written under the hand of the chairman of this commission to the Secretary of the Treasury recommending to him that the above amount be included in the annual estimates for purposes aforesaid and further suggesting that he recommend to Congress the desirability of authorizing the mint medal and descriptive booklet referred to herein; and be it further

Resolved, That the Assay Commission of 1916 recommends that the Director of the Mint consider the advisability of using the metric system of weights and measures in operation of the several mints;

Resolved, That the thanks of the commission be and are hereby heartily tendered to Hon. Robert W. Woolley, Director of the Mint; Hon. John Skelton Williams, Comptroller of the Currency; Hon. A. M. Joyce, superintendent of the mint; and to Mrs. Virginia \(H\). Carpenter, and to the various other officials and employees of the mint for the uniform courtesy shown the commission during its sessions.
Respectfully submitted.
C. C. Dill, Chairman. F. W. Clarke.

James H. Moyle.

\section*{MOVEMENT OF GOLD FROM THE PORT OF NEW YORK.}

The superintendent of the United States assay office at New York City has prepared the following table giving exports of gold through the port of New York:

\section*{STANDARD SLIVER JOLLARS USED IN SUBSIDIARY SILVER COINAGE.}

There were purchased as bullion and melted at the mints and assay offices 1,092 mutilated silver dollars during the fiscal year ended June 30, 1916, which were used in the manufacture of subsidiary silver coin.

The following have been used since 1883:
\begin{tabular}{|c|c|c|c|c|c|c|c|}
\hline Fiscal years. & Amount. & Fiscal years. & A mount. & Fiscal years. & Amount. & Fiscal years. & Amount. \\

\hline
\end{tabular}

The loss on the recoinage of \(\$ 2,541,651\) in worn and uncurrent gold coins was \(\$ 19,360.85\) and the net loss on the recoinage of \(\$ 848,565.65\) in worn and uncurrent silver coins was \(\$ 61,270.21\).

The Treasury was reimbursed from the appropriation for that purpose the following losses on uncurrent coin transferred during the fiscal year 1916 for recoinage:

\section*{UNITED STATES GOLD IN CANADA.}

The holdings of United States gold coin in the treasury of the Dominion of Canada on December 31, 1915, amounted to \$85,516,595.

The holdings of United States gold coin of the charter banks (19 in number) on the same date aggregated \(\$ 42,296,553\).

The total amount of United States gold coin in Canadian reserves on the foregoing date was therefore \(\$ 127,813,148\).

The foregoing report, covering the operations of the mints and - assay offices of the United States for the fiscal year ended June 30, 1916, is respectfully submitted.

\end{tabular}

1 Based on an estimate by A. De Foville, 1909.
\({ }_{2}\) The figures for the stock of gold in Germany represent the amount held by the Reichsbank and the estimated amount of coined gold in circulation only.
Note.-The blank spaces in this table signify that no satisfactory information is available. In some instances the amount of gold in banks and public treasuries is carried out as the total stock in the country, although an unknown amount is in circulation. The per capita circulation is based upon known amounts only. All estimates of stock of money in circulation must be accepted with reserve.

\section*{WORLD'S PRODUCTION.}

\section*{The following table shows, by calendar years, the production and value of gold and silver in the world since 1860:}

Production of gold and silver in the world since 1860.
[The anuual production of 1860 to 1872 is obtained from 5-year period estimates compiled by Dr. Adolph Soetbecr. Since 1872 the estimates are those of the Bureau of the Mint.]

Production of gold and silver in the world since the discovery of America.
[ From 1493 to 1885 is from a table of averages for certain periods, compiled by Dr. Adolph Soetbeer; for the years since, the production is the annual estimate of the Bureau of the Mint.

\title{
REPORT OF THE COMPTROLLER OF THE CURRENCY.
}

> Treasury Department, Offioe of the Comptroller of the Currency, Washington, D. C., December 4, 1916.

SIR: I have the honor to submit herewith the Fifty-fourth Annual Report of the operations of the Currency Bureau for the 12 months ended October 31, 1916, as required by , section 333 of the Revised Statutes of the United States.

Throughout the twelve months period covered by this report this country has experienced the greatest prosperity it has ever known. The activity manifested in virtually every occupation and in every kind of industry and in all sections has been unprecedented. This tremendous business expansion, together with advancing prices for commodities and for labor, has evolked the use of hundreds of millions of dollars of additional capital and accommodations from the banks.

In past years, under inadequate and unscientific banking and currency methods and systems, a great increase in business activity has almost invariably produced a money scarcity, has occasioned high interest rates, and sometimes has precipitated panics; but during the past 18 months of unexampled prosperity we have enjoyed, throughout the length and breadth of the land, the lowest money rates this country has ever seen.

No fair-minded man who has studied financial and business conditions for the past two or three years can fail to see in how large a measure these deeply gratifying results are to be credited to the operations of our new Federal Reserve System, which was inaugurated with the opening of the 12 Federal reserve banks November 16, 1914, a little over two years ago.

\section*{DECENTRALIZATION OF BANKING CAPITAL.}

The concentration and congestion of capital in a few great cities which in the past have so frequently bred panics-sometimes as a natural result of unnatural conditions, and sometimes produced artificially, but always interfering with the healthy growth of business and checking legitimate enterprise-have been largely relieved, and banking capital is to-day more widely and more equitably distributed over the country than ever before in this generation.

Our bank reserves are now being scientifically, utilized. Banks and business men, even in the midst of a world cataclysm, are conducting business with a greater sense of security and of confidence than at any time in our history as a people, and they no longer live in constant fear of the recurrence of the money flurries and panics which have, in the past, at such frequent intervals visited us with disastrous results. Business men, large and small, in the smaller cities and also
in towns and rural districts, as well as in the centers of wealth, are now enabled to obtain capital for the requirements of business on terms more favorable than ever experienced in the past; more liberal than many thought to be possible.

NATIONAL BANKS THE BACKBONE AND SUBSTANCE OF FEDERAL RESERVE SYSTEM.

Although the Federal reserve act provided that State banks (with the requisite minimum capital) as well as national banks, might become members of the Federal Reserve. System, it is the national banks which, as yet, principally compose the system, and through whose cooperation these magnificent results, which have meant so much, not only to business men, but to the people of our country generally, have been achieved.

On November 17, 1916, just two years after the inauguration of the system, the membership of the Federal Reserve System was 7,614 , with 15,980 million dollars of resources; 7,577 of these members were national banks, with resources aggregating \(15 ; 513\) million dollars.
During the decade preceding the inauguration of the Federal Reserve System the deposits in State banks and trust companies had shown a somewhat greater increase than the deposits of the national banks, but with the beginning of the Federal Reserve System these conditions have been reversed, and the records now show that from June, 1913, to June, 1916, the deposits of our national banks increased more than \(33 \frac{1}{2}\) per cent, while the deposits of State banks and trust companies for the same period increased only about 29 per cent.

The reports showing the condition of all national banks are compiled six times a year; but a compilation showing the condition of all State banks and trust companies throughout the country is only prepared once each year by the Comptroller's office in cooperation with the banking departments of the several States, and this statement is usually compiled about July 1 of each year.

\section*{resources and deposits of national banks exceed all previous RECORDS.}

On November 17, 1916, the national banks of the United States reported the largest resources and the largest deposits ever shown at any time in their history. The increase in total deposits reported by national banks for the year from November 10, 1915, to November 17, 1916, exceeded the greatest increase ever reported for any previous year and amounted to 2,332 million dollars. For the two years from October 31, 1914, to No vember 17, 1916, the resources of all national banks increased 4,028 million dollars-over 35 per centor from 11,492 million dollars to 15,520 million dollars. For the 10 years from 1904 to 1914 the resources of the national banks of the United States had increased only 4,295 million dollars, or from 7,197 million dollars to 11,492 million dollars, an increase for the period of about 60 per cent, or an average of 6 per cent a year for the 10 years. It is thus seen that the increase for the past two years, averaging
- about 18 per cent, was about three times as great as the yearly average for the preceding 10 years.
In April, 1906, the total.resources of all the national banks of this country were 7,670 million dollars. On November 17, 1916, the resources, as shown above, were 15,520 million dollars, an increase of more than 100 per cent in the last 10 years.

ENORMOUS INCREASE IN NUMBER OT DEPOSITORS IN NATIONAL BANKS.
On June 30, 1910, the number of depositors in the national banks of the United States was reported at \(7,690,468\). On May 1, 1916, the number had increased to \(14,288,059\), the increase being \(6,597,591\), or 86 per cent.

The resources of the national banks on November 17, 1916, exceeded the total resources of all reporting State banks, savings banks, private banks, and loan and trust companies throughout the United States at the time of the beginning of the Federal Reserve System, about two years ago.

\section*{COMPARISON OF RESOURCES OF OUR NATIONAL BANKS WITH THOSE OF THE BANKS OF ISSUE OF FOREIGN NATIONS.}

It is also worthy of note that the aggregate resources of the national banks of the United States at this time exceed by about a billion dollars the combined resources of all of the great banks of issue of all of the principal countries of the world, including the Bank of England, the Bank of France, the Bank of Russia, the German Reichsbank, the Bank of Italy, the Bank of Spain, the Bank of the Netherlands, the Bank of Denmark, the Swiss National Bank, and the Imperial Bank of Japan, according to the latest reports received from these foreign banks.

GROWTH OF NATIONAL BANKS IN /WEST AND SOUTH.
As an indication of the diffusion and increase of the banking wealth of the country attention is called to the fact that the resources on November 17, 1916, of the national banks in the Southern.States, Middle Western States, Western States, and Pacific States, exclusive of the Eastern and New England States, were considerably greater than the total resources of all the national banks throughout the entire United States as late as 1906. The increase in the resources of the national banks of this country for the first two years under the operation of the Federal Reserve System has been more than twice as great as the total increase shown for the five-year period preceding the inauguration of the new system; that is to say, from November 16, 1909, to October 31, 1914.

NATIONAL BANKS INCREASE IN NUMBERS AS WELL AS IN CAPITAL and resources.

From the opening of the Federal reserve banks, November 16, 1914, to November 15, 1916, the Comptroller of the Currency issued charters to 264 new national banks, with aggregate capital of
\(\$ 16,109,500\). During the same period 189 national banks increased their capital to the extent of \(\$ 27,117,700\). The aggregate number of new charters and banks increasing their capital was, therefore, 453, and the aggregate new capital authorized was \(\$ 43,227,200\).
During the same period 143 banks (other than those consolidating with other national banks) went into liquidation, their aggregate capital being \(\$ 11,873,000\). Thirty-four banks reduced their capital in the same time to the extent of \(\$ 2,735,000\), so that the total number of banks liquidating or reducing their capital (other than those consolidating with other national banks) was 177, with a capital reduction of \(\$ 14,608,000\). In addition to the above, during the same time there were 27 national banks placed in charge of receivers, representing an aggregate capital of \(\$ 2,635,000\). Of this number, 8 , with aggregate capital of \(\$ 530,000\), have been restored to solvency.

The records thus show that since the opening of the Federal Reserve System, excluding the banks consolidating with other national banks, the number of new banks chartered plus the number of existing national banks which have increased their capital exceeds by 257 the number of national banks which have gone into liquidation or which have reduced their capital, and the capital of these newly chartered banks, plus the increased capital of existing banks, exceeds by \(\$ 26,514,200\) the capital of all national banks which have gone into liquidation or have reduced their capital other than those consolidating with other national banks.
In addition to the new banks chartered as set forth above, this office had on hand at the end of the report year, October 31, 1916; 46 applications for the organization of national banks which had been approved by the Comptroller, and 87 applications for charters for new banks which were then under investigation to determine whether or not approvad should be granted.

These facts furnish a conclusive reply to suggestions which have been occasionally made that there has been any general tendency toward the withdrawal of banks from the national banking system.

\section*{WIDER DIFFUSION OF BANKING WEALTH.}

The healthy distribution of the money and banking resources of the United States which has been brought about under the Federal Reserve System is being manifested in many ways.

Formerly the 100 largest national banks in the Unitéd States were concentrated principally in a comparatively few financial centers. To-day the big banks are distributed through 22 States and in 33 cities, embracing every section of the country.
The 100 national banks with the largest resources as shown by the call of November 17, 1916, all have resources in excess of \(\$ 20,000,000\), with one exception, the exception being one of the Chicago banks.
The States of Oklahoma, Alabama, Louisiana, Virginia, Washington, New Jersey, and Oregon each contain 1 of the 100 largest banks.

Texas, Nebraska, Maryland, Michigan, Indiana, and Wisconsin each contain 2 of these banks; Colorado has 3; Ohio, Minnesota, and Massachusetts each have 5; California and. Illinois have 7 each; Missouri has \({ }^{\circ} 8\); Pennsylvania has 16; and New. York State has 25.

Between September 12, 1916, and November 17, 1916, the resources of the 100 largest banks increased \(\$ 550,000,000\), or nearly 9 per cent.

Outside of the central reserve cities the large banks which showed increases of as much as \(\$ 5,000,000\) each in deposits in this period were those located in Dallas, New Orleans, Buffalo, Kansas City, Philadelphia, San Francisco, Cleveland, Pittsburgh, and Boston.

Among the 100 largest national banks there were only 5 which did not show an increase. Three of these banks showing reductions were located in New York and 2 in California. The largest reduction shown by any one of these 5 banks was less than \(\$ 2,250,000\).

The largest percentage of increase was shown by a bank in Texas, which increased over 33 per cent, or over \(\$ 6,000,000\).

\section*{CONDITIONS GOVERNING THE GRANTING OF NEW CHARTERS.}

In weighing and passing upon the various applications received for charters for new national banks, this office endeavors to give full consideration to all factors entering into each proposition. Among others are: First, the general character and experience of the promoters and of the proposed officers of the new bank; second, the adequacy of existing banking facilities and the need of further banking capital; third, the outlook for the growth and development of the town or city in which the bank is to be located; fourth, the methods and banking practices of the existing bank or banks, the interest rates which they charge to customers, and the character of the service which as quasipublic institutions they are rendering to their community; fifth, the reasonable prospects for success of the new bank if faithfully and efficiently managed.

In cases where there seem to be differences of opinion as to whether the community is actually in need of additional banking facilities, and when the principal or only opposition to the establishment of the new bank comes from those interested in the existing bank or banks, and there is a pronounced desire from responsible citizens for a new bank, the disposition of this office generally is to resolve the doubt in favor of the community and grant the charter.

The records, as heretofore stated, show that during the past year charters were granted for 122 new national banks, while 16 other applications for charters were refused.

\section*{REDUCTION IN NUMBER AND LIABILITIES OF NATIONAL BANKS FAILING SINCE THE INAUGURATION OF THE FEDERAL RESERVE SYSTEM.}

The Federal Reserve Board was organized August 12, 1914, and the Federal reserve banks opened for business in November of the same year. During the fiscal year ended June 30, 1914, 19 national banks failed with liabilities aggregating \(\$ 39,952,000\).

For the next 12 months ended June 30, 1915, including \(7 \frac{1}{2}\) months of the operation of the new Federal Reserve System, there were 16 national bank failures with liabilities aggregating \(\$ 15,972,000\).

For the 12 months ended June 30, 1916, the first complete fiscal year under the new system, there were 15 national-bank failures with aggregate liabilities of only \(\$ 3,838,415\).

These figures thus show that for the first fiscal year under the operation of the new Reserve System the liabilities of the national banks which failed amounted to less than one-tenth of the liabilities of the national banks which failed in the yearimmediately preceding the inauguration of the system. Furthermore those banks which failed during the past 12 months were generally small concerns whose failures were traceable directly to criminal acts of mismanagement, defalcation, embezzlement, etc., which it is practically impossible to eliminate entirely under any banking system, although under improved methods of bank examination these cases are now being reduced to a minimum.

Of the 15 banks which failed during the 12 months ended June 30 , 1916, with liabilities of \(\$ 3,838,415\), two have resumed operation, 5 more already have paid, or are expected to pay, depositors 100 cents on the dollar, and the remainder are expected to pay from 65 per cent to 95 per cent of their liabilities.

\section*{UNPRECEDENTED GROWTH OF NATIONAL BANKS DURING THE PAST FISCAL YEAR.}

The following comparative statement shows the condition of all national banks as of November 17, 1916, as compared with November 10, 1915:

\end{tabular}
\({ }^{1}\) Rediscounts not included in total figures.
The following table shows the growth of the national Banks as revealed at five-year intervals at the time of the autumn calls for the past 20 years:
[In thousands of dollars.]

\footnotetext{
\({ }^{1}\) Reserve requirements changed Nov. 16, 1914, under operation of Federal Reserve Act.
}

This statement shows that in the past 20 years, or from October 6, 1896, to November 17, 1916, the national banks of the country grew in number from 3,676 to 7,584, an increase of a little over 100 per cent, while their resources to-day are nearly five times as great as they were in 1896, having increased from 3,263 million to 15,520 million dollars. In the same period the capital of the national banks increased over 65 per cent, or from 648 million to 1,071 million dollars, but their surplus and undivided profits in the same period increased from 336 million to 1,090 million dollars. It is a striking fact that the reserves which the national banks held on November 17, 1916, in excess of the amount which they were required by law to hold, were reported at 1,016 million dollars, which is nearly twice as much as the whole amount of reserves held by all national banks October 6, 1896.

\section*{PERCENTAGE OF PRINCIPAL ITEMS OF ASSETS AND LIABILITIES OF NATIONAL BANKS.}

In view of the fact that on an average approximately 70 per cent of the banks' assets are represented by loans, United States bonds, and lawful money, and a like percentage of the liabilities by capital, surplus and profits, and deposits, the following table is of interest as indicating the percentage of each of the items in question, based upon reports from banks at the date of the fouith call of each year from 1906 to 1916, inclusive.
\begin{tabular}{|c|c|c|c|c|c|c|c|c|c|c|c|}
\hline Items. & 1906 & 1907 & 1908 & 1909 & 1910 & 1911 & 1912 & 1913' & 1914 & 1915 & 1916 \\

\hline Surplus and profits & 8.4 & 8.8 & 8.5 & 8. 4 & 8.9 & 8.7 & 8.7 & 9.1 & 8.9 & 8.3 & 7.3 \\
\hline Deposits. & 52.4 & 51.5 & 50.4 & 52.3 & 52.4 & 52.9 & 53.8 & 53.0 & 53.5 & 55.1 & 58.6 \\
\hline Total. & 71.2 & 70.9 & 69.1 & 70.5 & 71.5 & 71.5 & 71.9. & 71.8 & 71.6 & 72.1 & 73.3 \\
\hline
\end{tabular}

Bank Reserves.
The total reserves held by the national banks of the United States at the November 17, 1916, call amounted, as shown above, to \(\$ 2,472,622,000\), and exceeded by \(\$ 185,172,000\) the reserves held March 7, 1916, which were the largest ever previously reported.

\section*{DESIRABILITY OF ANTICIPATING TIME WHEN RESERVES SHALL ALL BE CARRIED WITH FEDERAL RESERVE BANKS OR IN VAULTS.}

Under the provisions of the Federal reserve act until November 16, 1917, country banks have the privilege of carrying two-twelfths of their reserves with national bank reserve agents, and the reserve city banks have the privilege of carrying three-fifteenths of their reserves with their reserve agents in the central reserve cities instead of with the Federal reserve banks or in their own vaults.

In view of the strong condition of the banks at this time, their large excess of reserves, the great ease of money, and the uncertainties of the future, it is believed that it would be a wise move to require the banks to transfer the residue of their reserves at this time, or in the immediate future, from their reserve agents to their Federal reserve banks or their own vaults. This could easily be done now without disturbance to the money market or inconvenience either to the banks themselves, who would be called on to transfer their reserves, or to their reserve agents.

The total'reserve held by all banks in their own vaults; or with Federal Reserve banks, on November 17, 1916, was 1,437 million dollars. As the aggregate reserves which the national banks were required to hold in their own vaults or with the Federal Reserve banks, or with reserve agents, amounted to only 1,456 million dollars, it is evident that all but 19 million dollars of the 1,035 millions of reserve held with approved reserve agents in the reserve and central reserve cities were merely surplus or excess reserves, the surplus or excess reserve held November 17, 1916, being 1,016 million dollars over and above the reserve required.

The excess reserve as distributed by geographical sections November 17,1916 , was as follows:

The New England States held an excess of 59 million dollars, or 59 per cent more than they were required to hold.

The Eastern States held an excess of 272 million dollars, or 41 per cent more than necessary.

The Southern States 179 million dollars, or 127 per cent more than required.

The Middle States an excess of 245 million dollars, or 67 per cent more than needed.

The Western States an excess of 145 million dollars, or 158 per cent above requirements.

The : Pacific States 115 million dollars, or 127 per cent above requirements.

Alaska and Hawaii one million dollars, or 164 per cent more than needed.

\section*{Cash Reserves and Balances with Reserve Banks.}

The specie and lawful money held by the national banks on November 17, 1916, amounted to \(\$ 788,344,000\) as compared with \(\$ 846,775,000\) November 10,1915 , but this omission of the banks to show an increase in their holdings of specie and lawful money is entirely accounted for by the transfer by national banks of a large portion of their reserves to the Federal Reserve banks after the opening of these banks November 16, 1914.

The total amount of specie and lawful money held by the national banks October 31, 1914, was \(\$ 925,553,000\).

A year later, November 10, 1915, after the Federal Reserve banks had been in operation a year, the amount of specie and lawful money which the national banks held in their vaults, plus their balances with their Federal Reserve banks, aggregated \(\$ 1,212,960,000\), an increase of \(\$ 287,407,000\).

On November 17, 1916, the credit balances which the national banks held with their Federal Reserve banks, plus the specie and
lawful money in their own vaults, amounted to \(\$ 1,437,515,000\), being an increase as compared with October 31,1914 , of \(\$ 511,962,000\), and an increase as compared with November 10, 1915, of \(\$ 224,555,000\).

\section*{"Acceptances" Atiding Our Foreign Trade.}

Under section 13 of the Federal Reserve Act, any member bank is given power to accept drafts or bills of exchange drawn upon it and growing out of transactions involving the importation or exportation of goods, having not more than six months sight to run; but banks are limited in making such acceptances to an amount equal to onehalf of the bank's paid-in capital and surplus.

The following figures show the increase in "acceptances" based on imports and exports, as reported by the banks at the time of the several calls from September 2, 1915, to September 12,1916:

\section*{Acceptances by national banks, based on imports and exports.}
\begin{tabular}{|c|c|}
\hline September 2, 1915 & \$13, 077, 000 \\
\hline November 10, 1915. & 26, 808,000 \\
\hline December 31, 1915. & 31, 985, 000 \\
\hline March 7', 1.916. & 42, 677,000 \\
\hline May 1, 1916. & 59, 836,000 \\
\hline June 30, 1916. & 69, 303, 000 \\

\end{tabular}

Under subsequent amendments to the Federal Reserve Act the member banks have been also authorized, within prescribed limitations, to "accept" drafts and bills of exchange involving the domestic shipment of goods, provided they are secured by proper shipping documents at the time of acceptance, or are secured at the time of acceptance by warehouse receipts or other such documents conveying or securing title to "readily marketable staples;" and a further amendment to the act, authorizing member banks to "accept". drafts or bills of exchange drawn "for the purpose of furnishing dollar exchange as required by the usages of trade in the respective countries," still further broadens their powers in this connection.

The national banks have already developed a substantial foreign business under the authority thus given, and it is conceded that these provisions of the Federal Reserve Act have been a material aid in the development of our foreign commerce at this time.

In view of the unusual opportunities presented for the extension of our foreign trade by world conditions, these enlargements of the powers of the banks seem to have been particularly fortunate.

\section*{One Year's Growith of All Reporting Banks and Trust Companies in United States.}

Statement showing total resources of all reporting banks, including national and Sंtate institutions, and also the twelve Federal Reserve banks, on June 30, 1916, and June 23, 1915, with amount of increase or decrease in each.
[In thousands of dollars.]

1 Decrease.
The above table shows that for the 12 -months period ending June 30, 1916, the total resources of all reporting banks in the United States increased \(\$ 4,710,609,000\).

For the same period their deposits (individual and bank) increased \(\$ 4,592,194,000\), while the increase in loans amounted to \(\$ 2,145,073,000\).

The banks of the country increased their investments in bonds, securities, etc., to the extent of \(\$ 975,329,000\), and their real estate holdings increased \(\$ 33,237,000\).

The cash on hand June 30,1916 , was reported at \(\$ 1,911,717,000\), an increase during the year of \(\$ 150,980,000\).

It is noteworthy that borrowed money, including bills payable and notes rediscounted, was reduced from \(\$ 59,452,000\) on June 23, 1915, to \(\$ 53,468,000\) on June 30,1916 , a reduction of \(\$ 5,984,000\).

The total paid in capital, surplus, and undivided profits of all banks increased from \(\$ 4,589,736,000\) to \(\$ 4,663,986,000\), an increase of \(\$ 74,250,000\).

The resources of the national banks of the country November 17, 1916, exceeded by \(\$ 4,204,106,000\) the total resources, as of June 30 1916 (the latest date for which reports have been compiled), of all reporting State banks, savings banks, and private banks; and amounted to more than double the resources of all the loan and trust companies in the United States.

For the purpose of comparison, the number of reporting banks, together with their loans, total resources, capital, and individual
deposits for the fiscal years 1908 to 1916, inclusive, are shown in the following table:
[In millions of dollars.]

\section*{Abatement of Usury.}

In the last annual report of the Comptroller of the Currency, the practice of many national banks in some sections of the country, and of some national banks in nearly all sections, of charging usurious and unconscionable rates of interest on loans to customers was discussed at length, and numerous illustrations were furnished. It is extremely gratifying to be able to report a marked subsidence of this evil and the evidence of a general desire and effort on the part of the national banks to adhere to the provisions of the law governing the matter of interest rates.

The trouble has not, however, been fully rectified, and banks here and there continue to disregard the law in this respect, and to exact rates which can not be justified on any ground. These persistent offenders are being dealt with and it is hoped that in most cases they may correct their irregular and unlawful practices before it becomes necessary for this office to take steps for the annulment of their charters.
The following figures indicate the reduction which has taken place in the average interest rates charged on loans by national banks in certain sections of the country, according to the sworn reports of the banks:
In the State of Georgia, in September, 1915, 23 national banks reported that they were charging an average of 10 per cent per annum on all loans. In November, 1916, the number of banks reporting an average of 10 per cent had been reduced to 7 .

In Alabama, in September, 1915, 21 national banks admitted an average of 10 per cent per annum or more. In November, 1916, there were only 6 banks in Alabama reporting an average of as much as 10 per cent.

In Texas, in September, 1915, 317 national banks declared that they were charging on all loans an average of 10 per cent or more. In November, 1916, the number had been reduced to 122.
- In North Dakota, 90 national banks admitted, in September, 1915, that average interest rates of 10 per cent were being charged. In November, 1916, there were only 37 such banks.

In South Dakota, for the same period the national banks averaging 10 per cent or more were reduced from 25 to 10.

In Nebraska, as against 18 charging 10 per cent or more in September, 1915, there were only 6 in November, 1916.
- In Oklahoma, 300 national banks declared, in September, 1915, that they were charging an average of 10 per cent or more on all loans. In November, 1916, the number had been reduced to 193.

Throughout the entire country, in September, 1915, 1,022 national banks admitted average rates of 10 per cent or more. On November 17, 1916, the total number of such banks had been reduced to 558 .

In the last annual report attention was called to numerous instances where national banks were charging customers from 50 per cent to several hundred per cent per annum-in some cases more than 1,000 per cent-on some loans. These cases of extortion have, as a result of the work of this office, been greatly abated, but have not yet been entirely eliminated. A stringent antiusury law has been passed by the legislature of one or more States for suppression of usury in the State banks since this office directed attention to the evil; and it is exceedingly desirable that the Congress should enact legislation to enable this office more effectually to deal with offenses of this kind.

The Comptroller in his last annual report recommended the passage of a law to require national banks to keep a special record of all loans made by them upon which they charged, as interest or discount, rates in excess of those permitted by law, and empowering the Department of Justice to proceed against such offenders upon evidence to be furnished by the Comptroller of the Currency.

\section*{To Prevent Bank Failures.}

The Comptroller of the Currency, in his report for 1915, said:
"The establishment of the Federal reserve banks makes it practically impossible for any national bank operating in accordance with the provisions of the national-bank act and managed with ordinary honesty, intelligence, and efficiency to fail.
"Banks nearly always are broken, not by the failure of customers to whom they have lent money, not by bank robbers who have come from the outside, but by the tying up or dissipation of the banks' funds through loans to their own officers and directors, or to interests allied with or controlled by those officers and directors, or else by direct defalcations and embezzlements by trusted officers.
"If these evils are remedied-and they can be remedied if certain simple and much-needed amendments can be secured to the nationalbank act-failures among national banks can be reduced to a negligible number, or be absolutely eliminated."
The experience of the past 12 months has manifested in many ways the importance of the early adoption of amendments to the National-Bank Act recommended to the Congress a year ago. Had those amendments been enacted it is believed that nearly all, if not all; of the bank failures which have taken place in the past 12 months might have been avoided. Therefore, for the protection and benefit of the depositors and stockholders of national banks, as well as in the interest of the customers and the communities dependent upon these banks for banking facilities necessary for their growth and prosperity, I again recommend the adoption of the amendments to which I called attention in my preceding annual report, including the following:

\section*{Legislation recommended.}

\section*{TO PROHIBIT OFFICERS OF BANES FROM BORROWING FROM THEIR OWN BANKS.}

First. That the officers of a national bank be prohibited from borrowing funds of the banks by which they are employed.

TO PREVENT LOANS TO DIRECTORS EXCEP'T WITH TEE APPROVAL OF THE BOARD.
Second. That no loan be made by any national bank to any of its directors or to a firm in which a director may be a partner without formal authority of the board of directors of the bank, expressed by affirmative vote of at least two-thirds of directors present.

TO LIMI' DIRECT AND INDIRECT LOANS TO ONE INDIVIDUAL, FIRM, OR CORPORATION.
Third.. That a conservative and proper limitation be placed upon the aggregate amount of money any one person, company, corporation, or firm may obtain from a national bank through the discounting of commercial paper and bills of exchange. The limitation of 10 per cent of the capital and surplus under section 5200 , United States Revised Statutes, does not apply to "bills of exchange drawn in good faith against actually existing values and the discount of commercial or business paper actually owned by the person negotiating the same." It is suggested that the aggregate liability of any person, company, corporation, or firm on loans on commercial paper or bills of exchange should in no event exceed 25 per cent of the capital and surplus of the bank.
It is recommended also that a specific penalty be provided for the violations of section 5200, enforceable against the officers and directors of the bank responsible for the violation, in addition to the statutory penalty for forfeiture of charter for violation of the nationalbạnk act.

\section*{TO PROVIDE SUITABLE PENAITY FOR MAKING OF EXCESSIVE LOANS.}

Fourth. That the penalty for an excessive loan be the disqualification of the officer making or granting the loan, or the imposition of a suitable fine, or both, in addition to the civil liability incurred by reason of making such loan.

A fruitful source of loss to banks has been the making of excessive loans, and yet the only penalty provided under the present law for this offense is the forfeiture of the bank's charter, which, if resorted to, would result in most cases in a hardship to the bank and its shareholders quite out of proportion to the offense.

TO AUTHORIZE THE COMPTROLLER TO BRING PROCEEDINGS AGAINST DIRECTORS FOR LOSSES SUSTAINED BY BANK THROUGH VIOLATION OF THE NATIONAL-BANK ACT.

Fifth. That the Comptroller of the Currency be authorized to bring proceedings against directors of a national bank for losses sustained by the bank through violations of the provisions of the nationalbank act or the Federal reserve act.
Section 5239, United States Revised Statutes, provides as follows:
If the directors of any national banking association shall knowingly violate, or knowingly permit any of the officers, agents, or servants of the association to violate, any of the provisions of this title, all the rights, privileges, and franchises of the asso-
ciation shall be thereby forfeited. Such violations shall, however, be determined and adjudged by a proper circuit, district, or Territorial court of the United States, in a suit brought for that purpose by the Comptroller of the Currency, in his own name, before the association shall be declared dissolved. And in cases of such violation every director who participated in or assented to the same shall be held liable in his personal and individual capacity for all damages which the association, its shareholders, or any other person shall have sustained in consequence of such violation.

Banks often have sustained large losses as a result of the willful and persistent disregard by its directors of the clear provisions of the national-bank act. These losses, resulting from violation of the law by directors, fall upon the stockholders. The directors who have occasioned these losses by involving the bank in unlawful transactions to facilitate or promote schemes or enterprises in which the directors may be concerned, are found sometimes to be holders or owners of but a few shares of the stock of the bank the affairs of which they are directing and the funds of which they frequently have tied up in the promotion of their own private schemes. Very often stockholders never are informed of the losses the bank has suffered through these irregular transactions. It is the practice of some banks to keep their transactions from shareholders, especially those transactions which have resulted in losses. Thousands of banks give stockholders, at the close of each fiscal year, little or no information of the sources of the earnings and the details of the disbursements and losses.

Even when shareholders have knowledge of the losses incurred through violations of the law by the officers or directors of the bank, should they proceed to bring suit against the unfaithful directors for the benefit of themselves and their fellow shareholders, such action might precipitate a run upon the bank and result in suspension or unnecessary loss. Experience has shown that losses occurring from faults or improprieties of directors sometimes are charged to "profit and loss" account by the guilty directors themselves, and the stockholders never are apprised of the results of the mismanagement. The evil effects of the wrongdoing fall upon the innocent stockholders and the wrongdoers escape.

\section*{AUTHORITY FOR REMOVAL OF DIRECTORS GUILTY OF PERSISTENT VIOLATIONS OF THE NATIONAL-BANK ACT.}

Sixth. That the Comptroller of the Currency be empowered, with the approval of the Secretary of the Treasury, to require the removal of a director or directors or any officer of a bank guilty of the violation of any of the more important provisions of the act, and to direct that suit be brought in the name of the bank against such director or directors, after they cease to be connected with the bank, for losses sustained by their malfeasance or misfeasance in office.

PREVENT DELAYS IN TAKING DIRECTORS' OATHS.
Seventh. That the law provide that if a director when elected does not qualify and forward his oath to the Comptroller within 30 days after his election a vacancy shall be declared immediately, to be filled by the remaining directors, as provided by section 5148, United States Revised Statutes, and the derelict director be ineligible for reelection as director for that year.

\section*{ESTABLISHMENT OF APPROPRIATE PENALTIES FOR VIOLATIONS OF LAWS AND regulations.}

Eighth. That the Comptroller's office be empowered to penalize, by the imposition of appropriate fines, all infractions and violations of the law and the regulations of this office made in pursuance of the provisions of the national-bank act, and that these fines should be imposed upon the offending officers, as well as upon the bank.- Experience has also made it very clear that violations of certain sections of the law should be punishable with imprisonment, as well as fine, suits to enforce such penalties, of course, to be instituted by the Department of Justice in the United States courts.

\section*{AMENDMENT TO PROVIDE THAT SUITS AGAINST USURERS BE BROUGHT BY DEPARTMENT OF JUSTICE.}

Ninth. That an amendment be adopted authorizing and directing the Department of Justice to bring suit against national banks guilty of usury upon information furnished either through the Comptroller of the Currency or through other sources.

TO AUTHORIZE SPECIAL INTEREST CHARGES FOR SMALL LOANS.
Tenth. That section 5197, United States Revised Statutes, be so amended as to authorize a national bank to make a charge of 25 cents on any loan, even though that charge might exceed the legal rate authorized by law. The amendment should be so framed, however, as to make it impracticable for a bank to evade the intent of the law by requiring customers to make a multitude of small notes and then charge 25 cents for each note.

Such an evasion of the law against usury might, perhaps, be prevented by providing that if a minimum charge of 25 cents shall have been made to a customer on any particular day, and this charge shall be in excess of the legal rate of interest, no similar minimum charge shall be made the same day to the same customer on any other note, if in excess of the legal rate. This would prevent a bank from requiring a customer who might wañt to borrow \(\$ 100\) for 30 days from giving 20 notes for \(\$ 5\) each, to be charged 25 cents on each note, which would amount to \(\$ 5\), or 60 per cent per annum for the accommodation.

\section*{TO PREVENT OR LIMIT OVERDRAFTS.}

Eleventh. That the laws of the respective States in regard to overdrafts be made applicable to national banks, and that the individual liability prescribed by section 5239, United States Revised Statutes, shall be made applicable to any violations of this provision, and also that the officers of the national bank shall be required to bring before the directors, in writing, at each directors' meeting, a list of all overdrafts made since the previous meeting of the board.

In some States directors, officers, and employees of banks who knowingly overdraw their accounts are guilty of felony and may be imprisoned.

> TO LIMIT INTEREST PAID ON DEPOSITS.

Twelfth. That the rates of interest which any national bank may pay on its deposits shall not exceed 4 per cent per annum unless the fighest rate for time paper fixed by the Federal reserve bank of the
district shall be more than 4 per cent, in which event the rate of interest that may be paid may equal but not exceed such discount rate charged at that time by the Federal reserve bank of the district: Provided, however, That if the laws of a State fix the maximum rate of interest that may be allowed on bank deposits, the rate so fixed for State banks be applicable also to national banks in that State.

\section*{LIMITATION OF DEPOSITS TO EIGHT OR TEN TIMES CAPITAL AND SURELUS.}

Thirteenth. That the total deposits which a national bank may receive shall be limited to eight or ten times the unimpaired capital and surplus of the bank. The experience and observations of this office during the past year strongly emphasize the importance of such legislation, the reasons for which have been presented in a previous annual report.

\section*{AMENDMENT TO DISTRICT LAWS TO PREVENT "WחDCAT" BANKING.}

Fourteenth. That the laws of the District of Columbia be amended to prevent the irregularities and loose methods which arise from the establishment in the District of savings banks and building and loan associations organized in different States and whose charters do not contain the restrictions and provisions which are necessary for the sound and safe conduct of the banking business.

It is recommended that an act be passed providing for the incorporation of savings banks in the District, and prohibiting the estabtishment of any savings bank or building and loan association not incorporated under the laws of the District for the purpose of carrying on its business in the District of Columbia.

\section*{TO REQUIRE OFFICERS AND. EMPLOYEES TO GIVE SURETY BONDS.}

Fifteenth. That all officers of a national bank having the custody of its funds, money, or securities, and all officers, tellers, or other employees of the bank engaged in the handling of its money shall furnish surety bonds, preferably the bonds of an established surety. company.

TO REQUIRE CERTIFICATES OF DEPOSIT TO BE SIGNED BY TWO OFFICERS.
Sixteenth. That all certificates of deposit must be signed by two officers of the bank, and a penalty provided for the issue of any such certificate not signed by two officers. The records of the office show how heavy and needless losses have been sustained by banks for failure to observe this safeguard.

\section*{TO PREVENT ERASURES ON THE BOOKS OF A BANK.}

Seventeenth. That no officer or employee of a national bank shall erase or cause to be erased or removed, either by acid or abrasion, any entries on the books of any national bank. Where entries have been made inadvertently or erroneously and it is desired to correct them, they should be canceled by having three lines drawn across them in black or red ink in such a manner as to indicate its cancellation, but not to make it impossible to decipher the original entry.

National banks have suffered serious losses from erasures and changed entries by dishonest bookkeepers and officers to conceal or to falsify transactions.

\section*{STANDARDIZATION OF BY-LAWS.}

Eighteenth. That authority be given to standardize the by-laws of national banks and provide, inter alia, for the annual meetings of stockholders and for the submission to shareholders of definite reports as to the bank's operations and earnings and general condition. Stockholders sometimes complain bitterly of the scant information laid before them by their officers in charge.

REMOVE LIMITATION ON DENOMINATION OF NATIONAL-BANK NOTES.
Nineteenth. That the limitation which restricts the amount of circulating notes in the denomination of \(\$ 5\) to one-third of the total circulation issued by each national bank be removed. It is recommended that the proportion of notes of each particular denomination of each bank be left to the individual banks, subject to the approval of the Comptroller of the Currency.
rechartered banks should be allowed to use bank-note plates of original BANK.
Twentieth. That rechartered national banks be authorized to continue the use of the old bank-note plates. The repeal of the act of July 12, 1882, to that extent is recommended, as its enforcement merely subjects both the banks and the Government to needless expense.
The rechartered banks also should be permitted to utilize the notes of the original bank which may have been prepared by the Bureau of Engraving and Printing, with the proviso that these notes shall be given a mark of identification, to distinguish them from the notes issued prior to the rechartering of the bank, the old plates also to be given an appropriate mark of identification. Because of the present provisions of the law \(\$ 4,335,580\) of unissued currency belonging to banks whose charters were renewed was destroyed during the fiscal year ending October 31, 1916.

\section*{ENGRAVED SIGNATURES FOR NATIONAL-BANK NOTES.}

Twenty-first. That the engraving of signatures on national-bank note plates be authorized.
to authorize nattonal banks to establish branches in the untted states.
Twenty-second. That national banks, with the approval of the Comptroller of the Currency, shall be allowed to establish and maintain branches within certain limits, for example, within city or county lines, but not without the boundaries of the State in which the parent bank may be located, and if such State be partly within one Federal reserve district and partly in another Federal reserve district such branches shall be established only in that portion of the State which is in the same Federal reserve district as the parent bank. No national bank to be permitted, however, in this country, to have more than 12 branches. The capital of the parent bank to be
\[
62015^{\circ}-\text { FI } 1916-30
\]
increased, with the establishment of each branch in the town in which the bank is located, in an amount equal to not less than \(50^{\circ}\) per cent of the minimum capital which would be required for the organization of a national bank in the city wherein the parent bank is located, and the capital of the parent bank shall be increased with the establishment of each branch outside the city where the parent bank is located in an amount equal to the capital now required by the national-bank act for the organization of a national bank in the place where the proposed branch is to be located.

\section*{TO PERMIT BRANCE BANES IN ALASKA AND INSULAR POSSESSIONS.}

Twenty-third. That national banks be permitted to establish branches in Alaska and in the insular possessions of the United States.

PROVISION FOR CONSOLIDATION OF NATIONAL BANKS.
Twenty-fourth. That provision be made for actual consolidation of national banks along lines which would eliminate the embarrassments which arise under the present method of bringing about the consolidation of banks and which involve the liquidation of one of the banks.

FURTHER AMENDMENTS RECOMMENDED.
The experience in the past 12 months shows that several further amendments to the national-bank act ought to be adopted in the interest of the depositors or shareholders of the banks or of the general public, and I therefore submit the following further recommendations:

TO PROVIDE A PENALTY FOR MAKING FALSE FINANCIAL STATEMENTS FOR THE PURPOSE OF OBTAINING CREDIT FROM NATIONAL BANKS.

That the Criminal Code be so amended as to provide that any person, firm, or corporation obtaining a loan or credit from a national bank based on a false statement, willfully made, of the financial condition of the borrower, shall be guilty of a felony and that appropriate penalties be provided.

TO PROVIDE PUNISHMENT FOR BREAKING AND ENTERING A NATIONAL BANK FOR THE PURPOSE OF THEFT OR ROBBERY.

The penalties provided by the Criminal Statutes of the various States for housebreaking and burglary vary and it frequently happens that criminals guilty of such offenses, if apprehended, are not adequately punished. It is therefore recommended that the breaking or entering of a national bank or any place or building occupied by such bank, for the purpose of theft or robbery, shall be made a Federal crime to be prosecuted in the proper District Court of the United States.
to Limit investment in bank bullding.
Section 5136, United States Revised Statutes, at present permits a national bank to invest its funds in a bank building for its own use, but there is no limitation upon the amount of money which a national bank may tie up in this manner. The records of this office show various instances where banks have been brought to grief and where their creditors have sustained serious losses because of the tying up
of an excessive proportion of their resources in elaborate, ostentatious, and unnecessary bank buildings.
It is respectfully recommended that section 5136 be amended to provide that no national bank shall be permitted to tie up by investment in an office or bank building an amount in excess of the paid-in capital of the bank. This provision shall also apply to trust companies and banking institutions doing business in the District of Columbia. A further limitation based on total resources would also be wise.

TO AUTHORIZE UNITED STATES TREASURER TO SELL BONDS SECURING OIRCULATION 30 days after a bank goes into liquidation.

Under section 5222, United States Revised Statutes, a national bank going into voluntary or involuntary liquidation is given six months in which to settle its circulation liability before the Treasurer is authorized to sell the bonds securing the circulation. As there is no provision in the law by which a bank in liquidation can be forced to maintain its 5 per cent redemption fund, and as the Treasurer is required by law to redeem all bank notes as presented, it is respectfully recommended that the Treasurer be authorized to sell the bonds securing circulation at any time after the expiration of 30 days from the date on which the bank goes into liquidation.

\section*{NEW LAW AUTHORIZING BANKS IN SMALL TOWNS TO NEGOTIATE REAL estate loans and place insurance.}

During the past year the Comptroller of the Currency supplemented the recommendations contained in his last annual report to the Congress with a special recommendation, submitted in June, 1916, that national banks in certain small towns and villages be permitted to transact an insurance business, and also a business for the negotiation of loans on real estate.

A bill in substantial accordance with this recommendation was passed by Congress, and approved by the President on September 7, 1916.

In the appendix to volume 2 of the report of the Comptroller will be found a copy of the rules and regulations under which the national banks are now permitted to engage in such business.

\section*{New Banks Chartered and Charters Extended and Reextended.}

During the 12 months ending October 31, 1916, a total of 122 original charters were granted national banks.
Charters are granted to national banks for a period of 20 years from the date of their organization. In the year ended October 31 last 20 associations reached the termination of their existence, and their charters were extended for an additional period of 20 years under authority of the act of July 12, 1882. In the same year the charters of 22 banks which had been extended under the act of 1882 were extended for a further period of 20 years under the act of April 12,1902 . The total number of charters extended under the act of 1882 was 3,364 , and under the act of \(1902,1,276\).

In the coming year the charters of 36 banks will expire for the first time and 12 for the second. A list of banks the charters of which will expire during the year ending October 31, 1917, will be found in volume 2 of the report of the Comptroller.

\section*{EXTENSION OF CHARTER OF THE RIGGS NATIONAL BANK OF WASHINGTON.}

Among the national banks whose original charters expired during the past 12 months was the Riggs National Bank of Washington, D. C., whose charter ran out June 27, 1916. On May 23, 1916, this bank filed an application for an extension of its charter for another period of 20 years.

Section 3 of the act of July 12, 1882, provides:
That upon the receipt of the application and certificate of the association provided for in the preceding section, the Comptroller of the Currency shall cause a special examination to be made, at the expense of the association, to determine its condition; and if after such examination or otherwise, it appears to him that said association is in a satisfactory condition, he shall grant his certificate of approval provided for in the preceding section, or if it appears that the condition of said association is not satisfactory, he shall withhold such certificate of approval.

Previous examinations of this bank had shown that during the entire period of its existence it had been guilty of persistent violations of the national banking act and had been conducting its business in continuous disregard of regulations and admonitions of the Comptroller's Office. Its violations of the law had begun shortly after its organization in 1896 and had continued throughout the life of the bank, up to 1914, when they were checked as the result of the action of the Comptroller of the Currency.

The bank had attempted by various devices and subterfuges to conceal its irregular and unlawful practices and had persistently evaded or answered imperfectly various requests for information and data which the Comptroller considered it important and necessary to have in order to be properly informed as to its condition and operations, so that the Comptroller of the Currency had experienced much difficulty in ascertaining its true condition.
FINE IMPOSED FOR BANE'S REFUSAL TO FURNISH DATA CONCERNING 'dUMMY' AND OTHER LOANS TO ITS OFFICERS ETC.
Finally, on February 1, 1915, the bank definitely refused to furnish to the Comptroller of the Currency certain information asked for as to the "dummy" loans which the bank had been making through a period of years to officers and others, and also as to other loans which the bank had been making to its president, vice presidents, cashier, and other officers, and the members of the families of its officers.

Upon the bank's refusal to furnish this information, it was notified that it was subject to the imposition of a penalty of \(\$ 100\) per day under section 5213, United States Revised Statutes.

On March 30 the Comptroller notified the Treasurer of the United States to withhold from the bank \(\$ 5,000\) of interest due April 1, 1915, on certain United States bonds held for account of the Riggs National Bank, in order that the said \(\$ 5,000\) might be collected on account of the penalty which the bank had incurred for its refusal to furnish the data demanded by the Comptroller as provided by statute. The bank thereupon filed an injunction suit in the Supreme Court of the District of Columbia to restrain the Secretary of the Treasury, the Comptroller of the Currency, and the Treasurer of the United States from withholding said \(\$ 5,000\), and, in its bill of complaint, it alleged conspiracy and persecution on the part of the Government officers against the bank.

The court, after a full hearing, in an interlocutory decision on May 21, 1915, promptly dismissed the complaint so far as it alleged persecution or malice on the part of the Government officers. The court indicated that if "malice" was shown it was on the part of the bank and the bank's officers and not on the part of the Government officers; declared that the Comptroller was right in refusing, under the circumstances, to permit the Riggs National Bank to be designated as a depository for other banks, and said that it would decide later the question of the validity and the legality of the imposition of the \(\$ 5,000\) fine.

Subsequently, in May, 1916, the court handed down a lengthy decision, in which the position taken by the Government officers was upheld in every respect, but because of a technical omission of the Comptroller in his letter demanding information, to follow strictly the language of the statute, by demanding that the bank furnish the data called for over the signatures of the president and cashier and three directors, instead, as the law provided, over the signatures of the president or cashier and not less than three directors, the particular \(\$ 5,000\) fine imposed for omission to comply with that specific demand could not be collected. The court declared that the Comptroller of the Currency was fully within his authority in demanding the information which he had called for, and showed that the fine could be imposed and collected if the bank should at any time refuse any demand for the data desired if demanded as the statute provides to be "verified by the oath or affirmation of the president or cashier, and attested by the signature of at least three of the directors."

COURT'S DECISION COMPLETELY SUSTAINED COMPTROLLER'S RIGHT TO RECEIVE EVERY REPORT DEMANDED.
On this point the language of the decision in referring to the Comptroller's letter to the bank in which the data was demanded, was as follows:
"The demand was twofold:
"First, for information in regard to all direct loans made by the bank to certain of its then officers; and
"Second, for information in regard to all indirect or dummy or concealed loans made since the organization of the bank for the benefit, directly or indirectly, of those officers or any of them, including all loans for which they or any of them had indorsed or for which they had furnished the whole or any part of the collateral by which loans to any of them were secured, and for other information as shown by the quotation of said paragraph above.
"In the view which the court takes of the power of the Comptroller, these demands were entirely within his powers.
"* * * It is perfectly obvious that as to concealed loans made for the benefit of the officers of the bank no possible limit to the scope \({ }_{*}\) of an in \(_{*}\) inuiry by the Comptroller could be reasonably suggested. * * *
"The demands made by the Comptroller were that the bank make certain reports. If the demand had included the production of books and papers of the plaintiff, the officers of the bank would have no privilege of refusing to produce them because they might contain matter which would incriminate the officers or lead to punishment of
the corporation. (Hale \(v\). Henkel, 201 U. S., 42 ; Wilson \(v\). United States, 221 U. S., 361.) As was stated in the latter case, the State has visitorial powers over corporations. The fourth amendment of the Constitution protects a corporation against unreasonable searches and seizures, but the fifth amendment providing against compelling a person to be a witness against himself in a criminal case does not prevent the compulsory production of the books of the corporation by one of its officers, so here the bank can not excuse the failure to give a report simply because any of its officers required to furnish it raise the question of self-incrimination."

OFFICERS AND DIRECTORS SIGN LETTER ADMITTING COMPTROLLER'S RIGHTS AND PLEDGITNG OBEDIENCE TO LAW AND REGULATIONS IN FUTURE.

After the Supreme Court of the District rendered its decision, the Riggs National Bank, in a letter signed by its president, both vice presidents, cashier, and assistant cashier, and 14 directors, including all directors who were officers, acknowledged the full and complete authority of the Comptroller's Office as confirmed by the court's decision, and the signers solemnly and severally pledged themselves to conduct, in the future, the affairs of the bank-
"in strict compliance with the national-bank act and all the laws of the United States, and in conformity with the lawful rules, regulations, and requirements of the office of the Comptroller of the Currency,"
and in their letter, in referring to the court decision, the bank's officers and directors said:
"The court sustains the right of the Comptroller to have the reports and information called for, and the right toimposefinesinaccordance with the provisions of the statute, if the bank should refuse them."
The Comptroller thereupon, having received these explicit and unequivocal assurances as to the bank's future management, granted to the Riggs National Bank an extension of its charter for the ensuing 20 years.

Copies of the interlocutory decision of the Supreme Court of the District of Columbia in the injunction case, and a copy of a digest or synopsis of the final decision of the Supreme Court of the District as given out by the Department of Justice when the decision was handed down in May, 1916, together with a copy of the decision of the Comptroller of the Currency dated June 21, 1916, on the application of the bank for a renewal of its charter, are appended hereto as Exhibits A, B , and C .

There is also published in the appendix to volume 2 of the report of the Comptroller of the Currency the affidavit and answer of the Comptroller of the Currency in the injunction suit above referred to.

BANK OFFICERS CONVICTED OF CRIMINAL VIOLATIONS OF LAW DURING FLSCAL YEAR.

The Department of Justice reports the following list of officers and employees of national banks who have been convicted of criminal violations of law and sentenced to the penitentiary during the fiscal year ending October 31, 1916, for the offenses indicated:

National bank cases in which defendants were convicted or pleaded guilty during year ended October 31, 1916.
T. W. M. Boone, president, American National Bank, Fort Smith, Ark. \({ }^{\text {( }}\) False entries. Sentence, 7 years. September, 1916.
W. H. Garanflo, president, State National Bank, Little Rock, Ark. \({ }^{2}\) Misapplication. Convicted April, 1916. No record of sentence.
J. F. Harragan, vice-president, Dubuque National Bank, Dubuque, Iowa. \({ }^{3}\) Embeżzlement. Sentence, 5 years. December, 1915.
E. M. Dickinson, cashier, American National Bank, Fort Smith, Ark. \({ }^{1}\) Abstraction, misapplication, false entries. Sentence, 8 years. September, 1916.
R. D. Duncan, cashier, State National Bank, Little Rock, Ark. \({ }^{2}\) Misapplication. Convicted April, 1916. No record of sentence.
MaCalla Fitzgerald, cashier, First National Bank, London, Ky. Misapplication, false entries. Sentence, 5 years. May, 1916.
Geo. J. Homan, cashier, Dubuque National Bank, Dubuque, Iowa. \({ }^{3}\) Embezzlement. Sentence, 5 years. December, 1915.
John Hornung, cashier, Dresden National Bank, Dresden, Ohio. Embezzlement. Sentence, 13 years. December, 1915.
E. E. Lewis, cashier, National Bank of Commerce, Coweta, Okla. Misapplication, false entries. Sentence, 5 years. April, 1916.
M. M. Lowrey, cashier, Americus National Bank, Americus, Ga. Misapplication, false entries. Sentence, 5 years. November, 1915.
W. P. Phillips, cashier, First National Bank, Vinita, Okla. False entries. Sentence, 5 years. February, 1916.
W. M. Roberts, cashier, First National Bank, San Mateo, Cal. Embezzlement, Sentence 5 years. November, 1915.
W. H. Tebbs, cashier, Farmers and Merchants National Bank, Cisco, Tex. Embezzlement. Sentence 5 years. February, 1916.
P. A. Ball, assistant cashier, American National Bank, Fort Smith, Ark. \({ }^{1}\) Abstraction; misapplication; false entries. Sentence 8 years. September, 1916.
A. J. Biard, assistant cashier, First National Bank, Hugo, Okla. Embezzlement. Sentence 5 years. November, 1915.
John N. Deglman, assistant cashier, National Citizens Bank, Mankato, Minn. Embezzlement. Sentence 5 years. November, 1915.
A. J. Dowd, assistant cashier, American National Bank, Fort Smith, Ark. \({ }^{1}\) Abstraction; misapplication; false entries. Sentence 8 years. September, 1916.
Harry A. Jones, assistant cashier, Stoneham National Bank, Stoneham, Mass. Embezzlement. Sentence 5 years and 9 months. September, 1916.
Ernest G. Butler, teller, National City Bank, Indianapolis, Ind. Embezzlement. Sentence 5 years. May, 1916.
Carlos P. Cole, teller, First National Bank, Ashley, Pa. Abstraction. Sentence 5 years. November, 1915.
W. H. Connell, teller, Citizens National Bank, Meridian, Miss. Embezzlement. Sentence 5 years. September, 1916.
A. J. Finlayson, teller, First National Bank, Amsterdam, N. Y. \({ }^{4}\) Embezzlement. Sentence 5 years. February, 1916.
V. V. Foitik, teller, Livestock National Bank, South Omaha, Nebr. Embezzlement. Sentence 5 years. A pril, 1916.
Harry S. Gordon, teller, Union National Bank, Houston, Tex. Embezzlement. October, 1916.
Charles S. Lawson, teller, Exchange National Bank, Little Rock, Ark. \({ }^{5}\) Misapplication. Sentence 5 years. April, 1916.
John Oltmann, paying teller, Ridgewood National Bank, Ridgewood, N. Y. Embezzlement. Sentence 5 years. November, 1915.
Charles Seig, teller, Dubuque National Bank, Dubuque, Iowa. Embezzlement. \({ }^{3}\) Sentence 5 years. December, 1915.
A. H. Anderson, bookkeeper, First National Bank, Sheldon, Iowa. Abstraction and false entries. Sentence 5 years. June, 1916.
Wm. T. Brice, bookkeeper, First National Bank, Amsterdam, N. Y. \({ }^{4}\) Conspiracy. Sentence 2 years. February, 1916.
E. A. Bunker, bookkeeper, National State Capitol Bank, Concord, N. H. Abstraction. Sentence 5 years. March, 1916.

\footnotetext{
\({ }^{1}\) President, cashier, and two assistant cashiers of this bank convicted.
2 President and cashier of this bank convicted.
\({ }^{3}\) Vice president, cashier, and teller of this bank convicted.
- Teller, bookkeeper, and one other-no title given-convicted.
- Teller and one other-no title given-convicted.
}

Colbert Cecil, bookkeeper, Catlettsburg National Bank, Catlettsburg, Ky. Embezzlement. Sentence 5 years. April, 1916.
W. D. Cole, bookkeeper, State National Bank, Oklahoma City, Okla. Abstraction. Sentence 5 years. June, 1916.
John A. Duke, bookkeeper, Clearfield National Bank, Clearfield, Pa. Abstraction. Sentence 5 years. March, 1916.
John Finnegan, bookkeeper, First National Bank, Rome, N. Y. Abstraction; false entries. Sentence 5 years. May, 1916.
G. C. Merriman, bookkeeper, National Loan \& Exchange Bank, Columbia, S. C. Abstraction. Sentence 5 years. June, 1916.
Paul W. Sperling, bookkeeper, Commercial National Bank, Saginaw, Mich. Abstraction. Sentence 5 years. May, 1916.
Lloyd M: Dean, clerk, Indiana National Bank, Indianapolis, Ind. Abstraction. Sentence 5 years. May, 1916.
Wm. C. Gannon, clerk, Merchants-Laclede National Bank, St. Louis, Mo. Abstraction. Sentence 5 years. June, 1916.
A. O. Johnson, clerk, Fifth-third National Bank, Cincinnati, Ohio. Embezzlement. Sentence 5 years. November, 1915.
Earl D. Linnell, clerk, Palmer National Bank, Palmer, Mass. Abstraction. Sentence 5 years. January, 1916.
William Mink, clerk, Union National Bank, Cleveland, Ohio. Embezzlement. Plea of guilty July, 1916. No record of sentence.
C. W. Kay, messenger, Whitney Central National Bank, New Orleans, La. Embezzlement. Sentence 5 years. April, 1916.
John F. Young, messenger, Commercial National Bank, Kansas City, Mo. Abstraction. Sentence 5 years. January, 1916.
W. H. Cummins, aiding and abetting Lawson, teller, Exchange National Bank, Little Rock, Ark. \({ }^{5}\) Convicted April, 1916. No record of sentence.
Henry J. Nichols, aiding and abetting Brice in abstracting and misapplying funds of First National Bank of Amsterdam, N. Y. \({ }^{4}\) Sentence 5 years. February, 1916.

\section*{National-Bank Examinations.}

Marked progress has been made during the past 12 months toward improving and perfecting the work of the examination of national banks by the examining force. Under the provisions of the Federal reserve act each national bank is subject to at least two examinations each year and as many more as, in the discretion of the Comptroller of the Currency, may seem desirable. For the carrying on of this work the country has been divided into 12 national-bank examining districts, which are coterminous with the Federal reserve districts, and in each district there is now located a chief national-bank examiner who, under the supervision of the Comptroller of the Currency, has the immediate direction of the field examiners in his particular district.

The list of national-bank examiners as of October 31, 1916, was as follows:

\section*{Chief Examiners.}

\footnotetext{
Federal Reserve District-
No. 1-James D. Brennan, Boston, Mass.
No. 2-Charles F. Richmond (acting), New York City.
No. 3-Edward I. Johnson, Philadelphia, Pa.
No. 4-Silas H. L. Cooper, Cleveland, Ohio.
No. 5-Thomas P. Howard, Richmond, Va.
No. 6-James K. Doughton, Atlanta, Ga.
No. 7-Sherrill Smith, Chicago, Ill.
No. 8-Joseph M. Logan (acting), St. Louis, Mo.
No. \({ }^{9-}\) Peter M. Kerst, Minneapolis, Minn.
No. 10-Jay D. Rising, Kansas City, Mo.
No. 11-John C. Chidsey, Dallas, Tex.
No. 12-Claud Gatch, San Francisco, Cal.
}

\section*{Supervising National-Bank Examiner.}

Stephen L. Newnham, Washington, D. C.
Field Examiners.
First District.
N. S. Bean, Manchester, N. H.

George M. Coffin, New York City.
Harry F. Currier, Malden, Mass.

Otis M. Freeman, Providence, R. I.
T. J. Goodwyn, Montpelier, Vt.
D. C. Mulloney, Portland, Me.

Second District.

Harry L. George, Albany, N. Y.
H. G. Hanna, Elizabeth, N. J.
D. V. Harkin, New York City.

Benjamin Marcuse, New York City. Ebenezer Southall, Buffalo, N. Y. G. B. Wilkinson, New York City.

\section*{Third District.}

Daniel C. Borden, Johnstown, Pa. William W. Paddock, Philadelphia, Pa.
Charles R. Burrell, Wilkes-Barre, Pa.
Kinzie B. Cecil, Williamsport, Pa.
C. H. Chapman, Philadelphia, Pa.
D. F. B. Shepp, Tamaqua, Pa.

Carl M. Sisk, Pottsville, Pa.
George Stauffer, Lancaster, Pa.
Fourth District.

George E. Armstrong, Pittsburgh, Pa. Philip C. Berg, Hillsboro, Ohio.
A. B. Camp, Toledo, Ohio.

John B. Ohenault, Maysville, Ky.
George De Camp, Cincinnati, Ohio.

Robert C. McConaughy, Cleveland, Ohio. J. Frank Miller, Wilkinsburg, Pa. William M. Morgan, Louisville, Ky. George J. Stevens, Pittsburgh, Pa. Thomas C. Thomas, Columbus, Ohio.

Fifth District.

Edward J. Donahue, Washington, D. C.
R. J. C. Dorsey, Washington,.D. C.
R. Gordon Finney, Huntington, W. Va.

Claude Gilbert, Cumberland, Md.
Richard L. Hargreaves, Raleigh, N. C.

Robert L. Harris, Richmond, Va.
J. W. Pole, Greenville, S. C. Morton M. Prentis, Richmond, Va. J. B. Stringfellow, Roanoke, Va. James Trimble, Washington, D. C.

\section*{Sixth District.}

Thomas E. Fletcher, Cordele, Ga. William T. Marfield, New Orleans, La. W. C. Roberts, Birmingham, Ala.

William B. Roper, Atlanta, Ga. Edgar D. Walter, Chattanooga, Tenn.

\section*{Seventh District.}

Claude H. Beatty, Chicago, Ill.
H. C. Blackman, Hillsdale, Mich.
N. E. Haugen, Des Moines, Iowa.
E. F. Higgins, Chicago, Ill.

Raby L. Hopkins, Milwaukee, Wis.
Robert C. Houston, Laporte, Ind.
E. S. Hubbell, Elgin, 111.
J. L. Kennedy, Sheldon, Iowa.

Charles R. Mertens, Shelbyville, III.
William G. Minor, Cannelton, Ind. Robert Montgomery, Chicago, Ill.
Paul Partridge, Davenport, Iowa. C. F. Riddell, Indianapolis, Ind. Ellis D. Robb, Waterloo, Iowa. Miller Weir, Jacksonville, IIl. William H.' White, Paxton, Ill.

Eighth District.
E. H. Gough, Boonville, Ind.

William P. Kincheloe, Louisville, Ky.
Harry L. Machen, Little Rock, Ark.
John S. Wood, Centralia, Ill.

John K. Woods, Memphis, Tenn.
- Hal Woodside, Hannibal, Mo.

William R. Young, Springfield, Mo.

\section*{Ninth District.}

Harry E. Albert, Minneapolis, Minn:
Christopher H. Anheier, Fargo, N. Dak. J. W. Barton, Minneapolis, Minn.

Ward M. Buckles, Helena, Mont.
Thomas H. Campbell, Huron, S. Dak.

Oscar A. Carlson, Sioux Falls, S. Dak. Ben Hayes, jr., Fargo, N. Dak. William J. Schechter, Milwaukee, Wis. John F. Smith, Minneapolis, Minn.

Tenth District.

Lee R. Buchanan, Lincoln, Nebr.
Sherwook Crocker, Denver, Colo. William E. Fair, Cheyenne, Wyo. Thurston P. Farmer, Tulsa, Okla. Charles H. Filson, Guthrie, Okla. George W. Goodell, Denver, Colo.
Edward S. Jernegan, Oklahoma City, Okla.

John D. Mossman, Topeka, Kans.
Luther H. Patton, Enid, Okla.
William H. Reed, Kansas City, Mo. John Rush, Omaha, Nebr. Floyd Seybolt, Lincoln, Nebr. Thomas M. Williams, Hutchinson, Kans. C. F. Winters, Kansas City, Mo.

Eleventh District.

Richard H. Collier, Sherman, Tex. Charles W. Foster, Houston, Tex. Edgar F. Gossett, El Paso, Tex. William Z. Hayes, Tyler, Tex.

William E. Hutt, Sherman, Tex. Jesse L. Penix, Austin, Tex. Allison D. Thompson, Waco, Tex.

T:welfth District.

Fred Brown, Boise, Idaho.
H. R. Gaither, Portland, Oreg.

William M. Gray, San Francisco, Cal.
John A. H. Kerr, Los Angeles, Cal.
Martin McLean, Seattle, Wash.

Charles C. Otto, San Francisco, Cal. Douglas A. Swan, Salt Lake City, Utah. Oscar Thompson, Los Angeles, Cal. Walter E. Wilcox, Oakland, Cal.

\section*{report of examination furnished national banks.}

During the past year the Comptroller inaugurated, for the first time, the plan of furnishing each national bank, after each examination, a comprehensive copy of the examiner's report, showing in detail the condition of the bank, with notation of irregularities and matters criticized. Each examiner, furthermore, after every examination, also furnishes to the Comptroller's Office a special supplementary report containing data more or less confidential, with such special recommendations as the situation seems to call for.

This departure from previous practice has been strongly approved by the banks generally; and advices received indicate that the plan of providing banks with copies of the reports of examinations has resulted, in thousands of cases, in giving to the directors of banks, as well as officers, a clearer insight as to the bank's condition, and a better comprehension of its management and operations than they ever had before; and has also effected a material saving to many banks by enabling them to dispense with costly examinations, which some of them have heretofore been receiving periodically from special accountants.

\section*{Condition of National Banks at Date of Each Call During the Report Year.}

During the 12 months ended October 31, 1916, national banks have made, as in the preceding 12 months, six reports of condition, in lieu of the five rendered in preceding years.

The earliest call for the year covered by this report was made November 10, 1915, and the succeeding five have been made for December 31, 1915, March 7, May 1, June 30, and September 12, 1916. The resources and liabilities of the banks at each of the dates indicated are shown in the table following.
[In thousands of dollars.]

\end{tabular}
\({ }^{1}\) Prior to May 1 this item read "Letters of credit."
\({ }^{2}\) Beginning with report for Sept. 12, 1916, notes and bills rediscounted are not included in loans and discounts, as was the previous custom.

\section*{LOANS AND DISCOUNTS.}

As was the case during the 12 months ended September 2, 1915, loans and discounts increased steadily at each report date during the year ended September 12, 1916. The greatest increase between report dates is shown on November 10, 1915, when loans were \(\$ 477,249,000\) greater than on September 2, 1915. The proportion of loans to total assets remained approximately 55 per cent except that on May 1 the proportion was a little less than 54 per cent.

\section*{CLASSIFICATION OF LOANS AND DISCOUNTS.}

A new item appears in the classification of loans and discounts on June 30, 1916, namely, "Acceptances of other banks discounted," and as this item represents a new class of business, the aggregate held on that date added to the loans and discounts the sum of \(\$ 24,500,000\). Reference to the following table shows that while the aggregate loans have increased since June 23, 1915, the percentages of the various classifications remain practically the same with feew exceptions. The percentage of demand paper secured by collateral is greater by about 1.8 per cent, and time paper secured by collateral, other than stocks and bonds, decreased 1.8 per cent.

The increase in the total loans is distributed among central reserve cities, other reserve cities, and banks located elsewhere instead of being confined to the reserve city banks, as was the case in June, 1915. The table also shows changes in the amounts and percentages of the various classes of paper held by banks at the time of the June calls in 1914, 1915, and 1916.
[In thousands of dollars.]

\hline
\end{tabular}

The aggregate paper maturing in 90 or less days held on June 23, 1915, was \(\$ 3,906,617,000\) and of paper maturing in over 90 days, \(\$ 2,753,355,000\). The shorter-time paper therefore increased during the year by \(\$ 750,545,000\), or over 19 per cent, as compared with the increase in the longer-time paper of \(\$ 268,650,000\), or over 9 per cent.

\section*{OVERDRAFTS.}

Overdrafts show no great variation in amount during the year, the largest amount appearing on September 12,.1916, when they were \(\$ 7,839,000\), or thirteen one-hundredths of 1 per cent of deposits subject to check. This sum is an increase of \(\$ 2,778,000\) since September 2,1915 , when overdrafts to the amount of \(\$ 5,061,000\), or eleven one-hundredths of 1 per cent of deposits subject to check, were reported.

The lowest point for the year was in March, when accommodations of this character were \(\$ 5,493,000\).

\section*{UNITED STATES BONDS.}

The aggregate of United States bonds, which was \(\$ 781,726,000\) on September 2, 1915, has steadily decreased at each call date during the year, reaching the lowest point on September 12, 1916, when the amount was \(\$ 729,777,000\), a decrease of \(\$ 51,949,000\). This reduction is occasioned mainly by retirement of national-bank circulation: The bonds thus disposed of by national banks were nearly all purchased by the 12 Federal reserve banks, whose holdings on October 31, 1916, including \(\$ 11,267,000\) one-year 3 per cent notes, aggregated \(\$ 51,859,200\).

\section*{OTHER BONDS, SECURITIES, ETC.}

An increase of more than \(\$ 405,000,000\) is shown in the aggregate of bonds and securities other than United States bonds between September 2, 1915, and September 12, 1916, the periods of greatest increase in these investments being between December 31, 1915, and March 7, 1916, when the aggregate increase was \(\$ 89,638,000\), and June 30 and September 12, when the increase was \(\$ 96,795,000\).

\section*{STOCKS.}

The aggregate of stock other than stock of Federal reserve banks has varied but little, and on September 12, 1916, was only \(\$ 93,000\) more than on November 10, 1915. The amount of stock in the Federal reserve banks decreased slightly between December 31, 1915, and March 7, 1916, but on May 1, 1916, it shows an increase of \(\$ 183,000\) over the amount held on November 10, 1915. It again decreased by \(\$ 50,000\) on June 30, after which it again increased by \(\$ 272,000\), and on September 12, 1916, it aggregated \(\$ 53,923,000\). The net increase since November 10,1915 , is \(\$ 405,000\).

\section*{INVESTMENT SECURITIES OF NATIONAL BANKS CLASSIFIED.}

The investments of national banks in United States bonds, including premiums, and in other bonds and securities and stocks on June 30 , 1916, amounted to \(\$ 2,351,960,000\), an increase in the aggregate of \(\$ 283,591,000\) since June \(23,1915\).

In the following table are shown these various investments in June, 1915 and 1916.
[In thousands of dollars.]
\begin{tabular}{|c|c|c|}
\hline Classification. & \[
\begin{aligned}
& \text { June } 23, \\
& 1915 .
\end{aligned}
\] & \[
\begin{aligned}
& \text { June } 30, \\
& 1916 .
\end{aligned}
\] \\
\hline State, county, and municipal bonds. & 244, 473 & 278, 180 \\
\hline Rallroad bonds....................... & 379,191 & 467,629 \\
\hline Other públic-service corporation bonds & 220,304 & 274,928 \\
\hline All other bonds (domestic)......... & 246,630 & 301, 503 \\
\hline Warrants, claims, judgments, etc. & 53, 341 & 48, 521 \\
\hline Foreign Government bonds...... & 33,787 & 116, 768 \\
\hline Other foreign bonds and securitles & 13,402 & 40,303 \\
\hline Stocks, Federal reserve bank. & 54, 200 & 53, 651 \\
\hline Stocks, all other. & 39,588 & 39,272 \\
\hline Total. & 1,284,916 & 1,620,755 \\

\hline Total bonds of all classes. & 2,068,369 & 2, 351,960 \\
\hline
\end{tabular}

A large increase will be noted in the foregoing table in the amount invested in foreign and other Government securities. The increase in these investments for the period in question is \(\$ 109,882,000\). The increase in investments in domestic bonds (exclusive of United States bonds), as indicated by the first four items of the table, amounts to \(\$ 231,643,000\), or more than double the amount of increase in foreign securities.

The following table shows domestic and foreign securities held in June of each year since these securities have been separately classified:
[In thousands of dollars.]

\end{tabular}

\section*{BANKING PREMISES AND OTHER REAL ESTATE OWNED.}

The amount invested in banking house and furniture and fixtures shows an increase at each report date, the aggregate being \(\$ 12,943,000\) greater on September 12, 1916, than on September 2, 1915.

Other real estate owned increased gradually in amount up to May 1, when it aggregated \(\$ 47,787,000\) or \(\$ 3,833,000\) more than on September 2, 1915. Since May 1 the amount has decreased at each report date, so that the increase for the year is but \(\$ 3,673,000\). The decrease in the amount since May 1 indicates some revival in the demand for real estate, enabling banks to liquidate property of this description taken for debt, etc.

\section*{DUE FROM BANKS.}

The amount due from the Federal reserve banks, which is a part of the reserve required by law to be maintained by national banks, shows a material increase at each report date except May 1, 1916, when a slight reduction occurred. Reference to the computation of reserve made up from reports of condition on May 1, 1916, however, shows that balances with Federal reserve banks at the reduced requirement were \(\$ 31,825,000\) in excess of the amount which the law required to be so deposited on that date. Under section 19 of the Federal reserve act the reserve on deposits required to be kept with Federal reserve banks increased by one-twelfth in the case of country banks and one-fifteenth in reserve city banks (exclusive of central reserve cities) on November 16 and May 16.

On December 31, 1915, the first date after the November increase, deposits with the Federal reserve banks aggregated \(\$ 403,985,000\), an increase of \(\$ 37,800,000\) over the amount shown November 10, and of \(\$ 88,576,000\) over September 2, 1915. On June 30, 1916, the first date after the second increase in the required amount, the aggregate shows an increase in the amount deposited of \(\$ 47,912,000\) over the figures appearing on the preceding date, May 1 , and of \(\$ 160,694,000\) over September 2, 1915. Between June 30 and September 12, 1916, however, the largest increase for the year is shown, although no additional amount was required by law to be so deposited. The increase between these dates amounted to \(\$ 54,925,000\), probably due to the
\[
62015^{\circ}-\mathrm{FI} 1916-31
\]
fact that the Federal reserve banks began on July 15, 1916, to exercise the functions of a clearing house for national and other member banks.

The following table shows increases and decreases of deposits with the Federal reserve banks since the beginning of the system:

The aggregate amount due from approved reserve agents (national banks located in reserve cities that have been approved by the comptroller as reserve agents) on September 2, 1915, \(\$ 811,380,000\), increased by November 10, 1915, to \(\$ 895,830,000\), and decreased on December 31 to \(\$ 834,392,000\), the lowest amount for the year. On March 7, 1916, however, the aggregate had increased by \(\$ 188,250,000\) reaching \(\$ 1,022,642,000\). A decrease is noted at the next date, May 1, and again on June 30, but on September 12 the aggregate had increased to \(\$ 936,339,000\) and shows a net increase for the year of \(\$ 124,959,000\).

Amounts due from all other banks and bankers show a net increase of \(\$ 182,768,000\) between September 2, 1915, when they were \(\$ 597,-\) 832,000 and September 12, 1916, when they were \(\$ 780,600,000\). The lowest point for the year was reached June 30, and the highest September 12.

The three classes of bank deposits combined aggregated \(\$ 1,724,-\) 621,000 on September 2, 1915, and \(\$ 2,247,967,000\) on September 12, 1916, a net increase of \(\$ 523,346,000\) in bank deposits.

\section*{EXCHANGES FOR CLEARING HOUSES.}

The volume of exchanges shows an increase on September 12 1916, over the aggregate on September 2, 1915, of \(\$ 105,395,000\), and at no time during the year were they as low as on September 2, 1915. The greatest business ás indicated by these exchanges appears on December 31, 1915, and May 1, 1916. Since the latter date the aggregate has decreased at both report dates. The increases and decreases in this account, however, can not be considered as evidence of an increase or decrease in the business activity, for since July 15, 1916, a large volume of clearings has been transferred from correspondent banks to the Federal reserve banks, and as this feature of the Federal reserve system is extended, exchanges for clearing houses will be proportionately lower.

\section*{BANK CIRCULATION.}

For the first time there appears in the abstract as a separate item, Federal reserve bank notes. These notes issued by the Federal reserve banks and secured by United States Government bonds were reported by the banks for the first time on May 1, 1916, but were included in the abstract for that date with Federal reserve notes. This was also the case on June 30. The Federal reserve circulating notes held have increased between September 2, 1915, and September 12, 1916, by \(\$ 6,410,000\).

Bills of other national banks were held in a less amount on June 30, 1916, than on September 2, 1915, although the calls between these dates show a greater amount held. After June 30, however, the amount increased and on September 12, 1916, shows \(\$ 4,619,000\) more than on September 2; 1915, the increase between June 30 and September 2 being \(\$ 8,118,000\).

\section*{SPECIE AND OTEER LAWFUL MONEY.}

The aggregate of specie (gold and silver coin and gold and silver certificates) and legal tender notes have decreased between September 2,1915 , and September 12,1916 , by \(\$ 56,822,000\) and \(\$ 17,664,000\), respectively. A decrease in the amount of lawful money was also noted for the year ended September 2, 1915. The only items of specie showing an increase for the current report year are gold coin which increased \(\$ 2,128,000\), gold clearing-house certificates \(\$ 12,977,000\), and fractional silver coin \(\$ 8,000\). This decrease is wholly due, as explained above, to the transfer of funds from the banks vaults to the Federal reserve banks.

\section*{Liabilities of National Banks.}

\section*{CAPITAL, SURPLUS, AND UNDIVIDED PROFITS.}

While the capital stock of national banks decreased between September 2, 1915, and September 12, 1916, by \(\$ 1,299,000\), owing to the decrease in the number of banks occasioned by consolidation, etc., as hereinbefore indicated, the surplus fund increased during the same period by \(\$ 8,831,000\) and the undivided profits by \(\$ 33,874,000\), so that while the actual amount invested in capital stock is a trifle less, the amount of working capital has increased in the sum of \(\$ 41,406,000\), or nearly 2 per cent since September 2, 1915.

It will be noted that two new items appear in the abstract for September 12, 1916, namely, "Amount reserved for taxes accrued" and "Amount reserved for all interest accrued." Both of these items prior to that date were included in the total of undivided profits and are so included in making the comparison between capital, surplus, and profits.

The usual decrease is noted in profits on December 31 and June 30, owing to the payment of dividends and also the usual increase in the surplus fund on the same dates. An increase in the surplus fund necessarily accompanies the declaration of dividends as section 5199 requires that at least one-tenth of the net earnings of the preceding period shall be carried to the surplus fund whenever a dividend is declared by a bank until the surplus fund of that bank equals 20 per cent of its capital. The aggregate of surplus of all banks on September 12, 1916,
was over 68 per cent of the capital, showing the extent to which many of the banks have built up their surplus fund far beyond the requirements of law, thereby strengthening their business by furnishing working capital and greater protection against loss to the depositors and other creditors, instead of distributing all available earnings as dividends.

\section*{CIRCULATION.}

As was the case during twelve months ended September 2, 1915, the national-bank notes have shown a reduction at each report date during the year ended September 12, 1916, the net decrease for the year being \(\$ 44,382,000\). The decrease in circulation is due to the advance in the price of the Government bonds by which the circulation is secured, and the sale of bonds by the banks at the advanced figures.

The volume of circulation outstanding at the date of,each call during the year ended September 12, 1916, issued by national banks in New York, the three central reserve cities, other reserve cities and in the country outside of reserve cities is shown in the following table in millions of dollars:
\begin{tabular}{|c|c|c|c|c|c|c|}
\hline Dates. & \begin{tabular}{l}
New \\
York \\
banks.
\end{tabular} & New York, Chicago, and St. Louis banks. & Other reserve city banks. & \[
\begin{aligned}
& \text { All } \\
& \text { reserve } \\
& \text { city } \\
& \text { banks. }
\end{aligned}
\] & Country banks. & Total, \\
\hline Nov. 10, 1915. & 35.2 & 63.6 & 172.1 & 235.7 & 477.8 & 713.5 \\
\hline Dec. \(31,1915\). & 35.7 & 63.3 & 171.9 & 235.1 & 478.2 & 713.3 \\
\hline Mar. 7, 1916. & 35.0 & 55.1 & 165.6 & 220.7 & 475.1 & 695.8 \\

\hline June 30, 1916: & 32.2 & 49.4 & 159.1 & 208.5 & 467.6 & 676.1 \\
\hline Sept. 12, 1916. & 31.8 & 48.8 & 159.3 & 208.1 & 466.0 & 674.1 \\
\hline
\end{tabular}

DUE TO BANKS.
The aggregate amounts due on open account to Federal reserve banks, approved reserve agents and other banks and bankers on September 2, 1915, \(\$ 2,466,056,000\), had increased on September 12, 1916, to \(\$ 2,915,663,000\) or by \(\$ 449,607,000\).

The amounts due to Federal reserve banks are in all cases exceedingly small, the largest amount since November 10, 1915, being \(\$ 17,000\) on. September 12, 1916. Amounts owing to approved reserve agents are likewise small and unimportant. In both classes of banks national banks maintain the reserve required by law and necessarily are very seldom debtors to them on open account.

\section*{INDIVIDUAL DEPOSİTS.}

The aggregate of time and demand deposits on September 2, 1915, was \(\$ 6,762,183,000\) as compared with \(\$ 8,445,649,000\) on September 12,1916 , or an increase of \(\$ 1,683,466,000\) for the year. Of this increase, \(\$ 1,282,273,000\), or 76 per cent is in demand deposits and \(\$ 401,193,000\) or 24 per cent in time deposits.

\section*{BONDS AND MONEY BORROWED.}

Liability on account of bonds and other securities borrowed, bills payable and rediscounts have decreased at each report date during
the year excepting May 1, and June 30, when only a nominal increase is noted. The aggregate of these liabilities on September 2, 1915, was \(\$ 145,624,000\) or less than one-half of the amount in October, 1914, including clearing-house loan certificates then outstanding. On September 12, 1916, a further noticeable decrease is shown in the amount borrowed by national banks; the aggregate on that date was \(\$ 123,087,000\), or \(\$ 22,537,000\) less than was owing on September 2, 1915. On November 17, 1916, the money borrowed, including bills payable and rediscounts, had been reduced still further to \(\$ 104,388\),000, a reduction as compared with September 12, 1916, of \(\$ 18,699,-\) 000 . These figures compare with borrowings of \(\$ 140,680,000\) in November, 1915; \(\$ 254,079,000\) in October, 1914; \(\$ 150,487,000\) in October, 1913; \(\$ 110,656,000\) in November, 1912; and \(\$ 98,614,000\) in December, 1911.

\section*{RESERVE.}

The following table shows the percentages of reserve held by the national banks at each report date, and that there has been a large surplus in the reserve in every section throughout the year:
\begin{tabular}{|c|c|c|c|c|c|c|c|}
\hline Date of call. & Amount of reserve held (in thousands of dollars). & \[
\left.\begin{array}{|c|}

METHODS OF CALCULATING RESERVE TO OONFORM TO THE PROVISIONS OF THE FEDERAL RESERVE ACT FOR EACH CLASS OF BANKS.

While the reserve to be held by banks in central reserve cities is held in the vaults and with the Federal reserve bank in the same proportions as at the beginning of the system, under section 19 of the Federal reserve act the proportions of reserve required to be kept by other reserve city and country banks in Federal reserve banks and that which may be kept with approved reserve agents have changed on November 16, 1915, and May 16 and November 16, 1916. For the 12 months from November 16, 1916, to November 16,1917, other reserve city banks must keep six-fifteenths with the Federal reserve bank and may have three-fifteenths with approved reserve agents, and country banks must maintain five-twelfths of the required reserve with the Federal reserve bank, and two-twelfths may be with reserve agents. No further change will occur in the proportions of reserve until November 16, 1917, unless the law is amended in the meantime, when the final provision goes into effect requiring all of the reserve to be kept in the vaults of the bank and with Federal reserve banks, thus discontinuing the use of national banks as reserve agents.

The Federal Reserve Board, acting under authority granted in section 11 of the Federal reserve act, as amended September 7, 1916, has issued a ruling permitting all member banks to carry in the Federal reserve banks of their respective districts any portion of their reserves now required by section 19 of the Federal reserve act to be held in their own vaults.
Forms are submitted herewith indicating the method of calculating the reserve requirements under the Federal reserve act between November 16, 1916, and November 16, 1917 (A) for central reserve city banks, (B) other reserve city banks, and (C) for banks located elsewhere than in reserve cities.

Reserve is required on all deposits of whatever character and from whatever source.

\section*{RELATION OF CAPITAL TO DEPOSITS, ETO., OF NATIONAL BANKS.}

The proportion and variation from year to year of capital to individual deposits in national banks, capital to loans, capital to aggregate resources, capital and surplus and other profits to individual deposits, and lawful money held to individual deposits, are shown in the table following for the years 1912 to 1916, inclusive.

The statement shows that the individual deposits have increased more rapidly than capital, surplus and profits, taken collectively or separately. The ratio of deposits to capital is \(\$ 7.91\) to \(\$ 1\). A year ago it was \(\$ 6.32\) to \(\$ 1\), and the ratio to capital, surplus and profits, is \(\$ 3.99\) to \(\$ 1\), as compared with \(\$ 3.23\) to \(\$ 1\) in September, 1915.
\begin{tabular}{|c|c|c|c|c|c|}
\hline Items. & Sept. 4, 1912. & Aug. 9, 1913. & Sept. 12, 1914. & Sept. 2, 1915. & Sept. 12, 1916. \\
\hline Capital to individual deposits & \$1.00 to \$5. 63 & \$1.00 to 85.45 & & 81.00 to 88. 32 & \$1.00 to \$7.91 \\
\hline Capital to loans.................... & 11.00 to 5.77 & \(\$ 1.00\) to \(\$ 5.45\)
1.00 to 5.84 & \(\$ 1.00\) to \(\$ 8.79\)
1.00 to 6.04 & \$1.00 to \(\$ 8.32\) & \$1.00 to \$7.91 \\
\hline Capital to aggregateresources & 1.00 to 10.48 & 1.00 to 10.30 & 1.00 to 10.83 & 1.00 to 11.47 & 1.00 to 13.50 \\
\hline Capital and surplus and other prohts to individual deposits. & 1.00 to 2.96 & 1. 00 to 2.82 & 1. 00 to 2.96 & 1.00 to 3.23 & 1.00 to 3.09 \\
\hline Specie, legal tender, and balances with Federal reserve bank to individual de- & & & & c & \\
\hline posits 1..................... & 1.00 to 6.58 & 1.00 to 6.41 & 1.00 to 6.80 & 1.00 to 5.84 & 1.00 to 6.50 \\
\hline
\end{tabular}
\({ }^{1}\) At the time of the reports referred to prior to Sept. 2, 1915, the Federal reserve banks had not come into existence, and the figures upon which these computations are based, for the years 1912, 1913, and 1914 do not, therefore, include balances with Federal reserve banks.

\section*{CHANGES IN LOANS, BONDS, CASH, AND DEPOSITS IN NATIONAL BANKS.}

In connection with the general summary of the condition of national banks, as shown by their returns at date of each call during the year, there is submitted herewith a statement, by geographical divisions, based upon the returns for each call during the year, of the volume of loans, investments in bonds, cash and cash items, and deposits.

Changes in volume of principal assets and in deposits, by geographical divisions, 1915-16.
[In thousands of dollars.]

\section*{DEVELOPMENT IN NATIONAL BANKING.}

The following table shows the growth in the aggregate resources and liabilities and in the various items making up the total since the Federal reserve system went into effect. The first figures given are those shown by the Fall report of the year preceding the establishment of the Federal reserve banks, the first figures rendered after the beginning of the system, the Fall calls for 1915 and four calls for 1916. It will be noted that through the reduction of reserve requirements \(\$ 125,377,000\) less lawful money is held than on October 21, 1913, while the combined capital, surplus, and profits have increased by \(\$ 49,043,000\). During the same period individual deposits increased from \(\$ 8,346,011,000\) to \(\$ 11,362,341,000\) and loans and discounts from \(\$ 6,260,878,000\) to \(\$ 7,859,837,000\). Acceptances, which did not exist in so far as national banks were concerned in October, 1913, were held to the amount of \(\$ 76,608,000\) on September 12, 1916:

\footnotetext{
\({ }^{1}\) Time and demand deposits computed from the total deposits, reported together, for October, in the same proportion as reported Dec. 31, 1914.
}

Reserve required and held by national banks, together with the excess or deficiency, 1919-1916.
[In thousands of dollars.]

In connection with the foregoing statements there will be found in volume 2 of the report of the Comptroller tables relating to the development of banking as indicated by the returns from national and other banking institutions on a selected date in each year from 1875 to 1916. In these tables, the deposits, the loans, and the investments in bonds, etc., are classified, and the capital, surplus, and other profits, together with the aggregate amount of assets shown.

\section*{PRODUCTIVITY OF LOANS AND BOND INVESTMENTS OF NATIONAL BANKS.}

Loans and discounts and investments in bonds and other securities by national banks, represent over seven-tenths of their assets and as they are the principal sources from which earnings are derived, it is of interest to note the productiveness of these investments, compared with gross earnings, by banks in each geographical division of the country.

The gross assets of the national banks on June 30, 1916; were \(\$ 13,926,868,000\), and the investments in loans, bonds, and other securities \(\$ 9,984,644,000\), or 71.69 per cent, while the gross earnings for the 12 months ending June 30, 1916, were \(\$ 590,642,051\), or 4.24 . per cent of the gross assets, or 5.92 per cent on loans and securities.

The lowest percentage of gross earnings to total investments was for banks in the Eastern States, being 5.35, while the highest, 8.08, was in the western division. The details for the country, by geographical divisions, are shown in the following table:

IIn thousands of dollars.]
\begin{tabular}{|c|c|c|c|c|c|}

\end{tabular}

\section*{EARNINGS AND.DIVIDENDS OF NATIONAL BANKS.}

The reports of earnings and dividends of national banks for the fiscal year ended June 30, 1916, indicate that the gross earnings of the banks were \(\$ 590,642,051\), as against \(\$ 528,308,815\) for the year ended June 30, 1915. It appears, however, that the net earnings of the banks for the same 12 months were \(\$ 157,543,547\) as against \(\$ 127,094,700\) for 1915 , or an increase of about \(\$ 30,500,000\), and that the dividends paid were \(\$ 114,724,594\), as against \(\$ 113,707,065\) in 1915. The average dividend rate on capital stock increased from 10.64 per cent in 1915 to 10.76 per cent in 1916. For the current year dividends based upon combined capital and surplus averaged 6.38 per cent, while the net earnings to capital and surplus averaged
8.76 per cent. The combined capital and surplus of the banks for 1916 was \(\$ 1,798,029,240\), the percentage of surplus to capital being 68.64.

In volume 2 of the report of the Comptroller will be found the returns for the 12 months ended June 30, 1916, from the banks in each reserve.city and State relating to their earnings and dividends, and also corresponding data for each year from March, 1870, to June 30, 1916.

In the accompanying statement is shown the number of banks, their capital, surplus, dividends paid, the percentage of surplus to capital, and the percentage of dividends to capital for each geographical division.
[In thousands of dollars.]

\hline
\end{tabular}

ORGANIZATION OF NATIONAL BANKS.
In the year ended October 31, 1916, applications for authority to organize 223 national banks were received, of which 141 were approved, and 16 rejected, the principal reasons for rejection being that the communities were amply provided with banking facilities; that there was insufficient business in the localities to make additional banks profitable; or because the investigations made by this office indicated that the standing of the applicants was not such as to warrant the granting of a charter to them. The remaining applications are held pending the submission of further information, or have been abandoned.
Sincte December 23, 1913, the date of the passage of the Federal Reserve Act, 758 applications have been received, 363 being for the conversion of State banks or for the reorganization of State or private banks as national banks and 395 for primary organization, of which 155 were received during the 12 months ended October 31, 1916.

BANKS CHARTERED SUBSEQUENT TO THE PASSAGE OF THE FEDERAL RESERVE ACT.
From December 23, 1913, to October 31, 1916, charters were issued to 449 banks, 297 of which were issued under the act of March 14, 1900 , that is, to banks with capital of less than \(\$ 50,000\) each, and 152 under the act of June 3, 1864, to banks with capital of \(\$ 50,000\) or over.

While the Federal Reserve Act authorizes the chartering of banks without the deposit of bonds, 179 of the banks chartered during this period, and 30 during the past year, have deposited United States bonds to secure circulation and have become banks of issue.
During the current year charters were issued for 80 banks with capital of \(\$ 25,000\) each, 11 with capital in excess of \(\$ 25,000\) but less
than \(\$ 50,000\), and 31 with capital of \(\$ 50,000\) or more. Twenty-five of the minor banks and 5 of those with capital of \(\$ 50,000\) or more deposited bonds and became banks of issue.

\section*{NATIONAL BANKS ORGANIZED AND CLOSED, 1863 TO OCTOBER 31, 1916.}

Of the 10,918 banks chartered during the existence of the national banking system, 122 were chartered during the current year, with authorized capital of \(\$ 6,630,000\). There are now in existence, of the total number chartered, 7,608 banks, 2,767 having gone into voluntary liquidation and 543 placed in charge of receivers. Since 1863 1,906 State banks, with capital at date of change of \(\$ 352,385,428\), have been converted into national banks.

National banks organized, liquidated, and closed annually from 1863 to October 31, 1916, are shown in the following table:

Number and authorized capital of national banks organized and the number and capital of banks closed in each year ended October 31 since the establishment of the national banking system, with the yearly increase or decrease.

Number and authorized capital of national banks organized and the number and capital of banks closed in each year ended October \(\$ 1\) since the establishment of the nationull banking system, with the yearly increase or decrease-Continued.

\({ }^{1}\) The net decrease during the year was 24 banks, with capital of \(\$ 8,923,000\), as 2 insolvent banks with capital of \(\$ 80,000\) were restored to solvency by their shareholders and permitted to resume.
\({ }^{2}\) Includes 36 banks restored to solvency.
3 The total authorized capital stock on Oct. 31 was \(\$ 1,074,853,375\); the paid-in capital, \(\$ 1,074,485,134\), Including the capital stock of liquidating and insolvent Danks which have not deposited lawful money for the retirement of their circulating notes.

\section*{NATIONAL BANKS ORGANIZED DURING THE LAST YEAR AND SINCE 1900.}

In addition to the capital of new banks organized during the 12 months ended October 31, 1916, the banks organized prior thereto increased their capital during the period \(\$ 12,255,000\), making the gross increase for the year \(\$ 18,885,000\). Taking into consideration reductions of capital, voluntary liquidations, and failures, the net increase was \(\$ 2,027,000\), the authorized capital stock of all banks at the close of the year standing at \(\$ 1,074,853,375\).

Since March 14, 1900, the date of the act authorizing the organization of banks with minimum capital of \(\$ 25,000\), charters have been granted to 5,654 associations, with authorized capital of \(\$ 365,932,800\), of which 3,610 , with aggregate capital of \(\$ 94,150,000\), were organized under the act of that date generally with individual capital of \(\$ 25,000\), although a limited number of banks were organized with capital in excess of \(\$ 25 ; 000\), but all less than \(\$ 50,000\). The average capital, however, of banks of this class was slightly in excess of \(\$ 26,080\).

During the same period 2,044 national banks were organized under the act of 1864 , the aggregate capitalization being \(\$ 271,782,800\) and the individual capital \(\$ 50,000\) or over-the approximate average being \(\$ 133,000\) each.

\section*{State Banks Convèrted into National.}

Further classifying these banks, it appears that 987 were conversions of State banks, capital \(\$ 73,165,300 ; 1,670\) reorganizations. of State or private banks, capital \(\$ 122,602,000\); and 2,997, with capital of \(\$ 170,165,500\), primary organizations.

In the following table will be found a classification of banks organized from March 14, 1900, to October 31, 1916, based upon capital stock, together with the number of banks and their reported capital on September 12, 1916, by States and geographical divisions.

Summary, by State, geographical divisions, and classes, of national banks organized from Mar. 14, 1900, to Oct. 31, 1916, and the paid-in capital stock of all reporting national banks on Sept. 12, 1916.

Summary, by State, geographical divisions, and classes, of national banks organized from Mar. 14, 1900, to Oct. 31, 1916, and the paid-in capital stock. of all reporting national banks on Sept. 12, 1916-Continued.

\section*{FOREIGN BRANCHES OF NATIONAL BANKS.}

Under section 25 of the Federal Reserve Act, as amended, the Board has authority to approve the application of any national bank possessing a capital and surplus of \(\$ 1,000,000\) or more to establish branches in foreiga countries or dependencies or insular possessions of the United States for the furtherance of foreign commerce, and to act as required to do so as fiscal agents of the United States.Government.

The Federal Reserve Board also may approve the application of any national bank possessing a capital and surplus of \(\$ 1,000,000\) or more to invest an amount not exceeding in the aggregate 10 per cent of its paid-in capital and surplus in the stock of any banks or corporations incorporated under the laws of the United States or any State thereof and principally engaged in international or foreign bank-
ing, or banking in any of the dependencies or insular possessions of the United States. The business of such international corporations must be conducted upon conditions and under regulations prescribed by the Federal Reserve Board.
The Federal Reserve Board has authorized the National City Bank of New York to establish the following foreign branches and subbranches:

Branch at Buenos Aires, Argentine Républic: Subbranch at Montevideo, Uruguay.

Branch at Valparaiso, Chile: Subbranches at Antofagasta and Santiago, Chile.

Branch at Rio de Janeiro, Brazil: Subbranches at Santos, Sao Paulo, Pernambuco, Para, and Bahia, Brazil.

Branch at Habana, Cuba: Subbranches at Santiago, Matanzas, Cienfuegos, Guantanamo, Camaguey, Cardenas, Manzanillo, Cuba; Kingston, Jamaica; and Santo Domingo, Santo Domingo.

Branch at Petrograd: Subbranches at Moscow, Odessa, Warsaw, Riga, Baku, Astrakhan, Vladivostok, Sebastopol, Helsingfors, and Vilna, Russia.

Branch at Genoa; Italy: Subbranches at Turin, Milan, Venice, Florence, Rome, Naples, and Palermo, Italy.

Under like authorization the Commercial National Bank of Washington, D. C., has established branches at Panama City and Cristobal.

The principal assets and liabilities of the branches reporting, in June, 1916, were as follows (in thousands of dollars):
\begin{tabular}{|c|c|c|c|c|c|c|c|c|c|}

\({ }^{1}\) Report for June 16, 1916.
\({ }^{2}\) Includes \(\$ 13,000\) furniture and fixtures.
}
\({ }^{3}\) Includios \(\$ 6,000\) furniture and fixtures.
1 Amount to be set aside when required, \(\$ 100,000\).

Any national bank may be placed in voluntary liquidation by shareholders representing at least two-thirds of the stock. (Sec. 5220, R. S.) Meetings of shareholders for this purpose are called in conformity with the requirements of the articles of association, at which, in addition to adopting a resolution for the liquidation, provisions are made where practicable, either for immediate liquidation of the assets, and settlement with creditors and shareholders, or the appointment of a liquidating agent to settle the affairs of the bank as speedily as possible in the interest of both creditors and shareholders.

Liquidations during the past year numbered 135, the capital of the banks being \(\$ 14,828,000\). Of these banks 25, with capital of \(\$ 5,170,000\), were absorbed by other national banks; 15, with capital of \(\$ 2,315,000\), consolidated with other national banks; 23 , with capital of \(\$ 2,458,000\), were absorbed by or consolidated with State banks and trust companies; 62, with capital of \(\$ 4,120,000\), liquidated and reorganized as State banks; and 10, with combined capital of \(\$ 765,000\), liquidated for the purpose of discontinuing business.
It thus appears that 40 banks, with an aggregate capital of \(\$ 7,485,000\), liquidated for the purpose of consolidating their business with other national banks, which in many instances increased their capital stock and otherwise enlarged and strengthened their business and reduced expenses proportionately.

The principal reasons given for 85 liquidations, carrying with them an aggregate capital stock of \(\$ 6,578,000\), were to enable the liquidating banks to reorganize under State charters, in order that they might devote themselves to a trust and fiduciary business under State laws, and in some cases take advantage of the State guaranty laws, the greater latitude in regard to real estate and other loans, and the permission granted by the laws of some of the States to operate domestic branches and agencies.

Another reason assigned by some for liquidation was the policy of the Comptroller's office in enforcing the law, especially as to usurious interest rates. Ten banks with capital of \(\$ 765,000\) claimed that the banking business was not of sufficient volume to be profitable to shareholders and therefore decided to liquidate.

In the following table is shown the number of national banks in each State reported in voluntary liquidation during the year ended October 31, classified according to the principal reasons given for liquidating:

Liquidations reported for the year ended Oct. 31, 1916, by States and geographical divisions, classified according to the principal reasons, where given, for liquidating or leaving the national system.

\section*{FAILURES AND SUSPENSIONS OF NATIONAL BANKS.}

Thirteen national banks with aggregate capital of \(\$ 805,000\) were placed in charge of receivers during the year ended October 31, 1916, and one of these banks with capital of \(\$ 50,000\), was restored to solvency and authorized to resume business. The combined capital of the 12 insolvent national banks was \(\$ 755,000\) and their liabilities to depositors and other creditors at date of failure were \(\$ 2,772,088\). In the fiscal year 1915 ten banks failed with aggregate capital of \(\$ 1,750,000\) and liabilities of \(\$ 11,737,414\).
The date that each bank was authorized to commence business, date of the appointment of the receiver, during the past year, the capital stock, and the circulation issued, redeemed and outstanding, are shown in the following table:

\({ }^{2}\) Second failure; formerly Third National Bank.
The first failure of a national bank was in 1865; from that date until the close of business on October 31, 1916, the number of such banks placed in charge of receivers increased to 579 . Of this number, however, 36 were subsequently restored to solvency and permitted to resume business. The total capital of these failed banks was \(\$ 94,540,920\), while the book; or nominal, value of the assets administered by receivers under the supervision of this bureau aggregated \(\$ 391,407,860\), and the total cash realized from the liquidation of these assets was \(\$ 195,595,312\). In addition to this amount, however, there has been realized from assessments of \(\$ 49,605,740\) levied against stockholders the sum of \(\$ 23,468,194\), making the total cash collections from all sources \(\$ 219,063,506\), which have been disbursed as follows:

In dividends to creditors on claims proved, amounting to \(\$ 205,320,819\), the sum of
\(\$ 153,186,201\)
In payment of loans and other disbursements discharging liabilities of the bank other than those of the general creditors.

45, 196, 695
In payment of legal expenses incurred in the administration of such receiverships.

5, 596, 525
In payment of receivers' salaries and other expenses of receiverships. 9, 957, 368
There has been returned to shareholdersin rebates on assessmentslevied. 3, 663, 484
Leaving a balance in the hands of the Comptroller and the receivers of..
1, 463, 233

\section*{Total}

219, 063, 506
In addition to the funds thus distributed, there had been returned, at the close of business on October 31, 1916, to agents for shareholders, to be liquidated for their benefit, assets having a nominal value of \(\$ 14,732,463\).

The assets of the 52 national banks that are still in charge of receivers have a book, or nominal, value of \(\$ 53,807,750\). The receivers had realized from these assets at the close of business on October 31, 1916, the sum of \(\$ 26,105,443\), and had collected from the shareholders on account of assessments levied against them to cover deficiencies in assets the further sum of \(\$ 2,122,075\), making the total collections from all sources in the liquidation of current or active receiverships the sum of \(\$ 28,227,518\), which amount has been disbursed as follows:

The collections from the assets of the 527 national banks, the affairs of which have been finally closed, amounted to \(\$ 169,489,869\), and, together with the collections of \(\$ 21,346,119\) from assessments levied against the shareholders, make a total of \(\$ 190,835,988\), from which, on claims proved aggregating \(\$ 175,144,631\), dividends amounting to \(\$ 133,493,031\) were paid.

The average rate of dividends paid on claims proved was 76:22 per cent, but, including offsets allowed, loans paid, and other disbursements with dividends, creditors received on an average 83.06 per cent. The expenses incident to the administration of these 527 trusts-that is, receivers' salaries and legal and other expenses-amounted to \(\$ 13,926,580\), or 4.13 per cent of the nominal value of the assets and 7.30 per cent of the collections from assets and from shareholders. The outstanding circulation of these banks at the date of failure was \(\$ 26,338,794\), which was secured by United States bonds on deposit in the Treasury of the face value of \(\$ 28,576,900\). The assessments against shareholders averaged 50.94 per cent of their holdings, while the collections from the assessments levied was 47.80 per cent of the amount assessed. The total amount disbursed during the current year to the creditors of 41 of the insolvent banks, in the 55 dividends declared, was \(\$ 3,007,209\).

In the table following is summarized the condition of all insolvent national banks, the closed and active receiverships being shown separately:
\begin{tabular}{|c|c|c|c|}

\section*{CAUSES OF FAILURES.}

Two hundred and fourteen, or over one-third, of the 579 failures of national banks were attributable to criminal acts. In 43 of the 214 instances defalcation of officers was the cause; in 126 fraudulent management; and in 45 the banks were wrecked by cashiers or subordinate officers. Unlawful loans-that is, loans in excess of the statutory limit-were the principal causes of 113 of the failures. In 61 of the 113 instances excessive loans were made to officers and directors and in 52 to others than officers and directors. Depreciation in the value of assets was the ascribed cause of 83 of the failures. Injudicious or careless banking was the cause of 139, or nearly onefourth of the total number, and the remaining 30 failures were ascribed to insolvency of large debtors, "runs," nonliquidity of assets, etc.

In the following tables are shown the number and percentages of failures from principal causes, together with the number of times the principal causes figured.

Principal causes of failures of national banks.

Number of times principal causes figured in the failures of national banks.

Defalcation of officers.......................................................... . 59
Fraudulent management..................................................................... 206
Involving unlawful acts.....................................................................
Excessive loans to officers......................................................... 79
Excessive loans to others. ......................................................... . . 58
Injudicious banking............................................................................... 404
Depreciation of securities.................................................................... 279
Interest-Bearing Debt of the United States, National Bank Circulation, etc.

The interest-bearing debt of the United States on October 31, 1916, was \(\$ 972,469,290\), of which \(\$ 700,882,130\) is at the rate of 2 per cent, \(\$ 9,151,800\) at \(2 \frac{1}{3}\) per cent, \(\$ 143,945,460\) at 3 per cent, and \(\$ 118,489,900\) at 4 per cent. It thus appears that the annual interest charge is \(\$ 23,304,397.40\), or an average of about \(2.39+\) per cent.

During the year United States 2 per cent bonds, including Panama Canal bonds, to the amount of \(\$ 30,000,000\), purchased by the Federal reserve banks, were converted into bonds and Treasury notes, bearing interest at the rate of 3 per cent, in conformity with section 18 of the Federal reserve act. Of the total amount converted, consols of 1930 aggregating \(\$ 13,871,100\) and Panama Canal bonds to the amount of \(\$ 1,889,900\) were converted into the thirty-year 3 per cent gold bonds; and consols of 1930 to the amount of \(\$ 12,252,000\) and Panama Canal bonds aggregating \(\$ 1,987,000\) were converted into one-year gold notes; hence there was a total issue of \(\$ 15,761,000\) of converted bonds and \(\$ 14,239,000\) of one-year Treasury notes.
As a result of these conversions the amount of United States bonds available as security for bank circulation is reduced to \(\$ 883,317,490\) and consists of \(\$ 620,127,050\), consols of 1930 ( 2 per cent), \(\$ 80,755,080\) Panama Canal bonds ( 2 per cent), \(\$ 63,945,460\) loan of 1908 -1918 ( 3 per cent), and \(\$ 118,489,900\) loan of 1925 ( 4 per cent). Other than the conversion of the 2 per cent bonds into the 3 per cent bonds and notes, hereinbefore referred to, the only change in the interest-bearing debt during the year was in the issuance of the \(\$ 1,844,700\) of \(2 \frac{1}{3}\) per cent Postal Savings bonds.
The rates of interest and amount of each class of United States bonds-registered and coupon-outstanding October 31, 1916, are shown in the following table:
\begin{tabular}{|c|c|c|c|c|}
\hline Title of loan. & Rate of interest. & Registered. & Coupon. & Total. \\
\hline & Percent. & & & \\
\hline Consols of 1930. & 2 & \$617,413,950 & \$2,713, 100 & \$620,127,050 \\

MONTELY RANGE OF PRICES FOR, AND INVESTMENT VALUE OF, UNITED STATES BONDS.

In the New York market the prices for United States bonds flùctuated but slightly during the year. The 4 per cent, registered, loan of 1925, ranged from 109, the opening price in November, 1915, to 1103 \({ }^{\frac{3}{4}}\), the closing figures in October, 1916; the 3 per cent, 19081918, ranged from par in June and July to \(102 \frac{3}{4}\) in March and April, closing in October at 100 \(\frac{3}{4}-101 \frac{1}{4}\); the 2 per cent (consols of 1930), quoted at \(98 \frac{1}{1}\) in July and August, were \(100 \frac{1}{1}\) in April and May, the closing prices in October being \(99 \frac{1}{2}\) to 100 . The range for the Panama Canal 2 per cents was slightly less than for the consols.
The rates of interest realized by investors in United States bonds, at the average price flat, during the year, were as follows: Four per cent, from 2.549 in April to 2.747 in January; 2 per cent (consols), from 2.021 in April to 2.590 in October; 2 per cent (Panama Canals),
from 2.031 in April to 2.121 in January; and 3's (1908-1918), from 2.158 in April to 3.188 in July.

In volume 2 of the report of the Comptroller will be found tables relating in detail to the monthly range of prices of United States bonds in New York during the past two years and the investment value of the bonds during the past year.

\section*{BANKS' INVESTMENTS IN UNITED STATES BONDS.}

By reference to the last report of condition of national banks, September 12, 1916, it appears that the associations held or owned United States bonds to the amount of \(\$ 729,777,000\), of which \(\$ 687,-\) 201,990 were on deposit to secure circulating notes, \(\$ 27,939,550\) to secure Government deposits, and \(\$ 14,635,460\) deposited to secure postal savings and held unpledged. The exact amount deposited as security for postal savings and the amount of free bonds are not shown in the compiled returns from the banks.

In addition to the bonds held as security for circulation of active national banks, the Treasurer of the United States holds \(\$ 756,000\) as security for the outstanding circulation of liquidating and insolvent national banks.

\section*{FEDERAL RESERVE BANK INVESTMENTS IN UNITED STATES BONDS.}

Under section 18 of the Federal reserve act, relating in part to the retirement of national-bank circulation and withdrawal of bonds, the Federal Reserve Board has authority to direct the Federal reserve banks to purchase such bonds, when applications to sell are filed with the Treasurer of the United States, to an amount not exceeding \(\$ 25,000,000\) in any one year. By reason of the extensive purchases from national banks direct, and otherwise, by the Federal reserve banks, the Board has not exercised its authority in this respect. The November 3 statement of the condition of the 12 Federal reserve banks shows an investment of \(\$ 51,907,000\) in United States bonds and interest-bearing notes.

From the June, 1916, returns from banks other than national, it appears that investments of institutions of that character in Government bonds aggregated approximately \(\$ 7,500,000\). Summarizing the foregoing details, it appears that about \(\$ 790,000,000\), or approximately 80 per cent, of the interest-bearing debt of the United States is owned by the banks of the country.

\section*{DEPOSITS AND WITHDRAWALS OF UNITED STATES BONDS.}

Despite the favorable price of 2 per cent consols and Panama Canal bonds, the additional amount of bonds eligible as security for circulation (some \(\$ 186,000,000\) ) and the computed profit on the issuance of national-bank circulation, there has been a material reduction in the amount of bonds on deposit with the Treasurer of the United States as security for circulation, the net decrease for the year ended October 31, 1916, being \(\$ 47,017,550\). Bonds for securing circulation were deposited to the amount of \(\$ 11,341,160\). This sum includes \(\$ 10,065,910\) deposited by banks previously chartered and \(\$ 1,275,250\) by 30 of the 122 banks chartered during the
\[
62015^{\circ}-\mathrm{FI} 1916-33
\]
year. The withdrawals of bonds aggregated \(\$ 58,358,710\), of which \(\$ 46,036,640\) were withdrawn by banks reducing their circulation, \(\$ 8,782,070\) by banks liquidating, and \(\$ 3,540,000\) on account of insolvent banks.

In connection with the foregoing changes in respect of bonds securing national bank circulation it appears that of the investments of the Federal reserve banks in United States bonds, \(\$ 12,760,550\) were deposited during the year with the Treasurer of the United States in trust as security for Federal reserve bank notes. The withdrawals of bonds by these banks totaled \(\$ 3,360,550\), leaving the net increase and also the total amount on deposit on October 31, 1916, to the credit of the Federal reserve banks, on account of Federal reserve bank notes, \(\$ 9,400,000\).

The details of the bond transactions during the year, in respect of national banks, are shown in the table following:

United States bonds deposited as security for circulation by banks chartered and by those increasing their circulation, together with the amount withdrawn by banks reducing their circulation and by those closed, during each month, year ended Oct. 31, 1916.

\({ }^{1}\) Includes \(\$ 1,275,250\) deposited by banks ohartered during the year.

\section*{NATIONAL-BANK CLRCULATION.}

By reference to the table following, it will be noted that there was an almost uninterrupted reduction from month to month in the volume of United States bonds on deposit to secure national bank circulation, and in consequence a decline in the amount of circulation outstanding. From November 30, 1915, to October 31, 1916, the amount of bonds held as security for circulation fell from \(\$ 731,496,540\) to \(\$ 687,957,990\), or \(\$ 43,538,550\). The outstanding circulation declined from \(\$ 776,365,653\) to \(\$ 726,069,290\), a reduction of \(\$ 50,296,363\). The bond-secured circulation was reduced from \(\$ 720,633,061\) to \(\$ 679,650,913\); that is, a reduction of \(\$ 40,982,148\).

When a national bank is closed by voluntary liquidation or otherwise, or its circulation liability reduced, the proceeds of the securing bonds, or other lawful money to the amount of the circulation to be retired, is deposited with the Treasurer of the United States to provide for the redemption of the notes when presented. Lawful money on deposit with the Treasurer of the United States for that purpose on November 30, 1915, amounted to \(\$ 55,677,100\), increased to \(\$ 62,045,070\) by May 31, 1916, the amount held on October 31, last being \(\$ 46,418,377\).

November, 1915, was the last month in which national-bank circulation secured by miscellaneous securities and issued in 1914-15 under authority of the so-called emergency currency act of 1908 was reported. Before the close of the year 1915, however, provision had been made for the release of the securities and the deposit of the \(\$ 55,492\) necessary for the redemption of that amount of the remaining emergency issues outstanding.

Bonds on deposit, circulation secured thereby and by lawful money at the close of each month, year ended October 31, 1916, are shown by the following table:

Bonds and circulation.

1 Includes bonds held for account of banks in process of liquidation.

\section*{NATIONAL-BANK CIRCULATION REDEEMED.}

In the year ended October 31, 1915, national-bank circulation to the amount of \(\$ 800,700,000\) was received at the Treasury for redemption, this unusually large amount being due to the extraordinary issues of emergency currency between August, 1914, and June, 1915.

During the current year the receipts were \(\$ 492,259,690\), but \(\$ 80,308,800\) of these notes being "fit for use," were, after redemption, returned to the banks of issue. This left \(\$ 411,950,890\) of unfit notes redeemed and delivered to the Comptroller of the Currency for destruction and replacement by new issues, except where there were to be no further issues by reason of liquidations or reductions of circulation liability. The receipts, monthly, ranged from \(\$ 57,627,997\) in Janu-
ary to \(\$ 31,873,306\) in September, the monthly average being approximately \(\$ 41,000,000\), or nearly \(\$ 1,350,000\) for each day of the year.

The law provides that the banks shall reimburse the Treasurer for transportation charges and cost of assorting national-bank notes received for redemption. For the fiscal year ended June 30, 1916, these expenses averaged \(\$ 0.817+\) per \(\$ 1,000\) of notes redeemed. Including the circulating notes of the Federal reserve banks the receipts by the Treasurer of all bank notes for the year aggregated \(\$ 544,074,315\). By reference to the second table following it will be learned that over \(\$ 383,000,000\), nearly 70 per cent, of the bank notes received for redemption came from five of the principal cities of the country.

Receipts of each class of bank circulation, by months, together with the amounts of all classes received from the principal sources, are shown in the following tables:

Monthly receipts.

\section*{INCREASE OR DECREASE OF NATIONAL-BANK CIRCULATION.}

The amount of increase or decrease of national-bank circulation issued and retired each year since January 14, 1875, the date of the act repealing section 5177, United States Revised Statutes, limiting the aggregate amount of circulating notes of national banking associations, and the changes, quarterly, during the last year, are shown in the following table:

Yearly increase or decrease in national-bank circulation from Jan. 14, 1875, to Oct. s1, 1915, and quarterly increase or decrease for the year ended Oct. 31, 1916.
\begin{tabular}{|c|c|c|c|c|}

\section*{DENOMINATIONS OF NATIONAL-BANK CIRCULATION.}

The act of June 3, 1864, provided for the issuance of national-bank circulation in denominations of \(\$ 1, \$ 2, \$ 5, \$ 10, \$ 20, \$ 50, \$ 100, \$ 500\), and \(\$ 1,000\); that not more than one-sixth part of the notes furnished to any association should be of a less denomination than \(\$ 5\), and that after the resumption of specie payments no association should be furnished with any notes of a less denomination than \(\$ 5\). The act of March 14,1900 , limited the amount of \(\$ 5\) notes issuable to any bank to one-third of its total issues and authorized banks to receive and issue circulating notes to the extent of the par value of the bonds deposited.

Issues of \(\$ 1\) and \(\$ 2\) notes were discontinued in 1879. Of the total issues of ones, \(\$ 23,169,677\), and of twos, \(\$ 15,495,038\), there are still outstanding \(\$ 342,137\) of ones and \(\$ 163,468\) of twos. The issuance of notes of denomination of \(\$ 500\) was discontinued in 1885 and of the \(\$ 1,000\) denomination in 1884. By reference to the accompanying table it will be noted that there are still outstanding 176 of the \(\$ 500\) notes and 22 of the \(\$ 1,000\) notes. The total amount of \(\$ 500\) notes issued was \(\$ 11,947,000\) and of \(\$ 1,000\) notes, \(\$ 7,379,000\).

The amount of each denomination of national-bank circulation outstanding on March 13, 1900, and on October 31, 1916, is shown in the following table:
\begin{tabular}{|c|c|c|}
\hline Denominations. & Mar. 13, 1900. & Oct. 31,1916. \\
\hline Ones. & \$348, 275 & 8342,137 \\

\hline
\end{tabular}

\section*{vaUlt account of national-bank circulation.}

At the close of business on October 31, 1915, national-bank currency available for shipment to national banks amounted to \(\$ 545,992,740\) and during the year ended October 31, 1916, the amount received from the Bureau of Engraving and Printing was \(\$ 239,434,690\); hence a total to be accounted for of \(\$ 785,427,430\).

During the current year the shipments to the banks aggregated \(\$ 356,300,750\), and the withdrawals from the vault for destruction, by reason of liquidation and changes of titles of banks, \(\$ 15,148,820\), thus making total withdrawals \(\$ 371,449,570\) and leaving stock on hand, November 1, 1916, the beginning of the next report year, of \(\$ 413,977,860\).

\section*{PROFIT ON NATIONAL-BANK CIRCULATION.}

National-bank circulating notes are taxed by the Government at the rate of one-fourth of 1 per cent semiannually, where secured by bonds bearing interest at the rate of 2 per cent, and at one-half of 1 per cent semiannually in case the securing bonds bear a higher rate of interest than 2 per cent. In addition to this tax, the banks are required to pay for the plates from which the notes are printed, together with the expenses incident to the redemption of their notes. An additional item to be considered in connection with the profit on circulation is the premium paid for the bonds.

In computing the profit, the Government Actuary assumes an investment in bonds to the amount of \(\$ 100,000\) and that money is
worth 6 per cent. Banks receive from the Comptroller circulating notes to the extent of 100 per cent of the face value of the bonds deposited as security therefor, but by reason of the 5 per cent redemption fund requirement they have available to loan but 95 per cent of their issues; hence the gross receipts are the fixed interest on the bonds and 6 per cent interest on 95 per cent of the circulation received. The actuary's computations are based on three classes of bonds-consols of 1930, Panama Canal bonds, 1916-1936, and the 4 per cents of 1925.

The average net price monthly during the year for the 2 per cent consols ranged from 98.479 to 99.750 ; hence the rate of profit on circulation in excess of 6 per cent on investment in bonds, was 1.316 per cent at a low price of bonds and 1.167 at the high price.

Profit on circulation secured by Panama Canal bonds was a fraction greater than on the 2 per cent consols of 1930, by reason of the slightly lower price of the former. The 4 per cent bonds of 1925 averaged 110 in December, 1915, and January, 1916, and reached 111.583 in March. The profit on circulation secured by these bonds varied from a maximum' of 1.111 per cent to a minimum of 0.857 per cent in excess of 6 per cent on investment in the bonds.

In volume 2 of the report of the Comptroller will be found tables containing the computation made by the Government Actuary, showing the profit on circulation at the average net prices monthly for the bonds on \(\$ 100,000\) consols of 1930 , Panama Canal bonds, and the 4 per cent bonds of 1925 .

TAXES ON NATIONAL BANKS, REDEMPTION CHARGES, EXAMINERS' FEES, AND EXPENSES OF THE CURRENCY BUREAU.

Expenses incident to the issue of national-bank circulation, in the fiscal year ended June 30, 1915, were extraordinarily heavy, over \(\$ 7,418,000\), by reason of the issue of about \(\$ 385,000,000\) of emergency currency under authority of the act of May 30, 1908. The tax on this class of currency was \(\$ 2,977,000\); the cost of redemption was abnormal and it became necessary to engrave many extra plates.

The retirement of all of that currency having been provided for by the end of June, 1915, the tax and other expenses this year are confined to the regular issues of United States bond-secured currency and are reduced to \(\$ 4,218,322.99\), of which \(\$ 3,744,967.77\) was the tax on the notes, \(\$ 23,205\) cost of plates, and \(\$ 450,150.22\) redemption charges.

Other expenses to the banks in so far as the Government is concerned, are examiners' salaries and expenses, the income, capital, and broker taxes. The salaries of examiners for the fixcal year ended June 30,1916 , amounted to \(\$ 577,762.64\); the income tax, 1 per cent on net earnings, to \(\$ 1,500,000\); and capital tax, \(\$ 1\) per 1,000 on capital, surplus, and undivided profits, to \(\$ 2,100,000\). The income and capital tax are computed on data in this office relating to net earnings, capital, etc., of the banks for the current fiscal year as the returns from national banks are not segregated by the Internal-Revenue Bureau.

From 1863 to 1916 , inclusive, the tax paid on circulating notes by national banks aggregated \(\$ 136,857,219.64\) and on capital and net
earnings, under various acts during that period, some \(\$ 91,000,000\), or an aggregate of over \(\$ 228,700,000\), as follows:

Tax on deposits to \(1882 \ldots \ldots \ldots \ldots \ldots \ldots \ldots \ldots \ldots \ldots \ldots . . \quad 60,940,067.16\)

Tax on capital from 1899 to \(1902 \ldots\)............................................ 7, 048, 413.00

Tax, corporation, and income from 1909 to 1916.
10, 514, 700.00
The expenses of the Currency Bureau from 1863 to 1916, exclusive of contingent expenses paid from the general appropriation for contingent expenses of the department, were \(\$ 17,595,810\), and for the current year they were \(\$ 394,613.30\), of which the salary item was \(\$ 153,333.66\), and for special dies, plates, paper, printing, etc., \$241,279.64.

\section*{Transictions of Clearing-House Associations.}

Through the courtesy of Hon. William Sherer, manager of the New York Clearing House Association, a statistical summary has been obtained relating to the transactions of the clearing houses of the country for the year ended September 30, 1916, together with a revised statement of the transactions for the year 1915, the details of which appear in Volume, 2 of this report. The returns show that there are 173 clearing houses in the country, an increase of 10 , over the prior year, in the number reporting their transactions.

The aggregate transactions for the current year were \(\$ 241,407,-\) 541,000 , while those for 1915 were \(\$ 163,174,137,000\). There were decreases in only seven associations, amóunting in the aggregate to \(\$ 42,947,000\), the greatest decrease being in Albany, N. Y., and amounting to \(\$ 31,355,000\), while there were increases in 166 cities, totaling \(\$ 78,276,351,000\), the net increase being \(\$ 78,233,404,000\). The exchanges of the 16 associations exceeding one billion each aggregated \(\$ 217,414,066,000\), approximately 90 per cent of the grand total of \(\$ 241,407,541,000\). The transactions of these 16 cities show an increase of \(\$ 73,191,019,000\) over the clearings for the preceding year, ranging from \(\$ 137,894,000\) in Minneapolis, Minn., to \(\$ 56,338,-\) 001,000 in New York.

Increases in five principal cities were as follows: New York, \(\$ 56,338,001,000\); Philadelphia, \(\$ 4,050,121,000\); Chicago, \(\$ 3,725,-\) 285,000 ; Boston, \(\$ 2,698,779,000\); St. Louis, \(\$ 1,064,177,000\). In the other 11 of the 16 cities referred to there was an aggregate increase of \(\$ 5,314,656,000\), while the increases in the other 157 cities totaled \(\$ 5,085,332,000\).

The clearings for 1916 exceed the average for the years 1907 to 1915 by approximately \(\$ 81,800,000,000\).

The New York Clearing House, established in 1854, has been in existence 63 years. The number of bank members of the association is 63 , and the aggregate capital represented, \(\$ 185,550,000\), an increase of 1 in membership and in capital of \(\$ 7,000,000\) during the year ended Sept. 30, 1916. The clearings increased during the year from \(\$ 90,842,000,000\) to \(\$ 147,180,000,000\), hence an increase of \(\$ 56,338,-\) 000,000 , or over 60 per cent. The average dajly clearings were \(\$ 484,147,000\), the percentage of balances to exchanges was 5.82 , and
of funds used in settlement of balances 17.40 per cent was in gold and 82.60 per cent in legal tenders, etc.
The clearing-house transactions of the Assistant Treasurer of the United States at New York for the year were as follows: Exchanges réceived from clearing houses, \(\$ 399,384,000\); balances received from clearing houses, \(\$ 249,244,000\); exchanges delivered to clearing houses, \(\$ 593,353,000\); balances paid to clearing houses, \(\$ 55,275,000\). The transactions of the Assistant Treasurer showed an excess of credit balances of \(\$ 193,969,000\).

The exchanges for 1916 of the 16 clearing houses of the United States, with operations in excess of \(\$ 1,000,000,000\) each, and of the same clearing houses for 1915, and of all other clearing houses for the two years mentioned, together with the amount of increase or decrease in each case, are shown in the following table:

Comparative statement of the amount of exchanges of 16 clearing houses with exchanges in excess of \(\$ 1,000,000,000\) each, and of all others combined, for the years ended Sept. 30, 1916 and 1915.

\section*{RATES FOR MONEY IN NEW YORK.}

The monthly rates for money in the New York market during the year ended with October, 1916, as reported to the Comptroller by the Commercial and Financial Chronicle, ranged, for call loans, from a minimum of \(1 \frac{1}{2}\) to 3 , between November, 1915, and the following May; 21 \(\frac{1}{2}\) to 4 in June and 2 to 6 in July. Rates fell 2 to \(2 \frac{3}{4}\) in August, rose 2 to 3 in September, and in the closing month, October, ranged from 2 to 4.

Time loans, 60 days, ranged from \(2 \frac{1}{4}\) to \(2 \underset{木}{3}\) in November to February; \(2 \frac{1}{2}\) to 3 from March to May, inclusive; reached \(3 \frac{1}{4}\) to \(4 \frac{1}{2}\) in July, and ranged from \(2 \frac{3}{4}\) to \(3 \frac{1}{4}\) in August to October, inclusive.

Time loans, 3 to 6 months, ranged from \(2 \frac{1}{2}\) in November to 4 in June. In July the range was from \(3 \frac{1}{2}\) to \(4 \frac{3}{4}\); in August, 3 to 4; in September, 3 to \(3 \frac{3}{4}\); and in October, \(3 \frac{1}{4}\) to \(3 \frac{1}{2}\).

Rates for commercial paper, double name, choice 60 to 90 days and single name, prime 4 to 6 months, corresponded during each month of the year, ranging from \(2 \frac{3}{4}\) to \(3 \frac{1}{4}\) in November, \(1915 ; 3\) to \(3 \frac{3}{4}\) from December to June, inclusive, rose \(3 \frac{3}{4}\) to \(4 \frac{1}{4}\) in July; declined \(3 \frac{1}{2}\) to 4 in August and \(3 \frac{1}{4}\) to \(3 \frac{1}{2}\) in September and October.

Single name, good, 4 to 6 months paper, ranged from \(3 \frac{1}{4}\) to \(3 \frac{3}{4}\) in November, 1915, \(3 \frac{1}{4}\) to \(3 \frac{1}{2}\) from December to May, rose to 4 in June, ruled at 4 to \(4 \frac{1}{2}\) in July and August, stood at 4 in September, and closed in October at \(3 \frac{3}{4}\) to 4.

The range of rates monthly for each class of paper is shown in the following table:

Range of rates for money in the New York market, year ended Oct. 31, 1916.

Discount rates of the Federal reserve banks in effect Nov. 27, 1916.

1 Rate for bills of exchange in open-market operations.
2 Rate for trade acceptances bought in open market without member bank indorsement.
\({ }^{3}\) Rate for commodity paper maturing within 30 days, 3 立 per cent; over 30 to 60 days, 4 per cent; over 60 to 90 days, \(4 \frac{1}{2}\) per cent; over 90 days, 5 per cent.
Nove.-Rate for bankers' acceptances, 2 to 4 per cent.

\section*{STERLING EXCEANGE.}

It is of interest to note in connection with rates for money in New York the rates during the same year for sterling exchange, also reported by the Commercial and Financial Chronicle. The actual rates for 60 -day bankers' bills, reported in November, 1915, at \(460 \frac{1}{2}\) to \(468 \frac{1}{4}\), reached the maximum for the year, \(473 \frac{1}{8}\) to \(473 \frac{9}{16}\), in the following April, and declined \(471 \frac{1}{4}\) to \(471 \frac{1}{2}\) in October. Sight bills in the same months were \(461 \frac{1}{2}\) to \(471 \frac{3}{8}, 476 \frac{3}{8}\) to \(476 \frac{1}{2}\), and \(475 \frac{5}{8}\) to \(475 \frac{11}{16}\), respectively, while cable transfer rates were \(462 \frac{1}{4}\) to \(472 \frac{1}{8}\) in November, 1915, rose \(476 \frac{15}{16}\) to \(477 \frac{1}{16}\) in April, and closed in October at \(476 \frac{3}{8}\) to \(476 \frac{1}{2}\). The rates and ranges by months for the year ended with October, 1916, for these documents are shown in the following table:

Actual rates-Bankers' bill.

State, Savings, Private Banks, and Loan and Trust Companies.
Through the cooperation of the banking departments of the several States this office is enabled to present, as required by section 333 of the Revised Statutes, statistics showing the condition of all banks under State supervision in operation in the country as of June 30, 1916. Data from all incorporated banks in the United States, and from a large percentage of private banking concerns, are included in the tables which follow. Statistics relating to this class of banks from 1909 to 1915 were obtained from the individual banks, reports being made on blank forms prepared by this office. Foi the current year the information has been compiled, with a few exceptions, from the official summaries furnished by the State banking superintendents, thus resulting in the saving of a large amount of clerical work and expense both for the banks and for this office.
Summaries of reports of condition received for the current year from banks other than national show the condition on June 30, 1916, of 19,934 banks, or 477 more than reported in 1915.

The paid-in capital stock of these banks aggregates \(\$ 1,129,052,115.96\) and the resources \(\$ 18,344,369,696.93\). In 1915 banks other than national reporting numbered 19,457, with an aggregate capital of \(\$ 1,094,322,264.93\) and resources of \(\$ 16,008,444,520.68\). The increase in capital is therefore shown to be \(\$ 34,729,851.03\), or 3.17 per cent, and in resources \(\$ 2,335,925,176.25\), or 14.59 per cent.

A summary of the reports of condition of the banks other than national is submitted herewith.

Summary of reports of condition of 19,994 reporting banks other than national (State savings, private bankis, and loan and trust companies), in the United States at the close of business on June 30, 1916.

\({ }^{1}\) Including overdrafts.

\section*{STATE BANKS.}

Statements received from the State banking departments show State banks (commercial banks) to the number of 15,450 , with aggregate capital of \(\$ 563,497,182.91\) and aggregate resources of \(\$ 5,552,977,153.40\). These statistics include stocksavings banks for Virginia, South Carolina, Tennessee, Michigan, Wisconsin, North Dakota, Kansas, Montana, Idaho, and Nevada, and trust companies for Virginia, North Carolina, South Carolina, Teunessee, Idaho, and Nevada, as the banking department of each of the States mentioned does not
segregate this class of banks in their summaries of reports but designates all such as commercial banks. The summary of reports, therefore, includes 852 banks more than reported last year, with an increase in capital of \(\$ 59,511,863.60\) and in resources of \(\$ 1,153,374,844.49\).

The summary of reports submitted by State banks shows loans, exclusive of overdrafts, classified as follows:

In addition to the loans, overdrafts were reported aggregating \(\$ 27,158,447.45\), as against \(\$ 24,926,294.51\) reported for 1915.

The investments in bonds, securities, etc., are classified as follows:
\begin{tabular}{|c|c|}
\hline United States bonds. & \$1, 310, 868.28 \\
\hline State, county, and municipal bonds & 31, 440, 464.89 \\
\hline Railroad bonds. & 2, 005, 837.83 \\
\hline Bonds of other public-service corporations. & 14, 809, 195.99 \\
\hline Other bonds, stocks, warrants, etc & 643, 720, 791.99 \\
\hline
\end{tabular}

The State banks held cash amounting to \(\$ 271,753,812.34\), which was 6.32 per cent of individual deposits.

Individual deposits are classified as follows:
\begin{tabular}{|c|c|}
\hline ubject to che & \$2, 529, 610, 155.72 \\
\hline Demand certificates of deposit. & 119, 365, 224.71 \\
\hline Certified checks and cashier's & 19, 237, 171. 84 \\
\hline Savings deposits & 961, 693, 954.30 \\
\hline Time certificates of deposit. & 664, 731, 176.99, \\
\hline Deposits not classified. & 1, 615, 346.49 \\
\hline
\end{tabular}

Total....................................................... 4, 296, 253, 030.05
In addition to the individual deposits classified as above, dividends unpaid amounted to \(\$ 3,081,220.02\); postal savings deposits, \(\$ 4,457,-\) 263.97; and amounts due to banks and bankers aggregated \(\$ 217\),212,186.75.

\section*{MUTUAL SAVINGS BANKS.}

Summaries of reports of condition were received as of June 30, 1916, from 622 mutual savings banks, all being official statements with the exception of those from Massachusetts, Connecticut, and Maryland, the returns from these States being compiled in this office. Deposits in mutual savings banks are the accumulations chiefly of wage earners and, to a large extent, represent the prosperity of the wage-earning class. The mutual savings banks are located mainly in manufacturing centers and towns of the New England and Eastern States, there being only 21 reporting institutions of this character in other sections of the country, namely, 1 in West Virginia, 3 in Ohio, 5 in Indiana, 4 in Wisconsin, 7 in Minnesota, and 1 in California.

The resources of this class of banks aggregate \(\$ 4,547,941,986.84\) and their deposits amount to \(\$ 4,186,976,600.64\), credited to \(8,592,271\) depositors, the average deposit account being \(\$ 487.30\). In 1915, 630 mutual savings banks reported with aggregate resources of \(\$ 4,319,-\) \(382,916.93\) and deposits of \(\$ 3,950,666,362.08\), credited to \(8,307,787\) depositors, the average deposit account being \$475.53.

The increases during the year have been 284,484 depositors, \(\$ 236,310,238.56\) in deposits, and \(\$ 11.77\) in the average deposit account. The increase in deposits during the past year is the largest annual increase ever réported for mutual savings banks.

The following statement shows the number of mutual savings banks reporting, the number of depositors, the aggregate deposits, and the average deposit account for each year from 1908 to 1916:
\begin{tabular}{|c|c|c|c|c|c|}
\hline & Year. & Banks. & Depositors. & Deposits. & Average to each dèpositor. \\
\hline 1908. & & 676 & 7,137,481 & \$3, \(065,686,012\) & \$429.52 \\
\hline 1909. & & 643 & 7, 204, 579 & 3,144, 584, 874 & \({ }^{1} 435.66\) \\
\hline 1910. & & 638 & 7,481, 649 & 3,360, 563, 842 & 449.17 \\
\hline 1911. & & 635 & 7,690,973 & 3,460,575,072 & 449.95 \\
\hline 1912. & & 630 & 7,851,377 & 3,608,657, 828 & 459.62 \\
\hline 1913. & & 623 & 8,101,238 & 3,769,555,330 & 465.31 \\
\hline 1914. & & 634 & 8,277,359 & 3,915,626, 190 & 473.05 \\
\hline 1915. & & 630 & 8, 307, 787 & 3,950, 666, 362 & 475.53 \\
\hline 1916 & & 622 & 8,592, 271 & 4,186, 976, 600 & 487.30 \\
\hline
\end{tabular}
\({ }^{1}\) Only 627 banks reported as to the number of depositors and the average deposit is taken on that basis.
The resources of the mutual savings banks are classified as follows: Loans, \(\$ 2,221,426,717.93\); investments in bonds, securities, etc., \(\$ 1,999,131,810.54\); banking-house furniture and fixtures, \(\$ 39,811,-\) 988.37 ; other real estate owned, \(\$ 19,452,143.50\); due from banks, \(\$ 210,919,583.66\); checks and other cash items, \(\$ 2,753,380.16\); cash in bank, \(\$ 26,135,692.28\); all other resources, \(\$ 28,310,670.40\).

The liabilities are classified as follows: Surplus, \(\$ 303,300,757.57\); undivided profits, \(\$ 51,380,612.85\); due to banks, \(\$ 868,536.72\); individual deposits, \(\$ 4,186,976,600.64\); postal-savings deposits, \(\$ 943\),593.78 ; all other liabilities, \(\$ 4,471,885.28\).

The average rate of interest paid on deposits in mutual savings banks in 1916 was 3.95 per cent against 3.83 per cent in 1915 and 3.86 per cent in 1914.

The following table shows the number of depositors in mutual savings banks, the aggregate deposits, and the average amount due to depositors, in the States indicated, on June 23, 1915, and on June 30, 1916.

Number of mutual savings banks, number of depositors, aggregate deposits, and average deposit account, by States, June 23, 1915, and June 30, 1916.

STOCK SAVINGS BANKS.
Many so-called stock savings banks transact chiefly a commercial business and carry very few savings accounts, and the banking departments of a large number of States include their returns with commercial banks. As statistics for the current year were furnished by the banking departments in the form of summaries of official reports made to such departments, it has not been possible to make as complete a segregation of the reports for stock savings banks as was done in 1915 and several years prior thereto. In 1915 stock savings banks to the number of 1,529 furnished reports to this office. For the present year returns from only 1,242 stock savings banks are separately shown.

Statistics forstock savings banks of Virginia, South Carolina, Tennessee, Michigan, Wisconsin, North Dakota, Kansas, Montana, Idaho, and Nevada are included with the statistics for commercial or State banks as furnished this office by the banking departments of these States. Many of the State banking departments include all classes of banks in one official summary while others publish a summary of the returns from each class of banks under State supervision. So long as this practice continues it will not be possible for this office to make comparable summaries for stock savings banks.
In California a large number of the banks are known as departmental banks which make separate reports to the banking depart-
\[
62015^{\circ} \text {-FI 1916-34 }
\]
ment of that State for each class of business, that is, for their commercial, trust, and savings bank departments. Figures for California, therefore, include the resources and liabilities of savings banks and savings departments of other banks.

The 1,242 stock savings banks on June 30, 1916, reported loans including overdrafts aggregating \(\$ 713,987,889.45\), classified as follows: Secured by real estate, \(\$ 357,281,829.14\); secured by collateral other than real estate, \(\$ 29,011,565.34\); unclassified loans, \(\$ 326,361,578.64\); overdrafts, \(\$ 1,332,916.33\). Investments in bonds, securities, etc., aggregated \(\$ 131,404,563.61\), amount due from banks \(\$ 111,099,140.62\), and cash in bank \(\$ 32,821,494.87\).
On the liability side, capital stock was reported at \(\$ 72,870,175.84\), surplus at \(\$ 30,595,344.20\), and undivided profit \(\$ 16,103,770.05\). The amount due to banks was \(\$ 6,405,727.16\). Individual deposits aggregated \(\$ 901,610,693.88\). Of the individual deposits the sum of \(\$ 844,346,877.48\) was classified as savings and \(\$ 9,889,107.20\) as time deposits; the sum of \(\$ 42,374,916.97\) was reported as subject to check without notice, \(\$ 2,446,368.57\) demand certificates of deposit, \(\$ 905,939.88\) cashiers' checks and certified checks, and \(\$ 1,647,483.78\) was unclassified. The stock savings banks reported postal savings deposits held amounting to \(\$ 881,654.11\).

The depositors in the reporting stock savings banks number \(2,556,121\), of which \(2,297,911\) are saving depositors and 258,210 have commercial accounts. The rate of interest paid on savings accounts averaged 3.84 per cent.

The following table shows the number of depositors in stock savings banks, the average deposit, and the aggregate amount due to depositors, in States indicated, on June 23, 1915, and June 30, 1916.

Number of stock savings banks, number of depositors, aggregate deposits, and average deposit account, by States, June 23; 1915, and June 30, 1916.

\({ }^{1}\) Savings deposits in savings departments of Illinois State banks and trust companies were reported officially, on Junc 23, 1915, at \(\$ 294,534,096.83\), and on June 30, 1916, at \(\$ 326,156,216.75\).

2 Included with State banks.
Note.-Returns from the banking departments of 10 States include stock savings banks with commercial banks. It is estimated that 300 stock savings banks with 815,000 depositors and \(\$ 250,000,000\) deposits are included with the figures furnished by the State banking departments for State commercial banks. This estimate includes the so-called stock savings banks of Michigan now combined with commercial banks except 4, as indicated.

\section*{ALL REPORTING SAVINGS BANKS.}

The growth of savings banks (mutual and stock) in the United States from 1820 to 1916, as evidenced by the amount of deposits, number of depositors, average deposit account, and the average per capita in census years, from 1890 to 1916, is shown in the following tablé:

Number of savings banks in the United States, number of depositors, amount of savings deposits, average amount due each depositor in the years 1820, 1825, 1830, 1895, 1840, and 1845 to 1916, and average per capita in the United States in the years given.
\begin{tabular}{|c|c|c|c|c|c|c|}
\hline & Year. & Banks. & Depositors. & Deposits. & Average
due each depositor. & Average per capita in the United States. \\
\hline 1820. & & 10 & 8,635 & \$1,138,576 & \$131.88 & 80.12 \\
\hline 1825. & & 15 & 16,931 & 2,537,082 & 149.84 & \\

\end{tabular}
\({ }^{1}\) The relatively small amount of deposits reported for stock savings banks is due to the fact that the returns from many States include this class of banks with commercial banks.
\({ }_{2}\) Includes time deposits, \(\$ 9,889,107\), and commercial deposits amounting to \(\$ 47,374,709\).

In the assembling of data in relation to savings banks, the classification of banks as made by the State banking departments is followed, in consequence of which, in a number of States, banks heretofore treated by this office as savings banks are, for the current year, regarded as commercial banks and the returns are combined.

In the foregoing table the figures for 1896 to 1908 , inclusive, but not subsequently, include the number of depositors and the amount of deposits in the State banks of Illinois having savings departments, but not the number of such banks, by reason of the fact that general returns from these institutions are incorporated in State banks' returns.

\section*{Loan and Trust Companies.}

Summaries of reports of condition as of June 30, 1916, from 1,606 loan and trust companies show aggregate capital of \(\$ 475,832,586.87\), and aggregate resources, \(\$ 7,028,269,761.55\).

In June, 1915, reports were received from 1,664 loan and trust companies with capital of \(\$ 476,806,240\) and aggregate resources of \(\$ 5,873,120,341\). The difference in the number of companies reporting is accounted for by the fact that returns from the banking departments of six States include this class of institutions with their summaries of reports of commercial banks.

On June 30, 1916, loan and trust companies held loans and discounts aggregating \(\$ 3,702,104,485.09\), not including overdrafts amounting to \(\$ 2,264,046.95\).

Investments in bonds, securities, etc., aggregated \(\$ 1,605,392,871.86\), cash in bank \(\$ 329,456,991.49\), and individual deposits \(\$ 5,198,496\),296.53. Of the individual deposits- \(\$ 1,214,090,179.02\) was classified as saving deposits and \(\$ 166,846,034.47\) as time deposits, the remainder, \(\$ 3,817,560,083.04\), being demand deposits.

Banking premises and other real estate owned aggregated \(\$ 187,-\) 819,133.50.

The loan and trust companies had an aggregate surplus of \(\$ 508,-\) \(822,951.65\) and undivided profits of \(\$ 96,669,859.59\). In addition to individual deposits amounting to \(\$ 5,198,496,296.53\) the sum of \(\$ 4,826,014.51\) was reported as postal savings deposits, \(\$ 4,125,999.91\) dividends unpaid, and \(\$ 525,008,135.55\) due to banks and bankers.

\section*{Private Banks.}

Reports of condition as of June 30, 1916, were received from 1,014 private banks against 1,036 reporting in 1915. Less than one-half of the private banking institutions which are not under State supervision can be prevailed upon to furnish reports of condition for statistical purposes. The banks reporting numbered 115 from the Eastern States, 51 from the Southern States, 779 from the Middle Western States, 65 from the Western States, and 4 from the Pacific States.

The capital of the 1,014 reporting private banks aggregated \(\$ 16,852,170.34\) and the resources \(\$ 181,852,052.54\). The loans and discounts of the reporting private banks aggregated \(\$ 116,429,240.73\); investments in bonds, securities, etc., \(\$ 14,393,235.69\); amount due from banks, \(\$ 28,610,481.46\), and cash on hand, \(\$ 6,347,330.97\). The surplus was \(\$ 6,763,114.51\), and undivided profits, \(\$ 3,181,735.68\).

Of the individual deposits amounting to \(\$ 146,765,453.88\); the sum of \(\$ 16,302,104.43\) was classified as savings deposits and \(\$ 27,-\) \(659,270.15\) as time deposits.

The returns from private banks were all official except those from Pennsylvania, Texas, Illinois, Michigan, Iowa, and Utah, which were received by this office in compliance with the request of the comptroller addressed to the individual bankers.

\section*{Reports of Condition of all Banks in the United States.}

The consolidated statements of condition of 27,513 reporting banks in the United States and island possessions for June, 1916, including National, State, savings, and private banks, and loan and trust companies, show aggregate capital of \$2,195,101,115.96 and aggregate resources of \(\$ 32,271,237,696.93\), or an increase of 451 in the number of banks reporting, \(\$ 32,259 ; 746.03\) in capital, and \(\$ 4,467,108,019.37\) in resources during the year.
In the weekly statement published by the Federal Reserve Board showing the condition of the Federal reserve banks as of June 30, 1916, the capital of these banks is stated at \(\$ 54,854,000\) and the resources at \(\$ 624,957,000\).
By including the reports of the 12 Federal reserve banks with the statistics of all other reporting banks, it will be noted that the aggregate resources of the banks of the country approximate the sum of \(\$ 32,896,000,000\), with a total capitalization of nearly \(\$ 2,250,000,000\).
The following statement shows the principal items of resources and liabilities of 27,513 reporting banks from reports of condition at the close of business June 30, 1916, together with a summary of reports of condition of the 12 Federal reserve banks for the same date.
Statement showing the principal items of resources and liabilities of 27,513 reporting banks in the United States and island possessions together with the 12 Federal reserve
banks as of June 30, 1916.

\end{tabular}

\footnotetext{
\({ }^{1}\) Includes \(\$ 23,182,000\) Federal reserve notes (net).
\({ }^{2}\) Iucludes United States and postal savings deposits.
\({ }^{8}\) Includes Government deposits and reserve deposits.
}

There are about 3,000 private banking concerns in the country from which no reports can be obtained. A careful estimate based on the returns received from private banks indicates that the capital of these nonreporting banks amounts to \(\$ 60,000,000\) and the resources to \(\$ 535,000,000\). The aggregate banking resources of the country, actual and estimated, would, therefore, appear to be over \(\$ 33,431,-\) 000,000 , an increase of \(\$ 4,731,000,000\) or 16.48 per cent over the actual and estimated banking resources in 1915.

\section*{BANKING POWER OF THE UNITED STATES.}

The banking power of the United States in June, 1916, was \(\$ 29,353,500,000\), as represented by capital, surplus, and other profits, circulation and deposits of national and other reporting banks, together with the estimated amount of funds of this character in nonreporting banks, as of June 30, 1916, as well as the paid-in capital, net reserve deposits, and Federal reserve notes in circulation as shown by the statement of the Federal reserve banks.

In June, 1915, the estimated banking power of the United States was \(\$ 25,397,100,000\). The increase for the year was \(\$ 3,956,400,000\), or over 15.57 per cent. The details are set forth in the following table:

\({ }^{4} 0\) ne of the bankers' directories gives the total number of banks at 31,624 , but over 1,000 of this number are merely brokers and not included in these statistics.

SUMMARY OF THE COMBINED RETURNS FROM NATIONAL AND OTHER BANKS , AS OF JUNE 30, 1916.

The banks furnishing statements for use in connection with this report number 27,513 , being 451 more than reported in 1915. The resources aggregate \(\$ 32,271,237,696.93\) against \(\$ 27,804,129,677.56\) reported in 1915 , the increase being \(\$ 4,467,108,019.37\), or 16.07 per cent.

The summary following is based upon reports of condition of 7,579 national banks, and summaries furnished by the State banking departments and from individual statements of 15,450 State banks,

622 mutual savings banks, 1,242 stock savings banks, 1,014 private banks, and 1,606 loan and trust companies.

The reports from these banks are for the close of business June 30, except that the statistics furnished by the banking department of Nebraska are for the close of business May 29, those of Indiana for May 1, and of Georgia and Kentucky for June 1.

Summary of reports of condition of 27,518 banks in the United States and island posses-
sions, including National, State, savings, and private banks, and loan and trust com-
panies, for June 30,1916 .

\hline
\end{tabular}

The foregoing statement shows that the aggregate resources of the banks have increased from \(\$ 24,986,642,774.18\) in 1912 to \(\$ 32,271,237,-\) 696.93 in 1916, a gain of \(\$ 7,284,594,922.75\), or 29.15 per cent.

The increase in bank resources, exclusive of the Federal reserve banks, during the past year has been 16.07 per cent. The increase in 1915 over 1914 was 3.09 per cent; 1914 over 1913, 4.90 per cent; and 1913 over 1912, 2.90 per cent.

Growth of Banking in the United States Since 1863.
A table, in volume 2 of the report of the Comptroller shows the number of colonial and State banks in the United States from 1784 to 1833, together with their principal items of resources and liabilities. A statement of the resources and liabilities of the banks of the country in detail from 1834 to 1863 will also be found in the same volume.

The following condensed statement shows the principal items of resources and liabilities for national, State, savings, and private banks and loan and trust companies from 1863 to 1916, inclusive. The table also shows the principal items of resources and liabilities of the Federal reserve banks as of June 25, 1915, and June 30, 1916:

Principal items of resources and liabilities of national, State, savings, private banks, loan and trust companies from 1863 to 1916.
[From 1863 to 1872, inclusive, data from various sources; from 1873 compiled from reports obtained by the Comptroller of the Currency.]

Note.-Since 1873 the comptroller has collected and published statistics of State banks, but complete data for compiling these statistics for a number of years thereaiter were available only for those States in which the banks were required to report to some State official. For recent years the statistics are practically complete:
\[
62015^{\circ} \text {-FI 1916-35 }
\]

\section*{Money in all Reporting Bants.}

Cash in National, State, sarings, and private banks, and loan and trust companies of the country, shown by reports of condition as of June 30, 1916, aggregated \(\$ 1 ; 486,118,321.95\), and the cash held by Federal reserve banks on the same date amounted to \(\$ 425,599,000\), making the total cash held by all banks \(\$ 1,911,717,321.95\).

The cash holdings of all reporting banks in June, 1915, were \(\$ 1,769,861,138.31\), the increase in the cash holdings of all banks during the year being \(\$ 141,856,183.64\), or 8.02 per cent. Coin and other money held by all banks and by Federal reserve banks are shown in the following table:

Classification of cash in banks June 30, 1916.

\footnotetext{
\({ }^{1}\) Classification incomplete by reason of the fact that in the returns from banks other than national in many 8tates the various kinds of currency held are not shown separately.
\({ }^{2}\) Includes \(\$ 66,971,000\) gold clearing house certificates.
}

\section*{Distribution of Money in tee United States.}

The general stock of money at the close of the fiscal year ended June 30,1916 , was \(\$ 4,482,900,000\), or \(\$ 493,500,000\) more than was reported for 1915.

Of the total stock \(\$ 458,800,000\), or 10.23 per cent, was in the Treasury as assets. Included in the latter amount is \(\$ 160,540,000\), held by Federal reserve banks and Federal reserve agents against Federal reserve notes. Coin and other money in national banks and other reporting banks, exclusive of those in the island possessions, amounted to \(\$ 1,472,200,000\), and including \(\$ 425,600,000\) cash in Federal reserve banks, the sum of \(\$ 1,897,800,000\), or 42.34 per cent of the total stock of money, was held by banks, the remaining \(\$ 2,126,-\) 300,000 , or 42.34 per cent, being outside of the Treasury and banks.

The amount in circulation, exclusive of coin and other money in the Treasury as assets, is \(\$ 4,024,100,000\), or \(\$ 39.29\) per capita, being an increase of \(\$ 454,900,000\) and a per capita increase of \(\$ 3.85\) over the amount reported in 1915.
In the following table is shown the distribution of money in the United States (island possessions not included), giving the amount in the Treasury as assets and the amount in reporting banks from 1892 to 1916, inclusive:
\begin{tabular}{|c|c|c|c|c|c|c|c|c|c|c|}

\({ }^{1}\) Public money in national-bank depositaries to the credit of the Treasurer of the United States not included.
\({ }_{2}\) Money in banks of island possessions not included.
\({ }^{3}\) Includes amount held by Federal reserve banks and Federal reserve agents against Federal reserve notes.

4 Money in Federal reserve banks June 25, 1915, and June 30, 1916.
\({ }^{5}\) Population estimated at \(102,431,000\).

\section*{INDIVIDUAL DEPOSITS IN ALL REPORTING BANKS.}

Individual deposits in all reporting banks on June 30, 1916, aggregated \(\$ 22,773,714,074.98\). In 1915 individual deposits were reported at \(\$ 19,135,380,200.45\). The increase during the fiscal year was, therefore, \(\$ 3,638,333,874.53\), or 19.01 per cent. The percentage of increase in deposits for the fiscal year ended June, 1915, was 3.34.
Individual deposits in each class of banks as of June 30, 1916, classjfied as demand, time, savings, and unclassified, are as follows:

Classification of individual deposits in each class of banks, June 30, 1916.
\begin{tabular}{|c|c|c|c|c|c|c|}
\hline Banks. & Number of banks. & Demand deposits (including demand certificates of deposit, certified checks, and cashier's checks). & Time deposits, including time certificates of deposit. & Savings deposits. & Unclassified deposits. & Total. \\

\hline
\end{tabular}

\footnotetext{
1 Exclusive of United States and postal savings deposits
}

Summaries of reports of condition from banks other than national show savings deposits held aggregating \(\$ 7,171,546,327\). Savings deposits in mutual savings banks were \(\$ 4,135,113,212\), or, including time and demand, they were \(\$ 4,186,976,600\); in stock savings banks, \(\$ 844,-\) 346,877 (including time and demand, \(\$ 901,610,693\) ); State banks, \(\$ 961,693,954\); loan and trust companies, \(\$ 1,214,090,179\); and private banks, \(\$ 16,302,104\).
In view of the fact that under the Federal reserve act deposits in national banks are classified as demand and time, it is not possible to state the amount of deposits that might be classed as savings held by banks of that character.

\section*{State and Private Bank Faludres.}

Statistical information has been obtained through the courtesy of the Bradstreet Commercial Agency with respect to the number of banks closed, other than national, together with the assets and liabilities and the date of closing, but no information is submitted in relation to dividends paid to creditors or to the settlement of the affairs of insolvent State and private banks.

Included in the list of failures are 23 State banks with assets of \(\$ 2,147,768\) and liabilities of \(\$ 2,991,094 ; 3\) savings banks with assets of \(\$ 7,750,000\) and liabilities of \(\$ 11,885,000 ; 3\) trust companies with assets of \(\$ 256,070\) and liabilities of \(\$ 257,000\); and 12 private banks with assets of \(\$ 358,000\) and liabilities of \(\$ 877,416\).

Since 1896 no statistics have been secured relating to the settlement of the affairs of banks of this character, but there have been reported from year to year the number of failures, with assets and liabilities at the date of failure, which is summarized in the table following:
Number of failures, capital, assets, liabilities, and dividends paid by State and private banks that failed in each year from 1864 to 1916.
\begin{tabular}{|c|c|c|c|c|c|c|}

\section*{Banks and Banking in the District of Columbia.}

There are 59 banking institutions in the District of Columbia, consisting of 14 national banks, 6 trust companies, 20 savings banks, and 19 building and loan associations. The aggregate capital of all these institutions on June 30, 1916, was \(\$ 18,659,000\). The total individual deposits were \(\$ 104,821,809\), and the aggregate resources, \$157,534,007.

The number, capital, individual deposits, and aggregate resources of each class of financial institutions doing business in the District of Columbia on June 30, 1916, are shown in the following table:
\begin{tabular}{ll|r|r|r|r|r}
\hline
\end{tabular}
\({ }^{1}\) Share payments mainly.

\section*{Building and Loan Associations in the District of Columbia.}

On March 4, 1909, the building and loan associations in operation in the. District of Columbia were placed under the supervision of the Comptroller of the Currency. Since that date they have shown a steady increase in business, as indicated by the volume of loans, installment payments on shares, and aggregate resources, as set forth in the following table:
\begin{tabular}{|c|c|c|c|c|c|}
\hline & Years. & Number of associations. & Loans. & Installments on shares. & Aggregate resources. \\
\hline \multicolumn{6}{|l|}{June 30-} \\

\section*{Bulding and Loan Associations in the United States.}

This office is indebted to Mr. H. F. Cellarius, secretary of the United States League of Local Building and Loan Associations, for statistics relating to building and loan associations of the United States for the year ended December 31, 1915. These statistics show that there were in 1915 in the United States 6,806 associations, with a total membership of \(3,334,899\) and having assets amounting to \(\$ 1,484,205,875\). The increase in resources for the year amounted to \(\$ 126,497,975\), or 9.32 per cent'over the figures reported for 1914. The membership increased 230,964 , or 7.44 per cent during the same period.
The following table shows by States the number of associations, total membership, and total assets for States in which accurate statistics are compiled by State supervisors. The data for other States are consolidated under the heading "Other States," and the figures given are estimated:

Statistics for 1915.

Ohio shows the largest increase in assets for the year, gaining \(\$ 22,175,828\), followed by Pennsylvania, whose increase is \(\$ 21,893,720\). Other increases for the year are: New Jersey, \(\$ 11,298,097\); Massachusetts, \(\$ 10,761,848\); Illinois, \(\$ 7,818,325\); Indiana, \(\$ 7,251,531\); Iowa, \$5,150,507; Nebraska, \$4,522,457; and New York, \(\$ 3,943,159\).

The average amount due each member is \(\$ 445.05\) as against \(\$ 437.41\), the amount shown last year.

\section*{RECEIPTS AND DISBURSEMENTS FOR 1915.}

The aggregate receipts for 1915 were \(\$ 966,913,414\), an increase of \(\$ 43,255,710\) over the previous year. The receipts from weekly dues were \(\$ 9,015,120\) in excess of 1914 , and the mortgage loans made by the various associations were \(\$ 10,183,440\) in excess of the previous year. The total expense of management for all associations was \(\$ 8,640,152\), or a little less than nine-tenths of 1 per cent of the total receipts, which is about the same percentage as last year. In detail the receipts and disbursements for the year 1915 were as follows:

RECEIPTS.
Cash on hand Jan. 1, 1915.............................................. \(\$ 37,008,676\)

\({ }^{1}\) Balances are as shown by banks' books. The actual balances to credit of board of trustees was 880,721,982.61. The difference is made up as follows: Add funds in transit to banks, \(\$ 3,975.60\); due from late qualified banks, \(\$ 0.46\); deduct outstanding checks, \(\$ 48,929.81\); funds in transit to banks, \(\$ 8,650\).
\({ }^{2}\) No post offices designated as depositories until April, 1916.
The number of depositors on June 30, 1915, was 525,414 , while on June 30, 1916, they numbered 602,937 , being an increase in the number of depositors of 77,523 .

Savings Banks in the Principal Countries of the World.
The Bureau of Foreign and Domestic Commerce, Department of Commerce, has furnished for publication in this report the latest available information with reference to savings banks in foreign countries. The statistics following show the number of depositors, amount of deposits, average deposit account, and the average deposit per inhabitant of the principal countries of the world. The statistics presented are divided into two classes; first, those relating to all savings banks; and, second, to postal savings banks. To the information so obtained have been added data relating to mutual and stock savings banks in operation in the United States together with postal savings in the United States and the Philippine Islands. The statistics thus obtained are shown in the table which follows:

Savings banks, including postal savings banks: Number of depositors, amount of deposits, average deposits per deposit account and per inhabitant, by specified countries.

\section*{Federal Reserve Banks.}

The 12 Federal reserve banks opened for business on November 16, 1914. Statements of their combined assets and liabilities are issued weekly. The combined statements for November 27, 1914, November 26, 1915, and November 24, 1916, are as follows:

The first purchases of United States bonds and municipal warrants were reported in the statement for June 18, 1915, and were as follows: United States bonds, \(\$ 7,200,000\), and municipal warrants, \(\$ 9,700,000\). In the statement for April 8, 1916, there appear among the assets for the first time United States Treasury notes issued in exchange for 2 per cent bonds previously acquired by the Federal reserve banks, the amount being \(\$ 1,932,000\). These notes bear interest at the rate of 3 per cent per annum and are payable one year after date of issue. The statement for November 24, 1916, shows that the purchase of United States bonds had increased to \(\$ 39,427,000\), one-year Treasury notes to \(\$ 11,167,000\), and municipal warrants to \(\$ 22,166,000\).

The development of the business of the Federal reserve banks as indicated by the weekly statements to November 24, 1916, is shown in the following table:

Comparative statement of the principal items of resources and liabilities of the Federal reserve banks from the date of the first report, Nov. 20, 1914, to Nov. 24, 1916.

\section*{FEDERAL RESERVE NOTES.}

In the weekly statements issued by the Federal Reserve Board, in addition to showing in detail the assets and liabilities of the Federal reserve banks, the volume of Federal reserve notes issued, the amount of gold and other lawful money deposited with the Federal reserve agents to retire outstanding notes, and the net amount of notes outstanding are reported.

Nore.-It is interesting to note the element of elasticity in the new circulating medium, and how responding to the demands of business, the volume of Federal reserve notes outstanding, as shown in the weekly.statements, reached its high point early in the year when on January 21 it was reported as \(\$ 220,380,000\).

The demand for currency being light during the early summer months, the volume of notes gradually declined through the ordinary process of redemption until on July 28 the amount stood at \(\$ 174,023,000\).

Responding again to business requirements, the amount of Federal reserve notes in circulation is shown at its highest point on November 24, 1916, the date of the last report, when it reached \(\$ 258,081,000\).

In the table following are shown the amounts issued, gold and lawful money deposited, and net amount of notes in circulation at the close of each week from November 20, 1914, to November 24, 1916.
\[

\({ }^{1}\) Net liability on account of Federal reserve notes from June 18, 1915.

\section*{FEDERAL RESERVE NOTE ISSUES AND REDEMPTIONS.}

The operations of the Federal Reserve Issue and Redemption Division of this office show a continued call for Federal reserve notes, which are issuable upon the deposit with the local Federal reserve agents of notes, bills, and securities described in the Federal Reserve act (which have been rediscounted for the member banks). Against

Federal reserve notes so issued there must be a gold reserve of not less than 40 per cent.

During the months of August, September, and October, 1916, the volume of Federal reserve notes outstanding increased over \(\$ 65,000,000\), and on October 31 the total amount in circulation was \(\$ 238,496,920\) of which \(\$ 223,523,070\) were secured by the deposit with the Federal reserve agent of a like amount of gold and lawful money and only \(\$ 14,973,850\) by commercial paper.
Up to October 31, 1916, Federal reserve notes to the amount of \(\$ 897,020,000\) were printed, \(\$ 419,200,000\) of which were shipped to Federal reserve agents and United States subtreasuries, and \(\$ 477\),820,000 held in the reserve vault available for shipment as required.
The average life of national currency has been computed to be about \(2 \frac{1}{2}\) years, but notes begin to be returned for destruction as unfit in about six months after issue. At the end of the year, or up to October 31, Federal reserve notes to the amount of \(\$ 81,734,430\) had been returned for destruction as "unfit for circulation."

Detailed information relative to issues and redemptions of Federal reserve notes, by banks and denominations, is given in the following tables:
Statement of Federal reserve notes, by denominations, printeld, shipped to Federal reserve
agents, and United States subtreasuries, and on hand in reserve vault, Oct. 31, 1916.

Statement of Federal reserve notes, by denominations, printed, shipped to Federal reserve agents, and United States subtreasuries, and on hand in reserve vault, Oct. 31, 1916Continued.

\section*{FEDERAL RESERVE BANK CURRENCY.}

In addition to Federal reserve notes, the Federal reserve banks may also issue what has been designated as "Federal reserve bank currency." This currency is of the same tenor and effect and is
issued under the same terms and conditions as national-bank notes, except that its volume is not limited to the amount of capital stock of the issuing bank.
The notes issued to the banks are secured by deposits of Government bonds bearing the circulation privilege, acquired in the open market or taken over from national banks desiring to reduce their circulation.

Federal reserve bank currency, by denominations, printed, issued, and on hand in vault Oct. 31, 1916.

Federal reserve bank currency, by denominations, printed, issiued, and on hand in vault Oct. 31, 1916-Continued.

\section*{Legislation by the Present Congress.}

During the present Congress the Federal laws relating to banks, banking and the currency, have been materially amended and important new legislation affecting banks written into the statute books.

In addition to the amendments to the Federal reserve and national bank act, changes have been made in the laws relating to the income tax on banks; issuance of certificates against gold bullion and foreign gold coin, and the act of October 15, 1914, supplementing the laws against unlawful restraints and monopolies in relation to interlocking directorates.

Under date of July 17, 1916, the act was approved "to provide capital for agricultural development, to create standard forms of investment based upon farm mortgage, to equalize rates of interest upon farm loans, to furnish a market for United States bonds, to create Government depositaries and financial agents for the United States and for other purposes." There was also approved under date of August 29, 1916, the act "relating to bills of lading in interstate and foreign commerce."

The Federal reserve act approved December 23, 1913, was amended on September 7, 1916, as follows (changes and additions to the law in italics):

AMENDMENTS TO FEDERAL RESERVE ACT.
At the end of section eleven insert a new clause as follows:
"(m) Upon the affirmative vote of not less than five of its members the Federal Reserve Board shall have power, from time to time, by general ruling, covering all districts alike, to permit member banks to carry in the Federal reserve banks of their respective districts any portion of their reserves now required by section nineteen of this Act to be held in their own vaults."

That section thirteen be, and is hereby, amended to read as follows:
"Any Federal reserve bank may receive from any of its member banks, and from the United States, deposits of current funds in lawful money, national-bank notes, Federal reserve notes, or checks, and drafts, payable upon presentation, and also, for collection, maturing bills; or solely for purposes of exchange or of collection, may receive from other Federal reserve banks deposits of current funds in lawful money, nationalbank notes, or checks upon other Federal reserve banks, and checks and drafts, payable upon presentation within its district, and maturing bills payable within its district.
"Upon the indorsement of any of its member banks, which shall be deemed a waiver of demand, notice and protest by such bank as to its own indorsement exclusively, any Federal reserve bank may discount notes, drafts, and bills of exchange arising out of actual commercial transactions; that is, notes; drafts, and bills of exchange issued or drawn for agricultural, industrial, or commercial purposes, or the proceeds of which have been used, or are to be used, for such purposes, the Federal Reserve Board to
have the right to determine or define the character of the paper thus eligible for discount, within the meaning of this Act. Nothing in this Act contained shall be construed to prohibit such notes, drafts, and bills of exchange, secured by staple agricultural products, or other goods, wares, or merchandise from being eligible for such discount; but such definition shall not include notes, drafts, or bills covering merely investments or issued or drawn for the purpose of carrying or trading in stocks, bonds, or other investment securities, except bonds and notes of the Government of the United States. Notes, drafts, and bills admitted to discount under the terms of this paragraph must have a maturity at the time of discount of not more than ninety days, exclusive of days of grace: Provided, That notes, drafts, and bills drawn or issued for agricultural purposes or based on live stock and having a maturity not exceeding six months, exclusive of days of grace, may be discounted in an amount to be limited to a percentage of the assets of the Federal reserve bank, to be ascertained and fixed by the Federal Reserve Board.
"The aggregate of such notes, drafts, and bills bearing the signature or indorsement of any one borrower, whether a person, company, firm, or corporation, rediscounted for any one bank shall at no time exceed ten per centum of the unimpaired capital and surplus of said bank; but this restriction shall not apply to the discount of bills of exchange drawn in good faith against actually existing values.
"Any Federal reserve bank may discount acceptances of the kinds hereinafter dèscribed, which have a maturity at the time of discount of not more than three months' sight, exclusive of days of grace, and which are indorsed by at least one member bank.
"Any member bank may accept drafts or bills of exchange drawn upon it having not more than six months' sight to run, exclusive of days of grace, which grow out of transactions involving the importation or exportation of goods; or which grow out of transactions involving the domestic shipment of goods provided shipping documents conveying or securing title are attached at the time of acceptance; or which are secured at the time of acceptance by a warehouse receipt or other such document conveying or securing title covering readily marketable staples. No member bank shall accept; whether in a foreign or domestic transaction, for any one person, company, firm, or corporation to an amount equal at any time in the aggregate to more than ten per cent of its paid-up and unimpaired capital stock and surplus unless the bank is secured either by attached documents or by some other actual security growing out of the same transaction as the acceptance and no bank shall accept such bills to an amount equal at any time in the aggregate to more than one-half of its paid-up and unimpaired capital stock and surplus.
"Any Federal reserve bank may make advances to its member banks on their promissory notes for a period not exceeding fifteen days at rates to be established by such Federal reserve banks, subject to the review and determination of the Federal Reserve Board, provided such promissory notes are secured by such notes, drafts, bills of exchange, or bankers' acceptances as are eligible for rediscount or for purchase by Federal reserve banks under the provisions of this Act, or by the deposit or pledge of bonds or notes of the United States."

Section fifty-two hundred and two of the Revised Statutes of the United States is hereby amended so as to read as follows: "No national banking association shall at any time be indëbted, or in any way liable, to an amount exceeding the amount of its capital stock at such time actually paid in and remaining undiminished by losses or otherwise, except on account of demands of the nature following:
"First. Notes of circulation.
"Second. Moneys deposited with or collected by the association.
"Third. Bills of exchange or drafts drawn against money actually on deposit to the credit of the association, or due thereto.
"Fourth. Liabilities to the stockholders of the association for dividends and reserve profits.
"Fifth. Liabilities incurred under the provisions of the Federal Reserve Act.
"The discount and rediscount and the purchase and sale by any Federal reserve bank of any bills receivable and of domestic and foreign bills of exchange, and of acceptances authorized by this Act, shall be subject to such restrictions, limitations, and regulations as may be imposed by the Federal Reserve Board.
"That in addition to the powers now vested by law in national banking associations organized under the laws of the United States any such association located and doing business in any place the population of which does not exceed five thousand inhabitants, as shown by the last preceding decennial census, may, under such rules and regulations as may be prescribed by the Comptroller of the.Currency, act as the agent for any fire, life, or other insurance company authorized by the authorities of the State in which said bank is located to do business in said State; by soliciting and selling insurance and collecting premiums on policies issued by such company; and may receive for services so rendered such fees or commissions as may be agreed upon between the said association and the insurance company for which it may act as agent; and may also act as the broker or agent for
others in making or procuring loans on real estate located within one hundred miles of the place in which said bank may be located, receiving for such services a reasonable fee or commission: Provided, however, That no such bank shall in any case guarantee either the principal or interest of any such loans or assume or guarantee the payment of any premium on insurance policies issued through its agency by its principal: And provided further, That the bank shall not guarantee the truth of any statement made by an assured in filing his application for insurance.
"Any member bank may accept drafts or bills of exchange drawn upon it having not more than three months' sight to run, exclusive of days of grace, drawn under regulations to be prescribed by the Federal Reserve Board by banks or bankers in foreign countries or dependencies or insular possessions of the United States for the purpose of furnishing dollar exchange as required by the usages of trade in the respective countries, dependencies, or insular possessions. Such drafts or bills may be acquired by Federal reserve banks in such amounts and subject to such regulations, restrictions, and limitations as may be prescribed by the Federal Reserve Board: Provided, however, That no member bank shall accept such drafts or bills of exchange referred to in this paragraph for any one bank to an amount exceeding in the aggregate ten per centum of the paid-up and unimpaired capital and surplus of the accepting bank unless the draft or bill of exchange is accompanied by documents conveying or securing title or by some other adequate security: Provided further, That no member bank shall accept such drafts or bills in an amount exceeding at any time the aggregate of one-half of its paid-up and unimpaired capital and surplus."

That subsection (e) of section fourteen, be, and is hereby, amended to read as follows:
"(e) To establish accounts with other Federal reserve banks for exichange purposes and; with the consent of the Federal Reserve Board, to open and maintain accounts in foreign countries, appoint correspondents, and establish agencies in such countries wheresoever it may deem best for the purpose of purchasing, selling, and collecting bills of exchange, and to buy and.sell, with or without its indorsement, through such correspondents or agencies bills of exchange arising out of actual commercial transactions which have not more than ninety days to run, exclusive of days of grace, and which bear the signature of two or more responsible parties, and, with the consent of the Federal Reserve Board, to open and maintain banking accounts for such foreign correspondents or agencies."

That the second paragraph of section sixteen be, and is hereby, amended to read as follows:
"Any Federal reserve bank may make application to the local Federal reserve agent for such amount of the Federal reserve notes hereinbefore provided for as it may require. Such application shall be accompanied with a tender to the local Federal reserve agent of collateral in amount equal to the sum of the Federal reserve notes thus applied for and issued pursuant to such application. The collateral security thus offered shall be notes, drafts, bills of exchange, or acceptances rediscounted under the provisions of section thirteen of this Act, or bills of exchange indorsed by a member bank of any Federal reserve district and purchased under the provisions of section fourteen of this Act, or bankers' acceptances purchased under the provisions of said section fourteen. The Federal reserve agent shall each day notify the Federal Reserve Board of all issues and withdrawals of Federal reserve notes to and by the Federal reserve bank to which he is accredited. The said Federal Reserve Board may at any time call upon a Federal reserve bank for additional security to protect the Federal reserve notes issued to it."

That section twenty-four be, and is hereby, amended to read as follows:
"Sec. 24. Any national banking association not situated in a central reserve city may make loans secured by improved and unencumbered farm land situated within its Federal reserve district or within a radius of one hundred miles of the place in which such bank is located, irrespective of district lines, and may also make loans secured by improved and unencumbered real estate located within one hundred miles of the place in which such bank is located, irrespective of district lines; but no loan made upon the security of such farm land shall be made for a longer time than five years, and no loan made upon the security of such real estate as distinguished from farm land shall be made for a longer time than one year nor shall the amount of any such loan, whether upon such farm land or upon such real estate, exceed fifty per centum of the actual value of the property offered as security. Any such bank may make such loans, whether secured by such farm land or such real estate, in an aggregate sum equal to twenty-five per centum of its capital and surplus or to one-third of its time deposits and such banks may continue hereafter as heretofore to receive time deposits and to pay interest on the same.
"The Federal Reserve Board shall have power from time to time to add to the list of cities in which national banks shall not be permitted to make loans secured upon real estate in the manner described in this section."

That section twenty-five be, and is hereby, amended to read as follows:
"SEc. 25. Any national banking association possessing a capital and surplus of \(\$ 1,000,000\) or more may file application with the Federal Reserve Board for permission to exercise, upon such conditions and under such regulations as may be prescribed by the said board, either or both of the following powers:
"First. To establish branches in foreign countries or dependencies or insular possessions of the United States for the furtherance of the foreign commerce of the United States; and to act if required to do so as fiscal agents of the United States.
"Second. To invest an amount not exceeding in the aggregate ten per centum of its paid-in capital stock and surplus in the stock of one or more banks or corporations chartered or incorporated under the laws of the United States or of any State thereof, and principally engaged in international or foreign banking, or banking in a dependency or insular possession of the United States either directly or through the agency, ownership, or control of local institutions in foreign countries, or in such dependencies or insular possessions.
"Such application shall specify the name and capital of the banking association filing it, the powers applied for, and the place or places where the banking operations proposed are to be carried on. The Federal Reserve Board shall have power to approve or to reject such application in whole or in part if for any reason the granting of such application is deemed inexpedient, and shall also have power from time to time to increase or decrease the number of places where such banking operations may be carried on.
"Every national banking association operating foreign branches shall be required to furnish information concerning the condition of such branches to the Comptroller of the Currency upon demand, and every member bank investing in the capital stock of banks or corporations described under subparagraph two of the first paragraph of this sec. tion shall be required to furnish information concerning the condition of such banks or corporations to the Federal Reserve Board upon demand, and the Federal Reserve Board may order special examinations of the said branches, banks, or corporations at such time or times as.it may deem best.
"Before any national bank shall be permitted to purchase stock in any such corporation the said corporation shall enter into an agreement or undertaking with the Federal Reserve Board to restrict its operations or conduct its business in such manner or under such limitations and restrictions as the said board may prescribe for the place or places wherein such business is to be conducted. If at any time the Federal Reserve Board shall ascertain that the regulations prescribed by it are not being complied with, said board is hereby authorized and empowered to institute an investigation of the matter and to send for persons and papers, subpeona witnesses, and administer oaths in order to satisfy itself as to the actual nature of the transactions referred to. Should such investigation result in establishing the failure of the corporation in question, or of the national bank or banks which may be stockholders therein, to comply with the regulations laid down by the said Federal Reserve Board, such national banks may be required to dispose of stock holdings in the said corporation upon reasonable notice.
"Every such national banking association shall conduct the accounts of each foreign branch independently of the accounts of other foreign branches established by it and of its home office, and shall at the end of each fiscal period transfer to its general ledger the profit or loss accrued at each branch as a separate item.

\section*{INTERNAL REVENUE ACTS.}

The internal revenue act of October 3, 1913, was amended September 8, 1916, providing for an increase from 1 to 2 per cent in the tax upon the net income of banks, effective on and after January 1, 1917.
The emergency internal revenue act of October 22, 1914, imposing a tax of \(\$ 1\) per thousand upon the capital, surplus, and undivided profits of banks, continue until January 1, 1917, after which, under the act of September 8, 1916, the tax on capital stock will be reduced from \(\$ 1\) to 50 cents per thousand.

In addition, bankers engaged in the business of negotiating purchases or sales of stocks, bonds, exchange, bullion, coined money, bank notes, promissory notes, or other securities, for others, are liable after January 1, 1917, to a special tax of \(\$ 30\) annually as brokers.

\section*{ISSUE OF GOLD CERTIFICATES.}

The act relating to the issuance of gold certificates was amended June 12, 1916, to provide that " the amount of gold bullion and foreign coin so held (against issues of gold certificates) shall not at any time exceed two-thirds of the total amount of gold certificates at such time outstanding." The amendment in question changes the proportion of bullion and coin held from one-third to two-thirds of the amount of the certificates outstanding.

\section*{INTERLOCKING DIRECTORATES, ETC.}

The amendment to the law, relating to unlawful restraints and monopolies, approved September 7, 1916, is as follows:

\begin{abstract}
Any director or other officer, agent, or employee of any member bank may, with the approval of the Federal Reserve Board, be a director or other officer, agent, or employee of any such bank or corporation above mentioned in the capital stock of which such member bank shall have invested as herieinbefore provided, without being subject to the provisions of section eight of the act approved October fifteenth, nineteen hundred and fourteen, entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes."
\end{abstract}

\section*{BILLS OF LADING.}

An important measure passed by the last Congress, in which banks and the commercial world generally are interested, was the act approved August 29, 1916, relating to bills of lading in interstate and foreign commerce. It is provided:

That bills of lading issued by any common carrier for the transportation of goods in any territory in the United States or the District of Columbia or from a place in a State to a place in a foreign country, or from a place in one State to a place in another State, or from a place in one State to a place in the same State through another State or foreign country, shall be governed by this act.

\section*{Federal Farm Loan Act.}

The act approved July 17, 1916, provides for the establishment of the Federal Farm Loan Bureau, the organization of 12 Federal land banks, in districts to be determined, and also for the organization of national farm loan associations, joint stock land banks, for the issue of farm loan bonds, in connection with the provision for capital for agricultural development, the equalization of rates of interest upon farm loans, etc. The Federal Farm Loan Bureau, under the general supervision of the Federal Farm Loan Board, has been established in the Department of the Treasury.

In view of the general interest in this subject, the Federal Farm Loan Act is printed as Exhibit O hereto and the Decision of the Federal Farm Loan Board determining the districts and the location of the Federal land banks is herewith presented.

DECISION OF FEDERAL FARM LOAN BOARD DETERMINING FEDERAL LAND BANK DISTRICTS AND LOCATION OF BANKS.

On December 27, 1916, the Federal Farm Loan Board announced its decision determining the Federal land bank districts and the location of the Federal land banks, as follows:

The Federal farm loan act directs the Federal Farm Loan Board to "divide the continental United States, excluding Alaska, into 12 districts which shall be known as Federal land bank districts, and may be designated by number." In making this division of the country, the act provides that said districts shall be apportioned "with due regard to the farm loan needs of the country, but no such district shall contain a fractional part of any State."

The act further provides that the Federal Farm Loan Board shall establish in each of the said districts. a Federal land bank "with its principal office located in such city within the district as said board shall designate." By the terms of the act each Federal land bank will include in its title the name of the city in which it is located.

In determining the Federal land bank districts and in designating the cities within such districts where Federal land banks shall be severally located, the Federal Farm Loan Board has given careful consideration to the farm loan needs of the country. The board held public hearings in nearly every State in the Union and in this manner collected information of great value in determining its decision.

Every reasonable opportunity has been afforded applicant cities to furnish evidence to support their claims as locations of Federal land banks. More than 75 cities applied to be designated as the headquarters of a Federal land bank, and were heard through representative committees and individuals.

The 12 Federal land bank districts and the 12 cities selected for the location of the Federal land banks are as follows:

District No. 1.-The States of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, and New Jersey.

Location of the Federal land bank, Springfield, Mass.
District No. 2.-The States of Pennsylvania, Delaware, Maryland, Virginia, and West Virginia, and the District of Columbia.
Location of the Federal land bank; Baltimore, Md.
District No. 3.-The States of North Carolina, South Carolina, Georgia, and Florida.

Location of the Federal land bank, Columbia, S. C.
District No. 4.-The States of Ohio, Indiana, Kentucky, and Tennessee.

Location of the Federal land bank, Louisville, Ky.
District No. 5.-The States of Alabama, Mississippi, and Louisiana.
Location of the Federal land bank, New Orleans, La.
District No. 6.-The States of Illinois, Missouri, and Arkansas.
Location of the Federal land bank, St. Louis, Mo.
District No. 7.-The States of Michigan, Wisconsin, Minnesota, and North Dakota.

Location of the Federal land bank, St. Paul, Minn.
District No. 8.-The States of Iowa, Nebraska, South Dakota, and Wyoming.

Location of the Federal land bank, Omaha, Nebr.
District No. 9.-The States of Oklahoma, Kansas, Colorado, and New Mexico.
Location of the Federal land bank, Wichita, Kans.
District No. 10.-The State of Texas.
Location of the Federal land bank, Houston, Tex:
District No. 11.-The States of California, Nevada, Utah, and Arizona.
Location of the Federal land bank, Berkeley, Cal.
District No. 12.-The States of Washington, Oregon, Montana, and Idaho.
Location of the Federal land bank, Spokane, Wash.

\section*{THE PHILIPPINE NATIONAL BANK.}

At the fourth session of the Third Philippine Legislature there was enacted, under date of February 4, 1916, an act creating the Philippine National Bank, with Manila as principal domicile and place of business, with authority to establish branch banks at the provincial capitals in other municipalities, and not to exceed two branches or agencies in the United States.

The capital of the bank is \(20,000,000\) pesos, divided into 200,000 shares of 100 pesos each, 51 per cent of which is to be purchased by the Government of the Philippine Islands and the remainder by the public. The bank acquired by authority of the act the business of the Government Agricultural Bank.

The Philippine National Bank is the official depositary of the insular, provincial, and municipal governments and may receive deposits from the postal savings bank, associations, corporations, and private persons. Authority is granted to issue circulating notes on the security of specified assets, to be held inviolable for the purpose, a reserve of \(33 \frac{1}{3}\) per cent being required. The bank is also authorized to issue notes against gold coin of the United States, the coin to be held by. the bank and used for no other purpose, except for the redemption of the notes.

In general, the charter rights of the bank are of a character to enable it to become an important medium in the development of the agricultural and other resources of the islands.

\section*{Digest of National Bank. Decisions.}

In volume 2 of the report of the Comptroller will be found a digest of decisions relating to national and other banks, rendered during the last year.

The Federal cases are reported in volumes 238-240; United States Reports, and volumes 225-234, Federal Reporter. Five State cases are also given: One, Illinois, in 110 Northeastern Reporter; one, Massachusetts, reported in 112 Northeastern Reporter; one, Michigan, reported in 159 Northwestern Reporter; one, New York, in 160 N. Y. Supp.; and one, Oklahoma, reported in 150 Pacific Reporter

Of particular interest are the following:

\section*{AUTHORITY OF LIQUIDATING COMMITTEE OF A NATIONAL BANK.}

The national bank act contains no provision giving the specific manner in which the affairs of a national bank shall be liquidated, and no reference is made in the law to the appointment of an agent or trustee in liquidation, except when a national bank has been placed in the hands of a receiver and the claims of all creditors other than shareholders have been satisfied. Quite frequently the shareholders in voting to place the bank in liquidation also appoint a liquidating agent or committee, whose powers are not always clearly defined.

The United States Circuit Court of Appeals has held (Jewett \(v\). United States, 100 Fed. Rep., 832) that while no such office as an agent in liquidation was known to the statutes, yet it was one that had long been recognized as permitted by law. There has always been question, however, as to the extent of the powers of the liquidating agent, and whether the shareholders had the power to oust all of the officers of a bank and substitute in their place a liquidating agent or committee.

In a decision not reported, Judge Lacombe of the United States Circuit Court for the Southern District of New York held that the vote to liquidate and the appointment of a committee by the shareholders to liquidate the bank did not divest the directors of their general power and control over the management of the bank.

The form of resolution furnished by this office to banks for reporting liquidation provides that the liquidating committee shall exercise its powers under the general supervision of the board of directors, and in Planten \(v\). National Nassau Bank et al., 160 N. Y., Supp. 297, the court held that under the laws of New York and in the absence of Federal statutory authority or any decision of the Federal courts to the contrary, the authority of a liquidating committee of a national bank was subject to the supervision and control of the board of directors.

\section*{LIABILITY OF DIRECTORS FOR FALSE STATEMENTS.}

The United States Supreme Court has held, in Jones National Bank \(v\). Yates ( 240 U. S., 541 ), that where directors of a national bank knowingly made false statements as to the condition of the bank of which they were directors that the plaintiffs were entitled to recover from the said directors their losses by reason of their reliance upon such statements.

SALARIES OF BANK OFFICERS AND CLERKS.
Attention is called to Exhibits D, E, and F hereto, showing the salaries paid by national banks throughout the country to their chief executive officers, and also to clerks and other employees. The reports to this office show that the salaries paid to bank presidents and cashiers, outside of the large cities, are generally moderate; and that the average compensation of all bank clerks and other employees is in some cases decidedly low.

The national banks reported on September 12, 1916, the total number of their officers and employees at \(66 ; 394\), and the aggregate annual salaries paid them at \(\$ 88,428,120\)-an average of \(\$ 1,331.88\) per annum, or only \(\$ 110.99\) per month per employee.

On March 7, 1916, in the central reserve cities, 28 banks with a capital of \(\$ 1,000,000\) and upward, but less than \(\$ 5,000,000\), reported that the average salary paid to their presidents was \(\$ 22,482\); while 10 banks in central reserve cities with capital of \(\$ 5,000,000\) and over reported the average salary paid to their presidents to be \(\$ 49,000\) per annum.

The average salary paid to presidents of banks having a capital of less than \(\$ 50,000\), where any salary was paid, was \(\$ 1,008.41\) per annum. The arerage salary paid to bank presidents by all banks with a capital of \(\$ 5,000,000\) or over was \(\$ 44,421\) per annum. The average salaries of the presidents of banks of intermediate size varied between \(\$ 1,008\) and \(\$ 44,42\). according to the size and locality of the bank.
recommendation to banks to furnish life insurance to employees equal to one year's salary of each employee.

In view of the very moderate compensation paid to the average bank clerk, this office takes the liberty of recommending to national banks that they give special consideration to the question of furnishing their clerks and other employees receiving small salaries, life insurance policies equal to their salary for one year; so that, in the event of death, the families of the employees may at least be temporarily provided for. The advantages of such a plan are obvious and manifold, and proper cognizance may be taken of this slight extra expense in the adjustment of salaries. It is believed that, under blanket policies, and with cooperation among the banks, especially favorable terms may be obtained from standard insurance companies, and the offsetting advantages to both the bank and their employees should fully compensate for the slight extra expense involved in furnishing such insurance.

\section*{EXPENSES OF OPERATION OF CURRENCY BUREAU.}

On pages 519 and 520 of this report will be found a statement in regard to national bank taxes, redemption charges, examiners' fees, and the expenses of the Currency Bureau for the 12 months ending June 30, 1916.

I now submit the following figures as to the cost of maintenance of the Bureau of the Comptroller of the Currency for the report year
ending October 31, 1916, giving in some detail under appropriate headings the expenditures made during the year, and showing separately those directly reimbursable by the national banks and Federal reserve banks in connection with the issue and redemption of currency, and those not directly reimbursable; also the aggregate cost of national bank examinations and the revenue derived by the Government from the taxation of national banks on currency issued and redeemed through this bureau.

Section 5173, United States Revised Statutes, provides that "all * * * expenses of the Bureau of the Currency shall be paid out of the proceeds of the taxes or duties assessed and collected on the circulation of national banking associations" under the national bank act.
The taxes collected on national bank circulation during the report year ended October 31, 1916, amounted to \(\$ 3,744,967.77\), and the expenses of the bureau not directly reimbursed to the Government aggregated \(\$ 486,532.67\), leaving a net profit to the Government of \(\$ 3,258,435.10\).

\section*{Foreign Segurities Owned by Our National Banks:}

At the outbreak of the European war the current indebtedness of this country to Europe, practically all of which was due and payable prior to January 1, 1915, was estimated at \(\$ 450,000,000\). The largest item of this indebtedness was represented by the short term obligations of the city of New York, about \(\$ 80,000,000\). The remainder was composed of current trade balances of merchants and bankers and short-time loans borrowed by business houses which had taken advantage of the easy money conditions in Europe preceding the war crisis. Besides this current indebtedness our securities held abroad were estimated at between four and five billion dollars.

Before 12 months had elapsed this country had paid in full this floating debt, and had begun to make loans to both belligerent and neutral countries in large sums. The total of foreign loans placed in the United States for belligerent and neutral countries from August 1, 1914, to November 1, 1916, is estimated at approximately \(\$ 2,000,000,000\).

These foreign securities have been absorbed largely by the investing public generally, although great blocks of them have been taken by the corporations engaged in the business of supplying munitions and equipment of war to Europe.
To a not inconsiderable extent the securities of these foreign nations, principally their short term obligations, have been acquired by the banks of this country, both National and State, and by our trust companies, which have availed of this outlet for idle funds. No figures are at hand to show the amount of these securities which have been purchased by our State banks and trust companies, but the following table shows the holdings on November 17, 1916, by national banks of all foreign government bonds and also of other foreign securities, setting forth separately the amounts held by the national banks in the central reserve cities, in the reserve cities, and in the outside country banks.

The aggregate amount of bonds and securities, other than United States Government bonds, held by the national banks on November 17, 1916, was reported at \(\$ 1,709,956,000\), which included, as above shown, \(\$ 297,236,000\) of foreign securities; so that the foreign securities represented at that time were 17.38 per cent of the total securities held by them other than United States Government bonds.

\section*{Conclusion.}

Since the beginning of the European war, a little over two years ago, our country has passed swiftly and definitely from the ranks of the debtor countries and has become the most potential of the creditor nations. Practically the whole world is in debt to us and steadily increasing its obligations.
Our financial condition in relation to other peoples and the world at large becomes stronger from week to week and from month to month. As the figures show so conclusively, our wealth is piling up with wonderful rapidity; but to do our proper work in the world and to protect and enlarge our own interests we may before long need every dollar of these resources, gigantic and inexhaustible as they now seem to be.
From present indications it is probable that we will be required to finance not only our own enterprises, our preparations to make ourselves a formidable and therefore a respected power, and the commerce which is unfolding for us on this hemisphere, but also the endless complications and dernands of readjustment and reestablishment that will follow the close of the great war.

\footnotetext{
\({ }^{1}\) Since this report was sent to the printer, later statements have been received and compiled showing that the total amount of foreign government bonds and other foreign securitios held by all the national banks on December 27, 1916, as reported by them was \(\$ 321,993,000\).
In addition to these foreign securitios held on the date mentioned, the national banks in 100 cities of the United States,including all reserve cities and all other cities having a population of 75,000 or more (returns not yet received from about 10 per cent of the banks in these cities) reported that they were lending to merchants and other borrowers in foreign countries, including both belligerent and neutral countries, the sum of \(\$ 136,669,000\); making the total investment by our national banks on the date mentioned (as far as reported) in foreign government and other foreign securities, and in loans placed in foreign countries by national banks in the cities indicated, \(\$ 458,662,000\). This is equal to 42.82 per cent of the capital of the national banks; 21.22 per cent of their capital, surplus, and undivided profits; or 2.96 per cent of their total resources as reported by the banks on November 17, 1916.
Of the above \(\$ 136,669,000\) of loans made in foreign conntries, \(\$ 100,091,000\) were loaned by the national banks in New York City, and \(\$ 28,475,000\) by those in Chicago, St. Louis, San Francisco, Philadelphia, and Boston.
}

To meet these enormous drafts and strains on our resources, the most tremendous requirements and the widest opportunity that any nation in the world's history has ever faced, we are now strong and ready.

We have gained in a year and four months, from June 23, 1915, to November 17,1916 , over \(\$ 6,000,000,000\) in the resources of our banks, counting all banks. This means that we have added to the resources of our banks in this brief space of time an amount exceeding by a billion dollars the entire resources, as recently reported, of those citadels of financial strength the Bank of England and the Bank of France combined. As a further comparison the increase for this period also represents an amount twice as great as the total resources of the Reichsbank of Germany, plus the resources of the Bank of Italy, according to their latest reports.

We have now the Tederal Reserve System, which we believe assures us against panics and fears such as have in the past, at intervals, disturbed our commerce and paralyzed our industries. The Rural Credits, or Federal Farm Loan System, will aid in securing permanent commercial strength and safety based on the sure foundations of prosperous and thriving communities of farmers, held to the soil by ties of ownership and encouraged and aided to secure constantly increasing results per man, per acre, and per day.

In reviewing our banking and fiscal situation we seem now to be intrenched financially almost as firmly as it is possible for any human government to be. We are well prepared for preparedness, and ready and able to provide for whatever increases of Army and Navy the Congress may think to be necessary.

\section*{"TO SEE OURSELVES AS OTHERS SEE US."}

Our preponderating power in world finance is fast being recognized in all countries. As an illustration of the opinions now held abroad as to this country, it may not be amiss to quote in conclusion the following extract from an editorial entitled "American banks and the future," which appeared recently in one of the leading English newspapers, the Manchester Guardian:
"European financiers in general would be well advised to face the fact that the war has radically transformed the relations between the United States and Europe. The American Controller of Currency in his latest report indicates how greatly American banks have developed in recent years. Their resources on November 17 amounted to 8,104 million pounds. They have grown by 800 millions since 1913 and doubled since 1906.
"The Federal reserve act and other legislation under Mr. Wilson's auspices have given them, for the first time in their history, a really sound organization. The United States has wiped out, or by the end of this war will have wiped out, most of its debt to foreign investors. It will have a currency of unimpeachable soundness, fortified by a gold reserve of unprecedented magnitude.
"The American bankers will have acquired the experience they have hitherto lacked in the international money market. And all this strengthened financial fabric will rest upon an economic fabric which the war will have much expanded. It can hardly be doubted that under these circumstances New York will enter the lists for the financial leadership of the world."

\section*{INCREASED WORK OF THE OFFICE.}

The work of this bureau continues to grow. Since the April, 1913, call, to November 17, 1916, the number of national banks under the supervision of this office has increased from 7,440 to 7,584 , while the aggregate resources of these banks has increased from 11,081 million dollars to 15,520 million dollars,' a growth in a little over three and a half years of 4,439 million dollars, or 40 per cent.

The increase in the office force, however, has not kept up with the increase of work to be performed, necessitating frequently long hours and much overtime, but this has been accepted uncomplainingly and cheerfully. I take pleasure in bearing testimony to the earnestness, fidelity, and ability with which the employees generally of this bureau, including the force of National Bank Examiners, have performed their respective duties.
Attention is called to a number of special exhibits relating to the affairs and operations of our national banks which, in addition to other exhibits heretofore referred to, are published in the appendix hereto, including much interesting and valuable information obtained as a result of special reports which have been furnished from time to time by the national banks during the past year.

In volume 2 of the report of the Comptroller will be found, as usual, the detailed statements of condition of each national bank, together with additional general and special statistical data and the usual digest of court decisions relating to national banks.

Respectfully submitted.

> John Skelton Williams, Comptroller of the Currency.

To the Speaker of the House of Representatives.

\section*{INTERLOCUTORY DECISION IN RIGGS BANK CASE.}

In the Supreme Court of the District of Columbia.
Injunction suit of the Riggs National Bank of Washington, D. C. v. William Gibbs McAdoo, Secretary of the Treasury; John Skelton Williams, Comptroller of the Currency; and John Burke, Treasurer of the United States.

INTERLOCUTORY DECISION. OF MR. JUSTICE M'COY AT THE CONCLUSION' OF THE ARGUMENTS ON PLAINTIFF'S MOTION FOR TEMPORARY INJUNCTION AND ON DEFENDANTS' MOTION TO DISMISS.

Counsel for plaintiff in asking the court to continue the temporary restraining order argued that if the order were dissolved and the money finally covered into the Treasury the jurisdiction of the court would cease.

Counsel for the defendants argued that the rule was that where the equities of the bill were overwhelmingly denied, as in the present case, plaintiff's prayer for temporary injunction should be denied.

Thereupon the court made the following statement (pp. 672 to 679 of stenographic report of court proceedings May 21, 1915):
The Court:
Of course, there are two aspects of even that part of the proposition. I granted a temporary restraining order because it involved only the \(\$ 5,000\), and there was a contention made that if it were covered into the Treasury it might require an act of Congress to get it out. It may be that I shall continue it on the same ground pending a hearing; I do not know. But on the other branch of the case, in regard to granting any pendente lite relief in regard to these deposits or in regard to the reserve agency end of the situation, \(I\) say what I said before, that the case, such as it is, made out by the bill, assuming that any was made out by the bill for the purpose of an injunction, has been met overwhelmingly, in my opinion, by the proofs which are here in the form of affidavits, and I shall deny that relief pending the action.

I was struck when I first read the bill by the allegation on page 14 of the printed bill here which I called attention to the other day:
Plaintiff further avers that prior to December, 1913, the defendants McAdoo and Williams had, in ways which will be fully detailed in the evidence to be taken in this suit, openly and publicly manifested their personal malice toward certain of plaintiff's officers.

I wondered what that meant, and I do not know to this minute what it means; but of course there is an absence, not of evidence, but of the statement of any ultimate facts that would sustain that allegation in the bill; and when I came to read this Tribune article which
appears there, and the incident which occurred in Mr. McAdoo's office, whenever it was, coupled with that, if I were obliged to resort to that I should say that perhaps it was shown that the malice was the other way. In view of the absence, as I say, of any statement here as to backing up this general allegation, and coupled with what is in there, I do not see how anybody can fail reasonably to reach that conclusion, and that if there were bad blood-I do not know as to that-if there is anything between the parties, there is nothing here to show that the two defendants were the aggressors in the matter.

Then, again, I do not think it is necessary here to décide whether there has been any arbitrary exercise of power, or exercise of arbitrary power, in regard to this question of the reserve agency, or any threat of an exercise of arbitrary power. It seems to me, on the record that is made here before me now, that the Government officials would have been remiss if they had consented to permit the bank to act as agent for a new applicant bank, because, I think, for the purposes of this motion, always-now, I am not passing on the ultimate merits of the case-there is evidence here of persistent violations of the law, and that they began, not with Mr. Williams's incumbency of the office (and that has another bearing, perhaps, on the question of what animated Mr. Williams), but they began before he came there, and there is evidence that they are continuing until this day; and even if the comptroller is wrong about what kind of a bank ought to have Government deposits (namely, a so-called commercial bank or stock-exchange bank), even if those features were not in there, the other features of violations of the law are in there; and I should say that he was quite right in determining to take out those deposits, or at least to say that there should not be any further selection of this bank as a reserve agent.

While it may have nothing to do with the law of the case, I suppose that all judges have some right to consider matters of banking policy when they are called upon to decide legal questions. I should say that the policy of not having large deposits in so-called stockexchange banks as compared with the amount of deposits in commercial banks was an absolutely good and sound policy, and the fact that Congress thinks so is now embodied in the Federal reserve act. This question about whether or not stocks are good, and whether or not dealing in stocks is any different from dealing in oats and grain and steers and hogs and that kind of thing, is an argument that does not need to be answered.
Atrorney for Defendant. Will your honor permit me to suggest

The Court. I will ask you to excuse me a minute; I want to look through these prayers here.

I have never analyzed these prayers, but the second to the sixth, inclusive, apply to this \(\$ 5,000\) penalty, and to the other penaities which the plaintiff says the comptroller is threatening to assess or, at any rate, on account of which they claim to be in danger. I think I will take those under advisement on that question, which is the real question in the case.

No. 7 is a prayer "that the defendant Williams may be enjoined pendente lite and permanently from calling or attempting to enforce his call for any special report or reports from the plaintiff when the
same are not bona fide and reasonably necessary in order to a full and complete knowledge of the plaintiff's condition and are not such as he is expressly authorized by said section 5211 to call for."

I take it that refers to the future, and I shall deny that relief pendente lite.
I do not quite take in the scope of the eighth prayer for the minute. I will have to pass that.

Attorney for Defendant. I think that is on the phase of the constitutional law.

The Court. I say I do not take in the scope of it; I do not know what the evidence is here that would lead to any assumption that that was being done; but I will deny that relief pendente lite.

As to enjoining the defendant McAdoo from aiding, assisting, or abetting, there is absolutely nothing in the case, as it is made here, to show that he has. They are sued as officials, and if Mr. McAdoo had a duty to perform he would perform it; if Mr. Williams had a duty to perform he would perform it; and whether Mr. McAdoo would be glad to see Mr. Williams do a certain thing, or urge him to do a certain thing, does not seem to me to make any difference.
No. 10 is a part of the \(\$ 5,000\) transaction, and about that I will not say anything further.

Attorney for Defendant. No. 9 is denied, your honor?
The Court. No. 9 is denied; yes.
No. 10 is part of the \(\$ 5,000\) transaction.
Attorney for Defendant. That your honor takes under advisement?

The Court. Yes. Without saying anything about No. 13 , that is a part of that \(\$ 5,000\) penalty matter, and I will take it under advisement. I do not quite comprehend what the situation is about that so far as the allegations are concerned.

No. 14 I will not grant pendente lite.
Attorney for Plaintiff. It is not included in the rule, if your honor please.

The Court. It was not?
Attorney for Piaintiff. No; nor is No. 15. No. 16 you have already passed upon.

The Court. I have passed upon 16; yes.
It may be that in the hurried way I have made some mistake within the lines of what I have endeavored to lay down as my notions about the case for the time being. If counsel on both sides, upon reading the record, will point out anything of that sort I will be obliged.

\section*{Eximit B.}

\section*{DECISION OF SUPREME COURT OF DISTRICT OF COLUMBIA IN RIGGS BANK CASE.}

The following is a review or synopsis of the decision, rendered May 31, 1916, by the Supreme Court of the District of Columbia in the injunction suit of the Riggs National Bank versus the Comptroller of the Currency et als., as summarized and given out on May 31, 1916, by the Department of Justice at Washington, D. C.

This decision is a matter of general interest to the banks, since it defines very clearly the supervisory authority of the Comptroller's office:

\section*{"tHE RIGGS BANK DECISION.}
"The decision of Mr. Justice McCoy in the Riggs Bank case, filed to-day, contains seventy-three typewritten folio pages, and, as the Department understands it, decides the following points:
"(1) That the court had jurisdiction of the case (pp. 17-30).
"(2) That as 'the bill does not state facts sufficient to constitute a cause of action against the Secretary of the Treasury as to a conspiracy, nor as to anything done or threatened by him, it must be dismissed as to him, unless he is a necessary party in order to give relief by way of directing a purely ministerial act, namely, the payment of interest withheld because of the penalty of \(\$ 5,000\) assessed by the Comptroller? (pp. 32-36).
"(3) That the plaintiff's construction of the nature of 'special reports,' which the Comptroller was entitled to call for, was wrong, and that the Comptroller's contention was correct (pp. 37-53); and that 'the statute thus construed makes lawful any inquiry by the Comptroller for the purpose of obtaining information, not only as to current items on the books of the bank, but also for the purpose' of informing himself generally as to the management of the bank'; and that it is certain 'that Congress intended that national banking associations should be under the strictest supervision by him (the Comptroller) for the protection of creditors and stockholders and of the public generally' (p. 47); and 'that the power of the Comptroller under Revised Statutes, section 5211, is.to call for a report on the affairs of a bank just as fully, at least, as might a bank examiner' (p. 50).
"(4) That there was no such arbitrary action on the part of the comptroller as to amount to total lack of authority (pp. 55-60); but that 'the action of the comptroller on the basis of which specific charges are made to the effect that he was acting in excess of his powers, examined in the light of the views above expressed, must be upheld as lawful' (p.60).
"(5) That the plaintiff's contention that the comptroller had no right to call for reports as to past transactions was wrong, and that 'valid reasons for going back over the books of the bank for several years may be suggested by what is discovered as to recent transactions' (p. 58).
"(6) That the information called for by the Comptroller in regard to list of loans in excess of \(\$ 5,000\) secured by collaterals was rightly called for by him and should have been furnished (p. 60).
"(7) That the information called for by the Comptroller as to whether the plaintiff was maintaining a private telegraph wire connected with stock brokerage houses, 'was an eminently proper inquiry' (p. 60).
"(8) That the Comptroller's call for information as to the ownership of the Flather \& Flather account may well have been justified (p. 60).
"(9). That the Comptroller had the right to specify a longer time than five days within which to make certain reports, and that there was no reason for the bank's complaining of the giving of a longer time ( p .61 ).
"(10) That the Comptroller's request for information in regard to loans made by the bank to former United States officials was a proper one ( p .61 ).
"(11) That the Comptroller's call for information in regard to commercial paper carried by the plaintiff was clearly proper (p. 61).
"(12) That the Comptroller's call for information as to the expenditure of money for printed copies of the correspondence, etc., was rightly made (p. 62).
"(13) That the demand for information in regard to the direct loans made by the bank to certain of its officers, and for information in regard to the indirect, or dummy, or concealed, loans, made since the organization of the bank, for the benefit, directly or indirectly, of those officers, including all loans which any of the officers had indorsed, or for which they had furnished the whole or any part of the collateral, were 'entirely within his (the Comptroller's) powers' (p.62).
"These are the two demands for the failure to comply with which the penalty of \(\$ 5,000\) was assessed.
"(14) The Comptroller's requirement that certain facts be laid before the board of directors, even if made for the purpose of discrediting the plaintiff's officers before the board of directors, was proper ( p . 63 ).
"(15) That the allegation in the bill that the acts of the Comptroller were done maliciously, is merely a statement of a conclusion of law (pp. 63-64); 'the Comptroller was acting within his powers in performance of his duty, so far as calling for the reports is concerned. Therefore, as no right of the plaintiff was infringed, he was not acting maliciously.'
" (16) That the actions of the Comptroller as treasurer of the Red Cross funds were 'perfectly proper steps to obtain the largest possible revenue from it while on deposit. The plaintiff was given the same opportunity that was given to others to have those deposits made in its bank' (p. 64).
"(17) That the plaintiff's contention that the bank is not required to furnish a special report, which by Revised Statutes the Comptroller is authorized to call for, is incorrect (p. 65).
"(18) The plaintiff's contention that Revised Statutes, section 5213, does not impose a penalty for failure to make a special report, is incorrect (pp. 65-67).
"(19) The plaintiff's contention that the Comptroller's construction of the Revised Statutes would necessitate a holding by the court of their unconstitutionality, is incorrect. 'The plaintiff can not object
to giving the information demanded of it by the Comptroller, nor urge any constitutional ground as a basis for refusing, having accepted its charter under a statute giving the right to call for special reports' (pp. 68-69).
" (20) As to the merits of the case, the single point on which the court finds against the defendant is the following: That the Comptroller in making his demand of January 22, 1915, for the special report called for, required that it should be made under the oath of the president, cashier, and three named officers and directors, whereas the statute, section 5211, only required that the report be sworn to by the president or cashier and attested by the signatures of at least three of the directors.' The court said: "Therefore, it must be held in this case that the Comptroller having called for a report not verified and attested as provided in the statute, did not place himself in a positien where he could lawfully assess a penalty for a failure to comply with a demand which he made, (p.70).
"(21) The plaintiffs' petition in their bill in equity that the court should enjoin the Comptroller from revoking any designation of the plaintiff as a depositary, and from refusing to approve of the plaintiff bank as such, is refused, and the court states that 'it can not be granted' (pp. 70-72).
"(22) The plaintiffs' petition in their bill that the Comptroller should be enjoined generally from future violations of the law is refused: 'The court will not stop an officer vested with powers to be exercised at his discretion from performing his statutory duty.for fear that he should perform it wrongly' (p. 72).
"The result of the whole decision is that the temporary injunction restraining the payment of \(\$ 5,000\) is continued as against the Treasurer of the United States, but not as to. the Comptroller, and that, except for the purpose of compelling payment of the interest due the bank and retained, and of enjoining the assessment of penalties because of the failure to comply with the demands (held defective in form as above stated) for reports, the bill is dismissed as against all the defendants."

\section*{Exhibit C.}

DECISION OF THE COMPTROLLER OF THE CURRENCY ON THE APPLICATION FOR A RENEWAL OF THE CHARTER OF THE RIGGS NATIONAL BANK OF WASHINGTON, D. C.

\section*{The Riggs National Bank, \\ Washington, D. C.}

Sirs: On the 23d of May, 1916, you filed an application for an amendment to your articles of assoclation so as to continue the life of your association until June 27, 1936. This application, if granted in its present form, would extend the life of the corporation for 20 years and 1 day, which the Comptroller of the Currency has no power to grant, as the law now permits an extension of 20 years only. The application should be amended so as to provide that the association shall continue until the close of business on June 26, 1936, instead of June 27, 1936. The application, to be legal, should also bear a 10 -cent internal-revenue stamp, as required by law. I shall assume, for the purposes of this decision, that the application has been amended as thus indicated and that the 10 -cent intermal-revenue stamp has been affixed:

Section 3 of the act of July 12, 1882, provides:
That upon the receipt of the application and certificate of the association provided for in the preceding section, the Comptroller of the Currency shall cause a special examination to be made, at the expense of the association, to determine its condition; and if after such examination or otherwise, it appears to him that said association is in a satisfactory condition, he shall grant his certificate of approval provided for in the preceding section, or if it appears that the condition of said association is not satisfactory, he shall withhold such certificate of approval.

The word "condition," as it has been construed by my predecessors and by the Supreme Court of the District of Columbia in the decision rendered May 31, 1916, in the suit of the Riggs National Bank \(v\). The Comptroller of the Currency et al., comprehends not only the solvency of the bank, but as well the character of the business done by the bank and the management and the record of the bank with respect to observance or violations of law by its officers;

It is the duty of the Comptroller to determine such "condition". with reference to all of these factors or elements, and this necessitates a consideration of the bank's record as well as of its solvency and financial resources.
Acting upon this conception of my duty, I find that the present officers of the association (who, with the exception of Mr. H. H. Flather, who resigned Oct. 1 last, have been its officers almost since its organization) have conducted the business of the bank during almost the entire period of its existence in persistent violation of the national-bank act and in disregard of the regulations and frequent admonitions of the Comptroller's Office.

\section*{VIOLATIONS OF LAW AND UNLAWFUL PRACTICES.}

Some of its violations and irregular practices have related toThe making of real estate loans, contrary to law;
Investments in stocks, contrary to law;
The frequent and persistent failure to maintain reserves, as required by law;
Excessive and unlawful loans;
The carrying on of a stock-brokerage business either directly or through the agency of a partnership composed of the chief officers of the bank within the bank itself, under the firm name latterly of Glover \& Flather, or Flather \&.Flather, and in earlier years of Glover, Hyde, Jobnston, and others;
The maintenance of private telephone and telegraph wires with stock brokerage offices;
The making of dummy loans for the benefit of officers of the bank; and
The lending of large sums of money (oftentimes when the bank was running behind in its reserve requirements) to the president, vice presidents, and cashier of the bank, as well as to many bookkeepers, tellers, clerks, and other employees of the bank, contrary to what this office regards as proper and legitimate methods of carrying on a banking business under the requirements of the national-bank act;
Refusal to furnish reports as required by the Comptroller's Office; and.
Denial of the authority of the Comptroller to require information about the bank's affairs.
Its violations of law and irregular practices began shortly after the organization of the bank in 1896 and continued throughout the life of the bank until the summer or autumn of 1914, when they were discontinued because of the action of the Comptroller's Office. I shall not attempt to go into great detail in these matters, as they have been set out quite fully in the answering affidavits filed by the Secretary of the Treasury and the Comptroller of the Currency in the Supreme Court of the District of Columbia-in the suit brought by the Riggs National Bank in April, 1915, to test the powers and authority of the Comptroller of the Currency, but it is necessary that I should advert to them in a general way. Copies of said affidavits and a synopsis made by the Department of Justice of the opinion rendered by Mr. 'Justice McCoy, as well as the opinion itself, are attached hereto, as Exhibits Nos. 1, 2, 3, and 4, respectively, and are made a part of this decision.

\section*{STOCK BROKERAGE BUSINESS.}

National-bank examiners reported to this office, as a result of their investigations in May, 1914, that the principal officers of the Riggs National Bank were conducting an active stock brokerage and real estate loan business within the bank and were engaged in speculations for their own account, for which they were borrowing large sums of money from their own bank, from other local banks, and from the New York correspondents of the Riggs National Bank. It was established that the cashier of the Riggs National Bank, Mr. H. H. Flather, who resigned at the time that the indictments for perjury
were returned against him and other officers of the bank, had a private telephone line from his desk in the bank to the office of the now defunct stock brokerage firm of Lewis Johnson \& Co. It was disclosed that Cashier Flather traded, in some instances, on the orders of customers to his personal advantage, reporting sales to customers at prices less than those at which their securities had actually been sold, and converting the difference to his own use. Concerning these speculative transactions of Mr. H. H. Flather, National Bank Examiners Sherrill Smith, chief examiner of the Chicago district, and James Trimble, examiner at Washington, as a result of their examinations of the bank, submitted, under date of October 2, 1915, a report from which the following extract is taken:

REPREHENSIBLE PRACTICES, INCLUDING "DUMMY" SPECULATTVE ACCOUNTS.

\begin{abstract}
We find that H. H. Flather, from June 24, 1909, to March 7, 1914, had a personal account with Lewis Johnson \& Co. which was speculative in character, in which he usually carried a debit balance on which interest was charged, and in which for a long period the securities were inadequate. That from February 29, 1908, to November 20, 1909, he carried an account as "Henry Hepburn," which was speculative to a lesser degree; and that so far as our investigations went, his transactions through the bank accounts with Colgate \& Co. and Lewis Johnson \& Co (see this report) were most reprehensible, if indeed they are not held in some instances to be criminal.

We find that his entire dealings were conducted in a manner to prevent discovery; he maintained no balance, claiming he received and paid cash.

He protected himself from discovery of his deals with Lewis Johnson \& Co. by having thé advices come to the bank "in care of Cooke," and ran but few of his transactions through his account.

He sold short through the bank's account.
He advised customers of a credit before the stock was sold, and later sold the stock and took the profit, or made good the loss.
\end{abstract}

This report of the examiners showed how H. H. Flather, sometimes having orders to buy a certain stock, bought the stock ordered by the customer and then, if it should advance, would sell the stock so purchased and take the profit himself, and would then buy the stock again, at a higher price, for the customer. Or that, having an order to sell a certain stock, he would sell on the customer's order; and then, if the stock should decline, he would buy it in and later sell again at a lower price than the price at which he originally sold, but accounting to the customer at the reduced price, taking for himself the profit between the price at which the customer's stock was first sold and the price at which he bought it in, the customer losing the difference.

The examiners also stated that H. H. Flather sometimes bought the securities through the Riggs National Bank account with Lewis Johnson \& Co.; but making no deposit against such purchases; and then sold the securities at an advance, appropriating the profits personally.

Vice president of the Riggs National Bank, W. J. Flather, brother of the cashier, H. H. Flather, carried two speculative accounts on the books of the brokerage firm, Lewis Johnson \& Co., one in his own name and the other in the name of a member of said firm. Order's for the purchase and sales of securities were given by him to Lewis Johnson \& Co., and then charged to the account of the firm member as "Agent," Vice President Flather being the real principal. Another vice president, Mr. Ailes, carried his active speculative account with a New York stock brokerage house, with which the bank also had
\[
62015^{\circ}-\mathrm{FI} 1916-38
\]
private wire connection, the wire also connecting with the bank's New York correspondent.

The practice of officers of a national bank speculating in stocks and borrowing money from their own bank in order to carry on such speculations is reprehensible in the highest degree and can not be condemned too severely. Numerous junior officers, tellers, bookkeepers, and clerks are also shown by the record to have been borrowing large amounts of money from the bank to carry speculative accounts. Such practices have been the fruitful source of bank failures throughout the country, resulting in grave losses to innocent depositors and stockholders, bringing disaster to the bank officers themselves and serious injury to the communities where such bank failures have occurred.

Aside from the stock operations of said officers of the bank the records show that the bank itself, in its own name, carried on a brokerage business in stocks, contrary to law. This business was discontinued only recently as a result of the action of the present Comptroller of the Currency. It was proven in court that the bank, in its own name and on its own credit, had more than 2,500 transactions in stocks and bonds with the stock brokerage firm of Lewis Johnson \& Co. alone.

\section*{LOANS TO OFFICERS AND EMPLOYEES.}

While the law does not forbid the making of loans to officers and employees of a bank for speculative purposes, nevertheless the making of such loans has been frequently condemned by Comptrollers of the Currency as contrary to sound banking practice and the ethics of good banking. Many bank failures have resulted from the excessive borrowing of the bank's funds by officers of banks. Such officers owe a solemn duty to depositors not to use the funds of the bank to their personal advantage in such a way as to expose the money of depositors to undue risks or to prevent the bank from performing its full duty to the community. The officers have an advantage over every other person dealing with the bank, and this of itself imposes upon them a higher duty and a greater responsibility. This practice is particularly reprehensible when dummy loans are made in the interest of officers of a bank. There were frequent instances of such dummy loans in the Riggs National Bank.
The direct and indirect loans reported under oath by the bank as made to C. C. Glover, president; W. J. Flather, vice president; M. E. Ailes, vice president; and H. H. Flather, cashier, from July, 1896, to July, 1914, were:
\begin{tabular}{|c|c|}
\hline C. C. Glover. & \$2,534, 377 \\
\hline M. E Ailes & \\
\hline & 582,698 \\
\hline
\end{tabular}

From this it appears that there was borrowed from the bank in 18 years by its four principal officers, President Glover, Vice President Flather, Vice President Ailes, and Cashier Flather, a total of \(\$ 5,659,850\), exclusive of large amounts loaned to wives, brothers, sons, and daughters of some of these officers. Besides the loans to principal officers, the junior officers, tellers, bookkeepers, and other employees sometimes borrowed heavily. For example, loans made by the bank in the two years 1904 and 1905 to its ladies' teller, paying
teller, and note teller, and one of its bookkeepers exceeded in the aggregate \(\$ 466,000\), largely on speculative stocks. The above loans are all in addition to large loans made during the period to directors of the bank, other than officers, and to other junior officers and employees. Some of the above loans may have been renewals of other loans, and may have been carried through the books several times, and therefore the totals may to some extent be subject to adjustment, although some of the loans ran several years at a time. But in any case they exhibit a consistent policy or practice of large and dangerous proportions, which should be condemned by all who believe in sound and safe banking. It is true that after the present Comptroller of the Currency discovered this condition of affairs, the loans to all officers in the bank were taken up or transferred to other banks in the summer of 1914. Since that time the practice has not been resumed, and it ought not to be resumed at any time in the future.

\section*{BORROWING BY OFFICERS WHEN RESERVES WERE DEFICIENT.}

The records of the bank show that President Glover borrowed frequently from the bank when the bank was below its reserve requirements or during the 30 days preceding calls for report when the bank reported that it had during such period averaged short for 30 days in the legal reserve required. Banks were expressly prohibited by section 5191, United States Revised Statutes, from making any loan when there was a deficiency in their reserves. The records show that between August 4, 1906, and March 4, 1914, Mr. Glover borrowed 24 times from the Riggs National Bank on days when the bank's reserves were short; or, in the 30-day period when the bank had reported averaging short in reserves. These 24 loans aggregated \(\$ 412,500\). During the same period and under the same circumstances as to deficient reserves, Vice President Flather borrowed from the bank over \(\$ 210,000\) on 20 loans; former Cashier Flather borrowed over \(\$ 50,000\) on 6 loans, and Vice President Ailes got 29 loans from the bank on his own note, or jointly with others, for amounts aggregating over \(\$ 200,000\). I deem it my duty to bring out the foregoing facts in order that it may be clear that this office does not approve the practices to which I have referred and to enjoin upon the directors of the Riggs National Bank the importance of preventing a repetition of such practices in the future.

This office has no desire to do injustice to any bank. Its single aim is to promote sound, honorable, and safe banking and to use the powers which the law has conferred upon it for the protection of the legitimate banking interest of the country and for the prevention of those practices which, throughout banking history, have brought injury and disaster to innocent depositors and to the business communities where bank failures have occurred.

No national bank need have the slightest fear of any conflict or trouble with the Comptroller's Office so long as it obeys the law and observes the rules of sound and safe banking; but no national bank, however big or littlế, and no officer or stockholder, however influential or important, is above the law. The Comptroller must enforce the law and the rules and regulations of the Comptroller's Office impartially and unswervingly, whether the bank be big or little and whether or not the officers and directors be important and influential.

The records show that the directors of the Riggs National Bank have not always been as observant of their duties as the law provides and their oath of office requires. They have not always shown themselves sufficiently familiar with the transactions of the officers of the bank. If the directors had been more careful in discharging their duties, many of the practices of the bank which have aroused the criticism of the Comptroller's Office would not have occurred. As an instance of the negligence to which I refer, one of the directors of the bank made oath for five successive years, from 1910 to 1914, that he was the owner in good faith and in his own right of 10 shares of the stock of the bank standing in his name on the books of the bank, and that these shares had not been hypothecated or in any way pledged as security for any loan or debt; and yet, each time that he made this solemn oath the said 10 shares of stock were pledged for a loan and continued to be pledged for a loan during the whole of said five years. I accepted the explanation of this director that he made these oaths without reading them and without realizing that he was violating the law, but it is evidence of the serious carelessness of which I speak.

UNLAWFUL STOCK INVESTMENTS.
As far back as 1898 Comptroller Dawes wrote you as follows:
The bank holds a large amount of stocks which were purchased for investment. You are respectfully advised that the United States Supreme Court decided during the October, 1896, term, in the case of California National Bank v. Nat Kennedy (167 U. S., 362) that:
"The power to purchase or deal in stock of another corporation is not expressly conferred upon national banks, nor is it an act which may be exercised as incidental to the powers expressly conferred. A dealing in stocks is consequently an ultra vires act, and being such, it is without efficacy."
All shares of stock purchased for investment now owned by the bank are held in plain violation of law, and must be disposed of without further delay.

Since that date and until very recently you have continued to be a holder of stocks in violation of law. May 1, 1902, the Comptroller's Office advised you of a decision of the Supreme Court which declared that stocks could not be lawfully held as investments and directed that the stocks held by you should be disposed of. Similar letters, directing the sale and disposition of your stock investments, continued to be written after every examination up to June, 1906, but were ignored. You then transferred the stocks held by you to Joshua Evans, jr., then a clerk, now cashier in the bank, who gave his notes representing the market value thereof, and the stocks were, by this means, carried in loans and discounts until discovered by one of the bank examiners, whereupon they were put back in "Stocks, securities, etc.," and subsequently transferred into the Glover and Flather account, where they remained until finally disposed of a few months ago, or until after the filing of your injunction suit.

\section*{FAILURE TO MAINTAIN RESERVES.}

Through a period of years the bank has violated section 5191 of the Revised Statutes of the United States requiring national banks in reserve cities to carry a reserve of 25 per cent of their deposits. Out of 64 sworn statements of condition rendered between September, 1902, and March, 1915, 33-a majority-show that the bank was short in its reserves, either in the cash it was required to carry
in its vault, in the amount which it was required to carry with reserve agents, or in its total reserves. These shortages in its cash reserve averaged, 1910 to 1914 , more than \(\$ 150,000\), and on June 4, 1914, amounted to \(\$ 500,363\). The reports also show that there was throughout the same period an average shortage in your reserves for the period of 30 days preceding the filing of each report of the condition of the bank.

The failure to maintain reserves is particularly reprehensible on the part of a bank which is the reserve agent for other banks. A greater responsibility rests upon a reserve agent than upon a nonreserve agent, for the scrupulous maintenance of the reserves required by law.

FAILURE TO FILE DIVIDEND REPORTS.
You have also been negligent in filing the reports required by section 5212, United States Revised Statutes, as to the amount of dividends declared and the amount of net earnings in excess of such dividends, while from September 11, 1905, to March 8, 1915 (approximately 10 years), you have been from 14 to 54 days late in filing each report.' This is indicative of the careless and indifferent attitude of the bank toward compliance with the requirements of the law.

REAL ESTATE LOANB.
The practice of the bank in dealing in real estate loans and lending upon real estate or real estate securities contrary to law and the regulations of this office has continued throughout its entire existence until recently, and against frequent admonitions of former Comptrollers of the Currency. As far back as September 14, 1899, Comptroller Dawes admonished you as follows:

> Loans secured by real estate mortgages:
> At the time of the examination the bank had loans secured by real estate amounting to \(\$ 310,338.40\), while in in your sworn report of condition for June 30,1899, no amount appeared in the schedule of loans and discounts secured by real estate mortgages, although about the same amount was then held.
> It appears that the loans are made through the firm of Glover, Hyde \& Johnston, which is comprised of yourself and the two vice presidents of the bank, the cash being farnished temporarily by the bank, and that the notes are sold to customers of the bank without recourse on this firm. The examiner reports that at least \(\$ 2,000,000\) of this paper is outstanding and its collection and management is under the supervision of the collection department of the bank.
> The criticism as to the legality or illegality of these loans depend entirely upon whether they are made wholly or partly upon the security of the real estate mortgages, and in this connection your attention is called to section 5137 , United States Revised Statutus, which provides that the only purpose for which a national bank may lawfully acquire a mortgage on or title to real estate is "by way of security for debts previously contracted."

And again, on March 12, 1900, the Comptroller admonished you as follows:
The examiner reports 63 loans, amounting to \(\$ 282,405.65\), secured by real estate mortgages.
It appears that these loans are made upon notes discounted for the makers on the security of other notes running to such makers, which latter notes are secured by real estate mortgages, and that the bank accepts these mortgage notes and mortgages as collateral to the notes discounted.
While it is true, as stated by the bank, in reply to a former letter of this office in regard to such loans, that none of the collateral notes or mortgages in question run to the bank, it appears to be likewise true that the only security involved in any of these transactions is the real estate mortgaged to secure the note taken as collateral to the
note discounted, as it is not assumed that the bank would have discounted any of these borrowers' notes on the strength of the makers of the collateral notes without the real estate mortgages behind them.

These loans are therefore made in contravention of section 5137, United States Revised Statutes, which prohibits a national bank from taking real estate mortgages as security for loans except "such as shall be mortgaged to it in good faith by way of security for debts previously contracted," and the practice of making such mortgage loans should be discontinued.

On October 17, 1900, the Comptroller again admonished you with respect to real estate loans, and on May 19, 1901, the Comptroller wrote you as follows:

The examiner states that loans secured by real estate, amounted to about \(\$ 400,000\), the security for the greater portion running to employees of the bank. * * * Your attention is again called to the provisions of section 5137, United States Revised Statutes, in connection with these loans.

On numerous occasions thereafter the Comptroller's Office directed you to cease making unlawful loans on real estate, but its admonitions and directions were consistently disregarded. I refer you to Exhibit A, a statement showing the real estate loans held by you from May, 1898, to November, 1914, as far as discovered and reported by the bank examiners, contained in the affidavit and answer of the Comptroller of the Currency filed in the injunction suit.

REFUSAL TO FURNIBE SPECIAL REPORTS AND DENIAL OF AUTHORITY OF THE COMPTROLLER'S OFFICE.
The records clearly show that until the recent decision of Mr. Justice McCoy, to which I have referred, you refused to furnish, and denied the authority of the Comptroller to call for, the information and special reports which it was essential that you should furnish in order that the Comptroller might have full knowledge of the affairs of the bank. I regret to say that many of such reports as have been furnished, until quite recently, have been evasive, insufficient, inaccurate, and incomplete. It is a serious question for this office to give life to a bank or association which defies the Comptroller's authority and challenges his right to such information as the Comptroller deems necessary to enable him to properly understand the condition of affairs of the bank and enforce the law.

The suit brought by the Riggs National Bank against the Comptroller of the Currency et al. in the Supreme Court of the District of Columbia, to which I have alluded, grew out of the effort of the Comptroller's Office to secure special reports and complete information as to the affairs of the bank. Mr. Justice McCoy, in the opinion to which I have referred, says inter alia concerning the Comptroller's request for a special report, the refusal to furnish which carried the imposition of the \(\$ 5,000\) fine:

That demand was twofold:
First, for information in regard to all direct loans made by the bank to certain of its then officers; and

Second, for information in regard to all indirect or dummy or concealed loans made since the organization of the bank for the benefit directly or indirectly of those officers or any of them, including all loans for which they or any of them had indorsed or for which they had furnished the whole or any part of the collateral by which loans to any of them were secured, and for other information as shows by the quotation of said paragraph above.

In the view which the court takes of the powet of the Comptroller, these demands were entirely within his powers.

\section*{- decision of court upholding comptroller's authority.}

The decision of Mr. Justice McCoy further says:

\begin{abstract}
* * * It is perfectly obvious that as to concealed loans made for the benefit of the officers of the bank no possible limit to the scope of an inquiry by the Comptroller could be reasonably suggested.

The demands made by the Comptroller were that the bank make certain reports. If the demand had included the production of books and papers of the plaintiff, the officers of the bank would have no privilege of refusing to produce them because they might contain matter which would incriminate the officers or lead to punishment of the corporation. (Hale \(v\). Henkel, 201 U. S., 42 ; Wilson \(v\). United States, 221 U. S., 361.) As was stated in the latter case, the State has visitorial powers over corporations. The fourth amendment of the Constitution protects a corporation against unreasonable searches and seizuffes, but the fifth amendment providing against compelling a person to be a witness against himself in a criminal case does not prevent the compulsory production of the books of the corporation by one of its officers, so here the bank can not excuse the failure to give a report simply because any of its officers required to furnish it raise the question of self-incrimination.
\end{abstract}

It was against the exercise of the very powers which the court has decided that the Comptroller possesses that the Riggs National Bank, in its suit, sought to obtain an injunction.

Obviously it would be contrary to the purpose, spirit, and letter of the national bank act for the Comptroller of the Currency to give corporate life to an association which is denying the power of the Comptroller and challenging the very law under which the association is to be organized.

Obedience to law on the part of a national bank and its officers is an essential of its existence. The Comptroller has no authority to permit violations of the national bank act, and it is a serious question as to whether the Comptroller should extend the corporate life of a bank which, at the time of its application, is challenging the authority of the Comptroller's Office under the national bank act. Charters are granted to banks upon the express condition that they shall obey the law and the directors of such banks are required to take an oath that they will obey the law. It is the duty of the Comptroller to see that the law is obeyed and to proceed for a forfeiture of the charter of any bank which violates the law and refuses to respect lawful authority.

The Comptroller might be considered derelict in his duty, therefore, if he extended the corporate life of a national bank in the face of a challenge by the bank of the very law from which it is to derive its life, and when the Comptroller apprehended that he would be forced subsequently to bring an action for forfeiture of the charter of the bank because of its refusal to obey the organic law of its being.

In view of the record of the Riggs National Bank as thus shown, the question may well be asked, should its charter be extended if the present officers, who have been responsible for its management during the whole, or practically the whole, of the bank's existence, are to be retained in its management? If the practices and methods of these officers, which have been the subject of criticism, had continued down to the date of the pending application for extension of the charter, the answer would have to be in the negative; but the record of the bank shows that during the past 18 months these practices have been discontinued. During this period the bank's record as to observance of the national-bank act has been generally satisfactory, with the exception of the refusal of its officers to furnish the Comptroller with special reports he has called for and the resistance of the
bank to the lawful authority of the Comptroller. As to this phase of the matter, the recent decision of Mr. Justice McCoy in the Supreme Court of the District of Columbia, in the case of the Riggs National Bank \(v\). The Comptroller of the Currency et al., assists to a solution.

The court has, in the decree of Mr. Justice McCoy, thoroughly vindicated the authority of the Comptroller under the national-bank act, upholding the contentions of the Comptroller in every particular except as to the fine of \(\$ 5,000\), which the court held the Comptroller clearly had the authority to impose, but declared that it could not be collected in this instance because the Comptroller had demanded that the special report be verified by the signatures of the "president and cashier and three other officers," instead of by the signatures of the "president or cashier and attested by at least three directors,". which is the language of the statute. 6

The directors of the bank have agreed in writing to accept as final the decision of Mr. Justice McCoy, as shown by the following copy of a stipulation they have filed with the Comptroller of the Currency:

> The Rigas National Bank of Washingion, D. C., Washington, D. C., June. 21, 1916.

The Comptrjller of the Currency,
Washington, D. C.
Sir: We understand that in addition to other considerations relating to past management and omissions to comply with certain requirements of the law, you also have doubts as to the propriety of granting an extension of the charter of the Riggs National Bank because of the Riggs National Bank's resistance of the authority and power asserted by the Comptroller's Office, culminating in the suit brought by The Riggs National Bank \(v\). Comptroller of the Cürrency et al., and which was decided by Mr. Justice McCoy on the 31st of May, 1916.

The court sustains the right of the Comptroller to have the reports and information called for, and the right to impose fines in accordance with the provisions of the statute, if the bank should refuse them.

In order that the question as to the powers of the Comptroller's Office heretofore raised by the bank may not be a factor in your decision of the bank's application for the extension of its charter, we desire to assure you that, if the charter of the bank is extended, the judgment of the court; including the upholding of the authority of the Comptroller's Office and his powers under the national-bank act, will be accepted as final.

Respectfully,

> Chas. C. Glover, President. Miron E. Ames, Vice President. Wm. J: Flaterer, Vice President. Joshua Evans, Jr., Cashier. H. V. Haynes, Assistant Cashier.

Milton E. Anes, Wm. J. Flather, Chas. C. Glover, Jr., James M. Johnston, Thos. Hyde, L. Kemp Duval; Chas. C. Glover,

Robert C. Wileins, E. V. Murphy, Sterling Ruffin,
: Joseph Paul, H. Rozer Dulany, L. E. Jefpries, Charles I. Corby, Directors.

With this suit thus disposed of, the application of the bank is not embarrassed by an attitude of reesistance to or questioning of the law and the authority of the Comptroller. .The next question is the future management of the bank. There are several instances where my predecessors have refused to extend the charters of national banks because of the unsatisfactory record of the applicant bank and the
conduct of its officers, and have enforced their demand for a change of officers as a condition of the extension of the charter. In this case it has been urged upon me that the conduct and management of the bank under its present officers for the past 18 months is an earnest that it will be managed in the future in full compliance with the law. Whatever doubts the Comptroller has entertained in this particular have been sufficiently satisfied by a written pledge, signed by all the directors and filed with the Comptroller of the Currency, that the bank's business and affairs will be conducted in the future in scrupulous compliance with the law and all lawful rules, regulations, and requirements of the Comptroller of the Currency. The following is a copy of said pledge:

\author{
The Riggs National Bank of Washington, D. C., Washington, D. C., June 21, 1916.
}

The Comptroller of the Currency, Washinglon, D. C. 。
Sir: We, the undersigned directors of the Riggs National Bank, hereby solemnly and severally pledge ourselves to give special attention in the future to the manner in which the officers of the Riggs National Bank shall carry on and conduct the business and affairs of the bank, to the end that the business operations and affairs of the bank in the future shall be conducted in strict compliance with the national-bank act and all the laws of the United States and in conformity with the lawful rules, regulations, and requirements of the Office of the Comptroller of the Currency, and to take all such action as shall be necessary to secure that end.

The charter of the Riggs National Bank expires by limitation on the 26th of June, 1916. The stockholders of said bank, including the undersigned directors, have made application according to law to the Comptroller of the Currency for an extension of its charter for a further period of 20 years. Because of the controversies and issues which gave rise to the litigation in the equity suit above referred to, and in order to remove any doubts of the Comptroller as to the future conduct and management of the officers of the said the Riggs National Bank, we hereby give him this express and written assurance, in the hope that his doubts may be allayed, and that the said application for an extension of the charter of the bank for the future period of 20 years will be granted.

Respectfully,

Charles I. Corby.
Thos. Hyde.
Milton E. Ailes.
James M. Johnston.
L. Kemp Duval.
L. E. Jeffries.
E. V. Murpey.

Robert C. Wilking.
Wm. J. Flather.
Joseph Paul.
Chas. C. Glover, Jr. Chas. C. Glover.
H. Rozier Dulany.

Sterling Ruffin.

These questions being satisfactorily disposed of, there is but one other to be considered, and that is the solvency and financial condition of the bank.

A special examination, as required by the national-bank act, has been made since the filing of the application for the extension of the charter, and the report of the examiners as to the financial condition of the bank is found to be satisfactory.

In view, therefore, of the solemn pledge given by the directors of the bank that they will give special attention, in the future, to the manner in which the officers and employees of the Riggs National Bank shall carry on and conduct the business and affairs of the bank to the end that the business operations and affairs of the bank in the future shall be conducted in strict compliance with the nationalbank act and all the laws of the United States, and in conformity with the lawful rules, regulations, and requirements of the Office of the Comptroller of the Currency, and to take all such action as shall be necessary to secure that end, and in view of the fact that the bank
is solvent, and when properly conducted will serve a useful purpose in the community, and that a refusal to approve your application for an amendment to your charter extending your period of succession might work injustice to innocent stockholders, many of whom may have no potential influence or voice in the selection of the directors of the bank or its officers since they may be in a minority, I have concluded to issue a certificate of approval of your application for an extension of/your charter, with the expectation that the officers and directors of the Riggs National Bank, profiting by the experience of the past and the decision of the court in the litigation to which I have referred, will scrupulously conform to the provisions of the national-bank act and the rules, regulations, and requirements of the Comptroller's Office in the future. By doing this and confining itself to the legitimate business of banking, the Riggs National Bank can serve this community usefully and honorably. So long as it does this it will have the support and approval of the duly constituted authorities of the Government.

Respectfully,

\author{
Jno. Skelton Williams, Comptroller of the Currency.
}

\section*{Respectfully submitted.}

The Secretary of the Treasury.

\section*{REPORT OF THE COMMISSIONER OF INTERNAL REVENUE.}

\author{
Treasury Department, \\ Office of Commissioner of Internal Revenue, Washington, D. C., October 12, 1916.
}

Sir: I have the honor to make the following report of the work of the Bureau of Internal Revenue during the fiscal year ended June 30,. 1916 .

Included in this report is a statement of receipts from the several sources of internal revenue for the months of July, August, and September of the current fiscal year.

\section*{aCCOUNTS AND STATISTICS.}

The total receipts of the bureau for the past fiscal year amounted to \(\$ 512,723,287.77\), exceeding by \(\$ 97,042,263.91\) the receipts for the preceding fiscal year (1915), which were then the largest in the history of the bureau. Of this total there was collected from corporations under the act of October 3, 1913, an aggregate of \(\$ 56,972,-\) 720.88 as compared with \(\$ 39,144,531.71\) collected during the preceding fiscal year, being an increase of \(\$ 17,828,189.17\). Income-tax collections from individuals aggregated \(\$ 67,943,594.63\) as compared with \(\$ 41,046,162.09\), during the preceding fiscal year, being an increase of \$26,897,432.54.

The receipts from ordinary sources, including the "emergency revenue," were \(\$ 387,786,035.16\) as compared with \(\$ 335,479,265\) during the preceding fiscal year, an increase of \(\$ 52,306,770.16\).

The emergency revenue collected during last fiscal year amounted to \(\$ 84,278,302.13\). However, no comparison of these collections with those of the preceding fiscal year can be made which under provisions of the act of October 22, 1914, embraced fractional parts only of the year.

The ordinary receipts for fiscal year 1916, exclusive of this emergency revenue, as compared with those for fiscal year 1915, show increase in receipts from the following sources:
\begin{tabular}{|c|c|}
\hline Distilled spirits. & \$13,385, 692. 80 \\
\hline Manufactured tobacco, snuffs, cigars, and cigarettes. & 7, 853, 337.28 \\
\hline Miscellaneous. & 13,891. 59 \\
\hline Total. & 21, 252, 921.67 \\
\hline Less decrease in collections from fermented liquors. & 1, 155, 327.35 \\
\hline Net increase. & 20, 097, 594. 32 \\
\hline & 637 \\
\hline
\end{tabular}

The receipts from ordinary sources for the first three months of current fiscal year, exclusive of the emergency revenue, were \(\$ 83,144,648.12\) as compared with \(\$ 72,526,803.97\) for similar period of the fiscal year 1916, an increase of \(\$ 10,617,844.25\).

The emergency revenue collected during the first three months of current fiscal year aggregated \(\$ 22,386,330.75\).

Income tax collected for the first three months of current fiscal year amounted to \(\$ 11,853,624.95\) as compared with \(\$ 11,123,336.18\) for similar period of the fiscal year 1916, an increase of \(\$ 730,288.77\).

I estimate the collections for fiscal year ending June 30, 1917, distributed as follows: Ordinary collections, \(\$ 319,000,000\); emergency revenue including additional 50 cents barrel tax on fermented liquors, munition manufacturers' and estate taxes, \(\$ 124,000,000\); income tax, \(\$ 244,750,000\) (corporation \(\$ 133,000,000\) and individual \(\$ 111,750,000\) ); making a total of \(\$ 687,750,000\).

I estimate the collections for fiscal year ending June 30, 1918, distributed as follows: Ordinary collections, \(\$ 319,000,000\); emergency revenue including additional 50 cents barrel tax on fermented liquors, munition manufacturers' and estate taxes, \(\$ 145,800,000\); income tax, \(\$ 244,750,000\) (corporation \(\$ 133,000,000\) and individual \(\$ 111,-\) 750,000 ) ; making a total of \(\$ 709,550,000\).

The estimated receipts for fiscal year 1917, except such as relate to new taxes are predicated in part on the collections for the first three months of that fiscal year, and those estimated for fiscal year 1918 are predicated on a continuation of present industrial conditions without material change in existing internal-revenue laws.

\section*{SOURCES OF INTERNAL TAXATION.}

The sources of internal taxation producing the largest amounts of revenue during the last fiscal year are distilled spirits, exclusive of special taxes, \(\$ 149,849,180.47\); fermented liquors, exclusive of special taxes, \(\$ 87,875,672.22\); manufactured tobacco, including snuff, cigars, and cigarettes and not including special taxes for the manufacture and sale of same, \(\$ 85,324,094.46\); documentary and proprietary stamps, \(\$ 42,196,443.48\); various special taxes amounting in the aggregate to \(\$ 16,580,480.38\); corporation income tax, \(\$ 56,972,720.88\); and individual income tax, \(\$ 67,943,594.63\).

RECEIPTS IN LARGE TAX-PAYING STATES AND COLLECTION DISTRICTS.
The States in which the largest collections of internal-revenue taxes were made during the fiscal year 1916 are New York, \$104,910,489.62; Illinois, \(\$ 65,287,404.68\); Pennsylvania, \(\$ 44,817,504.27\); Kentucky, \(\$ 37,242,180.89\); Ohio, \(\$ 33,743,476.42\); and Indiana, \(\$ 30,848\),288.74 .

Among the States in which the smallest collections were made are Idaho, \(\$ 307,257.95\); Mississippi, \(\$ 304,884.61\); Nevada, \(\$ 157,393.28\); New Mexico, \(\$ 306,518.72\); and Wyoming, \(\$ 250,144.85\).

Of the collection districts, the second New York reported \$42,475,733.33; the fifth Illinois, \(\$ 28,952,297.85\); the third New York, \(\$ 27,407,542.01\); and the first Illinois, \(\$ 27,280,779.86\), which were the four largest collections made.

The fiscal year 1916 witnessed a large increase in the production and tax-paid withdrawal of distilled spirits; a falling off during the early part of the year in the production of fermented liquors, but with a steady increase in production during the later months following; a substantial increase in manufactured tobacco, snuff, and cigars, with a phenomenal increase in the manufacture of small cigarettes. A great increase in corporation and individual income-tax receipts further emphasized the general prosperous condition throughout the country.

In the fiscal year 1915 the total production of distilled spirits was 140,656,103 gallons; in 1916, 253,283,273 gallons, an increase of \(112,627,170\) gallons which is equal to 80 per cent of the entire production for 1915.

The four States having the largest production of distilled spirits during the last fiscal year are Illinois, \(66,868,865\) gallons; Indiana, 51,108,395 gallons; Kentucky, 33,254,129 gallons; and Louisiana, 23,291,661 gallons.

The four collection districts having the largest production of distilled spirits are the fifth Illinois, \(51,607,972\) gallons; seventh Indiana, \(38,377,826\) gallons; Louisiana, \(23,291,661\) gallons; and fifth Kentucky, 17,099,681 gallons.

During the fiscal year 1916 there were tax paid for bottling in bond \(12,578,452\) taxable gallons as compared with \(9,748,979\) taxable gallons tax paid during 1915, an increase of \(2,829,473\) taxable gallons.

The five States which produced the largest quantity of fermented liquors are New York, 12,732,529 barrels; Pennsylvania, 7,634,211 barrels; Illinois, 5,955,231 barrels; Wisconsin, 4,525,027 barrels; and Ohio, 4, 844,239 barrels.

The three collection districts which produced the largest quantity of fermented liquors are third New York, 5,168,070 barrels; first Illinois, \(5,045,561\) barrels; and first Wisconsin, \(3,723,400\) barrels.

The four States producing the greatost number of cigars weighing more than 3 pounds per thousand and the production of each during the calendar year 1915 are as follows:

The two districts showing the largest production of cigars are the first Pennsylvania, 741,858,057, and the ninth Pennsylvania, 619,106,632.

The States showing the greatest production of little cigars (weighing not more than 3 pounds per thousand) are:
\begin{tabular}{|c|c|}
\hline Maryland & 404, 237, 260 \\
\hline Pennsylvani & 364, 032, 686 \\
\hline New Jersey. & 147, 046, 950 \\
\hline The greatest & \\
\hline Maryland. & 404, 237, 260 \\
\hline First Pennsylvania & 361, 129, 446 \\
\hline Fifth New Jersey & 147, 046, 950 \\
\hline First New York. & 32, 440, 220 \\
\hline
\end{tabular}

The States of New York, North Carolina, Virginia, New Jersey Louisiana, California, and Pennsylvania, in the order named, show the greatest production of cigarettes weighing not more than 3 pounds per thousand.
\begin{tabular}{|c|c|}
\hline New York & 7, 868, 834, 742 \\
\hline North Carolina. & 5, 217, 326, 490 \\
\hline Virginia. & 3, 042, 628, 890 \\
\hline New Jersey. & 1, 646, 853, 755 \\
\hline Louisiana. & 788, 292, 795 \\
\hline California. & 279, 329, 914 \\
\hline .Pennsylvania & 81, 066, 410 \\
\hline
\end{tabular}

The three districts showing the greatest production of little cigarettes are the second Virginia, which produced \(3,039,632,110\) : the fourth North Carolina, which produced 2,753,345,000: and the second New York, which produced 2,466,621,892.

New York produced the greatest number of large cigarettes, showing a production of \(14,821,330\), of which number \(11,409,080\) were manufactured in the third district and \(3,330,710\) in the second district.

The States of North Carolina, Missouri, Ohio, Kentucky, New Jersey, and Michigan, in the order named, were the States reporting the largest manufacture of both chewing and smoking tobacco, the quantity manufactured being as follows:

\section*{Pounds.}

Missouri....................................................................................................... 65, 757, 724
Ohio.............................................................................. 44, 197, 188

The districts producing the largest quantity were:

First Missouri. . ..........................................................................................664, 221
Fifth New Jersey................................................................. 32, 924,688
First Ohio............................................................................... 31, 199,686
Fifth Kentucky.......................................................................... 29, 568, 242

The six States in which the largest amounts of corporation income tax were collected are New York, \(\$ 14,947,802.46\); Pennsylvania, \(\$ 6,789,242.89\); Illinois, \(\$ 5,579,151.99\); Ohio, \(\$ 3,627,218.61\); Massachusetts, \(\$ 2,668,189.60\); and Michigan, \(\$ 2,020,472.80\). The collection districts showing the largest collections from this source are the second New York, \(\$ 9,240,858.24\); first Illinois, \(\$ 5,109,164.99\); first Pennsylvania, \(\$ 3,153,890.79\); twenty-third Pennsylvania, \(\$ 3,004,-\) 542.04; third New York, \(\$ 2,869,929.31\); and third Massachusetts, \(\$ 2,668,189.60\).
The six States in which the largest individual income tax was collected are New York, \(\$ 30,252,255.39\); Pennsylvania, \(\$ 6,313,191.41\); Illinois, \(\$ 5,166,689.91\); Massachusetts, \(\$ 4,193,828.30\); New Jersey, \(\$ 2,928,300.13\); and Ohio, \(\$ 2,416,701.11\). The collection districts showing the largest collections from this source are the second New York, \(\$ 14,710,225.35\); third New York, \(\$ 10,587,399.81\); first Illinois, \(\$ 4,848,593.96\); third Massachusetts, \(\$ 4,193,828.30\); first Pennsylvania, \(\$ 3,756,186.27\); and Maryland, \(\$ 2,741,632.03\).

\section*{COST OF' COLLECTING INTERNAL-REVENUE TAXES.}

The cost of collecting the internal revenue for the fiscal year was \(\$ 14.04\) per \(\$ 1,000\), or 1.40 per cent. The cost of collection for the previous year was \(\$ 16.37\) per \(\$ 1,000\), or 1.64 per cent. The average cost of collection since the establishment of the bureau is approximately \(\$ 24.26\) per \(\$ 1,000\), or 2.43 per cent.

The internal-revenue receipts for the fiscal year 1916 amounted to \(\$ 512,723,287.77\), and this represents the largest collection in any fiscal year since the Internal-Revenue Service was established in 1862. The cost of collecting the internal revenue at the rate of 1.40 per cent for the fiscal year 1916, represents the lowest cost of collection in the last 50 years.

The following represents the expenditures from the various appropriations for fiscal year 1916:
Salaries and expenses of collectors of internal revenue. .............. \(\$ 2,116,305.91\)
Salaries and expenses of collectors of internal revenue (act of Oct. 22, 1914)

599, 794. 40
Salaries and expenses of agents and subordinate officers of internal revenue.
\(2,111,813.76\)
Collecting the income tax. ...................................................... \(1,155,599.76\)
Salaries, office of Commissioner of Internal Revenue... . . . . . . . . . . . . . . . 637, 260.85
Punishment for violation of internal-revenue laws............................ 161, 947.82
Restricting the sale of opium, etc................................................. 288, 652. 32
Miscellaneous expenses, Internal-Revenue Service. . . . . . . . . . . . . . . . . . 98, 375.21
Collecting the cotton-futures tax ...................................................... 21 . 524.12
Restricting the sale of opium, etc. (without year).......................... 7, 789.17
Total amount expended...................................................... 7, 199, 163. 32
Noтt.-Not included in this total are bills approximating \(\$ 8,000\), covering expenses of deputy collectors incurred in excess of allowances, transportation requests, miscellaneous items, etc., not yet adjusted.

The amount expended from the appropriation "Refunding internalrevenue collections" is \(\$ 43,337.68\). This amount is not considered as a part of the expense incident to the collection of internal revenue, so is not included in the expenses enumerated above.

\section*{ESTIMATED EXPENSES FOR NEXT FISCAL YEAR.}

I estimate the expenses of the Internal-Revenue Service for the fiscal year ending June 30, 1918, as follows:
Office of the Commissioner of Internal Revenue: For salaries of officers, clerks, and subordinate officers.
\(\$ 743,360.00\)
Salaries and expenses of collectors of internal revenue: For salaries and expenses of collectors of internal revenue, deputy collectors, surveyors, clerks, messengers, and janitors in the internall:revenue offices.
\(2,565,000.00\)
Salaries and expenses of agents and subordinate officers of internal revenue: For salaries and expenses of 40 revenue agents provided for by law, fees and expenses of gaugers, and salaries and expenses of storekeepers and storekeeper-gaugers.
\(2,200,000.00\)
Miscellaneous expenses, Internal-Revenue Service: For rent of offices outside of the District of Columbia, telephone service, and other miscellaneous expenses incident to the collection of internal revenue.
\(100,000.00\)
Punishment for violation of internal-revenue laws: For detecting and bringing to trial persons guilty of violating the internal-revenue. laws or conniving at the same, including payments for information and detection of such violations.

175, 000.00
\[
62015^{\circ}-\text { FI } 1916-41
\]
Refunding internal-revenue-collections: To enable the Secretary of the Treasury to refund money covered into Treasury as internalrevenue collections under the provisions of the act approved May 27, 1908
\(\$ 50,000.00\)
Collecting the income tax: For expenses of assessing and collecting the income tax as provided in Title I of the act entitled "An act to increase the revenue, and for other purposes," approved Sept. 8, 1916, including the employment of agents, inspectors, deputy collectors, clerks, and messengers in the District of Columbia and the several collection districts, and for the purchase of such supplies, equipment, mechanical devices, and other articles as may be necessary for use in the District of Columbia and the several collection districts
\(1,700,000.00\)
Collecting the cotton-futures tax: For expenses to enforce the provisions of part A of the act approved \(\Lambda\) ug. 11, 1916, known as the cotton futures act, including the employment of attorneys, agents, inspectors, deputy collectors, clerks, and messengers, and for the purchase of such supplies, equipment, mechanical devices, and other articles as may be necessary
\(32,000.00\)
Restricting the sale of opium, etc.: For expenses to enforce the provisions of the act of Dec. 17, 1914, entitled" An act to provide for the registration of, with collectors of internal revenue, and to impose a special tax upon all persons who produce, import, manufacture, compound, deal in, dispense, sell, distribute, or give away opium or coca leaves, their salts, derivatives, or preparations, and for other purposes," including the employment of agents, inspectors, deputy collectors, chemists, assistant chemists, clerks, and messengers in the field and in the Bureau of Internal Revenue in the District of Columbia, and for the purchase of such supplies, equipment, mechanical devices, and other articles as may be necessary for use in the District of Columbia and the several collection districts.
Collecting the tax on legacies, munitions, etc.: For expenses of assessing and collecting the tax as provided by Titles I, II, and IJI of the act entitled " An act to increase the revenue, and for other purposes," approved Sept. 8,1916 , and to pay such sums as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may deem necessary
\(340,000.00\)
\(8,205,360.00\)
Salaries, office of Commissioner of Internal Revenue (reimbursable): For salaries of two stamp agents and one counter
3,400.00

\section*{SALARIES.}

I have the honor to recommend that Congress appropriate for the fiscal year ending June 30,1918 , the sum of \(\$ 743,360\) as salaries for the following officers, clerks, and employees of this bureau:
1 Commissioner of Internal Revenue ..... \(\$ 6,500\)
1 deputy commissioner ..... 4,500
1 deputy commissioner ..... 4, 000
1 chief chemist ..... 3, 000
1 chemist ..... 2, 500
2 first assistant chemists, at \(\$ 1,800\) each ..... 3, 600
1 second assistant chemist ..... 1, 600
1 third assistant chemist. ..... 1, 400
4 heads of division, at \(\$ 3,000\) each ..... 12,000
5 heads of division, at \(\$ 2,750\) each ..... 13, 750
5 assistant heads of division, at \(\$ 2,000\) each ..... 10,000
1 superintendent of stamp vault ..... 2,000
1 private secretary ..... 1, 800
1 statistical expert ..... 2, 000
3 clerks, at \(\$ 2,000\) each ..... 6,000
35 clerks of class 4 ..... 63,000
31 clerks of class 3 ..... 49, 600
44 clerks of class 2 ..... 61, 600
43 clerks of class 1 ..... 51, 600
32 clerks, at \(\$ 1,000\) each ..... \(\$ 32,000\)
48 clerks, at \(\$ 900\) each ..... 43,200
4 messengers, at \(\$ 840\) each ..... 3,360
18 assistant messengers, at \(\$ 720\) each ..... 12, 960
16 laborers, at \(\$ 660\) each ..... 10, 560
For the following formerly authorized and paid from the appropriationfor "Classifying, etc., returns of corporations," and for others whoseemployment is necessary on account of the act inposing income taxeson corporations and individuals, namely:
1 deputy commissioner ..... 4, 250
1 head of division. ..... 3,500
1 head of division ..... 3, 000
3 assistant heads of division, at \(\$ 2,000\) each ..... 6,000
1 attorney ..... 3, 600
1 law clerk ..... 2,000
1 insurance expert ..... 2,000
1 railroad expert ..... 2,000
1 clerk ..... 2,000
32 clerks of class 4 ..... 57, 600
25 clerks of class 3 ..... 40, 000
44 clerks of class 2 ..... 61, 600
56 clerks of class 1 ..... 67, 200
46 clerks, at \(\$ 1,000\) each ..... 46,000
34 clerks, at \(\$ 900\) each. ..... 30, 600
7 messengers, at \(\$ 840\) each. ..... 5, 880
5 assistant messengers, at \(\$ 720\) each ..... 3, 600
560Total743,360

I also recommend the appropriation of the sum of \(\$ 3,400\) as salaries of two stamp agents, one at \(\$ 1,600\), one at \(\$ 900\), and one counter at \(\$ 900\), the same to be reimbursed by the stamp manufacturers as provided by the act of August 5, 1882.

\section*{SCALE OF SALARIES OF COLLECTORS.}

The recommendations made for the salaries of collectors are based upon an estimate of their probable collections according to the following scale, with the qualifications that if the actual collections vary from the amounts estimated the salaries will be readjusted at. the end of the fiscal year:
\begin{tabular}{|c|c|c|c|}
\hline For collection of- & Salary. & For collection of- & Salary. \\
\hline \$25,000 or less. & \$2,000 & \$375,001 to \$425,000. & \$3,375 \\
\hline \$25,001 to \(\$ 37,500\) & 2,125 & \$425,001 to \$475,000. & 3,500 \\
\hline \$37,501 to \$50,000. & 2,250 & \$475,001 to \$550,000. & 3, 625 \\
\hline \$50,001 to \$75,000. & 2, 375 & \$550,001 to \$625,000. & 3,750 \\
\hline \$75,001 to \$100,000 & 2,500 & \$625,001 to \$700,000. & 3, 875 \\
\hline \$100,001 to \$125,000 & 2,625 & \$700,001 to \$775,000. & 4,000 \\
\hline \$125,001 to \(\$ 175,000\) & 2,750 & \$775,001 to \$850,000. & 4,125 \\
\hline \$175,001 to \$225,000 & 2,875 & \$850,001 to \$925,000. & 4,250 \\
\hline \$225,001 to \$275,000 & 3, 000 & \$925,001 to \$999,999... & 4,375 \\
\hline \$275,001 to 8325,000 & 3,125 & \$1,000,000 and upward & 4,500 \\
\hline \$325,001 to \$375,000. & 3,250 & & \\
\hline
\end{tabular}

In addition to the salary based upon the above-mentioned scale, the collector shall receive a commission of one-half of 1 per cent on tax-paid spirit stamps, and may receive additional compensation on account of territorial extent, as provided by law, provided the gross compensation does not exceed \(\$ 4,500\). (See sec. 3148, as amended, and sec. 3314, Rev. Stat.)

The force connected with this bureau during the fiscal year ended June 30, 1916, in the various collection districts as reorganized under the Executive orders of May 21, 1887, September 16, 23, and 30, 1912; July 21, 1913, and October 24, 1914, was 64 collectors, who received per annum salaries as follows:
\begin{tabular}{|c|c|c|c|}
\hline Number. & Salary. & Number. & Salary. \\
\hline 62... & \(\$ 4,500.00\)
\(4,195.77\) & & \$4,125.00 \\
\hline
\end{tabular}

The following force of deputy collectors, clerks, messengers, and janitors was employed by the different collectors and received per annum salaries as follows:
```

APPROPRIATION "SALARIES AND EXPENSES OF COLLECIORS OF INTERNAL REVENUE."

```

APPROPRIATION "SALARIES AND EXPENSES OF COLLECTORS OF INTERNAL REVENUE". (ACT OF OCT. 22, 1914).

\end{tabular}

FIELD FORCE.
During the fiscal year the average number employed in the field was as follows: 64 collectors; 40 revenue agents appointed under section 3152, Revised Statutes, as amended; 63 revenue agents and 92 inspectors engaged on income-tax work; 1 agent employed under the opium appropriation; 1 attorney, 4 agents, and 2 stenographers employed on cotton-futures work; 2,174 deputy collectors, 217 clerks, 12 messengers, 1 janitor, 56 special employees, 963 storekeepers and storekeeper-gaugers, whose average per diem ranged from \(\$ 3\) to \(\$ 4\); and 468 gaugers whose fees or compensation ranged from \(\$ 3\) to \(\$ 5\) per. day.

\section*{OBJECTS OF TAXXATION.}

\section*{DISTILLED SPIRITS.}

During the past fiscal year there were produced from materials other than fruit \(249,123,921.8\) taxable gallons of distilled spirits, an increase of \(116,989,769.6\) gallons as compared with the quantity of like spirits produced during the fiscal year ending June 30, 1915.

Of this class of spirits there were removed from bonded warehouses on payment of tax \(133,025,969.4\) taxable gallons, an increase of \(11,527,644.4\) taxable gallons over the quantity tax paid during the preceding fiscal year.

The quantity of spirits remaining in distillery and general bonded warehouses at the close of the fiscal year 1916 was \(232,402,878.3\) gallons, a decrease of \(21,265,463\) gallons from the quantity so held in bond at the close of the preceding fiscal year.

The large increase in production of distilled spirits during the year was occasioned by the demand for alcohol and high-proof spirits to be
denatured and for export to European countries. Withdrawals free of tax for denaturation increased \(59,120,534.3\) gallons during the year, and for export \(37,348,484.4\) gallons.

The following table shows the quantity of distilled spirits produced from materials other than fruit from the fiscal year 1900, the quantity withdrawn upon payment of tax, and the quantity held in bond at the close of each fiscal year during that period:

\section*{DENATURED ALCOHOL.}

During the past fiscal year there were withdrawn from bond, free of tax, for denaturation, 84,532,253.1 proof gallons of alcohol and rum, as against \(25,411,718.8\) proof gallons withdrawn for like purposes during the fiscal year 1915 .
The following statement shows the quantity of spirits denatured dúring each fiscal year since the enactment of the denatured-alcohol law of June 7, 1906:

Detailed statements showing by districts the quantity of alcohol denatured during the past fiscal year and the various commercial purposes for which such alcohol was denatured will be found on pages 97-102 of the Report of the Commissioner of Internal Revenue.

\section*{DISTILLERIES.}

During the fiscal year ended June 30, 1916, there were operated for the production of distilled spirits 279 grain distilleries; 25 molasses distilleries, and 301 fruit distilleries, a total of 605-a decrease of 30 , as compared with the number operated during the previous fiscal year.

A close supervision by distillery and field officers was maintained over all establishments engaged in the manufacture, rectification, and sale of distilled spirits.

\section*{industrial (farm) distilleries.}

As noted in my report for the fiscal year of 1915, one industrial distillery only has been established under the act of October 3, 1913, which act, for the purpose of encouraging distilleries of this class, has made special exemptions and provisions in the matter of registry and conduct of such distilleries, and which permits the manufacture of alcohol "from any substance whatever."

In view of the present high price of grain and other material ordinarily used at regularly established distilleries, it may, I think, be reasonably expected that a considerable number of these smaller distilleries will be established in the near future.

\section*{BRANDY USED IN FORTIFYING WINES.}

During the fiscal year 1916 there were used in the fortification of pure sweet wines \(1,257,399\) proof gallons of brandy as against \(4,505,218.7\) proof gallons used for like purpose during the preceding fiscal year.

This noticeable decrease is doubtless due to the fact that by the act of October 22, 1914, the tax on brandy so used was increased from 3 cents per proof gallon, as fixed by the act of June 7, 1906, to 55 cents per proof gallon. The result of this increase in the rate of tax is also clearly indicated by the quantity of brandy used under these different rates during the fiscal year 1915, the quantity used at the rate of 3 cents per proof gallon during the first 4 months being \(4,132,419.4\) proof gallons, as against \(373,199.3\) proof gallons at the higher rate of tax used during the remaining 8 months.

By the act of September 8, 1916, the tax on brandy so used has been reduced to 10 cents per proof gallon, and it may, I think, be safely predicted that the quantity of brandy hereafter so used annually will closely approximate \(5,000,000\) proof gallons.

By the act of October 22, 1914, a tax at the rate of 8 cents per gallon was imposed upon all domestic and imported still wines sold or offered for sale or consumption, which, under the provisions of the act, was payable only when such wines passed directly to the consumer. As a rule such sales were made by retailers, and owing to the large number of retail dealers (some 200,000 in number) and the consequent difficulty in closely supervising such sales, a large quantity of wine was disposed of without payment of tax.
- By the act of September 8, 1916, tax has been imposed on this class of wines according to their alcoholic content, namely:

> On wines not exceeding 14 per cent alcohol, 4 cents per gallon.
> If exceeding 14 per cent and not exceeding 21 per cent, 10 cents per gallon.
> If exceeding 21 per cent and not exceeding 24 per cent, 25 cents per gallon.
> If exceeding 24 per cent, \(\$ 1.10\) per gallon.

Under the provisions of this act the tax is due and payable when the wine is removed for consumption, either from the winery or other place of storage, and provision is made for the bonding of all such premises and the filing of such notices and inventories as the Commissioner of Internal Renenue, with the approval of the Secretary of the Treasury, may prescribe. Under these provisions, and the regulations authorized by the act, it is believed that a closer collection of the tax imposed will hereafter be secured, and that the revenue from this source will be materially increased.

\section*{FERMENTED LIQUORS.}

The production of fermented liquors during the fiscal year ended June 30, 1916, was \(58,633,624\) barrels, being a decrease of \(1,174,586\) barrels, as compared with the preceding fiscal year. There were taxpaid for consumption \(58,564,508\) barrels and removed from breweries for export free of tax 69,116 barrels during the last fiscal year.

The number of breweries operated during the year was 1,332 , a decrease of 40 as compared with the previous fiscal year. Pipe lines were employed for conveying fermented liquors to the bottling premises at 374 breweries, being an increase of 12 as compared with the previous fiscal year.

TOBACCO.
The receipts from the tax on manufactured tobacco, snuff, cigars, and cigarettes, including special taxes, for the fiscal year ended June 30,1916 , amounted to \(\$ 88,063,947.51\), an increase over the collections from these sources during the fiscal year ended June 30, 1915, of \(\$ 8,106,573.97\). The collections from special taxes levied under the act of October 22, 1914, during the last fiscal year amounted to \(\$ 2,739,853.05\).

There were in operation at the close of the calendar year 1915, 15,732 cigar factories and 367 cigarette factories, this being a decrease of 1,022 cigar factories and a decrease of 14 cigarette factories, as compared with the previous year.

There were also in operation at the close of the last calendar year 2,285 tobacco and snuff factories, 2,214 producing manufactured tobacco and 71 producing snuff, 3,497 dealers in leaf tobacco and 431 retail dealers in leaf tobacco.

The sale of unmanufactured leaf tobacco by retail dealers in leaf tobacco continues to be of little consequence.

The past year witnessed the disclosure of numerous and immense frauds upon the revenue by manufacturers of tobacco, cigars, and cigarettes. These frauds were made possible by the lamentable weakness of the law relating to dealers in leaf tobacco. Quantities of tobacco have been sold by dealers in leaf tobacco to manufacturers of cigars, cigarettes, and tobacco without same having been reported to the Government. In many cases fraudulent leaf dealers have disappeared, and practically every opportunity for tracing the leaf
tobacco shown on their reports as on hand or collecting the tax on cigars manufactured therefrom is lost. To remedy the defects in the law, it has been recommended in the annual reports for the past few years that every dealer in leaf tobacco should be required by law to give a bond in such penal sum as the collector may determine, based upon the quantum of business done, the sum of said bond to be increased from time to time at the discretion of the collector or under instructions of the Commissioner of Internal Revenue. A true inventory of stock on the 1st day of January of each year and the rendition of reports of transáctions in leaf tobacco, either quarterly, monthly, or for such periods (and within 10 days after the close of such periods) as the Commissioner of Internal Revenue may prescribe, should be required of each dealer in leaf. tobacco. Authority should also be given the Commissioner of Internal Revenue to propose and levy assessments for tax on tobacco not properly accounted for.
It is also recommended that manufacturers of tobacco, snuff, cigars, and cigarettes, dealers in leaf tobacco and peddlers of tobacco should be required to register their name or style, trade or business, only on commencement of business and not annually on the 1st day of July, when special taxes on these occupations are not in force.

It is to be noted that during the past fiscal year there has been another extraordinary increase in the number of cigarettes taxpaid weighing not more than 3 pounds. per thousand. The receipts from the sale of stamps during the fiscal year ended June 30, 1916, show taxpayment of \(21,066,196,672\) small cigarettes, an increase over the previous fiscal year of \(4,325,719,760\) cigarettes.

\section*{OLEOMARGARINE}

A considerable increase is shown in the quantity of uncolored oleomargarine produced and withdrawn taxpaid during the fiscal year ended June 30, 1916, as compared with the preceding fiscal year, while there was a small decrease shown in the volume of operations in the colored product for the same period.

During the fiscal year 1916 there was produced a total of 145,760,973 pounds of uncolored oleomargarine, of which 145,443,578 pounds were withdrawn taxpaid at one-fourth cent, as against 138,241,907 pounds produced and \(137,693,610\) pounds taxpaid at this rate during the fiscal year ended June 30, 1915, thus showing a net increase of \(7,546,066\) pounds in the production and \(7,749,968\) pounds in the withdrawals taxpaid during 1916.

In 1916 a total of \(6,748,940\) pounds of colored oleomargarine was produced, and of this amount \(3,403,287\) pounds were taxpaid at 10 cents; 2,561,613 pounds withdrawn free of tax for export, and 746,281 pounds withdrawn free for use of United States as supplies for governmental institutions, as compared with \(7,595,141\) pounds produced; 3,753,012 pounds taxpaid at 10 cents; 3,081,356 pounds exported free of tax, and 734,030 pounds withdrawn free for use of the United States during the fiscal year 1915.

These figures show a decrease in the colored goods of 846,201 pounds produced; 349,725 pounds withdrawn taxpaid, and 519,743 pounds exported, and an increase of 12,251 pounds withdrawn free for use of Government during the fiscal year 1916.

The totals of both classes of oleomargarine show \(152,509,913\) pounds produced; \(148,846,865\) pounds taxpaid, \(2,587,689\) pounds exported, and 748,531 pounds withdrawn free for use of Government during the fiscal year ended June 30, 1916, as compared with \(145,810,048\) pounds produced, \(141,446,620\) pounds taxpaid, \(3,112,528\) pounds exported, and 734,030 pounds withdrawn for use of Government.in the fiscal year 1915.

From these figures it will be noted that there was a total net increase in both classes of \(6,699,865\) pounds produced, \(7,400,243\) pounds withdrawn taxpaid, and 14,501 pounds withdrawn free for use of United States, and a decrease of 524,839 pounds in withdrawals for export during the fiscal year 1916 over the preceding year.
Collections from all oleomargarine sources during the fiscal year 1916 amounted to a total of \(\$ 1,485,970.72\), which includes \(\$ 558,349.33\) from stamp tax at 10 cents per pound, \(\$ 366,350.58\) from stamp tax at one-fourth cent per pound, and \(\$ 561,270.81\) from special taxes of manufacturers and wholesale and retail dealers in the two classes of product.

The total collections from oleómargarine for the fiscal year 1915 amounted to \(\$ 1,695,256.95\), which included \(\$ 761,200.63\) from stamp tax at 10 cents per pound, \(\$ 347,141.81\) from stamp tax at one-fourth cent per pound, and \(\$ 586,914.51\) from special taxes of manufacturers and wholesale and retail dealers.

A comparison of the figures covering the collections for the fiscal years \(1915-16\), shows a decrease of \(\$ 202,851.30\) collected from stamp tax at 10 cents per pound and increase of \(\$ 19,208.77\) from stamp tax at one-fourth cent per pound, and a decrease of \(\$ 25,643.70\) from special taxes of manufacturers and dealers, or a total net decrease of \(\$ 209,286.23\) in the collections for oleomargarine in 1916.

These figures for 1916 include approximately \(\$ 200,000\), payments on assessments of stamp tax at 10 cents per pound on goods artificially colored by the manufacturers and placed on the market under taxpaid stamps at one-fourth cent per pound, and on the product illicitly colored by dealers who were discovered to have engaged in this illicit manufacture of oleomargarine, but these figures do not include collections from fines imposed by the courts and compromises effected in settlement of liabilities and violations of the law.

Investigations of violations of the oleomargarine law were continued during the fiscal year 1916, and while no cases of the same magnitude in fraud as those reported during the two preceding years were discovered, a large number of cases of considerable importance involving the illicit coloring of white oleomargarine by dealers were discovered and the offenders prosecuted and convicted. In addition to the criminal prosecutions in these cases assessments of stamp tax at 10 cents per pound on the product illicitly colored and special taxes as manufacturers were made against these dealers, and in several instances taxes amounting to several thousand dollars were collected.
The prosecutions pending at the close of the preceding year in three of the largest cases discovered in 1914 were vigorously pressed during 1916, and the most important one was brought to trial and resulted in conviction of all the principals, who were sentenced to pay fines
and serve terms of imprisonment. Through various legal technicalities and delays criminal prosecutions in the other two cases have not been brought to a conclusion and the cases are now pending.
A summary of the results of the investigations made during the fiscal year 1916 shows 66 violations by manufacturers, 28 by wholesale dealers, 1,789 by retail dealers, or a total of 1,882 violations by these various classes reported during the year, as compared with a total of 2,777 violations during the fiscal year 1915.
These figures of violations by manufacturers include only those cases reported against dealers who illicitly colored the white product and thereby became manufacturers under the law, as no violations were reported during the year against duly qualified manufacturers.
There were pending at the beginning of the fiscal year 1916, 22 cases of violations by manufacturers, 1 by wholesale dealers, 7 by retail dealers, and these cases, with those reported during 1916 were disposed of by indictment and prosecution where the facts warranted such action, and by compromise of those cases of technical violations and by being dropped upon payment of taxes due where the facts clearly showed unintentional nature of the offenses.
During the fiscal year 1916 prosecutions resulted in the conviction of a total of 10 manufacturers, 1 wholesale dealer, and 2 retail dealers, and acquittal of 4 manufacturers and 2 retail dealers, while 7 cases of illicit manufacture, 5 t́iolations by wholesale dealers, and 48 by retail dealers were compromised, leaving 60 cases of illicit manufacture; 14 violations by wholesale dealers, and 36 by retail dealers pending at the close of the fiscal year.
Fines aggregating \(\$ 38,751\) were imposed in cases where convictions were secured, in addition to prison terms, and there was paid in compromise of violations a total of \(\$ 14,090.90\). Assessments were made of special taxes amounting to \(\$ 56,134.19\) and of stamp taxes of \(\$ 116,490.72\) as a result of the discovery of these violations. Of these amounts there was collected from assessment of special taxes \(\$ 20,418.26\) and from stamp taxes \(\$ 188,428.33\), a total of \(\$ 208,846.59\), making a total collection by assessments and compromises of \(\$ 228,-\) 937.59 .

Included in the collections from stamp taxes is \(\$ 160,000\) paid on assessments made the previous fiscal year, while there were still outstanding a large amount in special and stamp taxes assessed in these cases discovered during the current year.

Attention has repeatedly been called in the annual reports of previous years to the urgent need of revision of the oleomargarine law, and while the figures showing a decrease in violations discovered during the current fiscal year as compared with the preceding year might indicate that the requirements of this law are being more scrupulously observed because of the vigorous enforcement during the past three years, it is apparent that as long as the double rate of taxation remains in force frauds upon the revenues and the public will continue, despite every effort to suppress them.

A thorough and careful revision of this law to make it in fact a revenue measure and at the same time to afford the greatest possible protection against fraud, is urged.

A total of 147 cases against manufacturers, 28 against wholesale dealers and 38 against retail dealers in adulterated butter, were discovered and reported during the fiscal year ended June 30, 1916, making a grand total of 213 violations, as against 30 cases against manufacturers, 5 wholesale dealers and 5 retail dealers, or a total of 40 violations of the act of May 9, 1902, reported during the fiscal year 1915.

All but 26 of these reported violations consisted of the manufacture and sale of butter as creamery butter which was subsequently found to contain moisture of 16 per cent or more, and where the incorporation of abnormal moisture was shown to be due to accident, the cases were dropped upon payment of special and stamp taxes, or compromised where the manufacturers were financially unable to pay the full amount of taxes due.

Prosecutions were instituted in the 26 cases where the evidence showed the dealers had purchased creamery butter, manipulated it, and added thereto abnormal quantities of water ranging from 30 to 50 per cent and afterwards sold the product as pure creamery butter, and these offenders were convicted in every instance.
This class of violations has grown with considerable rapidity in some of the large cities, and the indications are that it will take such vigorous efforts as have been instituted recently to suppress this, growing illicit traffic. But it is confidently believed that with the completion of the investigations now started and the prosecutions instituted this form of fraud will be stamped out.

As a result of the violations of this law discovered, there was assessed \(\$ 53,655\) in special taxes and penalties; \(\$ 26,246.05\) stamp taxes, making a total of \(\$ 79,901.05\) against manufacturers and dealers, of which amount there has been collected \(\$ 20,324\) from special taxes; \(\$ 17,745.10\) from stamp taxes, or a total of \(\$ 38,069.10\) from these sources in 1916, as compared with a total of \(\$ 23,085.05\) collected from special and stamp taxes in 1915.

In addition to the above amount collected in taxes, a total of \(\$ 7,707\) was collected through compromises in the cases where the facts warranted this action, and a total of \(\$ 2,678.80\) was collected in fines from those cases where prosecution was instituted.

It is again recommended that the act of May 9, 1902, be amended and some definite standard of moisture or butter fat content be fixed by the statute for the different classes of butter defined by the act of August 2, 1886, as amended by this act.

This law as it stands works entirely too severe hardships upon manufacturers of butter who unknowingly and unintentionally place on the market butter containing 16 per cent or more of moisture, and likewise imposes unduly harsh penalties in the form of special taxes upon dealers who handle such butter.

There was a slight decrease in the production and withdrawal taxpaid of renovated butter during the fiscal year ended June 30, 1916. The transactions in this product showed a total of \(34,514,527\) pounds produced and \(34,572,335\) pounds withdrawn taxpaid during the year as compared with \(39,056,180\) pounds pröduced and \(38,924,828\)
pounds withdrawn taxpaid in the fiscal year 1915, making a net decrease of \(4,541,653\) pounds in the production and \(4,352,493\) pounds in the quantity taxpaid.

Collections from renovated butter during. 1916 amounted to \(\$ 88,760.89\) as compared with total collections of \(\$ 99,612.50\) from this source in 1915, or a net decrease in the collections from renovated butter of \(\$ 10,851.61\). No violations of the law relating to renovated butter were reported during 1916.

\section*{NARCOTIC LAW.}

At the close of the fiscal year ended June 30, 1916, the act of December 17, 1914, known as the Harrison narcotic law, had been in force 16 months, and this period of operation was sufficient to give the administrative officers of the department a clearer view of the conditions which the act was intended to remedy, and at the same time to show the several serious defects in this law and the urgent need of amendatory legislation.

Attention was called in the annual report for 1915 to the conditions found in the course of the enforcement of this law for the first four months ended June 30, 1915, and the conditions found and the results accomplished during the fiscal year 1916 only corroborate the statements and emphasize the recommendation made in the report for the preceding year.

During the 12 months ended June 30, 1916, there was reported a total of 23,754 violations of this act, which include those of a technical nature and also violations of the provisions of the regulations issued under authority of the law. These violations involved 11,681 registered and 275 unregistered physicians; 4,054 registered and 19 unregistered dentists; 1,190 registered and 21 unregistered veterinarians; 99 registered and 6 unregistered manufacturers of drugs; 3 registered importers of drugs; 46 registered wholesale dealers; 4,325 registered retail dealers and 49 unregistered retail dealers; 446 by registered miscellaneous classes, and 1,540 by unregistered miscellaneous classes.

As a result of these violations prosecutions in the more flagrant cases were instituted and resulted in the conviction of 83 registered persons, 580 unregistered, a total of 663, and the acquittal of 20 registered and 163 unregistered persons, or a total of 183, while at the close of the fiscal year 1916, 123 registered and 276 unregistered persons were under indictment or held for the grand jury.

The cases of 555 registered and 29 unregistered persons were compromised, and 20,603 cases of minor infractions by the registered and 646 by unregistered persons, including in these cases those who failed to pay special tax within the required time, were dropped upon satisfactory evidence of the technical or unintentional character of the violation.

At the close of the fiscal year 1916 there were pending 460 cases against registered and 216 cases against unregistered persons, in which cases no action had been taken at that time.

Collections from fines imposed by the courts in 138 cases amounted to \(\$ 19,676.84\), while there was collected from compromises during fiscal year \(1916 \$ 36,492.29\). During the year ended June 30, 1916, special taxes and penalties amounting to \(\$ 22,696.98\) were assessed
against delinquents, of which amount there has been collected, \$22,567.77.
The Supreme Court in the case of United States \(v\) : Jin Fuey. Moy, on June 12, 1916, decided that the provisions of section 8, making it unlawful for any persons not registered under this act to have in their possession any of the proscribed drugs, with certain exceptions specified in said section, applied only to those persons required to register under section 1 of the act, and not to consumers of such drugs who had obtained them upon prescription of a physician or other practitioner registered under the act.

This decision makes it practically impossible to control the illicit traffic in narcotic drugs by unregistered persons, as the mere possession of any quantity of the drugs is not evidence of violation, and therefore the Government is forced to prove in every case, even where the circumstances indicate sale and dispensing, actual sales by this class of offenders, which it has been found difficult to do.

As a large number of persons had been tried and convicted and sentenced to pay fines or serve terms of imprisonment or both for violation of section 8 because of unlawful possession before this decision was rendered, it was necessary to take immediate steps for their relief, and in all these cases the persons have now been released, but there was no authority or money available for the refunding of the fines paid.

This decision renders imperative some legislation to amend and strengthen this law if the best interests of the country and those afflicted by the drug evil are to be protected and justice given those who have heretofore been convicted and paid fines for a violation of the law which the Supreme Court decided had not been committed.

Therefore, it is again recommended that this act be amended or revised to provide:

First. A tax on the drugs with provision for original stamped packages and to limit the dealing in and dispensing of and from such packages to those registered under the law, and to make the absence. of stamp from any package evidence of nonpayment of the tax and violation of the law, except where such packages contain drugs put up upon prescriptions issued for legitimate medical purposes by a registered practitioner, and to make the possession of an original stamped package by any person not registered, prima facie evidence of nonpayment of special tax and violation of the law.

Second. That the limitations as to registration under the act be clearly set forth and restricted to persons lawfully engaged in the sale of or dispensing, administering, or prescribing the drugs covered by the act, and that the writing of prescriptions, keeping records, altering or forging same, be fully covered with adequate provision for punishment of such offenses.

Third. Making all the general provisions of the internal-revenue statutes relating to seizures, forfeiture, etc., applicable to the drugs taxed and the persons upon whom special taxes are imposed under this act.

It is also recommended that Congress appropriate the necessary money for the repayment of those fines imposed by the courts upon persons convicted of unlawful possession under section 8 of the act, and for the purpose of determining the amount necessary, there has been secured and compiled a table showing all the cases coming within
this classification and the amounts so paid in the United States from March 1, 1915, to June 12, 1916, the date the decision was rendered, and this information is available should Congress see fit to adopt this recommendation, which justice seems to demand.

It is further recommended that Congress provide for the treatment by the Government, through some designated medical agency, of the persons addicted to the use of any of the proscribed drugs where such treatment may be rendered necessary and the persons affected desire this aid.

\section*{LABORATORY WORI.}

The comparison of this year's report with that of last year will show that there has been an increase of more than 2,500 samples received and analyzed over that of last year.

A larger number of butter samples have been received and analyzed and found to be adulterated. Distilled spirits show a decrease in the number of samples. A thorough campaign inaugurated against the practice of substituting caused those particular offenders to be more careful and not a great number of substitution cases were made. Most of the samples analyzed under this head were suspected cases of refilling bottled-in-bond bottles. The number of fermented beverage samples and medicinal preparations show an increase. The number of oil samples from the oleomargarine factories continue about the same each year. The oleomargarine samples decreased in number for the reason that no factory was under suspicion and only "moonshine" samples were examined. The narcotic samples show a large increase over last year, as also do the wine samples.

The work in the division of chemistry has steadily increased from year to year, and each year a larger number of cases are carried to court on the chemical analysis of samples and each year more convictions are obtained by expert testimony of our chemists.

\section*{CORPORATION EXCISE AND INCOME TAX.}

The result of the administration of the income-tax law during the fiscal year ended June 30, 1916, as it relates to corporations, jointstock companies or associations, and insurance companies, was highly gratifying, both as to the quantity of tax assessed and collected and the efficiency displayed by the field and office force engaged in this work. As compared with the fiscal year ended June 30, 1915, the increase in the amount of tax assessed was greatly in excess of all estimates.
During the year much attention has been given to a better systemization of the work, both in the field and in the office. Experience has demonstrated, however, that, in order that the work may be kept reasonably current, that returns may be audited in the office and examinations may be made in the field within a reasonable time after the returns have been received, the working force, both in the office and in the field, should be substantially increased.

The revised forms (1030 and 1031) prescribed for the use of corporations in making their returns of annual net income, comprising, as they do, a return proper and a supplemental statement in which is set out in detail.much of the data from which the return is prepared, have proved very helpful to the office, enabling it to make an intelli-
gent audit of the returns and to reach definite conclusions with respect to the amount of tax due in many cases that otherwise would have had to be referred to revenue agents for an examination of the books. The corporations, almost without exception, have fully complied with the requirements of these forms and thus cooperated with the office in reaching correct results without unnecessary delay.

During the fiscal year covered by this report there were received in the Bureau of Internal Revenue 366,443 returns of corporations. Included in this number are approximately 32,000 which related to and should have been received during the year ended June 30, 1915, so that approximately 334,000 were for periods ended subsequent to June 30, 1915, and prior to July 1, 1916, a considerable number of them being filed, as the law permits, for fiscal periods other than the calendar year.

Of the entire number received \((366,443)\) during the year, 190,911 showed an aggregate net income of \(\$ 5,184,442,389\), upon which there was assessed income tax in the aggregate sum of \(\$ 51,844,423.89\); and 175,532 returns showed an operating deficit, or no taxable income, the taxable returns being a little in excess of 52 per cent of the whole number filed, as compared with 58 per cent taxable of the whole number filed during the previous year.

As compared with the last preceding year, these figures show an increase in the whole number of returns received of 66,998 , and an increase of 16,706 in the number of taxable returns. By reason of the large number of returns carried over by collectors from the previous year and which should have been then filed, the most of which showed a deficit or operating loss, the number of nontaxable returns is also 50,292 in excess of those of the same class received during the previous year.

As hereinbefore indicated, the increase in the whole number of returns received during the year is largely accounted for in the fact that collectors sent in during this year thousands of returns which they received and should have sent in during the preceding year, and that for the last year they sent in practically all returns due and received during that period. These figures indicate that there are, almost accurately, 335,000 corporations making annual returns to this bureau.
Taking the whole number of returns received during the fiscal year ended June 30, 1916, and comparing them with the returns received during the last preceding year, a computation shows that there was an increase in the number received of 22 per cent. On a like basis, the number of taxable returns (those showing a net income) filed during the year shows an increase of \(9 \frac{1}{2}\) per cent over the taxable returns received during the previous year, while the nontaxable returns, for reasons hereinbefore stated, show an increase of 40 per cent. If the returns received by collectors during the preceding year and not then forwarded to this office be eliminated from the returns received during the last fiscal year, the increase in the number of returns properly creditable to the year ended June 30, 1916, would be almost negligible.

It may be of interest to note that, for the several years since the special excise tax law became effective (Jan. 1, 1909), the number of returns made by corporations has been as follows:

For the year-

\begin{tabular}{|c|c|}
\hline 1913. & 316, 909 \\
\hline 1914. & . 299,445 \\
\hline 1915. & ............ . 366, 443 \\
\hline
\end{tabular}

The total amount of taxes assessed against corporations, jointstock companies, or associations and insurance companies during the year ended June 30,1916 , was \(\$ 58,547,081.71\). This includes \(\$ 51,844,423.89\) income tax assessed on the basis of the net income shown in the returns as originally filed during the year; also \(\$ 371,155.22\), which represents the 50 per cent additional tax levied against corporations, etc., for failure to file their returns within the prescribed time, offers in compromise submitted by them in lieu of the specific penalty imposed for delinquency, and the 100 per cent added in a very few cases where it was clearly apparent that the returns were made with false and fraudulent intent; also \(\$ 523,108.95\), the amount of income tax assessed on the basis of the office audit; and \(\$ 5,808,393.65\), the amount of special excise and income tax discovered by revenue agents and assessed on the basis of their reports.

The total amount of income tax assessed during the year against corporations on the basis of returns filed during this period was \(\$ 51,844,423.89\). This does not include penalties asserted and taxes assessed on the basis of office adjustments and revenue agents' reports, the most of which relate to other years. Comparing this amount with that assessed on the same basis for the year ended June 30,1915 , viz, \(\$ 36,193,877.86\), an increase of \(\$ 15,650,546.03\) in the amount of income tax assessed is shown. Taking the 1915 figures as a basis, this represents an increase during the last fiscal year of approximately 43 per cent in the aggregate net income of the corporations making taxable returns.

During the year fines, penalties, and compromises were asserted to the amount of \(\$ 371,155.22\), as compared with \(\$ 137,482.73\) for the previous year, an increase of \(\$ 233,672.49\).

On the basis of office audits (confined chiefly to 1914 returns) there was assessed \(\$ 523,108.95\), as compared with \(\$ 300,000\) assessed on a like basis for the previous year, an increase of \(\$ 223,108.95\).

On account of the work done by revenue agents, there was assessed \(\$ 5,808,393.65\) during the year, as compared with \(\$ 2,355,591.69\) assessed on a like basis for the prior year, an increase of \(\$ 3,452,801.96\).

The total amount placed on the assessment list from all sources during the year was \(\$ 58,547,081.71\), as compared with \(\$ 38,986,952.26\) assessed for the fiscal year ended June 30, 1915, an increase of \(\$ 19,560,129.43\), or approximately 50 per cent.

During the year the correspondence with corporations and internal revenue officers has been unusually heavy. The great bulk of this has been of an educational character, having to do with the construction of the law and the application of the regulations to particular conditions. As a result corporations and officers having to do with the administration of the law have become better informed as to the provisions of the law and the regulations, and the administration has been remarkably free from friction. It is gratifying to note that returns filed by corporations during the last year were freer from errors than were those of prior years, and collectors found it necessary to return fewer of them for correction. This may be recorded
\[
62015^{\circ}-\text { FI 1916-42 }
\]
as one of the results of the educational work that has been done by the field force and through correspondence from this office.

Because of the fact that the checking and comparison of the supplemental statements with the returns proper involve numerous calculations, together with close constructions of the law, the auditing of returns in the bureau is necessarily tedious; and, because of a lack of a sufficient force of clerks, this particular work is more than a year in arrears. While all the returns (except a few, delinquents) due to be filed during the fiscal year ended June 30, 1916, have been filed; because of the insufficiency of the clerical force not a single return filed within that period has been audited.

The assessments were made upon the returns as they came to this office from the several collection districts. The audit when made will show, no doubt, as that of the returns of other years has shown, that many of these returns are erroneous in some particular and that, upon correction, much additional tax will be assessed. It is obvious that the audit of the returns should be kept current and that corporations should be advised, with as little delay as possible after the receipt of their returns, of any errors contained in them and of any additional tax to which they are subject by reason of the correction of these errors. It is unfair to both the corporations and the Government that there should be more than a reasonable delay in auditing returns and in finally fixing and assessing the exact amount of tax due. No feature of the administrative work of the bureau as it relates to corporations has been more annoying than has been that growing out of the delay in auditing returns in this office and in making the examination of the books of corporations where this is found necessary. In the case of the examination of books by the field force it has been found advisable and necessary to examine books covering returns made four, five, and six years ago. Otherwise, much omitted tax, as hereinafter shown, would have escaped assessment and collection. The delay in making the audits and examinations oan be remedied only in providing such additional, competent help, both in the field and in the office, as will make and keep the work current.

While the clerical force of the Corporation Tax Division engaged in auditing returns has been numerically insufficient to bring the work up to date, it has nevertheless been efficient and industrious. During the period intervening since the last annual report, this force has been engaged in completing the audit of the returns received during the fiscal year ended June 30, 1914, and in auditing those received for the year ended June 30, 1915, about 20 per cent of which, at this time, remain unaudited. As a result of their work, together with that of the correspondence clerks, and without the aid of any outside force, there were discovered and assessed; in addition to that assessed on the basis of the returns filed, taxes in the aggregate sum of \(\$ 523,108.95\), the great bulk of which but for the efficient audit would have escaped collection.

Since the audit in the office of the returns will result in the discovery and assessment annually of taxes to an amount of not less than \(\$ 500,000\), no argument is needed to show that this division should not be handicapped or embarrassed for want of sufficient additional clerical help to do the work in the most prompt, efficient, and effective manner. With a clerical force numerically insufficient the work
must be delayed or care must be sacrificed for speed, neither of which conditions is desired and both should be provided against. The prompt and efficient auditing of the returns will not only remove a cause for complaint among taxpayers but will add to the tax at the time it should be assessed a sum many times greater than the cost of the additional help desired, and which tax, in the absence of a careful audit, will go undiscovered and unassessed.

While the limited office force has been alert in the discovery of additional tax, the field force (revenue agents, inspectors, and deputy collectors) has been active and productive of gratifying results. This force, increased to some extent in numbers, has, as a result of their experience, greatly advanced in efficiency and effectiveness. As a result of the work done by this force, viz, the examination of the books of corporations for the verification of their returns and the discovery of taxpayers who had not made returns, there was assessed against corporations during the year ended June 30 , 1916, \(\$ 5,808,393.65\); that is to say, this amount was discovered and assessed during the year in addition to the amount assessed in the ordinary course on the basis of returns, the great bulk of which, but for the examinations made, would have escaped assessment.

In the discovery of this additional and previously omitted tax, the officers examined the books of 17,300 corporations, covering their returns for the several years as follows:
\begin{tabular}{|c|c|}
\hline For the year- & \\
\hline 1909. & 9,726 \\
\hline 1910. & 11, 083 \\
\hline 1911. & 11, 962 \\
\hline 1912. & 13, 009 \\
\hline
\end{tabular}
\begin{tabular}{|c|c|}
\hline \multicolumn{2}{|l|}{For the year-} \\
\hline 1913. & 14, 254 \\
\hline 1914. & 14, 563 \\
\hline 1915. & 2,872 \\
\hline 1916. & 15 \\
\hline
\end{tabular}

Preliminary to an examination, card synopses of the returns for the several years, for which examinations are desired, are prepared in this office and then sent to the revenue agents in charge, with instructions,-in some instances, when the officer deems it advisable, to extend the examination to cover the returns for years for which cards are not sent. For the reason that the audit has not been made of the 1915-1916 returns, cards for this year are rarely sent. This accounts for the comparatively few 1915-1916 examinations that have been made.

During the year there were prepared and sent to revenue agents card synopses of returns in the aggregate number of 93,067 . These were distributed among the several years as follows:
\begin{tabular}{|c|c|c|c|}
\hline For- & & For- & \\
\hline 1909 & 11, 155 & 1913 & 17,604 \\
\hline 1910 & 11, 125 & 1914 & 22,798 \\
\hline 1911 & 12, 081 & 1915 & 3,714 \\
\hline 1912 & 14, 575 & 1916 & 15 \\
\hline
\end{tabular}

At the close of the year there remained in the hands of the agents 60,195 cards, representing 15,914 corporations whose books had not then been examined.
The records of this office show that after all the returns filed for any given year have been carefully audited, there remains approximately 15 per cent of the entire number which, in the opinion of the auditors, cannot be satisfactorily adjusted here and should be referred, by synopsis cards, to the revenue agents for examination and investigation. On this basis there remained at June 30, 1916 (not including
the 1915-16 returns), 37,234 corporations to be examined. Experience has demonstrated that for every 1914 return, subjected to examination, there must, on an average, be sent synopsis cards for the returns for three prior years. This means that, to complete the examination covering all the rejected returns for 1914 and prior years, 148,936 returns, for such years, remained at the end of the fiscal year to be verified by an examination of the books. To this number there should be added approximately 53,000 returns for 1915-16, making a grand total of 201,936 to be covered by a revenue agent's examination.

Assuming that an officer will examine one return per day (and this is about the average, as the record of work done shows), it will take one officer 201,936 days to complete the examinations covering corporate returns now on file in this office. Assuming that one officer will examine 300 returns per year, it will require 673 men, working steadily on corporations alone, to complete, within the next year, the work now in hand; or, if the present field force ( 274 men ) were employed exclusively and steadily on corporation work, it would take them two years and six months to make all the examinations contemplated to be made for the year 1915 and previous years, to say nothing of the individual returns rejected for examination or of the corporate returns which, in the meantime, will be filed, at least 15 per cent of which, in accordance with past experience, will be rejected for examination by the field force.

This clearly demonstrates the necessity for a substantial increase in the force of field examiners, and the amount of tax hereinbefore indicated as having been assessed during the last year on the basis of revenue agents' reports is a convincing argument that a field force sufficient to make and keep the examinations reasonably current should be provided. Fifteen per cent of all the returns filed represents the minimum that should be referred to revenue agents for examination and comparison with the books. This minimum is made up of those corporations which show the largest amount of gross income. Were the field force sufficient to warrant it, it is confidently believed that the examination of the books might be extended to many of the smaller corporations, with profit not only in the amount, of additional tax discovered, but in the information communicated to the corporations.

As hereinbefore indicated, the examinations that have been made by the field force covered returns made under the special excise corporation-tax law (sec. 38, act of Aug. 5, 1909), operative from January 1, 1909, to March 1, 1913, as well as those made under the income-tax law (sec. 2, act of Oct. 3, 1913).

On the basis of these examinations there was assessed during the year special excise tax, covering the years 1909 to 1912, in the sum of \(\$ 2,746,089.24\), and income tax in the sum of \(\$ 3,062,304.41\), an aggregate of \(\$ 5,808,393.65\). The revenue agents, as a result of their examinations, recommended the assessment of sums considerably in excess of these amounts. In some instances their recommendations were not approved by this office; in other instances the assessments could not be made because the statutory limitation (three years from the date when the returns were due) had expired, and in other cases the reports, involving considerable sums, had not been audited by this office when the year ended, or were held pending the receipt of further information. In all cases where the assessment of the additional tax
discovered is barred by statutory limitation and where it is believed to be actually due and collectible, the matter of its collection by suit has been referred to United States district attorneys. It is believed that when the revenue agents' reports pending at the close of the year shall have been finally adjusted a further additional tax of approximately a million dollars will have been assessed.

The aggregate amount ( \(\$ 5,808,393.65\) ) assessed during the year on the basis of revenue agents' reports includes omitted special excise tax discovered during the year, the same applying to and being distributed over the years the excise-tax law was in force, as follows:

and omitted income tax discovered and distributed among the several years as follows:

For the year-
\begin{tabular}{|c|c|}
\hline the year- & \\
\hline 1913 & \$1, 701, 580. 19 \\
\hline 1914. & 1, 200, 785.77 \\
\hline
\end{tabular}

For the year-
1915
\(\$ 157,235.95\)
The smaller amount of tax discovered and assessed for each of the earlier years is due to the fact that the books of many of the larger corporations covering their returns for those years had been previously examined and the omitted taxes, if any, had been accounted for in the year in which the examinations were made. The comparatively small amount of tax assessed for 1915-16 on the basis of revenue agents' reports is due almost wholly to the fact that at the end of the fiscal year (June 30, 1916) but few examinations had been made covering the 1915-16 returns.
It is estimated that the taxable net income of corporations for the fiscal year 1917 will be súbstantially in excess of that for the year 1916. This, together with the fact that the act of September 8, 1916, increases the rate of taxation from 1 per cent to 2 per cent of the net income, warrants the conclusion that the amount of tax to be assessed against corporations during the fiscal year ending June 30, 1917, will not be less than \(\$ 125,000,000\), and will most likely exceed that amount.

The assessments made during the months of July, August, September, and October, 1916, are substantially in excess of the assessments made during the same months of 1915, as is indicated below:
\begin{tabular}{|c|c|c|c|}
\hline & Assessed in- & 1915 & 1916 \\
\hline July. & & \$1, 138, 119.01 & \$935, 345.96 \\
\hline August. & & 604,773.98 & \(1,018,729.15\) \\
\hline September. & & 1, 299, 223.52 & 2,453, 413. 77 \\
\hline October. & & 1, 468,701. 09 & 1 4, 677, 731.16 \\
\hline Total & & 4,511, 217.60 & 9, 085, 220.04 \\
\hline
\end{tabular}
\({ }^{1}\) This includes additional 1 per cent tax on incomes earned since Jan. 1, 1916, by corporations whose returns were made on the basis of a fiscal year ended since that date.

During the fiscal year ended June 30, 1916, there was collected from corporations special excise and income tax in the aggregate sum of \(\$ 56,972,720.88\) as against an aggregate assessment during this period of \(\$ 58,547,081.71\). During the year ended June 30, 1915, there was collected from the same source, \(\$ 39,144,531.71\).

Since June 30, 1916, during the months of July, August, and Sep tember, there has been collected on account of special excise and in-
come tax assessed against corporations for previous years the sum of \(\$ 5,939,224.69\), which includes unpaid taxes assessed during the preceding year and which were due and payable on or before June 30, 1916. This amount will be reported in the collections for the current fiscal year (1917).

The Government has been forced in several instances to institute suit in the United States district courts to collect additional tax -which, under the rules of this office, is legally due, but which could not be assessed and collected in the usual manner because the period within which assessment could be made had elapsed before the additional tax liability was discovered. These suits chiefly involve lumber and mining corporations, and are designed to test, to a final judicial determination, certain rulings of this office to the effect that the stumpage and depletion deductions should not exceed the cost of the assets extinguished or depleted. So far as this question has been passed upon by the lower courts, they have sustained the position of the corporations, viz, that they have the right to exclude from their taxable income on account of stumpage or depletion an amount equivalent to the market value, as of January 1, 1909, of the assets depleted.

There were 15 districts in each of which the amount of corporationincome tax assessed during the year was in excess of \(\$ 1,000,000\), as follows:

The assessments in the same districts for the preceding year were as follows:
\begin{tabular}{|c|c|}
\hline Second New York. & \$6, 342, 964. 89 \\
\hline First Illinois. & 3, 222, 951. 30 \\
\hline First Pennsylvania & 2,149, 888.49 \\
\hline Twenty-third Pennsylvania & 1, 806,068. 80 \\
\hline Third Massachusetts & 1,674,496. 16 \\
\hline Third New York & 1, 587, 441. 64 \\
\hline Minnesota. & 1, 199, 714.78 \\
\hline Eighteenth Ohio: & 1, 095, 438. 13 \\
\hline First Michigan & 1, 023, 096. 26 \\
\hline Maryland. & 616, 311. 23 \\
\hline Connecticut. & 819, 245. 46 \\
\hline First California & 1,178,998. 51 \\
\hline Fifth New Jersey & 1, 049, 928. 97 \\
\hline Twenty-eighth New York & 639, 347. 22 \\
\hline First Missouri. & 705, 345. 05 \\
\hline
\end{tabular}

In eighteen States and Territories there was an increase in the amount of tax assessed against corporations for the fiscal year ended June 30, 1916, as compared with that assessed for the fiscal year ended June 30, 1915; in excess of 50 per cent. These States and Territories, with the percentage of increase, are as follows:
\begin{tabular}{|c|c|c|c|}
\hline State & Per cent increase. & State. & Percent increase. \\
\hline Delaware. & 832.6 & Colorado. & 76.9 \\
\hline Alaska.. & 354.6 & Hawaii. & 71.6 \\
\hline Kansas. & 180.6 & Rhode Island. & 67.0 \\
\hline Arizona. & 137.7 & Michigan... & 63.4 \\
\hline New Mexico. & 112.8 & Ohio...... & 63.1 \\
\hline South Carolina. & 100.0 & Oklahoma. & 61.7 \\
\hline Connecticut. & 95.6. & Massachusetts. & 61.1 \\
\hline Montana. & 89.2 & Minnesota. & 54.0 \\
\hline Utah.. & 82.2 & New York. & 52.3 \\
\hline
\end{tabular}

In the statistical section of this report will be found a comparative statement of income tax assessed during the fiscal year ended June 30, 1915, and June 30, 1916, together with tabulated statements showing number of returns filed, tax assessed, etc., by collection districts and by States and Territories.

\section*{PERSONAL INCOME TAX.}

The work in connection with the personal income tax has progressed favorably during the past year and, in conjunction with the prevailing prosperity of the country, the increased efficiency of field and office forces has resulted in income-tax collections from individuals of \(\$ 67,943,594.63\) for the fiscal year ended June 30, 1916, as against \(\$ 41,046,162.09\) for the fiscal year 1915 and \(\$ 28,253,534.85\) for the fiscal year 1914.

There were 336,652 individual returns filed in person or by personal agents for the tax year 1915, of which number 940 were filed by American citizens residing abroad, showing an aggregate net income of \(\$ 14,518,634.30\). . The reduction in the latter figures by comparison with the previous year, when 1,291 returns were filed by American citizens residing abroad, representing a total net income of \(\$ 16,570,-\) 603.32 , is due, of course, to the changed conditions that have arisen from the European war. -
Notwithstanding the conditions abroad, however, 669 nonresident aliens filed returns that showed an aggregate net income from American sources of \(\$ 10,887,493.70\).

Thirty-four thousand one hundred and thirty-two returns were received from withholding agents, by means of which a total normal tax of \(\$ 6,591,911.76\) was collected at the source.

The normal tax was withheld at the source from the incomes of approximately 38,000 individuals who were not required under the income tax law of October 3, 1913, to render returns in their own behalf. The total number of returns filed by and in behalf of individuals was 374,652 for the tax year 1915 as against 357,515 for the tax year 1914.

The total collections of individual tax for the fiscal year ended June 30, 1916, are given here in the classifications that conform to the provisions of the act of October 3, 1913, with a comparison of the collections for the fiscal year 1915.
\begin{tabular}{rl|l|l|l|l}
\hline
\end{tabular}

The necessity for a careful audit of all returns rendered by individuals and withholding agents, and for field investigation in a large number of cases, continues to be an important task for the activities of the office and field forces. The year's results have again demonstrated the inadequacy, in point of numbers, of the force of revenue agents and inspectors allotted by law to the needs of the service; and an analysis of the task involved in a conscientious discharge of the administrative duty of securing, verifying, and correcting individual returns of income with the means heretofore provided, impels the conclusion that all physical efforts need to be supplemented by some well-devised system of procedure.

As a result of the office audit alone, further assessments of tax aggregating \(\$ 484,624.52\) have been made during the fiscal year without the intervention of revenue agents.

Transcripts of 35,097 returns have been sent to internal-revenue agents in the field for investigation and report along such lines as may have been indicated by an office examination of the returns as rendered. This field work resulted in further tax collections of \(\$ 2,881,285.78\) from 14,406 cases completed during the fiscal year; and on June 30, 1916, there were 28,332 transcripts of cases in the field for similar investigation. As an evidence of increased efficiency, a comparison may be made with the further collections of \(\$ 1,329,104.02\) as a result of similar field examinations for the previous fiscal year.

Acknowledgment is made of this response of the field service to the earnest efforts of administrative officers to increase the efficiency of that branch, but it is desired to draw attention again to the inadequacy of the provisions made by law for the size of the force in comparison to the territory covered, and to the lack of any real guidance and aid to its efforts from legally authorized sources of information. It is to be recalled that, while the numerical strength of the force has been somewhat increased by recent legislation, the results that have been obtained for the fiscal year 1916 were reached through the efforts of the same number of men, practically, as were engaged in the field work of the previous year. It has been elsewhere pointed out that a force of 274 men, which was about the number employed, required each one to investigate 2,397 returns upon a basis of the number of returns rendered for the previous tax year; and that, accepting the population of the United States as about \(100,000,000\), the population
assigned to each income-tax field officer was 364,963 . It would be idle to assert that the revenues of the Government could be fully protected by a system based on these figures unless they could be accepted as the evidence of superhuman zeal and activity.

An analysis of the situation has shown that further tax was due the Government in 63 per cent of the number of returns designated for investigation, and that an average of \(\$ 200\) resulted from each examination. Coincident with the examination of returns in hand there has been pursued a diligent search for delinquents, and investigations of this character have resulted in securing returns in 52 per cent of the cases initiated, with an average yield of \(\$ 30\) tax.

The comparatively small amount of tax collected as a result of examinations of returns and investigations of supposed delinquency reveals the urgent necessity for some concerted plan of endeavor in this field if the highest results are to be obtained in the collection of individual income taxes. The office has sought heretofore to emphasize its need for means of obtaining information at sources of income and for legislative authority to require returns on a basis of gross income instead of net income; or, failing this, for an adequate field force to make reasonably effective the method which is now employed and which, from the circumstances of the case, is the only available one at hand.
The problem of income-tax collections resolves itself into a matter of locating the individuals who have taxable incomes and of ascertaining the taxable amounts; and it is of more than ordinary interest to observe that the actual experience of the Government in the collectión of internal taxes and customs duties has demonstrated the necessity of securing information that will enable it to determine for itself whether or not a taxpayer's declaration is true, and by this means to assert and collect the full amount of tax where evasion has been attempted.

It is of equal interest to observe that the laws and regulations for the collection of customs duties and internal taxes have uniformly made provision by which the Government may secure the fullest information and that the income-tax law alone has failed to provide this necessary aid to a proper collection of the revenues.

Under the provisions of both Federal income-tax acts certain information is secured in connection with normal tax withheld at sources of income, butits inadequacy as a method of securing information of complete value is shown by the relative collections of \$6;591,911.76 normal tax obtained from sources of income and \(\$ 67,943,594.63\) obtained from all sources.' The term. "withholding at the source" conveys the idea in a general way that before an individual receives his income the normal tax of 1 per cent is deducted and withheld, but this is true to such a limited degree under the prevailing provisions of law that it is valuable neither as a means of complete collection nor as a method of disclosing adequate information to Government officers. In the nature of things a taxpayer's normal tax liability is satisfied in part, only, at the source; and the records of the bureau show that for the three years during which an income-tax law has been enforced less than 10 per cent of the whole amount of tax was collected at the source.
So far as its facilities have permitted, the bureau has conducted certain experiments for the purpose of comparing collections in dis-
tricts where circumstances have placed a greater degree of information at its disposal with collections in neighboring districts where no such information was available. An experiment of this nature is being conducted in one internal revenue district with the objéct of securing delinquent returns, and at the present time about 75 per cent of the work is completed. The record at this point shows that 691 delinquent returns have been secured upon which taxes amounting to \(\$ 14,717.16\) have been assessed. In the State in which this district is located there are two other revenue districts which show a decrease in the amount of tax collected in 1915 as compared with 1914, one to the extent of \(\$ 2,100\), approximately, and the other to that of \(\$ 16,000\) in round numbers; but in the district where the special information came into the hands of the Government and a thorough canvass for delinquents was made on the facts disclosed, there was an increase, as between the years 1915 and 1914, of over \(\$ 40,000\). The conclusion is inevitable that this increase was due to the knowledge that the Government officers were in possession of information that made evasion a dangerous risk, although a certain degree of credit may be due to the educational advantages, in the way of the dissemination of a knowledge of the law's requirements, that is involved in any painstaking canvass of a given territory. In whatever way the credit may be divided it remains a fact that productive results were obtained by the canvass based on secured information, both by direct application to specified delinquents and the influence on the minds of taxpayers that a knowledge of the certainty of Government supervision produces.

The bureau has heretofore recommended a shifting of the requirements of individual returns on a basis of net income to that of gross income; and attention is again called to the fact that this difference in the basis of returns has been provocative of many administrative difficulties, much dissatisfaction on the part of taxpayers, and in some cases has lessened the authority of collectors of internal revenue to require returns of income in the absence of absolute and accurate information as to the net incomes of individuals, thus placing upon collectors the entire burden of proof. On the present basis of net income, notwithstanding the measure of relief that has been given by the last Congress, there exists the anomalous condition that taxpayers are allowed in some degree to pass upon their own liability for tax under their own interpretations of the provisions of law; and to check errors and evasions becomes a large and important part of administration, with many opportunities and loopholes by which tax liability may be escaped eventually. It has been demonstrated that justice to honestly intentioned taxpayers, on one hand, and to the interests of the Government, on the other, requires that persons made liable for returns should be able to base their computations upon some simple and readily understood requirement, easy of check and revision.

If the basis of returns should be changed to one of gross income, less opportunity would be afforded for either error in computation or evasion of tax liability, and collections could be made more effective, as it would be easier to locate individuals with gross incomes of a designated sum, allowing them to set up the deductions to which they believed themselves entitled, subject to review by the Government. No argument is needed to make plain that such a change
would greatly aid collectors and agents in their search for delinquents and that those officers could act with greater certainty in requiring returns where they have reason to believe them due but where none has been rendered.

A feature of revenue investigations that is obnoxious to taxpayers and presents many disadvantages to Government administration is found in the delay that occurs under present conditions before a taxpayer's return can be finally examined and audited. Notwithstanding the provision that has been made for some increase in the internal revenue force, it is not sufficient to keep the large volume of. work current. While it is impracticable to provide the number of officers that would be necessary to a complete supervision, as to income-tax liability, of the whole population of the country, it is requisite nevertheless that the force should be further increased. This will at least enable investigations to be conducted with somewhat greater economy to the Government and with far more convenience to the taxpayer, because less time will elapse between the dates of return and inquiry, the facts will still be fresh in the taxpayer's mind, and records pertinent to the tax period will be more readily available.

With all due credit for the zeal and efficiency of effort on the part of officers and employees of the service; it is apparent that a maximum of productive results has not been obtained by present methods. With the expenditure of the utmost efforts of the bureau to guide the field work by means of general instructions to the revenue agents in charge of the 31 divisions, as now constituted, and to supply them with transcripts of individual returns that give indication of a further tax legally due the Government and with such information as may be drawn from the application of the present withholding provisions of the law, there is clearly a waste of effort on unproductive cases, undertaken with no other incentive than chance or speculation, which can be remedied only by an authority of law that will place in the hands of administrators the complete and certain information that will form a guide to systematic action.

It is recapitulated as axiomatic that the Government can not rely ontirely upon a taxpayer's declaration as to his own tax liability; that the laws and regulations for the collection of customs duties and internal taxes have uniformly made provision by which the Government may secure the fullest information; that the income-tax law alone has failed to provide this necessary aid to a proper collection of the Government's revenues; that "withholding at the source" js valuable chiefly for the information it supplies; that for the successful enforcement of the income-tax law it is essential that further provision be made for locating the individuals who have taxable incomes and for ascertaining the taxable amounts; that a shifting of the requirements of individual returns from a basis of net income to that of gross income would be of material aid to administrators; that it is not practicable to rely wholly upon the income-tax field force to secure information that will disclose complete tax liability; but that in the absence of an extended authority for securing information and requiring returns of gross income it is essential to a completely satisfactory collection of income tax under existing methods that adequate facilities be granted by a further increase of the field. personnel.

At the beginning of the fiscal year ended June 30, 1916, there were pending 6,199 claims of all kinds, amounting to \(\$ 4,325,653.51\).

There were received during the year 46,197 claims of all kinds, amounting to \(\$ 10,400,043.52\).

During the year 42,304 claims were disposed of, amounting to \(\$ 10,146,422.71\), leaving on hand July 1, 1916, 10,092 claims of all kinds, amounting to \(\$ 4,579,274.32\).

During the year 1915 the number of claims disposed of was 34,817, which was then the highest ever attained. The past year shows an increase of over 20 per cent above that, with the prospect of a very great increase for the coming year on account of the repeal of the provisions of the act of October 22, 1914, requiring the use of documentary and proprietary stamps. The stamps in the hands of purchasers must be redeemed, and many claims will be filed.

There are a considerable number of claims pending for the refund of individual income tax collected from withholding agents, which claims are in most cases allowable.

Action upon a large part of the claims pending at the end of the year is delayed on account of pending action in the courts.

\section*{LITIGATION AND LEGISLATION.}

LITIGATION.
On July 1, 1915, there were pending 590 civil cases and 2,917 criminal cases growing out of violations of the internal-revenue laws. During the year there were instituted 302 civil cases and 5,676 criminal cases. Three hundred and ninety-six civil cases and 5,575 criminal cases were disposed of during the year, and the number of civil cases pending June 30, 1916, was 496, and of criminal cases 3,018 , as shown by reports received from the Department of Justice.

In addition to the court cases handled, a large number of reports of violations of law from officers in the field were received and examined, and during the fiscal year 36,829 compromise offers, growing out of such violations in this or previous years, were received, as against 19,752 in the fiscal year 1915.

The total number of reports of seizures received, examined, and recorded during the fiscal year was 4,607 , as compared with 4,911 during the year previous.

\section*{COURT DECISIONS.}

There have been a number of cases decided involving questions under the internal-revenue law, among which are the following:

DEGISIONS UNDER THE CORPORATION TAX ACT OF AUGUST 5, 1909.

\footnotetext{
Grand Rapids \& Indiana Railway Co. v. Doyle, collector, United States District Court, westerm district of Michigan (T. D. 2210):

In making return of income of the corporation deductions for expenditures for additions and betterments to the property, such as expenditures for sidings or spur tracks, are not authorized.

The payment for labor and materials which go into the actual operating of the road and the property are deductible.
}

Maintenance means the upkeep or preserving of the condition of the property to be operated and does not mean additions to the equipment, additions to the property, or improvements of former condition of the road.

\section*{DEPLETION OF COAL.}

United States \(v\). Biwabik Mining Co., United States District Court, northern district of Ohio:

The right of corporation to deductions on account of exhaustion of ore deposits owned by lessor and depletion of coal. The right of corporation "lessee." to deductions on account of depreciation of ore deposits owned by lessor. Judgment was for United States. Case taken to the United States Circuit Court of Appeals.

DOING BUSINESS.
Laurentide Co. v. Durey, collector ( 231 Fed. Rep. 223; T. D. 2346), northern district of New York, March 13, 1916:

A Canadian company held to have engaged in business in the United States rendering its net income liable to taxation.

BURDEN OF PROOF.
Camp Bird (Ltd.) v. Howbert, collector, United States District Court, district of Colorado (T. D. 2366):

Burden of proof under section 3225, Revised Statutes. The return made by the plaintiff having understated the amount for which it was subject to taxation, although made in good faith and without any intention to escape lawful tax, plaintiff can not recover in view of section 3225, Revised Statutes.

This case is pending in the circuit court of appeals.
SUIT FOR TAXES.
United States \(v\). Minneapolis Threshing Machine Co., United States District Court, district of Minnesota:

Judgment for United States for \(\$ 746.66\).
Indebitatus assumpsit will lie for taxes although no assessment can be made on account of the three years' limitation.

No limitation binding upon the United States in bringing an action like the one at bar (229 Fed Rep. 1019; T. D. 2285).

DECISIONS RELATIVE TO LEASED CORPORATIONS.
There have been a number of cases decided involving questions left undecided in the Minehill case in the Supreme Court. Decisions have generally' been against the con-' tention of the Government following the decision of the circuit court of appeals in the case of Anderson, collector, v. Morris \& Essex R. R. Co., and Delaware, Lackawanna \& Western R. R. Co., reported in 216 Fed. Rep., 83.

The true test of distinction to determine whether a corporation organized for a business purpose is engaged in business within the meaning of the corporation tax act is whether it is continuing the body and substance of the business for which it was organized, or whether it has retired from it and turned it over to another.-(Traction Companies \(v\). Collectors of Int. Rev. (6 cases) 223 Fed. Rep. 984.)

A corporation to be subject to the tax must be organized for the purpose of doing business and must be actually engaged in business.-(Emery-Bird-Thayer Reaity Co. v. Uniied States, 198 Fed. Rep. 242, affirmed in Supreme Court (T. D. 2188).)

AGENCY QUESTION.
On the question whether the lease created the lessee the agent of the lessor, in carrying on the business, decisions have been generally against the contention of the Government.

\section*{MINEHILL DECISION.}

The Court of Claims rendered a decision in the case of Rio Grande Junction Railway Co. v. United States, May 29, 1916.

The Minehill decision in the Supreme Court (228 U. S., 295; T. D. 1847), does not apply where a corporation is organized for the ostensible purpose of building and operating a railroad and leases the road before it is built.

If a corporation is doing business for which it was organized, the income derived from such business is taxable under the act of August 5, 1909:

If the purpose for which the corporation was organized was to build and lease property, the rents derived from such lease are taxable, even though thereby the corporation leases all the property and of necessity goes out of all corporate business excepting the collection and distribution of its rents.

OPERATING AGREEMENT.
McCoach, collector, \(v\). Continental Passenger Railway Co. of Philadelphia, Circuit Court of Appeals, third circuit, 233 Fed. Rep. 976:
"Doing business."-An operating agreement by which a street railroad company surrenders its own and leased lines to the possession of another company for operation for a term of 999 years, in consideration of annual rentals and the payment of interest on its indebtedness and that of its lessors, does not differ in legal effect from a lease, and the lessor is not subject to the excise tax imposed by the corporation-tax law.

\section*{emergency revenue act of october 22, 1914.}

The Real Estate Title Insurance \& Trust Co. v. Lederer, collector, United States District Court, eastern district of Peninsylvania:
The special tax on bankers is constitutional. The words "capital used or employed" necessarily limits the tax to a special license or excise tax.

STAMP TAX ON DEEDS.
The law requiring stamps on referee's deed sustained.-Home Title Insurance Co. v. Keith, collector, United States District Court, eastern district of New York, 230 Fed. Rep. 905 (T. D. 2310).

Stamps required on master's deed.-Crawford, as trustee, v. New South Farm \& Home Co., United States District Court, southern district of Florida.

\section*{POWERS OF ATTORNEY.}

Powers of attorney in bankruptcy proceedings were required to be stamped.-In re Capitol Trading Co., United States District Court, northern district of New York, 229 Fed. Rep. 806.

\section*{MUTUAL FIRE INSURANCE COMPANIES.}

Suits are pending in the northern district of Ohio against the collector of the tenth district, for recovery of stamp tax on policies of insurance. These are test cases involving the construction of the following provision of the act of October 22, 1914:
"Provided, That purely cooperative or mutual fire insurance companies or associations carried on by the members thereof solely for the protection of their own property and not for profit shall be exempted from the tax herein provided."

INCOME-TAX ACT OF OCTOBER 3, 1913.
The income-tax act of October 3, 1913, was held to be constitutional by the Supreme Court in the case of Brushaber v. Union Pacific Railroad Co., appealed from the District Court of the United States for the southern district of New. York, January 24, 1916 (T. D. 2290). The court held that the authority conferred upon Congress by section 8 of article 1 "to lay and collect taxes, duties, imposts, and excises" is exhaustive and embraces every conceivable power of taxation.

\section*{DEPRECIATION.}

The physical loss or deterioration a building suffers during the tax year depends on the life of the building; how many years it would remain so as to be habitable for the general purposes for which it was constructed. No allowance can be made for depreciation by reason of decrease in rental value nor in value arising from lack of modern improvements.-Cohen \(v\). Lowe, collector, United States District Court, southern district of New York (T. D. 2343).

United States \(v\). Jim Fuey Moy:
Indictment under section 8 of the act of December 17, 1914. It is assumed that the statute has a moral end, as well as revenue, in view, but it reaches this ead within the limits of a revenue measure. The words "any person not registered" in section 8 must be taken to refer to the persons who are required to register. Decision of the United States Supreme Court, June 5, 1916 (T. D. 2340).

\section*{IN.IUNCTION.}

In the case of Nathan Tucker, M. D., and William B. Robinson, M. D., v. Williamson, collector, plaintiffs sought to enjoin the collector from seizing their plant for violation of the act of December 17, 1914, in connection with the dispensing of cocaine without actual diagnosis or personal attendance upon patient, the plaintiffs receiving orders by mail and sending their preparation, containing cocaine, by express.
Plaintiffs also sought to enjoin the collector, through a civil action, to estop criminal proceedings against them for violation of the act. The judge's opinion construes the act, particularly defining the right of the Government to prescribe limitations on professional men registered thereunder:
Motion to dismiss temporary injunction sustained (T. D. 2272).

\section*{UNITED STATES COTTON FUTURES ACT.}

A decision was handed down by Judge Hough of the eastern district of New York, October 13, 1915; holding that the cotton futures act of August 18, 1914, was unconstitutional, as the bill originated in the Senate (Hubbard \(v\). Lowe). The case was appealed to the Supreme Court and afterwards dismissed. In the meantime the law was reenacted by the act of August 11, 1916, an act making appropriations for the Department of Agriculture for the.fiscal year ending June 30, 1917 (T. D. 2358).

LEGISLATION.
Legislation was enacted during the last session of Congress affecting internal revenue as follows:

Act of May 10, 1916 (legislative appropriation act, 1917).
Act of June 22, 1916 (loss of alcohol in transit).
Act of July 8, 1.916 (alcohol withdrawn by institutions).
Act of August 11, 1916 (cotton futures act).
Act of August 23, 1916 (liens of judgments).
Act of September 7, 1916 (peddlers of tobacco).
Act of September 8, 1916 (deficiency appropriation act, 1916).
Act of September 8, 1916 (new revenue act; emergency revenue act repealed).

\section*{NEW REVENUE ACT.}

The following changes in the law were made by the "Act to increase the revenue and for other purposes," approved September 8, 1916, effective September 9, 1916. It repeals the emergency revenue act of October 22, 1914, and joint resolution of December 17, 1915, except sections 3 and 4 (special taxes), which remain in force until January 1, 1917. It amends the income-tax law by doubling the normal tax and making reclassification of rates for additional tax, and modifying some of the minor and administrative measures without disturbing the fundamental features of the previous law.

It levies an estate tax, or tax on the transfer of net estates of persons dying after September 8, 1916, and a munition-manufacturer's tax.

Certain of the special taxes provided in the emergency revenue act of October 22, 1914, are reenacted. A special excise tax is imposed on corporations for doing business.
\[
62015^{\circ}-\mathrm{FI} 1916-43
\]

On and after January 1, 1917, dealers in leaf tobacco and dealers in tobacco are relieved from special taxes.

New rates are imposed upon manufacturers of tobacco, cigars, and cigarettes.

Changes are made in the wine taxes.

\section*{STAMPS.}

During the fiscal year \(5,546,104,956\) internal-revenue stamps of all classes and denominations were shipped to collectors of internal revenue. Of this number \(5,534,865,646\) represented a face value of \(\$ 407,581,352.91 \frac{1}{3}\). There was an increase of \(116,015,875\) in the number of all stamps, and an increase of \(\$ 4,062,854.06 \frac{1}{3}\) in the face value of stamps delivered to collectors during the year over the previous year. Stamps having no money value were delivered to the number of \(11,239,310\). These include stamps for rectified spirits, wholesale liquor dealers' packages, distillery warehouse stamps, etc.

PRODUCTION OF STAMPS.
All of the stamps issued by the bureau are engraved and printed by the Bureau of Engraving and Printing, with the exception of tobacco stamps imprinted on tinfoil wrappers, which are printed under contracts without cost to the Government, the contractors receiving their remuneration from the purchasers of the stamps and reimbursing the Government for the salaries of agents and counters necessary to properly supervise the work.

\section*{RESTAMPING.}

One hundred and forty-four applications for restamping tax-paid articles, under section 3315, Revised Statutes, were considered and disposed of during the year.

\section*{STAMPS RETURNED.}

Stamps and coupons of various kinds and denominations, fractional books from outgoing officials, and stamps (principally for special taxes) for which there was no use, to the value of \(\$ 28,868\),\(144.43 \frac{3}{8}\), were returned by collectors and credited in their accounts.

CERTIFICATES IN LIEU OF LOST STAMPS.
During the year 4,057 losses were reported of special-tax stamps, and certificates were issued in lieu thereof.

SHEET STAMPS FOR UNCOLORED OLEOMARGARINE AND FOR PROCESS BUTTER.
The preference shown by manufacturers for sheet stamps for uncolored oleomargarine, denominations of 10, 30, and 60 pounds, encourages the extension of sheet stamps, to replace the coupon stamps, in other denominations of uncolored oleomargarine, and to further extend it to process butter. A design for the 30 -pound sheet stamps for process butter has been approved.

The work performed during last fiscal year by revenue agents and the force employed under their direction was very efficient. These officers worked early and late in the performance of their duties incident to enforcing the internal-revenue laws and much credit is given them by this office for their hearty cooperation, zeal, and loyalty.
There has been a slight decrease in the number of illicit distilleries seized during fiscal year 1916 as compared with the number seized during the preceding fiscal year. No abatement, however, appears in the illegal sale of liquors by "bootleggers," and none may be expected unless the bureau shall receive more hearty cooperation on the part of local officers in the various States and localities, where prohibition laws exist.

During the last three years gigantic frauds against the revenue and evasions or omissions of tax have been uncovered, and evaded taxes approximating \(\$ 50,000,000\) have been discovered. Of this amount \(\$ 22,509,576.47\) was assessed, representing approximately \(\$ 2,700,000\) more than was expended during the three years for the operation of the Internal-Revenue Service. The unpaid taxes reported for assessment and collection were distributed as follows:
\begin{tabular}{|c|c|}
\hline Corporation taxes. & \$11, 326, 125. 82 \\
\hline Individual income taxes. & 5, 006, 696. 92 \\
\hline Offers in compromise. & 984, 791.41 \\
\hline Distilled spirits, tobacco, and miscellaneous taxes. & 4, 241, 555. 45 \\
\hline Collections on account of oleomargarine frauds & 950, 406.87. \\
\hline Total.. & . \(22,509,576.47\) \\
\hline
\end{tabular}

One extensive whisky conspiracy operating for many years in more than a dozen States was discovered and 11 conspirators have been convicted and are serving prison sentences.

In one oleomargarine conspiracy 34 offenders in a single city were convicted or plead guilty and sentenced to terms of imprisonment and to pay fines aggregating \(\$ 138,000\).

One investigation of tobacco frauds, extending over three States, resulted in the seizure of 236 factories of the offenders:

\section*{RECOMMENDATIONS.}

The following recommendations are submitted, viz:
1. Tobacco.-In previous reports attention was called to the weakness of the statutes relating to the business of dealers in leaf tobacco. The recommendation heretofore made is again renewed-that section 3360 of the Revised Statutes should be amended so as to require every dealer in leaf tobacco to give a bond, the penalty of which should be fixed by the collector according to the quantum of business to be done, to make a true inventory of stock on hand on January 1 of each year, and to render monthly report of his transactions to the collector for the district, within 10 days after the close of the month. The commissioner should be given authority to make assessments for tax on tobacco not properly accounted for by leaf dealers. It
is also recommended again that section 26 of the act of October 1, 1890, be amended so as to require registry of manufacturers of cigars, manufacturers of tobacco, dealers in leaf tobacco, and peddlers of tobacco on commencement of business only and not on July 1 of each year, as required when special taxes on these clanses of persons are not in force.
2. Oleomargarine.-Attention is called to recommendations of previous years that the existing oleomargarine statutes be amended, and it is again urged that remedial legislation be enacted substituting a flat rate of tax upon the product and single rates of special taxes upon wholesale and retail dealers in lieu of the dual rates imposed by the present law, and that the statute provide for packing the product only in original packages of fixed sizes, each package to bear required tax-paid stamps, marks, and brands.
3. Adulteraied butter.-This law should be revised and a butter fat or definite moisture standard fixed by the statute, with adequate provision for the classification of the various kinds of butter coming within the operation of the statute.
4. Narcotic law.-Legislation to amend this law, the defects of which have heretofore been pointed out, is again urgently recommended in order that it might be properly enforced.
5. Personal income tax.-Amendments to the income-tax law:
(a) To require returns of annual gross income of \(\$ 3,000\). or over instead of annual net incomes of like amounts.
(b) To require that returns of income be filed in the district in which the person making the return or for whom the return is made has his legal residence.
(c) To provide authority to enable United States consular officers to make, under the direction of the commissioner, examinations and inquiries concerning the incomes of American citizens residing within their respective consular districts and compel attendance and testimony within the power of the United States similar to the provisions applicable to examinations and investigations provided to be made by internal-revenue agents.
(d). That the provisions of law requiring the withholding of the normal income tax at the source of the income be repealed, except as to the income of nonresident alien individuals and corporations received from sources in the United States, and that a provision for information at the source be provided.
* * * * * * * *

Respectfully,

> W. H. Osborn, Commissioner of Internal Revenue.

> Hon. William G. Mcadoo, Secretary of the Treasury.

Note.-For details of the Report of the Commissioner of Internal Revenue, see his annual report.```

[^0]:    ${ }^{1}$ The European war commenced shortly after the beginning of this fiscal year.

[^1]:    Resolved, That it is highly advantageous that a Pan American Financial Conference of the character of that held in Washington in 1915 meet every two years; that the next Pan American Financial Conference take place in 1917 in Washington, the exact date to be agreed upon subsequently among the various Governments on the initiative of the central executive council of the International High Commission; that the ministers of finance of all the countries of the American Continent be urged to attend in view of the fact that the financial questions there to be discussed constitute the most important problems of these conferences, and in view also of the fact that the presence of these ministers is conducive to the more effective carrying out of the resolutions adopted.

[^2]:    a The balance in the Treasury of $\$ 218,863,995.43$ includes $\$ 41,286,057.56$ disbursing officers' credits, after deducting outstanding checks, and is free of all current obligations, the entire amount being available for the future expenditures of the Government.

[^3]:    1 Excess of repayments.

[^4]:    ${ }^{1}$ Authorizẹd by act of May 30, 1908, as amended Dec. 23, 1913, and Aug. 4, 1914.
